MORRISBURG—ONTARIO

AN HONORABLE CITIZEN PASSES TO HIS REWARD

An honored and widely known citizen, ripe in years, experience and judgement, who spent the greater part of his active and useful life in the village of Morrisburg, in the person of Mr. William Eager, passed to his reward on Saturday evening, November 17th, after a short illness, in his eighty-sixth year. Though of an unassuming nature, he took a deep interest in every movement for the general welfare, and his exemplary life has made an indelible impression upon those who had the privilege of an intimate association with him. The community in which he was for forty years an outstanding personality, and which is profoundly conscious of a feeling of personal loss and sorrow, will long cherish the memory of a faithful, dignified and successful citizen.

Born at Heckston, Ont., on November 13th, 1843, he, after receiving an early education, became a cheese merchant. Moving to Morrisburg early in life, he kept apace with the material growth of his cheese business in an extensive way, and soon became the owner of twenty-nine cheese factories in Eastern Ontario. Despite his busy career in the cheese business, he found time to invest in local industries, and became managing director of the Morrisburg Tack Co., now known as "The Canada Tack and Nail Co." He also served the community as Police Magistrate, member of the Board of Education, and for a number of years was a warden of St. James church.

Mr. Eager is survived by one son, William Spencer Eager, B. A., of Montreal, and two daughters, Miss Ruth C. Eager of Edmonton, Alta., and Miss Isabel Eager of Ottawa; one grandson, William Eager Kilgour, of Beauharnois, Que.; two brothers, Messrs Daniel Eager of Ottawa, and Richard Eager of Heckston, Ont.; one sister, Mrs. Sanderson of Toronto.

In addition to a large number of friends from the surrounding district present at the funeral, which included Mr. Carkner of Metcalfe, with whom Mr. Eager has done business for forty years, and Mr. Keith Bowman, last and only cheese employee under his charge, at the time of his death. were the following members of his family and relatives: Miss Ruth C. Eager, Miss Isabel A. Eager, Mr. W. Spencer Eager, Miss Marjorie Sanderson of Toronto; Mr. and Mrs. Daniel Eager of Ottawa; Mr. Richard Eager, Heckston; Mr. and Mrs. A. G. Parish, Brockville; Mr. R. W. Kilgour and Miss Bessie Kilgour of Beauharnois.

The funeral took place from his late home to St. James Church on Tuesday at two p.m. The casket was covered with beautiful flowers, and the large assemblage was a fitting testimony to the love and esteem in which the departed was held in the community.

The pall-bearers were Messrs S. Finnie, W. Connolly, G. Challies; F. S. Broder, L. Southworth and W. Baker.

MRS. C. W. MERKLEY

The community of Grantley was deeply moved by the sudden passing of Mrs. C. W. Merkley, early Tuesday morning, Nov. 13th, after only a few days illness. She was born near Dunbar, May 29th, 1902, the youngest daughter of the late Mr. and Mrs. Frank Todd.

She is survived by her husband and three small children, Maxine, 6 years; Gordon, 4 years, and Dolores, 18 months, also by four sisters, Mrs. Robt. Kanoff, Massena; Mrs. Diane Ireland, Watertown; Mrs. Arthur Russell and Mrs. Chas. Russell, of Massena.

The funeral service was conducted in Grantley United Church by Rev. A. W. Stewart. Interment was made in Maple Ridge cemetery.

CHAS. REDMOND KNIGHT

After three or four weeks illness, suffering from sceptic sore throat, Charles Redmond Knight, Dunbar, passed from the community on the 11th inst. The deceased, while only 14 years of age, was a favorite with his companions, beloved by all who knew him, and his early death has caused much disappointment and sorrow to his devoted parents, who left nothing undone during his illness to bring about his ultimate recovery.

When it was discovered his condition was becoming alarming, the family physician felt hospital care was imperative. The boy was removed to Smiths Falls but despite the most skillful care he soon lapsed into coma and died a few days after his arrival.

Redmond is survived by his parents, one brother Albert, and one sister, Lillian.

The funeral was held at St. Marys church, Chesterville, on Wednesday, 14th inst., where requiem high mass was chanted by the Rev. Fr. Staley.

CHICKEN SUPPER

The annual Bazaar of the Ladies Aid of United Church, Colquhoun, will be held on Wednesday evening, Nov. 28, in the vacant house of Mr. John McNairn. Meats of all kinds, chicken, scalloped potatoes, salads, jellies, cakes and pies will be served. Admission 35c. ac

M. E. MULHERN DROWNED IN CORNWALL CANAL

In a most unfortunate accident in Cornwall Monday afternoon, Mr. Maurice E. Mulhern, Superintendent of the Cornwall Canal, to which position he was appointed about four years ago, lost his life. Mr. Mulhern had just returned to the canal garage with a truck which he was driving. On getting out of the car to open the doors he left the motor running. Seeing the car backing up in the old canal, he jumped on the running-board to shut off the motor but not in time to prevent the machine going into the canal with him. No one saw the actual occurrence, but some canal employees saw him swimming about and brought him out of the water. He expired almost immediately, death being attributed to heart trouble. The late Mr. Mulhern was 34 years of age, and practiced law in Cornwall for some time prior to receiving this appointment. He was educated at Harvard and Osgoode Hall, and after serving overseas took a postgraduate course in law at London, England. He leaves to mourn his loss his widow, formerly Miss May Boyd, daughter of Mr. and Mrs. W. V. Boyd, Cornwall; four small children; his father, A. F. Mulhern, and three sisters, Mrs. D. W. Knight, Misses Muriel and Alice Mulhern.

DUNDAS COUNTY TEMPERANCE RALLY

Attend the Temperance Rally of the Electors of the County of Dundas on WEDNESDAY, the Twenty-eighth day of November, 1928, in the Town Hall in the Village of Winchester.

Sessions: Afternoon at 2.30 p.m. and Evening at 7.30 p.m.

Purpose: Educational and Inspirational Addresses and Reorganization of County with reports from retiring Executive.

Speakers: Mr. JAMES HALES, K. C., of Toronto, former Chairman of Ontario License Board, and Dr. IRWIN of Toronto, General Secretary of Ontario Prohibition Federation.

Music—South Mountain Mixed Quartette, and Iroquois Male Quartette.

Every elector desirous of the downfall of King Alcohol is urged to attend both sessions. Special rate for tea at Hotel Winchester. Everybody, especially the ladies and young people, welcome.

W. J. CASS, Pres. M. W. BEACH, Sec.

ac

SUCCESSFUL DAIRY SHOW

The annual district dairy meeting for the county of Dundas, was held at Brinston Tuesday Nov. 20, under the auspices of the Provincial Dept. of Agriculture and the Dairymen's Association of Eastern Ontario. At 2.00 the afternoon meeting opened with the president, A. McGruer, in the chair. C. W. Norval, Williamsburg, an instructor, gave a full report of the 22 factories in his charge telling of the present conditions of these places which formerly were not beauty spots, of the better quality of the milk supply and consequently of the cheese produced. Mr. W. E. Bolton, Winchester, also an instructor with the same number of factories, gave a similar report.

A federal grader, Freeman Brown, Montreal, spoke of the excellent cheese coming into the warehouse from Dundas County, also of the increase in quantity, and gave a talk on the proper boxing of cheese. The retiring president asked G. H. Barr. Toronto, to take the chair while nominations were made for a new president. Samuel Thorpe moved and Ancel Locke seconded Mr. McGruer's re-election, which was unanimously carried. He resumed the chair and announced Mr. Barr as the next speaker, who gave a comprehensive address on dairying.

At 6.30 the ladies of the United Church gave a banquet in the school room with tables set for fifty. At 8 o'clock the hall was filled for the evening meeting, the address of welcome being given by Thos. Johnson, reeve of Matilda Township.

Prizes donated by A. C. Casselman, M. P., Geo. Smyth, M. L. A. and Mr. McGruer, of $10, went to W. J. Byers, Ormond, John Cobbie, Morewood, W. Campbell, Mountain. The silver cup donated by A. A. Sweet, ex-M. L. A., was won for the second time by W. F. Coleman, of Mountain, and now remains in his possession.

The silver cup donated by Mr. Norval was presented by him to A. Sharkey, Iroquois. The musical numbers were in charge of Mrs. Hugh Thompson, and consisted of piano, vocal and violin numbers, and a male quartette.

ARTICLES FOR SALE

About 400 new hard brick.

One 9x12 ft. English Axminster Rug.

One 7x9 ft. Woodstock Axminster Rug.

One 4 burner New Perfection Oil Stove.

Four kitchen chairs.

Two drop-leaf tables.

One kitchen stove (Quebec Heater with oven.)

These articles may be purchased at the residence, Gravel Road, until Nov. 30th.

Sunday School Lesson

November 25. Lesson VIII—The Prayers of Paul—Acts 20: 36-38; Eph. 1: 15, 16; 3: 14-21. Golden Text—Rejoice evermore; Pray without ceasing. In everything give thanks.—1 Thess. 5: 16-18.

ANALYSIS.

I. THE FAREWELL PRAYER OF EPHESUS, Acts 20: 36-38.

II. PAUL'S CEASELESS THANKSGIVING, Eph. 1: 15, 16.

III. PAUL'S SECOND PRAYER, Eph. 3: 14-21.

INTRODUCTION — Prayer ought to have the central place in the life of every true Christian. Jesus was our leader in this regard as in all others. He taught his disciples definitely on the principles of true prayer, gave them the great model, called the Lord's Prayer, and most of all set them an example of the value and effect of sincere communion with God. Paul follows his Lord here very closely, and we find that the same stress is laid upon this great subject in the Epistles as in the gospels.

I. THE FAREWELL PRAYER OF EPHESUS, Acts 20: 36-38.

V. 36. In time of deep emotion or of danger it was natural that these Christians should turn to God, and in this incident we have a fine example of the way in which Paul carries on the thoughts of his converts from the sorrows of the immediate parting to that great union with God, who is above all change and who can guard and keep all his children. There is nothing that can calm the sorrowful mind like a real attempt to enter into the presence of the loving Father. We are not given any part of the actual prayer, but in the letter to the Ephesians we have two whole passages from which we may gather some idea of the thoughts which must have filled Paul's mind at the time.

V. 37. These verses are sufficient to banish any suggestion that Paul was a stern, hard, cold man, indifferent to all the warmer emotions of the soul. His heart was very soft and tender. Prayer had done wonders in deepening his sympathy with all those who loved the Lord Jesus.

II. PAUL'S CEASELESS THANKSGIVING, Eph. 1: 15, 16.

Thanksgiving is one of the leading elements in true prayer. There are so many lovely, gracious, and good people and things in the world that we may always have cause for gratitude and joy. In Paul's heart there was a fountain of thanksgiving. In one letter he writes, "In all things give thanks." His generous nature is reflected in the way in which he always picked out the good qualities in his converts. There are several things which may be noted here: (1) Paul believed that in all true prayer, man was not dependent merely on his own will and effort, since God's spirit was always suggesting and inspiring and helping the worshipper. "The spirit bears witness with our spirits." (2) He was a firm believer in intercessory prayer. He must have had long lists of those whom he mentioned daily in his prayer. This duty must have made great inroads upon his time, but he reaped great results. Perhaps there are few ways in which some people can do more service than in sincere and constant petition for those whom they love, and whose welfare they desire.

III. PAUL'S SECOND PRAYER, Eph. 3: 14-21.

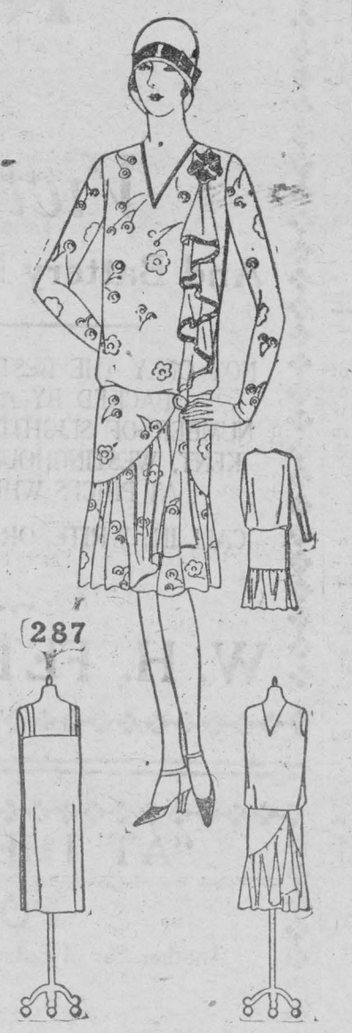

V. 14. This is the second of the prayers in Ephesians, and it is exceedingly rich in its teaching and the light thrown upon the nature of true worship. Paul knelt to the "Father." Everything is a religious turn upon the nature of the God who is worshipped. Those who worshipped a cruel Moloch thought it was necessary to make their children walk through the fire as an act pleasing to their God. Today the heathen think of a revengeful God whom they attempt to appease by acts of torture. But when the idea of God is pure, then prayer also is pure. Jesus first revealed this beautiful grace and love of God when he taught his followers to say, "Our Father which art in heaven." He thereby made true prayer possible. We know that God is our Father who is constantly contemplating the best things for all his children.

V. 15. These two prayers in Ephesus should be compared as one is the complement of the other. In 1: 17-23, Paul thinks of the magnificence of the hope which Christ brings and of the grandeur of the inheritance which is laid up for believers. No human eye can see it, so he prays that the eyes of their minds may be opened by the Spirit of God that they may see the full measure of the glory. But in the second prayer, he thinks not so much of light as of strength.

V. 18. This strength can only come as Christ dwells in us. But Jesus has promised to reveal himself to his followers, for he will abide with us for ever. Three things are here emphasized. (1) That it is only by the spirit that men may come to know the fulness of the glory in Christ. We do not rise by our own efforts. Strength has to be given to us from above and we can only obtain this strength as we live in unity and harmony with others who are worshipping the same Christ. It is along with the saints that we know truth. (3) This love of God can never be exhausted. We may see more of its great dimensions, its length, breadth, height, depth, but still it remains unknown in all its fulness. It surpasseth knowledge.

V. 20. Therefore all glory must be ascribed to him who came to give us this blessing. Paul's prayers are a great description of prayer to Jesus. They are, as is said in theological language, christological—Christ is the centre.

Styles by ANNETTE
Paris — New York

NEW FLARE.

A charming dress of printed sheer velvet that subscribes to new flared treatment in tiered effect, which gives a graceful ripple to hem. The flattering cascading jabot frill is caught at shoulder and waistline with ornamental buckle. To assure a perfect fit, after the bodice and skirt are joined, it is stitched to slip at waistline, which creates slight blousing and flat hipline. Bodice is also tacked to shoulder straps of slip, pattern for which is included. Style No. 287 lends itself beautifully to chiffon, georgette crepe, crepe Roma, crepe satin, crepe de chine, canton crepe and crepe Elizabeth. Pattern for this fascinating dress can be had in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Price 20c in stamps or coin (coin is preferred). Wrap coin carefully.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto. Patterns sent by return mail.

Those who seek the secret of Anglo-American understanding can find part of it in the ambassadorship of Shakespeare.

Advocates of simplified spelling would not indite indict, while proponents of simplified language indict indite.

Animal Stories Are Also News

Some Headlines of the Year Show That Man's Interest in Other Creatures Has Not Dimmed Since the Far-Off Pre-Historic Days.

By Warren Irvin in N.Y. Times

Here are a few headlines that indicate the extent to which animals figure in the day's news:

"Porcupine Ate Dynamite," "Rabbits Had Hand in America's Discovery," "Jazz Tunes Lure Deer to Parked Car," "Giraffes in Egyptian Art," "Lion Visits City Hall," "Flood Control Considered from Angleworm's Angle," "Japan Planning Big Bullfrog Crop."

Probably the oldest of all stories is the animal story, nor is this surprising when one considers that early man subsisted largely by hunting and fishing. The most primitive cuneiform systems contain animal figures, and centuries before the fables of Aesop were thought of Paleolithic men were scratching animal forms upon rocks. The rock pictures of the Australians, the house carvings of the Eskimos and the drawings of the Bushmen are alike remarkable for their faithful representation of animals.

Notwithstanding its antiquity, however, the animal story has lost none of is fascination. Newspapers devote thousands of columns to it annually. No longer is it confined to tales of faithful dogs warning families of fire, cats causing asphyxiation by carelessly walking across gas stoves, or runaway monkeys drawing crowds in pursuit through busy city streets.

Interest Does Not Flag

Turn back over last year's files and note the variety of animal news that has been printed. Headlines speak for themselves. Here, between two small items telling respectively of the loss of Texas Guinan's pet terrapin and the gift of a kangaroo to President Coolidge, one finds the caption, "African White Rhinoceros Rapidly Nearing Extinction."

Or, among a cluster of small stories headed variously: "Deer Eat $35 Worth of Pansies," "Train Interrupts Doe's Sleep on Tracks Near Middletown," "Canoe-Upsetting Hippopotami Sentenced to Death in Uganda," "Film Lion to Cross Country in Airplane," or "Frogs Enlighten Savants, Then Tickle Their Palates"—among all these stories is an account of how in the Province of Khorassan, one of the remote districts of Persia, camels and other beasts of burden are taxed to provide for the upkeep of the municipal hospital.

There are stirring accounts of duels to the death between buffalo bulls; or fierce fights between lions and tigers, or between tigers and crocodiles. There are tales of savage jungle beasts which, once having tasted of human flesh, will have no other. There are stories of wolves driven by hunger to invade towns or villages, or stories of wolves adopting human children and caring for them.

There are scientific studies of animal behavior, or accounts of strange animal customs like that of the female scorpion, which devours its own mate and sometimes its offspring. There are touching stories of animal gratitude like that of the London lioness whose cubs were sick, and who attacked her mate when he sprang upon a keeper who was tending them. And there are endless comic anecdotes like that of the scolding circus stork who set upon fourteen lions in the circus and sent them scurrying to shelter in their cages.

"Travel Law Saves Wolves" tells how two Portuguese who discovered wolves attacking their cattle chased them to the Spainish border, where they were compelled to abandon pursuit for want of Spanish passport visas. "Lion in Flatbush Proves a Raccoon" recounts the struggles of Gaetano Marascio, a laborer, with a full grown raccoon four stories above the street on the scaffolding on a partly completed apartment house. The raccoon went to the police station and Marascio to the hospital.

Cat stories alone would fill volumes. Look at the headlines! "Cats of Rome Lose Their Forum," "Cat Passes Hours Vainly Snatching at Mail Chute," "Prison Cat Sacrifices Life for Baby Rabbit," or "Jail Delivery Scare in Bronx Caused by Cats on Fire-Escape." The tales range from the account of the cat who held up traffic in Lafayette Street hile, with her kitten in her mouth, she strolled nonchalantly from one side to the other, or that of a frightened Maltese treed by a dog and rescued by the fire department after three days' isolation, to the story of the Locarno cat whose claim to fame is that he shared a room with Herr Luther and M. Briand when they held their memorable conference.

But there are stories about an endless variety of animals. Word comes from Berlin that the only orangeuton known to have been born in captivity died because his mother did not know how to take care of him. Apparently regarding him as some new kind of toy, she bounced him on the floor and in an excess of affection squeezed him to death.

"Why not?" scientists ask. "No mother," they say, "would know better unless taught. Mother love has nothing to do with the instincts but is due to training."

"What accounts for the zebra's queer stripes?" is the question raised by another article. In other animals the deposition of pigment is sometimes determined by the course of blood vessels, by the course of nerves or by the direction of the bony tract; but scientists insist that the zebra's stripes have no relation either to the ribs or to the course of nerves or blood vessels.

"Bullfrogs and White Rats," says one headline, "Are in Constant Demand. Biologists Use Them to Work Out Problems Connected With Human Progress." "Annie the Anteater —Loses Caste," says another, describing how the mascot of the flagship Seattle turned out to be neither anteater nor feminine, and subsequently became Andy the coatimondi.

From Calcutta comes the news that Americans are the greatest collectors of wild animals. Before the World War European zoos used to be the chief purchasers.

Kansas City contributed an amusing anecdote of the recapture of 150 wild steers that had escaped from a wrecked cattle car in the heart of the town. People returning home from the theatre, patrolmen, street car company employes, motorists and citizens generally took part in the round-up.

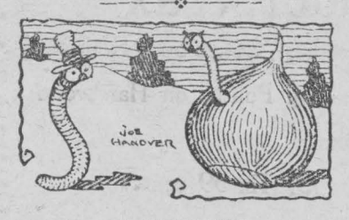

A porcupine full of dynamite gave a Pennsylvania forest ranger in Tioga County an unpleasant time recently, says another animal story. The ranger returned to his tower sixty feet above ground to find the porcupine there eating an explosive stick. The ranger beat a hasty retreat, but to his consternation the animal followed him. He feared it might fall and blow up. He dared not shoot it. But when the porcupine had disappeared into the woods the ranger again mounted the tower and telephoned for advice. He was told the dynamite was poisonous.

The Eastland (Texas) Toad

Eastland, Texas, reports that a horned toad sealed in the corner-stone of the court house there thirty-one years ago was found alive recently when the stone was removed. It is a Texas tradition that a horned toad can live a century without food or water. According to County Judge Edward S. Pritchard, when the toad was disentombed it at first appeared lifeless, but after a little while opened its eyes and showed signs of breathing. The mouth, however, appeared to have grown together.

Here is still another contribution, this one from London. In the discussion of the text of the Rabbits bill, by which the British Parliament hopes to stimulate and regulate rabbit farming . Professor E. H. L. Schwartz disclosed that except for these "destructive rodents" Christopher Columbus might not have discovered America. Columbus, he pointed out, married Felipa Munnis, daughter of Perestrello, one of Prince Henry's captains, and part of her dowry was the Island of Porto Santo. The young people established themselves there, but their plantations were destroyed by rabbits and they were ruined and had to come away.

And so the stories go. "What Do Animals Think About? Intelligence Tests Give Dogs Equal Rating With Some Human Children—Also Proving That Birds, Fish and Insects Are Not Mormons in Their Species"; "Shells of the Armadillo Make Basket Industry"; "Beaver Culture Advocated to Add to Supply of Fur"; "Best Weather Prophet is Turtle, Says Tennessee Woman." They are of all kinds and all sorts, and they come from every section of the globe.

A WARNING

Angle Worm: You'd better move out of that house, Mr. Chestnut Worm, you're liable to get roasted!

Bulbs For Winter

Hyacinths

Soft, delicate colorings; enchanting fragrance; sexture of wax, hundreds of wee bells building plump pink, rose, lavender, white, blush, porcelain-blue, yellow and red spikes among slender green blades—the whole redolent of fresh sweet springtime. Such is the glory that pots of hyacinths bring to winter's window ledge.

Get the best quality, large, smooth skinned, firm bulbs for pot culture. Plan ahead at least four months, five is better, before the blossoms are wanted. Mix up a light rich compost, of pure sand, loam, leaf mould and well decayed cow manure, in equal portions. Let this stand three or four weeks before using.

Plant in half-pots, preferably old ones, that have been soaked in water several hours to remove any deleterious matter. Cover the hole in the bottom of the pot with a small piece of broken pottery and build up over this a little mound of fine gravel or moss. There must be free drainage and this will keep the soil from clogging the outlet. Fill the pot one-third full of the compost and press it down slightly; do not pack, as the air must not be excluded. The tops of the bulbs should be left level with the surface of the soil, which should be moderately boist; set the bulbs in, about an inch apart, and fill in with more soil, working and pressing it in around the bulbs with the fingers until the tops are barely covered. The soil should be at least a half-inch below the rim of the pot.

Special Points

Water thoroughly and turn the pot on its side, so that any surplus water will run off, and set on a bed of ashes, moss, sand or sawdust placed on the floor in a cool, dark, airy location, such as a well-ventilated cellar without heat. Cover with coconut fibre to a depth of about five inches, and leave to root for three or four months. Successful cultivation depends almost completely on this point. Occasionally supply with liquid manure when growing to keep the foliage dwarf and to assist the perfect coloring of the flowers.

Instead of planting in compost, fibre can be used. In this case, fill the pots with the fibre and press it lightly around each bulb, water a little and set away to root. Thereafter keep the fibre uniformly damp, and, since the plantings must have air, never place them in a closet but in a well-ventilated place.

At the end of about four months remove to a warm, well-lighted window to force.

In Glasses of Water

Growing hyacinths in glasses of water is a simpler and probably more interesting method than growing them in pots of soil. Each new development of root, foliage and flower can be observed continually and regulated as desired.

Hyacinth forcing glasses provide ample space for spreading root growth and, at the same time, the bulb is held at such a height that it does not come in direct contact with the water, the water being filled in so as almost to touch the base of the bulbs. A few pieces of charcoal should be put in the glass, as this is of service in keeping the water pure and affords some nourishment. The next simple proceeding is to place the glasses in any dark room, cellar or cupboard for about four weeks, or until the roots nearly touch the bottom of the glass. As the water evaporates, replenish it. When sufficient root growth has been attained the glasses may be brought gradually to the full light, where they are wanted to bloom.

Perfect poise, we would say, is not looking self-conscious in a rumble seat.—American Lumberman.

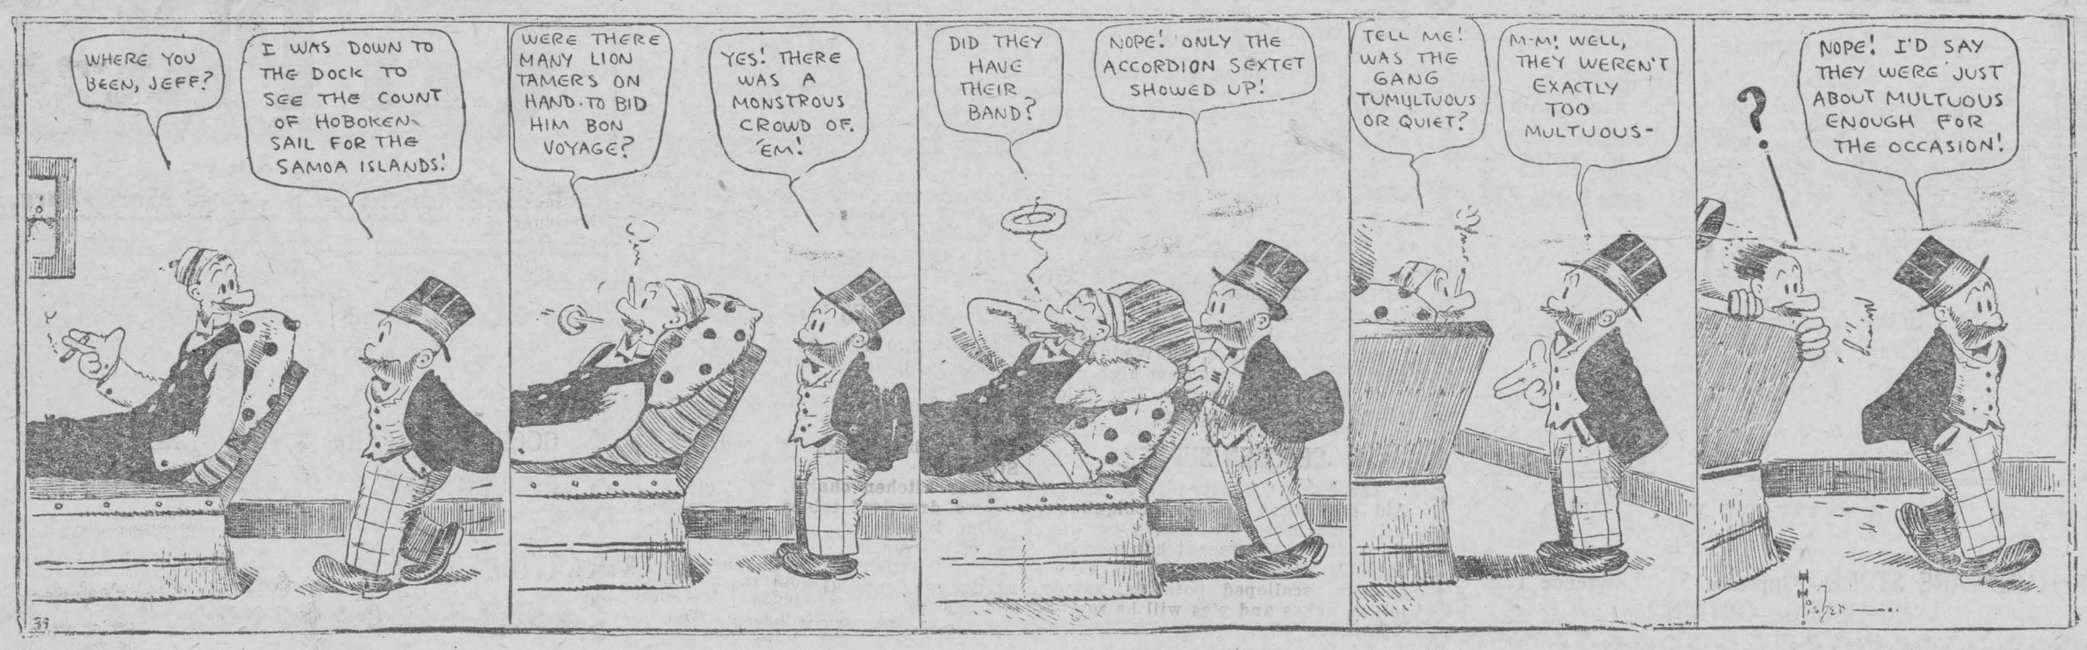

It is gathered from the many articles printed that the secret of health is still a secret.—Wall Street Journal.

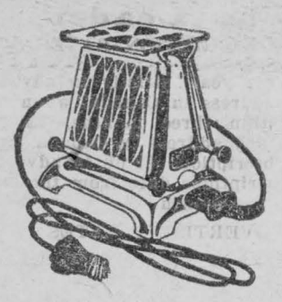

Holiday Maker: "Yes, I'm off for my holidays. Can you tell me of a decent book to take away with me?" Returned Reveller: "You'll find a cheque book most useful."

"I see Madge is going in for aviation." "Madge who?" "Madge Bahr. You know, that girl who wears such skinny clothes." "Oh. Well, she ought to make a good aviatrix; she's had lots of practice in taking off."

MUTT AND JEFF.—Bud Fisher.

FINANCIAL NEWS

GAIN BY C.P.R. AND C.N.R.

Inceases aggregating $11,188,021 are shown in traffic earnings of the two principal Canadian railroads for the month of October, compared with October, 1927. C.P.R. earnings increased $5,821,000, and Canadian National earnings increased $5,367,021 during the month. Details follow:

Canadian Pacific.

October	Increase
First week	$1,327,000
Second week	1,426,000
Third week	1,396,000
Ten days	1,672,000
Total	$5,821,000

Canadian National.

October	Increase
First week	$1,268,239
Second week	1,244,315
Third week	1,374,189
Ten days	1,480,278
Ten days	$5,367,021

For the ten days ending October 31, C.P.R. traffic earnings were $8,864,000—an increase, compared with the same period last year of $1,672,000, or 23.2 per cent.

MINING BRIEFS.

Favorable results are being secured in development at the Murphy Mines' property in eastern Kirkland Lake, according to officials of the company. A diamond drill hole being put down about 250 feet east of the new shaft has encountered ore of good grade and has been in it for two or three days up to the time of writing. This is thought to be a new vein or probably the extension of the Ritchie vein. Width is unknown as the dip of the ein is not known as yet and the drill was set at an angle of about 60 degrees. Work has gone ahead at a very rapid rate on the property and the new shaft is now down to the 100-foot horizon and a level has been established at that depth. Some lateral work has been carried out here and this has been successful in opening up 40 feet of ore to date. The main shaft has been put down to the 600-foot level. Officials state that recent work at the property has indicated about $4,000,000 of ore in one vein alone. This is the showing upon which the new shaft was sunk. In addition to this ore there are three other proven breaks on the property as well as the break which the drill is now in. Murphy is capitalized at 4,000,000 shares, 3,800,000 of which are issued with vendors stock, amounting to 1,000,000 shares, being pooled until November, 1929.

Keeley is reported to have made a new find on the surface of their property at South Lorrain. The discovery is said to be a two-inch-wide vein of high grade silver. Values were not mentioned. It is further stated that a crosscut has been started underground to cut the downward extension of this showing.

Work on the new find at the Capital Rouyn is said to have opened up considerable high grade, showing considerable heavy leaf gold. The ore occurs in a strong break and appears to be a southwesterly extension of a quartz vein discovered early this summer. Work during the summer included the sinking of six diamond drill holes, totalling 2,000 feet, three of which were put down on a copper showing a little east and north of the present find. Results of the drilling were negligible and in his recent report Engineer Carl M. Mohr states that these indifferent results were the outcome of not having done sufficient sudface work to direct the course of the drills. Mr. Mohr predicts that when additional data is obtained the results will be of different character.

Fifty feet of drifting on the 200-foot level of the Bathurst Mines is now said to have opened up an important shoot of ore. High assays have been obtained during this work.

It May Be *Urgent*

When *your* Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant or babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

Fletcher's CASTORIA

Then and Now

London Daily Telegraph (Cons.): From what travesty of the past did Mr. Smith learn the illusion that its life was more refined and more moral than ours? He dreams of a Victorian golden age. He should read some of the Victorian diaries, he should turn up some of its newspapers. And let him remember—it is a warning to all censors of morals—that the prim Victorians themselves were perpetually being shocked by the authors who are to our decadent time the models of classic virtue. Thackeray, Charlotte Bronte, George Eliot, all in their day were under the ban. Meredith made the critics blush, and Hardy was condemned by dons. Miss Rhoda Broughton used to relate that when she began writing people passed her by on the other side, and in her old age she had become and author for girls' schools. Such and so enduring are the fashions in censorship.

TONIC TREATMENT FOR INDIGESTION

Indigestion Comes With a Run-Down Condition — Relief Comes Through Enriching the Blood — Dr. Williams' Pink Pills Make New Blood.

There are many symptoms of indigestion such as acute pain after eating, belching of wind, nausea and vomiting, bloating and pains in the region of the heart, a dread of food for the misery it causes. Dieting and the use of pre-digested foods may give ease, but that is all, and meanwhile the stomach grows steadily weaker. The work of digestion depends upon the blood and nerves and the only way to get rid of indigestion is to tone up the stomach through the blood, to do the work nature intended it should do. The one thorough way to do this is through the use of Dr. Williams' Pink Pills, which renew the blood, strengthen the nerves and enable the stomach to do its work with ease and comfort. Neglected indigestion means prolonged misery. If you have any of the symptoms of this trouble try the tonic treatment with Dr. Williams' Pink Pills at once and you will be gratified with the results.

Among the many who have found new health through the use of Dr. Williams' Pink Pills is Mrs. Ada Webb, R.R. No. 3, Prescott, Ont., who says:—"For a long time I went through the tortures of nervous indigestion; I call it torture because no other word can describe what I endured. If my stomach was empty I retched. If I took food I vomited. I did not sleep, and I was steadily growing weaker. I doctored for months but with no benefit. One day my husband said, as the treatment you have had has not helped you, why not try Dr. Williams' Pink Pills. I consented and he got me a supply. After I had been taking the pills for a while I knew they were helping me as the pains and retching grew less and I slept better. I gladly continued the use of the pills and in a few months I felt like a new woman, better than I had felt for years, and able to work for my husband and children again. After such a wonderful experience how can I do anything else but recommend Dr. Williams' Pink Pills?"

If you need a blood-building tonic begin taking Dr. Williams' Pink Pills to-day. Sold by all medicine dealers or sent by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Suffragist—"I maintain that woman has always been the prime factor in this world." Heckler—"Oh, I don't know. In the very beginning, according to the Bible, woman was only a side issue."

June: "Last night I heard a noise and got up, and there, under the bed, I saw a man's leg." Mollie: "Good heavens! A burglar's?" June: "No, my husband's. He had heard a noise, too."

Red Rose Orange Pekoe comes as near to perfection as any tea can. Everything that tea experts can do to make Red Rose Orange Pekoe superior in quality, flavor and value is done in the great Red Rose blending rooms. Try it to-day. Put up in the bright, clean aluminum packages. 2-E

ISSUE No. 46—'28

In Fine Raiment

Glasgow Herald (Cons.): (The brighter boots and shoes being offered to London men are not meeting with deserved appreciation.) The plumage of the Georgian is drab compared with that of the Victorian in his gayer moments. Although it is generally agreed that Disraeli and Dickens overloaded their color schemes, their well-meant errors of taste were at least tolerated; but similar exhibitions of sartorial exuberance to-day would drive the pioneers from the streets. Yet if it were ordained by Act of Parliament that all men appear in public wearing plum-colored knee-breeches and green stockings we should probably obey with little more fuss than we make over the paying of income-tax.

CHILDHOOD AILMENTS

Can be Quickly Banished With Baby's Own Tablets.

The ailments of childhood are many but nine-tenths of them are due to one cause and one cause only—a disordered condition of the stomach and bowels. To quickly banish any of the minor ailments of babyhood and childhood the bowels must be made to work regular and the stomach must be sweetened.

No other medicine for little ones has had such success as has Baby's Own Tablets. They banish constipation and indigestion; break up colds and simple fevers; correct diarrhoea and colic and promote healthful sleep by regulating the functions of the stomach and bowels. Concerning them Mrs. L. M. Brown, Walton, N.S., writes:—"I cannot speak too highly of Baby's Own Tablets as I have found them excellent for childhood ailments."

Baby's Own Tablets are sold by medicine dealers, or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, On.t

Hopes to Extract Food From Wood

German Professor Has Produced a Digestible Carbohydrate For Cattle and Hogs

Berlin.—Professor Bergius, known as the successful liquefier of coal and maker synthetic benzine, claims another discovery from which it appear sthe German Press also expects wonders. In an address to the annual conference of the Association of German Chemists, which is taking place at Dresden, he announced that, in the course of experiments to transform wood artificially into coal, he had proruced a digestible carbohydrate.

Readers of Maeterlinck's remarkable little book on Ants will remember that the Belgian poet puts it forward as one of the chief achievements of those wonderful insects that they alone among animate creatures know how to extract nutriment from ,cellulose, the chief constituent of wood, and so are able to devour either forests or furniture—whichever happens to lie handy.

Professor Bergius now proposes to do for man what the ants do for themselves. We are nt, however, directly to substitute faggots for cutlets and logs for sirloins. The woods of Germany are to be transformed into fodder, which will take the place of hundred and fifty or two hundred million dollars worth of barley and maize at present imported annually as food for cattle and pigs.

It is not, of course, pretended that the transition from laboratory success of factory prduction will be immediate.

Savings on Balloon Tires Total in the Millions

Washington.—Because balloon tires last longer than high pressure tires and because the Stevenson rubber restriction plan in Malaya and Ceylon was thwarted by the independent efforts of natives in the Dutch Inides, the motorist pays $10 for his caring to-day as against $11.20 on an average in 1925. Reckoned in terms of the 63,550,000 tires sold in the United States last year—a new high output—the benefit passed on to the consumer reaches millions.

Incidentally, the revolution in the rubber industry has sent explorers to the far ends of the world seeking rubber substitutes, has set Thomas Edison to work extracting rubber from milk weeds, and even turned the attention of natural scientists to 2,000 acres of black, vicious, molasses-like bitumen, beneath the waters of the Great Salt Lake in Utah, as a possible source of "synthetic" rubber. The story is told in statements released by the Department of Commerce.

Substitutes for true rubber are not likely to make great headway with the present price, it is felt, but they will be held in reserve should th eprice again mount.

The Italian press is the freest in the world.—Benito Mussolini.

An English naval authority, who wants to install soda fountains on battleships, says that sailors do not fight better on rum. "But think of having to sing, 'Yo, ho, ho, and a dish of ice-cream," comments Punch.

MEDICINE FOR YOUNG GIRLS

Mothers Endorse Lydia E. Pinkham's Vegetable Compound

Sydney, N. S.—"My seventeen year old daughter took Lydia E. Pinkham's Vegetable Compound for weakness and pains. She could not go about much with the other girls as she was not strong enough. We got six bottles and it did her a great turn. Sheis working out now in a store and walks three miles every morning and back in the evening."—MRS. MARY VANCE, 44 Lingan Road, Sydney, N. S.

Pinewood, Ont.—"I constantly had pains in my back and side and spent two days in bed every month. I have taken three boxes of Lydia E. Pinkham's Vegetable Compound Tablets. They have done me good and I always have them in the house. I have recommended your good medicine to several friends and have given it to my 17 year-old girl."—MRS. ALFRED OUELETTE, Pinewood, Ontario.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

"used Monarch 12 Years with splendid results"
Says Mr Tooke of
Manor Farm

The Maple Leaf Milling Co.,
Toronto, Ont.

Gentlemen:

We have been using Monarch Feeds for over twelve years, at Manor Farm, and at this time it is being fed to over Fifteen Hundred Layers, and Three Thousand Pullets, with splendid results.

We believe that Monarch Scratch and Laying Mash are the best on the market. One can safely order twelve months ahead, and be sure of getting the same uniform Mix all through.

We would also like to say a word in regard to the Chick Mash. This season we have had wonderful results; the Chicks grew and feathered very fast, with very few losses. Also your Growing Mash: in 1927 we fed this Mash to all our growing stock, and the same this season, which speaks for itself.

As a rule we do not like to recommend Poultry Feeds to anyone on account of the variation of so many of them, but it is always a pleasure to say a good word for the Monarch Brands.

Yours truly,
(Signed) E. H. TOOKE

ARCHER

Mr. and Mrs. Earle Droppo and children Reta and Alden of Nudell Bush were Sunday guests of Mr. and Mrs. Roy Cunningham.

Mr. and Mrs. Thomas Russell and daughter Violet and Audrey spent Sunday with Mrs. Russell's parents, Mr. and Mrs. Wm. Barkley of Spruce Grove.

Mr. and Mrs. Frank Shaw and Messrs. A. W. Weagant and Darwin Weegar spent Sunday with Mr. and Mrs. George Weagant.

Mr. Dwight Weegar who has spent the past few months in Maple Creek, Sask., returned home on Tuesday.

Several from here attended the Euchre and Box Social and Dance in the I.O.O.F. Hall, Aultsville, on Wednesday evening last. All report a fine time.

Mr. Allan Bush of Smith Falls and daughter, Mrs. George Casselman of Nudell Bush visited Mr. and Mrs. Roy Cunningham and Mr. and Mrs. Reuben Gallinger. on Wednesday.

Mrs. Frank Moriorty and children of Grantley are spending a few days with her parents, Mr. and Mrs. Thomas Manion.

Mr. Dwight Weegar is spending a few days in Montreal this week.

Mr .Garnet Dennison is spending some time at Mr. Reuben Gallingers of Gallingertown.

PAYNE VALLEY

Miss Mae McMillan of Montreal spent Thanksgiving at her home here.

Mr. and Mrs. George Eligh spent Monday with friends at Cornwall.

Mr. Donald McMillan of Montreal spent the week end at his home, Mr. Neil McMillan.

Mr. and Mrs. Norman Eligh of North Valley spent Saturday with Mr. and Mrs. Clifford Eligh.

Miss Helen Richards of Avonmore spent Thanksgiving with her friend, Miss Mabel Campbell.

Mr. and Mrs. Jim McIntosh of Martintown spent Sunday at Mr. Allan McMillan's.

Mr. and Mrs. Dan Campbell and family and Mr. Charlie Campbell spent Saturday in Cornwall.

Mr. and Mrs. George Tinkess of Avonmore spent Sunday with their daughter, Mrs. J. D. Shaver.

Mr. and Mrs. Ernie Rombough and son Orlin of Newington spent Sunday with Mr. and Mrs. Will Meldrum.

Mr. Bernice Ouderkirk was calling at Mr. George Eligh's on Monday.

Mr. and Mrs. Will Meldrum and daughter Georgena and Miss Muriel Mattice spent one day last week at Cornwall.

A First Aider to the Rescue

"I was going to work on my motorcycle," explained the victim of a serious accident as he lay on a snowy hospital cot, "when an auto came out of an alley, threw me to the pavement, tearing my boot off and severing an artery. Fortunately a Bell Telephone man was passing. He stopped the bleeding, made a tourniquet and had me in a fine shape when the ambulance arrived."

Instruction classes in all ranks of telephone employees have turned out an army of skilled First Aiders who are continually happening along when some victim of serious mishap is in dire need of assistance. Knowing what to do and just how to do it has saved many lives. Seventy per cent of all Bell Plant workers are qualified First Aiders.

could do to meet such warriors as these.

No, the entire gang would go down full of lead unless they were forewarned. And, since some of them were sure to be wounded and not killed outright, before they died they were certain to give the name of the cashier who had first promised to betray the bank and had then betrayed his tools.

And this would as effectually ruin the reputation of Sam Carney as if he himself had been caught in an act of theft. Such were the reflections which filled his mind as he made his way toward the Tompson shack. And they so excited him that he began to push the horse forward relentlessly. But when he reached the shack, there was no sign of any one near it.

He lighted matched, and by their light he examined the ground around the shack. All the hoofmarks were old which had traveled that trail which had once been a comfortable wagon road. No party of hard riders had gone by that way this night.

He sat down at the door of the old cabin and began his vigil.

But he must not be found by any chance wanderer sitting in front of this deserted cabin. It would make a strange tory to be told in the town the next day. And Carney was in no

He saw that it was three o'clock.

situation to have stories about clandestine meetings pread abroad.

He changed his place. There was a cluster of saplings, growing thick, about fifty yards from the house. It was on rising ground, and in the starlight he could sweep all the approaches to the cabin with his eyes. To these saplings he removed himself, tethered the horse in the midst of the trees, and began to wait.

He consulted his watch. It was still early in the night, and the robbers were not apt to reach the cabin before two in the morning, at the earliest.

It was a pleasant place and a pleasant night. This evening the air was soft, the stars were bright, and the song of a far off coyote gave a weird and thrillingly romantic touch to the moment. The mountains, too, now that he was so close to their feet, were more imposing than ever, but there was a more beautiful majesty about them. He decided that he must unmake his mind about many things, and, just as he had discovered a new point of view about Oscar Fern, he must look again upon all of his old preconceptions.

And so, with these mild thoughts, he was lulled fast asleep! He wakened again, with his heart pounding, and wild sense of alarm in his brain.

He whipped out his watch. The first match broke in his trembling fingers. But the second gave a light by which he saw that it was three o'clock. He stood up still and straight, with a stifled cry. He had slept at his post and they had gone by him.

"God help me—and them!" moaned Carney, and ran out into the trail.

There, on his knees, he lighted more matches. And instantly he saw the hoofprints. It looked to his inexperienced eyes as if twice ten horses had passed. He turned down the road. The moon haze closed together not so far away.

He raced back to the waiting horse, loosed the rope flung himself into the saddle, and spurred with might and main for the town. He had an hour—if they did not begin their work until four. A whole hour. And that was enough to reach the town if the horse held out.

(To be continued.)

After Every Meal

BEGIN HERE TODAY

Finding the lifeless bodies of his two partners at their gold mining camp, Harry Gloster flees southward, knowing that he will be accused of the crime. On the way Gloster is jailed after getting into a fight with several men over a girl.

Joan Barry, daughter of a famous rider of the old plains, helps Gloster to escape. Later Joan, in quest of Gloster, falls in with a bandit gang in the mountains. Joe Macarthur, a quick-on-the-trigger scoundrel, is made chieftain of the gang when he appears with a scheme to rob the Wickson Bank. Samuel Carney, cashier, has given Macarthur the combination to the safe, but later repents and tells the president of the bank what he has done. Gloster goes with Buck Daniels, Joan's guardian, to the bandit camp to find the girl. She will not leave, so Gloster joins the band,too, to be near her.

NOW GO ON WITH THE STORY

She went out to the defile and looked north in the direction she must journey. But yonder the noise of seen horsemen was going down the mountainside, and all of her heart turned strongly after them. What was coming to Harry Gloster on this night of nights?

She drew a great breath. The North Star was as bright as ever, but for Joan, it had lost some of its power. If she could not prevent or help, at least, she could be a witness. And if they flew again, she might help them flee!

She turned the head of the Captain to follow, but as she did an eighth horseman started out of the woods just beneath her and began to wind slowly along the hillside. Was this some man of the law, trailing the band? She stared until her eyes ached, but she could make out nothing more than his shadowy outline. He disappeared into the trees, and she followed.

From a hill-top, she marked out the course which they must be taking. They were crossing the summit, and dipping down on the farther side, heading almost due west. She took a different course, so that she might not be heard following them, and she sent the Captain in a wide detour to cut in ahead of them.

They came to the ravine which she had selected as being the one through which the riders must pass. And, ten minutes after the Captain had brought her there, she saw them pass.

They rode in single file on account of the broken nature of the ground

Minard's Liniment for Asthma.

with Macarthur, as his duty was, leading the way and making the trail. Behind him came the six, and last of all was the bulky form of Harry Gloster.

They passed on, but still she did not ride out. For there was yet another man to be watched, and this was the one she had seen on the mountainside following the others. A full ten minutes she waited, and then he came, jogging his cow-pony steadily along, a man who wore his hat in a strangely familiar way, canted to one side. He passed, and his horse stumbled.

"Steady, boy!" muttered the rider, and rode on.

But he left Joan stunned behind him, for she had heard and recognized the voice of Buck Daniels.

CHAPTER XXXII.

A FATAL MISCHANCE.

Samuel Carney was enough of a Christian to believe in the efficacy of forgiveness of sins, but if he had had any doubt it would have been removed on this day. Even a sense of shame had left him. He was filled with a mild peace and feeling of purification.

But the vision which occupied his mind, in place of the unseen visage of the Almighty Father, the fat and rosy face of Oscar Fern. The devotion which he felt for the good natured banker and millionaire was a cross between the devotion of a soldier for his captain and of a son for his father.

It was a strangely humbled Samuel Carney, therefore, who prepared for the work which lay ahead of him that night. It was not pleasant work. It meant that he must ride after dark out of the valley and into the foothills to the deserted shack of the old Tompson ranch.

And Sam Carney was not at all fond of riding He spent his days at his desk, his evening at his newspaper and his books, and the nights puzzling over business problems and fighting for sleep. A spin through the fresh open air was an unknown novelty to him. But it was necessary this evening.

Men were coming down from the mountains into a death trap which, they had been assured by his own lips, would not exist. He must warn them off. Therefore, he saddled his horse and rode away as soon as the darkness fell.

He had in his pockets five hundred dollars in cold cash. That might help to soothe the wounded feelings of Joe Macarthur and pay him for the wasted ride of the night. If it would not do, he could not help it.

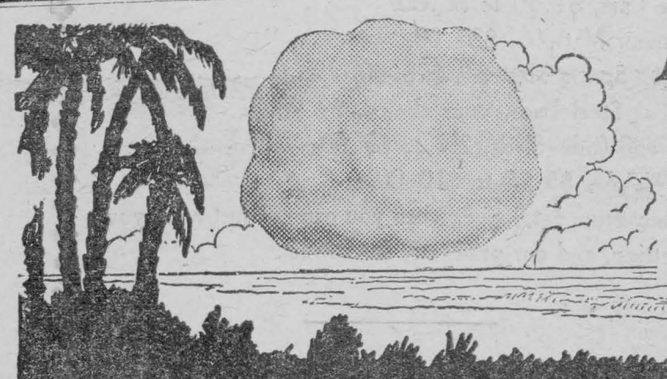

One fierce ten minutes of conversation, and then the affair would be off his shoulders forever, and he could go on to face the prospect of a happy and peaceful life to the end of his days, music for his daughter, health for his wife, and the undying love and faith of his employer!

It was a two-hour ride to the Tompson place. He would reach it long before the outlaws arrived. But, no matter for that, he must be there in plenty of time. Otherwise there was a chance that the gang might get by him and go on to the trap.

He shuddered as he thought of the precautions of Oscar Fern. Twenty men had been employed. They were not casually picked up about the town, but here and there through the valley Fern had sent his couriers. They had gone to call on old ranchers who had been in the Wickson Valley in the days when the cow business was the only business—men who had lived with saddle and gun and who had forgotten the use of neither.

He heard Fern tell each man that a "tip" had come to him from a source which could not be revealed that the bank was to be robbed that night, and he wanted a strong reception committee in waiting in case that attempt were made. Therefore he had picked out the best men in the valley to fight the fight. For one thing, they would confer a great obligation on him; again, they were upholding the law; and yet again, they should all be liberally paid for the night's work—or waiting—if they would accept his money.

Money, however, was not what they wanted. Carney say their eyes light at the prospect of battle, and grim a fighter as Joe Macarthur was, he knew that there would be more than he

Our Commercial Vegetable Output

Canning for Domestic Use and Export Makes Progress, But Imports Still Are Gaining

Government figures would indicate that interest in the commercial production of vegetables in Canada is increasing, according to the Canadian Pacific Railway. The tomato acreage in British Columbia this year is placed at 2,550 acres in 1927; in Eastern Ontario, at 3,200 acres, as compared with 3,280 acres, or approximately the same as in the previous year, while the acreage reported in Quebec is 2,000 acres. Onion acreage, on the other hand, has declined somewhat, due doubtless to a falling away of the New Zealand market last year, says a bulletin on the subject. Acreage devoted to this crop in British Columbia is 1,035 acres, as compared with 1,233 acres, and in Ontario 1,568 acres, compared with 1,580 acres. The Canadian potato acreage indicates at 2 per cent. increase over 1927, with 581,300 acres, as against 572,373 acres, all provinces reporting slight increases with the exception of Saskatchewan and British Columbia.

"Though vegetable growing is engaged in extensively throughout Canada," the bulletin continues, "commercial production has come to centre in certain specially favored areas where canning industries have developed. Ontario and British Columbia find their tomato and onion producing industries profitable, and though potato growing is followed on a voluminous scale in every province for local markets, commercial production for export is largely confined to the Maritime Provinces and British Columbia, which have won high reputations for their products. The present year also sees the ambitious entry of the Prairie Provinces into commercial vegetable production, canneries having been established at Edmonton and Medicine Hat in Alberta, supported by producing acreages about them, and the first tomatoes, beans and other vegetables are being processed there this Fall.

"While the graeter part of Canadian vegetable production is either consumed fresh or canned locally, there is a substantial export trade carried o nin fresh vegetables. Potatoes, of course, constitute the most important item, the Maritime Provinces product being widely and favorably known and British Columbia steadily extending its reputation in the same regard. In the last fiscal year Canada exported 7,744,960 bushels of potatoes, worth $7,338,906, as compared with 88,319,080 bushels, worth $9,717,425, in the previous year. The United States is the big market for this product, taking nearly 65 per cent. of the total, followed by Cuba, also a long-established market, where nearly 30 per cent. of the exports go. Other important potato markets are Newfoundland, Jamaica, British Guiana and Bermuda.

"Of late years the Dominion has developed a profitable market for her onions, principally with New Zealand and the United States. Last year she shipped 42,830 bushels, worth $50,059, as compared with 84,390 bushels, worth $125,430, in the previous year, the decline being due to a falling off in the New Zealand demand. In spite of the smaller acreage, this year shipments are expected to equal those of last year. The Dominion also has an increasing export of turnips, last year 2,630,9588 bushels, worth $708,548, being shipped to the United States, which country also took 53,225 tons of sugar beets, worth $323,683.

"Despite this voluminous production and export, Canada is importing fresh vegetables very heavily and to an increasing extent. The value of such imports in the twelve months ended with July was $6,262,934, as compared with $5,535,307 the year before. For the main part these comprise vegetables which the Dominion is capable of producing herself, including cabbages to the extent of $305,569; celery, $486,305; onions, $548,521; potatoes, $799,039, and tomatoes, $1,550,102. These imports are all from the United States, with the exception of onions, which come also from Australia, Bermuda, Egypt, Japan and Spain.

"The canning of vegetables in Canada is making great progress both for domestic consumption and to send abroad, and exports are steadily increasing. In the twelve months ended July last 15,478,035 pounds of canned vegetables, worth $1,099,042, were exported, as compared with 10,656,990 pounds, worth $769,254, in the previous corresponding period. However, the import of canned vegetables is at the same time increasing, figures for the same period showing 16,308,847 pounds, worth $1,456,166, entering the country, against 15,337,774 pounds, worth $1,319,758, the year before. Many of these, for instance tomatoes, peas and corn, could be produced equally well in Canada.

"It has been pointed out by authorities that an expansion of the vegetable-growing industry on the Pacific Coast of British Columbia, which can successfully produce the year round, could eliminate the necessity of a good deal of importing by other parts of Canada. Experiments have been made in shipping green vegetables from Vancouver to points as far east as Toronto and Montreal, though their effect has not been noticed in import trade figures. Arrangements are announced for an improvement in the marketing of British Columbia apples from coast to coast through the establishment of facilities at all chief ectntres, to which supplies will go daily. It would seem as though this might profitably be extended to cover fresh vegetables."

Chicago is planning a 192-mile subway, probably so there will be some safe way for a man to go home.—American Lumberman.

We don't accuse him of commercializing art, but the other night a California undretaker played "Waiting for You" on a trumpet at a lodge function. —The Thomas E. Pickerill Service.

Lawn Hockey in England

FAIR ENGLISH GIRL ROOTERS

Spectators who braved the rain to see the leading English girls teams play for leadership.

Old-Fashioned Miniatures

Down where the ferns wave fans and mosses glow,
Pink ladyslippers walk the evergreen.
Wild lupin takes the road and turns it blue;
Cassiope bells renew their purple screen.
Indian pipes perform a translucent white,
Dimming to dove and ebony as they fade.
Toadstools stir their bowls with a coppery light;
The Nightshade draws a dusky lilac shade.
A tiny bloom puts on her diadem—
A coronet of buds on a coral stem.
The bobbing globes are grained in ivory—
And soon they peer about with a jade-green eye.
She nods her head to the perennial law—
This two-inch, three-eyed queen, Pipsissewa.

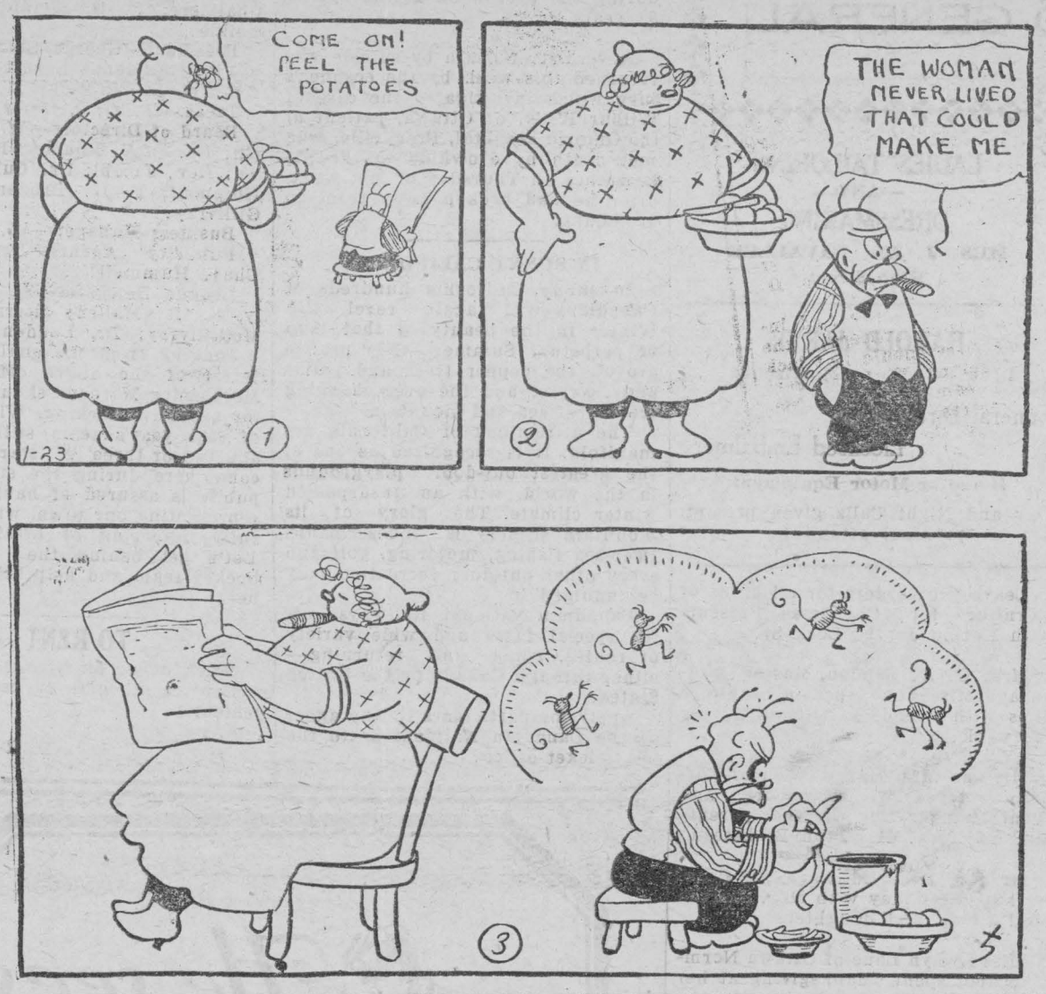

—Alfred Kreymborg, in "The Lost Sail, A Cape Cod Diary."

British to Build A Skyscraper

Great Britain's first skyscraper is to occupy a site in Manchester. It is to be seventeen stories high, having a height of approximately 217 feet, or about a third of the Woolworth Building's height.

In preparing the public for the innovation British architectural engineers have receded from their former contention that only in Manhattan were such structures justifiable. They now say that modern scientific treatment of structural problems has made tall buildings practicable; and the Manchester undertaking is further justified by the statements that not only are the city's territorial limitations a factor but rising rents make it necessary.

ADAMSON'S ADVENTURES—By O. Jacobsson.

Arctic Policemen Patrol 7,500 Miles

Canada's Mounted Force on Northern Islands Brave Blizzards and Fogs

CENSUS OF ESKIMOS

One Constable Traveled 700 Miles in Forty Days With Only a Native as Companion

Notwithstanding severe weather conditions—blizzard, fog, frost and rain—detachments of the Royal Canadian Mounted Police stationed at posts on the islands and mainland in the Eastern Arctic sub-district carried out more than 7,500 miles of patrol covering the less frequently visited parts of Ellesmere, Devon and Baffin, and including Alex Heiberg, Graham, Buckingham and North Kent Islands.

A number of important geographical discoveries were made during these long patrols, a census of the Eskimos in the areas visited was taken, game conditions were noted, and medical and other assistance was provided when necessary. Reports from the various detachments were received at the police headquarters in Ottawa by the patrol ship Boethic whe nshe returned from her annual trip to these regions recently.

"At Bache Peninsula on Ellesmere Island, the farthest north post, Constables E. Anstead, G. T. Makinson and R. R. Garnett spent an adventurous year," says the Canadian Interior Department, in telling of the vicissitudes of this northern service.

"In March, 1928, an attempt was made to enter the interior of the northern end of the island by Sawyer Bay and Cannon Fiord to Lake Hazen, but it was checked by the dangerous condition of a glacier which barred the way.

Glacier Blocking Pass

"On March 22, Constable Anstead left with two Eskimos on a patrol to the West Coast which lasted until April 30, and accounted for some 850 miles. The pass from Flagler Fiord to Gretha Bay Fiord, on the West Coast, is being slowly blocked by a glacier and Constable Anstead, defying the alarm of his Eskimos, managed to squeeze through between the precipitous foot of the glacier and the cliff which constitutes the opposite side of the valley. The space was barely wide enough for them to pass, blocks of ice fell from time to time and 500 yards of the trail was very dangerous. The men worked so hard that, though the temperature was 30 degrees below zero, they were bathed in perspiration. From the Western Coast the party visited Axel Heiberg Island, crossed Norwegian Bay to Graham and Buckingham Islands, skirted North Kent Island, and spent some time in the Bjorne Peninsula on the return journey to the coast. In the last-named locality at a point about 200 feet above sea level several outcroppings of soft coal were found.

"Constable Makinson made some interesting geographical discoveries during a patrol from the Bache Peninusla Coast to the East Coast of Ellesmere Island, to Craig Harbor on the Southern Coast and westward to Starnes Fiord. He was accompanied by one Eskimo and in addition to visiting an unmapped island east of Cape Dunsterville, on which he noticed remains of native igloes, he found and explored a large fiord north of Clarence Head.

"Travelers usually cut across on the ice, but Constable Makinson followed the shore and discovered first a large bay running southwest, and then a fiord two miles wide. An island in the middle of the bay made the fiord difficult to notice from seaward. He also explored some fifty miles up the fiord and its branches. The party was absent from the coast for forty days and covered 700 miles.

Climbs Frozen Waterfall

"From Pond Inlet, at the northern end of Baffin Island, Inspector C. E. Wilcox made a patrol of 900 miles to Fury and Hecla Strait; Constable S. H. G. Margetts aggregated nearly 1,300 miles during three patrols to Milne Inlet, Arctic Sound, and Home Bay respectively, and Constance Cox made some shorter patrols to the height of land between Eclipse Sound and Foxe Basin. The most important trip was Inspector Wilcox's patrol to Fury and Hecla Strait, this taking him to the northern end of Foxe Basin and to Melville Peninsula. He traveled across the interior of the northwestern part of Baffin Island, traversing numerous lakes, and on one occasion climbing a frozen waterfall. About 150 Eskimos were visited, and they were generally prosperous, with plenty of food; the usual census was taken. In this region the caribou were quite numerous, and wolves were scarce. The journey was marked by a five-day blizzard, and the weather was so cold that the coal-oil, carried for fuel, froze and had to be thawed out by native oil lamps before it was used. Constable Margett's patrol to Home Bay, a matter of fifty-one days between April 12 and May 31, accounted for 945 miles. In this area, too, the natives were prosperous.

"Weather was unfavorable for long patrols on Devon Island in the vicinity of Dundas Harbor. However, two extended patrols were made, one across the island to Belcher Point and the other westward to a place called Cuming Creek and inland up the gorge of this watercourse.

Patrolled by Dog Team

"From Pangnirtung, the post on Cumberland Gulf, Baffin Island, Sergeant O. G. Petty patrolled the gulf and visited native camps on the east coast of the island. The Winter as unfavorable for traveling owning to conditions of weather and ice, nevertheless, the entire district was patroled by dog team, the distance aggregating 1,700 miles. One of the men, Constable G. J. M. Curleigh, patrolled to Cape Mercy and remained there for some time hunting. He also made a journey with one Eskimo companion along the southeastern coast to Cornell Grinnell Bay. A shortage of dog feed and frequently severe storms made this trip a trying one. The party was asbent forty-five days and covered 640 miles.

"The detachment at Lake Harbor on the southern coast of Baffin Island was established during the Winter of 1927-28 by Sergeant J. E. F. Wight, with Constable P. Dersch. The buildings were begun while the Beothic was in the harbor on last Summer's patrol. After she left, the rain was incessant and it was six weeks before the policemen could go on with the work. As all the dogs had died in an epidemic, comparatively little patrol work was done. The total mileage was about 500.

"At Port Burwell, at the entrance to Hudson Strait on the mainland, Corporal H. G. Nichols and Constable S. R. Montague were sationed. All of the native families along Ungava Bay were visited and their health was reported as exceptionally good.

"The police posts received instructions from Ottawa by radio and reception varied considerably. At Bache Peninsula, within 700 miles of the North Pole, it was fair; at Dundas Harbor and Pond Inlet it was good, and at Pangnirtung it was on the whole poor."

HER PLAY WAS RAIDED

Mae West, author of "Pleasure Man", was arrested in New York with entire cast for producing it. She was in that sort of trouble before.

A Baby Blimp

THIS AIRSHIP PROPELLED BY COMPRESSED AIR

A new type exhibited at the International Air Exhibition in Berlin. A revolving propeller is fitted into its nose.

Summary

Thought I leave the sea, always I come
Back to sound of dark water in the cove,
Back to the tide's slow and untiring drum
Against the ears; this only do I love
The sound of waves against a foaming bluff,
The sound of a rising wind on a night of stars,
After all, this only is enough
To claim the heart, this and the ploughing spars
Of many ships sailing for fabulous lands.
Of many ships bound for the wind's loud onder,
Sailing beyond the cool kind wash of the sands—
Into the loud dark laughter of the thunder.

Harold Vinl.

Every branch of farm work, farm machinery, stock, etc., has an expert writer in the Family Herald and Weekly Star, the recognized first writers in Canada.

Born—At Morrisburg, Riverfront West, on Saturday Nov. 17th, to Mr. and Mrs. C. Lee Deeks, a son.

Mrs. G. Anderson and daughter, Mrs. Frank Coons, leave tomorrow (Saturday) for Toronto, where they expect to spend the winter months.

Bed Springs and Mattresses at Harold Jarvis', Lock St.

Mrs. A. H. Bullard of Madrid, N. Y., spent a few days last week with Mr. and Mrs. A. H. Hunter.

Mrs. Geo. Godfrey of Montreal is spending a few days with her mother, Mrs. Wm. Allison and family.

Mr. George Foster Bowman, A. C. I., of the Royal Canadian Air Force, Ottawa, spent the week-end with his parents, Mr. and Mrs. Thos. Bowman.

Married—On Saturday, November 17, 1928, by Rev. A. O. Lloyd, B. A. Winnie Eula, daughter of Mr. and Mrs. S. W. VanAllen, Mountain, to William Andrew Logan, son of Mrs. Logan and the late William Logan of Kemptville.

According to a recent despatch from the Liquor Control Board of Ontario, all employees of the Board have been notified that they must not offer themselves for public office. This order affects vendors, brewery warehouse inspectors and all other like employees.

Mr. and Mrs. John Henry Barkley announce the marriage of their only daughter, Frances Leona, to Mr. John Edward Callahan on Thursday, November 8th, at Fayettville, New York.—Chesterville Record.

Mr. and Mrs. Morley J. Wells announce the marriage of their daughter Blanche Irene to S. V. Wikander of Plainfield, N.J., on Wednesday, November 21st, 1928, at Jersey City, by the Rev. J. H. Meyer, pastor of Lutheran Church of Our Saviour. They will make their home at 609 Madison Ave., Plainfield, N.J.

Married—On Wednesday Nov. 28, at the home of the groom's parents, Donald G. Shaver, eldest son of Mr. and Mrs. Howard Coons, Iroquois, and Miss Florence E. Casselman, daughter of J. C. Casselman, Morrisburg, Rev. T. Knowles officiating. The young couple were attended by Miss Della Shaver and Arthur McInnis. Congratulations.

The remains of the late Alexander McMillan, who passed away in Edmonton last week, arrived in Chesterville Sunday afternoon, accompanied by Mrs. Sime McMillan, and were taken to the home of Mr. Wm. Arthur McMillan at Elma. The funeral was held Monday afternoon at Elma United church when the services were conducted by Rev. J. Hurst, interment being made in Elma cemetery.

The home of Mrs. Fred J. Barlow, Princess St., was the scene of a very pretty reception on Tuesday from three to six. The guests were invited into the reception room by Miss Agnes Parker of Winchester and Miss Jean Meikle. The rooms were tastefully decorated with yellow 'mums, baby 'mums and carnations, while candles and lamps cast a roseate hue over the assembled guests. Mrs. Barlow received in a French gown of peach georgette, wearing a shoulder bouquet of carnations, and was introduced by Mrs. Fred Meikle. The guests were ushered to the dining room by Mrs. Irwin Hilliard, where tea was poured by Mrs. J. H. Ross of Winchester, Mrs. Thos. Irving of Prescott, Mrs. John Meikle and Mrs. J. G. Challies. Ices were cut by Mrs. B. L. Carr and Mrs. (Dr.) Davy. Those assisting in the dining room were Mrs. (Dr.) McKeown, Mrs. K. Helmer and Mrs. Fred Parker of Winchester. During the afternoon Mrs. George Reaburn of Chesterville presided at the piano, while the guests were delighted with songs sung by Mrs. W. N. Fulton, also of Chesterville. The numbers present at this reception was a fitting appreciation of Mrs. Barlow's taking up her residence in our midst.

Leave your orders for all kinds of Furniture for Christmas Presents with Harold Jarvis, Lock St.

Mrs. C. A. Louden, Master Gordon and Miss Anne, spent a couple of days with friends in Ottawa during the week.

Mr. and Mrs. Harry Owen of Toronto motored to Morrisburg and spent Thanksgiving with her parents Mr. and Mrs. Hamilton Beckstead.

Mr. and Mrs. Ed. Fagan of Cornwall spent Sunday with Mrs. Martha McGillivray and daughters.

Miss Evelyn Lane of Ottawa Normal School spent Thanksgiving at her home and with friends in Morrisburg.

Miss Gladys Clark, Mrs. P. J. Timmins and sons, Mrs. Henry Clark and Miss Bessie all motored to Cornwall Nov. 16th.

Mr. and Mrs. Washington Beckstead and son Clair of Toronto motored to Morrisburg and spent the week-end with his parents, Mr. and Mrs. Hamilton Beckstead.

Ira W. Beckstead wishes to announce that he is now at his studio at Iroquois, every day, and ready for business. A dozen of your photos will solve the problem for you, of twelve appropriate christmas gifts. Come to Iroquois for your setting and have them made. bc

A quiet wedding was solemnized at St. Simons church, Toronto, on Tuesday, Nov. 13, when Miss Margaret Russell, daughter of Mr. and Mrs. W. L. Russell, of Buffalo, became the bride of Mr. John Labatt Reid, son of Senator J. D. and Mrs. Reid, of Prescott.

While reloading cartridges, Mr. Wm. Hummell had the misfortune of having the fingers of one hand so badly shattered, when one of the cartridges exploded, that one finger had to be amputated.

Cedar Chests, Chesterfields, Rattan Suites, Smoker Sets, Rockers & Chairs at Harold Jarvis', Lock St.

Police court fines in the town of Cornwall for the past year were the highest in history, according to a summary of receipts and expenditures read at the statutory meeting of the Town Council at the Town Hall, Thursday evening. The aggregate is more than $1000 higher than that of the same period of last year. Approximately $4750 was received by the town from the police court during the period from January 1st to November 15.

Every editor an expert. The departments of the Family Herald and Weekly Star, Montreal, are all headed by men of practical experience and nation-wide fame—that's why it's first in public esteem. The subscription price is only $1 a year or three years for $2.

The "Thousand Islander," a splendid steamer at present used as a day excursion boat between Detroit, Wallaceburg and Chatham and formerly operated for several seasons on the St. Lawrence has been sold by its owners, the Northern Navigation Co. to the Georgian Bay Tourist Co., Midland. The steamer will be placed in service next season on the Midland Parry Sound route.

Edward Lavery, aged 56, Chief of Police of Prescott, died in St. Vincent de Paul Hospital, Brockville, on the night of November 15th, of injuries received when the car he was driving in pursuit of two suspicious characters, believed to be shopbreakers, crashed into a steamroller on Provincial Highway No. 2, three miles east of Brockville. Lavery suffered a fractured skull and other injuries. His brother, who was accompanying him, escaped with only a shaking up.

The inquest into the death of Ulrich Leroux, who lost his life on Wednesday last when his truck was struck by the Inter-City Ltd. at Lancaster crossing, was held in the Public Library in that village on Friday afternoon last, Dr. C. A. Stewart, of Cornwall, Coroner, presiding. After hearing the evidence the jury brought in the following verdict: "We the jurors considering the evidence, find that Ulrich Leroux came to his death on Wed., Nov. 14th, by being struck by the C. N. R. train No. 35 on the Lancaster crossing. The jury attach no blame to the engineer and fireman, but consider that further protection should be given the crossing at a time when there is another train in the yard, especially on a double track and the view hidden from the East as it is.

David A. Brown, for 33 years a widely known traveller for Steele Briggs, died at his home in Toronto during the past week at the age of 81 years.

A verdict of death by suicide was returned this week by the coroner's jury which investigated the case of Wilbur Kelly, of Ottawa, patient at the Ontario Hospital, Brockville, who met death by drowning in the St. Lawrence on Thursday of last week, after he had broken away from an attendant.

IN SUNNY CALIFORNIA

In sunny California hundreds of Canadians will again revel this Winter in the beauty of that land of perpetual Summer—the orange groves, the pepper trees and palms and flowers; and the ever changing scenery of sea and mountain.

The attractions of California are manifold. It is recognized as one of the greatest out-door playgrounds in the world, with an unsurpassed winter climate. The glory of its mountain scenery is indescribable. Deep-sea fishing, motoring, golf and every other out-door recreation may be indulged in.

Canadian National Railways offer special fares and wide variety of routes, going and returning—either through Canada or the United States.

Apply for particulars to any agent of the Canadian National or to the local ticket office.

Judging from the quality and interest of the above officers, the Morrisburg Maroons should not lack for executive backing. With the best of last year's team still available, and two or three real stars who have come here during the summer, the public is assured of having a team representing our town, which will be fully deserving of loyal support. Let's get behind the Morrisburg hockey team and help bring the cup here!

NEW CITIES

THIS MAN is a business prophet. He does not really look into a crystal ball but he reads the future nevertheless and he sees new cities yet unbuilt. He is important in the telephone business.

He judges the future from the facts of the present and it is his job to judge with accuracy. He must judge with accuracy because, in a telephone system, plans must be made for years ahead and millions of dollars are involved.

With a railway there must be tracks and stations before trains can run. With a telephone system there must be conduits and central exchanges before telephones can go in.

To wait until people are clamoring for telephones is too late.

THE BUSINESS PROPHET does not wait. He comes to the management with his charts and graphs and figures and says: "In 1930 the demand in Ontario will be 80,000 new telephones. They will be wanted here and here and here."

Or he says: "Within the next five years the Province of Quebec will need at least forty per cent more exchange capacity."

And the management does not wait either. They know it is up to them to prepare now. If they don't they will be falling down on their job; they will not be keeping pace with the country.

BECAUSE THE BUSINESS PROPHET spoke in time and the management acted promptly there are 139,000 telephones being installed in Ontario and Quebec this year. Without them there would be inconvenience and confusion now in thousands of new homes and offices.

Next year the business outlook calls for spending over twenty-seven million dollars to extend and renew the system and plans have been made to do so.

For the next five years the telephone expansion definitely known to be needed in the two provinces means over one hundred million dollars.

FINDING THE MONEY is a problem. It is as great a problem as the complications of engineering and organization.

Every year as the country grows there must be new money ready so that the telephone system may keep pace.

Every year thus far the money has been ready because the policy of the telephone system has been fortunate in attracting the support of conservative and reliable investors who have not been subject to the influence of market fluctuations.

THAT IS HOW the business prophet and his graphs have been made effective. And that is why the telephone management has always met Canadian progress with confidence and enthusiasm.
