Argentine Corn

We are unloading a car this week. We do not need to emphasize the quality of this Corn, as you all have used it it. The price is 25 cents below that of Middlings; 40 cents below Oats; migmt it not be wise to feed more Corn and less of the higher-priced Feeds?

POTATOES

A limited quantity of New Brunswick Irish Cobblers can still be had. Potatoes will go higher before Spring.

FLOUR

TRY THE MAPLE LEAF BRAND---IT SATISFIES.

Mill Feed

We have in stock, BRAN, SHORTS, MIDDLINGS MONARCH HOG FEED, SAMPSON FEED, MONARCH DAIRY FEED, GLUTEN, SCREENINGS AND SCRATCH FEED.

The MORRISBURG FEED & PRODUCE Co.

MORRISBURG, ONT.

SHELL

Aviation Motor Gas

HIGHEST GRADE OF MOTOR GAS IT IS POSSIBLE TO PRODUCE

It is absolutely pure--does not carbonize and gives full power to the last drop. A very simple test will soon show whether the gas you are using is "doped." Put some in a plate and expose to the air. If it is genuine SHELL it will evaporate, in time, but all the quantity left will still be pure SHELL MOTOR GAS. To the very last drop SHELL is the same. If your sample is doped then after a few hours the "light dope" will have evaporated and will leave inferior grade of fuel. Some times there is a very high percentage of coal oil which will occasionally work in an engine when it gets heated up, but there is not the power in the fuel nor has it the quick starting quality.

PLAY SAFE

PROTECT your radiator with MAPLE LEAF ANTI FREEZE. We have it in bulk---can give you any quantity you desire,

MORRISBURG — ONTARIO

COMMEMORATING ARMISTICE DAY, NOV. 11th---1918-1926

Services, under the auspices of the G.W.V.A., were held in Morrisburg, at the Monument Site on Thursday evening. Ven. Archdeacon Carson conducted the service.

MR. JOHN STYLES

There passed suddenly away early Thursday morning, at the home of Jas. J. Styles, Froatburn, Mr. John Styles Sr., in his seventy-second year. His wife, the late Sabrina Froats Styles, predeceased him on November 25th, 1918. He leaves to mourn his loss, three brothers and one sister: James J. and George E Styles, Froatburn; W. E. Styles, Madrid, N.Y. and Mrs. Jas. E. Salmon, East Williamsburg.

The funeral service was held at Trinity Memorial Church, Riverside on Saturday, at 1.30 o'clock, Ven. Archdeacon Carson officiating.

Relatives from a distance who attended the funeral were: Mr W. E. Styles, Madrid, N.Y. Mr and Mrs. W. E. Styles, Great Bend, N. Y.; Mr. and Mrs. Robert Casselman and son of Massena, N.Y.

HYSLOP--SCHWERDTFEGER

A very quiet but pretty wedding took place on Wednesday noon at the home of Mr. and Mrs. Simon Schwerdtfeger, Froatburn, when their only daughter, Eleanor Catharine, was united in marriage to Mr. Milburn Hyslop of Iroquois. Rev. Jacobi of Morrisburg, performed the ceremony.

The bride, who was given in marriage by her father, was gowned in a peach satin faced crepe and carried a bouquet of pink roses and maiden hair fern tied with white ribbon. The wedding march was played by Mrs Gordon Render of Iroquois, and the witnesses were Miss Audrey Froats and Mr. Homer Schwerdtfeger.

After the ceremony, at which only the immediate relatives were present, a wedding dinner was served.

Mr. and Mrs. Hyslop left, amid showers of good wishes for Eastern Points, and on their return, will reside in Iroquois.

A. E. MOSS

WHO IS AT THE HEAD OF D. C. BUSH'S GREATEST SALE

After thirty-seven years of faithful and successful business in Morrisburg, Mr. D. C. Bush is staging the greatest sale of his career, and to assist him, he has secured the services of Mr. A. E. Moss who has, we understand, made a study of this work for many years. Judging by the activities around the store the past few days, and the transformation scene that greets the eye on entering we would say it's going to be a Real Sale.

5000 half sheet posters have been printed in this office and mailed to every home for miles around. These bills give you the full details of the sale.

A TUG-OF-WAR IN A TAG DRIVE

At a recent meeting of the staff and students of the Collegiate Institute, it was unanimously agreed with hearty enthusiasm, that the staff and students purchase a piano for the new assembly hall.

A Tag Drive was adopted as the first means of raising money In connection with this sale of tags, which is to begin at once and continue until the afternoon of "Commencement" Day, there will be a triple contest among:

1, individual students.
2, Between forms.
3, a big "tug-of-war, between the girls and the boys.

The tags will be sold at two prices, 10 and 25 cents.

Mr. J. W. McMartin, corresponding secretary of the "Drive", will gratefully receive small contributions from ex-students and others.

When sending in your contributions please state on which side of the "tug-of-war" you wish your offering placed---the girls, or the boys.

The students solicit especially the friendly co-operation of the public schools of the townships.

J. W. McMartin, Sec.

DEEKS---TULLY

Married. at the United Church Parsonage, Spencerville, by Reverend Johnston, on Wednesday, November the 10th, 1926, Mr Fred F. Deeks, one of Morrisburg's popular young men, and youngest son of Mr. and Mrs. J. M. Deeks, highly respected farmer, just north of town, to Miss Grace Tully, only child of Mr. and Mrs. J. W. Tully of New York City, and granddaughter of Mr. and Mrs. Thos. Thompson, Brinston. The bride is well known around Brinston and vicinity, having been organist for seven years at the United Church, Hanesville.

The bride was charmingly dressed in a gown of grey georgette with an overshirt of rose cut velvet, and wore a grey metallic hat, black pumps and grey hose to match, also a rope of pearls one of the many presents she received.

The happy couple motored to Toronto and Niagara Falls. They have the best wishes of a host of friends

The bride's travelling costume was black taffeta trimmed with an overskirt of crepe de chene and silver lace. She wore a large hat of black satin and a needle point coat trimmed with grey fur, wearing a hand-painted scarf, the gift of her cousin, Mrs. Belliveau, Montreal.

NOTICE TO RATEPAYERS

In order to make it convenient, the Collector of Taxes will open an office at W N. Rice's Livery Office, beginning Monday November 22nd.

To drink a cup is a revelation. Try it.

The RED RAIN MYSTERY by HEADON HILL

BEGIN HERE TO-DAY.

Samuel Honeybun, retired English countryman, startles the neighborhood with the announcement that blood is found in his rain-gauge. Right on the heels of the announcement comes news of the strange murder of—

Sir Francis Lathrop, father of Margaret, who is engaged to Sir Guy Lathrop. Sir Guy is suspected of the murder.

Detective Inspector Roake of Scotland Yard, who had been assigned to the case, visits the Lathrop home.

NOW GO ON WITH THE STORY.

CHAPTER VIII.

With warm expressions of thanks Klyne took his departure, but having gained the road, he stopped irresolute. It was a new sensation for him. His many successes had been won by his being cocksure of himself. Now he was full of misgivings. There had been something roguish in that confounded girl's tone since she had failed to find his assumed name in the Clerical Directory, and it was uncanny that she had not asked where he was staying, though she appeared to take it for granted that he would still be thereabouts on Sunday. Had she heard of the young clergyman at the inn and had she identified him with the Lathrop detective? Moreover, she had fastened down the envelope, an unusual proceeding in the case of a letter of introduction.

It was the stuck-down envelope that settled it. It would be the act of an idiot to present a letter in ignorance of its contents. Instead of continuing his walk to Long Paston Manor he returned to the inn and in the privacy of his bedroom steamed the envelope open. This is what he read under the stamped heading of Cheverel Rectory:

"Dear Mr. Symes—The bearer is either a lunatic or a criminal impostor, and you would do well to hand him over to the police. Father has gone to town to-day, and in his absence 'Mr. Danvers' called and badgered me for an introduction to you on the pretext that he was our curate. I know nothing about him, though he was quite frank about his object, which, I gathered, was to extract money from you. To get rid of him I appeared to accede to his request, though naturally he is not aware that I am warning you against him.—Yours very sincerely, Adela Larkin."

Klyne put the letter away in his pocketbook, frowning rather in bewilderment than in anger.

"Of all the treacherous young cats!" he muttered. "This means that I must get my information otherwise than through Mr. Symes."

And later in the day he got it, by discreet inquiries elsewhere than at the Manor. Wilmot, late chauffeur to Mr. Symes, had recently left that gentleman's employment and was believed to have obtained another situation in London.

To London, therefore, "The Reverend Charles Danvers" hied himself, retaining his room at the inn and notifying Margaret Lathrop of his departure. His letter to his client bade her be careful.

In the garden that evening Margaret showed the detective's letter to Sir Guy.

"The damn feller's splurging about all over the shop," said Sir Guy. "I told you these private sleuths were no good. He'll never catch your father's murderer. Much better marry me right off the reel and let me protect you."

"And the day after our wedding have that Scotland Yard inspector arrest you," said Margaret. "No, thank you, Guy. I much prefer to let Mr. Klyne carry one. At least he's got an open mind."

"I see," rejoined Sir Guy gloomily. "You won't marry me as long as I am under this cursed cloud of suspicion. So be it, but you will quite understand that we can't go on living in the same house under those conditions. You or I will have to clear out, and it's me that's for it."

Margaret's refusal to marry him till the mystery of her father's death was solved rankled. The next morning, in a huff, Sir Guy left the stately house he had inherited and had himself motored to the railway station to catch an early train. Starting before the family breakfast hour, he did not see Margaret again.

Now Inspector Roake of Scotland Yard was a restless soul. When he wasn't in full cry after a certainty he was fond of what he called "kicking his heels." Which was why he was prowling about the small wayside station serving Lathrop Grange when Sir Guy took his ticket for London. The next minute there was no more heel-kicking for the Inspector. He thought he had got his certainty. He also booked for London, and when the train steamed in took his seat a few compartments behind the one entered by his quarry.

"No, thank you, Guy. "I'll let Klyne carry on."

The baronet was evidently doing a bolt with a view to leaving England—pre-eminently a man to be shadowed with that dogged patience which had raised Mr. Roake to his present position at the Yard.

So Roake took the job in hand, and when the train ran into the London terminus was soon in swift pursuit. It was a simple matter of instructing a taxicab driver to follow the preceding taxi to its destination. This was a house of service flats in Jermyn Street, where Guy Lathrop had lived from the armistice up to the death of his uncle.

With a cheery nod to the hall-porter in his hutch he vanished up the stairs, and Inspector Roake, after a glance at the name-plates in the vestibule, took up what was to be a prolonged vigil in a tobacconist's shop across the street. For it was not till after dark that Sir Guy Lathrop emerged from his lair. But the old watch-dog's pulses quickened as he took up the chase again. There was a change in the baronet's rig, a change that promised great things. He was dressed differently, and when he had entered the flats he had carried a suitcase. Now he was carrying a bundle.

Roake was gratified when he found that his man was going to travel afoot. He disliked cab shadowings, as they entailed trusting to the wits of the driver. Resourceful and proud of his own initiative, he much preferred a pedestrian pursuit, since that method brought into play certain little tricks and dodges which he had specialized in.

Metaphorically licking his lips, Roake perceived that Sir Guy had adopted a costume of well-worn tweeds that accorded with the carrying of a bundle. There was nothing to make people turn and look at him, as there would have been had he sallied forth in evening clothes or a frock-coat and tall hat. He might have been a respectable artisan returning home after redeeming a pledge from a pawnbroker.

And there was assuredly something furtive in the baronet's mode of progression. Before turning a corner he always stopped and looked back, as though fearful that a shadow dogged his steps. Roake chuckled inwardly. His prize suspect was bent on some errand that he would never have undertaken in the light of day.

Sir Guy made stealthy approach to the Thames Embankment by way of Charing Cross and Villiers Street, thence along the Embankment to Waterloo Bridge. Halfway across the bridge he leaned over the parapet and dropped the bundle into the stream. Then he walked on toward the southern end of the bridge, and his gait was no longer furtive. He strode forward head erect and eyes to the front, as a man who has nothing to conceal.

Probably he hadn't, Roake reflected. He had got rid of his guilty burden when he cast the bundle into the Thames.

Roake hurried to the Embankment station of the river police and was lucky enough to find a launch alongside the wharf. The little craft was soon chugging down-stream with the Scotland Yard officer on board. There followed an exhibition of the marvelous skill with which the amphibious patrollers of London's waterway set about their "lawful occasions." Shown the spot by Roake, they got out their grappling-irons and, after only two abortive attempts, hauled Sir Guy Lathrop's bundle inboard, a ball of ooze and slimy mud.

"The juggins weighted it!" snorted the Inspector, feeling the brick in the interior. "If he hadn't it would have been a mile down-river by now and would have led us the devil of a dance."

There were no facilities on the launch for examining the contents of the bundle, so word was given to return to the police station. There, on the slab in the receiving room, the unpacking took place, and Roake's eyes nearly bulged from his head when he extracted a stained suit of clothes and, wrapped in it, a sharp-pointed Italian stilleto.

"The clothes he wore and the weapon he used!" gloated the Inspector, restoring the exhibit so far as was possible to its former semblance. "Good enough proof to pinch him on, anyhow, and blamed if I don't go and do it. He ought to have trickled back to his diggings by now."

Leaving the bundle in the safe custody of the river police, he walked to Jermyn Street and interviewed the hall-porter of the flats he had watched all day. In answer to his question he was informed that Sir Guy Lathrop had not returned.

Roake hovered about till midnight and then, concluding that Sir Guy did not mean to return, he retreated to New Scotland Yard and set in motion the vast mechanism that radiates therefrom for preventing wanted fugitives from leaving the country and for arresting them if they remain in it.

"Merely a matter of hours, but I should have preferred to have run him in myself," the Inspector murmured.

(To be continued.)

At the Games.

"Why on earth is that fellow attempting to jump with his overcoat on?"

"It's a spring overcoat, can't you see?"

Seven Homely Truths—

—It takes real strength to stand abuse without becoming vindicative.

—Courtesy is cheap, but it always pays a big profit.

—Success can usually be had if we are willing to pay the market price.

—Some people think they are cultured when they are only critical.

—Most of our troubles disappear if we march up to them courageously.

—Stinginess is probably the last fault we will ever accuse ourselves of.

—A prejudice is an honest conviction in its dotage.

NURSES

The Toronto Hospital for Incurables, in affiliation with Bellevue and Allied Hospitals, New York City, offers a three years' Course of Training to young women, having the required education, and desirous of becoming nurses. This Hospital has adopted the eight-hour system. The pupils receive uniforms of the School, a monthly allowance and traveling expenses to and from New York. For further information write the Superintendent.

Final Report of Peat Committee.

The prospect of the establishment of a peat fuel industry in Canada has been materially advanced by the investigations carried on by the Peat Committee, according to the final report of that body, published by the Department of Mines. The Peat Committee was appointed jointly by the Governments of the Dominion of Canada and the province of Ontario, with the object of finding, if possible, a practical-working and commercially-feasible method of making availabe the products of our extensive peat deposits as an auxiiary source of fuel supply, especially in the "Acut Fuel Area" of Ontario and Quebec. The foreword to the committee's final report states that a gratifying measure of success had been met by the committee in its investigations and that the object of its appointment had been substantially attained.

The unsatisfactory situations which have arisen in parts of Canada, particularly in Ontario and Quebec, through the dependence on anthracite of foreign origin brought forward the necessity for a domestic source of fuel supply for this area. An investigation into the possibilities of peat as a substitute fuel was undertaken and the committee began its investigations in 1918. Field operations were carried on by the committee at the peat bog near Alfred, Ontario, about 40 miles east of Ottawa. During the period of investigation machines were designed and methods developed by which the production of peat on a commercial basis could be accomplished. The investigators went further and made a study of the uses to which peat fuel could be put and how the bogs not worked for fuel and those from which the peat had been removed could be utilized for agricultural purposes or otherwise advantageously disposed of.

The outstanding conclusions arrived at by the committee were that the only methods or processes which could be economically employed for the manufacture of peat fuel were those employing air-drying, that the climatic conditions in Ontario and Quebec were favorable for the manufacture of peat fuel for 100 days during the summer season, and that the commercial production of this form of fuel, on a large scale, could be conducted on many of the bogs which had been examined in detail, and which were favorably situated with regard to centres of population and transportation facilities.

What the Artist Wants.

Last night we sat late over the fire. It had been a blustering day, but at sunset the wind fell and the stars came out in splendid brilliancy. Rosalind had taken up her work, and we were anticipating a long, quiet evening, when the door opened and our friend the artist walked abruptly in. Without ceremony, he dropped his hat and coat on a chair, and almost before we realized that he was in the house he was standing before the fire warming his hands and saying that it was an uncommonly sharp night. No more welcome guest ever comes under our roof than the artist. . . . His fellow-craftsmen are all talking about his extraordinary work, and the world is fast finding him out; but he remains as simple-hearted as a child. It is this quality quite as much as the genius for expression which I find in him which assures me that he has the elements of greatness.

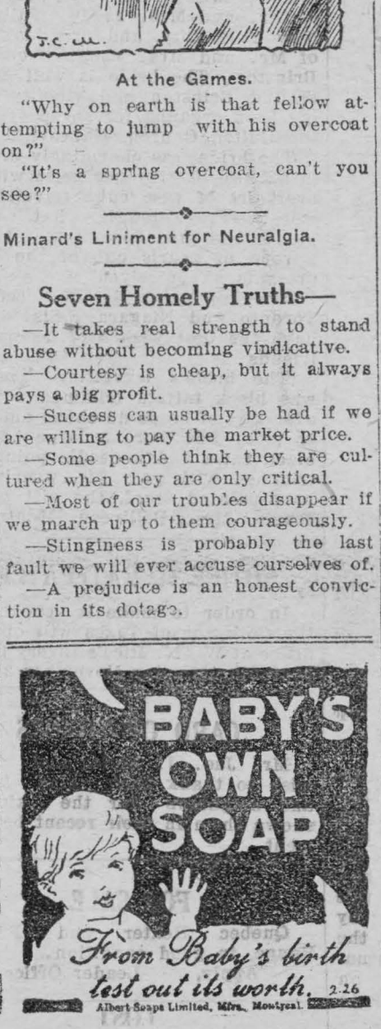

When we were comfortably disposed before the fire, and the talk, breaking free from personal incident, began to flow in its accustomed channels, Meryon and Corot were mentioned by Rosalind . . . It happened that yesterday Rosalind and I had been looking at an etching of Meryon's, and we had naturally fallen to talking about the pathos of his life. . . .

"Don't bother about that," said our friend, starting out of his chair and standing before the fire. "There is nothing that a real artist cares less for than what you call success. . . . No happier man ever lived than Corot during those years when there was nothing to do but sit in the fields . . . and watch the morning sky and then go and paint it. As for Meryon . . . he had the supreme satisfaction of saying his say. He put himself on his plates and that was enough for any man. . . . Don't you understand that all an artist asks is a chance to work? What we want is not success, but the chance to get ourselves onto canvas. I paint because I can't help it."—From "My Study Fire," by Hamilton W. Mabie.

The Oldest Game?

Invented in ancient Greece more than two thousand years ago, a game was exhibited recently in London consisting of fourteen small flat pieces of ebonite of various shapes which, when properly arranged, form pictures of an elephant, an ostrich, a charging soldier, a barking dog, and several other figures.

This game was probably used educationally for the training of the powers of observation or memory in children, and, although mentioned in ancient manuscripts, all trace of it had been lost for the last 1,500 years.

"IDEAL Fashions" by Jean Belle Hamilton

INDIVIDUAL AND SMART.

Can you imagine anything more becoming and more vivacious than this stunning frock of moire? It will answer so many occasions and serve many purposes with chic that the youthful woman will at once claim it for her own. The skirt has clusters of side plaits in the front and back and is joined to a straight bodice having a boyish collar and long set-in sleeves. The bodice opens at the neck, and a peplum flared at the sides is sewn to the dress at the low waistline. No. 1395 is for the miss and small woman and is in sizes 16, 18 and 20 years. Size 18 years (36 bust) requires 3⅞ yards 39-inch moire; ⅜ yard plain contrasting. Price 20c.

Every woman's desire is to achieve that smart different appearance which draws favorable comment from the observing public. The designs illustrated in our new Fashion Book are originated in the heart of the style centres and will help you to acquire that much desired air of individuality. Price of the book 10 cents the copy.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

Hands That Talk.

What is known as the deaf and dumb alphabet is a common accomplishment among those who are thus afflicted and those who are responsible for their welfare. But, if the researches of a well-known scientist are carried to a successful conclusion, a new method of communication may be evolved, in which the hands will be made to speak words and sentences in exactly the same way as the mouth does.

The scientist in question is Sir Richard Paget, who, with the aid of bellows and a metal tube, which take the place of the lungs and windpipe, has made his hands "speak" words in a remarkably natural way. In the course of a demonstration, Sir Richard explained that vocal sounds are produced by the action of air passing over the opening of a cavity; he illustrated this by models made of plasticine and cardboard. By supplying air to these models he made them utter vowel sounds and even words, such as "mamma," "Minnie," "rather," and "well."

Then, discarding the models, he used his hands only, and made them "talk' so that everyone could hear and understand. Moistening his hands to prevent the leakage of air, he manipulated them in conjunction with a metal tube and made them say, distinctly, "Hullo, London! Are you there? Lila, I love you!"

SPECTACULAR FIRE DESTROYS FAMOUS SHRINE AT STE. ANNE

Ste. Anne de Beaupre, Que., Nov. 8.—Half a million dollars is the loss sustained by the Order of the Redemptorist Fathers, guardians of the Shrine of Ste. Anne, from the conflagration which, for the second time within four years, destroyed their church with practically all its treasures and most of its relics.

The fire broke out around 1 o'clock this morning, and before adequate effort could be directed towards fighting it, the sacred structure was a mass of smoking ruins. But, as if to inspire faith that the destruction of material things did not mean destruction of things spiritual, the famous relic of Ste. Anne, upon which the entire raison d'etre of the Shrine is centred, was saved from the flames. This was found in a vault in the sacristy, somewhat scorched, but otherwise intact.

Several valuable paintings and statues were saved, but the ancient bell and the statue to which the faithful attributed all the miraculous cures, were totally destroyed. The loss of this venerated statue is considered to be irreparable.

There were no casualties, although a panic in the nearby hospital in which were a number of patients was narrowly averted by the nurses and the attaches. Some of the feebler are said to-night to be in a serious condition, due to shock.

The origin of the blaze has not yet been determined, and the suddenness with which it broke out and spread cannot be explained. The first notification of it was given by one of the brothers of the Redemptorist Order, who was awakened by the smell of smoke. He made his escape from the burning church with difficulty and roused the other members of the Order. In a few minutes the whole church was ablaze. Thousands of people from the town and surrounding villages thronged to the scene of the conflagration, but they were able to render little aid beyond saving those articles that had not yet fallen prey to the flames. Aid was summoned from Quebec, 22 miles away, and several units of the city's fire-fighting force were despatched post-haste to Ste. Anne. They were unable to save the Basilica, however, and could only restrict their efforts to preventing the spread of the flames.

The church was a temporary structure, used pending the completion of the new Basilica that is being erected to replace the one which was destroyed by fire in March, 1922. Beyond a scorching of the walls of the new church, which stands adjacent to the burned building, the material loss to it was little.

When the outbreak was first noticed smoke was belching from the windows in huge volumes and the crackling of the flames, the glare of which at times flashed through the heavy black clouds of smoke, to the accompaniment of crashing timbers as the interior of the building crumbled to ruin, were sufficient indications that to attempt to penetrate into the edifice would be unavailing and mean certain death.

All the priests and the crowd which soon gathered could do was to stand by in consternation and look on with broken hearts while the fire ravaged the church and destroyed its treasures. Indeed, it looked as though the entire village would be destroyed.

DESPERATE CONVICTS FELL THREE GUARDS

Thirteen Break From Penitentiary After Savage Revolver Battle.

Columbus, Ohio, Nov. 8.—Thirteen Ohio Penitentiary prisoners, including five serving life terms for murder, all members of the "Red Shirt Squad," classed as too desperate to work, felled three guards at the main entrance of the institution to-day and tramped through to the street outside.

Twelve were back in the penitentiary, while posses searched the countryside for the other one.

The break for liberty was made as visitors were being let in. Women screamed as a pandemonium of shots and shouts broke out and the rushing prisoners pushed them aside. The men were armed with crude knives, revolvers snatched from guards, heavy iron hooks and a stout table leg. All cells were quickly locked, and the visitors scrambled to safety.

Warden Preston E. Thomas shot one of the fleeing prisoners as he ran past the prison office, and another was hauled down by a fleet-footed guard near the penitentiary walls.

Nine of the convicts seized an automobile and drove for about 30 miles before they were overhauled and forced to take refuge in a cornfield. A hail of bullets from rifles and shotguns of the possemen drove them out of the field to capture.

Measles More Feared Than Scarlet Fever

London.—Authorities here have discovered that measles, once regarded with humorous scorn, are far more to be feared than the hitherto dreaded scarlet fever. Fifteen years ago, when the Metropolitan Asylum board decided to receive measles patients in their hospitals, it was agreed that the claims of those suffering from scarlet fever should have priority.

This week it was decided that the preference should be revised in view of the much higher mortality of measles and its greater destructive effects on child life. For some unaccountable reason measles has become a deadlier disease, while scarlet fever has lost its virility. Out of every million people living during the last fifteen years in London, 251 died annually of measles and 42 from scarlet fever.

60-Year-Old Crack in Big Ben is Revealed

London.—Big Ben, the largest clock bell in the world, and which strikes the quarters from the tower of the Houses of Parliament at Westminster, is cracked. This revelation was made by William Houghton, a member of the Ancient Society of College Youths, England's oldest bellringing fraternity, who has been making an inventory of London's bells for phonograph records.

The bell, which weighs thirteen and a half tons, has kept this secret for sixty years, for it is now disclosed that the crack developed when it was cast in 1858. A hole was then bored in the bronze to prevent the crack from extending, and Big Ben has been declared as healthy to-day as he ever was.

Don't be Fooled!

Government "control" does not cure these evils:—

1. BOOTLEGGING:—"Bootlegging to extent of 5,000 cases a month.... in and around Vancouver."—*The Hook* (an Anti-Prohibition paper).

"Bootleggers handle twice as much liquor as the Government stores."—*Vancouver World.*

2. FLASK DRINKING:—The Sherbrooke *Daily Record,* speaking about conditions in Quebec, says: "The hip-pocket flask is an institution to a greater extent here than in Ontario."

3. LAWLESSNESS OF YOUTH:—Andrew Blygh, J.P., of Vancouver, describing the state of affairs in British Columbia under Government "Control", says: "Any night, cabarets are operating with 50% of those present showing signs of intoxication. The dance halls are a public scandal with young girls slipping to the back alley to get a nip from the flasks of their escorts."

4. DRUNKENNESS:— There have been 851 names placed on the Indian List in Alberta during Government "Control", the majority of whom procured liquor without permits.

5. RECKLESS DRIVING:— Comparing Montreal and Toronto, Mayor Duquette of Montreal stated: "Montreal has registered twice the number of automobile accidents with half the number of automobiles."

¶ What WILL cure these evils?

¶ The honest, sustained enforcement of the Ontario Temperance Act.

Vote for Your DRY Candidate!

DUCK HUNTER DROWNS IN SCUGOG MARSHES

Young Scot, W. G. Dean, Was Prominent in Financial and Social Circles in Toronto.

Port Perry.—His body firmly held in the cockpit of his duck boat, William George Dean, aged 26 years, of 116 South Drive, Toronto, was found drowned in the marshes of Lake Scugog about a mile and a quarter south of here. Alone at the time, Mr. Dean, it was surmised, had in some manner upset the frail craft and had been unable to extricate himself.

Mr. Dean was well known to Toronto society as the son-in-law of F. G. Osler, of Osler & Hammond, Toronto brokers.

The upturned boat was discovered by E. F. Osler of Bronte, uncle of the drowned man's wife, and Samuel Wakeford and Jack Murray of Port Perry, the latter being an employee of the duck-shooting club to which the others belonged.

The four men had been out shooting together, and Mr. Dean had been left by himself in his duck boat in one "hide," while the other three went further through the marsh. The last time that they heard him shoot was at 1.30 p.m. When he was taken from the water it was found that his watch had stopped at 2.15 p.m., so that it is likely that he was precipitated into the water either at or slightly before that time.

Mr. Dean was born in Aberdeen, Scotland, and was a graduate of Oxford. He came to Canada late in the spring of 1925, and on June 3 of that year was married in St. Thomas's Anglican Church, Toronto, to Miss Phyllis Amy Osler, daughter of F. G. Osler. He and the former Miss Osler had met some months before while she was visiting the Old Country.

He was Assistant Manager of the Canadian Mortgage Investment Co., Toronto. During the war he held a commission in an Imperial regiment, and was wounded on active service.

Prince of Wales to be Invited to Ottawa Ceremony

Ottawa.—The Prince of Wales will be invited to officiate at the formal opening of the carillon of 53 bells in the Victory Tower on Parliament Hill some time in May, in the event of his acceptance of the invitation to come to Canada to open the Peace Bridge between Fort Erie and Buffalo. His Royal Highness laid the corner-stone of the tower upon the occasion of his first visit to Canada, seven years ago.

Pianist Still Plays at 100.

Berlin.—Heinrich Krause, a former teacher at Broskau, is showing the world that one can still play the piano at the age of 100. Though he gave up regular teaching twenty-seven years ago, he continues to play for an hour or more every day.

TRAPPING TRIP IN NORTH HAS TRAGIC END

Two Brothers Started, One Returns Bearing Body of the Other.

Fort William, Ont.—Bringing with him the body of his brother, Mike Turecki, a young trapper, arrived here after a long journey, partly by canoe and partly by rail, from Irish Lake portage, beyond English River.

The dead man is Lewis Turecki, 24, and the two arrived at Irish Lake portage last Thursday, when the fatal accident occurred. They hailed from Armstrong's Creek, Wis., and had intended to put in the winter trapping.

Thursday evening they started to get supper and Lewis went down to the canoe for provisions. In some unexplained manner a .22 calibre rifle in the canoe was discharged and Lewis was shot in the head. He lost consciousness and died in his young brother's arms two hours later.

Mike, who is 21 years old, would not leave his brother until the end came. Then he paddled 25 miles for help. The tragedy means the end of the dream of the two brothers to live a life of adventure and amass a competence as trappers.

Ferdinand's Death Car Takes Four in Final Crash

London.—The world's unluckiest automobile has come to a bad end. The car in which the Archduke Ferdinand and his wife were assassinated at Serajevo on June 28, 1914, with the first shots of the great war, has been completely destroyed after four persons lost their lives in its final adventure, according to dispatches from Vienna.

During the war the automobile was kept in the Vienna museum, from which it passed into the hands of the Jugoslav Governor of Bosnia. This official had so many accidents that he sold it and the next owner was found dead in a ditch with the car on top of him. The family then sold the car to Tibor Hirschfield a motor dealer in the Transylvania town of Tordo. Unable to find anybody ready to take a chance on owning it, the dealer used it himself. Driving to a wedding he collided head on with another auto. Four passengers were killed and the car was wrecked.

Six Motorists Are Injured As Car Plunges 50 Feet

Halifax, N.S.—Miss Theresa O'Hearn of Sydney was seriously injured and five others were badly shaken up when a car in which they were driving to Halifax from New Glasgow left the road near Waverley and plunged down a 50-foot embankment to the waters of Rocky Lake.

Forty-six Shorthorns Bring Average of $125

London.—Forty-six Shorthorn cattle were sold here at the auction held by the Western Ontario Consignment Sale Co. Twenty-five animals brought over $100. The average price was about $125. Elm Guard, a red male, champion bull of the show, held preceding the sale, entered by R. and S. Nicholson of Parkhill, was sold to John E. Hardy of Northwood for $155. Ridgebank Duchess of Gloster, second Grand Championship Cup winner, entered by A. W. Barrett of Parkhill, went to J. E. Ellis of Blyth at $125.

Top prices for males was $175 for Marshal Royal, entered by A. W. Barrett of Hyde Park, and sold to George Wettlauffer, New Hamburg. Two females brought $150 each, as top price —Gains Pride, entered by George Ferguson of Elora and bought by Noel Gibson of Komoka, and Lady May, entered by Percy Sutherland, and bought by Noel Gibson.

Settlers From U.S.

Ottawa, Ont.—Immigration to Canada of farm settlers from the United States for the month of September was particularly active, according to reports received from the agencies of the Dept. of Immigration and Colonization. Last month the agency at Fargo, North Dakota, headed the list of the 18 agencies of the Department in the United States with a total of 675 persons sent to Canada, an increase of 300 over September, 1925. These 675 settlers brought with them cash and effects valued at $726,095. Only 10 were not of the farming class.

The agent at Syracuse, N.Y., reports that more settlers have been sent to Canada through his office since April 1st, this year, than in any year since 1915. Reports for last month from the other agencies show increased migration of the best class of farm settler, when compared with September in recent years.

Parliament Soon to Meet.

Ottawa, Ont.—It is expected that the next session of the Canadian Federal Parliament will be opened on or about December 7th next. Before leaving for the Imperial Conference, now in session in London, England, Rt. Hon. W. L. Mackenzie King, Prime Minister of Canada, stated that he hoped to call Parliament to meet early in December. Considerable business that was not completed when Parliament dissolved last summer will be taken up and disposed of at the forthcoming session, which will be opened by His Excellency Lord Willingdon, Governor-General of Canada.

Britain Once Aided Lotteries.

The British government at one time promoted lotteries, the famous British Museum having been founded by one which raised $500,000 to purchase the collection of Sir Hans Sloane.

FAMOUS SURGEON CALLED BY DEATH

Dr. John Wishart, Long Associated With Western University, Dies in London.

London, Ont.—Dr. John Wishart of Dufferin Avenue, for many years one of the most distinguished of London's surgeons, and a leader of the older school in his profession, died early Thursday morning in St. Joseph's Hospital. Dr. Wishart had been ill for some months, and recently all hope for his recovery had been abandoned.

Dr. Wishart, who was the son of a farmer, was born near Guelph, and commenced life as a school teacher in his own home district. Subsequently he studied medicine under Dr. Grooves at Trinity College Medical School in Toronto. He proceeded later to England, and secured the degree of M.R.C.S. He travelled the world for years as a ship's surgeon, notably on a line to India and the Orient. He made many voyages also to Australia, South Africa and South America. He endured a hurricane off Cape Hatteras, witnessed many battles between Europeans and native tribes in Africa and had many interesting stories of the loading of ships by slaves under vicious slave-drivers.

He came to London in the seventies to establish what later became a notable practice, and he was associated for many years with the late Dr. F. R. Eccles. He was one of the founders of the Medical College of the University of Western Ontario, and served as a member of the faculty until 1910.

Distinguished Canadians To Receive Queen's Degrees

Kingston. — Viscount Willingdon, Governor-General of Canada, has consented to accept the degree of Doctor of Laws from Queen's University at the fall Convocation on Nov. 12, and it was announced at the university that Queen's will at the same time confer the same degree on Sir J. A. M. Aikins of Winnipeg and Sir Clifford Sifton of Toronto.

Farmer is Killed When Struck by Car

London, Ont.—Hubert Grover, a middle-aged Ekfrid Township farmer, was instantly killed near Melbourne when struck by an auto driven by John Vincent Huddard of Toronto.

Grover was walking behind a load of wood when the auto struck him. His body was crushed, his neck broken, and one leg was severed. The body was thrown into Huddard's car, which went into the ditch, throwing Huddard and the corpse against a fence. The body was between Huddard and the fence and this undoubtedly saved the motorist from serious injuries. One of the horses was so badly hurt that it had to be killed.

Huddard is under arrest on a charge of manslaughter.

LIBERAL-CONSERVATIVE CONVENTION

The Liberal-Conservative Convention held at Winchester Springs on Saturday November 6th, was the largest and most enthusiastic convention of Liberal-Conservatives held in the County of Dundas for many years.

Mr Eli Merkley, President of the association, occupied the chair, and after calling the meeting to order, Col. Lorne Mulloy, B.A., of Iroquois and Dr. Marcellis withdrew their respective nominations. As Mr. John McCormick of Winchester was the only nominee before the Convention, Col. Mulloy moved, seconded by Dr. Marcellis, that the nomination of Mr. McCormick be made unanimous. The President put the motion and asked for a standing vote which was responded to unanimously, and with much enthusiasm.

Mr. McCormick was invited to the platform and received a rousing reception. He dealt with the questions before the people and outlined his position on the temperance question, announcing his acceptance of the Government's policy as the only solution of this question. He declared himself a strong advocate of temperance and would use his best efforts to improving present-day conditions in that respect.

Hon R. J. Cooke, Minister without Portfolio, was present and gave a masterly address dealing with the evils of the present system under the O.T.A. in a very impressive and convincing manner.

FEW

People realize the importance of naturally and regularly eliminating the waste materials of the body each day. If your bowels are not properly throwing off the poisons of the body then the system gradually absorbs them and disease is the result.

CHIROPRACTIC ADJUSTMENTS

and

ELECTRO MAGNETIC BATHS

have been remarkably successful in eliminating the poisons from the body.

Each of the 109 Years

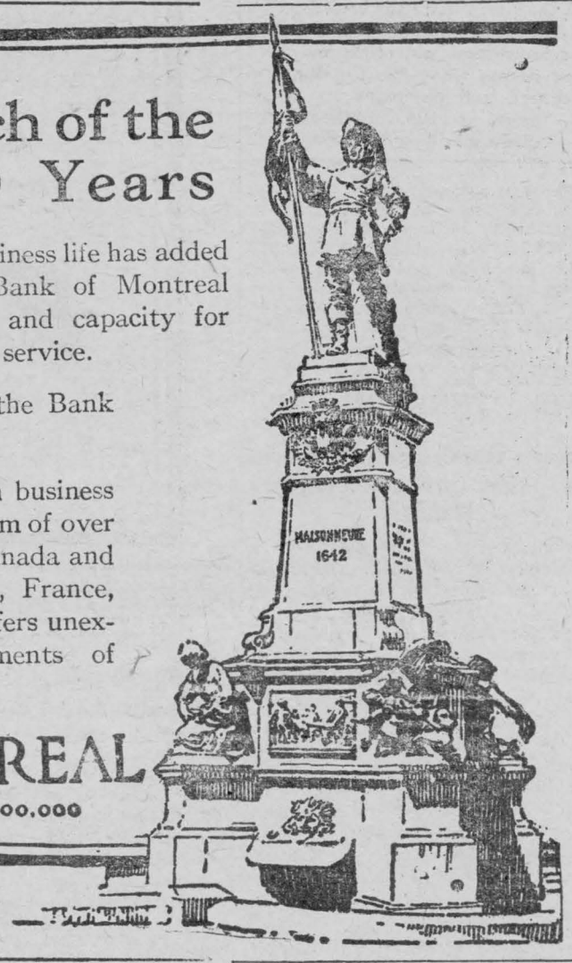

of its business life has added to the Bank of Montreal strength and capacity for financial service.

On the 3rd of November, 1817, the Bank established its first office.

At this, the beginning of its 110th business year, the Bank, through the medium of over 600 offices located throughout Canada and Newfoundland, in Great Britain, France, the United States and Mexico, offers unexcelled facilities in all departments of domestic and foreign banking.

BANK OF MONTREAL

Total Assets in excess of $750,000,000

Acclaim Won— Through Sheer Merit

Hupmobile Eight has outsold and is outselling cars of comparable price because it offers far more in beauty and luxury as well as in impressively finer performance.

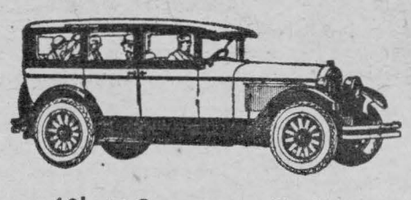

And it has successfully invaded the field *above* its price, for motorists have found that higher investment can bring no greater return in the essentials that constitute sound value.

Public appreciation of a new and finer development in motoring was never shown more conclusively and promptly.

Announced two years ago, Hupmobile Eight attained immediate leadership in the ultimate perfection of the straight-eight principle. It has steadily increased its prestige and its hold on popular favor every month since.

The reasons for this striking success lie within the car itself. For Hupmobile has brought to the Eight new smoothness and agility, new engineering superiorities and new ease of handling that literally place this car in a class apart.

We could detail at length the advanced engineering features which have contributed to Hupmobile's greatest achievement. But only a ride in the Eight will convince you that this car possesses in an enhanced degree all the virtues of the most costly cars of other types, at a price which immeasurably broadens the eight-cylinder market.

The Beautiful Hupmobile Eight 1700

O. P. SNYDER, MORRISBURG

Do you think it's the Recipes that make your Baking Good?

THINK now! Isn't it the way you put the ingredients together that makes or mars the bread, cake or pudding?

And doesn't the kind of flour used have a lot to do with results?

Are you doing justice to your recipes and your talent for baking?

Are you using Purity Flour—the flour used and praised by hosts of home bakers? For every baking need you can always depend upon the uniform excellence and the quality and flavour of Purity Flour.

Just phone your retailer.

Write for the 180 page, Purity Flour Cook Book. 30c in stamps brings it postpaid to you.

Worth lots more.

OUR CORRESPONDENTS

WILLIAMSBURG

Mr and Mrs. Eddie Deeks and Mr. and Mrs. Al. Weegar spent last Sunday visiting friends in Morewood.

Mrs. Wm. Fisher of Morrisburg spent a few days last week with her daughter, Mrs. Rob. Norval.

Mrs. George Seekings and little daughter, Catharine of Montreal and Mrs. Claude Merkley and children of Ottawa spent Thanksgiving holidays with their parents, Mr and Mrs. J. D. Beckstead

Mr. and Mrs. Stuart Casselman and little son of Vernon spent last week end with Mr. and Mrs. Walter Casselman.

Congratulations, Mr. P. E. Beckstead and Mr. Ross H Beckstead felt very fortunate when they were presented with a cabinet of Community Plate Silverware. Grosvenor design, won in a competition by the International Harvester Co. of Canada.

We learn with regret of the illness of Mr. Ward Casselman and hope he will soon be around again.

Mr. and Mrs. J. C. Payne of Brinston spent last Sunday with Mr. and Mrs. R. B. Strader

Mr. and Mrs. Rob Norval and children were guests of Mr. and Mrs. Hector Munroe of Winchester Springs.

Mr. and Mrs. Robbie Merkley and baby arrived home on Sunday last from Flint, Michigan, where they have spent the last few months.

Mr. and Mrs. Linden Shannette of Ottawa, Mr. and Mrs. J. W McIntosh and children and Mrs. Alice Strader of Ottawa spent Thanksgiving at their parental homes.

Mr. and Mrs. Harry Merkley and Miss Ruth of Ottawa were week end guests of the Misses Mae and Sarah Merkley.

Mrs. Brown of New York is spending this week with her mother, Mrs. Jeremiah Lane.

Mr. and Mrs. R. B. Strader and Miss Mary were guests at Sunnybrook on Tuesday.

The most interesting event of the near future will be on November 21 at Williamsburg when Dr A. E. Runnell, formerly of this place and now of Montreal will reopen the United Church. The Board has been busy for some time with extensive repairs and the decoration of the building. The new pews are to be in place for that occasion. It is hoped that many will take advantage of this opportunity to again meet with and listen to Dr. Runnell at morning and evening services

---

(Late for last week)

Mrs. Gordon Sheppard of South Mountain spent a few days last week with Mrs. Ed. Kenny.

Mr. and Mrs. Roy Merkley and little son of Smiths Falls are spending this week with their parents and other friends in this vicinity.

Mr. Wm. Somerville of Pleasant Valley was a guest at the home of Mr. Isaac J. McIntosh last Sunday

Mr. and Mrs. Jas. Cook Jr. attended the baptism of their little grandson, James Andrew Johnson, son of Mr. and Mrs. Bert Johnson of Dixons last Sunday.

Miss Martha Barkley visited her niece Mrs. Albert Utman on Wednesday of this week.

Mrs Davey and little Marie Merkley of Iroquois were guests of the latter's sister, Mrs. Strader McIntosh over last week end.

Born--To Mr. and Mrs. Albert Utman, Boucks Hill, on Thursday, October 7th, 1926, a daughter, Edna Gladys.

R. M. D. WILLIAMSBURG

Mr. and Mrs. Darcy Patrick and Mrs Chas. Barkley and baby Betty, spent Friday with Mr. and Mrs. Wm. L. Casselman.

Mr. and Mrs. Wm. Whitteker and son Howard spent Sunday at the home of Mr. and Mrs. Chas. F. Whitteker.

Mr. and Mrs. Vincent Casselman and baby Joyce spent Sunday visiting Mr. and Mrs James Casselman.

Mr. Clifford McIntosh spent Sunday with his parents, Mr. and Mrs. Louis McIntosh.

Mrs. Thos. H. Casselman spent the week end visiting friends at Glen Becker.

Mrs. Wm. L. Casselman and children spent Monday with her sister, Mrs Wm. J. Whitteker of Dundela.

Mr. and Mrs. Jas. Casselman, Mr. Ross Becksted, Mr. and Mrs. Wilburn Hall, were calling on Miss Ella Becksted on Sunday.

Mr. and Mrs. Mahlon Casselman and family spent Sunday at the home of Mr. and Mrs. Cooke Casselman.

Mrs. Joe Bailey spent last week visiting her mother, Mrs. Ella Merkley

Mr. and Mrs. Chas. Barckley and baby Betty, Mrs. Della Warner and daughter Goldie spent Sunday at the home of Mr. and Mrs. Thos. H. Casselman.

Mr. and Mrs. Lennie Merkley spent Sunday visiting at the home of Mr. and Mrs. Frank Merkley.

Mr. and Mrs Darcey Patrick spent Sunday at the home of Mr. and Mrs. Wm. Lee Casselman.

Mr. and Mrs. Harold Whitteker and Mrs. Joe Adams spent Sunday at the home of Mr. and Mrs. Archie Casselman.

Mr. and Mrs. Alfred Hall was calling on Mr. John Beckstead on Monday evening.

ARCHER

Mrs. Ed. Ault and sons, Lyman and Olin of Finch were the guests of Mr. and Mrs. C. J. Ault.

Born—At Archer, October 30th to Mr. and Mrs. Frank Moriarty of Finch, a daughter

Mrs. H. A. Gallinger and son Lloyd, spent a few days with Mr. and Mrs. Clarence Loucks, Cardinal, recently.

Mr. and Mrs. Fred Cunningham of Odessa spent Monday with friends here.

The Misses Hilda, Dorothy and Greta Gallinger called on Mrs. F. Moriarty at Mr. Thos. Manions on Saturday.

Mr. and Mrs Clarence Loucks and children of Cardinal spent Sunday with Mr. and Mrs. H. A. Gallinger.

Mr. and Mrs. F. C. Bodette spent Wednesday with Mr. C. Baker's.

GRANTLEY

Mr and Mrs. Walter Carr were Sunday guests of their daughter, Mrs. Roy Brownell, Newington.

Mrs. Ed. Perrault and son John spent Monday at Elma.

Mr. and Mrs. Chas. McMillan and family and Mr. and Mrs. Jas. Wallace spent Sunday with friends at Aultsville.

Mr. and Mrs. Murray McLean and children of Goldfield spent a few days at Mr. Howard Becksteads

The concert and supper at Grantley Union Church last Wednesday evening was a good success Everyone enjoyed themselves.

Visitors at Ed. Perrault's on Sunday were Mr. and Mrs. Jay Bailey, and Mr. and Mrs. James Perrault and sons Kenneth and Irwin, and daughter, Miss Inias and Miss Jennie Mitchell of Fitzroy Harbor, Ont.

Mr. and Mrs. Claton Hummell and baby and Mr. Grant Taylor of Chesterville were Sunday guests of Mr. and Mrs. Alex. Taylor.

CEDAR GROVE

Mrs. Amos Crites of Gallingertown visited her daughter, Mrs. J Beaupre, Thursday.

Mr. Owen Fincham of Louisville Landing, N.Y., spent the past week with Mrs. E. Jarvis.

Mr. and Mrs. Mason Beckstead attended the funeral of Mrs. Beckstead's uncle, Mr. John Styles at Froatburn on Saturday.

Mr. and Mrs. C S. McConnell and baby Wanda of Massena, spent the week end with Mr. and Mrs. Frank McConnell.

Mr. and Mrs. Reuben Gallinger of Bush Glen visited Mr. and Mrs. F. G. Dafoe on Sunday.

Mr. and Mrs. Wm. Fay of Aultsville visited Mr and Mrs. F. McConnell the 7th.

Miss Fern Gallinger spent Saturday with her cousin, Miss Muriel McConnell.

Mrs. W. T. Dafoe spent Saturday with Mrs. George Wells, Aultsville.

Miss Mabel Wells spent Thanksgiving day with Chesterville friends.

The Ladies Aid of Gallingertown were entertained at the home of Mrs Willis Wereley on Wednesday 10th.

CHURCH ROAD

The community was greatly shocked at the news of the sudden death of one of its oldest life-long residents, in the person of the late John Styles Sr., which occurred Thursday 4th.

Mr. and Mrs. W. E. Styles and children Flora and James of Great Bend, N.Y., spent the week end at Mrs. Styles' parental home here and attended the funeral of their uncle, the late John Styles, Saturday.

Mr. and Mrs. R C. Casselman and son Robert of Massena, were week end guests at J. J. Styles'.

Mr. W. E. Styles of Madrid attended the funeral of his brothr and visited J. J. Styles and family several days the past week.

Mr. Wm. Dafoe spent Monday at Mr. S. Dafoe's, East Williamsburg

Dr. M. W. Locke called at J. J. Styles' on Saturday.

Mr. and Mrs. Vincent Casselman and baby Joyce of East Milliamsburg were recent guests at Mr. Frank Casselman's.

Mr. and Mrs. Sam Swerdfeger and baby called at Mr. Roy Schell's one evening last week

PAYNE VALLEY

Mr. and Mrs. Lyle Hunter and baby Isabella of Morewood, spent Thursday with the latter's parents. Mr and Mrs. Kennie Cameron

Mr. and Mrs. Finley Campbell and daughter Joyce spent Sunday last at the latter's home, North Valley.

Mrs. Clifford Eligh spent the past week with her sister who is very ill at Ottawa.

We are sorry to report Mr. Clifford Eligh is suffering with blood-poison in his hand. We hope for a speedy recovery.

Miss Dorothy Shaver spent a couple of days last week with her friend Miss Ileen Macelheran.

Mr. and Mrs. Will Meldrum Sr, Berwick, spent Sunday with Mr. and Mrs. Will Meldrum.

Quite a number from here attended nomination at Finch on Tuesday

Guests at Mrs. George Eligh's on Sunday were Mr. and Mrs Milton Carr and family of Grantley and Mr. and Mrs. Arthur Hough and son Linden of Avonmore and Mr. Leslie Stephenson. Cornwall.

Miss Ruby Watson and Mac Eligh spent Thanksgiving with friends at Cornwall.

Guests at Mr. S. McIntyre's last week were Mr. and Mrs. A. Johnson of Maxwell.

Miss Ida Barkley, Newington, spent Tuesday with the family of Mr. George Eligh.

Mr. and Mrs. G. Eligh and daughters Mae and Ruby, spent Sunday last with friends at Aultsville.

Good Health for All the Family

Mrs. Mary Fourgere, Larry's River, N.S. writes:—"I was troubled with constipation for years." At last a friend suggested that I try Dr. Chase's Kidney-Liver Pills. I did so and must say that they have given me more relief than all the medicine I have taken during the last ten years."

The newest idea in medicine is to prevent serious disease by looking after the "minor ills."

Since about ninety percent of serious diseases develop from constipation and torpid action of the liver and kidneys the use of Dr. Chase's Kidney-Liver Pills to arouse the action of these organs is the most effective of preventives.

Backaches, headaches, indigestion, constipation, etc., soon disappear when this great regulating medicine is used.

Dr. Chase's Kidney-Liver Pills

RECEPTION AT BECKSTEAD

About seventy-five friends and neighbors attended a reception in honor of Mr. and Mrs. Keith MacLean last Tuesday evening, November 2nd at the home of Mr. J. R. MacLean.

Games and music were indulged in until about 11 o'clock when an address was read by Mr. Orak of Chesterville, and the presentation of a well-filled purse was made by Mr. Burton Beckstead. They were the recipients of many other lovely gifts also

Following is the address:

Chesterville, Nov. 2, 1926.

Dear Keith and Hilda:

Hearing of your return from your honeymoon, we your many friends, have assembled here in your old home to extend to you our heartiest congratulations and best wishes for your future happiness.

To you, Keith, although you have not been with us for a few years, we rejoice just the same in your newly found happiness, and feel pleased that you have conquered fate and brought home so winsome a bride.

And to you Hilda, we extend a hearty welcome, and hope to prove to you true friends and will try to make your future life as congenial as possible.

We ask your acceptance of these gifts as a slight token of esteem and may they oft remind you of all who are represented here tonight.

And may your united lives prove a blessing to all with whom you may come in contact.

We all hope, since you have set the sail to go through matrimonial life, it will be a peaceful, happy voyage.

May the blessings of the Almighty God be your portion.

Signed on behalf of those present

Burton Beckstead,
Clifford Carr,
Murray MacLean.

Keith thanked them all very kindly on behalf of his wife, inviting one and all to visit them in their new home at Massena, N.Y.

All joined in singing "For They are Jolly, Good Fellows."

Lunch was then served after which they all dispersed, having spent a very enjoyable evening.

IN MEMORIAM

In loving memory of my dear wife Mrs. Ruby Janetta Baker, who entered into rest November 10th, 1925

Gone, yet ever in the memory of her husband, Clarence.

HOUSE TO RENT

Mrs. K. M. McGannon desires to rent her home. It is furnished throughout and equipped with all modern conveniences--warm and comfortable home with a pleasant outlook--terms moderate.

CHANGE OF BUSINESS

I beg to advise the people of Aultsville and vicinity that I have purchased the undertaking business formerly owned by Mr. C. S. Ault and conducted by Mr. R. H. Hanes. I intend to put into service at once a first class motor hearse, thus enabling me to give prompt and efficient service both by motor or horse drawn vehicles.

Mr. R. H. Hanes, who for the past thirty-seven years has been associated with Mr. Ault, will still be in charge, and we can assure the public of prompt and up-to-date service.

Embalming work carefully executed; also a complete line of funeral requisites always on hand.

Night or day calls promptly attended to.

Phone: Aultsville Central.

Four Bedrocks of Safety

1. Dominion Government Bonds.
2. Provincial Government Bonds.
3. Municipal Bonds.
4. First Mortgages.

They Stand Behind Every Bond of The National Debenture Corporation, Limited

FOR every $100.00 invested in Series "A" NATIONAL DEBENTURE Bonds, $105.00 par value in the four securities named must be placed with Trustees. Of this amount, no less than $55.00 always must be in Dominion Government, Provincial Government and Municipal securities. No more than $50.00 can be in First Mortgages. No one Mortgage can be more than five per cent. of the total First Mortgages held.

All securities behind NATIONAL DEBENTURE Bonds are subject to the scrutiny of the Trustee, The Trusts and Guarantee Company, Limited, in addition to their examination by the officials of THE NATIONAL DEBENTURE CORPORATION, LIMITED.

THE NATIONAL DEBENTURE CORPORATION, LIMITED, is an Investment Trust, patterned after similar organizations in Britain. It is among the first of such institutions organized in Canada.

An Investment Trust, such as THE NATIONAL DEBENTURE CORPORATION, LIMITED, is an agency by which the combined funds of many investors, both in large and small amounts, are utilized to purchase such a wide variety of securities that safety of principal and interest is attained in diversification.

NATIONAL DEBENTURE Series "A" Twenty-Year Bonds are sold at 100 and bear interest at 5½ per cent.

NATIONAL DEBENTURE Bonds present a high yield, consistent with the maximum of safety.

Write to-day for our new booklet, "The Investment Trust". It will explain this safe, conservative investment.

For forty-three years, no bond recommended and sold by our organization has failed to pay principal and interest. 14

HOW TO USE THE ROCKS

BY L. H. COBB.

Rocks on a farm are not an unmitigated evil, though I am very sure I should not buy a rocky farm for the sake of the rocks; I would prefer to haul the rocks from some other man's farm if I had a choice in the matter.

An uncle of mine had a farm that was rocky all over, and he made rock fences that were still standing when he died at a good old age, and I guess some of them are still doing service as fences and rabbit harbors. I never was impressed with his rock fences, though there can be no doubt that they served their purpose well and lasted with the best fences, built as he built them; and considering that the material was near at hand and had to be taken from the fields, his plan was all right for his day. Now I think we can find better use for the rocks.

My uncle also used a good many rocks to build a dam across a draw that was cutting a cultivated field in two, and the dam caused the draw to fill until there was but a slight depression. This was done gradually, but before he died the terrace above the wall was above his head when he stood in the draw below it.

Concrete work calls for an abundance of rock, and an excellent concrete wall six inches or more in thickness can be made with a big saving in cement and labor of rock crushing if the rocks are used whole and the concrete poured around them. To do this it is only necessary to see that at least a half-inch of space is left between the rocks and the forms. Mix the cement with sand, in the proportion of one part to two, and have the mixture thin enough to run down among the rocks freely; then build up the rocks just ahead of the filling so the concrete can be worked down to insure a good job. No better or more lasting wall could be constructed, and the saving in cement is in proportion to the size of the rocks used and the solidity of the rock work, though if small rocks are used it will not do to place them so close as to prevent a strong binding of the cement-and-sand concrete.

A farmer who wanted to build a machine shop and implement shed hired a rock-crusher to come to his place and crush the rock he had picked up and hauled. The crusher was to cost him $1 a yard of crushed rock with a minimum of 50 yards, which was a lot cheaper than hand crushing, and made his rock supply cost him low. With his ton truck, on a rocky hillside, it was no hard job to gather the rocks needed. Quite a few farmers have crushers of their own, and in some cases several farmers own a crusher jointly.

Concrete is the most lasting material we can use on the farm for the purpose that it serves, and it can be adapted to a great many purposes at that—silos, farm buildings, troughs, manure pits, scale pits, floors for feedings, walks and curbs, and numerous other things. One farmer I know paved his barnyard in the semicircle that is formed by the buildings, from the edge of the lawn back, so there will be no mud between the house and the buildings. His arrangement is excellent, for the stock does not come inside the line of the buildings. The poultry-house, machine shop, implement shed, cow barn, silos, manure pit and horse barns all border this concrete yard, while a driveway enters from the highway, along one side of the lawn, runs back to the paved yard and out to the road again at the other edge of the lawn.

Home Fattening.

Is it best to fatten at home? That depends upon conditions. If you are planning to kill for market, by all means first fatten the birds. You may take ever so much pains with the killing, dressing, wrapping and packing but if the birds are of poor quality or are not fat, you have wasted your time. A dressed bird never will be a better grade than when it was living but it does pay to dress them for market if you have the time and can fatten them first.

There are two ways to fatten chickens.

One way is to put them in a small pen, allowing about one and one-half square feet of floor space for each bird. If there is more space, the birds will exercise too much. If less space is allowed, the weaker ones will be trampled upon as well as be crowded away from the feed. The troughs or feed pans should be on blocks at least four inches above the floor to keep the chickens from standing in the feed. Do not keep feed before them all of the time. Give only what they will eat in half an hour then fill the troughs with water until the next feeding time. Feed either a prepared fattening mash or mix one at home. Give cracked corn soaked in milk or water for the evening feed. If possible, fatten the young chickens in a separate pen from the old ones, as they need a longer time since they are growing as well as fattening.

The other way to fatten is to use crates as in the commercial feeding plants. Be sure the crates are not in a draft. A room in a barn, the driveway of the corn crib (if there are doors at the end) or a place in the poultry house may be used. A crate twenty-eight inches wide, thirty-six inches long and fourteen inches high with a partition lengthwise through the centre is a good size. This will hold from twelve to twenty depending on whether cocks and hens or spring chickens are being fattened.

Crate fattened birds shrink too much to be profitable if they are shipped live weight, so unless you plan to dress them, it would be better to fatten them in a pen.

Dress Turkeys Before Shipping.

Authorities agree that whenever possible turkeys should be sent to market dressed. In his bulletin on "Turkeys and their Management," published by the Department of Agriculture at Ottawa, Mr. A. G. Taylor of the Poultry Division of the Experimental Farm, advises starving the birds during twenty-four hours before killing. During this time they should be given all the fresh water they can drink, which aids in cleaning the intestines and improving the flavor of the flesh. Dressed birds, Mr. Taylor adds, should be thoroughly cooled before packing and the carcasses should be packed firmly in the cases so as to prevent shaking about when in transit.

A Home-made Fruit Bowl.

If you have an old wooden bowl that is not in active use, buy some paint and shellac—dark shades are preferable—and give it a coat of paint, and when thoroughly dry shellac it. The result will be a very attractive fruit bowl. If you know how to make pretty borders, such a finishing touch will make the bowl even more attractive. —I. M. S.

Quality commands best prices, but quality can not be secured from feed alone. Unless the feed is utilized to best advantage, quality will be lacking.

Selecting Stockers and Feeders.

In selecting stocker and feeder cattle the buyer should keep in mind beef type, breeding, uniformity, quality and development for age, says Prof. Wade Toole of the Animal Husbandry Dept. O.A.C. All cattle so selected should at least be sired by a pure-bred bull and should show as much breed character as possible. Blood tells, and, if it is practicable, it is well to select cattle which show similarity in breed character, because this makes for uniformity and uniformity always has a market value. For instance a carload of cattle of the same breed and color, of equal weight and finish will generally meet a more ready sale than a mixed lot. Quality is important and size for age is a factor because stunted cattle rarely come back and make the gains that thrifty cattle do. It is well to select cattle that are low to the ground, showing short, broad heads with strong muzzles and with plenty of heart girth and middle giving every indication of being able to handle large quantities of feed to advantage. The long-legged, shallow-bodied, wasp-waisted, weak-muzzled, cat-hammed steer is almost invariably a poor doer and a money loser. As mentioned elsewhere, the original weight of feeding cattle is important, because whatever spread in price the feeder shows, of course, a profit on this original weight, and for short-keep steers the heavier feeder often gives a greater chance for profit, whereas for the long-keep cattle lighter steers are often selected.

Breeding Sows for Two Litters a Year.

In discussing the breeding of sows for two litters a year the Dominion Animal Husbandman (Mr. G. B. Rothwell) in his recently published pamphlet on Breeding and Feeding the Market Hog, points out that under the two-litter-a-year plan the spring litter must needs be farrowed not later than the middle of April. This is necessary since September may be regarded as the limit month for fall-farrowed litters except in the case of the more specialized breeder who has special facilities for housing and caring for the later litter. The average farmer can, however, so regulate his breeding dates that the second litter will arrive not later than the end of September. Thus enabling the sow to have a brief rest between litters and to be on the gain before being bred for the second litter. It is very important adds the Dominion Animal Husbandman, that the sow be allowed two or three weeks to get on the up-grade, particularly if she has just weaned a large litter. Close breeding should be attempted only when the sow is in good condition, where, for instance, the former litter has been small.

Mr. Rothwell suggests in the pamphlet, which can be had free of cost by applying to the Publications Branch, Ottawa, that for the spring litter the sow should be bred from the middle of November to December 20 or not much later. She will then farrow from somewhere around March 6 to the middle of April. She can then be bred for the fall litter from about the first week of May to not later than June 10 or 12 in order to farrow by the end of September.

Willie heard grandma say she had mislaid her spectacles, and when found they were broken. That evening Willie gathered the eggs, and found one broken. He rushed into the house: "Grandma! oh, grandma! one of the hens mislaid an egg."

VERY SMART FOR THE JUNIOR MISS.

This chic little two-piece dress with skirt joined to lining top has groups of plaits in front and back to give the necessary fulness. Long sleeves gathered into narrow wrist-bands, and a turn-down collar are attractive and becoming features. No. 1391 is for girls in sizes 8, 10, 12 and 14 years. Size 10 requires 3 yards 36-inch material; ⅞ yard lining. 20 cents.

Our new Fashion Book contains many styles showing how to dress boys and girls. Simplicity is the rule for well dressed children. Clothes of character and individuality for the junior folks are hard to buy, but easy to make with our patterns. A small amount of money spent on good materials, cut on simple lines, will give children the privilege of wearing adorable things. Price of the book 10 cents the copy.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

Brightening the Kitchen.

So often there is no convenient place in the kitchen for a wood box; the ordinary one is a catch-all for paper and trash of any kind and is consequently an eyesore. I have had a window seat built of scrap lumber; the hinged lid lifts and is held in place with a button which is attached to one side of the frame. This protects the glass while the box is being filled. When closed it is the favorite spot of the whole family. Being near the stove, it is warm. The size depends entirely upon the size and height of the window.

I was real proud of my freshly painted kitchen in the spring, as I had used only one coat of flat paint, which covered the spots nicely. But soon finger marks began to show around the doors and no amount of washing would remove them. While painting the table legs and lower part of the stove with black enamel, I conceived the idea of painting an equal distance above and below the locks on all doors with the black. The effect is very pleasing and now no finger marks can be seen.—L. B.

TERMS OF PAYMENT VARY CONSIDERABLY

When giving a mortgage deal only with reputable firms or individuals and get dependable legal advice. The terms of payment of principal and interest vary a great deal. Very often a first mortgage should be what is called a straight mortgage or one on which interest only is paid periodically and the principal not until the end of five years. This is particularly desirable when a second mortgage must also be carried as in this case substantial periodical payments plus accrued interest must be made on the principal.

You should not only consider the terms of mortgages in relation to your own ability to pay, but also as they affect the sale of your property at any time.

What are the chief considerations in selecting a home-building plan? Arranged in order of importance they are roughly as follows: Economic use of materials and labor; Convenience; Comfort; Interior attractiveness; Exterior attractiveness; Finish.

Building a home is a serious business, and you should undertake it only with a serious sense of the future advantages or disadvantages that may arise from the careful or negligent study of those features which make a home valuable or the reverse.

It is well to reverse what would seem, at first sight, the logical method of planning a home. Don't look at your dream house from the outside inwards. Look at it from the inside out. Try to place yourself in imagination inside it. Study the arrangement of the rooms, stairs, etc., take into consideration the saving of steps, the later installation of labor-saving devices, the question of lighting, passages, cupboards, windows, recesses, heating and ventilation.

Jan Masaryk

Czecho-Slovakian minister to Great Britain.

Use for Surgeon's Tape.

The adhesive tape that every medicine closet holds may be very useful in other household ways than that of helping to hold in place the small bandages occasioned by cuts and burns. One of the best of these is its use in corking salt-cellars, both individual ones and large ones. Cut a tiny strip of the adhesive tape to cover the cork hole of the salt-cellar's base. Fill the salt-cellar. Place the tape over the cork opening. This will eliminate the irritating trouble with corks that fall out of the salt-cellars and get lost. The tape is permanent till you wish to fill the salt-cellar again.

Bottles that have no corks may also be covered with the adhesive tape when standing in the medicine closet.

For marking children's rubber slickers or rain capes and rubbers, adhesive tape is vey useful. Write the owner's name in indelible ink upon the tape's smooth surface. Cut the length and apply to the base of the hanger or at back of the neck of cape or slicker. A good place to put the marking tape in rubbers is at the side or under the storm cap.—P. B.

"TAKE TIME"

BY GLADYS. E. TAYLOR.

One of our professors at College once said that he could preach a sermon on the two little words, "take time." I do not know what he might have said in such a sermon but I have often thought of this counsel and have tried to adopt it into my own life.

The life of the farm woman is of necessity full. I have learned this from experience and yet my advice to all farm women is "take time" to live! Learn to work for speed and efficiency in your housework. Drain your dishes instead of wiping a presumably unsanitary towel over them. Use a pretty oil-cloth table cover that can be wiped off after every meal. Teach the children to put things away after using them. Do not spend time to iron common sheets, pillow slips and other articles which are just as well—and, some maintain—better without it. These are but a few of the time-savers which can be usd and thus permit us more time to "live."

Take time to get acquainted with those children of yours. They need your comradeship and sympathy, whatever their ages. Show an interest in the things which interest them. Learn their strong points and help to develop them. Remember that you are their most influential teacher. Give them daily lessons in honor, kindness and justice. Teach them to like good books and good music.

Take time to read. As a voter, it not only is your privilege but is your duty to keep posted on current affairs. Do not vote for a certain individual because he runs on the ticket of the party to which your husband or father belongs, but vote for him because he is the best man! Read the classics. Good literature will both rest and uplift you.

Take time to care for yourself. Be as careful to make yourself attractive in the eyes of your husband as you were when he was your lover. Pay especial attention to your hair, your nails and your clothes. Have outside interests which will take you among women who have something else to talk about than their neighbors' affairs. Active thought stands off old age.

Take time for picnics and pleasure excursions with your family. Take time to get "snaps" of your children as they are growing up. They will mean much to you in later life.

Take time for spiritual life. Your soul needs food even more than your body.

So I might go on and on, saying take time to do these things which, after all, are not for time but for eternity. Think them out for yourself.

Storm-Bound.

In the midst of the spelling lesson, Miss Allison noticed that the wind was rising. She glanced from the window and saw that snow was beginning to fall.

"That is strange," she said to herself. "The sun was shining a few moments ago. It is probably just a cloud passing over."

The snow, however, continued to fall and the wind blew harder and harder. By noon the air was thick with snow driven before a gale from the north. Miss Allison's room was getting cold in spite of the big stove in the corner.

Miss Payne, the other teacher in the little country schoolhouse, appeared in the doorway.

"It is cold in here," she said, "you had better all come into my room with your lunches. It is much warmer in there for we don't feel the wind so much."

So Miss Allison and all the children accepted the invitation.

"It seems to me," said Miss Payne in a low tone to Miss Allison, "that we ought to dismiss them and let them get home before the storm is any worse."

"We couldn't do that," said Miss Allison. "Look at those drifts. Some of these children come from over a mile away. When the time comes," she added smiling, "there will be a way."

There were no lessons at all that afternoon. The children sat two in a seat and the time was spent in all sorts of ways. First Miss Payne read a story, then one of the boys recited, then they sang a song.

Once one of the children, looking out of the window at the piling snow, wondered how they were ever going to get home.

"It isn't time yet," said Miss Allison. "When it is time there will be a way and a good one."

"Let's sing a song about spring," suggested Miss Payne. So they sang one about soft breezes and bright sunshine and laughed to see the snow go dashing past the windows, driven by the cold north wind.

"It's getting dark," said one of the little girls in a frightened voice.

"That is because the clouds are hiding the sun," said Miss Payne. "See, the clock says it isn't late at all." So the time passed. Then just before the usual time for school to close, one of the boys sitting near the window gave a shout—"Look, look," he cried, and all the children crowded to see.

"Somebody's coming," laughed the little girl who had been frightened a little while before. "I see Uncle Dan, driving Tom and Joe."

"I see Dad," cried another.

Through the drifts the powerful horses fought their way and four big bobsleds drew up before the door of the little schoolhouse.

"Come on," called Uncle Dan cheerfully. "Lots of room for everybody."

There was plenty of straw in the big sleds and warm blankets and robes to keep out the storm.

Everybody was soon tucked in warm and comfortable. "I was scared this afternoon," confessed the little girl to Uncle Dan as they drove along. "But Miss Allison said there would be a way when the time came, and there was."

"There always is," said Uncle Dan.

Stirring.

Native (to a vacationist who is complaining about the dull locality)—"Well, sir, you should stay here until next week, and then you will see the whole countryside stirred up."

Vacationist—"What will happen?"

Native—"Plowing."

Little black bear visits camp at Lake Wabasso, near Jasper town, Alberta. This is in the area of the Jasper National Park, one of the world's great playgrounds.

Light Burns for "Yard" Dead.

In one of the corridors of Scotland Yard burns a light which never has been put out, and the intention is that it never shall be. It burns in memory of those men of the "Yard" who were killed in the war, and has an inscription to that effect.

RHEUMATIC PAIN AND THIN BLOOD

Liniments of No Avail — The Trouble Must be Treated Through the Blood.

The most a rheumatic sufferer can hope for in rubbing something on the swollen, aching joints is a little relief and all the while the trouble is becoming more firmly rooted. It is now known that rheumatism is rooted in the blood, and that as the trouble goes on the blood becomes still further thin and watery. To get rid of rheumatism, therefore, you must go to the root of the trouble in the blood. That is why Dr. Williams' Pink Pills have proved so beneficial when taken for this trouble. They make new, rich blood which expels the poisonous acid and the rheumatism disappears. There are thousands of former rheumatic sufferers in Canada, now well and strong, who thank Dr. Williams' Pink Pills that they are now free from the aches and pains of this dreaded trouble. One of these is Mr. Robt. A. Smith, Mersey Point, N.S., who says: —"Some years ago I was attacked with rheumatism, which grew so bad that I could not walk and had to go to bed under the doctor's care. It is needless to say that I underwent a great deal of suffering. The doctor's medicine did not seem to reach the trouble, so when I was advised to try Dr. Williams' Pink Pills I did so, and after taking them for some weeks I was able to get out of bed. I continued using the pills and was soon able to work, and I have not been troubled with rheumatism since. In other respects also I derived a great deal of benefit from these pills and I think them a wonderful remedy."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Rains Reopen Mines.

Heavy rains in British Guiana have supplied water for the working of many diamond mines that had been idle for some time.

The Scriptures.

There are no songs comparable to the songs of Zion, no orations equal to those of the Phophets, no policies like those the Scriptures teach.—Milton.

There is no empty vessel that makes so much noise as a man who is full of himself.

Homeward Bound for CHRISTMAS

Old hearts will beat more quickly; old eyes will shine with happiness when YOU go home. And what a joy it will be for you, too, visiting the scenes of childhood days and meeting friends of other years!

Make arrangements now to go home this Christmas on a liner of the Cunard or Anchor-Donaldson Canadian Service. The voyage will be an unforgettable pleasure. The ship's comfortable appointments and the courteous, intelligent interest taken by every member of the staff in your well-being make your journey a real joy.

Christmas Sailings from Halifax

CUNARD ANCHOR-DONALDSON

CANADIAN SERVICE 183

Mapping a Hitherto Unmapped Area Northwest of and Adjoining Red Lake.

A few weeks ago it was announced in the press that the federal authorities were engaged upon a mapping programme covering the region in the vicinity of Red Lake. In accordance with this mapping programme a provisional map of the Red Lake disrict itself had been issued to meet the urgent need for the presentation of authentic topographic information; and the subsequent publication of map sheets lying on all sides of the Red Lake region was provided for. Two of these projected sheets were issued during the past few weeks, namely, the Lac Seul sheet and the Points du Bois sheet, lying respectively to the southeast and the southwest of Red Lake, and north from the main line of the Canadian National railways. The mapping programme has been carried on by the Topographical Survey, Department of the Interior, in co-operation with the Surveys Branch of the Department of Lands and Forests, Ontario, and the Royal Canadian Air Force.

A third sheet is now ready for issue to the public. This is known as the Carroll Lake sheet and comprises an area lying northwest of and adjoining Red Lake, included within latitudes 510 and 520 and longitudes 940 and 960.

These sheets are published on the scale of four miles to the inch. They are issued in folder form for convenience in carrying in the pocket and may be obtained for the nominal fee of fifty cents by writing the Topographical Survey, Department of the Interior, Ottawa. They are also issued in plain form, unfolded, for which the fee is twenty-five cents.

Up to the time that this mapping programme was undertaken, there was very little authentic information available regarding the topography of this region, and most of the previous maps showed practically blank spaces here. This is far more a true representation of the case, for the topography actually consists of a maze of lakes, rivers, and connecting waterways of all sizes and shapes scattered throughout an entirely forested territory. The value of a good map in such country is at once apparent.

But He Knew the Dog.

The man who dashed into the police-station at half-past two in the morning looked as if he had been having a nightmare.

"My wife!" he gasped. "I want you to find my wife! Been missing since eight this evening! Oh, find her for me!"

"What's her description?" asked a sergeant. "Height?"

"I—I don't know!"

"Weight?"

"The husband shook his head vaguely.

"Color of eyes?"

"Er—average, I expect."

"Do you know how she was dressed?"

"I expect she wore her coat and hat. She took the dog with her."

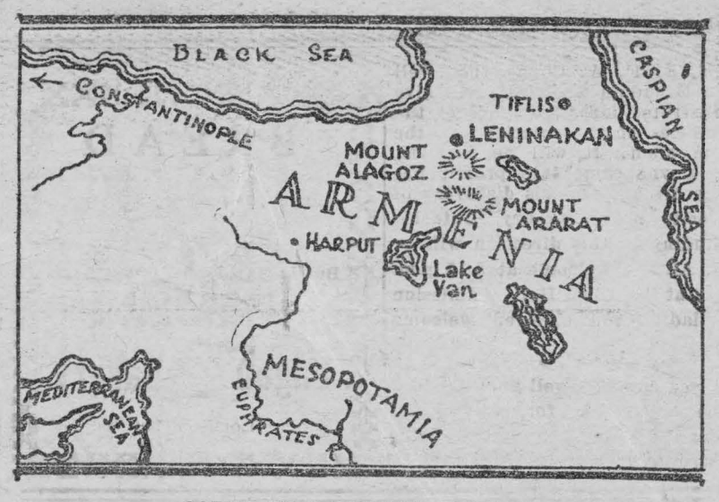

"What kind of a dog?"

"Brindle bull-terrier, weight fourteen and a half pounds, four dark blotches on his body, shading from grey into white. Round, blackish spot over the left eye, white stub of a tail, three white legs, and right front leg brindled, all but the toes. A small nick in his left ear, a silver link collar, with—"

"That'll do!" gasped the sergeant. "We'll find the dog!"

The Beginnings of Music.

It is a curious and interesting fact that although Eastern music and Western music are so different from each other they have developed on very much parallel lines. Pythagoras, who was the man who first discovered the principles by which different notes may be fixed, the fact that a string divided into two gives a note an octave higher than its full length, and similar facts, was born about thirty years before Confucius who, besides giving China its standard Philosophy which has lasted to the present time, established its musical principles, comparing the motion or rhythm of music to that of the stars and giving the scales the names which fix their order of importance. Within a hundred years of that time Indian music was first placed on a scientific theoretical basis which enabled it to be taught by other means than merely by ear.

SCENE OF ARMENIAN SHOCKS

Above is shown a map of Armenia reported badly razed by the succession of quakes. Mount Alagoz, Mount Ararat, the legendary resting place of Noah and Leninakan, are said to be the shock centres.

Street Beauty.

I never leave London without a pang. I never come back to it without realizing afresh its beauty and its glamor. In fog or sunshine, in rain or snow, with its turmoil and its rush, I love the Town.

Not long ago I happened to be in Westminster on a December afternoon. It had been raining heavily all day, and the sky, which had just cleared, was flooded with a golden light. The towers of the Abbey stood up against it in misty blue. A string of hansom cabs coming along, reflected in the wet streets, looked like a procession of black gondolas. It was a striking effect. I gazed at it entranced, and then walked home feeling as if I had had a glimpse of fairyland.

Men talk rapturously about "mountain distances" and ::air perspectives"; but what can be more striking than the blue-grey fog that turns the end of a London street, as you look down it, into mystery and beauty, that gives to the present a tinge of uncertainty of the future, and throws a halo of poetry over the most common-place homes?—Rose Barton in "Unfamiliar London."

Diabetes.

Once upon a time we saw a poster which read: "Why is food important? Because we are food on legs!" We hope we are more than just that, but the subject of food must give us pause, although it is rather too much to say "Tell me what you eat and I will tell you what you are," yet any one in any part of the country to-day will tell you that if you eat too much sugar and starchy foods it will doubtless bring on diabetes. That is exactly what happens when the body is not able to properly take care of the sugar and starch contained in the food we eat.

What are we eating? "We are eating more cereal products than any of our ancestors ever ate in the past, except perhaps the ancient Egyptians, who were the grain-eaters of antiquity.

"We are eating much more sugar than any one in the world ever ate before. One hundred years ago the average consumption of sugar per person was about eleven (11) pounds in a year; to-day it is one hundred (100) pounds" ! During the war we ate less sugar—diabetes was reduced; after the war we increased our sugar and diabetes increased.

The main cause of diabetes is wrong food—too many sweets and starchy foods. No sugar in tea and coffee, no candy, no pastry, no iced cakes, none but milk puddings, no cereals—are some of the "don'ts" for those who have a tendency to diabetes; use simple foods: milk, eggs, lean meat and fish, fruits and vegetables, bran muffins or brown bread. This is the best preventive—proper diet.

Charged Water.

"He carries a mighty big bill at the drug store, I hear."

"Yes, even the water he gets there is charged."

Artists' Need of Fitness.

It is not necessarily higher moral qualities that make the musicians of to-day more sober than those of a few generations ago, but stern necessity, because the music of to-day is so much more difficult to play and sing. A humorous description of the effect of indulgence on orchestral players was given many years ago by the late Sir August Manns, the famous conductor of the Crystal Palace Orchestra. He said that the players "were always in bad order on Monday morning" because on Sundays they smoked too much and kissed their wives and sweethearts so much that the lips of the wind players were all out of order. Modern music, as well as the conditions of professional life, demands so much from the artist that any lack of fitness results in an imperfect performance, while the criticism of managers, conductors, press and public alike is so keen that the artist cannot afford to be less perfect than the highest he can give.

BABY'S OWN TABLETS ARE OF GREAT VALUE

To All Mothers Having Young Children in the Home.

No other medicine is of such aid to mothers of young children as is Baby's Own Tablets. The Tablets are the very best medicine a mother can give her little ones during the dreaded teething time because they regulate the stomach and bowels and thus drive out constipation and indigestion; prevent colic and diarrhoea and break up colds and simple fevers.

Concerning Baby's Own Tablets, Mrs. John A. Patterson, Scotch Village, N.S., says:—"I have six children, and all the medicine they ever get is Baby's Own Tablets. I would use nothing else for them and can strongly recommend the Tablets to all other mothers."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Bugville Athletic Note.

"Bugville's champion shot-putter in action."

Prelude.

The little bird sits in the nest and sings
A shy, soft song to the morning light;
And it flutters a little and prunes its wings.
The song is halting and poor and brief,
And the fluttering wings scarce stir a leaf;
But the note is a prelude to sweeter things,
And the busy bill and the flutter slight
Are proving the wings for a bolder flight!

—Paul Laurence Dunbar.

After Shaving—Minard's Liniment.

The Best Country.

Such is the patriot's boast, where'er we roam,
His first, best country, ever is at home.
And yet, perhaps, if countries we compare,
And estimate the blessings which they share,
Though patriots flatter, still shall wisdom find
An equal portion dealt to all mankind;
As different good, by art or nature given,
To different nations makes their blessings even.

—Goldsmith.

RED ROSE TEA "is good tea"

Perhaps you use good tea. We think Red Rose extra good.

Health Partnership and the Individual's Responsibility.

Industrial Hygiene means promotion of the health of industrial workers. This necessitates the most practical co-operation between the two great groups concerned, the employers, who are responsible for health conditions in the plant, and the employees, who are responsible for health conditions in the homes, and, more important still, for their own private health habits. The benefits to health resulting from good working conditions (such as adequate light, ventilation and temperature and facilities for nourishment and cleanliness) are enormously minimized if not entirely counteracted unless the individual employee is a partner in the health campaign, is convinced of the importance of such factors, and tries to obtain them in his home. Health can not be imposed on anyone; to some extent each man must be a self-starter.

Broadly speaking the health factors which are the individual's private responsibility are housing or rooming arrangements, food, sleep and personal hygiene. The importance of these things cannot be over emphasized—if bad, they can shatter the strongest physique; if good, they can conserve and strengthen the most delicate. The problem is similar for men and women but most difficult for women who are apt to be hampered by small means. It is for this reason that the Department of Health brought out the well-known book on the subject—"Health Confessions of Business Women," a book by business women themselves for business women, covering all the personal factors which bear on health. It may be had on application to the Division of Industrial Hygiene, Ontario Department of Health, Spadina House, Toronto. Over 12,000 have already been requisitioned, but a limited supply is still available.

Our Most Dangerous—

—Day is the one on which we complete our masterpiece.

—Friend is the one who tells us our second best is good enough.

—Enemy may be our friend who knows the most about us.

—Dollar is the one we got without earning it.

—Moment is the one when our loyalty to a friend conflicts with loyalty to duty.

—Ambition is the one that ignores our conscience.

—Amusement is the one that leaves us less fit for work.

PAINS ALL OVER BODY

Two More Cases of Feminine Illness Relieved by Lydia E. Pinkham's Vegetable Compound

Barrington, N. S.—"I had terrible feelings, headaches, back and side aches and pains all over my body. I would have to go to bed every month and nothing would do me good. My husband and my father did my work for me as I have two children and we have quite a big place. I read in the paper about Lydia E. Pinkham's Vegetable Compound, and then got a little book about it through the mail, and my husband sent to Eaton's and got me a bottle, and then we got more from the store. I am feeling fine now and do all my work and am able to go out around more. I tell my friends it is Lydia E. Pinkham's Vegetable Compound that makes me feel so well."—Mrs. VICTOR RICHARDSON, Barrington, Nova Scotia.

Dull Pains in Back

St. Thomas, Ont.—"I took four bottles of Lydia E. Pinkham's Vegetable Compound and found great relief from the dull, heavy pains in the small of my back and the weakness from which I suffered for five years after my boy was born. After taking the Vegetable Compound and using Lydia E. Pinkham's Sanative Wash I am feeling better than I have for the past seven years, and advise my friends to take it."—Mrs. F. JOHNSON, 49 Moore Street, St. Thomas, Ont.

• • •

Iroquois, Nov. 10th-- Clarence Scott, of Iroquois, had a narrow escape from the cold waters of the St. Lawrence, when driving out the cross road by the Churches at Riverside, three miles east of Morrisburg. Not noticing the turn when he came to the main highway, he drove down the bank of the river. His car turned over a couple of times, and the surprise is the young man was not hurt, but dazed and badly shaken up. Residents hearing the crash, hurried to his assistance, and Mr Link brought him to his parents' home in Iroquois. At last reports the car had not been recovered.

• • •

Iroquois, Nov. 10--Two bicycles stolen in Cardinal, the night of the 8th, alleged to have passed east on the highway, are being traced by men of the police staff. Mr. Howard Hutchison, an Iroquois man, while in Aultsville, a day or two ago, with his car in a garage, found when he was ready to return to his home that it had been relieved of its tires. Police are also endeavoring to find the guilty party or parties.
