Spring is sure here. . .you can tell by the yellow glow from the Dandelions on almost every piece of grass in town, not t mention the abundance in the parks. Some people don't seem to like the small yellow flowers the Dandelion brings in such glory each year. Looking on the bright side of things, however, compare them with the Mustard, Pig Weed and many other weeds such as the Burdock . . and the darned Dandelion doesn't look so bad, now does it?

Well we tried!

* * *

We wouldn't want the road superintendent's job in Matilda Township no matter what the salary. Not that we're trying to butter up the man, either.

During a two month's period each Spring the roads fall to pieces, as it were. Nothing that anyone can do, except maybe spend a couple of million dollars, which none has, would remedy the situation. Yet each Spring when the potholes appear, everybody and his uncle goes to work belaboring the road super and the council . . not forgetting the reeve. They're at fault, they should pave the roads!

With over 100 miles of roads in the twonship it must be some job.

Writting a policy, the insurance agent inquired of the cowboy if he had ever had any accidents.

"Nope, but a rattlesnake bit me and a few broncs have kicked me."

"Don't you call those accidents?' asked the agent.

"Nope, the critters did it on purpose."

"When I was in New York," Ralph said, "I saw a fellow drop his watch from the top of a tall building, then go down on the elevator and rush out into the street to catch it."

"That sounds impossible," remarked his listener.

"Well, the watch was slow."

* * *

The fellow required surgery after his wife beaned him with a rolling pin. When he was wheeled into the operating room, he asked the doctor, "Will I be able to play the piano after the operation?"

"Certainly," answered the doctor.

"That's funny, I never could before."

First Meeting of Year C.W.L.

The first meeting of the year 1960-61 of the Parish Council CWL took place in the school on Tuesday evening, May 10, 1960. the new President, Mrs. J. P. Vermette, presiding. Before the formal business session, however, two different group photographs were taken of the out-going and of the in-coming executives for the records which are being kept in the form of a history and a scrap-book of the organization.

A welcome was extended to the new members; the official publication, CANADIAN LEAGUE, will be sent to all members the subscription charge to be paid from the treasury. It was voted that Mrs. Vermette should attend the Diocesan Convention in Kingston, June 12 and 13. Mrs. Roger Denis and Mrs. L. Montpetit were appointed to represent the Parish Council at the May meeting of the Cancer Society for work in afternoon and evening, respectively. Last year's conveners of standing committees, for the most part, will carry on for the present year. The President read a portion of the message from the National President, quoting from the Canadian League, in which was stressed the need for outstanding spiritual content in our meetings, rather than to abandon them to a discussion of ways and means of raising money. A plan was discussed for bringing cheer to hospital patients but actual details were postponed till fall. Mrs. Malloy and Mrs. Burns will be conveners for the next Lions' Club supper.

A reminder of the approaching Forty Hours devotion, Friday, 13th to Sunday 15 th, was given by Fr. Terrion.

A social hour closed the evening.

GOLF CLUB HAPPY

Used Articles Sell Like Hot Cakes

The Iroquois Golf Club's first 'surplus' sale of used articles brought close to $200 into the club's treasury, not to mention a few donated items that will help to furnish the spacious clubhouse, Club Treasurer C. W. Hodgert reported today.

Sales during the two-day period, Friday and Saturday, went at fair clip and proved the success of such a venture,, the first undertaken in the village in many years.

Donated articles ranged all the way from pots and pans to fur coats, stoves and good used furniture.

Iroquois's nine-hole golf course is fast drying up as the Spring sun does its work and already a few hardy golfing enthusiasts have tried the course (all under par?).

Work on renovating the clubhouse is progressing satisfactorily with the front steps getting the first treatment from the carpenters. Last Fall, the roof was fixed and during the Winter months, a complete re-wiring of the building undertaken.

Wallpaper has been ripped from all the downstairs rooms and as soon as the papering and painting is done, the clubhouse will be ready for occupancy.

Equipment for taking care of the fairways and greens has been ordered and should arrive shortly, the first cutting soon becoming necessary.

Membership has grown steadily since formation of the club last year and is expected to rise to nearly 200 this year.

OPINIONS

Ours and Yours . . .

The Last Roundup

In terms of today's modern slang, we might admonish students "to get hep" and get with it when it comes to taking an interest in their school year, which is almost at an end.

Going into the last month of school before writing examinations, many students are now beginning to wonder if they'll get their "year". Looking back over their progress in the past months of school should give most of them an idea whether they will graduate or take the grade again.

Once a youngster reaches high school he or she should begin to knuckle down, taking adequate time for school work, home work and above all, show a willingness to co-operate with the staff. In return, the staff might also, make a supreme effort to keep the youngsters problems in mind.

Last, but by far not least on the list of what should be done, is the co-operation from a third party . . .the parents, in seeing that their children do what is expected of them. A little discipline towards keeping up with school work, can work wonders at exam time.

Like we said at the start, man, "get with it".

Nothing Cheap Is A Bargain

As in our every day purchasing, anything we buy cheap, doesn't usually turn out to be a bargain. In announcing a $2.00 season's entrance into the parks system operated by the Ontario St. Lawrence Development Commission, many might feel the fee is rather high; that local residents should have these facilities at no charge or at least less than that being generally charged.

For years, a system of collecting monies for parks facilities has been in operation in Ontario and apparently it has worked out quite satisfactorily. Our neighbours across the river in New York State also operate their state parks on the same principle . . with possibly a somewhat higher tariff charged.

The parks system inaugurated in this area stemmed from the fact that we had no organized park facilities for swimming, picnicing or camping. It also was realized that such facilities should be at the disposal of the entire population, not just a few who were fortunate in having private lands suitable for such outdoor activities as are now included in the parks system.

A fee of $2.00 seems reasonable in the light of the facilities being provided and the advantages the parks system offers to this area, both in the fact that for $2.00, a carload of people can use the parks for an entire season and in addition, for the tourist attraction all parks systems create. If you may only visit the park once in a season, it will cost you 50c for the visit.

Hardly an amount to dispute in light of what a bargain you get for it.

100 ONTARIO PEOPLE TB'S

DAILY SCORE

In Ontario today 100 more people were infected with tuberculosis. The same unmber were infcted yesterday and another 100 persons will breathe in infecting TB germs tomorrow.

In stating these figures Dr. Paul S. deGrosbois M.O.H. of the Three United Counties stressed that newly-infected persons experience a particularly dangerous period of about two years.

"During these two years," the doctor explained, "from two to eight percent of the 36,00 people infected annually will prove incapable of handling the infection and will break down with active tuberculosis."

He said the great majority of the newly-infected will successfully encase the germs in their lungs in thick-walled nodules called tubercles. "They will be safe from TB providing they maintain supremacy over the action of the germs. However, if their bodies undergo severe strain this supremacy may be lost."

"I want it understood that 'infection' does not mean 'active disease'. Active cases are diagnosed from chest x-rays and require immediate medical attention in sanatorium. On the other hand, infection is indicated by means of a simple tuberculin test available from any doctor. If a person is infected, he should obtain a yearly chest x-ray. Then any evidence of active TB would be plain to see and treatment could begin at once.

"Our concern," Dr. deGrosbois emphasized, "is for persons who, probably without knowing they are ill, are infecting 36,000 people annually in Ontario. They also provide re-infection for thousands more and this re-infection could be disease-producing."

"Tuberculosis is by no means a disease of the past, said the doctor. "It is here with us in the present; it could be with us for a long time in the future."

THE

BIBLE

TODAY!

The Chuana complete Bible was first published in 1857. Seventeen years earlier the first consignment of Chuana New Testaments had been delivered to the Congo with the new missionary, David Livingstone, who had chosen to serve in Africa under the influence of Robert Moffat.

One day Robert Moffat was approached by a very worried native. Moffat asked him his trouble and the native said, "My dog has eaten one of the leaves out of my Bible" Mofat replied, "That is easy to repair. I wil give you a new leaf to replace the other one". This failed to relieve the man's worry for he said, " No, that is not the worst thing. My dog wil be of no use, as he will become as tame and kind as all the warriors have become since they read that book."

Over one hundred years have passed since this conversation and the Chuana Bible is still taming man's wild spirit.

EMPTY SAN BEDS DUE TO SHORTENED TREATMENT TIME

Dr. Paul S. deGrosbois M.O.H. of the Three United Counties, reported that 60 days were taken off the average Ontario patients' stay in TB sanatorium during 1955-1956. In 1954, the patients who were discharged averaged 441 days in sanatirium. In 1956, discharges averaged 381 days under treatment.

"No wonder there are a few empty beas," he said, "the turnover of patients has been accelerated. The accumulated hospital time saved patients in the two years 1955-1956 equals 12,000 months."

"This helps the patient returning home as well as the new patient who is not delayed from beginning immediate treatment. This is a major advantage over being overcrowded as the sanatoria have been until 1954."

Parliament Topics

It is one thing to recognize problems and quite another thing to solve them. Most of us would like our children to learn as much as they can. Schools are built for this purpose and remaining at school is the easiest and fastest way to at least form the solid habit of learning. I try, as all parents do, to explain this to my children. It is becoming absolutely essential that we make them understand. As the world is now developing they will be defeated if they do not cultivate their minds.

We have gone a long way in recognizing the necessity of health precautions. Only the most backward allow their children to risk polio and physical paralysis. I fear that some of our most intelligent citizens allow their children to risk economic paralysis. It is hard and demanding and difficult to stimulate young people, to encourage them to give up the pleasures of the moment to stay at their homework. However, it is possibly one of the most worth while contributions to society that a good citizen and a good parent can make. I never see reports in our local newspapers of high marks and achievement without wishing to congratulate that family. I know the number of evenings when a popular movie was bypassed, the times TV was turned off because studying was more important, the times the Mother rose earlier to prepare a nourishing and attractive breakfast in order that the day might start off smoothly and calmly. There may be some luck in success, but there is also a lot of courage, and will, and preseverance.

The Minister of Labour, Hon. Michael Starr, said recently that during the past ten years, opportunities in professional occupations had increased by about 70 per cent, skilled occupations by an estimated 35 per cent, white collar occupations by another 35 per cent, while unskilled occupations showed an increase of only about 20 per cent. He went on to point out that this trend resulting frm technological advances wuld inevitably continue and if the average young Canadian hoped to reap the benefits of a modern progressive natin he will have to face up t the fact that education is no longer a luxury but a necessity.

We in North America have attained our high standard of living by use of technical skill and readiness to apply technical discveries and advances. We cannot stop now.

In this connection it is interesting to note in the annual report of the Imperial Oil that investment in plant and equipment per employee for 1959 has risen to over $80,000, an increase of about $20,000 per employee since 1955.

We did not win World War 2 by expecting our boys to handle increasingly complicated and costly aircraft without intensive and demanding education and training. We will not win the present economic war without the same effort from our young people.

People resent being controlled or directed if they do not think it necessary. Some pedestrians like to cross in mid-block, or walk against the red, to keep their feeling of "independence". But, points out the Ontario Safety League, they aren't very independent trussed up in a hospital bed.

* * *

Under the Driver Demerit Point System, points out the Ontario Safety League, many people who are careless for a moment become car-less for three months.

ED. NOTE

We regret that there was no "Record World" column last week, but BILL GALLANT of CJSS, who was supposed to write the column, has left CJSS Radio and was therefore unable to handle the job. Next week "The Record World" will be written by either DICK COOK or RON ROBERTS of WSTS, or possibly both (we hope). We expect they will be handling the column for the next six weeks until GARY PARMETER returns.

I.H.S.

REPORT

by Wayne Jackson

As the school year is near its end not too much is happening at I.H.S.

Mr. Desormeau, head of the Year Book Society staged a chicken dinner for his followers. The banquet was held in the school Home Economics room at 5:00 Thursday May 12.

I.H.S. new back stop was used May 12, for the first time. The wire net witnessed 7-2 victory for Dundela over Iroquois.

Miss Henderson head of the Home Economic class at I.H.S., is planning a fashion show in the near future. The show will feature clothes made by the girls in the Home Economic class. Tea will be served to the mothers who attend.

Those who went to the Formal last Friday were sure to admire or stumble into the decorations, and the rocket which was situated in the centre of the floor. Ernest Fader and Carol Buckland were responsible for the fine decorations. The Formal was a big success and truly a grand finale for the schools social activities.

Cadet Inspection was held Tuesday with Capt. Evans inspecting such display as Range, Gym, Bren gun, and Signals. The Stratchcona Crest for best shot was awarded to Willard Duncan by Mr. G. G. Trivett. Canadian legion cups for the best cadets, girl and boy, were presented to Anne Leizert and Alex Scott by Mrs. T. Millar and Mr. L. Roberts.

Certificates and cheques, presented by Capt. Evans, were awarded to those who passed their 18 words a minute (morse Code). The lucky ones who were blessed with receiving $20 cheque were A. Cummins, L. Barkley, R. Johnston, C. Fisher, P. Anderson, C. Stone, R. Fisher.

Refreshments were served in the school cafeteria to the parents and the visiting officers.

MORRISBURG AND DISTRICT CANADIAN CLUB STARTS

The Morrisburg and District Canadian Club will commence its 1960 season with Sir Saville Garner, K.C.M.G., British High Commissioner to Canada, as the guest speaker. His topic will be "The Commonwealth in the '60's".

This first meeting will be at the Civic Centre, Morrisburg, Wednesday, May 25th, at 7 p.m., and tickets are now available through all the local directors.

It is anticipated that there will be two speakers in the Spring and three in the Fall and that an interesting program for the year will be available.

This area Club is now in its 36th year and is an organization of which the district should be proud as, with over 300 members, it is the largest Canadian Club in any rural or small town area in Canada, and in fact is larger than most urban clubs with the exception of the large metropolitan cities.

OXFORD AND GOWER SCHOOL TEACHERS MET

The Oxford on Rideau and South Gower Teachers are pleased to announce a partial list of the lectures for the Fall Seminar in Remedial Instruction which will be held in Kemptville Agricultural College on Tuesday nights from Sept 13, to Nov. 15th.

Miss Evelyn Reynolds of Public School Staff in Toronto who has wide experience in Guidance at Elementary School level.

Mr. C. W. Ogden, Master at Ottawa Teacher's College.

Mr. B. F. Leary, President of Thos. Nelson Co.

The exceptional ability of the speakers and the interesting subjects to be discussed are responsible for the many inquiries for registration in this course.

Local inspectors are forwarding material to their teachers, or you may register with Mrs. Frank Latourell of R.R. 3, Mountain.

Interviewing an applicant, the employer commented, "You want high wages for a man with no experience."

A VILLAGE CHANGES

The year was 1898 . . . the scene an Ontario village.

A local historian, reflecting on the things she remembered about the village, wrote that the village had "No electricity, no stone roads, no radio, no telephone, just coal lamps for light."

Today in her village the coal lamp has vanished, pavement covers the dirt roads, and telephons, radios, and electric lights are taken for granted.

These changes were possible because of steel. In 1898, Canada made less than 10 pounds of steel per person. Last year, the country's steel industry produced 660 pounds of steel per person.

This higher productivity comes from the factories Canadians have built. For example, The Steel Company of Canada, Limited has invested nearly $365,000,000 in plants and equipment since the Company started operations fifty years ago.

Canadians produce more mainly because Canadian companies are continually improving their plants and equipment.

Nothing so clearly expresses your best wishes as does the gift of a beautiful, efficient electric household appliance . . . ready to be her constant help in her brand new job of homemaking. No wonder today's brides-to-be prefer electric appliances as wedding gifts.

Electricity can help so much in planning a happier, easier, better way of life.

Riddell. She was also the recipient of a gift honoring her on her retirement after faithfully serving on the executive for the past 55 years. Mrs. C. R. Two selections by thirty members of the Jr. choir, under the direction of the organist, Mr. E. Flannigan, were greatly enjoyed. Dr. Wm. Merilees brought greetings from the Presbytery, thanking the ladies for the helpful co-operation through the years.

* * *

An inexplicable traffic jam on the open highway often turns out to be caused simply by drivers "crawling" to get all the details of an accident scene. The Ontario Safety League asks drivers to remember that slowing down simply to satisfy one's curiousity at an accident location can irritate and inconvenience following traffic, and may even delay the arrival of essential ambulance and police services.
