The Burden of Proof is on You

If you lose a receipt for a cash payment it is not the other man's job to prove that the account is unpaid.

It is up to you to prove payment.

Most often it cannot be done. In paying bills by cheque, protection is assured.

Interview one of our branch managers and arrange to open a checking account. 917

Father Staley Dies From Injuries

As we go to press word comes from Toronto announcing the death of Father Arthur Staley last night as a result of the motor accident, particulars of which will be found in this issue. The funeral will take place at Kingston Saturday morning.

Rumored Change of Train Time

A change in the time-table of the C.P.R. for the summer months will shortly be made when it is rumored that the local from Montreal in the evening will arrive at Chesterville about ten minutes after six. With close connections from Ottawa the tedious wait at Finch will be cut out.

Cornwall Crowd Chased Police

In the east end of Cornwall on Monday night inland revenue officers and provincial police seized 200 bottles of liquor at the premises of Napoleon Lefave. As they were about to arrest Lefave, he bolted, and, although shots were fired after him, disappeared. A crowd of nearby residents gathered, forced the officers to an upper storey of the house and threatened to set it on fire. They broke windows in the house and captured the liquor which the officers had seized.

Miss Dorothy Fusee Showered

On Tuesday evening, 18th inst., the young lady friends of Dorothy Fusee from town and vicinity gathered at the home of Mr. and Mrs. J. L. Helmer to honor the bride-elect. On returning from a drive she was completly taken by surprise to find the house full of friends who were so eagerly awaiting her return. Immediately after all present engaged in "fishing', and Dorothy made the lucky catch of a heavily weighted line leading from the fish pond to the parlor where many useful and appropriate gifts in aluminum, silver, linen and china were glitteringly displayed. Although momentarily overcome she made a most gracious reply to her friends who will long treasure her pleasant words. Lunch was served and the remainder of the evening spent in music and games.

Father Staley's Brother Injured

Rev. Fr. Staley was called to Toronto on Friday, where his brother was seriously injured in an auto accident, the particulars of which are given by the Mail and Empire as follows—"Rev. Father A. Staley, who has charge of the parish of St. John's R. C Church, 47 George St., Weston, was badly injured yesterday afternoon, at Dundas Street west and Ritchie Avenue, when the coupe he was driving dashed into the rear of an eastbound Dundas Street car. The coupe overturned and Father Staley was thrown out on his head sustaining a badly fractured skull and other injuries. His condition is regarded as critical.

According to the police, Father Staley was driving his car east on Dundas street west in the wake of a street car in charge of Motorman Gilroy, 60 Lynd Avenue. The car stopped at an intersection to take on passengers, and the reverend gentleman's machine, out of control, crashed into the rear of the trolley car. The auto was capsized, Father Staley being thrown out and rendered unconscious. After being given treatment by Dr. Aikenhead, 119 High Park Avenue, the injured cleric was removed to St. Michael's Hospital. He is 44 years of age."

Guaranteed Home Brew Recipe

What appears to be one of the "hangovers" of the recent dry raids in California is a home brew recipe repeated in many quarters. The police say it came in by broadcast radio. The Record passes it on:—

Chase a wild bullfrog three miles and gather up the hops. To the hops add the following: Ten gallons of tanbark, one-half pint of shellac and one bar of home-made soap. Boil 36 hours and strain through an I. W. W. sock to keep from working. Bottle and add one grasshopper to each pint to give the kick.

3 = BIG EVENTS = 3

CHESTERVILLE, MAY 23 & 24
PRESCOTT, MAY 31 & JUNE 1
BROCKVILLE, JUNE 6 & 7

Mr. Reader did you ever pause for one moment and consider what an advancement it is for any place or community to hold within the borders a great event of any kind? The most historic parts of the great civilized world to-day, are the places where sensational events in some form or other have taken place, and where prudent people have congregated in order that they may have intelligently satisfied the longings and desires of their own human nature, by actually witnessing the taking place of something which was more than ordinary. The foremost nations of the world today are the nations which are famous for their spectacular environments and their great achievements in the line of national commerce and national sport. These are two of the leading factors that govern or control and which are largely responsible in this modern age for the advancement and upbuilding of our greatest nations. As of a nation, so of a country and on down, down until we come in direct touch with our local community life. It is of the latter mentioned environment which I strongly appeal to the people of my native country to become moec interested in, fully and conscientiously believing that the efforts put forth by myself in this direction will be crowned with success and that I shall be doing for my native land and people, service which shall be honorably recognized by the whole of the civilized world.

Now, then, by the act of gaining control of the three great Exhibition Grounds, namely Chesterville, Prescott and Brockville, and the amalgamating of them together, forming one Grand Circuit, for the staging of Harness Racing, which is truly recognized National sport of all the leading nations of the world, and the spectacular events which are scheduled to take place on different dates at the three above mentioned places, is truly the greatest undertaking of its kind ever attempted by any one individual, and the staging of these great events shall popularize this local part of our great dominion, with each and every section of its inhabitants, as well as insisting on the great Uncle Sam to the south of us to sit up and take notice, and perchance a little bit more nourishment. I say, Mr. Reader, these are the events, which popularize our inhabitants and introduces us, if you will, to those who reside afar off. Also, consider the special benefits to be derived locally, from an event of this kind. First of all it involves an outlay of thousands and thousands of dollars. The large cash stakes and prizes the horsemen of this country are offered to compete for, in connection with these events, have attracted the attention of the best thinking men of Canada to-day, and the finest and best equipped harness racing outfits have been lured to our midst, by the fascinations and attractions which we are able to offer them, by the controlling and operation of such an extensive affair. The amount of money it will place into circulation, within our midst, as well as the creating of positions for many unemployed for several weeks, together with the excellent opportunity it is affording to the many gallant young ladies of our locality, of assisting themselves to that which provides for the necessaries of life, cannot be over-estimated, and directly, and indirectly, each and every legalized enterprize for scores of miles approaching any of these above mentioned places shall be materially benefited thereby.

It is for these specific and logical reasons that I appeal to the people of this country for assistance and support, that I may be able to even make a greater success, and a greater name for Chesterville, Prescott and Brockville, together with all their outlying districts, than was made for Chesterville alone on the 29th day of September 1921.

Now, then, should any of the several young ladies who are candidates for the One Thousand Dollars in Gold appeal to you for aid in order that they might be successful in winning the Greatest Gold Prize ever offered in Canada, please do not turn them away, because the one dollar you toss into the coffers of this, the greatest enterprize and event that has ever yet taken place in your midst, shall bring you back indirectiy tenfold, in that it shall do its bit toward up-building and popularizing of this most beautiful part of the Land of the Maple wherein we reside, with all other places in the civilized world, thereby materially benefiting each and every individual.

The tickets purchased at $1.00 each from any Candidate of the One Thousand Dollars in Gold entitles the purchaser to admission on both days of the Carnival events, otherwise a ticket purchased at the Wicket for $1.00, only admits you on one day. This is a fact well worth consideration. Take advantage of it, and buy from the Girls.

Large bills, posters and dodgers, will be spread over the country at an early date, scheduling each event in a more complete manner. Everything is all set. More than fifty of the best trotters from London, Ont., to Boston, Mass., have already entered and we are now assured of the greatest event of its kind in the history of our Country.

Progressives Organize

At a representative meeting held in Ottawa, Saturday afternoon, at which members of Parliament, candidates for the provincial and federal houses, and organizers of the Progressive movement in Eastern Ontario and Western Quebec were present, it was decided to constitute a central advisory and organization committee to develop economic and political co-operation among the constituencies, the committee to consist of two members from each riding in the area named. The resolution to constitute this committee was proposed by Preston Elliott, M. P. for Dundas, and seconded by R. M. Warren, M L.A. for Renfrew North, and unanimously adopted after a conference lasting over three hours Marshall Rathwell of Navan, who was Progressive candidate for Russell in the federal election, took the chair at Saturday's meeting and was appointed provisional chairman of the new committee with Dr. S Lafortune, candidate for Hull, acting as French secretary, and Herbert A. Jarvis as secretary-treasurer.

"Yes," said the old man to his visitor, "I am proud of my girls and would like to see them comfortably married, and as I have made a little money they will not go penniless to their husbands. There is Mary, twenty-five years old, and a really good girl. I shall give her one thousand dollars when she marries. Then comes Bet, who won't see thirty-five again I shall give her three thousand dollars; and the man who takes Eliza who is forty, will have five thousand dollars with her."

The young man reflected a moment, and then asked, "You havn't one about fifty, have you?'

Claim He Tried To Murder Wife

The appearance of a member of the Town Council of Oshawa, in court on a charge of attempted murder caused quite a sensation around that town Thursday. Alleged to have been under the influence of liquor, Councillor William Benjamin Rowe was arrainged in police court before Magistrate Hind. on a charge of attempting to murder his wife with an unsheathed sword in the door way of his residence.

Tea Growing Very Expensive

The very high wages that have to be paid to workers on the tea plantations in India and Ceylon, due to social and political unrest, has caused the price of tea to rise consistently in the primary markets and in London. This influence is now being felt farther along the line and it is to be expected that the price of tea will increase to the consumer in the near future.

Talking Movies Perfected at Last

Talking movies, with the "lines" recorded on the film instead of on phonograph discs, have been perfected by Lee De Forrest, pioneer in the wireless telephone field, he announced upon his arrival from Germany, where he has been experimenting for six months. He said he had perfected the talking motion picture so that the human voice was "photographed on the film at the same time that the picture was taken." The impressions are taken electrically, through the action of light on a sensitive cell, he explained.

Fruit Growers Don't Think Frost Did Much Damage

Although the mercury dropped to 12 degrees below freezing throughout the Niagara fruit belt last week, fruit growers discounted the anxiety reported as to damage done. The buds are said to be much too sheltered as yet to be frost bitten, and representative growers expressed the opinion that the severe weather resulted in no harm. There was, it was pointed out, heavy frost last year when the buds were out, and no loss was occasioned.

Old Cornwall Resident Passes Away

As the result of paralysis ou Wednesday, John Miner one of the oldest residents of Cornwall, passed away at his home on Victoria avenue Sunday. Mr. Miner, although within three months of attaining his 86th birthday, was remarkably smart for his years, and up to last Monday was able to go about town, but on that day was seized with a chill followed by a stroke two days later. For a quarter of a century Mr. Miner conducted a saddlery business.

Buyer Bought Cattle With Unredeemable Cheques

Warrant was issued in Brockville for the arrest of a cattle buyer named Jacob Ulmo, said to belong to Hull, Que., who is alleged to have victimized farmers in the vicinity of Kemptville by tendering cheques in payment for cattle which were returned from a Hull bank as unredeemable.

Ulmo is said to have resold the cattle at Bedell to a Montreal buyer. The amount figuring in the transactions totals $1,200. Ulmo is charged with obtaining money under false pretenses.

Profits Commensurate

Lady—I should think you'd be ashamed to lead such an idle and unprofitable life.

Frayed Phil (as he tackled a good hand-out)—Idle it may be, mum, but considerin' de capital invested, de profits is purty good.

CRYSLER

Mrs. Geo. Meldrum, has returned to town, after spending the past week with relatives in Perth and other places west.

Mr. and Mrs. Wm. Armstrong and family motored to Berwick on Sunday and spent the day with relatives.

The Misses Annie and Josie Cashion with Mrs. (Dr)Gormely spent Sunday last at the home of Mr. J. Ruddy.

Mr. E. Meldrum of the Canadian Railway Telegraph Institute, with Mr. H. Maxwell of Bancroft, Ont. who is a student in the same Instltute, are spending the week with the former's parents, Mr. and Mrs. Geo. Meldrum.

Messrs. C. and L. Ault spent Sunday at there home in Chesterville.

Mr. and Mrs. John Carruthers with Miss Ida left last week on an extended visit to the west where they will be the guests of Mr. and Mrs. Geo. Carruthers.

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

MILK CANS & STRAINERS

PAILS! PAILS! PAILS!

When spring is here, with its sunshine
And the winter months are past;
And those old pails and milk cans
Are worn out at last.

Then come right into Berwick,
And buy, for we've a stock and a half,
And when the test is made at the factory
Then you can afford to laugh.

Now, remember your trials of the winter,
With that old pump that is worn out,
Better phone us to put in a new one
And put all your troubles to rout.

When you want good work and service,
We can suit you down to a T
With anything in our line
If you don't believe us, come in and see.

Water Where and When You Need It

Water is One of Life's Three Essentials—FREE

Wind Power will Pump Water Anywhere on Your Farm

Running water you can have on your farm. Toronto Windmills make it possible.

—because they use FREE power—no operating cost.

—because they are BETTER windmills—staunchly built and scientifically designed. *Double Gears* give these Windmills their great superiority. No expense beyond an occasional oiling. *Quiet* in operation. They give a lifetime of service. Double Gears have brought wind power back into favor.

Toronto Pumps and Toronto Water Systems give you all the advantages of city service. We can arrange a system with a Toronto Windmill; a Toronto Gasoline Engine, or a Toronto Electric Motor.

You will be interested in our literature on Windmills, Pumps and Water Systems. It is sent free. Mail us a postcard *now*—before you forget.

Transmit Photos By Radio

Even to the amateur, who has dabbled in wireless, there was much that was startling in Dr. J. H. Dellinger's address in "Radio Developments" on Saturday evening, but to those who have not kept posted on the progress of the art, his revelations were little short of amazing.

Not the least startling of his assertions was one to the effect that within the past handwriting had been transmitted across the Atlantic by radio. Within a very short time, he added, it would be possible to transmit photographs by wireless. Until a year ago, American experts have been sceptical on this point, but in 1921 they took a trip to Europe, witnessed an actual demonstration of the transmission of photographs by ordinary telephone. On their return to the United States they had arranged to co-operate with the European inventor and the transmittion of the actual handwriting of a message across the Atlantic had been the result. Dr. Dellinger pointed out that anything that could be done by wired telephone could also be done by radio. Transmission of photographs by wire had resulted in almost perfect reproduction, hence the same would be done by radio as soon as the apparatus was modified. The significance of the step can be realized with the suggestion of but one of the multitude of the possible uses of the new device —that of transmission of finger prints.

"We can now communicate without wires between and two points of the earth's surface whether on the ground, under the sea or in the air." Another startling fact which was first proved by actual demonstration in 1918 when a ship at sea heard the Bordeaux, France, station. "At the present time," continued the speaker, "amateurs in the United States with comparatively simple apparatus are regularly listening to the big European stations. Occasionally comparatively weak amateur stations in America are heard in England and Scotland.

Would Improve Pensions of Widowed Mothers

Major Power, of Quebec South, is renewing this session his effort to get fuller provision for the widowed mothers of those soldiers who died on active service. He has given notice of a resolution for the House of Commons to amend the Pension Act to provide that the pension of a widowed mother of a member of the forces who died on active service shall not be reduced on account of her income, and further she shall have a right to a pension whether or not there are other children living. Under the existing law a widowed mother received no pension if she is in receipt of an income regarded as sufficient, or if she has children who are able to support her.

Direction of Grain In Shingles

It is generally recognized that edge grain shingles, are superior to flatgrain owing to the greater tendency of the latter to "cup." This is explained by the Forest Products Laboratories of the Forestry Branch Department of the Interior, as follows: Wood shrinks or expands, in response to change in atmospheric moisture to a much greater degree in a direction around the tree than in a direction from the pith to the bark. An edge-grain shingle, thereof, which is cut in a direction from the pith to the bark, shrinks or expands less than one cut in the other direction When the heat of the sun causes the shingle to dry out more rapidly on the upper than on the under side, the external shrinkage tends to pull the shingle out ot shape. On account of the decidedly smaller shrinkage of the edge-grain shingle, the tendency is very considerably reduced.

Moustache Lost He Seeks Damages

Injured pride at the loss of a prized moustache, "not less than three inches in width and six inches from tip to tip," removed from the plaintiff while he was asleep under a hot towel in a barber shop has found outlet in a suit for $290 damages filled in San Francisco Justice Court. The suit was brought by James T. Maguire, of Bakersfield, against Henry Jacoby, barber.

Maguire was said to have stopped in a San Francisco barber shop while en route to a golf tournament at Byron Hot Springs, seated himself in a chair and fallen asleep, to awake to discover his loss.

Pretty Niece (blushing) "Auntie, what would you do if you learned that a young man was secretly inquiring about your ability as a cook?" Wise Aunt: "I should immediately make secret inquiries as to his ability to provide things to cook."

"Now, Johnny, if your father get $4 for working eight hours a day, what would he get for working ten hours a day?"

"Six dollars."

"That's wrong, Johnny."

"No 'tain't. Pop always gets double pay for overtime."

Aviator Killed When Airship Crashes to Ground at Waldemar

Flight Captain H. L. Holland, of the Militia Department, Ottawa, was killed an Flying Officer Owen, also of Ottawa, was injured when the large military airship in which they were travelling fouled a tree and crashed to the ground Sunday afternoon. The tragedy occurred at Waldemar, on the Teeswater branch of he C.P.R., eight miles from Orangeville and two and a half miles from Grand Valley. Flight Captain Holland, who is in charge of the Ottawa aredrome, left the Federal capital on Friday with his companion and flew to Camp Borden in a two-seater D H -Four machine with a Rolls-Royce engine. Between three and four o'clock on Sunday afternoon they left Camp Borden for London where they purposed taking photographs for the Government. They had reached Waldemar about seven o'clock when the water pump stopped working and the airmen descended to have it repaired. It was their intention to return to Camp Borden after having been delayed by the accident. On the take-off the plane hit the bough of a tree, about sixty feet in the air, took a nose dive and crashed to the ground.

Flight Captain Holland became entangled in the wreckage, which immediately caught fire. Flying Lieutenant Owen, although painfully injured, endeavored to extract the body of his companion from the burning debris, but was unsuccessful and the unfortunate officer was burned to death.

One-third of Coal Bill Pays for the Coal Itself

The intricacies of coal mining were explained in a talk given before the Toronto Rotary Club Friday. In speaking about the price of coal in Toronto, Mr. Ratcliffe said that only one-third of the cost in that city really went to pay for the actual coal; that the remainder went for timber, water and other essentials used in mining and distributing it.

Greece Paying Canada Arrears

London, April 26. Canada's position in connection with the trade credits granted to five foreign countries, two of which have defaulted the payment of even the interest due, has improved considerably of late. Greece, which shortly after the advent of the Government which succeeded that of Venizels declared its inability to pay the interest on the $25,000,000 which Canada credited her in 1919, has announced her ability to make good now and has already made a substantial payment on the arrears of interest.

MOREWOOD

Mrs. (Rev.) K. A. Gollan of Lucknow spent the week end with friends here.

Miss Helen Black of Winchester, is visiting Mrs. W. Steinburg.

Miss Mildred Allison spent the week end with friends in Winchester.

Mr. F. Farmiloe and George spent a few days last week with friends in Spencervilie.

Mr. Harold Meikle of Cardinal, is visiting at Mr. Thos. Faulkner's.

Dr. J. A. MacGregor is visiting his parents Mr. and Mrs. Dan MacGregor for a couple of days.

Mr. Geo. Forrester returned on Thursday after visiting friends in Elma and Winchester Springs.

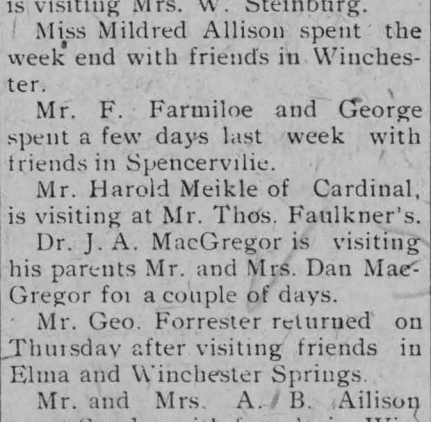
Mr. and Mrs. A. B. Ailison spent Sunday with friends in Winchester.

Mr. E. V. Dodge and Jack made a business trip to town on Saturday.

Miss Olive Bogart is visiting friends in Inkerman.

The Farmer's Wife: "There's a letter from a lady this morning, Timothy, as wants to take a this 'ere farm in the summer, and asks if we have a bath room. What am I to say?" Farmer; "Write and tell her the truth at once, Sally. Say she'd better have her bath the day before she comes here."

Mrs. Goodsole: "So you're in favor of work on Sundays?" Mrs. Grabbe: Most decidely! My husband says if he doesn't work seven days a week I can't have a new fur coat next winter."



NATION VALLEY

Mr. Jas. Toye of DeCalb Jct., N.Y., has been the guest of several relatives in this district.

Mr. Douglas Rae of Ottawa, spent the holidays with his parents Mr. and Mrs. Walter Rae.

Our High school boys and girls have returned to school.

Miss Evelyn Gray of Maple Ridge, spent the holidays at her home here.

Miss Nellie Stata of Morrisburg, was visiting relatives in this locality.

Mr. Andy Jackson attended the Teachers' and Trustees' convention in Toronto, afterward going to Barrie to visit his brother Mr. Matthew Jackson.

Messrs. Silas Coughlar of Ogdensburg and brother Edward of Inkerman, were visiting relatives here on Wednesday last.

Master Clare Summers who was very ill with pneumonia is now convalescent.

Miss Evelyn Merkley of Ottawa, visited her home here last week.

Messrs. Derry Thomas of Kenmore and Case Thomas of Winchester, were visiting relatives in this locality.

Miss Jessie Nesbitt of Ottawa district, spent the holidays with her mother.

Little Alice Rosetta, eighteen-months-old daughter of Mr. and Mrs. M. Robinson passed away on Friday April 14th at five a. m., after a few days illness with whooping cough and pneumonia. The sympathy of the vicinity goes out to the bereaved ones.

Try It

Broken arm?

Yes.

Accident?

Oh, no. Broke it while trying to pat myself on the back.

What on earth for?

Minding my own business.

140—In The Shade

A convalescent soldier who was so comfortable in the nospital he hated the idea of leaving it, thought of a plan to prolong his stay. While his nurse's back was turned he removed the clinical thermometer she had placed in his mouth and held it for a few moments against the register. The nurse, returning to him, looked at the thermometer, but never blinked an eye. She merely murmured. "Poor fellow!" and went off to make her report.

Later she came back and announced that the patient was leaving that day.

"But, nurse," he protested, "my temperature was away up this morning."

"I know," she replied calmly, "up to 140. That's why they're removing you—you're dead."

Try This Plan If Housecleaning

With the house turned half inside out getting meals is the big problem, and most men don't seem to understand or care.
Men want their meals on time even if you are housecleaning.

Don't Bake. Try our Cakes.

We have more than a dozen different kinds, all as fresh and dainty as if you made them. Try these, they will save hours of your time every day.

We have the Ottawa Bread fresh every day.
And Burton's Whey Butter at 35c a pound.
Don't these with a can of Salmon or other fish suggest a good meal with the least trouble?

Oranges Lemons Grape Fruit
Make Grape Fruit Marmalade.

FOR SALE

Limited quantity of Salzer's North Dakota seed corn for sale. Apply W. A. McElroy, Chesterville. 21c

Change of Business Hours Suggested

In many towns and villages throughout the country the custom of having one half holiday each week during June, July and August has become regular practise. Discussing this matter with some of Chesterville's business men recently the feeling seems to prevail that in a dairy section such as surrounds Chesterville the plan of opening the business places promptly at seven o'clock and closing at five o'clock in the afternoon each evening except Saturday would meet the situation much better for all concerned than closing up one half day each week.

One of the bad features of the half holiday is that travellers coming to do business do not keep these holidays in mind and land in town only to find all business suspended for the day. It means the loss of much time and increased expense for them and no business done.

To the farmers of the district to find the stores and shops open an hour earlier during June, July and August, should prove puite a convenience. Many ship milk to the city, others deliver to the Condensery and still others to the cheese factories, all at early hours. With the stores, banks and post office open earlier much time could be turned to value by the farmers before hay, grain and other crops are in fit shape to handle each morniug on account of the heavy dew. Between five and six o'clock every afternoon is the dullest time of each day in shops and stores in a dairy section. Of necessity dairy farmers are required at home to prepare and attend to the milking, leaving the staffs of stores with little to do other than waiting for the six o'clock whistle to release them for the day.

Given the hour between five and six means a great deal to people who from the nature of their occupations are kept indoors all day. It means more than a casual glance might reveal, perhaps the greatest benefit being the opportunity to put the following hours of the evening to some advantage in out door work, recreation or otherwise. Closing at six leaves but very little daylight after the evening meal is cleared away to enjoy with one's family or in home surroundings.

Who will take the lead in opening and closing their place of bnsiness one hour earlier each day during June, July and August?

Mrs. Wm. Barkley, Dunbar

The angel of death visited the home of D. M. Barkley on Thursday evening April 13th taking his aged mother Mrs. Wm. E. Barkley (nee Lena Shennette.) The deceased was in her 88th year, and was of a kind and loving disposition and will be mourned by all who knew her. She was the mother of six children. The husband passed away sixteen years ago. There are now left to mourn her loss one daughter and three sons:—Miss Arabella and Melanchon at home, Ezra of Elma, and Alfred of Dunbar, also one brother, Alexander of the home place near Morrisburg The funeral was held on Saturday afternoon at 2 o'clock from her late home to the Lutheran church, at Dunbar, services being conducted by Rev. Isler of Williamsburg. The remains were placed in the vault at Williamsburg where interment will be made later.

Floral tributes received were:—Pillow from son and daughter at home; Wreath from the Shennette family.

New Model Delco-Light

The new model Delco Light suitable for forty electric lights, electric washer, water system, cream separator etc. and selling at $495 00 F. O. B. Toronto is being shown and demonstrated at the farm of Ward Johnson, north of Chesterville. All who are interested in electricity should not fail to see this plant in operation, and will be well paid for a visit to Mr. Johnson's farm. Recent installations in this vicinity of the Delco-Light Pulley plant are at Wm. Durant's, N. of Chesterville, Herman Summers, Cass Bridge, Preston McIntosh, Winchester Springs, These Plants may also be seen in operation, and farmers desiring dependable electricity at the lowest possible cost will do well to investigate these wonderful plants. Williamsburg township boasts of fifty farms being supplied with electric light and power furnished by Delco-Light.

The above is a drawing of a cross section of the AERO CUSHION INNER TIRE, showing as it appeared enclosed in the Outer Casing, Also showing plainly the Millions of Cells or pores, where the air is confined, making it very light and resilient.

AERO CUSHOIN INNER TIRES

Fit Any Casing

NO Punctures Blowouts **NO** Rimcuts Pumps **NO** Patches Extra Tubes

SAVES TEMPER, TIRES, TIME AND TROUBLE.

First Cost : Last Cost

FACTS WORTH KNOWING

The automobile today is nearly perfect apart from puncture, blowouts and rimcuts to the pneumatic tires, which furnish the greatest expense, worry and danger to the user.

The Aero-Cushion Tire renders the automobile practical for both pleasure and business.

The Aero-Cushion tire is an inner tire, circular in form, molded in size and shape to fit the outer casing, composed of pure para rubber, highly porous, which makes it very light and resilient. This tire rides as easy as the present air tire when inflated soft and at less pressure than required. In effect it is an air-filled tire in which the air is divided into countless numbers of pores and air chambers instead of being confined in one large rubber tube. This air is imprisoned in these pores without pressure, rendering it impossible to escape by puncture or cuts

ECONOMY

As casings will average approximately 15,000 miles you save the cost of at least three sets of outer casings, besides many sets of air tubes. Furthermore after the wearing of one set of casings, you still have your set of Aero Inner Tires to be transferred to other casings, rendering a purchase of Aero-Cushion Inner Tires a very economical investment.

WORN OUT CASING

When the old casings are worn down to the last fabric, The Aero Cushion Inner Tires are transferred to another set of casings, at a nominal charge.

DURABILITY

The life itself of the Aero-Cushion Tire is indefinite; being indestructible from ordinary use, and it is practically impossible to tear or wear it out.

LIFE OE CASINGS

From the rigorous tests which have been made it has been established that with the use of Aero-Cushion Tires, your outer casings will average approximately 15,000 miles, being three times the mileage of air-filled tires.

Economy is the Keystone of Success - - Practice it by Buying

AERO CUSHION INNER TIRES

You're tired of air in automobile tires—everyone using it is. The constant work, trouble and fear is always with you. It has possibly never occurred to you that the troublesome air tube could be a thing of the past. This was a long tedious study with us until we successfully produced Aero Cushion Inner Tires. Our product was absolutely the first of its kind produced in the United States. Having been granted patent rights on our formula under the laws of the United States and Canada; and since 1915 has been used with absolute success by thousands of users of pleasure cars, electric, hearses and front wheels of Ford trucks, farm trucks and heavy trucks that were formerly equipped with Air tires in front and solid tires in the rear.

Inquire for a local agent. Write or inquire of G. W. Bogart & Son, District Agents.
All sizes kept with tools to install same.

G. W. BOGART - - CHESTERVILLE

Harold Clark of Mountain Director of New Co-operative Co.

The organization of the dairymen of the Province into a huge co-operative marketing organization somewhat upon the lines of the famous California system, is the object Hon. Manning Doherty has in view in asking the House to pass legislation to incorporate the "Ontario Co-operative Dairy products, Limited." The bill was submitted to the House by the Minister Tuesday, and is the first step of a carefully laid out plan by which it is hoped to bring into one compact organization by the Fall of the present year a large percentage of the butter and cheese producers of Ontario.

For some time past the Minister has been working out the general lines of the plan for putting the big scheme across. Members of the O.A.C. staff have been working upon a thorough dairy survey, and this data will be submitted sometime in May to a conference of representatives of every dairying county in the Province, each of whom will be asked to take over the work in his own district. These representatives will canvass the local situation, submit information as to the number of producers, output, and so forth, and inform the department regarding sentiment toward the scheme. Following this the department, early in June, will undertake an extensive educational campaign, to explain the scheme to the producers, and Aaron Sapiro, the California authority on co-operative marketing, will be brought up to assist. Already, it is stated, the Minister has received assurances of co-operation from some of the largest cheese producers in the Province, who are willing to throw their whole output into the pool.

The legislation submitted to the House by Hon. Mr. Doherty proposes a provisional board of directors composed of W. W. Ballantyne, of Stratford; E. H. Stonehouse, Weston; E. Z. Gibson, Caledonia; Jas. H. Anderson, Mountain View; James Newbigging, Atwood; J. A. McFeeters, Toronto, and J. Harold Clark, Mountain. All these, with the exception of Mr. McFeeters, who is associated with the Toronto Creamery, are well-known dairymen.

Examine Your Address Labels

The address labels on all Records going out this week have been corrected up to 24 April 1922. The date after the name shows the date to which your subscription has been paid. Where subscriptions have been paid the dates are corrected and the new dates substituted in this office about every five weeks. Examine your address label on this paper or wrapper and note when you last paid. If you are not paid in advance of 24 Apr. 22, you owe from the date shown to a date in advance of this. We dislike making appeals for the payment of subscriptions in this way every few weeks, but many have paid no attention and have not paid up. After the next correction of the lists, in five weeks, those accounts still outstanding will have to be placed for collection with instructions that all necessary means be used for securing payment. We would ask you to save us the expense of collection and all unpleasantness to yourselves.

Mr. and Mrs. Hamlin Honored

Last Thursday evening a few hours before Mr. and Mrs. C. L. Hamlin left for their new home at Elba, N. Y., the former's fellow employees at the Maple Leaf Condensed Milk Co. together with a large number of their friends throughout the town, gathered at the McCloskey House in an informal way and testified to the high esteem in which Mr. and Mrs. Hamlin have been held during their residence of two years in Chesterville. The occasion was taken advantage of to present to Mr. Hamlin a very handsome club bag, and to Mrs. Hamlin one of the latest style hand bags, while their little son Junior was remembered by many individual gifts. Mr. Clem McCloskey read an address, appreciative of the sterling qualities displayed by Mr. Hamlin in the way of clean sportsmanship in baseball and hockey as well as those qualities which made of his family desirable residents in our town.

Mr. Hamlin replying, thanked his friends and fellow employees for their kindness in even thinking himself and Mrs. Hamlin worthy of such gifts and kind expressions after so short a time a resident here. His sojourn had been most enjoyable, and although he had been located in many places throughout his own ooountry it had never been his good fortune to be located in any town with more congenial people and kinder friends than he and his wife had found in Chesterville.

Mr. Hamlin goes to Elba, N. Y. to take up a similiar position in the Nestle Food Co. plant there as he has held in Chesterville, that of chemist.

Rural Power Bonus Will Be Extended

(Toronto Star, Apl. 24th.)

W. H. Casselman, the beligerent U. F. O. member for Dundas, appears to have won his fight to have the bonus for rural power lines adjusted so that it can benefit, indirectly, at least, private generating companies.

Mr. Casselman has a bill before the legislature which would extend to private companies the 50 per cent bonus towards the cost of rural primary lines which the Hydro system gets. This bill he will have to abandon. But in its place the Government is likely to introduce a bill that will extend the bonus to municipalities or other co-operative schemes that will serve the farmer.

Under the government measure, which it would become Hon. Col. Carmichael's duty to introduce, a township or a group of farmers can put up the rural primary lines and make a contract with some private company to supply them with power for a term of years.

The difference between the orinigal Casselman proposal and the amended Government plan would be that the title to the primary lines under the second plan would be in the people and not in the company. But the company would benefit by getting customers without fresh capital expenditures on its part.

It is said that down in Dundas county, where Mr. Casselman lives, a company stands ready to deliver power under such an arrangement at rates lower than the Hydro could afford.

Higher Prices For Staples

A straw that, along with many other straws, shows how the economic wind blows, is the sudden advance in various woollens made by the leading United States company. It added from 10 to 40 cents a yard on a considerable list, and more increases are foreshadowed, especially on worsteds. The tendency of steel and iron, and of many other basic commodities to recover some of the loss of last year is very prominent. Even rubber, sunk in the slough of despond, with a floating surplus equal to a year's consumption, is recovering.

The end is clearly at hand of the deflation of commodity prices—at least for a time. Most economists have predicted drastic declines, with moderate recoveries, then more declines. But the shakeout of 1921 was drastic, and for at least a year seems to have laid the basis of moderate firmness. The building up of orders in steel and textiles demonstrates that confidence in a stabilized future has returned. Nothing in the way of boom markets commercially need be hoped for until agriculture shares in the revival after the next crop a large part of business is merely constructive anticipation of that revival. One reason why United States prices are firming up is the prospect of the new tariff bill passing congress, and bringing into effect the stiffest protection the country has known. The Senate bill carries authorization to the President to add 50 per cent. to the duties on any class or groups of commodities whose importation is hurting American industry, and also provides for valuation of these on the American price basis, thus increasing indirectly by the actual protection The United States has an industrial plant twice as big as the country really requires, for normal purposes, and the utilization of this plant is one of the objects of the big industrial interests.

Advancing markets nearly always bring in business that otherwise hangs off. Business piles in on the busy man. If commodity prices as a whole follow the trend indicated by the stock market the latter part of this year will see a sharp rally. Railway tonnages and earnings are improving, and agriculture alone awaits better times. Before the war, the United States and Canada did relatively little foreign business, and yet they prospered. Our foreign trade is down by about one-half, from the war peak, but if immigration began to make itself felt in settlement, and new construction, Canada should pull up on the new road to prosperty faster than any other country.

Convicts on Prohibition

At the request of a legislator who desired to collect testimony in favor of prohibition, a questionnaire was sent to the various American penitentiaries, and the convicts were asked to declare where they stood with regard to the question. By an overwhelming majority they declared in favor of the Volstead Act. The inference is, of course, that a great many of these felons believe they were brought to their present condition through intoxication and there can be little doubt that many of them were. But had they voted as overwhelmingly against prohibition the result might have beenheld up with equal confidence by the reformers. "There," they would say, "you see the kind of people who are against prohibition—jail birds." We do not know that the views of convicts on the question of prohibition are of much more value than their views on daylight saving. As long as they are incarcerated it must make little or no difference, to them personally whether people drink or do without drinking or whether the clocks are moved on an hour in May or not. The story is told of a convict in a southern prison shouting out of the window at a passing negro and asking him the time. "What do you-all want to know de time fur?" demanded the colored man. "You aint goin' nowhere."

It is not improbable that some among the tens of thousands of inmates of American penitentiaries owe not their crimes but their detection to liquor. Detectives have testified that since the coming of prohibition their work is much harder, first because the old familiar resorts where the criminals gathered have been closed, and second, because criminals who work with their wits about them, and are never fuddled by liquor, either while they are committing their crimes or afterward, are much more difficult to apprehend than the boozers who used to "blow-in" the proceeds of their hauls on liquor and boast about their exploits. The criminals may well have a strong personal concern in the enforcement of prohibition quite apart from their awakened consciences and a desire to reform. Most criminals in the past were drinkers. They were also smokers, but it would be rash to conclude that they were made criminals as a resnlt of these habits.

Some celebrated scroundrels neither smoked or drank, and, apart from murderous proclivities, were civil enough. From the point of view of efficiency there can be little doubt that criminals who are never emboldened or confused by alcohol are the greater menace to the community.

What Schools Are For

Few persons have a correct conception of the work of every well conducted school. The book learning is only a small part of what every school does for the boys and girls who are being educated there and the teacher makes school good, bad or indifferent. An educational writer well says: Most boys think that the reason they are sent to school is to get an education, and if they learn their lessons sufficiently well to pass the examinations and to finish the prescribed course and be graduated, they will have that education and be ready for the business of life. But the object of the best schools is not simply the book learning to be gained but to give to a boy's spirit, mind and body the moral, mental and physical training which he is capable of receiving, so that when school days are ended a boy shall be equipped with a healthy and active body, a mind with alert perceptions and well trained reasoning facilities, and a moral nature whose will is strong enough to govern both mind and body perfectly There is a great deal the boy can do to help his school to do it; and the way he can help is by his conduct. When a boy behaves well, he always plays the fairest, and studies his best, so that his mind, body and spirit are being trained together — Bowmanville News.

The Joy of Work

We seem as a nation to be suffering from a mania for play. The huge development of pleasure-chasing automobiles merely symbolizes our universal restless eagerness to be running after something, anything, that we can classify as diversion. Under pressure from tormenting constituents our legislatures are piling up holidays. And the cry of labor everywhere is, "Cut down hours; cut down hours," until it seems as if brief, tired minutes were all that would be left for work. The obvious deduction is that work is always something to be got rid of, as if it were a curse.

Yet work is life. Proper recreation and relaxation are of course essential, even for the effective doing of work itself; and it may be that the past had been sometimes neglectful of these in due proportion. But that does not mean that men would ever thrive if they had all holidays, or even mainly holidays. Experience has shown over and over again, proclaims, cries out to us, that if the ordinary healthy man has his whole existence made of leisure he does not know what to do with it and in the end rots out in degeneration and misery.

No, work is what we live for, and work makes all the dignity of life. But everything depends on how we look at work. If we consider it as merely something that must be done because it can not be avoided, something to be dodged and scamped and slighted the minute the employer is not looking, if we regard it as hateful drudgery and nothing else, it naturally becomes a curse and a burden.

Put thought into your work, put pride into it, put yourself into it. Your work is yourself, or ought to be. It is your creation, the expression and embodiment of all in you that is really worth standing room in the world. If your work is worth while, you are worth while. If not, not. If you take no joy in your work, neither man nor God will take any joy in you.

The fine old lines of George Herbert are still good to carry about with us:

Who sweeps a room as for Thy laws
Makes that and th' action fine.

CASTORIA

For Infants and Children

In Use For Over 30 Years

Always bears the Signature of Chas. H. Fletcher

"FRUIT-A-TIVES" SAVED HER LIFE

This Fruit Medicine Always Gives Relief

917 Dorion St., Montreal.

I suffered terribly with *Dyspepsia.* I had it for years and all the medicines I took did not do me any good.

I read something about *"Fruit-a-tives" being good for all Stomach Trouble and Disorders of Digestion,* so I tried them.

After finishing a few boxes, I was entirely relieved of the Dyspepsia and my general health was restored; and I am writing to tell you that I owe my life to "Fruit-a-tives"

Mlle. ANTOINETTE BOUCHER.

50c a box, 6 for $2.50, trial size 25c. At dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

Getting Ready For Big Tasks

"I wanted so much to go out into the world and do some great things but here I have to stay at home and plod at this humdrum work which never amounts to anything," grumbled Henry.

"Do not be too sure that it does not count," said his uncle. "God usually tests His workmen at home before he sends them abroad. We qualify for the greater task by performing the lesser one God usually wants us to do something at home before we do it for the nation. If we are faithful to the duties which await us each day, no matter how commonplace they appear to us, we may rest assured that God will give us greater things to do.

The plant that grows to maturity rapidly, usually has a short life, while the oak which is slow in its growth lives for centnries. We have need for patience in order that our lives may be all that God wants them to be. The greatest opportunity of our life is usually found at our door and there is great danger of missing it while we are looking far ahead.

VITAMINES

precious health-building elements are essential factors of growth to every child.

Scott's Emulsion

is the food-tonic of special value to children. It is rich in vitamines—builds health and promotes growth!

Scott & Bowne, Toronto, Ont. 22-1

True Courtesy

The finest courtesy is that which comes from the spontaneous manifestation of good will. Yet often people who feel good will toward others are not notable for courtesy. When there is any failure in courtesy it can almost invariably be ascribed to fear. Perhaps the person is afraid of assuming too much importance and of appearing egotistical and therefore lurks in the background when he should come forward. Perhaps he fears that some one will think that he is trying to curry favor, and therefore he is so distantly polite as almost to be rude. Perhaps his good will is so mingled with admiration as to make him awkward and embarrassed; the fear of being regarded as commonplace and unimportant as he cannot help knowing himself to be prevents him from showing proper courtesy. Or, on the other hand, the fear that courtesy will be interpreted as weakness causes him to be assertive, overbearing or truculent.

Fear is the great enemy to happiness and accomplishment. One of the most effective ways in which fear works is through curbing or suppressing the courteous manners and actions that, if it were not established in a position of authority would display themselves as the natural expression of the heart.

Good Eating

First Cannibal—Our chief has hayfever. Second Cannibal—What brought it on? First Cannibal—He ate a grass widow.

Catarrhal Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. Catarral Deafness requires constitutional treatmeat. Hall's Catarrh Medicine is a constitutional remedy. Catarral Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely olosed Deafness is the result Unless the inflammation can be reduced, your hearing may be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and restoring normal conditions.

Circulars free. All Druggists.

As your home for old age must be secure so must the investments be to provide you the necessary income.

Make the fouhdation of Bonds.

Municipal, Provincial or Victory Bonds may be bought in amounts of from fifty dollars up, yielding from 5½ to 6 per cent. payable half yearly.

All business strictly confidential.

G. C. LACEY - Record Office - CHESTERVILLE

The Shortest Thing in the world—

Isn't a mosquito's eyelash or a gnat's whisker, or any other part of any insect, whatsoever—
IT IS THE MEMORY OF THE PUBLIC.

If you doubt this ask the first dozen men you meet the following questions :

When did the R34 cross the Atlantic ? Who was her pilot ? On what date was Lord Kitchener drowned ? What was the name of the ship that blew up and almost wiped out the city of Halifax ? What German submarine torpedoed the Lusitania ?

It is a safe bet that you would not get one correct answer.

Now do you see the necessity of persistent advertising ? When details of events of world wide importance are so soon forgotten how do you expect the public to remember you—and the kind and price of goods you sell—unless YOU TELL 'EM—and keep on telling them ?

Hog Rations and Methods of Feeding As They Affect the Finished Product

(Experimental Farms Note)

Food supply as well as heredity excerises a controlling influence on the character and development of the growing animal. In order to obtain maximum development, the normal individual requires certain specific food constituents in well defined quantities. A failure to supply these or an abnormai supply of one or more of the required elements will result in more or less altered character and development.

The animal body is constructed from fourteen chemical elements and because these are not all available in any one food it is necessary to resort to a variety of feeds in order that the body tissues may be permitted to function normally. The fact that some feeds contain certain of the elements in greater proportions than other feeds has been utilized as the basis from which the proper computing of rations for the needs of the particular individual has been derived. It has been convincingly demonstrated that different animals and also the same animal at different stages of development require the various elements in different proportions. Throughout the earlier stages of an animal's life, while the body tissues are growing and developing, there is a proportionally greater mineral and protein requirement, these being utilized in the formation of bone and muscle, and a relatively smaller amount of energy-producing food requirement such as is obtained from the fatty portion of the feed.

For the production of pork, particularly during the early part of a pig's life, feeds with a high content of protein and mineral matter should be supplied. In this connection, it is note-worthy that the feeds which are rich in protein are also usually high in mineral matter or ash, while the feeds which are high in fat are relatively deficient in mineral matter. As the pig develops and matures, the proportion of the protein and mineral matter is decreased and the fat or energy producing part of this ration is increased to satisfy the body requirements. Should the young growing pig be reared on a ration materially deficient in the bone and muscle forming material, the individual thus fed will be undersized, fine boned, lacking in muscling and will mature earlier than would a similar individual fed a good growing ration high in protein and mineral matter content. Young breeding stock which has been reared on a highly fattening ration such as corn frequently suffer from impaired fecundity. It will, therefore, be observed that while a hog destined for the block at the earliest possible date may be forced with such a feed as corn or its by-products, swine that are destined for bacon production must be fed a higher protein ration which is conductive to the production of a longer pig and also one that is less heavily fleshed.

Self-fed hogs in the main make greater gains than trough or hand fed hogs but these gains frequently cost more to produce. The trough feeding method, on the other hand, is more suited to produce bacon hogs because the feeder can regulate the feed to the needs of the hogs and keep them growing without their becoming gorged as is frequeutly the case on the feeder. While more or less spread must be and is allowed in the feeding of swine the following deductions can be accepted as satisfactory under ordinary conditions for raising young pigs.

About three weeks before weaning a creep should be supplied where the young pigs learn to consume meal and milk. In order to realize the best results milk by-products are almost a necessity both at this stage and for some considerable time after weaning. Middlings, and finely ground or rolled oats either fed seperately or together in varying proportions make, a very satisfactory meal to feed the young pigs. After weaning, which is done to best advantage about eight weeks of age, feed a daily ration of about one pound of the following mixtures:—oats, shorts and linseed meal or flax seed meal mixed in the ratio of equal parts of oats and shorts with the linseed composing about 5% of the total mixture with also an addition to this ration of five pounds of milk by-products. Soaking the meal in the milk for twenty four hours previous to feeding improves the palatability.

Pen fed hogs make the most rapid and economical gains and generally this method is preferred for the production of market hogs. Alfalfa or clover fed in racks is the most suitable for hogs fed in pens. Whole dry grain such as corn or oats scattered through the litter tends to make the pigs take exercise. The meal rations should be gradually increased until at six months of age three or more pounds of meal are being fed. Corn or barley meal should be gradually added to the rations until these feeds compose 6 parts with the remainder of the ration composed of three parts of shorts and 5% of linseed oil meal or else flax.

The paddock is most desirable for rearing young breeding stock as soon after weaning as conditions permit. Alfalfa and clover occupy first place as pasture crops with oats, barley and rape ranking second. Similiar rations should be given these pigs as those given market hogs, except that the ground corn should be wholly or partially substituted with ground oats or barley. Undoubtedly the most satisfactary method of rearing young breeding stock is on paddock, because the growth of bone and muscle and the constitutional vigour thereby cannot be realized under other conditions.

Plant Surgery

If you have a plant that has been injured, even seriously, or that has been allowed to deteriorate, you can perhaps save it by operating on it. A straggly and unsightly plant that has still a graceful top can be helped by making an incision in the bark on each side of the stem and wrapping sphagnum moss round the cuts. Keep the moss wet; roots will form where you made the incisions. When they have grown sufficiently, cut off the top, with the new roots, and pot it. Or you can split a small flower pot in halves and place one-half on each side of the stem of the plant, so that the stem passes through the hole in the bottom of the pot. Fasten both halves securely to the plant and pack the pot with leaf mould, covered with sphagnum moss kept wet. When the pot has filled with roots, all that you will need to do is to cut the stem below the pot and move the plant into a larger pot; in that way the roots will not be disturbed.

Many plants in open ground that have been broken off by accident but not wholly severed from the roots can be saved. Bandage the breaks and pile earth well above them. Cosmos, dahlias and other plants that have distinct rings at the joints can be treated in that way. but you must do the work just after the break has occurred, before the foliage has begun to wither and before there has been an appreciable loss of sap. When you bandage plants that are growing out of doors, set a few splints of wood on a pad of sphagnum moss and tie the splints a several points so that new roots will find their way out into the earth.

If your plant has been injured by worms that have bored into it near the surface of the ground, ruu a wire into the cavity until you kill the worms, then pile earth round the wound.

To remove a broken limb from a plant, a tree or a shrub, make the cut as near the trunk or a sound limb as possible and so that the cut will be parallel to the surface from which the broken limb is to be removed,

If the roots of a plant have been injured, cut them back to healthy tissue with a knife that is sharp enough to make a clean cut.

Plant surgery can sometimes he used successfully to duplicate plants. One girl who had a choice geranium wished to have another plant of the same kind. She could get no large cuttings, and she did not care to wait or a small cutting to grow into a plant; so she divided the geranium, which was short and stocky and branched close to the ground. With a sharp knife she cut down through the centre of the plant and the root, removed one half, and potted it with the earth banked well above the cut. Then she piled earth close about the cut in the original plant and kept the earth moist. Both plants continued to grow vigorously

Spring And Summer Forest Fires

There are usually two periods of fire-hazard in the Canadian forests, in early spring just after the snow disappears, and in late summer, when the vegetation has begun to get dry. Exceptional seasons vary these periods but the two classes of "spring fires" and "summer fires" remain. Many people understand why the dry, hot period of late summer is likely to be favourable to the starting of forest fires but they think that, after the heavy snowfall of winter, the woods ought to be safe till early summer at least. A little reflection, however, will show why the early spring period is particularly dangerous. In early spring there is often a short period of hot, bright days. The leaves have not yet come out and the sun shines down through the leafless branches directly on the forest floor. The snow disappears as if by magic and the dead twigs and last year's leaves become dry as tinder. If a glowing match or cigarette stub is dropped among this material the forest floor is ablaze over a space of many yards in a moment. A few days at this period are always most critical. After the first spring rain the ground vegetation becomes green and damp, and the leaves come out and shade the forest floor. The worst danger is then over, until the hot days of late summer cause the vegetation to dry out, when a danger period ensues which lasts till the first autumn rains. The moral of it all is that Canadians ought always to be careful with fire in the forest and doubly careful during these danger periods.

Horses And Babies

Are horses peculiarly gentle with babies? It seems a fair question. Certainly the horses in this account, which a contributor sends us, were almost humanly solicitous of the welfare of the two young children who came into contact with them.

Our neighbor, says our contributor, had a field one corner of which came up to his dooryard. One day while he was ploughing he stopped when he reached the corner and, leaving the horses standing in the furrow, went to the pump for a drink. As soon as he returned he took up the plough handles and spoke to the horses. They did not move. He spoke again, sharply. Still they did not move. Astonished and vexed, he struck them with the whip. Still they stood immovable, and then he realized that something must be wrong. He went to their heads, and there in the furrow in front of them he saw his toddling baby boy!

The two-year-old daughter of a friend of mine in Denver had an experience a good deal more astonishing than that of the baby boy's. The little girl managed to stray away from in front of the house where she had been playing. There was a long search in which the police and fire department joined; but it was unsuccessful. Finally in a livery stable two miles away some men working there thought they heard a little cooing voice. They were horrified, for it seemed to come from the stall of a vicious horse that even the grooms approached cautiously and with dread. The men looked into the stall and saw the baby patting the horse's hind leg and calling him "nice horsie" while he, with his head turned, watched her benignantly not moving a muscle lest he should hurt her!

Bobbie: "Jimmy's got a great scheme to get out of school on fine days." Leslie: "How does he work it?" "He goes out an' washes his face at lunch-time, an' the teacher thinks he's sick, and sends him home."

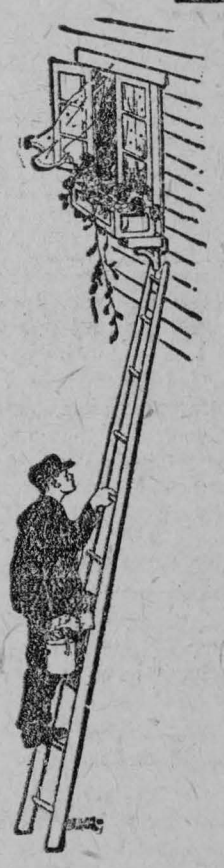
COUNTER CHECK BOOKS

The Record has the agency in this district for

THE APPLEFORD COUNTER FECK BOOKS

Look over your stock, and if you are nearly out drop in and see us, or use the telephone and we will send a representative. Prices on automatic check books are likely to rise on account of scarcity of materials caused by the war, so it will be wise to order now even if you are not needing a new supply immediately.

Clean Up
Paint Up



KEEP your house looking its best at all times. Keeping up its appearance will keep up your pride in it.

Plant flowers and grass seed. Trim up the shrubbery and vines. Don't let rubbish accumulate in either the front or back yard.

Then paint your house with Lowe Brothers High Standard—the investment paint. Lasts longer than most other paints and looks better as long as it lasts. This means that repainting won't be necessary so soon.

High Standard costs a few cents more per gallon, but you need fewer gallons, therefore you begin saving money right at the start.

We will gladly prove to you that the difference between Lowe Brothers and other paints is more than a mere difference of opinion.

Come in and ask for interesting literature and look at the sample panels.

MAINLY ABOUT PEOPLE

Mr. J. G. Tate spent Monday in Winchester.

Mr. and Mrs. Glen Merkley have returned home after spending two weeks with friends in Montreal.

Mr. and Mrs. P. S. Boyd during the Easter holidays were guests of relatives in Mountain.

Miss Laura Johnston of Ottawa Normal school, spent Easter week at her home here.

Mr. Wm. Ross yesterday attended the funeral in Ottawa of his aunt Mrs John McConnell, who passed away in that city.

Clean up your premises, back yards as well as front lawns. Lessen the danger of fire to yourself and your neighbors.

Get rid of Rheumatism, use O. R. Kidney Tonic. It is O. K. 75c at your dealers or postpaid from The O. R. Medicine Co, Richmond Hill, Ont. 26

One of the infallible signs indicating whether a village has "gone to seed" or not is the appearance of its buildings. If citizens have pride in the place they call home they keep it painted. An old saying used to put it for the sake of your credit "If you are hard up paint your fence"

A quiet wedding took place at the home of Mrs. Henry Weegar, Chesterville, on Thursday April 20th, at four o'clock, when her daughter, Winnifred, was united in marriage to Irwin, son of Mrs. Silas Cross of Maple Ridge. Rev. A. J. Sinclair performed the ceremony. Only the immediate relatives were present.

So. Mountain Herald—While assisting in taking down the frame work of Mr. Pillar's barn, on Wednesday afternoon, Mr. Gilbert Gilroy had the misfortune of falling off the big centre beam, to the ground backwards, receiving very serious injuries to his back and head. Drs. Ferrier and McKendry were summoned after an examination found that the spine was badly fractured.

GRANTLEY

Miss Gladys Carr spent Wednesday with her sister Mrs. Reuben Weegar.

Miss Gladys Robinson of Ottawa and Miss Mae Trimble of Munster, spent the week end with Mr. and Mrs. Mason Robinson.

Mr. Clifford Carr spent Sunday evening with Mr. Elburn Carr.

Mrs. W. L. Harte and Miss Jane Harte have returned home after spending the week in Montreal.

Mr. George Countryman of Bush Glen, called on Saturday at Mr. M. O. Robinson's.

Miss Maude Wilson, teacher has returned after spending the Easter Holidays at her home in Melvin.

BERWICK

Miss Kathleen Ruddy of the C. S. Ottawa, spent the Easter holidays at her parental home.

Master Hubert McCadden returned from the Hotel Dieu Hospital, Cornwall, on Saturday.

Mr. Johnston Ouderkirk is able to be around again much improved in health.

Miss Dorothy McNaughton of Chesterville and Master Emmett Norton of Connaught, spent Easter the guests of their grandparents Mr. and Mrs. Wm. Galvin.

Guests at the home of Mr. and Mrs. Geo. Barrigher on Sunday were Mr. and Mrs. Shaver and Mr. and Mrs. Dishaw of Cornwall and Mr. and Mrs. H. Merkley of Chesterville.

Mr. D. B. Cameron is in Ottawa this week on business.

Messrs. Dennis O'Donohue and Wm. Clement of Crysler, were calling in town on Tuesday.

Mrs. Margaret Bouckhout who spent the winter months with her son out in the country returned to her home this week.

Miss Mary Spotton returned to Normal school on Monday.

Little Edith Dishaw of Cornwall, who was spending her Easter with her grandparents Mr. and Mrs. Geo. Barrigher took very ill last week with pneumonia but we are glad to report she is recovering.

Mrs. Frank Stephen and children of Ottawa, were the guests of Mr. and Mrs. Wm. Galvin.

Moving and fishing is the order of the day in town.

Mrs. (Dr.) J. C. Gormely, Misses Annie and Josie Cashion of Crysler, were guests at the home of Mr. John Ruddy on Sunday.

MAINLY ABOUT PEOPLE

Whittaker the Optician will be in Chestervill May 9 th and Finch 11th.

Miss Mary Brown of Spencerville and Mr. Delbert Gilmore of South Mountain, spent the week with their cousin Miss Alice McMillan of Dunbar.

Mr. P. S. Boyd, principal of Chesterville Public school represented the teachers of Dundas at the recent convention of the Ontario Educational Association in Toronto.

With three of I. N. Harper's heavy horses attached to the road drag Tuesday afternoon several of the streets were put in a much better condition for traffic than they have been for some time.

Mr. C. D Nadeau of the Molson's bank, who has been in the Kingston Military Hospital for some time under treatment for injuries received overseas has resumed his position

A concert of "Ye olden tyme" will be given under the auspices of the Epworth League on Monday evening May 1. in the S. S. Hall. Songs and Costumes of great grandmother's day.

Word was received on Tuesday by friends at Melvin of the death of a former teacher in their school, Miss Fraser, who passed away on Monday at her home near Maxville. She was a popular young lady and a successful teacher, having resigned because of ill-health, more than a year ago. To her relatives is extended the loving sympathy of many friends who knew her in this locality.

MAINLY ABOUT PEOPLE

Mrs. K. A. Gollan of Lucknow, was the guest Saturday of Mr. and Mrs. Rol. Shaver.

Mrs. T. A. Cauley and children of Montreal, spent the week end with Mrs. Cauley's parents Mr. and Mrs. F. McCloskey.

Mr. Leon O'Neil of Melvin, who has been suffering from blood-poison in the middle finger of his right hand for some time had the finger amputated at the second joint last week. This has caused Mr. O'Neil much suffering but his many friends hope for a speedy recovery.
