The Leader

XXIII, No. 7 MORRISBURG, ONT. FRIDAY, MAR. 13 1925

THE UNITED FARMERS CO-OPERATIVE COMPANY LIMITED HEAD OFFICE TORONTO, ONT.

Flour & Feed

We have a complete assortment of Mill Feed which we are offering at very attractive prices.

CORN

Our Argentine Corn, the ideal poultry feed, is one of our best sellers.

SALT

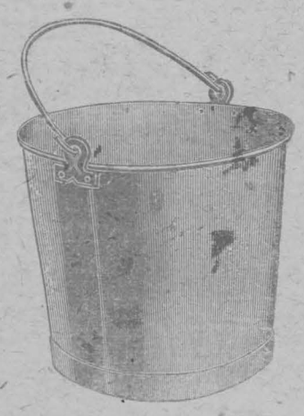

The coarse salt is of excellent quality, it is essential to feed it all the time, particularlly to growing stock and milch cows.

EGGS

We anticipate a good season in eggs. THE EGG POOL will undoubtedly be a success.

THE UNITED FARMERS CO-OPERATIVE CO. LIMITED
MORRISBURG, ONT.

DAIRY PAILS

A splendid line to make your selection from. If you want an extra heavy pressed retinned raised bottom pail with substantial bale and ears, something that will stand the bangs and hard knocks, we have it at an EXCEPTIONALLY LOW PRICE.

We also have a NEW DAIRY PAIL made expressly for women, girls and boys milking. They are narrower across the top than the standard pail, also deep, flaring, making them very easy to hold, and yet contain all the milk the standard pail will hold.

We have exclusive sale of this NEW DAIRY PAIL in this vicinity and making a special of it at 49c.

White and Tints. MURESCO for wall and ceiling decoration.

Will Not Rub Off

SPECIAL XX White Full 5 pounds, 55c.

OUR NEW WALL PAPERS NOW OPEN FOR YOUR INSPECTION

MORRISBURG — ONTARIO

CITIZENS MEET COUNCIL

A large number of the citizens attended the special meeting of the Council held at the Town Hall on Monday night. The meeting was called for the purpose of discussing by-laws to govern the new rates for local electric current.

It can hardly be said that the meeting was a success, so far as discussing the subject for which the meeting was called is concerned. However, Mr. I. Hilliard, K.C., seized the opportunity, when so large a number of the citizens were gathered together, to offer a suggestion, which in his opinion, would go a long way towards solving the problem of low voltage.

One of the objections which the members of the Council, who are opposed to meters are featuring, is that the town cannot afford, under present financial conditions, to undertake such a large expenditure, and are delaying until certain debentures run out in 1927.

In order to meet this objection, Mr. Hilliard stated that if the Council would decide to install meters immediately, he would assist them in the sale of their debentures, by making arrangements to have the first payments come due in 1927. He also stated that he would have an experienced electrical engineer come to Morrisburg to investigate the cost of generating power, and have a meter rate set accordingly.

We understand that Mr. Hilliard's suggestions have made a favorable impression on a large number of our citizens and will undoubtedly be given due consideration by our Council.

There seems to be a general desire among our councillors and citizens, to throw aside all obstructions, and join in the spirit of co-operation. The necessity for united effort in this matter is growing and the barriers, whether they consist of selfishness, excessive independence, or exaggerated ideas, must be lifted before we can work together and thereby promote jointly, the same end.

The Council, we believe, have decided to make an effort to right the matter, and the true co-operation of our citizens during the next few months, will help to make the road smoother. Three months from today it will be too late to discuss matters or experiment.

At the present time, the voltage, during the daytime, is much improved, and we are therefore, apt to overlook the importance of making a move that will mean permanent improvement. Unless this is done now, however, it will mean thousands of dollars of a loss to this town next Fall and Winter.

According to information from the highest authorities, the town electrical plant, if we continue to operate it under present conditions, is liable to fall into the hands of the Hydro Commission, which has jurisdiction over all electrical plants in the Province of Ohtario.

The Leader will not, for the present, comment on the proposed new by-laws.

THE LATE JOHN SADDLEMIRE

At Glen Becker, on February 24th, 1925, there passed to his rest and reward, one of the most respected citizens of this community, in the person of Mr. John Saddlemire, at the age of 78 years, having been born Sept. 29th, 1847.

The late Mr. Saddlemire was one of the most successful farmers of the day, and by hard work and integrity made an honoured place for himself among the prosperous agriculturists of the Morrisburg district.

In religion he was a Presbyterian, and for many years was a respected Elder in the Williamsburg Presbyterian Church. He was also a talented singer and led the choir there for a long term of years. In the Spring of 1914 he moved to Morrisburg and soon after was elected as an elder of Knox Church, where he served with fidelity and acceptance till failing health prevented him.

His wife, nee Miss Amanda Swerdfeger, predeceased him March 10th, 1922. The sorrow of this loss weighed heavily on his spirit and he longed also to pass to the other side.

Four sisters and four daughters are left to mourn. The sisters are: Mrs. Ralph Beckstead, Glen Becker, Mrs. Alzon Dillabough, London, Ont. Mrs. Donald Hanes, Dundela, and Mrs. Thos. Stewart, Morrisburg. The daughters are: Mrs. John D. Dain, Morrisburg, Mrs. Roy Swerdfeger, Williamsburg, Mrs. (Rev.) D. K. Fetterly, Monongahela, Pa., U.S.A., and Mrs. Frank Powell, Glen Becker.

The funeral was held from the family residence, Glen Becker, on February 27th, and was attended by a large number of relatives and friends. The services were conducted by Rev. J. D. MacKenzie of Morrisburg, assisted by Rev. Edwin Smith of Williamsburg. Interment was in the family plot in the Williamsburg Cemetery.

KNOX CHURCH

Sunday, March 15th, 1925.

11 a.m. the pastor will preach, sermon topic: "The Value of a Man" or "How Much Better Then, Is A Man Than A Sheep."

7 p.m. Subject: "The Way of a Man" or "A Way which Seemeth Right unto a Man."

All are cordially invited.

CLERK TAKES EXCEPTION

Mr. F. R. Chalmers, Clerk of Morrisburg, informed us that he takes objection to the statement made in The Leader recently, to the effect that it must be a difficult task for him to make a certain declaration. He claims that a false impression has gone abroad that he takes a false oath. We regret to have made a false impression, but perhaps the Clerk has done more to spread such a false impression about himself than anyone else in town.

Will the Clerk answer these questions?

Do you know that you are, as Clerk, in our opinion, collecting light and power rates for standard voltage at the present time contrary to law?

Do you know that you rendered bills to The Leader Publishing Co., Limited at a rate of 15.00 per H. P. when other party or parties were paying only $7.50, and that in our opinion that was contrary to law?

We do know that a deputation appointed to meet the Council at their regular meeting a few weeks ago, to try and arrive at some settlement of the power question, had to cancel their meeting owing to the fact that the Clerk had given out too many invitations to come to the Council meeting and "see the fun."

If Mr. Chalmers, as clerk of the town, thinks the present condition of things is funny, it is time someone of a more serious nature were appointed to deal with this particular matter.

COLLISON TO HANG MAY 29

Dr. Edward Ryan, head of Rockwood Asylum, Kingston, the last witness at the Collison trial, for the murder of Beatrice Thorpe at her home in Hulbert on Nov. 22nd last, said he had examined Collison on December 28 and 29 and on March 10, and that any man who could buy a farm when 22 years of age was above normal. He considered that Collison knew he was doing wrong in commiting the deed.

After hearing the addresses from the Crown and Defence, Mr. Justice Lennox addressed the jury for about an hour, covering every phase of the case and instructing the jury as to their duties under the law as defined in the case of a plea of insanity.

The jury retired for an hour and brought in a verdict of guilty.

Collison showed no sign of agitation at the verdict.

The judge asked Collison if he had anything to say why sentence should not be passed on him, and the prisoner in a feeble voice replied: "I have nothing to say."

The judge then passed sentence of death the execution to take place May 29th.

ACKNOWLEDEMENT

Ottawa, March 5th, 1925.

To Miss Smith, the Staff, and Students of the M. C. I.

I desire to not only acknowledge the receipt of the choice bouquet of Roses accompanied by the valued gift enclosed in the presentation box which came to hand yesterday, but I wish also to express my gratitude and deep appreciation for the thoughtful, kindly spirit that prompted you and the pupils of the Collegiate to remember me in this tangible and spontaneous manner.

This appeals to me in my declining years as a reward for my feeble efforts in helping to promote that spirit of friendship, happiness and co-operation which has existed in the Collegiate during the years in which I was associated in any way with this institution.

During these years it was my privelege and opportunity of making many friends among the students, many of whom now hold respected and responsible positions in social and commercial life, and it is with pleasure and a deep sense of satisfaction that I look back on those friendly associations of former days and realize that my efforts, however small, for their comfort and happiness have been appreciated.

I will always cherish this kindly rememberance from the staff and students of the Morrisburg Collegiate.

Thanking you all most heartily,
I remain,
Yours faithfully,
JAMES LASKEY
417 Chapel St.

WILLIAMSBURG COUNCIL

The Council met at Williamsburg on Saturday, March 7th, 1925. Members all present. Minutes of previous meeting read and adopted.

The following accounts were passed::—

Henry Wells, services as truant officer	$ 9.50
Henry Wells, salary as collector for 1924	25.00
R. I. Pruner, salary as collector for 1924	25.00
R. I. Pruner, excise stamps and postage	3.12
Ezra McMillan, payment on salaary as Road Supt.	62.50
C. N. R. expenses, crossing gates at Morrisburg, Dec.	33.03

The Council adjourned to meet again at Boucks Hill in Barkley's Hall on Saturday April 4th, 1925, at one o'clock p.m.

Recent Price Reductions make Overland

World's Lowest Priced FOUR-DOOR SEDAN

with Sliding Gear Transmission

THIS beautiful five-passenger Sedan which showed an amazing sales increase of 72 per cent last year—is to-day $105 less in price.

The same high quality and complete equipment are maintained. The Overland four-door Sedan is now not only the "World's Lowest Priced four-door Sedan with sliding gear transmission" but is the World's Greatest Value.

Overland's original "23 big-car advantages" continue to be engineered into this splendid car, as into the entire Overland line.

Bigger power—disc clutch—extra large, removable axle shafts—oversize brakes—comfortable Triplex Springs—big economy—are only a few of the advanced features that are making Overland such an outstanding success.

Competitive dealers and salesmen everywhere are questioning whether Willys-Overland can continue to produce such remarkable cars at such remarkably low prices. But let Willys-Overland worry about that!

See these cars today. Long, easy terms if desired.

OVERLAND

W. H. FETTERLY & CO.

At Your Service

Let us supply your needs for Spring.

If you have need of a new roof, stable equipment, or plumbing. I can give you a price on what it will cost you and guarantee you satisfaction We can supply you with hand made milk cans, pails, sap buckets, and anything else in our line you need. My prices are right and quality, very best. I handle stoves, ranges, furnaces, pumps and repairs, washing machines. I solicit your patronage.

THE SEED CORN SITUATION.

In a normal season in our seed-corn-growing areas, the corn plants mature their seed sufficiently early for it to become well hardened while still on the stalk. This hardening process consists largely in loss of moisture and is necessary in order that corn may go into storage dry enough to prevent moulding of the corn or frost injury to the germ.

Unfavorable weather conditions during the latter part of the past growing season resulted in large quantities of corn failing to dry out or mature sufficiently to produce first-class seed. Unless such corn was artificially dried before heavy frosts set in, its vitality is sure to be impaired to a large extent. Such a condition calls for foresight and good judgment on the part of the prospective buyer, foresight in the matter of early purchasing, as seed corn is likely to be scarce, and good judgment in testing the germination of all seed corn bought in order that sufficient may be planted to ensure a full stand.

The present seed corn situation should also cause is to give thoughtful consideration to the question of the variety of corn we intend to plant. On the whole, seed of the earlier-maturing varieties is likely to be in better condition than the later-maturing sorts. A variety of corn which reaches at least the glazed stage in any district during an average year is therefore likely to be the safest to grow this coming season from the standpoint of the quality of seed that it will be possible to buy. Not only will the chances be better for securing satisfactory seed of such a variety, but the odds are equally good that more actual feeding value per acre will be secured than would be the case with most later sorts.

It would seem to be the policy of wisdom, therefore, for all prospective purchasers of seed corn to (1) buy early (2) buy a variety that will almost reach maturity in the district concerned (3) test thoroughly the germination of all seed before planting.—G. P. McRostie, Dominion Agrostologist.

HOGS.

March and April pigs get to market before the price collapse that comes late every fall. At no other time of the year does it pay as well to take an easy chair down to the hoghouse and sit up with farrowing sows.

Early spring nights are almost always chilly. The new pigs are apt to crawl under their mothers, in search of warmth, and get crushed. I find it pays to be on hand to effect rescues in case of need.

Year after year, every spring, I have sat up with my sows. It is not as inconvenient as it sounds. I bundle up warmly and take a good lantern along. The night passes quickly. I half doze in my chair, keeping one eye open for possible mischances to the increasing families.

Long ago I learned to distinguish between the combative squeals of the new arrivals and the choking moan that means that one of them is being crushed. It is well to shoo small wanderers back to their mother's side, where they will be safe from chill. —E. V. L.

POULTRY.

The first step toward successful breaking up brooding among hens is to get them just as soon as they begin to brood. If you allow them to set for two or three days, they are usually very hard to break. By starting the first day they show inclination toward brooding, it will only take a day or two to break them up.

Usually the best way is to go in at night, taking out any birds which are on the nest, and putting them in coops with slatted or wide bottoms. Feed them nothing but mash feed, with plenty of green food and water. Starving brooding hens is absolutely wrong, as it throws them clear off production and they are usually a month or six weeks coming back.

Get Machinery Ready.

Repair parts for farm implements should be ordered months ahead of the time to put implements in use, because there is often a considerable delay in obtaining parts, owing to the fact that that particular implement is no longer manufactured, and the part ordered has to be cast and machined after the order is received. And, moreover, there is sometimes weeks of delay in transit by freight. Besides, a grain farmer's time is worth far less in winter than in summer, so he can better spare the time to tinker up implements in winter.

It is necessary to replace worn out equipment with new:

1. When repair parts can no longer be obtained.

2. Advisable, when repair parts would cost more than a new implement.

3. Advisable, when new implement would prove more efficient than the old one.

4. If a considerable portion of an implement is worn out, or if it is of a too antiquated model, it is usually economy to buy a new implement.

A great many farm implements last the lifetime of the farmer, if well cared for, and minor repairs made when needed. For example, my father erected a windmill forty-five years ago which continues to pump water as when new. A double harness was in almost daily use, except Sunday, for thirty years, being washed and oiled once a year and repaired as needed.

Very many farms are not equipped with enough mechanics' tools so that the owner can do any repair jobs other than to toggle things together with baling wire. A larger assortment of mechanics' tools would pay good interest on the investment, if the owner is fairly handy with tools.

"Good Equipment Makes a Good Farmer Better," because he can do more work, better work, do it in the proper season, and at less expense. —A. N. C.

ISSUE No. 10—'25.

Boys Make Money Wtih Their Tractor.

One of the few tractors owned and operated in this part of the country is owned by my brother James and his friend, Glenn Storer.

When these boys first bought a tractor, some three years ago, all their friends prophesied that it would lose them money. "There isn't enough work on the small farms we have around here to anything like pay one to own a tractor," they argued. But the boys thought they knew how to get work for the tractor in seasons when the work on their own farms was negligible. In order to supply this work, they bought a small grain-separator, a wood-saw and a small mill for grinding feeds.

Last spring the boys not only plowed their own ground but also plowed quite a bit for their neighbors. This plowing was done at a cost of about 60 cents an acre for oil and fuel. After finishing plowing the boys disked part of their ground with the tractor. As soon as this disking was done the tractor was placed in the shed, where it could be hitched up to the mill two days each week to grind feed for the neighbors round about.

Along in the summer James's pond became almost dry and the tractor was given the job of pulling the big road scraper we used in digging a new one.

When the small grain became ripe enough to harvest, Friend Tractor was hitched to the binder and went chugging away until the grain was cut. Then, without a whimper, he backed up to the separator and pulled it out and began threshing grain. The boys made about a $1,000 run with their thresher last summer.

Threshing time was scarcely over when silo-filling time arrived and the tractor was put to work filling silos. The farmers who own silos own a company silage-cutter but hire the power to operate it.

Without even a breathing spell, millet, buckwheat and soybean threshing followed silo filling and close on the heels of the threshing season came wood sawing. There are still small patches of timber on nearly every farm in this neighborhood. Thus it is that nearly every farmer gets up a pile of wood for his winter's supply of fuel. The tractor's ample and steady power gains him many friends here.

At this time, November 12, wood sawing is the order of the day and such will continue to be the case for some time to come. Then the tractor will move back into its shed and while away the cold winter days grinding feed for his friends.—W. I. C.

Cement in Lime Makes Good Whitewash.

A good whitewash for stables, milkhouses, pig pens, hen houses, or any other building about the farm, may be made by using two parts hydrated lime, and one part cement in water. It dries hard and will not rub off. Better results will be had if hot water is used to mix. Make about as thick as paint.—J. M. P.

Promises That Much.

Edwin—"And we'll be as happy as any married couple that ever lived."

Angelina—"At least as happy as any married couple that ever lived together."

All the large, successful poultry farms of to-day started in a small way and gradually built on a firm foundation.

Mr. Cosgrove, the president of the Irish Free State, is back at work in Dublin after a long stay at Nice, where he went to recover his health. He is shown with his wife and son, Liam.

Results of Co-operative Experiments With Farm Crops in 1924.

The co-operative experimental work with farm crops in connection with the Ontario Agricultural and Experimental Union is rapidly approaching its pre-war magnitude. In 1924 there were 485 more experimenters than in 1923 and 578 more than three years ago. There were in all forty-two distinct co-operative experiments with farm crops in the past year. These included various tests with grain crops, potatoes, field roots, fodder crops, hay crops, etc.

Those varieties of grain crops which gave the highest average yields of grain per acre in the separate experiments in 1924 were as follows: Oats, O.A.C. No. 144; barley, O.A.C. No. 21; hulless barley, Guy Mayle; spring wheat, O.A.C. No. 85; buckwheat, Silver Hull; field peas, Potter; field beans, Michigan No. 630425; soy beans, O.A.C. No. 211, and winter wheat, O.A.C. No. 104.

The highest yielding varieties of roots in the co-operative experiments were: Mangels, Sutton's Mammoth Long Red; sugar mangels, Bruce's Giant White Feeding; Swede turnips, Perfect Model; and field carrots, Rennie's Mammoth Short White.

The following gives the average yield in tons of whole crop and in bushels of shelled grain per acre per annum of each of eight varieties of corn tested throughout Ontario under similar conditions for eight years: Golden Glow, 9.5 and 65.6; White Cap Yellow Dent, 9.4 and 61.4; Wisconsin No. 7, 10.6 and 60.6; Bailey, 9.5 and 59.5; Salzer's North Dakota, 9.1 and 56.4; Longfellow, 9.0 and 54.8; and Compton's Early, 8.5 and 52.5.

In seven years' co-operative experiments the average results in yield of grain per acre per annum from three different seed mixtures were as follows: Oats 1 bushel and barley 1 bushel, 2,104 pounds; oats 1 bushel, barley 1 bushel and Golden Vine peas ½ bushel, 2,019 pounds; oats 1 bushel, barley 1 bushel and Wild Goose spring wheat ½ bushel, 1,913 pounds.

In the 890 successfully conducted tests throughout Ontario in the past seven years, the Green Mountain potatoes gave an average annual yield per acre of 203 bushels and the Irish Cobbler of 177 bushels.

Within the past seven years 475 separate tests were made throughout Ontario in comparing the results from Northern and from Southern grown seed potatoes. The average annual yield per acre from the Northern grown seed was 190 bushels and from the Southern grown seed, 181 bushels. In every one of the seven years the Northern grown seed gave a higher average yield than the Southern grown seed.

In an experiment extending over four years and including in all thirteen tests the average annual yield of oats per acre was 62.8 bushels from the application of ten tons of barnyard manure, 58.4 bushels from the application of 200 pounds of 3-8-3 fertilizer, 56.4 bushels from the application of 200 pounds of 1-8-1 fertilizer and 51.2 bushels from land which received neither manure nor fertilizer.

For detailed information regarding these and other co-operative experiments the reader is referred to the forty-sixth annual report of the Experimental Union which is now being printed and which will be distributed from the Dept. of Agriculture, Toronto, Ontario, a few weeks hence.

Ontario farmers wishing to experiment with field crops in 1925 should write to the Field Husbandry Dept., O.A.C., Guelph, asking for the spring circular of co-operative experiments which will be printed about the end of February.

Plant Rapidly Growing Trees.

A report on foreign practices in timber growing reveals the fact that in private forests rapid growing trees are most favored. This has popularized the poplar tree. Its exceeding rapid growth, the ease with which it can be worked, and the many uses to which it can be put, have made it a favorite. Ash, larch and Douglas fir are also planted generously for the same reasons.

To raise turnip-rooted celery or soup celery successfully, the bottom leaves must be kept pulled off. Otherwise there will be large tops and no large roots. We raise both kinds of celery and found out this secret ourselves. In the fall we pack the roots in boxes of damp sand, and they keep fine until all used—Mrs. W. S.

Boiled vegetables should not be fed too liberally, or they will produce bowel troubles in fowls.

Home Education

"The Child's First School is the Family"—Froebel.

Childish Fear—By Edith Lochridge Reid.

"You'd better behave for that policeman's looking at you—he grabs little boys that cry." So spoke Donald's mother when her small son was making a scene because she didn't have a penny to let him get some candy from the slot machine while they were waiting for the street car at the corner. Less than a month later Donald got separated from his mother when they were watching a street parade. A blue-coated officer attempted to help the child locate his home and parents but Donald was so terrified to have the policeman touch him that he almost had a spasm. The nervous shock of feeling he was in the power of the man he had been taught to fear left him half sick.

One only needs to walk the streets of any city for a day to hear similar remarks by parents. "The conductor will throw you off the car," or "See that man watching you—he'll chase you with his cane," these are typical expressions to quiet or frighten children because the parent is too weak in discipline to control them in any other way.

Recently a doctor remarked confidentially in describing the trouble he had encountered with a frightened child, "Some one ought to wake up mothers to the fact that it is very serious to have a child fear the doctor. This child to-day had been taught that I carry terrible things in my black bag for children that coax for rich desserts and fall out of trees because they disobey. She raised her temperature several degrees fighting me off."

And this case is only one of many. I heard a mother say to a child that was impatient about staying in bed for the necessary time after an attack of measles, "If you don't mind I'll send you to the hospital and the nurse will come along and strap you right in bed and not give you any dinner."

How much better to have read to the restless tot or planned surprises for her or to have played a new record on the Victrola. She should have willingly stayed in bed because she loved her mother and had been taught to respect authority rather than through fear of being sent to the hospital.

A threat to a child always denotes a weakness in the tie that binds that child to respectful authority. Why does a mother need to tell a child a big black bear will get him if he doesn't shut his eyes and go to sleep? Probably because she has managed his bedtime very erratically. Perhaps one night, he went at seven and the next night if the family wanted to go to a movie he trailed along and was put to bed at nine or later. Now, to-night, because there are guests and Son must be disposed of summarily he is told he must go right to sleep or—then follow the penalties that will come if he disobeys, all of which instill fear into his heart that lasts until he is old enough to become disillusioned.

Can't we aim to have our children do right because it is right, and not because they fear doctors, hospitals, officers and bears? Let us develop caution and judgment but not senseless fear.

A PADDY PARTY FOR MARCH 17

A Paddy Party to be given on St. Patrick's Day, on March 17, could not help but be a very merry one. It would not be natural to be stiff or glum at a table all decorated in Irish green, or to keep a straight face through the merry games which this day is sure to bring forth. So if you are planning a party for this last of the winter months select this felicitous day for the event.

You might send out your invitations like little high hats. Cut them from stiff shiny black cardboard or paper making the crown part double so that the invitation can be written inside. A particularly good way to make them, if you can call an artist friend to your help, is to draw a comical paddy face, make the hat double and separate, and after cutting a slit in the double hat—like a paper doll's hat—slip it on Pat's head. The invitation in either case can be the same. Write it in limerick form, in green ink, something like this:

I am passing around this high hat,
And I know you won't hate me for that,
For it comes to invite
You for Tuesday night
To a party in honor of Pat.

All the opportunity in the world is offered to the hostess on this occasion for her decorations. She has snakes, shamrocks, potatoes, pipes, tall hats and pigs for inspiration. The shamrock idea makes an awfully pretty scheme of decoration. The little three-leafed plants can be cut in large quantities from green tissue paper or cardboard, and strung on gold cord around the room. They can be hung at different lengths in the doorways for portieres. An idea which is not so generally used for the March party is the Irish fairy, or "wee folk." This would make a very lovely idea to work upon for the children's party, with a wishing well for the grab bag in one corner of the room, and a ring of pixies dancing around a circle of green grass and "stones" for the centrepiece on the table. The stones could be prize packages of candy with a tiny favor in each and wrapped in brown or gray paper.

Grown-ups will enjoy the regulation Paddy party better probably, and to give it variety it might take the form of a sight-seeing tour through Ireland. There will have to be a jaunting car, of course, and this can be that old but always amusing stunt of trying to keep balanced in a clothes basket swung between two chairs by putting an umbrella or broomstick through the handle. Each guest must take his turn in the jaunting car, and must be required to pick three shamrocks off the back of a chair just within his reach. If the party needs any livening up, this stunt is sure to do it.

The first stop is Blarney Castle. Here the guide points out the Blarney stone, which each must kiss. This is a piece of muslin marked off into stones with one painted green in the centre. This is hung on the wall, and each guest must try to kiss the Blarney stone by standing about two feet away from the wall and bending backward until he actually kisses the green spot in the muslin. The very athletic will be able to do it, but the others will have to be helped along. If this contest is not too unequal a prize could be awarded to the one who kissed the spot most exactly in the centre.

A famous fortune disclosure well is the next point en route. Into this, the guide says, any maid can see her fate if she looks into it at the time of the crescent moon. This is so arranged that a mirror surrounded by artificial moss and painted muslin rocks is tilted to reflect the picture of a bride. As each girl leaves the well, she is asked not to tell the others what she has seen.

For the centre of the table from which the refreshments are served use a tall hat turned upside down and filled with a ferndish of shamrocks. If you can get an old hat, it would be unusual to slit the hat in several places and let some of the natural shamrock leaves poke through the holes. Pass around plates on which you have a green pepper stuffed with mashed potato salad, with sprigs of parsley "growing" in it, brown bread and butter, sandwiches with very thin slices of tongue or corned beef between the bread, coffee poured from a tea pot, ice cream colored green, or flavored with pistachio nuts, and small cookies cut in the shape of harps, shamrocks, pipes and pigs.

During the refreshments suggest that each guest think up the funniest Irish bull he has ever heard. A prize might be awarded for the best one. And if your evening requires any further entertainment, or if you want to substitute a game for the journey through Ireland, try the following:

TEN PAT ANSWERS.

The Pat which destroyed the hole, Patch.

The Pat that is imitated, Pattern.

The Pat of high birth, Patrician.

The Pat as old as the hills, Patriarch.

The Pat who is hard to keep, Patience.

The Pat who protects your ideas, Patent.

The Pat who gives you a free ride, Patrol.

The Pat who loves his country, Patriot.

The Pat who is like his father, Paternal.

The Pat that is heard in the nursery, Patter.

MME. Margaret Vogel

Who has been made under-secretary for her or to have played a new record on the Victrola. She should have willingly stayed in bed because she loved her mother and had been taught to respect authority rather than through fear of being sent to the hospital.

"Bad luck" in poultry keeping is nothing more nor less than another name for wrong management.

Butter and Cheese Exports.

By the News Letter of the Dairy and Cold Storage Branch at Ottawa it is ascertained that during 1924, 22,343,939 lbs. of butter valued at $8,000,512 were exported from Canada compared with 13,173,711 lbs. valued at $4,905,608 in 1923; also that 121,456,600 lbs. of cheese valued at $22,575,787 were exported in 1924 compared with 116,201,900 lbs. valued at $23,445,401 in 1923. It will be seen that exportations of butter last year exceeded those of the year before by 9,170,228 lbs. and of cheese by 5,263,700 lbs. About thirty per cent. of the butter in 1924 and 80 per cent. of the cheese went to the United Kingdom. Nearly twenty per cent. of the butter went to the United States, or 482,613 lbs. over 18 per cent., 459,648 to Germany, and 265,019 lbs. to Panama.

The price of the table fowl is as much regulated by the method of dressing as it is by quality.

Matings should be made at least a month before you intend to incubate the eggs.

Wood ashes must not be mixed with the poultry manure under the roots. It not only injures the fertilizing value of the manure, but is likely to be injurious to the fowls.

ONTARIO BREED BETTER $ STOCK LIVESTOCK Improvement Committee

Many Farmers Buying Pure Bred Bulls

Ontario is fortunate in having many Pure Bred Breeders of proven merit, and the stock they produce bring fame to Ontario.

Ontario farmers are rapidly getting the idea that the herd that pays is the only one to keep.

Follow the lead of successful farmers by getting good Pure Bred Bulls.

Your Agricultural Representative knows the breeders of good bulls in your county. See him.

UNITED STATES REACHES DECISION REGARDING CHICAGO WATER DIVERSION

A despatch from Washington says:—Finis as far as the United States is concerned was written to the dispute over lake levels between the sanitary district of Chicago, states other than Illinois bordering the Great Lakes, and Canadian lake interests. Secretary of War Weeks issued his decision with respect to withdrawal of water by Chicago from Lake Michigan, ruling that diversion for the present should be limited to 8,500 cubic feet per second and that it should be reduced to 4,167 feet by 1935. The Secretary granted a permit for an average of 8,500 feet until Dec. 31, 1929, but this is conditional on various undertakings by the sanitary district and may be revoked.

One of the attached conditions stipulates no unreasonable interference with navigation.

Other important conditions under which the sanitary district, which asked for a diversion of 10,000 cubic feet, is granted a slightly lesser amount are:

That the Chicago sanitary district shall carry out a program of sewage treatment by artificial processes before the expiration of the permit.

That the sanitary district shall pay its share of the cost of regulating or compensating works to restore the levels of the Great Lakes and shall post a bond or guarantee of $1,000,000 as evidence of good faith in this matter.

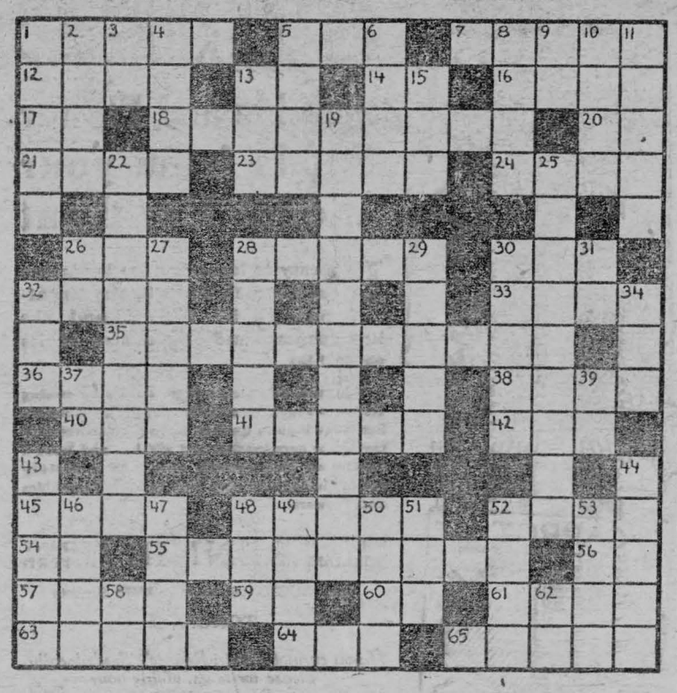

That the sanitary district shall submit to chief army engineer of the United States and to Secretary of War Weeks plans for controlling works to prevent the discharge of the Chicago River into Lake Michigan during storms. (These works are to be completed by July 1, 1929.)

Unless the conditions are carried out the permit may be revoked without notice at the instance of the Secretary of War and subject to such action as Congress may take. It is pointed out that compliance with the terms of the permit dealing with sewage treatment will make possible the reduction of the diversion of 7,250 cubic feet by the end of 1929.

Mr. Weeks' decision followed action of the Supreme Court upholding his right to control diversion of water from the Great Lakes under his authority to control navigable waters. Chicago's contentions to the contrary were fought by all states bordering on the Great Lakes except Illinois, which also opposed at the public hearing by the Secretary the application for permission to withdraw 10,000 feet per second. At this hearing representatives of Canadian lake interests were present.

"This department has always held and continues to hold," Mr. Weeks wrote to Mr. King, "that the taking of an excessive amount of water for sanitation at Chicago does affect navigation on the Great Lakes adversely and that this diversion of water from Lake Michigan should be reduced to reasonable limits with utmost dispatch. I appreciate that the desired reduction cannot be made instantaneously."

CROSS-WORD PUZZLE

SUGGESTIONS FOR SOLVING CROSS-WORD PUZZLES

Start out by filling in the words of which you feel reasonably sure. These will give you a clue to other words crossing them, and they in turn to still others. A letter belongs in each white space, words starting at the numbered squares and running either horizontally or vertically or both.

HORIZONTAL

1—A small job
5—Pronoun (possessive)
7—Implied
12—Girl's name
13—Thus
14—Exclamation
16—Inside an apple
17—Printer's measure
18—One who bears the blame
20—Upon
21—Wealthy
23—Small Spanish horse
24—Perfect mentally
26—Nonsense (slang)
28—Very small insects
30—Consumed
32—A grain
33—Indentation
35—Understands
36—Suppose
38—An English school
40—Possesses
41—Direct
42—Put on clothes
45—A helper (abbr.)
48—Caper
52—Poisonous reptiles
54—Legal term
55—Those who put money in business
56—Island near New York (abbr.)
57—End of a dog
59—Prefix meaning "formerly"
60—Prefix meaning "in"
61—Supplied with shoes
63—Old
64—Boy's name (abbr.)
65—Last name of author of Uncle Tom's Cabin

VERTICAL

PREMIER OF NOVA SCOTIA CALLS ON CITIZENS TO SAVE THE MINES

Halifax, N.S., March 8.—Premier Armstrong has urged the citizen's committee of Glace Bay to agree to man all the mines and power houses with maintenance men as a solution to the problem of protecting collieries from total destruction by flooding. This was the result of an exchange of telegrams between the Premier, the corporation and the committee appointed at Glace Bay to act in the interests of saving the collieries. No answer to this suggestion had been received at midnight to-night. Another development to-day was the receipt of a telegram from J. E. McLurg, vice-president of the British Empire Steel Corporation, formally asking Premier Armstrong if he would, as Premier of Nova Scotia, provide adequate police protection for outside men in the event of the corporation bringing in a party of maintenance men from outside districts to man the pumps and power houses.

Appeals were received by wire from the Town Council of Glace Bay, for Government intervention to assure the support and maintenance of those people in that town who are in want as a result of labor conditions, and also a resolution calling upon the local Government to confer with the Federal Government with a view to an inquiry into the Cape Breton problem being instituted through joint action of the two legislative bodies, the investigation to be under oath and the corporation being forced in the meantime to operate the mines four days a week at the 1924 rate of wages.

With their larders replenished at the hands of their more fortunate neighbors, the miners of Cape Breton, who quit work Friday night following the refusal of the British Empire Steel Corporation to restore credit at the company's stores and operate collieries Nos. 2, 4 and 6 on a working basis of four days per week, spent perhaps the quietest Sunday in their memory. The long lines of muddy streets flanked by the dreary monotony of uniform cottages, characterizing the mining communities of Nova Scotia were unpeopled save for swarms of apparently carefree children.

Smoke belched from the smokestacks of the various bank head's where members of the company's clerical staff laboriously fired the boilers, furnished steam for the pumps and fans which must be operated, tie-up or no tie-up, in order to keep the mines in operating condition. But the din of industry was absent. In the towns knots of miners gathered about the street corners, but there was no disorder and no intemperance.

The relief of distress, the immediate problem precipitated by the tie-up, is being organized systematically, and it is extremely doubtful if anybody went hungry over the week-end. Committees had already been formed and were functioning with money locally contributed.

NOVA SCOTIA STRIKE PUT INTO FORCE

Miners Down Tools and Desert Colleries on Order of Union.

Sydney, N.S., March 6.—Following a failure of negotiations that commenced last December looking toward a new contract between the British Empire Steel Corporation and its miners in Nova Scotia, and passed through many stages, including the appointment of a conciliation board, a hundred per cent. cessation of work in practically every coal mine in Nova Scotia commenced at 11 o'clock tonight, involving some 14,000 men. With the exception of one or two small collieries on the mainland, privately owned, not a single ton of coal will be mined in any of the great mines that constitute the most important single industry in the province.

The utmost good order marked the abandonment of the pits by the miners. As fast as the men were raised to the surface they dispersed to their homes, and in a few moments pitheads that had echoed to the bustle of industry became silent and deserted.

The Glace Bay Town Council has voted $5,000 for relief purposes among the needy families there, but forwarded a resolution to the Government declaring that they could go no further in the way of furnishing financial assistance to the strikers, and asking intervention in their behalf.

CANADA APPOINTS HER REPRESENTATIVES

Members of Economic Committee are L. C. McQuatt and J. Forsythe Smith.

A despatch from Ottawa says:—Announcement is made of the appointment by the Dominion Government of L. C. McQuatt, of the live stock branch of the Department of Agriculture, and J. Forsythe Smith, a member of the trade commissioner service of the Department of Trade and Commerce, as Canadian representatives on the recently formed Imperial Economic Committee.

This body, which will consist of four representatives from Great Britain and two from each Dominion and India, with Sir Halford Mackinder as chairman, will consider the question of improvements in the marketing of overseas food products in Great Britain.

MARKET BREAKS UNDER HEAVY ORDERS

Public Not Affected by Slump at Winnipeg and Chicago.

A despatch from Winnipeg says:—Battered down under a deluge of selling orders, the local wheat market broke 10½ cents from Friday's point, dropping to an extreme low point of $1.90¾ and representing a decline of 11¾ cents for May delivery from Thursday's close.

Liverpool cables closing four pence lower, completely reversed sentiment in Winnipeg and Chicago markets and the bulls of Thursday were ardent sellers on Friday.

Chicago broke proportionately with the local decline. Trading was exceptionally large throughout the day.

The coarse grains and flax fixtures were traded in on a fairly large scale, displaying weakness in sympathy with the action of wheat futures.

The break did not affect the public to any extent, as the outsiders have been out for the last two weeks. It was, consequently, a quiet and orderly market.

Will Return Shield to the City of Quebec

London, March 8.—The shield which was taken from the gates of old Quebec after the capture of the city by General Wolfe, and is now in the possession of the town of Hastings, will be returned to the Canadian city.

About two months ago the members of the Hastings town council decided to keep the shield, which had been presented to it by General Wolfe Murray, a descendant of Wolfe, but now they have reversed this decision in the belief that it would be an act of grace to return the shield to Quebec.

Canada Clips Record Wool.

Sheepmen of Canada clipped a wool crop of 15,111,719 pounds in 1924, according to a report by the Dominion Department of Agriculture. Value of the wool was $3,777,930, compared with $3,160,000 the year before, an increase of more than $600,000.

Greater demand for Canadian wool in world markets, the report declared, raised the price realized by the producer from 20 cents a pound in 1923 to 25 cents in 1924. Great Britain and the United States were the principal purchasers.

NEW WIRELESS TO REACH AROUND WORLD

Construction Commenced on Huge Observatory on Mountain Crest at Geneva.

A despatch from Geneva says:—Construction of the world's largest wireless station and astronomical, metearological and siesmological observatory was started on Friday on the crest of Mount Saleve, overlooking Geneva. It is expected to be completed within two years, and the total cost is estimated at $2,000,000.

The wireless station will reach around the world, keeping in constant communication with ships both in the Atlantic and in the Pacific. It is understood the League of Nations will be allowed fifteen minutes daily for broadcasting under conditions which will provide absolutely uninterrupted world communication in war time regardless of land wires or ocean cables.

The telescope for the observatory is bieng constructed by the American scientists, Professors Ritchie and Bauer. It will be the largest in the world, excelling even the one at Mount Wilson. The diameter will exceed ten feet, and the instrument will make possible tabulation and exploration of hitherto unrecorded stars. It also will be used in efforts to verify the Einstein theory.

A movement is under way to make the observatory the seat of an international meteorological office in connection with the League of Nations. Mount Saleve, which is ten minutes by automobile from Geneva, is 4,000 feet high, and contains the ruins of an ancient Roman war camp.

King George Continues to Improve

London, March 8.—It had been expected that King George would venture into the Palace gardens to-day, but, owing to the wintry, cold weather and snow flurries he did not take the risk. The King, however, is now sufficiently recovered from his recent indisposition to get up daily, and there seems to be no longer any fear of a relapse.

Vessels Leave St. John's on Annual Seal Hunt

St. John's, Nfld., March 8.—Ten steamers with 2,200 men sail at daylight to-morrow for the annual seal hunt. One will take its station in the Gulf of St. Lawrence, while the rest will work off the east coast. The ice floes bearing seals are believed to have been carried well over the Grand Banks by the prevailing winds.

BANK OF ENGLAND INCREASES ITS RATE

Discount is Raised to Five Per Cent. to Check U.S. Withdrawals.

A despatch from London says:—The Bank of England rate was raised on Thursday to 5 per cent., with a view to checking the withdrawal of American money from London. The advance had been amply discounted both in Lombard Street and on the Stock Exchange, for, despite differences of opinion as to its expediency, in view of the probable immediate effect upon domestic business, the preponderant view in financial circles was that it was necessary to prevent the withdrawal of American money from London, with consequent depreciation of sterling.

The London Times's financial editor says he cannot accept the conclusion of J. M. Keynes that if the price level falls the higher bank rate may be harmful.

"A fall in prices," says The Times's editor, "while it may be unpleasant and actually lead to an influence in unemployment, pending an adjustment, it would, in the long run, give the much-needed stimulus to our trades and industries."

Rockefeller Foundation to Aid Irish Physicians

Under the new local government act of the Free State, it is announced that the Rockefeller Foundation is offering three travelling fellowships for the position of medical officer of health, says a Dublin despatch. Each fellowship entails a residence in the United States for about eight months, and opportunities for study will be afforded in specialized institutions.

This is expected to prove a great boon to young doctors who are candidates for the appointments. The three fellows will be selected by a committee of medical experts.

THE MARKETS

TORONTO.

Man. wheat—No. 1 North., $2.16½; No. 2 North., $2.11½; No. 3 North., $2.08; No. 4 wheat, $1.98.

Man. oats— No. 2 CW, 71c; No. 3 CW, 66½c; extra No. 1 feed, 67½c; No. 1 feed, 64½c; No. 2 feed, 61c.

All the above c.i.f. bay ports.

Am. corn, track, Toronto—No. 2 yellow, $1.45.

Millfeed—Del., Montreal freights, bags included. Bran, per ton, $30; shorts, per ton, $32; middlings, $38; good feed flour, per bag, $2.40.

Ont. oats—No. 2 white, 55 to 58c.

Ont. wheat—No. 2 winter, $1.65 to $1.70; No. 3 winter, not quoted; No. 1 commercial, nominal, f.o.b. shipping points, according to freights.

Barley—Malting, 85 to 90c.

Buckwheat—No. 2, nominal.

Rye—No. 2, $1.40 to $1.45.

Man. flour, first pat., $11.40, Toronto; do, second pat., $10.90, Toronto.

Ont. flour—90 per cent. pat., $7.80 to $7.90, in bags, Montreal or Toronto; do, bulk, seaboard, $7.40.

Straw—Carlots, per ton, $8.50 to $9.

Screenings—Standard, recleaned, f. o.b. bay ports, per ton, $28.

Hay—No. 2, per ton, $14.50; No. 3, per ton, $11.50 to $12.50; mixed, per ton, $11.50 to $12.

Cheese—New, large, 24c; twins, 24½c; triplets, 25c; Stiltons, 25c. Old, large, 25 to 26c; twins, 26 to 27c; triplets, 27 to 28c.

Butter—Finest creamery prints, 35 to 36c; No. 1 creamery, 34 to 35c; No. 2, 32 to 33c. Dairy prints, 26 to 28c.

Eggs—Fresh extras, in cartons, 42 to 43c; loose, 40 to 41c; fresh firsts, 37 to 38c; splits, 34c.

Live poultry—Hens, over 4 to 5 lbs., 20c; do, 3 to 4 lbs., 15c; roosters, 15c; ducklings, 5 lbs. and up, 22c.

Dressed poultry—Hens, over 4 to 5 lbs., 28c; do, 3 to 4 lbs., 20c; spring chickens, 4 lbs. and over M.F., 35c; do, corn fed, 32c; roosters, 20c; ducklings, 5 lbs. and up, 27c; turkeys, 35c.

Beans—Can. hand-picked, lb., 6½c; primes, 6c.

Maple products—Syrup, per imp. gal., $2.40; per 5-gal. tin, $2.30 per gal.; maple sugar, lb., 25 to 26c.

Honey—60-lb. tins, 13½c per lb; 10-lb. tins, 13½c; 5-lb. tins, 14c; 2½-lb. tins, 15½ to 16c.

Smoked meats—Hams, med., 25 to 26c; cooked hams, 37 to 38c; smoked rolls, 18 to 20c; cottage rolls, 21 to 23c; breakfast bacon, 23 to 27c; special brand breakfast bacon, 29 to 31c; backs, boneless, 30 to 36c.

Cured meats—Long clear bacon, 50 to 70 lbs., $17.50; 70 to 90 lbs., $16.80; 90 lbs. and up, $15.50; lightweight rolls, in barrels, $33; heavyweight rolls, $27.

Lard—Pure tierces, 18 to 18½c; tubs, 18¼ to 19c; pails, 18¾ to 19½c; prints, 21 to 22c; shortening, tierces, 14 to 14½c; tubs, 14½ to 15c; pails, 15 to 15½c; prints, 16 to 16½c.

Choice heavy steers, $7.75 to $8.50; do, good, $7 to $7.50; butcher steers, choice, $6.75 to $7.50; do, good, $6.25 to $6.50; do, m.d., $5.50 to $6; do, com., $4.75 to $5.25; butcher heifers, choice, $6.50 to $7.25; do, med., $5.50 to $6; do, com., $4.50 to $5.25; butcher cows, choice, $4.50 to $5.25; do, fair to good, $3.50 to $4; canners and cutters, $2.25 to $2.75; butcher bulls, good, $4.25 to $5.25; do, fair, $3.75 to $4; bologna, $2.50 to $3.25; feeding steers, good, $5.75 to $6.50; do, fair, $4.75 to $5.50; stockers, good, $4.50 to $5.50; do, fair, $4 to $4.25; calves, choice, $11 to $12; do, med., $7 to $9; do, grassers, $3.50 to $4.50; milch cows, choice, $70 to $80; fair cows, $45 to $55; springers, choice, $80 to $100; good light sheep, $7 to $8; heavies and bucks, $4.50 to $6.25; bulls, $3 to $4; good ewe lambs, $14.50 to $16; bucks, $12.50 to $14; do, med., $10 to $12; do, culls, $8 to $9; hogs, thick smooths, fed and watered, $12.35; do, f.o.b., $11.75; do, country points, $11.50; do, off cars, $12.75; select, premium, $2.40.

MONTREAL.

Oats, No. 2 CW, 77c; No. 3 CW, 69c; extra No. 1 feed, 66c. Flour, Man. spring wheat pats., 1sts, $11.10; 2nds, $10.60; strong bakers', $10.40; winter pats., choice, $8.35 to $8.45. Butter—No. 1, pasteurized, 33½ to 34c; No. 1 creamery, 32½ to 33c; seconds, 31½ to 32c. Eggs—Fresh extras, 43c; fresh firsts, 40c. Potatoes, per bag, car lots, 75 to 80c.

Med. to fairly good steers, $7.50; do, poorer quality, $6.35; good milk-fed calves, $12; com. to med. calves, $9.50 to $11; lambs, $12 to $14; sheep, $7 to $8; select hogs, $13.35; med. hogs, $12.85; sows, $10.50.

CANADA'S MAPLE SUGAR CROP

Demand Awaits This Luxury When Put Up in Inviting and Attractive Condition.

The warm, sunny days and the cool nights provide ideal conditions for making maple sugar and syrup. This is one natural resource that is typically Canadian and largely local to the provinces of Ontario and Quebec.

The sugar bush has long been a feature of the rural districts. Apart from its revenue-producing value, it is usually the rendezvous of the surrounding country at sugaring-off time. Here the young people were wont to gather, just, it was said, to see the sugar being made, but the farmer always had his suspicions that this did not constitute the sole attraction. The number of samples taken, to be cooled in the snow, and eaten, evidenced that the visitors were more concerned with the amount of sugar made available for tasting that with the work attached to gathering the sap and the boiling.

On many farms, however, the sugar bush is a thing of the past. The many substitutes for maple syrup and its higher production costs have materially reduced the revenue derived from this source, while the high prices prevailing for hard maple for firewood have been a temptation too strong to resist, and many of the sugar bushes have been cut down.

In some of the larger areas of eastern Ontario and the eastern townships of Quebec, however, quite elaborate plants are installed for sugar making. The sap is brought to the boiling house in pipelines, thus eliminating much of the labor of gathering. In the boiling houses improvements have been made in the equipment, resulting in a higher grade of sugar and syrup being produced. In the marketing, however, little improvement has taken place.

Maple sugar is a luxury, and as such it should be marketed. Like many another Canadian product, it is suffering from the condition in which it is exposed for sale. The manufacturer of the chocolate bar puts his product up in attractive wrappers, which largely influences its sale. Maple sugar, however, is usually exposed for sale without even a wrapper and without the slightest attempt being made to give it an attractive appearance, or even to assure the consumer that it is reaching him in the best condition. A market undoubtedly awaits Canadian maple sugar and at good prices when it is well made, and put up and marketed in an inviting and attractive manner.

Patients Discharged as Cured of Leprosy

Washington, March 8.—Four men who entered the National Home for Lepers at Carrville, La., several years ago, have been discharged from the institution as cured. The United States Public Health Service announced to-night that the men have been under close observation for a year, and during the entire time the leprosy bacillus had been absent from their body tissues.

Recorder on a Mower.

A lawnmower that has been invented enables a man to record the distance covered each time he uses his mower and in an entire season.

GREAT BRITAIN TO EXPEND $5,000,000 TO IMPROVE PALESTINE PORT

New York, March 8.—Sir Herbert Samuel, British High Commissioner of Palestine, has announced officially that the port of Haifa is to be developed as the principal harbor of Palestine, it was reported here yesterday by the Keren Hayesod, or Palestine Foundation Fund, of which Samuel Untermyer is president. Aproximately $5,000,000 will be expended in improving and enlarging the port, which will serve as Palestine's gateway to the world for tourist traffic and the greatly increased volume of foreign trade.

Activity at Haifa, according to this report, will result in other commercial developments of international significance. Among these are the exploitation of the mineral resources of the Dead Sea and the development of the vast territory north and east of Palestine,—Syria, Transjordania and the Iraq—for which Haifa will serve as port. Part of this hinterland is the famous Valley of Jezreel, or Armageddon, where the Palestine Foundation Fund recently established a dozen agricultural settlements.

In the development of the Mosul oil fields, the construction of a pine line to the Mediterranean will have its outlet at Haifa, which also will serve as the port for the exportation of hundreds of thousands of tons of minerals with the development of the mineral resources of the Dead Sea.

Palestine's industrial prograss, since the reconstruction of the country as the Jewish homeland was undertaken at the close of the World War, has been retarded by poor harbor facilities. The ports of Jaffa and Haifa, its only cities on the Medieterranean, virtually are in the same condition as when they were flourishing cities during Bibilcal times, competing for maritime honors with the Phoenicians of Tyre. Large ships cannot dock at the cities and it has been necessary to transport passengers and freight in small boats to the shore.

DOES YOUR POULTRY PAY, OR DOES IT COST YOU MONEY?

New Booklet Issued by Bank of Montreal tells how loss may be converted into profit.

"Take the poultry money out of a farm community, and the country town merchants would wonder what had happened to their business."

This is one of the many striking statements in a booklet, "Poultry for the Farm and Home," just issued by the Bank of Montreal for free distribution from its various branches.

The facts put forward in this booklet, illustrated by scores of actual photographs, indicate that in many cases the same amount of effort on the part of those who keep poultry could be made to produce much more money than is now being produced. Also by actual demonstration, the booklet shows that a flock of poultry may be producing little beyond the cost of upkeep, or be an actual loss.

The booklet brings to mind the many welcome dollars which farmers' wives earn for household expenses and little family luxuries by means of their poultry. It gives information as to the enormous amount of investigation into successful poultry methods by poultry experts and Experimental Farms all over this continent—information which has shown beyond all doubt that poultry keeping can be made an important and profitable branch of farm business, even when carried out on a modest scale.

For the guidance of farmers and their wives, the finding of these experts has been put into plain language in this book, together with photographs of every phase of the subject, showing what is right and what is wrong.

A farm census in the United States recently showed that in a single year chickens and eggs sold by the farmers there brought $1,048,000,000, or 39 per cent of the total value of all live stock products. This illustrates what is being done by the constantly improving methods of poultry-keeping. An experiment at the Experimental Farm at Guelph. Ont., so the booklet states, showed that one method of feeding poulry produced a handsome profit, while another method produced a loss. It will be seen, therefore, how important it is for poultry keepers to know exactly what they are doing, and why.

After all, it is profit, and profit only, that counts. This booklet tells just what to do to produce profit from poultry—the breeds to keep, the way to house them, the method of culling, the feed to give, the manner of preventing diseases and destroying parasites, how test eggs and market them—in fact, everything essential that a poultry keeper should know, put in language and pictures that anybody can understand.

EAST WILLIAMSBURG

Married—At Aultsville, by Rev. Bender, Mr. Stanley Wells, to Miss Laura Gallinger of Aultsville, on Saturday the 7th of March, and left to spend their honeymoon at Montreal on Saturday.

The Highest Development in Cream Separator Construction

The McCormick-Deering Primrose Ball-Bearing Cream Separator represents the highest development and construction in cream separators. For years the Primrose has been recognized and vouched for by thousands upon thousands of satisfied users as excelling all others for efficiency, durability, design, close skimming, compactness and finish. The added feature of ball bearings now places it far in advance of any other type of cream separator, and without additional cost to the user.

SOLD BY,

P. E. Beckstead & Son

No other small car has so many big car features as the NEW Chevrolet

1. The new Fuel Tank is rigidly fastened to the rear of the steel channel frame. A steel cover protects the tank and adds to its appearance.
2. New, Larger Brakes—eleven inches wide. Positive brake operation is applied through strong steel pull rods. The brake adjustment is very easy to regulate and readily accessible.
3. Rear Axle completely new. A big, sturdy rear axle that will handle all the famous power of the Chevrolet Moter under any conditions. Larger, stronger, bevelled driving gears quietly deliver the power to the axle shafts. One-piece banjo type rear axle housing.
4. New automatic brake equalizing device entirely distributes the power to the service brakes.
5. New semi-elliptic Rear Springs—underslung for better roadability.
6. The New Frame is strong and sturdy. It has five heavy cross members, one more than was previously used.
7. New Disc Clutch—completely enclosed. Four friction surfaces instead of two; it has no internal adjustments; it requires no lubrication. Simple yet delivers all the power to the rear axle without slippage.
8. New steering control of semi-reversible type worm and gear construction with fore-and-aft linkage to front wheels.
9. The Chevrolet Motor—Refined—has unusual power at all speeds, under every driving condition—quick get-away in traffic—low fuel consumption. Practically all moving parts are completely enclosed.
10. Cord tires on open models; 29-4.40 Low Pressure tires on closed models.
11. New, Honeycomb Radiator. With a new, more beautiful nickelled radiator shell.
12. New, semi-elliptic front springs of chrome vanadium steel.

OUR CORRESPONDENTS

WILLIAMSBURG

Miss Thora Robinson is visiting at Mr. Will Bailey's, Chesterville.

Mr. and Mrs. Isaac McIntosh and family spent Sunday at Mr. Reuben Merkley's.

Mr. and Mrs. James Hanson were visiting Mr. and Mrs. Arthur Whittaker on Monday.

The Misses Blanche and Hilda McIntosh of Winchester Springs were visiting friends at Williamsburg last week.

Mr. and Mrs. Cochrane of Presbyterian passed through our burg one day last week enroute to Winchester.

Miss Almeda Whittaker is spending a few days with friends at Strader Hill.

Mr. Levi J. Casselman of Iroquois was visiting at Mr. John Casselman's last week.

Mr. James Cook of Strader Hill is serving on Grand Jury at Cornwall this week.

Mrs. Chester Merkley of Chesterville is visiting her daughter, Mrs. George Strader, for a few days.

MR. ABRAHAM GARLOUGH

On Thursday, March 5th, 1925, Mr Abraham Garlough passed away at his home here. The deceased was in his 78th year, and had been ill for the past few months. He leaves to mourn his loss, one son, Allen, at home, and three daughters, Mrs. J. Price of Brockville, Mrs. Geo. Stata of Williamsburg, and Ida at home, also two brothers, John and Peter, both of Williamsburg.

The Young Peoples' League of the Methodist Church will hold their meeting on the evening of March 17, (St. Patricks Day) at 8 o'clock. Mr. Long will give an illustrated lecture on Ireland. There will also be a few vocal and instrumental selections. We hope all the Loyal Irish will be out to hear this address and bring their friends along. Everybody welcome.

GLEN BECKER

Mr. Henry Wells of Hoasic spent Monday at Mr. Charles Watson's.

Miss Mary Shennette of Morrisburg spent the week end with Miss Lila Saddlemire.

The Misses Hilda and Blanche McIntosh of Winchester Springs were guests of Mr. and Mrs. Merton Saddlemire on Friday last.

Mr. and Mrs. Willis Mattice and Miss Etta Bell Barkley spent Sunday with Mr. and Mrs. Bert Becker of Williamsburg.

Mr. and Mrs. George Hall spent Sunday afternoon with friends at Froatburn.

Mr. and Mrs. Frank Powell and baby Billy spent part of Sunday at Stanley Saddlemire's.

Mr. Charles Watson spent Tuesday afternoon at Williamsburg.

Mrs. T. Casselman and Miss Goldie Warner spent Sunday evening at Mr. Dalton Saddlemire's.

Mrs. Malcolm Froats and Miss Audrey spent Sunday last with friends at Williamsburg.

Mr. and Mrs. Merton Saddlemire and master Keith were visitors at Mr. Stanley McIntosh's on Sunday last.

Mr. and Mrs. Dalton Saddlemire and family spent one day this week with Mr. and Mrs. E. G. Vincent, Gallingertown.

ROWENA

The guests of Mrs. A. Barkley and Mr. and Mrs. Clarence Wallace on Tuesday were, Mr. and Mrs. R. Suffel of Winchester, Mr. and Mrs. Alfred Shaver, Mr. E. Shaver, Mr. and Mrs. Herman Cooper and family, Mr. and Mrs. Milton Locke, Mr. and Mrs Howard Locke and Mr. and Mrs. J. Marcellus and son, Aden, Mr. and Mrs. Allan Hanes and Mr. J. Bouck.

Mr. and Mrs. Arthur Harkness entertained a few of their friends on Thursday evening.

The organized class of Rowena Sunday School were entertained at Dundela on Friday evening. They all report a good time.

Mr. and Mrs. John Marcellus and Aden, Mrs. Cephas. Smyth and son, Mac and Miss Gertrude Smyth were guests of Mr. and Mrs. Milton Locke Tuesday evening of this week.

Dr. A. E. Shaver of Brockville spent Sunday with his father and brother.

On Saturday night a very pleasant time was spent at Mr. and Mrs. Wellington Seeley's, by the young people of the neighborhood.

The evening was spent in music and games. The time went all too quickly to suit them.

BRINSTON

Mrs. Mary Pitt is spending a few days at Shanley, with Mrs. John Pitt who is seriously ill.

Misses Helen and Hazel Wylie and Miss Pearl Hamilton spent Sunday with Mr. and Mrs. Ralph Adams of Hulbert.

Mr. Armstrong of Cardinal visited his sister, Mrs. Andrew Riddell a few days last week.

Mrs. Cheney of Mountain visited a few days at Mrs. John Murdock's.

The young Mens and young Women's organized Bible Classes of this church were entertained at the home of Mr. Rumsey Peterson of Toys H. on Friday evening.

A large crowd attended H. Collison's sale west of here, on Wednesday. Mr. and Mrs. Collison expect to leave soon for their home in Manitoba.

H. R. Wallace was in Cornwall on Wednesday.

Miss Lillie Payne of Kars is visiting Mrs. Fannie Strader a few days.

Mrs. Chas. Feader and daughter, Ruby spent Friday with her parents Mr. and Mrs. Jesse Coons.

Miss Ruby Boyd of Hoasic spent the week end at her home here.

On Saturday, one of the largest crowds of the winter attended the protested hockey match held here between Williamsburg and Inkerman. On account of the keen rivalry of the two teams, the game was interesting and clean throughout, except for a few minor penalties. The ice was in poor condition owing to the warm weather of Saturday, which made it bad for the players. The game ended 4--3 for Inkerman. At each score it was evident that both teams had their supporters along by the cheers.

Mr. and Mrs. Earl Merkley and Lorne and Ruth of Iroquois spent Saturday at Thos. Hamilton's.

Miss Alice Harkness of Iroquois, visited Miss Pearl Hamilton over the week-end.

AULTSVILLE

A quiet but pretty marriage was solemnized at St. Pauls Anglican Rectory, March 7th, 1925, by Rev. C. A. Bender, the contracting parties being Stanley George Wells, son of Alfred and the late Mrs. Wells, of East Williamsburg and Laura Annie Gallinger, daughter of the late Arthur and Mrs. Gallinger of Aultsville. Only the immediate relatives were present at the ceremony and Mr. Kenneth Gallinger gave his sister away. The young couple were unattended. The bride was dressed in an Ensemble Suit of Navy Blue Gabardene and Grey Canton Crepe with fur collar and hat to match and carried a shower bouquet of roses, carnations, and maiden hair fern. Mr. and Mrs. Wells left on the 4-19 train amid a shower of rice and confetti for Montreal and points east, and on their return will take up house-keeping at Hoasic.

The best wishes of a wide circle of friends will follow them to their new home.

Mrs. Aziz of Egypt is the guest of Mr. and Mrs. Chas. Ault for a few weeks.

Several from here are attending court at Cornwall this week.

Mr. and Mrs. James Morgan were in Montreal on Wednesday.

Mr. W. F. Beach of Newark, N.J., spent a couple of days here this week with his mother, Mrs. Mary Beach and family and renewed old acquaintance.

Mrs. Alice Duffin is spending a few days at Woodlands, Ont., with Mr. and Mrs. Herman Brownell and other friends.

March 17th. All things Green at the Tea and program in the Methodist Church basement and S. S. room. Tea from 5.30 on until all are served. Program at 8 p.m. Tickets 35 cents. Adults to both Tea and Programme. A special feature of the programme will be an old fashioned spelling match when Green will be spelled with a capital G. Everybody welcome.

The Womans Missionary Society of the Methodist Church are holding their 35th Anniversary in the Church auditorium Sunday evening next March 15th at 7.30. Mrs. Hilliard of Morrisburg will give an account of the recent Missionary Convention at Washington D.C. A free will offering will be received.

Mrs. M. Beckstead and Mr. and Mrs. I. H. Beckstead and baby are spending the week at Grantley.

Mrs. Beatrice Gogo left on Wednesday night for her home in Toronto.

Mr. and Mrs. Allen Empey, East Front spent Thursday here with Mr. and Mrs. George Markell.

Mrs. George Sampson has returned home after spending a month in Lachine with her daughter Mrs. Sanford Hickey and family.

Mr. and Mrs. Edgar Markell of Wales spent Sunday here with Mr. and Mrs. Frank Markell.

ARCHER

Tapping the sugar bushes is the order of the day.

News reached here on Saturday of the very sudden death of James Gogo of Toronto, formerly of Nudell Bush. having been gassed in his room in Buffalo where he was engaged in building contracts. He leaves a wife, a daughter of Mr. and Mrs. Wm. Baker, Aultsville. Much sympathy is felt for all bereaved ones.

Visitors at the home of Mr. and Mrs. Clarence Baker last week were Mr. and Mrs. Oscar Lane and daughters Ketha and Wanda and Mrs. Ellen Lane of Cedar Grove on Friday. and Mr. and Mrs. I. Fetterly and grandson Trevor Wells of East Williamsburg, on Saturday.

Mr. and Mrs. John Warren spent Monday at Aultsville.

Messrs. B. Cunningham, R. Gallinger and H. S. Baker of M. C. I., spent the week end at their respective homes.

Mr. and Mrs. Josiah Markell of Aultsville spent Tuesday with Mr. and Mrs. C. Baker.

"Nerves in Bad State Could Not Sleep"

Mrs. H. N. Tardell, Harrowsmith, Ont., writes:

"My nerves were in a very bad state, and for nearly six months I did not know what it was to have a good night's rest. I could not eat, and never felt well. I heard about Dr. Chase's Nerve Food, and thought I would try it. After taking it for a few days I began to feel better, and soon was able to sleep well at night. My appetite also returned, and I felt stronger and better, and after taking three boxes of Dr. Chase's Nerve Food I was quite well. I have also given the Nerve Food to my little girl, with good results."

CHIROPRACTIC SPINAL ADJUSTMENTS

Removes the cause of disease

1. Slight subluxations at this point will cause so-called headaches, eye diseases, deafness, epilepsy, vertigo, insomnia, wry neck, facial paralysis, locomotor ataxia, etc.
2. A slight subluxation of a vertebra in this part of the spine is the cause of so-called throat trouble, neuralgia, pain in the shoulders and arms, goitre, nervous prostration, la grippe, dizziness, bleeding from nose, disorder of gums, catarrh, etc.
3. The arrow head marked No. 3 locates the part of the spine wherein subluxations will cause so-called bronchitis, felons, pain between the shoulder blades, rheumatism of the arms and shoulders, hay fever, writers' cramp, etc.
4. A vertebral subluxation at this point causes so-called nervousness, heart disease, asthma, pneumonia, tuberculosis, difficult breathing, other lung troubles, etc.
5. Stomach and liver troubles, enlargement of the spleen, pleurisy and a score of other troubles, so-called, are caused by subluxations in this part of the spine, sometimes so light as to remain unnoticed by others except the trained chiropractor.
6. Here we find the cause of so-called gall stones, dyspepsia of upper bowels, fevers, shingles, hiccoughs, worms, etc.
7. Bright's disease, diabetes, floating kidney, skin disease, boils, eruptions and other diseases, so-called, are caused by nerves being pinched in the spinal openings at this point.
8. Regulations of such troubles as so-called appendicitis, peritonitis, lumbago, etc., follow Chiropractic adjustments at this point.
9. Why have so-called constipation, rectal troubles, sciatica, etc., when Chiropractic adjustments at this part of the spine will remove the cause?
10. A slight slippage of one or both innominate bones will likewise produce so-called sciatica, together with many "diseases" of pelvis and lower extremities.

DR. J. S. PAXMAN, Chiropractor

Will be at Ouderkirk's Hotel, Morrisburg, Wednesdays and Fridays from 9 to 11 a.m., commencing Monday, Sept. 22nd, 1924. Cornwall Office, over L. H. Clark's Shoe Store. Phone 332.

The Woman of To-Day

HOW I STARCH CLOTHES TO LOOK LIKE NEW.

The purpose of starching is to provide a gloss similar to that of new fabrics and to give garments a surface that repels dust and moisture. My definition of a satisfactory starch is one that sinks into the pores of the material, producing the desired amount of stiffness without destroying the pliability.

My first rule is to mix the starch with cold water first. This separates the grains and helps to avoid lumps. Next I add boiling water, stirring constantly, which thoroughly cooks the starch grains, discouraging the formation of lumps. To make sure the starch is cooked enough, I boil it three or four minutes, stirring constantly so it will not scorch. Then it is strained through a sieve and set in a pan of hot water. If it is kept hot, there will be no scum on top to appear on the clothing during the ironing.

The amount of starch used will vary, depending on the kind. I always look on the package to see if there are any special rules. For a thick starch, I dissolve three-fourths cup cornstarch or one and one-fourth cups wheat or rice starch in two cups cold water. Then I add, while stirring constantly, three and one-half quarts of boiling water.

For a medium starch, the best for almost all clothing, I use half as much starch and the same amount of water as in making the thick paste. I make a thinner starch for curtains and very sheer materials. One-fourth cup wheat starch or two tablespoons cornstarch are dissolved in two cups cold water, and three and one-half quarts of boiling water are stirred in, then the mass is cooked a few minutes.

Various kinds of starches have different traits. Cornstarch, for example, has a greater tenacity or stickiness, while wheat starch is more pliable. Rice has the least tenacity of all. Many laundry starches are a combination of varieties with or without the addition of other products.

Perhaps a little borax or paraffin may have been added. At least I know the addition of these substances sometimes improves starch. Two teaspoonfuls of borax added to a gallon of hot starch increases its pliability and gloss, while the addition to two teaspoons melted paraffin or any clean white fat, such as lard, helps to prevent the starch from adhering to the iron. This usually can be done anyway, if a good hot iron is used.

I always turn garments wrong side out before dipping in hot starch. Then the clothing is put through the wringer to distribute the starch evenly and to protect the hands from the heat.

It is necessary that a clean pan, one free from rust and scorch as well as dirt, be used for holding the starch. The spoon for stirring needs to be removed when the starch is made.

Raw starch is used for collars, cuffs, shirt bosoms and other garments that are supposed to be very stiff. I make the cold starch by mixing the raw product with cold water, stirring it well while being used, because the grains are not dissolved—merely separated. I sometimes buy starches that are manufactured especially for cold work. In using them the directions on the package are followed.

Cold-starched garments will iron much easier, I have found, if the starch is rubbed into the cuff or collar with the hands instead of immersing the fabric in the paste and wringing the surplus out. Sufficient of the starchy liquid is rubbed in to moisten the material thoroughly.

In several home economics schools the girls nowadays are taught to use a combination of cooked and raw starches instead of the ordinary cold starch. The recipe for this paste is as follows: Disolve one-fourth cup wheat starch in one cup water and stir into it three cups boiling water. Boil five minutes, stirring constantly. Cool slightly and add one-fourth teaspoon each of borax and lard or paraffin. Then stir in three teaspoons raw starch which has been mixed thoroughly with one cup cold water. Beat with a wheel egg beater until thoroughly mixed. Rub this mixture into the surface which is to be starched very stiff. Roll, and let stand an hour or so before ironing.

A DAINTY FROCK FOR A SMALL GIRL.

4827. Printed crepe and crepe de chine are here combined. This is a good style for dimity, pongee and cotton prints.

The Pattern is cut in 4 Sizes: 1, 2, 3 and 4 years. A 3-year size requires 2¼ yards of 27-inch material. Collar and cuffs of contrasting material require ⅜ yard 27 inches wide.

Pattern mailed to any address on receipt of 15c in silver, by the Wilson Publishing Co., 73 West Adelaide St., Toronto. Allow two weeks for receipt of pattern.

Send 15c in silver for our up-to-date Spring and Summer 1925 Book of Fashions.

A BOX FOR EVERYTHING.

My husband particularly likes a box just the right size and depth to hold all his shaving things conveniently. They never get scattered.

I use boxes, too, to keep things straight and handy on my kitchen and pantry shelves. For example, when I bake I lift down a box full of extracts and spices and another with the soda, baking powder and cream of tartar together. There is then no fumbling for the right bottle.

An aluminum oblong pan holds my cleaning soaps, powders, mops and scouring things, so they are easily moved about the house.—Mrs. R. J. P.

I GROW HERBS TO SELL.

We make money from our garden by growing common herbs and horseradish in it. Dry sage leaves also sell well for use in preparing meat. In two years we have sold about $50 worth from four small rows.

Dill, to use in preparing pickles, is easily grown. Sweet marjoram is used as a relish for soups and dressings. Horseradish roots can be bought from any seedhouse. The relish sells for a good price if put in small bottles containing a few ounces.

Rhubarb stalks sell well some places, and are fine used as sauce or "pieplant pie."

ISSUE No. 10—'25.

Kit Kennedy

BY S. R. CROCKETT.

CHAPTER XII.—(Cont'd.)

Upon the first day he had as we have seen, been put into the "Tenpenny," school books being in Galloway known by their prices as far as the "Shillin'-book." After that came the "Series of Lessons,' and that admirable compendium of knowledge and excellent reading, "McCulloch's Collection, of which (and vainly) I have long desired to possess a copy. In this only the very oldest pupils were exercised, but Kit soon found it worth while to stay in school during the dinner hour in order to spell over the lessons in a purloined copy till he had mastered them, carefully avoiding, however, the numerous scientific and philosophical disquisitions.

Duncan Duncanson, deposed minister, chanced to be in a good humor during the first days of Kit's pupilage in the little schoolhouse of Whinnyliggate. No dark red bar crossed his brow. He had been disposing of his harvest of honeycomb, and there still remained in the corner cupboard so much of the silver coin of exchange as sufficed for three trips to the "Red Lion" every day—"to change his breath," as the neighbors said. The schoolmaster was so regular till the hoard was done that the neighbors looked at their clocks as he passed by to see if they were keeping anywhere near the mark, and surmised a catastrophy when he was five minutes late.

One of the first lessons Kit learned in school was that of "Brave Bobby," the Newfoundland dog of educational fiction. In ten minutes after the calling of the class Kit had won his way to the top by dint of correct spelling and "trapping" in the reading lesson—that is, informing a stumbling neighbor of the correct pronunciation of a word. But his crowning achievement came last.

The master, whose strong point was not geography, which he looked upon as a vain thing, rose to point out the mist-veiled island of Newfoundland, Bobbie's original home. But finding that his short-sighted eyes could not discern the name, he was tracing the coast line of America with the short pointer, hoping to arrive at his desire by force of a policy of exclusion, when Kit broke in abruptly:

"Eh, man, can ye no find it? It's juist that elbuck (elbow) that sticks oot there into the sea on your richt hand. Ye're glowering straight at it, man!"

And while the other pupils of Whinnyliggate sat dumb at his daring, Master Kit Kennedy went forward to take the pointer from the master's hand, and finish the job himself.

He got the pointer in due course, but it was across the shoulders.

"Sit down, sir," cried the angry master; "I was not looking for Newfoundland, but for the Gulf Stream!"

And as the scholars retired they gazed with awe upon Kit, and pointed him out to chance passers-by as "the boy that had trappit the maister!"

But in spite of the dominie's search for the Gulf Stream, he was so much impressed by the boy's general knowledge that he immediately removed him into the "Series" (full title, McCulloch's Series of Lessons), where Kit underwent a most wholesome discipline from his elders and betters.

"Gin ye daur to trap us that's bigger than you, we'll thresh ye like a sheaf o' corn—hear ye that?" cried half-a-dozen of the senior pupils, after the promotion had taken effect.

"We are no gaun to be trappit by a wean like you!"

The command was punctuated by sundry admonitory "punces" in the ribs, and the exhibition of half-a-dozen grimy fists in immediate proximity to Kit's nose. Then it was that for the first time Kit felt the path of learning to be a thorny one.

But soon he was so interested in the school games and especially in the eternal one of dodging the master and learning as little as possible, that he cared no more about trapping, and so escaped many troubles.

As was the custom among all the country scholars he took his dinner with him in a leather bag. For the most part it consisted of scone and butter with a piece of oatcake and cheese added thereto. Semi-occasionally a piece of cold bacon would be enclosed, and a tin flask of new milk was always placed in a separate compartment, which beverage, when consumed shortly after noon, had a strong and composite flavor of tin and newly tanned leather. But Kit did not complain, for the natural hunger of healthy youth furnished as good sauce as any cook, however celebrated, could have invented.

Kit took his meals with a kind and gentle old lady, the wife of the smith in the little house down the lane from the schoolhouse.

Kit's hostess was a friend and gossip of the goodwife of the Black Dornal. And she had a great and consuming interest in Master Kit.

It was understood that Mistress Hutcheon, the wife of the Whinnyliggate smith, was to keep a more than maternal eye over the young man's morals, and to report any transgression at headquarters. Whereupon his grandmother would reckon with him in the gate.

This arrangement was an admirable one—in theory. But in practice it had its drawbacks. For Kit possessed one of those heedless, cheerful, happy-go-lucky dispositions, which since the world began have commended their owners to the hearts of all women-folk. Mistress Hutcheon, a thin-faced, sweet-eyed woman, with an air of being perpetually tired, did her part, so far as personal reproof went, with admirable firmness. It was in the report stage that she failed most conspicuously.

At the first reading this was somewhat her form:

"Kit Kennedy, ye are a regardless, mischeevious loon. Ye troaned (i.e., truantised) the schule yesterday, and as true as daith I'll tell your grandmither on you the very first time she comes to Whinnyliggate. Forbye I hae heard o' your ill gangings on at the schule, and how the maister lickit ye for cuttin' the taws into fingerlengths and flingin' them up the ventilator. Dinna think that I'll conceal your evil deeds. Na, they shall rise in judgment against ye. Your granny shall hear it every word, as sure as my name is Nannie Hutcheon. Ye shall sup sorra', ye misleart young reprobate, that wad bring disgrace on a God-fearin' hoose, and especially on your ain grandfaither, that's ruling elder in the Kirk! Think shame o' yoursel', Kit Kennedy!"

This sounded threatening enough, but Kit knew his entertainer too well to be very anxious. For when at last his grandmother did come into Whinnyliggate, riding in state in a red cart, driven by her strong son Robert Armour, the fashion of the speech of Mistress Hutcheon was changed.

Instead of cursing, like Balaam, she blessed.

After the necessary and essential discussions of the price of eggs, the new tune the precentor put up last Sabbath at the first diet of worship, the remarkable and shamelessly gaudy bonnet worn by Mistress Allardyce, the grocer's young wife ("a fair peevee wi' pride an' gumflooers"), the goodwife of the Black Dornal turned to home topics, and instantly a wary look in Mistress Hutcheon's eye told that she was on her guard.

"And hoo's that ill boy o' mine behavin' doon here at Whinnyliggate? I can get naething oot o' him at nicht, except that he won a dozen and a half 'stanies' at the bools (marbles), and maybes an 'alley'—but is he aught o' a guid boy, think ye, Mistress?"

Then the smith's wife would lift up her hands in a sort of perfervid ecstasy of admiration.

"Margaret Armour," she would cry, "to tell ye the truth there never was sicean a guid boy as that Kit o' yours I wad gie a pound note (or mair) gin ony o' my ain were like him. He's juist the best laddie, clever at his lessons, an' quaite—indeed, quaite is nae name for him."

And "quiet" was indeed no name for Master Kit Kennedy, in that said the smith's wife aright. But to herself she added, "I hope this is no ta'en doon Up Abune, or I'll hae a heap to answer for!"

"I am pleased to hear ye think sae weel o' the lad," said his grandmother, eyeing her gossip, however, to see if there was any trace of guile in her eyes. But the pale tired face of Nannie Hutcheon told nothing. There came even a kind of eager enthusiasm in her expression when she spoke of Kit Kennedy.

(To be continued.)

Answered.

Ellen (doubtfully)—"Am I the only girl you ever loved?"

Ralph (reassuringly)—"My dear, you are one in a hundred. Need I say more?"

WOOLENS *lose their warmth the minute they shrink or mat*

THAT is why they must be washed carefully. Always use Lux for anything containing wool. Lux won't shrink or mat woollens—won't fade colours. Lux is safe for any fabric or garment that is safe in pure water alone. Lever Brothers Limited, Toronto.

Faggots.

I stole your faggots for my winter burning,
But give you back my candle's glow instead.
I cheated you of stones, that I might leave you
This friendly bread.

Your cloak I wore a little time, unbidden,
Your sandals borrowed for my weary feet,
And in the shielding dusk drank from your table
Warm wine and sweet.

See, now I offer carven bowls and flagons
Ivory pale, wrought through the lilied night,
Wrought through a lonely hour by moon-dipped fingers
For your delight.

My flame fills all your orange lamps at twilight,
My song upon your window curtain blows,
And where my tears fell on your garden trembles
Another rose.

—Joan Dareth Prosper.

GREAT INCREASE IN TEA DRINKING

The last few years have witnessed a tremendous increase in tea drinking. Production has fallen far behind demand. Tea now costs more than at any time in the last 75 years. It may even reach $1.00 per pound, for the price is expected to rise still further. When such profits are being made by the tea plantations, over production and a sudden drop in prices is bound to come. It may take a year or longer or the price might fall when least expected. Not even experts can foretell what will occur.

A Last Straw.

Emily is aged three. She is an only child, and she has a friendly, sociable disposition. She adores playmates, and it has been a great grief to her that she is so often debarred from playing with her little friends on account of bad colds, whooping cough, suspected measles, and what not.

Recently a new baby cousin arrived in her uncle's family, and Emily was enjoying the prospect of a speedy visit to the little newcomer. Her father casually remarked that the baby had dimples, whereupon Emily appealed to her mother in a tone of despair, "Oh, mother, can't I go near her if she has dimples?"

Minard's Liniment Fine for the Hair.

Living the Simple Life.

The bill of fare of the Afghan is very simple and reflects the poverty of the country. Bread, fruits, vegetables, tea, sweet milk, sour milk, and cheese are the main foods. Rice, mutton fowl and sweets cooked in various ways are found on the tables of the well-to-do. The average Afghan has no particular fondness for wine or spirits.

Surnames and Their Origin

RODDY.

Variations—Rodd, Rod, Raud, Rodin.
Racial Origin — Anglo-Norman and French.
Source—A given name.

Here is a group of family names derived from a given name, and whose origin is almost completely concealed by reason of the drastic variations to which it has been subjected in the past, though the given name still exists today, and is indeed by no means uncommon.

The given name is Gerald, which, to English eyes and ears seems a long way from Roddy.

The key to the change however, is the tendency at one period in the development of the French language to substitute a "u" for an "l," and also the tendency to soften the originally hard "g."

The substitution of the "u" for the "l" was never carried to the same extent by the Normans who went to England as it was in the speech of the French, because the process was interrupted by the reviving dominance of the Saxon tongue in England. But there are numerous cases in which it is to be noted.

Rodd and Roddy may be classed for the most part as English developments of the family name, from the syllable "raud" in "Geraud" or "Garaud," originally "Garald.'

Rodin (with diminutive ending added, Rod and Raud, are names more common to France, and developments which have worked out in that country.

BRISBANE.

Variations—Brisban, Brisben, Brisbin.
Racial Origin—Cornish.
Source—A place name.

Brisbane, perhaps, is not a name widely borne, but it is widely known.

It belongs in the classification of family names, which have been derived from names of places. In this instance the place name is of Cornish-British origin, forming a part of the new scanty remains of an all but extinct branch of the Celtic language, a branch more allied to the Welsh and the Breton than to the Gaelic of Ireland and the Scottish Highlands.

Around the name may be woven a romance of speculation as to the scenes which occurred there in ancient days before the advent of the Saxon and the Norman before the advent of Christianity; for the name means "hill of judgment." It evidently constituted anciently the court in which men were tried for their offense according to laws and customs now forgotten. But long since the character of the place has been forgotten the name has sturck and in that much later period when men came to be known by the names of the places from which they came and the names of their fathers as well as by their own given names, this place name made its advent into the records of family names.

Has the Dairy Cow Been Given a Chance?

Dairy cows and men are very much alike in one respect—neither has anything to say as to their parentage.

They are very different in another respect—man is master, the cow a servant. Such being the case, are men giving the dairy cows a chance to pay their way and prove their worth? What is a reasonable chance for man to give a dairy cow?

First—Since men largely control the matings of cattle, we are in duty bound in the first place to mate animals of known production, good type and plenty of vigor with one another, if the offspring is to be expected to produce milk at a profit.

Second—Granting that the first necessity has been carried out and the young animal has been properly fed to the production age, we must feed that animal in such a way as to give her a chance to produce milk at a profit. How can this be done? Briefly this: Every animal requires a certain amount of food to maintain body heat, life, and to repair the worn out parts of the body. To feed this amount of food is not giving the cow a chance to produce at a profit. We must feed in addition to this amount of food, an amount out of which we may rightfully ask the cow to prove what she can do. This food must be suited to the demand expected of her, and it is this part of the daily ration which will not only pay for itself, but will pay for the food consumed in maintaining life itself, the body heat and the repair of worn out parts. Just how much additional food over and above the maintenance ration can be fed will depend not only on the constitution of the cow, but upon her inherited ability to convert this food to milk. Here is where good breeding shows its value. It is quite possible for two farmers having equal quantities and qualities of feed to feed this to cattle of equally good type and breeding, and yet one farmer may sustain a loss, and the other a profit. It can be done in this way. Farmer A. may keep 50 cows and the feed available will simply supply a maintenance ration. All the incidental expenses are going on, and the cows are getting no food out of which they can produce much milk. A loss results. Farmer B. keeps half the number of cows, but they consume an amount of feed equal to that consumed by A's 50 cows, and half the feed goes to produce milk alone, and half to maintaining life. These cows, if the proper kind, will produce a profit.

Third—Men must use all the intelligence at their disposal to see that the milk produced is marketed to the best advantage and in the best possible condition. If this has been done, we may then be prepared to deliver judgment on the cow.

What Do the Microbes Do?

It is easy to ask this reasonable question, but it takes a lot of answering. A few microbes find entrance into the body and in a few hours, it may be, the man is dead. The effect seems somehow out of proportion to the cause.

"Behold how great a fire a little spark kindleth." Within the food-canal or in the blood, or in the wind-pipe and lungs, the invaders multiply with extreme rapidity.

A bacillus less than one five-thousandth part of an inch in length multiplies under normal conditions at a rate that would cause the offspring of a single individual to fill the ocean to the depth of a mile in five days.

Dr. Macfie calculates that the cholera bacillus can duplicate every twenty minutes, and might thus in one day have a progeny of five with twenty-seven noughts after it, and weighing over 7000 tons. But before this happens the patient is dead.

It is not, however, by sheer multiplication that microbes kill, nor, in most cases, by making holes in tissues, blocking passages or devouring blood-corpuscles.

These things may happen, but the main answer to our question, as far as bacteria secrete albuminoid poisons or toxins which are fatal to various kinds of living cells within the body. In other cases the toxins are only set free by the destruction and solution of bacteria which is continually taking place.

All that we can say in a few words is that the living matter of the body cells is disastrously susceptible to the presence of these strange albuminoids, and it must be borne in mind that even an innocent stuff like white of egg may act as a virulent poison.

Give to-day the best of your heart and mind. Do to-day's tasks to-day! Yesterday is the past—to-morrow is the future—live for to-day!

The Nile is noted for the variety of its fish. An expedition sent by the British Museum brought home 2,200 specimens.

The Sailor.

Mile upon mile, in soft and golden light,
The county lies; while long and silent shadows,
Sharp-hewn from solid sunlight, over meadows,
Across white roads, climbing whatever height
They meet, are thrown from every uprising slight;
From tufts of grass, from bushes, and the higher
Strong trees and walls; the whole ripe floor of the shire,
Green and gold, slashed by shadow-shafts, waits the night.
A thousand miles to westward of the land
A gull across the dark horizon swerves,
Spreading its sturdy wings over the low tide.
Behind the same sun sets. On either side
A gray drear waste of waters heaves and curves,
A very desert, and his chosen bride.
—J. C. Bird.

FOR MOTHERS OF YONNG CHILDREN

Mothers are quick to praise anything which brings health and comfort to her little ones—any medicine that will make the baby well and keep him well will always receive hearty recommendation from the mother. That is why Baby's Own Tablets are so popular. Thousands of mothers, throughout the country, not only use them for their own little ones but are always delighted to be able to recommend them to other mothers. Thousands of mothers have proved Baby's Own Tablets to be without an equal in relieving their little ones of any of the many minor ailments which arise out of a derangement of the stomach and bowels. Baby's Own Tablets are the ideal laxative—easy to take but thorough in action. They banish constipation and indigestion; break up colds and simple fevers; expel worms and make the teething period easy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Furs as Money.

In those countries and regions where animals bear costly fur and are slain for that reason trade, traffic, and culture are usually farthest behind. The most primitive conditions prevail, neither railway, highway, nor even money is known. The pelt has become the unit of value. The general means of payment; in fact, money. A sleigh or a boat cost so and so many furs of this or that variety, and the different furs frequently bear a direct ratio of value to one another. In the fur districts of Siberia, sable forms the unit of value and the currency; in certain remote hunting districts of North America and in Alaska the beaver pelt is the most important means of exchange and the best measure of value. In former centuries this fur money was in general use in the northern countries of Europe also.

It Isn't Done.

Playwright—"I'm working on a play that deals with the idea that the woman pays."

Playgoer—"You don't happen to have located any of the scenes in a restaurant, have you?"

Bolivia Vice.

The chief vice of the Indians and half-breeds of Bolivia is chewing cocoa. A man who has the habit can always be detected by the immense lump in his cheek. The general effect of the drug is to dull the nerves and stiffen the resistance to fatigue. Under its influence natives can endure great hardships and physical strain. Many of them will work for days at a time on nothing except cocoa leaves, which they begin to chew at breakfast time and continue to chew throughout the day. As with all narcotics, the persistent use of coca wrecks the nervous system and dulls the intellect.

Street Names in China.

Business streets in China take their names from the kind of business transacted in them.

Experiments With Noncarrier Waves Prove Many Advantages of This System.

Success of the noncarrier wave system of broadcasting which was developed by H. A. Brown and C. A. Keener, members of the electrical engineering staff of the University of Illinois, is announced as positive after another series of tests which bore out the results of previous tests held over a period of more than a year.

The elimination of "fading" is an added feature of the new broadcasting system which now seems possible. In the last series of tests, instruments which accurately measured the curve of audibility of both the carrier wave system and the new noncarrier system were set up a distance of 100 miles from station WRM, the university's radiophone with which the experimental work is carried on. These instruments showed the usual fading when the old system was used, but did not vary a particle when the noncarrier was employed. However, this advantage is not yet being claimed, because it has not been subjected to enough tests to establish it as a fact.

Previous advantages which were claimed for the system and which the final tests show as outstanding over the system now in general use include increased sending efficiency, more selective tuning at the receiver with greater possibility to tune out local stations, opportunity to cover greater distances and the elimination of all sorts of sounds which are impressed on the carrier wave and which only perfect modulation at the transmitting end and perfect detection at the receiver can eliminate.

The suppressed carrier or noncarrier system differs from the present type of broadcasting in that the carrier waves go out only when a note is sounded or a syllable spoken. Between notes or spoken words, the carrier wave does not go through the air. That is, the sound and the wave on which it rides leave the broadcasting apparatus simultaneously. This interval of time between sounds when there is no carrier wave in the air makes possible the advantages noted.

The Heretic.

His god was not a biped, ape-like thing
Who ruled by anger and a childish pride,
Who gave an ear to prayer of pope or king,
And dully listed all who sinned or lied.
His god could never walk the muddy earth,
And never note the fate of men or weeds,
The death of lords and empires or their birth,
The rise and fall of peoples or of creeds.

But in those dim, illimitable regions
Where worlds by myriads roll through starry night,
And where the atoms storm in swirling legions,
The God he worshipped hovered out of sight—
Wherefore, because that God was hard to see,
The pious cast him out for blasphemy.
—Stanton A. Coblentz.

Dominion Express Money Orders are on sale in five thousand offices throughout Canada.

More Natural Than the Real.

Imitation concrete blocks made of sandpaper have been found to appear more natural in motion picture photography than the genuine articles.

For Sore Throat Use Minard's Liniment

Dollar Courtship.

John McBeth had secured a license to marry Mary Manning, but the intended bride changed her mind, and six weeks later John made his second appearance in the clerk's office.

"Misther Johnson, in February I got a license from you to marry Mary Manning, an' I deedn't marry her. An' now, please your honor, would ye be so good as to alter it so it would fit Ellen McWatty?"

"No, you must get a new license to fit Ellen."

"And pay for it?"

"Certainly."

"Ah, mon, I'm ruined entirely. Fur I just coorted Ellen to save the dollar."

Bobbie's sister had bobbed her hair and now was carrying her comb around with her. Bobbie was vexed with her one evening and taunted her with: "Nothing but old hens carry their comb with them."

ISSUE No. 10—'25.

The Useful Plough.

A country life is sweet!
In moderate cold and heat,
To walk in the air, how pleasant and fair,
In every field of wheat,
The fairest of flowers adorning the bowers
And every meadow's brow;
So that, I say, no courtier may
Compare with them who clothe in grey
And follow the useful plough.

They rise with the morning lark,
And labour till almost dark;
Then, folding their sheep, they hasten to sleep;
While every pleasant park
Next morning is ringing with birds that are singing
On each green tender bough.
With what content and merriment
Their days are spent, whose minds are bent
To follow the useful plough.
—Old Song.

Minard's Liniment for Colds.

The fastest single-screw merchant ship in the world is the S.S. Royal Scot, which was built to give a speed of 22 knots, and plies between London and Edinburgh.

Two it takes to make a quarrel; one can always end it.—Spanish Proverb.

MINARD'S "KING OF PAIN" LINIMENT

WORKING GIRL'S EXPERIENCE

Read How She Found Help in Lydia E. Pinkham's Vegetable Compound

Arnprior, Ontario.—"I must write and tell you my experience with your medicine. I was working at the factory for three years and became so run-down that I used to take weak spells and would be at home at least one day each week. I was treated by the doctors for anemia, but it didn't seem to do me any good. I was told to take a rest, but was unable to, and kept on getting worse. I was troubled mostly with my periods. I would sometimes pass three months, and when it came it would last around two weeks, and I would have such pains at times in my right side that I could hardly walk. I am only 19 years of age and weigh 118 pounds now, and before taking the Vegetable Compound I was only 108 pounds. I was sickly for two years and some of my friends told me about Lydia E. Pinkham's Vegetable Compound, and when I had taken a bottle of it I felt a change. My mother has been taking it for a different ailment and has found it very satisfactory. I am willing to tell friends about the medicine and to answer letters asking about it."—Miss HAZEL BERNDT, Box 700, Arnprior, Ontario.

A day out each week shows in the pay envelope. If you are troubled with some weakness, indicated by a run-down condition, tired feelings, pains and irregularity, let Lydia E. Pinkham's Vegetable Compound help you. C

FOR Lumbago

BAYER

ASPIRIN

Proved safe by millions and prescribed by physicians for

Lumbago — Colds
Headache — Pain
Neuralgia — Toothache
Rheumatism — Neuritis

Safe — Accept only "Bayer" package which contains proven directions.

Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

"RUN DOWN" MEN AND WOMEN NEED

Dr. Williams' Pink Pills

They Give New Vitality—and more.

The expression "run down" comes from the feeble action of an unwound clock, and the comparison is a good one. Applied to health it means a condition in which the bodily functions are enfeebled. Appetite fails, digestion is impaired, the nerves impoverished, the complexion becomes pale and fatigue is a constant symptom.

No particular organ being affected, you must look for relief through the blood, and Dr. Williams' Pink Pills are the best blood builder known to medical science. As your blood becomes rich and red, the various organs regain their tone and the body recovers its full vigor. If you are weak, begin taking Dr. Williams' Pink Pills to-day and see how soon improvement will show in increased appetite and renewed vitality.

Mrs. Chas. Bourdage, Five Fingers, N.B., says:—"Before taking Dr. Williams' Pink Pills I was completely run down. I did not sleep well, my digestion was poor and I would take dizzy spells. The use of the pills changed all this and I am now a strong, healthy woman."

* * *

With the passing this year of the Methodist Church into the United Church of Canada Iroquois Methodists celebrated on Sunday, Mar. 8th, 135 years of Methodism in that district and 48 years of that church edifice. The circuit is one of the oldest in all Canada. The first missionary, William Losee, visited Pt. Iroquois in 1790, and the first church, a frame structure, was constructed there in 1797. The present church was built in 1876. It was in this building that the Methodist Union of 1884, was consummated when the Episcopal and Wesleyan Methodists came together, with Dr. Albert Carman as General Superintendent.
