HENRY'S Shorthand School Ottawa, Ont.

No School in Canada offers a better training, or ensures a more successful future. Henry's leads all others, and ranks among employers as "THE SCHOOL OF HIGHER EFFICIENCY"—a fact borne out by more than 600 pupils who have, since January, 1913, left other Ottawa schools to come to it.

Therefore, it is not surprising that business men, in advertising for stenographers, should specially say, "Graduates of Henry's School preferred."

For particulars about our course, apply to:

D. E. HENRY, Director.

McMillan's Store, Grantley, Has Narrow Escape

Saturday afternoon about four o'clock a hurry-up call was given over the telephone from Grantley, for assistance in fighting a fire discovered in the roof of Charlie McMillan's building and was promptly responded to by a number from town. Before their arrival the danger had been averted by the prompt action of immediate neighbors. The fire started in the attic and apparently caught from the chimney or an over-heated stove pipe which enters the chimney in the attic. The wind was very high at the time and only prompt action save a heavy loss. Sunday morning flames were again discovered almost at the same place as the day before, which, after doing considerable damage, were again subdued by a bucket brigade formed by the neighbors.

Winchester Twp. Council

Council met at Morewood on May 5th, members all present. A Court of Revision re assessment on the Lough Drain was opened. One appeal was heard and referred to the engineer.

A petition for a drainage work was presented, signed by W. A. Servage and seven other ratepayers, which was ordered filed for further consideration.

The engineer's report on the repair of the Devanney Branch, Stoney Creek, was accepted.

The petition for repairs to Kittle Creek was accepted and the engineer requested to report.

A petition by O Dillabough and ten others, being sufficiently signed, was referred to the engineer for report.

The stone crushing for the year was ordered to be advertised.

Next meeting at Winchester on June 2nd, as Court of Revision of Assessment Roll.

Chesterville Shriners Attend Ottawa Initations

Shriners W. M. Saucier and Melvin Durant attended the Eastern Ontario initiations in Ottawa Saturday last where rich uniforms alternated with striking floats and comedy features as 800 Shriners paraded Ottawa's streets with the initiation of 180 candidates to the mysteries of the burning sands. The ceremonies were carried out by Rameses Temple, Toronto. Including Shriners from Karnak Temple, Montreal, and various temples in northern New York State, 600 visitors were there.

Candidates decked out in convicts' stripes were formed in "chain gangs," and several looked out upon the public from behind bars of cages erected on wheels. Prominent in the parade were a number of the traditional goats pawing the ground in agreeable anticipation. Brilliant velvet uniforms of the Karnak Patrol, worn for the first time and prepared especially for the great Shriners convention in Toronto, were an outstanding feature. Three bands were in attendance.

High officials present were Hon. G. S. Henry, Potentate of Rameses Temple, Toronto, and W. J. McNally, Potentate of Karnak Temple, Montreal, who drove in a "tally-ho" six-in-hand coach.

Other prominent officials were W. J. Gallon, Dr. W. H. Wright, Charles Soady, J. J. Brown, W. H. Shaw, Past Potentates of Rameses Temple; T. J. McDonald and T. Currie, Past Potentates of Karnak Temple.

Seeding Well Advanced

The very favorable weather of the past week has been taken full advantage of by the farming community for work on the land, which seems to be in particularly fine condition for getting the seed in early. On the higher ground many acres have been sown and many more are ready for the seed. The high temperature and prevailing strong winds during the past week have put much of the low lying land in shape for cultivation which is steadily going on. Unless a set back of real bad weather comes seeding will be finished considerably earlier than usual. With trees almost in full leaf from ten days to two weeks earier than usual the landscape has taken on a most pleasing appearance, while the meadows have also shown wonderful improvement.

Without A Light

In an accident near St. Thomas an automobile hit a horse and buggy and a prosecution may result. But the charge may be laid against the owner of the buggy for failing to carry a light. Any vehicle on the highway at night without a light is dangerous both for the occupants of the vehicle and others who happen to be using the highway.

The Late Mrs. Ellen Allen

On Saturday, April 26th, the community was shocked to learn of the death of Mrs. Ellen Allen, wife of the late James Allen. She had been very frail for the past seven years, but the most loving and constant care prolonged a cherished life. Consoled by all of the advantages of Holy Church she peacefully passed away in the presence of her four daughters and the Sisters of St. Mary's Convent.

The deceased, who was in her 76th year, had been a life-long resident of Chesterville and in her quiet, pleasant way had endeared herself to friends and neighbors by being ever ready to assist those sorrowing and bereaved.

From a family of twelve, seven survive to mourn her loss: Mrs. E. P. McDonald, Mrs. M. J. Curran, Mr. Wm. Allen, Mr. Jas Allen of Smiths Falls, Miss Anna Mae Allen, Miss Margaret Allen, and Thomas L. Allen of Dell Rapids, S.D.; also two brothers, John Daly, of this place, and Thomas Daly of Orient, S.D. Thirty-seven grandchildren and five great-grandchildren also survive.

The pall bearers were six grandsons: Frank Allen, Gerald Curran, Leonard Curran, Joseph McDonald, James McDonald, Wm. McDonald,.

The Requiem Mass was celebrated on Tuesday morning at nine o'clock in St. Mary's church by Rev. Fr. Ryan. Interment took place in the Lower cemetery.

The great number of mass cards, Spiritual offerings and letters of condolence are tokens of esteem in which the deceased was held and the sympathy of a large circle of friends is extended to her sorrowing family.

Spiritual offerings: Mr. and Mrs. Michael J. Curran and family, 4 masses; Mr. and Mrs. E. P. McDonald and family 2 masses; Anna Mae Allan, 2 masses; Mr. and Mrs. Thos. L. Allen, 2 masses; Margaret Allen, 2 masses; Mr. and Mrs. Jas. Allen, Mr. and Mrs. Wm. Allen, Frank Allen, Nellie McDonald, Mr. and Mrs. Leonard Curran and family, John Daly and Michael, Mr. and Mrs. Wm. McDonald, Joseph C. McDonald, Mr. and Mrs. Michael M. Curran, Mr. and Mrs. Thos. Allen, Mrs. S. Daley and Kathleen, Mr. and Mrs. Edward Lefebvre, Mr. and Mrs. D. J. McMilan, Dr. and Mrs. J. Gormley, Irene Allen, Mrs. A. and Misses Gormley, 2 masses; Pupils of S. S. No. 9, Limerick, Mr. and Mrs. Edward Carroll, Mrs. P. M. Curran and family, Mrs. Hughes and Marcia, Mr. and Mrs. M. E. Curran and Ileen, Mr. and Mrs. Geo. McMahon, Mr. and Mrs. Thos. McMahon, Mr. and Mrs. Allen Moran, The Catholic Women's League, Mr. and Mrs. Daniel Masterson and family, Mr. and Mrs. W. Rogers, Mr. and Mrs. Thomas McDonald, Mr. and Mrs. Patrick Manley, Mr. and Mrs. Michael Walsh, Mr. Wm. Clarke, Mr. E. B. Lynch and family, Mr. and Mrs. Maurice Servage, Mr. and Mrs. Dan O'Brien, Mrs. J. Murphy and Ranald Curran, Mr. and Mrs. Jas. Tallmire, Mrs. Hannah Refue and George, Mr. Hugh Masterson, Sr., Mr. and Mrs. John Manley, Mr. Bernard Coyne and family, Mr. and Mrs. H. J. McMahon, Mr. Patrick McMahon, Mr. Thomas Coligan and family, Mr. and Mrs. Chas. Dwyer, Mr. Thomas Moran, Mr. George Servage, Mrs. Eleanor Blacklock, Mrs. M. Gillissie and family, Mrs. Ira E. Dishaw and Sister M. Isadore, Mr. and Mrs. H. McCambridge and mother, Mr. and Mrs. Jas. Masterson, Mr. and Mrs. Thos. McCloskey and family, Mr. and Mrs. Jas. Clement, Mr. and Mrs. John J. Quinn, Mr. and Mrs. James McAvoy, Mr. and Mrs Frank McCloskey, Mr. Ed Gibbons and Mr. and Mrs. John Heveran, Mr. James Moran, Mr. and Mrs. Vincent Coyne.

Messages of sympathy were received from the following:—Miss Kathryn Allen, Montreal; Miss Anna McDonald, Montreal; Mrs. A. and Misses Gormley, Ottawa; Mrs. McDonald, Alexandria; Mr. Thos. Gormley, Alexandria; Mrs. Peter Morris Alexandria.

Motorist on Metcalfe Road Saves Family From Fire

Ten persons had a narrow escape from death when fire destroyed a house and barn on the Metcalfe road near South Gloucester shortly before one o'clock Sunday morning. Mr. and Mrs. F. Binnette and eight children, occupants of the dwelling, were able to make their way to safety after a passing motorist had awakened them.

When the outbreak was discovered the barn, which adjoins the house, was a mass of flames and one part of the two-storey frame dwelling had caught fire. All members of the household were sound asleep and it was with considerable difficulty that the motorist awakened them and they became aware of their danger.

In the meantime, neighbors gathered at the scene of the fire and assisted the owner in removing some of the household effects. It was found impossible to save the building. A quantity of hay and feed in the barn was lost but horses and cattle were in the fields when the fire started.

Former Chesterville Lady's Play Accepted In Chicago

Many people in Chesterville and vicinity will be pleased to learn of the success of a former well-known and popular resident in Mrs. Thurston, of Calgary, nee Alice McMillan, of Orchardside, who has recently had her play of the western ranching country, entitled "Maverick," accepted for production by The Five Arts Club of Chicago. Mrs. Thurston is a member of the Canadian Author's Association and a popular amateur entertainer. "Maverick" is only one of several plays which the Chicago club has under consideration from Mrs. Thurston's pen.

United Ladies' Aid

With a very good attendance, the regular meeting of Chesterville United Ladies' Aid was held yesterday afternoon at the hospitable home of Mrs. A. J. Forward, when the Roll Call was answered by a verse of Scripture. The business part of the meeting was taken up with the discussion and making arrangements for the holding of the anniversary supper and concert on Monday evening, June 2nd.

The afternoon's programme included two delightful solos by Mrs. Geo. Merkley accompanied by Mrs. Hewitt, and a reading by Mrs. C. Munro, which was followed by dainty refreshments served by the committee in charge, Mrs. Forward, convenor; Mrs. W. Hamilton, Miss Moad, Mrs. Helmer, and Mrs. Geo. Cass. The meeting closed with the singing of the National Anthem.

CARD OF THANKS

I wish to very heartily thank my neighbors for the very effective assistance rendered Saturday afternoon and Sunday in saving my buildings from fire. To those from Chesterville and at a distance who responded the same thanks are cordially extended.

—Charles McMillan.

If You .. Require Glasses

You need them now. To postpone the wearing of glasses because of groundless prejudice is to take risks with your eyes. You cannot be too careful to preserve the quality of your vision.

To begin to care for your eyes to-day is better than to-morrow.

One eye ,if not both, may be slightly defective and defects can only grow worse if the eyes are left to grapple with them unaided.

Come and get the benefit of our scientific method of sight testing and modern equipment.

Let us give you an accurate knowledge of the condition of your eyes.

Don't Starve The Teeth

Teeth have to be built out of foods that are rich in phosphorus and calcium. Many children take into adult life teeth that are defective, unfit for the job that nature intended. Shredded Wheat with milk helps develop sound teeth, good muscles and good bones. It is rich in the bone-making salts. The crisp, crunchy shreds make chewing necessary and that develops healthy gums and good digestion.

WITH ALL THE BRAN OF THE WHOLE WHEAT

THE CANADIAN SHREDDED WHEAT COMPANY, LTD.

Tornado Hits Hastings County

Belleville.—Hastings county was visited by a miniature tornado centering around the village of Marmora Sunday.

Several residents saw roofs of their homes hurled off by the gale. Telephone poles were torn loose and trees uprooted and several sections presented scenes of desolation. The tornado lashed itself into intensive fury on the Madoc road and a school was damaged.

Motorists were forced to shelter under the barrage of rain and hail. No reports of injuries were received.

Sunday Fire at Mille Roches

A double tenement frame house dwelling at Mille Roches, five miles west of Cornwall, owned by Mrs. P. N. Tait, of Cornwall, was completely destroyed Sunday morning by a fire which started in the back kitchen on the west side of the house, which was occupied by Alex. Antoine and family.

The east side of the house was occupied by Alex Quenville, and both families saved most of their possessions from the front, but the building was burned to the ground.

The house was insured but there was no insurance on the contents. The firemen centred their attention to saving two houses to the east and one to the west and succeeded in their efforts.

The people of Mille Roches expressed deep appreciation of the prompt response of the Cornwall firemen and the good work they did after their arrival.

65 Varieties Grafted

Fredericton, N.B.—F. A. Good, of Fredericton, who operates a farm in the adjacent parish of Kingsclear, has an apple tree on which sixty-five varieties of apples have been grafted. Twelve to twenty of those varieties will bear fruit this season. The others will develop later. The tree of Mr. Good, who is a member of the teaching staff of the Provincial Normal school of this city, far surpasses a tree in Ontario, of which note was made in despatches some days ago. Not only have numerous varieties of apples been grafted in, but pear grafts were used. The pear grafts lived two seasons and then died out. The owner of the tree in Kingsclear hopes to have sixty-five varieties of apples grafted on the tree by the end of the present season. He does not believe the tree will take any more than that.

The young preacher had delivered an inspiring sermon on the beauties of married life. Two old women were heard discussing the sermon later. One said, "That was a fine sermon—and I only wish I knew as little about the subject as he does."

Satisfying Sandwiches

By Etta Bitta Pye.

Many women do not think of sugar in connection with sandwiches, yet a little touch of sugar furnishes some quick energy food of real value and goes a long way toward bringing out the real flavor of some of the other sandwich ingredients. Try the following and you will appreciate these facts:

Boston Sandwiches

Either left-over or canned baked beans can be used for a delicious filling for a hearty sandwich. Whole meat and Boston brown bread are equally desirable.

Press 1 cup baked beans through a coarse sieve and add 1 tablespoon tomato catchup, ½ teaspoon onion juice, ½ teaspoon mixed mustard and ½ teaspoon sugar. Spread on buttered slices of bread and serve with crisp pickle.

Date Picnic Sandwich

The picnic lunch needs plenty of fruits. A few date sandwiches help to bolster this up, and furnish very delicious tidbits as well. Run half a cup of dates and half a cup of walnut meats through the food grinder, using the coarse plate. Mix with one Philadelphia cream cheese and ½ teaspoon sugar. Spread on buttered slices of whole wheat bread.

CHOCOLATE PIE

2 sq. chocolate
7-8 cup sugar
¼ cup flour
¼ teaspoon salt
1 cup boiling water
1 cup evaporated milk
3 egg yolks
1 tablespoon butter
½ teaspoon vanilla
Baked pastry shell

Melt chocolate over hot water. Add sugar that has been thoroughly mixed with flour and salt. Blend well. Add boiling water and milk. Cook in a double boiler 25 minutes, stirring occasionally. Pour chocolate mixture gradually over well-beaten egg yolks, beating vigorously to prevent curdling. Return to double boiler and cook 2 minutes longer. Add butter and flavoring, cool slightly and pour into cold baked pastry shell. Cover with meringue and brown to the preferred color in a slow oven.

COTTAGE CHEESE CUSTARD

1 cup cottage cheese
2-3 cup sugar
2-3 cup sweet milk
2 eggs
1 tablespoon melted butter
¼ teaspoon salt
1 teaspoon vanilla

Beat the egg yolks, add the sugar and the milk, then mix cottage cheese, salt, butter, and vanilla. Bake in custard cups set in a pan of hot water, in a slow oven, forty-five minutes. Cool slightly and add meringue made by adding 2 tabelspoons of sugar to stiffly-beaten egg whites of 2 eggs, brown in oven.

"Made To See It"

"I can't see it," said Buffer. "Nobody reads these little advertisements. It's preposterous to think it." "But," said the editor, "you read what interest you?" "Yes." "And if there is anything you wan particularly to look at?" "Certainly." "Well, among the thousands that make up this busy world of ours, everything that is printed is read. Sneer as you please, but I assure you that printer's ink is the truest secret of all business success." Still Buffer couldn't see it. He didn't believe that half those little crowded ads. were ever read.

"Suppose you try an experiment," said the editor. "Just slip an ad. of the want of one of the most conspicuous things in the world. For the sake of the test I will give two insertions free. Two will be enough; and you may have it jammed into any out of the way place in the paper. Two insertions of only two lines. Will you try it?" Buffer said, "Of course," and selected where he wanted it put and waited to see a proof of his ad. which read: "Wanted—A good House Dog. Apply to J. Buffer, 575 Towser st., between 6 and 9 p.m." Buffer went away smiling and nodding.

Next morning he opened his paper and after a deal of hunting found his ad. At first it did not seem conspicuous. Certainly so insignificant a paragraph could not attract notice, but after a while it began to look more noticeable and the longer he looked, the plainer it grew, until finally it glared at him from the closely-printed page. It was because he was the person interested, but of course it would not appear conspicuous to any one else.

Buffer was just sitting down to tea when the door bell rang. The servant announced that a man was at the door with a dog for sale. "Tell him I don't want one." Six times Buffer was interrupted while eating his tea by men with dogs. He was a truthful man and as he had put his foot in it he meant to take it out manfully, so when the twenty-sixth applicant, which was a small boy and a girl with him leading a ragged dirty poodle came, Buffer bought it and immediately gave it to the girl and set them off. To the next applicant he was able to say: "Don't want a dog, have bought one." The stream of callers continued until ten o'clock when he turned off the lights.

Next evening as Buffer approached his house he found forty men and boys, each with a dog to sell. He told them he had bought a dog. Buffer had his hat knocked over his eyes, had his coat torn, his umbrella smashed, and his feet tramped on, but with the help of six policemen finally came through alive. He had no idea there were so many dogs in existence.

The following morning he visited his friend the editor, to acknowledge his mistake, and to have the Wanted ad. taken out and in the most conspicuous place, in big type, to advertise that he did not want any more dogs. For this he paid. He then went home and posted on his door "Gone to the country," hired a special policeman to guard the place, locked up, and went away.

From that day Buffer has never expressed his doubts concerning the value of printer's ink, nor has he asked, "Who reads the advertisements?"

"We want a man for our information bureau," said the employer. "He must be wide-awake and accustomed to complaints."

"That's me," said the applicant. "I'm the father of twins."

OUT OF TOWN CALLS — QUICKER AND CHEAPER THAN EVER

Mrs. Rush had her things on all ready to go out.

"I wish I knew how many yards of that curtain stuff my sister needs. I wonder if I could reach her by telephone?"

Her sister lived in a city over 80 miles away — but in just a little over a minute Mrs. Rush was talking to her and getting the details she wanted. It didn't delay her shopping trip more than two minutes and it cost her only 50 cents.

"Well, that was certainly worth while! Now I know exactly what to buy", she said as she stepped into her car to go down town.

Our facilities are now so complete that the average long distance call takes only a fraction over a minute and a half!

It is so easy to place a long distance call. Just ask for "Long Distance," and give her the distant number. If you do not know the number, "Information" will look it up. Calling by number speeds up the service.

THE BELL TELEPHONE COMPANY OF CANADA

"Do you have to see a doctor to get liquor in this town?"

"No, indeed, it's afterwards you'll have to see a doctor."

12 Dead In Accidents Over the Week End

Toronto, May 5.—Lured out to the wide open spaces by almost summer-like weather, 12 persons fell victims to drowning, motoring, and other accidents throughout Ontario over the week end.

Fatalities took a heavy toll of fishing expeditions, five persons being drowned out on stream and lake endeavouring to coax wily perch and trout to bite. Another was drowned when he fell off a bridge.

Motor cars took a toll of four lives, while fire took the life of one, and a railroad accident another.

India's "Untouchables"

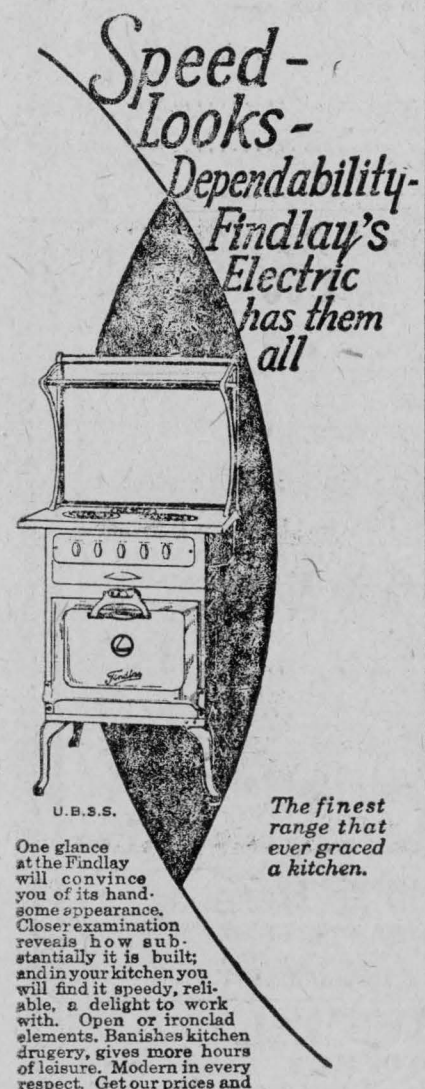
A British doctor, who has just returned from India, where he has been for eight years, confesses that so vast and complicated is India and its population that he has learnt little more than his own ignorance about it all. One matter on which he was definite was the importance of the problem of the "untouchables." Mr. Gandhi's great dilemma is here. Although he condemns the rigid caste system, it is powerful among Hindus. Almost inevitably an anti-British demonstration in India concludes with intercommunal fighting, and the police have had lately to protect the "untouchables" from their fellow Hindus These Hindu pariahs number 60,000,000, a fifth of India's population. For even the shadow of one to fall on a Brahmin involves the latter's purification. "Untouchables" are generally extremely poor. They might be cultured or rich merchants, but they would still be despised by all the rest, including the hereditary criminals, who are born to live by crime. The Indian Government is the only protector of these outcasts, who have begun to organize and to realize the power of their numbers.

Who Dies of Tuberculosis?

Some very interesting findings appeared recently in a little booklet published by the National Tuberculosis Association.

Native-born persons of native parents show low death rates from this disease. The rates are high for German males, and the Irish rates, both male and female, over twice the rates of native-born. The rate for Russians, including Jews, is even lower than for native born, and Italian males show very low rates. Italian females, however, show a high rate. The rate for Negroes in any locality is usually from two and one-half to three times that of the white population. These figures, of course, apply to the United States Registration Area which comprises about ninety per cent of the total population.

Fortunately, the death rate for this terrible disease is getting smaller as the years pass. It has been declining almost yearling since 1900. The 1927 rate was less than half that of 1904—which meant a saving of approximately 130,000 lives a year.



The finest range that ever graced a kitchen.

One glance at the Findlay will convince you of its handsome appearance. Closer examination reveals how substantially it is built; and in your kitchen you will find it speedy, reliable, a delight to work with. Open or ironclad elements. Banishes kitchen drugery, gives more hours of leisure. Modern in every respect. Get our prices and easy payment plan.

Findlay's Electric RANGE

Date Is Still Uncertain For R-100 to Visit Canada

The work of repairing the starboard elevator of the R-100, giant dirigible, which was injured when the ship was being taken from her shed in preparation for a trial flight a few days ago, is still progressing. After the repairing job is completed the final trials must be undergone before the R-100 will be able to leave on her long-hailed flight to Canada.

The actual date of the flight will depend on weather conditions and the Air Ministry has never given a date. It had been generally assumed the start would be made towards the end of May and no information of a postponement is obtainable.

Egg Market Is Firmer

When an egg season opens with low prices it often finishes in a strong position. This was the case with storage eggs last fall and is proving to be the case again in the current spring market, says the egg and poultry market review issued by the Dominion Department of Agriculture. Improvement in the general tone of the market was displayed again last week, and there are no signs of any weakening influences in the situation.

Demands for eggs for immediate consumption has been extremely heavy all across Canada and has cut materially into the inward storage movement. On May 1, 1930, there were 40,272 cases of eggs in storage in Montreal, according to Board of Trade figures, while on the corresponding date last year holdings were 45,273 cases.

There is a firmer tone to the egg market this week, and dealers in Montreal have to pay more for their supplies, whether purchased in the east or from western centres. British Columbia fresh eggs sold in Montreal as high as 33½c a dozen for extras, 31½c for firsts, and 30c for seconds, delivered, Montreal. Contact during the day with Ontario sellers revealed that their ideas were about the same levels. Eggs from the Prairie Provinces were quoted at 29½ cents for extras, 27½c for first, and 25c for seconds.

Health Service

Prepared by the Canadian Medical Association.

HEART DISEASE

The heart is a muscle organ which acts as a pump, sending the blood to all parts of the body. The blood must reach all parts because it carries the nutrition upon which depends the very life of each part. If the heart is damaged, the result is heart disease. Depending upon the nature and extent of the damage, the heart is correspondingly unable to carry out its work.

The heart muscle may be damaged as the result of infection. The poisons given off by germs are very apt to cause injuries to the heart muscle. Rheumatic fever, syphilis, diphtheria, and scarlet fever are the principal diseases in which the heart is damaged by the poisons of the germs which cause them.

Another form of infection which is frequently responsible for heart disease is that which is caused by tonsillitis and diseased teeth. In such cases, there is a focus of infection in tonsils or teeth where poisons are produced by the germs living at the focus, and such poisons, when carried in the blood stream, may damage the heart.

Acute rheumatism is the chief cause of heart disease in early life. The specific cause of rheumatism is not known. It should be understood, that growing pains, tonsillitis, chorea and St. Vitus' Dance are evidence of rheumatism in children.

The prevention of heart disesase begins with the maintenance of physical fitness by proper food, fresh air, sunshine, rest, and play. A clean mouth, which means regular dental care, and the treatment or removal of diseased teeth; the treatment, or removal, if necessary, of diseased tonsils; prompt attention to tonsillitis or sore throat, growing pains, or painful joints, chorea or St. Vitus' Dance ,are all essential, as are the prevention of diphtheria by immunization at an early age, protection against the communicable disease and proper care of these, if contracted, with particular supervision during the convalescence.

As the individual grows older, care should be taken to avoid those conditions which, although not direct cause, do predispose the heart to damage, or to the breakdown of a heart already somewhat damaged. Such conditions are excesses of any kind, whether in food or drink, or in the manner of life. Too little or too much exercise, lack of rest, over-eating and worry are some of the factors which contribute to the incidence of heart disease.

When heart disease is detected early, and the individual is able and willing to adjust his life to the capacity of a weakened organ, he very frequently outlives his friends because of the reasonable care which he gives himself.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Keep the Chicken Feed and Water Clean on the Range

Experimnetal Farms Note.

With the ever increasing danger of parasitic infection due to the intensive methods now in vogue in the rearing of chicks and the handling of laying and breeding stock it behooves breeders to adopt every sanitary precaution to ensure the health and well being of the growing chicks.

Infection through the drinking water and feed, while on range, should be avoided by using stands for the feed troughs and drinking vessels, so that there will be no chance of infection through the consumption of feed that has become contaminated by coming in contact with the droppings on the ground or through the drinking water that has formed puddles on the ground around the pails.

For this reason all feed and water consumed should be supplied either from hoppers for the dry mash or from troughs for the scratch grain and from elevated clean vessels for the drinking water. The roosting shelters, hoppers, troughs, and water stands should be moved at frequent intervals so as to keep the chicks on fresh ground as much as possible.

For sketches of shelters, hoppers, or water stands, write the Poultry Division, Central Experimental Farm, Ottawa.

Teacher: "Who was it that prompted you? I distinctly heard someone whisper that date."

Student: "Excuse me, but I expect that was history repeating itself."

ACTUAL RESULTS

Policy 248,043 in Sun Life Ass.Co.ofCanada for $1000, matured Feb. 1st.

Plan of Insurance—20 year Endowment, dividends left to accumulate.

We sell the better grade to build the better trade

H. J. McMAHON

"Bobbie, you bad boy, you've eaten all three cakes. I told you that you might have one," said his mother.

"Yes, mum," said Bobbie, "but I didn't know what one you meant, so I ate them all to make sure I got the right one!"

CARD OF THANKS

We wish to thank our many friends and neighbors for their many kind acts and expressions of sympathy in our recent bereavement, the death of our mother, Mrs. Ellen Allen.—The Allen Famiy.

Gyproc *Gives* PERMANENT PROTECTION

MADE from Gypsum rock, Gyproc Wallboard *does not burn.* And this year it has a new smooth Ivory finish that needs no decoration (when panelled) although you can tint, paper or plaster it if you wish.

Structurally strong, inexpensive, easily and quickly put up, Gyproc Wallboard gives permanent fire protection to the walls, ceilings and partitions of your home.

Your dealer's name is listed below. Ask him for complete details of this pioneer Canadian fire-safe Gypsum board or write for free interesting book, "Building and Remodelling with Gyproc."

Lightning Was Destructive

Brockville, Ont.—A bolt of lightning emerging from a clear sunlit sky Tuesday totally destroyed a large barn on the farm of Asa Peterson, Eloida, Leeds County, as well as four pigs, nine calves, a valuable bull, two hundred bushels of oats and a large quantity of hay. Neighbours succeeded in saving adjoining buildings.

24 Pigs in One Litter

An all-time Canadian record is claimed for a two-year-old crossbred Yorkshire and Tamworth sow, owned by J. E. Armstrong, Kinburn, Ont. The sow gave birth to a litter of 24 pigs, her fourth litter. In the first two there were ten pigs each, and in the third 15. Of the 59 only six have died. Nine to eleven is the average litter.

Berwick

Mrs. W. D. Munroe spent Tuesday at Winchester, the guest of her parental home.

Mrs. Frank Eagles and children, of Massena, are spending this week at her parental home here.

Mrs. Elliott, of Ottawa, who spent the past couple of weeks the guest of her son, returned home on Tuesday.

Miss Elizabeth Ruddy is spending a couple of days this week in Ottawa.

Mrs. J. Dubois, of Embrun, is the guest of her niece, Mrs. J. Meilleur.

Miss Dora Legg, of Cornwall, spent a few hours on Sunday at her parental home here.

Mr. and Mrs. Wm. Servage, of Massena, spent Sunday with the former's parents, Mr. and Mrs. Geo. Servage.

We are glad to see Miss Bella M. Legg out again after her severe illness.

Mr. and Mrs. Thos. Kearns, of Detroit, are spending a couple of weeks with their relatives here, being called owing to the serious illness of the latter's mother, Mrs. Wm. Galvin.

Miss Jennie McRae, teacher, spent over the week end at her parental home at Monklands.

Orchardside

Mrs. Walter Merkley visited Mrs. Howard Beckstead on Wednesday.

Mr. and Mrs. William Irving visited their daughter, Mrs. Geo. Ouderkirk, one day last week.

Visitors at Mr. Grant Beckstead's on Sunday were: Mr. and Mrs. Chas. Beckstead and Mr. and Mrs. Levi Merkley, of Brockville.

Mrs. John Weegar and Mr. Harold Weegar, of Elma, visited at the home of Mr. W. Edgerton on Monday.

Mr. Clifton Merkley, of Chesterville spent the week end at his home here.

Rev. A. W. Stewart, of Finch, visited at the home of Mr. David Beckstead on Tuesday.

Straders Hill

Misses Olive Cook and Olive Strader were guests of Misses Ruth and Doras Strader Sunday.

Miss Dora Hanson is spending some time with friends in Morrisburg.

Mr. and Mrs. Henry Hanson visited friends in Chesterville on Monday.

Mr. Stanley Pitt visited his grandparents, Mr. and Mrs. Ross Hanson, recently.

We are sorry to hear Mrs. Elizabeth Strader is not very well and hope to see her out again soon.

Visitors at Mr. Henry Hanson's for the week were: Mrs. J. Casselman, Mr. and Mrs. Jack Newton and little Jack, Mr. and Mrs. Percy Call and daughter, Muriel, of Ottawa; Misses Doran Hanson and Olive Strader.

Mr. and Mrs. Orlando Cook and baby visited Mr. and Mrs. J. Casselman and family recently.

Canadians Big Meat Eaters

There is an increasing consumption among Canadians of meat, poultry and eggs. A recent report issued by the Canadian Government bureau of statistics discloses that he per capita consumption of beef, pork, mutton and lamb increased from 156.14 pounds in 1928 to 157.81 pounds in 1929; consumption of poultry increased from 10.12 pounds to 11.38 pounds a person, and the consumption of eggs from 30.59 dozen to 30.87 dozen. The average Canadian family consumed in 1929 over nine-tenths of a beef, over two and a half hogs, and over four-fifths of a sheep or lamb, in addition to seven fowls, three-quarters of a turkey and approximately half a goose and half a duck.

BORN

Nugent—On Tuesday, April 22nd, 1930, to Mr. and Mrs. H. C. Nugent, Berwick, a son.

Alfred had obtained a new job with a firm of builders. He began work on Monday morning. When Wednesday evening arrived he found that he was rather short of money, so he approached the cashier.

"Can I have my week's wages now?" he asked. The cashier was taken aback.

"You've only been here three days," he said.

Alfred nodded.

"I know," he replied, "but if I can trust you for the first half of the week, surely you can trust me for the second."

Varieties of Strawberries

Experimental Farms Note.

The strawberry is the most important of the small fruits grown in Canada. It is adaptable to a wide range of conditions and is widely grown, not only in commercial plantations but in home gardens as well. In spite of this wide adaptability, perhaps no fruit is so susceptible to changes in climate and soil conditions. Varieties succeeding in one location may be total failures in another. Hence, knowledge of varieties is essential to the prospective planter, as out of the hundreds of available varieties, only a very limited number are really satisfactory under any given set of conditions.

In selecting a veriety, it is essential to know whether it is a perfect or imperfect flowering sort. Varieties with perfect flowers may be planted in a solid block and will produce satisfactory crops. Imperfect varieties are unable to fertilize their own blooms and must be interplanted with a perfect variety in order to ensure a crop. All varieties are listed in catalogues as perfect or imperfect, and if one is familiar with the meaning of the terms, no difficulty will be experienced.

Many varieties have been tested over a period of years at the Experimental Station, Fredericton, N.B. For general purposes this list may be narrowed down to three varieties, namely: Senator Dunlap, Premier, or Howard 17, and Glen Mary. In an eight year average from one-year-old plantations, Glen Mary ranked first with a yield of 5210 quarts per acre, and was followed in order by Premier and Senator Dunlap with yields of 4753 and 4592 quarts respectively.

In a three-year average from two-year-old plantations, Senator Dunlap ranked first with a yield of 6434 quarts per acre, and was followed in order by Glen Mary and Premier with yields of 6108 and 5105 quarts respectively.

Senator Dunlap is a vigorous grower and a strong runner-maker, and is adaptable to a wide range of conditions, although doing best, perhaps on heavier types of soil. For these reasons, it is the most popular of the three varieties in Eastern Canada, although the other two are well worth consideration.

Riverside

A large number attended the movies in the Community Hall, Berwick, on Saturday night.

Recent visitors at the home of Mr. R. C. Bogart: Mrs. Wm. Dillabough, Mr. and Mrs. Allen Starke and Stewart Starke, Mrs. S. Hutt, Mr. Ingram Smith.

Miss Jean Fulton and Miss Elsie Hewitt were recent visitors at the home of Mrs. J. Foster and family.

Mr. Dougal McMillan and Mr. and Mrs. Donald McMillan visited Mr. and Mrs. John McMillan, Avonmore, recently.

A number from here attended the regular meeting orf the Women's Association of Berwick United church at the home of Mrs. Cimeon Ouderkirk, Ashburn, on Tuesday.

Mr. Gordon C. Bogart, Mr. and Mrs. Bernard Shaver and family, and Mr. and Mrs. Fay M. Droppo spent the week end at their parental home.

Mr. James Rutley spent Sunday with his parents, Mr. and Mrs. Eli Swerdfeger.

The many friends of Mrs. Wm. Galvin are sorry to hear of her illness and all hope for a speedy recovery.

Why the Demand for Pensions for the Old

Legislation providing for the payment of pensions by the state to persons who have passed the age of sixty-five years and who are without sufficient means to support themselves has been put into operation in Ontario and four other provinces of Canada. Such legislation has not been enacted in the United States and the advisability of enacting such a law or laws is under discussion. The National Civic Federation has declared that the majority of the dependent old people are now satisfactorily cared for and that state pensions are not needed. Mr. Walter Gifford, writing in The Atlantic Monthly, in February, contended that the task of caring for the aged poor should be left to trained social workers, administering charitable funds supplied by the free-will gifts of the well-to-do, and should not be undertaken by the state. Now Dr. Alice Hamilton, a member of the medical staff of Harvard University, in the latest issue of the same magazine, offers arguments in support of the contention that state pensions for the aged poor are preferable to support given through private charity.

Not the least interesting feature of Dr. Hamilton's discussion of conditions that have given rise to the demand for old age pensions. She agrees with the statement, in a British delegation's report upon its investigation in 1927 of industrial conditions in the United States, that "high hourly wages often do not result in high yearly income and, in the case of those outside the more skilled classes, irregular work may rapidly bring on serious poverty." Dr. Hamilton argues that many workers, who marry and bring up families, are not able to lay by any considerable sums of money while they are in the prime of their lives. She says, too, that operation of the new, complicated machinery now used in industries called, not for skill, experience and judgment, which are the gifts of middle age, but for quickness and adaptability, which are the gifts of youth. The rapid increase in use of labor-saving machinery, consequently, has lessened the demand in industry for workers who have passed forty years of age. Moreover, because of the nature of the scale of premium rates that insurance companies charge for group insurance of workers against sickness and accident and that employers pay, the increase in the use of that sort of insurance tends, in the opinion of Dr. Hamilton, to operate to the disadvantage of the middle-aged workers in the United States. Organization of industry for mass production by the adoption of labor-saving machinery lowers prices of manufactured goods. By so doing it is expected to enlarge the market for the services of the workers. In the process of organization, Dr. Hamilton suggests, new problems have arisen and, in an effort to solve those problems, the demand for state pensions for the aged has been made.

Mrs. Bindler—"Is there any difference, Thomas, do you know, between a fort and a fortress?"

Mr. Bindler.—"I should imagine a fortress, my dear, would be more difficult to silence."

—o—

The conference was over and ladies were returning from seeing the visitors off.

"Whom did you have, Mrs. Jones?" asked one hostess.

"Oh, quite a nice clergyman. Whom did you have?"

"I had two locust preachers," replied the other.

"You mean local preachers. Locusts are those things that come in swarms and eat everything up."

"That's right," said her friend. "I had two of them."

News and Information For the Busy Farmer

Furnished by the Ontario Department of Agriculture.

Edward Doddridge, Brinston, Ont., reports the sale of 6 head of pure bred Holstein females to Murphy Bros., of Waddington, N. Y.

Melvin S. Dawley, Winchester, Ont., recently put through a big sale of pure bred Holstein cattle to R. Austin Backus, Mexico, N.Y., the American breeder taking 16 head from Mr. Dawley's herd.

Beautifying the Farm Home.

Every unimproved or unembellished home in Canada can be made more attractive and more valuable by the planting of trees, shrubs, vines, and flowers and a well-kept lawn. The cost of the nursery stock is one of the most profitable investments a farmer can possibly make, because such improvements will actually increase the money value of the place many times the amount spent in a simple plan of home planting.

Good Hoppers Needed.

The annual waste of mash through the use of poor hoppers is enormous. While you are getting everything in readiness for the coming year, see that your hoppers are in good condition and that they are of the type that will not permit the wasting of mash. Supply at least two running feet of hopper space per ten hens. The table type of hopper with a wire top keeps the hens from walking in the mash, keeps it clean and wholesome and does not clog as most of the wall hoppers do.

Potato Seed Important.

The selection of seed potatoes should begin in the field the previous season, for virus diseases are detected only by the foliage and not by the tubers. Only good sized tubers should be selected for planting and this refers to seed weighing three ounces or over. Observations show that plants affected with virus diseases such as mosaic and leaf-roll produce mostly small and unmarketable tubers. All potatoes showing traces of disease and of frost should be discarded along with those which have been subjected to mechanical injury.

Hay and Pasture Crops.

The largest area of land used for growing pasture and corn occurred during the period 1914–23 or during the years of the World War and five years immediately following. The greatest acreage of small grains and roots in Ontario was grown in the 10-year period 1894–1903; and potatoes and hay in the period of 1924–28. Although hay and pasture crops have increased in area during the recent years, there has been very little improvement in the quality of most of the crops grown for these purposes. Much improvement is still possible in the hay and pasture crops through the medium of selection and hybridization; the choice of the most valuable varieties to use in hay and pasture mixtures; the use of artificial fertilizers to increase the yield and improve the quality, and better management of these crops.

World's Grain Srow.

J. A. Mooney, managing director of the World's Grain Show, during a recent visit to Ontario, stated that there is a surprising interest growing in Canada and in foreign countries in this event, which will be held in Regina from July 25th to August 6th, 1932. From enquiries he has estimated that between fifty and sixty countries will participate. The executive is receiving requests from national and international institutions to be permitted to hold their conventions in Western Canada during the show period.

Farm Drainage.

The drainage of land is receiving increased attention in Ontario. The high acre returns from orchards and other cultivated cash crops has stimulated this interest. Properly installed tile drains, while increasing production, lower the overhead cost per unit of commodity marketed. The greater ease with which the drained land can be worked further lowers production costs. The O. A. C. Department of Drainage stands ready to assist farmers by making drainage surveys, inspection of drainage work completed, the securing of machines where possible and any advice needed by the individual farmer in securing loans under the Tile Drainage Act. You can secure further particulars from your local agricultural representative or by writing to the Department of Drainage, O. A. C.

Fighting the Sow Thistle.

Prof. Howitt of the O. A. C. recommends the following practices to assist the farmer in combatting the sow thistle menace:

1. Vigorous mid-summer cultivation during the dry, hot weather immediately following haying or harvest.
2. The use of smother crops, such as sweet clover, rape, and buckwheat. These are very effective when properly handled.
3. Short crop rotations which give a chance to use hoed crops frequently.
4. Under-drainage of lands requiring it. (Poorly drained land is most favorable to the growth of sow thistle.)
5. On heavy clay soils, deep plowing immediately after haying, especially if the ground is very dry and hard. (This means plenty of power.)
6. Thorough cleaning out of the first small patches that appear on the farm to prevent the weed from becoming established.
7. A determination not to be beaten by weed or devil.

Protecting Swine.

Vermin cause considerable annoyance to swine and their presence in large quantities is destructive to profits. If the swine have a good wallow hole they can free themselves of the pest during the summer, but without the assistance of a wallow, some other aid must be given or else the lice will flourish. The application of crude oil to the pig's skin will make the lice let go. The crude oil may be applied through the use of a rubbing post equipped to deliver oil when the pigs rub against it or it may be applied with an oil can. A good time to do this is when the pigs are standing at the feed trough. Colony houses should be well sprayed with a two per cent solution of creolin in the autumn and again in the spring.

Herd Depreciates.

In a discussion of the costs of dairy farming an item is often overlooked that should be mentioned—the cow itself. Many a dairy farmer is not making as much money yearly as he thinks he is because of the depreciation of the value of his herd. The useful life of a cow is not very long. The troubles which occur in every herd, such as abortion, non-breeding, udder troubles, take a larger toll than is thought possible without records for guidance. A study of the situation shows that the average cow remains in production about five years. Allowing about ten months milking per year, this limits the average useful life of a cow to 50 months. During this period the cow has to pay all costs of feed, labor, housing, etc., besides a profit to the owner. Only good cows can do this.

How to Stop Early Swarming.

For beekeepers it is all important to have each colony at maximum strength in time for the main honey flow. To do this careful management of the colonies in the spring and early summer is required. All manipulations in the apiary at this time are for the purpose of producing bees to gather the harvest and to prevent them splitting forces through swarming. The important factors in building up the colonies are good queens, abundant food, sufficient room and protection. Early in the spring the queens start their egg-laying and as the spring advances and new nectar and pollen are brought in, the number of eggs laid each day increases until there are between two and three thousand produced every 24 hours. Twenty-one days after the first eggs are laid, new bees are being added to the colony. New bees cannot be produced unless there is, firstly sufficient room for the queen to reach her maximum egg production, and, secondly, enough food to feed the young bees. A colony may reach a feeling of strength before the main flow commences and decide upon swarming during the dandelion and fruit bloom flow. This is easily controlled by giving the queen sufficient room for egg-laying by enlarging the brood chamber and by giving enough super room so that surplus nectar may be stored in supers instead of the brood chambers.

All Present.

Judge—"Prisoner at the bar, do you hear what Mrs. Jones says—that you stole her pig,"

Sambo—"It is true, Yo' Honor."

Judge—"What did you do with it?"

Sambo—"Ah killed it."

Judge—" And then?"

Sambo—"Ah ate it."

Judge—"And doesn't your conscience trouble you? When you come to the last judgment and find yourself face to face with Mrs. Jones and her pig what are you going to say?"

Sambo—"Why, Jedge, does yo' think the pig will be there too?"

Judge—"Certainly."

Sambo—"Den Ah would say: 'Mrs. Jones, here am yo' pig.'"

Politician: "And are you taking this lying down?"

Voice from the audience: "No, the reporters are doing that."

DUTY OFF BRITISH-GROWN TEA

"SALADA"

REDUCES PRICES

15c A POUND

BROWN LABEL (Black and Green), NOW 60c lb.
JAPAN GREEN TEA, Price Unchanged. ALL OTHER LABELS, Reduced 5c lb.

TO THE PUBLIC: THESE PRICES ARE EFFECTIVE NOW
DO NOT PAY MORE

Due to the action of the Government in Abolishing the Duty on British-Grown Tea and to the Lower Costs of Certain Grades at the Tea Gardens, We are able to Give the Public the Benefit of these Substantial Savings.

Unfortunately, the market for fine teas has been advancing for some time, so that we are only able to reduce our higher grades by 5c lb.

TO THE RETAIL GROCER:

As always, we protect you against any loss on SALADA TEA by making good to you the difference in the invoice value of the stock on hand. Please reduce prices at once at our expense. Claim form is being mailed to you at once.

"SALADA" TEA COMPANY OF CANADA LIMITED

THE BUMBLEBEE WAR

The shanty on Halverson's homestead was two miles from my Uncle Daniel's ranch house, and between them lay what was called the "south eighty," a part of a tree claim that the old man had also taken.

Since Halverson was a veteran of the Civil War, he was entitled to have the period of his military service subtracted from the time the government required settlers to live on the land before they could "prove up." So in midsummer while the "breaking crop," as the first uncultivated planting of corn was called, was maturing, the old man shut his shack, turned his cattle in with ours and went to visit a daughter in an adjoining county.

He let my uncle cut the hay on the south eighty for the many favours our household had done him. The south eighty, coming under a different provision of the law, did not get the same protection that his homestead entry got, and Uncle Daniel had warned him to file his application without delay. Halverson intended to do so while visiting his daughter.

When haying time came, and we had cared for our own wild prairie grass, the men prepared to cut the south eighty. Between it and our land lay a long slough of mud and reedy marsh that now was almost dry. To avoid a long detour round it the men had begun to construct a "rock-and-willow" road across the narrowest part; but, finding that the black mud swallowed up the material as fast as they could put it in, they gave up building. It was less labor to make the long haul.

We had cut Halverson's south eighty the season before, and one of the lively incidents of the summer was the "big runaway," the result of an attack of bumblebees on the team that was drawing the mower.

Now, bumblebee hunting was one of the boyish sports on that Nebraska ranch that my cousins and I were expert at; and, knowing our skill, my uncle told us to rid the slough road of the bees; he did not want another "big runaway."

Hunting bumblebees was a matter of deep strategy with us. We had three methods. One was to attack them directly with wooden paddles, which required an exciting stand-up fight in which we had to make many charges and many retreats to windward to escape the vicious pursuers. A second method we called "flagging," and the third, "jugging." Flagging and jugging, although tamer, were really more humane, although the bees' nest was destroyed.

To flag a bumblebee garrison was a simple matter. We attached a red bandanna handkerchief to a long pole, prodded the fort until the angry defenders poured out and then gently waved the flag among them. The bees would dash at the handkerchief with reckless valour. While they were stinging the cloth with futile energy we would give the pole a dexterous flirt that would wind a dozen of them in the cloth, to be dragged off and immersed in a bucket of water. Even that method led to frequent stings or to lively defense with the paddles whenever a bee more wise than his fellows made a "bee line" for the boy who held the pole.

But jugging exposed us to no danger whatever, and consequently we held it in small regard. It consisted merely in filling a big jug half full of water, setting it near the nest and then stirring up the bees. They would come fuming and circling round the jug and, hearing the hollow breeze made in the receptacle, would hurl themselves furiously inside and into the water.

We could never account for their action; perhaps the bees mistook the roar for the buzzing their young make in the nests when disturbed; perhaps they suspected that an enemy lurked within. At any rate, jugging was very successful; on a windy day I have seen every member of a bumblebee colony lured into the jug.

When the doughty garrison was quite helpless, we would open the nest and devour the strong black honey in the tough gray cells. Later we would release the jugged bees, a mass of angry, wet, and temporarily helpless heroes. We made it a rule of honor never to kill a jugged bee.

While the maymakers were putting up the last of the wild hay crop, we three boys on Uncle Daniel's orders opened hostilities on the slough-road colony. When the bees built their nests in a gopher's burrow, we did not have to disturb them, for then they offered no great danger to the teams; but we had to destroy all the nests, built on the surface of the ground in the roots of the prairie grass. One morning we were busy at our task. My cousin, Hadley, had placed the jug and stirred the nest with a pitchfork, and then we had retired to await the result and were lying at full length in the sweet wild grass, lazily watching the little gray hawks that were circling above our heads. Presently Hadley went down the gully in which the slough lay to see what the enemy were doing. He returned almost at once, much excited.

"There's a lot of mover's stuff in the gully," he said. "Some one must have broken down and unloaded a wagon near the road; there's some household goods and a considerable amount of lumber piled on the ground."

Even as we got up, a "prairie schooner" came down the side of the slough. The bows were off, and the wagon was full of new pine lumber. We advanced, full of curiosity, for neighbours or passers-by were rare enough; we had not seen a town or a railway for a year or more and were glad to greet anyone from the outside world.

The bees had either settled into the jug or had returned to their nest. We met the wagon near the spot and hailed the driver familiarly. He was a wizened, ill-looking fellow, and his comrade, who was standing near the pile of goods, was no more prepossessing. They began to unload the wagon within a few yards of us. The driver, standing up in the wagon, eyed the jug in astonishment.

"What are you boys doing?" he asked.

"Jugging bees," replied Hadley; "we want to cut the grass in the gully, and the bumblebees are pretty thick in this strip."

"Jugging bees!" the driver echoed incredulously. "Who ever heard of such a fool thing! Anyway, you'd better run along, sonny; your folks won't cut this hay. It's ours."

"Yours?" said Hadley. "It's old Halverston's! He told us to cut it."

"Well, you won't cut it this season; we've taken this eighty," said the fellow roughly. "Now you skip."

The man advanced threateningly, and we retired in amazement to the jug.

"They're claim jumpers!" exclaimed Hadley. "They're going to rush a shanty up on the eighty and freeze the old man out. We'd better tell father."

The men went on with their unloading. "Jumpers" they undoubtedly were.

Obviously they were anxious to get their cabin up and make a show of residence before anyone interfered with them. We noticed that they had cunningly selected a spot where the new shanty could not be seen from our ranch, and we guessed that they had hauled their stuff their during the night.

Hadley was angry at their uncivil speech and at the injustice that they were doing the old soldier. Ben and I, being younger, were frightened when he went down near the men and began to argue with them; it seemed a foolish proceeding.

"You are jumping Halverston's claim!" shouted Hadley. "You wait till the ranchers find it out, and they'll run you out of the county!"

In his indignation Hadley shook the pitchfork at them, and the man who had abused us before suddenly sprang from the wagon with a short shotgun in a threatening manner.

"You get!" he cried. "Don't let me catch you on this land! Move on, all of you! There, take your jug!"

He kicked the bumblebee jug to one side and came at us. Hadley stood his ground; he was a big boy and just at the age when a lad dislikes to suffer indignity from a man.

"Run, you fellows!" he said to us. "Tell the men that old Halverston's claim is jumped!"

We started across the prairie, but the man shouted at us to stop. He raised the gun threateningly, and then I saw Hadley suddenly dig his fork into the sod and lift the bumblebees' nest on the tines. He flourished the mass an instant and then threw it swiftly at the claim jumper. The man dodged the missile, and it struck among the scantling on the wagon.

The two men were instantly fighting scores of the furious bees! The man with the gun fell back, beating his head and neck; the other climbed on the load to hold the horses. But the bumblebees flew at the animals, and they started to run, with the driver wildly yelling in pain and rage as he jerked at the lines.

Run!" gasped Hadley. "That fellow will shoot!"

Off we dashed for the haymakers a mile away. The man was engaged in a ludicrous contest with the bumblebees; but when he saw us running he seized the shotgun and fired both barrels. The fine shot whizzed and cut the grass, but merely frightened us into greater speed.

The rumbling of the wagon as it crossed the slough road caused us to turn. The horses had galloped out on the unfinished rock-and-willow work, and the next minute we saw the entire outfit plunge from the end of the road into the mud slough. The wagon turned over, and the driver fell far out into the slime. The spectacle of his discomforture and of the jumping antics as he tried to escape the bees were so funny that we stood laughing at the top of the gully Then suddenly the man on the bank of the slough began to wave his arms up and down and call to us excitedly.

"That fellow will drown,' said Ben; he's sinking in the mud!"

"That's so," said Hadley. "Ben, you run for the men, and we'll go down there if they won't fight us!"

The driver was submerged to his neck in the mud and badly frightened. His companion was trying to reach the timbers on the half-sunken wagon and throw them to him. The horses were on firmer footing and, except for their frantic plunging, were in no trouble. A few bees pursued us when we reached the bank.

The man who had fired at us was even more frightened than the driver.

"Run for somebody!' 'he cried. "He'll drown in the mud."

"We have," said Hadley. "Here, help me out to the wagon, and I'll try to pass some boards to him."

Hadley finally got footing on the side of the sinking wagon box and began to throw the boards out. The sinking man pushed them down under his body and had to use a dozen of them before he was able to raise himself out of the black mud. Then the two claim jumpers abused each other vigorously for not watching the team. Hadley, still on the wagon and plastered with mud, stood looking at them. At that moment Uncle Daniel and three of the farm hands hurried up.

The claim jumpers were meek enough in the presence of that superior force. The ranchmen, preservcept Uncle Daniel's invitation to go work to get out the wagon and horses —a task that took two hours. I think there was some malice in the hasty manner in which they "snaked" out the bedraggled wagon; at any rate, they left most of the contents to sink in the mud. The claim jumpers made no plea for their property. The fellow who was dragged from the swamp was sick, or pretended to be; but neither he nor his companion would acwith us to the ranch for food and fresh clothing.

"All right," said my uncle; "you can move your stuff over on my land and camp for the night if you want to. Now get to work!" he said, pointing at the goods already unloaded. "I'll give you three hours to pack up and move off this eighty. Three hours and no longer! Remember, there's a committee in this county to look after fellows like you!"

The discomfited claim jumpers made no reply, and we left them. After dinner Hadley and I and Uncle Daniel rode over to the place. There were a few big bumblebees circling above the mud-tracked grass, and it seemed as if there were a note of victory in their deep buzzing. The jumpers had made a quick retreat.

Hadley and I missed Ben at the supper table. The men had sent the thirteen-year-old lad forty miles to warn Halverson of the affair, so that he could file his entry at the land office without delay. Little Ben rode that distance before sundown and returned the following day.

We cut the hay on Halverson's eighty the next week, but the mowing machines passed around the gully where the bumblebee colony lived. We decided that for once the black-and-yellow warriors had performed a public service worthy of recognition; and old Halverson, after this episode, would permit no further raids on their stronghold.

Old Country Villager (to tourist)—"This 'ouse, sir, is where Katharine of Aragon is said to 'ave been bitten by a mad dog."

Tourist—"Tudor, eh?"

Villager—"Yes, sir, chewed 'er somethink 'orrible."

Flowers Beneficial In Rooms of Sick

That flowers are beneficial rather than harmful in hospital and other sleeping rooms, is embodied in a statement issued by the Department of Agriculture, referring to the practice of removing flowers at night.

The belief that plants should be removed from sleeping rooms at night is entirely without foundation, says the director of scientific work in the Department of Agriculture. In many hospitals it is the regular practice to remove flowers and plants from the rooms at night, because it is thought that they are in some way injurious to the patients.

Instead of plants being harmful they are beneficial. During the day they give off oxygen and moisture and take up carbon dioxide. At night these processes slow down and small amounts of carbon dioxide are given off, but a whole greenhouse full of plants would not give off enough carbon dioxide to injuriously affect the composition of the air.

The only occasion for removing plants and flowers from sleeping rooms is in the case of poisonous plants and in cases of people who suffer from hay fever.

Accepts Lancaster Call

Heath Fowler, son of L. U. Fowler, for many years secretary of the I.O.F. High Court, of Prince Edward Island, and now of Calgary, has accepted a call from the Presbyterian congregation at Lancaster, Ont. He will have charge of the church made famous by Ralph Connor in his story "The Man from Glengarry."

FURNACES, RANGES AND HEATERS

If you have delayed your decision to instal a furnace or find it necessary to replace the old one, see us for a hurry-up job.

The Findlay Furnace
Is the choice in many Chesterville homes

Because of its great heating qualities on an economical consumption of coal.

As the Findlay Furnrces require less coal for satisfactory heat, they save a little money for you each year.

Mainly About People

Mrs. Ed. Sauve, who has been visiting her daughter, Mrs Olive Brooks, in Lake Forest, Ill., returned home this work.

Mr. Graham Weegar left this week for Kingston, to take a position with the Hydro Electric at Brockville which constitutes the practical work in his course at Queen's University.

Mr. J. G. Craig, formerly manager of the Bank of Nova Scotia here, but now of Carleton Place, recent underwent an operation for appendicitis in an Ottawa hospital.

Mr. and Mrs. Melvin Stanley, Mrs. S. O. Kendrick, Mrs. W. M. Marcellus and Mrs. L. M Colquhoun visited Cornwall General hospital last Sunday where Mr. A. G. Becker and his daughter, Mrs. Claude Casselman, are patients.

Miss M. K. Hunt, who has been teaching at Mimico during the past year, has accepted a position on the staff of Harbord Collegiate in Toronto for the coming year, while her sister, Miss E. L. Hunt, has been appointed to the staff of Whitby Ladies' College for the coming year.

Congratulations are in order to Miss Jean Houlehan, who has been successful in obtaining her B. A. degree in the honor course at Queen's University, and to William Brown son of Dr. W. A. and Mrs. Brown, of Kingston, who won a gold medal in mathematics at the recent examinations.

Cattle Importer Pays $1,500 Fine

Brockville.—On a charge of furnishing the customs department at Ogdensburg, N. Y., with false weights of some 23 head of cattle imported by him from Brockville district, George Burke, of North Lawrence, N.Y., was fined $1,500, customs officials have announced.

The duty on cattle imported into the United States is one and one half cents a pound for cattle weighing less than 1050 pounds, and two cents a pound on cattle heavier than that.

The cattle which Burke imported were weighed in at Morristown by Burke and all were said to be under the 1,050 pound weight.

Officers became suspicious as many of the herd looked much heavier and on a check up it was shown that Burke made false return of weights by weighing the lighter animals twice and not weighing the heavier cattle.

Born With Full Set of Teeth

The Pas, Man.—A few days ago the stork left an Indian infant in a private nursing home in The Pas with a full set of upper teeth, including the double molars. The youngster, just a few days old, is busy cutting a lower set, and not complaining about it, according to the nurses.

His mother, just 17 years old ,is the wife of one of the husky braves on the Cree Reserve near The Pas. Just before the arrival of this baby, a relative of his was born on the Reserve with six fingers on each hand.

Morewood

Mr. and Mrs. Gordon Casselman, of Kingston, are spending a few days with Mr. and Mrs. John McLeod.

Mr. Ralph Dillabough, of Metcalfe, spent the week end with his parents, Mr. and Mrs. Orrin Dillabough.

Mrs. Lyle Gibbons, of Brockville, is taking care of her sister, Mrs. Walter Carlyle, who is sick.

Mr. Garlough, of Williamsburg, is visiting with Mr. and Mrs. Jake Swerdfeger for a few days.

Mr. and Mrs. Nathaniel Merkley and Mrs. McCann, of Boucks Hill, visited Mr. and Mrs. Orrin Dillabough.

Miss Ellice Smith is teaching at Moulinette, the former teacher being on the sick list.

Mr. Ford Steinberg had the misfortune on Sunday morning of being badly kicked by a horse and is improving slowly.

Goldfield

Mr. and Mrs. John O'Donobue and family, of Crysler, and Mr. and Mrs. Dennis McMahon visited at the home of Mr. and Mrs. Jas. McMahon the first of the week.

Mr. and Mrs. Ross McMillan and family, of Avonmore, visited the former's parental home here the first of the week.

Mrs. Jas. Younge is spending a few days with her daughter, Mrs. Wm. Servage, Crysler.

Mrs. A. P. McLean and Mrs. D. C. McLeod attended a meeting of the Women's Institute in Newington recently.

Mr. and Mrs. C. F. Warner visited friends in Avonmore on Sunday.

Mrs. Wm. Buell, son Willie and daughter Doreen, of Gravel Hill, and Mr. H. Buel, of Maxville, were guests of Mr. and Mrs. Jas. MacArthur recently.

Mrs. C. Warner, Mrs. J. MacMillan and Miss Jean Morrison, R.N., visited at the home of Mr. and Mrs. C. F. Warner one day last week.

Melvins

Mr. and Mrs. John Lang, of Van-Camp, spent Sunday evening with Mr. and Mrs. Reuben Pruner.

We welcome Mr. and Mrs. Wm. Sheldrick and family to our settlement, having bought Mr. John Barrett's farm. Mr. Barrett has left for Ottawa.

Visitors at the home of Mr. Farren Beckstead on Sunday were: Mr. Charlie Stata and family, of Morrisburg; Mr. Norman McCormick and Miss Mary Beckstead, of Russell.

Mr. and Mrs. Charlie Flegg and family took dinner with Mr. and Mrs. Richard Scott.

Mr. and Mrs. Farren Beckstead and son, George, and Miss Mabel Stata spent Saturday in Ottawa.

Mr. John Scott, of Winchester, spent one day recently with his son, Richard.

A large crowd attended the party at Mr. Charlie Flegg's on Friday night when all enjoyed a good time.

Mr. Wm. O'Neil and mother, Mrs. Eliza O'Neil, and Mr. and Mrs. Bernard Masterson and children, of Chesterville, spent Sunday afternoon with the latter's mother, Mrs. Leon O'Neil.

Mr. Johnston Stewart, of Massena, spent a couple of days at the home of his mother, Mrs. Wm. Stewart.

Misses Lafleur and Cousineau, of St. Therese, spent Tuesday evening with Mr. and Mrs. Herson Gauthier.

Plant Good Seeds Properly

The amateur gardener who remembers these four words will avoid many of the pitfalls into which beginners are likely to fall.

There is no more prolific source of failure among amateurs than hasty, careless or improper sowing of seed. A dry seed may retain its vitality for years, but after germination has commenced a check of a day or two in the process may prove fatal. There is no time in the life of a plant when it is so susceptible of injury from too much or too little heat and moisture as at the period between the commencement of germination and the formation of the first true leaves.

Enthusiastic gardeners are choosing the proper seed from the store around the corner. But when they plant this seed they should be sure it has a constant and proper degree of moisture, a proper degree of heat, that it is covered with the proper thickness of earth and that the soil is such that the young stem can penetrate it and the young roots find food.

The soil should always be moist, never wet. To secure this, cover the seed as soon as it is planted with well-pulverized, fresly prepared earth, pressing it firmly over the seed. A small board may be placed upon the row and walked upon, or the back of the hoe used—but the directions should be followed in some way, if you wish to start your seedlings properly.

IN MEMORIAM

In loving memory of our dear daughter and sister, Eva, who departed this life May 7th, 1925, Mrs. H. McGillvary.

Teaven now holds our dearest treasure,
Earth the lovely casket keeps,
But the sunshine loves to linger
Where our darling Eva sleeps.
Father, Mother, Sisters, and Brothers.

IN MEMORIAM

In oving memory of my dear sister, Eva, who departed this life just five years ago today, May 7th, 1925.

Eva, you have gone and left me,
You have bid me good-bye,
You have reached the heavenly mansion,
Where all sorrow turns to joy.
Sister, Luella, Detroit, Mich.
