Read the RECORD.

Accident in Cornwall Canal.

The coal barge Nicaragua, of Ogdensburg, westbound ran into the upper gates at lock 18 of the Cornwall canal Saturday morning and twisted the gates in such a manner that new ones will have to be placed in position.

Cornwall Pastor Ill.

Rev. A. B. McLeod, pastor of St. John's church, Cornwall, is in the General hospital, Montreal, where he underwent an operation which will keep him out of his pulpit for a few weeks. A. D. MacKenzie late of Montreal, who will be ordained and inducted shortly at Moose Creek, will fill his pulpit.

Montreal Firm is to Build New Bank.

The contract for the erection of the new building on Pitts street, Cornwall, for the Bank of Montreal, has been let to Byers and Anglin, of Montreal. Messrs Peden and McLaren are the architects. The building is to be a massive structure, with an imposing front of solid granite. The upper floor will contain commodious quarters for the junior clerks. The new building will be on the site of the ill-fated Rossmore House, burned a year ago.

Annual District Meeting.

The annual meeting of Matilda District was held in Brinston on Wednesday of last week. Rev. W. Philip presiding. Rev. S. F. Newton, Elma, was appointed journal Secretary. The returns for the year showed the District to be in a prosperous condition. The Rev. Jno. Webster was appointed on the Stationing Committee. In the evening two excellent addresses were given, one by Rev. Mr. Stevens, Chesterville on "The Use of Books," the other on "The Leaguer and the Holy Spirit," by Rev. S. F. Newton.

Sudden Death at North Crosby.

Thursday evening between six and seven o'clock a sudden death took place in the township of North Crosby. The victim was Mrs Thos. Dier, who dropped dead. The other members of the family left the house to do the evening milking and on their return discovered the lifeless body lying on the floor. She leaves a grown-up family. Her maiden name was Thompson, and she was a most highly respected resident.

Presentation.

Mr. Earl Merkley, one of Smith's Falls popular young men who has resigned his position in Frost and Wood Co's office and will leave next week for Calgary, was last evening made the subject of two presentations. Mr. Merkley has been actively identified with the various organizations of St. Paul's church, and last evening the members of the Men's Bible Class presented him with a nicely worded address and a pair of gold bar cuff links. No sooner had Mr. Merkley recovered from the pleasing shock of the presentation and kind words when he was presented with a Gillett safety razor outfit, the gift of St. Paul's boy scouts with whom Mr. Merkley has been identified and was scout master. Mr. Merkley carries west with him the kindest and best wishes of a host of friends.—Smith's Falls News.

More Money in Fruit.

Farmers in this part of Ontario are waking up to the fact that there is more money in the growing of fruit than in the dairy business to which most of them have devoted nearly all their attention in recent years. D. A. McIntosh of Harrison set his neighborhood a good example last week by setting out 525 fruit trees, 500 of which are McIntosh Red, Mann, Monroe and Ben Davis apples, and 25 Montmorency large cherries. The trees have been planted in rich well-drained soil and in a few years Mr. McIntosh will have a wealth-producing orchard. The demonstrations of fruit culture carried on by representatives of the department of agriculture in this district is having good results in causing farmers to pay more attention to their orchards, which had been neglected.

G. M. WHITNEY,

Chesterville, Ont., Branch.

MANAGER.

Personal.

Mr. J. A. Cochrane of Ottawa, was in town yesterday.

Mr. I. Pelletier is spending a few days across the border.

Mr. Douglas Laflamme of Papi-neauville, Que., is in town.

Mrs. Algure, wife of Dr. Algure of Cornwall, died on Tuesday.

Mr. Murray Casselman of Montreal, spent the holiday in town.

Miss Ethel McVey of Marvel-ville, is the guest of Dr. and Mrs. McVey.

Mr. and Mrs. J. W. Gillisse and family of Ottawa, are at the Dominion House.

Mr. Harry Bogart of Ottawa, spent the holiday with Mr. and Mrs. Wm. Huxtable.

Miss Hazel Franklin and Mac Franklin spent the holiday with Mrs L. A. Zufelt.

Miss Helen Cameron of Winchester, was a guest of Miss Mabel Shirkey for a few days the past week.

Mr. Robt. Steven of Cannamore, was in town Monday. He has just returned after spending a couple of months in British Columbia.

Miss Ella Harrison left yesterday for Montreal, where she takes the steamer for the Old Country. She will spend some months there.

Mr. John Nottell and wife of Montreal, are spending a few days here, before leaving for Calgary, Alta., where he intends residing.

Mrs Jos. Alford was in Montreal Sunday attending the bedside of her youngest brother, Chas. B. Parker, of Winchester, who is ill in the Royal Victoria Hospital.—Iroquois News.

Destroyed by Lightning.

The barns and outbuildings belonging to Mr. Moses Johnston, who lives one mile east of Winchester, were struck by lightning and burned just before noon on Tuesday of this week. Mr. Johnston had just gone into the barn for shelter and was not feet from where it struck, but fortunately was not stunned enough to prevent him from saving some of his belongings. Besides the buildings he lost a bull, 9 pigs, 15 tons of hay and 500 bushels of oats.

Lawsuit Follows Fire at Beckwith.

As a result of last week's fire in Beckwith township near Smith's Falls, there will be several law suits to be tried out at the next sitting of County Court. Already actions for damages have been entered against W. J. Covell, who is said to have first set fire on his property to burn the brush, the plaintiffs being S. Coleman and A. C. Stewart, both of whom lost heavily by the fires.

Lightning Storm done some Damage at Brockville.

Brockville was visited by one of the worst thunder storms in its history Friday morning, but very little damage is reported. The homes of Albert Pennock and N. G. Somerville were struck. The chimney and gable end of Mr. Pennock's house was slightly damaged. In Mr. Somerville's home the fluid entered by electric light wires, but the only loss was the knocking down of some stovepipes.

Anniversary Services at Dunbar.

The anniversary services at Dunbar Presbyterian Church last Sunday, conducted by the Rev. Dr. Harkness of Cornwall, were very largely attended, the church being filled at both services.

On Monday evening a large number attended the concert and listened, with much enjoyment, to Mr. McGillivray's lecture and to solos by Mr. Sharpe of Ottawa. Both gentlemen will be gladly welcomed when they again visit Dunbar.

Miss Minnie Foster of Chesterville, very efficiently acted as accompanist for Mr. Sharpe.

The Model Schools.

Circulars will be issued in a few days giving the locations of the ten model schools which the Government intends to re-establish in order to cope with the scarcity of teachers in the province. The Government is not going back to the old model school system, but as there is such a scarcity of teachers it is the intention to restore ten of the schools.

DIED

TYGART—At Caledonia, N. Y. on May 10, 1911, Fannie Mattice, daughter of Mr. and Mrs Stephen Mattice, Finch, and wife of Fred Tygart, Caledonia, aged 44 years and three months.

A TURKEY TALE.

Whether turkey eggs sell at \$1,000 apiece some day depends on what turkey raisers do in the present.

Great aunts were once thick as peas in a pod. Today there's not one alive on the sod, and their eggs now sell at \$12,000 per dozen.

If you object to dealing in futures just keep a few turkey eggs for heirlooms. They may give your "poor relations" something to fight over some day.

The east today is a turkey graveyard, and the sad intelligence now comes that blackhead is knocking out the red-headed gobblers of the middle west, and if it just sweeps down to Texas and over the Rockies the name turkey on this continent will be Denis.

The standard recognizes six varieties—Bronze, Narragansett, Buff, Slate, Black, White Holland.

There are others, such as the Bourbon Reds and mixed varieties.

All resemble each other much in shape, musical ability and that dandy flavor and fitness to hit the spot.

Their main difference is in color and size. Bronze and Narragansett are most alike in color and size, the latter having more light markings.

Bronze cock and hen weigh thirty-six and twenty-five pounds respectively.

THE MAMMOTH BRONZE—OH, HOW PROUDLY; Narragansett, thirty and eighteen pounds. Buff, Black and Slate weigh alike, twenty-seven pounds for cock and eighteen for hen.

The White Holland was classed for a time at twenty-six for cock and sixteen for hen, but by breeding them with white sports from the Bronze their weight has much increased.

These are standard weights, the criterion for exhibition specimens.

They are not arbitrary, however, a Bronze cock that sold for \$500 at the northern Illinois poultry show weighing fifty-two pounds, while a ten months old Bronze tom at the Dallas (Tex.) show weighed forty and a half pounds.

The Narragansett is seen mostly in New England, the Buff and Bourbon Red in the south, the Black and Slate are scattered, and the latter is almost extinct.

The magnificent Mammoth Bronze and beautiful White Holland are the

THE WHITE HOLLAND—OH, HOW SASST!

CRIPPLE FROM RHEUMATISM

NOW IN PERFECT HEALTH THANKS TO "FRUIT-A-TIVES"

VANCOUVER, B.C., Feb. 1st, 1910. "I am well acquainted with a man, known to thousands in Vancouver, Victoria and New Westminster, who for nearly a year was practically a cripple from Rheumatism. He was so troubled with the disease that he found it difficult to even turn over in bed. His heart appeared so weak that he could hardly walk up stairs.

Last June, he received a sample of "Fruit-a-tives". He used them and dates his recovery from that time. To-day, there is no man in Vancouver enjoying better health.

He was building a house this fall and shingled a good part of the roof in a driving rain, without suffering any bad effects". JOHN B. LACY.

Mr. E. E. Mills, (assistant postmaster at Knowlton, Que.), also writes: "I honestly believe that 'Fruit-a-tives' is the greatest Rheumatism cure in the world". Try it yourself.

50c. a box, 6 for \$2.50, trial size, 25c. At dealers, or from Fruit-a-tives Limited, Ottawa.

most numerous and popular of the turkey family.

May their tribe increase!

The great auk is nix, the buffalo has flit, and whether turkeys in the future will be stuffed with onions and oysters to decorate tables to the delectation of lip smacking millions or be stuffed with sawdust to be rubbed at by spectators in museums is a question for turkey fanciers to settle for themselves and posterity.

KNOWS A GOOD THING, SURE!

I love to see the golden grain As in the wind it waves. It beats the billows of the main And waves of ocean caves.

But when fair Mary-brings the lunch And waves a kiss to me There is the wave that beats the bunch In earth, in sky, in sea.

I like to hear the reaper sing As it mows down the grain And always clap when harvesters Unite in glad refrain.

But, say, old man, that dinner bell That swings up in the tree— You bet it sings a bully song As it rings "Come!" to me.

Wheat looks so pretty in the green, Much nicer in the shock, And when it's thrashed and in the bin Who can its beauty mock?

But when it's in the sweet brown loaf And Mary cuts it round And you slap country butter on Where is its equal found?

And if you've got a plump drumstick And chicken gravy fat And dip your bread in good and deep— What on this earth beats that? C. M. BARNITZ.

KURIOS FROM KORRESPONDENTS

Q. I have a brood of chicks here that will not eat earthworms. I have never seen the like. I thought all chickens liked them and they were good for them. Have you ever seen a case like this?

A. We are not acquainted with the whole wiggler tribe, but there are often different varieties of earthworms in the same plot of ground, and some of these have a strong smell, and neither chicks nor fish will touch them. At a certain season of the year earthworms are very strong, and chicks pass them by.

Q. Does the big hen lay the big egg, and does the big egg give the big chick?

A. Big hens do not generally lay big eggs. Big eggs mostly give big chicks, but hatch poorly.

Q. What is the length of life of an egg germ, and how long should eggs be kept before setting?

A. The life of a germ depends on the vigor of its parentage, the manner of keeping the egg, and the older an unset egg is the nearer to death is the germ. Eggs have been set seven weeks after being laid and have hatched. This is exceptional. We do not set eggs over two weeks old.

Q. I have had very poor incubator hatches, so many chicks sticking in the shell. There are so many with twisted toes, club feet, crooked backs and very thick necks. None of my breeders are crippled, and I come to you for an explanation.

A. You run your incubator too hot, especially in the last ten days. Try 102 degrees first week, 103 degrees the second up to day of hatch and then let temperature go to 104 degrees, but no higher.

FEATHERS AND EGGSHELLS.

In Pennsylvania it is a misdemeanor, attended with \$200 fine, to have rotten eggs in one's possession. This law is popular with politicians as well as consumers, as it protects both.

China is the greatest duck producer in the world. Her public hatcheries incubate millions of ducks. They are herded like cattle by men in boats on the rivers.

It is strange how few realize that it

requires certain qualifications to make the poultry business a success. Many fail at it. Yes, and that's sign enough that it's no mud pie affair.

Criticising a newspaper is generally a dumbskull's caper. Such people often visit us, tell us how to raise poultry and often buy some of our most vigorous chicks and can't raise one. They think they're the whole show when they're all blow.

It's a wise plan before you send what you consider adulterated feed to the state department for analysis with a view of prosecuting the adulterators to find out what some of our obliging officials charge and then, second, investigate what the prosecution will cost you. Sherman said, "War is hell!" Guess he included legal battles as well.

At Windsor, Pa., a chick was hatched with two heads, three eyes and two bills. It used both bills in eating. It will not be popular, as poultrymen have already too many bills.

Three thousand dollars' worth of Gamecocks captured at a Pennsylvania cockfight were killed and distributed among poor families of Philadelphia. While the game fighters chewed the rag, many poor folks chewed old stag.

New Jersey has 4,000 poultry farms and \$10,000,000 in the business. If statistics aren't lies, for her size she takes the prize.

Five thousand farmers attended the lectures given on the "farmers' special" in a three day trip through eastern Pennsylvania on the Pennsylvania railroad. A lecture on poultry was given at every stop.

Have you ever noticed how people rush to buy from certain farmers in market? Those farmers are sold out on the jump because what they sell is A No. 1 done up in attractive style—no roushy, strong butter, no dirty haymow eggs, no slimy, skinny, pin-feather fowls on that market stand.

Bringing eggs in dusty oats to market may have passed muster in by-gone days, but it doesn't just conform to modern ways. Neat egg crates are cheap, sanitary and safe, and eggs graded as to size and color in them win and hold bon ton trade.

You seldom see leg weakness among hen raised chicks. The old hens keep them on the jump, and the exercise gives them strong leg muscles to support their fast growing bodies. Chicks without exercise have a quick demise.

C. M. Barnitz.

Treat Animals Gently.

It will mean a loss to the farmer to have the cow afraid of him. It is a loss every time she is frightened. To run a cow to pasture is like throwing money away. A cow in any way worried will not do her best. The cow that is made a pet of will make money for her owner. The milk of a frightened or abused cow is poisonous.

THE FARM DOCTOR.

Worms in Hogs.

For the round or stomach worms in hogs one of the best remedies is turpentine in teaspoonful doses mixed with a teaspoonful of raw linseed oil or gasoline in the same amount given with milk. Whichever is used, the dose should be given three days in succession and after ten days or two weeks repeated. For tapeworm give powdered areca nut in dose of two drams to one-half ounce, according to size, following with a cathartic, such as raw linseed oil, one-half pint, or epsom salts, one-quarter pound.

Grub in Sheep.

Some pine tar on sheep's noses will prevent grub in the head.

Udder Treatment.

For caked udder of cows nothing is better than massage with lard and turpentine, equal parts, thoroughly worked in.

Bloody Milk.

Rub the quarter affected with some of this liniment twice a day: Tincture of iodine, two ounces; spirits of camphor, two ounces; alcohol, six ounces; mix. Give a tablespoonful of powdered sulphate of iron in feed twice a day.

Foul Hoof of Cattle.

For foul hoofs of cows wash the foot out with warm water, make a ground flaxseed poultice of hot water, fill the claws of the foot full, wrap the foot up so no dirt can get into it, put the cow in a stall or tie her in a stall, and in three days the foot will be well if not too bad a case. If it is not make another application.

Care of Calving Cows.

Many cows clean in a few minutes after the calf is born; others go naturally a few hours. If they have not cleaned in twenty-four hours it is wise to take the membranes away by hand. It is not necessary to use injections of any sort if all things are normal.

Lump on Horse's Leg.

On the appearance of any lump about the legs of a horse it should be bathed diligently with water as hot as can be borne. What might develop into a spavin may sometimes in this way be checked at the start.

WHEN SHAW WAS SHORT.

His Days of Poverty When a Shilling
Looked Big to Him.

In Mrs. T. P. O'Connor's reminis-
cences, "I Myself," where she tells of
her early acquaintances, we get a
glimpse of George Bernard Shaw in
the days when he was struggling for
fame and fortune and when in his des-
titution a shilling looked big and car-
fare was seriously considered. In
September, 1888, we find him declin-
ing an invitation to accompany Mrs.
O'Connor to West Kensington. He
wrote:

"I walked home from my lecture at
Dalston last night to save a train fare
—think of that and blush! Probably I
shall walk home from the New Cut to-
night for the same reason. Last month
I earned £6 12s. The month's rent is
£5. I have another paper to prepare
for Oct. 5, equal in difficulty to the
Bath one and equally paid in the gra-
titude of posterity. I have two books
commissioned, payment by royalty af-
ter they are published—and you talk of
the Italian exhibition! Ha, ha! Do
you know what the Italian exhibition
costs? Our tickets, third class, includ-
ing admission, half a crown if they
would cost a penny. One program be-
tween us, a penny; the Blue Grotto,
three pence (for you—I should wait out-
side, as I have seen the imposture al-
ready); sixpenny seats at the Coliseum,
1 shilling; threepenny seats at the
Mandolinists, sixpence; shilling seats
at the Marionettes, 2 shillings; switch
back railway, one turn, sixpence; re-
freshments, say fourpence, as we could
be scrupulously economical; loss of
time reckoned at Star rates of pay-
ment, half a crown apiece; total, 12s.
2d. So that even if I borrowed 10
shillings from you to start with (which
an army reserve man tells me is the
cheapest plan of managing an affair of
this sort, I should still be 2s. 2d. out of
pocket. Two shillings and twopence to
gratify the whim of a giddy young
woman who proposes (monstrous con-
ceit to take my education in hand! My
education! You a baby, still look-
ing with wide open, delighted eyes at
the glitter of west European white-
wash, and advising maids, wives and
widows with the artless wisdom of an
incomparable and unique naïveté—edu-
cate me! Stupendous project! No, I
learn from everybody, and what I learn
I teach, but I am nobody's pupil, though
I should be glad indeed to meet my
master."

SEX AND LONGEVITY.

Woman Has the Better of Man in the
Term of Life.

It is a well known fact, proved over
and over again in vital statistics, that
the term of life of women is slightly
longer than that of men. Just why
this is so has never been explained sat-
isfactorily. One fact, however, is clear,
and that is that during early years fe-
males possess a greater tenacity of life
than do males.

The difference of the mortality rates
during the first few years of life is
striking. During the first year the
mortality among males is decidedly
greater than among females.

Although more boys are born than
girls, the proportions are reduced to al-
most even terms at the end of the first
year by the excessive male mortality.
Even during the first four years the
mortality among males exceeds that
among females, notwithstanding the
fact that there are practically no dis-
tinctions made in the management of
the two sexes. Both are subject to the
same conditions, are dressed virtually
the same and receive the same food.

At the age of about five years the
comparative death rate among girls be-
gins to increase. This has been at-
tributed to the fact that boys of this
age are more in the open air. The mor-
tality in both sexes diminishes
from this time until the twelfth year,
when it attains its lowest point. It
then steadily rises, being larger in each
successive year. Between the twelfth
and sixteenth years the death rate
among girls increases more rapidly
than among boys, but after the six-
teenth year for several years the rate
of increase is more rapid on the male
side.—St. Louis Post-Dispatch.

How Byron Fought Fat.

Poetry and a too pronounced plump-
ness do not harmonize well, and no
one was more widely awake to this
fact than Lord Byron. Many were the
means he adopted for ridding himself
of his unwelcome "adipose deposit."

In a letter to his solicitor he says:
"I wear seven waistcoats and a great-
coat, run and play cricket in this dress
till quite exhausted by excessive per-
piration, use the bath daily, eat only
a quarter of a pound of butcher's meat
in twenty-four hours. By these means
my ribs display skin of no great thick-
ness and my clothes have been taken
in nearly half a yard."

The Whole Thing.

"I suppose," said the absconding
cashier to the friend who had run
across him in parts unknown, "that
there was a good deal of talk about me
after I disappeared."

"I should think there was!" answer-
ed the friend. "Why, man, the weath-
er wasn't mentioned at all for two
weeks."

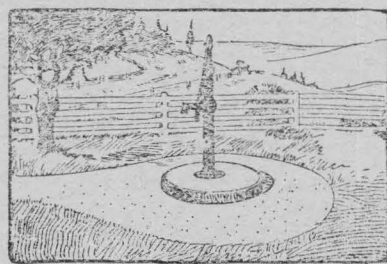

It is only a few years since con-
crete was generally accepted as a
reliable building material, yet
the difference which this con-
venient and economical form of
construction has made in the outlook
of the farmer in these few years, has
done much to revolutionize things on
the farm.

The growing scarcity of lumber and
its consequent rise in price, has
gradually caused that commodity to
assume the general aspect of a lux-
ury. So much lumber is used on the
farm for buildings and fences that its
extremely high price has made it al-
most prohibitive to the average farm-
er unless he has an extra large sum
of money to spend on outlay. Wire
fencing partially solved the problem,
but real relief did not come until con-
crete was proven by actual tests to be
not only practicable, but to possess
many advantages over wood as a
building material.

The uses to which
concrete can be put
are "practically
without limit, more
particularly on the
farm. Already the
list includes forms
of construction
ranging from the
large hip-roofed
barn down to a
nest-egg that de-
ceives the wisest
old layer in the
brood. These uses
have been ex-
tended largely, by
a series of exten-
sive experiments
conducted under
the auspices of the
Canada Cement Company, on farms
throughout the country. This large
concern, which has fathered the con-
crete building process in Canada, has
been a large factor in the spreading of
knowledge of concrete and its uses.
Recently it has distributed 65,000
copies of a book entitled "What the
Farmer Can Do With Concrete." This
work contains information which
makes it possible for any farmer to do
almost any kind of construction work
around a farm with concrete, and is
given free of charge. This generous
distribution of literature and the ef-
forts of this firm to show the farmer
how practical concrete really is, have
earned for them the highest of com-
mendations.

The most recent plan to introduce
concrete to the farmer is a contest
arranged by the Canada Cement Com-
pany. The lines along which the con-
test is planned are broad enough to

SHOWING CONCRETE WELL CURB AND PLATFORM.

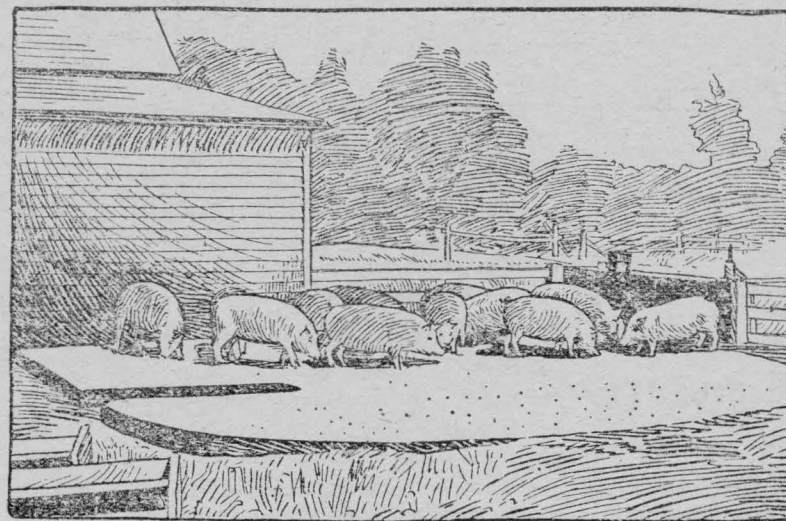

enable every farmer to compete with
equal chance of success with the most
experienced user of concrete. In each
Province there are four cash prizes of
equal value offered, each prize \$100.
The first is to be given to the farmer
in each Province who will use the
greatest number of barrels of "Can-
da" cement in a given time on
his farm; another prize will be
given to the farmer in each Province
who uses "Canada" Cement on his
farm in 1911 for the greatest number
of purposes; the third is to be given
to the farmer in each Province who
unfurnishes a photograph showing the
best of any particular kind of work

done on his farm during 1911 with
"Canada" Cement. The fourth will
be for the farmer in each Province
furnishing the most complete descrip-
tion of how any particular piece of
work, shown by any photograph sent
in, was done. This contest will be
open until November 15th, 1911.

Already much has been accom-
plished on the farm by the use of
concrete. Perhaps the greatest argu-
ment in its favor, and one which
has developed only since concrete has
actually been put into general use, is
its health-promoting properties.

If sickness occurs in a city to any
great extent, a searching investigation
usually follows, conducted by a med-
ical health officer, with the result that
it is traced back to its cause and this
cause removed.

The farmer must be his own med-

HOGS EATING FROM A CONCRETE FEEDING FLOOR.

ical health officer. He must look to
the causes to be found on his own
farm. A great deal is now being done
along these lines, and in many places,
particularly in the West, it has been
found that a number of the causes of
sickness can be avoided by the use of
concrete.

A common sense view of the situ-
ation shows that this simply-handled
material is peculiarly well adapted to
measures of sanitation and in prevent-
ing germs from spreading.

Possibly the place visited more of-
ten than any other by the farmer is
his well. If it is so situated that un-
healthy ground streams can leak
into the drinking water, there is every
possibility of this unhealthfulness be-
ing communicated to the farmer and
his family by the most direct route.
Concrete has done much to remedy
this. If a well is built of concrete—a
solid cylinder set into the ground—it
is impossible for such leakage to oc-
cur. In the same way a concrete
dairy provides but slim accommoda-
tion for disease germs. These two
simple precautions are a long stride in
the direction of good health, as water
and milk, the latter even more than
the former, are the commonest of the
germ-distributing agencies and both
are used frequently by the farmer and
his family.

Not only has the modern farmer
studied out a method of guarding
against sickness from sources which
might, in the case of water and milk,
be termed, internal. He has gone a
step further and has decided that the
barnyard must also be subjected to
some changes if doctors' pills and doc-
tors' bills are to be dodged.

The average barnyard—there are
many worse, some better—consists of
a stack of hay or straw, a manure pile,
a watering trough, and a spongy, oozy
mass of mud, dirt, and filth, in be-
tween and all around. Most farmers
will recognize this type as being fam-
iliar, even those whose farms are
models in other respects. Until re-
cently it has seemed almost impos-

sible to avoid this objectionable condi-
tion in a barnyard. Owing to the
stamping of cattle and the rooting and
scratching of the smaller stock, the
ground seems to be kept constantly
worked up into its oozy state. Into
this, and through it, the farmer is
compelled to make his way several
times a day while doing his chores.
Despite his best efforts, a certain
amount remains upon his shoes and
clothing. If he escapes the germs that
are sure to exist in the stagnant wal-
low, and does not catch a cold from
wetting his feet in it, he always runs
the risk of carrying some small par-
ticles into the house on his shoes,
where they dry into fine dust and are
stirred up by the next sweeping, filling
the atmosphere that has to be
breathed.

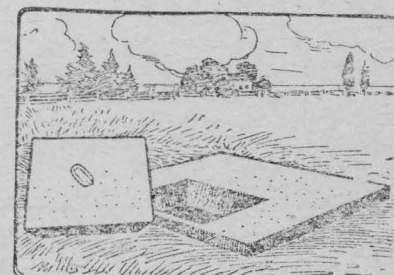

To avoid this altogether would be
impossible, but the
farmer has found a
way in which much
can be done to al-
leviate the barn-
yard troubles.

Instead of wad-
ding through mud,
the farmer and his
family walk dry-
shod to the barns
and amongst the
buildings on con-
crete walks and
drive-ways. Instead
of standing in a
muddy hole, while
he waters the stock,
he stands on a con-
crete platform on
which is set a con-
crete drinking pool.
This serves a double
purpose of not only
providing cleaner
water for the
horses and cattle, but also does not
harbor the germs of contagious dis-
eases which so often lurk in old
wooden drinking troughs.

His small stock and poultry, instead
of rooting in the mud and filth for
their food, take it from a concrete
feeding floor laid in a convenient spot
in the barnyard. This may be swept
down or washed off and prevents a
waste of feed.

The use of concrete as drainage ma-
terial and in forming gutters under
eaves makes it possible for farmers'
wives and daughters to visit the barns
without danger of contracting colds
and without many other unpleasant-
nesses.

With water pressure secured from a
concrete cistern built above ground,
and the use of concrete in the building
of closets, many of the objectionable

SOLID CONCRETE CISTERN.

features are removed and with proper
drainage, much can be done to make
such buildings perfectly sanitary.

Aside from its advantages as a
germ-proof material, concrete finds
favor with the farmer of to-day be-
cause he can use it himself as easily
as he could use wood. All that is re-
quired is a quantity of broken stone,
sand, and Portland cement. The
moulds are easily constructed and
can be made of odd pieces of lumber
handy. With the exception of the
cement, the materials can be found on
almost any farm and should cost little
or nothing.

PUBLIC NOTICE!

Notice is hereby given that the first sitting of the
COURT OF REVISION
For the year 1911, in connection with the Assessment Roll for the Municipality of the

TOWNSHIP OF WINCHESTER
Will be held in the
TOWN HALL, CHESTERVILLE
—ON—

Monday, June 5th, '11

At 11 o'clock a.m.

All persons interested will govern themselves accordingly.

GEO. QUART.
Township Clerk.
Winchester, May 24th, 1911.

COURT OF REVISION

Public notice is hereby given that the Municipal Council of the Corporation of the Village of Finch, will set in the Council Chambers, in the said

VILLAGE OF FINCH, on

Tuesday, the 6th day of June, A.D., 1911

At the hour of 7.30 p.m.

As a Court of Revision, to hear and determine complaints (if any) respecting the Assessment Roll of aforesaid village, for the year, A.D., 1911.

All persons interested are requested to attend.

Dated at Finch, this 17th day of May, A.D., 1911.

JAS. R. SIMPSON, Village Clerk

Servant Burned to Death.

Ottawa, May 18—The house of Hector Chauvin, solicitor of Hull, and residing on Rideau-street, Ottawa, was burned this afternoon. Katie O'Rourke, aged 35, a servant, was burned to death. Her clothes caught fire at the gas stove and she rushed upstairs to the bathroom and thus set fire to the residence. The inside of the house, with all the furniture, was burned; \$6000 damage was done. An inquest will be held on the victim.

ALLISON STOCK FARM STALLIONS.

We own Four Imported Clydesdale Stallions, Three of which will travel as follows, commencing May 1st, 1911:

WHITEKIRK HERO (10,721) will travel west through Bethune Bush, Winchester Springs, Toye's Hill, Brinston's Corners, Hulbert, Inkerman, and East through Cass Bridge, Nation Valley, arriving at Allison Stock Farm Friday Night, remaining till Monday Morning.

BARON MANOR (10,720) will travel North-East through Connaught, Cahore, Cannamare, Morewood, South to the Boyne Road up to Robert Bell's, Winchester, and cross over and down Maple Ridge to Allison Stock Farm Friday Night, remaining till Monday Morning.

MOORLAND PRINCE (11,909) will travel East and South, starting East to Finch, back to Berwick, up and crossing over through Goldfield, up to Grantley, west to Elma, north to Dunbar, and to Allison Stock Farm Saturday Noon, remaining till Monday Morning.

KEIR JASPER (11,908) will stand at Allison Stock Farm throughout season. We have ONE FAMOUS HACKNEY STALLION got by the World's Famed Mathias and out of Bog Myrtle, color Dark Brown. He is coming Three years old; he has the best feet and legs and best of all round action. He will stand at home throughout the season.

We have spared no money in securing from Scotland the very best bred animals obtainable, which is proven by their pedigrees. On application we will be pleased to furnish Pedigrees, Terms of Service, etc. The horses speak for themselves. Come and see them.

ALLISON STOCK FARM.

SHOOTS WIFE AND THEN KILLS HIMSELF.

**NATHANIEL SELF, BIGAMIST, TRIES TO
MURDER HIS WIFE AT LONDON.**

London, Ont. May 18—Nathaniel Self, convicted of bigamy at Windsor in August 1908, and released before his three-year's term was up, came to the home of his first wife, 242 King street, this morning, and fired a half-dozen revolver shots at her, wounding her twice. As a policeman was running up the street to arrest him, Self put two bullets into his own head.

Mrs. Self ran into the yard and ran for the east side, where a gate led into the yard at the rear of Ald. John Saunders' blacksmith shop, and through this, Mrs. Self ran.

Self followed, shooting the while, but none of the later shots took effect. Mrs. Self ran into the shop. Ald. Saunders was working in his shop at the time and had heard the first shots.

"Send for the police!" she cried, as Mr. Saunders ran toward her, "He tried to murder me," she added, gasping. She was taken by the Alderman to a chair in the rear of the shop, where she sank, holding her head between her hands and groaning. Blood streaming down the side of her face.

Mr. Saunders locked the door to keep Self out.

When Self thought he had finished the woman he turned the gun on himself and put a bullet in his brain. He never regained consciousness, and died in the hospital this afternoon. Self's wife will likely recover. Dr. Seaborn removed the bullet this afternoon and to-night she is resting easily. The Coroner will order an inquest into the death of Self.

A story to-night in connection with the shooting is that Self became infuriated when he called on his wife and found her with a young baby in her arms not knowing it was the child of his own married daughter, who resides in Hamilton, Mrs. Darville. Self had not lived with his wife for some years.

BERWICK.

Mrs. Dr. Stark has returned home after spending the with friends in Gananoque.

Mrs. McNaughton, Chesterville, is visiting her mother, Mrs. Wm. Galvin.

Rev. Duncan McRae returned to the west after spending some time with his parents here.

Miss Catharine McLeod spent some time with Mrs. A. McQueen before returning to Scotland.

Mr. O. E. Fetterly, Aultsville, called on Jas. Pollock Tuesday.

Mr. Hugh Campbell, Martintown, visited his daughter, Miss Annie Campbell last week.

Mr. Montgomery, Gravel Hill, returned home after spending some time with his son Lawrence.

A large number from here attended the sale of Mrs. Montgomery's, Roxborough.

Mrs. Alex McQueen visited friends in this vicinity last week.

J. M. Pollock of McGill University is spending the holidays at his home here.

Mrs. Alex McPherson, Avonmore, made a business trip here Wednesday.

Mr. Densey was in Ottawa Saturday.

Miss Mary Ann Rutley has recovered from a serious attack of appendicitis.

Mr. and Mrs. Dan Patterson and family left for Belleville after spending the winter with friends here.

Mr. and Mrs. L. Carr have gone to Edwards, where Mr. Carr has secured a factory.

Mr. Peter Ouderkitk has purchased a rubber tire buggy from Mr. Simeon Hutt.

Rev. James Pullar passes away at an advanced Age.

Rev. James Pullar, 104 Polson, for the last 54 years actively connected with the Presbyterian church, died this morning from pneumonia at his home at the age of 75 years. The deceased minister was ordained in Scotland when 21 years old and since that time had taken an active interest in church matters. For 35 years he had been connected with the Presbyterian church in Canada, his last charge being Marieapolis, Man. For the last eight years he had not been in active charge of any church, but had been substituting for other ministers, especially in and around Winnipeg. He leaves a wife who is 70 years old, one daughter, Mrs. J. W. Quinn, and one son Reay Pullar. Four sisters are living, three, Annie, Jane and Kate, in Hamilton, and Mrs. George Chapman in Toronto.

The funeral will be held from his home on Thursday afternoon at 2 o'clock and will be conducted by Rev. J. A. Boyman, a personal friend, who is connected with the immigration office in this city.

The deceased was well and favorably known by a great number in the city. He lived in Winnipeg for the last eight years and in the west for a much longer period. He was of a retiring nature but a very able minister. His father, 35 years ago, was a prominent congregational minister in Hamilton. The deceased belonged to the Masonic order although he had not of late years taken an active interest in the order. When in Scotland he was chaplain of the order with which he had associated himself.

Until two weeks ago he had been in splendid health but contracting pneumonia he was unable to throw off the disease, his age being against him.

He was the oldest Presbyterian minister in the city and had probably been associated with more mission field work and in the building up of more churches throughout the country, than any other man connected with the ministry since the time of Dr. Robertson. Many friends feel his loss keenly and the church itself has lost an able and strenuous worker.

The deceased was a pastor of Morewood Presbyterian congregation, for the years 1885-6, and the above notice appeared in the Winnipeg Free Press of March 15 last.

Crimean Veteran Dead at Brockville.

Brockville, May 18—Angus Shaw, one of the few survivors of the Crimean War, and a possessor of medals and clasps for the battles of Balaklava, Sebastopol, Inkerman and Alma, a member of the famous "Red Line" of the 93rd Highlanders, whose members are now almost extinct, died at the General Hospital last night. The sole survivor of his family is Dr. Shaw, of Landsdowne. Deceased was in his seventy-ninth year.

THIN HAIR ON TOP.

If Parisian Sage, the hair grower that W. G. Bolster guarantees, will not cause hair to grow where the hair is thinning out, nothing on this earth will.

And we may say to everybody, you can have your money back if Parisian Sage isn't the best hair grower, hair saver, hair beautifier and dandruff cure on the market to-day.

It stops itching scalp and falling hair and makes hair grow thick and abundantly, or money back. 50 cents for a large bottle. Parisian Sage makes the hair soft and brilliant and promotes growth.

Seven Million for Invention.

Toronto May 20—The Island Smelting and Refining company of Toronto which sprang into existence a few years ago through the researches of Dr. J. S. Island in the back room of his dental office, has been sold to Sir Donald Mann, of Mackenzie and Mann, for the sum of seven million dollars.

Dr. Island confirmed the report this morning at his office. Under the conditions of transfer of the secret process for which Dr. Island searched for years, together with all apparatus, and the services of the inventor, the holders of stock in the Island Smelting and Refining company will receive approximately seven millions for their holdings, which will represent an enormous profit on their original investment. Payment will be in stock, Sir Donald Mann and his associates retaining about three millions.

About two years ago the Mann interests offered six millions cash for the secret, which was refused. It is understood that in addition to the inventor's share holdings, a large portion of the balance is in the hands of Toronto men, although United States money is also represented. Mr. John Douglas, a well known Canadian mining man, is president.

FULTON BROS.

Calf Meal.

Bibbys Cream Equivalent

The best food for Calves on the market to-day. Young calves develop and grow surprisingly when fed this wonderful meal. It is no drug or "Fake" meal. Canadian Government report shows it to contain the highest percentage of nutritive value.

Try a 50 lb. Bag.

Can be fed with either hot or cold water.

Livingston's Oil Cake.

This food costs you nothing if you count the results it gives. Your cows will relish it, as it is easily digested. It will enrich the quality of the milk and increase the flow. Try a sack and be convinced. It will put money in your pocket.

PURE LINSEED MEAL.

Feed your Horses a little of this meal and they will lose all their old hair and become fine and sleek. Equally good for Calves and Cows.

JUST A REMINDER.

MAN FOUND DEAD.

Body Discovered in Detroit River with Bruises on Head and Pockets Turned Inside Out.

Windsor, Ont. May 19—The body of Eli Herbert aged 65, a prominent Tecumseh farmer, was found in the Detroit River at the foot of Bates Street, Detroit this evening. It is believed he was robbed and killed and then thrown into the river by his assailants about two months ago.

Herbert left his home on March 1 with \$125 in his possession and has not been heard of since. When the body was recovered there were bruises on the head, and the pockets, with the exception of one containing some small change and beads, were turned inside out.

When he disappeared his relatives notified the authorities here, and they in turn communicated with the Detroit police. A search was made, but the police were unable to find any trace of his having been here.

Identification of the body was established by papers on the person and also by two strings of beads, which he is said to have always carried. Little or nothing is known of his movements from the time he left home and reached Windsor in the afternoon of the day he left Tecumseh and spent the night with friends here. The following morning he started out to go to Sandwich Town, where he had some business to transact, and so far as is known now this is the last time he was seen alive. To have reached the spot in the river where the body was found tonight it must have been placed in the water considerably further up the shore than the Bates Street dock, probably up in the vicinity of the Belle Isle bridge or the Detroit dry-dock. The remains which were in a terrible condition, are now at the Wayne County Morgue awaiting the arrival of the dead man's friends.

Special Notice!

I wish to inform the general public that I have been appointed agent for the celebrated

D'Laval Cream Separator.

FINCH.

The regular monthly meeting of the Women's Institute of Finch, will be held at the home of Mrs. (Dr.) Marcellus on May 25, at 2.30 p. m. As this is the annual meeting of the Society, all members are requested to be present.

The Caledonia, N. Y. Era says: "As announced briefly in the Era of last week Mrs. Fred Tygart passed away at 10.30 a. m. on Wednesday, May 10, at her home on the Marlplant Farm, and one half miles east of Caledonia. Funeral services of a simple character were held from the home at 1 o'clock Friday afternoon, interment following in Mumford Rural cemetery. Rev. Clarence J. Williamson offered prayer and made brief remarks at the home and read the usual committal service at the grave. Relatives from Le Roy, Riga and elsewhere were present and the floral offerings were many and varied.

"Mrs. Fannie Tygart was the eldest of 11 children of Mr. and Mrs. Stephen Mattice of Osnaburck, Ont. and the first to be gathered home. She was born on Feb. 9, 1897. Some 20 years ago she came to Caledonia and in December, 1892, was united in marriage to Fred Tygart, since which time Caledonia or vicinity has been her home. Of a determined, courageous, yet kindly spirit it was her greatest delight to spend and be spent for her family. More than a year ago her health failed and last fall it became known that she could not long withstand the ravages of tuberculosis with which she had become afflicted. Mrs. Tygart was a devoted member of the United Presbyterian Church, a loving and devoted mother and a woman highly respected by those who knew her well.

"Her husband, two sons, Carl and Wilfrid, and one daughter, Zoe, her aged parents, five brothers and five sisters, besides many other more or less distant relatives, mourn her death. The brothers are: Stanley, Royal, Anson and Albert Mattice of Osnaburck, Ont.; Harry Mattice of Rochester; the sisters are: Miss Laura Mattice, Mrs. Jacob Brownell, Mrs. John Boal and Mrs. W. Grandaw, of Osnaburck, and Mrs. Frank Kettle, Manitoba."

Mr. E. S. Brown Found Dead beside the Road.

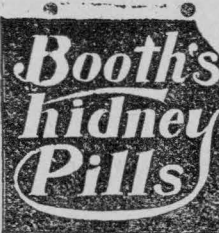

Guelph, May 18—Mr. E. S. Brown, a Peel township farmer, who lived about a mile and a half from Alma, was found dead on the roadside between Alma and Goldstone yesterday morning. Mr. Brown had driven to Gladstone on Tuesday night with the intention of having his horses shod. When the blacksmith had finished shoeing the team he left for home, but never arrived there. A search was made and he was found dead on the road. The horses have not yet been recovered. Whether his team ran away and threw him from the wagon or whether he was stricken with heart failure is not known. There were no marks on the body which would indicate that death was due to violence.

NO APPETITE?

The Kind You Have Always Bought

In Use For Over 30 Years

THE CENTAUR COMPANY, 77 MURRAY STREET, NEW YORK CITY.

Central Saskatchewan Wheat Lands.

In the "Heart of the World's Hard Wheat Belt"
The Last Mountain Valley.

The Wm. Pearson Co. Limited, Winnipeg, Canada, offer for sale 175,000 acres of selected open prairie and park wheat lands in the famous Last Mountain Valley. Abundant rainfall for all crops—the best of water at from 12 to 30 feet—splendid railway service with 7 railways in the district and 3 more being built—nearly 30 towns and shipping points. The top soil is a mellow chocolate loam, from 8 inches to 2 feet thick, extraordinarily rich in nitrogen, phosphoric acid and potash—the foods of cereals. Beneath this is a rich loamy marl 2 to 3 feet thick, then a strong yellow clay subsoil. The combination is ideal, as crops grown there have abundantly proved. In fact a single crop often pays for the farm on which it was grown.

Free Transportation If You Buy.

For prospective purchasers and settlers we are running monthly excursions by Private Car during this Spring and Summer. Good meals, berths and service make the journey pleasant, and the total expense of the return trip is only about \$50. On arrival the parties are driven over a large district and given a chance to thoroughly inspect the land.

If you like the country, select a piece of land that suits you, and accept our easy terms, we will refund the cost of your transportation.

Settlers are pouring into the Canadian West at the rate of 1,500 a day. Each man naturally takes the best he sees. The choice left for you is narrowing down every day. Don't put it off. Write or call. We will give you map and all the information you want about the Last Mountain Valley and the Monthly Excursions.

CHESTERVILLE - **ONTARIO**

UNWRITTEN LAWS

Man Dare Not Place Them Upon
the Statute Books.

THE SHIP CAPTAIN'S CODE.

It Demands That the Skipper Shall Go Down With His Vessel if She Be Lost, and It Is Held Sacred—The Iron Law of the Army and Navy.

There is a class of unwritten law which does not and cannot become written law, says Case and Comment, because it approaches so near the danger line that man dare not recognize it to the extent of publishing it and declaring it as a part of the positive law. It is the unwritten law of the sea that a captain must go down with his ship. Men dare not write it into the contract, and nations dare not incorporate it in their navy or marine regulations, yet the tyrants of the sea know the law and believe that to obey it betters their service, and there are few instances of its being disregarded.

It is the unwritten law of the army and navy that an officer shall not seek cover, or at least shall not show apprehension of danger to his person in time of battle and in the presence of enlisted men or common sailors. In the Franco-Prussian war nearly 4,000 officers of the German army were killed, and the great majority of them gave up their lives because they believed in this law of conduct.

In obedience to this law Farragut bound himself to the mast, Lee rode at the head of his charging column at the bloody angle, and Lawton walked coolly in front of the line and was shot in the presence of his men.

The law of the right of revolution has been much talked about and much written about. Every intelligent citizen believes that he has the right under certain conditions to oppose the established government of his own land and join in an effort to establish another in its place. Just prior to and during the war between the states there was much discussion in this country by learned men on either side of the right of revolution and the "higher power" and the "greater law."

The law justifying one person in the killing of another has required the serious consideration of every country. Every criminal code provides certain punishments for homicide, and many of them graduate the punishment with minute particularity, according to the circumstances of the killing, so that any one of six crimes may be involved in a single tragedy. Such codes also attempt to define what killing is justifiable and what is excusable and with their interpretation by the courts attempts to describe the only conditions under which one human being can kill another and not be guilty of crime.

The Hebrew code almost stands alone in its recognition of man's desire to kill and his right to have that desire and that climax of all satisfactions which come to him who under great provocation slays another. It is not at all strange that in this branch there should be an extended code of unwritten law, unwritten now and always to be unwritten for the reason that the recognition given by its embodiment in the statutes would be taken as a license by dishonest men and would result in harm rather than good.

It is an unwritten law among the officers of the army that if a subordinate officer kills a superior officer because that officer has publicly degraded him by striking him or by other action equally humiliating then the court martial will not convict. During the war between the states on a memorable occasion at Louisville, Ky., General Nelson said to General Davis:

"How many men have you?"
General Davis replied, "About"—giving an approximate number.
Nelson said: "You an army officer and say 'about'! Why don't you 'know' how many men you have?" And with that he struck Davis in the face with his glove. Davis shot and killed him, and the court martial acquitted Davis.

Rich Man, Poor Man.

You can easily tell a poor man from a rich one by examining his mail. The poor man's mail consists of requests for money that he owes, the rich man's for money that he doesn't owe.—Lippincott's.

The Reason.

Daughter—There ain't anybody come a for dinner today, ma? Landlady grimly—No; this is the day that they a promised positively to pay.—Puck

Don't set dirty eggs in machine or nest. A splendid hatch demands the best.

Don't advertise as if you have 10,000 fowls when you have not. Such a stunt makes your name rot.

Don't expect to raise a large percentage of chicks unless you put in your very best ticks.

Don't worry about chicks getting leg weakness if your brooder hasn't a hot floor. They are kept from damp and your feed is not too forcing.

AMAZING LINGUISTS.

A Wonderful Teacher of Spanish and a Master of Arabic.

An amazing incident happened in one of the higher schools in France a few years ago. A certain deputy of great influence went to the minister of public instruction and asked a place as schoolteacher for one of his constituents. The minister said the only place vacant was that of teacher of Spanish. The deputy told his friend this and remarked that it was a pity he did not know Spanish. To which the postulant replied:

"Spanish? Why, Spanish is my specialty! I shall be glad to take the professorship."

So he was appointed. He bought a Spanish grammar and began teaching it to his pupils, doing his best to keep a lesson ahead of the class. But it was pretty poor Spanish he was teaching, and he was very well aware of this.

Everything went along smoothly, and the end of the term approached when the class was to be examined by a severe and exacting professor from the university. The teacher trembled in his shoes as the dread day drew near. The day came and with it the examining professor. The scared teacher put his class through its paces, painfully conscious that Cervantes would never have recognized as Spanish this language the pupils were speaking. The grim professor listened in impassive silence. Then he asked a few questions and gave the members of the class a few sentences to translate into Spanish. As his pupils answered the teacher felt that he might as well hand in his resignation. But when all was over the professor congratulated him on his success and the class and the rapid progress it had made.

The professor did not know a word of Spanish!

Emanuel Arene used to tell the following story: A certain Marseillaise boasted so long of his knowledge of Arabic that at last he came to believe he knew it. One day an Arab was arraigned in a Marseilles police court on a charge of murder. He began to speak in his own defense, but as no one there could understand a word he said the judge demanded an interpreter. The boaster was sent for and told to interpret what the Arab said. He listened gravely to the man's defense. Then he turned to the court and said: "He confesses everything."

And so the Arab was found guilty.—New York World.

AMERICA VESPUCCI.

She Asked Congress For Citizenship and "a Corner of Land."

A decided sensation was created at Washington during the Van Buren administration by the appearance there of a handsome and well dressed Italian woman who called herself America Vespucci and claimed descent from the navigator who gave his name to the continent. Ex-President Adams and Daniel Webster became her especial friends, and she soon was a welcome guest in the best society. In a few weeks after her arrival she presented a petition to congress asking, first, to be admitted to the rights of citizenship and, secondly, to be given "a corner of land" out of the public domain of the country which bore the name of her ancestor. An adverse report, which soon was made, is one of the curiosities of congressional literature. It eulogized the petitioner as "a young, dignified and graceful lady with a mind of the highest intellectual culture and a heart beating with all our own enthusiasm in the cause of American and human liberty." The reasons why the prayer of the petitioner could not be granted were given, but she was commended to the generosity of the American people.

"The name of America, our country's name, should be honored, respected and cherished in the interesting exile from whose ancestor we derive the great and glorious title."

Later it was discovered that the woman was an impostor.—"Perley's Reminiscences."

Man and a Wife.

The primary impulse of all creatures is possession. It is this that causes a chicken to tear around the yard with a piece of meat in its mouth and all the other chickens after it. Of course it cannot possibly eat the meat. It hasn't time, but the instinct of possession makes it grab and keep it. The same is noticeable among beasts. They like to get a great piece of meat in their mouths and then growl. It is this instinct in man which provokes him to matrimony. He wants something to guard and growl over. So he seeks a hollow tree, a cave or a house and a wife.—Puck.

Squabs.

A squab grows enormously the first twelve hours and still more rapidly after the third day. Squabs are at first sparsely covered with long filaments of down, the root of each filament indicating the point from which each future feather is to start. The down for awhile still hangs on the tips of some of the feathers during their growth and is thought by some to be finally absorbed into the shaft of the growing feather.

D. ALLISON, N.G. W. E. GRUE, REC. SEC'Y

Synopsis of Canadian North-West Land Regulations.

ANY person who is the sole head of a family, or any male over 18 years old, may homestead a quarter-section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency, or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties.—Six months, residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter-section along-side his homestead. Price \$3.00 per acre. Duties.—Must reside six months in each of six years from date of homestead entry (including the time required to earn the homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot take a pre-emption may take a purchased homestead in certain districts. Price \$3.00 per acre. Duties.—Must reside six months in each of three years, cultivate fifty acres and erect a house worth \$300.

A PHEASANT TALE.

It's a wonder more don't raise pheasants. Big money in it, and pheasant tastes so pleasant. In England they're thick. On the Suffolk estate 101,000 eggs were gathered and 9,700 birds bagged in one season. It's like beehives of pheasants busted loose—like shootin' with a mowin' machine.

But Oregon didn't do so bad. Sixteen years after thirty-six were turned loose 100,000 were shot. But some estates didn't do so well. Pheasants were brought from Asia and Europe and served a brand of climate that didn't suit their system. We have forty-seven kinds, and those climates should have been matched first.

They were turned loose on a new fauna and flora without instructions as

ENGLISH COCK AND HEN PHEASANTS.

to what bugs, worms and greens were good to eat. Food was not supplied, and they died. Those accustomed to hills were placed on plains. Those whose habitat was plains with bushy coverts were turned loose in dark forests, on bleak peaks and sandy deserts. It was a pure and simple case of nature faking.

Pheasants need a variety of environment. They feed, mate and multiply best where are verdant hills, vine clad groves and mountains interspersed with gleaming streams, meadows and fields of grain. A climate and habitat selected to suit their original haunts, food and protection supplied when necessary, they should flourish a million miles away from home, and your Un-

THE PHEASANT'S NEST.

cle Samuel has the goods to raise this toothsome dainty for an epicurean world.

Pheasants are affected by the same conditions and diseases that affect chickens, and the feeding and housing of adult birds are nearly the same.

The varieties best adapted to this country are the English and the English and Chinese crossed.

The birds in our pictures were raised by a Riverside boy in his father's yard. They were fed like chicks and when grown were placed in a large screened run yard and housed and fed like chickens.

DON'TS.

Don't forget that system helps to spell success. The plant that's run any old way will be sold by the sheriff most any day.

Don't place too many hens with a single male or hatching eggs will surely fail.

THE IMPORTANCE OF SIZE IN HOGS.

In an address before the Kentucky farmers' institute Professor J. D. De-trich had the following to say in regard to the size of hogs:

I think I am quite safe in saying that early maturity and quality have been overemphasized during the past years during all the time that hogs have been bred. People want a hog that will mature early. I want a hog that will grow big. When the market demands a hog that weighs 225 to 275 pounds, why do we want a brood sow that weighs 900 pounds? It is just this—this size and thriftiness become their characteristics and are transmitted. A pig that is from an 800 pound sire and dam will grow larger than from a 400 pound sire and dam, and the larger the parent stock the sooner you will be able to get your pig to the market weight and the less feed it will require to do that. Therefore, if you can feed a pig that comes from a 400 pound sire and dam to weigh 300 in ten months' time, you ought to be able to feed a pig to weigh 300 pounds, from an 800 pound sire and dam, in seven or eight months' time and use less feed, because as a hog approaches maturity he grows slower, and it takes less for him to eat. The older a hog is the less it requires for him to eat.

HAMPSHIRE SOW, PRIZE WINNER IN ENGLAND.

Therefore the older a pig the less he has to make gains. You perceive the point at once—the larger, then, the sire and dam the earlier will be the time your pigs will reach a marketable age.

Then one point that people have been overlooking in hogs—they have been selecting for early maturity. Early maturity, of course, means small size. They have got a hog that they call of very high quality. Quality is very much a matter of condition. Where they have been selecting for quality, usually, they have been selecting for fattening tendency. A fattening hog is one that matures early and gets ripe at an early age. So that we have this condition of affairs—that many times the improved hog is not as good as one that is not so highly improved. So the hog that is being developed for breeding purposes should never be allowed to get into that degree of finish where we require market hogs to get, and the amount of weight and rations should not be reduced to so small a quantity.

Too Liquid.

"You used to rave over my liquid voice," she says accusingly. "I know I did," he mutters in defense, "but I did not imagine then that your words would come in such torrents."—St. Paul Dispatch.

Hard to Collect.

The world owes every man a living, but you have to be pretty smart to get a judgment for the debt.—Washington Star.

Butchers and London Streets.

The butcher's shop is not a pleasant spectacle today. But what must have been its condition in the middle ages? The names given to some of the by-ways of Newgate street afford some indication: Stinking lane, St. Nicholas' Shambles and Blowbladder street. "There was a Butchers' bridge on the Thames side near Baynard's castle," writes H. B. Wheatley, "to which the offal was brought from Newgate street through the streets and lanes of the city, by which 'grievous corruption and stink have been generated.' The evil, in fact, was so great that a royal order was issued in 1360 for the removal of Butchers' bridge."—London Chronicle.

Invincible Amazons.

"And just to think, John," said Mrs. Stubb proudly, "if the suffragettes ever get into power the leaders will have their pictures on the postage stamps."

"By crickey!" sighed Mr. Stubb, with a faraway look. "That's the only way we'll ever be able to lick 'em."—Chicago News.

WANTED.—A General Servant. Apply at this office.

Rev. Geo. Mason of Dunbar, occupied the pulpit at Cornwall at both services last Sunday, in the absence of Rev. Mr. McGillivray.

Anniversary services will be conducted in Trinity Methodist Church in this place on Sunday and Monday next, particulars of which is given in announcement in this issue.

Mr. Patrick Page (our own Pat) left on Saturday for Kingston Mills where he goes to spend the summer. He intends returning in the fall.

Such a hot wave is seldom experienced in this part of Canada as has prevailed for the past week and especially in the month of May.

Miss Miller, daughter of Mr. Wm. Miller, was killed on Sunday afternoon by an electrical storm which passed over Graton, about two miles from Eganville.

A Garden Party, under the auspices of St. John's Church, Cryler, will be held on the church grounds at Cryler, on Thursday evening next, June 1st.

The remains of the late Wm. E. Nicholas who died in Carleton Place on Sunday, were brought here by the afternoon train of Tuesday and conveyed to the residence of Mr. Marselis at Dunbar. Yesterday morning services were conducted, after which interment was made.

There was great excitement on the bowling green yesterday when doctors, lawyers, merchants, ministers and ———, were clamoring for supremacy, but just in the height of excitement the rain put a damper on the whole thing and they adjourned to fight it out later.

The Roman Catholic Church at St. Cecile de Masham, in the Gati neau district, about 25 miles from Ottawa, was struck by lightning during a storm on Monday evening and, with the residence of the parish priest and the convent adjoining, was completely destroyed.

Announcement is made of the marriage of Miss Annis M. Smirle, only daughter of Mr. and Mrs. James Smirle of Cannamore, Ont. to Mr. C. H. C. Moyer, assistant master of the Elgin Street School, Ottawa. The wedding takes place on Wednesday, June 28th.

The Late Chas. Weagant.

After an illness extending over a year there passed away at his home Riverside, on Sunday night, May 13th, Mr. Chas. Weagant, in his 67th year.

Deceased was a son of the late Jacob Weagant and was born on the farm where he died, on July 1, 1844. All his life he followed the occupation of farming. When a young man he married Miss Elizabeth Baker, daughter of the late James Baker of Hosiatic. To this union there were born one son and three daughters, the three daughters surviving being Mrs. Henry Schwerdfeger, Riverside; Mrs. F. A. Nash, Morrisburg, and Miss Annabel at home. In religion Mr. Weagant was an Anglican, and in politics a Conservative.

The funeral took place from the family residence at 1.30 p. m. to Trinity church, service being conducted by Rev. G. S. Anderson, interment taking place in the cemetery at Riverside—Leader.

Arthur Young of Hamilton was discovered walking in his sleep on the street railway tracks.

The barge Nicaragua bumped into the gates of the Cornwall canal, putting the canal out of business.

Local and District News.

Mrs. Rouleau, wife of Celestin Rouleau of Cornwall, died at that place on Sunday, aged 67 years.

Mr. Andrew Carnegie has agreed to pay half the price of a \$2,100 pipe organ for Winchester Methodist church.

Rev. Mr. Lett, of the Methodist Church, Smith's Falls has accepted a call to Vancouver, to take effect in June, 1911.

The first rural mail delivery to be established by the Government in Smith's Falls section of country is shortly to be started between Smith's Falls and Kilmarnock.

Whittaker, the Optician, will be at Chesterville on Tuesday, June 13th, 1911; Morewood on Wednesday, June 14, and Finch on Friday, June 16th.

Mr. R. S. S. Shepherd, of this year's graduating class in the University of Toronto, has been appointed assistant in the Lick observatory which is situated on Mount Hamilton in California.

The C. P. R. employe named Ricard, who broke into a house at Smith's Falls on Monday night under the delusion that he was being chased has been found to be mentally deranged. His relatives at Three Rivers will take him home.

The Dominion Government buildings throughout Canada will be decorated in honor of the coronation of King George V. A supplementary estimate calling for a vote of \$25,000 for this purpose was presented in the House.

Rev. C. E. S. Radcliffe, B. C. L. of the parish of Montague, preached his farewell sermon on Sunday. He will be inducted as rector of the parish of Kitley by the venerable Archdeacon of Kingston, Dr. Carey on Sunday, May 28th.

During the electric storm Friday morning the barns on the farm of John Harnett, near Kemptonville, were struck by lightning and totally destroyed. Five cows were burned to death and a quantity of hay and grain. Happily the members of the family had just finished milking and left the building.

Mr. Gordon Manhard, Holstein breeder of Brockville, was in Winchester locality the first of last week purchasing Holstein cattle and secured fourteen fine cows. The purchases were made from the following farmers; Captain Walker, Metcalfe, 6; Jas. McVey, Metcalfe, 1; J. R. Carscadden, Russell, 2; M. R. Black, Melvin, 4; Geo. E. Earl, Melvin, 1; Mr. J. J. Black accompanied Mr. Manhard on his purchasing tour.

Alexander Cameron, Alexandria has been awarded the contract for building the new counties house of refuge on the property ceded to the United Counties for that purpose by W. A. Craig, Cornwall. The contract price, \$44,300, covers the building, plumbing and heating. The buildings will be two storeys, with basement and attic, and will be built of cement blocks. The main building will be 132 by 40, and there will be a large wing at the rear. The building will be practically fireproof and will accommodate 100 inmates.

At a meeting of representatives of the manufacturing industries of Cornwall on Tuesday night of last week, a deputation was appointed to confer with the local officials of the Department of Railways and Canals with a view of having some steps taken to improve the supply of water in the Cornwall canal in order to maintain a more regular power service. The deputation met W. A. Stewart, superintendent of operation at the canal office, and discussed the situation, after which it was decided to ask Col. Smith, M. P. to arrange for an interview with the Minister of Railways and Canals at Ottawa.

Lawyer Enters Suit for \$10,000.

Bryson, Que. May 17—Mr. R. de Salaberry, the lawyer who conducted the defence of Annie Murphy last spring, when she was charged with complicity in the murder of the two young men at Shawville, has entered an action for \$10,000 against the Village at Shawville.

After the Murphy murder trial, the Shawville council passed a resolution which was published in the local newspapers and which Mr. de Salaberry claims reflected on his professional reputation, hence his action. The writ has been served on the municipal authorities at Shawville.

NEW ARRIVALS!
