Smith's Falls Men Visit Water Power.

A party of Smith's Falls men went to Arnprior on Wednesday of last week to look at a water power near that town owned by Mayor Brennan, of that town. The water power is known as Long Rapids, eight miles from Arnprior, and fourteen miles long. The party were most favorably impressed with the possibilities of the rapids as a power producer. The development would necessitate a dam 200 feet long, in the building of which, it is said, there would be no engineering difficulties. By means of this dam it is estimated that a head of 114 feet would be obtained and about 13,000 horse power developed

Ditch Causes Dispute Between Municipal Entnusiasts

Five stalwarts of the township of Mountain, Thomas, George and William Carlyle, and Samuel and Milford Reid, who strongly objected when Joseph Madden and Geo. Acres of the township of Osgoode, began to dig a culvert between the two townships, are now charged with breach of the peace. The effect of the culvert, it is claimed, would have been the draining of water from Osgoode into Mountain. Residents of Mountain strongly objected, and it is alleged that the five men emphasized the objection with force. They were first charged with assault, but in Metcalfe police court Saturday the charge was altered to breach of the peace.

Reeve Duncan McDermid and Councillor Stuart of Osgoode, both gave evidence in Metcalfe police court on Saturday afternoon, and the case was adjourned by Magistrate Smith to Tuesday afternoon at 3 o'clock in the Ottawa court house.

Girl Gets $150 Annuity from the Eddy Co.

Judge Chauvin, giving judgment in the Hull Superior Court yesterday morning in the case of Miss Alice Girouard against the E. B. Eddy Company, allowed the girl an annuity of $150 a year for life. The girl had lost one of her hands by having it caught in a machine at the Eddy plant while working there, and asked damages of $5,000. Under the Workmen's Compensation Act, however, the judge was unable to allow a lump sum, and granted the annuity. Major & Fortier acted for the plaintiff and T. P. Foran for the defendant.

UNION BANK OF CANADA

With Cash in the Bank You Can Buy to Advantage

You know how everything costs more when you have to buy on credit. Why not practice self-denial a while if necessary, open a Savings Account in the **Union Bank of Canada,** and, with the money in hand, buy at Cash prices? The discounts will help to swell your bank balance, and you will have made a good start towards financial independence.

CHEESE CHEQUES CASHED HERE.

Hamilton vs. McCaffrey's Sons Co.

Mr. and Mrs. Wesley Hamilton returned from Pittsburg, Pa., recently, where they were called to give evidence in an action in which Mr. Hamilton as plaintiff was claiming for the price of hay sold to Daniel McCaffrey's Sons Co., a prominent Pittsburg firm. The defendant counterclaimed for damages alleging that part of the hay purchased was not up to the contract. In the court below the defendants were successful but on appeal the jury after hearing the evidence of the plaintiff and Mrs. Hamilton, gave a verdict in the plaintiff's favor for the full amount claimed and disallowed the large counterclaim of the defendants. Mr. Hamilton is to be congratulated on his persistence in prosecuting his claim in a foreign court to a successful issue.

Two Brockville Men Charged with Arson.

Arthur and Joseph Belfoy, brothers, are under arrest at Brockville charged with arson. Wednesday night a barn owned by Maxime Lortie, at Schofields Hill, was burned, together with a horse and some hay. The Beltoys were arrested last week for fighting, and it is understood that they since blamed Lortie for sending for the police. They are on a week's remand.

Outbreak of Smallpox at St Onge

The smallpox outbreak at St. Onge, Russell county, is of such a serious nature that all milk and cream going into Ottawa from that place has been put under the ban by the health department.

Officials of the department went to that place, which is about twenty miles from Ottawa, on the Ottawa & New York railway, and found a number of scattered cases of the disease throughout the community.

Considerable quantities of cream have been brought into Ottawa from St. Onge, and the health department is keeping tab on all those who received the dairy products in an endeavor to prevent any spreading of the disease by that means of communication.

Passed 100 Cheques; is Given Six Months

A man known by the various names, Melville Smith, Baker Harris, Stephens, Brown, etc., admitted in the Police Court at Toronto on Saturday that he had since last July passed in Toronto about a hundred bogus cheques and was sentenced to six months in the Ontario Reformatory.

The man was arrested last week by Detectives Mullholland and Nursey, and when they told him that they had 50 charges against him he said that there must be close on to a hundred. All cheques were for small amounts, generally $5.90. He used the names of various stores and firms by the means of rubber stamps he had made and filled in whatever name he chose to use.

Smith passed all the cheques in small grocery stores, making small purchases and getting money in return. To make the cheques look good Smith stamped across the cheque, "Under Ten Dollars." The merchants fell for the fake, but as the amounts were not large, many did not make complaints.

Will be Contested.

Relatives of the late Rev. Father Brophy of Kingston who died recentiy leaving an estate valued at $177,000 are taking action to oppose the will. It is stated that Father Brophy made the greater part of the money through insurance. Years ago it is claimed, he insured his life on the endowment plan, and at the end of the specified time drew out $11,000. The insurance agent advised him to insure his (the agent's) life and he did so for $75,000. The former died in less than a year's time. Father Brophy securing the money It is said the will is to be contested on the grodnd that the testator was of unsound mind when he made it, the greater part of the estate being devised the Roman Catholic clergy.

Personal

Miss Irene R. Pelletier left last week with her sister, Mrs Wm. Rule, for Faust, N.Y., where she will spend a couple of months.

Mrs. Eli Lefebvre and her youngest daughter Rose, spent Sunday with her eldest daughter Julia, in the Kingston convent.

The Misses Ina and Ella McMillan of Miles City, Mont., spent a few days with their cousin, Miss Hazel Smith, at the Boyne.

Mrs. Wm. Rule and baby Jack, left for their home in Faust, N.Y., after spending a couple of weeks with her parents, Mr. and Mrs. I. Pelletier.

Mr. and Mrs. W. G. Reaburn are spending two weeks' holiday in Montreal and in Parry Sound, where they are visiting their son, George, who is a clerk in a bank in that town.

Sudden Death of Prescott Lady.

The numerous Prescott friends of Mrs. James Cotter were greatly shocked to learn of her sudden death in British Columbia. The deceased had left Prescott only a few weeks ago to remain with friends on the coast, and her sudden passing away came as a great surprise.

Ross—Agnew.

Mrs. Blanche Agnew, daughter of Mr. and Mrs. William Gardiner of Winchester, was married to Mr. J. H. Ross, editor of the Smith's News, at Winchester on Wednesday of last week. The ceremony was performed by Rev. Mr. McLeod of St. Paul's Presbyterian church. Mr. and Mrs. Ross left on a trip to New York, and on their return they will reside at Smith's Falls.

The Late Thos. Moran, Jr.

On Thursday, Oct. 30th, 1913, Mr. and Mrs. James Moran of this town, received the sad intelligence of the death of their son Thomas, of Springfield, Mass., aged 42 years.

Deceased had spent almost his entire life in the U. S., having left this vicinity when a young man. He had many warm friends, who will regret to hear of his demise.

In 1904, accompanied by his wife, he visited his parents and relatives here.

A few weeks ago, he contracted an illness, which ended in brain fever, under which he succumbed.

Much sympathy is extended his aged parents, wife, sisters and brothers.

Interment took place in the R. C. cemetery, Springfield, Mass., on Nov. 1st.

Barn Buildings Burned.

On Saturday evening last the barn buildings on the farm of Mr. F. McCloskey, situated about three miles east of this place. was consumed by fire, of an unknown origin, together with about fifty tons of hay, a quantity of straw and some farm implements. There was a small insurance on the buildings, but unfortunately the policy on the feed elapsed during last month, therefore Mr. McCloskey's loss is heavy.

Belleville Cheese Board passed a strong resolution declaring the need of cold storage plants on steamers and at terminals.

Died in His Buggy at Cemetery Gate

A. E. Cameron, a well-known flour and feed merchant, accompanied by Alonzo Charlton, drove to the Brockville cemetery Sunday afternoon. Arriving at the gate Charlton got out to open it, and when he returned to the rig he found Mr. Cameron unconscious, and he died in the buggy before assistance could be summoned. Deceased was a prosperous man of middle age and leaves a wife and family.

Golden Wedding Anniversary.

We beg to extend our congratulations to Mr. and Mrs. Wm. Keys of Chesterville, who celebrated their 50th wedding anniversary last Tuesday. They were married at Mountain Nov. 3rd, 1863. The immediate relatives and a few friends assembled at their home bearing beautiful gifts and good wishes and taking the recipients completely by surprise. At 12.30 a bounteous dinner was served at the home of Mr. and Mrs. Frean Hummel, son-in-law and daughter. After dinner, on behalf of the relatives, Rev. W. H. Stevens spoke of their affectionate regard, and as an evidence of this presented Mrs. Keys with a ladies gold watch and Mr. Keys with a gentleman's gold watch, taking occasion to speak of the esteem in which they were held by the citizens generally and wishing the recipients many years of increasing happiness.

Mr. Keys speaking for himself and wife warmly thanked the donors and heartily reciprocated their good wishes.

Bazaar, Dec. 12th.

The Merrickville correspondent of the Kemptville Advance writes: "Mrs. Adams of Kemptville, gave some choice musical renderings in most cultured and impressive voice, for which she was raptuously encored; as was also Miss E. Eastman, of Kemptville, for some well selected, and artistically rendered elocutionary numbers. Mrs. Adams and Miss Eastman also favored the audience with a much appreciated duet."

The Chesterville Presbyterian Ladies' Aid have secured the services of these two talented ladies for the 12th Dec., the day of their bazaar and concert.

Hydro Gets Big contract.

The contract to sell the T. Eaton Company 2,500 horse-power per annum represents one of the biggest individual contracts yet signed by the Toronto Hydro-electric Commission.

The cost to the company will be in the neighborhood of $30,000 per annum, and the Commission states that it will have to increase its supply from the Ontario Power Commission in order to cope with the increased demand.

Born.

SHAVER—Near Morewood, on Nov. 5th, 1913, to Mr. and Mrs. Milton Shaver, a daughter.

Peat Manufacture an Assured Success.

Ottawa, Oct. 31—The experimental work which was carried on under the direction of Dr. Eugene Haanel, head of the Mines Department, in regard to the proper manufacture of peat, has proven so successful that there are now two private concerns producing peat, one at Alfred, Ont., and the other at Farnham, Que., and the output does not begin to meet the demand. While coal is becoming dearer all the time, peat should become cheaper. There is hope of reduced freight charges, and also of devising cheaper methods of manufacture. Inquiry has been made of hundreds of people who have used the peat manufactured according to the method recommended by the Department of Mines, and the great majority report that it is satisfactory for grates and also good for cooking. Some find it not quite so satisfactory for furnaces, but the trouble seems to be to educate the users of peat to shut off the draught. It will burn up too quickly unless the draught is checked.

It is said that nearly a million dollars was thrown away on experiments in the manufacture of peat in this country by people who did not understand how to dry the fuel properly. When the Government Commission was sent to various European peat-using countries it was found that the most successul way to treat the peat was to let the sun and wind take the moisture.

After the Government had shown the practicability of producing a good quality peat at a saleable price it was left to private enterprise to continue the work. The peat is sold in Ottawa at $5 a ton, or $3 a ton on the cars at Alfred. The difference of $2 is made up of a charge of 90 cents a ton for freight and the cost of distribution and the dealer's profit. As has been said, the demand cannot be met at the present time. So far as the plant at Alfred is concerned, the output will be considerably increased next season by making an earlier start and getting the machinery "tuned up" sooner, and also probably by using electric light at night and working twenty-four hours a day for the hundred days which is about the limit of time during which the manufacture can be well carried on in a cool climate like this.

There is another splendid possibility in connection with the peat industry that has been worked out successfully in Germany and Sweden, and which will no doubt be realized here in time. It is the production of gas, and, indirectly, electrical energy from the peat. At the fuel-testing plant in this city the Mines Department has a 60 horse-power gas producer engine which is operated from the gas produced from the peat. Engines up to 250 horse-power can be run successfully in the same way. Dr. Haanel states that there is no reason why sections of the peat-producing parts of Canada, where water power is not available, could not obtain power by the simple establishment of a series of these gas-producer engines. Electrical energy could be developed for light and power purposes for factories in town or mechanical operations on the farms. In Germany, he states, power and light produced in this way are carried as far as forty miles. The farmers of any district, he added, could, with a joint capital of about $7,000, erect a plant for the manufacture of peat to provide them with fuel, and a further outlay would enable them to provide power as well. Power thus developed locally would, as compared with water power, save all the overhead charges and also the loss in transmission.

Truax, Liberal Elected in Bruce

Walkertown, Ont., Oct 30—Reuben E. Truax, the Liberal candidate, was elected in the South Bruce by-election today by a majority of 124, defeating Wellington D. Cargill. The seat was rendered vacant by the elevation of Hon. James Donnelly to the Senate and the campaign was fought almost entirely on the naval question. Mr. Donnelly's majority at the last general election was 103. No figures of the total vote were obtainable tonight, as only the majorities at the different polling sub-divisions were brought into Walkerton. It is understood, however, that the vote was even heavier than in the general election.

Both candidates were residents of the riding. Mr. Truax has lived in the district 57 years, and his personal popularity made him a strong candidate. Besides supporting the Liberal position on the Navy, in practically every speech, he declared his adherence to the doctrine of reciprocity with the United States in natural products.

Walkerton, Mr. Truax's home town, gave him a majority of ninety. At the last general election his majority there was fifty-six.

Mr. Morris, conservative, elected in Chateauguay, said he replied favorably to the questions of the Dominion Alliance.

"I ATTRIBUTE MY CURE SOLELY

And Entirely To Taking "Fruit-a-tives"

HULL, QUE., DEC. 24th. 1909

"For the past twelve years, I had painful attacks of Dyspepsia. I could not digest my food and everything caused the most agonizing pain in my stomach. I also had a fearful attack of Constipation and at times, I had no movement of the bowels for two weeks.

Three doctors attended me for two years and gave me all kinds of medicine but did me no good. My weight came to only 80 pounds and everyone thought I was going to die. Finally, I had the good fortune to try "Fruit-a-tives" and as soon as I began to take them, I felt better. I persisted in the treatment and to my great joy, I steadily improved.

Now I feel very well, weigh 115 pounds, and this is more than I ever weighed even before my illness.

I attribute my cure solely and entirely to "Fruit-a-tives" and can never praise them too much for saving my life. To all who suffer from Dyspepsia and Constipation, I recommend "Fruit-a-tives" as a miraculous remedy"

MRS. ANDREW STAFFORD.

50c a box, 6 for $2.50, trial size 25c. At dealers or from Fruit-a-tives Limited, Ottawa.

Camped All Night Near Land Office

Calgary. Nov. 1--One year ago belated travellers along First street east, were interested in the spectacle of a young lady camping upon the land office steps. It was learned that she was there to file upon oil lands. Some thought it a feminine prank, and others that it was a very strenuous proceeding for a young lady. The young lady took it as a serious matter, and did not take a bit kindly to the newspaper accounts of the episode.

How well her mission was well directed is shown that today she is the possessor of one-fourth interest in 18,000 acres of the best oil land in Alberta, and one of the directors in a big company that will soon begin developtng the land.

The young lady is Miss Jean N. Earl, who for some time has been associated as secretary to G. E. Buck, of the B. and R. Co., Ltd.

Miss Earl, while justly having earned the titled of "Oil Queen" of Alberta, takes her good fortune modestly. She is a business woman, whose counsels have been valuable to the big concern with which she has been so long associated.

When the Coalinga Oil syndicate was organized recently Miss Earl was immediately placed upon the directorate, and is now engaged in assisting in the direction of the work that will begin within the next few weeks, when drilling will begin on section 34, township 19, range 3, west of the fifth meridian.

Miss Earl now smiles at the jokes and raillery of her friends who watched her battle the inclement weather a year ago, and while she declines to be designated as the "Oil Queen," feels a natural pride in responding to her good judgment that has brought her an immense fortune.

HELPS THE SICK TO GET WELL

A Good Friend To GIN PILLS

The letter below is only one of many that show how GIN PILLS are regarded by those who have used them.

"I think it my duty to tell you that GIN PILLS are a sure cure for Kidney Trouble and La Grippe. I suffered so much with my kidneys and La Grippe until I used GIN PILLS, and now would not be without them in the house. I shall always recommend GIN PILLS to anyone I know is suffering with their Kidneys."

MRS. M. BUTLER, VANCOUVER, B.C.

GIN PILLS are sold on a positive guarantee of money refunded if they fail to give relief. 50c. a box—6 for $2.50. Sample free if you write National Drug and Chemical Co. of Canada, Limited, Toronto.

MANGA-TONE BLOOD & NERVE TABLETS are the ideal tonic for pale, thin people. 50c. a box—6 for $2.50. 207

Awards to Canadians from Carnegie Fund.

Pittsburg, Pa., Oct. 31—The Carnegie Hero Fund made public its quarterly awards today. In all an aggregate of $71,600 is given in cash for deeds of heroism, the largest aggregate amount in the history of the fund.

Among the awards are the following to Canadians:

Bert T. Yates, Cornwall, Ont.—Bronze medal and $2,000 as needed for educational purposes. Yates aged seventeen years, a student, saved Percival A. Newman, aged nine, a schoolboy, and J. Frederick Shaver, aged fifteen, a student, from drowning at Mille Roches, Ont., on Aug. 29th, 1909. Yates, Newman, Shaver and two other boys were crossing a section of the St. Lawrenee River, near the foot of Mille Roches rapids, when an oar-lock broke and the boat upset, 135 feet from the bank, where the water was 5½ feet deep. Yates and two of the boys grabbed the boat, which drifted upside down, but Newman, who could not swim, called for help, and Yates swam fourteen feet to him. He placed Newman's hands on his shoulder and swam a few feet with him when he saw Shaver, who could not swim beneath the surface. He pulled Shaver to the surface, put his arm around his body, and swam about seven feet farther with the boys to a punt which was coming to their aid.

Lynn E. Wilcox, Pennant, Sask.—Bronze medal and $1,000, as needed. Wilcox, aged twenty-three, a farmer, attempted to save Leroy A. Keller, aged twenty-two, a farmer, from suffocation, at Pennant, December 1st, 1911. Keller was standing on a bolt stuck through the end of a cable being raised from the bottom of a well seventy feet deep, in which dynamite had recently been exploded, when he was overcome by smoke and fumes and fell to the bottom. Wilcox had himself lowered, standing on the bolt. When he reached the bottom of the well he attempted to secure Keller with a rope. He found himself becoming weak and there was a roaring in his ears. He called for aid and was raised, leaving Keller at the bottom. Wilcox was semi-conscious when he was brought up, but he was revived. Another man, J. W. Augustine, attempted to save Keller, but both Augustine and Keller were suffocated.

In the same case the father of John W. Augustine of Pennant, Sask., was awarded a silver medal because of the death of his son trying to save Lefroy A. Keller after Wilcox had failed to get him to the top of the well.

R. Frederick Dayton, Battle River, Alta., silver medal to widow and pension of $25 a month.

FALLING HAIR

Many People Have A Simple Way of Stopping it—They Use Parisian Sage

It was Dr. Sangerbond of Paris who first discovered that dandruff and falling hair were caused by a microbe.

And now that Parisian Sage, the remedy that kills the dandruff germ, is sold in every town in Canada, the people of this country have awakened to the fact that dandruff is unnecessary; that falling hair and itching scalp can be quickly stopped, and that the people who use Parisian Sage will never grow bald.

To every reader of the Record who wishes to eradicate offensive dandruff, stop falling hair and have an immaculate clean scalp, free from itchiness, W. G. Bolster says he will sell Parisian Sage in a large fifty cent bottle with a guarantee to refund the money if not satisfied. It is an ideal daintily perfumed hair dressing, free from grease and stickiness that will put life and beauty into dull faded hair and cause it to grow lustrous and lnxuriant.

Single Tax at Winnipeg.

Winnipeg, Oct. 31—That the City Council is in favor of submitting to the voters of Winnipeg a plebiscite on the principle of taxation of land values only, and that the city will ask for power to submit each plebiscite at the next session of the Mauitoba Legislature, was the assurance given today by Mayor Deacon to a large deputation of citizen headed by members of the Land Values Taxation League.

Mr. N. W. Rowell, K.C., M.P.P., speaking at Brampton, charged that there was a combination between the Government and the liquor interests working in bye-elections.

Fire did $130,000 damages to Belanger & Company's dry goods store and Le Soleil newspaper in Quebec.

Ottawan Victim of Smash-Up

Moose Jaw, Sask., Nov. 3—Lillian Pettypiece, Ottawa, Ont., aged 16, was killed and ten persons more or less seriously injured in an accident in the west yards of the Canadian Pacific railway here at 5 o'clock this morning, when a second-class passenger car on the No. 4 Toronto express, east-bound, took an improperly closed switch and was splintered against a freight engine standing on the siding.

DEAD.

Lillian Pettypiece, aged 16, daughter of Mrs. C. Waterman, Ottawa, and bound there from Calgary, Alta.

INJURED.

Mrs. C. Waterman, Ottawa, Ont., skull fractured.

Henry Warren, Calgary, jaw broken.

Henry Pope, Vancouver, B.C., bruised.

Dan Brooks, Edmonton, Alta., broken leg.

Clifford Johnson, Hesper, Alkansas, bruised and cut.

T. S. St. Hilian, Gull Lake, Sask., cut in head.

C. R. Seubrigg, New Hamburg, Ont., sprained in back.

E. Johnson, Brandon, Ont., cut on forehead.

W. Pick, Toronto, burns on feet.

The accident took place in the yard a mile west of the city. The engine and baggage car passed the switch safely, but the second-class car took the switch, plunging into the engine of the outgoing freight standing on the siding. It is supposed the switch had been improperly closed.

Drowned While Hunting

Huntsville, Ont., Nov. 2—Bert Slatter, a young man in a hunting party in Toad Lake, near here, was drowned, and in an effort to save him, Harry, his brother, was also drowned. The latter leaves a wife and ten children. Their father is a well-known resident of Huntsville.

Farmer Found in Creek.

Ingersoll, Ont., Nov. 4—Following the finding of the body of Frank Henderson, a farmer, of Nissouri, in a creek on his farm, this morning, Coroner Dr. J. A. Neff, of this town, opened an inquest this afternoon. A jury was empanelled and, after viewing the body, the inquest was adjourned until Monday evening next week, when it will be resumed in the Kintore Town Hall.

Henderson was last seen alive shortly before noon on Monday. He did not return to the house for dinner, and at first it was thought he might have gone to a neighbor's His continued absence, however, caused alarm, and a search this morning resulted in the finding of the body in the creek, not far from the barn.

The first section of the National Transcontinental Railway completed and ready for traffic is a fifty-mile stretch west from the Quebec bridge.

Rev. Dr. Donald Ross, the first head of Queen's Theological Faculty since its separation from the university, was installed as Principal of the college.

Case Heard at Toronto

The following case was heard at Toronto last week before Britton, J., in Single Court:

Re Ouderkirk—R. Smith, K.C., for executors D. B. McLennan, K. C., for widow Jessie Ouderkirk. A. L. Smith (Cornwall) for Official Guardian. Motion by executors of will of John Ouderkirk for order construing the will under C. R. and for the opinion and advice of the court upon certain matters connected with the estate.

Judgment (1): In my opinion the widow must be put to her election. She is not entitled to dower out of lands of deceased in addition to the provision made for her by will; (2) the widow is entitled to a lien upon the whole estate of the testator, to secure her the amount of $200 a year. As the annuity is only during the widowhood of Jessie it is difficult to plan an investment safe for the widow and not onerous for the others entitled. With the assistance of the Official Guardian acting for the infant some equitable settlement can probably be arrived at. (3) The widow is entitled to look to the corpus if necessary to make up a defficiency if the income is not sufficient. (4) A full answer to the fourth question had better be deferred until after the widow has made her election, and after the executors have sold if they intend to sell, the real estate. If daughter Mildred is maintained by widow, the widow will be entitled to interest upon the $3,000 for such maintenance, but to get that the widow's lien for the annuity should not be enforced in such a way as to interfere with its investment. No doubt the parties as to income can agree when it is known what that will be. If not executors may apply again. Costs of all parties out of estate. Official Guardian's fixed at $25.

New Place of Worship in Ottawa.

Rev. Basil W. Thompson, pastor of the Glebe Methodist church, and formerly of Dominion Methodist church, has a brand new idea in down town church work which he proposed putting into effect next Sunday evening.

In brief, Mr. Thompson has rented the Famiiy theatre for Sunday evenings this winter and is going to hold services there, but these services are not going to be exactly the same as those regularly held in the churches.

"We are going to have an orchestra," said Mr. Thompson, "and we are going to have a choir too. But the main object is to make people feel at home, and if the audience like the music or like any particular part of the discourse they may applaud and it will be taken as usual.

"It has been my opinion all along that a good many people don't go to church because there has come to be a certain amount of formality and stiffness about our churches. It is that idea I want to combat, and in the Family theatre I assure you we are going along new lines."

As an instance of this, Mr. Thompson added: "We won't even take up a collection."

"We are out after the people who don't go to church," he said, "and without trying to obtain them by the sensational methods, but we are going to get them."

Mr. Thompson further intimated that it was planned to keep the sermons down to about fifteen minutes and have lots of music.

"How is it being fianced?" he was asked.

"Of course the finances won't take care of themselves. I have sent out circular letters to business men telling them of my plans, and the response has been more than gratifying. I have already received some cheques for $50 each. We are not trying to make money. Only the theatre costs us something so does the orchestra and we have to meet these bills.

Grain Barge Sank

Cornwall, Nov. 2—The barge Cornwall, of the Montreal Transportation Company in tow of the tug Emmerson, parted its lines while coming down the Cornwall Canal, and swinging around, blocked navigation for a time. The barge was finally taken to Bergen's Lake, where she was beached. Shortly afterwards she sank and will probably be a total loss.

The Cornwall was laden with 40,000 bushels of wheat, bound for Montreal.

Read the RECORD.

Deacon Carl Jones Takes Satisfaction Out of Lockie Wilson.

Vankleek Hill Review:—Mr. J. Lockie Wilson, of Toronto, Superintendent of Fairs, always puts up an annual howl about the "awful things" that are permitted at the fall fairs in the shape of sideshows, etc.

Poor Mrs. Wilson, she has a peck of trouble looking after the bad boys of Ontario who control the various fairs.

Poor Lockie, she worries a heap when her children do naughty things.

Their naughtiness will bring mother Lockie with grief and gray hairs in sorrow to her grave.

It really is too bad.

To be serious dear Mr. Wilson, kindly go away back and sit down. As a superintendent of Fairs you are a huge joke.

You would travel better with Lydia Pinkham, Carrie Nation or old mother Siegel.

The men who run the various fall fairs in Ontario have just as much gray matter as you have. They know what the people want. They know what the people demand. They also know what they are going to supply whether you like it or whether you do not like it.

If the country people who come out to a fall fair to have a day's fun after their harvest is over and want to take chances on getting a white dog, a teddy bear, hitting the nigger on the head or throwing the balls in a pail or even going to see a miniature Mollie Rouge they are not going to ask your advice Mr. Wilson. They are going to have that fun and the board of directors who make up their minds to close up their show and go out of business.

Dear Lockie why do you not close up the sideshows at Toronto Fair, at the Ottawa Fair and elsewhere—Shows that are "rotten" morally and save yourself the trouble of being sentimentally silly over the innocent fun the boys and girls in country places have at their scrub horse races, their wheels of fortune, their nigger dog and teddy bear games.

You cannot make us any better Lockie, but your annual squealing may perhaps regularly inform us that you are on your job.

So long, old girl.

Catarrh Cannot be Cured

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarrh. Send for testimonials free.

Gen. Booth Man of Peace.

Toronto, Nov. 3—Bramwell Booth, General of the Salvation Army, was given an enthusiastic reception on his arrival here Saturday afternoon. On the station platform he was greeted by several of his officers and civic representatives. Outside the station 2,000 members of the Army with ten bands were in line, and after the General had reviewed them they paraded before him to the city hall. There General Booth was formally welcomed by the mayor in an address eulogistic of the Salvation Army and its methods.

Later in the evening a mass meeting of Salvationists and friends was held in Cooke's church. The General, who touched on some features of his father's life, said he realized the difficulty of following such a character. One of his officers, in whom he had great confidence told him he was only a make-shift. He was not in the least offended, and he replied: "I know exactly what you mean, I feel like that myself, but never mind, we are going to start something."

Great audiences which three times filled every seat in Massey Hall were swept away on remarkable tides of religious enthusiasm when General Booth addressed them. It seemed that the passion of these ten thousand people— Toronto people of every class—was stirred, not so much by the personality of the man himself, not by the words he spoke, but by the sense of the things for which he stands.

Bramwell Booth in his speeches yesterday did not show himself a magnetic orator. Standing in an improvised pulpit on the platform, a frail-looking, sheltered-appearing gentleman, moving his hands in gentle, discreet gesticulation, and uttering words devoid of forensic adornment in accents so politely restrained.

PHONE No. 6.

On Friday evening of last week a party called for Mr. Chas. Fulton at his residence to secure some parcels that had been left in the store. While going to the store the horse ran away, the bit breaking, and in jumping from the buggy, which was a covered one, Mr. Fulton sustained a bad shaking up.

We are experiencing some very fine weather at present.

Mr. and Mrs. W. L. Bell of Brinston, spent Sunday with Mr. F. Shirkey.

Tammany Goes Down to Defeat

New York, Nov. 4 —Fusion carried New York city today, elected John Purroy Mitchel mayor by over 100,000 plurality—possibly 125,000—and retaining control of the important Board of Estimate by an overwhelming majority.

Tammany Hall saw its nominee for the mayoralty, Edward P. McCall, go down to defeat by one of the biggest pluralities ever given against a candidate of the organization, and it looked near midnight as if it might not even save the New York County offices out of the wreckage. The big vote for Mitchel pulled through even the Fusion candidates for president of the board of aldermen and comptroller, Geo. McAneny and Wm. A. Prendergast, against whom Independence League as well as Democratic organization candidates were running.

The election of Mitchel by a sweeping majority was early apparent, but not until nearly two-thirds of the returns were in was the success of McAneny and Prendergast assured. With figures at hand from something less than seven-eighths of the election districts in the greater city, however, Prendergast had a lead of more than 10,000 over Herman A. Metz, Tammany, for comptroller, and the Tammany's leaders conceded the former's re-election together with the election of Mr. McAneny, who had piled up a lead of approximately 35,000 over Jos. A. Goulden, his Tammany opponent, in almost the same number of districts.

Tammany's only salvage from the rout consisted of the borough presidencies of Queens and Richmond, minor officials in those boroughs, and a few scattering assemblymen.

The entire Tammany ticket in New York County (Manhattan Island,) was beaten. The Fusionists captured in county offices in Kilegs County (Brooklyn,) and the Bronx.

The board of aldermen of the greater city will be controlled by Fusion votes by a majority, as yet only estimated, of fifteen.

In the Sixth Assembly district, William Sulzer, recently deposed as governor, was eletecd on the Progressive ticket.

Tammany leaders early conceded the election to Mitchel, but it was not until nearly 11 o'clock that they would concede the board of estimate to Fusion.

"It looks as though we had lost everything," Secretary Smith of Tammany Hall finally admitted. At the same time Samuel S. Koenig, chairman of the Republican County committee, claimed the election of the entire Fusion ticket in the greater city and of the New York county ticket as well.

"This is the worst blow delivered at Tammany in many years," said Mr. Koenig, in a statement. "It is doubtful if that organization will ever recover from it. The Republican party is proud to have been affiliated with the Fusion movement, and of having contributed the largest vote toward the election of Mr. Mitchel and his associates in the Fusion ticket."

Smiths Falls will have a Reeve

According to the 1913 Ontario Statutes Smiths Falls will be entitled to elect a Reeve next year although what we will do with him is a problem. We do not belong to the County Municipally and therefore our Reeve cannot attend County Council and just what we will do is a conundrum. The office looks just now like a real sinecure. However the law reads that "the Council of a town not in an unorganized territory, having a population of more than 5,000 shall be composed of a mayor, a reeve, as many deputy reeves as the town is entitled to and three councillors for each ward where there are less than five wards or two councillors for each ward where there are five or more wards, chap. 43, sect. 48. Under sec. 51 it is provided that only towns not separated from the county are entitled to deputy reeves. Smiths Falls being separated is therefore not entitled to any deputy reeves but no such exception is made in sect. 48 regarding reeves although it must be presumed that such an exception was intended. A reeve for Smiths Falls will be something like a fifth wheel to a coach.—Smith's Falls Record.

The Government steamer Acadia is on the way to hunt for the new island reported off Sable Island.

Township Council Meets.

Pursuant to adjournment the Winchester Township council met on Monday Nov. 3rd, in Town Hall, Chesterville

Members all being present.

The minutes of previous meeting were read and adopted.

The engineer's report on the Servage & Jeffrey drains was read and considered.

AFTERNOON SESSION

Moved by E. Countryman, seconded by Geo. Earl, that the road commissioners for the different divisions be instructed to pile stone for crushing next year as follows:—

N.E.¼ 100 cords, to be placed on Main road cons. 7 & 8. S.E.¼ 100 cords, Main road 50 cords north of Chesterville and 50 south of Chesterville. S.W.¼ 100 cords on Main road cons. 1 & 2, N.W.¼ 200 cords —100 cons. 7 & 8, 100 con. 10.—Lost.

Mr. Beckstead, Reeve of Williamsburg Township, was present to confer with the council as to the best plan to be adopted to meet the drainage difficulty, which had developed in connection with the Barclay Creek.

Moved by E. Countryman seconded by Geo. Quart, that F. M. Eagleson, C.E., report to this council upon the description of the work required, the extent of the same, and the estimated cost of the work to be done to repair the Barclay Creek drain, so as to make the same conform to the plan, profile, specifications and report of George L. Brown, C.E., in connection therewith, making all proper allowances for farm crossings or damages to lands and crops rendered necessary by the work of repair to be done. —Carried.

Moved by Geo. Quart, seconded by E. Countryman, that the road crossing diagonally, lot No. 18 con 7, be closed to public travel and that Mr. Herman Hummel be given full possession of the same in accordance with his offer to meet the annual assessment under by-law No. 216, Kittle Creek, the municipality to be allowed to remove the gravel from the same.—Carried.

Moved by J. A. Bogart, seconded by Geo. Quart, that this council adjourn to meet at Winchester, Dec. 1st, at 10 a.m.- Carried.

Village Council.

A special meeting of the village council was held Sept. 22nd, 1913.

Members all present.

Moved by F. M. Sanders, seconded by J. H. Fulton, that the clerk be instructed to notify Wesley Hamilton, T. T. Shaw and Joseph Fisher, that their connections with the Albert St. sewer, must be cut off.

Council then adjourned.

Pursuant to adjournment the council met in the Town Hall, Wednesday, Oct. 1st at 8 p.m.

Members all present.

Moved by F. M. Sanders, seconded by J. H. Fulton, that the following accounts be accepted and paid:—

C. W. Casselman P. S. Requisition	$200 00
J. G. Craig, High School Requisition	500 00
Sanders, Soule & Casselman Co. ac. re sidewalks	615 00
Eli Harper, sidewalk accoont	9 50
Geo. Elliott, revision of voter's list	10 92
Geo. Beattie, gravel	18 40
F. McCloskey, stand for fire engine	4 00

Rufus Garrett "	58 00
Edgar Harper "	35 00
John Latta "	52 75
O. D. Casselman, Sec'y Horse Show, grant	25 00

Moved by L. Jordan, seconded by T. Houlehan, that council do now adjourn to next regular date of meeting or at the call of the Reeve.

A special meeting of the village council was held in the Clerk's office on Oct. 15th.

Members present: G. W. Bogart, reeve; Fulton, Sanders and Jordan, councillors.

Moved by F. M. Sanders, seconded by J. H. Fulton, that the Reeve be authorized to sign and approve the requisition for material to be supplied by the Hydro-Electric Power Co., for the construction of village plant; also for the purchase of meters and transformers, as recommended by the commission.

Moved by J. H. Fulton, seconded by L. Jordan, that the Solicitor, Mr. Lawson, be instructed to sell the debentures provided for by the Hydro-Electric By-law, No. 224.

Council then adjourned.

A regular meeting of the village council was held last evening in the Town Hall.

Members all present.

Moved by F. M. Sanders, seconded by T. Houlehan, that by-law No. 229, to appoint Mr. Jas. G. Craig, collector (in place of Mr. Hugh Kearns, resigned) be read a first time.

Bylaw No. 229, finally passed, signed and sealed.

Moved by L. Jordan, seconded by T. Houlehan, that the following accounts be accepted and paid:

A. H. Forbes	$ 10 00

Edgar Harper "	9 00
Sim Bogart "	4 00

This Bottle Made a Long Journey

Rochester, Nov. 4—When the Beaver River was at flood height last March, Clarence Mitchel wrote a note, signed his name and address, and sealing it in a bottle, tossed the bottle into the flood.

Last night he received a letter from Frank Farthing in Glasgow, Scotland, saying he had picked up the bottle on the Scottish coast two weeks ago.

The bottle, to reach its landing place, had floated down the Ohio and Mississippi Rivers to the Gulf of Mexico, and making its way out into the Atlantic had drifted to Scotland.

Fergus and Elora carried Hydro-electric bylaws, proposing to spend respectively $16,000 and $10,000.

The Grand Trunk freight sheds at St. Catharines and ten loaded freight cars were burned, loss $50,000.

Lillian Waterman of Ottawa, was killed and nine others injured in an accident on the C.P.R. at Moose Jaw, Sask.

We are going to stimulate Afternoon Shopping in this town as it was never stimulated before.

Beginning To-morrow Afternoon we will hold an "Afternoon Sale." Every Afternoon for the Next Ten Days, from 2 p.m. to 5 o'clock p.m.

The Biggest Bargains you ever heard of will be the trade attracting features of these Afternoon Sales.

We have asked our leading Manufacturers and Wholesalers to co-operate with us, by giving our friends some special "plums" to make the "Afternoon" sales a grand success. They have responded nobly and the story is told in items and prices that can't be matched in this or any other town for real value.

LOTS ARE LIMITED, SO BE ON HAND EARLY.

Ladies and Misses Coats.

Another shipment just arrived. If you have not already bought your Fall Coat it will pay you to examine our present stock of Ladies, Misses and Children's Coats.

Newest Materials. Latest Styles.

Unbeatable Values.

All sizes in stock.

SEE ! SEE !

Our $15.00 Fur Trimmed Coats for Men. It is a well tailored coat. The material is a good quality Black Beaver, lined with Italian lining and interlined with rubber, with a Lamb or Marmot Collar. $15.00.

Also better quality coats at higher prices,

Sable Furs.

Just received 20 sets of Sable Furs. This is an excellent lot and we are prepared to save you from 15% to 20% on sable. It will pay you to get our prices before you buy. Also

Persian Lamb, Mink Marmot,

We invite your inspection.

Flannels.

Cold weather will make you think of warm Flannels. We have

Dark Gray.
Medium Gray.
Light Gray.
Navy Blue and Red.

All extra quality at lowest prices.

P.S.—Coming Nov. 17th and 18th, a representative of one of the big Fur Houses, who will have a full range of samples to take orders for immediate delivery. If you cannot find what suits you, just wait till you see his immense range. Remember the dates, Monday and Tuesday, Nov. 17th and 18th.

G. W. BOGART, - - Chesterville, Ont.

CRYSLER

Wm. Brownlee of Russell, was in town on Thursday.

J. A. Senecal spent Sunday in South Indian.

Stewart Boyce of Finch, spent Sunday at his home here.

Simon Ouderkirk has returned home from the west.

Mrs. John Currie and daughter Jean, spent the week-end with friends in Ottawa.

Miss B. Rounthwaite and Miss Jessie Dey spent Monday with Mrs. (Dr.) Crain.

Mrs. Dey of Finch, spent Wednesday with her daughter, Mrs. (Dr.) Crain.

The euchre party given on Wednesday evening by the English church was a success.

Mrs. Byron Baker of Depot Harbor, is paying a visit to her parents, Mr and Mrs. John Wright.

Mrs. R. Montgomery left for Ottawa on Monday evening, where she intends spending a couple of weeks.

DUNBAR.

Nov. 4th.

Ploughing is the order of the day.

Mr. and Mrs. James Myers and baby of Bush Glen spent Sunday at the latter's home, Mrs. Elsie Johnston's.

Mr. and Mrs. Jake Casselman of California have been visiting relatives in our district

Miss Clarrissa Dillabough spent Sunday the guest of Miss Arletta Philips.

Mr. and Mrs. Myles Marselis and children, Harold and Leon were visitors at Mr. Henry Weegar's on Sunday.

Mr. S. H. Merkley has disposed of his store to Messrs. Charles McMillan and Carman Barkley.

Visitors at Mr. Harvie Dillabough's on Sunday were:—Mrs. Thomas McLean and Masters Thorold ahd Walter and baby Audrey, Miss Cora Durant and Mr. Herbert Durant.

Mrs. Wm. Gordon and little granddaughter Dorothy, of Morewood have been renewing acquaintances here.

A quiet marriage took place at Dunbar on Wednesday last, when Mr. Manson Dillabough and Miss Florence Baker of Bouck's Hill, were united in holy bonds of matrimony. Congratulations.

BILL NYE.

East Middlesex bye-election for the Ontario Legislature seat vacant through the death of Geo. W. Neely, will be held on the 27th instant, nominations on the 20th.

MOREWOOD.

Plowing is the order of the day.

Mrs. J. W. Smith is visiting her daughter, Mrs. L. Walker.

Miss L. Marcellus has purchased a residence and is moving her household effects.

Mrs. John Summers is visiting Mrs. J. H. Loughridge.

Mrs. W. J. Gordon who has been visiting friends in Dunbar and vicinity returned home on Saturday.

Mr. John Coulthart is moving into his new home in the village.

The Morewood hockey boys held a very successful Hallowe'en social in the hall on Friday night.

The regular monthly meeting of the Women's Institute will be held on Tuesday, Nov. 11th, at the home of Mrs. J. W. McCormick. This is a cookie meeting. Each member is requested to bring at least a dozen cookies and the recipes. The recipes are to be interchanged and the cooking to be sent to the Cornwall General Hospital. We hope to have a good large box to send. All the ladies of the community are welcome at our meetings and may contribute towards our box for the hospital if they care to do so. We would like to have the young girls become members of our Institute. We hope to see a number of members present as there is a discussion on the demonstration lecture course. We obtained a number of names last month and hope the number may be increased at the next meeting.

S. S. No. 10 Finch.

Maximum marks in III and IV on two examinations 200.

Class IV—Katie Rady 153, Annie Manley 149, Martin Graham 119, Katie Coyne 113, Abbie Murphy 105, Ethel Knight 82.

Class III—Margaret Rady 256, Agnes Bell 134, Patrick Murphy 131, Annie Barkley 130, Lillian Robertson 128, Helen Beehler 119, Joseph Graham 110, Mary Manley 77.

Class II—Ella Murphy 69, Hugh Murphy 66, Peter Manley 66, Laura Murphy 59, Rose Murphy 54, Mary Murphy 54, Mike Knight 51, Ranald Murphy 36, Edmund Murphy 30, Mike Moran 30.

Primer (b)—Margaret Grady, Annie Coyne, Darcy Lynch, Gordon Murphy, Harold Murphy, Roy Lynch, Veronica Murphy, Walter Beehler, John Robinson.

Primer (a)— Annie Lynch, Walter Lynch, Leo Gibeault, Williard Baker, Jacob Baker.

BERTHA GIBBONS, teacher.

Gets Portfolio to Cabinet of Sir Rodmond Roblin.

Winnipeg, Nov. 4.—Hon. Colin H. Campbell's resignation as Minister of Public Works in the Manitoba cabinet was received yesterday and the portfolio at once offered to Hon. W. H. Montague. Dr. Montague accepted and Sir Rod mond Roblin called later on the lieutenant-governor and received his consent to the change. The new minister will be sworn in this morning at 10 o'clock.

The cabinet change is a complete surprise. Premier Roblin returned from the east yesterday morning and on his desk found the resignation of the minister of public works. Mr. Campbell wrote repeatedly he was improving and hoped to be able to return to business early in the spring, but that it was impossible to attend to the duties of his portfolio during the winter.

Dr. Montague has lived in Winnipeg many years. While here he has been engaged in the land and investment business. He was born in Adelaide township, Middlesex county, Ontario, his father having been one of the early settlers in Adelaide district.

From 1886 until 1900 he was member of Parliament for Haldimand, for some time during his Parliamentary career he was known as one of the best informed debaters in the House. Finally he became Secretary of the State and afterwards Minister of Agriculture of the Dominion.

Another Gunning Accident

Kingston, Nov. 4—While going through the woods near his home at Tamworth, Herbert W. Shannon, aged 16, stumbled, and a gun he was carrying discharged, the bullet entering his body, causing instant death. He was in the company of Frederick Baker on a hunting trip, but at the time of the accident had wandered off alone. Later his chum came across the body

Jas. J. Mahar's body was found at Charlottetown, P.E.I., he having evidently fallen from a train.

The body of Frank Henderson, of East Nissouri, was found in a creek near Kintore.

Tory is Elected for Peel County

Brampton, Ont., Nov. 4—With one poll to be heard from, J. R. Fallis, Conservative, was today elected in the Peel by-election by 375 majority over his Liberal opponents, Mr. Milner. The election was made necessary by the resignation of Sam Charters, to accept the position of registrar of the county.

Mr. Charters was elected by 725 majority in 1911, the highest majority ever given in the riding. This was due to his personal popularity. He was first elected in 1905 previous to which the riding was Liberal since conferation.

Mr. S. Price for the Railway Commission

Ottawa, Nov. 4—Mr. Samuel Price, K.C., of St. Thomas, law partner of the Minister of Labor, who has been almost steadily engaged on various commissions for the Government during the past two years, is slated, according to rumor in Government circles here, for the Federal Railway Commission in succession to Dr. Jas. Mills on the latter's retirement from the commission next January. Mr. Price has recently completed a two years' task in revising the Dominion Railway Act for Hon. Frank Cochrane. A voluminous bill embodying the provisions of the new act has been printed and given the Cabinet Ministers and a few railway experts for private consideration and revision before it is introduced in Parliament next session. Mr. Price having completed this task will, it is said, now accept a permanent position under the Government as Railway Commissioner at $7,000 a year.

One of the provisions of the new Railway act will meet the request of the Canadian Union of Municipalities in regard to giving municipalities greater control over their streets in the matter of preventing telegraph and telephone companies from erecting poles thereon.

Mr. Samuel Price, K. C., of St. Thomas, is said to be slated for the Railway Commission in succession to Dr. James Mills.

No trace has been found of Miss Margaret Fraser, formerly of Harrison, who disappeared over a week ago from Montreal.

PREVENTION OF CORNSTALK DISEASE

"Cornstalk disease" is not a myth in spite of the loud assertions of a good many farmers who have been fortunate enough not to encounter it in their experiences, writes a Nebraska correspondent of Farm Progress. It is a very real thing to the man who has lost a few valuable young cattle through turning them into a stalk field.

Young cattle seem to be more liable to dangerous attacks of this trouble than the older ones. For some reason or other they are more susceptible to it, and it goes harder with them after

The Galloway is the oldest of the pure breeds of cattle and is noted for its hardiness. The breed is native to southwest Scotland, where the custom among farmers is to winter cattle in the open. They have thus acquired those characteristics of hardiness which adapt them to farming conditions in America, especially in the northern and western sections. In fact, experience proves that the Galloway does better when wintered in the open than when sheltered in barns. Among beef breeds the Galloway holds high rank.

they do get it. The drier the stalks the more liable the cattle are to be stricken.

There is no treatment for it yet developed. The veterinarians cannot make up their minds as to the causes of the affection.

It makes little difference about the cause so long as no two men are able to agree upon it. The point the cattle owner must keep in mind is how to prevent it. The following plan has been found valuable as a preventive:

Turn the cattle into the stalk field gradually. The first stay ought not be longer than half an hour, and this may be gradually increased if no trouble is encountered.

If the cattle are well fed and watered before being turned in there is less opportunity for trouble, as so much of the dry food will not be eaten. Giving them water immediately after they have stuffed themselves with dry blades and husks may bring on an attack.

By feeding some laxative forage like alfalfa or millet as a part of the ration while on the stalks the cattle are less likely to develop any of the symptoms.

So far as I know there is no medical treatment, but a laxative is helpful in the earliest stages of the trouble. It is well to bear in mind that a great many cases develop late in the fall or early in the winter during the first cold, stormy rains. By getting the cattle out of the fields in such weather and putting them under shelter the danger of an attack will be minimized.

It is easy to pick out the sufferers in a herd. They are found "humped up" and at some distance from the main body of the cattle. The switching of the tail, the restlessness and the aimless kicking are evidences of serious abdominal pains.

The drier and older the stalks the more dangerous they seem to be. Cornstalk disease is rarely heard of early in the fall, but is more common after the last cornfield has been gathered and the stock turned in.

Reasons For the Silo.

Because of the palatability and succulence silage possesses higher feeding value than does the same forage dry cured. Conservative feeders estimate that the silo doubles the value of the forage crop.

Silage can be used in summer and fall as a substitute for and to supplement pasture.

It has been conclusively proved that the silo effects a considerable saving in the cost of production of beef, mutton and milk.

The silo enables the farmer to keep more live stock, which promotes the rotation of crops and the preservation of the soil fertility.

Improving the Horse's Mane.

The mane and tail of a horse may be improved in thickness by simply bathing them once a day with cold water. If any skin trouble is present pour on or rub in a mixture of two parts machine oil and one part kerosene two or three times a week. Groom the horse thoroughly every day and feed carrots to improve the condition of the skin.

The Ailing Animal.

When a farm animal is feverish stop feeding. As a rule a horse or a cow will not take food when in that condition, but sometimes folks urge them to do it. It only adds fuel to the fire. Wait; let nature work. She is a better doctor than any of us.—Farm Journal.

THE FLOCKMASTER.

Sheep require water. See that they get it.

Don't keep old sheep; market when about six years old.

Don't let the sheep stand on damp manure or sickness will result.

Cleanliness is a factor in successful sheep raising. Disinfect troughs and pens weekly.

Foul odors in the sheep barn will bring pneumonia. Keep your mind on having them well ventilated.

A ewe in good flesh almost invariably is a good breeder and a good suckler, something that thin ewes cannot very well do.

Avoid crowding the lambs in the feeding quarters. They need a lot of room on account of their natural habit of crowding.

THE CREAM SEPARATOR.

Machine Should Be Firmly Set For Efficient Operation.

The best temperature for separating the milk is 85 to 90 degrees F., or about the temperature at which it comes from the cow, writes T. A. Leadly in the Kansas Farmer. It is obvious that the milk should be separated immediately after milking, or it will be necessary to warm it, and this is troublesome and takes time. Milk is usually in its best and healthiest condition when first drawn, and any delay in separation adds to the danger of contamination and an increase in the number of bacteria in the milk.

To obtain the most efficient separation adjust the cream screw to skim between 30 and 35 per cent cream. The richness of the cream depends upon the temperature of the milk, the speed of the bowl, the richness of the milk and the position of the cream screw. Thin cream does not keep so well, and separating very rich cream will cause a loss of butter fat in the skimmilk. Each machine has a certain speed at which it gives the most efficient separation. In different machines the bowl makes from 7,000 to 14,000 revolutions a minute, while the handle makes from 45 to 60 a minute. A few revolutions of the handle under this limit will make quite a difference in the cream. Considerable butter fat

OPERATING THE SEPARATOR.

will be left in the skimmilk and the cream will be thinner. The machine should be firmly stationed, otherwise the bowl will be thrown out of balance by the vibration and the effective separation will be impossible.

Separator agents often maintain that cold milk can be separated as well as warm milk, but this is a mistake. A richer cream is obtained if this is done, but more cream is left in the skimmilk, and there is danger of clogging up the separator.

Another point which the dairyman should not overlook is the care of the separator. Efficient separation and the quality of the cream depend largely upon this. The separator should be thoroughly washed after each operation. If not washed sediment will collect in the bowl, making an ideal place for the growth of bacteria and thus becoming a means of contamination for the next lot of milk separated. If the milk and sediment are allowed to dry on the different parts of the bowl they will be more difficult to wash. The use of a good washing powder is good to clean the separator and in preventing the growth of bacteria. The most important problem for the dairymen of today is the production of clean milk. To do this absolute cleanliness is necessary in keeping the separator in the proper condition, in keeping the milk in a pure atmosphere free from contamination, and in keeping the dairy barn and animals free from filth.

Will Capture Fever Ticks.

A novel method of clearing a forest district of the fever ticks which produce spotted fever is to be tried by the government in the Bitter Root national forest in Montana. Two bands of sheep are to be grazed in the parts of the forest where the tick is most abundant, and it is expected that the ticks will attach themselves to the sheep in large numbers. Whenever occasion requires the sheep will be dipped in an insecticide which will kill the ticks and the sheep will not be at all injured. It is hoped by this method to eventually clear the district of the dangers.

CURIOUS DUELS.

Combats In Which the Weapons Selected Were Avalanches.

An extraordinary duel was fought near Mont Blanc in France. Two young men who had fallen in love with the same girl arranged to fight a duel, with nature as decider of the result.

Selecting a part of that mountainous district, many thousand feet up, where avalanches are known to fall at frequent intervals, the lovers agreed to take it in turns to stand for a given time in the most dangerous spot that could be found. The idea was that when one was killed by an avalanche the other should be free to propose to the girl whom they both loved. In this case the idea became a fact.

This is not the only instance on record of a duel by avalanche. A few years ago two Italians, named Guetta and Sorato, decided to test fate in this manner, and also for the love of a woman.

For three mornings they tempted nature, but nothing serious happened. On the fourth day Guetta was knocked down by a falling avalanche, but not much hurt. Then it was that their food supply gave out, and they returned home to get some more. By this time the police had come to hear of their strange duel, and threatened them both with imprisonment. So the undaunted rivals settled their differences in another and less adventurous way. They drew lots for their lady love. Sorato won, and after Guetta had left the village he was married to the girl of his choice.—London Answers.

STRENGTH OF A LIMPET.

Its Sticking Power Largely Due to Atmospheric Pressure.

Every one is familiar with the saying "to stick like a limpet," but there are not so many who know how it is that a limpet is able to stick as it does to the rocks upon which it passes its existence. The creature is able by means of the central portion of its body, which can be raised independently of the edge or frill which surrounds it, to create a vacuum much in the same way that a piece of soft wet leather can be made to adhere to a smooth surface by pressing out all the air. Thus the so called "strength" of the limpet is largely due to atmospheric pressure.

It is not entirely so, however, for if they are closely examined it will be seen that the shells accommodate themselves around the edges to the surface of the rock upon which the limpet is located, and if removed to another spot the edge of the shell will probably be found to be a very bad fit and the creature's power of adhesion somewhat lessened. If taken by surprise with a smart sidelong blow even a large limpet is easily enough dislodged, but if it is given the slightest warning its power of suction is instantly brought into play and very often considerable force is then necessary before it can be detached. — London Standard.

An Unburied Picture.

Rossetti secured permission in 1869 to reopen the coffin of his wife in order to secure the manuscripts of some poems which he had buried with her seven years before.

Some such incident might have occurred in connection with J. M. W. Turner if his desire to be buried wrapped up in his own painting of "Carthage" had been carried out. There was some difficulty in selling the painting, and the artist kept the canvas by him. He always said he would be wrapped in it when he was buried and even went so far as to ask Chantrey if as his executor he would fulfill his wishes on that point.

"No doubt," answered the sculptor. "I shall bury you rolled up in your picture if it is one of the conditions of your will, but I would take you up next day and unroll you!"

There's nothing like a delicious cup of Tea as a delightfully refreshing stimulant and brain soother.

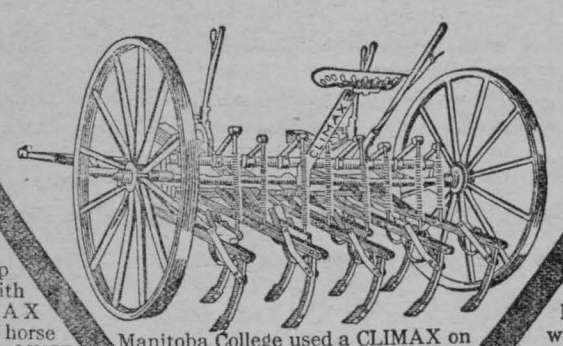
In any soil, on any farm, the CLIMAX earns money for you every minute you use it



Very Strong

You can rip sod land with the CLIMAX and a 3-horse team—so it MUST be built strong! Yet the teeth won't smash if they strike a stone—their joints unlock and fly back to pass over unharmed.

Manitoba College used a CLIMAX on land rank with wild mustard; got rid of that bad weed; and grew oats 71 inches in the straw *without a weed in the whole crop!* The CLIMAX certainly does destroy weeds!

Easy Handled

Each pole has a tilting lever; and these, with the pressure lever — all in easy reach of operator — exactly regulate depth of cut. Teeth go right for the roots of the weeds, and rip them out of the soil.

This is the stiff-tooth cultivator that gets the weeds OUT of the soil—not merely cuts off their tops or just tickles the roots a little. On dirty land you surely need the

Frost & Wood Climax Cultivator

You can have your choice of points—2, 4, 7 or 10 inch. You ought to learn all the merits of this money-making weed-banisher. May we send you Catalogue ?

CHESTERVILLE — ONTARIO

AVONMORE.

Our community was shocked on Sunday morning, Oct. 26th, 1913, on learning of the death of the Rev. S. D. MacPhee, B. A., of the Presbyterian Church, here. Though he was critically ill, hopes were entertained as long as there was life that God in His wisdom might decree, that he might yet be spared to his family, his congregation and the community in general in and around Avonmore, for he was beloved by all with whom he came in contact with. The warmth of his heart, and his genial nature won for him a host of friends. He came to Avonmore in December, 1909, and has made friends of every one he met here. His physical health was not all that could be desired, and while attending the General Assembly in Edmonton in 1912 he felt so much physical improvement from the atmosphere that he decided to take a couple of months, holidays this summer and try the Western climate again. He left here in June, and after taking Mrs. MacPhee and family to Belfast, P. E. I., their native home, he left for the West, and after a couple of months' sojourn in Regina, Calgary and therebouts, he started for home by the Southern Manitoba route. After filling a Sabbath's engagement at Killarney, he was taken suddenly ill and was obliged to remain there under medical care for a few weeks, when he felt able to proceed to Winnipeg. Then he visited Mr. W. J. McCart and family, formerly of Avonmore, for some days, then continued his journey Eastward towards Belfast, P. E. I., where he remained another couple of weeks, returning here on the evening of Friday, Sept. 26th He consulted a specialist in Winnipeg and arrived in Avnnmore very much encouraged, having gained two pounds in weight in a couple of weeks. He occupied his pulpit here, Sunday morning, Sept. 28th, and attended Prayer Meeting the Wednesday evening following, and was taken suddenly ill the following morning. Everything that medical skill and trained nursing could do was done, under the care of Dr. W. M. Earle, with Dr. D. O. Alguire, M. P., Cornwall, and Dr. Dickey, of Newington, in consultation But the serious attack of typhoid with complications was too much for his weakened constitution, and after four and a half weeks' illness he was called to his eternal home on the morning of Sunday, the 26th October. The funeral took place on Monday, the service being conducted by the Rev. Donald Stewart, jr., in the Presbyterian Church, here. The scripture lesson was read by the Rev. Mr. Charlesworth, of the Avonmore Methodist Church, and the sermon was delivered by the Rev. Mr. MacLeod, of Cornwall, Rev. Mr. McNeil, of Belfast, P.E.I., and Rev. Mr. Gollan assisted at the service. In all there were sixteen clergyman present. The service was attended by the largest gathering of sympathizing friends that ever attended a funeral here. The remains were taken to Belfast, P.E.I., by C. P. R. on Tuesday morning, accompanied by his sorrowing widow and Rev. Mr. McNeil. He leaves, besides his widow, four children, to mourn the loss of a loving father. He was 48 years of age; a member of the I. O. Foresters, I. O. Oddfellows and the L. O. Association. Floral tributes were presented by the staff of the Bank of Ottawa here, by the congregation and others.

Colonel L. R. Carleton is new Commandant.

Ottawa, Oat. 31– Col. L. Carleton, D. S.O., of the Essex Regiment, England, has been appointed Commandant of the Royal Military College, Kingston. Col. Carleton succeeds Col. Crowe, who accepted last summer an important post under the War Office. The new Commandant was selected for the position by Col. the Hon. Sam Hughes, after consultation with the War Office in London last month. He comes to Canada with a distinguished record as a soldier and as an experienced and successful educationist and administrative officer. For five years he has been connected with the instructional staff at Sandhurst. He will at once assume his new duties as head of the Royal Military College. Col Carleton served in the South African War.

CASTORIA

Mr. Taggart Goes West

Kingston, Nov. 2—J. G. Taggart, B.S. A., Agricultural Representative for Frontenac, with headquarters at Sydenham, has resigned to accept an important position in western Canada. His assistant, W. M. Chisholm, will carry on the work in the meantime.

NO ALUM

Prince of Wales' Career Outlined.

London, Nov. 1—There is good reason to believe that the marriage of the Prince of Wales is not desired by the King and Queen until after the Prince's twenty-first birthday in 1915. There is no urgent reason for the Prince's early marriage, and the report of his betrothal, which was denied yesterday, appears to have arisen from arrangements being made for the Prince's visit to the Czar at St. Petersburg about Easter time.

The visit will be purely private and is only part of the programme arranged for the Prince to see all Europe. When the time arrives for the Prince to marry it is believed that, within the limits, he will be allowed a free choice, and political considerations will not be allowed to influence to event. One of the conditions is that his bride must be a Protestant.

Meantime the Prince of Wales continues his career as outlined and settled by the King. He will complete his Oxford studies at the end of the summer term, 1914, and will then leave on a continental tour, the itenerary of which has not been completed. In the autumn he will begin his military career, being gazetted with the 10th Hussars and will occupy the Royal pavilion at Aldershot.

Tentative arrangements are being discussed for the Prince to tour the Overseas Dominions, but the tour may not begin until the autumn of 1915, probably toward the last of the year.

Practised Law over 30 Years Though Blind.

Cornwall, Nov. 1—The death at Lancaster on Wednesday of William Stewart, barrister, after a few hours' illness, came as quite a shock to the community. The deceased was at his office on Tuesday afternoon and complained of not feeling well, but nothing of a serious nature was apprehended until Wednesday morning, when acute symptons set in, with the result that one of the most familiar figures on the streets of Lancaster succumbed in a few hours to an acute internal trouble.

Mr. Stewart was born in Lancaster, being a son of the late Ranald Stewart, and was in his 53rd year at the time of his death. He was a nephew of Mr. Justice Maclennan, of Toronto. He received his education at Lancaster and Williamstown, and at Queen's University, Kingston.

When about 20 years of age he was attacked with smallpox, which deprived him of the sight of both eyes, but he continued his studies, and passed his legal examinations with great credit to himself, being called to the bar about 25 years since. His reputation was that of a good sound lawyer, and many of his clients all over the county will miss his good advice.

He was a well-read man, dispite his affliction, took a keen interest in politics and all the live topics of that day, and those who knew him always enjoyed the pleasure of a conversation from which they were sure to learn something. He leaves a widow and several children, his eldest son being a clerk in the office of the Merchants' Bank at Lancaster.

The funeral took place Friday afternoon from his late residence to the cemetery at South Lancaster.

Co-Operative Store for C.P.R. Workmen.

Moose Jaw, Sask., Oct. 31—C. P. R. employes here will form a co-operative grocery store in order to secure credit which they cannot get from local groceries, who insist on a cash basis (an enormous requirement from men whose monthly salary is paid anywhere from the 15th to the 25th of the succeeding month).

The company will be capitalized at $25,000, and shares sold to employes only. Shares are twenty-five dollars, and no employe may acquire more than twenty shares. The store will cater to the general public on an ordinary basis, while each shareholder shall enjoy five per cent discount while paying for his shares and ten per cent after they are fully paid up.

ANTIQUITY OF GAMES

MOST MODERN SPORTS HAVE A LONG BACKGROUND.

Chess Is Perhaps the Oldest of Contests of Skill and Cricket Goes Into Remote History In England —Billiards and Bowling Were Mediaeval Recreations — Baseball Is Only Up-to-Date Rounders.

The Anglo-Saxon is responsible for the preservation of many of the games which are now almost unknown in the countries in which they had their origin. Some of these forms of diversion are older than the Roman empire, while others are, for instance, basket-ball, are of comparatively late origin.

Baseball, which holds almost undisputed sway on this continent, is [illegible] on the old English game of rounders and for centuries it has been known in England in various forms.

Billiards is believed by some to have been brought from the east by the Crusaders, while others claim an English origin for it and find it allied to the game of bowls. Still others assert that the French developed it from an ancient German game. It seems pretty certain that the first person to give form and rule to the game was an artist named Henrique Devigne, who lived in the reign of Charles IX. of France.

Bowls, or bowling, is one of the most popular and ancient of English pastimes, its origin being traceable to the 12th century. It was held in such disfavor for years that laws were enacted against it and it was an illegal pursuit. Alleys were built, however, as it could not be played out of doors during the winter, and the game flourished in spite of opposition. In the beginning of the 18th century greens began to increase, while the alleys were rigorously and absolutely suppressed. It soon became a royal game and no gentleman's place was complete without a bowling green.

Checkers is said by some to be a very old game, while others declare it to be of comparatively modern origin. Whence it came is absolutely unknown. The game is also called draughts and there are many varieties of it—Chinese, English, Polish, Spanish, Italian and Turkish. It is also found among the native tribes of the interior of New Zealand.

Chess always has been the subject of more dispute, so far as its origin is concerned, than any other game. It is probably the most ancient as well as the most intellectual of games, and it is played all over the world. The belief which is most generally accepted is that it came from the Hindoos and the most conservative estimate places its age at 1,000 years. Some persons, however, claim an age of from 4,000 to 5,000 years for it. Its basis is the art of war and the Hindoo name for it, chaturanga, means that four "angas," or members of an army which are given in Hindoo writings as elephants, horses, chariots and foot-soldiers.

Cricket is the national game of Englishmen and seems always to have been played in Britain. The first mention of it is found in a manuscript of the 13th century. The name comes from the Saxon "cric" or "cryc," a crooked stick.

Croquet is said to have been derived from paille-maille, or mall, which was played in Languedoc in the 13th century. Mall was very popular in England at the time of the Stuarts.

Curling has been popular in north Britain for the last three centuries and is regarded as a Scottish game.

Dice are said by some to have had their origin in occult sources but more frequently they are ascribed to Psalmedes of Greece, B. C. 1244. Those exhumed at Thebes are identical with those used to-day and the games played with them are the simplest and most widely known games of chance in the world.

Football was undoubtedly introduced into England by the Romans and is therefore older than the national game of cricket. Varieties of it may be found in the Philippines and through the Polynesian Islands, among the Eskimos, the Faroe Islands and even by the Maoris of New Zealand. The Greeks also played it.

Golf is popularly supposed to have had its origin in Scotland, but there seems to be good reason for believing that it came from Holland.

Lacrosse, the national game of Canada, came from the aboriginal red men, who doubtless played it for many centuries before the discovery of the new world.

Poker is probably a development of il frusso, an Italian game of the 15th century. A similar game called primiera was played in Italy in the 16th century and thence journeyed into Spain. In France this became ambigu and later appeared in England under the name of brag. Poker seems to have descended more directly from the game of brag than from any of the others.

Tennis is pronounced the oldest of all the existing ball games. It is impossible to give its origin, but it was played in Europe during the middle ages in the parks and ditches of the feudal castles. It was at first the pastime of kings and nobles, but [illegible] popular with all classes. The French took it from the Italians and the English from the French.

Whist undoubtedly is derived from the old game of trumps, which has a purely English lineage. There is no record of the origin of this game nor of its development into ruff-and-honors, which was the parent of whist. The earliest reference to it is believed to be in a sermon of Latimer, about the year 1529. The name probably is derived from the "hist" or "silence," which close attention to play demands of the players.

THE LIGHTHOUSE.

Lighting the Coast Line Dates Back To Days of Galleys.

Ever since man began to navigate the waters he has endeavored to light them at night. The father of lighthouses, of course, was the ancient Pharos of Alexandria, in Egypt. It was built by Ptolemy Philadelphus, about 720 B.C., on a small island at the entrance to the harbor, connected by a causeway with the mainland. The Pharos cost 800 talents; if these were silver talents — as most likely they were—that would be equal to $850,000, the largest sum ever expended upon a single lighthouse. The structure had a base of some 400 feet, and towered 450 feet above sea level. As the whole was built of white marble, the edifice must have been at once elegant and impressive. At the summit, fires were kept burning to direct the mariner through the tortuous entranee to the bay. It is recorded by some of the ancients that the flame of the Pharos could be discerned 100 miles at sea. This, of course, is an exaggeration, as the most up-to-date light of modern times, with all the latest inventions for increasing its intensity, is only visible 30 miles out. It is doubtful if the smoky gleam of the ancient Pharos was seen 20 or 25 miles on a clear night. The Romans built many lighthouses, and it is said that several exceeded in splendor and magnificence the famous Pharos, but none of them now remain.

The earliest example extant of a lighthouse is the famous Tower of Corduan on the west coast of France. It was built by the great French architect, M. Louis de Foix, in 1584 and still stands to-day a monument to his skill; and it is certainly one of the most remarkable edifices in the world. This lighthouse is a beacon a church, and a royal residence all in one. First there is a circular stone platform, 135 feet in diameter around which an elegant parapet runs. From this platform the tower rises in four stages, each smaller than that beneath, and ornamented outside with beautiful columns and engravings. The first floor is the entrance hall, and the one above the King's apartments. Above this is the chapel and then comes the lantern. The French monarchs often stayed at this novel residence, and are recorded to have "enjoyed the ocean palace full of fresh sea air and free from all the bustle and worry of Parisian life." Originally the lantern stood 94 feet above the sea. About a hundred years ago the height of the tower was increased, and to-day a handsome lamp, throwing changing colors adorns its summit, 189 feet above high water mark.

Right down to the time of John Smeaton, who invented the stone tower, lighthouses were built of wood. It was Smeaton's success in placing a stone edifice on the dreaded Eddystone rocks, in the Eighteenth Century, which really gave an impetus to lighthouse building; and since that time the sea-builder has been busy erecting lights on dangerous islands and pinnacles in all parts of the globe.

The Vatican Library.

The Vatican library probably is the most sumptuously housed in the world. The collection contains some of the most precious manuscripts in existence, including the Biblical "Codex Vaticanus" of the fourth century, the fifth century Vergil and the palimpsest "De Republica" of Cicero.

The printed books include more than 2,500 fifteenth century editions, many of them vellum copies. The total library has been estimated to comprise more than 220,000 volumes and 30,000 manuscripts, but it has never been adequately catalogued.—Pall Mall Gazette.

No Bargain.

On former occasions when guests had been invited to dinner young William had proved to be very talkative. Later when another guest was expected he was given a dime as the price of his silence during the meal. He kept his part of the agreement perfectly until his favorite dessert was being served, when he could no longer restrain his enthusiasm. Drawing the coin from his pocket he looked at it longingly for a moment, then, rolling it across the table, exclaimed:

"Here's your dime, ma. I'd rather talk."

Unique Altenberg.

Doubtless the most unique spot in Europe is the little village of Altenberg, on whose border three countries meet. It is ruled by no monarch, has no soldiers, no police and no taxes. Its inhabitants speak a curious jargon of French and German combined and spend their days in cultivating the land or working in the valuable calamine mine of which the village boasts.

Her Forebodings.

"Why are you worrying, dear?" he asked after they had got things settled in their cunning little bungalow.

"I was just thinking that if you turn out to be as great as I expect you to be and we have any children, they will have to take their places among the idle rich."—Chicago Record-Herald.

Not All Blank.

"How about this shooting?"

"My client's mind is blank, judge. That ought to be sufficient excuse to get him off."

"I might consider it if the cartridges had been blank too."—Kansas City Journal.

Fear and Danger.

Nervous Old Lady (to deck hand on steamboat)—Mr. Steamboatman, is there any fear of danger? Deck Hand (carelessly)—Plenty of fear, ma'am, but not a bit of danger.

Anxiety never yet successfully bridged over any chasm.—Ruffini.

Wilford M. Saucier

Rosthern Experimental Farm.

In a comprehensive article on "Experimental Farms in Northern Saskatchewan," in the Farmers' Advocate (Winnipeg) appears the following dealing with Rosthern Experimental Farm, of which Mr W. A. Munro, formerly of the Agriculture Office and the first district representative of the Department of Agriculture in Morrisburg, is superintendent. The article is profusely illustrated, all the illustrations depicting scenes on the exhibits from Rosthern Experimental Farm. The excerpt follows:

Within a mile of the town of Rosthern lies another Experimental Farm. It is located in a conservative German settlement and a more prosperous-looking country would be difficult to find. The farmers, some of them with foreign tongue, and nearly all with a foreign accent, have taken up mixed farming, have settled down to build real homes and to make permanent improvements that savor of prosperty Each farmer has shrouded his buil lings with trees and is a firm believer in a good garden. It is in such a community that W. A. Munro is conducting the Dominion Experimental Farm and it is this conservative, perhaps too conservative, class of agriculturists that the Experimental Farm is intended to serve.

Approaching the farm, the farm buildings, the lawn, orchard and vegetable garden are the first to come into view. The beautiful surroundings after such a short period of inauguration speaks well for the painstaking work that the superintendent has performed. The vegetables are of exceptionally good quality. Celery, tomatoes, carrots, onions, beets, cucumbers, squash and citrons all well advanced for the season. The raspberry canes were loaded with berries and the various flowering plants bearing clusters of bloom included different varieties showing colors of exquisite beauty.

The field crops were fortunate enough to escape the heavy hail storm that devasted a strip of the neighboring country. The variety tests and cultural experiments bore many lessions which will be absolute after harvesting.

As yet live stock has not been planted on a firm basis, the ffeld crops being given first place.

An exhibit from this farm was displayed at Prince Albert Exhibition, Its magnitude and artistic arrangement attracted admiration from all visitors. There were grains in bottles, plants of the different varieties placed with an eye to beauty, and various vegetables and fruits that added greatly to the grandeur of the display. It was a good advertisement for the farm.

Lieutenant-Governor to get $20,000 a Year.

As a result of the conference of the Provincial Premiers at Ottawa last week it has practically been determined to increase the annual stipend of his Honor the Lieutenant-Governor from $10,000 to $20,000, and the necessary resolution to implement this will be brought down in the Legislature when the estimates are considered next session. At the same time the designation of his Majesty's representative is to be elevated to Governor.

A further outcome of the conference is that the House will be asked to declare in favor of Provincial securities being placed on the trustee list in Great Britain, the necessary changes in legislation it is hoped, being secured to accomplish this object.

What the demand for an adjustment of the representation of the Maritime Provinces will amount to Sir James Whitney is unable to indicate. This is likely to become a political question in the east, and whatever is done will be bound to affect the other Provinces.

On the question of Provincial subsidies the Prime Minister intimated that he would be extremely disappointed if a larger subvention was not granted to the Provinces.

Local and District News.

Arnprior is to have a branch of the Victorian Order of Nurses The town Council has agreed to meet one half the year's expenses.

Mr. A. W. Brown of Elgin, has purchased the stock of the Palmer Lumber Company both in Kemptville and Smiths Falls, and is conducting a sale of the stock.

Mr. J. A. Lewis, the town clerk of Smith's Falls, has been appointed treasurer. He will do the work of both offices and draw the salary of both.

Whitteker, the Optician, will be at Chesterville on Tuesday, Nov. 11th; Russell, Thursday, Nov. 13th; Finch, Friday, Nov. 14th.

Mr. P. Vandelac of Montreal, will be at Chesterville, on Friday and Saturday, Nov. 7th and 8th to purchase horses.

Married at the R. C. church, Morrisburg, on Oct. 29th, by Rev. Father Meehan, Bernard Sweeney to Miss Verna McIvor, daughter of Mr. and Mrs. Andrew McIvor of Iroquois. The young couple left for New York city on their honeymoon.

Rev. P. A. McLeod, D.D. Kingston, was unanimously called to the pastorate of Kemptville Presbyterian church at a congregational meeting held last week, at a salary of $1,300 free manse and one month's holiday.

It is not generally known that the practice of carrying live fowls by the feet, with the head hanging down, is a violation of the law, and the offender is liable to arrest by the Humane Society. It is a fact nevertheless, and that act constitutes cruelty to animals.

On Sunday last Inspector Phillips of Smiths Falls, seized about 300 yards of nets containing fourteen salmon which he located in Murphy's Bay near Portland. Two men charged with thus violating the law were each fined $25 and costs. The salmon were divided between the two hospitals in Smiths Falls.

Rev. T. A. Sadler. B.A., Cardinal, who for the past six years has been pastor of the Presbyterian church there, has tendered and placed his resignation in the hands of Clerk of Presbytery. The Presbytery of Brockville met in Cardinal on Tuesday to consider his resignation. It is expected that he will leave for his new charge at Kensington, Montreal, in a couple of weeks. Cardinal greatly regrets the departure of Mr. Sadler and family.

John Johnston, of Ottawa, aged 58 years, a brakeman on the C. P. R. mixed train arriving here at 10.05, had a narrow escape from being killed at Hawkins' Crossing, one mile on this side of Bellamy's, this morning. A car was to be left off the train and while it was slowing up Johnston attempted to jump off. He slipped and so close did he come to the wheels that the lapels of his coat and a portion of the left sleeve were torn. Hishead struck the journal and several serious cuts and bruises were sustained. Arriving here Johnston was conveyed to St. Vincent de Paul Hospital where his injuries were dressed by Dr. Bowie. It is not known yet whether or not he is injured internally.—Brockville Recorder.

Michener to Retire?

Calgary, Alta., Nov. 4.—The News-Telegram a Conservative newspaper, publishes a story tonight to the effect that E. Michener, provincial leader of the Opposition, is to be appointed Lieut.-Governor of the province with the retirement of Lieut.-Governor Bulyea and that T. M. Tweedie, the member for Centre Calgary, is to succeed to the Conservative leadership.

East Middlesex Bye-Election

Toronto, Nov. 4—Sir Jas. Whitney stated today that the East Middlesex bye-election would be held on November 27, and nominations on the 20th.

Indian seal hunters in Queen Charlotte Islands claim compensation to the value of $1,500,000.

Chief John Holmes of Chatham, has retired, and is succeeded by Patrolman Thomas Groves.

New and separate actions are said to be contemplated on behalf of Miss Gladys Meredith against Brantford police officers

Civil War Veteran Dead.

Cornwall, Ont., Nov. 4—Richard O'Brien, one of the oldest residents of this section, died at Grant's Corners, at the age of eighty-eight years. He was a veteran of the American Civil War.

"Browns Nurseries are famous for their fine Peach, Apple, Plum and Cherry trees. They have the best nursery soil in Canada and are the largest growers of trees in the Dominion. All scions and budsticks are cut by one man, and he has been in their employ many years, so no mistakes are made by usiug wrong scions or buds. Send in list of the stock you need, and get their prices. Write for agency as they have some unoccupied territory in this County."

BROWN BROS. CO.
Welland Co., Browns Nurseries, Ont.

Baker—Casselman.

At the home of the bride's mother, Edith Annie, daughter of the late Gordon of East Williamsburg was united in holy matrimony to Mr. Charles S. Baker, son of the Mr. John E. Baker. The ceremony was performed by the rector of Williamsburg, the Rev. G. S. Anderson, in the presence of a large gathering of relatives of both the bride and the groom. Mrs. Clarence Baker played the wedding march while the bridal party came in procession and stood beneath a large wedding bell which hung from the centre of an archway. The duties of bridesmaid were gracefully performed by the niece of the bride, Miss Ada Castleman; and the groom was gallantly assisted by his nephew, Mr. Clifford Baker.

After the service and congratulations were over the large party sat down and enjoyed a most sumptuous marriage feast, when the usual toats and responses were not overlooked.

The large number of elegant and useful presents received by the bride were an unmistakable evidence by her popularity. Among the presents was a very handsome mantel clock, the gift of the members of Trinity Church choir, of which Mrs. Baker has been a faithful member for several years.

Mr. Baker although he has resided in Puyallup, Washington Territory, U. S. A., for some time has many friends in Williamsburg and all will join most heartily in wishing him and his bride a long and very happy married life.

Oakville Town Hall was burned, ioss $10,000.

London is likely to have a fine Technical school to cost about $35,000.

The schooner Flora T. foundered with two men in Northumberland Strait.

Mrs. Wm. Buck of St. Catherines is missing, and is supposed to be drowned.
