BUY W.S.S. WAR-SAVINGS STAMPS

High Prices are Predicted

For Eggs and Poultry, owing to Export Demand

☞ We Export to Great Britain direct ☜

It will pay Farmers handsomely to feed and care for their Poultry Flocks.

Farmers of Canada lose millions of dollars annually from bad methods of producing and handling eggs. Considerable loss is preventable because it is due to partial hatching of the fertile eggs which have been allowed to become warm enough to begin to incubate

Heat is the great enemy of eggs both fertile and infertile. Summer heat has the same effect on fertile eggs as the hen or incubator. Farmers are urged to follow these simple rules, which cost nothing but time and thought, and will add dollars to the poultry producers' returns.

1—Keep the nests clean and provide plenty of clean straw in and around the hen house.

2—Gather the eggs twice daily.

3—Keep the eggs in a cool, dry room or cellar until the collector calls for them.

4—Market the eggs at least once a week.

5—Sell, kill or confine all male birds when the hatching season is over.

6—Make application for membership in the Dundas Co-operative Association, Limited, and participate in the profits on the sale of your eggs and poultry.

Dundas Co-Operative Association
STORAGE"

This 25-lb. Pail,

A GUARANTEED STOCK TONIC

We Stand Behind Dr. Hess,s Guarantee

Why pay the peddlar more than our price?

Why over stock yourself with a tonic you know nothing of?

Why buy more than you require?

We urge every farmer right now not to overlook the SPRING PIG CROP—the mortgage lifters—keep them free of disease.

A GUARANTEED WORM EXPELLER

Worms are responsible for nine-tenths of your hog troubles at all seasons of the year, but especially in the fall. Do not be mislead thinking your hogs have some other ailment. Nine times out of ten their trouble is worms. Dr. Hess Stock Tonic will positively expell these worms and keep your hogs in a healthy condition, thereby enabling them to resist disease and lay on fat. FEED DR. HESS STOCK TONIC to your hogs right now. 25 lb pail $3.00 — 10 lb. package $1.35 4 lb. package 65 cts.

Highly concentrated as the small dose quantity proves. As a worm dispeller we will go the limit in guaranteeing DR. HESS STOCK TONIC. To clean out your hogs, put in the feed one tablespoon of Dr. Hess Stock Tonic to every two hogs twice a day and you will make short work of the worms. Your stock will grow and improve in appearance, and thrive.

DR. HESS' Guarantee

"So sure am I that Dr. Hess Stock Tonic will put your animals in a thriving condition make the ailing ones healthy and expell the worms; that Dr. Hess Poultry Pan-A-Cea will help make your poultry healthy, help make your hens lay and your chicks grow, that I have authorized my dealer in your town to supply you with thes e preparations and if they do not do as I claim, return theempty packages and get your money back. — Gilbert Hess, M. D., D. V. S.

Try a 25 lb — if it does not do all that is claimed return the empty pail and we will refund your money. — were you ever offered a fairer or more liberal proposition.

Col. J. W. Allison Buys Property in Ogdensburg

(Ogdensburg News.)

The Arnold brewery property located on Main street, was sold yesterday afternoon at a mortgage foreclosure sale held in the law office of D. B. Lucey to Col. J. W. Allison of Morrisburg for $12,000. The amount of the mortgage including costs, taxes and interest amounted to $14,048.21.

Just what Col. Allison will do with the property is problematical at present although he told a representative that it would not be idle for any length of time.

For years Col. Allison has had a tender spot in his heart for Ogdensburg and has always had a desire to do something that would boost the city. He is a man who when once he makes a promise he always keeps it. And it can just be reckoned on that something will be installed in the building that will employ labor and become a busy hive of industry. The Colonel has two or three things in view which yesterday he did not care to disclose but which will be disclosed shortly. No finer gentleman ever lived that Col. J. Wesley Allison. Broadminded, to the extreme, generous and kindly disposed in his make-up; a friend worth while, a hustler and a live wire. Ogdensburg can congratulate itself that it has at last such a man interested financially in its property and business life. He is a man of strong personality, keen and shrewd in business and successful in whatever he undertakes. That Ogdensburg is going to profit by his purchase of the Arnold brewery property there is no doubt.

* * *

We feel that we must congratulate the Editor of The News for his words of appreciation of a native of Morrisburg, an in every sense a shrewd, broad-minded citizen. But we can ill afford his attention to be drawn across the line by kind words. We do not question the writer's statement, that he has a warm spot in his heart for that Burg but there is another Burg which offers advantages, the equal of which is seldom heard off, and with which the Colonel is too well acquainted to overlook. In addition to natural advantages, he has the assurance that the citizens of Morrisburg will ever be found ready to back him up when opportunity presents itself!.

Will Face Murder Trial

Montreal, July 30th.—William Fallon, of Cornwall, the returned soldier, who was held by the coronerjs jury responsible for the death of Bella Roy of Ottawa, who was found dead in a St. Lawrence Boulevard rooming house on the morning of July 16th, appeared before Judge at for inquest vesterday, and was sent for trial before the Court of King's Bench.

Death Followed Airplane Crash

One man was fatally injured and another was severely hurt in an accident which occurred to an aeroplane at Winchester "Peace Day" when the machine dropped from a height of twelve feet, dug her nose into the ground and turned somersault, throwing the two aviators several feet.

The dead man is Pte. Willis Nephew 19 years old, Finch, Ont who suffered a fractured skull and two fractured legs. He died at the Royal Victoria hospital, Montreal. The injured man is Lieut. Arthur Deweert, 25 years of age, who is reported to live on the shore of Lake St. Louis, who suffered a fractured collar bone and severe injuries to his head and shoulder.

LOST

A purse on Gravel Road, containing a small amount of money; also very valuable keep sakes to the owner. Will finder kindly return to The Leader and greatly oblige.

Heartease and Gentian

By GERTRUDE ROBINSON.

PART I.

Eloise Cheney rose from her seat beside her mother and passed softly down the dim church aisle. She looked exactly like a wax angel—so thought Horace Ludlow, sitting in a remote corner in the rear of the faintly lighted church.

"What sinner is she going to tackle?" he asked himself lazily. It was revival time in Birch Point Union Church; and, obedient to the command of Parson Weatherby, even timid church members were becoming gentle evangelists.

And then the man realized what was about to take place. For the two years he had been working in Birch Point shipyard Horace Ludlow had looked on Eloise Cheney as an unattainable star; the very thought of some time speaking to her dizzied his brain. Now he knew in his inner consciousness that she was walking straight down the church aisle to speak to him! When she stopped, he could not lift his eyes to meet hers. He felt in a vague way that he was before a very holy of holies.

And then she spoke. "Please," whispered the timid, lilting, girlish voice, "please, don't — you — wish— Parson Weatherby to pray for you?"

Horace Ludlow could not speak. He opened his mouth, but words would not come.

"I'm sorry," faltered Eloise. "I thought—maybe—you would like to be prayed for, if some one only asked you!" With an effort the man lifted his head and looked straight at the girl. Immediately he became aware that Eloise, her delicate enthusiasm spent, was about to retreat. And she was sobbing! Sobbing, had he known it, for very shame at her temerity in speaking to a man she did not know. But to Horace Ludlow her emotion spelled sorrow for his wickedly stubborn heart.

He put out an impetuous hand. "Yes, oh, yes!" he heard himself pleading. "I do wish to be prayed for. I want you to pray for me. I—"

But Eloise was backing away. "I think Parson Weatherby would do it much better," she murmured. "I'll ask him to come to you."

Parson Weatherby, hastening to the rear of the church at her request, found no penitent. He was much disturbed; with all his experience with men and the curious wayfarings of the human soul, he did not know that out in the safe darkness of the churchyard the soul of Horace Ludlow was undergoing an effective regeneration. Horace was determining to make himself fit to look without flinching into the innocent eyes of his lovely missionary.

Presently the service closed. And then came to pass the second miracle —Eloise came out alone. Her mother was staying to polish the communion service for the next Sunday, and Eloise must hasten home to open the house for the sea-captain boarder.

Neither of them knew just how it happened, but Horace Ludlow found himself walking silently down the elm-shaded street beside the maid of his dreams. It was not until they had reached the turn of the main street and were climbing the hill at the crest of which stood the great white, square-pillared house which was the girl's ancestral home, that Eloise broke the silence.

"I'm sorry—you didn't—feel like seeing Parson Weatherby to-night," said she.

"I couldn't—after you," admitted the man, quite honestly and unexpectedly.

Eloise, breathing quickly, drew a pace away from him. Her mother had brought her up with all the scrupulous carefulness of the typical daughter of a time-touched Old Country family. She had never, as a child, played with boys, or as a maiden been permitted attentions from them. She wore her dainty frocks and went her dainty way as unsmirched with the world's knowledge as the flower she resembled. Her father was long dead, and the ancient sea-captain who boarded with her mother (for truth to tell, the family fortune had been less permanent than the family breeding,) treated her with the same gracious courtesy he gave her mother. Nevertheless, Eloise understood the significance of Horace Ludlow's involuntary admission.

"I'm sorry," she stammered. "I meant to do you some good." And then, on a sudden impulse, she picked a flower from the bed that bordered the walk and thrust it into the man's hand

"Put it in your Bible," she directed. "It will help you remember to be good."

Before her companion was quite himself, Eloise had unlocked the massive front door and had vanished within the darkness of the great house. As the young man walked rapidly back along the same street, his fingers clutched tightly the bit of a blossom. When he came to a light, he looked at it a minute.

"Heartsease!" he said to himself. "She has given me a sprig of heartsease, bless her innocent heart!"

The next Sunday morning Horace Ludlow was not in church. He spent a glorious day out on the great damp meadows of Edgecomb. There, in the piny, bracken-grown lands, he found what he was seeking—fairy clumps of fringed gentian, blue and wonderful as the sky itself. It seemed to him there was nothing else quite perfect enough to offer the maid of his dreams. He wondered how he should find courage to walk up to the great house and offer Eloise the flowers. And then came to pass the third miracle.

Toward him, stepping daintily and joyously, walked Eloise. She did not see the man until they met face to face. In her hand she carried a small basket and a little red-bound book. Not at all sure of how it happened, Horace Ludlow found himself walking back to Edgecomb, carrying the basket and the little book, while Eloise, beside him, had the great bunch of fringed gentians. She had been talking for some time before he realized just what she was saying.

(To be continued.)

Sword of Peace

An Interesting Peep at the Treasures of the Royal Armoury.

The "sword of peace" recently presented to King George by a Japanese editor is the latest addition to a collection which is said to be without a rival in the world.

In this Royal collection, of which the King is very proud, you will see swords of every conceivable type and form. In one case you will see an old Crusader's blade which laid many a Saracen low in Palestine seven centuries ago; and by its side, sheathed in a scabbard of purple and gold, inlaid with diamonds, rubies, and emeralds, the sword with which Bahadur Siraj slew himself rather than yield to his enemies on the plains of Indore, in Stuart days.

Here is a Persian blade, once worn by the Rao of Cutch, with a hilt of solid gold, encrusted with diamonds and bearing the inscription, "I was born to slay, but in me is mercy"; and it has for near neighbor a scimitar with which the Maharajahs of Indore did doughty deeds in half a hundred battles centuries before Clive set foot on Indian soil.

This straight, double-grooved sword, bearing the letters, "I.H.S.," was taken to the Crusades by an English knight, [illegible] our King John was on his throne; and, after disappearing for three or four centuries, somehow came into the hands of Sivaji, the freebooter, who with it hewed his way to the Mahratta throne. In a neighboring case we see a scabbard, ablaze with rubies, emeralds, and diamonds, which sheathes a sabre worn for many a generation by the Rajahs of Mandi.

Near to it are a gold-hilted sword, with this inscription in Persian, "There is no saint but Ali, no sword but Zulficar," which, five centuries ago, was held in superstitious awe as the deadliest weapon in the East, against which no warrior, however brave and skilful, could hope to live; and a murderous weapon—sword and pistol combined—said to have been invented by the infamous Tippoo Sahib.

Another sword is the very weapon with which Mir Nureef struck off the right hand of the treacherous brother who had stolen his wife from him during his absence from the Court of Akbar; and this blade, with its hilt of rock-crystal and diamond-studded gold, saw centuries of fighting in India after it had received its baptism of blood in the Crusades.

To this wonderful collection the Japanese sword comes as the first emblem of peace.

EMPIRE'S TRIBUTE TO CAPT. FRYATT

MEMORY OF HEROIC MERCHANT SEAMAN HONORED.

Remains Brought From Belgium With Naval Escort—Service at St. Paul's Cathedral—Interment at Dovercourt.

A national tribute of honor was paid on July 8 to the memory of Captain Charles Fryatt, executed by the Germans in 1916 for attempting to ram a U-boat, by a national memorial service at St. Paul's Cathedral, says a London despatch. After lying in state at the Dover station over night, the body arrived at Charing Cross Station at eleven o'clock, and was placed on a gun carriage drawn by blue jackets. A cortege was formed, headed by relatives and including representatives of the Admiralty, War Office, other Government departments and all seafarer's organizations.

With a naval escort and a band, the procession passed slowly through the crowded streets by way of Trafalgar Square, Northumberland Avenue, the Thames embankment and Ludgate Hill, arriving at the cathedral at noon. The coffin was hidden under a mass of flowers, among which were many magnificent wreaths from the townspeople and authorities of Bruges and Entwerp. Only the steady tramp of feet and the solemn strains of funeral music broke the silence as the cortege passed through the streets.

Memorial Service at St. Paul's.

At the cathedral the ceremonies were generally a repetition of those in memory of Miss Edith Cavell. The clergy received the body at the west door of the edifice, an orchestra playing a funeral march as the coffin was placed in position. The burial service was read and the hymns: "Eternal Father, Strong to Save," and "Abide With Me," were sung.

At the conclusion of the service the procession was reformed and again made an impressive progress to the Liverpool Street Station, where the casket was placed on a train and sent to Dovercourt, the home of Captain Fryatt, where the remains will be interred in the quiet parish churchyard, All flags which are floating over the public buildings of London in honor of the signing of the treaty of peace were half-masted during the ceremonies.

YOUTH WRITES A LETTER TO LOVE

Youth Writes a Letter to Love .... PART V.

It took her no more than a moment, and then she dropped it into her lap, still keeping a tight hold upon it.

"She shan't have it," she declared with bitter heat. "Designing—she hasn't any right—"

Replied the boy's father:

"He wanted her to have it, and it is our last chance to do for him something he wanted done."

That was how Mary Hopkins happened to get the letter that was never intended for her. It came when she was on a case, and three hours passed before she found an opportunity to read it behind the closed door of her room, sobbing over it, though there was as much tenderness and adoration as grief in her tears, and a great joy in her breaking heart.

After a single reading she knew it by heart, and so could keep on reading it when her eyes were too tear-dimmed to see:

Mary Dear: I don't think I'll ever see you again, but Love doesn't get shot down in the trenches. I want you to remember that always and always.

Your Godfrey.

And so, you see, it was the love of Godfrey Hammond for the stationer's unworthy Mary that gave all that courage and inspiration to Mary Hopkins the nurse, making her all that she had been in France.

Youth wrote a letter to Love, and the letter Youth wrote was delivered.

(The End.)

Willing To Be Reasonable.

The talented actress, Miss Lena Ashwell, who did a lot of entertaining of wounded soldiers during the war, tells a story concerning an Irishman named McGuire.

Gassed, and suffering from trench fever (says Miss Ashwell), he positively refused to take a second dose of medicine, which happened to be unusually nasty.

Several smiling nurses bent over him, and tried to coax him to be good.

"Come," pleaded one, "drink this and you'll get well."

"And rosy too," chimed in a second.

Pte. McGuire brightened up visibly and sat up in bed. After surveying the pretty group, he enquired eagerly:

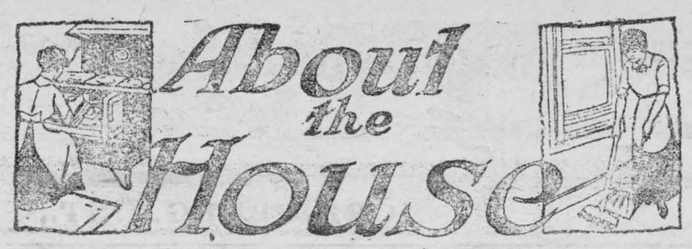

"And will yez be after tellin' me, which one of yez is Rosie?"

Archie—"I can marry any woman I please." Clarice Marte—"Then, I conclude, you haven't pleased any yet."

The manufacture of clothing in all forms has developed into an important industry in recent years throughout Australia.

At the last census there were 39,577 persons of German birth living in Canada, and 2,501,181 living in the United States.

Minard's Liniment Cures Garget in Cows.

Avoid a Heated Kitchen in Dog Days.

If signs of the time as displayed in store windows count for anything, Canadian women are about to plunge into an orgy of household machinery buying. Certainly the signs are plentiful and portentious in that direction, for department store windows which once were filled with smart hats and gowns, or with period furniture and near-oriental rugs, are now showing a "full and complete" line of washing machines, mangles, ironing machines, gas, electric and oil stoves, electric irons, gas irons, charcoal irons, bread-mixers, cake-mixers, in short, everything so far put on the market to make woman's work lighter.

And best of all signs, the women are pausing to study these same windows. Even greater crowds surround the window where foamy suds splash about in an electric washer, than before the window where Parisian models of robes no woman could wear are displayed. Women are beginning to see that it is more extravagant to spend $50 for a sleazy silk gown than it is to spend $100 for a washing machine and mangle. And when they once begin to think it is only a step to putting the thought into deeds. Many are already buying, and when the knitting club meets now the relative merits of vacuum cleaners or of cylinder washing machines come up for discussion before hobble skirts and capes.

Certainly something must be done to make woman's labor lighter if families are to be raised, for no woman can take care of a home and a family of children and do all of her work unaided, without killing herself or leaving undone many things which should be done if health and happiness are to be maintained. In the city and in some farm homes electricity solves the problem, but there are still hundreds of farm houses where electricity must continue to be something to be hoped for in years to come. Many things may be done, however, to lighten the burdens of the women in these homes, and it is up to the woman herself to see that they are done.

Take the matter of a stove for one thing. Wood is becoming almost unknown as a fuel in the average farm home, and the experiences of 1917-18 show us that coal is not always to be had. Furthermore, the price of that fuel is going up so that it can no longer be regarded as cheap. Both wood and coal make extra dirt, and thus extra work, while the labor of building a fire and keeping it going is no small part of the day's work. Much of this unnecessary work could be cut out by buying a good oil or gasoline stove. Once filled it is good for at least a day, and in homes where it is not so much used as a stove often does the cooking for several days with one filling. Then how easy to simply turn a burner and apply a match when you want a fire. No splitting kindling or sending the children scurrying for chips when you suddenly discover you are out of bread and have biscuits to make. No cooling of the oven with a delicate cake baking, because you forgot to fill the stove and the wood has all burned out.

Best of all, think of the comfort in summer. The hours of standing over a scorching stove are eliminated. The meals may be prepared and fruit canned in a cool room. And on ironing day you can have the stove moved outside onto a sheltered porch and do the ironing in comparative comfort, if you have not yet attained the luxury of a charcoal or gasoline iron.

Get the iron, however. They may be purchased for a small sum and the steps they save you in traveling back and forth for a hot iron more than pay back the money you spend. Along with the iron get a mangle. You probably will not want to pay $150 for an ironing machine, but the mangle will do sheets, towels, unstarched kitchen aprons, and even men's work shirts quite satisfactorily.

With your stove and laundry appliances eliminating unnecessary heat, you will get through the summer in much better shape than ever before.

The Health-Giving Salad.

Salads are a popular summer dish. They should be made from fresh vegetables, which contain the health-giving elements that are so vitally essential for our physical well-being. There are also the mineral salts, which help purify the blood stream, and thus keep us physically fit.

Eggs, etc., that are used in preparing the dressings, have a food value that may be figured upon in our daily ration. Heavy salads, composed of meat, are best to be eliminated for the hot weather. Replace them with light, dainty and attractive salads, that are not only appetizing, but also easily digested.

The making of a successful salad is an art indeed. The proper blending of the various ingredients and then using a well blended dressing and garnishing, so that it will not only satisfy the eye but will tempt the palate as well—that is a real salad.

The proper combinations are very important; harmony must prevail. As, for instance, a combination of beets, tomatoes and carrots would not only be inartistic but also a poor combination of foods. Care must be taken in preparing the lettuce or other greens used. All plants that form into heads must be separated and thoroughly washed in order to free them from dirt and insects, and then they should be given a final washing in water that contains one tablespoon of salt to every two quarts, then rinsed in ice water. The bath in salt water will remove the tiny and almost invisible mites and slugs that cling to these greens.

Boiled Dressing—Mix 3 tablespoons sugar, 1 tablespoon mustard, 1 teaspoon salt, speck red pepper, add 2 well beaten eggs and ½ cup vinegar; stir over boiling water until thick, remove from fire, add 3 tablespoons butter. Cool and seal in glass jar. Thin with sour cream when needed.

Russian Dressing—One cup of boiled salad dressing, one raw beet, one raw carrot, one raw onion. Pare and then grate the vegetables into the salad dressing and then add one teaspoon of salt, one teaspoon of red pepper, one-half teaspoon of mustard. Beat to mix and then use. This dressing will keep for a week, if it is placed in a bottle and then stored in a cool place.

French Dressing—Place in a bottle one-half cup of salad oil, three tablespoons of vinegar or lemon juice, one teaspoon of salt, one-half teaspoon of mustard, one-half teaspoon of pepper. Shake until creamy and then store in a cool place. This will keep until used.

Pimento Dressing—Add four finely chopped pimentos to one-half cup of prepared salad dressing.

Paprika Dressing—Add one and one-half teaspoons of paprika to the French dressing. Shake well to blend. Paprika is a sweet, mild red pepper that will not bite the tongue. During the warm weather use salads twice a day, beginning the day with watercress, radishes, or crisp young onions or leaves of lettuce, for your health's sake.

Vegetable Timetable.

The time required for cooking vegetables depends on the kind, size and age of the vegetable. You must use your own judgment in deciding when they are done, but a timetable may help you.

Timetable for cooking fresh vegetables in water:

Asparagus	15-20 minutes
Beans, Lima (green)	¾-1 hour
Beans, string	1-3 hours
Beets, old	3-4 hours
Beets, young	¾-1 hour
Cabbage	20-30 minutes
Carrots	30-60 minutes
Cauliflower	20-30 minutes
Corn, green	10-15 minutes
Onions	20-30 minutes
Parsnips	30-45 minutes
Peas, green	20-30 minutes
Potatoes	30-40 minutes
Spinach	15-30 minutes
Squash	20-30 minutes
Turnips	30-45 minutes

What Salt Will Do.

Dip a piece of flannel in salt and whiting to clean knife handles, stained teacups and glasses.

SALT

All grades. Write for prices.
TORONTO SALT WORKS
G. J. CLIFF - - TORONTO

Salt scattered on the carpet before sweeping is very good, but be sure to sweep it all up, as the dampness might make it run.

By adding a tiny pinch of salt to milk when fresh it will keep a much longer time.

Egg stains on silver can be removed by rubbing with a little salt and a damp cloth.

Saskatchewan Wool.

It is expected that fully 500,000 pounds of wool will be shipped this year to the Co-operative Branch, Saskatchewan Department of Agriculture. Contracts have already been sent in for 45,000 fleeces, an increase of 25 per cent. over last year, according to the Winnipeg office of the Department of Immigration and Colonization.

FLEET FOOT

for all work about the farm

FLEET FOOT Shoes are much cheaper than leather. That is why FLEET FOOT is so economical for farm work in the summer.

The strong canvas uppers and springy rubber soles make "WORKMAN" and "EVERY-DAY" shoes easy, restful [illegible]fortable—and sturdy enough to stand up to rough work.

As it is, FLEET FOOT Shoes mean money in your pocket, for you can have several pairs of FLEET FOOT for the price of one pair of leather shoes.

There are FLEET FOOT styles for men, women and children—for work and play—for every-day and Sunday wear.

DOMINION RUBBER SYSTEM

Ask your dealer for FLEET FOOT Shoes. The name is stamped on each pair.

Soils and Crops

By Agronomist.

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W. Toronto.

Summer on the Dairy Farm.

The misty morning air, noonday heat, balmy evenings, murmuring brooks, soft breezes, luxuriant herbage and lowing herds are phrases for poets, not dairy farmers, to conjure with. The man who provides means for contending against the hot, blistering sun, flies, drought, stagnant water, declining milk yields and loss of flesh condition finds more prose than poetry in the management of dairy cattle during the summer months. Farmers have learned to care for cows better in the winter than in the summer.

To maintain a cheap and satisfactory flow of milk, pastures must be supplemented with some cheap, bulky food as well as grain. Dairy farmers are finding the silo of incalculable value in avoiding summer losses. Silage feeding in many localities has reduced milk losses and solved the problem of maintaining the cattle in a thrifty, flesh-gaining condition during the summer. During recent years thousands of dairy farmers have avoided losses which formerly amounted to from twenty to thirty per cent. and the expenses for silage were repaid two times over in the actual saving of flesh condition and growth of the animals. The summer silo marks the elimination of drought losses from the accounts of the dairy farm. With silage at hand one may rely on pasture simply to supply its crop of feed as a contribution to the ration which is completed whenever necessary by additional feed. More uniformly profitable milk yields and growth of young stock are thus secured in spite of the eccentricities of the weather. With the losses from drought eliminated every possible pound of feed is made into milk, growth and fat.

Next to feed, water has the greatest influence upon the flow of milk and the health of the cattle. Cows should have as much water as they will drink during the summer. The supply should be pure. The drinking of impure water not only has a deleterious effect upon the milk, but it leads to parasitic infection which lowers the cow's vitality and lessens the flow of milk. If the water in the pasture cannot be procured from a clean spring or running stream it should come from a deep well that is not subject to surface drainage. The same principles apply to the quality of water used for washing dairy utensils. Impure water used for washing utensils is a frequent cause of bad flavored milk. Of the inorganic foods perhaps the only one that needs to be supplied is common salt. The other constituents are present in sufficient quantities in the food and water.

No one thing will do as much toward insuring a high grade of milk during the summer months as keeping the utensils clean and sanitary. Milk may be produced in any ordinary farm from healthy, well-fed cows and drawn in a cleanly manner, but the good effects of such care will be wasted unless it is extended to the utensils. The various kinds of bacteria are unusually active in warm weather. Many thousand may be concealed in a crevice so small that it can hardly be seen, and if these get into the milk they may increase more than one thousand fold within twenty-four hours. A little milk left in the seams, or about the rim of the pails and cans harbors thousands of bacteria, and their injurious effect is sure to be great if the conditions are favorable for their development.

There seems to be a general tendency on the part of dairymen to neglect sanitary conditions about the premises during the summer. While the work in the field is pressing, the gutters are allowed to become full of manure, the alleys scattered with litter, the windows and walls dirty and covered with cobwebs and a general air of neglect is apparent. Special effort should be made to keep manure cleaned up about the stables and yards during warm weather. Manure piles are an ideal place for flies and bacteria to thrive and multiply. It is impossible to produce high grade milk under filthy surroundings. Cows that are kept under such conditions will wade through the manure and get their legs plastered with it during rainy weather. It pays to clean up the yards early in the season and destroy the breeding places of flies and vermin. Lime spread liberally in the yards and stable will keep down foul odors and make life less comfortable for flies and vermin. Sawdust is an excellent absorbent to use in the gutters while the cows are being kept on grass and other succulent foods.

The work of handling the milk so that it will keep until ready for shipment or delivery to the creamery, factory or condensary is greatly simplified if one has an abundance of ice at hand. The milk should be removed from the stable at once, the cans put in a tank of cold water, and the temperature reduced as quickly as possible by frequent stirring. This removes the animal heat without exposing the milk to the air which even under the most ideal conditions is sure to have more or less bacterial dirt floating in it. Cold and cleanliness are the agents that must be employed in making high grade milk during the summer.

After providing an abundant supply of bulky, succulent feed and clean and sanitary surroundings the next problem is handling the herd so that the losses from flies during the hot season will be minimized. Anything we may do to alleviate the suffering of the stock during this period will be amply repaid us in the increased flow of milk and gains in flesh condition. One pint of blood from each cow daily is the heavy toll demanded by flies during their period of greatest activity. Such losses and suffering mean that they cannot produce profitably at the pail. In nearly all dairy localities flies cut down milk receipts from thirty to forty per cent. No dairy farmer can afford to stand such losses. Keeping the cows in darkened stables during the heat of the day and spraying them with fly repellents greatly reduces their suffering. A spraying material made up of fish oil one hundred parts, oil of tar fifty parts and crude carbolic acid one part, applied every other day will give excellent results. A number of the commercial dips and sprays will produce equally good results. It is imperative that we use some form of fly repellent if we get best results from the cows during fly time. Young calves should be kept in a darkened stable during the day and turned out in the pasture at night for exercise during fly time.

Grade the Pullets.

There is a loss in farm poultry flocks from keeping all of the pullets that grow instead of culling them rigidly and keeping only the most vigorous of the best breeding. It will pay to divide the pullets into three grades. The first grade will be the birds which have feathered early and grown rapidly and were hatched from the best breeding stock on the farm. Such pullets should be suitable to keep until they are two years old with occasional culling to remove any birds that fall below expectations.

The second grade of pullets can contain the birds which may be satisfactory to keep for eggs during their pullet year. They can be forced for eggs and then sold for meat at the end of their laying period. If any of them develop unusual qualities of value they can be advanced to the first grade and held over another year for breeding stock.

The third grade pullets should be marketed the same as broilers. They will contain the birds that feather slowly and seem to lack the vigor that is necessary for good laying or breeding stock. They are the type of birds too frequently saved over in the farm flock and they seldom produce enough eggs to pay their cost of production. In addition, they lower the vigor and general laying average for the flock and reduce profits and chances for flock improvement.

The pullets of the third grade should not be sold to beginners for breeding stock or layers as this is very unfair. The amateur breeder will try to be successful with them and fail, and a good friend to the poultry business and a successful breeder may be lost because of the first failure with poor stock. Too often breeders with good stock sell their cull pullets to amateur breeders and it always injures their future business and is thus as unprofitable to them as to the buyer.

The pullets of the second grade may not be good enough for the owner's flocks and yet be very satisfactory to a buyer who may wish a small flock of layers. It is fair to sell such stock as the buyer can often be very successful with them. In that way a new poultryman is made and such a man is apt to purchase higher class birds after enjoying some success with birds not quite so good.

It pays to keep the best grade of pullets where they can receive first-class care. This develops them into fall layers and if they lay all winter without too much forcing, the eggs laid in the spring can be used for hatching. Of course, these eggs will not be as good as the eggs laid by mature hens which have not laid often during the winter. However, they will produce very good chicks. This means that the pullets must be isolated from the cockerels and the old hens so that they can be given rations which promote a rapid, even growth and will not be disturbed at feeding time by other stock.

All the pullets should be given a separate range as soon as they have feathered out so they can be easily separated from the cockerels. This gives the poultryman a better chance to study the pullets on the range and the constant observation enables him to grade them fairly accurately. Strangers watching a poultry flock will wonder how the birds can be told apart if they are the same age and of the same breed. The poultryman of experience soon learns that the young poultry have an individuality of their own and he soon learns to watch the progress of certain birds the same as he would study certain calves or colts.

Where I Rest.

There is a place where I am wont to stray
When every hope seems vanquished by a grim
Relentless Fury, and the chosen way
Grows shadow-cast and dim.

The placid stream allays my shapeless fears:
With quiet faith it flows serenely past,
Until ashamed of my rebellious tears,
I find them gone, at last.

My pettiness is lost amid the sight
Of that vast out-of-doors before my eyes;
The stretch of sturdy hills, the fields of light,
The sweep of glowing skies.

There comes a clearer vision to me there,
A quiet courage for the daily test,
And in the wonders of God's open air
I am again at rest.

"Making Two Blades Grow Where Only One Grew Before"

Bank Another $40 Per Acre On Your Fall Wheat

No crop Ontario grows shows better profits with proper fertilizing than Fall Wheat. Returns 12 to 30 extra bushels per acre—with the same labor cost, remember—are proven over and over again. Sown with the seed, **"Shur-Gain" Fertilizer** starts the plant off with vigorous growth, gives strong, numerous rootlets that shake off the heaving and root-snapping influences of frost, and supplies the rich, balanced nourishment needed for a heavy crop.

Gunns **"Shur-Gain" Fertillzers**

Are compounded by experts who know from actual field experience what Ontario farms need. They are concentrated, finely ground, quickly assimilated by the soil. They give nitrogen, the stalk-framer; phosphoric acid, the plant ripener and root invigorator, and potash for strength and disease resistance. Forty years of success.

SEEDING TIME IS NEAR GET YOUR SUPPLY NOW

This advertisement will be wasted if we don't impress you with the danger of delay in ordering, risking shipping delays, last-minute rush and scarcity of materials. Don't let the other fellow beat you out. Get early shipping discounts. Get your **"Shur-Gain"** now. See or phone your dealer to-day.

GUNNS LIMITED - WEST TORONTO

Selecting Memorials

Man has always been a maker of memorials. His desire to be so is a manifestation of his innate craving for immortality. From the very earliest times he has aspired to keep alive at least the memories of great men, or of great deeds, or of astounding events. The Greatest of Teachers did not neglect this elemental phase of human character and one of the most beautiful services of the Christian church was founded as a memorial. With this end in view, too, men have created, often with tremendous expenditure of labor, many different kinds of commemorative monuments. In most instances these structures have long been of great historical value. The pyramids and obelisks of Egypt, the sculptured friezes and other forms of architecture of the Greeks and Romans and the altars erected by the ancient Israelites each and all proclaimed in unmistakable terms the character and spirit of the men who erected them, quite as much as they kept alive the memories of the objects they were designed to commemorate.

During the past six months, very much has been said and written about memorials that will most fittingly call to the mind of future generations the splendid deeds of sacrifice performed throughout the war. To do this in the fullest and noblest sense, the memorials should possess characteristics that will symbolize the spirit that animated the men who fought and died. It is left for those who sacrificed in a lesser degree, or sacrificed not at all, to determine how these characteristics are to be exemplified.

The greater number of the memorials so far suggested are designed with a view to their being of service to the communities in which they will be erected. The time when it was the custom to place bronze effigies of soldiers on granite pillars as an excuse for forgetting deeds of valor is happily past. At the same time, the building of hospitals, schools, halls, libraries, churches and other community institutions for memorial purposes should be more than expression of a materialistic age. Such institutions may be of deep and lasting service, or they may be merely utilitarian. Such structures can be memorials in any real sense only if those who erect them have felt deep within them the spirit of service and have given adequate thought to the visible embodiment of that spirit. Further, there is a danger that these, of themselves, will in time lose their glamor. To prevent this, it will be desirable to hold patriotic festivals in them on the anniversaries of the great battles of the war in which special attention should be paid to the spirit of service as well as to the memory of men and women who transcribed their conception of service in terms of supreme sacrifice. It is essential that memorials, whatever their form, should convey something of the beauty and courage and love of country that inspired the heroic deeds. It is important that they should be well and truly built, so that centuries hence they will recall these deeds to men and women and create in them a desire to cherish the memories of those who died in a titanic struggle for human freedom. In any case, it should be realized that future generations will be in a position to judge with unfailing accuracy whether the motives that prompted the building of the memorials were worthy ones or merely shams.—A. D., in Canadian Municipal Journal.

Health Talks

By John B. Huber, A.M.,M.D

Dr. Huber will answer all signed letters pertaining to Health. If your question is of general interest it will be answered through these columns; if not, it will be answered personally if stamped, addressed envelope is enclosed. Dr. Huber will not prescribe for individual cases or make diagnosis. Address Dr. John B. Huber, M.D., care of Wilson Publishing Co., 73 Adelaide St. West, Toronto

How To Prevent Hydrophobia.

The only way to prevent hydrophobia is by administrative measures strictly enforced.

England not only has a muzzling order; but what's more, she strictly enforces it. Those who idolize dogs at the expense of human life get no sympathy. The result? Whilst hydrophobia used to be very rife on The Tight Little Island, the dreadful disease is now practically unknown there.

When stray dogs are captured methodically and without let up hydrophobia diminishes progressively to the vanishing point. When the pursuit of the civic mongrel is relaxed rabies again puts up its horrid front and the number of its victims increases. All dogs that are worth the price of a muzzle or a leash should be muzzled or leashed; the others should be destroyed. After all, the right fate for the unclaimed, starved, miserable dog is the blessed nepenthe afforded by the town pound; or, far best of all, the pathological laboratory, where those wicked visisectionists work under the shameful pretense of assuaging human suffering and of benefitting humankind. Let us not be molly-coddles here.

And remember that besides rabid dogs there may be other rabid animals. Wolf bites are most dangerous by reason of the vicious character of the wound and the virulence of the poison. Cat bites come next; and then dog bites and so in order, rats, foxes, jackals, bears, horses, cattle, sheep, pigs. But the wolf's, and next the dog's bites, are generally responsible for the disease in the animal world.

Bites on exposed surfaces are more dangerous than through the clothing; saliva is wiped from the teeth on the latter and little or none enters the wound. For the same reason long-haired dogs and sheep escape infection. Face bites are the more dangerous. Happily the majority of those bitten by a rabic animal do not develop rabies—one in seven is about the proportion.

Question and Answers.

My daughter is a school girl aged 16. She has inflammation of the inner lining of the white of the eye. Can it be cured and will her eyes be as strong as ever again?

Answer—This lid inflammation is called conjunctivitis. It requires local applications which should be made only by the family doctor. For an eye wash a teaspoonful of boracic acid in a pint of water, that has been boiled, is right. Practically all eye troubles, that produce matter, are contagious. For the sake of others, therefore, as well as for your own family's sake, have this inflammation attended to at once. It can be cured, and if the trouble is attended to promptly, the eyes, in most cases, will be as strong as ever.

What is dry pleurisy? I have been told I have that. Also, one side of my chest is bigger than the other. Does this mean tuberculosis?

Answer—I am sorry to say that in many cases, pleurisy is the forerunner of tuberculosis. Further information is being mailed you.

Hogs

One of the best investments the breeder or farmer can make is a safe and comfortable house and yard for the breeding boar. It should be away from the rest of the hogs, but connected with the other yards with a lane or driveway. A comfortable colony house and a strong iron fence inclosing a small yard, and a larger yard making altogether an acre of land will be sufficient to give him the necessary exercise and afford good grazing when the ground is not covered with snow. If the soil is good and the lot properly drained by a porous subsoil or tile it will produce a variety of grasses and clovers, such a combination as will suit the needs of the hog. Alfalfa is not well suited for the small yard so one must provide grasses that are. Bluegrass, orchard grass, timothy and red-top mixed will survive and last for years unless abused or rooted out. To start such a combination of grasses in the boar pasture prepare the ground in the spring, sow oats and peas mixed and seed with timothy, clover, orchard grass and red-top mixed equal parts and add one-third the amount of bluegrass. The lot will be ready for grazing in six weeks. Such a seeding will come on and furnish grazing for a long time.

Alfalfa is such a valuable crop for grazing that it will pay one to have a field adjoining the boar's yard, so that he may have access to it when it is ready for grazing. If the growth is too luxuriant for him to graze profitably alone turn one or two bred sows in with him to get the full benefit of the crop. By changing him as the conditions of growth in the two lots demand and allowing one or two sows to run with him when there is an abundance of grazing he will always have better grazing than when only a small lot is used. Of course, if he is to have good grazing he must have rings in his nose to prevent rooting.

Such a house, yard and pasture for the boar will save a lot of unpleasant and risky work in caring for the hogs, more especially when an aged boar is kept on the farm. Besides there is no more disgusting feature of hog raising than to have breeding boars breaking through fences and running about the premises rooting up the gardens and shrubbery and tearing up things in general. The man who takes pride in his work and keeps a breeding record of his sows will not allow his boars free run of the premises.

A rank growth of weeds becomes an asset when plowed under before they make seed.

One farm flock of 75 hens is reported as laying 120 dozen eggs in July and August which sold for $30, the hens gleaning their entire living during that time from grain picked up from harvested fields of wheat, oats, and rye.

The Dairy

The farmer of moderate means can use an ordinary herd of cows as a part of the foundation of a splendid grade herd if he selects a good sire of either one of the great dairy breeds. He can secure one or two heifers of the breed of his choice for a moderate outlay of money and gradually as time goes on he can sell his grade cows to his less fortunate neighbors and fill their places with pure-bred animals grown on his own farm. By and by he will find himself with a pure-bred herd and it will have cost him no large amount of money at any particular time. Such a course and such results are within the reach of most farmers throughout the country.

The cow must be in proper condition to go through the work of making a good production record, whether for seven days, thirty days, ninety days or one year. Few breeders of dairy cattle realize what condition means in making a great production record. It is often the extra few pounds of flesh and reserve energy that means the breaking of a world's record for milk and butter-fat production and places some breeder on the highest pinnacle of fame. It is difficult to define exactly just how to put on this extra flesh and bring the cow safely through her calving period, but it is seen only when cows begin their official tests as vigorous and well-fleshed as skillful feeding can make them. Condition, as meaning capable of maximum production, is necessary before a phenomenal record may be looked forward to in the coming test.

A good motto for the gardener and truck grower to keep in mind these days is "Get the weeds conquered before they conquer you."

Sell only clean eggs of good size at top prices. Use small, odd shaped and soiled eggs at home. As a rule it is not advisable to hold eggs for a rise in price.

When hens are being compelled to forage for the greater part of their living, drop into their roosting quarters frequently in the evening and feel of their crops. It is the full crop, like the full dinner pail, that gives results. If the crops are not well filled, supplement their gleanings with a good feed of grain at night. There's money in it.

When it became definitel, known that H.R.H. the Prince of Wales would open the Canadian National Exhibition this year the management at once got into touch with the official photographers in London and requested a profile photograph of him for reproduction on the Victory Year Medal to be awarded to the winners in the Agricultural and other sections of the Big Fair. The photo shown above was received after considerable delay, and immediately a cable was rushed back to this effect:

"A mistake has been made. An official picture is desired. One you sent shows the Prince without hat or coat and with khaki shirt collar turned in. Charming deshabille, but hardly dignified enough."

Then came the answer:

"Sorry you dislike it. It's the Prince's favorite picture, taken with the Canadians in France and in every sense official."

And that is the reason why the People's Prince will appear on the Canadian National Exhibition 1919 medals, hatless, coatless and in the careless attire of the Fighting Man in France. He will open the Big Fair on Monday, August 25th.

THE LISTER MILKING MACHINE

July 12th., 1919

R. A. Lister & Co.,

Gentlemen,—Last spring I purchased, through your agent, Mr. A. H. Beckstead, one of your milking machines, and I am pleased to say that it has given entire satisfaction. It does not injure the cows, nor put them off their milk. We have put it to a test, first milking by hand, and then with the machine and they gained 75 pounds with the machine. It is easily and quickly cleaned, and we are well pleased with it.

James Zeron.

NOTICE TO CREDITORS

In the matter of the Estate of Margaret Young late of the Township of Williamsburg, in the County of Dundas, spinster, deceased.

Notice is hereby given pursuant to section 56 of the Trustees Act R.S.O. 1914 Chap. 121, that all creditors and others having any claim or demand against the Estate of the said Margaret Young who died on or about the Eleventh day of July, 1918, at said Township, are required on or before the Twelfth day of August, to send by post prepaid or deliver to the undersigned Solicitor for the Executor of the last Will and Testament of said deceased, their christian names and surnames, addresses and description, the full particulars, in writing, of their claims duly verified and the nature of their security, if any, held by them.

And take notice that after such mentioned date said executor will proceed to distribute the assets of said deceased among the parties entitled thereto having regard only to the claim of which he shall then have notice and will not be liable for any part of said assets to any person or persons of whose claim notice shall not have been received at the time of such distribution.

Dated at Morrisburg this 12th day o July 1919.

Arthur Flynn,
Solicitor for the Executor.

Greatest Rule of Health

And How it May be Carried Out With Dr. Chase's Kidney-Liver Pills.

You sometimes hear it said that the most important Rules of Health is "Daily movement of the Bowels."

Constipation begins with the bowels but it does not end there.

You must also consider the way it effects the liver, the kidneys, the digestive system, and in fact the whole human body.

Headaches, backaches, aching limbs, indigestion, biliousness, kidney derangements, appendicitis, and the most serious diseases imaginable often have their beginning with constipation of the bowels.

There is one treatment which has a direct and combined action on the bowels, the liver and the kidneys and gets these organs into good working order in remarkably quick time, and that is Dr. Chase's Kidney-Liver Pills.

They afford relief quickly, but they do more than that. They positively cure constipation, and insure lasting regularity of the bowels by setting the liver right.

Mr. M. Lock, 30 Home street, Brockville, Ont., writes: "For many years I have been troubled with constipation and have tried a number of remedies, but without obtaining much benefit. About a year ago I started using Dr. Chase's Kidney-Liver Pills, and have found them to be the best medicine for constipation that I have ever used. I would strongly advise anyone troubled with this complaint to try the same remedy."

Mrs. R. Childs, Harriston, Ont., writes: "I suffered from constipation and kidney trouble for some time. One day I bought some of Dr. Chase's Kidney-Liver Pills to see if they would help me, and to my delight, I received great benefit from them in a short time. They are a splendid medicine, and I always keep them on hand as a household remedy."

Dr. Chase's Kidney-Liver Pills are so universally used as a treatment for constipation and liver and kidney troubles that you can obtain them at any store where medicines are on sale. One pill a dose; 25 cents a box. Edmanson, Bates & Co., Ltd., Toronto.

PILES Do not suffer another day with Itching, Bleeding, or Protruding Piles. No surgical operation required. Dr. Chase's Ointment will relieve you at once and as certainly cure you. 60c. a box; all dealers, or Edmanson, Bates & Co., Limited, Toronto. Sample box free if you mention this paper and enclose 2c. stamp to pay postage.

Even Two Coats of Paint Give Less Than a Hundredth of an Inch Protection

When you know that you must depend on a paint film less than a hundredth of an inch thick to protect your buildings from weather's wear and tear you begin to realize the vitalness of buying the right paint.

An outside paint must be not alone waterproof but weatherproof. Making a paint weatherproof is the difficult part. If it is not weatherproof it will not long stay waterproof.

To be weatherproof, the paint film must be so elastic that it will expand or contract with the weather's changes—and do it without cracking.

Lowe Brothers
HIGH STANDARD LIQUID · PAINT

is specially made to meet these conditions. That is why it stands so many years of weather's wear and tear.

The picture [illegible]en from a photograph showi[illegible]t film of HIGH STANDARD PA[illegible]he hand. The film was over two [illegible] old when photographed; yet it was as flexible as a handkerchief.

If you have been having paint troubles, or want to prevent them, tell us about your painting needs. The expert advice given so gladly will cost you nothing. It may save you much.

OUR CORRESPONDENTS

HOASIC

Mr. and Mrs. Arthur Wells of Syracuse are spending a few days at Morley Wells.

Mr. and Mrs. Lucius Froats and Mr. and Mrs. Allen Casselman of Morrisburg spent Monday at Frank Wells.

Mr. and Mrs. Wm. Kermeny and Mr. and Mrs. Willis Swerdfeger spent Sunday at Mr. Clarence Becksted's, Boucks Hill.

Rev. Cameron of Morrisburg called at Durham Wells Tuesday.

Rev. F. Bernion spent a few days this week with Mr. and Mrs. Bert Marcellus.

Mrs. B. Stillson spent a few days this week with Mrs. Casselman Fetterly.

Much sympathy is extended Mr. and Mrs. Oliver Aulgire and family in the death of their little daughter, Hilda, which occurred at their home here this week quite suddenly.

Mr. and Mrs. Daniel Durant and Miss Ada and Ella spent one day last week with Mr. and Mrs. Bodette, Archer.

Mr. Daniel Dillabough and Mr. and Mrs. Morley Dillabough and little daughter spent Sunday at D. Durant's.

Mr. and Mrs. Sanford Colquhoun spent Sunday at George Colquhoun's, Boucks Hill.

Mr. and Mrs. Jack Morrison of New Jersey are spending a few weeks at Mr. Edward Swerdfeger's.

Mr. N. Marcellus and Miss Racheal Eamon of Boucks Hill spent Sunday at Darwin Weegar's.

Mr. Fred Wiggins and Mr. La Rose of Morrisburg visited the home of Durham Wells on Friday

NATION VALLEY

Miss Ella Merkley visited Morrisburg Saturday.

Mr. George Elliott, B.A., Chesterville, was the guest at the home of Mr. and Mrs. m. Elliott.

Rev. Mr. Hicks, B.A., Chesterville, was calling in the Valley this week.

Miss Nellie [illegible] Ottawa last week.

Several from here attended the lawn social at the Springs.

Misses Grace and Dean Darling entertained the young people of the Valley and several relatives from Russell, Elma, Winchester, Morewood and Chesterville on Friday evening last in honor of their cousins, Misses Mildred and Eileen Shaver of Winnipeg. A most enjoyable evening was spent in music, games and dancing. At midnight, cake, sandwiches, coffee and icecream were served. Among the guests were a number of returned men and they certainly enjoyed getting back to an old time house party. Many thanks were tendered the young hostess for the success of the evening, and many regrets were expressed among the young people that such good times did not come more frequently.

Rev. Mr. Hall B.A., and Mrs. Hall of Williamsburg were calling at the home of Mr. and Mrs. H. Jackson this week.

Church Road

BASBET PICNIC

A Farmers' reunion taking the form of a basket picnic, will be held at Willis Werley's Grove, 3d Con. of Osnabruck, four miles north of Aultsville, Saturday, August 9th., 1919. A feature of the day's program will be speeches by R. W. E. Burnaby, President of United Farmers' Co-Operative Co., Toronto; S. J. McDonald, U.F.O. director County of Stormont; Thos. Houlehan, U. F.O. Director for Dundas County and other prominent speakers. In the evening a public meeting will be held in the township hall, Osnabruck Centre, at 7.30 standard time. An invitation is extended to all.

Mass Meeting of Dairymen

A mass meeting of Dairymen representing Cheese Factories in Eastern Ontario and Western Quebec will be held in the City Hall, Ottawa, on Tuesday, Aug. 5th at 2 o'clock p.m. to discuss present cheese situation, and if advisable, present Memorial to the Prime Minister, Sir Robert Borden and other members of the Government.

It is in the interest of every producer that your cheese factory meeting.

OBITUARY

Miss Maggie E. Froats

Miss Maggie Ellen Froats passed away at the home of her brother, Mr. A. J. Froats of Dickinson's Landing, on Monday, morning, July 14th, after a few days' illness. The deceased was in her 42nd year. She leaves to mourn her loss, her mother, two sisters and four brothers. The funeral took place on Tuesday afternoon, the services being conducted at the house by Rev. C. O. Carson. Interment in St. David's cemetery, Wales. The pall-bearers were her four brothers, William, Alexander, John and Tom Froats; Archie Warren, her brother-in-law, and Mr. H. Ransom. Many beautiful flowers were placed on the casket. Relatives present were, Mr. Thomas Colquhoun and son of Colquhoun, Mr. Jonas Leporte of Osnabruck Centre and Mrs. S. Colquhoun of Hoasic, and Mrs. Thomas Froats of Gallingertown. The deepest sympathy of the community is extended to the bereaved family.

Mrs S. Johnstone

One of the oldest residents of the Township of Finch, Mrs. Johnstone, relict of the late Geo S. Johnstone, passed away at her home here on July 14th at the advanced age of 84 years. The deceased, whose maiden name was Elizabeth Blakely, was a daughter of the late Christopher Blakely, and was born at Woodlands, Ont. Mrs. Johnstone enjoyed remarkably good health up to within a week of her death, when she suffered a stroke of paralysis. In the year 1856 she was married to Mr. Johnstone and removed to lot No. 5, Con. 8 of the Township of Finch, the site of the present homestead. With her late husband she was one of the early settlers in the township. She was a woman of high christian ideals and for many years was a member of St John's Anglican Church, Crysler. She was held in the highest esteem in the community, and her death is regretted by a wide circle of friends. Surviving are three sons and two daughters—Jen and Annie Johnstone, George K. Charles and Christopher Johnstone, all of this place; three sisters, Mrs. Wm. Stuart, Mrs. Abram Weager and Mrs. Lyle Southworth, Morrisburg.

The funeral took place on July 15th to St. John's Church and cemetery here, the service being conducted by Rev. E. A. Woolley, Rector. The pall bearers were her three sons, Messrs. Christopher, George K. and Chas Johnstone; two grandsons, Messrs J. L. and F. G. Rounthwaite and Mr. F. B. Brownridge, manager of the Royal Bank, Cornwall. Among the relatives present were Mr. and Mrs. W. G. Baker, Morrisburg; Mrs. George Sampson and Mrs. Wm. Stuart, Wales; Mr John M. Campbell and Mr. and Mrs. John T. Campbell, Finch; Mr. and Mrs. F. G. Rounthwaite and Mr. and Mrs. F. B. Brownridge, Cornwall. — Cornwall Standard.

Children Cry for Fletcher's
CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

Patriotism and Profit

It is patriotic to buy War Savings Stamps because Canada must have money for reconstruction.

But it is also profitable to buy War Savings Stamps because you are investing in Government Bonds yielding over 4½%.

You don't need to be a capitalist. You can start with 25 cents. Buy a Thrift Stamp for a quarter. When you have sixteen of them, exchange them for a War Savings Stamp, and you will have laid the foundation of a solid investment with your odd savings.

In May W-S.S. Cost $4.04

In June W-S.S. Cost $4.05

You can add to this investment as often as you save $4.00, and in 1924 the Government will pay $5.00 for every War Savings Stamp you buy now for $4.00 odd.

This is the biggest opportunity ever afforded to wage earners to become investors.

BUY W.S.S. WAR-SAVINGS STAMPS

War Savings Stamps can be bought wherever this sign is displayed.

Make Your Savings Serve You and Serve Your Country.—Invest Them in War Savings Stamps.

BRITISH SETTLERS FEAR GERMAN PERIL IN SOUTH AFRICA

Compulsory Repatriation of Teuton Settlers is Urged—Country Shows Big Possibilities For Mining, Agriculture, and Cattle-Raising Boom.

A despatch from Windhuk, South Africa, says:—The total pre-war German population of what was formerly known as German Southwest Africa, including women and children, was 14,000, of whom 2,000 belonged to German garrisons and 800 were police. Though no statement on the subject has been made in the union parliament, it is known that within the last few weeks these 2,800 have been repatriated in addition to 600 civilian Germans, who are now in the course of repatriation, and this number will probably be increased by another 400. Moreover, it is anticipated that at least another 1,000 Germans will return to Germany voluntarily.

British settlers are of opinion that the former German officers and soldiers, particularly the former, who are settled on the land, ought to be compulsorily repatriated. They influence both the Dutchman and native, and if they were left in the country they would almost certainly be an element of permanent unrest.

The mining possibilities of the country are of virtually unknown quality and quantity, except for the Otavi mines in the south. Geologists of high repute who have visited Kaokoveld in the north are of opinion that Kaokoveld is highly mineralized and occurrences of tin have been reported. The government did not encourage the prospecting. When a coal seam was reported to have been discovered in the Beseba district in 1910 the German Government immediately closed the district to prospecting.

Apart from minerals the country has a sure future in its stock-raising potentialities, in which respect it is compared with Argentina.

In any consideration of these possibilities you must divide the country into north and south, and that can be done roughly by taking the north as that portion to the north of Windhuk and the south as south of Windhuk. It has enormous economic values, both as an agricultural and cattle-raising country. Its agricultural possibilities have only been scratched and considerable developments are expected under this head from the additional capital and influx of the population which will undoubtedly take place under the new regime.

However, cattle-raising in the north seems far and away more profitable and certainly greater in its possibilities than agriculture. It has been proved that small stock do not thrive as well in the north as in the south, whereas the north has been proved to be the more excellent cattle country. The veldt is composed of grass and trees. The latter entirely disappear in the south. The average rainfall is 15.2 inches and falls during summer only. There are no winter rains.

The price of private land in the north ranges from $2.25 to $6.75 per cape morgen (about an acre). The present administration cannot dispose of the government land.

The south is commonly described as a desert and its virtues from a stock-raising point of view or any other point of view are not apparent to the stranger or chance traveller. It has always been neglected and scorned both by the government and the prospective settler. However, the man who knows the south recognizes its great possibilities as a stock-raising country.

The South African farmer and particularly those living near its southern border also are beginning to recognize its potentialities in this respect. Those British who have entered the protectorate since it was occupied are loud in their praise of this region and highly satisfied with the results they have attained. Horses, cattle, Namaqua sheep and Boer goats all do exceptionally well, and in some portions of Rehoboth, Maltahohe, Gibeon, Kectmanshoop and Warmbad districts merino and angora goats also do well.

The increase in sheep and goats in good lambing seasons is 80 per cent., which is an exceptionally high percentage. This is due to the fact that stock sicknesses are virtually nonexistent.

The veldt conditions are very different from the north and vegetation is very sparse as against the luxurious growth of the north. There are no trees from Rehoboth southward and the veldt is composed of grass and bush in most places, very much like Karroo, except that the bush is not so thick. The grass is short and sweet and resists drought. However, the bush forms the most important part of the veldt.

The south is undoubtedly more free from disease than the north, and this may be due to less rain and more severe winters. In the south, owing to the minimum rainfall, no agriculture is possible. The average 15,000 morgen farm in the south will carry 250 head of small stock, while farms in the Rehoboth, Maltahohe and Gibeon districts will carry more than this.

The first essential in the development of the south is the opening up of water and extensive boring operations on government land, which are immediately necessary. The only bore masters, "Germans," in the country are now being repatriated so that boring operations in the hands of private individuals have for the time being come to an end. There is also the question of damning the rivers, which come down during summer rains.

Private enterprise and capital are what this country requires.

The country will offer excellent prospects and good returns to young men with small capital—young men who are not afraid of the loneliness of the vast Veldt and the comparative absence of social life. There are no failures, because, comparatively speaking, there are no stock sicknesses. The question at the end of a given period is the amount of success obtained and that is regulated by the amount of capital originally invested in stock. Knowledge of stock is, of course, essential.

HELP WANTED

"Keep away from the flame of the candle if you don't want your wings singed" is a proverb as old as the hills. So old we have almost forgotten to apply it to OURSELVES. In every community men and women are imitating the moths. How many times have WE been singed by the fascination of that LONG DISTANCE "bargain?" And how many times have WE come BACK, and back AGAIN, to the flame? How much MONEY is lost each year to this community by this same SINGEING process? The flame of the candle mounts higher. The moths crowd closer and closer to the flame. It is OUR business to put that flame OUT. WANTED:—A few MEN and WOMEN in OUR community to apply the SNUFFER.

PRINCE TO VISIT U. S. AFTER CANADIAN TRIP

A despatch from London says:—The Prince of Wales will visit the United States next month as a guest of the American Government. King Gorge, on behalf of the Prince, has accepted an invitation sent the Prince by President Wilson to visit the President in Washington.

After his visit to Canada the Prince will go to Washington for a few days as a guest of the United States Government, and later will make a brief visit to New York, where he will live on board the British battleship Renown in New York harbor, although still a guest of the Government.

GET HOUSING PLANS FOR TEACHERS' HOMES

A despatch from Edmonton says:—Three standard plans for teachers' residences to be built in Alberta rural school districts, where there is a predominant non-English population, are now being prepared for the Department of Education, and will be ready in the course of another week.

They provide for houses of varying size, ranging in cost from $1,000 to $1,800.

GERMANY WILL LOSE MUCH LIVE STOCK

A despatch from Paris says:—Germany will have to surrender to France 500 stallions, 3,000 fillies, 90,000 milch cows, 100,000 sheep, and 10,000 goats, according to a report made before the French Peace Commission sitting under the Presidency of Rene Viviani, by M. Dubois, economic expert for the Commission, in commenting on the Peace Treaty clauses.

Two hundred stallions, 5,000 mares, 5,000 fillies, 50,000 cows and 40,000 heifers are also to go to Belgium from Germany. The deliveries are to be made monthly during a period of three months until completed.

ONE CANADIAN CITY REDUCES DEBT IN WAR.

A despatch from Winnipeg says:—During the past five years, under war conditions, the net debt of the city of Winnipeg has been reduced by $7,893,403.12. During the fiscal year ending April 30, 1919, the debt was cut down by $1,592,236.05. These are two of the outstanding features in the annual report of Sinking Fund Trustees submitted to the City Council.

NEARLY 50,000 STILL TO BE RETURNED

A despatch from Ottawa says:—Apart from the thirty-eight hundred officers and men just arrived in Canada, there still remain in England, including soldiers, dependents and unattached women, approximately forty-nine thousand Canadians, who must be brought home before the task of demobilization is complete. Unmarried soldiers and officers still to be returned number ten thousand, and married, eleven thousand. Wives, children and unattached women swell the total to nearly fifty thousand.

Although the homeward movement of Canadians is not at present so heavy as formerly, it will shortly be speeded up, and it is anticipated that by the end of August the Canadians and thir dependents will all be back in Canada.

CONTINUE FOOD CONTROL DURING COMING WINTER

A despatch from London says:—Negotiations for the securing of large stocks of food supplies in Canada are now under way. It has been decided to continue the British food control during the coming Winter, and if the negotiations are successful its various agencies in Canada will also be continued for an indefinite period. However, in view of the recent action of American middlemen in buying up Canadian cheese supplies before the Ministry of Food could close its purchases, the details of its operations in the Dominions are not being divulged.

GENERAL RAINFALLL IN PRAIRIE PROVINCES

Winnipeg, July 27.—Rains which were general in nearly all sections of the three Prairie Provinces swept the country Friday night, following a period of intense heat. There was a certain amount of hail and high winds, and crop damage is inevitable in some districts.

AUSTRIA ASKS FOR EXTENSION OF TIME

St., German-En-Laye, July 27.—Dr. Karl Renner, the Austrian Chancellor, and head of the Austrian peace delegation, accompanied by Dr. Richard Schuller, another member of the delegation, arrived here to-day from Feldkirch, near the Swiss boarder, where they have been in consultation with the Austrian governmental represntatives from Vienna.

Dr. Renner, at once, upon his arrival, formulated a request to the Peace Conference for an extension of the time accorded Austria to reply to the second part of the peace terms, which were communicated to the Austrian delegation on July 20. The Austrians were originally given fifteen days within which to make reply.

500 GERMAN PRISONERS TO EMBARK AT QUEBEC

A despatch from Amherst, N.S., says:—Upwards of 500 German prisoners have left the internment camp here under guard for Quebec, where they will board a transatlantic liner for Germany. The Germans were brought to Amherst in 1915, and composed for the most part of crews of the Kaiser Wilhelm der Grosse and other German ships captured on the high seas. Between three and four hundred prisoners remain in the internment camp, including the Austrian and Bulgarian captives.

MOTION OF WOMAN BARS HOHENZOLLERN

A despatch from Weimar says:—No member of a family that at any time has ruled in Germany is eligible for the office of President of Germany. The National Assembly has thus ruled by adopting a motion of one of its women members, Frau Agnus.

The farmer who is not breeding and has lost faith in profits from horse rearing is not handling the right sort of horse.

LARGE LOSS OF LIFE IN EGYPT UPRISING

800 Natives and 31 Europeans Killed—Military Loss Was Light.

A despatch from London says:—Eight hundred natives were killed and 1,600 wounded during the recent disturbances in Egypt, according to despatches from General E. H. H. Allenby. Cecil Harmsworth, Under-Secretary of the Foreign Office, made this announcement in the House of Commons.

The casualties to Europeans and other civilians were: Killed, 31; wounded, 35. The casualties to the military were: Killed, 29; wounded, 114.

The death sentence was imposed on 39 natives; detention for life, 27. Upwards of 2,000 were sentenced to short terms of imprisonment. The military courts have been dispensed with, the sentences which they imposed being reduced by three months.

General E. H. H. Allenby, who served as commander of the British forces in Palestine and forced the surrender of Jerusalem, was appointed High Commissioner for Egypt last March. He arrived at Cairo on March 27 and set about immediately to restore order. He announced at the time that it would be possible to do this only by active repression.

The first uprising in Egypt was participated in by 5,000 Egyptian tribesmen at Assault. These disturbances lasted from March 20 to 23. The revolutionary movement spread to many other parts of Egypt, and at times the forces of the Allies were exceedingly hard pressed. Toward the end of April it was announced that the disorders had been quelled.

One small patch of weeds will sow many acres with seed.

LEADING MARKETS

Breadstuffs.

Toronto, July 29.—Man. Wheat—No. 1 Northern, $2.24½; No. 2 Northern, $2.21½; No. 3 Northern, $2.17½; No. [illegible] wheat, $2.11½, in store Fort William.

Ontario wheat—No. 2, $2.

Montreal, July 29.—Choice steers, $12 to $13 per 100 lbs.; good, $10 to $12; medium, $8 to $10. Choice butchers' cattle, $10.50 to $12 per 100 lbs. good quality, $9 to $10; medium down to $7 per 100 lbs.

PROVES THAT KAISER STARTED THE WAR

Berne, July 27.—The German Social Democrat Kautsky, who last November was entrusted with the examination of the archives of Berlin connected with the origin of the war, has now completed his work. The documents would fill three volumes.

I am assured from an excellent source that the documents contain positive proof of the ex-Kaiser's responsibility for the war, and that if they were known the majority of the German people would demand his impeachment.

Fashions for the Small Folk

9014 9034 8718 8488

9014—Girl's Dress (smocked or shirred). Price, 20 cents. In 6 sizes, 2 to 12 years. Size 6 requires 2⅞ yds. 32 ins. wide, or 2¼ yds. 36 ins. wide.

No. 8718—Child's Dress. Price, 15 cents. Straight lower edge; yoke and sleeve in one. Cut in 5 sizes, 6 months, 1, 2, 4 and 6 years. Size 4, flouncing, 1⅜ yds. 21 ins. wide; yoke, long or short sleeves, ½ yd. 40 ins. wide. McCall Transfer Design No. 690. Price, 10 cents.

No. 8488—Child's Dress. Price, 15 cents. Tucked or shirred. Cut in 5 sizes, 2, 4, 6, 8 and 10 years. Size 4 requires, front, back, 1⅜ yds. 32 ins. wide, or 1¼ yds. 40 ins. wide; yoke, sleeves, collar, 1 yd. 32 ins. wide, or ⅝ yd. 40 ins. wide; one material, 2⅛ yds. 32 ins. wide, or 1¾ yds. 40 ins. wide. McCall Transfer Design No. 690 and No. 448. Price, 10 cents each.

These patterns may be obtained from your local McCall dealer, or from the McCall Co., 70 Bond St., Toronto, Dept. W.

THE CAUSE OF BACKACHE

Only in Rare Cases Does Backache Mean Kidney Trouble.

Every muscle in the body needs constantly a supply of rich, red blood in proportion to the work it does. The muscles of the back are under a heavy strain and have but little rest. When the blood is thin they lack nourishment, and the result is a sensation of pain in those muscles. Some people think pain in the back means kidney trouble, but the best medical authorities agree that backache seldom or never has anything to do with the kidneys. Organic kidney disease may have progressed to a critical point without developing a pain in the back. This being the case, pain in the back should always lead the sufferer to look to the condition of his blood. It will be found in most cases that the use of Dr. Williams' Pink Pills to build up the blood will s[redacted] the pain in the ill-no[redacted] the back. How mu[redacted] bette[redacted] to try Dr. Williams' Pink Pills for the blood than to give way to unreasonable alarm about your kidneys. If you suspect your kidneys, any doctor can make tests in ten minutes that will set your fears at rest, or tell you the worst. But in any event to be perfectly healthy you must keep the blood in good condition, and for this purpose no other medicine can equal Dr. Williams' Pink Pills.

You can get these pills through any dealer in medicine, or by mail, at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

Fame is a plant that cannot be forced in a hothouse.

To Get Most Out of Manure.

A subscriber who runs a dairy farm thinks he is not getting such good results from manure as he has a right to expect, and wants to know how to get the most possible value from it. At present the manure is piled in the barn lot till time to haul it out, and a good deal of juice runs out of it into a gulley. He says he is so situated that he can not very well haul the manure out and spread it as it is made.

Undoubtedly this friend is losing much of the "goody" of his supply of manure. The liquid manure from cows is worth fully as much as the solid, and he loses nearly all the liquids. It would pay to make a good concrete foundation for this manure to rest on and to put some kind of a cover over it. Use enough bedding so that the manure will contain straw enough to absorb all the liquid, and hold it. So far as possible haul the manure out to land that is soon to be plowed, so that the newly spread manure will soon be mixed with soil. In this way the manure will go further. It would also pay to add about forty pounds of acid phosphate to each ton of manure, either as the manure accumulates or as it is hauled out.

Mice do not like the smell of peppermint, and a little oil of peppermint placed about their haunts will soon make them look for other quarters.

There is a spirit of dissatisfaction on the part of the bulk of the Labor party which betrays a want of appreciation of the divine government of the world. It seems to be forgotten that man is to live by the sweat of his brow.—Rev. Finlay Macrae.

The Adventure of Mr. Dubois

Mr. Dubois, a retired Belgian professor of mathematics, lived in the country until the Germans burned his house. He then went with his daughters to Brussels, says the Belgian Bulletin, where he rented a modest apartment.

One morning one of his daughters came to tell him that two German officers were waiting to see him. He found them inclined to be excessively polite. One of them studied him carefully, and then asked if he was the person known as Mr. Dubois.

"I am, as a matter of fact, Mr. Dubois, professor of mathematics," he answered.

The officer smiled and stroked his moustache. "Have it your own way," he said. "Please get ready to leave with us within ten minutes. Take clothing sufficient for several days. You may, if you like, take leave of your family."

The officer took the prisoner to one of the best hotels in Brussels, where he turned him over to a barber. Mr. Dubois found it hard to restrain himself when the barber cut off first his moustache and then his cherished beard. The officer, upon inspecting him, seemed pleased, even triumphant, and handed him a monocle. But when Mr. Dubois protested that he never worn one and was unable to keep it in place, the officer said:

"Admiral, do not keep up this farce. We have, as you see, the greatest respect for your rank and your misfortune."

The officer then informed him that they had received orders to conduct him to Zeebrugge.

When the party arrived at the canal the officer, with apologies, bandaged Mr. Dubois' eyes, and when the bandage was removed he found himself in the presence of several aged officers at a table covered with maps and plans. One of the officers came forward with outstretched hand and said:

"Admiral, allow me to shake hands with you as one does with an enemy one respects.

Mr. Dubois took his hand and replied, "I am Mr. Dubois, professor of mathematics.'

"You are so far from being Mr. Dubois," the spokesman replied with great politeness, but firmly, "that your right thumb bears the scar of a wound you received on board your ship six years ago when a cannon exploded." He pointed to Mr. Dubois, whose thumb lacked a joint.

"That," said Mr. Dubois, "is the result of an accident I met with while driving twelve years ago; the flying glass cut my hand, and —"

"Do not insist, admiral," said the chief officer in a stern voice.

At that moment a young officer ventured to interrupt his superiors. Holding up a photograph, he cried out:

"Look, the admiral's left thumb is injured, while this man's right thumb lacks the tip."

The photograph was passed from one to another amid an ominous silence. The two officers who had brought Mr. Dubois shivered. Presently the commanding officer crossed his arms and addressed Mr. Dubois:

"So you are not Adm. Beresford?"

"I am Mr. Dubois, professor of mathematics," he answered once more, with his eye on the door.

The commanding officer raised his arm and, pointing to the door, said, "Clear out!"

Needless to say, Mr. Dubois did not stop until he reached his own apartment, where he burst in upon his family. They stared in astonishment at his beardless face.

"What is the meaning of this?" demanded his father-in-law.

Mr. Dubois drew himself up, put the monocle in place, and announced: "I am Adm. Beresford."

FLY FROM HALIFAX TO GRAND'MERE

NEW MEANS FOR DISCOVERY AND LOCATION OF FIRES

Aircraft to be Used for Forest Patrol On the St. Maurice River Watershed.

The feasibility of an aircraft patrol for the discovery and location of forest fires is to receive a thorough tryout this summer, in both Canada and the United States.

In Canada, the sponsor for the experiment is the St. Maurice Forest Protective Association, which protects an area of some 13,000 square miles of forest country on the watershed of the St. Maurice River, Quebec.

The Provincial Government of Quebec is assisting the project by a cash grant. Through the generous co-operation of the Department of Marine, two hydroplanes, belonging to the Dominion Government, have been loaned to the Association. An experienced aviator has been secured, together with mechanics and other necessary staff.

The headquarters of the new scheme of patrol will be near Grand'mere. It is expected that Lieut. Stuart Graham, the aviator, will maintain a daily patrol, covering the entire area of Association territory once every two days. This patrol will supplement the efforts of the regular patrolmen, who will still continue to travel by canoes, by motor cycle, by automobile, by railway power speeder, or on foot, in the old-fashioned way.

Lieut. Graham has himself flown the two machines through from Halifax to Grand'mere, this being the first journey of the kind undertaken in Canada.

An Interesting Experiment.

The application of aircraft to forest protection is new, and the experiment will be observed with the closest interest. It is expected that work will also be done in the direction of aerial photography of timber limits with a view to securing accurate information relative to drainage, forest types, etc., including the ascertainment of areas burned-over, cut-over, and reproducing to young growth, as contrasted with virgin forest.

That an experiment of this kind should be undertaken this summer is a strong tribute to the progressiveness of the St. Maurice Forest Protective Association, the Provincial Government of Quebec, and the Dominion Government.

In the United States, arrangements have been made for close co-operation between the War Department and the Forest Service. Definite routes have been laid out for the patrol of National Forest areas, particularly in the western states. Observation balloons are also being used as forest fire lookouts. A case has already occurred where a specific fire was discovered in this way at the foot of the Sierra Madre mountains. Within seven minutes after the fire was discovered, enlisted men in a special fire truck had arrived, and the fire was promptly extinguished. The forest patrol planes are equipped with wireless and maintain communication with permanent stations. Emergency landings have been provided.

SWALLOWS EAT MOSQUITOES

Birds Do Much to Keep Down Insect Life Increase.

If you want to free the neighborhood of mosquitoes encourage swallows to make themselves at home, says the American Forestry Association, which is conducting the national bird-house building contest among school children. These birds feed almost entirely upon obnoxious insects and they will do much toward protecting orchards and other trees from insect pests. No better investment can be made, therefore, than some houses set out for martins or other swallows.

Of the blue swallows the purple martin is the largest, the male being entirely blue above and below, while the female is blue above with a gray breast. Swallows are highly migratory, most of them spending the winter in South America.

Larkspurs.

The difference in the foliage is so great as to lead a person to believe that the annual and perennial larkspurs are a different family of plants. The foliage of the annual is fine and graceful, somewhat resembling myriophyllum, or parrot's feather, the popular equarium plant. The broad leaved foliage of the perennial larkspurs is entirely different; this also is attractive.

The annual larkspurs make handsome beds with their light, graceful foliage and bright colored flowers. The flowers keep well when cut and placed in water and really seem more delicate and refined than the perennial sorts.

Both the annual and perennial larkspurs are benefitted by liberal fertilizing and daily watering during the hot weather.

The dog attains full growth at the end of the second year, is old at 15 years, and seldom lives beyond 20.

The intrinsic value of a British shilling in 1914 was 4d. To-day it is worth 10½d.

CHOLERA INFANTUM

Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months, and unless prompt action is taken little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent all the dreaded summer complaints. They are an absolutely safe medicine, being guaranteed by a government analyst to contain no opiates or narcotics or other harmful drugs. They cannot possibly do harm —they always do good. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Princess Pats.

You've read of the charge of the "Light Brigade,"
How they faced both shot and shell,
Of the gallant, desperate charge they made
Into the very jaws of hell—
How only half of them came back
To receive the glory they'd won—
Now, lis't to the tale of the Princess Pats.
Who won victory from the Hun.

They sailed away to a foreign land
A full three thousand strong,
They went, a gallant fighting band,
To right a world-wide wrong,
To fight for King and Princess Pat,
For home and fireside,
They needed no goad, but at drop of hat,
Rushed on—a resistless tide.

Down into the valley of Death,
Down into the jaws of hell,
And out from the fume of the battle breath,
But few returned to tell
How breast to breast with death they fought,
To uphold a fair Princess' fame,
Her flag, a flag with honor fraught,
Inscribed with Royal name.

In France they lie, with poppies red
O'er them—as cross their valor'd won,
A pall of beauty o'er hero dead,
Royal color for Canada's son.
On honor's shield, their name engrave,
Let nation mourn their loss,
They died the silken folds to save
Of their Princess flag, at any cost.

TORONTO FAT STOCK SHOW.

Careful preparation is the keynote to success in the live stock business, either in the fitting for the show ring or in the marketing of butcher stock. Placing of awards or the topping of the market depends largely on the condition of the animal when shown or offered for sale. Animals to be shown at the winter shows should be selected now and preparations started so as to have them in the best possible condition by show time. The Toronto Fat Stock Show offers an excellent opportunity for feeders who have taken the time to fully condition their stock to get the highest market value, and in addition to compete for the many generous premiums that are offered.

He Got the Job.

It was through bad luck that Jack had sunk down to rags and hunger, but his heart beat hopefully as he applied for a job on the coasting steamer.

"Afraid you won't do," said the captain curtly, doubting if this ragged person really was a sailor.

But Jack's reply proved it.

"I hope, sir," he said, "that you will not condemn the hull for the sake of the rigging."

This is to certify that fourteen years ago I got the cords of my left wrist nearly severed, and was for about nine months that I had no use of my hand, and tried other Liniments, also doctors, and was receiving no benefit. By a persuasion from a friend I got MINARD'S LINIMENT and used one bottle which completely cured me, and have been using MINARD'S LINIMENT in my family ever since and find it the same as when I first used it, and would never be without it.

ISAAC E. MANN.
Metapedia, P.Q.

Aug. 31st, 1908.

The Parson in Literature.

Both Charlotte Bronte and Jane Austen—although the former was the daughter of one clergyman and the wife of another, and the latter's father was also a clergyman—seldom or never make their parsons wholly sympathetic personages. Perhaps the reason is that to do otherwise meant solving what Balzac calls "the difficult literary problem of how to make a virtuous person interesting," or perhaps they believed that it was from the unpleasant characters in novels that we get most of the excitement and fun. At any rate, the curates in "Shirley" are merely caricatures, and Mr. Helstone—"a conscientious, hard-headed, hard-handed, brave, stern, implacable, faithful old man"—fails to win the reader's sympathy, while Mr. Brocklehurst, in "Jane Eyre," must be classed with the clerical goats rather than the clerical sheep of fiction. The best that can be said of most of Charlotte Bronte's parsons is that they have far more character and virility than those pale and uninteresting tea-drinking clergymen who appear in so many Victorian novels.

Lazy men are dead to the world, but they remain unburied

BITS OF HUMOR FROM HERE & THERE

A Hint.

"Is your watch going, George?" she asked sweetly, stifling a yawn.

"Yep," answered George.

"How soon?"

Pleasant Silences.

"If there is anything I enjoy it's going to the moving pictures."

"I thought you were such an admirer of the English language."

"I am. I hate to hear it abused. I go to the movies to rest my ears."

It Wasn't Fair.

Father—"I'm ashamed to see you crying because a bee stung you. Act like a man."

Bobbie—"Yes, and th-then you-you'd gim-me a li-lickin', like you said y-you would i-if you ever h-heard m'me usin' that k-kind of l-language."

Home Camouflage.

Neighbor—My dear, why are you covering your jam pots with wall paper?

Efficient Mother—Camouflage. It's the same paper as that on the pantry walls.

The Power of the Vote.

A suffragette lecturer once brought down the house with the following argument:—"I have no vote, but my groom has. I have a great respect for that man in the stables, but I am sure if I were to go to him and say, 'John, will you exercise the franchise,' he would reply, 'please mum, which horse be that?' "

Precaution.

Mother: "Johnny, on your way home from school, call at the grocer's and get me some coffee and a bar of soap."

Father (after Tommy had gone): "Why do you want coffee?"

Mother: "That's so he'll remember the soap."

Bang Went ——"

A new and pleasant turn has been given to the story of the Scot's sixpence. Lord Shaw of Dumfermline, speaking of the practice of economy, stated that he recently met in a London 'bus a distinguished Marchioness and her daughter. They were distressed because they had just discovered that they had boarded the 'bus without any money. Lord Shaw paid their fare for them—amounting to sixpence. A couple of days later he received six penny stamps from the Marchioness, and in writing to acknowledge the unexpected payment, he stated it was unkind of her to visit upon him in this way the traditional love of a Scotsman for a sixpence.

MONEY ORDERS.

When ordering goods by mail send a Dominion Express Money Order.

A Prisoner.

The city's hand extends its grasp
Across the sunny countryside,
Till even brooks and rivers wide
Are held in iron clasp.

My little brook with waterfalls,—
That, sparkling, sang so cheerily
Upon its journey to the sea,—
Is now in prison walls.

Its course is bound in tubing dark;
I, peering down through bars above,
Attempt to see the brook I love,
I hear it singing—hark!

That blessed song of joy and wings:—
"They cannot chain my soul in me!"
The way it sang when it was free,
And bravely, still it sings.

Minard's Liniment Cures Colds, Etc.

Why Nursey Left.

On his return to civil life Jenkins was told about the nice nurse his wife had engaged for the baby.

"Don't be misled by her looks," explained Mrs. Jenkins. "Although she is rather pretty and childish-looking, she is really very sensible and well-trained. Why, she won't let anyone kiss baby while she is near."

"No one would want to," said hubby absent-mindedly, as he gazed after the slender grey figure, "while she is near."

Sure! High Heels Cause Corns But Who Cares Now

Because style decrees that women crowd and buckle up their tender toes in high heel footwear they suffer from corns, then they cut and trim at these painful pests which merely makes the corn grow hard. This suicidal habit may cause lockjaw and women are warned to stop it.

A few drops of a drug called freezone applied directly upon a sore corn gives quick relief and soon the entire corn, root and all, lifts out without pain. Ask the drug store man for a quarter of an ounce of freezone, which costs very little but is sufficient to remove every hard or soft corn or callus from one's feet.

This drug is an ether compound and dries in a moment and simply shrivels up the corn without inflaming or even irritating the surrounding tissue or skin. Clip this out and pin on your wife's dresser.

NURSING.

WANTED—PROBATIONERS FOR the Montreal Women's Hospital. Two years' course. Monthly salary during period of training. Apply Lady Superintendent, 1002 St. Catherine Street West, Montreal.

FOR SALE.

NEWSPAPER, WEEKLY, IN BRUCE County. Splendid opportunity. Write Box T, Wilson Publishing Co., Limited, 12 Adelaide St. W., Toronto.

WELL EQUIPPED NEWSPAPER and job printing plant in Eastern Ontario. Insurance carried $1,500. Will go for $1,200 on quick sale. Box 62, Wilson Publishing Co., Ltd. Toronto.

POULTRY WANTED

WHAT HAVE YOU FOR SALE IN Live Poultry, Fancy Hens, Pigeons, Eggs etc.? Write I. Weinrauch & Son, 16-18 St. Jean Baptiste Market, Montreal, Que.

ECME BUILDERS!

MISCELLANEOUS.

CANCER, TUMORS, LUMPS, ETC., internal and external, cured without pain by our home treatment. Write us before too late. Dr. Bellman Medical Co., Limited, Collingwood, Ont

The Finishing Touch.

Paddy was showing a gentleman over his master's new house, and after he had gone through it the gentleman said to Paddy: "Well, it's really a very fine house, and beautifully finished." "Oh, no," said Paddy, "it's not finished yet." "Indeed!" said the visitor; "why, what more do they intend to do to it?" "Well," said Paddy, "I heard our master say the other day that he was going to have a mortgage put on it."

Minard's Liniment Cures Distemper.

To lengthen the usefulness of fat pour it through a cloth laid over the strainer each time after use. This removes the foreign substances that usually burn before the fat is thoroughly heated and cause the dissatisfaction of repeated fryings in the same fat.

GIRLS! WHITEN YOUR SKIN WITH LEMON JUICE

Make a beauty lotion for a few cents to remove tan, freckles, sallowness.

Your grocer has the lemons and any drug store or toilet counter will supply you with three ounces of orchard white for a few cents. Squeeze the juice of two fresh lemons into a bottle, then put in the orchard white and shake well. This makes a quarter pint of the very best lemon skin whitener and complexion beautifier known. Massage this fragrant creamy lotion daily into the face, neck, arms and hands and just see how freckles, tan, sallowness, redness and roughness disappear and how smooth, soft and clear the skin becomes. Yes! It is harmless, and the beautiful results will surprise you.

GENUINE ASPIRIN HAS "BAYER CROSS"

TABLETS WITHOUT "BAYER CROSS" NOT ASPIRIN AT ALL.

Get Genuine "Bayer Tablets of Aspirin" in a "Bayer" Package, Plainly Marked With the Safety "Bayer Cross."

BAYER

There is not a penny of German money invested in "Bayer Tablets of Aspirin," nor will a German citizen profit by its sale or ever be allowed to acquire interest.

The original world-famous Aspirin marked with the "Bayer Cross" is now made in Canada and can be had at your druggist's in handy tin boxes of 12 tablets and larger "Bayer" packages.

Genuine Aspirin has been proved safe by millions for Pain, Headache, Toothache, Earache, Rheumatism, Lumbago, Colds, Grippe, Neuritis.

Aspirin is the trade mark, registered in Canada, of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

CUTICURA HEALS BABY'S FACE

Could Not Sleep Eruption Itched and Burned So.

"I noticed a little pimple on my baby's face. I thought it was from the sun but it kept getting worse and the skin was red and very hot. He could not sleep or rest the eruption itched and burned so, and it caused him to scratch. I was quite discouraged.

"I saw an advertisement for Cuticura Soap and Ointment and sent for a free sample. I bought more and after using two cakes of Cuticura Soap and two and a half boxes of Cuticura Ointment he was healed." (Signed) Mrs. S. D. McGuire, Clarksburg, Ont., Dec. 18, 1918.

Use Cuticura Soap, Ointment and Talcum for every-day toilet purposes.

For free sample each of Cuticura Soap, Ointment and Talcum address post-card: "Cuticura, Dept. A, Boston, U. S. A." Sold everywhere.

LOCAL AND GENERAL

Citizens of Morrisburg and vicinity have learned with considerable regret of the resignation of Principal Elliott who for the past five years very successfully filled the position of Principal of of the Collegiate Institute. Mr. Elliott, we understand, has accepted the position of Principal of the Sudbury High School with an increase over the local salary of $700. Mr. M. J. O'Neil of Omemee, Ont., specialist in imathematics and physics will succeed Mr. Elliott. In their departure from amongst us, Mr. and Mrs. Elliott will not only be missed in educational matters, but in every circle that pertained to the welfare of the municipality, they have always figured prominently; the former, of late, devoting much of his time and attention to the erection of a suitable memorial within the Collegiate to the boys who represented the institution on the field of battle. He was also president of the Horticultural Society, in which he took interest and pride, and was instrumental in bringing about many improvements in town of we are today justly proud. The Leader joins with their legion friends in extending best wishes for continued success in their future home.

Mr. and Mrs. Beggs of Hecksston were guests of Mr. and Mrs. here received word that their barns had been struck by lightning and burned to the ground.

Miss Eileen Baker is spending a week with friends at Wales.

Mr. and Mrs. Cornelius Wells of Aultsville, Mr. and Mrs. J. A. Wells, Syracuse, N.Y., and Mrs. R. J. Swerdfeger and daughter, Mary of New Richmond, Wis., motored to Prescott via Waddington and Ogdensburg early Tuesday morning of last week and boarded the "Rapids King" for Montreal. Mr. and Mrs. C. Wells are spending several days with friends in the city, while the rest of the party returned on the "Britanic" on Thursday of last week.

Mrs. W. G. Baker and children Francis and George, are visiting friends at Crysler.

Mildred Largie, well known here, Gives splendid private recital

Sherbrook Daily Record--When a display of musical genius, finished technique masterful genius, and supreme depth of color, is produced by some famous artist, whose name is known all over the world, the audience privileged to hear the exhibition, hold as the highest goal of their appreciation, mere realization of what they have heard said about the performer. And though held spell-bound by the artist's genius, their enjoyment seldom exceeds their expectations.

When a young girl, however, looking scarcely more than a child, sits down at the piano and with the touch of a master, brings out the very soul of the instrument in floods of inspired music, her listeners are overcome by the wonder of the talent which borders almost on prodigy.

There is no doubt that some at least of a small group of guests present were somewhat skeptical about the much-vaunted talents of Miss Mildred Largie young Richmond pianist, and winner of the Dominion College of Music Gold Medal. Yet, if skeptics there were, they left the end of the rendition of a difficult program, thorough converts and enthusiasts.

Miss Largie leaves in May for Europe, where she will study eight months or more studying.

Miss Largie has a number of friends in Morrisburg, whom, we are sure, will be pleased to learn of her success. She is a niece of Mr. R. E. Leonard, formerly accountant at the Molsons Bank here.

Twelve hundred and thirty-eight certificates have been issued and the same number of credentials issued to date for the National Liberal convention to be held in Ottawa, Aug. 5, 6, and 7. About 290 more names have been received of probable delegates, making altogether an attendance of accredited delegates exceeding 1,500. To each of the delegates phamphlets reviewing the work of the Liberal party are being issued. One of these gives in detail the tariff record from 1893 to 1919.

Mr. and Mrs. J. H. Redmond, and daughter of Cannuck Resort Jefferson, Ohio, are spending several weeks with friends in the county.

Citizens wishing to subscribe to the Monument Fund and those who have been called on but could not give a decided answer, would make it easier for the committee if they would notify the Treasurer, Mr. Chalmers, of the amount they wish to give.

Miss Grace Johnson of Montreal is spending a few days the guest of her sister, Mrs. J. H. Mullin.

Among the beautiful gardens of the town, none are more inviting than those of the Horticultural Society on the Fair Grounds. It might wellbe called Morrisburg's Experimental Farm. The completeness in which Society does things is exemplified by the manner in which the post office lot has been put into shape which is now a credit to the town.

Mr. E. Townsend of the Protestant Hospital, Ottawa, was visiting Mr. and Mrs. F. D. Van Allen on Tuesday.

Mrs. M. Fraser of Ottawa, spent a few days this week with Mr. and Mrs. Fred D. VanAllen.

Rev. D. K. and Mrs. Fetterly and family of Leechburg, Pa., and Rev. and Mrs. B. Fetterly and family, Kittanning, Pa., are spending a month's vacation with relatives and friends in the county.

One hundred thousand small black bass, ranging in size from an inch and a half to three inches in length, were turned loose into the St. Lawrence Saturday in various feeding places, all within two miles of Alexandria Bay. They were taken there by an agent from the state hatcheries at Ogdensburg who was accompanied by F. L. Raymond, one of the leaders of the Anglers' Association of St. Lawrence river.

There will be a Food Sale and Afternoon Tea in the Meikle Carpet Rooms on Monday afternoon, August 4th. at 4 o'clock. Everybody welcome. A business meeting to make further arrangements for Welcome Home Day will be held at 3 o'clock sharp.—Womens Insturute.

It is hardly necessary for us to reiterate conditions which have already been made common knowledge to the citizens of Morrisburg in connection with the upper power house which has for the last few years been a white elephant to the municipality But it will be news, and welcome news to the citizens to learn that official word was received early part of the week from the Department of Railways and Canals announcing that hereafter, until such time as the power is rented, the rent instead of being $1530 will be $1.00 per year, and some three years' back rent amounting to $4620 has also been wiped off. In this the municipality benefits in no small degree, and much credit is due the public spirited men who make up the present town council. Since assuming office they have always proven themselves ready and willing to enter into any scheme that gives fair promise of for the interest of the town. Their forethought in this matter, and the skillful manner in which they, assisted by Mr. J. Hilliard, M.P.P., presented the case to the Department, was undoubtedly the means of bringing about so favorable a settlement. The white elephant's rations having been cut off, this should prove a stimulant to the progressive spirit of our council in reaching out with the other hand and pulling in an industry worthy of the effort.

Dr. and Mrs. Gorrell arrived in town on Monday and have taken up their residence on Main St.

Reeve Geo. Brown spent the week in Lansdown, Ont.

week in Lansdqwn, Ont.

$5.00 and costs for berry-picking contrary to the Landlord's wishes was the judgment in a case of prosecution wheih was arraigned before Justice Eager on Monday.

We are generally losers in the end if we stop to refute all the backbitings of those who know so well how your business should be run that they are not half running their own. They are annoying, it is true, but not dangerous so long as we do not stop to expostulate and scold. Our characters are formed and sustained by ourselves and by our own actions and not by others. They may injure us for a time but public opinion and justice will correct all groundless slander if we do not furnish fuel to the flames by taking valuable time to deny the charges.
