XXV, No. 35 MORRISBURG, ONT. FRIDAY, SEP. 10 1926.

Eggs

The Market is advancing, but we are not looking for very much higher prices, due to the fact that the wholesalers are using the Storage Eggs freely and offering them 5c below the Fresh Eggs.

Oyster Shell and Grit

Oyster Shell and Grit are two essentials in Egg production and can be obtained from us.

Flour & Feed

We have a good supply of Millfeed and Flour on hand. New Wheat Flour will be on the market very shortly—in less than two weeks' time Old Wheat Flour will be sold at a premium.

FOR REAL GOOD BREAD, TRY OUR MAPLE LEAF FLOUR.

WE ARE OPEN THURSDAY and SATURDAY NIGHTS.

The MORRISBURG FEED & PRODUCE Co.

MORRISBURG, ONT.

GYPROC

The Fireproof Wallboard For Walls and Ceilings

EASY TO HANDLE

Saws and Nails like Lumber. Takes Paint, Alabastine, Muresco, or Wallpaper beautifully.

ECONOMICAL PERMANENT WALLS

NON WARPING and UNSHRINKABLE

Costs less than Plaster or Lumber, as Cheap as Wallboard and far better in every way—Call for Sample Literature.

INDUCTION AT KEMPTVILLE

An interesting and impressive ceremony took place in the Presbyterian Church, Kemptville, when, before a large gathering of people Rev. W. J. Fowley, formerly of Lonsdale, N.J. was inducted into the pastorate of Kemptville and Oxford Mills. Rev. William Merriles, of Iroquois, moderator of the Brockville Presbytery narrated the steps and conducted the induction. Rev. D. MacOdrum, of Brockville preached the sermon; Rev Mr. Burkholder of Morrisburg addressed the minister and His Honor Judge Dowsley of Brockville addressed the people.

TO DEDICATE CHURCH

On Sunday morning next at 10 o'clock His Grace Archbishop Spratt of Kingston, will dedicate the Catholic Church at Trooptown under patronage of St. Therese of the Child Jesus. The sermon for the occasion will be preached by Rev. Father J. Vincent Meagher of Morrisburg. The choir of St. Francis Xavier's Church of Brockville will furnish music on the auspicious occasion. Rev. Father L. B. Garvin, formerly of Morrisburg is the pastor of the church, which was destroyed by fire some months ago after being struck by lightning.

MR. J. G. TATE

A very wide circle of friends and acquaintances throughout the county of Dundas were much grieved on Tuesday to learn of the death of James Gordon Tate which occurred in the early hours of the morning after an acute illness. For some time Mr. Tate had not been in the best of health but a fatal termination was not looked for at the present time.

MR. JOHN MURPHY

The death occurred Tuesday night of Mr. John Murphy of Chesterville under very sad circumstances following a stroke. During the afternoon Mr. Murphy was at the home of Mr. Edward Sauve assisting in threshing operations and while pitching sheaves of grain on to a wagon in the field was seen to be in distress and when assistance reached him it was found he had become partly paralyzed and could not speak. Medical attention was quickly summoned and Mr. Murphy was taken to his home where he passed away during the night.

The deceased for many years had been a farmer within the corporation of Chesterville and took an active interest in the affairs of the village having on different occasions been a member of the council.

The funeral takes place today (Friday) at St. Marys Church Chesterville.

BECKER—WEBER

The wedding of Miss Edna Becker and Mr Ernest Weber was an event of last Tuesday. The ceremony was performed at the home of Rev. C. H Hobart who officiated.

The bridal dress was of brown satin with a hat to match. Mrs. Helen Johnson was the matron of honor. Fred Johnston acted as best man.

After the ceremony the couple left for a honeymoon to be spent in the bay region. They will return to make their home in this city.

Mrs. Weber is the daughter of Mr. and Mrs. Orrin Becker. Mr. Weber is the son of Mrs. A. Will.

Mrs. Weber is the grand daughter of Mr. and Mrs. Delacy W. Prunner, and a neice of Mrs. Wesley J. Larmour, of Morrisburg.

ST. PAUL'S Ev. LUTHERAN CHURCH

Sunday Sept. 12th—
Morning service 10.00 a.m.

HOLDS THAT WIFE HAD RIGHT TO PLEDGE HUSBAND'S CREDIT

A merchant entered suit at the last sittings of Division Court in Kingston, against a husband for goods purchased by his wife for her personal use. The defence entered was that the husband and wife were not living together, and that therefore the wife had no right to pledge her husband's credit.

Judgment was rendered by Judge Lavell in favor of the plaintiff upon the grounds that the goods were necessary and suitable to the wife's station in life, and that while she was not living with her husband it was due to his misconduct and his refusal to have her. The Judge held that in such a case the wife had an irrevocable right to pledge her husband's credit for articles such as were involved in the present action, she having no means of her own to procure them.

WILLIAMSBURG COUNCIL

The Council met at Williamsburg on Saturday Sept. 4th 1926. Members all present. Minutes of previous meeting read and adopted. The Reeve and Frank Casselman were appointed a committee to arrange for the grading in connection with Hess bridges No. 1 and 2. By-law No. 855 for the repair and improvement of the Casselman branch of the Casselman-Dawley Drain was read a 1st and 2nd time and provisionally adopted and a Court of Revision wiill be held on this drain on Saturday October 2nd 1926 at one o'clock p.m. in Froat's Hall, Williamsburg, and the Clerk was instructed to have the by-law printed and served.

The following accounts were passed:

Canadian National R.R. expenses gates for July	$29.51
Melvin McIntosh, fence viewers' fees	4.00
Myron Merkley, services as inspector Hess bridges.	41.25
Ora McIntosh, caretaker Whitteker gravel pit	17.80
F. M. Eagleson, progress estimate, Hess bridges	500.00
Reeve and Clerk, settling with Osnabruck	6.00
Ezra McMillan, pay on salary as Road Supt.	62.50
Ed. Whitteker, for 19 yards gravel	7.60
J. A. Reddick, work on bridges W. T. L.	2.50
Alvin McIntosh, hauling and furnishing 132 yards gravel S. R. Con. 6	120.40
Morley McPherson, 17 rods wire fence	3.40
Mahlon Beckstead, hauling gravel G. R. Con. 7	18.00
Ora McIntosh, gravelling 5th Con. H. L.	41.20
Roy McIntosh, cutting brush	2.70
Ezra McMillan, paying help on crusher Colquhoun pile	276.41
Edgar Whitteker for 19 yards gravel	7.60
Ritchie Tupper, gravelling G. R. Con. 6	166.30
C. F. Marcellus, for 186 yds. gravel and gravelling G. R Con. 8	231.90
Thos. Lawson, repairs for crusher	4.50
Howard Beckstead, gravelling E.T.L.	112.00
Howard Beckstead, gravelling G. R. Con. 8	40.90
Ezra McMillan, paying help on bridge work, G. R. Con. 4 lot 37	7.25
Grant Cassel, part pay on 19 cord stone, lot 13 Con. 2	10.00
Hugh McHaffie, gravelling 2nd Con. H. L.	114.00
J. B. Barkley, for oil and gasoline	7.75
J. A. McLean, for 24 yards gravel	9.60
J. B. Barkley, Nash Road Con. 5	7.00
Wm. Carr, gravelling Nash Road, Con. 5	21.00

The Council adjourned to meet again at Williamsburg on Saturday October 2nd, 1926, at two o'clock p.m.

M. S. BECKSTEAD, Clerk.

PUBLIC MEETING

In the interest of Mr. A. C. Casselman, Liberal-Conservative Candidate, will be held in the Music Hall Saturday Sept. 11th, at 8 o'clock p.m. Addresses will be given by W. M. Nickle Kingston, A. C. Casselman and others.

Ladies welcome. ao

WATER SUPPLIES---INFORMATION AND ADVICE FOR FARMERS

BY FRANK T. SHUTT, Dominion Chemist.

An abundant supply of pure water is a matter of first importance; there can be no guarantee of good health if the drinking water contains drainage matter of an excretal origin or is loaded with decomposing vegetable or animal organic matter. Excess of mineral matter in solution, as found in certain deep-seated waters, will also render a supply non-usable for drinking and household (laundry) purposes.

The salient features of the principal sources may be briefly considered as follows: Rain, the purest form of all natural waters as it descends, but collected and stored is often contaminated and is only useful for washing purposes. Dust on roofs and dirty, uncovered barrels or tanks are responsible for the unsanitary condition of stored rain water.

The degree of purity of the water of streams will depend on a number of factors and in the larger number of instances the safety of the supply for drinking and culinary uses can only be definitely ascertained by analysis. As a preliminary step there should be an inspection for some miles above the point of collection, to make sure there is no large amount of drainage matter of a polluting character entering them.

Large rivers and lakes are used as water supplies by cities, towns and villages. Unfortunately such sources are frequently polluted—it may be more or less locally—by drainage from other towns and this necessitates, to have a perfectly safe water, daily chlorination.

Shallow or dug wells should be distant, if possible at least 150 feet from house, barn, manure pile, septic tank or any other polluting source. When such distance proves impracticable it is imperative and in all cases advisable to protect the well by lining it with puddled clay or concrete to a depth of say 10 feet, continuing the concrete one foot above the ground's surface. By this device, the water entering the well must pass through at least 10 feet of earth and the absorptive power of the soil removes extraneous matter, affording a fair but not absolute protection against contamination.

Bored or driven wells, though at times yielding a water too saline for daily use, furnish as a rule water of a high degree of purity. Deep wells should be protected from the entrance of surface waters by adequate covers and furnished perfectly sound pipes and joints.

In conclusion, if the water is offensive to sight, smell or taste, it is in all probability unsafe—or at least highly objectionable—for domestic use, and a better, purer supply should be sought. If such is not available, protection may in a very large measure be obtained by boiling for a few minutes all the water required for drinking purposes. Another safeguard and one that can be highly recommended is as follows: Take a half teaspoonful of chloride of lime and rub it up with a little water to the consistency of cream and stir well into a barrel of the suspected water.

Simple Treatment for Packed Crop.

Packed crop is common in flocks kept in close confinement. Desire for green food, even when it is regularly supplied, leads some greedy individuals to overeat, with the result that their crops become stuffed with a hard mass that will not readily pass into the gizzard. Unless the birds are relieved, fermentation results, and in not a few cases causes death.

Last year I had a hen that had overeaten, and her crop was full and exceedingly hard. I did not want to open it with a knife, so I removed the hen to a brood coop, with a small attached run. The ground covered by the run was bare, so the hen could get nothing to eat except what was given her. I gave her a dish of water in which was dissolved a liberal quantity of Epsom salt, and for two days gave no food whatever. I thought by having her bowels emptied the hen might get some nourishment from the contents of her crop. At the end of two days the crop was smaller and the remaining contents had softened somewhat.

I then began feeding once a day a small quantity of soft food, consisting of stale bread soaked in sour milk and mixed with a little ground beef scrap. I still kept before her the water in which Epsom salt had been dissolved.

A few days of this treatment caused the crop to be emptied, and enabled me to increase gradually the amount and character of the feed. In a short time the hen was eating regular rations and resumed her laying.

Cleaning the Milking Machine.

The primal necessity of milking is cleanliness. Mr. A. G. Lockhead, Dominion Bacteriologist, writing on the subject of the milking machine points out that the sooner the cleaning of the machine is commenced after milking the more efficient it will be. Directly the cow is finished with, our authority advises that the teat-cups should be drawn through the unit, the cups being lifted up and down to allow the air as well as water to pass through. The cups and tubes should next be treated with hot water to which has been added a dairy cleansing powder. This can be done, says the Bacteriologist, in the most recent number of Seasonable Hints, with the suction on as before, or by removing from the machine and cleaning in a sink or suitable basin using brushes to clean the passages. Clean hot water should be used for the final rinsing and the whole system should be thoroughly flushed. Where there is danger of water getting into the air passages a wooden plug should be put in the open end after removal from the machine. Once a week the teat-cups and tubes should be taken completely apart and thoroughly brushed, a cleaning powder being used, and reassembled when dry.

Grow No. 104 Winter Wheat.

This variety has surpassed all other varieties in average yield of grain per acre, in the Experimental Union Co-operative tests and at the O.A.C. It is now widely grown and the seed is not hard to locate.

In six out of seven years it yielded better than Dawson's Golden Chaff, in the experiments conducted at the homes of the farmers. The O.A.C. 104 is a white wheat, with a white chaff and beardless head. It is hardy, vigorous and well suited to the Ontario climate.

Soap was made by the Gauls over 2,000 years ago. They made it of goat's fat and the ashes of beech trees.

The Age of a Horse.

To tell the age of any horse,
Inspect the lower jaw, of course;
The six front teeth the tale will tell,
And every doubt and fear dispel.

Two middle nippers you behold,
Before the colt is two weeks old;
Before eight weeks two more will come,
Eight months the corners cut the gum.

The outside grooves will disappear
From middle two in just one year,
In two years from the second pair—
In three years, "corners," too, are bare.

At two the middle "nippers" drop.
At three the second pair can't stop.
When four years old the third pair goes;
At five a full new set he shows.

The deep black spots will pass from view
At six years from the middle two,
The second pair at seven years;
At eight the spot each corner clears.

From middle 'nippers," upper jaw,
At nine the black spots will withdraw;
The second pair at ten are bright,
Eleven finds the corners light.

As time goes on the horsemen know,
The oval teeth three-sided grow.
They longer get—project before—
Till 20, when we know no more.

She Sells Kittens.

"Pussy Wants a Corner—in Your Heart." This and similar signs at our roadside stands have netted me higher returns the past year than my brother has earned from his pigs.

Most folks call it bad luck to have a black cat cross their path. Fortune smiles four ways every time one pussyfoots across mine. The lives of 365 song birds are saved, the heart of a city child is made glad, kitty is sure of a saucer of warm milk daily, and a dollar finds its way into my pocket. While attending school in the city last year an excited child invited me into the basement of an apartment home "to see him's kitty." From a soft lined box he rapturously brought forth a dead caterpillar which had been his pet for weeks. He stroked its fur with his baby fore-finger, cuddled and talked to it as if it really were the live pet he fancied it to be. On the spot I registered a vow, in tears, to provide something living and responsive for city children to love. Pigeons flew into my thoughts, rabbits hopped through my mind, white mice and guinea pigs. When I returned home for the week-end a nest of kittens opened the way. I started at once to house-break them in the "old loom room," an ancient edifice on the place. The heart-hungry apartment child received the first, gratis. Their next-door neighbor offered a dollar for the mate and within a few days all were sold at that price.

Black kittens and tigers sell best, but all colors go when displayed in a white chicken crate surmounted by the sign, Mouse Traps For Sale. A self-addressed postcard goes with pussy to its new home. Through them cat messages return to me along with new customers.—A. A.

Protection From Grease.

The sleeve of an old coat or worn-out pair of overalls is handy as a means of protecting the arm when doing a small job on the car that requires reaching into a greasy locality. It takes but a minute to slip on such a sleeve, right over the regular shirt and coat sleeve—and it saves a lot of laundering and cleaning.

A Farm in Paperland.

Kathleen and John each had a pair of blunt scissors of their own. There was a large room in the attic which they called Paperland, where they played with the pictures that they cut from magazines with their blunt scissors.

One morning they decided to have a farm in Paperland. Kathleen was to cut out pictures for the garden and the house, while John was to cut out the pictures of fields, stables, garages and of whatever would be of interest to a boy.

First they built a wall of blocks, which they played were stone, to separate the house and garden from the rest of the farm.

Kathleen found a picture of a large white house having green shutters and wide porches. In front of it were some fine big trees. She cut the picture out and set it up against a shallow cardboard box. Then she covered the floor in front of the picture with green paper for grass. She made walks of ordinary wrapping paper and laid one between the house and the road, and another around the house to the back.

She found some lovely flower-beds, which she put first in one place, then in another, till she found just the right place for them. The front garden was almost finished, but Kathleen wanted one more thing. So she looked through ever so many magazines till at last she found it. And what do you guess it was? A lily pond. Yes, a beautiful lily pond with a fountain in the centre. Then she put a hedge of green paper between the lawn and the road and set up a few trees along the road.

There were still the vegetable garden and the inside of the house to make, but it was almost time for luncheon, so she stopped to see what John had been making.

He had divided his part of the floor into several compounds or lots by placing thin sticks along the floor. Against the wall of the attic at the back of the farm, he had put a picture of woods wih deer and birds. There was another picture with mountains in the background. Farther on was a picture of the sea.

"It looks as if your farm was all scenery," said Kathleen.

"You just wait and you will see something besides scenery," said John, as he picked up some pictures he had cut out. "Did you ever see any finer live stock than that?"

In one of the lots he put some black and white cows. In another he put sheep and in still another chickens and turkeys and geese. In a fourth he put horses.

Then he set up some stables and barns and a garage. Near by he placed a windmill. There were pictures of fields of wheat, of corn, of oats and of barley. Each was placed in a lot by itself. Then there were plows and cultivators and tractors and all sorts of farming implements. He had automobiles of every kind. The grandest ones you ever saw.

Ding-a-ling-ling! went the luncheon bell.

So Kathleen and John could not finish the farm, but you might finish it for them. You could plant an orchard and a garden and furnish the house. You will find pictures of everything you could possibly need among the advertisements in magazines. And you must remember that farm houses have telephones, radios, mailboxes, and nearly everything that is to be found in town houses.

Be sure to keep the pictures that you cut out for the farm, for you can use them again to make other things. You might keep them in large envelopes labeled: houses, animals, flowers, men, women, children, etc.

The Fun of the Fair.

A GAME.

This jolly wet day game can be made at home; all that you need is a dice, and some animal pictures cut cut from any old papers.

Cut out pictures of single horses, cows, sheep and pigs and paste each on a small slip of cardboard—color them also if you like.

If you want to play this game before you have collected enough pictures write the names of the animals on separate slips of paper—this will do for a makeshift.

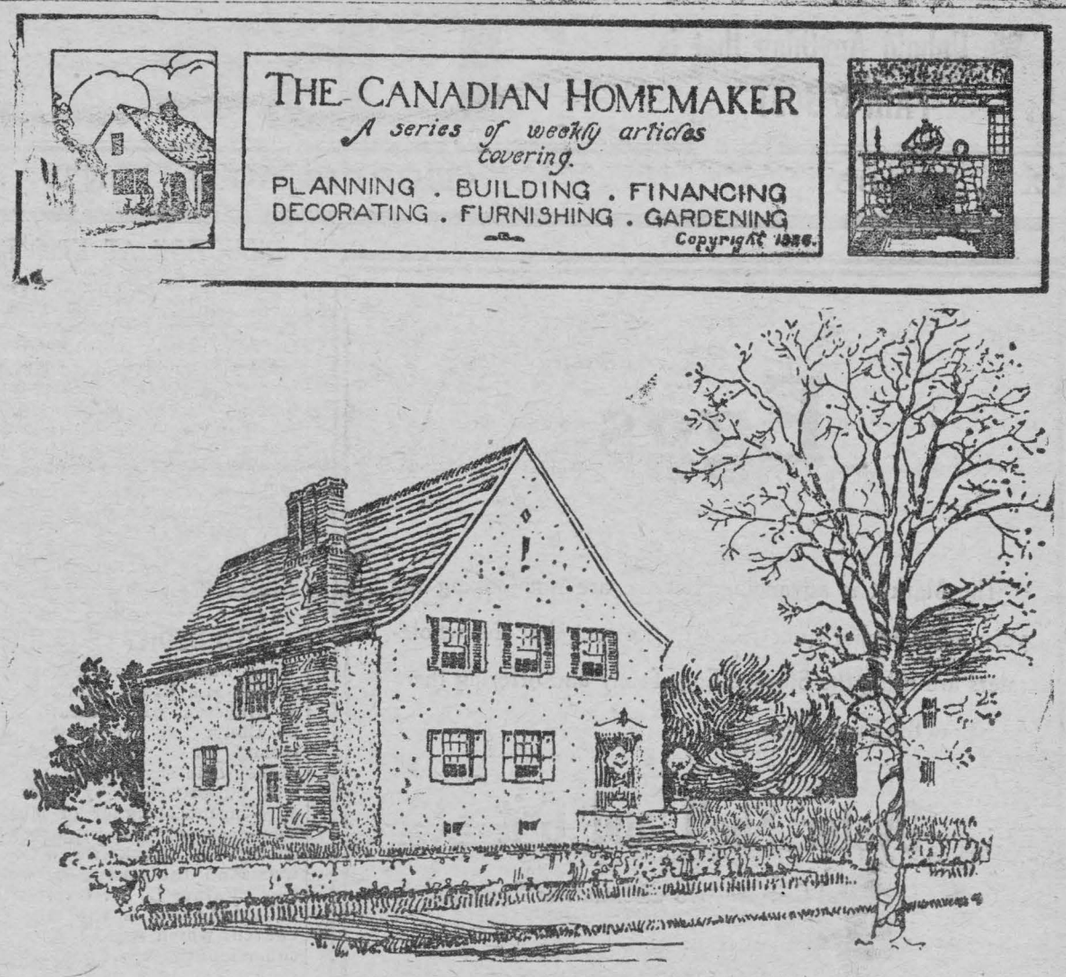

The animals are placed in rows on the fair ground—the table—then the dice is shaken and the game begins. According to the number you turn up so you "buy" from the fair.

For six, you buy a horse; four, a sheep; three, a cow; two, a pig. For one, however, you lose your turn and if you are unfortunate enough to turn upa five, then you lose all your animals for they must be returned to the Fair Ground. This is where the uncertainty and the fun come in.

When all the animals have disappeared and the Fair Ground is empty the player who has "bought" the largest number of animals wins the game.

A Canadian-owned Ayrshire cow, Nellie Osborne of Elmshade the 16th, owned by W. C. Wylie, of Howick, Que., has displaced an American-owned Ayrshire for the world's record milk and butter production for this breed. In a 306-day official test she produced 21,241 lbs. of milk and 909 lbs of butterfat. The previous record, held by Douglas Hall Dandy, was for a production of 18,266 lbs. and 739 lbs. of butterfat.

Sardine oil is extensively used in making paints and soap.

A FRENCH COLONIAL HOUSE

By Lawson & Little, Architects.

This house, about twenty-five by thirty, contains seven rooms and a bathroom. The hall, which is in the centre of the house, is approached through a verandah porch and vestibule, off the latter is an ample coat cupboard. Both the living room and dining room are of ample size, the former having a large fireplace, and the latter conveniently connected to the kitchen for easy service.

A side and cellar entrance, and a separate kitchen entrance are provided. As the stairs land in the centre hall on the first floor direct entrance is given to the four bed rooms, and bath room, without any loss of floor space. In fact, the plan shows commendable study in this respect. Besides a cupboard in each room, the master bed room is provided with a fireplace.

The exterior shows a dignified rendering in the French Colonial style, the uninterrupted lines of the eaves and cornices being artistically broken by the vertical lines of the group flued chimney.

The house has been erected of concrete and concrete blocks—the walls being finished in plaster—stucco roughcast. The roof is slated with Asbestoslate, of guaranteed quality.

The interior woodwork is of oak throughout the ground floor, and pine for painting elsewhere. The floors are of hardwood, except in the kitchen.

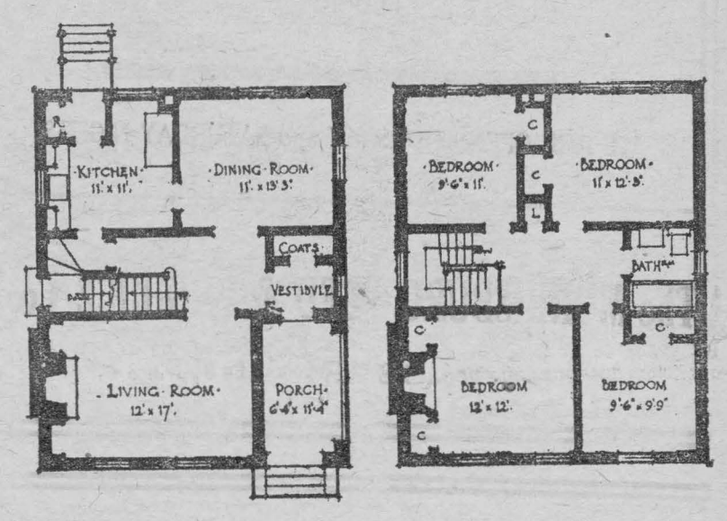

The heating is by hot water to each room, from a Standard type hot water boiler in the basement. Plumbing fixtures of modern design and type have been installed.

This house on a forty foot lot would cost about ten thousand dollars.

Readers desiring further information regarding the plans and specifications of this house should communicate with the architect direct. Address Lawson & Little, 273 Beaver Hall Square, Montreal, Que.

Question: The plans for ous house call for brick walls with lintels and sills. My contractor objects to these and advises using stone or cement. As there is considerable difference in cost what would you advise?

Unquestionably the architect who designed your house used brick lintels and sills because he thought they would be better appearing. We advise you to use them. If the contractor puts them up properly the construction will be sound.

Some Good Recipes.

Spiced grapes can be made by an old recipe which calls for 7 pounds of grapes (stemmed and washed), 5 pounds of sugar, 3 teaspoonfuls of cinnamon, 1½ teaspoonfuls of allspice and cloves (mixed), ⅞ of a pint of good vinegar. Squeeze pulp from skins, rub through a colander to remove seeds. Cook skins in a little water until tender, then add to the strained pulp. Add sugar, vinegar and spices and cook for one hour, or until thick and clear. Pour into sterilized glasses and seal with paraffin.

Tomato jam is made with 4 pounds ripe tomatoes (peeled and sliced), 2 pounds of sugar, 1 pint of vinegar, 1 tablespoonful of salt, 1½ teaspoonfuls of cinnamon, ½ teaspoonful of cloves. Cook slowly for three hours. Pour into sterilized glasses and seal with paraffin.

For peach cottage-pudding, stir sliced peaches into a batter made of ½ cupful of sugar, 3 tablespoonfuls of butter, 1 beaten egg, 1 cupful of milk, 1 pint of flour, 1½ teaspoonfuls of baking-powder. Bake in a loaf and serve with hard sauce.

Buckingham corn stew will please. To make, dice 6 carrots, 6 onions, 6 green sweet peppers. Let these cook (just covered with boiling water) while scalding, peeling and cutting up ½ bushel of tomatoes. Put all together and cook until the vegetables are tender—about two hours—then add the corn cut from two dozen ears (first scoring down the middle of kernels) and cook just ten minutes. Season highly to taste with salt, pepper and sugar when the corn is added. This makes a meal in itself, and is one of the most delectable stews made. As the recipe makes a large amount, can what is left in quart jars for winter use, using the open-kettle method; it keeps perfectly. Add sliced okra if you raise this vegetable.

Canned tomato soup calls for 1 peck of ripe tomatoes, 4 large onions, 2 red sweet peppers (seeds of one), 25 whole cloves, 2 quarts of boiling water. Cook together until soft (about half an hour) and press through a fine sieve or colander. Add to the pulp 1 cupful of brown sugar and 2 tablespoonfuls of salt. Boil 15 minutes and seal hot. Celery seed or fresh parsley can be added before straining. Thicken with flour and butter (or salt pork fat) before serving.

A COLOR SCHEME IS AN ECONOMY IN SEASON'S WARDROBE

Simplicity, harmony of color, and good lines characterize the well-dressed woman. These essentials may be secured on a modest income or dress allowance. To be expensively dressed is not necessarily synonymous with being well-dressed, and vice versa.

One woman, while shopping, saw a charming spring coat of a beautiful shade of terra-cotta. She tried it on and found it most becoming. After making her purchase, however, she discovered that the color clashed with almost everything she possessed. She couldn't wear it with any of her hats, so had to buy a new one. Even then she was not satisfied, for her dresses being off-color, her appearance lacked the charm of a well-planned toilette. Eventually she had the coat dyed. She was a poor shopper.

Another woman who cannot afford a varied wardrobe but who has the reputation of being a well-dressed woman, attributes her success in this direction to the fact that each year she decides on a definite color scheme for an entire season. For example, this spring she selected orange as her basic color. Hats, gloves, and stockings were chosen to harmonize. A tailor-made tan cloth dress with a woven pattern of orange, makes a charming frock for chilly days. For warmer days were chosen an orange-colored silk with an all-over pattern of tan; a buff-colored linen with touches of blue and orange, and a shantung silk dress. A white lace frock completed this simple but tasteful wardrobe, which, being based on one scale of color, enabled the wearer to use the same accessories with each frock and to have them always in harmony. Had she wanted to elaborate her outfit a little further, a black dress could have been effectively introduced, and she could have gone yet farther afield into certain blues and greens.

Cucumber loaf is a pleasing company dish to be served with hot or cold roast meats. It is made thus: Into 2 cupfuls of boiling water turn 6 peppercorns, 1 blade of mace, ½ of a bay leaf, ½ teaspoonful of celery salt and 1 slice of onion; steep 20 minutes, drain and add to the liquid ¾ of a box of gelatin dissolved in a little cold water; strain, add 4 tablespoonfuls of vinegar. Cover the bottom of a mold to the depth of half an inch with the mixture, add a layer of thinly sliced cucumbers and repeat the layers until the dish is full. Stand in a cold place to harden and serve very cold on a bed of watercress.

For a seasonable dinner, remove the seeds from firm ripe tomatoes. Fill the cavities with cold cooked meat and stale bread cut into small pieces. Season with salt and pepper and sprinkle the tops with grated cheese. Bake for 30 minutes, then place in the centre of a platter with a ridge of mashed potatoes around them, then a row of peas or beans that have been cooked and seasoned. Cook the juice of the tomatoes, thicken to a sauce; pour it over the tomatoes, and garnish the platter with watercress or parsley.

Breakfast Room Furniture.

For the sum of $5 the furniture and hangings for a really charming breakfast room were evolved in one home. The varnish was first removed from an old oak chiffonier and four dining room chairs, the preparation sold for this purpose being used according to directions. These pieces, together with a drop-leaf side table which had been used in the kitchen, were then given a coat of flat white paint, followed by two coats of a lovely soft shade of pale green enamel. A stencil in white with a touch of pink and black in the design added an individual note. Cream scrim curtains were given a border of fast-color green chambray. A green glass fruit dish was set between two tall brass candlesticks on the chiffonier and a Canton China bowl holds always a bouquet of mixed flowers in shades that harmonize with the soft colorings of the room. That is for the summer time. In winter a growing plant or greenery is used.

The population of the earth doubles itself in 250 years.

CHILDREN ARE SUFFERERS WHEN MILK PRODUCERS GO ON SRTIKE AT HALIFAX

Halifax.—Householders in this city are on short milk rations as local milk dealers, unable to get sufficient milk, were forced to cut down their sales. The situation is serious. The little milk served the first day was, for the most part, two days old. Firm in their determination to defeat the Health Board, milk producers from the outlying districts sent practically no milk into the city. With the supply practically exhaused and with no milk obtainable from the producers, the probability is that many consumers will be compelled to do without the staple commodity.

Perhaps the most serious development was contained in the announcement by a local dairyman who supplies the Tuberculosis Hospital, to the effect that that institution is practically without milk. "At the hospital they use 60 quarts daily," he said, "and I was not able to provide them with a drop for the past two days. I just came from there a few minutes ago and there is not a drop of milk in the institution."

This statement was later corroborated by the authorities at the Tuberculosis Hospital, who stated that for two days they had had practically no milk. They obtained a small quantity, insufficient to meet their needs. At the city home, it was stated, condensed milk had been used for the past two days.

At the Children's Hospital a similar condition of affairs exists. This institution has not been altogether without milk, but the quantity it has ben able to obtain has been much smaller than it requires, and the shortage is felt. The Victoria General Hospital, more fortunate than the other institutions, was able to secure the regular quantity.

258,000 PEOPLE AT FAIR ON LABOR DAY

Attendance to Date Passes Million Mark With 30,000 to Spare.

Toronto, Sept. 7.—Establishing a record attendance of 258,000, or 28,000 more than the previous high of 230,000 on Children's Day in 1921, Labor Day at the Canadian National Exhibition yesterday wiped out the deficit of 34,000, caused by the downpour of rain all day on Saturday, and once again put this year's total 19,200 ahead of last year. This huge attendance marks the first time that the Fair has passed the quarter-million mark in one day and puts 1926 well on the way to making a new record for the thirteen days of the Exhibition, the present record of 1,519,000 having been reached in 1924. Last year's total was 1,491,000, a rainy last day pulling the attendance down by 50,000.

Evidences that the forces of labor were out to beat previous records at the Exhibition was forthcoming very early in the morning when the turnstiles began clicking out a merry tune and a never-ending throng of people poured through the gates. It was not long before the Midway began to assume the appearance that one associates chiefly with the evening, when the throngs of city workers have arrived for a night of rollicking amusement. By one o'clock, from the eastern gates down the Midway and to the west of the Grand Stand was one thick wedge of people and to reach the centre of the grounds needed the exercise of considerable muscular energy.

As the afternoon wore on the crowds became even denser and at the confluence of the Midway and the road crossing the East of the Grand Stand was one thick wedge of people and to reach the centre of the grounds needed the exercise of considerable muscular energy.

As the afternoon wore on the crowds became even denser and at the confluence of the Midway and the road crossing the East of the Grand Stand, the two streams of people several times became locked like a log jam, with a stationary mass of people in the centre and only the outskirts in motion. This was not surprising considering that people had been pouring into the grounds all through the afternoon, a queue at the Dufferin Street entrance at one period extending for two blocks.

Hon. Narcise Perodeau

Lieutenant-governor of Quebec, who opened the exhibit of wool, woollen and knit goods, at the Exhibition, is shown here, clad in the coat of which the wool was shorn from the lambs at Brantford only Saturday morning, the finished coat being brought to Toronto by airplane that night, constituting a record for speedy manufacture of a woollen coat.

FIFTY LIVES LOST WHEN CINEMA HALL IS DESTROYED BY FIRE

Irish Village in Panic When First Show Hall of its Kind Becomes Seething Furnace.

Limerick, Ireland, Sept. 6.—Fifty lives were lost and a dozen persons seriously injured Sunday night in a fire in a temporary cinema hall in the Village of Drumcollogher, near here.

The moving-picture show was being given in a hall over a garage in a wooden building. The hall was reached by one stairway. The projection machine caught fire, and in the panic women and children were crushed and trampled in the frantic attempt to escape from the blazing hall, in which many were trapped and burned alive. The village has a poorly equipped water supply, and the wooden building with the garage on the ground floor burned fiercely.

It was the first time the show had been opened to the public. There had been a trial showing the night before, at which everything went well. The Village of Drumcollogher has less than 500 population, but the announcing of the showing of the film, "The Decoy," attracted an audience from all the hamlets about, for such a show was an unusual event in those remote villages.

The fire started within 15 minutes after the opening of the show. The projecting machine was not protected by any screen, and was placed within a foot of the only door. When it caught fire it was a seething mass of flames within a moment or so and great panic seized the spectators, who had to pass through sheets of flame from the apparatus in rushing for the door. Men, women and children were knocked down and trampled in the terrible rush.

The wooden building soon became a furnace. Some managed to get through the one door and hurled themselves down the narrow stairway. A few active young men climbed through a skylight and escaped to safety in the neighboring yard. A portion of the floor soon collapsed, dropping part of the spectators into the garage beneath, when it was more easy to escape.

The fire burned itself out and the building was completely destroyed. Most of the bodies recovered from the ruins were burned beyond recognition. Throughout the night rescuers were engaged in the task of removing the dead. Piteous scenes were to be observed during this work because of the distress causedt he vereaved in their inability to identify positively their own dead.

The bodies recovered included 20 women, 10 men and 10 children. One family of six persons on a holiday from London perished. Some children who were thrown through the window escaped with bruises only. One young girl after clambering through the skylight fell from the roof and was killed. A man trying to descend from the roof by a waterspout fell and was badly injured.

Both the operator of the phojecting machine and the owner of the show were arrested.

THE MARKETS

TORONTO.

Man. wheat—No. 1 North., $1.51½; No. 2 North., $1.46; No. 3 North., $1.39.

Good Yields Reported from Western Points

Winnipeg.—Wheat at Niverville, Manitoba, is going 25 to 35 bushels to the acre, with the weight at 62 to 64 and grading No. 1 and No. 2 Northern, according to reports received here.

The following points report good yields: La Riviere, 27 bushels; Cartwright, 20 to 28 bushels; Napinka, 25; Macdonald and Minnedosa, 20; Westbourne, 35 to 45; and Bradwardine, 25 to 35 bushels to the acre.

Saskatchewan—Grenfell, 26 bushels; Sinclair, 24; Kisbey, 24; Rouleau, 30; Valour, 28 to 30, and Glamis, 35 bushels to the acre.

Justice J. V. Teetzel

Ontario supreme court judge, who passed away on August 24 in the Barbadoes.

QUEBEC NOW INCLUDED IN STATISTICS REPORT

Of 18,844 Living Births Recorded in January, 6,808 Were Reported from Quebec.

Ottawa.—The vital statistics for the month of January last have been issued by the Dominion Bureau of Statistics, and are of more than ordinary interest in that for the first time in such reports the Province of Quebec is included.

Of the total of 18,844 living births during the month of January, 6,808 were reported from the Province of Quebec. Ontario reported 5,481. For the provinces, exclusive of Quebec, the total last January was 12,036, over 600 less than for the corresponding month the year before, all the provinces showing a lesser number. The infants last January were 9,787 males and 9,057 females. Montreal had 1,745 births and Toronto 911. Winnipeg had 392, Quebec 311, Ottawa 268, Vancouver 246, and Hamilton 216. Among the provinces Saskatchewan came next to Ontario, with 1,664 births, Manitoba 1,182, Alberta 1,155, Nova Scotia 839, New Brunswick 800, British Columbia 797, Prince Edward Island 118.

The average death rate for the month per 1,000 of population was 11.1, with Quebec the highest, 14.0, and Saskatchewan the lowest, 6.5, Alberta being 6.8, Manitoba 7.9, British Columbia 9.3, whereas the rates in the other provinces ranged between 11 and 12.

DIRECT SUNLIGHT NECESSARY TO HEALTH

President of Sanitary Inspectors Points Out Principal Community Needs.

Brantford.—The Sanitary Inspectors' Association of Canada held a three-day convention here, presided over by Pres. E. W. J. Hague, Chief Health Inspector of Winnipeg. Mayor J. A. D. Slemin welcomed the guests.

Pres. Hague, in the opening address, discussed "Light and Health," stressing the necessity of natural light in living and working quarters. Sunlight was necessary for continued health. He summed up by stating that the four principal needs for the health of a community were: A clean atmosphere in cities and towns; the admission of direct sunlight to all working and living quarters, particularly to homes where there were growing children; the perfection of a window glass to admit ultra violet rays; the inculcation in the minds of the people of the absolute need of direct sunlight, in winter as well as summer, if health was to be maintained.

Murder of Publisher Is Charged to Employee

Montreal.—Henri Bertrand, former manager of Le Prix Courant and other publications conducted by the late J. A. Beaudry, who was found shot to death in his office on Aug. 14, was formally charged with the murder of Beaudry before Judge Cusson following the Coroner's inquest, when he was declared criminally responsible for Beaudry's death. Preliminary trial was set for Sept. 9.

20,000 London Hoppers to Harvest Sussex Crop

London.—An army 20,000 strong left London last week for the annual invasion of the great hop fields of Kent and Sussex to harvest England's beer for next year. Scores of special trains and weird caravans of tramp pickers, carrying their bedding, kitbags and food in boxes and on their backs, carried the army to the hop fields.

The hoppers swarmed into the railway stations the night before their departure for their traditional keeping of an allnight vigil beneath the flickering lamps, awaiting the break of dawn, when the packed railway carriages started southward. Some of the hoppers stay two or three weeks, others till October.

VETERAN VISITOR AT NATIONAL EXHIBITION

Made First Visit in 1873 and Has Missed Only Three Fairs Since That Time.

Toronto, Sept. 7.—One of the visitors to the C.N.E. yesterday was a veteran of the days before the present Exhibition was constituted and when the old Toronto Fair was the atttraction. This was H. Larkin, of Saginaw, Mich., and his first visit to the old Fair was in 1873. Since that time he has put in 51 annual visits, missing only three times.

"Every year that I have been here," he said, "the Exhibition seems to be getting bigger and bigger. When are you going to stop?"

From the time when a few thousands visited the Fair to the present when a crowd of 200,000 may pass through the gates in a single day is a long journey, and Mr. Larkin has been in attendance as almost each milestone was passed. The longest visit he made to Toronto for the Exhibition was when he was living in Oregon, but he made the trip and intends to keep repeating it in the future.

George Hall

Hamilton, employee of the Hand Fireworks Company, who was killed at the Exhibition when a fireworks "bomb" exploded laterally instead of into the air. He leaves a wife and one young child.

MERCHANT MARINE TO BUILD FIVE SHIPS

Special Service to West Indies With Montreal as Summer Port.

Montreal, Sept. 6.—The building of five new ships for the Canadian Government Merchant Marine for service between this country and the West Indies, in accordance with the terms of the West Indies trade treaty, is expected in local circles to be undertaken shortly, according to J. E. Dalrymple, vice-president in charge of freight traffic, C.N.R. These ships will have refrigerator, passenger and freight accommodation. The vessels will be built in Canada, Mr. Dalrymple declared.

The offer to establish this new service has been made to the Government by the C.G.M.M., and it is anticipated that some action will be taken as soon after the elections as is practicable, Mr. Dalrymple intimated.

If the offer is accepted, Montreal will be the summer port of the service and Halifax will be the winter port.

Heat in the Stars.

The hottest stars probably reach a temperature as high as 40,000 degrees Fahrenheit.

FINDS HIGH STANDARDS IN CANADIAN SCHOOLS

Bar Association Proceeds to Organize National Body for Law Schools.

St. John, N.B.—The standard of education in the law schools of Canada is high, as it is comparatively low in the United States, according to addresses and reports delivered at the Thursday morning session of the eleventh annual meeting of the Canadian Bar Association here. This was brought out during the report on legal education, presented by J. E. Read, K.C., Dean of the Faculty of the Dalhousie Law School at Halifax, and an address on legal education in the United States delivered by Dr. Everett Fraser, Dean of the Faculty of Law of the University of Minnesota.

J. F. H. Tweed of St. John reported on a meeting held by members of the governing bodies of the Provincial law societies, at which it was decided to form a new organization as a subsidiary of the Canadian Bar Association. The name chosen for the new body was Conference of Representatives of Governing Bodies of the Provincial Legal Societies.

Fire at Cobourg Destroys Terrace With Four Houses

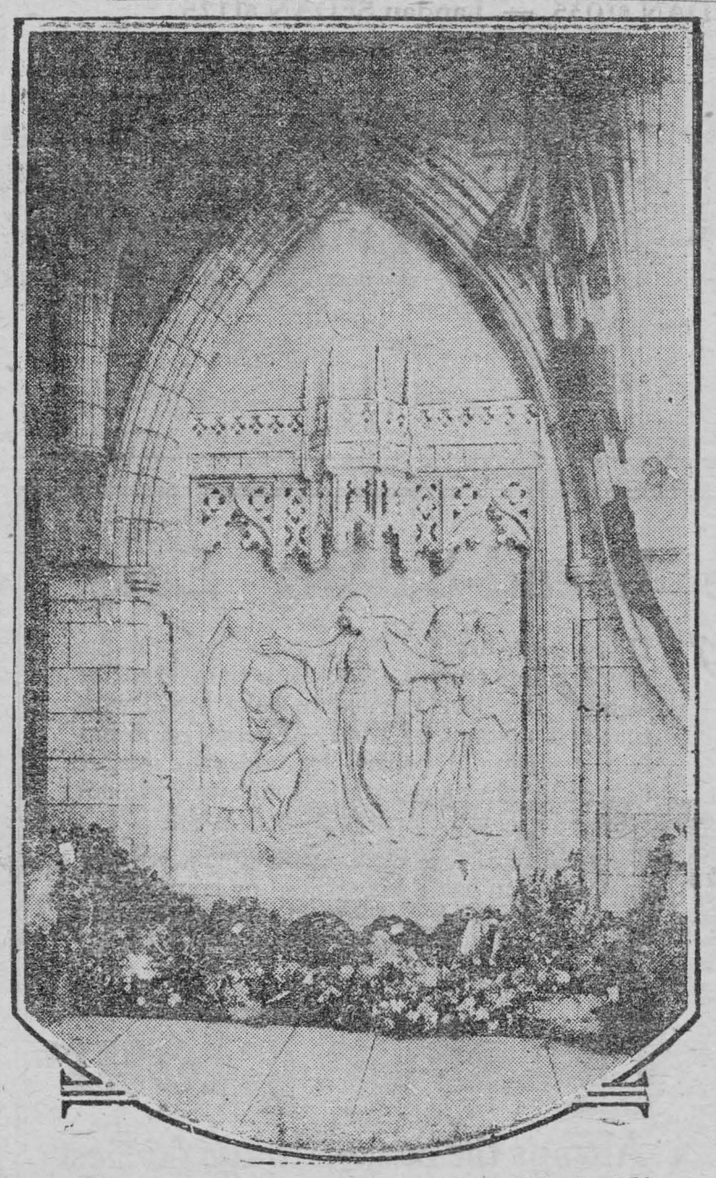

Cobourg, Sept. 6.—Fire of unknown origin completely gutted a four-house terrace at the corner of Covert and Division Streets here to-night. The fire started about 8.30 at the rear of one of the houses and rapidly spread to the other three. This corner is close to the business district.

The houses were on the old Crawford estate and it is understood that the loss, which will amount to several thousand dollars, is covered by insurances.

New Kipling Volume to be Published Soon

London.—The publication of a new volume by Rudyard Kipling is a rare event these days, and considerable interest has been caused by the announcement that he will issue "Debits and Credits" containing fourteen short stories and twenty-one poems on September 15.

The publishers state that the twenty-one poems will appear for the first time in the new volume.

UNVEIL MONUMENT TO HEROIC CANADIAN NURSES

At a brilliant function on Parliament Hill, Ottawa, a monument to the heroic Canadian nursing sisters was presented to the people of Canada by Miss Jean Brown, of Toronto, on behalf of the Canadian Nurses' Association, of which she is president. The monument was unveiled and accepted by Sir Henry Drayton on behalf of the people.

NINE LIVES LOST WHAN RADIAL RAILWAY CRASH ON MICHIGEN TRAINS

Monroe, Mich.—Nine persons were killed and 19 injured, 10 of them seriously, when two interurban passenger cars met head-on half a mile north of the Monroe city limits. Among the dead is one Canadian, William A. Rooney, 145 Randolph Ave., Sandwich, Ont.

The wreck occurred on a 2,000-foot curve. The motorman of the northbound interurban, which left Detroit city limits at 12.45 p.m., is said by officials to have overrun Pine Siding, one mile north of Monroe, the scheduled meeting place of the two interurbans. A half mile south of the siding the southbound car crashed on the curve into the car travelling from Toledo to Detroit. Each car was travelling about 40 miles an hour, and the impact telescoped each car about half its length.

State police, aided by members of the Sheriff's force, went to the scene soon after the crash and assisted in removing the dead and injured. It was reported that several passengers were pinned beneath the wreckage. In addition to those seriously injured, a number were badly shaken up and cut by broken glass.

An investigation into the cause of the wreck was begun immediately. An effort will be made to learn why the motorman of the southbound car failed to stop at Pine Siding, as his orders read. The bodies of the dead and the injured persons had been removed from the wreck an hour after the accident.

Windsor.—William E. Rooney, of Sandwich, who was killed in an interurban collision at Monroe, had lived in Sandwich for about three years, coming here from Buffalo. He made his home at 144 Randolph Ave., and was employed as a salesman for a Detroit company. Surviving are the widow, Mrs. Lillian Rooney, and a daughter. Mr. Rooney's parents reside at Buffalo.

WINCHESTER SPRINGS

Master N. Laudreville of Ottawa spent a couple of weeks with his aunt, Mrs. O. Casselman, returning home Thursday.

Mr. and Mrs. Lee Tuttle of Dundela were visiting at the home of Mr. and Mrs. Elburn McIntosh recently.

Mr. and Mrs. C. Smyth of Dundela visited recently at the home of Mr. and Mrs. H. McIntosh.

Mr F Shaver of Hainesville spent one day recently with his father, Mr. John Shaver.

Mrs. Luther Deeks of Elma spent a few days with Mrs. J. Shaver.

A large number of farmers from here attended the fair at Ottawa this week.

Mrs. K. Gilmour spent a few days with friends in Uncle Sams Domain.

Master N. Laudreville, Mrs A. J. Casselman and Mrs. O. Casselman were guests on Monday of Mrs F. Cross at Mapleridge and Mrs. C. J. Strader at Winchester.

Miss Laura Walker, Perth, spent Sunday with Mr. and Mrs. Orren Cas selman.

Messrs Jay Bailey, Blake McMillan and Cecil Casselman went on the Harvesters Excursion.

Masters Dwight and Bruce Armstrong of Winchester spent the week-end with Master Venance Lauderville at the home of Orren Casselman

Mrs. Walter McIntosh, Misses Lucy and Ruth McIntosh and Mrs. Elburn McIntosh spent Wednesday with Mr. and Mrs. E. Johnston, Toys Hill.

Miss Mabel McIntosh called at the home of Mrs. C. Robin Sunday.

Mrs. Myke Casselman is spending some time with Mrs. Jack McDonald in Ogdensburg.

Mrs. Clarence Thompson spent a few days with Mr. and Mrs. Percy McMillan at Waddington.

Master N. Laudreville, Mrs. A. J. Casselman, and Mrs. O Casselman, were visiting at the home of Mrs. Orsen Coleman's at Toys Hill Wed.

Miss Elta Thorp left for Hurst on Sunday to resume her duties as teach er.

Visitors at Mr. C. Robinson's on Sunday were Mr. and Mrs. G Arrington of Napanee and Mr. and Mrs. Hugh Arrington of Russell ,Ont.

Messrs Manson and Lorney Derbey of Lisbon, N. Y. spent a few days the guests of Misses Elta and Bessie Thorp.

Mr. and Mrs. O. Casselman and Master N. Laudreville, Mr. and Mrs. A. J Casselman spent Tuesday at Rideau.

Mr. and Mrs. O. Casselman, Mr. and Mrs A. J Casselman, called on friends at Iroquois Prescott and Brockville on Friday

The Misses Dora, Clara and Laura Bell of Brinston, were recent guests of the Misses Hilda and Mildred Davidson.

Mrs. D. Hanson of Waddington spent a few days with her son, Mr. A. Bailey.

Mrs. Orson Coleman and sons of Toys Hill were guests of Mr. and Mrs. A. J. and Mr. and Mrs. O Casselman on Sunday

Mr. and Mrs. Geo. Myers and Miss G. Myers spent Friday last with Mr. and Mrs. Alva Runions at Lisbon, N. Y. Miss Lela Runions who has been spending a couple of weeks with her grandparents returned home with them.

Mr. and Mrs. G. Myers spent Wednesday last the guests of Mr. and Mrs. Will Myers at Aultsville.

Mr. and Mrs. A. J Casselman, Mr. and Mrs. O. Casselman, motored to Brockville Friday and spent the day with Middagh brothers and families

CEDAR GROVE

Mr. and Mrs. Henry Flett and the Misses Gladys and Edna Flett of Iroquois visited Mr. and Mrs. Frank Dafoe on Tuesday and Wednesday.

Mr. and Mrs. Wm. Jarvis and fam ily, Mr. and Mrs. Fred Jarvis, and Mrs. Ed. Jarvis spent the week-end wiht friends in Montreal.

Miss Jessie Waldroff who has been the guest of Mrs. Fred Dafoe the last three weeks, returned home on Sat.

Mr. and Mrs. Ralph Fincham and family of Louisville Landing, spent Labour Day with Mrs. E. Jarvis.

Mr. and Mrs. Ross Beckstead of Riverside, visited Mr. and Mrs. Mason Beckstead the 5th.

Mrs Carmi Froats and Mrs Mary Froats of Gallingertown were visitors of Mrs Wm. Myers on Tuesday.

Mr and Mrs. R. F Gallinger and Miss Fern and Mr and Mrs. F. McConnell and Miss Muriel visited Mr and Mrs. C. Hart, Wales, on Monday

Recent guests of Mr and Mrs Chas F Dafoe were Rev. Mr. Stone, Massena, Mr S H Morgan Toronto, Mr. and Mrs. Clarence Dafoe of Massena Mrs Jas. Bryan and daughter Helen of Gallingertown, Mr. and Mrs. Albert Hollister, Miss Thelma and Master Clifford Hollister, 2nd Con. Mr. Correl Heath Miss Doris Heath, of Moulinette

The Ladies Aid of Gallingertown, purpose holding a harvest supper in the United Church, at Gallingertown, on Thursday Sept. 16th,; supper served from 6 to 9 p. m. Tickets 50c Weather being unfavorable it will be held the following evening.

Messrs C. F Dafoe, Geo and Frank spent Tuesday in Finch.

VILLAGE VIEW

Mrs. Isabella Deeks and Mrs. Stanley Saddlemire spent Friday at the latter's daughter's hoome, Mrs. F. Merkley.

Mr, J. Merkley spent two days at his daughter's home, Mrs Alex Ault, of Ogdensburg N Y.

Our school opened on Wednesday with Miss Elizabeth Casselman as teacher.

Mr. and Mrs George O'Shaughnessy spent Sunday at Mr J. M Deeks' home

Mrs. Walter A. Merkley and her daughter, Mrs. Edward Deeks, spent a couple of days at Ogdensburg fair, then motored out to visit friends at Gouverneur, N.Y.

Miss Laura Deeks is visiting at her cousin's home, Mrs. G. O'Shaughnessy this week

Mr and Mrs. Neil Hunter spent Sunday at the home of Mr. Ross Beck stead, River Road

Congratulations to all our Entrance pupils who all were successful in passing. We are pleased to see Claude Barclay attending Morrisburg Collegiate.

Visitors at Mr. J M Deeks' home on Sunday were Mr Willie Thompson of Montreal; Miss Gracie Tulley and Mrs. Thomas Thompson, and Mr. Arnold Johnston all of Dixons Corners

GRANTLEY

Our school opened here on Wednesday with Miss Mildred Allison of Morewood as teacher for the coming year.

Mr. and Mrs. Alf Wells, Mr. John Wells and Miss Hazel Wells spent a few hours with Mrs. Milton Carr on Monday enroute to Lemieux, Ont. where the latter will take up her duties as teacher for this year.

Mr. and Mrs. Hollister of Osnabrook Centre spent Sunday with their daughter, Mrs Bert McMillan.

Dr. Schwartz of, Canton, N. Y., spent a few days with Mr. and Mrs. George Countryman.

Mr. and Mrs. Henry Hanson of Brinston spent Tuesday with Mr. and Mrs. M. Carr.

Miss Leona Dane spent a couple of days with her friend, Miss Lottie Taylor.

Mr. and Mrs. Jerry Good and son Gerald of Ottawa, spent Sunday with Mr. and Mrs. Ed. Perrault.

Mr. and Mrs. Kyer spent Sunday at Cornwall with the latter's mother who is seriously ill

Miss Marion Gordon is spending a few days with her grandfather, Mr. A. C. Fetterly, at Cornwall, also attending Toronto Exhibition.

Pontiac Six Has Created Its Own Field!

INTO a market already apparently divided into "classes" and "price-ranges" came Pontiac Six—a new car, a new value that swept away all barriers of "class" and "price". Pontiac Six brought quality into the "low-priced six" field. It brought low price into the "quality six" field. And, to the multitude of Pontiac buyers, it brought a new combination of quality and economy that has established for Pontiac a field and a market all its own.

Search as you will the range of low-priced sixes and you will find no other car, at Pontiac price, which provides a spacious Fisher closed body finished in dashing permanent Duco colors, a large engine of 186.5 cubic inches displacement, a 46 lb. crankshaft, automatic spark control, honed cylinders and the rugged construction which has already won for the Pontiac Six its reputation for unrivalled stamina.

Pontiac's low prices are made still lower by the removal of the Canadian Excise Tax—Pontiac Six now being Canadian-built.

Why shouldn't they buy from you?

Make up your mind to secure the trade of the Summer cottages near town, this year. Think of all the things they will be buying! Why shouldn't they buy them from you? In the city they are used to ordering goods by telephone. Call them, even using Long Distance where necessary and tell them what you can do for them. Remind them that for week-end parties you can give them prompt delivery.

When they see how easy it is to order from you by telephone they will likely prove good customers all Summer.

WOOD'S PHOSPHODINE, *The Great English Preparation.* Tones and invigorates the whole nervous system, makes new Blood in old Veins. Used for *Nervous Debility, Mental and Brain Worry, Despondency, Loss of Energy, Palpitation of the Heart, Failing Memory.* Price $2 per box, 3 for $5. Sold by all druggists, or mailed in plain pkg. on receipt of price. *New pamphlet mailed free.* THE WOOD MEDICINE CO., TORONTO, ONT.

ECZEMA You are not experimenting when you use Dr. Chase's Ointment for Eczema and Skin Irritations. It relieves at once and gradually heals the skin. Sample box Dr. Chase's Ointment free if you mention this paper and send 2c. stamp for postage. 60c. a box; all dealers or Edmanson, Bates & Co., Limited, Toronto.

Good Health for All the Family

Mrs. Mary Fourgere, Larry's River, N.S. writes:—"I was troubled with constipation for years." At last a friend suggested that I try Dr. Chase's Kidney-Liver Pills. I did so and must say that they have given me more relief than all the medicine I have taken during the last ten years."

The newest idea in medicine is to prevent serious disease by looking after the "minor ills."

Since about ninety percent of serious diseases develop from constipation and torpid action of the liver and kidneys the use of Dr. Chase's Kidney-Liver Pills to arouse the action of these organs is the most effective of preventives.

Backaches, headaches, indigestion, constipation, etc., soon disappear when this great regulating medicine is used.

Dr. Chase's Kidney-Liver Pills

35c. a box, all dealers or The Dr. A. W. Chase Medicine Co., Limited, Toronto 2, Canada.

GYPROC
Your house and garage

One of Ontario's Best Investments

Highways contribute greatly to people's welfare and pleasure

By making transportation easy, Ontario's good roads foster business, assist the farmer, and bring pleasure to hundreds of thousands of our people. Good roads are one of our best investments.

These roads have cost $180,000,000 of the people's money. Many more millions will be required to keep them in repair and to renew them. This money must come from those who use the roads.

You, as a motorist, are invited to take an interest in the highways. They are yours to use, not to abuse—yours to enjoy, not to destroy. Excessive speed grinds away road surfaces. Drive moderately and you will help to protect the huge investment which you and the other motorists have made in the good roads of your Province.

While confident that the majority of motorists will heed this request for co-operation in preserving the roads, the Government gives warning to the careless that the speed laws are being rigidly enforced.

THE HON. GEO. S. HENRY, Minister of Highways
S. L. SQUIRE, Deputy Minister

Issued by the Ontario Department of Highways to secure the co-operation of motorists in abating the abuse of the roads of the Province.

"IDEAL Fashions" by Jean Belle Hamilton

1384

THE DAYTIME MODE IS PRINTED IN PARIS

New in line, youthful and flattering, and the type of frock that smart women wear all day long. Fashioned of printed foulard in polka-dot design, it has a tiered skirt showing more fullness in front than the back. There are jabots extending from the turn-back collar to the waistline, and long set-in sleeves that are gathered into narrow bands at the wrists. Printed rayon or cotton voile would also be suitable for this frock, No. 1384, which is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 requires 4½ yards 36-inch figured material, with ¾ yard plain contrasting for jabots. Price 20 cents.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

Keep Young with Rinso

Your doctor will tell you the old-fashioned wash-day is one of woman's greatest foes.

Strained backs, ugly hands, jangled nerves and short tempers—all come from the everlasting rub-rub-rubbing on the ancient washboard.

The modern way is to let Rinso do the work.

Change the hard work of washing to just rinsing.

Simply dissolve Rinso in the wash-water, put in the clothes, soak for 2 hours or more and just rinse.

Let Rinso do your next washing.

Made by the makers of Lux.

Change washing into just rinsing

R-452

ISSUE No. 36—'26.

Excelling in Cedar.

That much misunderstood but most heroic of the prophets, Jeremiah, stalked into the palace of King Jeholkim. It was a new palace, lined with cedar and decorated in vermilion. Neither Josiah, the king's illustrous father, nor David, his first ancestor, had lived in such a house. To build it an overtaxed people had been burdened, but what was to be done about it?

Jeremiah walked in and confronted the king and said, in substance:

"You are a great king, an excellent judge of cedar; a potentate of paint and varnish. And while your brother is a hostage in Egypt and your people are trembling under the fear of invasion from Assyria you live here in luxury. You do not deserve the throne; you do not deserve to be buried in the same soil with your father. His excellence was in the simple qualities of justice and piety. You deserve, when you die, to be hauled out and thrown on the dump like a dead ass."

Stinging words, brave words; we wonder how Jeremiah was able to speak them and get away alive. And this is the hero who is often remembered only as "the weeping prophet!"

We of this generation are excellent judges of cedar and vermilion. Our houses have electric light and steam heat, charming furniture and decorations. If these things make a people great, we are great. But that which really made the generation whose children we are was moral earnestness, devotion to duty, reverence for God, and the authority of conscience. We can never afford to think lightly of these qualities. Cedar will give place to black walnut, and black walnut to quarter-cut oak, and oak to mahogany, as fashions change; but there is just one kind of honesty and righteousness. "Did not thy father eat and drink and do justice and righteousness?" Simple were his tastes, but he did not die a pauper; he had enough, and left an honored name. That was real success.

Dickens's Last Letter, Denial of Irreverence, Sells for £40.

The last letter Charles Dickens ever wrote has been sold at auction for £40, a figure much below what was expected. The letter, dated "Gad's Hill Place, June 8, 1870," is addressed to John M. Makeham, who had complained that Dickens was thought to have been guilty of irreverence in some of his books. Dickens wrote in reply:

"It would be quite inconceivable to me but for your letter that any reasonable reader could possibly attach a Scriptural reference to a passage in a book of mine, reproducing a much-abused figure of speech, impressed into all sorts of inappropriate occasions, without the faintest connection of it with the original source. I am truly shocked to find that any reader can make the mistake.

"I have always striven in my writings to express veneration for the life and lessons of Our Saviour, because I feel it, and because I rewrote that history for my children—every one of whom knew it from having it repeated to them long before they could read and almost as soon as they could speak; but I have never made proclamation of this from the housetops."

How to Foil Auto Thief.

Many cars are fitted with a battery ignition system in which the distributor arm is removable. By removing this arm, the car owner makes stealing his vehicle possible only by towing it away or by fitting another distributing arm. The arm may be removed simply by unclasping the distributor cover to which the wires are attached. It usually happens that there is only one way in which this arm will fit, so there need be no worry about replacing it.

He Was Running No Such Risk.

A farmer was calling down his hired hand for carrying a lantern on the way to see his girl.

"The idea!" he exclaimed. "I never carried no lantern when I went courtin'. I always went in the dark."

"Yes, and look what you got," answered the hired man sadly.

Underneath the Embankment Gardens, London, is a subterranean lake containing water 12 feet deep.

Minard's Liniment for bruises.

The Doctor's Love Story

BY H. DEVERE STACKPOOLE.

PART I.

Dr. O'Flynn's practice stretched from his surgery in Little Endell street round and about as far as Gordon Square on the north and half down Drury Lane on the south. It was a mixed practice, and though the surgery was frankly a converted shop, and though his work took him to slums like those in Sardinia street, he had a few good patients, such, for instance as the Burkes of Gordon Square and the Hon. Miss Corkran, of Cunningham Mansions, all Irish and Catholics like himself.

O'Flynn was of the peasant stock that supplies such good recruits to the priesthood and the mdeical profession; 50 and over, fresh-faced, with a twinkle in his eyes, a humorous tongue and a careless manner. He was friends with all men and women.

Careless in dress and manner, he sometimes contravened the strict dictates governing the rules of medical procedure; acting generally on the impulse of his heart, he sometimes even transgressed the laws of ordinary life, doing things that no English professional man would ever dream of doing—like, for instance, the thing I am going to tell you about presently.

Norah, 58, from Kerry, cook, housemaid and general factotum, made up, with Billy, the surgery boy, the whole of the doctor's menage. Billy would arrive every morning at 8, departing at 5. Norah rarely went out, except to mass; she had no holding with the "ould trash" of English people round about; aching always to be back in Tralee, she led the life of a prisoner in the Bastille, bound by the chains of household duties and barred from escape by her absolute, unflinching, almost incredible devotion to the doctor.

For the sake of O'Flynn she even permitted children to play on the house doorstep. You must understand, and this is an important part of the geography of my story, that the shop door was the way of ingress for patients; the house door, with its night bell and speaking tube, was sacred to the doctor and private callers. Children, never being driven away from it, haunted it, urged by the passion for doorsteps that seems part of a child's make-up.

One day, returning to his doorstep and his midday meal, the doctor found a message awaiting him. Norah delivered it verbally as she uncovered his chop.

"Miss Corkran sent word after you were gone askin' you to call immediate, and I told the chap that brought the message you wasn't an airplane," said Norah, dish cover inverted in her hand, "and to tell her you was out on yer rounds and wouldn't be back till past noon."

"Bother Miss Corkran," said O'Flynn. But "bother" wasn't the word he used. It was always the way with rich patients, urgent messages to come at once, sent at impossible times, and he had experienced trouble and enough with the Corkran woman ever since her dog had died a month ago.

It was in the man's rough and ready nature to use the word "damn" in connection with her, and it was in his nature to understand and appreciate her, this attenuated woman of 35, all spirit and affection, yet lonely, somehow, as Robinson Crusoe; without chick or child, ever ready to help the poor, yet somehow without the power of making friends among the rich.

A delightful friend, for whom he would have walked barefooted down Drury Lane, but the devil of a patient. She had just that fault, just that bit of selfishness in her nature that made her forget a doctor wasn't an airplane, had only legs, in fact, and dozens and dozens of other patients to see.

He didn't hurry himself over the meal, and when he started on his afternoon rounds he left Miss Corkran almost the last on his list, arriving at Cunningham Mansions about 4.

It lies close to Gower street, this great hive of flats, inhabited by the special breed of London people who live in flatland—a creation quite distinct from the race of London people who still inhabit houses.

O'Flynn went up the stone stairs, knocked at the door, and was admitted by Margaret.

Margaret was County Dublin, pure and simple, a stout, matronly woman with chestnut-colored hair worn flat on the forehead, and a Dublin accent which is to the accent of Kerry as cockney to West Somerset.

"Is Miss Julia in?" asked the doctor.

"In," said Margaret, "faith, where else would she be? She hasn't set foot to the ground since here you were last, achin' and pinin' on the sofa and me near driven distracted with her."

She took his hat and, leading him down the passage, ushered him into a sitting room filled with twilight and the pleasant flickering of a fire, the perfume of violets and the fragrance of China tea.

By the couch stood a table with tea things for one, and near the table a chair with a cushion on which had once reposed the dog.

Miss Corkran, on the entrance of the physician, laid down the book that she had been reading.

It is a thing to be read by twilight or firelight, and this super-refined sensualist had evidently been trying to do both. She held out a ringless, attenuated hand to the other, but she did not offer tea.

The Corkrans of Castle Corkran were a very old Irish family and the O'Flynns were just the O'Flynns; perhaps that was the reason she did not offer tea even to this tried friend, or perhaps it was because, being bound up in herself, she didn't think.

He took his seat beside her with a few words and picked up a book that had fallen from the couch to the floor. He noted the title as he placed it on the table by the tea things, "Have Animals Souls? Yes!"

"And now let's look at your tongue," said he.

On that order, given to the commonalty, a mouth flies open like a trap-door and a tongue protrudes itself even to the roots.

But the Corkrans are different; moving and moistening her lips, wiping them with a lace-edged handkerchief, she presented a tongue on a salver, so to speak, a tongue fresh and innocent as the tongue of a child.

"H'm," said O'Flynn.

He took her pulse, a pulse soft as a 6-year-old's, even and full of vitality if not of robustness.

"Bad," said O'Flynn. "You haven't been doing as I told you. Oh, there's no use in talking of neuralgia when ye won't listen to me advice. Here you've been lying ever since I saw you last."

"Oh, no, I haven't," cut in the patient. "I've been up and about——"

"Up and about! It's up and out I told you to be. It's not your body, it's your mind that you want to take out for a walk; I told you that last time and I won't tell you again; there now, you have it plain."

Miss Corkran sighed.

"I can't bear people," said Miss Corkran. "I know it's wicked and all that, but I've tried it—ever since—no matter."

She plaited her handkerchief, and to O'Flynn there came the suggestion, and not for the first time, that Julia Corkran, in the years before he had been her doctor and friend, had experienced a cross in her affections.

"Maybe you never tried the right people," said he. "I come to you for money for the poor souls down in Sardiania street or Drury lane, and out leaps your purse; never a friend of the poor better than you. Well, get into a cab and come down and see them; the salt of the earth they are, and the welcome of God they'll give you."

But Miss Corkran shook her head; she could do anything for the poor but touch them. Poverty, squalor and dirt horrified her; she hinted as much and then she slipped back to her ailments, imploring of him a sleeping draft for that night.

O'Flynn wrote the prescription, a harmless concoction of sugar and water.

Outside he talked a moment to Margaret on the landing.

"Oh, don't be asking me how she is," said he. "Haven't you eyes in your head as well as meself? It's dying she is for the want of that dog. Where's your sense not to have got her another?"

"Dog," cried Margaret. "I tould her that, and it's seven fits she went into at me words. 'Never another, never another!' cries she. Lost she is over that whazin' plate-faced brute of a Pakinese."

"Well, it's a dog or an undertaker for her," said O'Flynn, and off he went.

He took his way back to the surgery on foot.

A patient like Julia Corkran stands out strangely in a practice like O'Flynn's. He had seen that day twenty-one patients besides those who came to the surgery, working people, small shopkeepers struggling to make two ends meet, women to shudder over, and men sure to be jailed again within the month, and the only one of the lot crying pity was Julia Corkran.

(To be continued.)

The Day is Done.

Many people who confess that they do not appreciate poetry take pleasure in the poems of Longfellow, because he never tries to conceal his thoughts in vague phrases and uncommon words.

Come, read to me some poem,
Some simple and heartfelt lay,
That shall soothe this restless feeling,
And banish the thoughts of day.

Such songs have power to quiet
The restless pulse of care,
And come like the benediction
That follows after prayer.

Then read from the treasured volume
The poem of thy choice,
And lend to the rhyme of the poet
The beauty of thy voice.

And the night shall be filled with music,
And the cares that infest the day
Shall fold their tents, like the Arabs,
And as silently steal away.

Shops.

I like the people who keep shops,
Busy and cheerful folk with friendly faces.
They handle lovely things—bulbs, seed and flowers,
China and glass and gay-backed magazines,
Velvet and satin, foreign silks and laces.

One keeps a stall that's good to see,
Of nuts and fruit the morning sunlight dapples,
With dewy green things fresh from country gardens,
Tomatoes, bloomy plums and figs in baskets,
Melons and pears and red or russet apples.

The ironmonger charms me, too,
With wholesome things of house and ground for selling,
Rakes, hoes and spades, tin ware and tacks and hammers,
And shining lamps that wait for kindling fingers,
A pleasant place for converse, good, clean-smelling.

To serve us seems their only aim,
Asking our wishes, quick to crave our pardon,
And yet I know in each of these shop people
There dwells a soul withdrawn from us, elusive,
The shop can never know—a secret garden.

How can we guess who sees them so,
Behind their counters, writing down our orders,
The hidden glades of thought, the fair surprises
That lie without our reach, the blue horizons
Stretching for them beyond their peaceful borders?

—W. M. Letts.

He—"I was brought up in the country."

She—"Not by me. I never asked you to come here."

London consumes about 35 gallons of water every day for each one of its population.

After Every Meal

It doesn't take much to keep you in trim. Nature only asks a little help.

Wrigley's, after every meal, benefits teeth, breath, appetite and digestion.

A Flavor for Every Taste

CG13

Bells and Ringers.

Bells have wide mouths and tongues,
but are too weak,
Have they not help, to sing, or talk or speak.
But if they move them they will mak't appear,
By speaking they'l make all the Town to hear.
When Ringers handle them with Art and Skill,
They then the ears of their Observers fill,
With such brave Notes, they ting and tang so well
As to outstrip all with their ding, dong, Bell.

—John Bunyan, in "A Book for Boys and Girls." 1686.

Wine, 1600 Years Old, Discovered in Germany

A bottle of wine, reputed to be the oldest in the world, is an attraction of the wine section in the Historical Museum of Spyer, Germany. This relic is more than 1,600 years old. It is a large Roman glass bottle containing a mixture of wine and honey.

The bottle was found in a grave dug in 300 A. D. The contents were sealed with oil, which in the course of many centuries has become solidified, thus preserving the wine.

Soap on Mosquito Bites.

Moist soap rubbed on a mosquito bite will allay the irritation.

If all of us knew everything about the rest of us, none of us would associate with the rest of us.—Lord Dewar.

Minard's Liniment for toothache.

Every Woman Deserves One

The SMP Roaster is a fine time saver. You put the roast or fowl in the oven. The roaster does the rest, bastes, roasts to perfection. It roasts with very little shrinkage, thus saving dollars every year. None of the tasty meat juices are lost; all the rich flavor is retained. Besides you can buy cheaper cuts, for it makes cheap cuts taste like choice ones.

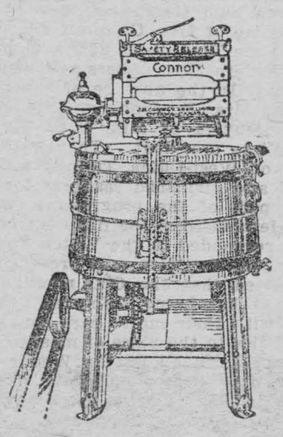

The close fitting cover keeps all the cooking odors and the grease inside the roaster—the smell of cooking doesn't fill the house, and the oven is kept sweet and clean. Best of all, it cleans out in a jiffy after the roasting. These are splendid vessels. Price 85c. to $3.50 according to size and finish. Sold in all hardware stores.

SMP Enameled ROASTER

CROCODILE HAD MIGHTY ANCESTOR

He Was the Gigantic Dinosaur, Who Once Ruled the Earth.

Three different types of dinosaurs are shown in the sketch. Scientists have given them names almost as formidable as their appearance. The one at the left is a stegosaurus, at the centre a tyrannosaurus, and at the right a diplodocus.

Secrets of Science.

By David Dietz.

The lung-fish which learned to gulp air was the ancestor of the first amphibian.

The amphibians survive to-day. Frogs, newts, salamanders and the like are amphibians.

The amphibian lays its eggs in the water. The young are hatched in the water and live there for part of their lives. Then they emerge upon land and spend the rest of their lives there.

The egg of the frog when first hatched is a tadpole. The tadpole lives entirely in the water. But in time it turns into a frog and emerges upon land.

The important development between the lung-fish which has learned to gulp air and the amphibian is the development of the terrestial foot from the fin of the fish.

Emergence upon land demanded the evolution of a new type of locomotion.

There is reason to believe from the study of fossils that the first amphibian lived mainly in marshes where the soft mud helped support their bodies.

The foot as first evolved from the fin had only two digits. But gradually, with the passage of time, five digits, the standard in the world to-day, were evolved.

The amphibian, besides developing terrestial feet, is thought to have developed for the first time in the history of life, true lungs, a three chambered heart, a movable tongue, eyelids and eardrums.

It is also thought that the amphibian developed a voice. Therefore it was the first creature upon the earth able to make a sound.

The reptile represents another step in the upward scale of evolution. It is entirely freed from the necessity of spending any part of its life in water.

The reptile lays its eggs on the ground. A tough casing or cell protects the egg from evaporation. The reptile, from the moment of its birth, breathes by means of lungs.

As we saw in our survey of geology, in the Age of Reptiles, these animals attained gigantic size, many of them being over 100 feet long. These were the great dinosaurs.

The crocodile of to-day is probably the nearest relative to the great dinousaurs which ruled the earth in the Age of Reptiles.

TRIALS OF INDIGESTION

Errors About This Trouble Into Which People Fall.

Many people so far misunderstand the digestive system as to treat it like a machine; neglecting it until it works sluggishly, then irritating it into work again by the use of purgatives. The stomach needs help at all times, but a study of the process of digestion will show that purgatives, as commonly taken, are seldom necessary and often harmful.

To safeguard your digestion the diet must be controlled. Over-eating is always harmful, but one must assimilate enough food to supply the needs of the blood. Remember, the blood has to carry nourishment to all parts of the body and find fuel for its energy. Hence when the blood becomes weak and fails to do its work, indigestion arises. Therefore the sure remedy for indigestion is to build up the blood. If you suffer from any form of indigestion choose your diet carefully and take wholesome nourishment. Above all, start building up your blood by taking a course of Dr. Williams' Pink Pills. Then under the influence of the new blood supply, your digestive system will respond naturally, your appetite improve and your food will do you good. So begin to improve your digestion by starting to take Dr. Williams' Pink Pills now.

You can get these pills from your druggist or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Heavy Surf.

I roar and I roar
As sea-gulls soar
With my spray-bubbles tossed to the air;
My ways are deep but my waters keep
Small sea-shells perfect and rare.

Above and below
My song full and low
You may hear if you listen with care
A lullaby, lullaby, born of a cloudy sky
Threading the tumult there.

My waters heave
As giants breathe
Great rolls and ridges of height.
But my wave soon breaks and the fringe that it shakes
Is fine and soft and white.

So though I may roar
And lift and lower,
And pound with a mighty power,
My heart sings on as lovely a song
As ere came from the heart of a flower.

—Flora Lawrence Myers.

Modern Version.

—Said the teacher:

" 'And it came to pass, when King Hezekiah heard it that he rent his clothes,' Now, what does that mean, children—'he rent his clothes?' "

Up went a little hand.

"Well, if you know, tell us."

"Please, ma'am," said the child, timidly, "I s'pose he hired 'em out."

Cases of twins occur once in every sixty-nine births.

RED ROSE TEA

"is good tea"

Red Rose Orange Pekoe is extra good. Won't you try it this time?

Rabies.

"The most terrible death a man can die," said the doctor after he had returned from the bedside of a little boy who had been bitten by a rabid dog. "The thirst is intense—beyond imagination; his tongue is swollen to twice its size and hanging out of his mouth—yet he can't take a drop of water; his throat is paralyzed, and the sight of a drink produces choking and a paroxysm of the muscles used in swallowing, which no human being could look at without pity. And the tragedy is that there is no help under heaven for it, once the disease develops."

The boy had been bitten by a rabid dog; unfortunately his parents had delayed too long in getting the lad treatment to prevent hydrophobia, and it was impossible to save his life. The treatment will absolutely prevent rabies if given ten days to three weeks after the person has been bitten.

Don't kill the dog that bites a person—tie him up. If alive at the end of 10 days, you may be perfectly sure he did not have rabies; no dog suffering from rabies will live longer than 10 days.

If the dog is dead within ten days, send the head well packed in ice to the Laboratories of the Department of Health, Spadina House, Toronto. They will advise you immediately whether the dog died of rabies and whether it is necessary to take treatment, which is known as the Pasteur Preventive Treatment for Rabies and supplied free of charge to Ontario residents.

A child's life is worth more than a thousand dogs—let us muzzle Ontario dogs and keep out dogs from the United States which may spread rabies among our stock and kill our children.

Sea Highway.

In days of old you were a barrier
That held the Peoples of the World apart;
O long and long old Neptune plied his art—
There was small need of you as Carrier!
But now, O now, what wheels your waters whir. . . .
No more you are the barrier you were.

Your tractless wastes a great highway for ships,
That carry endless cargoes everywhere;
The Airway never will your own eclipse,
Whatever feats the future flyers dare.
For you, O sea, will always be
The highway that unites Humanity!

—Stella V. Kellerman.

Add a tablespoonful of painter's size to the water when washing linoleum or oilcloth, and the surface will present a glossy appearance.

POULTRY PROFITS.

Do you keep hens? or do hens keep you? Anyone can make Biddy lay three months each spring. The trick is how to make her produce during fall and winter months. Years of experience and study has taught us how to make BIG PROFITS every month of the year. You can do the same. Start feeding and caring for your flock in a scientific way and reap rewards this winter. Send $1 for necessary information. Oliver Poultry Farm, Shanty Bay, Ont.

British Nursing Head Visits Canada

Dame Maud McCarthy, G.B.E., of London, England, who headed the British Nursing forces in France during the World War, arrived recently at Quebec on the Canadian Pacific liner Empress of Scotland. This distinguished lady, who has gained the title of "The Florence Nightingale of the World War," attended the meeting of the Canadian National Association of Nurses in Toronto and later delivered an address at the unveiling, in Ottawa, of a memorial to the nurses who served in the great war.

Dame McCarthy began her first outstanding war services during the South Africa War, 1899-1902. From 1903 to 1910 she was Matron of Queen Alexandra's Imperial Military Nursing Service and until 1914 was Principal Matron of the Q.A.I.M.N.S., War Office. In 1914 she was appointed Matron-in-Chief of the Q.A.I.M.N.S., British Armies in France, and in 1920 Matron-in-Chief of the Territorial Army Nursing Service.

In the above photograph, which was taken on board the S.S. Empress of Scotland, Dame McCarthy is seen standing with Commander Latta beside the wheel house.

How to Carve.

The "Fine Art of Carving" is the title of an interesting booklet issued by the manufacturers of S. M. P. enamelled ware. The proper way to carve fowl of different kinds as well as the various joints of meat is clearly set out and illustrated. There are also some valuable hints on the preparation of different meats for roasting. Copies may be had free from Sheet Metal Products, Ltd., Toronto.

CHOLERA INFANTUM

Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months, and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent the dreaded summer complaints. They are an absolute safe medicine, being guaranteed to contain neither opiates nor narcotics or other harmful drugs. They cannot possibly do harm—They always do good. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

British to Use Plane in Copper Prospecting

An airplane, for the first time in history, as far as is known, will supersede the divining rod in prospecting for precious mineral deposits when the British Aviation Company undertakes an earial survey of 20,000 square miles in northern Rhodesia for a mining company.

Copper deposits are thought to underlie the region and an air photograph of the territory will reveal the location of the copper by showing the abscense of vegetation, it is believed. Special aircraft with the new Nimbus engine will be used and the work has begun at the aerodrome base. As this country is not suited to forced landings, spaces are being cleared and leveled to serve as emergency landing grounds.

As soon as a woman begins to dress "loud," her manners and conversation partake of the same element.—Haliburton.

One-sixth of the people in Great Britain live within fifteen miles of Charing Cross.

Address .....

Two Motion Pictures.

I have seen Majesty, though not of kings.
For once, long since, among the wintry hills,
The Northern Lights, all silently, and low
Against the sky, moved in procession slow.

No glowing balls nor streamers flashing bright
From the horizon to the zenith, bold,
Compelling admiration and acclaim—
Not these. Only majestic motion, clothed
With light resistless. Slow, but without rest,
It passed into the heart like silence blest.

I have seen Graciousness, though not of queens,
For yesterday, beside my cottage door,
A moonflower white, under the silver silence
Of the stars, unfolded to the night.

'Twas not the beauty of its pure white disk,
Nor yet the generous sweetness that it poured
Into the far dark reaches of the air—
Not these. But its most gracious motion, free,
Unlabored. Unrestrained and effortless
Its fluted beauty opened from duress.

Who looks on Majesty hastes not, I ween;
Nor does he strive, who Graciousness has seen.

—Clara C. Rowley.

Moonlit Peaks.

From the mountain top
We watched the sun's golden setting.

The eastern skies turned rose;
Long's Peak, mistily hooded,
Loomed in the northwest.
From our lofty vantage
Seven ranges we counted,
Our eyes feasted on
Indescribable mutations
Of dove and blue and mauve.

Far below
Vesper winds smote upon
Responsive pine-harps;
And rushing, unseen streams
Challenged with chanting voices.

From the mountain top
We watched the moon's silver rising.

—Heloise M. B. Hawkins.

Red Rose Used for Essence.

In the making of attar of roses only the red rose is used, and this must be plucked just before dawn, when the flower begins to open, but has not yet been heated by the sun.

Rub your scalp with Minard's Liniment

In Close Touch at Least.

"Your old landlord owned a lot of real estate, but his business went to the devil after he died."

"Well, then, I guess he got it back again."

Plenty of Hand-Painting.

Little Johnny had accompanied his mother to a dinner at Mrs. Smith's. During the course of the meal Mrs. Smith remarked, "This plate is hand-painted, Johnny."

"That nothing," spoke up the boy. "Our whole fence is hand-painted."

The cruelty which children are permitted to show to birds and other animals will most probably exert itself on their fellow creatures when at maturity.—Richardson.

Defining An Epidemic.

The inspector was paying his annual visit to the village school and was putting the children through their paces.

They did quite well until he asked them the meaning of the word "epidemic." Nobody knew, so he had to help them out.

"An epidemic is something that spreads. Now, can anybody give me an example of epidemic?"

There was a long silence.

"Can no one tell me?" asked the inspector at last. "Remember, something that spreads."

Then came a small voice: "Jam, sir."

RESTORED TO GOOD HEALTH

Mother of Eleven Children Praises Lydia E. Pinkham's Vegetable Compound

Her Interesting Experience

Buckingham, Quebec.—"I am the mother of eleven living children, and my baby is five months old. I am only 38 years old and I have taken Lydia E. Pinkham's Vegetable Compound for weakness and my nerves. I knew of it from my sister, Dame Edouard Bellefeuille of Ramsayville. For five years I was in misery and was always ready to cry. Now I am so happy to have good health. My daughter, who is 18 years old, has also taken it and will be happy to recommend it to all young girls."—Dame WILLIAM PARENT, Box 414, Buckingham, Quebec.

Why suffer for years with backache, nervousness and other ailments common to women from early life to middle age, when Lydia E. Pinkham's Vegetable Compound will give you relief?

In a recent country-wide canvass of purchasers of Lydia E. Pinkham's Vegetable Compound, over 250,000 replies were received, and 98 out of every 100 reported they were benefited by its use. C

PROTECTION FROM FIRE AND WEATHER

..TORONTO ASPHALT ROOFING, made by the exclusive Milne System from the finest materials produced, make the ideal covering for your home. This roofing is not affected by extreme change in temperature; will not crack, curl or split, and being a non-conductor of temperature, it keeps your house cool in summer and warm in winter. The Fire Resistant Qualitis of Toronto Asphalt Roofing have been proven and you benefit by thelow insurance rates you get by using this Superior Roofing.

ECONOMY

You save on the initial cost when you buy Toronto Asphalt Roofing because it requires no painting or staining and it is easier to lay. The first cost is the last and it will outlast its competitors.

BEAUTY

Made in soft, pleasing tones of red, green; heather or blue black and has that distinctive beauty and charm which make it a wonderful asset to any home. It costs more because it's worth more, but it's worth more than it costs—SEE SAMPLES AND GET PRICES.
