Drunken Truck Driver Jailed by Magistrate

Toronto Man Trying to Put Borrowed Truck Through Wire Fence When Arrested by Constable Rose.

After being found in an intoxicated condition and his borrowed truck in the ditch while he was still trying to drive it through a wire fence, bordering the Montreal-Toronto highway west of Morrisburg, John Joseph Grainer, of Toronto, was arrested on Monday night, by Traffic Officer Eugene Rose, of Morrisburg.

Taken to Winchester from Cornwall where he spent the night in jail, he appeared before Magistrate John McCormack Tuesday afternoon. He was fined $10 and costs on a charge of reckless driving and sent to jail in Cornwall for 14 days for being intoxicated while in charge of a motor vehicle. The truck, which Grainer said was the property of a Toronto resident, is being held by the police.

Four other traffic cases for speeding are pending in the Dundas County Court, following charges laid by Constable Rose. According to instructions from the provincial inspector, all traffic officers have been strictly enforcing traffic regulations in an effort to reduce the number of accidents mainly due to fast driving. Information from the traffic inspector indicated that the accidents during the past month had practically doubled in number.

BROTHER OF FORMER RESIDENT DIED AT ATHENS RECENTLY

On Tuesday morning, after some weeks of illness, Mr. S. J. Dillabough passed away at his home at Athens, aged 54 years, leaving a wife and two sons to mourn the loss of a loving husband and father. His mother also survives, Mrs. A. S. Dillabough, of Cloverdale; as well as one brother, Mr. Charles Dillabough of Cloverdale and two sisters, Mrs. Geo. Beattie of Cornwall, and Mrs. Arnold Docksteader of Winchester. The funeral service was held at Athens on Thursday last.

WM. CHAMBERS DEAD.

Word was received here from Los Vegas, Nevada, of the death in hospital there on February 26th of Wm. Chambers after a lingering illness.

The late Mr. Chambers went West from here 36 years ago and after working in different places through many states had lived in Nevada for several years past. He was in his 55th year, the eldest son of the late Geo. Chambers and Mrs. Chambers of town who survives with two brothers and five sisters, who have the sympathy of the community.

Young Elma Newlyweds Are Tendered Reception

Mr. and Mrs. Burl Robinson Presented With Splendid Gifts By Their New Neighbours and Friends.

On Tuesday evening Mr. and Mrs. Burl Robinson of Elma were tendered a reception at the home of Mr. and Mrs. W. Garlough by their friends and neighbours in honour of their recent marriage. The evening was spent in dancing, and at eleven o'clock the young couple was called to the floor and a very appropriate address was read by Miss Mary Garlough and the presentation made of six diningroom chairs, a rocking chair, an eight-day clock, and a pair of Ibex blankets.

Elma, Ont. March 19, 1935.

Dear Mr. and Mrs. Robinson,—

We, your friends and neighbours, have gathered here this evening to welcome you as new members to our community, and to honour you on the occasion of your recent marriage.

While you do not come from far distant, we want to welcome you and extend to you the hand of fellowship and goodwill. It is our sincere wish that your life among us be one of health, peace and prosperity. Although it is a new life which you have entered, with varied responsibilities, may it bring to each one of you a fuller and greater understanding of life.

We extend to you both our heartfelt wishes for all that makes for your highest and best happiness, and in token of these good wishes we ask you to accept these gifts.

Signed, on behalf of your friends and neighbours, Leslie Runions, Wilfred Garlough.

Mr. Robinson replied in a few well chosen words and all joined in singing "For They Are Jolly Good Felows." Lunch was served by some of the ladies of the community and dancing was continued.

Local Business Man Married At Ottawa On Saturday

Miss Agnes Schlievert of Kirkland Lake Becomes Bride of Mr. H. M. Henderson.

A very pretty wedding was solemnized on Saturday evening at seven o'clock at the home of Rev. Hugh Cameron, Ottawa, when he united in marriage Miss Agnes Schlievert of Kirkland Lake, and Mr. Harry M. Henderson of town. They were attended by Mr. and Mrs. J. Howard Crawford with Mrs. Schleivert, mother of the bride, and Mrs. S. M. Henderson, mother of the groom, as witnesses.

After the ceremony the bridal party motored to the home of Mr. and Mrs. Edward Hartley, cousins of the groom, where a number of friends had already gathered to welcome them The evening was spent in music and games and after a dainty repast the bride and groom left amid showers of confetti for a short motor trip.

The happy couple will return home shortly and will take up residence on Main street where the groom established himself in business several months ago.

ICEBERG MENACE LESSENED.

United States coastguard cutters working along the Grand Banks in the North Atlantic, report the presence of five icebergs which are approaching the steamship routes earlier than usual in the season. The news is not as alarming as it would have been in the past, for the watchful cutters keep track of all 'bergs and notify vessels as to their position and movements. The sea is well policed nowadays and voyaging is so much the safer.

Challies Says Roebuck Hydro Statement Absurd

Former Provincial Treasurer Explains to Legislature Advantages Gained by Purchasing Gatineau Power Rates Bing Cut Almost in Half.

Mr. George H. Challies in the Legislature referring to the Attorney-General's attack on Hydro, shows the benefit Eastern Ontario has had from Gatineau Power and the reduction in rates achieved all along the line as well as rescuing the Central Ontario division when dry weather reduced the flow and power from local power sources. Mr. Challies statement in part follows:

The many absurd, inconsistent statements made by the Attorney-General can best be illustrated in his reference to the Eastern Ontario System:-

He stated that "The System has suffered from acts of gross incompetence or worse," "the system had not been ruined though rates have been made unnecessarily high" through the purchase of power for the St. Lawrence system. The contract "was contrary to good principle and ill-advised in view of the fact that the Commission had available potential developments elsewhere."

I have already pointed out that our water power resources on the St. Lawrence and Ottawa were not open to us because of Federal Liberal policies and that the powers on the smaller streams are of use only as supplementary to these larger areas,—that as a source of firm power for the St. Lawrence they are too expensive. To prove my contention and disprove the fallacy of the stand of the Attorney-General let me give you the actual facts.

First is to his contention that we should not have purchased Quebec power but developed our own on the smaller rivers and thus saved in the price of power.

Take the Rideau Division which prior to 1930 developed power of one of the smaller streams at high capital cost per horse power. In 1930 this high cost power was diluted with Gatineau power purchased at 14.55 per h.p delivered at Smiths Falls, netting the Gatineau Company approximately $11 to $12 per h.p. with the following results:

1928—Power from our own streams, price per H.P. to following municipalities:

Carleton Place	Kemptville	Perth	Smiths Falls
62 50	67.50	52.00	47.60

1930—Power from Gatineau contracts

28.89	36.86	29.22	25.27

1930—Dry Season in Central Ontario System the emergency was met by hooking up with Gatineau Power at Smiths Falls.

In the same year power was taken under the Gatineau contract weeks before, because of the demand, delivery was supposed to start.

1933—The power possibilities on the Trent System in October was only 40 per cent of the rated capacity of the system.

Gatineau Power has been the saving factor in the whole power situation in Eastern Ontario.

This proves conclusively that with Gatineau Power, prices for power to the municipalities were cut almost in two.

Now as to "gross incompetence or worse," finances almost ruined:-

Let me give the House the financial statement of the operation of Hydro in Brockville, which is characteristic of the other municipalities in the St. Lawrence System—and to show the utter lack of knowledge on the part of the Attorney-General of history and conditions in Eastern Ontario.

1920—3 Utilities total indebtedness—$272,347.03.

Rates—1920: Electricity 10c KW, Gas $2 1000 cu. ft., Water, double to-day's rate.

To-day—Reserves and surpluses — $282,985.69; Assets, Electrical Dept. alone $595,503.18; Liabilities NIL.

Rates to-day: Electric 2-1 KW, less 10 per cent; Gas 1.35 1,000 c. ft.; Water one-half of 1920.

Rebates—Past 6 years, 2 months electrical bill, rebate equalizing $86,713.36;

Past year—3 months electrical bill, rebate equalizing $25,000.00.

Reserves other Departments than Electrical amount to $122,-265 11.

Debentures retired during that period $997,466.71.

Mrs. Andrew D. Summers Died in Her 86th Year

Many Attend Funeral Yesterday At Nation Valley of Fine Old Lady —at Home of Son.

A large number of sorrowing relatives attended the funeral yesterday afternoon of Helena Strader, widow of the late A. D. Summers of Nation Valley. Mrs. Summers, who was in her 86th year, passed away on Monday at the home of Mr. and Mrs. Edgar Summers. The funeral was in charge of Rev. D. W. Summers who was assisted by Rev. Mr. Bain of Ottawa. The service was held in her late home.

Loving and kind in all her ways, a great mother and very hospitable in her home, she was beloved by all who knew her. Surviving are two sons, Almon and Edgar, of Nation Valley, and one daughter, Mrs. Geo. Smith of Campbell's Bay. Interment was made at Maple Ridge cemetery.

Ottawan Has $30,000 Stake Grand National To-Morrow

Half-Million Dollar Sweepstake Army and Navy Veterans Brings Fortunes to Scores of Canadians.

An Ottawa man, identified only by the nom-de-plume "Dare," stands an excellent chance of winning the big prize of $30,000 in the Army and Veterans' sweepstake on the running of the Grand National steeplechase at Aintree on Friday it was revealed last night when drawing took place in Montreal for horses in the half-million-dollar sweepstake.

"Dare" was one of 114 persons drawing lucky tickets on entered horses and strangely enough his name was bracketed with the Canadian-owned racer, "Trocadero," which is conceded a good chance in the classic. At the least, "Dare," will win $1,000 on the race, as a result of his luck in getting a horse.

His ticket on Trocadero will be envied by all racing men who have studied the field for the steeplechase. The well-known trainer Hurt, handled the English - bred Trocadero, which will handle Canada's first challenge in the great race at Aintree, since she has been purchased by Gordon Perry of Toronto. Hurt said of Trocadero, one of the bottom-weights, "he stands a good outside chance."

Several other Canadians will be in the money subcribed to the sweepstake, which netted the veterans $92,-000 for their charities. Woodydin, of Winnipeg, drew second choice horse, Castle Irwell; Clehevriel, Three Rivers, drew Kiltoi; Jacob Gerber, of Medstead, Sask. drew Master Orange; Bobby of Toronto drew Red Park; Optimist of Cote des Neiges road, Montreal, drew Southern Hue; E. A. E. of Trail, B.C., was drawn for Thomond II., and Ratto of Gogama, Ont. drew Southern Hero.

Two first prizes of $30,000 each will be awarded the holders of tickets on the winning horse. There will be two second prizes worth $20,000 each; two third prizes to the value of $10,-000 each, and two fourth prizes, each worth $5,000.

All those drawn stand a chance of winning the big $30,000 prize, and are assured of $1,000 at least.

In addition, 11 residents of Quebec 10 in Ontario, two in Manitoba, and one in Saskatchewan British Columbia, Alberta and Nova Scotia, drew horses and win prizes of $964 each, while 54 residents of Quebec, 36 in Ontario, 11 in Alberta and nine in Manitoba, each draw consolation prizes of $100 each.

Toronto All-Stars Mop Up Ottawa Canadiens 11-0

Maple Leafs' Conquerers Go Down Heavily at Toronto Last Night.— Lost First Game 3-2 in Ottawa.

In the final of the two-game series in Toronto last night between Toronto All-Stars and Ottawa Canadiens, the former increased their margin when they smashed in 11 counters and held Canadiens scoreless. Toronto started early when their first counter came after little more than two minutes of play while three more were added before the end of the first period. In the second the All-Stars smashed the rubber home no less than five times, adding a pair in the final. While Canadiens seemed outclassed perhaps they did not do so badly to hold the O.H.A. champions even to an 11 score splurge, when the latter set out with the intention of making a show of the Habitants, when they threw five forwards into the fight when leading by more than a half dozen counters. In the final the Ottawa boys stepped with the winners and gave a good battle but could not net the rubber. Poy Johnston in the Canadien nets stopped shots by the dozens and the defeat could not be laid at his door. In fact, he was the standout of the game.

Interesting Meeting Held of Women's Institute

The Women's Institute meeting yesterday afternoon was a very interesting one. After the business routine and plans made for the annual Easter Sale, a very fine programme was presented.

Mrs. Jas. Hanna had charge of current events, Mrs. Geo. Merkley contributed a solo, "Believe Me if All Those Endearing Young Charms," and Mrs. Bernard Gibbons gave a paper on "St. Patrick." The social hour was much enjoyed. The tea table was presided over by Mrs. W. A. Durant and Mrs. Harold Durant assisted by Mrs. Ward Johnston, Mrs. D. McKercher, Mrs. W. N. Fulton and Mrs. W. Cameron.

"That horrid Mrs. Smith called me a stupid goose."

"Don't cry, darling—all geese are stupid."

Maroons' Overtime Score Defeats Chicago Hawks 1-0

Baldy Northcott's Goal for Montreal Team Proves Only Score of Two-Game Opening Series.

Before a capacity house of 17,681 Chicagoans, Maroons blasted the world-champion Black Hawks out of the Stanley Cup picture Tuesday night, when Baldy Northcott, the Winnipeg sharpshooter, flipped home the winning goal after four minutes and two seconds of overtime sudden-death play to break up what has been probably one of the closest fought series in Stanley Cup history in recent years. It was the only goal of the contest and the two-game series, as the clubs battled through 60 minutes of gripping, tightly played hockey.

The extra session was only three minutes old when the Maroons got their first real break of the series, a five-minute penalty to Lolo Couture for cutting down Dave Trottier near the Maroon cage. Trottier was hardly in the dressing room before Maroons struck their winning blow. Bob Gracie, leading a power play, shot the puck into the Hawk zone and the defence of the Chicagoans, seemingly hypnotized as the Maroons swarmed in like the charge of the Light Brigade, broke in confusion as Northcott swooped in, picked up the loose puck and drove it high into Chabot's cage.

Couture's inexplicable act, which paved the way for the deadly punch, appeared inoffensive enough. He seemed to be trying to check Trottier, but he, nevertheless, swung his stick over his head and as Trottier moved in he took the full force of the blow on his right temple. So great was the force of the wallop that Couture's weapon broke off half-way up the handle. Blood streamed from the wound and the referees had no alternative but to give Couture five minutes.

Hawks had the advantage in only one period and, having shot their bolt they were dangerous only while the Maroons' ranks were depleted by penalties. The Montrealers showed their mettle late in the third session when, after Blinco, who had been chased for tripping, Smith was given an additional 10-minute misconduct penalty for arguing with Referee Goodman. There did not seem much point to Goodman's act for Smith had protested mildly, but with the captain off and short-handed already, the Maroons' goose appeared to be cooked. When they survived this crisis, they really won the game.

Canadiens Play to 4-4 Tie But Lose Round to Rangers

Flying Frenchmen Lose First Round of Stanley Cup Playdowns 6-5 In Spite of Gallant Flourish.

Montreal Canadiens missed out by a hair's breadth to Rangers Tuesday night. But as they were eliminated from the first round of the Stanley Cup play-offs for the third year in succession, the Flying Frenchmen once more went out with a flourish of gallant, desperate battle that fell short of victory by just the odd goal.

On the wings of a terrific third-period rally, they had Rangers with their backs to the wall as they went surging in quest of the tying goal. But the final gong saved the Rangers and sent them into the Stanley Cup semi-fials against Maroons by a round score of 6-5 as Canadiens fought to a 4-4 draw in a throbbing finish before their best home crowd of the season.

The 2-1 edge that Lester Patrick's crew gained in the bloody combat in New York on Sunday night proved to be the margin of triumph.

Leafs Even Boston Series As Kid Line Conquers 2-0

Mighty Toronto Team Takes Second Game in Finals for National League Championship.

Toronto Maple Leafs evened the National Hockey League championship series with Boston by defeating the Bruins 2-0 before another capacity crowd of some 17,720 fans in the bean town Tuesday night.

The "Kid" line of the dashing Blueshirts wrecked Boston hopes of chalking up two straight victories by breaking away from their close checking opponents to clash the puck past Cecil "Tiny" Thompson twice within a period of less than three minutes in the third frame of the fast, exciting match.

Charlie Conacher, the league's leading marksman, started his team on the road to a well-earned triumph by blazing a shot into the far top corner of the Bruin cage at 9.50. Albert "Babe" Seibert, husky Boston defence man, was in the penalty box when Conacher took Harvey Jackson's pass for the goal. Just after Seibert returned, Jackson broke through to snare a loose puck Conacher and Joe Primeau had tried to feed him and easily beat Thompson for the clinching marker.

Thompson proved the individual hero of the night by stopping 41 shots many of them with the sniper almost on top of him. George Hainsworth had only 16 and few of those were difficult. The Leafs appeared the ultimate winners of the game from the very outset when the fast-skating, hard-hitting blue-clad youngsters broke through the tired Boston defence with ease. Only the spectacular work of Thompson prevented the Leafs running up a much larger score long before the final frame.

NEWS AND INFORMATION FOR THE BUSY FARMER

Furnished by the Ontario Department of Agriculture

Ontario produced about two-fifths of the Canadian commercial strawberry crop in 1934.

Expansion of the sale of canned goods on the domestic and export markets offers the most hopeful outlet for an increased production of vegetables in this province.

Observations extending over a long period indicate that thin, sparse pasturages for sheep encourage the growth of the finer grades of wool, while thick, lush grass increases the production of the coarser grades.

The total value of Canadian field crops harvested in 1934 is now estimated at $544,974,600 compared with a revised estimate of $453,598,000 for 1933. This increase of $91,376,300 is due mainly to higher unit prices.

British Apple Market.

Mr. A. Fulton, overseas fruit representative, advises that prospects for Ontario apples in Great Britain for the balance of the season are far from encouraging, although a reaction is expected, after the deplorable market conditions of February, as common storage apples from Nova Scotia and English sources are now practically finished. In order to get values up to remunerative levels before the season finishes in about three weeks' time, it will require shipments of outstanding quality and condition to regain confidence of the buyers. Owing to the slump in prices and the arrival of apples in an unattractive condition, the trade have lost interest in the business as they see no hope of recovery with present supplies. Everyone feels that it will take fresh apples to stimulate business, with the result that attention is now beong directed to the Australasian season opening up towards the end of March, when the first steamers are expected to arrive. Under these conditions Mr. Fulton cannot foresee high prices for Ontario apples again this season.

Much sunshine and a fair amount of rainfall during the summer of 1934 undoubtedly provided proper conditions for a bountiful storage of sap in maple trees. With frosty nights and mild days during the sugaring season an abundant crop is expected this year.

A fire prevention expert recently stated that fire loss on farms would be substantially reduced if a ladder were part of the equipment of every farm. A ladder kept in a convenient place makes any roof fire quickly accessible and provides the means for occasional inspection of chimneys and flues.

Potatoe Prices Up.

The following are the prices of potatoes paid to farmers in Ontario on January 31st and February 28th, 1935, after one month's operation of the Eastern Potato Marketing Board which commenced to function on Feb. 4th:

Per 90-lb. bag.	Jan. 31	Feb. 28
Orangeville	17c	35-40c
Alliston	15c	35c
Uxbridge	15-17c	35-40c

Prices showed a similar upward trend in the Maritime provinces where the marketing scheme is also in operation.

Horticultural Notes.

House Plants: Nearly all smooth-leaved plants are greatly benefited by applications of water to their foliage provided the sun is not allowed to shine upon them while wet. But plants having hairy leaves, like the Gloxinia and the Rex Begonia, are almost invarably injured by the application of water to the foliage. Bear this in mind, and be governed in showering your plants by the peculiarities of their foliage.

Transplanting: In putting out plants in the garden, choose a cloudy day for it, if possible. Water well when you plant. Shade for a day or two, or till they begin to grow.

Geraniums: These are hot weather plants: they like hot rooms and steam heat. but they cannot be expected to produce many flowers unless they are placed in a sunny, south window, free from curtains. They prefer heavy soil and must not be grown in pots too large, else they will not bloom so profusely. Cut them back each fall to make them bushy, otherwise they will fill too much window space. Good house plants of geraniums are obtained by taking slips in summer and growing the plants in pots until winter.

Ferns: The less finely divided leaf sorts of Boston ferns are the most successful. Ferns generally do not prefer the full sunshine and must be kept from cold drafts. The soil which suits them best is one derived from decayed sod or leaf-mould. Ferns need an abundance of water, but poor drainage and "wet feet" should be avoided. Syringe the plants often if they are to be kept healthy.

O. A. C. College Royal.

The annual exhibition or College Royal put on by the students of the Ontario Agricultural College, Guelph, has grown to be one of the outstanding events in the College year. Started eleven years ago by the late Prof. Wade Toole, it was designed at first simply to give the students some idea of the technique of preparing and showing animals. Since the first show it has grown until all major departmens of the college now take part, and in addition to the showmanship contests there is a competition for the Wade Toole Memorial Trophy for the best educational exhibit.

The grand champion showman this year was Bruce Innes, a third year student. For the fourth time since it was presented, the Animal Husbandry Club won the Wade Toole Trophy with their splendid display of methods by which injuries to animals may spoil meat. A moving placard with a series of legends explained how blows, horn-gore and other injuries to live animals had their effect on the carcass.

In second place was the Field Husbandry Club, with a striking display of the value of soybeans, while third was Agricultural Science, with a graphic and picturesque exhibit which showed how barn fires may be combatted. The Poultry Club, with a display showing the improvement made in the preparation of poultry in the last forty years was fourth, while the Dairy Club with an ice-cream exhibit was fifth.

Trophies, together with other lesser prizes and awards, were presented at a ceremony in the War Memorial Hall when Dr. G. I. Christie, president of the college, and other speakers were heard.

- Breaking - Into the Movies

Miss Marian Robertson, Talent Scout, Tells of Fun She Has in Picking "Finds"

EVERYBODY wants to get into the movies, and it's one of the toughest things in the world to achieve. However, despite the fact that there is a veritable staff just to say "No" to aspiring screenstruck thespians, the movie companies all maintain a staff of scouts who are forever seeking out new material to make screen stars. Now take the case of Miss Marian Robertson. Miss Robertson is a stunning looking girl. But she doesn't want to get into the movies. Instead she spends her time travelling around trying to find other people to put into the movies. She's a talent scout for RKO. Marjorie Shuler has been looking up some of the women who work in the movies but never get on the screen, and in an article in The Christian Science Monitor she tells of her encounter with Marian Robertson.

It is the job of the talent scout to go to theatres, vaudeville houses clubs, restaurants, radio stations, any place for entertainment, searching for performers with photographic personalities. It does not have to be a striking beauty or an Arrow collar ad type of man. Many of these are insipid before the camera. It may be a person with a very plain face, for lights, make-up and the peculiar single eye of the camera may turn a very plain person into one of great charm. Moreover, it must be a person with brains, for the movie people have discovered that brains register very strongly in the movies. Thinking shows through the face, and blank minds show up almost immediately on the screen.

"It's a grand job," says Miss Robertson, "grand in the winter even when you have to cram two or three openings into one evening, and then go on to a couple of night clubs searching for talent afterward. It is grand in the summer even with the theatres cropping up all over Cape Cod and down the Connecticut River valleys, and along the Hudson so that you have to be pretty much on the fly to get around them all."

Miss Robertson will discuss her profession in general, but not in particular. She admits she has made some "finds" but who they are remains her secret. She admits, too, that she's had her disappointments. There was the case of the stalwart young actor she saw in a play last fall. She rushed backstage and arranged a screen test, only to discover that on film he was a gentle shrinking soul not at all suitable for the hero type of stuff.

Then there was the opera singer who wouldn't make his test except in costume, and when he discovered that he had forgotten his tights, insisted on wearing his long underwear. The impromptu costume gave difficulties which necessitated the singer doing his aria with a sort of St. Vitus dance action throughout and he's still wondering why the company didn't snatch him up immediately.

A young man strolled into her office one day, and when he was politely turned down, he went into a terrific rage which Miss Robertson quickly recognized as a scene from a Broadway play. He got his test and is in Hollywood now.

Dancers and children are the toughest assignment. Miss Robertson has discovered that the ordinary good ballroom dancer comes out in a succession of jerks on the screen. Film dancing seems to require a special rhythm of its own. With children, the difficulty is to get them at the age of eight or nine but looking like they were four or five. The reason is that if you take them younger, they suddenly decide to lose their first teeth and so sit around for months doing nothing but drawing salary. Freddie Bartholomew delayed production on "David Copperfield" when a couple of teeth decided to come out in the middle of the film. However, a fast-working dentist filled in the gap with a temporary bridge and so too much time and money was not lost.

"Mike fright" is another thing that must be taken into account. Rank amateurs may not mind it at all; while, on the other hand, seasoned troupers go into a panic when they first get before the microphone and camera. Mrs. Patrick Campbell almost went to pieces during her first screen test, and Ben Bernie could only appear in long shots for several days when he first went to Hollywood. He couldn't do a thing when they got the camera close to him until after he had become used to it all.

A Scottish landowner was giving a dinner to his tenants. He gave instructions that a magnificent repast was to be provided, and that there was to be no stinting of champagne.

Two guests were just partaking of their fifth glass of champagne when one of them turned to the other and whispered:

"I say, Sandy, I wonder when the whusky is comin' around? These foreign mineral waters are very lowerin'."

THE WEEK in OTTAWA

By FREDERICK EDWARDS

CANADA'S 1935 pre-election budget, delivered Friday last by Hon. Edgar N. Rhodes, Minister of Finance, bears the hallmark of sanity and soundness. It is no vote-catching statement, but a practical means to accomplish the end of making ordinary revenues meet ordinary expenditures during the next fiscal year, with a small surplus. Mr. Rhodes estimates that under its provisions a total revenue of $392,100,000 may be expected against expenditures of $370,600,000.

Additionally the budget implements in part the reform programme outlined by Prime Minister Bennett in his radio speeches. It includes provisions for the furthering of Empire trade by substantially extending British preferences. It places a greater burden of taxation upon those with larger incomes earned or unearned. I increases the corporation income tax. It imposes a tax upon gifts, except those between husband and wife and others already provided for by income tax law, the purpose of which is to prevent evasion of the income surtax by the device of an income recipient making gifts to dependents, and so on.

Briefly, the taxation changes are as follows:

Surtax on investment incomes over $5,000 ranging from two per cent on lowest taxable income to 10 per cent on investment incomes of $200,000 or over, expected to yield $12,000,000 additional revenue.

All income, no matter what the source, to be treated same as investment incomes for surtax purposes if exceeding $14,000.

Tax on premium value of gold to expire May 31st, 1935, but depletion allowance on income tax of precious metal mines reduced from 50 per cent to 33 1-3 per cent, and on dividends to shareholders of such mines reduced from 50 per cent to 20 per cent.

Corporation income taxes increased from 12½ to 13½ per cent, and increase of 1½ per cent on taxes paid by those who make consolidated income returns.

Graduated tax on gifts exceeding $1,000 ranging from two per cent on $25,000 to 10 per cent on $1,000,000 or more.

Sales tax unchanged except for a concession given articles produced by the deaf and dumb which are to be taxed at half the standard rate in the future.

Excise tax unchanged but Empire preference imports exempted, and 20 per cent tax placed on cigarette lighters to offset drop in revenue from sales of matches.

Excise duties on spirits reduced from $7 to $4 per gallon, with the declared intention of combatting the smuggling and other illicit liquor traffic blamed for the drop in federal revenues from liquors from $41,000,000 in 1930 to $12,250,000 in 1934.

There are substantial extensions of the British preference, particularly upon woollen items, and an important enlargement of the classification of British goods on the free list.

Preceding the tariff and taxation changes, Mr. Rhodes painted a graphic picture of the substantial recovery effected in Canada during the past year. He told of: A rise of 48.5 per cent in the physical volume of business between the low point of the depression and the level of February, 1935, with progress accelerated in 1934; Canada's occupancy of first place in general industrial production among 15 leading countries since January, 1933; a rise of 51.4 per cent in the index figures of industrial production as compared with the low point of the depression; an increase of 29 per cent in construction contracts in 1934; a new record in power production; the greatest activity in forest industries in five years; increased car loadings and railway earnings; higher wheat prices, and an increase of over $90,000,000 in the value of 1934 field crops.

Of importance during the week end was the announcement that the Federal Voters' Lists would be completed Monday afternoon, a full week ahead of schedule.

Minister of Labour Wesley A. Gordon's unemployment relief bill for 1935-36 was passed by the House on Friday last after considerable opposition from the Liberal benches, and is now with the Senate.

Miraculous Gifts Are Credited To Young French-Canadian Girl

Ottawa.—In a humble little clapboard-faced cabin eight miles east of here, the body of 19-year-old Marie Anne Gravelle lay in state to-day while scores of people gathered in and about the house relating the many miracles she is credited with having performed in the two weeks previous to her death.

On the wall above the casket were two crutches and a cane left by a man and woman who claim to have been cured of deformities resulting from illness. Several other residents of the district said they had been completely cured of physical disorders from which they had suffered, by her prayers.

So deeply impressed are the parishioners of St. Joseph Orleans with the miracle said to have been wrought by the young French-Canadian woman that a chapel may be erected on the spot where she died.

Father Rene Morin, Cyrville, parish priest, declined to comment on reports of the girl's miraculous powers but it was understood the question was being considered by church authorities with a view to investigating authenticity of the claims.

Miss Gravelle, in ill-health for the past four years, was ordered to bed about a month ago. It was about that time, neighbours said, that manifestation of her powers of healing appeared.

Among those who claim to have experienced cures at the hands of the girl is Joseph Clairoux, Navan road farmer, who said he was deaf in one ear and that Miss Gravelle restored the hearing in the defective ear to such an extent that it was better than the hearing of his other ear.

The owner of the cane which hangs in the little house, Alfred Normand, of Eastview, said he had been paralyzed in one side and unable to raise his arm. He raised both hands above his head to show that he was no longer paralyzed.

Mrs. Amedees Poitras, owner of the crutches, said she entered the Gravelle home last Wednesday and left her crutches there, although she had used them ever since she was a child. She said that last Sunday night she walked downstairs unaided, carrying her six-months-old child.

A man almost blind claimed to have derived benefits from his visits to the girl. He is Omer Auger, of Hull, Que. For two years, he said, he had been completely blind. He visited the Gravelle girl and thereafter was able to see slightly, he declared, and now can discern objects in the room where he sits. Auger said doctors had told him his case was "beyond medical science.'

Curtis J. Hitsman Dies Unexpectedly at Wincnester

Husband of Chesterville Girl Honoured Sunday Afternoon When Wesleyan Church Filled to Capacity

The Wesleyan Methodist church in Winchester was crowded to the doors on Sunday afternoon at the funeral of the late Curtis Hitsman, who passed away unexpectedly on Friday at noon, having taken a stroke on Wednesday. He was 55 years of age.

For some time Mr. Hitsman had not been in good health but was able to be around and work a little. Besides his wife, he is survived by two sons, Leslie and Arthur, and a daughter, Mrs. Walter Barkley all of Winchester. His wife is a daughter of the late Wm. Smith, painter, and Mrs. Smith of Chesterville. His father, Mr. Philip Hitsman, of Winchester, also survives, as well as three brothers and a sister.

The funeral service was conducted by his pastor, Rev. D. W. Summers, after which interment was made in Maple Ridge cemetery.

Payne Valley

Mr. Norman Bethune of Newington East called at Mr. Geo. Eligh's on Thursday.

Quite a number from here enjoyed an old time dance at the home of Mrs. Effie Quinn on Tuesday evening last.

Mr. Alex MacLean of Finch spent a day last week with his daughter, Mrs. Jim McMillan, and Mr. McMillan at Finch.

Miss Cassie McMillan spent Sunday with her brother, Mr. Angus McMillan and Mrs. McMillan, Finch.

Messrs. Geo. Eligh and Fred Legault spent Tuesday at Northfiled.

Mrs. Albert Bush spent a few days last week with her daughter, Mrs. W. J. Cameron and Mr. and Mrs. Joe Cameron of Finch.

Mrs. W. Meldrum and sons spent an evening last week for tea with Mrs. Effie Quinn and family.

Mr. and Mrs. J. D. Shaver and family, Messrs. Donald Shaver and Carl Waldroff spent Thursday evening with Mr and Mrs. Dan Campbell and family.

Mr. and Mrs. George Eligh spent Thursday evening with Mrs. Mary MacIntyre and family.

ST. LUKE'S LITERARY SOCIETY.

St. Luke's Literary Society met in the schoolhouse on Friday last with a good attendance. The president, Mr. George MacElheran, was in the chair The minutes of the last meeting were read by the secretary, Mr. C. Waldroff. The meeting opened with a duet "Killarney's Lakes," by Misses Eileen Campbell and Mary MacIntosh," accompanied by Miss Mabel Campbell. During the evening they gave two more Irish numbers. Mouth organ selections by Wallace Hasely and Sam Cameron were enjoyed. Mr. Dan Campbell told a very interesting story about the life of St. Patrick. Mr. Eldred and Howarl McMillan, with violin anl mouth organ, accompaniel by Miss Mabel Campbell, gave several pleasing numbers. A debate followed, Resolved, That farming communities fifty years ago were more conducive to happiness than conditions at the present time." Both sides were ably presented, the affirmative by Misses Mary MacIntyre, Gertrude McMillan and Clare Moak, the negative by Miss Mabel Campbell, Mr. Eldred and Mr. Howard McMillan. The judges, Miss Sanderson, Mr. Hugh Curran and Mr. C. Waldroff, gave their decision in favour of the affirmative, after which a social half hour was spent.

NEWSPAPERS ARE SOUGHT IN THE HOMES

Did you ever stop to think that people read newspapers because they want them? The newspaper is not forced on anyone. People pay for it and read it regularly. Whole families await it eagerly and contest good naturedly over their individual turns to read it. Each praises and criticizes it as one is prone to criticize the other members of the family. The good newspaper is a definite part of the family. That is why its sales force is immeasurable. Door-to-door salesmen use all kinds of ingenious devises to get inside the home. But the newspaper is a welcome guest. One type of selling is forced, the other is received cordially. Door-to-door handbills are most times an intrusion upon the privacy of the home, but the newspaper is invited in. Its messages are read avidly and its advertisements are considered a part of these messages. The newspaper is so definitely a part of the people, so much an accepted member of the family that its pages constitute the finest and lease expensive advertising medium yet devised.

A NEW HEN

CANADA has contributed materially to the making of what is claimed as a new hen which has been evolved by agricultural scientists at Cambridge University, England. The bird at the moment is the object of considerable attention in the Old Country, and concerning it The Spectator says: "Few successes of greater interest and practical possibilities have been won in the field of agricultural biology than the making of the new Cambridge hen. Her chicks declare their sex at birth, because the males and females are differently marked. This is a great advantage in the poultry industry, since chicks travel safely and well only during the first two days of their life. The new breed, known as Cambar, was developed by Dr. R. C. Punnet and his associates at Cambridge, England, by the application of Mendelian principles. By the use of the Canadian Barred Plymouth Rock (supplied by the University of British Columbia to Cambridge University) both silver and golden Cambars have been evolved. They are prolific layers of large coloured eggs, whilst still possessing the virtue of sex-linked chicks. These chicks marks an epoch in the scientific breeding of poultry."

NEW COURSE SUGGESTED.

Perth Expositor.

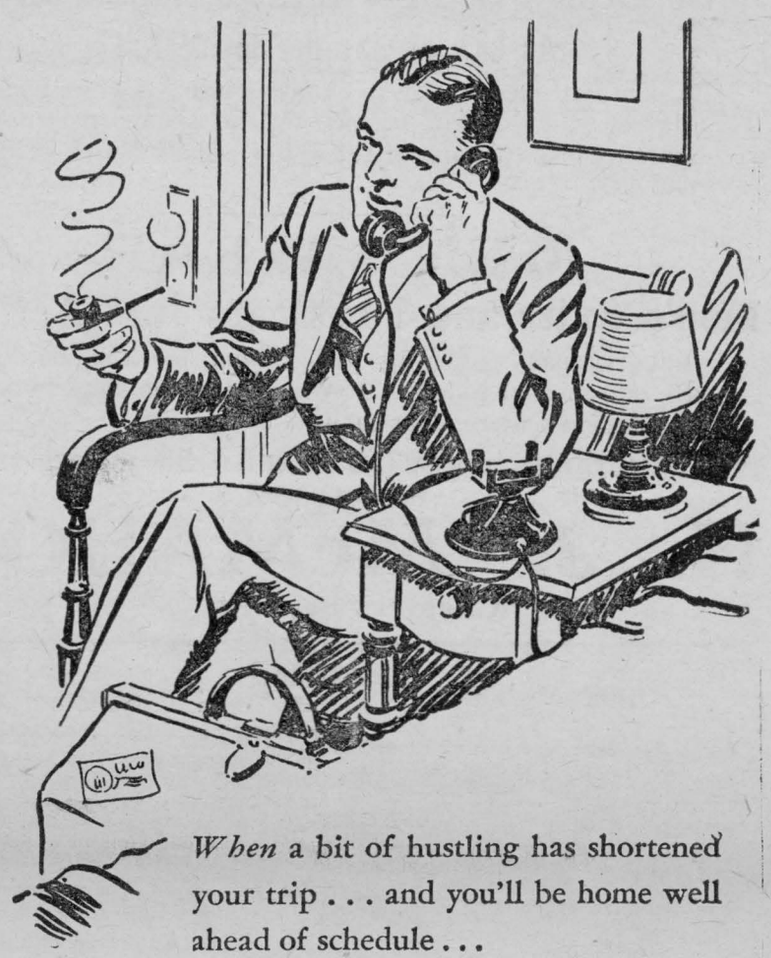
THERE is an agitation on in some quarters to have radios installed in the schools so that the pupils can listen in to public addresses. Now is the time to nip this foolish idea, and once and for all have it thrown into the discard. We have enough nonsense in our educational laws and regulations, but to have radios installed and hear Lady Buncom tell the pupils the only way to get the dirt out of the pores is to apply that particular cream, or hear Blue Ribbon Beer advertised as the best and most refreshing drink in the United States. By way of variety, Amos 'n' Andy would be elevating. Caddy Entor would make it interesting by telling the boys and girls he has five daughters and hopes some day to have a son, while some lecturer from across the border would make Moses and the Apostles, and even MacDonald and Laurier look like pigmies compared with Lincoln and Washington. A good juicy pumpkin pie slapped over the orifice of the agitator for the installation of radios in schools would be a good thing.

ROBINSON-BOGART

A quiet, pretty wedding was solemnized on March 12th at the United church manse, Elma, when Willa Annie, only daughter of Mr. and Mrs. John Bogart and Burl Edgar Robinson were married by Rev. Kenneth Woodwark. The bride, who was unattended, wore a match blue crepe dress, hat, coat and shoes to match. After the ceremony dinner was served to the immediate relatives at the home of the bride's parents, the table being decorated in colours of blue and white. Mr. and Mrs. Robinson left on a wedding trip to Smiths Falls and western points, the bride travelling in a brown costume with accessories to match. They have since taken up residence on their farm near Elma.

Customer: "What do you mean by sending me such a tough fowl?"

Butcher: "Why, my good man, do you happen to know that that bird has won first prizes at all the local poultry shows for the last 12 years?"



When a bit of hustling has shortened your trip . . . and you'll be home well ahead of schedule . . .

Share the pleasure with the folks at home. Call them on Long Distance.

Morewood

Mr. and Mrs. Milton Swerdfeger of Glen Stewart, Mr. and Mrs. R. S Allison of Winchester Springs were in town on Sunday.

Mr. and Mrs. Max Martin, Ottawa, were the guests of Mrs. Martin over the week end.

Miss Munroe, of the High School staff, spent the week end at her home in Ottawa.

Mr. Dan MacGregor has been confined to his room for a few days.

Mr. and Mrs. T. Andrew and family were Sunday guests at the home of Jas. Andrew. Mrs. J Andrew returned to Ottawa with them.

Mr. and Mrs. J. E. Faulkner visited in Winchester on Sunday.

Mrs. P. MacGregor entertained Rev G. H. and Mrs. Smith at the tea hour on Thursday.

Mr. Don Faulkner has returned home after spending the winter at Wilson's Corners.

The W.M.S. meeting for March was held at the home of Mrs. Abner Dillabough on Thursday last with the president, Mrs. Walter Coulthart, in charge. The study book was in charge of Mrs. Coulthart and several ladies took part. Misses Blanche and Alta Loucks favoured with a duet. Plans were made for the Easter Thankoffering to be held Easter Sunday night when the C.G.I.T. will affiliate with the W.M.S. The girls, in their new uniforms, will take the offering.

Berwick

Mrs. W. D. Munroe and children visited with relatives last week at Ottawa.

Mr. Wm. Plumb returned home last week from Ottawa where he had been a patient in the Civic hospital for a month.

Mrs. C. Gray is spending some time at Cornwall caring for her daughter, Mrs. J. C. Searle, who is ill.

Misses Edith MacLean and Kathleen Ruddy of Ottawa visited their parental homes over Sunday.

Mrs. John Rutley spent over Sunday with relatives at Cornwall.

The oyster supper which was held in the Community Hall on Friday night in honour of the Hockey boys, was well attended.

Mrs. Catherine McQueen spent Tuesday at Cornwall.

Mr. Wm. Elliott visited his mother and sister at Ottawa recently.

A number from here attended the court at Cornwall on Tuesday.

Mr. Wm. Spotton and family are moving this week to their farm east of Berwick.

Mrs. John Ouderkirk of Finch visited Mrs. Geo. Alguire on Thursday.

The Y.P.S. of St. Paul's United church, Berwick, held an old-time concert and box social recently .Rev. H. M. Beach presided as chairman of the evening and the programme was opened by a promenade of those in old-time costume. By vote of the audience, Miss Flossie Nichols was chosen winner of the prize.

The programme was made up of vocal and instrumental selections and was greatly appreciated.

One or two interesting features which savoured of olden times was the "Old Spinning Wheel" while a duet of that popular song was being sung. Miss Ruth Meldrum in a quaint old-fashioned costume, demonstrated the art of spinning on a wheel which was over 100 years old. Also of interest was an "Old-Time Quilting Bee." A group of the older ladies from Berwick exchanged the news of the village of forty years ago as they quilted. Many pranks of the former youth of Berwick were brought to light and a good laugh was enjoyed by all.

The ladies' boxes were placed on display and a vote was taken of the young gentlemen on which was the most popular box. Miss Velma Whitteker received the prize. The boxes were auctioned off by Mr. Aden Casselman and the sale brought a nice sum of money to the society.

After the games, which were enthusiastically participated in, the evening's entertainment was brought to a close with the singing of "Good Night, Ladies" and the National Anthem.

IN MEMORIAM

Servage—In loving memory of a dear sister, Mrs. Herbert Servage, who departed this life April 1st, 1929.

—Ever remembered, Mrs. S. Morris.

Make More Money with Bray's

XTRA-PROFIT CHICKS

THE new name, "Xtra-Profit," that we have given to our top grade of chicks this year, isn't just a "catch word." It means exactly what it says. Our "Extra-Profit" chicks do make you more money.

These chicks ALL come from eggs that run from 25 ounces per dozen up to 30 ounces and 32 ounces per dozen. And we know, from observation, and from trap-nest records kept at Ottawa, that these bigger-than-average eggs come mostly from bigger-framed, deeper-bodied birds. The chicks inherit the extra vigour and growthiness of their mothers. They hatch better, live better, and grow faster. They give you earlier broilers, bigger cockerels in the Fall, bigger-bodied, stronger pullets at laying time, and a larger average egg-size through the Fall and Winter.

We have a good "standard" grade of chicks, too, that are outstanding value at to-day's price. Hatched from "standard sized" eggs—23 to 25 ounces per dozen Backed by Bray methods of breeder selection, blood-testing and incubating.

Also a few started chicks and 3-weeks-old Leghorn pullets that will give you the advantage of earlier hatching. Come in.

BRAY CHICK HATCHERY

AGENT: H. L. HOUGH,
CHESTERVILLE, ONT.

Goldfield

Mr. and Mrs. C. F. Warner and son and Mr. and Mrs. John Gibson and daughter visited relatives in Avonmore on Sunday.

Rev. W. E. Davies, B.A., and Mrs. Davies of Finch were calling here on Wednesday and were guests at the tea hour at the home of Mr. A. D. Gillies.

Miss Janette MacLean returned to her home after spending several weeks with Misses Minnie and Katie Gillies in Finch. Miss Minnie Gillies is confined to her bed for a year suffering the results of a stroke.

Mrs. Elburn Shaver, who underwent a serious operation a few weeks ago in Cornwall General Hospital, is able to return to her home.

Mr. and Mrs. Ross McMillan and sons of Avonmore visited the former's home here on Sunday.

Mr. and Mrs. Thos. Foley visited with Mr. and Mrs. Patrick Foley and family recently.

Mrs. S. M. MacLean attended the W.M.S. meeting of St. Luke's Presbyterian church, Finch, on Tuesday afternoon held in the Sunday School Hall.

Mr. J. E. Nephew, B.S.A., spent a couple of days last week in Kingston as a delegate for the Holstein Club of Dundas.

Mrs. Catherine Gillies and sons Hugh and Donald spent Tuesday in Ottawa and Hawthorne.

Mrs. Roland Droppo and daughter, Miss Lena Droppo, R.N., attended the funeral of the late Mr. Isaiah McBride at Northfield on Tuesday.

Master Francis Foley was in Alexandria last week where he assisted in the programme at a concert.

Mrs. Silas Farrell visited at the home of Mr. and Mrs. John Nephew recently.

Mrs. Geo. Smith visited her mother Mrs. Jas. Younge, at Crysler, the first of the week.

Misses Margaret and Rose McMahon and Nell Gillies visited at the home of Mr. A. D. Gillies on Sunday.

Melvins

Mrs. Richard Scott took tea Monday with Mrs. John Scott of Winchester.

Mrs. John Darling of The Boyne is spending some time here with her daughter, Mrs. George Beckstead.

The annual meeting of the Sunday School was held at the home of Mr. Arthur Christie on Friday evening with a good crowd in attendance. After the business part of the meeting was over a social hour was spent and a dainty lunch was served by the hostess.

The first auto of the season was seen on our road yesterday, so it looks as though spring were here and that the roads were in good condition for carring.

Mr. Lewis Miller of Cornwall returned to Mr. Richard Scott's, having spent the past couple of months with his family in Cornwall.

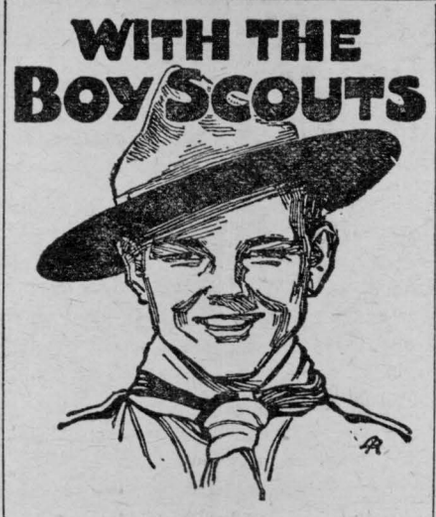
ONCE ADVERTISED—
—IT'S AS GOOD AS SOLD



HONOUR.

(Scout Law No. 1)

A Scout's Honour is to be Trusted

If a Scout says "On my honour it is so," it is so, just as if he had taken a most solemn oath. Similarly, if a Leader says to a Scout, "I trust you on your honour to do this," the Scout is bound to carry out the order to the very best of his ability and to let nothing interfere with his doing so

NEW RULING FOR THE TROOP.

Up to the present time a Scout who missed a meeting was not penalized any more than the points he would have brought to his Patrol had he been present, and interest in the meetings has been such that not many of the boys have missed more than one or two meetings in a row without some cause, such as illness. But one or two have crept into a bad habit of not turning up and to take care of these a new ruling was passed last week by the Court of Honour. It is to the effect that any Scout who misses three consecutive meetings without a reasonable excuse will be required to hand in his badge until he has given attendance at three consecutive meetings when it will be restored to him. It is hoped by the officers that this drastic measure will not have to be enforced on the boys of the 1st Chesterville Troop. Absence without leave has been one cause for the Wolf Patrol losing so many points in the Honour Patrol competition.

TESTS PASSED.

A number successfully tried the task of remembering 16 out of 24 assorted articles after viewing them for one minute—Kim's Game—which is given in place of the tracking test in the Second Class tests. Four failed by one point only, and the Whip-poor-wills lead the way with six of their number coming through. They were followed by three Beavers and two Wolves. Geo. Olsen also passed the compass requirements.

LEADERS WANTED IN CHESTERVILLE

There are two other branches of Scouting other than the Scouts as we have known them locally for some years, departments that take care of boys before they are of the Scout age of 12, and Rover Scouts, into which the Scouts step when they have reached the age of 18 years. There is material galore among the youngsters of Chesterville, ages 9 to 12, to supply a Wolf Cub Pack, which consists of 24 boys and usually three leaders, a Cubmaster and two assistants. Many lady Cubmasters, by the way, are doing excellent work among the youngsters in their preparation for a career of Scouting.

The need among our local children for a training of this kind is acute and the members of our Court of Honour have often talked over the possibility of securing suitable leaders. This week the S.M. received a letter from Mr. Edgar Jones, Field Secretary who, besides enquiring of the welfare of the troop, asks if it would be possible to start a Wolf Cub Pack. We would be only to glad to tell Mr. Jones that leaders were located and a Pack was assured.

Is there anyone in Chesterville willing to sacrifice a little of their time to take on a work which is a game at heart, and a lot of fun, because the teaching of Cubs is mainly through games and story-telling. Several of our Scouts have reached the age limit of 18 years and it has been suggested among ourselves that three or four of them should take over this junior work and, doubtless, after receiving this note from our Field Secretary, the matter will be more fully talked over at to-night's session of the Court of Honour.

IT WAS A PAPOOSE, OF COURSE!

AMONGST GIFTS sent by the Red Deer, Alta., Boy Scout Toy Shop at Christmas to Cree Indian children near Rocky Mountain House were some dolls. Recently a very small Indian maiden was seen on the street at Rocky Mountain House with a large toy shop doll carefully wrapped in a rabbit skin and slung over her back in the traditional squaw manner.

DEMONSTRATE LIFE SAVING.

Following their winning of the Clouston Cup, emblematic of the Scout life saving championship of the Province of Quebec, the swimming team of the Weredale House Scout Troop, Montreal, gave a rescue demonstration at a life-saving clinic sponsored by the Royal Life Saving Society.

HUNGARY AGAIN INVITES ENGLISH SCOUTS TO CAMP

The Scouts of Somogy County, Hungary, have again invited a party of 60 British Scouts and leaders to pay them a three-weeks' visit in August, part of the time as guest campers, and the balance as guests in Hungarian Scout homes.

REGINA'S SCOUT ORATORS.

For the second year a Boy Scout has won the Regina I.O.D.E. contest in oratory. The winner for 1935 was Gordon Blair of the Wolf Patrol of the 22nd Regina Troop.

SEA SCOUT FIREMEN.

The Sea Scouts of Lymington, England, will in future assist the local fire brigade by providing orderlies for the Fire Chief, running out hose, keeping back crowds, and doing salvage work.

SMALL SKATERS GET A 'BREAK'

The operation of free public skating rinks was a widespread Boy Scout service this past winter. In New Glasgow the Scouts gave small skaters a "break" by reserving the ice to them each afternoon until 4.15 p.m.

1,000-MILE LAND CRUISE.

A "Thousand Mile Land Cruise" by special train from London to Edinburgh and return, touching at York and other historic points, is a novel Scout project being carried out during the Easter holidays. The Scout tourists will be served breakfast and supper on the train, and for midday a "haversack lunch" to facilitate sightseeing.

TO CAMP WITH DANISH SCOUTS.

The Danish Y.M.C.A. Scouts have invited a party of 25 English and 25 Scottish Scouts to their national camp near Copenhagen in July.

15,000 POLISH SCOUTS TO CELEBRATE

Scouts from other countries are invited to the 25th Anniversary Jamboree of the Scouts of Poland, to be held in the forest of Spala in July. Some 15,000 Polish Scouts are expected to participate.

NEXT WEEK AT THE
CAMEO THEATRE
MORRISBURG

MONDAY and TUESDAY	JEAN HARLOW, FRANCHOT TONE and LIONEL BARRYMORE —in— **"THE GIRL FROM MISSOURI"** —also— the Most Beautiful and Entertaining Short Subject in Colors evrr released **"LA CACURACHA"**
WEDNESDAY and THURSDAY	GRACE MOORE —in— **"One Night of Love"** The Most Glorious Musical Romance of All Time A rare Treat for all Lovers of High-Class Music.
FRIDAY and SATURDAY	HAROLD LLOYD and UNA MERKEL —in— **"The Cat's Paw"** This Veteran Actor-Comedsan returns to the Screen in a Masterpiece of Comedy and Genuine Entertainment. Do Not Miss It.

THIS FRI. & SAT. **"A Girl of the Limberlost"**

We wish to announce that from now on, commencing this Saturday, we will run three complcte shows every Saturday evening, starting at 6:30 - 8:30 -10:15 o'clock.

CONTINUOUS SATURDAY EVENING FROM 6:30 TO MIDNIGHT

Are You Thinking of Having a Sale This Spring?

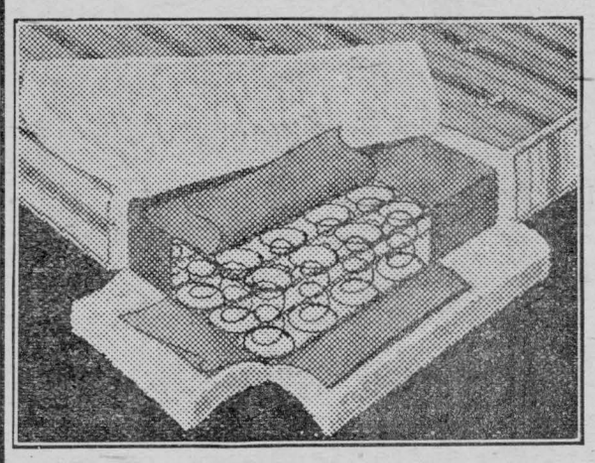
SEE ME FIRST.

Now is the Time to RE-ROOF That BARN, HENHOUSE or other Building with METAL ROOFING at Depression Prices.—Get My Free Estimate.

Still time to order your SWEET CLOVER SEED
Gov't Tested at 11c No. 1; 9c No. 2; 7c No. 3.—GOLDEN MILLET 7c lb.
SEED CORN
Agent, Successors to J. O. Duke Seed Co. Order Early. Price will be Higher If you are thinking of building a Silo this year, get my prices for Hylo Sylo —Ready to erect.

A. V. HEMMINGS
LICENSED AUCTIONEER
R. R. No. 1 : CHESTERVILLE
Agent for Matthew Moody Co. makers of Good Farm Implements Since 1845

SPECIAL SALE of Marshall Spring Mattresses



from APRIL 6TH to APRIL 30 for **11.95**

The Marshall "AVON" Mattress

This mattress contains 190 double cone springs in the construction, interlocked with small helical springs covered with heavy hessian and upholstered with layer felt padding with a heavy quality damask ticking, ventilated and hand tufted. Any standard sizes. **Reg. $16.00**

The depresson, for 16-year-old William L. McDonald of Brookdale, Man., is over. William's 900-pound steer brought him $125 in prize money at the Brandon Winter Fair and was sold for $315.

* * * *

A confidential report supposed to have been sent to President Roosevelt and published in a Paris newspaper represents Germany as being on the verge of financial and industrial collapse. If true, Hitler may be in the same position as the Irishman at the concert party who was told he would have to sing or make a speech. "I can't do either," he said, "but by way of diversion, I can lick any man in the crowd."

* * * *

Col. Fraser Hunter, a former Bengal Lancer, speaking of India, said that the one thing that impressed itself upon his mind during his life in India was the thousands of the "finest youth of England" who died there as a result of the habitual "cocktail round." "They never seem to learn that cocktails in that country are fatal. In Canada, the Royal Military College in Kingston, whatever else was said about it, it does teach the boys to take their whiskey like gentlemen and not lke Red Indians."

* * * *

Dr. William J. Mayo, of the famous Rochester clinic, believes that the motorist who goes out on the highway with just two or three cocktails on his stomach is a greater menace to public safety than the one who goes out drunk. A couple of cocktails, he says, will slow up the normal man's reactions so that it takes him two to four times as long to react to an emergency as a man who has taken no alcohol. A cold sober driver, proceeding at 40 miles an hour, will travel about 25 feet before he takes any action to meet a sudden danger. The man ballasted with a couple of cocktails will require 50 or 100 feet.

* * * *

Existing fears that the present armament disputes of the European powers would result in another war were treated lightly by Vernon Bartlett, internationally known commentator on foreign affairs for the British Broadcasting Corporation, on Saturday afternoon in addressing a large audience in Toronto under the auspices of the National Council of Education. The speaker poohpoohed the idea that Germany was bent on another war, and blamed the attitude of the Allies for the difficulties which have arisen in connection with the German re-armament scheme.

* * * *

Thousands of lambs, many of them fattened on the finest clover roughage and best of home-grown grains, are raised every year on the sheep ranges in Western Canada. As in 1934, the Dominion Department of Agriculture under the Lamb Feeding Project, is again encouraging the fattening of these lambs on specially selected farms in Eastern Ontario. Results obtained a year ago, when over three thousand head were marketed as super-quality lamb, were such that this year approximately seven thousand head have been placed in feedlots with Eastern farmers. Carcasses of fresh-killed, feedlot lambs augment the supplies of store lambs which are put by for winter use from the fall run of domestic lambs. Canadian people are becoming more discriminating each year as regards the quality of each class of meat that they use. The steady marketing of feedlot lambs during the winter and spring months has greatly improved the average quality of Canadian lamb with the result that to-day lamb occupies a prominent place in the meat diet of a large percentage of Canadians.

HEALTH by [illegible] M.D.

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

ACIDOSIS.

DURING the past year, the Health Service was asked by many correspondents for information concerning the acid-forming foods. It is a significant fact that these people did not enquire about the alkaline or base-forming foods. For one reason or another, there is a popular fear of what is commonly called acidity or acidosis.

When foods are burned to produce heat, energy, etc., carbonic acid gas is produced, which is eliminated from the lungs. An ash is left which may be acid, alkaline, or neutral. If the acid ash is in excess and this continues to pile up over a period of time, the alkalinity of the blood will be gradually reduced, and the condition known as acidosis results.

The common symptoms of this form of acidosis are fatigue, headache, a sense of weakness, and pain in the muscles, with a loss of appetite. The symptoms are mild when the acidosis is mild but if the acidosis progresses, the symptoms become more severe, the urine and the sweat being strongly acid. The condition, in a mild form at least, is fairly common among those who consistently use acid-forming foods to excess.

The body does its best work on a balanced diet. To maintain health, the diet must be reasonably balanced in all ways, including the acid and alkaline foods. A continued excess of acid forming foods leads, as has been said, to acidosis, while an alkalosis, which is just as much to be avoided, will follow upon a diet that is excessive in its alkaline content.

It is not a question of one or other food being a good food; it is rather that an excess of any one kind of food is undesirable and may actually be harmful or dangerous.

Meat, fish, eggs, bread and other cereals are acid-forming foods. The alkaline foods are vegetables, excepting rhubarb; fruits excepting plums, cherries, cranberries and prunes; almonds; and milk. Fat foods, such as butter, cream and lard, together with sugar and starch, and the fats of meat, fish and fowl are neutral foods.

It is not necessary to become faddy with regard to diet to secure the balance which is essential to good health and physical fitness. To the diet of meat, bread and other cereals add liberal amounts of fruits, vegetables and milk.; this will ensure the balance. There are other reasons why fruits, vegetables and milk should be used every day; they are the protective foods which guard against lack of minerals and vitamins as well as against an excess of acidity.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College street, Toronto, will be answered personally by letter.

The orderly sergeant was making his tour.

"Any complaints?" he boomed.

"This Irish stew's funny," grumbled one soldier.

"Oh, is it?" said the sergeant. "Then why ain't you laughin'?"

---o---

"Yes, it is really remarkable," observed mother at the head of the table. "Clifford seems to eat twice as much chicken when we have visitors."

"Indeed!" exclaimed the lady visitor. "And, pray, why is that, Clifford?

"'Cause that's the only time we have it!" replied the truthful lad.

---o---

"I tell you that I won't have this room," protested the old lady to the bellboy, who was conducting her. "I ain't going to pay my good money for a pig-sty with a measley little foldin' bed in it. If you think that just because I'm from the country—"

Profoundly disgusted, the boy cut her short. "Get in, mum, get in. This ain't your room, this is the elevator."

Johnnie Rejoices

(Concluded From Page Seven.)

"Yep, I sure did," said the road inspector. "I passed your friend stalled at the side of the road about ten miles back, some distance this side of the town of Chester, with both rear tires punctured. He'd run over some broken glass and was swearing a blue streak."

"We're right on his heels now!" exclaimed Johnnie exultingly as he started the motorcycle. "At the rate we're going we'll get there in twenty minutes. If we can only overtake him before he get's the tires repaired!"

Fortunately, they had the road almost to themselves, and when they had covered nearly ten miles they began to peer round each turn of the road in the momentary expectation of catching sight of the wine-coloured car.

At last their persistence was rewarded; for when they reached the summit of a long hill the road stretched out, a white ribbon, winding across the verdant plain beneath them. Along it proceeded an automobile with a single occupant, and the body of the car, even from that distance, shone crimson in the sparkling sunlight.

Johnnie's heart fairly leaped with excitement and, casting all caution aside, he opened wide the throttle of the motor cycle and fairly flew down the long grade. The wind, whistling past, whipped their unprotected faces till they could hardly see. The old machine creaked in every joint and pinion and swayed precariously, but Johnnie did not slow down. At last they shot out upon the level plain.

They were now rapidly overhauling Sprague. Johnnie had no predetermined plan of action, and, as the automobile thief was obviously unaware that they were close behind him, he decided to play safe and remain just out of earshot until Sprague should stop, and they could close in on him without giving him a chance to distance them in his faster machine.

They proceeded in this manner for several minutes, pursued and pursuer, until, at a sharp turn in the road, Sprague, happening to glance back saw them. Instantly the rising crescendo of his motor showed that he recognized them, and, although they gained on him in the first spurt, they soon began to have difficulty in holding their own. Johnnie gritted his teeth and exerted his utmost skill in trying to keep pace with the flying Sprague, but he realized that luck would have to come to their aid if they were to catch him.

Fortune smiled on Johnnie, however, and waved her hand, and lo! the drawbridge over the ship canal that they were approaching began to slowly open. Sprague saw it, too, and knew that he was cornered; they could see him anxiously scanning the road ahead of him for some byway to turn into, but there was none.

A moment later they shot alongside the automobile and came to a stop directly in front of it. Johnnie sprang from the motorcycle and leaped upon the running board of the car, with his jaw set and his blue eyes flashing.

"This is my car that I bought from you and paid you for," he cried, "and I mean to have it back right this minute!"

Ed had come up on the other side of the car and he glared at Sprague menacingly. The thief uneasily eyed the two stalwart, determined young fellows.

"All right, old man," he said with studied resignation. "To tell you the truth I had to get out of town in a hurry; so I thought I'd borrow my old car and when I was through with it leave it in some garage and let you know where it was and you could come and get it. If you'll take me to Chester, you will be doing me a big favour, and then you can have your car back again, without fail."

"So you only borrowed the car!" said Johnnie sarcastically. "Well, it's now high time you returned it, and I intend to take possession of it at once. But if you must get to Chester," he added, glancing meaningly to Ed, "I'll drive you there."

"Who is that coming?" suddenly exclaimed Sprague, jumping out of the automobile and peering back along the road.

Johnnie and Ed both turned to see a low racing car rapidly approaching. Two men were in it, and something about the appearance of one of them struck Johnnie as familiar; but before he recognized the man his attention was attracted by a cry from Ed. He wheeled round to find that Sprague had slipped unnoticed from the car and seized the motorcycle, and was running with it toward the canal.

As they hesitated uncertainly for a moment, Sprague reached the edge of the steep bank that sloped down to the towpath and pushed the motorcycle over it; he just managed to hold it back at the bottom from going into the water. Then he quickly mounted the machine and, pedalling furiously until the engine started, sped off down the narrow towpath.

They stared after him, dumfounded completely at a loss to know why he had suddenly abandoned the automobile. But the two men who came up in the racing car were able to shed light on that point.

"Confound it, man, why didn't you hold on to him and have him arrested?" demanded one of them, whom Johnnie now recognized as the man who had stopped him as he was leaving the police station in Franklin and asked for a description of Sprague.

"He went so quick—and, anyway, I've got my automobile back," explained Johnnie, "and the motorcycle really belongs to him as part payment for it. No, by George, I borrowed it from Young."

"I don't care anything about your automobile, or your motor cycle, or who they really belong to'!" cried the man impatiently. "I'm a government agent, and I am after this fellow you call Harry Sprague as a draft evader. Tell me, does this road cross the canal again farther on, or run alongside of it at any place?"

"I don't know," replied Johnnie absently; "I've never been any farther than this on it."

At that moment the drawbridge began to close. Instantly the officer started the racing car and shot ahead.

Johnnie and Ed watched the two men speed across the bridge and on the farther side turn their automobile down the highway that ran parellel to the canal. The quick eye of the officer had seen not only the roadway, but also, in the distance down the canal, a second bridge. The boys glanced first at the the speeding car, then at the fleeing Sprague—the pursuers dashing down one side of the canal, the pursued down the other. Running at sixty miles an hour and raising a great cloud of dust, the officer's car reached the bridge first, a mere speck in the distance. It crossed to the other side and stopped. Sprague was cornered.

"See! They've got him!" cried Ed.

"I guess Mr. Sprague's goose is cooked," said Johnnie as he got into the car and joyfully took his place behind the wheel. "And they've left the motor cycle! We'll get that cycle, and then we'll be off."

"Let her go," rejoined Ed, grinning. "This seat is a whole lot more comfortable than the one I've been clinging to for the past couple of days."

Johnnie pressed the self-starter, and the answering purr was music to his ears. As, after a strenuous day, they drove homeward over the undulating hills, straight into the glowing depths of the setting sun, Johnnie's heart was glad and his soul rejoiced.

GOOD THINGS TO EAT

Conducted By
MISS HELEN LACEY, B. H. Sc.

HOT CROSS BUNS.

HOT CROSS BUNS have always been an Easter specialty and there is no reason why they should not be enjoyed throughout the Lenten season.

HOT CROSS BUNS.

1 cup milk
1-3 cup sugar
½ teaspoon salt
⅛ cup lukewarm water
⅛ yeast cake if mixed at night or
½ yeast cake if mixed in morning
3 tablespoons softened butter
1 teaspoon cinnamon
½ cup raisins and currants
About 3 cups flour

Make a sponge by adding 1-6 cup sugar and the salt to scalded milk. When lukewarm add yeast which has been softened in the lukewarm water. Add enough flour to make a medium thick batter or sponge, beat vigourously until bubbles begin to appear. Set in a warm place to rise. When light add remaining sugar, butter and flour sifted with cinnamon, and the currants and raisins. Knead dough until it is elastic. Let rise a second time until light; knead slightly. Roll ¾-inch thick; cut with a 3-inch cutter. Make cuts at right angles on top of each bun. Let rise; bake. Just before removing from oven, glaze by brushing with sugar and water. The crosses may be filled with plain frosting if desired.

SWEDISH TEA RING.

1 cup scalded milk
¾ teaspoon salt
¼ cup sugar
6 tablespoons shortening
⅛ cup finely chopped nuts
1 yeast cake softened in ¼ cup warm water
3½ cups flour
1 egg

Add the scalded milk to the salt, sugar and fat. When lukewarm, add the yeast. Add one-half the flour and beat well. Let rise until very light. When light, add the egg and the remaining flour and beat well. Let rise. Divide the dough into two parts and shape each in a long, round piece and form two circles, placing them on a baking-tin. Brush with white of egg and sprinkle with finely-chopped nuts. With a large pair of scissors, cut towards the centre of the ring, but not quite to the centre, at intervals of two inches, placing the cut section each time flat on the tin, giving it a petal-like appearance. When light, bake in a hot oven.

BROWN SUGAR COOKIES.

1 cup butter
2 cups brown sugar
1 teaspoon vanilla
3 cups flour
1 teaspoon salt
2 teaspoons baking powder
¼ teaspoon soda
2 eggs, unbeaten

Cream the butter and blend in the sugar. Add eggs and vanilla. Stir well. Sift flour, salt, baking powder and soda together. Turn onto a floured board. Divide dough into two parts and shape each into an oblong roll. Wrap well in waxed paper and chill overnight. When ready to bake, slice thin, arrange on a greased cookie sheet, sprinkle with brown sugar and bake in a moderate oven until brown.

RICE, CHEESE & EGG RAMEKINS

2 tablespoons butter
2 tablespoons flour
¼ teaspoon salt
Pepper
1 cup milk
½ cup grated cheese
2 cups cooked rice
6 eggs

Make a white sauce of the first five ingredients by melting butter in top of double boiler. Add flour, salt and pepper. Blend well. Add milk slowly and cook over hot water, stirring constantly until thick. Add grated cheese and stir until melted. Add cooked rice and blend well. Line individual baking dishes wth this mixture break an egg into each and bake in a moderate oven about 15 minutes or until eggs are set.

The term shortening includes fat of any kind that is used in pastry, doughs and batters. Any clean, sweet fat may be used.

* * * *

Always cook custard mixtures over hot water or surrounded by hot water.

* * * *

To know the value of food by calories is often helpful in planning a balanced diet. Yet the entire value of a given food cannot thus be measured. Calories register the fuel value of a food but do not indicate how foods build or regulate the body. A food may be very high in its caloric value but be lacking almost entirely in vitamins and minerals.

* * * *

Mental work does not change the amount of food one requires.

* * * *

Meat should always be carved across the grain.

* * * *

Roasts should be placed on the table with the thick end towards the left hand of the carver.

Questions should be addressed to Miss Helen Lacey, Chesterville Record.

WARNING IS ISSUED AGAINST ADULTERATED MAPLE PRODUCTS

"THE 1935 CROP of maple syrup and maple sugar will soon be on the market for the sap is running in the maple trees in Eastern Canada, the sure and certain sign that spring is just around the corner," says R. L. Wheeler, Fruit Commissioner, of the Dominion Department of Agriculture. "It would be well for everyone who desires only the pure products to make it a point to see that the container is stamped 'Pure Maple Syrup' or 'Pure Maple Sugar', for many attempts are being made to sell adulterated maple products.

"The Maple Sugar Industry Act and Regulations," explained Mr. Wheeler, "state that 'no person shall manufacture for sale, sell or offer, expose or hold for sale any maple syrup or maple sugar that is adulterated or any sugar or syrup resembling or being an imitation of maple syrup or maple sugar which is not pure maple syrup or pure maple sugar, unless the nature and origin of such sugar and syrup shall be clearly indicated.'"

Inspectors of the Department throughout Canada are keeping a sharp lookout for those violating the Act, the penalty for which is a heavy fine or imprisonment.

Gentleman (entering shop): "What do your envelopes run to now?"

Assistant: "They don't run sir; they're stationery!"

---o---

The party was almost over, and refreshments were being served. "Won't you have some more cookies, Willie?" asked the hostess.

"No, thank you; I'm full," said Willie.

"Well, put some in your pockets, to eat on the way home," she insisted.

"They're full, too," replied Willie.

Johnnie Rejoices

THE AMBITION of John Lawton's life was to own an automobile. He did not crave a large, luxurious eight- or twelve-cylinder car, or even a brand-new car. His dreams would be realized when the old barn housed a small but substantial motor car.

He possessed an ancient, "one-lung" motorcycle; but riding about on it was lonesome sport at best, for few of his friends, hazarding one trip astraddle the bundle carrier on the rear, cared to repeat the experience.

One warm morning in July he stood leaning against the fence post in his front yard, debating whether to start out for a ride on the old motor cycle or to look up his chum, Ed. Lawrence, who lived on the next block. Time was hanging particularly heavy on Johnnie's hands that summer, for his two older brothers were away at the officers' training camp.

At last the desire for company made him decide to seek out his chum and he walked slowly down the street. As he came in view of Ed's house he descried his chum just coming out from the front gate. Johnnie hailed him.

"Hello, Johnnie!" Ed replied. "I'm going down to Young's garage to see if our car is fixed yet; the oil pump is broken. If it's ready, father said I could have it for the day. Want to go up to the lake for a swim?"

Johnnie agreed with alacrity, and the boys hastened toward the main street of the town. When they reached the garage Ed went in, but Johnnie stayed outside to inspect an automobile at the curb that had caught his attention. It was a broad-seated roadster of a beautiful wine colour, and its polished nickel fairly shone. It had electric lights and a self-starter, and, taken all in all, it was the very car of his dreams. Oblivious of everything else, he was examining the various instrument and guages on the dashboard, when a sound at his elbow caused him to look up. A young man whose dress might be described as "sporty" stood beside him, smiling ingratiatingly.

"Well, how do you like that car, old man?" the newcomer asked.

"It's a pippin," Johnnie declared enthusiastically. "Does it belong to you?"

"Yes, and make no mistake about it, she's one fine little car. You ought to see her eat up the hills, and, as for speed she will pass anything on the road in her class."

"I bet she will," Johnnie agreed enviously. "I wish I had a car just like her."

"Are you thinking of buying a car?" asked the stranger casually.

"Yes; I've been saving up for a long time to get one, and I've pretty nearly got enough now."

"How much have you got?"

"What? Your car isn't for sale, is it?" asked Johnnie eagerly.

"Well," said the stranger, studying the boy closely, "I'm in the draft and expect to be called any day. So, rather than leave the car to rust in a garage for several years I think I'd sell it if some one offered me a fair price and spot cash."

"What would you call a fair price?" asked Johnnie quickly.

"Well, five hundred dollars."

Johnnie shook his head sadly. "I haven't got five hundred dollars," he said. "Wouldn't take any less?"

"How much less?" asked the young man doubtfully.

"I've got two hundred and fifty dollars in the bank, and I know where I could borrow fifty dollars more, and my motor cycle is worth fifty dollars."

"Could you sell the motor cycle though? It wouldn't be of any use to me."

"I could try," said Johnnie hopefully.

"I tell you what Ill do," said the young man. "Three hundred and fifty dollars is not much for that car, but I've taken a fancy to you, and I'll give you an option on it until to-morrow morning."

Sudden misgivings assailed Johnnie now that the car seemed almost in his grasp. "It certainly looks fine, but how do I know that it will run all right?"

"Jump in and I'll show you what she can do."

Johnnie called to Ed, who was standing in the doorway of the garage. "Come along, Ed. if you want a ride in a good car!" Then, turning to the stranger, he said, "This is my friend, Ed Lawrence."

"Glad to meet you. My name is Sprague—Harry Sprague."

The three crowded into the seat. At a touch of the starting pedal the motor sprang into life and the car glided down the street.

"Now," said Sprague, "show me a long hill and watch her step along."

Johnnie directed the way to a steep hill that not a great many cars could climb on high gear. As they approached the foot, Sprague opened the throttle, and the car fairly flew over the road and shot up the grade with scarcely any diminution of speed.

"Well, does she run all right?" demanded Sprague triumphantly.

"Great!" exclaimed Johnnie. "I don't believe there's a car in town that could have kept up with us."

"Take the wheel and drive her a while yourself. You know how to drive a car, don't you?"

"Oh, yes, I know all about 'em," replied Johnnie and moved eagerly into the driver's seat.

Having once experienced the actual feel of the car as it responded to the slightest touch, Johnnie quickly forgot any lingering doubts that he may have had.

"Do you think he'll really sell it for three hundred and fifty dollars, Johnnie?" asked Ed. "It's awful cheap."

They had parted from Sprague at the garage and were excitedly discussing the proposed purchase on their way home.

"He said he would. But Ill have to sell the motor cycle this afternoon in order to raise the money."

Though Ed was a little envious of Johnnie's opportunity to acquire an automobile of his own, he did not hesitate to lend his friend hs entire savings of fifty dollars.

But disposing of the old motor cycle proved a hard task. All of Johnnie's friends were too well acquainted with the idiosyncrasies of that ancient machine to care to acquire it; and others who showed some willingness to listen to his earnest exhortations did not have the ready money. The end of the day found him almost discouraged. As a last resort he determined to try to borrow the remaining fifty dollars from his father.

He broached the matter of a small loan at the dinner table, but when he casually mentioned fifty dollars as the amount he needed his father closed his half-opened pocketbook with a frown. Johnnie at last explained what he wanted so much money for, and at once the family raised numerous objections. But Johnnie argued valiantly that he had thoroughly examined the car, that he had had a convincing demonstration of it, and that he was familiar enough with automobiles to know that this was the chance of a lifetime to get a real bargain.

At last his father said he was willing that Johnnie should buy the car. The money Johnnie had was his own, earned for the most part by tinkering other people's cars, changing their tires for them, and vulcanizing their tubes. That money he was free to spend as he chose, but his father would not advance him any. So it was really an empty victory for Johnnie, and he went to bed discouraged.

The next morning, with hope revived, he was out in the barn bright and early, cleaning and polishing the old machine; he was determined to get that coveted car in some way or other.

Mounting the motorcycle, he rode off to the town, picking up Ed on the way. At the bank he drew out all his savings and then went to the garage. Sprague had not yet appeared, but at last Johnnie espied the graceful wine-coloured car coming down the street, and his eyes followed it with rapturous delight until it drew up at the curb. Sprague greeted them affably.

"Well, is it a bargain?" he asked quickly.

Johnnie took out his roll of money and counted it out before Sprague's eyes. "Three hundred dollars," he said impressively. "I couldn't sell the motorcycle; but if you will take it for fifty dollars, then here's your money."

Sprague eyed the roll for a moment, then reached out his hand for it. "It is giving the car away," he declared, "but I'll go you, although I don't know what to do with the motorcycle."

"I want a bill of sale," said Johnnie.

Sprague thereupon produced a piece of paper from his pocket on which he wrote: "Received from John Lawton three hundred dollars, one motorcycle, payment in full for one Model 25. Budd automobile, Motor No. 2002." After signing and dating it he gave it to Johnnie and then proceeded to remove the license numbers from the car. "It's against the law, you know, to sell an automobile without taking off the license plates," he explained. "You will have to get numbers of your own."

Then, turning to Johnnie, he said, "Well, she's yours, and guaranteed to be in A1 condition. The gasoline tank is full and there is plenty of oil and water in her."

Johnnie and Ed jumped precipitately in and, with a hasty good-bye, sped away to a day of unalloyed delight. First they drove to the town hall, where they were fortunately able to register the car at once and to get the new license plates. Not once that day did the little car falter; and in the evening, after dinner, its performance won the unqualified approval and admiration of Johnnie's arstwhile skeptical family.

At last, dust-stained and tired, Johnnie backed the car into the barn for the night, and closed and locked the doors.

It was his intention to make an early start next morning for an all-day trip, but the strenuous excitement of the preceding day made him sleep late. It was nearly nine o'clock when he went out to the barn and eagerly opened the door. To his infinite dismay, the barn was empty! His automobile was gone!

He stood petrified for a moment in the doorway and then dashed wildly down the street. Ed was on the lookout for him, and one glance at Johnnie's face, together with his first words, told him the story.

"It's gone! S'olen!" burst from Johnnie's lips. "Come on with me."

And, with Ed at his heels, he made for Young's garage as fast as he could go.

"Hello, boys! What's all the excitement about?" demanded the proprietor as they dashed into the garage.

"My new automobile has been stolen!" Johnnie cried. "Have you seen anything of it or of Mr. Sprague?"

"Not since yesterday morning when you were all out in front. If you want my opinion, I'd say that when you get hold of this Mr. Harry Sprague you'll find your car."

"Do you think he stole it?"

"Well, all I know is that after he met you the first time he was in here asking a lot of questions about you: Who you were, where you lived, and if you had a place in which to keep a car. He seemed a bit too slick and too inquisitive."

"If only our car were repaired, we could go after him in that!" Ed exclaimed.

"I haven't got even a motor cycle now," Johnnie added ruefully, "or I would start out and look for him."

"Your motorcycle is here," put in Mr. Young. "Sprague left it as security for the garage bill he owes me. Ill let you have it for a day or two to help you out. And I think I can give you a tip on the direction to take; I heard this Sprague asking some chauffeurs about the best road out of town and they told him the Franklin Turnpike. Then he asked them where it went and a lot of other questions."

Johnnie waited to hear no more. Thanking the kindly proprietor, he jumped on the motorcycle, and Ed got up behind him.

"I guess we'd both better go home first and let 'em know what we're going to do," said Johnnie. "We may be gone several days, and we'll need to take some money with us."

Johnnie's father had gone to business, but his mother, though rather dubious of the outcome, helped him to get ready for the pursuit and supplied him with the necessary money. He and Ed made a small bundle of their things and strapped it on the motor cycle. Then they set forth full of hope.

Going through the town, they stopped at the police station, reported the theft of the automobile and received a promise from the sergeant in charge that the case would be "looked up" as soon as possible.

As Johnnie headed for the Franklin Turnpike he felt convinced that if he were ever to get his automobile back again he should have to find it himself.

Once on the smooth surface of the turnpike, the sturdy old motorcycle caried them along rapidly. At each town and village through which they passed, they sought news of the car, but without success.

When they had covered almost twenty miles they came to a long bridge over a shallow but wide stream. In order to avoid the jolting from the loose planks and to stretch their legs, which were cramped with long riding, they dismounted and walked across.

Johnnie was ahead, pushing the motorcycle, when Ed suddenly called to him and pointed excitedly down into the water.

"Look! There's an automobile license plate! Can you make out the number on it?"

"Yes, just as sure as you're born, it's one of my numbers that I got yesterday, and there's the other one farther out sticking in the mud. We're on the right trail all right. He has taken my license numbers off the car and put his own back on again."

"Do you know what his numbers are?" asked Ed as they remounted and rode on.

"No, I never noticed them," Johnnie answered. "I wish I had—it would have made it a lot easier to trace him. Anyway, we're certain that he came this way; probably he's making straight for Franklin. It's the only large town round this part of the state where he could stay for a time without attracting attention. We can get there before dark if nothing happens to this old gondola."

But fate was against them, for a few miles farther on a barricade of boards stretched across the road, and a large sign pointed the way to a detour.

The road became rough, and the motorcycle gasped painfully as they bumped along at a snail's pace. Coming to a steep hill, Johnnie tried to get a flying start for it and succeeded to climbing halfway before they lost all their momentum in going over an abrupt "thank-you-ma'am." When he tried to pick up speed again there was a sharp snap: the chain had broken.

"Thunder!" Johnnie exclaimed. "We're done for now!"

Ed looked somewhat relieved as he sprawled off the machine. "A few more miles of this road," said he, "and I should have been done for myself."

"Well, we'll have to push her," Johnnie announced as he disentangled the broken chain. "One of the links is broken, and I can't fix it here. If we can manage to find a garage or a blacksmith shop it won't take long to repair it."

But they trudged on and on, and, except for an occasional isolated farm house, no signs of human habitation appeared. The sun was getting low in the west, and soon the boys began to think more of finding food and shelter for the night than of getting the motorcycle repaired. At last they overtook a farmer on foot, driving a pair of horses before him.

"Howdy boys!" he said affably. "Your machine broken down?"

"Yes," answered Johnnie. "Can you tell us how far it is to the next village?"

"Wal, I reckon it's about four or five miles to Layton's Corners."

Noticing their obvious chagrin at the news, the farmer inquired, "Was ye calculatin' to put up thar for the night?"

"Well, we've got to find some place to spend the night," Johnnie replied. "Do you know of any place nearer? We're pretty much all in now."

The farmer ruminated for a moment and then said, "My place is jest a spell further on, and I guess we could make ye both comfortable, if ye feel like staying with us."

The boys gladly accepted his offer and followed the farmer, who presently turned in through a maple-bordered lane that led to a large, substantial farmhouse.

Their host, Tom Ryder, proved to be very genial, and when he had heard the story of their quest became at once their staunch friend. They went to bed that night satisfied with his assurance that he would help them repair the motor cycle in the morning.

But Johnnie and Ed opened their eyes the next morning on a rain-soaked world. Heavy mists hung low over the hills and the rain fell steadily. Tom Ryder shook his head to all Johnnie's anxious queries about the weather clearing.

"We might wait till this afternoon and then try it," began Johnnie.

"Ye won't get more'n a mile or two on that thar bicycle over these soakin' roads," said Tom Ryder, "before you'd break yer necks."

"And get drenched to the skin in the only clothes we've got with us," added Ed.

Noon brought no diminuation of the steady downpour. The gutters were now rivers, and every depression in the road had become a miniature lake of uncertain depth. Johnnie, gazing disconsolately out upon the inundated countryside, gave up all hope of continuing the pursuit of Sprague that day.

However, they repaired the motorcycle, thoroughly oiled and greased it, and then vented their surplus energy in chopping wood in the woodshed.

The gray day finally passed, and with evening the rain stopped and the stars came out—harbingers of fair weather. The next morning the sun shone down from a cloudless blue sky.

"Wal, good luck to ye, boys," said Tom Ryder when, after a hearty breakfast the boys wheeled the motor cycle out of the barn. "If ye come back this way stop in and let me know how ye've made out."

They thanked him heartily and started off. The roads were still very soft and muddy, and they made slow progress until they reached Layton's Corners where the detour ended and they came back upon the turnpike again. From there on they made good time and soon covered the remaining distance to Franklin.

Their first stop was at police headquarters. Several men were grouped in front of the brass railing inside and the police lieutenant was questioning one of them when Johnnie entered. He stood unnoticed and listened to the conversation.

"Describe the stolen car fully, Mr. Howe," the lieutenant was saying.

The man, who was middle-aged and prosperous-looking, said, "It was a wine-coloured Budd roadster, Model 25."

"And the motor number?"

Glancing at a piece of paper he held in his hand, Mr. Howe replied, "2002."

"Why, that's my car!" cried Johnnie loudly, advancing forthwith s raight to the desk. "I bought it three days ago from a man named Harry Sprague and here's the bill of sale for it."

The lieutenant stared at Johnnie, nonplussed for a moment, and then mechanically took the paper.

"It doesn't take a handwriting expert to see that this bill of sale was written by the same person who wrote yours, Mr. Howe, although they are signed by different names," he said. "They certainly describe the same automobile. It looks as if this young man had prior claim to the car as his receipt is dated previous to yours, Mr. Howe."

Mr. Howe looked rather perplexed at the unexpected turn of affairs, but after asking Johnnie a number of questions he said that he should be satisfied to take his chance of getting his money back when the thief was caught.

As Johnnie turned to go, a tall, heavily-built man intercepted him.

"Describe to me this fellow you call Harry Sprague; I think I perhaps know him," he said.

Johnnie readily gave him a thorough description of Sprague, and the man listened attentively, observing Johnnie all the while with keen, steel gray eyes.

"And what are you going to do now?" he asked, when Johnnie had finished.

"We're going to keep right on after him till we catch him and get the automobile back."

"How are you going to make him surrender the car if you do overtake him?"

"There are two of us," replied Johnnie significantly, a look of determination coming into his tanned face, "and I'm sure that either is a match for Sprague, once we get hold of him."

The man nodded approvingly. "Stick to it, and you'll run across him again; and when you do be sure and hold on to him and telephone the nearest police station; they'll be glad to get their hands on him."

"What do you know, Ed?" cried Johnnie. "Sprague has sold the car to someone else and stolen it back again.

Ed uttered an exclamation of astonishment, but this new development only served to whet his interest in the pursuit.

"Let's find the best roads running north from the town!" Johnnie exclaimed when they were outside. "Sprague certainly won't turn back in the direction from which he came, and he seems to stick to the good roads, where he can make the best time."

They found that there were two main roads leading out of Franklin in the direction they believed Sprague would take; as one of the roads was in bad repair, the boys unhesitatingly chose the other. The old motor cycle seemed to have caught something of the spirit of the chase, for it sped noisily along but steadily, mile after mile, without miss or mishap.

They sought constantly for tidings of the car and found several persons who were sure that they had seen it. But the first definite assurance that they had that they were on the right road came when they met a road inspector at a place where some workmen were making repairs.

Johnnie's oft-reiterated question brought a quick and decisive reply this time.

Mainly About People

Mrs. W. M. Saucier is at present the guest of her daughter, Mrs. Russell Millar, of Toronto.

Mrs. Geo. F. Droppo visited her sister, Mrs. Joseph Barrigar, of Winchester on Tuesday and Wednesday of this week.

Mrs. Fred Carter of Foam Lake, Sask., spent a couple of days last week with her aunt, Mrs. S. M. Henderson, in town.

Mr. and Mrs. Richard Cramer, who have been residents of Chesterville for many years, left this week to take up residence at Morrisburg.

Mrs. H. Leblanc, who has been in Toronto with her sister, Mrs. Miller during the past couple of months, returned to town this week.

Reports from the Ottawa Civic hospital are that Mr. G. J. Hunt and Mrs. Orval Colquhoun, who have both undergone serious operations, are making satisfactory progress toward complete recovery.

Mr. I. A. Striffler, who has been on the laboratory staff of the Nestlé's Milk Products Co., at the local plant for the past five years, left last week end for Marysville, Ohio, where he has been promoted to the control laboratory.

The Misses Kay and Edith Hunt of Toronto, who arrived home Monday to visit their father in the hospital were called to Lanark to attend the funeral of their grandmother, the late Mrs. Robertson of that place, whose death took place the first of the week.

Visitors at the home of Mr. and Mrs. Billie Hummel oper the week end were: Mrs. Schlievert of Kirkland Lake, Mr. and Mrs. J. Howard Crawford of Ottawa, Mr. and Mrs. Harry M. Henderson, Mr. and Mrs. Ralph Hummel, Ms. Gordon Cumming and Mrs. F. D. Douglas of town.

IN MEMORIAM

Fetterly—In loving memory of Garnet Fetterly, who fell asleep in Jesus April 11th, 1934, aged 4 years, 11 months and 11 days.
Sadly missed by Father, Mother, Brother and Sister and Grandparents.

IN MEMORIAM

Clark—In memory of a loving husband and father, James Clark, who passed away April 1st, 1934.
Shel ered by the rock of ages,
Anchored on that golden shore,
In the loving arms of Jesus
He is safe for ever more.
—Ever remembered by his Wife and Family.

Riverside

Mr. Bruce McIntosh, Miss Audrey McIntosh and Miss Margaret O'Donohue spent the past week end with friends in Montreal.

Mrs. S. Hutt spent Wednesday and Thursday with Mrs. R. C. Bogart.

The Misses Cassie and Theresa Droppo and Mr. Hosea Droppo were week-end visitors at the home of Mr. Dan Pollock.

A number from here attended the oyster supper in the Community Hall, Berwick, Friday night for the hockey boys.

Mr. and Mrs. Fay M. Droppo and family visited the latter's parental home at the week end.

Mrs. Mills Foster spent the week end with friends in Cornwall.

The members of the Women's Missionary Society of St. Paul's United church, Berwick, met at the home of Mrs. Robert Bogart on Wednesday and pieced two quilts to be sent to the West in the near future. Rev. H. and Mrs. Beach of Finch were also present.

Mrs. Jack McPhee and son Donnie visited Mr. and Mrs. Robt. C. Bogart over the week end.

Mr. R. C. Bogart was in Cornwall on Tuesday.

Mr. Eaner Hanson visited friends in Cornwall at the week end.

Miss Isabel McMillan visited Mrs. Dan Pollock on Tuesday.

A very stout actor was late for rehearsal one morning and the producer was annoyed. He asked, "Does anyone know where Blank is?"

"Yes," said one of Blank's friends. "He's gone to the tailor to get measured for a suit."

"Measured!" shouted the producer. "You mean surveyed, don't you?"

Judge: "What were you doing at that roadhouse when it was raided?"

Locksmith: "I was making a bolt for the door."

River Ice Dynamited To Safeguard C.P.R. Bridge

Precaution Taken Monday For Fear Ice Lodging Against Structure. Danger of Any Flood Past.

In anticipation of a heavy flow of water, the ice jam in the Nation near the railway bridge was dynamited on Monday afternoon clearing the way for any rush which might come from up stream, but which up to the present has not materialized in this section. The water is at a very much lower point at present than is usual at this time of year and with the snow practically all gone from the fields it is hardly likely to cause any inconvenience this season. Bright sunshine and some thawing with considerable frost at night is reported to have caused good flows of sap and made the syrup season a successful one for many throughout the district.

"Father," said the small boy, "what is psychology?"

"Psychology, my boy, is a word of four syllables that you ring in to distract attention when the explaining gets difficult."

Mr.: "When I read about some of these wonderful inventions of electricity it makes me think a li tle."

Mrs.: "Yes; isn't it wonderful what electricity can do?"

Brown sent his junior clerk for the tenth time to collect the money for a bill which was long overdue.

The youth returned to the office very quickly.

"Well, what about the money?" asked the boss. "Did Smith pay?"

The clerk shook his head.

"What's he going to do about it?" went on the other.

"He said, 'Go back and tell Brown that if he sends you back any more I'll wring your neck,'" the young man nervously told him.

"Go back at once!" snapped Brown hotly, "and tell him that that won't frighten me!"

Fire Insurance

Insuring Mercantile, Manufacturing
Residential and Farm Property

One year instead of Three Years

Farmers insuring in our companies have now the option of insuring for one year instead of three years, owing to low prices of farm produce, and consequent scarcity of money. This may be to your advantage until conditions improve.
