MORRISBURG — ONTARIO

Eastern Ontario Unanimously Endorse Sir Adam Beck in Power Development

Good news for the people of Eastern Ontario, who use, or want to use Hydro-Electric power, was given last night at Prescott by Sir Adam Beck, the Power Knight of Ontario, who announced to a loudly enthusiastic meeting, that in the past the Commission has saved to the people of Ontario \$100,000,000, and that the Commission was able to announce a reduction of rate to 150 municipalities, including many of those along the St. Lawrence.

Another welcome announcement of Sir Adam was that in an interview at Ottawa, yesterday, with the Hon. Geo. P. Graham and Hon. Chas. Stewart, these two Federal Ministers readily conceded on behalf of the Federal Government to Ontario, her full right to, and control over the water powers in her navigable streams. This was important as showing the King Government meant business.

Sir Adam made it known too that the Commission had registered plans for the Morrisburg project as submitted to the Federal Government which was equivalent to the expropriation or condemnation of the property necessary for the project. A strong appeal was made by Sir Adam to the Federal Government to approve of the Commission's plan so that work could be begun soon. It would require 4 years to complete the project after the necessary consents are received from the Dominion and U. S. Governments. That project would supply 350,000 H. P. on the Canadian side at Morrisburg alone, at an estimated cost of \$40,000,000. The same applies to the U. S. side of the river.

The Hydro-Electric Commission proposes to save the Dominion Government \$15,000,000 by construction of the power dam at Morrisburg which will take the place of the proposed regulating dam suggested by the Engineers of the Dominion and U. S. Governments, to the International Joint Commission in the Report made in 1921. The Commission will also provide a navigation lock in the dam for 25 or 30 feet.

Sir Adam pointed out that the demand for electric energy was running ahead faster than developments could be made, and in the Niagara, St. Lawrence and Ottawa Rivers there was less than 3,000,000 H. P. in eight. This will only carry the Province of Ontario on for another 15 years or less at the present rate of power consumption which is increasing at the rate of about 15 per cent. a year.

In 1922 the increase of load carried by the Hydro-Electric Power Commission was 104,000 H.P., and in 1923 it was 120,000 H.P. The total load now carried by the Hydro-Electric Commission is 750,000 H.P. which will be up to 900,000 H. P. by the end of the present year. The Hydro-Electric Commission is 750,000 H.P. which will be up to 900,000 H.P. by the end of the present year. The Hydro-Electric Commission favors a 2-stage plan of development with the first dam at Morrisburg and the second at the Long Sault, which will avoid the flooding of 29,000 acres of land and sixteen cemeteries, which was proposed by the Government Engineers in their report favoring the single stage development (Bowden-Wooten report) to the International Joint Commission in 1921.

In outlining the project Sir Adam said: Our plan is to connect the mighty Niagara System with the mighty St. Lawrence and Ottawa systems. We want to create in Ontario just what the people of New England want to create, a Super-Power System to carry 3,000,000 H. P. As for power export, "God forbid that one horse power, that we need for ourselves should go out of Ontario."

The people of Ontario have eliminated private capital and enterprise for the supply of power, and they mean to go on with it. Condemning the contract of the Quebec Government to permit of the export to the U. S. of 1,000,000 H. P. Sir Adam said "I do not know how we, as Canadians are going to get it back. Let Ontario have some of that power. It is worth millions a year to us. It is being given to the U. S. for a paltry rental."

Sir Adam said, if the project which we are attempting to launch on this river is made available, you will have 20 per cent to 25 per cent. cheaper power for industry than we have from the mighty Niagara System. The St. Lawrence River would also become an ocean waterway instead of a lake waterway. The Hydro-electric Commission has spent \$300,000 to date investigating the power possibilities on the upper St. Lawrence at Morrisburg, and an appropriation of \$1,500,000 has been made ready for commencing the work. The flow of the river will be regulated at the Morrisburg dam and the low flow increased 20,000 cubic feet per second by holding back the high flow and storing the water in Lake Ontario. This will raise the water in Montreal Harbour from 18 inches to 3 feet during the period of regulation, and increase the carrying capacity of ocean liners coming to Montreal proportionately.

Sir Adam said Canadian Engi-

MRS CATHERINE C. ADAMS

A lady, whose life has been a beautiful example of fidelity and faith, in the person of Mrs. Catherine Carman Adams, passed peacefully to her eternal reward at the residence of her son, Mr. Richard Passmore Adams, London, on Wednesday, June 4th. The remains were conveyed to Morrisburg arriving Thursday. The funeral service was conducted at St. James Church on Friday by Ven. Archdeacon Carson, and interment was made in St. James cemetery.

The late Mrs. Adams was 67 years of age, widow of the late Richard Passmore Adams of Terrington, North Devon, Eng. She was born in the County of Dundas, and with the exception of the last few years, had resided practically all her life in Morrisburg.

Her kind and affectionate nature endeared her to a large circle of friends in this community who extend sincere sympathy to the bereaved members of the family.

She leaves to mourn, one son, Mr. Richard Passmore Adams of London, Ont.; and one sister, Mrs. H. H. Bradfield of Morrisburg.

MR. JOHN MOORE

The residents of Morrisburg were again reminded of the uncertainty of life, when it became known that Mr. John Moore had passed away. Having spent all his life in the village, John was well known to the people generally, and being of a kindly disposition, will be greatly missed by many, being ever ready to lend a helping hand where needed. Though in poor health since he underwent an operation twelve years ago, he had endeavored to be about as usual, until the day of his death. John bore his long illness in a beautiful spirit, without complaint. Many of his answers to inquiries as to his health were whimsically cheerful, showing an heroic character. The funeral service was conducted at his late residence, by Rev. Mr. Lawson. He leaves to mourn his loss, six sisters.

On April 8th, his mother, Mrs. Lucy Adelaide Moore, widow of the late David Moore, one of Morrisburg's most highly respected citizens passed away. Though not as rugged as in former years, Mrs. Moore enjoyed good health up to within two weeks of her death, when she rapidly grew weaker and finally passed peacefully away at the age of 77 years. Mrs. Moore was a consistent member of the Methodist Church, and though of a quiet, unobtrusive nature, won many friends and was loved by those who knew her. Her sphere was in the home and it was known as one in which love, harmony and good will radiated from and around herself. She left to mourn her loss, one son, six daughters and four grandchildren.

MISS FANNIE J. WARREN

Miss Fannie J. Warren passed away at the Cornwall General Hospital on Monday June 3rd after a few days' illness. Miss Warren was well known in this vicinity where she had spent the most of her life. She was born at Archer about 66 years ago and leaves three brothers, Archie of Morrisburg, John of Archer and Amos of Crofts Island; also a number of nieces and nephews.

The funeral was held at Colquhoun's Church on Wednesday, June 4th. Rev. Cameron of Ottawa preached the sermon taking as his text, "To Depart and Be with Christ which is far better."

ers would design and carry out the work.

At a preliminary meeting held in the town hall, Prescott, at 4 p.m., the organization was formed, to be known as the Eastern Ontario Municipal Power Union. The following officers were elected:—

Pres.—Mayor Reynolds, Brockville.

Sec.—Treas.—Mr. Farquharson of Brockville.

Executive—A. C. Casselman, Prescott; Geo. H. Challies, Morrisburg; J. M. Dobbie, Brockville; W. D. Holmes, Athens; W. J. Wilson of Perth.

County Representatives—Dundas, N. W. Beach; Glengarry R. T. Nicholson; Stormont, A. C. Fetterly; Grenville, P. McCarty; Leeds, G. C. Cumming; Frontenac, M. Campbell; Prescott, E. O. Bertrand; Russell, M. P. Lachapelle; Renfrew, A. Munro; Lanark, W. A. Nicholas; Carleton, H. Craig; Renfrew, D. Barr.

It was decided to hold public meetings periodically at different points in Eastern Ontario during the summer to promote the interests of power development.

The following resolution was unanimously adopted:—

"That this meeting go on record as supporting public ownership of our water powers, and also in favor of these powers being under the jurisdiction of the Ontario Hydro Electric Power Commission, especially as proposed for Eastern Ontario, and the work be started at the earliest possible date."

MASTER SIX 24-41

The New Master Six Double Service Sedan

HERE is a practical, comfortable and economical closed car for five passengers, built for strenuous, everyday, business service, yet eminently appropriate for family motoring. Notwithstanding its low cost, this double service Sedan is equipped with the new, more powerful, automatically lubricated McLaughlin-Buick Motor, the well-balanced, 120-inch wheelbase chassis, the new tested 4-wheel brakes and every other mechanical feature which has made the 1924 models of "Canada's Standard Car" the season's outstanding values.

For the
Boys and Girls

JUST PICK YOURSELF UP
AND GO ON.

This morning you hurried along on your way,
So eager were you to get out to your play,
Not seeing the stone that lay right in your path
Till down you fell, plump, while you sputtered in wrath.
But did you lie there till the play hour was gone?
Not you. You just picked yourself up and went on.
In life as in play, you will find it the same
As you hurry along to take part in the game.
You will stumble and fall where some hidden stone lies
And rest there a bit, in indignant surprise.
But will you stay down till the players are gone?
No, indeed. You must pick yourself up and go on.

—By F. Jones Hadly.

HOLE BALL IS A GAME RUSSIAN BOYS PLAY.

This is a good game to play in a

meadow or backyard if a "keep off the grass" warning does not prevent the digging of holes in the ground. There should be as many holes as there are players, each hole having a number. The hole is big enough to form a cup into which a tennis, golf, or baseball may be thrown.

Each player should draw a number. The players throw from a straight line drawn ten feet from the first hole. Count out to see who shall be the first thrower. The hole into which the ball goes counts as many points for the player as the number of the hole indicates.

Suppose the ball goes into hole five—that means that the player receives five points. It means also that the player holding number five must play next. If this player's ball lands in hole two, his score for the play is two, and the player holding the two number is next to cast the ball.

When a player fails to score, the next one to play is decided by counting out. Continue playing until someone reaches the grand score, which may be either twenty-five or fifty.

LONDON IN AERIAL AGE SEEN AS CITY OF ROOFED STREETS

Prof. A. M. Low, the distinguished London University philosopher, who besides possessing great learning has the vision which permits him to make application of scientific principles to the needs of everyday life, has been speculating on the changes to be wrought in London's life as the airplane becomes more popular.

Here are the high spots in his vision of London in the new air age:

Safe, swift airplanes in the near future at a cost not exceeding \$300.

Airplanes capable of landing in a space not much larger than their own dimensions.

Abolishment of London's parks in order to supply landing fields.

Roofs ultimately to be placed over all principal streets to afford landing facilities.

Traffic regulations to prevent overcrowding of machines in the air.

Wireless control of airplanes.

Ultimate establishment of cables so that airplanes and motorcars can travel along without gasoline, drawing their power electrically from cables.

Question of Improvements.

"We are not far," said Prof. Low,

Dusty hands are germ-carriers

Everywhere, every day, the hands are touching things covered with dust.

Countless times those dust-laden hands touch the face and the lips in the course of a day.

Consider—dust is a source of infection and danger.

Lifebuoy Protects

Take no chances—cleanse your hands frequently with the rich, creamy lather of Lifebuoy. Lifebuoy contains a wonderful health ingredient which goes deep down into the pores of the skin, purifying them of any lurking infection.

The clean, antiseptic odour vanishes in a few seconds, but the protection of Lifebuoy remains.

NATURAL RESOURCES AND MANUFACTURE

Development and Production Advancing Side by Side in Canada.

In Canada the development of natural resources and the advance of manufacture are closely related. The rapid settlement of the Prairie Provinces, and the invasion of the pulpwood forest—the two most prominent features of Canadian development during the present century—have been outstanding but at the same time not the only lines upon which this country has advanced, says the Natural Resources Intelligence Service of the Department of the Interior.

The general development for manufacturing forms, in itself, an impressive record, entirely aside from the growth which has and is taking place in the pulp and paper-making industries.

A wealth of figures might be marshalled to illustrate the growth of manufacturing within the past twenty years or so. For instance, the total value of goods manufactured in Canada, as reported in 1920, was more than eight times as great as the census returns show for 1900. Such statistics merely suggest the extent of progress. Owing to the variations in census methods, the rise in prices and so on, they give a rather exaggerated measure of growth. Taking the other extreme—the most conservative test—the number of persons reported as being engaged in manufacturing pursuits doubled in the twenty-year period.

The exact extent of growth, however, is not the only consideration. It is equally important to note that the progress has been well distributed geographically and otherwise. It is true that both Montreal and Toronto—Canada's great industrial centres—reported more capital invested in manufacturing in 1920 than was shown for the whole country in 1900; but the smaller cities have not been eclipsed. Twenty years ago only four cities in the Dominion were credited with a manufacturing output of a value exceeding ten million dollars, whereas, in the latest returns, over fifty cities equalled that figure, about thirty doubled and nineteen trebled it.

Not only geographically but in the nature of enterprise as well has Canadian manufacturing growth been widely distributed. No one or two classes of industry have entirely outstripped the others. The industries producing textile and metal and chemical goods, as well as those finishing vegetable, animal and wood products, have shown excellent progress. For instance, the industries manufacturing vegetable products such as flour, sugar and tobacco, took first place in 1920 in point of gross value of output, but the iron and steel industries led in number of persons employed, while the wood and paper group surpassed all others with respect to the net value added to the raw materials by manufacturing processes.

self—that of overcrowding in the air and collisions.

"That, however, is a problem which could easily be dealt with by wireless control. Already small electric powers can be transmitted over air gaps. It is not unreasonable to suppose that those powers can be greatly increased. We may therefore look forward to the time when airplanes and motors can travel along without petrol, drawing their power electrically from cables under the earth or sea and measuring the power they use by meter.

"Such a cable would itself form a definite airway. Airplanes could travel over it in fixed airways at a fixed height. Night flying would lose half its terrors and fogs would be of no account since the pilot would be automatically guided to his destination."

Practical experience shows us that those whose lives are mainly drudgery spend their leisure least well.

Mr. H. S. Dennison.

Minard's Liniment Heals Cuts.

NOTED MEN'S NAMES WRITTEN IN BRITISH SOLDIERS' ALBUM

The British Legion Album, just published, is a book of unique interest, says a London despatch. No such volume has ever been produced before, and the proceeds of the sale will be devoted to the benefit of British ex-service men of all ranks.

It contains a collection, which has never been paralleled, of autographs and passages written in their own hand by the most famous people of the day and by representative leaders in every department of human activity. Numerous illustrations, cartoons and caricatures, many of them in colors, add to the lure of the book.

There is a foreword by Field Marshal Earl Haig, of Bemerseyde, reminding all that by "readiness to help living ex-service men, the depth and sincerity of our respect and gratitude toward the dead; toward fallen comrades of ours, who, dying, left homes and dear ones destitute; toward those gallant lads who fell on the threshold of life can best be manifested."

All the greatest admirals and generals, British and allied, who fought in the war, have contributed their signatures. Lord Ypres affixed his autograph on the battlefield of the Marne in September, 1922, on the occasion of the celebration of the Marne victory.

The variety of factors that have impelled explain the breadth and balance that have marked the growth of manufacture.

First, the settlement of the prairies gave a powerful impetus to countless industries—producing a huge supply of raw materials for flour mills, packing plants and other industries finishing farm products, and at the same time creating a large new market for the machinery, textile, rubber, leather, furniture, and other factories of Eastern Canada. The influence of this prairie market has radiated in every direction. The purchasing power of the western sales territory is studied with the keenest eye by the manufacturers of almost everything from plows to pianos.

Secondly, the rise of manufacturing in the Dominion owes much to the wonderful advances made since the opening of the century in the use of electric power. The advances along these lines have enabled Canada to realize upon her unexcelled water-power resources, and hydro-electric power has proved a unique asset. Since 1900 the total water-power harnessed has increased from about 150,000 to nearly 3,000,000 horsepower, serving a variety of uses that touch practically the whole field of manufacturing industry. Not only is the investment in electric light and power enterprise in Canada greater than in any other branch of manufacture but, further, every large extension of water-power development has brought in its train a series of subsidiary industries.

Added to the opening of the West and the Dominion's happy position with regard to hydraulic resources, two other factors of primary importance have contributed to the advance in manufacture. One is the influence of American industries in establishing branch factories in the Dominion. The growing value of the Canadian market, the advantage of location for trade with other parts of the British Empire, the availability of raw materials, and so on, have drawn hundreds of industries of American parentage. Such subsidiary concerns, backed by the capital, experience and directing force of strong parent companies, have given the ranks of Canadian manufacturing industry many of its most valuable recruits.

Again, the war with its multiple demands tested the resourcefulness of Canadian initiative as never before, and revealed an unexpected capacity for complex and specialized manufacture. Some of the new industries then created have been able to survive under peace-time trade conditions, but the net result has been a permanent gain of no small importance in the diversifying of Canadian mill and factory output.

The Infant Flapper.

A small boy who was the youngest of a large family accompanied his mother to see his married sister's new baby. After barely glancing at the baby he wandered idly round the room; soon he became absorbed in the contents of the baby's basket.

After turning over the various dainty trifles that it contained he picked up a powder puff. Turning to his sister, he said in shocked tones: "Isn't she rather young for that sort of thing?"

Minard's Liniment for Dandruff.

Irish Logic.

An Irishman wanted to send a telegram to a friend. The clerk told him the charge would be 1s. 9d.

"An' how do ye make that out?" asked Paddy.

"A shilling for the wire and ninepence for delivery outside the radius," answered the clerk.

"That be hanged!" retorted Paddy; "ye send the telegram an' I'll write an' ask my friend to call for it."

MUSIC AND THE TOMBS OF KINGS

From the Valley of the Kings in upper Egypt, while exploration of the recently discovered tomb of Tutankhamen has been yielding new revelations of the culture as well as the power of the Pharaohs, may yet come some monumental disclosure for the musical historian. Press dispatches from Luxor, describing daily the objects removed from the tomb, and brought to the light of day after four thousand years, have had a few references to musical instruments, flutes, harps, and cimbals, as among the objects thus uncovered. "Evidently," ran one line of comment, "the king was musical."

That Egypt was the musical schoolmaster of the ancient world is conceded by all who have traced the art back through the centuries. The Jews in their period of bondage sat at the feet of the musicians of the Nile, and learned much of what was later brought to flowering in the time of Solomon and the Temple, when 4,000 musicians participated in ritualistic services. It is known that there was a popular as well as a sacerdotal music among the Nile people; indeed, it is to be presumed that there, as elsewhere, music began with the people rather than with the priests. The character of the instruments used has long been known, not only from ancient carvings, but from examination of the instruments themselves.

As to the nature of the music sung and played in the dawning of history there can be only conjecture, guided somewhat by the traditional airs of the Jews, and some other music believed to be of the ancient East. So far as research has been able to establish, musical notation was unknown and melodies were passed on from individual to individual, and from memory to memory. This is difficult to reconcile with the advancement and the high intelligence of the Egyptians. Scientists and art experts at the tomb of Tutankhamen have been particularly impressed by the utility, as well as the beauty of objects unearthed there recently, and have become convinced that Egyptian civilization reached its zenith much earlier than has been recognized.

If, in the course of further delving, one written phrase of Egyptian music can be found and deciphered, the discovery will be one of far more significance and world profit than the uncovering of another mummy of another king, the probability now exciting the tourists who, it is said, are crowding the hotels at Luxor. Life can never be restored to a mummy, but music once written down never really dies, though it may be neglected through countless centuries. It is there, to speak again, whenever one who knows its language goes to it for its message.

Even without a note of written music from ancient Egypt known to be in existence, the possibility remains that in the store of melody of unknown origin which has come down to the Western world through the Jews, there remains some fragment that would have been as an old song to King Tutankhamen.

Five million people in the United States are unable to read or write.

CHEVROLET

—is easily within the reach of all

NEVER before in the history of the automobile industry has such car value been possible. And it is possible now, only because the Chevrolet Car and Chevrolet business principles have been so universally and so favorably received. Chevrolet production has, as a result, rapidly grown in volume until now Chevrolet is the world's largest manufacturer of quality automobiles.

Chevrolet quality is more than apparent. For, the more closely Chevrolet is examined and the more severe the tests demanded, the more convincingly is Chevrolet quality demonstrated and proved.

Moreover, day by day continuous service brings out another economy equal, if not greater in importance, than Chevrolet's remarkably low first cost. Chevrolet is more economical to operate than any other car built, and its maintenance cost is the lowest in the world.

Investigate Chevrolet yourself. Have us demonstrate the model that suits your needs. We can arrange terms that will surely fit your circumstances.

ADVANTAGES OF THE SILO.

One of the chief advantages of the silo is that in many cases it enables withholding stock from the pastures until the grass and the weather conditions are favorable. Never a spring goes by but sacrifices have to be made in the condition of the stock as well as the pastures, by emptying the stables at too early a date. The feed supplies become exhausted, hay and other feed is relatively dear to purchase, and there is nothing for it but to turn out the stock. If one has a silo, it follows that bulky crops will be grown, and as these are preserved without loss, the available supply of feed for the winter months is greatly increased. It would be difficult to estimate accurately the increase of stock that can be carried on a given acreage by the addition of a silo and the growing of silage crops. The advantage lies, not so much in keeping a greater number of animals, but in keeping better those that one has.

Where corn can be grown at all successfully, there is no other crop equal to it for the making of silage. Before deciding that this crop cannot be grown satisfactorily, a careful test should be made, because corn has been so improved in recent years that the experience of the past does not justify a decision for the future. If, however, it is proved that corn of the earlier varieties is not a success, then one can fall back on a mixture of oats, peas, and vetches, or sunflowers, or on such crops classified as clovers.

For cattle feeding, roots were for many years the succulent winter feed used. With the introduction of the silo and the growing of corn, it was soon learned that labor cost was greatly reduced. Besides this, there is the advantage of better thrift in ensilage fed cattle, as well as reduced labor in preparing the feed. Pamphlet No. 35, "Silage and Silo Construction for the Maritime Provinces," records that steers fed ensilage at the Fredericton Experimental Station, made a profit of \$15.32 more per head than those fed on roots as the succulent portion of the ration. The advantages of the silo are equally great for dairy cattle. At this season of the year when next winter's stock rations must be provided for, it is well to consider whether or not one can afford to be without a silo. Even under the best systems of feeding the profits are little enough. By the use of silage, greater profits are undoubtedly made possible, whatever crop is to be grown for the silo.

There are certain essential factors

necessary in silo construction. These are strength, smoothness of interior, the absence of angles on the inside, and durability. Of the popular types, the stave silo is the most easily and quickly erected, and when given a permanent roof and the hoops kept tight in the summer, it is fairly satisfactory. The concrete silo with walls reinforced by half-inch rods, has the advantage of being permanent. This silo is perhaps the most popular where it can be afforded. It can be constructed by ordinary farm labor. Cement blocks and vitrified tile are also found satisfactory. These several styles of silo are described, and complete instructions for the building of the stave silo, with illustrations, are given in the pamphlet in question, available at the Publications Branch of the Department of Agriculture at Ottawa.

DID YOUR CLOVER KILL OUT THIS SPRING?

If it did, you had better write the Department of Chemistry, Ontario Agricultural College, Guelph, for directions for taking a sample of your soil to discover the reason.

Reports from some districts this year show a good deal of winter wheat and clover killed out, states the Department of Chemistry, O.A.C. This is highly undesirable and can be prevented by the use of lime and acid phosphate applied with the crop on which the clover is seeded. In some cases lime is not necessary for the soil is not acid, but where acidity occurs lime is very essential. Phosphorus is a great root farmer and it is the strong, deep-rooted clover and wheat plant that withstands the alternate freezing and thawing of spring weather.

In answer to a circular sent out this spring to the twenty-five co-operative experimenters handling our Lime Phosphate Experiment, the majority report that the clover on the half acre which received crushed limestone and acid phosphate in the fall of 1922 is in perfect shape, while in many cases the untreated section did not winter nearly as well and in one or two cases will have to be plowed up.

If seeding is done with spring grain it is good business to use acid phosphate at the rate of at least 300 pounds per acre, and preferably 400. If the soil is acid, lime is also necessary to give a strongly rooted clover and alfalfa which will carry it over the first winter—the most critical period of the life of the plant.

Farmers in New Neighborhoods

BY HILDA RICHMOND.

When a man moves into a new community, particularly if he moves in from another province or a distant county, there are several things he should attend to without delay. Indeed, there are some things that he should attend to before he leaves his old home in order to begin right in the new one. One of these is to get letters of introduction and recommendation from the bank with which he has always done business, from the pastor of the church he attends, and from several of the leading business men.

When he arrives at his new home, he leaves the letters of introduction with the bank and the church and at once establishes his identity and his standing. This is more important than many people consider it. It may help in time of emergency and, if the emergency never arises, it gives the newcomer a fine start in every way. It shows that he did not have to slink away from his old home; and though he may be worth little in this world's goods, if he can show good recommendations as to character and integrity he is at once gets in touch with good people in his new neighborhood.

DOES THE POSTMASTER KNOW YOUR ADDRESS?

His name and the exact location of his farm should be given at once to the telephone and telegraph offices. Many people neglect this, saying: "We do not expect any messages." But no one knows what calamity, sickness or important business may make it necessary for friends or strangers to look him up.

I used to work in the post office, and it was amazing to see how many death notices and letters and telephone messages were not delivered until too late, because of lack of address. Once a telegram came for John Brown; and, after exhausting all their resources, the authorities put the customary notice in the post office expecting that John Brown would prove to be a commercial salesman and would call soon. It turned out that the owner of the telegram was the nephew and hired man of a newcomer in a neighborhood some miles from town. His mother was buried two days before he received the notice of her death.

Just a little common sense would have prevented the tragedy for that young fellow who missed a last sight

of his mother; but nobody had thought it worth while to announce immediately the arrival in the county of one new family.

LOOK UP A GOOD DOCTOR.

Another wise precaution is to hunt up and get acquainted with a good doctor, as soon as you are located. If the family is healthy and there has been no need of a doctor's services for years past, no harm will be done; and if an emergency arises, the family will have reason to thank its lucky stars that it knows where to apply instantly for medical aid. It isn't necessary to take up an hour of a busy doctor's time announcing one's intentions or giving a lengthy history of the family, but it is well to get acquainted and make a note of the telephone number and the location of the doctor's office.

After getting settled, write to the folks "back home" and tell them the exact location of your farm, your telephone number, rural route, and various other items, so that telephone calls and mail need not be delayed. If you have a common name like John Smith or John Jones, it is well to tell your postmaster that your mail is likely to come from certain towns. Then if your friends neglect to put the correct address on the letters, every other John Smith and John Jones will not finger your mail over first and delay it.

A young man once came breezily into the post office to inform me that he had received a letter that did not belong to him, and upon being asked to produce the letter he said it did not amount to anything so he had destroyed it. Of course it did not amount to anything to him, but the right John Smith was very much disturbed when he heard of it. It happened to be a letter from his best girl.

If it is spring, the local dealer who handles repairs for the make of machinery on the farm of the newcomer should be hunted up. An unnecessary delay in corn-planting time means much; and so does stopping to hunt repairs for the harrow or the disk when work is pressing. Getting in touch with the huckster is also advisable in order easily to get groceries in the busy season and to be able to market eggs frequently in hot weather.

Last, but not least, hunt up the church of your choice without waiting for a busy minister to guess that

you intend, some day, to identify yourself with his flock. Finally, subscribe for the local paper.

If you show yourself friendly and anxious to identify yourself and your family with all local interests, you will soon feel well acquainted, and ten to one the ladies of the family will like the new home instead of pining for the old one.

Home-Grown Mangel Seed Best.

In the average results for ten years at the Ontario Agricultural College, very careful field tests show that our home grown mangel seed gave an average percentage of germination from the clusters of 119 per cent, while in the average of the same ten years the imported seed obtained through three of the leading seed houses gave 77, 77 and 76 per cent. We have not obtained imported seed from any source which has given us as high a percentage of germination over a series of years as we have obtained from the seed produced at Guelph.

If farmers who have some good mangels stored in their root cellars, would next spring, when the growth of vegetation is starting, plant these on a piece of well-tilled land, they would be able to grow seed for home use. As near perfect roots as possible should be selected and these should be planted about thirty inches apart each way. We have occasionally obtained as high as a pound of seed per plant, but this is exceptional and it would not be wise to count on more than from four to eight ounces of seed per plant on the average. By transplanting from fifty to one hundred plants in the spring, a nice quantity of seed should be obtained. This would greatly help out the situation in furnishing home grown seed and in showing what can be done in seed production in different localities throughout the whole province.

Nitrate of Soda Helps in Cold Springs.

In such a season as this, cold and wet, the greatest need of the plant is for nitrates, says the Department of Chemistry, Ontario Agricultural College, Guelph. The ground is so cold and wet that it takes a long time to warm up and as a result bacterial activity is at a low ebb. As a result no nitrates are being formed in the soil and plants cannot make vegetative growth.

To correct this and enable the plant to get away to a good start, apply nitrate of soda one hundred pounds to one hundred and fifty pounds per acre at once. If bought in lots of several hundred pounds it can be obtained at a reasonable price and its benefit is almost certain. Do not, however, apply if heavy rain threatens, as it is soluble and will be lost by washing.

Another benefit which will be derived is this. The nitrate of soda dissolves in the soil water and soaks down into the soil. The roots go after it and hence the result is a deeper rooted plant more able to withstand the period of drouth which so often follows a wet seed time.

Silage Crops.

Where corn cannot be grown satisfactorily, a mixed crop of oats, peas, and vetches has proved to be a very suitable mixture for the making of silage. The ensilage from these crops has high feeding value, containing, for example, twice as much protein as either corn or sunflowers. Corn, on the other hand, where it does well, is to be preferred on account of the very much greater weight of crop that can be grown per acre. In sections where the corn crop is doubtful, it is well, therefore to put in some acres of the cereal mixture. This mixed crop has the advantage of being suitable either for silo or for the making of hay, or it even may be allowed to ripen for threshing. When it is to be put in the silo, it must be cut very fine, spread evenly, and well tramped. The keeping quality is greatly improved also by adding plenty of water as the filling proceeds. Unless this is done, the stems being hollow do not pack closely and are almost sure to mould during the curing process. Pamphlet No. 35 of the Department of Agriculture at Ottawa, available at the Publications Branch, goes fully into silage crops, describes the various popular silos, including the construction of the stave silo.

False economy is the hole in the pasture fence.

When stung by a bee, I always remove the stinger and rub the spot with lard. Try this.—J. M. K.

HORSE.

We know that a wide variety of feeds is absolutely essential with cows and poultry for high production of milk and eggs. Also that it is necessary for the best growth of pigs, calves and other young animals.

The work horse does not produce foods directly, like the cow or hen, but he certainly lends a hand in making crops. And he, too, needs a varied diet to do his best.

When hard at work in the hot fields the horse puffs and sweats. With every extra puff of breath and every extra drop of sweat he is burning up, not one or two, but half a dozen or more chemical compounds. And if a variety of feeds is not supplied to refill and refurbish the animal's body, he will either become weak or lose flesh; sometimes both.

A poor farmer driving a poor horse with a whip. A progressive neighbor and good horseman remarks, "It is not a whip but more hay and oats the horse needs." How true! Yet many horsemen attempt to make their teams do more with a whip, though feeding them only a narrow ration of timothy hay and corn during the heavy working season.

One of the best farmers we know, who has fine horses and gets the best kind of work from them, and keeps them "fat" throughout the year, feeds a varied ration during the working seasons. In addition to timothy, he feeds them some clover or alfalfa hay. Besides corn, he always gives his working team some oats, with a little bran or shorts, occasionally a dash of linseed-oil meal.

Some men will not allow their work horses to touch green grass, declaring it will make them soft, or cause them to lose their wind.

To those of us who know how much good a little green grass does a work horse, in connection with heavy dry feeds, depriving a hungry work horse of this appetizing necessity is hard to understand.

Many of the best farmers let their work teams out to pasture at nights, because of the better air of the pasture and so that the work animals may secure vitalizing green feeds to mix with the dry ones they eat throughout the day.

Good farmers and kindly horsemen have always known in a practical way the benefit of green matter with dry to the well-being of all animals. Vitamin discoveries and scientific proof of this knowledge.

Many work horses in summer become skin poor, and a few drop dead in the hot fields for want of the complete nourishment that a wider variety of feeds will furnish.

POULTRY.

The mite is the poultryman's worst enemy. It multiplies by millions, feeding upon the fowls from the time they settle upon the perches in the evening until they leave them next morning. Spraying the perches may destroy great numbers, but thousands are left to hatch out new colonies at once.

The best method I have tried to get rid of the pests is to provide two sets of perches. The round ones have blocks nailed upon each end, to prevent turning upon the supports. About every two months these perches should be removed and replaced by the other set. This can be done, even in cold weather, by simply shifting the fowls to their day quarters.

I remove each perch carefully so as not to dislodge any of the mites. Then I spray around the supports and clean up generally. After that I replace clean perches and allow the fowls to return undisturbed. The infested perches have boiling water, with a liberal quantity of kerosene and spirits of turpentine added, poured over every inch of them. Then they are placed on end against a tree or fence, some distance from the poultry house.

Culling.

During the year 414 culling demonstrations were held by the O.A.C. Poultry Dept. Extension men—a total of over 5,000 people attended. In addition to the 414 culling demonstrations, culling schools were held in Woodstock, Port Hope and Napanee. Of the 50,000 hens handled at demonstration over 17,000 were considered to be culled in so far as profitable egg producing is concerned, so says Professor W. R. Graham, Ontario Agricultural College.

There's many a slip 'twixt the seed and the silo. It takes a farmer to be the true optimist.

Home Education

"The Child's First School is the Family"—Froebel.

A Question of Endurance—By Ora A. Clement.

"Yes, Janet is going to learn music," said Janet's mother, "even if it does worry me nearly to death to make her practice."

"Doesn't she like to practice?" asked the friendly neighbor, who was making a call.

"The first half of her hour she practices very well, but almost every day she begins crying after thirty minutes are over, and I frequently have to punish her to make her finish the hour."

"You don't mean to say that seven-year-old baby practices for a steady hour each day?" The motherly eyes of the older woman were very bright as she asked the question.

"Indeed she does," the child's mother answered emphatically. "If there is one thing more than another that I cannot endure it is dilly-dallying about something. When a thing is begun, I want it finished before it is left."

The caller was silent for a moment, and when she resumed the conversation it was to introduce another subject.

"Did you enjoy the lecture Prof. Mozer gave before the club yesterday?" she queried.

"It was interesting, and he is a pleasing speaker, but I did wish he could have made his lecture shorter. After four o'clock, when I felt that I should be at home getting dinner started, I could not keep my attention on the lecture at all. My mind was somewhere else, and I could scarcely sit still."

"It was a long program, and I can imagine how you felt," the neighbor agreed. "It is very hard to force one's attention when the mind is busy elsewhere."

"Well, I simply can't do it." The younger woman was very positive.

"When I have lost interest, I might just as well leave the meeting for all the good I get from what is said afterward. I don't remember a word of it."

The caller's brown eyes twinkled knowingly but kindly, as she said very gently, "I am sure that is more or less true of us all. Especially is it true of our little folks. Did you ever hear it said, Mrs. Martin, that a child of Janet's age cannot concentrate its attention for more than thirty minutes at one time? The average is less than that."

"It is not a child's fault that it cannot concentrate. It is Nature's way of insuring normal, all-round development. It is as natural as it is beautiful for children to go flitting happily from one thing to another like butterflies, and it is well to train the little ones to apply themselves to work and study by giving short tasks which can be finished within a half-hour. Longer tasks exhaust a child's power of concentration and use up nerve force. Furthermore, nothing is gained by continuing them after interest and attention are lost. But I was going to ask how you enjoyed Miss Love's solo."

So again the subject of discussion was shifted and Janet and her lessons were not mentioned.

But the motherly neighbor was pleased the next day when, after a painstaking, if jerky, rendering of Pixie Valse with some finger exercises as a finale, the Martin's piano was quiet until Janet had had a long romp with the Jones twins, after which it tinkled methodically and cheerfully for thirty minutes more with no accompaniment of sob.

"That is much better," she said to herself. "I only hope I did not offend Janet's mother."

them rising up to the tree tops, and going even beyond them as high as birds may fly, they called frantically to them to come back, promising to give them all the food they wished.

However, the little boys did not hear them, for their eyes were on the lovely sky land where they saw all the beauties of the cloud-world. The good little spirit fixed them there forever and turned them into seven beautiful bright stars and they were very happy, and never again were hungry for food.

HOGS

We have had a great deal to say in times past about the efficacy of good pastures on the economical production of live stock. It is a subject well worthy of frequent discussion, and it is just as important with regard to hogs as with any of the other domestic animals.

The ancient pig sty with its tiny proportions, its filth and squealing occupants, is, or should be, a thing of the past, so far as commercial hog production is concerned. It is as unnatural for a hog to be confined for long periods in close quarters, as for a man to spend all his life in the house. The evil effects of such treatment may be overcome largely by careful attention to exercise and diet, but it is neither desirable with man, nor profitable with hogs.

In a state of nature hogs roamed the woods and the prairies seeking what they might devour. We have no records of their suffering from intestinal worms and lice, and hog cholera was unknown.

We put rings in their snouts so they cannot root up our nice meadows, and then feed them tangle to replace the worms and grubs, and mineral mixtures to replace the mineral elements which their ancestors were in the habit of rooting in the earth for. We even cut down all the trees, because they interfere with the plow or the binder, or with our distorted aesthetic sense and build artificial shades, that our hogs may enjoy protection from the heat of the sun, which nature demands they should have. Perhaps, some day, we will employ osteopathic hog doctors to exercise their muscles, and import celery and head lettuce to keep them in health, but, to date, we are still depending upon plenty of range and good pastures to fulfill this requirement.

The best of all forage so far discovered is alfalfa. Clover is a close second, and on rich land rape gives excellent returns. Fall-sown rye or June grass comes earliest in the spring, oats and peas are very good for the older hogs about June 1. Sweet clover promises to take a position among the best hog forages. Soybeans are greatly relished for fall feed, and up-to-date practice calls for growing them extensively with corn, that is to be hogged off.

Many experiments have shown that the most economical gains from growing pigs come from the use of abundant forage in combination with approximately one-half of a full feed of grain. They also show that the acres thus utilized are often the greatest producers of net profits of any on the whole farm.

When replanting corn, instead of using a hoe I use a sharpened broomstick with a pipe of some kind attached. I jab the broom stick into the soil, drop a grain of corn into the pipe, scratch a little soil into the hole and the job is done.

THE CHILDREN'S HOUR

WISHING.

Do you wish the world were better?
Let me tell you what to do;
Set a watch upon your actions,
Keep them always straight and true:
Rid your mind of selfish motives,
Let your thoughts be clean and high;
You can make a little Eden
Of the sphere you occupy.

Do you wish the world were wiser?
Well, suppose you make a start
By accumulating wisdom
In the scrapbook of your heart.
Do not waste one page of folly;
Live to learn and learn to live.
If you want to give men knowledge
You must get it ere you give.

Do you wish the world were happy?
Then remember day by day
Just to scatter seeds of kindness
As you pass along the way;
For the pleasure of the many
May oft-times be traced to one
As the hand that plants the acorn
Shelters armies from the sun.

THE ORIGIN OF THE PLEIADES.

BY LERINE BALLANTYNE.

Because they had no books from which to read, nor any great thinkers to write books for them, the Indians who lived here in North America before we came devised legends about the wonders of nature. These legends were handed down and the young people would sit in the wigwams or long houses and listen during the long winter evenings to the stories told by old men and women about how the stars came into the sky, what caused the trees to grow, why the animals were cunning, and all such things that we too ask our parents about, when we are little boys and girls.

One legend told by the old Huron people long before even Cartier came to this country, about the origin of the Pleiades, is very quaint. The Pleiades is a group of seven stars which we may see almost any bright night high up in the sky. The Indians say these were seven very bright and clever little Indian boys who once upon a time lived here on the earth. They were expert dancers, and whenever a feast was held or a celebration given by their family, the seven brothers were called upon to dance for the company.

One time they were celebrating the harvest by the many usual dances and feasts of thanksgiving, and the seven boys were dancing in a giddy whirl just like the dry leaves, that, falling from the trees are carried around and around by a playful breeze. The boys became hungry and stopped their dance for food, but their people were so busy enjoying themselves that they took no notice of the boys, and when they asked for food, they told them to dance for it.

Clasping hands, they whirled away again while the old men beat time on the deer-skin drums. But as they danced they cried to each other "We are so hungry! We must have food!" Just as they said these words a good spirit which was passing beckoned them, and they found themselves being whirled up off the ground following this spirit without any effort on their part. Higher and higher they ascended. When their people saw

The only Canadian nurse who lost an arm on the field is pictured while attending a recent convention of the Ontario Amputation Association.

W. M. S. CONVENTION

The delegates from here who attended the W.M.S. Convention held recently in Ottawa, were Mrs. E. Lawson, Mrs. Chas. Marsh, Mrs. L. Mattice and Miss Carrie Stata.

The officers from here who attended were Mrs. I. Hilliard, 1st Vice-President and Mrs. W. S. L. Merrill, Supt. of Matilda District.

Miss Carrie Stata gave a very fine paper on "Opportunities of Strangers' Secretary in rural districts. This paper was full of real interesting information and was much appreciated.

The Ottawa Journal reports as follows:

"Mrs. W. H. Henderson of Dominion Methodist Church, Ottawa, was re-elected by acclamation, president of the Women's Missionary Society of the Methodist Church in the Montreal Conference when they held the concluding session of the 41st annual meeting in Dominion Methodist Church this morning.

Mrs. T. G. Williams was re-elected honorary president and the other officers include: Honary vice-president, Mrs. W. I. Shaw, Westmount; first vice-president, Mrs. I. Hilliard of Morrisburg; second vice president Mrs. F. A. Larke, Brockville; third vice-president, Mrs. R. O. Joliffe, Kingston; recording secretary, Mrs. E. M. Grose, Huntingdon; corresponding secretary Mrs. J. A. Gordon of Montreal; treasurer, Mrs. R. Antillie, Westmount; corresponding secretary of circles and bands, Mrs. C. C. Smith, Rosemont Church, Ottawa; treasurer of circles and bands, Miss Dorothy Flower, Montreal; superintendent of stewardship, Mrs. A. W. Young, Westmount; Stranger's secretary, Mrs. S. F. Newton, Athens, Mrs. W. S. L. Merrill of Matilda district and Mrs. W. O. Johnston, will represent the branch at the next Board meeting in Toronto.

Rev. Mr. Terrybury, Ontario secretary of the Lord's Day Alliance, spoke briefly on the work being done by the organization which he represented. He urged the members to give one dollar each to the Alliance as \$75,000 was needed to carry on the work. Canada had no need of a Continental Sunday or the day of worship as observed in the United States. A resolution was moved by Mrs. I. Hilliard and seconded by Mrs. Larke, pledging the support of the branch to the Dominion Alliance. The courtesy committee of which Mrs. Lawson is convener, expressed the appreciation of the W.M.S. to Dominion Church for their kindness to the Ladies Aid Society of St. Paul's Church who were caterers, and to all who insured the success of the annual meeting.

NOTICE

The Counties Council of the United Counties of Stormont, Dundas and Glengarry, will meet at Council Chamber, Court House, Cornwall, on Monday the 23rd day of June A.D. 1924, at 8 o'clock P.P. pursuant to adjournment from January session.

JAMES R. SIMPSON, County Clerk.

Cornwall, June 2, 1924.

FOR SALE

Eighty acres of land lot one, Con. 4, Township of Matilda. About 50 acres tillable rest wood and pasture; well watered and good buildings. Will take \$35 an acre for quick sale. Possession any time.

ALEX WHITTEKER, Gouverneur, N.Y.

R.T.D. No 5.

HORSE FOR SALE

A good farm horse weighing about 1300 pounds for sale. This horse is in good condition to do the Spring work.

Apply to

SAM AGULNIK, Morrisburg, Ont.

TO LET

Brick dwelling, hot water heating, hardwood floors, bath, etc. Main street.

I. HILLIARD, Morrisburg.

FOR SALE—Medium size brick dwelling on Main street west, bath and toilet, furnace, etc., good out-buildings; also the Gordon property on Main street west. This will be a quick sale, as the buildings are all new and artistically built—bath and toilet, furnace summer and winter kitchen, double garage and woodshed. Also the beautiful Helney property, and the Cheelely home, at a bargain. I also have a profitable business in town for sale. Money to lend on farm security—no commission charged—J. A. Riddell.

CORNWALL GENERAL HOSPITAL

This institution provides skilled nursing and care at very moderate rates to those able to pay, and without charge to indigent persons from the three United Counties, other than the Municipal Grants.

It is kept up by: Fees from paying patients. Grants from the Government and Municipalities.

Donations and subscriptions from Churches, Corporations, Societies and Individuals, the last being the largest source of revenue.

YOU ARE ASKED TO ASSIST IN THIS WORK

The nucleus of an endowment fund has been established by a legacy recently received, and parties remembering the Hospital in their wills may stipulate that bequests made by them shall go to this fund.

If you would like a copy of the last Annual Report, drop a card to the Secretary, who will be pleased to send you one.

I DO WANT TO GO TO Business School

Let me hear you say, "I do want to go to business school" and I will tell you if the business world is anxious to have your services.

I can tell by the way you say it. Do you emphasize "do"? There are plenty of boys and girls who would like to dream themselves into good jobs and never get there.

The Do-Ing kind get into action and reach the goal of their desires.

Our catalogue tells you all about our different courses of study, tuition rates, etc. Write for your copy today.

DEPARTMENT OF RAILWAYS AND CANALS

Ontario-St. Lawrence Canals, Williamsburg Canals.

SEALED Tenders, addressed to the undersigned and marked "Tender for Repairing Highways on Canal Lands" will be received at this office until 12 o'clock noon on Thursday, June 12th, 1924.

Plans, specifications and form of contract to be entered into can be seen on and after this date at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa, and at the office of the Superintending Engineer, Ontario-St. Lawrence Canals, Cornwall, Ont.

An accepted bank cheque on a chartered bank of Canada for the sum of \$500.00 made payable to the order of the Minister of Railways and Canals, or war loan bonds of the Dominion of Canada to the same amount, or war loan bonds and cheques if required to make up the difference, must accompany each tender, which sum will be forfeited if the party tendering declines entering into contract for the work at the rate stated in the offer submitted.

The cheque or bonds thus sent in will be returned to the respective contractors whose tenders are not accepted.

The cheque or bonds of the successful tenderer will be held as security or part security for the fulfillment of the contract to be entered into.

The lowest or any tender not necessarily accepted.

By order, J. W. PUGSLEY, Secretary.

Department of Railways and Canals, Ottawa, May 28th, 1924.

AUCTION SALE

Of farm stock and implements, on part of lot 25 in the 4th Concession of Williamsburg, commencing at two o'clock, Tuesday, June 10th.

One Yearling Bull sired by a son of Avon Pontiac Echo, who was senior herd sire for Carnation Stock farms, which have 1000 head of milk cows. A half sister to this bull made 34 pounds butter in seven days, and as a two year old made over 142 pounds of butter in 30 days. This is a world's record for butter. The Dam of this Bull made over 30 pounds of butter in seven days. She is a grand daughter of pontiac Korndyke, the greatest bull known in Holstein history.

16 High-grade Holstein Cattle, three Holstein Yearlings 3 Holstein calves One Chestnut Brood Mare rising 10 years, weighing about 1400 lbs. one Chestnut gelding, rising 9 years

weighing about 1300 lbs., black mare rising 7, weighing about 1500 lbs. one brood sow, four shoats, two sets of bob sleighs, one double box wagon, new; one farm wagon, one milk wagon, one single buggy one set lever harrows, one set drag harrows, one Spring Tooth Cultivator, one Cockshut 15-disc drill, new, one Oliver sulky plow; one walking plow two horse corn cultivator, one grain binder, one mowing machine; one hay loader; one horse rake; one set disc harrows; one single cutter; one hay rack; one sleigh box; two sets double harness, two sets single harness, one car, fork rope and pulleys, a pair of ducks; three geese; 80 hens, a quantity of Elm plank; a quantity of stove wood; six pall coolers; three thirty-gallon milk cans, churn, milk pails; water tank; and other articles.

The farm consisting of 100 acres, more or less, will be offered for sale subject to a reserved bid. Terms of sale of farm will be made known on day of sale.

TERMS OF SALE \$10 and under cash, over that amount six months' credit on furnishing approved joint notes or 4 per cent off for cash.

Ross Morrow, Auctioneer.

Mrs. C. R. Becker, Proprietress

NOTICE TO CREDITORS

Estate of Charles Ross Becker Deceased.

Notice is hereby given that all persons having claims against the estate of Charles Ross Becker, late of the Township of Williamsburg in the County of Dundas, farmer, who died on or about the 31st day of May 1924 are required on or before the 6th day of July 1924 to send postpaid or deliver to the undersigned solicitor for Albert Becker, the administrator, full particulars of their claims duly verified.

And notice is further given that immediately after said last mentioned date said administrator will proceed to distribute the assets of the estate among the parties entitled thereto, having regard only to the claims of which he then has notice, and will not be liable for any part of the assets so distributed to any person notice of whose claim has not been received at the time of such distribution.

Dated at Morrisburg this 6th day of June 1924.

ARTHUR FLYNN,

Solicitor for Administrator.

PILES

Do not suffer another day with itching, bleeding, or protruding Piles. No surgical operation required. Dr. Chase's Ointment will relieve you at once and afford lasting benefit. 60c. a box; all dealers, or Edmanson, Bates & Co., Limited, Toronto. Sample box free if you mention this paper and enclose 2c. stamp for postage.

NOTICE

Court of Revision on Assessment Roll, Township of Williamsburg.

The first sitting of the Court of Revision on the Assessment Roll for the Township of Williamsburg will be held in Barkley's Hall, Boucks's Hill on Saturday, June 14th, 1924, at the hour of one o'clock p.m.

M. S. BECKSTEAD, Clerk.

Dated at Williamsburg, the 4th day of June, 1924.

To add new accounts

Don't overlook the village stores off the line of railways.

A salesman we know began by calling on some of them in a car to make the necessary arrangements. He hasn't seen his new customers since. At an appointed day and hour he regularly calls up each by Long Distance from a list he prepared, and gets their orders.

If he is away, someone else carries out the schedule for him.

His customers like to deal with headquarters.

He added over 100 new accounts in a few months—says the business bulks large at the end of the year.

Every Bell Telephone is a Long Distance Station.

EXCLUSIVE DEALERS FOR

Low Brothers PAINTS AND VARNISHES

Never Figure the Cost of Paint by what it costs "per gallon." So-called "cheap" paint is the dearest you can buy measured by "job" cost, which is the only true measure of paint performance.

Before you paint consult us. We will be glad to show you how to paint most economically, and to give you color cards and other information for your guidance.

To paint this house (2,000 sq. ft.) with "cheap" paint Mr. A. required 6 1/2 gals. at \$4.00 per gal. \$26.00

It takes a painter 1 day to apply 1 gal. of paint, therefore to apply 6 1/2 gals. of "cheap" paint it took 6 1/2 days at \$5.00 per day \$32.50

Total cost \$58.50

To paint this house (2,000 sq. ft.) with Lowe Brothers' High Standard Paint, Mr. B. required 4 gals. at \$5.75 \$23.00

A painter can usually apply in a day more Lowe Brothers' High Standard Paint than any other but figuring on an equal basis of 1 gal. per day, it took 4 days at \$5.00 per day \$20.00

Total cost \$43.00

By using Lowe Brothers' High Standard Paint Mr. B. saved \$3.00 on the cost of paint and \$12.50 on the cost of labor—a total saving of \$15.50 on the complete job.

Low Brothers PAINTS AND VARNISHES

OUR CORRESPONDENTS

WILLIAMSBURG

Rev. Iseler preaches at Ottawa today evening, June 8th, there be no services in the Lutheran Church. The morning service and Sunday School will be conducted as usual.

Miss Emma Paesler of Québec is spending a few weeks at the Lutheran Parsonage.

Mr. George Dickey of Montreal spent last week end with his brother Mr. Willie Dickey.

Mr. and Mrs. Alex. McGruer and daughter of Dixon's were guests of Dr. and Mrs. Locke last Sunday.

The weather man is giving us some change in the weather. It has been fine and warm for the past few days and the prospects are good for more days just like them. The farmers are getting their seeding almost finished.

Mr. and Mrs. Ed. Kenny, Mountain; Mr. and Mrs. C. E. Merkley and daughter Marie were guests of Mr. and Mrs. Fay Merkley on Sunday last.

We are pleased to report that Mr. Archie Shannette was successful in his exams at Queens University last term.

Many friends throughout this community learned with regret of the sudden death of Mrs. Martha Dillabough of Brockville last Saturday morning while visiting her nieces in Ottawa. Much sympathy is extended to the bereaved daughters Mrs. Alice Nash of Morrisburg, Mrs. Lou Brown of Brockville; Miss Annie Dillabough, Brockville; and one son Jimmie of Winnipeg; also two brothers Isaac L. McIntosh of Williamsburg and John of Elma. Deceased was held in sincere affection by a large number of friends to whom her passing will bring a genuine sense of loss. A large number of friends and relatives attended the burial service in Mariatown cemetery where interment was made on Tuesday afternoon of this week.

The funeral service of the late Charles Baker of Bucks Hill was held in the Presbyterian Church here on Monday afternoon conducted by the pastor Rev. E. Smith. The concourse of friends and neighbors showed the esteem in which the deceased gentleman was held.

"Eczema on My Face Completely Relieved"

Miss Winifred Ernest, Box 46, Blockhouse, N. S., writes:

"Ever since I was a little child, I suffered with eczema on my face. At times my face was completely covered with large sores, and I tried nearly every kind of medicine that I heard of with no results. This lasted for over twenty years, until one day I asked the advice of my druggist, who bade me give Dr. Chase's Ointment a trial. After using the Ointment for a few days, the sores began to heal, and soon I was completely relieved of the disease."

HYDRO COMMISSION MAKES DRASTIC CHANGE IN RATING SYSTEM

Domestic Floor Space Toll Replaced by Flat Service Charge of Thirty Cents—Standard Price of Current Revised.

A despatch from Toronto says:—A revolutionary change in the rating system for domestic and commercial lighting throughout the various Hydro Electric systems of the Province was announced Thursday night by Sir Adam Beck, speaking on behalf of the Hydro Commission.

Simplification of the rating method has been under consideration by the officials of the Commission for some months, and on Tuesday members of the Municipal Hydro-Electric Association were called into conference. The call for this conference was issued by ex-Mayor Maguire of Toronto as president of the association. The result of these deliberations was a decision—which was communicated officially to the municipalities throughout the province—to abolish floor-space rating for all domestic services and to provide instead thereof a 30-cent service charge in the case of all houses, large or small, connected with municipal distribution services in the various Hydro zones.

It is believed, Sir Adam states, that this will be found in the end to be more equitable than the minimum and maximum floor space ratings hitherto enforced.

It also has been decided that the standard charge for current shall be 2 cents for a minimum of 60 kilowatts and 1 cent per kilowatt for all current supplied above that minimum. In the case of municipalities which find the revenue from this basis of rating insufficient for their needs and necessary additional revenue will be obtained by increasing the number of

kilowatts from 60 upwards to which the 2-cent rate is applicable.

If, for example, a municipality finds that it requires a minimum of 90 kilowatts per month at 2 cents to carry its necessary expenses, the local authority will have power to increase the standard minimum from time to time, subject, of course, to the general supervision of rating by the Provincial Commission.

It had been decided, Sir Adam stated, to accept for general use in the matter of commercial rating the basis put forward by the Toronto Hydro-Electric Commission for use in this city. Formerly commercial lighting was supplied at a minimum rate of 5 cents per kilowatt hour for 30 kilowatt hours, 3 cents for the next 70 and 1 cent for all over 100. The Toronto rate, which will now be applied throughout the province, provides for a rating of 4 cents per kilowatt hour for the first 50 hours, 2 cents for the next 50, and 1 cent for all over 100.

These changes have been formally approved by the Provincial Commission, as well as the new domestic rating system, and, so far as possible, goes into force on the first of June.

At the session of the Commission, revisions of provincial rates in 212 cities, towns and villages were formally approved, having regard to the surpluses disclosed by last year's revenue returns. In 155 cases reductions were made in the rate for power supplied by the Provincial Hydro to the local authorities; in 54 the rate holds at that of last year, and in 3 only was it found necessary to make increases.

This might easily be a scene of far-off India, but instead it's at Wembley, when Queen Mary "did" the show with Queen Marie of Rumania. Garlands of flowers were placed around the necks of the two Queens while dusky attendants held Indian sunshades over their heads.

WESTERN GRAINS MAKE RAPID GROWTH

Rains and Rise in Temperature Help Crops Make Up for Lost Time.

A despatch from Winnipeg says:—Marked improvement in weather conditions throughout the Prairie Provinces has proved a welcome boon to the Western farmer generally.

Despite the lateness of the seeding operations and the unusually cold weather during the past month, recent rains and rise in temperature have contributed greatly to rapid growth.

Wheat seeding is completed in the three Provinces with the exception of a few isolated districts, while good progress is reported in the seeding of coarse grain.

Farmers in the Regina district report that crops are slightly ahead of last year, and in some districts wheat has reached the height of three inches. In the Prince Albert district lack of precipitation has somewhat retarded growth, but rain is forecast.

The season's crop prospects in Alberta are regarded as the most ideal in many years. A steady but gentle downpour of last week-end over a wide area proved very beneficial.

In Manitoba the crop is not much later than in former years, although the lateness of the seeding season materially reduced the acreage sown to wheat.

"There is ample time yet for the development of a good crop, and, notwithstanding unfavorable weather conditions during the early spring, no fear need be entertained concerning the crop," declared Premier John Bracken, Minister of Agriculture for Manitoba, following a visit through the Neepawa district.

Dickens's Son Finds Faith in Human Nature Unsound

Sir Henry Dickens, who as a London magistrate has found in actual life that the faith his famous novelist father had in human nature is not always justified, has just commented upon a case that was brought before him recently. Sir Henry some time ago remarked that he was determined to try a great experiment, with a man who was arraigned before him.

Although the prisoner had a long criminal record, Sir Henry paroled him and found work for him. Three months later the man was again arrested.

"It was one of the greatest disappointments I have ever experienced," said Magistrate Dickens. "I will never try such a thing again."

Mrs. Jamie Brown
The reigning mistress of beautiful Holyrood Palace, Scotland.

BRITISH WAR STOCKS FINALLY DISPOSED OF

\$3,235,890,000 Worth of Surplus War Material Sold in Last Five Years.

A despatch from Montreal says:—The Disposal and Liquidation Commission of the British Government, which in connection with its predecessor, the Ministry of Munitions, has had in charge the liquidation of the surplus war stocks and properties of the British Government, has just completed its work, and as reported by the English Information Service, has realized for these stocks in the past five years \$3,235,890,000 at par of exchange.

The releasing of these surplus properties and stores in large and small lots has involved more than three million separate business transactions, including railways in Europe, Asia and Africa, as well as thousands of miles of railways, sidings, etc., in the British Isles and a large fleet of miscellaneous craft lying in various harbors all over the world. Among the properties liquidated were real estate and factories, rolling stock, industrial plants, machinery, mechanical transport and road plant, metals, huts, buildings, furniture, building materials, horses and other animals, textile goods, medical stores, food stocks and aircraft material.

ANOTHER VICTIM OF NIAGARA WHIRLPOOL

Seventeen-Year-Old Youth is Caught in Strong Undertow of Lower River.

A despatch from Niagara Falls, Ont., says:—Joseph Alexander Dempsey, 17 years of age, was drowned in the whirlpool in the lower river early Thursday morning when he jumped out of a rowboat which had become unmanageable.

Dempsey, with Edward Barrie and Morley Pearson of this city, went along the river bank with a skiff and launched it just above the whirlpool with the idea of taking it down to Queenston for the summer. Dempsey got into the boat himself and started to row across the big eddy. The current, however, was too strong for him and he had to pull the oars into the boat. Finding himself gradually being drawn into the vortex of the pool, he jumped into the water and started toward the shore. He made about twenty strokes, shouting for help, and suddenly disappeared. It looked as if he was caught by a strong undertow. The body has not been recovered.

It is probable that if he had remained in the boat he would have been saved, for it drifted around the eddy and was drawn up near the shore.

103 Per Cent. Increase in Immigration in April

A despatch from Ottawa says:—Immigration into Canada in the month of April this year shows an increase of 103 per cent. over that of the same month last year, the total for April, 1924, being 19,330, as compared with 9,500 in April, 1923. Of the total for April this year 9,410 were British, as compared with 4,671 in the same month last year; from the United States, 1,838, as against 2,140 in April last year, and 8,082 from other countries, as against 2,689 in April last year.

Angling for the wily brook trout when the white water pours into a shady pool—a familiar scene in the Laurentian hills of Quebec this time of year.

ROYALTY VISITS CANADIAN EXHIBIT

King and Queen Much Interested in Butter Model of Prince's Ranch.

A despatch from London says:—King George and Queen Mary, with King Victor Emmanuel and Queen Helena of Italy, and Princess Mafaldi spent a considerable part of Wednesday forenoon at the Canadian Pavilions at the British Empire Exhibition. Announcement of their Majesties' visit to Wembley brought sightseers by the tens of thousands, but, thanks to the skillfulness of the police and the good humor of the crowd, the royal party made a walking tour at the exhibition in perfect comfort.

The first call of the royal party was at the Canadian National Railways pavilion. The longest visit of the Italian royal visitors and their royal host and hostess was in the Dominion pavilion, where they were shown around by officials. King George fairly roared with laughter when he was suddenly confronted with the model of the Prince of Wales in Canadian butter. The butter exhibit is in the form of a model of the Prince's Alberta home, the Prince,

his horse, his ranch, the house and landscape all being in butter. "Capital, capital, is it not?" King George exclaimed to Queen Mary, who was also much entertained by the display.

The Canadian Pacific Railway Building then was visited by the royal party. The spectacle of a model train running right around the C.P.R. Building attracted the visitors' attention. Seeing a view of Banff, Queen Mary remarked, "I remember very well being there."

Sleeping Sickness on Increase in the Old Country

Sleeping sickness is increasing rapidly in this country, and 649 cases were notified by doctors in the first three weeks of April, against 468 in March, 217 in February, and 75 in January, says a London despatch.

While investigations into the cause of the disease are being carried out by the Medical Research Council, doctors admit they do not know either a cure or any means of preventing the spread. Large towns appear to be more affected than rural districts and the disease seems to spread westward.

They love least that let men know their love.

Surnames and Their Origin

CLAYTON
Variations—Newton, Leighton, Layton, Hiltten.
Racial Origin—Anglo-Saxon.
Source—Localities.

This little group of family names is typical of the larger part of the entire classification of "ton" names. They are given here as variations of one another, not because they have come from the same source, but from the same kind of source.

This source is Anglo-Saxon place names. This does not by any means establish the first bearers of the surnames as of Anglo-Saxon blood, however. They might have been and undoubtedly were in many cases Normans.

But it was back in the Anglo-Saxon period that the place names were formed around the old word "tun," which has given us our modern word "town." To the Anglo-Saxons this word meant primarily an inclosed place, which, of course, most of their towns were. Thus if the locality were noted for a clay soil, the "tun" became known as Clayton and grew into a town of that name. Newton would signify an inclosure recently built (recent in the view of those who named it). Leighton and the modern simplification, Layton, would be an inclosure on a "leigh" or "ley," that is, meadow land. And Hiltton would designate such an inclosure on a hillside or hill-top.

Such names became family names

as a rule when former residents settled in other communities.

TUMULTY.
Variations—Tomalty, Talty.
Racial Origin—Irish.
Source—A given name.

At just what period this Irish clan came into being is not quite clear. The clan name, however, is traceable back to a period prior to that in which the majority of English family names originated.

As nearly as the Irish spelling of the name can be rendered with the English alphabet, it is "O'Tombaltaigh." The spelling is formidable, but the pronunciation is not, the native Gael pronouncing it just about the way we pronounce the variations Tumulty and Tomalty, with the clan-signifying "O" before it.

This "O" in Irish names, however, is but the modern development of the more ancient forms "Hua" and "Hui," sometimes rendered in English as "Ua" and "Hy." One is singular and the other plural in this sense; the former is used when speaking of a single person who is a member of the clan, the latter when the speaker is referring to several members or to the clan as a whole.

The Irish clan names all are taken from the given names of the chieftains who founded them. In this case the given name was "Tomhalt," with a meaning of "the waster" or "the generous one."

Animals That Advertise.

Everywhere one goes in the country signs may be seen which indicate that creatures of the wild know the value of advertising just as much as do human beings.

Often this advertising may be just a dodge on the part of the insect or animal to avoid the attentions of another creature who has designs upon him as a delectable dinner morsel.

This peculiarity of Nature is noticeable in regard to the butterfly, which is an ingenious little publicity merchant. Certain kinds of butterflies have noxious qualities which are not to the liking of birds, but there are other species which are just the reverse. The latter consequently assume the colorings of the former, and so, by advertising their undesirability as food, manage to preserve their lives.

The same tactics are adopted by beetles, but it is from bird and animal life that we get the best examples. Certain kinds of snipe, for instance, set up a peculiar shriek as soon as they catch sight of a shooting-party, and this is kept up until they have advertised far and wide that the gunners are on the look out.

Sheep's Secret Signals.

Wild sheep, also, are clever in this respect. They need only to see one of their number at attention, with head up and ears pricked forward, to become suspicious and ready for flight. Again, when deer register the presence of a foe, they send a signal to every member of the band to be cautious.

The wild bellow of the lion is often uttered not because he is angered and ready to fight. He knows that to keep away his foes he has but to remind them of his power, and he does so by proclaiming his strength far and wide.

With just the same object does the rattlesnake shake his castanets. The sound of them reaches the ears of his foes, and, awed with the dreadful warning of the snake's latent power, they rapidly disappear.

But it is at the mating season in the

wild that the full power of publicity is brought to bear. There is a general flaunting of color and parade of strength, with the object of proving to a possible rival how much more desirable than his rival each one is.

This competition for favor is particularly outstanding in bird life, and the display of colors and ornaments to catch the female eye is carried to perfection. The great peacock, while conscious of his beauty, at the same time is aware that his rival may be just as beautiful, and to out him from favor he tides himself up and, as it were, puts on his Sunday best.

The Alligator's Courtship.

Birds of Paradise wave their wonderful silky plumes, and the hummingbird with great skill flashes his gems among the flowers, making a perfect color scheme.

Other birds, less fortunate in the matter of color, find the power of song a great factor in gaining favor; so these songsters chant their sweetest melodies or chirrup and whistle as best they can.

Even the lumbering alligator knows how to advertise, and in searching for a bride does his best to stage a fight so that the lady of his choice may see him come forth the victor!

The same applies to lions and tigers and even the monkey, so if you see any of those fellows vainly strutting about at the Zoo, don't laugh. They know what they are doing!

GREEN TEA IN GREAT DEMAND.

Twenty-five years ago, Green Tea was more popular than Black, but due to the heavy importation of poor quality Japan and China Green Teas, the demand fell off. Ceylon and India started producing Green Tea on a large scale only in recent years. They were of such fine quality and delicious flavor that Green Tea drinkers immediately recognized their superiority and demanded them in ever increasing quantities. Salada Tea Company is practically the sole importer of Ceylon and India Green Teas in Canada.

Rest.

To get the most out of a vacation one should have a rest as well as a change of scene and recreation. Excessive physical fatigue whether from work or play is dangerous. Fatigue means a tired heart and weakened digestive organs, and it lowers resistance to infection of any sort. Many a vacation has been spoiled by unusual fatigue, with over eating, and many a vacationist returns home suffering from an infection which would never have occurred had his natural powers of resistance not been lowered by general bodily fatigue.

Begin new forms of work or play moderately. Moderation in physical exertion for the first few days of a vacation will make a great difference in the actual results of the vacation. It will also make a vacation far more beneficial in its results if the daily programme be arranged so as to provide a period of complete relaxation and rest, if not a nap, after the noon-day meal or before the evening meal.

One who has climbed the ladder should not pull it up or kick it down—he should extend a kindly hand to the fellow below.

Ask for Minard's and take no other.

Love's Way.

Love goes the way of laughter
And pretty maiden fears,
But he knows naught of life's way
Nor grey and bitter tears.

Love goes the way that Hope takes,
And meets the golden dawn.
And oh! the picture Hope paints
Are sweet to look upon.

Ah! Love is wise and gracious,
Or folks would never know
The tinkling lilt of laughter
In Dawn's young ruddy glow.
—Leraine Ballantyne.

THE CHEERFUL WOMAN

Is One Who Has the Rich, Red
Blood of Good Health.

The fact that one woman is bright-eyed, rosy-cheeked, strong and cheerful, while another is pale, weak and depressed is due more often than otherwise to the condition of the blood. The way to remedy this depressed state is to build up the blood, and for this purpose there is no other tonic can equal Dr. Williams' Pink Pills. A case in point is that of Mrs. Melvin Abra, Graveley Street, Vancouver, B.C., who says:—"About two years ago I was a very sick woman. I seemed to be wasting away and getting thinner all the time. I grew so weak that the doctor sent me to the hospital, but the treatment there did not help me and I returned home. Then I tried a number of tonics with no better results. At this stage my mother came to me, and as she is a firm believer in Dr. Williams' Pink Pills, she started me on this medicine. I can only say that they did wonders for me. I began to get new health and strength after I had taken a few boxes, and day by day this improvement continued until I was again well and able to do all my household work, and I have not had a sick day since. I cannot recommend your pills too highly and urge those who are looking for health and happiness to give them a trial."

You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Seeing Eyes.

The automobile plowed through the deep sand of a piney woods road. There was not a house in sight, not a sound except the impatient and disgusted exclamations of the pair in the car, a young couple from the city.

"Miles and miles and not even a cabin! I don't wonder nobody lives in such a forsaken country," grumbled the young man at the wheel, and his wife emphatically declared that she didn't blame folks for not living where there was nothing except pines and sand.

Just then the breeze that stirred the boughs bore to their ears a song, jubilant and glad:

"I've reached the land of corn and wine,
With all its treasures surely mine;
I've reached that beautiful shining shore—
My heaven, my home, forever more!"

The car slowed down and, drawing to one side, stopped to allow a small covered cart to come slowly up over the narrow road. An old woman in a purple calico dress, with a big black sunbonnet falling back on her neck, sat in a chair and drove the pony.

"In trouble?" inquired the old woman sympathetically. "The sand's so deep I reckon you're stuck. I'll drive on and send a neighbor to pull you out."

"No, not stuck, just waiting to ask if you could show us some nearer way out to the main road," said the young man.

"Now ain't that a nice way to travel, though!" exclaimed the woman, "glidin' along smooth as grease and seefin' everything!"

"But this country"—began the young woman impetuously, "this country is so—so—"

"Ain't it?" replied the stranger, beaming upon them. "For them with seefin' eyes there's no prettier country to be found! This time of year especially when the woods are fair groanin' under the bounty of the Lord. I been down the road a piece, spendin' the day with a neighbor; she's a erip-ple body and can't get out much, so I stop now and then to gather her a basketful of huckleberries and wild grapes. You can see the vines yonder. And don't them clusters of sumac look pretty, jest like flamin' torches? That slim tree with the few red leaves on it is a persimmon, and they are good now that frost's touched 'em. I filled the basket with them and with some open clusters of chinquapins. Squirrels gather 'em, possums come to eat the persimmons and grow fat as butter. Truly this is, as the hymn says, a land of corn and wine—which is jest a name for all God's plenty."

The young couple gazed round them with opened eyes.

"Me a-runnin' on, and you askin' the highest way out!" said the old lady, laughing deprecatingly. "But when I get started on the country, why I just forget. The Lord made a sight of pretty things for travelers to see if they got eyes to see 'em with. You follow the main tracks like you're doin' and you'll soon come out on the highway."

They called cheery good-bys and waved back at the odd little figure in the purple calico. For a time the two were silent; then the young wife spoke softly to her husband. "See, dear, right ahead of us are a whole family of squirrels in that hollow limb. I counted four, and there comes another with a nut in her mouth!"

"I see; and over yonder in that thicket there's a covey of quail."

"And there right overhead is a vine just loaded with grapes! Stop the car and let's pick some. There really are so many things to see in these woods if,"—she looked into her husband's face, and he nodded, understandingly,—"if we have seeing eyes!"

Vagabondia.

O I am done with golden shoes,
With satin, silk and shining gear.
What is this tinsel show to lose
An' I take a road far, far from here!

Thick on a road white dust will lie,
Rise in clouds to a barefoot gait.
A brown lark will be touching the sky
And I'll sleep at night where mountains wait.

O I am done with a cloak of red,—
Slow rain will cling to a russet shawl,
Wind will finger a brave, bold head,
And darkness will hide no fears at all!

—Lillian Middleton.

CHILDHOOD INDIGESTION

Nothing is more common in childhood than indigestion. Nothing is more dangerous to proper growth, more weakening to the constitution or more likely to pave the way to dangerous disease. Fully nine-tenths of all the minor ills of childhood have their root in indigestion. There is no medicine for little ones to equal Baby's Own Tablets in relieving this trouble. They have proved of benefit in thousands of homes. Concerning them Mrs. Jos. Lunette, Immaculate Conception, Que., writes: "My baby was a great sufferer from indigestion, but the Tablets soon set her right, and now I would not be without them." Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

League Protects Children.

The children of the world will henceforth be under the protection of the League of Nations. The International Bureau for the Promotion of Child Welfare has been working in Brussels under the auspices of thirty governments and of various national organizations, but with the consent of the members the Council of the League has authorized the concentration of all child-welfare activities in a special department of the League at Geneva.

Payment for articles advertised in this column should be made with Dominion Express Money orders—A safe way of sending money by mail.

NURSE CHAPPELLE SAYS TANLAC BRINGS MOST GRATIFYING RESULTS

Nurse With 15 Years' Experience
Urges Use of Tanlac
—Tells of Her Mother's Experience With World's Famous Tonic.

home and visits around, as well. And mother thinks the TANLAC Vegetable Pills are the greatest ever.

"In all my long years of experience as a nurse, I have never known the equal of TANLAC."

TANLAC is for sale by all good druggists. Accept no substitute. Over 40 million bottles sold.

Take TANLAC Vegetable Pills.

"I have direct and personal knowledge of so many cases where TANLAC has restored health and strength and helped weak, run-down people to get on their feet that I know it to be an unusual medicine," is the emphatic manner in which Mrs. M. E. Chappelle, Blue Mount and Thomas Ave., Wauwatosa, Wis., a practical nurse of fifteen years' experience, pays tribute to the famous treatment.

"Time and again I have urged TANLAC'S use and it always brings the most gratifying results. My own mother, now eighty years old, took TANLAC five years ago, and it has been her standby ever since. Nothing helps her as TANLAC does and she is as strong an advocate of the medicine as I am. Only recently, mother became generally run-down. Her stomach was disordered, her appetite utterly failed her, and she came near having a nervous breakdown. TANLAC gave her a vigorous appetite, corrected all complaints and left her not only well and happy, but so strong and active that she looks after the

Five Thousand Whales in One Season's Catch.

The Greenland whale fishery, so far as this country is concerned, is almost non-existent. The harpoon-gun was too deadly, and the "right" whale of the Arctic appeared likely to become as extinct as the dodo.

Then news was circulated that the ocean around the Falkland Islands in the south Atlantic was "alive" with whales, and, just as gold-seekers rush off to any new field where gold is reported, so the whaling fleets all turned south. To-day the whale fishery around these islands is more profitable than all the other fisheries of the world put together.

No time is wasted returning to port with a "catch." Floating factories have been established where the blubber can be treated, and so valuable is this that the rest of the whale's carcass is often sent adrift, a waste of tons of valuable material.

During one year a score of whaling boats operating from South Georgia killed five thousand whales, the oil from which filled 200,000 barrels. Six barrels represent a ton, and as whale oil sells at from \$50 to \$125 per ton, the catch of this fleet was worth \$2,500,000.

No man can be cheated out of an honorable career in life unless he cheats himself. Believe in yourself and your capabilities and you will not be cheated.

Of London's 20,000 thoroughfares, 112 are named "Church," the next most popular names being "Park," "Grove," and "Victoria."

EXCRUCIATING PAINS, CRAMPS

Entirely Remedied by Lydia
E. Pinkham's Vegetable
Compound

Eberts, Ont.—"I started with cramps and bearing-down pains at the age of eleven years, and I would get so nervous I could hardly stay in bed, and I had such pains that I would scream, and my mother would call the doctor to give me something to take. At eighteen I married, and I have four healthy children, but I still have pains in my right side. I am a farmer's wife with more work than I am able to do. I have taken three bottles of Lydia E. Pinkham's Vegetable Compound and I feel that it is helping me every day. My sister-in-law, who has been taking your medicine for some time and uses your Sanative Wash, told me about it and I recommend it now, as I have received great relief from it."—Mrs. NELSON YOTT, R. R. 1, Eberts, Ont.

Lydia E. Pinkham's Vegetable Compound is a medicine for ailments common to women. It has been used for such troubles for nearly fifty years, and thousands of women have found relief as did Mrs. Yott, by taking this splendid medicine.

If you are suffering from irregularity, painful times, nervousness, headache, backache or melancholia, you should at once begin to take Lydia E. Pinkham's Vegetable Compound. It is excellent to strengthen the system and help to perform its functions with ease and regularity.

CORNS

Lift Off—No Pain!

Doesn't hurt one bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the foot palates, without soreness or irritation.

LOCAL AND GENERAL

MORASH FOUNDRY

Mrs. W. A. Burt of Windsor is a guest at the Allison Island home.

Miss Bella Hesson left on Sunday to spend a few weeks in Ottawa.

Mr. E. A. Lapiere of Syracuse, N.Y., spent the week end at his home here.

Vegetable plants of all kinds for sale at George W. Harrison's.

Mr. A. T. Carson arrived home on Saturday last from the Theological Seminary, New York.

Mrs. Matthew Jackson and son, Hugh, of Barrie, Ont., were in town for a few days last week.

Miss Sarah Mallen is spending a few days at Capt. L. Mallen's.

Mrs. A. W. Massey of Kingsville (Lake Erie) is visiting her parents Mr. and Mrs. B. S. Wickwire.

On Sunday June 8th, Rev. E. Maeder will preach at Riverside in the afternoon and at Morrisburg in the evening.

Be sure and plan to attend the play "Aunt Susan's Visit" in the Presbyterian Church, Williamsburg, on Tuesday evening June 10th.

The first game on the local diamond, of the Eastern Ontario Amateur Baseball League schedule, was played on Tuesday, when Prescott defeated the locals by a score of 15 to 0.

If it's something choice in the way of plants and vines for your verandah boxes and vases, I have it—George W. Harrison.

Guests of Mrs. John Mallan on Sunday were Mr. and Mrs. Herb Houlahan and son Patrick, Toyen's Hill, Mr. and Mrs. H. McCann and daughter Margaret of Ottawa and Miss Beatrice Gannon of Prescott.

Mr. and Mrs. Sam Allison of Dunbar, accompanied by the former's brother Mr. Alex Allison of Orlando, Florida, arrived home on Tuesday after spending a few days in Heuvelton, N.Y.

Mrs. A. H. Beckstead returned home on Tuesday after spending the winter with her daughter, Mrs. F. F. Tracy of Champion. Mrs. Tracy accompanied her mother, and will spend the summer months in town and vicinity.

In the neighborhood of 12,000 barrels of beer valued at a quarter of a million dollars were seized this week at Rouses Point by United States customs authorities, while en route to New York on the canal barge D'Eneaux. It was consigned to the D'Eneaux Lumber Company of New York City.

Archdeacon C. O. Carson, and Messrs. H. H. Bradford, Wm. Eager, and Ernest Styles were in Ottawa the first of the week as delegates to the Annual meeting of the Synod of the Church of England.

The Point Iroquois Summer School of the Montreal Methodist Conference will be held from July 28 to August 2, Rev. W. R. Johnston of Brinston, is president of the organization of the camp and Rev. T. J. Vickery of Iroquois, the secretary.

Dr. A. B. Clayton, who for the past year has so ably filled the vacancy here, caused by the death of the late Dr. McLaughlin, has severed his connection with Morrisburg to accept a more lucrative field at Chesterville. Dr. Clayton will be greatly missed here where he enjoyed a good practice and won the esteem of a large circle of friends, who will all join in wishing him success in his new field.

Cornwall's beer garden, made famous last fall by a raid from some 80 Provincial officers from all over the district, was again the scene of a raid this week, when Provincial Officers Wetherall and Seguin and Chief Paterson, acting on information received, made a search and recovered over a thousand bottles from the cool waters of the St. Lawrence. The man who is alleged to be the owner of the stock took to a rowboat and struck out for Cornwall Island as soon as the officers were sighted and made his escape.

Camp Meeting Services to be continued over Sunday June 8th. Monday evening June 9th there will be a Missionary Address delivered by Rev. F. R. Webster, returned Missionary from Egypt, all who are interested in Missionary Work will do well to be present. A cordial invitation is extended to all. At this special time, I ask the Prayers of all Christian People, that Men and Women, young and old may be aroused to a sense of their need of God. Heaven is sweet, dear people, the Pit of Hell will be very bitter.—Rev. Geo Rhodes, Pastor.

On Tuesday, in Whitsun week, June 10th, 1924, the Lord Bishop of Ottawa will ordain to the Diaconate, Archibald Temple Carson and John Charles Anderson; and to the Priesthood, Rev. Frank Taylor, and Rev. John James Bannell, at 11 o'clock, in St. James Church, Morrisburg, Ont.

Mr. and Mrs. Irwin Hilliard left today (Friday) for Montreal. On Saturday at 10 a.m. they will go on board the "Marlock" to Glasgow, Scotland. They will be absent about two months, during which time they will visit several places of interest overseas. Prior to their departure they were tendered bon voyage by a large number of their friends in this community.

Mr. W. H. Thresher, organist and Choir-master of Wall St. Methodist Church, Brockville, will bring his choir of 55 trained voices to Iroquois to give a Sacred Concert in the Methodist Church on Friday evening June 13th. The programme will include a beautiful Cantata besides solos, quartettes and duets. Remember the date, June 13th, and watch for programme. Mr. A. A. Sweet, M.P.P., chairman.

Dr. Charles A. Loudon wishes to announce that he will begin a medical practice this week in the offices formerly occupied by Dr. A. B. Clayton. Dr. Loudon is a graduate of Queens University and has spent the past year as an assistant to Dr. Madill in the Hepburn Hospital, Ogdensburg. He has also taken a special course in Obstetrics in the Lying-in-Hospital, New York.

We are pleased to note, among the successful candidates in the fourth year Exams, held recently at Toronto University, that Miss A. M. Hilliard took second highest standing in Biological and Medical Science.

Mr. Edward Alfred Tilton, who had been receiving treatment at Brockville, passed away on Sunday. The remains were conveyed to Morrisburg Monday afternoon for interment.

It was announced this week at the headquarters of this military district that owing to the lack of funds there will be no cadet camp at Barrie field this coming summer. This announcement was made following instructions received from Ottawa to the effect that cadet camps throughout the Dominion have been cancelled for the present year.

A carload of 1,500 dozen empty beer bottles and whiskey bottles which were to be shipped from Ogdensburg to the Canada Bottling Works in Toronto were seized by customs agents in the New York Central yards at Ogdensburg Saturday, and Lawrence Lundy, of Ogdensburg, who is said to have been loading the car, was arrested. It is said that a Canadian who was the representative of the consignee, disappeared before he could be identified.

Spring bedding plants of every variety vines, etc., for sale at Geo. W. Harrison's.

Spencerville defeated Brockville 5 runs to 1 at Brockville, Tuesday before a large holiday crowd at the Fulford Athletic grounds in the first home game of the Eastern League, their victory giving them three straight wins in the league race. By defeating Brockville Spencerville has put the quietus on Cardinal, Prescott and Brockville in succession.

Mrs. Harry G. Pepall, wife of Harry G. Pepall, Toronto, formerly manager of the Aemilium Jarvis bond firm of Bay street, Toronto, and her two children, Ned, aged five years and Rosemary, aged three, lost their lives when their summer cottage at Eastbourne Lake Simcoe, was destroyed by fire. Aileen, aged eight, the eldest daughter, and the maid escaped.

A monster sturgeon, one of the largest ever caught in the vicinity of Cape Vincent, was landed by Robert Gault, a fisherman of that place, on Sunday when he hauled in his nets at the mouth of Mud Creek. The fish weighed 187 pounds and measured seven feet six inches in length. It has a girth of two feet, eleven and one quarter inches. Its value on the New York market is placed at about \$100.

TO MY FRIENDS IN MORRISBURG AND THE PUBLIC GENERALLY

When I came to Morrisburg today I heard of the rumors that I had my car stopped, was arrested, fined, and I do not know what all. I desire to contradict all such rumors; there is not a single word of truth in any of these statements. I have driven a car for 8 years and I have never been stopped or fined for speeding or for any other cause. MRS. FRANKLIN E. DEEKS

MRS. LAURENCE DILLABOUGH

Seized with an attack of heart disease shortly after she had risen for the day, Mrs. Laurence Dillabough of Brockville died very suddenly on Saturday morning at the home of her son-in-law Mr. A. J. Forward, Ottawa. She was in her 77th year. Mrs. Dillabough, formerly Miss Martha McIntosh was born and spent the early years of her life near Williamsburg village, but for many years had been residing in Brockville with her son-in-law Mr. L. M. Brown. She was visiting in Ottawa and had only been there a few days. She is survived by one son, Mr. J. V. Dillabough of Winnipeg and three daughters, Mrs. Arthur Nash of Morrisburg, Mrs. L.

M. Brown and Miss Annie Dillabough of Brockville. Her husband predeceased her 19 years ago; a daughter, Mrs. A. J. Forward, died in Ottawa four weeks ago. The funeral services were held in Brockville and the burial service was held in Morrisburg cemetery where interment was made. Two brothers, Mr. Isaac L. McIntosh of Williamsburg and Mr. John McIntosh of Elma, besides a number of nephews and nieces survive. A large number of relatives and friends from Williamsburg and surrounding district attended the burial service on Tuesday afternoon at Morrisburg. Deceased was of an affectionate nature and was dearly beloved by a large circle of friends.

JOHNSTONE & ANDERSON

Morrisburg, Ont. Phone 74

Tindal's Garage McLaughlin & Ford Service

Almost every motorist knows the benefit of draining off the worn out oil and refilling crankcase with fresh lubricant at regular periods, but this process of "changing the oil", as it is called, is usually more or less apt to be put off from day to day until the working surfaces of the motor are actually suffering for want of proper lubrication.

With the idea of giving better service to the motoring public and at the same time boosting our oil sales, we offer to change the oil in your motor, free of labor charge when we supply the necessary oil at regular prices.
