Heating Problems

House heating is a science—it should be done by experts. Any good salesman can tell you all their good qualities and lead many people to believe that their furnace is the best, that any one can install them, the sale is made, the contract signed, the furnace installed, or SIMPLY PUT IN, the fire made—works fine—just feel the heat, the money paid—thanks very much, hope you have have satisfaction, Good-Bye. Then the real test—cold weather. Say this room is chilly, open draft on furnace, puts on sweater coat—still no comfort, drive furnace hard soon the smell of gas, dust on furniture—where is the agent? Gone. Have to phone the tinsmith, furnace is too small, improperly installed—who is to blame. You! Have it done by Mechanics.

Polished Stove Pipes, Stove Boards, Coal Sifters and Hods on hand.

QUALITY & SERVICE—OUR MOTTO.

D. H. JACKSON

Phone 103 Winchester.

NOTES AND COMMENTS BY THE EDITOR

Thanksgiving Day is only a short time off, and every Canadian has much to be thankful for.

The way some ladies keep their hands soft and white is by allowing mother wash the dishes.

Not satisfied with stealing Canadian liquors over the border, the United States are now attempting to steal our Niagara Water.

The new four wheel brakes may be a good thing for automobiles, but the ordinary pedestrain needs most four pairs of eyes to avoid being knocked over.

A manager of a local bank asked a prospective customer "how much liquid assets he posessed," and was surprised when the man gave him a knowing wink and asked him to come around in the evening and he would take him into his cellar.

Of three thousand illicit stills seized in the past year throughout the Dominion of Canada, 428 were in the "wet" Province of Quebec. The average per province is 333, yet Quebec has nearly a hundred above the average. And yet some people say the moonshine operators are confined to prohibition provinces.

A foreigner from central Europe, committed suicide at Tupper Lake, N.Y. last week by setting on a charge of dynamite and turning on the electricity that caused the explosion. He must have been lonesome for some of the excitement in his Native land.

And once again we remind you that this is a good town to live in, a good place to trade, and a good one to keep your money in. But in time it will cease to be either unless you are as loyal to the town as it is to you. See which merchants are advertising in this paper and tell them what you want.

Cancellation of the contract let without tenders by Hon. Frank C. Biggs for 1924 markers at 23 cents a pair has been justified by the conclusion of a new bargain at 12¾ cents. On an order for 300,000 sets this means a saving of more than $30,000 which the spendthrift U.F.O. minister would have presented to the firm he favored.

It isn't the job we intended to do
Or the labor we've just begun,
That puts us right on the ledger-sheet,
It's the work we've already done.
Our credit is built upon things we do,
Our debt on things we shirk;
The man who totals the biggest plus
Is the man who completes his work.

Hon. George S. Henry, Minister of Highways, in a recent address, gives a warning to the speed motorists, and it is, in substance, that after the first of next year any person convicted of reckless driving on the highways of Ontario will be subject to imprisonment. A similar penalty will be imposed on all those failing to return to the scene of an accident. As Mr. Henry states, it is up to the motorist to obey the law. With hearty co-operation the number of accidents will be greatly reduced. The time has come when there should be no speeding. Just plain common sense ought to prevail in the use of the highways. The roads are for the public and it is necessary that every precaution be taken.

Who Did It?

A country school board was visiting a school and the principal was putting his pupils through their paces.

"Who signed Magna Charta, Robert?" he asked, turning to one boy.

"Please, sir, 'twasn't me," whimpered the youngster.

The teacher, in disgust, told him to take his seat; but the old-tobacco-chewing countryman, on the board, was not satisfied, so he said:

"Call that boy back. I don't like his looks. I believe he did do it."

Orangemen Will Entertain.

The local orange lodge will give an entertainment in the Town Hall on Friday night, Nov. 9th. The Grand Master, Mr Charles Lount, of Cornwall, and other speakers will be present, also musical programme. No admission fee. Silver collection at door. All friends are cordially invited to be present.

W. C. T. U.

The regular monthly meeting of the Women's Christian Temperance Union was held at the home of Mrs. Faith on Wednesday afternoon, the President Mrs. Empey occupying the chair. Devotional exercises were conducted by Mrs. Johnston, evangelistic supt., who also read a letter, an appeal to the women for their prayers, especially for the temperance cause in the Province of Alberta, where the vote is to be taken next Monday Nov 5th. Mrs. Johnston emphasized the great responsibility of the women of the unions in these trying times, when our own Province is in danger of a change in the Temperance Act. Minutes of last meeting were read by Mrs. Armstrong and business arising from same was discussed. The flower, fruit and delicacy department asked that each member report to the supts. any work in that department. The arrangements for the medal contest and entertainment to be held on Thanksgiving night were discussed and the committee reported a very interesting and full programme was being prepared. Ticket sellers were appointed, being Mrs. Boves and Mrs. Henderson for the South-West corner; Miss Irving for the North-West; Miss Empey for the North-east and Mrs. Armstrong and Mrs. McQuatt for the South-east.

A letter was read by the President acknowledging parcels of literature that had been sent to the Indians and asking that more papers and magazines be forwarded. This was unanimously agreed to by the union, and papers and magazines given to our President will be forwarded without delay. Mrs. Challies of Morrisburg was heartily welcomed to our meeting and gave a short account of past memories in respect to our union and the carrying of local option in Winchester. Twenty-five answered to the roll call. After which Mrs. Faith served afternoon tea which was very refreshing. The next meeting will be the parlor meeting, which is to be held at Mrs. Sweet's home in November.

SOCIAL AND PERSONAL NOTES

Mr. Alvin Deeks arrived home from the West the first of the week.

Mrs. A. E. Cameron, Brockville, is the guest of Mrs. A. W. Beach.

Mr. Cecil Dukelow arrived home Saturday from Storchoaks, Sask.

Mrs. Wm. Gillespie has returned home to her daughter's in Toronto.

Mr. Ray Lavere of Spencerville visited friends in town last Saturday.

Mrs. J. G. Challies, of Morrisburg is a guest of Mr. and Mrs. Alex Ross.

Mr. Irwin Watts has been engaged as book keeper in Mr. T. O. Keyes store.

Miss Elsie Mennie of Ottawa is spending Thursday with her sister Mrs. Geo. T. Dixon.

Miss Laura Dukelow spent the week end the guest of Miss Olive Johnston, Cass Bridge.

Mr. Andrew W. Summers returned from his trip to Western Canada on Thursday of last week.

Mrs. O. Casselman and Mr. Arnold Casselman were visiting at Mrs. F. Cross' last week.

Mr. Preston I. Timmins of the Ottawa Normal School spent the week end at his parental home here.

Mr. and Mrs. Robt. Suffel attended the anniversary services in the Inkerman Methodist church last Sunday.

Mrs. G. G. MacEwan and Miss Thelma Abernethy of Ottawa spent the week end the guest of Mr. Chester Timmins.

Mr. Albert Robinson who has spent the past two weeks in the Hospital at Ottawa was able to be brought home on Tuesday.

Mrs. Wyman of Ottawa, with her little daughter Shirley, is spending this week with her parents, Mr. and Mrs. James Anderson.

Miss Ethel Lesley, Mr. and Mrs. Herb Jackson and family and Mr. Irvin Hanes were calling on Mr. and Mrs. F. Cross one evening last week.

Tottie E. Reveler of the Union Bank of Canada, has been transferred from the Gerrard and Greenwood Branch to the Eastern Superintendents Office at the Head Office.

The Misses Ada Derby, Sadie Dixon and Messrs Alex MacDonald, Jack Leigh, Ralph Briggs and Bryon Johnston of Ottawa were the guests of Mr. and Mrs. Geo. T. Dixon on Sunday.

Mr. and Mrs. G. Watson Johnston announce the engagement of their youngest daughter Maud Cummings to Mr. Edward Bush of Hallville, Ont. The marriage to take place Nov. 14th, 1923.

The Rev. W. S. Weary rector of S'Matthias Church who has been taking a Missionery tour of the Deanery of Lanark returned home on Sunday evening. He will take the service on Sunday morning next at 10.30 A.M.

Mr. and Mrs. John Keays, of Stittsville Ont., announce the engagement of their second daughter, Ethel Evelyn, to Mr. James Robert Barkley, of Ottawa, second son of Mr. and Mrs. George Barkley, Winchester, Ont.

Visitors at the home of Mr. and Mrs. F. Cross Sunday were Mr. and Mrs. Mailon Kyer and Mr. Wilburn Kyer of Goldfield, Miss Annie Jane Kyer of Cornwall, Mr. and Mrs. M. Laundreville Jr., Miss Margaret Laundreville and Miss May Laundreville of Ottawa and Miss Verna Strader.

Mrs. T. O. Keyes assisted by Mrs. (Rev) Waddell welcomed her friends to her new home on Friday evening, Oct. 26th. Miss Luva Allison of Mcrewood, niece of Mrs. Keyes, directed the guests to the drawing room. Mrs. A. B. Allison led the way to the dinning room which was decorated in pink and white, in the centre of the table was a beautiful boquet of pink and white mums. Mrs. (Dr.) S. J. Keyes of Ottawa and Mrs. J. W. Ault of town poured tea and Mrs. J. A. McDougal cut the ices. Others who assisted in the dining room were Miss M. Empey, Miss M. Kendree, Miss Edna Cass and Miss Nora Elliott. About eighty guests were served to a very dainty lunch. Mrs. Keyes received the best wishes for a long and happy life in her new home, from her many friends.

A distinction in Free Masonry that come to the few, very selet and deserving was bestowed on Mr. A. Sweet, M.P.P. of Winchester, last week when he had conferred on him at Toronto, the 33rd degree Scottish Rite Masonry. The receiving of this degree is a distinction that come to but few masons, as the Supreme Council is limited in number, and the candidates are chosen from over all the Dominion. On the death of a member, a new member is chosen. Last March Mr. Sweet received notice that he was next in line for the degree, and it was only a few weeks ago that he was notified to appear in Toronto on Oct 24th to be duly enrolled with the usual Masonic ceremonies. A singular coincident was that Sir John M. Gibson, who 21 years ago conferred the 32nd degree on Mr. Sweet, also conferred on him the 33rd degree. Outside the city of Ottawa there are only four other 33rd degree masons in Ontario east of Toronto, and that Mr. Sweet should have been chosen, unsolicited and unknown to himself, for such distinguished Masonic preferment, is an honor he may well feel justly proud of, and an honor his home lodge feels is deserving and merited. The Press joins with Mr. Sweets many friends in congratulations.

Never has the Methodist parsonage looked prettier than on Thursday last when Rev. J. A. and Mrs. Waddell received for the first time since their coming to Winchester.

The drawing room was decorated with choice cut flowers, chrysanthemums and astors in shades cream and rose being used in profusion.

Pink candles and pink carnations were used effectively in the dining room to adorn the tea table.

In the afternoon Mrs. Waddell was assisted in receiving by Mrs. Aaron Sweet. Mrs. J. W. Ault invited the guests to the tea room where Mrs. George Reveller and Mrs. A. W. Beach poured tea. Mrs. N W. Beach cut the ices, while Mrs. Percy Durant, Mrs Fred Parker and Miss Erma Beach served the guests.

Mr. and Mrs. Waddell received together in the evening and in addition to those who assisted in the afternoon, Mrs. E. M. Shaver and Mrs. R. Suffel poured tea and Mrs. H. L. Hughes directed the guests to the tea room. Among the out of town guests was Mrs. W. J. Robinson of Kingston, mother of the hostess. Misses Mabel and Jean Waddell opened the door to the many friends who called to welcome the new pastor and his wife to Winchester.

LOCAL AND GENERAL JOTTINGS

Get your furnace in order.

Put away the garden tools and get out the snow shovel. You will soon need it.

Mr. J. W. Ault is shipping between two and three hundred cans of milk daily to Montreal.

A number of our citizens intend going to Kingston to-morrow to see the great foot-ball match between Queens and Varsity.

Don't forget to secure your cooking and fowl for Thanksgiving from the W.M.S. ladies on Saturday, Nov. 10th at the S. S. rooms.

Mr D. Melvin has installed a "radio" at his residence on St. Lawrence Street, and he has now "the world at his door" in the way of popular music, etc.

The Canadian McIntosh Red apple is the champion dessert apple of the British Empire, so the judges at the Imperial Fruit Show, which opened in Manchester England, adjudged.

One Touch of Lumbago makes the whole World Kin—and a few rubs with Williams' Camphorated Mustard Cream takes away the pain and loosens the stiff joints. 35c a jar—at your druggists. Rub it on and rub it in, it won't blister.

Mr. Alex Madden whose farm is in the vicinity of Williamsburg, suffered a severe loss on Thursday evening of last week, when his barn and contents, including all this season's crops and some farm machinery were destroyed by fire. The origin of the fire is unknown.

A well known and highly respected resident of Williamsburg in the person of William I. Merkley, died at his late home on Sunday evening, Oct. 21st, 1923, in his sixty-fifth year. Death was not unexpected as Mr. Merkley had been in a critical condition for some time.

Rev. J. B. McLeod of Montreal who preceeded Rev. Mr. Glassford as pastor of St. Paul's Presbyterian church here, was heard with gladness and profit in the morning and evening services last Sunday. Rev. Mr. McLeod received a warm welcome from his many friends here.

The Ontario Government intend erecting a monument in Queens Park to the late Sir James Whitney, who so ably served this province and represented Dundas County. If the Government would carry out one of Sir James' last wishes, they would make and maintain the Whitney memorial road between Morrisburg and Ottawa.

Masquerade Ball.

The Masquerade Ball, held in the Town Hall last night was a decided success. The attendance was good and a large number were masked. The prizes for best lady and gent costume, were awarded to Miss Hazel Wallace and Mr. Sherwood Wilson. Music was furnished by the Shiesha orchestra while a very dainty lunch was served in Lannins Lunch Room. Everyone reports a very enjoyable time.

Property Destroyed.

Everyone likes to see the young people have a good time on hallowe'en night, and for several years past Winchester has been free of of the rowdy element on that night, whose chief delight is in destoying property. Last night we regret to say some property was needlessly destroyed, and to no purpose. The large cement tiles at Mr. Beach's that were smashed was a case of wanton destruction as was also the breaking of wire and other fences. The monument erected at Sweet's corner was a work of art in its way and caused much amusement.

Late Mrs. McDiarmid

At her late home in Winchester Township, Janet McDonald, wife of William McDiarmid, was called to rest at the ripe age of 71 years. For eight years she had borne an affliction that rendered her helpless and almost constantly a sufferer, but with rare patience and fortitude she had endured her trial. The constant care of her husband and family ministered to her wants and brought cheer and comfort in her seclusion. She was a member of Ormond Baptist Church for many years but was prevented from enjoying the Church privileges during recent years. She was born and lived nearly all her life on the farm where she bade farewell to all things earthly. Her mind was stored with Scripture truth and beautiful poems which she had memorized in early days and which brought cheer to her in lonely hours. The funeral service was conducted by the Rev S. F. Farmer, of Ottawa, in the absence of her pastor. There remain to await a blessed re-union beyond, her husband two daughters, Annie and Katie, and two sons Millo and Duncan, all at home.

Business and Real Estate Changes

Mr. Andrew Christie, who for forty years and more has been the careful, obliging, accomodating, trusted and successful agent for many Fire Insurance Companies in this section, and who is so well known in this part of Eastern Ontario, has retired from business, and hereafter his insurance business will be looked after by Mr. Albert Dixon, who also has become well and favourably known throughout this section as a successful Life Assurance agent. Mr. Dixon took over Mr. Christie's agencies on Monday, and hereafter will look after all his policies, renewals, etc, and we bespeak for him the same success that has for so many years been his predecessor's, Mr. Christie.

Mr. Dixon, who just recently sold his residence to Mr. Wallace, has purchased the brick residence of Mrs. Isabel Brown on Church Street, and takes possession this week.

Mrs. Wm. Scott who occupied a part of Mrs Brown's residence has moved into the house on Main Street east lately occupied by Mr. Wm. Workman.

Mr H. B. Fetterly, I.P.S. has purchased the residence of Mr. J. A. McDougall on the corner of Maine and Alexander streets and will take posession on Dec. 1st. Mr. McDougall will occupy the apartments over his store on Main Street.

LOCAL AND GENERAL JOTTINGS

The many real estate deals of late is evidence that Winchester is not standing still.

The hunters are off and our anticipation of roast venison is growing keener and keener.

A little lad named Wallace received a bad gash on his head on Monday, when at play at the Public school.

Holy Communion in S'Matthias Church on Sunday morning next Nov. 4th, at 10.30 A. M. The rector will preach.

The members of the Methodist W.M.S. will hold their annual Thanksgiving food sale in their S.S. rooms on Nov. 10th. Please keep the date in mind.

We would draw the attention of our readers to the advts on page three of this issue, and the article on loyalty to your home town on page six.

The mysterious car that was referred to by the Press a couple of months ago is not now on the road, and its driver is, so to speak, also retired. But there are other "mysterious" messengers. In time they also will be nabbed.

After a lingering illness, Mrs. Ella O. Ault, widow of the late Edward Ault, died Saturday, Oct, 20th, at the home of her daughter, Mrs. John L. McMartin, Morrisburg. Mrs. Ault was born in Williamsburg, February 27th, 1846, being one of the large family of the late Mr. and Mrs. George Whittaker.

For some months past dogs have been running cattle and sheep to the south of Kemptville and Dr. Fenton has had a a valuable young Jersey heifer killed by them. Owners of cattle in that neighborhood are obliged to lock their animals up over night for protection. There is talk of having a hunting party and destroying dogs found running at large on the farms adjacent to the village.

Buried To-day

The funeral of the late James Jones, Mountain township in his 77th year, who died at his home a few miles west of Winchester, on Tuesday Oct. 30th, took place this afternoon at maple Ridge Cemetery.

Sale Postponed.

The Auction Sale of Mike Young, Winchester township, advertised for Oct. 30th, is postponed until Saturday, Nov. 3rd. See posters for particulars. Sale to begin at one o'clock. Thos. Irving auctioneer.

Got the Bull

Mr. Rowat Elliott was the holder of the lucky number that got the bull that was drawn for at Mr. Lamoreux on Friday night last. There was a big crowd present. The editor of the Press fully expected to get that bull as he held that lucky number 13. No good.

In The Name Of The Law.

The picture under the above title to be shown here on Saturday night is pronounced one of the most thrilling and fascinating in the long list of good movies. It grips you at the very beginning, and like "Over the Hill" keeps hold of you all the way through. It is a picture well worth seeing, and the Town Hall will likely be filled on Saturday night.

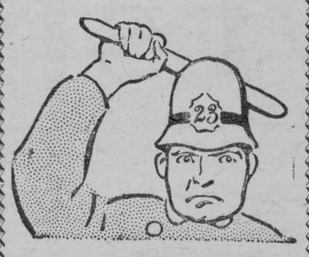
Fresh Fish Fisher's Friday.

Tip top mince meat the finest on the market at Fisher's.

Hotel Winchester

Winchester may well be proud of its hotel accommodation, and of the fact that it has the best conducted, the most comfortable and home like and the best table service of any hotel in Eastern Ontario outside the large towns and cities, and is better than most of them. Mr. Geo. Mowat since he purchased the hotel has been steadily improving it in every way. When he instituted the oil heating system, and added the upper balcony to the front, the public thought he had done pretty well, but last week he installed in the waiting rooms, the halls and parlour, beautiful white globes attached to the electroiers, and under the balcony outside is another large white globe with "hotel" across its face. All this is evidence that George is not only keeping a first class hotel but is increasing his business, and keeping up with the times. Everything about the place is orderly and quiet, no unnecessary loitering, no loud talking, and in fact a boarder in Hotel Winchester is as comfortable as in any private boarding house.

"IN THE NAME OF THE LAW."



Town Hall, Winchester Saturday Night, Nov. 12

No picture ever shown has ever received a more popular welcome. People have flocked not once, but several times to see this great thrill picture

There will also be a first class comedy.

See small dodgers, then see the show.

DO NOT SNUB YOUR CHILD.

"It took me forty years' struggle to get over the snubbing I received as a child," said a prominent man the other day.

"My parents were the good, old-fashioned sort who believed that their first duty was to instill a sense of humility into their children, so our every fault and defect was kept continually before us, and our every good quality minimized, and we were generally made to feel that we were worms of the dust that had no right to even try to lift our heads, much less to get up on our mind legs and walk.

"Whenever we expressed an opinion on any subject we were promptly squelched and given to understand that our views were so silly that we would do well to keep silent. Wherever we tried to do anything out of the ordinary all of our pep was taken out of us by being told that we never could succeed. Others might, but not we. Whenever we voiced an ambition it was laughed at. The idea of poor, ordinary commonplace dubs like we, thinking that we could accomplish anything great!

"Of course, our parents' idea was merely to keep us from becoming self-conceited, but the result was to kill all of our confidence in ourselves and to implant in us what the psychologists call an inferiority complex that has been a great handicap to us all of our lives.

"One of my sisters, for instance, is an unusually pretty woman, and all that she has ever lacked of being a great beauty is that swagger of beauty that makes a woman carry herself 50 per cent. above her looks instead of 90 per cent. under them. You know what I mean—that air that a pretty woman has that cries aloud to all who see her to come and admire her, and that sort of press-agents her charms.

"My poor sister has none of this aura of beauty. She hasn't even any style, because she had it so firmly impressed on her youthful mind that people were only flattering her when they told her what wonderful eyes, and beautiful hair, and lovely complexion she had, and that good looks didn't amount to anything, anyway, that she acquired a deprecating air that has made her slink through the world as unobtrusively as possible, instead of queening it, as is a beauty's right.

"As for myself, I have missed a thousand golden opportunities just through lack of faith in myself. It had been so bred in my bones that I had only the most mediocre ability that I was afraid to undertake things that I really knew I could do, afraid to assert myself, afraid even to try to climb.

"It took years for me to find out that we really write our own price tags, and that other people take us at our own valuation nine times out of ten. Perhaps the humble shall be exalted, and those who take a back seat be asked to come up and sit on the platform in the next world, but it doesn't happen in this.

"It took me other years to find out that the secret of success is self-confidence. You may not be always able to do everything that you aspire to do, but you certainly can do nothing more than you think you can. To doubt yourself paralyzes energy and ambition.

"Before you can inspire confidence in other people you must have faith in yourself, and you can only have this if you have a good amount of self-esteem, and anybody who robs you of this has done you a deadly wrong.

Nearly all the men in the whole history of the world who have accomplished great things have been great egotists. No meek, meaching general could lead an army to victory no matter how brave he was or how wonderful a tactician.

It takes a man who believes in nimself implicitly to inspire a sublime faith in his followers. Na deprecating business man could borrow a hundred thousand dollars from a bank. It takes a man who thinks he is a Napoleon of finance to hypnotize others into seeing him as he sees himself, and give him all the credit he wants.

"I'll admit that self-conceit is the most unattractive quality that anyone can possess. No one is so tiresome as the egotist who tells you what a wonder he is, and boasts of his own achievements, but, even so, he is far more apt to arrive than the modest man who does not blow his own horn, who does not exploit his own talents, but who waits, generally in vain, for a purblind public to discover and reward his virtues.

"For this reason, and, judging from my own experience, I think it is a mistake for parents to try to teach their children to think poorly of themselves and their abilities. Especially is it a crime to discourage a child's ambitions, and t is a double-dyed crime to make a child feel that its possibilities are limited by its defects.

"The braggadocio of youth may sound ridiculous, but who knows what are the possibilities of any human being, or what he may achieve?

"A swelled head is objectionable, but it is better than a pinhead any day, and that is the point that parents who are always belittling their children will do well to consider."—Dorothy Dix.

HAVE SINK AT PROPER HEIGHT.

How many rounded shoulders and bent aching backs can be traced to sinks and tables so low that the worker has to lean over constantly? The bottom of the sink, its working surface, should be high enough so the woman can just touch it with her clenched fists, held straight down in front of her. This means she can stand erect in washing dishes. If the sink is too low and cannnot be raised, a wire standard can be purchased for a quarter that will hold the dishpan steady at the right height.

NO MUSS.

Pancakes, waffles and batter cakes usually are popular with the family, but are a trial to the cook because the batter is so drippy and apt to muss up the stove when being put into the hot griddle by the spoonful. I avoid all this by making my batter in a big pitcher. It is then unnecessary to use a spoon at all in dropping the batter on the griddle. Just pour it out in nice little puddles and you have cakes of a more uniform size and no muss at all.—M. B. W.

THOSE USEFUL CLOTHESPINS.

When it is desired to strain any hot liquid such as jelly, cottage cheese, soup or starch through a cloth, pin the cloth to the top of the receptacle which is to contain the liquid with ordinary clothespins. This will not only make the work easier, but will prove a safeguard against scalding.

A POPULAR BLOUSE IN SLIP ON STYLE.

4509: An old friend with new features is this stylish model. The fulness of the front makes this style attractive for slender figures. The sleeve may be in wrist or elbow length.

The Pattern is cut in 6 sizes: 34, 36, 38, 40, 42 and 44 inches bust measure. A 38 inch size requires 2⅝ yards of 32 inch material. If made with short sleeve 2¼ yards will be required.

Pattern mailed to any address on receipt of 15c. in silver or stamps, by the Wilson Publishing Company, 73 West Adelaide St., Toronto. Allow two weeks for receipt of pattern.

Ocean Greyhounds.

In eighty-three years overseas travel has been built up until from its small beginnings it has reached the height of perfection and luxurious comfort that is obtainable to-day.

The Britannia, the first Cunard liner which left Liverpool for Boston and Halifax, carried sixty-three passengers and accomplished the journey in 14 days and 8 hours. Her length was 207ft., and she had a speed of 8.5 knots

To-day the Mauretania, one of the world's fastest liners, has completed the trip in 4 days 10 hours 41 minutes, while an average Cunarder with a length of 910ft. has a speed of 27.04 knots.

Whereas formerly one oil lamp sufficed to light two cabins, to-day the Aquitania has 10,000 electric lamps, while her electric power is sufficient to supply the domestic needs of a town of 70,000 inhabitants.

As compared with tub baths in passenger cabins we have to-day 105 private ordinary and shower baths, and a swimming pool, on board one liner. The morning news by wireless at the breakfast table is not the least of the wonderful achievements in the romance of world travel.

Didn't Know the Brand.

Old Sport (trying to ring in)—"I see this ozone is putting a fine tint on that pretty cheek of yours!"

Saleslady (at the shore) — "This ain't 'Ozone,' old dear—it's called the "Bloom of Youth."

Tangled Trails

—BY WILLIAM MACLEOD RAINE

(Copyright, Thomas Allen.)

CHAPTER XVI.

THE LADY WITH THE VIOLET PERFUME.

"I won't have it," Kirby said flatly. "If Miss McLean tells her story to the district attorney he'll probably arrest her. It'll come out about her sister an' the papers will run scareheads. No need of it a-tall. Won't hurt me to stay here a few days if I have to."

Jack, dapper and trim, leaned on his cane and watched his cousin. He felt a reluctant admiration for this virile cousin so picturesquely competent, so clean-cut and four-square of mind. Was he in love with the Wild Rose from Wyoming, whose spirit also was like a breath from the sweet hill pines? Or was his decision only the expression of a native chivalry that went out to all his friends and perhaps to all women?

"They'd certainly arrest her," Jack commented. "From a lawyer's point of view there's every reason why they should. Motive for the crime, sufficient; intention to force the victim to make reparation or punish him, declared openly; opportunity to commit it, confessed; presence on scene and eagerness to escape being seen there, admitted. The case against her is stronger than the one against you." He offered this last with a smile decorously but not wholly concealed.

"Yet she couldn't possibly have done it!" the cattleman replied.

"Couldn't she? I wonder." The Beau Brummel stroked his bit of mustache, with the hint of insolence his manner often suggested.

"Not possible," said Lane forcefully. "Uncle James was a big, two-fisted fighter. No slip of a girl could have overpowered him an' tied him. It's not within reason." He spoke urgently, though still in the low murmur both the cousins were using in order not to be overheard.

Jack put a neat, highly polished boot on the desk of the sergeant of police. "Ever hear of a lady called Delilah?" he asked lightly.

"What about her?" In Kirby's quiet eye there was a warning.

The man-about-town shrugged his well-tailored shoulders. "They have a way, the ladies. Guile, my son, is more potent than force."

"Meaning?"

"Delilah chloroformed Samson's suspicions before she sheared his locks."

Kirby repressed an anger that he knew was worse than futile. "If you knew Miss McLean you couldn't misjudge her so. She thinks an' acts as straight as a man."

"I don't say she did it, old top. I'm merely pointing out that it's possible she did. Point of fact your friend made a hit with me. I'd say she's a game little thoroughbred."

"You an' James will regard what she told you as confidential, of course."

"Of course. We're of your mind, too, though I put her proposition to you. Can't see anything to be gained by airing her story unless it's absolutely necessary on your account. By the way, James wants me to tell you that he thinks you won't have to spend another night at this delightful hotel the city keeps for its guests. Bond has been practically agreed on."

"Fine. Your brother's a brick. We're goin' to run down this business, he an' I, an' drag the truth to light."

A glitter of sardonic mockery shone out of the dark eyes of Cunningham. "You'll work together fine and Sherlock-Holmes this thing till it's as clear as mud," he predicted.

By the middle of the afternoon Kirby was free. After he had talked over with James a plan of campaign, he called Rose up on the telephone and told her he would be right out to Cherokee Street.

She came to meet him in the stuffy parlor of the boarding-house with hand outstretched.

"Oh, Kirby, I'm so glad to see you and so sorry I was such a horrid little beast last time we met. I'm ashamed of myself. My temper explodes so—and after you came to Denver to help me and gave up so much for me. You'll forgive me, won't you?"

"You know it, Rose," he said smiling.

"Yes. I do know it," she cried quickly. "That makes it worse for me to impose on you. Now you're in trouble because of me. I should think you'd pretty near hate me."

"We're in trouble together," he corrected. "I thought that was supposed to bring friends closer an' not to drive them apart."

She flashed a quick look at him and changed the subject of conversation. Just now she could not afford to be emotional.

"Are you going back to Twin Buttes?"

"No. I'm goin' to find out who killed James Cunningham an' bring the man to justice. That's the only way to clear us both before the world."

"Yes!" she cried eagerly. "Let me help you. Let's be partners in it, Kirby."

He already had one partner, but he threw him overboard instantly. James Cunningham was retired to the position of an adviser.

"Bully! We'll start this very minute. Tell me all you know about what happened the evenir' of the murder."

She told again the story she had confessed to his cousins. He asked questions, pushed home inquiries. When she mentioned the woman who had passed her on the stairs he showed a keen interest.

"You say you knew it was a woman with the man by the perfume. What kind of perfume was it?"

"Violet."

"Did you notice a violet perfume any other place that night?"

"In your uncle's living-room."

"Sure?"

"Yes."

"So did I."

"The woman I met on the stairs, then, had just come from your uncle's rooms."

"Looks like it," he nodded in agreement.

"Then we've got to find her. She must have been in his apartment when he was killed." The thought came to Rose as a revelation.

"Or right after."

"All we've got to do is to find her and the man with her, and we've solved the mystery," the girl cried eagerly.

"That's not quite all," said Kirby, smiling at the way her mind leaped gaps. "We've got to induce them to talk, an' it's not certain they know any more than we do."

"Her skirts rustled like silk and the perfume wasn't cheap. I couldn't really see her, but I knew she was well dressed," Rose told him.

"Well, that's somethin'," he said with the whimsical quirk to his mouth she knew of old. "We'll advertise for a well-dressed lady who uses violet perfume. Supposed to be connected with the murder at the Paradox Apartments. Generous reward an' many questions asked."

His badinage was of the surface only. The subconscious mind of the rough rider was preoccupied with a sense of a vague groping. The thought of violet perfume associated itself with something else in addition to the darkness of his uncle's living-room, but he did not find himself able to localize the nebulous memory. Where was it his nostrils had whiffed the scent more recently?

"Don't you think we ought to see all the tenants at the Paradox and talk with them? Some of them may have seen people going in or out. Or they may have heard voices," she said.

"That's a good idea. We'll make a canvass of the house."

Her eyes sparkled. "We'll find who did it! When two people look for the truth intelligently they're bound to find it. Don't you think so?"

"I think we'll sure round up the wolf that did this killin'," he drawled. "Anyhow, we'll sleep on his trail for a moon or two."

They shook hands on it.

CHAPTER XVII.

IN DRY VALLEY.

If Kirby had been a properly authenticated detective of fiction he would have gone to his uncle's apartment, locked the door, measured the rooms with a tape-line, found imprints of fingers on a door panel, and carefully gathered into an envelope the ashes from the cigar his uncle had been smoking. The data obtained would have proved conclusively that Cunningham had come to his death at the hands of a Brahmin of high caste on account of priceless gems stolen from a temple in India. An analysis of the cigar ashes would have shown that a subtle poison, unknown to the Western world, had caused the victim's heart to stop beating exactly two minutes and twelve seconds after taking the first puff at the cigar. Thus the fictional ethics of the situation would have been correctly met.

But Kirby was only a plain, outdoors Westerner. He did not know the conventional method of procedure. It did not even occur to him at first that Apartment 12 might still have secrets to tell him after the police and the reporters had pawed over it for several days. But his steps turned back several times to the Paradox as the center from which all clues must emanate. He found himself wandering around in that vicinity trying to pick up some of the pieces of the Chinese puzzle that made up the mystery of his uncle's death.

It was on one of these occasions that he and Rose met his cousin James coming out of the apartment house. Cunningham was a man of admirable self-control, but he looked shaken this morning. His hand trembled as it met that of his cousin. In his eyes was the look of a man who has suffered a shock.

"I've been sitting alone for an hour in the room where Uncle James met his death — been arranging his papers," he explained. "It began to get my nerve. I couldn't stand it any longer. The horrible thing kept jumping to my mind." He drew his right hand heavily across his eyes, as though to shut out and brush away the sight his imagination conjured.

(To be continued.)

Real Treasure Islands.

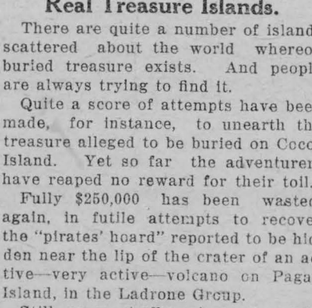
There are quite a number of islands scattered about the world whereon buried treasure exists. And people are always trying to find it.

Quite a score of attempts have been made, for instance, to unearth the treasure alleged to be buried on Cocos Island. Yet so far the adventurers have reaped no reward for their toil.

Fully $250,000 has been wasted, again, in futile attempts to recover the "pirates' hoard" reported to be hidden near the lip of the crater of an active—very active—volcano on Pagan Island, in the Ladrone Group.

Still, as a set-off against many failures, there have been a few successes There is no doubt, for instance, that a Liverpool sailor named John Adams unearthed treasure to the value of between $750,00 and $1,000,000 on Auckland Island some years back; while William Watson, a shepherd, recovered in 1868 nearly a ton of gold that had been hidden on one of the Queen Charlotte Islands.

Likewise, two runaway seamen named Handley and Cross, successfully located and dug up a valuable hoard on Oak Island, off the coast of Nova Scotia, and this after many others had failed.



Just a Home Run.

Bird—"Great Scott, what is that, an aeroplane egg!"

A musical attachment to seek which would change its key if shown weight were being given, is one suggestion for protecting customers from dishonest tradesmen.

Vital Work of the Quarantine Service of Canada

(Prepared under the direction of Dr. J. A. Amyot, Deputy Minister, Department of Health, by Dr. J. D. Page, Chief of the Division of Quarantine).

One of the chief assets of a nation is its health. The vitality of a people is not only a national resource but one that largely determines national standing in the world arena.

The safeguarding of the health of the people from a national and community standpoint is the care of the federal and provincial health departments, the various medical health officers and numerous organizations. In a country of stable population, internal organization would probably be all that was necessary, but in the case of Canada, where immigrants are coming in by the tens of thousands every year, the possibilities of spreading an epidemic far and wide are very great unless the gates are closely guarded. Ths vital work is being carried on by the Maritime Quarantine Stations of the Dominion.

In thickly populated countries like Great Britain and France, with their well-organized systems of health control, the quarantine statiin has been dispensed with and replaced by what is known as the "follow-up" system, whereby tach individual landing from an infected vessel and believed to have been exposed to the disease, is referred to the local health authorities of the district to which he or she is destined. This method, however, is not practical in an immense and thinly populated country like Canada.

The most serious infectious diseases to be guarded against are cholera, plague, smallpox, typhus, and yellow fever. To prevent the transmission of these and other epidemics into this country from an infected ship, the Dominion Government quarantine stations, situated at Quebec, P.Q., Halifax Nova Scotia, St. John, New Brunswick, and Victoria, British Columbia, besides maintaining officers at all the principal ports.

Value of Quarantine Stations.

At the four main stations adequate facilities exist in the form of well-manned hospital accommodation for each type of infectious disease; detention quarters for the proper observation of those who have been exposed to infection; disinfecting and fumigating plants; bath-houses and apparatus for fumigating ships' quarters. Large numbers can be handled rapidly and delay reduced to the minimum consistent with safety.

The man in the street noting the comparatively few cases of infectious disease quarantined each year, might be led to wonder if quarantine stations were not becoming obsolete. It is true that quarantine work is made lighter by the improved sanitary conditions throughout the world, including the countries from which Canada's immigrants are drawn, and also by the medical inspection before and during the voyage, but a little consideration will show that if a number of persons infected with plague or typhus were allowed to enter the country undetected, a serious epidemic might develop.

While it may be unlikely that terrible epidemics such as those of tht third and fourth decades of the last century which carried off their victims by thousands will ever again visit Canada, nevertheless the prevention of even a small epidemic would pay for the quarantine service for a long time, not to speak of the greater saving in health, working power and happiness. World statistics show that the quarantine station, now a century-old institution, has more than justified its existence and that its continuance, especially in thinly populated countries like Canada and Australia, is a necessary and far-sighted policy.

Where Colors Come From.

Insects, fish, and plants all help to provide the colors with which an artist paints his pictures. The cuttle-fish is responsible for sepia, this color being obtained from the fluid which the fish discharges in order to hide itself from its enemies.

The cochineal insect is the foundation of carmine, and at one time vermillion was made from it. Nowadays the latter color is produced chemically from mercury.

Another insect gives crimson-lake, at least, the color is made from the resin deposited by an insect on the banyan tree. From the madder plant are obtained both madder-brown and Turkey-red, the roots of the plant being washed, baked, and ground.

Indigo is made by soaking the indigo plant in water until it is decomposed. Gamboge is really a corruption of the name Cambodia, where the resin in providing the color is found. A natural earth from Sienna, in Italy, gives both ordinary and burnt sienna, the latter, of course, as the name implies, being burnt earth. Burnt umber is also an earth, while yellow ochre is a clay.

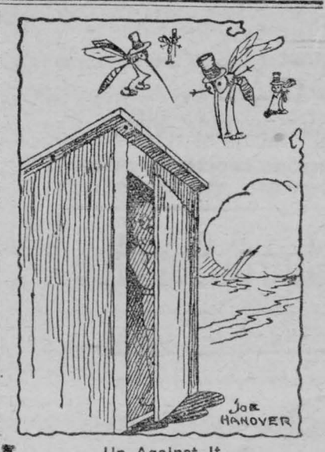
Prussian blue was originally made from the hoof of the horse, but now it consists principally of iron, potassium, and sulphur. It was first made in Prussia.

Ultramarine, which means "from beyond the sea," was formerly made by crushing a stone of that name. This process is now out of date, and the color is produced by chemical means. It is the same with the chromes of different shades, which are derived from the chemical chromium. Chinese white is oxide of zinc; it was first known in China, hence its name. Ivory-black sounds a curious contradiction; its foundation is burnt ivory and bone.

The Wrong Finisher.

A teacher was one day giving a lesson in a Scottish school when suddenly she caught sight of a little boy moving up and down, and then putting his head under a desk, and then up again. It worried her very much, so she went up to him, and was just going to ask him what was the matter when he saw him with a big round sweetie. She told him to go and finish it in the corner.

As she went on with her lesson she saw another little boy crying bitterly. She went up to him and asked him what he was crying for. He replied: "Please, teacher, that was my sweetie what that boy had; I only let him have a len' of it to have a sook."



Up Against It.

Mosquito—"Come on, fellows. There is the fellow in there that slapped my child last night!"

Fragrant Names.

Many charming legends have helped to christen flowers.

Narcissus was a beautiful youth beloved by the nymph Echo. But as he was incapable of love Echo died from grief. In order to punish him the goddess Nemesis caused him to see his image reflected in a fountain. Narcissus fell in love with his own shadow and slowly pined away until he was changed into the form of the flower.

The hyacinth sprang from the blood of another handsome youth, Hyacinthus, the son of a spartan king. While he was playing at quoits the god Zephyrus, in a fit of jealousy, caused a quoit to strike his head, killing him instantly.

Iris means "a rainbow." And because the rainbow was supposed to unite heaven and earth, the ancient Greeks regarded Iris as the messenger of the gods.

Snowdrop, bluebell and honeysuckle are names that explain themselves. The daisy is the "day's eye," but the foxglove is really the "fairy's glove."

The origin of tulip is in the Turkish form of "turban," a name prompted by the resemblance between the flower and the head-dress. Thyme is derived from a Greek word meaning "incense," and was so called because of its sweet smell.

The dahlia is a unique monument to Andrew Dahl, a distinguished botanist.

Knowledge of coming weather changes shown by birds is attributed to atmospheric pressure on their nerves.

HAVE YOU A FEAR BOGEY?

Not so long ago there were monarchs who lived in constant fear of being poisoned. They never partook of food until their cooks or other trusted servants had first eaten some of it. This was true of some rulers even in recent times, notably of the late Czar Nicholas of Russia and the Sultan of Turkey.

Most people would say that life under such conditions would hardly be worth living.

Yet there are few among the great mass of mankind to-day who do not live in the constant shadow of some kind of fear. People do not know just what they are afraid of, but they are afraid of something.

Don't Look for Trouble.

They have a foreboding of impending evil, a sense of something hanging over them, a vague dread of some coming calamity that they cannot escape. You will hear them say: "Well, I'm sure something is going to happen. I don't know just what it is, but I feel it very strongly. I don't know whether it's death, sickness, or an accident in the family, but something bad is coming."

I have a friend, writes Dr. O Swett Marden, in "Success," who has always lived under the shadow of fear, who is always and forever predicting trouble ahead. I rarely meet him that he does not see some impending catastrophe just in front of us; we are on the toboggan slide headed towards destruction; we are going to have hard times, worse failures than we have ever had before.

On the personal side he is afraid that his health will fail, and that his wife may meet with an accident; that his children will disappoint him. In short, there is nothing in the category of human ills that he does not anticipate.

Cowardice and Crime.

I have known this man for many years, and few, if any, of the dire things he has predicted have ever come to pass.

Are we not all, in some degree, like him? Almost everyone I know is worrying about something, anticipating some evil or misfortune.

It is estimated that there are more than five thousand different kinds of fear. In fact, fear in all its different phases of expression, such as worry, anxiety, anger, jealousy, timidity, suspicion, superstition, intolerance, greed and avarice, is darkening and crippling the lives of most of us.

Fear is the greatest enemy of the human race. It has robbed man of more happiness and efficiency, has made more men cowards, more people failures or mediocrities, caused more crimes and suicides than anything else.

Conquered by Courage.

Yet this Fear devil, with all its attendant worries and evils, is the greatest delusion ever conjured up by the mind of man. Fear is nothing but a bogey of the imagination, as unsubstantial as a soap bubble or a child's toy balloon. No matter how dreadful the face it wears, it collapses at the first touch of courage and common sense.

But in spite of this the majority of us travel from the cradle to the grave suffering, harassed, often driven to desperation through fear of something or other, ill-health, accident, poverty, failure—in nine cases out of ten, something that never happens.

Perhaps there is no one thing which has caused so much anxiety and worry to so many human beings as the question of to-morrow's bread. Where is it coming from? How shall we provide for ourselves and our loved ones? This worrying about debts, about the future in general, has wasted enough energy to transform the world, to provide for the future of the whole race.

The Story of Shorthand.

Although shorthand is so widely used to-day, probably few people realize that, in a different form, it was popular in the days of Ancient Rome.

The first mention of an abbreviated system of writing is made in connection with the Roman peot Quintus Ennius, 200 B.C., who devised a scheme of 1,100 signs for his own use. Then we have Plutarch's statement that Cicero's famous oration in the Roman Senate, in 63 B.C., was reported in shorthand.

References to shorthand were made in the works if Cicero, Horace, and Pliny, and the poet Ovid bears testimony to the fact that by means of these characters Caesar's political secrets were borne far over land and sea. Evidence goes to show that the Sermon on the Mount was reported in shorthand by St. Luke.

The writing was scratched on to tablets covered with a layer of wax. The tablets were afterwards fastened together at the corners by wire, thus forming a sort of book.

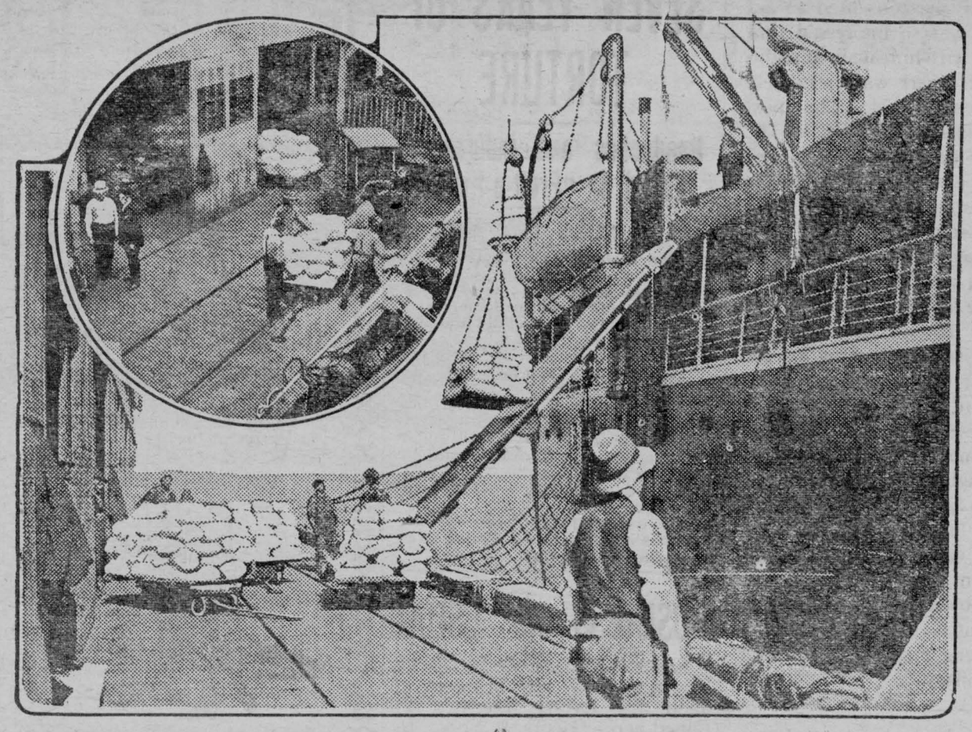
Relief for Famine Sufferers



Empress of Russia at Vancouver loading supplies for the earthquake stricken thousands of Japan

With every available inch of her cargo space crammed with foodstuffs and a capacity stock of ships stores, sufficient to replenish the supplies of the Empress of Canada and the Empress of Australia, on relief duty off the Japanese coast, the Canadian Pacific S.S. Empress of Russia was the first relief ship to arrive. She carried consignments of flour, canned milk and canned salmon amounting to 350 tons, from the Canadian government. The British Columbia branch of the Canadian Red Cross sent twenty tons of canned milk and fifty tons of other canned food-stuffs, while the Vancouver Japanese Association contributed an initial shipment of fifty tons of flour for their famine stricken countrymen More than two hundred & twenty-five of the "Russia's" three thousand tons of cargo was of flour

Roast Turkey!

For tender, meltingly delicious and wondrous flavored turkey, you must roast it in an SMP Crystal Ware or Pearl Ware roaster. This roaster roasts as if by magic. It bastes the roast or fowl—the fat dripping down from above. The delicate juices and rare flavor are cooked right in. Nothing is lost. There is no wasteful shrinkage.

When you buy expensive roasts of meat, turkey, or other fowl or fish, you want them perfectly cooked. For from $2.00 to $4.00 you can purchase a splendid SMP Roaster that will positively guarantee the roasting. To ensure the perfect cooking of an expensive 15-lb. turkey, surely it would pay you to use the proper utensil—an SMP roaster costing only one-quarter the price of the fowl! A roaster that fully guarantees perfect roasting!

After the hardest roasting, an SMP Roaster cleans as easily and simply as a china dish. No scouring or hard cleaning. There are styles and sizes to suit every size of roast, fish or fowl. Finished in Pearl Ware, two-coated pearly-grey enameled ware, or Crystal Ware, three-coated snowy-white enameled ware. You can inspect them at any good hardware store.

Qnality Cars at a Moderate Price.

Come and see them at the

OLD RELIABLE STAND

BAILEY'S GARAGE, Winchester, Ont.

Here and There

The world's record for grain trains was shattered by the Canadian Pacific Railway on October 5th, with a monster train of 125 car loads of wheat, over a mile long, which operated between Stoughton and Arcola. The contents of the cars, 185,000 bushels, weighed 5,566 tons.

All grain loading records in Alberta were completely smashed by the Canadian Pacific on October 10th when the Company loaded 753 cars, representing at least 1,065,200 bushels. If these cars were placed together they would make up a freight train about six miles in length, and a baker's dozen of these trains would extend from Calgary to Banff, a distance of 82 miles.

A record in western railroad construction was established on the Canadian Pacific Lanigan-Melfort line recently, when the last mile of track between Lanigan and Pleasantdale was completed in one day. D. A. Livingstone, engineer in charge, reports that seventy per cent of his crew of 25 were British harvesters.

Federal and Provincial Departments of Agriculture co-operated in the purchase in the British Isles of a large stock of horses, swine and sheep, including sheep owned by His Majesty the King, which arrived here recently. This is the second shipment of cattle to Canada through the co-operation of the agricultural departments with sheep and swine breeders throughout the Dominion.

T. K. Doherty, the Canadian Commissioner in the International Institute of Agriculture, estimates Canada's exportable wheat surplus this year at 300 million bushels, as against 150 millions from the United States, 110 from Argentina, 50 from Australia, and 15 from Russia. Canada, in fact, may be expected to supply nearly half the wheat exports of the whole world—300 out of 675 million bushels.

E. W. Beatty, K.C., President of the Canadian Pacific Railway, speaking at important centres on his recent extensive tour through the Canadian West, sounded a note of optimism, declaring that the general improvement in Canadian business conditions rendered an accompanying growing pessimism entirely unjustifiable. Stressing the need for a vigorous, intensive immigration policy by the government, he put forward as suggestions that the department of immigration and colonization should issue a general invitation through Great Britain, the United States and certain European countries, for settlers, and that greater advantage should be taken of the favorable policies towards emigration to Canada adopted by the governments of Great Britain and other countries.

Most extraordinary yields of grain are reported from the Provincial School of Agriculture at Olds, Alberta. On a one-acre patch 105 bushels of Marquis wheat were threshed, which is believed to be a record for this crop, exceeding the 82 bushel yield of Seager Wheeler, which was previously considered unsurpassable. From an acre seeded to oats, 205 bushels were threshed. Barley similarly yielded exceptionally. On a field of 27 acres an average of 70 bushels to the acre was secured, whilst on another, 10 acres of a different variety, a yield of 80 bushels to the acre was recorded.

Eignty per cent of Canada's national debt is owned by Canadians. Bank deposits in this country at the close of the last fiscal year, March 31st, 1923, totalled $1,218,000,000, an increase in ten years of $720,000,000. The year's trade records show Canada's foreign trade to be $1,000,000,000, an increase of $221,000,00 over last year, and Canada's exports to exceed her imports by $107,000,000, forty-two per cent of these exports being finished products.

The New HOOVER
MADE IN CANADA
IT BEATS... as it Sweeps as it Cleans

It's Lighter!

You can carry the *new* Hoover—whenever you need to—almost as easily as a carpet sweeper. *It's light!*

And that's only *one* of the improvements. *There are 9 others*—all important.

This is The Hoover you've always wanted—the world's greatest household electric cleaner.

See this *new* Hoover today. Phone us, we'll send one to your home—no obligation. We just want you to see what it will do.

What About It?

How about that "Whitney Memorial Road" scheme? Why not get busy now, so that when the Ontario Legislature meets our local members can go before the house well fortified with endorsements from all along the line. To make the road between Ottawa and Morrisburg a government highway, to be maintained by the government, and dedicated to the memory of the late Sir James Whitney, would not prove a very expensive public improvement as the greater part of the roadi s now in fairly good shape. The present premier, Hon. G. H. Ferguson, ought to give the scheme his personal and earnest support. He is our closest neighbor, he was a personal friend of the late Sir James, and, better than anything else, the scheme is a deserving one, one that had the sanction of the late Sir James Whitney, and the highway would not only serve a very large section of the richest dairying county in Ontario, but prove a most popular route for tourists.

The True Civic Spirit.

"The prosperity of a town is not guaranteed by the wealth of its inhabitants, but the uniformity with which they pull together, when a very important undertaking is to be accomplished. A man with a thousand dollars at his command and a love for his town in his heart, can do more for its upholding than the millionaire who locks up his capital and snaps his finger at home enterprise."

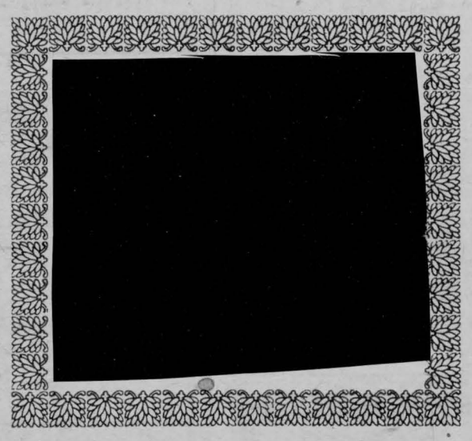
The above paragraph taken from an exchange is perfectly true. But unfortunately the enterprising man with the $1000, and a big heart full of loyalty to his home town does not have very good sailing weather when he launches out. There is that very personal friend who hates to see him "throw his money away in this dead town," and there is the back room critic who "sees the end of that chap's thousand" and predicts an early financial collapse. There are also those who are always good at giving advice they are never asked for, and can tell the other fellow how to do it, but never do it themselves. Unfortunately most communities are cursed with such pessimistic advisers and many a local and worthy enterprise has been squelched by them. But they do not always succeed, and when the subject of their satire and opposition does really succeed they are the first to seek his favor and patronage. Blessed indeed is the community with a dozen or more enterprising and optimistic spirits,—they are worth a hundred disgruntled lazy money lenders and do-nothing critics.

A story told in connection with the late Dr. Alexander Whyte, the well known Edinburg preacher, shows what a wide influence may be quietly exerted. A commercial traveller named Rigby was compelled to spend a week-end every quarter in Edinburg. He always stayed at the "Waverly," and worshipped at Free St. George's, being attracted by the wonderful ministry of Dr. Alexander Whyte. It was his invariable custom to try to persuade some other visitor to accompany him to the service. On one occasion, after breakfast, he saw a fellow-traveller writing busily and approached him to ask if he were going to any place of worship. The man answered that he was too busy, but finally he consented to accompany Mr. Rigby, and was so impressed that he asked permission to go with him again at night. At the evening service his heart was strangely moved, and he yielded to Christ. The next morning Mr. Rigby was passing the house of Dr. Whyte, when an impulse prompted him to call and tell the preacher of the help he had given to one soul. As the doctor listened tears rolled down his cheeks, and then he told how he had come away from the previous evening's service feeling that everything had been a failure. Then he bethought himself to ask the name of his caller, and on being told that it was Rigby, he exclaimed: "why, you are the man I've been looking for for years!" Dr. Whyte went to his study, and returned carrying a bundle of letters, from which he read such extracts as these: "I was spending a week-end in Edinburg some weeks ago, and a fellow-commercial called Rigby invited me to accompany him to St. George's. The message of that service changed my life." "I am a young man, and the other day I came to hear you preach at the invitation of a man called Rigby, and in that service I decided to dedicate my life to Christ." Dr. Whyte went to say that twelve of the letters were from young men, of whom four had since entered the ministry.

Editor A. W. Marsh, of the Amherstburg Echo, remarks that there is a lot of time wasted in unnecessary trivolous conversation over the telephone. For instance, how many of us when we call our friends do not often start off with "How are you today?" 'Can you guess who's sbeaking?' "No it isn't, try again." Etc. Often people who ordinarily consider themselvcs pretty industrious indulge in much talk that they would never dream of uttering when in conversation face to face. The great trouble is that not only are such people wasting their own time but frequently the time of other people who want to get the use of the line for business or other importance. If this applies to you, and it likely does to nearly all who read this, make a calculation of how much better your time and that of the party at the other end of the line could be employed.

An Editorial Industry

Every week the Press receives suggestions, propositions and offers to make this paper more interesting, and as some of them put it 'Snappy' —for a consideration. This new editorial industry is rapidly expanding, and we notice that some of our really excellent exchanges have adopted this "ready-made" editorial plan to make their paper more interesting. One or two concerns furnish paragraphs, some of them are what the girls call cute, some of them very commonplace and rediculous. All the editor has to do is to give them a local application, or insert the name of some well known citizen. But the public are not so easily fooled as some publishers seem to think. They know, in most cases, that the items are not a bit like the editor, and when they discover that he is trying to put it over on them, they think less of the editor and his paper. A weekly newspaper editorcan easily find enough topics of local and provincial interest to interest his readers, if he has the ability and the enterprise to deal with them intelligently, and in the long run his paper will grow in favor and in circulation, and he will command the sincere respect of his readers. These borrowed or purchased frills do not add to a newspaper's attractiveness any more than an extra dose of rouge adds to the attractiveness of a pretty girl.



You should eat more good bread

"The Staff of Life" is well named. Wheat flour contains no less than sixteen essential food elements. All of these are retained in the milling—all are in bread. When you eat bread and butter, you are eating what is practically a complete food.

Eat More Bread! It is best when made in the home. Make it with Quaker Flour, milled in the finest mills in the world—the Quaker Mills. Quaker Flour is guaranteed to give you *always* the finest results. If it does not satisfy you, your dealer will give you your money back.

SEVEN YEARS OF TORTURE

Headaches and Indigestion Ended By "Fruit-a-tives"

The Marvellous Fruit Medicine

Like thousands and thousands of other sufferers, Mr. Albert Varner of Buckingham, P.Q., tried many remedies and went to doctors and specialists; but nothing did him any good.

Finally a friend advised him to try "Fruit-a-tives"—now he is well. As he says in a letter:

"For seven years, I suffered terribly from Headaches and Indigestion I had belching gas, bitter stuff would come up in my mouth, often vomiting, and was terribly constipated. I took Fruit-a-tives and this grand fruit medicine made me well".

50c. a box, 6 for $2.50, trial size 25c. At dealers or sent by Fruit-a-tives Limited, Ottawa, Ont.

THE BIG STORE

NORTHWAY JACKETS

There are some people who seem to think that they can get better goods by sending away to the city for them instead of patronizing their home dealer. Fortunately for us there are many who think otherwise. Last week we had an order from an Ottawa lady for one of our Northway Jackets. We were able to send her exactly what she wanted and she was delighted with it. If you come and give us your order we can suit you just as well.

Messrs Bilow and Byers who have spent the last three months in the West returned home Saturday.

Mr. and Mrs. Wilburn Marcellus and children and the Misses Bella and Laura Moffatt visited Winchester friends Sunday

Morewood is again called on to mourn the loss of one of its oldest and most highly respected citizens in the person of the late Wm. Gordon. Mr. Gordon attended church Service on Sunday during the forenoon and evening and was in his usual good health. He retired about ten o'clock and was heard by his wife to make a slight noise and on being questioned what was wrong replied that he didn't know. He had been overcome by a stroke and never rallied. He passed away about one o'clock. The funeral service was conducted on Thursday afternoon by his pastor Rev. Jobb.

Final Reductions In Sweater Coats

Fine Wool Pullovers, in brown, green or navy shades with fancy Shawl Collars. Men! You can go wrong at this price. Regular $4.50 value at **$2.67**

Men's Coat Sweaters, warm heavy knit garments, in brown or maroon. $4.50 value **$3.67**

Men's All Wool Sweater Coats, the biggest values on record! Large Shawl Collars in heavy chain stitch, $5 50 val. **$4.19**

Reap This List of PIPING HOT BARGAINS

Men's $1.00 Fleeced Underwear, heavy soft nap finish, Now **77c**

Children's Fine Winter Underwear, soft nap finish, 50c values, now **37c**

Men's Heavy Woolen Socks, knit from grey wool yarn, 40c values now **27c**

Fine Scotch Yarn, colors of grey or black, 40c val. **27c**

You owe it to yourself Men to Investigate these Big Values in OVERCOATS

You can choose from a nice dark brown Frieze Overcoat in Ulster Style with full belt $21.00 value for **$13.87**

Another very attractive line is shown in Brown Material of much superior quality. $25.00 value for **$17.65**

The most striking value is in a handsome "Lovat" Material. This line is made with 3 piece belt and finished in plaid back linings $28.00 value **$20.95**

Let The Milk Pail Tell The Tale

THE milk pail tells the story of well-fed, healthy cows.

The top quart in the pail is the profit, and Schumacher Feed will put it there.

Schumacher Feed will give a summer milk flow while winter milk prices can be obtained. It produces more milk at a profit. It keeps the cow healthy and vigorous, and gives her a keen appetite.

Feed Schumacher Feed this winter. It is a perfectly balanced ration made of milled products of corn, barley, oats and wheat, with linseed meal. Cows eat it greedily, and digest it easily. They don't "go stale" on it. It is more economical than straight grains.

Try it, and see for yourself that Schumacher Feed pays. It will bring your hogs to market at the earliest date, too. It produces good sound flesh.

SCHUMACHER FEED

Write us regarding your hog and dairy problems. Our Live Stock Service Department can help you. Its advice is free.

THE AUTOMOBILE

WHAT DO YOU KNOW ABOUT STRAINERS.

Do you know how many strainers there are concealed within your car, where each one of them is and how it can be gotten at for cleaning? These strainers or screens, so long as they are intact, are faithful safeguards, preventing solid impurities in the gasoline from reaching the minute passages in the carburetor, obstructing them and thus stopping the engine by cuting off its fuel supply, while the function of the strainer in the engine lubrication system is to prevent solid matter, either introduced with the oil or worn from the moving parts, from clogging oil passages or getting into engine bearings and cutting them. The more work these strainers have to do and the more faithfully they do it, the sooner they require attention, for if there is considerable dirt in the gasoline it soon fills up the tiny holes in the fine copper gauze, of which the strainer screen is made and then gasoline can no longer flow to supply the engine. Usual practice is to locate one strainer in the top of the vacuum-tank, where the draft-pipe from the main tank enters and another in the carburetor bowl at the point of connection of the suuply pipe from the vacuum tank. Both of them are usually removable by uncoupling the gasoline pipe involved and screwing out the fitting which encloses the strainer. In some fuel systems a combination strainer and settling pocket is provided in the gasoline pipe, somewhere between the main tank and the engine compartment, consisting of a fitting which screws out and carries with it or at least exposes the screen. The settling pocket or sediment bulb catches water and heavy solid particles and requires emptying whenever the strainer is cleaned. All strainers require cleaning about every 1,000 miles and great care should be taken not to break the wire mesh, as a strainer with even a small hole in it is no good at all. If removable, shaking the screen around in a can of gasoline and brushing it is the best way to clean it. Prodding the gauze with a sharp tool is almost sure to break it. Strainers that cannot be removed can be cleared by hooking the dirt off their surfaces, with a piece of small wire, or sometimes by forcing liquid through them in the direction opposite to the normal flow. The oil filtering, screen around the pump intake, in the crankcase, requires cleaning each time oil is changed as, if neglected, the flow through it becomes less than that required to keep the pump full and oil circulation will become inadequate.

THE CRANKSHAFT AND HOW IT FUNCTIONS.

Motor car design meets no more delicate problem than the fashioning of a crankshaft, according to George Stowe, vice-president of the Reo Motor Car Company of New York. Though this unit of a car has remained almost without change since the early days of the industry, it is a point at which engineers are obliged to exercise their greatest skill. It is one point where perfect balance is essential, and unless this is assured the entire chassis is unfavorably affected.

A crankshaft is said to be in balance when it revolves at high speed between two points of suspension without throbbing. If one side of the shaft has even a fraction of an ounce more weight than the opposite the act of revolving it from 1,000 up to 3,000 times per minute will accentuate the unevenness almost unbelievably.

According to Mr. Stowe, each Reo crankshaft is balanced statically and dynamically in the big shops at Lansing, Mich., before it is passed to the production departments. The machinery used is as delicate as any in the plant, registering its findings in hundredths of pound-inches and showing exactly where the shaft must be lightened to make it perfect.

ON THE ROAD TO RECOVERY

—From the Philadelphia Public Ledger.

Down in the Deep.

1st Fish—"Were you frightened?"

2nd Fish—"Yes; I trembled like a jellyfish."

World's Champion Cow.

The world's champion cow is Agassiz Segas May Echo. She was given a public reception the other week in her home town of Agassiz, in British Columbia, in honor of her record-breaking feat of milk and butter production during a period of 365 days.

In that time she gave 30,886 pounds of milk, which yielded 1,345 pounds of butter-fat, equal to 1,675 pounds of butter. This is eighty-six pounds more than the previous world champion produced. She gave just over sixteen times her own weight in milk, and almost her own weight in butter during the test.

She was milked four times a day by the same man, who also attended to her feeding. The cow was never on pasture, but kept in a box-stall, except for a short time during the hot weather, when she was allowed out in a paddock. Her best day's milk production was 121½ pounds.

May Echo has an amazing appetite. On the day of her highest output she consumed 165 pounds of pulped mangles, 31 pounds of grain, and a small quantity of corn and hay.

On Its Last Legs.

"Don't you think this marathon dancing is dying out?"

"Yes; it's on its last legs."

Practical Psychology.

"How do you manage to remember everything I tell you so well, Mary?" inquired her employer the other day.

"I'll tell you, ma'am," Mary replied. "All me life never a lie I've told. And when ye don't have to be taxin' yer memory to be rememberin' what ye told this one or that one, or how ye explained this or that, ye don't overwork it and it lasts ye, good as new, for ever."

Family Pride.

A small boy returned from school and confronted his father with the question: "Father, what are you?"

"What am I, my boy? Why do you ask?"

"Well, father," was the reply, "Jenkins came up to me in the dinner hour and said, "What's your father?"

"And what did you say?" asked his father.

"I didn't say anything," answered the boy. "I just hit him."

The bamboo holds the record among plants for quick growth. It has been known to grow 2 feet in 24 hours.

Oysters are nervous creatures, and it is said that a sudden shock such as a loud thunderclap will kill many hundreds of them.

Certain diseases have been diagnosed in a very early stage by means of the camera; the lens will show up a rash long before it is visible to the naked eye.

Animal Ages.

It was reported recently that a turtle had been found in the Tonga Islands that was branded by Captain Cook in 1773. The report stated: "It is blind, and when walking it creaks like an ox-cart."

This is not an extraordinary age. The record for long life among land animals belongs to the tortoise. Given favorable conditions, this animal will live between 300 and 400 years. In 1906 one which died at the London Zoo was said to have lived at least 350 years. The crocodile is another long-liver, for, given fair play in its native wilds, it can exist for 300 years.

Among domestic animals the horse lives longest, twenty-seven years being its average span. The cow and pig follow closely with twenty-five years each. The dog and goat usually manage to reach fifteen, the cat thirteen, and the sheep twelve years respectively.

The elephant claims the greatest age among the larger wild animals. Well treated, it should live to be a hundred. The lion and the camel fall a long way behind, forty years being their usual limit.

In sacred writings frequent mention is made of needlework.

It is predicted that Alberta's wheat yield this year will not only break all records in the aggregate but will break all records in respect of average per acre yield. The latest estimates place the total wheat crop at round 148,000,000 bushels, but it is believed in grain circles that it will approximate 150,000,000 bushels.

Knew His Business.

The elevator boy was green at the job. Two passengers, a man and a woman, got on at the street floor. "Ninth," said the latter, once they were fairly started. "Sixth," said the man. The car sped by the sixth floor and stopped at the ninth. On the way back the man said: "Why in thunder didn't you stop at the sixth floor? The sixth is lower than the ninth." "I know that," said the elevator boy, "but the lady said 'Ninth' first."

Grafting the living nerve of a dog on to a man with success was one of the surgical wonders of the war; feeling became possible in 148 days, and power of movement in 340.

The World's Loneliest Job

One hundred and twenty feet beneath the waves that swirl off the Donegal coast, among rocks covered with the slime of the ocean depths, and surrounded by little-known forms of marine plant life, a squad of divers has been busily engaged for four years recovering the $35,000,000 worth of bullion that went down with the great liner Laurentic.

The story of their achievements, when fully told, will read like an Arabian Nights romance. The divers, highly-skilled members of the Navy, have in the aggregate spent months under the waves, blasting away many obstructions and sending to the surface box after box of gold. No treasure hunt has ever been more successful.

Training the Beginner.

Some little-known facts about divers and their methods were given to the writer by the head of the firm of Siebe, Gorman and Co., the best-known submarine engineers in the world.

Before a man can become a diver he must be passed as medically fit in every way, while frequent examinations by a doctor are carried out during training. To begin with, the novice, in complete diving kit, is submerged in from ten to twenty feet of water.

His first jobs consist of locating lost articles and slinging them in the approved fashion so that they can be sent safely to the surface. Clearing propellers of fouling material, recovering cables, and removing rust from ships' bottoms are other jobs that fall to the lot of the beginner, who cannot qualify as a fully-fledged diver until he has worked at a depth of 120ft.

A diver first removes his own clothing and puts on an assortment of underclothing, including woolen vests, pants, stockings, and a thick jersey with a woollen cap. The shoulder-pad is then put on, after which the diver has literally to be forced into his deep-sea armor. The weight of the complete outfit, including boots that weigh 15lb. each, and 80lb. of lead to shield the shoulders, is 175 lb.

The art of diving, apart from that associated with swimming feats, has been known well over 2,000 years. Divers were employed during the defence of Syracuse (215-212 B.C.) to remove barriers which had been sunk in the harbor. It is recorded that Alexander the Great was lowered into the sea in a machine specially designed to keep out the water and to admit light. Diving by means of air tubes was also practised at this period.

One of the forerunners of the modern diving dress was that invented by a German marine engineer, whose device, a cylindrical arrangement with air pipes attached, was in use up to a hundred years ago, when Augustus Siebe produced a form of diving dress not unlike that worn now, although it possessed many crudities that were not eliminated until many years later.

Attacked by an Octopus.

The greatest depth at which a diver has worked with success is 182 ft., the hero of this exploit being a Spanish diver, who recovered $6,000 in silver from a wreck off Finisterre. It has been proved, however, that it is possible for a diver in certain circumstances to work at the great depth of 210ft.

A remarkable fact in the history of modern diving is that although divers all over the world wear suits of British design and make, no accident has yet occurred as a result of faulty workmanship or defects in the materials used.

In the case of the Laurentic, attacks by giant dogfish have had to be guarded against, while on one occasion a large octopus appeared on the scene, threatening a diver with its unpleasant embraces.

FIGHTING AGAINST SHOPPING BY MAIL

HOME TOWN MERCHANT GIVES BEST VALUE.

Manner in Which Such Competition Has Been Met by Stores in Small Towns.

Mail order competition with small town merchants is by no means as difficult to fight as it appears, but in fighting it most of them do not make use of the most valuable weapon they have. This, according to Frederick Haase, an advertising and merchandise counsel of New York, is the comparison of values. On first thought this would appear to be a dangerous matter for the small merchant to touch upon, inasmuch as it is the apparent advantage the mail order houses hold in this respect that brings the great bulk of their business to them.

On the other hand, if the comparisons are made properly, it is the mail order houses that come out on the short end, and Mr. Haase cites instances to show that this is so. They were obtained from his experience a few years ago as Director of the St. Joseph, Mo., Service Bureau for Retailers, a co-operative organization for increasing the business of wholesalers in that market. During his tenure of office many instances came to his attention of how small merchants had met successfully the menace of mail order competition.

"There is no doubt now about the average small merchant's ability to meet mail order competition on a basis of comparison of values," said Mr. Haase. There are hundreds of small town merchants in every section of the country who are proving day after day, the superiority of their merchandise over that of the mail order houses. It is needless to say that in these sections there is little or no business going away from home.

The Same or Less Prices.

"If every merchant in this country advertised to his trade that he was prepared to fill any order taken from a mail order house catalogue at the same or less prices than the mail order house quotes, and also to give the same or better service than the mail order house gives, the financial reports of the latter would soon have to be revised. It is a merchandise situation in which the united power of merchants' associations in every part of the country should be brought into motion to swing the out-of-town tide of business in favor of the home store. The individual effort of one merchant in a locality, of course, does some good, but results can be accomplished more quickly and effectively if all the merchants in that locality are working along the same line. The plan is the same in either case.

"One of the most interesting single-handed fights against mail order houses, as well as one of the most successful, was that conducted by a retailer in Roundup, Mont. This man adopted the comparison of values scheme, which he put out in his publicity matter under the caption of 'The Deadly Parallel.' In one column he listed the merchandise of one of the most prominent mail order concerns, with its prices, while in an adjoining column he listed his own goods and prices. So successful was the plan that, two years after the time he started his business on a 'shoe-string,' he had an $8,000 stock, all paid for, and money in the bank. He handled standard merchandise only, and, unlike some of his retail competitors, he did not throw in a 75-cent cap with a $10 mackinaw just to make a friend. By not doing so he made a better customer.

Here is an idea of the way the Montana retailer worked it:

Interesting Comparisons.

"In the left-hand column of his 'deadly parallel' he ran the mail order house's descriptions and prices of goods, taken directly from its catalogue. In one of the camparisons, item No. 1 of the mail order house was reproduced this way: '(See page 423) 41F 707—Bib Overall, extra heavy; weight in size 38 waist, 29 ounces; no union label; cost (to customer) $1.39, plus 17 cents parcel post, three-cent money order and two-cent stamp; cost laid down in Roundup, $1.61.

"Opposite this he ran this description of his own goods: 'Big 3 Bib Overall; union label; weight in size 38, 36 ounces, or 7 ounces more (than the mail order house); sells here every day for $1.25, or 36 cents less than—(the mail order house). In a similar way he showed how he sold a 12-inch high top man's shoe for $2.63 a pair less than the mail order house, and gave better value as well. Other savings marked his entire list of comparisons.

"Other merchants in the western half of the country also made interesting comparisons, which showed that the local merchants had other reasons to expect home buying than the howl so many small retailers put up about the ethics of trading out of town. In one case a merchant I knew sold a blanket to one of his male customers by convincing him, through a comparison of the mail-order blanket with his own, that the later was the better. The comparison showed the mail-order blanket to be four inches shorter than the local merchant's, two inches narrower, and considerably lighter. The price of the mail-order blanket was slightly lower than the local man's, but on a weight basis, the argument on which the local merchant made the sale, the latter's blanket was much the better value of the two.

"In another comparison, a pair of women's stockings offered by a mail-order house was found to be lighter in weight and about two inches shorter in length than the local merchant's goods. Besides this, the local goods were 3 cents cheaper per pair.

"One of the best movements of its kind in fighting mail order competition on a comparison of value basis forlows: In this case a number of the local merchants combined in the fight, and the comparion lists showed the mail order houses up pretty badly, in spite of the fact that 'specials' of the home merchants were not permitted to figure in the comparisons. The outstanding point of the whole affair was found to be that, although the mail order houses undeniably undersold the local merchants on certain articles, the total cost of various combinations of articles selected from the local stocks and the mail order catalogues at regular prices of both favored the home merchants anywhere from 17 to 22 per cent. In other words, the home merchants were able to demonstrate, through co-operation and publicity, that persons who patronized the mail order houses to the more or less general exclusion of the home dealers were paying from 17 to 22 per cent. of the cost of their purchases for the privilege of buying out of town.

"Mention of co-operation brings up a matter on which many small town merchants fail miserably. They either can't or won't co-operate to fight competition that is dangerous to them all."

ARSENIC TREATMENT SAVES MANY CROPS

A Useful Mineral Difficult of Production, but for Which Demand Exceeds Supply.

The close association between mineral development and our commercial and agricultural industries is receiving the attention of the Mines Branch of the Dominion Department of Mines to a constantly increasing extent. Conditions are arising continually where the product of some one or more of our mineral resources is required or enters into the production of agricultural or industrial products so intimately as to make it absolutely essential that the location of supplies, the possibilities of development, the refining or other process necessary to extract the product, the means for marketing and the uses of the material be known and readily available.

During the past few years the demand for oxide of arsenic has increased to such an extent as to largely exceed the visible supply. The necessity of eradicating the boll weevil from the cotton areas of the Southern States and the grasshopper from the Northern States and Prairie Provinces, if the cotton and grain crops are to be preserved, has created a demand for arsenic which calls for greatly increased production, while the largely enhanced price secured for the arsenic may warrant more intensive development of the minerals from which it is obtained.

DIFFICULTIES IN REFINING.

As an element contained in ores, arsenic has not been exploited until recent years on account of its troublesome nature. Even now arsenic is the "bugbear" of the metallurgist, particularly at lead works, where it is a constant source of expense. It combines with other elements, principally iron, lead and silver, to form speiss, which, until a short time ago was considered waste, as no economical method had been found for treating it. Sulphurous gases and fumes containing arsenic from the furnaces have caused expensive litigation against smelting companies, and to overcome these nuisance as well as to save some of the metals that were going to waste, the fumes are filtered through woolen bags hung in special bag houses. A further development was the electrical precipitation of particles from the fumes by the Cottrell treater. After the arsenical fumes are precipitated they are refined in special furnaces or reverberatories.

THE DIRECT PRODUCTION FROM ARSENOPYRITE.

The direct production of white arsenic has been attempted a number of times, based on the refining of arsenopyrite containing no other element of value. It is easily possible from a technical standpoint to produce 99 per cent. arsenic from arsenopyrite but the plant installation and the process are both costly, and, in the face of the violent fluctuations of market prices and by-product competition little real progress in this branch of the industry has ever been made.

The production of arsenic in Canada includes arsenious oxide refined and crude, produced in the smelting of the arsenical silver-cobalt nickel ores of the Cobalt district, also from the arsenical gold concentrates shipped from the Hedley gold mine at Hedley, B.C., the latter being treated at Tacoma, Washington.

In 1922 Canada produced 2,576 tons of white arsenic valued at $321,037 which was an increase of 73 per cent. in quantity over shipments for 1921. The prices of arsenic has fluctuated in the last 15 years between 1½ cents and 20 cents per pound, reaching 15 cents in October, 1922, in New York.

USES OF ARSENIC.

Arsenic is used in the glass making industry, in the dyeing trade, for preserving skins and other uses, including the destruction of weeds. It is one of the most important insecticides and in recent years has come into active demand for the treatment of boll weevil in the cotton crop of the United States, and for the destruction of grasshoppers.

It is destined to play an important part in agriculture in the future as, while it is not in itself a fertilizer, experiments have shown that, used in small quantities it will sterilize soils and kill enemies of plant life and thus promote growth.

During the present season Dr. A. W. G. Wilson of the Mines Branch, Department of Mines, is making an investigation of occurrences of arsenic in Canada, which will be supplemented by a further investigation of the technology of the recovery of arsenic, the production of arsenious oxide and the uses and markets both in Canada and the United States.

Studying the Eider Ducks With Camera and Note Book

The Wonders of the Annual Migration Along the Atlantic. By Bonnycastle Dale

We chose the most outlying point of Nova Scotia so that we might be very close to the migration route and try to estimate the numbers of he wild ducks, the seafowl, and the shorebirds that pass south along this coast. Our cabin was right beside the great Cape Sable Light, and hundreds of the poor migrants perished on the telephone wires nearby.

There were two magnificent crescents of sandbeaches where the surf poured on in all its roaring, rushing majesty. Then there were the large tideflats, filled with worms and food for the shorebirds, some thousands of acres of wet lands shielded and built up by the serf itself, and in turn torn down and carried out to make the things we call "The Banks" fifty to two hundred miles off shore. Between the blaring of the huge fog horn, the all night circling of the great soft bars of the Light, the tempestuous winds that shook sea and land, cabin and light, in their furious grasp, our nights were disturbed and our days were but unending conflicts with sea and tide, sandflat and tortuous tide channel, but we saw more wonderful sights in that year's hard cold work than in many a year before.

Down-Lined Nest.

Out some twenty miles from shore lay Seal Island, where the eider ducks, the American usually, makes its down-lined nest. The breast of the female is plucked bare to form this warm comfortable home for the ten downy, wise, swift-concealing little ducks.

Our neighbors who made the Iceland trip tell us that the eider ducks breed there all over the foreshore, right around where the fishermen pass and work, and no man dare disturb them, for after the huge host leaves, the down in the nests is gathered and makes a comfortable sum of money for those isolated people. So tame are the great flocks in the bays off the breeding grounds that they, the males and barren females, simply parted to let the rowboats through, and all the yet plump on that precipitous shore held nests and golden-brown backed female eider ducks—northern eiders, king eiders and the one we call the American.

On a Labrador Schooner.

If you take one of the little schooners that make Labrador each spring and summer you will find all the three birds breeding along that wild coast, and also the young of both Eskimo and Montagnais Indian killing them with arrow and throwing stick, and the older men with shotguns. All the men with whom I have spoken on both coasts above civilization always say, "My father always took eggs and ducks and his father too, and so do we." A very natural argument. With all the slaughter, in which the white men join all down this coast—lawfully—the eiders in 1921-22, on the southbound migration were more numerous than in the memory of any man along Cape Sable. We noted down some 250,000 eider ducks and drakes passing south and pictured many of them. They flew in flocks of thirty to fifty, with about five minutes intermission, all day long. They were the ones that were breaking off the outer edge of some immense flock resting far up the coast. Of course we did not see so many on the northern trip. Spring of '22, the nor'-west winds blew them far out to sea. The men did not see so many in 1922-23, as the cold spring and summer held back or chilled many eggs, but the men far out fishing say that huge flocks went south in '22, far out.

Many Kinds of Eiders.

There are flocks of these most beautiful ducks which winter off our coast, and the men call them "stingnecks," and sea ducks and "white-throats." All these Cape Islanders spoke of so many different kinds of eiders that they had us puzzled until the springtime came. We are permitted to take and care for any injured or sick bird, so at times we have quite a bird hospital.

We noted many odd ducks among the eiders. There were the glorious males of the American. These big drakes have a light yellow, long, soft billcover, a rich purple head and a sea-green, fading into white, neck, and back-things of most exquisite beauty. Then there were the golden brown females and then, as the spring advanced, there were these "stingnecks," brown birds with odd patches of white feathers here and there. These were but the young males of the American, last year's young drakes. Then there were a few richly-colored drakes which had golden and bright red bills. These were the males of the king or in some cases the northern eider, so there are but three kinds along here after all. They again puzzle the hunters when they return from the breeding ground. First of all come the lazy old drakes, who had been sunning themselves far from the nests all summer. Then the nesting females and then the young males and females who had not come south with the ducks.

"Butterbills and Patchpoles."

In the spring of '22 we went up to the top of a wild, surf-torn hill, a bit of true ground not yet eaten off by the surf, and the eiders were blown right in over our heads. There were both American and northern, and surf-ducks, or "butterbills and Patchpoles," as the gunners call them.

In the years when they were not protected it was a wonderful sight to sit on the great surf-thrown sea wall that guards "the Cape," and see a triple string of gunners' skiffs anchored off out in the open sea off "The Cape." Three lines of tiny fourteen foot gunning skiffs with a man in each, and about fifteen or twenty boats in a line that extended half a mile out to sea. There was a swift tide running the last time I saw them, and a big, long, slow swell. Also out of the great sea came at times an "old sea," a relic of a storm in some distant part; these rolled twenty feet high and the wind-chop on top would readily upset any boat it hit, so they must dodge it. The pale sun was just emerging from the sea when I crept up the cold sliding, clattering stones. All the boats were in place, some since 2 a.m.

Best Shots in Canada.

Far off towards Baccaro Light came a long black line. It swept the top of the swell until it saw the first line of boats; then it slid up the skyline until it was, say thirty yards, above the gunners, and it essayed to pass over. There are no better shots in Canada than these Cape Sable gunners. Puff—puff—puff blew off on the cold air—ping—ping—ping sang tenbores, and down fell half that line of swiftly flying black objects. The balance soared and crossed the second line and the few remaining went still higher and swept on over the third line of boats. Out of some sixty birds but seven went south. For an hour I watched this novel sight. After the birds were down they were by no means to be counted in the score; they had to be picked up or finished off first. To see these foolhardy men standing erect in those tossing tiny boats, swinging their guns in halfcircles, killing each black head the instant it popped up in the white and green seas—good, clean, merciful killing. If these birds are sent here as food, let the hunter be skillful and the game suffer but little. The modern shotgun with its smokeless powder and hard shot, with the sportsman educated in all the tricks and wiles of the game, there are but few suffering, lost, wounded birds, which take every atom of pleasure out of the day's hunting.

IT MUST BE FUNNY TO AN OLD TIMER

Left the Blind Up.

Old Aunt—"So, your young man makes plenty of money—but he's a window-dresser, you say?"

Niece—"Yes, auntie—what of that?"

Old Aunt—"What o' that? He's one of these immodest fellows that always forget to pull down the blind, I suppose!"

Before the war Great Britain owned nearly 44½ per cent. of the world's total tonnage of iron and steel steamers; now it has decreased to less than 33 per cent.

"Handle with care" seems to mean little to the ordinary freight handler. Perhaps he does not read. A precautionary measure that some companies are now using is stencilling on the outside of the case a picture of what the package contains. The picture of an electric-light bulb, it seems, is more efficacious than admonitions. An X-ray of what some of the cases contain at the end of the journey might be useful too.

Mustard is valuable in the diet

Did you know that mustard not only gives more zest and flavor to meats, but also stimulates your digestion? Because it aids assimilation it adds nourishment to foods.

but it must be Keen's 229

HEALTH EDUCATION

BY DR. J. J. MIDDLETON

Provincial Board of Health, Ontario

Dr. Middleton will be glad to answer questions on Public Health matters through this column. Address him at Spadina House, Spadina Crescent, Toronto.

There are various kinds of coughs. There are true coughs that are caused by some disease of the lungs or bronchial tubes; there are also coughs that are due to some condition outside the lungs.

This condition is generally one of irritation; this irritation sets up reflex action, and the same nerve supplying both the lungs and the part irritated causes a cough, though the lungs themselves are perfectly sound and healthy.

The two places where this kind of cough may be set up are the throat and the stomach, the former being called a "throat cough," and the latter a "stomach cough." What causes a stomach cough? Any congestion or irritation of the lining of the stomach is very liable to affect the ends of the pneumogastric nerve there, and that nerve going to the lungs as well, an irritating cough is set up.

This "stomach cough" is a peculiar one. It only occurs at one time of the day, and that is in the morning on getting up, and particularly just after rising. Then it occurs in paroxysms and induces retching and hawking up of mucus. But there is no expectoration at all. Quite a number of attacks of coughing may occur before breakfast time, but after that meal it is all over for the day.

At what age is this cough most prevalent It may occur at any time during adult life, but is most commonly in middle-aged men who lead rather indulgent lives, eating and drinking, not wisely but too well. As a result, the lining membrane of the stomach and bowels gets into a state of slight chronic congestion, a mild gastro-enteritis being set up, the irritation of the bowels sometimes producing diarrhoea which may be slight or severe. That is the first stage.

But if the cough is neglected, and the cause of it allowed to continue to act, the liver begins to get congested too. And later, the trouble may extend and assume a serious and indeed often incurable condition of affairs.

Congestion of the stomach is brought about by over-stimulation of food or drink. Too much food will cause it, and too much fluid will cause it too. Over-indulgence in alcohol is a very prevalent cause of congestion of the stomach—not that these people are drunkards, far from it. But habitually they take a little more than is good for their stomachs, and the stomachs resent it. The same applies to over-indulgence in any food, and even tea or coffee can be made a curse instead of a blessing.

Any man who finds he coughs and retches in the mornings when he gets up, and at no other time, should regard it as a warning and give up his over-indulgence. If it is allowed to continue there will be in time enlargement of the liver. If he alters his habits the cough will very soon disappear. No cough mixture is needed for this kind of cough. A good brisk liver pill at intervals of a few days, a few doses of bismuth and pepsin mixture, and above all no more over-indulgence in alcohol or such stimulants for a time, and the congestion of the stomach will subside. And the cough will disappear.

WORLD'S RECORD FISH

Captured off St. Ann's Bay, N.S., by Mr. J. K. L. Ross, Director of the Canadian Pacific Railway, and well-known sportsman and race-horse owner, this tuna weighed 712 pounds, a world's record fish via the rod and reel. Using a Von Holt tuna rod and reel, No. 39 thread line and mackerel for bait, Mr. Ross landed the big fellow in three and a quarter hours. It was 9 feet 2 inches in length, and 6 feet in girth.

Mr. Ross for many years has been an ardent tuna hunter. He has landed many large ones, some weighing over 600 pounds, but until this summer he was unable to beat the record of Captain Laurie Mitchell, who caught a 710 pound tuna off the Nova Scotia coast many years ago.

Trains That Never Stop.

A never-stop railway, the trains of which require neither driver, conductor, nor signals, is being experimented with at the Kursaal, Southend, England, where yards of track have been laid for testing purposes.

The speed of the train is automatically increased and decreased. When it arrives at a station the train slows down to about one mile and a half an hour, so that passengers can step to a "landing-stage" level with the station platform. The principle is similar to that of the escalator. But once past a station the train gathers speed up to twenty-four miles an hour. Its speed is controlled by a screw, which is driven by a special motor.

No noise is made by the train, and the wheels have rubber tyres.

Come to the Lectures, Demonstrations and Practices at the

Ontario Agricultural College

1924 — SHORT COURSES — 1924

Stock and Seed Judging — (Two weeks)—January 8th - 19th.
Poultry Raising—(Four Weeks)—January 8th - February 2nd.
Horticulture Courses:
Fruit and Vegetable Growing—January 21st - February 2nd.
Floriculture and Landscape Gardening—Feb. 4th - Feb. 16th.
Dairy Courses:
Course for Factory Cheese and Buttermakers — January 2nd - March 14th.
Cow-Testing—Jan. 7th - Jan. 19th.
Farm Dairy—Jan. 21st - Feb. 2nd.
Factory Milk and Cream Testing, including Factory Management and Accounts—Feb. 4 - Feb. 16.
Market Milk, including Mechanical Refrigeration—Feb. 18 - March 1.
Condensed and Powdered Milk—March 3rd - March 15th.
Ice-Cream, including Mechanical Refrigeration—March 17 - Mar.28.
Creamery and Cheesemaking Course, including Mechanical Refrigeration—Mar. 24 - Mar. 28.
Bee Keeping (Two Weeks)—January 8th - January 19th.
Drainage and Drainage Surveying (Two Weeks)—Jan. 8 - Jan. 19.
Farm Power, including Tractors, Gasoline Engines, etc. Two Weeks)—Jan. 22 - Feb. 2.

These courses are planned to meet the requirements of farmers, farmers' sons, dairymen, poultrymen, bee-keepers and horticulturists who may be able to leave home for but a short period during the winter months.

All courses are free, with the exception of the dairy courses, for which a small registration fee is charged.

A change from the home surroundings, meeting other people interested in the things in which you are interested, exchange of experience and the acquirement of knowledge, will do you good.

Plan to attend some course that appeals to you. Reduced rates on railways. Write for booklet describing the courses and ask for railway certificate.

J. B. REYNOLDS, M.A. President — L. STEVENSON Director of Extension — A. M. PORTER, B.S.A. Registrar

With The BOY SCOUTS

The Beginnings of Scouting.

In an article in "The Trail," the monthly paper published by the Ontario Boy Scout Council for its officers and leaders, Sir Robert Baden-Powell, the Chief Scout and founder of the Boy Scout Movement, writes regarding the beginnings of the Boy Scout Movement:

"In 1893-1894, when serving with my regiment, the 13th Hussars, I realized that the ordinary peace training of soldiers for service in the field was not sufficiently practicable, and I therefore carried out classes of training in my squadron for the men individually in Scouting and Camping. In 1897-1898, having been transferred to command the Fifth Dragoon Guards, I carried on similar training, but on improved lines, with a view to developing character, as well as field efficency, since this was largely lacking in lads coming on to the army from the ordinary school. My lectures and practices were collated and published in a small book, "Aids to Scouting." During the South African War, 1899-1900, Major Lord Edward Cecil, my Chief Staff Officer, organized the boys of Mafeking as a Corps for general utility on Scout lines, rather than those of Cadets, and the experiment was an entire success. The experience taught one that if their training was made to appeal to them, boys would learn rapidly and also that boys were capable of taking responsibilities to a far greater degree than was ordinarily believed if only they were trusted.

In South Africa.

"In 1901 I raised the South African Constabulary on lines of my own, the principles of which were practically those of the Scout training applicable to men. The troop was made a small unit, in order that the Commander should be able to deal with each individual on personal knowledge of him; the system of patrols was initiated, of six men under a leader. Responsibility was thus given to the junior non-commissioned officers, and emulation between the patrols produced a good spirit to a higher standard of efficiency all around. The human side was appealed to, and the men were trusted on their honor to a very large degree in carrying out their duties. Their uniform for field work was the cowboy hat, shirt, green tie, and shorts. Badges were awarded for proficiency in different lines of work.

"On my return to England in 1903 I found that, among others, Miss Mason, head of a training school for teachers, had adopted 'Aids for Scouting' as a textbook for their instruction in observation and education as a step to character training. In 1904 I had a conversation with Sir William Smith, the founder of the Boys' Brigade, as to adapting the training for boys, and I offered to write a book for them on the lines of 'Aids to Scouting,' as a means for enthusing the boys and giving the wider scope and greater variety to their training for citizenship.

The First Scout Camp.

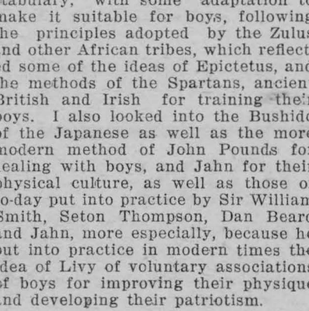
"In 1907 I held a trial camp for Scout training, Brownsea Island, at which I had boys of other schools to experiment on, and its result exceeded my expectations and prompted me to go on with the idea. The training was based on that which I had employed with soldiers and with the constabulary, with some adaptation to make it suitable for boys, following the principles adopted by the Zulus and other African tribes, which reflected some of the ideas of Epictetus, and the methods of the Spartans, ancient British and Irish for training their boys. I also looked into the Bushido of the Japanese as well as the more modern method of John Pounds for dealing with boys, and Jahn for their physical culture, as well as those of to-day put into practice by Sir William Smith, Seton Thompson, Dan Beard and Jahn, more especially, because he put into practice in modern times the idea of Livy of voluntary associations of boys for improving their physique and developing their patriotism.

No "Boy Scouts" Till 1907.

"I had never heard the title 'Boy Scouts' before I applied it to boy training in Britain in 1907. I chose it because this training was based in principle and detail on that which I employed for many years previously in training soldier Scouts in the Army. The term 'Scoutmaster' for their officers was one which I adopted from Oliver Cromwell's officers' ranks, among which there were 'Scout Masters.'

In 1908 I brought out the handbook of the training entitled 'Scouting for boys' in six fortnightly parts. A number of troops were started in different parts of the United Kingdom before the series was half completed. Although I had only anticipated that Scouting would be taken as an additional attraction for their boys by the 'Boys' Brigade' and 'Church Lads' Brigade,' it became evident that a separate movement was required to deal with a number of boys who were taking it up unconnected with these bodies.

"In 1910 the Boy Scout Movement had grown to such dimensions, numbering 123,980, that I felt it incumbent upon me to leave the Army in order to take the Movement in hand."



Ideal Conditions.

"Do you think he could afford a car?"

"To be sure he could. Doesn't he own his own home and there's no mortgage on it."

New Pest.

A pest called white pine blister rust is attacking white pine nursery stock in localities from the Atlantic to the Pacific.

Without the spirit of comradeship, our Empire would not be what it is to-day.—Prince of Wales.

Minard's Liniment Heals Cuts.

PAIN IN THE JOINTS

Is An Indication That the Blood is Thin and Watery.

The first sign of rheumatism is frequently a pain and swelling of one of the joints. If this is not treated through the blood, which is the seat of the disease, the poison spreads, affecting other joints and tissues—sometimes rheumatism attacks the heart and is fatal.

A remedy that has corrected many cases of rheumatism is Dr. Williams' Pink Pills. These pills enrich and purify the blood so that the poisonous rheumatic matter is driven out of the system as nature intended. Miss Gertie Denne, Washago, Ont., was attacked with rheumatism and found relief through Dr. Williams' Pink Pills. She says:—"About a year ago I was attacked by rheumatism and for two weeks was confined to my bed. The trouble was so painful, affecting the joints of my limbs so that I could not stand alone. Mother had a box of Dr. Williams' Pink Pills in the house and thought they might help me. I began taking them, and when I had taken these pills got a further supply, with the result that the rheumatism vanished and I was a well girl. I may add that my mother and two of my sisters have also used the pills for various ailments with equal success, and now we are never without them in the house."

If you are suffering from any condition due to poor, watery blood, or weak nerves, begin taking Dr. Williams' Pink Pills now, and note how your strength and health will improve. You can get these pills through any dealer in medicine, or by mail, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Empire's Wonder Lakes.

In the thirteen odd million square miles of territory which comprises the British Empire, there are many remarkable phenomena, one of the most interesting being the Pitch Lake of Trinidad, in the West Indies. It is a natural reservoir of valuable mineral pitch, a hundred acres in extent, from which 200,000 tons of asphalt are exported annually.

Althought the asphalt appears soft, one can easily walk about on the lake. Any excavations made during the day are mysteriously filled up at night by nature, although the general level of the lake is slowly sinking.

About half-way across Kenya Colony, in British East Africa, is Magadi Lake, a vast natural deposit of soda. The lake is ten miles long, two to three miles in width, and seen from the mountains that surround it, it has the appearance of an immense rufiled white sheet.

Borings have failed to reveal its depth, and as new deposits are formed after excavations the supply would appear to be inexhaustible. A railway has been built to it, refineries opened, and every year something like 150,000 tons of soda reach us from this wonder lake in East Africa.

White Island, off New Zealand, contains another of these remarkeable minenral deposits. It is sixty acres in extent, and about fifteen feet deep. Its water contains a high percentage of hydrochloric and sulphur acids.

On account of the deadly fumes it is possible to live on the island only between November and March. Then large quantities of gypsum and sulphur are mined and exported. Between these dates the wind always blows in one direction, making it possible to get at the valuable chemicals.

$4.60 Profit From Each Hen.

By S. W. Knife.

A short time ago an article appeared in the "Pickering News" stating that "E. W. Ruddy, who has a country residence there, cleared $4,600 profit from 1,000 hens for the preceding twelve months," and employed all help required to look after them. This certainly shows there is money to be made from hens. How? By proper feeding, good care and attention. Poultry raisingn is as much a business as any other business and to make a success one must understand what he is doing and why.

The winter is not the natural laying season, therefore to get good egg production, when prices are high, the hens must be fed with that object always in view. They need exercise to keep the body warm, which should be provided by making them work (scratch) for every grain of feed. The feed should be stimulating and body-building, such as wheat and corn, say 40% of each, making up the other 20% with Western oats, buckwheat, peas, etc. It is best just to feed enough at a time so as to keep the bird always ready for the next meal.

A lot has been said for and against "hot mash." Mr. Ruddy fed hot mash as a mid-day meal all through the winter. In the average home there is usually a considerable amount of table scrap which can profitably be utilized, mixing it along with the laying mash and fed in a "crumbly" condition, not sloppy. Feed at mid-day and just enough; if you feed too much the birds will go to roost, which is not desirable. Why not feed hot mash in the morning? Because birds will easily fill their "crops," stand around and get chilled, whereas grain first thing makes them active and keeps them warm. Grain should also be fed in the evening. Soft feed being more easily digested, the birds' crops are empty long before daylight and you cannot expect man or beast to do their best on an empty stomach.

Light and Heat.

The light and heat that make life possible are flashed to us in eight and one-half minutes over the 90,000,000 odd miles that separate us from the sun. But the nearest of the stars is so far away that its light needs more than four years to reach us.

Human beings owe a debt of love to one another, because there is no other method of paying the debt of love and care which all of us owe to Providence.—Ruskin.

EASY TRICKS

No. 50

Brush It Off

A travelling salesman, so the story goes, discovered this little stunt. Perhaps you can try it on your friends. You'll need a coin and a whisk broom.

Hand the whisk broom to a friend and put the coin on the palm of your right hand. Extend the palm—and coin—toward your friend and say:

"Brush it off."

He won't be able to do it.

It is not necessary for you to prepare the coin and there is no trick about it. All that you have to do is to place the coin in the centre of the palm. Of course, your friend can shove or drag the coin off—but he can't brush it off.

The trick can also—or can't also—be done with a clothes brush.

(Clip this out and paste it, with other of the series, in a scrapbook.)

Dumb Friends of the Famous.

Few dogs have been photographed as frequently as Laddie Boy, the late President Harding's terrier. This dog was so devoted to its master that for some days after his death it refused to eat.

Laddie Boy brings to mind Caesar, the favorite terrier of King Edward. The tenderest friendship existed between the King and his dog, and Caesar always slept in his master's bedroom.

When the King was taken ill Caesar fretted so much that he, too, became ill, and when the King died Caesar's grief was intense. He would not eat and wandered miserably about the palace. It was only with difficulty that his life was saved.

There are many cases on record of dogs actually dying of grief. A recent one was of the pet of Mistral, the French poet. It refused food and would not move from the study. Exactly a week later the dog was found lying dead beneath its master's writing table.

Mr. Lloyd George is rarely seen without Ruffles, the great sable and white St. Bernard which he brought home from Switzerland in 1920. What is more, the then Prime Minister broke the law by bringing the dog straight to Downing Street before it was placed in quarantine.

THE FALL WEATHER HARD ON LITTLE ONES

Canadian fall weather is extremely hard on little ones. One day is warm and bright, and the next wet and cold. These sudden changes bring on colds, cramps and colic, and unless baby's little stomach is kept right the result may be serious. There is nothing to equal Baby's Own Tablets in keeping the little ones well. They sweeten the stomach, regulate the bowels, break up colds and make baby thrive. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

To achieve success not by heritage but by individual effort is the greatest joy of life.—J. P. Morgan.

Minard's Liniment for Dandruff.

The surest way of making fools of yourselves is to be frightened of doing so.—Dr. Vaughan Williams.

Two-pronged forks were introduced into England in 1608. They were first made in Sheffield. Three-pronged forks came into use in 1750.

MINARD'S "KING OF PAIN" LINIMENT

SMOKE OLD CHUM

The Tobacco of Quality

½ LB. TINS and in packages

Manufactured by Imperial Tobacco Company of Canada Limited

Lie in Weight.

Lytway, the butcher, had been busy for a few moments with a well-worn dictionary. Suddenly he closed it with a snap and glowered at his wife.

"That Mrs. Smarte is getting too clever," he howled.

"What's the matter?" asked the good lady, surprised at this criticism of a good customer.

"When she came in just now she told me I ought to rename my scales the Ambush brand."

"Well, why——?"

"I've just looked up the word," went on the infuriated man, "and the dictionary says that ambush means 'to lie in wait!' "

The whites of eggs will beat much faster if thoroughly chilled.

That nasty, irritating, tickling cough that keeps you awake at night, makes life miserable, will not stay when Dr. Howard's Gum Balsam is used. The first dose relieves. Every 50c bottle guaranteed satisfactory or money refunded. Refuse substitutes and avoid disappointment. All Drug Stores. Manufactured Taylor Pharmacal Co., Birchcliffe, Ont.

Remarkably rich radium bearing mineral deposits have been discovered in Madagascar.

Keep Minard's Liniment in the house.

Photographing the flashes of a lightning bug was recently accomplished by letting the bug crawl over a photographic plate.

Farthings.

Round farthings were not coined until the year 1210; before then pennies broken into four pieces made farthings (fourthings).

Save Your Pans.

When food sticks to the cooking utensils, use a clothespin to loosen it, instead of a knife, and you will not scratch your pan.

MONEY ORDERS.

A Dominion Express Money Order for five dollars costs three cents.

If I knew only half the law of England I would be satisfied.—Mr. Justice Darling.

Ask for Minard's and take no other.

It is a reproach to any woman of any class not to be able to darn well. —Lady Nott-Bower.

Why Have Skin Trouble Cuticura Will Prevent It

In the treatment of all skin troubles bathe freely with Cuticura Soap and hot water, dry gently, and apply Cuticura Ointment to the affected parts. Do not fail to include the exquisitely scented Cuticura Talcum in your toilet preparations.

Soap 25c. Ointment 25 and 50c. Talcum 25c. Sold throughout the Dominion. Canadian Depot: Lymans, Limited, 344 St. Paul St., W., Montreal. Cuticura Soap shaves without mug.

ASPIRIN

Say "Bayer" and Insist!

BAYER Genuine

Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer product proved safe by millions and prescribed by physicians over twenty-three years for

Colds	Headache
Toothache	Lumbago
Earache	Rheumatism
Neuralgia	Pain, Pain

Accept "Bayer Tablets of Aspirin" only. Each unbroken package contains proper directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer Manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

MOTHER OF LARGE FAMILY

Recommends Lydia E. Pinkham's Vegetable Compound to Other Mothers

Hemford, N. S.—"I am the mother of four children and I was so weak after my last baby came that I could not do my work and suffered for months until a friend induced me to try Lydia E. Pinkham's Vegetable Compound. Since taking the Vegetable Compound my weakness has left me and the pain in my back has gone. I tell all my friends who are troubled with female weakness to take Lydia E. Pinkham's Vegetable Compound, for I think it is the best medicine ever sold. You may advertise my letter."—Mrs. George I. Crouse, Hemford, N. S.

My First Child

Glen Allen, Alabama.—"I have been greatly benefited by taking Lydia E. Pinkham's Vegetable Compound for bearing-down feelings and pains. I was troubled in this way for nearly four years following the birth of my first child, and at times could hardly stand on my feet. A neighbor recommended the Vegetable Compound to me after I had taken doctor's medicines without much benefit. It has relieved my pains and gives me strength. I recommend it and give you permission to use my testimonial letter."—Mrs. Ida Rye, Glen Allen, Alabama.

Women who suffer should write to the Lydia E. Pinkham Medicine Co., Cobourg, Ontario, for a free copy of Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women."

Mother and Her Baby Are Relieved of Eczema

Mrs. Peter A. Palmer, Salt Burn, Sask., writes:

"Dr. Chase's Ointment has completely relieved me of eczema and piles. I also used this Ointment for my baby, who broke out in eczema. A few applications were all that was necessary in her case. Dr. Chase's Ointment has been worth a hundred dollars to me—before using it I had spent a great deal more than that in unsuccessful treatment from doctors. We have also used Dr. Chase's other medicines, the Nerve Food having restored my health after suffering from severe nerve trouble when a girl."

DR. CHASE'S OINTMENT

60 Cents a box, all dealers, or Edmanson, Bates & Co., Ltd., Toronto

South Mountain

Mr. E. V. Dodge, of Cardinal, was a caller in town Monday on business.

A number of homes are under quarantine for measles at present.

Mr. and Mrs. Army Patterson were into Ottawa Tuesday.

Mrs. C. Kirkwood and little Doris, of Toy's Hill, were guests of her sister, Mrs. L. Boyd Monday.

Messrs Wm. Thompson and Harry Barry were up to Prescott the latter part of the week.

Mr. and Mrs. Geo. Doran and family moved to their new home at Cardinal the first of the week.

Mr. and Mrs. R. W. Boyd and Miss Annie, were down to Winchester Monday.

Mr. Alfred Welling and Miss Naomi Berry were guests of friends at Ottawa the latter part of the week.

Miss Linda Hess left on Friday last to attend Normal School at Ottawa.

Mr. C. Wynn has returned home after a visit with friends at Rochester, N. Y.

The many friends of Mr. Martin Hall were very sorry to learn of his barn buildings all being burned on Friday evening last.

Mr. and Mrs. Edwin Gilroy were down to Winchester one day last week.

Mr. Thos. Major, of Toy's Hill, was in town the first of the week.

We are sorry to report Mr. W. Marshall still very ill.

Mr. Wm. Burd was out to Cardinal last week.

Mrs. S. Major and children are visiting friends in the States.

The Late Mr. Daniel Grant

In loving memory of the late Mr. Daniel Grant, cousin of Mrs. Henry McQuaig, whose birth place was in South Gower, near Heckston. He was a son of the late Lewis Grant Esq., and his wife Mary who died many years ago. Lewis Grant Esq. moved with his family to Kemptville where he carried on the milling business for years in that town. Later he moved to Bath and from there to Toronto, where he died Sept. 20th, 1895 in his 80th year. The late Mr. Daniel Grant's home was still in Toronto, till three years ago, his sister Eliza, who kept house for him, died in her 74th year, leaving him alone. He then went to Dakota and was with his niece till he came to Winchester about a year ago. He was converted in 1866 under the ministry of Rev. J. Brown, and has since lived a consistent christian life, he was a member of the Baptist Church and received daily visits from Rev. Mr. White during his last illness. Mr. Grant was preparing to return to his niece in Dakota, when he was suddenly stricken down on Sunday, Oct. 14th. His nephew Gideon Grant, a prominent lawyer in Toronto took his uncle to Toronto where he entered a hospital but he passed away on Monday the 22nd in his 82nd year. His remains were brought back on the 24th and laid in the family plot in South Gower cemetery, to await the ressurrection morning "Blessed are the dead who die in the Lord."

Seekings—Beckstead

The home of Mr. and Mrs. J. D. Beckstead, Williamsburg, was the scene of a very pretty wedding on Wednesday evening, Oct. 24th, 1923, when their eldest daughter, Jessie Eleda, was united in marriage to George, son of Mrs. Pauline Seekings and the late Mr. George Seekings of Brockville. The ceremony was performed by Rev. S. F. Newton of Athens, Ont., in the presence of about seventy-five invited guests. The bride who was given in marriage by her father entered the drawing room to the strains of Mendelssohn's wedding march, played by Mrs. A. Miller, cousin of the bride. She looked charming in a gown of white meteor crepe with a cononet veil held by a wreath of orange blossoms and carried a bouquet of American Beauty Roses and White Heather. The bridesmaid, Miss Maudie Seekings, sister of the groom, was dressed in biege georgette, and carried a bouquet of pink chrysanthmeums. Mr. Sidney Seekings was the best man. During the signing of the register, Mrs. Clinton Fetterly of Morrisburg sang "O promise me." Following the ceremony, a sumptuous wedding supper was served by Miss Aggie Beckstead and Mrs. Strader McIntosh.

The groom presented the bridesmaid with a gold bar pin set with amethyst and pearls, the best man with a pearl tie pin, the pianist a pearl pendant and chain, the flower girl and ring bearer, signet rings. The bride's gift to the groom was a silver cigarette case. The numerous beautiful and costly gifts including several cheques which the bride received show the esteem in which she is held by her friends. The happy couple left on the 10.30 train amid showers of confetti for Montreal, Quebec city and other eastern points, the bride travelling in a blue broadcloth suit a grey panne velvet hat and a black fox fur neck piece the gift of the groom. Other guests from a distance were:—Mrs. Jessie Abbot, Toronto; Mrs. Helen Mouthrop, Buffalo; Mrs. Sarah Seekings, Bridgeport, Conn.; Mrs. Annie Mouthrop, Waddington; Mr. and Mrs. John Gossman, Governeur; Mrs. Anna Barker, Antwerp, N. Y.; Miss Florence Seekings, Montreal; Mrs. John Carmichael, Schenectady; Mrs. Minnie Tousaw and daughter Mabel, Iroquois; Mr. Geo. Reddick, Mille Roches; Mrs. F. S. Newton, Athens; Mr. and Mrs. Lou Brown Brockville: Mrs. Claud Merkley and Mrs. Alice Strader, Ottawa.

Minced Steak at Fisher's 15c Per lb.

Cleaning Chimneys

Renfrew Town Council is moving in the direction of having the people pay more attention to the cleaning of chimneys. In this Canada of ours chimneys are usually left to take care of themselves; consequently chimney fires are frequent. This lack of care for chimneys makes for defective flues, because if chimney cleaning were common flues would not be overlooked, and everybody knows the defective flues lead to many a fire, being on about equal terms in that respect with faulty wiring and spontaneous combustion. No one will be more pleased with the work of chimney reform than the members of the fire brigade who get many an annoying run to chimney fires.—Mercury.

NOTICE TO FARMERS!

At periodical intervals a prudent owner of an automobile has it overhauled by an expert. The engine is thoroughly examined, all bolts are tightened, the electrical system is tested, the brakes are inspected and the carburator regulated,

Is it not just as wise and perhaps more important to have your human power plant overhauled from time to time. All unknown to you, some important part—the heart, the lungs, the kidneys—may be on the verge of a breakdown. Only a thorough medical examination by a competent physician can reveal your real condition. Let one examine you. If he finds you in good physical condition, you will be glad to know it. If he finds any impairments, this knowledge will give you the opportunity to apply correct measures, which may overcome them or at least control them so as to save you from severe illness, possibly from permanent disability.

A $5000.00 participating policy at age of 35 is $107 a year. The dividends year $61.78 or roughly 60 per cent. of this year's premium. For an an additional $6.00 in case of accidental death, the Co. will pay your beneficary $10,000.00 Ask or write for free book on "How to Live Long."
