The above Cars are in the low price field except that in the cases of Chrysler, Overland and Star in the Provincial figures only.

MELVINS' GARAGE

Winchester, Ont.

Government Control!

We Buy Eggs according to Government Regulations.

Did You Ever Give A Thought To This?

That hard times mean nothing to a hen? She keeps on digging and laying eggs, regardless of what the newspapers say about conditions. If the ground is hard, she scratches harder. If it is dry, she digs deeper. If she strikes a rock, she works around it.

But always she digs up worms and turns them into hard-shelled profits as well as tender boilers.

Did you ever see a pessimistic hen?

Did you ever know of one starving to death waiting for worms to dig themselves to the surface?

Did you ever hear one cackle because times were hard?

Not on your life. She saves her breath for digging and her cackle for eggs.

We are not digging or cackling but we believe we are on the right track for the best interests of the producer. Our price for Extras for Saturday and Monday is 28c per doz. We have for sale at reasonable prices Egg Cases 15 doz. and 30 doz., also Feed Wheat, Laying Mash, Chick Feed, etc.

Dundas Poultry & Egg Association.

Our Column

Canada is to issue a set of jubilee stamps for the coming celebration of the sixtieth anniversary.

Experienced Rupture Specialist will be at Hotel Winchester, Wednesday, April 20th. See advt in this issue of the Press.

If you want to get in on the \$5.00 in gold Singles Competition, join up with the Bowling Club now. Billy Leonard is the Secy-Treas. and will be glad to have your name and fee.

At the advanced age of 91 years the death occurred on Sunday at her home at Kemptonville, of Mrs. Mary McKeown, widow of the late Mr. Hugh McKeown. Her whole life was spent in Kemptonville and vicinity.

A meeting is to be held at Morrisburg, on Wednesday of the County Boys Work Board to arrange for the Boys Camp at Broder Island. Mr. C. F. Plowman of the Provincial Boys Work Board is expected to be present.

Rev. H. W. McCracken, Presbyterian minister of Carnarvon, near Belfast, Ireland, has accepted the call extended to him by the Almona Presbyterian Church with a salary of \$2,500 per annum, free manse and a month's holidays, as well as assistance in transporting Mrs. McCracken and their children from Ireland.

Some of the farmers in this section who have made considerable on their maple syrup this spring can join lustily in that patriotic song "The Maple Leaf Forever."

This is a good year for sap, and the old saying that a good sap year is a poor wheat year is true this season, as the frost every night is injuring the fall wheat.

The three Government Control Commissions are drawing a salary of about \$110 a day for 365 days in the year. That's one of the great things this Government Control is doing for the people.

That the gladsome days of Spring have come. So full of joy and meaning: But they don't mean a thing to some Except to start house cleaning.

Work in the flower garden can rightly be charged to recreation and entertainment. And when one really gets interested in flowers, plenty of time will be found to care for them without neglecting other duties.

We will have two holidays to celebrate the Diamond Jubilee of Canadian Confederation. As Dominion Day falls on Friday this year, Saturday, July 2nd, has also been declared a public holiday throughout Canada. This makes an extra holiday in 1927.

When "television" come into general use in connection with the telephone, the speaker will have to be as truthful and cautious as they are now when in personal conversation. There will be no more winking, and sticking out of the tongue, and face making, as the person at one end talks sweetly and friendly to the other end. If a telephone case could talk what a lot of deceit they could reveal.

Some people think they are "getting even with an editor" when they come in and "stop their paper." They should be reminded of the crushing blow he had inflicted. "O" said Horace, "now go home, and stick your finger in a pail of water; then draw it out, and see if you can find the hole."

It takes a heap of livin' in a house to make it home. A heap of sun and shadder, and ye sometimes have t' roam. Afore ye really 'preciate the things ye lef' behind.

An' hunger for them somehow, with them allus on yer mind. It don't make any difference how rich ye get t' be.

How much yer chairs and tables cost how great yer luxury: It ain't home t' ye, though it be the palace of the King.

Until somehow your soul is sort of wrapped round everything.

—Edgar Guest

A friend has passed along the following rules which are worth keeping in mind if your car has not yet had its spring overhauling:

Always take it for granted that the other driver is a fool. You can't get hit if you're out of the way.

Don't get the idea that your car is the fastest thing on the road. Death is very swift.

Don't think the speed cop can't catch you. That's the way he makes his living.

If you're late for an appointment, don't speed. You may never get there.

If s-p-r-i-n-g spells speed to you, leave your car in the garage and go for a walk. Jail is unpleasant when the sun is shining.

Remember that gasoline mixes with love no better than it does with liquor.

Bad brakes bring bad breaks.

Let the other fellow fellow be the reckless driver. You be the wreckless one.

Revival Services

The revival mission in the Baptist Church under the efficient and capable leadership of Evangelist Alexander Torrie, B. A., of Toronto, continues to increase in interest and attendance, until Sunday night the church was filled to overflowing and many had to turn away not being able to gain admission and many stood throughout the service.

Beginning Tuesday night the services will be held in the Town Hall until further notice.

Mr. Torrie's messages have been scriptural and practical, appealing to the conscience rather than the emotions, and his methods while quite unsensational are effective. He excels in his clear presentation of the plan of salvation, and his methods are thorough. He has truly a passion for soul-winning.

LOCAL AND GENERAL

Your label will tell you how your Winchester Press subscription account stands on our books.

Mrs. Daniel Algaire, mother of Dr. D. O. Algaire and J. C. Algaire, Registrar of Deeds for Stormont, died at the Cornwall General Hospital on April 3, after an illness of several weeks.

The citizens of Finch and Stormont were shocked on Monday to learn that Hugh C. McLean, well-known resident of that village, had dropped dead at his home. The deceased was 68 years of age.

On Friday, April 15th, there will be service in St. Mathias Church at twelve noon to 3 p. m. Short addresses will be delivered on "The Seven Words from the Cross." Service Sunday, April 17th, at 7.30 p. m. A cordial welcome is extended to both services.

Buy at Casselmans where you get service, style and quality. Hats that are different, Coats that spell Distinction, Dresses of Charm and Variety. Come in and be fitted.

Mr. and Mrs. Frank Summers, of Fielding, Sask., spent their winter holidays on the western coast visiting Vancouver, Victoria, Chilliwack and other points. They were very much taken up with the ideal climate where the grass is green twelve months a year. While there, they visited Mr. and Mrs. Bertus Summers and other friends formerly of Fielding, who gave them a wonderful time sight seeing. Mr. Summers intends going back this summer to purchase a home. He says there's no place like Vancouver for him. Vancouver or bust.

Women's Institute

Members are to answer roll-call with some don'ts for the home. Mrs. Dukelow will give an address on "Woman, her sphere and influence." This April meeting will be held in the Town Hall next Tuesday, the 19th, at 3 p. m.

Successful Sale

The Fisher Auction Sale on Tuesday afternoon attracted a large crowd, and the goods offered found ready purchasers. Ross Morrow, the auctioneer, appeared in his element, and never a nod or wink was lost by him. It was one of the best sales held in this section this season.

Got Stiff Sentences

The four young men who held up the Dominion Store at Cornwall a couple of weeks ago, and escaped in a stolen car, but were arrested and brought back, were on Tuesday sentenced to serve 3 years for two of them, 5 years for another, and Fred Melleur, who appeared the leader of the gang, got 10 years in the Kingston Penitentiary. The reward of crime.

Burned Hole in Coat

An Ottawa gentleman who was a visitor to Winchester on Sunday last, before entering the home he visited pinched the end of a cigarette he was smoking and put the stub in his overcoat pocket. The coat hung in the hall for sometime, when the smell of cloth burning attracted the attention of the party. Investigation showed the overcoat of the visiting gentleman burning. A large hole was burnt through the pocket, and a \$5 pair of gloves ruined. It is easy to imagine what might have happened if the incident had occurred at night and after the family had retired to bed.

A Second Fire

On Wednesday of last week about 4.30 fire was discovered in one of the upper rooms in the Allison residence, east of Morrisburg. Immediately upon discovery, Mrs. Allison telephoned to Morrisburg for assistance, but before the large crowd who answered the call had reached the building, the fire had made such headway that nothing could be done to save it. Practically all the furniture and clothes upstairs were destroyed; the furniture in the lower rooms was carried out to safety. Special effort on the part of the fire fighters prevented the loss of other nearby buildings. A little over a year ago Mr. Allison lost by fire his barns and henery. He had built new ones, and his house had been greatly improved during the past few years. While there is insurance the loss will be very heavy.

Killed by Machinery

Wm. Brown, pumpmaker, Kemptonville, had his clothing caught in gear of machine used for boring water pipes, and was strangled to death. His lifeless body was found by his wife when she went into the shop to get chips to start a fire. The late Mr. Brown was in his 76th year, and had spent his life along the Rideau. He was born at North Cowar, and resided in that vicinity until about seven years ago, when he and his wife moved to Kemptonville. He was widely known throughout the district, and his untimely passing is deeply mourned by a wide circle of friends. Besides his widow he is survived by three daughters, Mrs. J. R. Wallace, of North Gower; Mrs. Lytle Crowder, of Mountain; Mrs. J. Lapland, of Cornwall; and three sons, Park Brown and W. G. Brown, of Roule u, Sask., and Eric, at home, also two brothers, James Brown, of Westboro and John W. Brown, Ottawa.

A play entitled "The Deacon's Second Wife" will be presented in Summers School House, on Monday, April 18th. Admission 35c and 25c. Following is the cast of characters:

Malvina Fitz—Mrs. Ross Durant.

Deacon Barachias Fitz—Mr. Edward Summers.

Miss George Washington Fitz—Reginald Parmenter.

Nancy Melissa Fitz—Eileen Durant.

Mrs. Brown—Mrs. Frank Cross.

Kate Rollins—Mrs. Edward Summers.

John D. Bullock—Mr. Ross O. Durant.

Mrs. Bullock—Mrs. Geo. H. Casselman.

Dorothy Bullock—Glenna Durant.

Hartley Bullock—Mr. Herman Strader.

Ernest Rench—Mr. Oscar Howes.

Philip Gamboe—Mr. Edward McKencher.

LOCAL AND GENERAL

Mr. Howard Justice, medical student at Queens, is home for the Easter holidays.

Rev. R. E. Newman, Dundela, was the guest of Mr. and Mrs. S. J. McCrea this week.

Mrs. H. R. Patterson, of Merrickville, is spending this week here with Mrs. Annie Hughes.

Mr. W. D. McQuaig, of Smiths Falls, spent Tuesday here with his mother, Mrs. H. McQuaig.

Mr. George Hamilton, of Chesterville, spent several days last week visiting with friends here.

Miss Helen Agnew, attending the College of Education at Toronto, is home for the Easter holidays.

Mr. W. S. L. Merrill, Morrisburg, has sold his flour and feed business in that village to Mr. John Dain.

Miss Helen Smith left on Monday for Toronto and Kitchener, where she will spend her Easter vacation.

Mrs. E. E. Adams and daughter Laura, of Prescott, were week end guests of their aunt, Mrs. Henry McQuaig.

Mr. and Mrs. Asa Hart spent one day the first of the week, with Mr. Nathaniel McIntosh, Sr., of Inkerman.

Miss Dorothy Hummel and brother, Donald, of the Boyne, called at the home of Mr. and Mrs. Asa Hart, Wednesday.

Mr. Lloyd Walker, Mountain, who has not been well for sometime, is now in the Civic Hospital, Ottawa, under treatment.

Mr. John Dawley is in the Cornwall Hospital for a slight operation. Mr. Dawley's many friends hope for his speedy recovery.

Mr. Hupert Helmer, who is a student at Queens University will take up missionary work in Saskatchewan during the summer months.

In Memorium

In memory of our dear father, Thomas Middagh, who departed this life, April 16, 1923. Inserted by his sons.

Just a thought of sweet remembrance, Just a memory fond and true, Just a tear of silence falling And a longing just for you.

Middagh Brothers.

In Memorium

In loving memory of Jacob Dixon, who died April 19th, 1925.

This day brings back sad memories Of a loved one gone to rest, And those who think of him to-day Are those who loved him best.

Wife and Family.

Coat Exchanged

On Sunday night last I got my overcoat exchanged in the Baptist Church, and would be grateful if the party having my coat would return same and get his.

Chas. Frost, Winchester.

A Refreshing Night's Ride on Lake Erie

Take a palatial C & B Steamer from Buffalo to Cleveland and enjoy a cool, clean steamer arriving in the morning, rested by the break in your journey. Tour Cleveland. Spend a day on our Steamer "GOODTIME" with several hours at famous Cedar Point or Put-in-Bay summer resorts. A fascinating round trip day excursion through the beautiful Lake Erie islands. Stop-over privileges. Leave Buffalo any night at 9:00 p.m.; arriving in Cleveland at 7:00 a.m. (Eastern Standard Time). Ask your ticket agent or tourist agency for tickets via C & B Line. New Tourist Automobile Rate—\$7.50 and up.

Fare to Cleveland \$5.50; to Cedar Point \$6.50

How far will your car go before the miles begin to tell?

ALMOST any car will give you satisfactory results for the first 10,000 miles or so.

But if you want the same fine service on through the second, third and many following tens of thousands of miles, buy a McLaughlin-Buick!

Accurate tests at the great Proving Ground of General Motors, where all cars are driven and examined, show McLaughlin-Buick's sturdy construction and powerful Valve-in-Head Engine still gaining in efficiency at the point in miles where other cars are distinctly on the down grade.

It is the care in McLaughlin-Buick design—the tests at the Proving Ground to be sure a suggested change is right—the search for better and more durable performance constantly carried on—which are responsible.

Enormous volume and its savings make possible this extensive research and McLaughlin-Buick's superior construction.

McLaughlin-Buick cars are built for big mileage on their speedometers—for greater satisfaction to their owners. Buy one for years of exceptional service.

W. H. FETTERLY & Co.

McLAUGHLIN-BUICK

WHEN BETTER AUTOMOBILES ARE BUILT, McLAUGHLIN-BUICK WILL BUILD THEM

Here and There

The Canadian Pacific purchasing office located at Sicamous, B.C., spent more than \$100,000 in 1926 for Okanagan products. Fifteen years ago such purchases amounted to but \$5,000.

With the fisheries of the province of British Columbia running to \$21,000,000 annually—or half the Canadian total—numbers of enquiries are being received from financial interests in Eastern Canada and the United States, with a view to spying out business opportunities.

Until the problem of truck competition is solved satisfactorily all transportation in Canada will suffer, according to T. E. McDonnell, Vice-President of the Canadian Pacific Express Company, in a Toronto address recently before the Transportation Club. He states that under the present transportation regulations the railway and express companies are operating under very unfair conditions.

For the second time in three weeks the stork has paid a visit to a Canadian Pacific passenger train. Yesterday on the Imperial Limited going east from Vancouver, Mrs. Olson, of Malakwa, B.C., gave birth to a son between Malakwa and Revelstoke. Mrs. Olson was on the way at the time to the Revelstoke hospital. Railway officials and employees did all in their power to render assistance. Telegraphic dispatches from the hospital state that both mother and son are doing well.

The election of J. H. R. Fairbairn, of Montreal, chief engineer of the Canadian Pacific Railway, as president of the Engineering Alumni of the University of Toronto, was announced at a dinner-smoker of the alumni held in Hart House recently. More than 150 graduates acclaimed the new president with the enthusiastic spirit characteristic of a gathering of "School" men. The chief speakers of the evening were Sir Robert Falconer, President of the University, and Mr. Fairbairn.

The rapid strides made by Prince Edward Island's seed potato business, aggregating 800,000 bushels for the past season, mostly shipped south, formed a subject of discussion at the 51st annual convention of the New Brunswick Farmers' and Dairymen's Association here. It was pointed out that this business has rapidly developed; that ten years back not a single seed potato was sold outside of the province. The remarkable advance in this business was due, it was claimed, to the production of a disease-free potato.

Immigration to Canada in the ten months of the fiscal year ending January 31st, amounted to 118,199, compared with 76,439 for the same period of 1925-6. This is an increase of 55 per cent. January immigration amounted to 4,164, compared with 2,324 for the preceding January, a gain of 79 per cent. Of this immigration 899 were British, 905 from the United States and 2,360 from other countries. During January 2,297 Canadians who had gone to the United States with the intention of remaining permanently returned to Canada, making a total of 50,898 so returned for the ten months of the fiscal year.

The Hon. William D. Euler, Minister of Customs and Excise, announces that the present period of 30 days of free entry into Canada of United States motor tourists on a permit will be extended to 90 days, to conform with the privilege now granted by the United States authorities, who admit Canadian cars carrying motor tourists free into that country for 90 days. The only difference will be that the Canadian permit will not initially be for 90 days, but for a first and second 90-day extension, if and when the tourists can show bona-fides and recommendation from reputable associations of automobilists in the United States. A larger tourist movement in Canada is expected to result from the change.

Here and There

Passengers aboard the Canadian Pacific Empress of Scotland were not deprived of visiting China on the present round-the-world cruise of this ship, on account of the recent trouble in that country. Word from the cruise director is to the effect that the passengers received a warm welcome at Shanghai and that the Chinese were most friendly.

A new Canadian bird, the "turken," has made its appearance. It is a cross between a turkey and a Rhode Island hen, and was first brought to public attention at the Edmonton poultry show. George Spurgeon, who raised it, claims that it will effect a revolution in the poultry business, as it combines the best features of the hen and the turkey. It has a hen body and a turkey head.

His Majesty King George and H.R.H. the Prince of Wales have notified the British section of the World's Poultry Congress that they intend to exhibit poultry at the congress exhibition to be held in Ottawa from July 27 to August 4 next. There is also a possibility of the Queen of the Netherlands and King Alfonso of Spain sending exhibits, in which case the Canadian capital will be the first city in the world privileged to house the exhibits of several royal flocks.

The Indians of the three prairie provinces last season produced approximately 1,000,000 bushels of grain, of which about half, or 488,000 bushels was wheat, according to a recent government report. There are about 35,000 Indians in the area in question and the portions reserved for their use include some of the most fertile land of the west. They had 97,000 acres of land under cultivation in 1926 and they own about 25,000 head of cattle and 35,000 horses of a good type.

Warren Cordingley of Ashton, Idaho, won the 85-mile dog race from Calgary to Banff held recently in connection with the Banff annual Winter Carnival. The race was one of the hardest fought in the history of these events. Cordingley's lead dog broke down and was carried to the finish line on the sled. Ike Mills' team, of Banff, picked to win the race, was attacked by town dogs near Calgary. Both driver and dogs were badly bitten but stuck to the trail and finished.

Applications for permits to develop hydro power in Western Ontario and Northern Manitoba are on a scale that represents an ultimate volume of 5,000,000 horse-power, indicating the industrial growth that the territory is achieving. These range all the way from the Lake of the Woods country to the basin of the Nelson River, and relate to pulp and paper mills, mining plants, civic hydro promotion and transportation projects.

During 1927 more than 6,000 Hungarians will emigrate to Canada, according to Albert de Hayden, Hungarian Consul-General of Canada, who is here on business in connection with the 6,000 countrymen who came to Canada last year. "My investigations have shown," he said, "that on the average the newly arrived Hungarians are doing fairly well despite the fact that this is a dull time of the year in farming and to a lesser extent in industrial plants."

"If they can pitch ball as well as they can snowball, they would be some team; they sure can send some stingers," was the comment of one of the Calgary Scouts as he dug himself out of a concentrated volley of snowballs that the Westminster Scouts had placed on various parts of his body and face, when the Calgary boys tried to enfilade the choristers in a snow battle staged near the C.P.R. station. It was the culmination of a program arranged for the Scout choristers during the visit to Calgary recently of the Westminster Boys' Choir.

Here and There

When the internal trouble which has been devastating China for the last two years subsides, a tremendous market will open up for Canadian wheat in that country, according to J. E. Scott, representing a large British firm at Hong Kong, on his way back to London to report.

Bounties paid for bob-cats in New Brunswick, by the Department of Lands and Mines, have so far exceeded the figures for the corresponding period of last year, according to L. A. Gagnon, chief game warden, who states that wild cats are being killed in greater numbers each year.

Ontario buyers of milk cows have about completed the purchase of five carloads of Guernsey cows from Colchester, Cumberland and Picton counties. The buyers are Anderson Brothers and Messrs. Graham and Calder from the Hamilton districts.

The first auction sale of horses that has taken place in Montreal for some years was opened at the East End Stock Markets, March 28. Stabling was put at 262 horses and it was stated that approximately 200 horses were sold. The demand was mostly for heavy draught horses, Percherons, Clydesdales and the like, for carter and for lumbering purposes, coming chiefly from Alberta and Saskatchewan, and some from the middle west.

Consequent upon an agreement reached at a general conference of Canadian and United States telegraph companies the Canadian Pacific Telegraphs have announced that code words will be accepted at all their offices in future for day and night letters. This departure will affect both Canadian and international business, the companies concerned being: the Postal-Telegraph Company, the Canadian Pacific Telegraphs, the Canadian National Telegraphs and the Western Union Telegraph Company.

The development of a new industry from the propagation of muskrats and other water fur-bearing animals, in land and water areas, leased from the Province of Alberta through agreement with the Dominion Government, was indicated by Hon. George Hoadley, Minister of Agriculture, in committee discussion in the Alberta Legislature. The amendment would give the Government power to regulate and license fur and game farms, and to lease the Dominion water and land areas for the propagation of such animals.

A keen competitor to Betsy Wiley, the Nova Scotia world's champion milk and butter producer, has been discovered at Fox River, Cumberland County. Mr. Henry S. Kerr of this place, claims that he owns the champion butter producing cow in her class. This cow is a grade Ayrshire and Durham cow, which has just recently freshened. In one week she produced 392 lbs. of milk, which churned 20 1/4 lbs. of butter, after deducting approximately 12 quarts of milk and 1 1/2 quarts of cream for home consumption. This record is creating keen interest.

Following upon his recent announcement to the effect that a Toronto firm of architects would be employed in connection with the erection of the new Canadian Pacific Hotel in that city, E. W. Beatty, Chairman and President of the Canadian Pacific Railway, recently stated that Messrs. Sproatt and Rolph had been appointed associates with the firm of Ross and Macdonald, of Montreal, to handle this work. Messrs. Ross and Macdonald have been employed in Canadian Pacific work for some time, the latest of their buildings being the company's new hotel at Regina. It is desired that the new hotel shall be thoroughly representative of the city in which it stands and the appointment of a firm of Toronto architects is made to further this purpose.

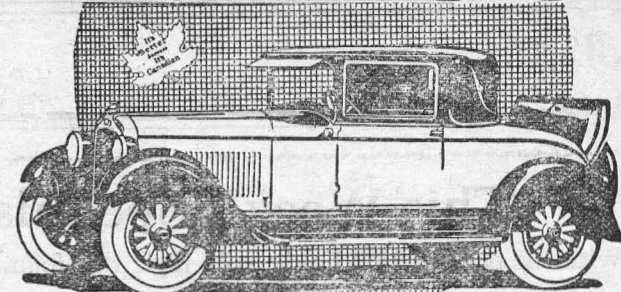

They Forgot The Telephone

The scene as recounted by the watchman. The incident is one of scores of recent events in which the telephone has proved to be the most helpful ally of the police, the fireman or the physician.

FOUR times during their two hour stay "gentlemen yeggs" exploded charges of "soup" in an effort to break open the safe at the Neal Baking Powder Company in Windsor. Securely trussed to a chair in a cupboard the watchman heard the disappointed robbers leave the building. Wriggling to a nearby telephone, with his mouth he lifted the receiver off the hook and yelled, "Help! Police!" The ever watchful Bell operator picked up his cry and relayed it to Police Headquarters, with the result that in five minutes the police flyer carrying a squad of uniformed men was on the scene and taking up the trail of the bandits. An enterprising photographer re-set

The New and Finer PONTIAC SIX

Its Smoothness and Beauty Will Thrill You

THE announcement of a New and Finer Pontiac Six—built in the great, new General Motors plants—justifies high expectations. Yet even this scarcely prepares you for the thrill of real delight you experience as you see the New and Finer Pontiac Six, and ride in it for the first time. Here are all the smoothness, power and stamina for which Pontiac Six won such unstinted praise last year. Here is the economy for which Pontiac Six became so quickly renowned. Here is all that made Pontiac Six, in its first year, the greatest success of all motor car history. But in addition, here is a new BEAUTY—new, Fisher Bodies, lower, longer, more graceful; new, higher radiator, new, appealing shades of Duco. Here is a car that commands a second admiring look wherever it appears.

The New and Finer Pontiac Six is a car of dashing appearance, built to perform outstandingly. It merits your close inspection, as its new, lower prices warrant your serious consideration.

GEORGIAN BAY CANAL BILL DEFEATED IN COMMITTEE

Contrary to Public Interest to Grant Prayer of Petitioners Was Reason for Rejection.

ONLY ONE MEMBER SUPPORTED THE BILL.

Ottawa, Ont.—The bill to renew the Georgian Bay Canal charter was killed with startling suddenness. Only one member, E. J. Young, Weyburn, Sask., had courage enough to vote "year." Then came the amendment "that the bill was not in the public interest," as the reason for rejection. This was moved by F. G. Sanderson, South Perth, in extension of his vote to send the bill to the committee. The amendment was carried unanimously.

The issue now is who is to develop and control Ottawa River power. Will it be the Dominion or the Province of Ontario and Quebec? No doubt any other leases on the Ottawa will be refused renewal so that the problem is the right of development. The Federal Government is not in the power business but desires to secure revenue from the Ottawa power. It is believed a conference between the representatives of the Federal Government and of Ontario and Quebec will be called to consider the question. The Government will not renew the lease of the Carillon power site, which expires on May 1st of this year.

Benito Mussolini
Dictator of Italy, who is not looked upon to show any relenting front in the present Balkan tangle.

MOISTURE ABUNDANT ON WESTERN FARMS

Land in Excellent Condition for Beginning Spring Work.

Winipeg.—Looking forward to another bumper crop, farmers at different points in Saskatchewan and Alberta are commencing operations. Reports made to the Department of the Canadian Pacific Railway here indicate that plowing and dragging will be general at Hinton, Saskatchewan, by the end of the present week, and that the farmers near Cardell and Ponteix, Saskatchewan, are plowing.

The heavy snowfall of last winter and gradual thaws have put the land in excellent condition for reception of seed, with abundant moisture to ensure normal germination.

With continuance of favorable weather, land operations are expected to be in full swing in Alberta by April 9. In Saskatchewan and Manitoba prospects are not so bright for immediate commencement of work. Much acreage is still under water in both provinces, while a blanket of snow still covers Manitoba as the result of the recent storm.

School Children in Palestine Increase in Numbers

Jerusalem.—At the beginning of the new school year the number of pupils in Hebrew educational institutions was 12.5 per cent greater than last year, reports the Educational Department of the Zionist Organization. Another 2,500 children have been admitted into schools, for whom an additional 88 teachers have been engaged.

This increase is mostly in Tel Aviv, the Jewish municipality which last year made all primary education free. As many as 194 institutions, manned by a staff of 742 teachers and serving 18,593 pupils, are administered by the Zionist Education Department, which operates with the funds of the Keren Hayesod.

Bilingual Stamps Issued for Confederation Celebration

Ottawa.—Acting on representations made by the National Committees in charge of the celebration of the sixtieth anniversary of Confederation, it has been decided that a bilingual issue of stamps will be printed by the Post Office Department, Hon. P. J. Veniot, Postmaster-General, stated in the House of Commons in reply to a question asked by Hon. J. W. Edwards (Conservative, Frontenac-Addington). Mr. Veniot said that any future issue of these stamps beyond the issue in connection with the celebration would be a matter for consideration.

Those who have the gift of eloquence have always before them a broad and open road, which they usually think excuses them from the necessity of exploring the country through which they pass.

ELEVATOR AT FORT WILLIAM DESTROYED

Spectacular Blaze Causes Loss Estimated at \$75,000.

Fort William, Ont.—Fire caused loss estimated at more than \$75,000 when the Wiley Lowe Company's inland elevator on Pacific avenue was destroyed. In the building was a quantity of grain estimated at around 25,000 bushels and practically ruined. The cause of the fire is not known. An alarm was sent in before six o'clock and after it had been put out the firemen watched the place for about an hour and then left it in charge of four employees of the plant. Another alarm came in about 8:30 and the flames appeared to be in one of the shipping legs. Soon the place was a raging furnace. As a result of a dust explosion two firemen, John Kemp and John Maki were injured and taken to the hospital.

The fire was a magnificent spectacle, the sheet iron siding keeping the blaze in at the sides. They roared out at the top and mounted high in the air. Sparks ignited eighteen roofs in the adjacent area, a strong east wind blowing. Some of the roofs ignited were more than a quarter mile away. Large pieces of sheet iron floated high in the air and were a menace to life and property as they descended.

The capacity of the elevator was 75,000 bushels, and insurance was carried. It was built in 1912 but an addition was later added. There was a drying plant in connection.

The Vineyards of Canada.

Altogether some 13,000 acres are given over to the culture of grapes in Canada, and the annual production averages 40,000,000 pounds, valued at \$2,350,000. The 1926 crop has been estimated at 38,400,000 pounds of a value of \$1,920,000. The vineyard industry in Canada dates back at least to 1857, when a small area was set out in vines at Queenston. The grapes of Ontario were developed largely from species native to Eastern America, with here and there a sprinkling of European "blood." There are now many varieties, in colors of black, blue, white and red, of which the blue Concord, white Niagara and red Rogers are favorites alike for dessert, jam and jelly. None of the Canadian grapes will dry to make raisins or currants. A large percentage of the grape crop is used for wine-making and all varieties may be used for this purpose, but the Concord is the leading wine grape. In 1925, the last year for which figures are available, the Canadian wine industry used 8,911,889 pounds of domestic grapes and 65,190 pounds of imported grapes. Fermented wine is the major product of the wine manufacturing industry and in that year totalled 1,388,265 gallons. A small amount of unfermented wine and some grape juice is also produced. On the average approximately one-third of the grape crop enters the commercial wine industry, while, undoubtedly, a further considerable proportion is used for home manufacturing of grape wine and grape juice. In this connection the production figures may be interesting:

Year.	Quantity	Value
1920.....	33,114,457	515,280
1921.....	46,872,308	421,713
1922.....	70,308,462	756,520
1923.....	42,185,177	858,651
1924.....	24,500,000	1,144,559
1925.....	24,000,000	1,388,265
1926 (estd)...	40,000,000

These figures take no account of large quantities of grapes used in the manufacture of home-made wines which, in the aggregate, must be considerable.

Grape growing in Canada is centered in the Niagara Peninsula of Ontario, where favorable climatic conditions have resulted in the growth of a vineyard industry of considerable proportions. Most of the vineyards are on a narrow strip of land, with suitable soil lying between the Niagara escarpment and Lake Ontario. The Niagara escarpment runs

New Liquor Commission Holds First Meeting

FIRST DUTY IS VISIT TO WAREHOUSE ON WELLINGTON STREET WHERE WET SUPPLIES ARE STORED

The Ontario Liquor Control Commission, which was empowered to act, by Lieutenant-Governor Ross' signature of the Liquor sale bill, at its first meeting in the office of Hon. D. B. Hanna. The commissioners, from left to right, are: Messrs. D. B. Hanna, chairman; Stewart McClenaghan and Hon. R. J. Manion, M.P. The meeting at which this photograph was taken was of a preliminary and informal nature. Later in the day, at the government

east from the city of Hamilton to the Niagara River at Queenston. Below it is a strip of country of three to seven miles in width which is one of the finest fruit growing regions in Canada. It is here that grapes are grown in the greatest abundance, but the district is also especially noted for its production of orchard fruits, such as peaches, pears, apples, plums, cherries and all small fruits. Grapes are also grown on a commercial scale in Halton and Peel counties along the north shore of Lake Ontario and in Essex and Kent counties, on the north shore of Lake Erie. They may be grown for home use over a large section of Ontario and in other parts of Canada by covering the vines in winter.

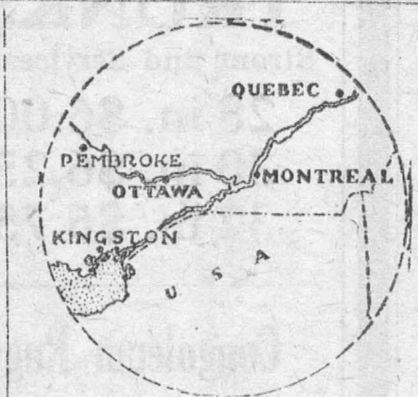

Economic Justice.

BY C. W. PETERSON.

As fully 85 per cent. of the cost of all commodities and services is represented by human labor, enjoying more or less standardized wages, it will be clear that the farmers' operating and living costs have increased to a fantastic degree since the war, while the prices for his own products have been governed by rigid economic laws wholly without reference to cost of production. The average price of wheat at Liverpool during the entire 17th century, for instance, was \$1.17 per bushel, with industrial labor at 25 cents a day. The prevailing price during 1923 was \$1.23 per bushel, with industrial labor at well above a dollar an hour. This well illustrates the tremendous decline in the purchasing power of the bushel of wheat, which is a fair indicator of all prevailing farm produce prices. As I have frequently pointed out, the greatest social crime following the world war lies in the spectacular increase in the reward to urban labor without a somewhat approximate increase in the reward to agriculture.

Every cent the farmer receives from his products is spent in wages and other operating expenses—in taxation, in the purchase of equipment and in the further improvement of his property. The farmer, even in prosperous times, is not an outside investor. This is particularly the case in partly undeveloped countries like ours. It consequently follows, that owing to this enormous increase in industrial labor cost, he faces an increased operating cost all around of considerably over sixty per cent., as compared with pre-war expenditure. On the other hand, it is very clear that the average price he receives on the farm for the full range of his products is not sufficiently above the average of pre-war times.

That the crude, directive agency of natural laws would ultimately mete out ruthless, social justice to everyone is hardly open to doubt. That it will do so in the long run, irrespective of man-made obstacles, is equally certain. But, unfortunately, these obstacles lead to long periods of readjustment involving stress, injustice and suffering on the part of great classes of producers, which is the price society pays for conferring special privileges by class war or legislation. Whether in the end it is worth while or not I shall leave to

Montreal Fever Area.

This map shows territory affected in the milk and cream embargo imposed by Uncle Sam, extending in a 200-mile radius from Montreal, where the typhoid cases are nearing a 2,000 total. Washington announced that the embargo would be strictly maintained till the danger from importation was past.

wiser heads to determine. The fact that confronts us is that the natural flow of production is obstructed on every side as between nations, and within nations, as between classes. All of which add to the increasing complexities of modern life.

The farmer is to-day the only class in Canada absolutely at the mercy of natural laws. Practically all other classes are protected by tariff, wage agreements and the like. But the continued drift to the towns, the world over, in itself a product of natural laws, will work the complete cure. There are brighter days ahead for agriculture and, with an intelligent policy of rural colonization in Canada, the urban districts would speedily profit by an increased and profitable agricultural production.

Celebrate 135th Anniversary of Vancouver's Arrival

Victoria, B.C.—The people of Vancouver Island and Washington State will join on May 1 in celebrating the 135th anniversary of the arrival of Capt. George Vancouver in the north Pacific and the meeting between the British navigator and Capt. Robert Gray, United States trader.

The Victoria and Seattle Chamber of Commerce are working together on plans to commemorate this im-

PIRACY OF CANADA WAVE- LENGTH BARRED BY COMMISSION

"Short-Term" Licenses Will be Issued to Radio Broadcasting Stations for Sixty to Ninety Days.

SO LONG AS COMMISSION APPROVES.

Washington.—The new Radio Commission has definitely adopted the policy of issuing only "short term" licenses to broadcasting stations. Under this policy, announced by Commissioner Bellows, acting as spokesman for the Commission, it will issue no three-year licenses for some time to come, if at all.

The law provides that licenses may be issued for as long as three years, but does not compel granting them for that entire period. The short-term licenses will be issued in the

beginning for periods running from 60 to 90 days to continue for indefinite periods, so long as the Commission feels that the station is entitled to a place on the air within the intent and meaning of the radio control law.

All American broadcasters will have to get off the channels assigned to Canada. The Commission will protect, by prosecution of offenders, frequencies allocated for exclusive use by Canadian stations. Commissioner Bellows said that stations on this side of the border barred from using the Canada wavelength "would have to find homes elsewhere."

The policy of the Commission after April 24, Mr. Bellows said, would be to issue short-time licenses, which might run anywhere from 60 to 90 days. Until April 24 stations would operate on the temporary "permit" system, which extended authority to function as conferred by the Secretary of Commerce under the Radio Act of 1912.

important historical event, following which the world first turned its attention in earnest to the Pacific coast of America. The celebration will include the burning of huge beacon fires on the southern shore of Vancouver Island and on Protection Island, off the Washington coast where Capt. Vancouver landed during his travels.

British Mechanic Invents An Aerial Bicycle

London.—An aerial bicycle is the invention of a British mechanic named Jules E. Palmer, living at Andover. Preliminary experiences lead him to believe that he can attain a speed of twenty-five miles an hour with the apparatus he is now constructing.

This will consist of a cigar-shaped balloon filled with hydrogen gas, below which is suspended an aluminum framework resembling a bicycle, with handle bars and pedals that will work a propeller in front of the machine.

The commission sittings were attended by Manager Hilliard Birmingham, of the Government dispensaries, in addition to Commissioners Hanna, Manion and McClenaghan.

ONTARIO LIQUOR PERMITS TO COST \$2 REGULATIONS OF CONTROL COMMISSION

Toronto.—Permit cards for individual citizens are to cost \$2 under the regulations which the Government Control Commission is now framing. The cards will be good for one year and will generally be subject to the conditions which the Government outlined when the bill was under discussion in the Legislature. In other words, they will enable the individual citizen to secure liquor for reasonable amounts for beverage purposes, but will be subject to cancellation for abuse of privileges.

The date of the opening of the Government stores is at best a matter of conjecture as yet. An immense amount of detail faces the liquor commission before it can enter upon its

function of administering the law for which the people voted last December. Daily sittings are being held by the commissioners, however, and every possible energy is being directed by them towards the aim of expediting the work of organization. At the present stage an estimate of one month and a half is understood to be approximately that which the officials hold of the time which will have to elapse before they will be prepared to undertake the retail end of their business.

The commission sittings were attended by Manager Hilliard Birmingham, of the Government dispensaries, in addition to Commissioners Hanna, Manion and McClenaghan.

FRENCH AVIATORS SAVED BY TWO COWS

Fell 4,500 Feet Out of Clouds Landing Squarely Upon Cow Cushion.

Paris.—Two cows grazing peacefully in the sunshine of the spring day saved the lives of two French army aviators when their plane fell squarely upon them from a height of 4,500 feet. The animals, however, died instantly, being crushed under the wreckage. One of the officers crawled out from underneath with but slight bruises and cuts, while the other only suffered a fracture of both arms. The accident took place at the aviation centre near Bordeaux, and the personnel desire to bury the cows with military honors.

British Columbia Leads in Social Legislation

Victoria, B.C.—British Columbia will be the first province in Canada to inaugurate old-age pensions under plans which are being shaped by the Provincial Government here. Following the action of the Canadian Senate in ratifying the old-age pension legislation which it rejected before, the British Columbia authorities are arranging to bring this scheme into effect here without delay. An agreement under which the Dominion and the Province will each pay half the cost of pensions will be negotiated, immediately so that these allowances may be extended early in the summer.

How many people will be affected cannot be estimated until applications for pensions begin to reach the Workmen's Compensation Board, which will administer the scheme. It will cost the province about \$200,000 a year, it is expected, as its 50 per cent. share of the pension allowances. With the adoption of old-age pensions, British Columbia will lead all other provinces in Canada in social legislation. It already enforces a mother's pension scheme, a workmen's compensation scheme, a minimum wage for women workers, a minimum wage for all male workers, a law to regulate labor in factories, an eight-hour day law, and a superannuation scheme for Government and municipal employees.

World's Poultry Congress.

His Majesty the King, it is announced, will exhibit pigeons at the Congress Exhibition, while H.R.H. the Prince of Wales is sending along an exhibit of chickens from his Cornwall farm.

Argentina will be officially represented at the Congress by Engineer Luis Marie del Carril, sub-director of Agriculture for the Argentine.

Delegates from the Netherlands will arrive at Halifax on July 20th on board the liner Nieuw Amsterdam. Reservations have been asked for a party of twenty. They are bringing fifty flocks of live poultry in addition to a large educational exhibit.

Dairy-type cows, com. to med., \$5; com. heifers, \$6.50; calves, \$6 to \$7; hogs, \$11.15 to \$11.25.

Condition of Rumanian King is Said to be Critical

ANOTHER BALKAN POLITICAL DIFFICULTY MAY FOLLOW UPON HIS DEATH

During the last few days cables have carried the news that King Ferdinand of Rumania is near death's door. His eldest son, Prince Carol, some time ago renounced his rights to the throne and has been leading a gay life in France. Carol's picture appears at the extreme left. Second from the left is Crown Princess Carol, who was formerly Princess Helen of Greece. In the centre is little Prince Michael, four-

year-old son of Carol and his princess, and who is now next in line for the throne. Queen Marie, who is well known on this side of the Atlantic and who visited Toronto, is shown second from the right. To the extreme right

is King Ferdinand. Three factions are striving for the ascendancy once Ferdinand passes out. The Bratianu family, long leaders in Rumanian politics, are determined to fortify their positions. Queen Marie is seeking to become re-

gent. The struggle between the two promises to be for control of the young Prince Michael. There is also a considerable faction who favor Carol in spite of his abdication. It is said the army is behind him.

THE BRODER MEMORIAL

(Brockville Recorder-Times)

Down in Dundas, the scene of many memorable electoral battles of the past, political feeling still runs strongly. Some time ago J. H. Ross, the editor and proprietor of the Winchester Press, made the suggestion that the erection of a monument to Hon. Andrew Broder, who represented the county successively in the Provincial and Federal Houses of Parliament for a great many years, would be a fitting manner in which the people of Dundas might give recognition to the services which he rendered to that riding and to the affection in which he was generally entertained by his constituents, apart altogether from the parties to which they belonged.

Last week a public meeting was held in Morrisburg in conformity with the suggestion, the attendance being in the neighborhood of 75, two-thirds of whom are said to have been Conservatives in their party affiliations. Although an effort was made upon the part of Irwin Hilliard, K. C., himself a prominent Conservative, Mr. Ross and others to induce the meeting to have the monument erected upon a non-partisan basis, it decided otherwise, as the result of an appeal by Lt.-Col. Lorne Mulloy and associates, and the monument is thus to stand in the name of the Conservative party of Dundas rather than in the name of all the people of that riding. All of which means that politics are still taken very seriously in Dundas and that one political party at least in that riding harbors some very small and narrow-minded men.

Surely it is time for politics to be forgotten when the memory of a man who has been dead for a number of years and who in his day was the friend of all the people, whether they were Tory or Grit, is to be commemorated. A monument to Andrew Broder which is erected solely by the Conservatives of Dundas will be only half a monument.

ABUSING THE MAILS

A Pembroke woman has been fined \$24 in the police court of that town on a charge, to which she pleaded guilty of sending obscene literature through the mails, the literature in question being a printed valentine with repulsive additions from the sender's own pen which she sent to a neighbor with whom she was at loggerheads.

This sentence should serve as a warning to those people who are inclined to make use of the mails for the forwarding of anonymous letters and other offensive matter, often couched in anything but complimentary phraseology, to persons against whom they bear a grudge and to whom they wish to bring mortification.

There is no person more cowardly or more contemptible than the writer of the anonymous letter. That there is a penalty attached to the sending of such literature, when it is written in foul or slanderous language, does not appear to enter the mind of the sender. In the Pembroke case, thanks to an investigation instituted by the Postoffice Department, the recipient has been given satisfaction and the sender has probably learned a very valuable lesson.—Brockville Recorder and Times.

WET OR DRY MOONS

"Wet" and "dry" moons are existent only in the imagination, according to Dr. W. J. Humphreys of the United States Weather Bureau. Even the cheer given by the old adage of a change of weather with a change of moon is not as sensible as that given by scientific apparatus. There is a belief that the moon affects the atmosphere causing great waves of either as it does with the water of the sea in the form of tides and as it does the mountains which are said to be raised and lowered nearly a foot twice a day by its pull.

The professor denies the claim that the moon causes great tides in the air, that it affects in any way the temperature and although it seems to dissipate clouds it does nothing of the kind.

"The moon is a wonderful theme in song and story, in love and war, in sentiment and science, but for all that it never did, and it never will have anything to do with causing or changing the weather," says Dr. Humphreys, pointing out that wet and dry moon supporters are not agreed which is the wet and which the dry moon.

HARD-EARNED DOLLARS ARE OFTEN THROWN AWAY NEEDLESSLY

That many thousands of dollars are thrown away annually in foolish investments by people of St. Mary's and vicinity, is a statement that was made to The Journal-Argus by a local bank manager the other day.—St. Mary's Journal-Argus.

The same observation will doubtless apply to other places, Perth among the rest. Many people who are otherwise intelligent, but have little actual knowledge of financial matters, are apparently easy meat for peddling stock salesmen. They will invest a thousand dollars or more, in short, sums that mean real money to the purchaser, and then there they unwittingly say good-bye to their money. Their hard-earned savings are gone. After a while—perhaps right away they begin to have misgivings. They run to their bank manager, or local bond dealer, to get his advice about it. He tells them at once that they have made an unwise investment. But it is too late. Stock-peddlers seem to flourish like a green bay tree at the present time all over Ontario. Before the war the farmer and mechanic were suspicious of anything in the nature of stocks and bonds, but the Victory Loan campaigns educated the people to the idea of buying bonds, and it also taught the peddling stock salesmen where the money is to be got. Their commissions are enormous, and a sale of a day enables them to live like millionaires. There would be no such losses if folks who are not thoroughly posted in financial matters, would simply take one precaution. All that is necessary is to make it a definite rule that you will not invest a dollar in any enterprise that has not the approval of your bank manager. Your bank manager has no axe to grind and he will gladly advise you. Or your local bond office will advise you.—Perth Expositor.

BEAUTIFY AND CULTIVATE

Poets and philosophers tell of the satisfaction obtained from cultivation of flower and vegetable gardens, but the practice is not as general as could be wished. In many places there is much less gardening than there was some years ago. People have too many things they want to do with their spare time.

In many cities and towns, however, the garden movement has been pushed as a community proposition. People have been urged, in a systematic way, to decorate their grounds with hand some shrubbery and flowers, and some of these communities have developed an amazing amount of this beautification.

Such towns become noted, and every minute of time put in on those flower beds is no doubt paid for in the higher value of real estate that is established in such a town.

Home pride is the motive that can best be relied upon to promote the gardening movement. People will usually do what their neighbors do. If you persuade one or two influential families on a street to spend a little more time and money beautifying their places this season, the majority of their neighbors would, within a year or two, fall into line and do the same thing.

As respects vegetables, the advantage of the back yard garden ought to be obvious in these times of high prices. The children of the modern community do not have enough share in the home tasks, and it would do them good to have some regular labors in a garden and they could well do a good deal of its work. But the old folks cannot expect them thus to labor unless they also are willing to do some stunts with the spade and hoe.

THE "CAMPAIGN FUND" OF THE WETS

Gradually the truth is coming out. People who did any thinking at all knew that the vast sums of money expended during the Provincial Elections last December, came from the liquor interests. But to prove this was at the time was difficult. Now, before the Royal Commission sitting at Toronto, the facts are gradually coming out. There was what is now known as the "snake fund" contributed for political propaganda. But the evidence given in connection with the investigation of the transaction of the Toronto Distillery of Goodram & Worts, proves conclusively that the funds contributed were intended to "Get the people of Ontario to vote Wet rather than Dry." Mr. Hatch, President of the Distillery firm, stated openly that the funds contributed were intended to "get the people to vote wet instead of dry" so that there would be an increase in the output of the distilleries. One can at least admire the straightforward honesty of men like Mr. Hatch. He did not go about telling the people that 'Government Control was in the interests of temperance' like Premier Ferguson and many of his candidates did. He knew, as every reasonable thinking person knew, that the Government Control scheme was intended to increase the sale of liquors in the province. It is a safe assertion that all the Brewers and Distillers of Ontario contributed not less than half a million dollars to the interests of the Ferguson party in the last election.

A very pleasing event took place at the home of Mrs. Nora Merkle, where Mr. and Mrs. Andrew Fawcett, Mr. and Mrs. Willie Fawcett, Mrs. Armstrong and family and Miss Mary Merkle, of Inkerman, gathered in honor of Chester Merkle's birthday on Thursday.

Must I Always Fight?

(By E. A. Duncan in Warton Echo)

I am harassed to the very soul and worried to death. Nemesis is at my heels. Modern civilization is bound to down me in the end, and I am afraid I have been fleeing from its onward march for years, trying to get away from it. At times, I think I have it beaten. I stop and fight for a moment, but then I arise again and pursue me. I have denounced and raved about the automobile, condemning it for its revolutionizing of business, and warning all and sundry against buying the damned things. I told them it would break 'em financially, that they don't pay their grocery and meat bills and own a car; I predicted the blame things would be the means of perpetuating our national debt for evermore. No one paid a bit of attention to me. They kept on making 'em and selling 'em faster than ever and still they seem to be buying and eating groceries and meat, and "Jim" Robb has paid a couple of instalments on the national debt.

Then the women started to shorten their dresses at both ends. Year after year they kept looping off an inch, top and bottom. I was the first prophet in the country to foresee the inevitable unless something was done. I solemnly protested and warned the public of the impending disaster.

Mene Mene Tekel Upharsin! I pleaded with the mothers and fathers to act before it was too late. It is as simple as A. B. C. Mathematics will prove the conclusion easily. Nature every autumn demonstrated the proposition to us. Look at the million leaves that fall. One by one the leaves are shed and the bare trunk eventually appears. And still my warnings are ignored. Mothers and grandmothers are as bad as the rest.

Year by year, the dresses are shrinking perpendicularly and horizontally. Let 'em go—I have done my duty. I am approaching the seer and yellow leaf stage. What matters it to me? But it is coming, despite my warnings. I am like a voice crying in the wilderness in the onward march of civilization.

I fought against Church Union, I fought against Government Control. Despite me, they both came, or are coming.

I am a fundamentalist and even now I have my back against the wall whilst in a verbal battle to the death against this modernism. But my strength is waning, though my voice is still strong. I seem to be prize champion of unpopular causes, always fighting against the inevitable.

For fifty years politically I have been practicing the rankest Toryism.

I am convinced that I was born two generations too soon. I decided recently to quit championing or defending anything, and to spend my remaining days in peace and quietness and let the maddening crowd go by.

But, alas, this week I got another punch in the eye. I lived three years in Toronto, and while there the telephone became the bane of my life. I came to hate it. I developed a habit of profanity over it which sticks to me to this day as a result and threatens to make my final destination when I shuffle off this mortal coil downward instead of upward. To locate a number in that big telephone directory one needs to be possessed of the leisure of a policeman and the concentration of a proofreader on a big city daily newspaper. No telephone girl in Toronto ever gave me the right number immediately in my life, and, when I

mory, 60 miles north, and that much farther from the blighting advance of civilization, and where there are no telephones?

Where the wicked cease from troubling, And the weary are at rest." Go away, don't bother me—I want to think.

RUPTURE EXPERT

COMING

TO

WINCHESTER

WILL BE AT

WINCHESTER HOTEL

ONE DAY ONLY

WED., APRIL 20th

Rupture Specialist With Years of Experience

This specialist, who will be in Winchester on Wednesday, April 20th, will examine and demonstrate to Men Women and Children, in a most simple manner, FREE as to how you can be permanently healed of rupture in nature's way.

A ruptured man or woman is a cripple and wears a crutch, called a truss, and because he can hide it often neglects the opportunity of getting permanent relief.

Mr. Thompson, who will be here on Wednesday, April 20th will consider your case carefully. Make a special effort to come to the hotel on the above date and get acquainted with him. Tell your friends to come and let him explain his method of treatment.

Ask at the Hotel Office for Mr. Thompson's Special Apartment.

Only Chevrolet Could Do It

ONLY Chevrolet—world's largest builder of gear-shift automobiles—could produce such a car as the Most Beautiful Chevrolet in Chevrolet History—could introduce such smooth, spirited performance—such beauty of line, such evident distinction, such unmistakable quality in a car at anywhere near Chevrolet price.

Only Chevrolet, with its enormous purchasing and manufacturing economies, could combine the beauty, the quality, the distinction and the performance of the Most Beautiful

Chevrolet, at such phenomenally low prices—the lowest prices for which Chevrolet has ever been sold in Canada.

NEW LOWER PRICES

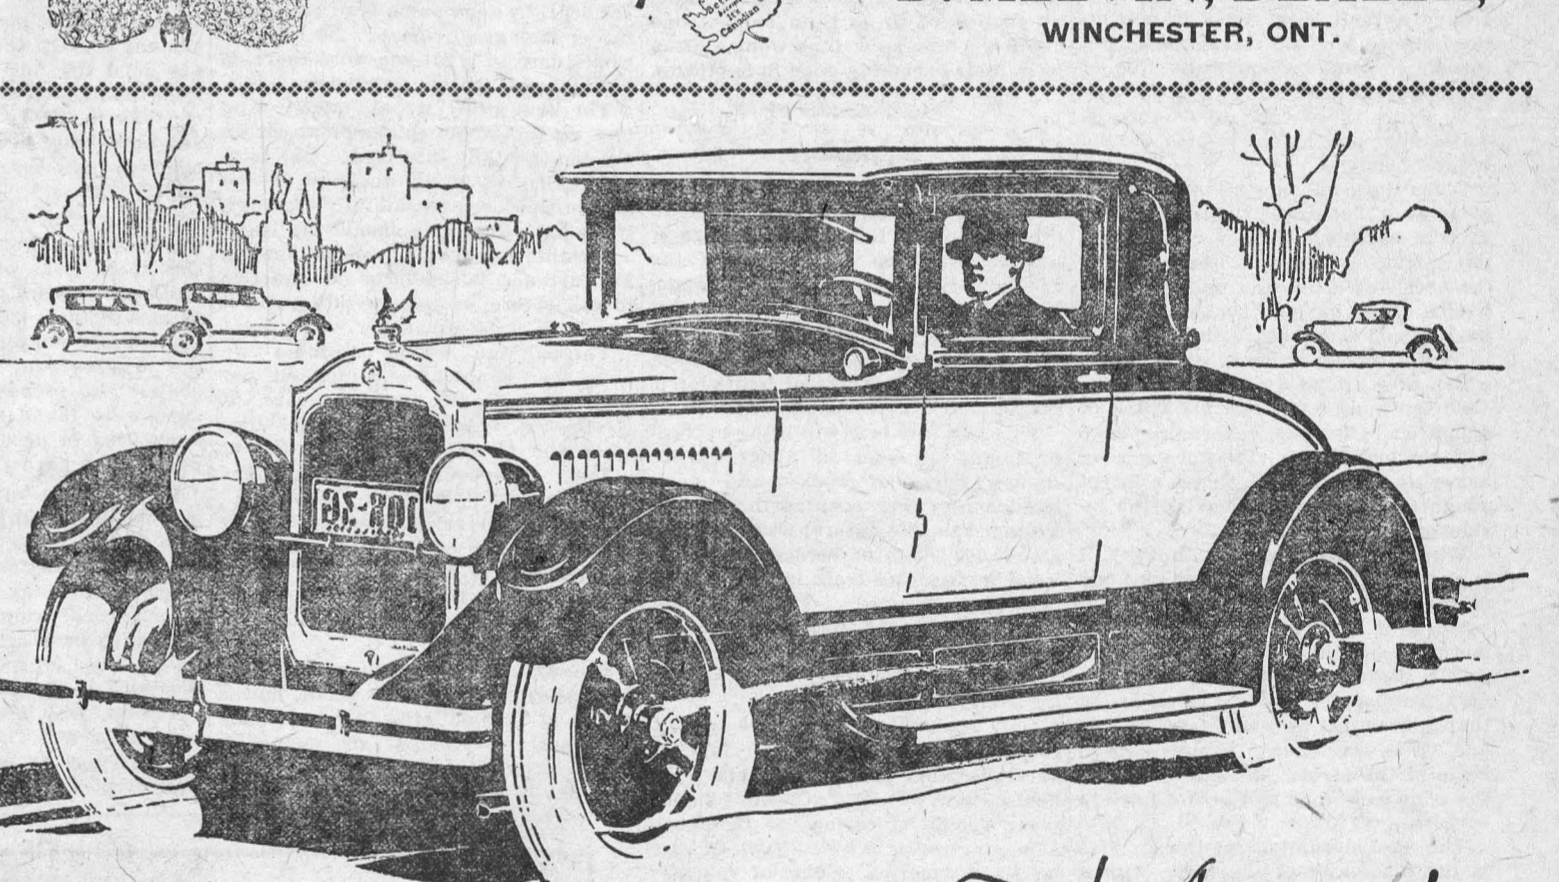

Roadster - \$655.00 Coach - \$760.00
Touring - \$655.00 Sedan - \$865.00
Coupe - \$780.00 Cabriolet - \$890.00
Landau Sedan - \$930.00
Roadster Delivery - \$655.00
Commercial Chassis - \$490.00
Utility Express Chassis - \$645.00

Prices at Factory, Oshawa—Government Taxes Extra.

PRODUCT of GENERAL MOTORS OF CANADA, LIMITED

D. MELVIN, DEALER, WINCHESTER, ONT.

The Most Beautiful Chevrolet in Chevrolet History

The Professional and Business Man's Car!

LOW maintenance costs, smart design and unfaltering service account for the popularity of the New Star Car among professional and business men.

Unfaltering service is guaranteed because of the use of quality materials throughout.

Labor charges are reduced to a minimum because every adjustable part is accessible to a degree that is positively unique.

In design and equipment, the New Star Car wins instant approval and admiration, while thousands of owners—from coast to coast—know that New Star Car service is incomparable.

- New Star Car Features
- Red Seal "L"-head Continental Motor
- Full Pressure Lubrication
- Morse Silent Timing Chain
- Thermostatically Controlled Cooling System
- Locomotive-type Brakes
- Super-Sensitive Steering
- Pullman Ventilators
- Gold Rivetted Chassis Frame
- And Other Quality Features.
- Nation-wide Service Facilities

Durant Motors of Canada, Limited Toronto, Canada

FIRE INSURANCE

I can handle your risks and give you protection with the better class of companies. Our rates will be lower and safer than others. It will pay you to see me before placing your Fire Insurance risks.
HARVEY W. NESBITT.

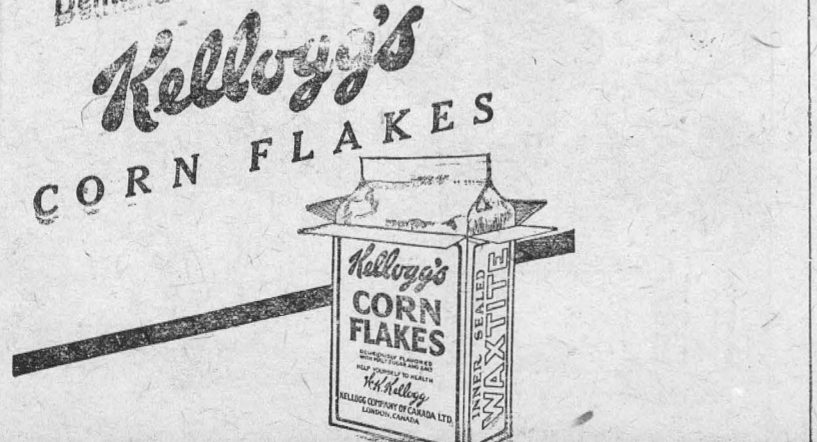

Are you overlooking this economy?

At ten o'clock about five days a week, Jones of Kitchener says to Long Distance, "I want to speak to R. H. White, Peterboro." White looks forward to Jones' calls, and is always at his desk ready for them.

"Why do you always ask for Mr. White?" a telephone salesman asked Mr. Jones. "Because he is the man I want — no one else will do." "But Mr. White is always at his desk. If you said to the operator, 'Please get me anyone at 2624 Peterboro,' you would get Mr. White, and the station-to-station rate would be about twenty per cent cheaper."

Jones now uses Station-to-Station exclusively. He finds it answers every requirement and saves money.

Kellogg's CORN FLAKES

Of Interest to Motorists

MOTORING AIDS IN PRESERVATION OF HEALTH.

The automobile has introduced a factor into modern life which can have unique benefits from the standpoint of health. In all probability the increased expectancy of life of the Canadian people, according to the life insurance statistics, can be traced in part to the beneficial effects of automobiling. It is well known that the motor car is an increasingly tremendous factor in the thorough enjoyment and the helpful benefits to be derived from a summer vacation. It has not only made possible for thousands of people who otherwise would not receive such benefits a healthful tour into the open country where an ideal vacation can be enjoyed, but it has inaugurated into our Canadian life a type of outing which, from the standpoint of pure recreation in ideal circumstances, leaves little to be desired.

There is one point which seems not to have received as much general recognition as it should have. Having enjoyed the thrills of the vacation, whether by motor or by combination of motor and other mediums, and having come back filled with unusual energy for the work of another year, there is always the tendency to try to ride through the cold weather season on the strength accumulated while on vacation. Physicians recognize that it is thoroughly unscientific and hopeless to expect that the healthful energy acquired during a few weeks of untiring vacation will be sufficient to carry one through the following months. It is found in many cases that the summer tan wears off and with it goes the surplus of energy acquired.

AUTOMOBILE AS HEALTH AID.

At this point the automobile stands ready to render a worthwhile service. It is available for helping the individual to perpetuate this vacation vigor. This is especially true when one stops to realize that the autumn is an ideal time for using the car to get out into the country for week-end trips. The atmosphere has a unique, stimulating and bracing effect and is not too cool for one thoroughly to enjoy country life. The highways are not nearly so crowded with cars as they are in the hot weather days; consequently mo-

toring is more enjoyable and the benefits to be derived are more easily acquired.

Sleeping in the open at this time of year is a tremendously invigorating experience which is not likely to be interfered with by mosquitoes and various other bugs which often prevail in the summer. As far as definite things to do are concerned there are still many possibilities: fishing, hunting and other sports.

The beauty of the landscape is in many respects at its best during the fall, when the leaves of the trees have become a riot of marvelous colors and the clearness of the air makes possible wonderful views of the countryside.

WINTER SPORTS BENEFICIAL.

Such delightful pastimes as the automobile affords during these autumn days cannot help but maintain the vigor accumulated during the summer weeks. What is true of the fall season will also apply to a considerable extent to the winter. With the introduction of our splendid highways, which are kept open for traffic in spite of snowfalls and wind, it is now possible for motorists to get into the country even in the middle of the winter.

During the coldest season of the year there are many opportunities for skating, coasting, skiing and other winter sports, all of which are beneficial in maintaining good health. If a person will definitely plan to keep himself physically fit through a year-round program of outdoor exercise, he will find that the automobile is an important consideration in carrying out these activities. If they are carried on through the fall and winter, the habit is likely to be formed, and when the spring comes with its wonderful flowers and new foliage, it will be natural to be out enjoying these exhibitions of nature.

When summer comes around again, it will find those who have followed these practices with bodies not depleted, as is frequently the case, but strong and healthy and in shape to get even greater profit than usual out of another summer's vacation. This is the time of year when the habit should be formed and when motorists should begin to schedule health-maintaining week-end trips into the country.

Carry a Square Meal in Their Hair.

The savage Nuba tribesmen in the African Sudan have many strange customs, but none stranger than that of carrying a generous supply of food around in their hair. Seen from a little distance, one of these black men seems to have a luxuriant crop of white, sausage-like curls, but a closer look shows these curls to be rolls of maize flour and butter formed around wigs of hair.

When these savages go into the jungle to hunt they travel "light"—dressed only in narrow strips of cloth about the thighs, a string of beads around the neck and a bracelet or two on the wrists. They have no pockets to carry food in, and they need both hands free to throw the long, heavy spears with which they are so amazingly skillful.

So the hunter mixes a big batch of dough and literally covers his head with the moist stuff. The hot sun soon bakes the outside of these rolls of dough to a firm crust, leaving the inside soft and doughy.

When the black man gets hungry, it is a simple process for him to pull one of the rolls from his kinky head and eat it as it is, or after baking it some more in a primitive oven of hot stones.

This coiffure seems to be about the only method of Sudan hairdressing that is practical as well as decorative, and it is much more sanitary than some of the styles that the women of the tribe look upon as the last word in coiffures.

The most unsanitary of these styles is the plastering of the hair with a filthy, foul-smelling "pomade" and curling it in tight little knot balls. The Sudan bachelors find nothing disgusting about this.

The ultra-fashionable women of the tribe get their hair permanently waved so that five long, black prongs stick up from the middle of the head, from the forehead to the nape of the neck. Having the hair fixed like this is a long and expensive operation for which the native barbers charge a sheep or many fish-hooks.

In order not to mar the "beauty" of this strange coiffure, the women sleep with their heads resting in uncomfortable wooden racks that hold their heads off the ground.

Another style that is popular is a close shave on the front of the head, with the rest of the hair cut very short and shingled.

The Sudan natives have no mirrors in which to look at the peculiar hair-

cuts that their skillful and hard-worked barbers give them, so they often pair up and get the same sort of clip or coiffure.

When the African tonsorial artist has finished work on two customers with their hair dressed exactly alike, all they have to do is to look at one another. Men as well as women often have their barbering done in duplicate.

Labrador.

For more than 25 years both Canada and Newfoundland have laid claim to the interior of Labrador, although it has always been admitted that the coastal strip belonged to Newfoundland. Quite recently by a decision of the Judicial Committee of the Privy Council of Great Britain it has been decreed that the whole of Labrador is the property of Newfoundland.

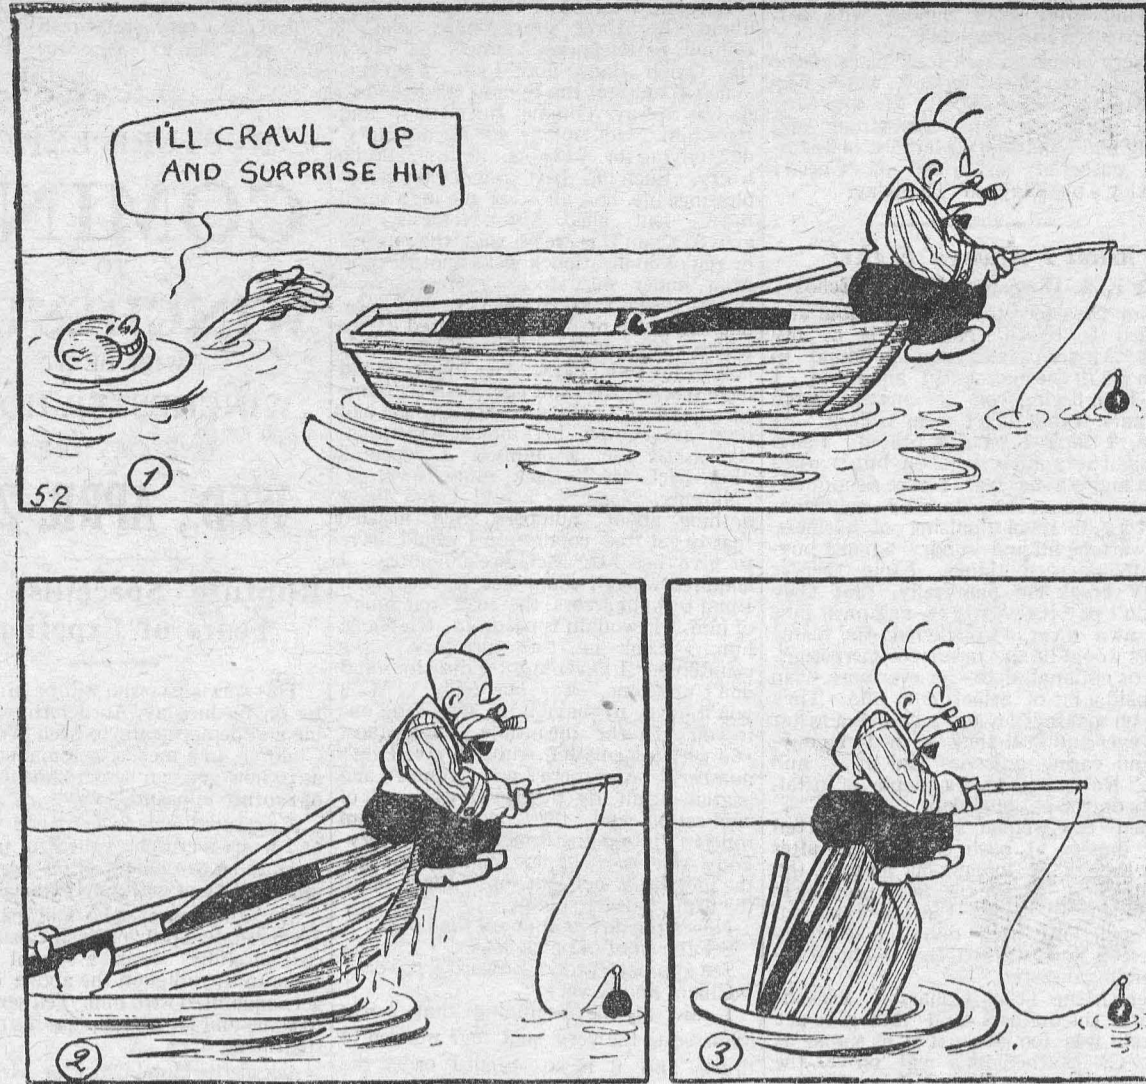

This new territory will bring to Newfoundland an area of about 109,820 square miles of rocky and desolate country, but country that is not without valuable natural wealth. There are 60,000 acres of spruce trees, and wood from spruce trees is valuable for making newspaper. Then Labrador contains coal and iron ore deposits, and its rivers and waterfalls will be a valuable source of power for producing electricity.

Only about 4000 people live in Labrador, mostly Eskimos and Indians, and their chief industry is fishing. The fine work of Dr. W. T. Grenfell among these people in caring for them and educating them, is well known in England and America. Some of you may have read one or more of his books about Labrador—"Adrift on a Pack of Ice," "The Harvest of the Sea," and others.

The Satisfactory Life.

The most agreeable thing in life is worthy accomplishment. It is not possible that the idle tramp is as contented as the farmers along the road who own their own farms, and whose credit is good at the bank in town. When the tramps get together at night they abuse the farmers, but do not get as much satisfaction out of it as do the farmers who abuse the tramps. The sounder your argument, the more satisfaction you get out of it.

In Canada there are about 150 species of plants that reach tree size. Of these thirty-one are conifers (or softwoods).

Do You Say What You Mean?

Some of our catch phrases are concerned with our unreliable speech. "Actions speak louder than words"; "Empty vessels make most noise"; "Speech is silver, silence is golden"; "A still tongue makes a wise head"; "Be swift to hear, slow to speak"; "Think twice before you speak once," and so on.

Most of us speak far too much, because speech is so easy we often say things we don't mean and without knowing we have said them. Memory does not travel as quickly as speech and thus we forget what we have said. It was with the development of education that our words became less trustworthy. Men began to talk faster and say more, and thus they were unable to keep pace with what they said. Their promises and professions came to be involved and others found themselves incapable of believing. Then it was that we had to write our promises and sign our names.

Around the centre dome of the Royal Exchange, Manchester, is inscribed: "A good name is to be chosen rather than great riches." No member would dare to break his word there. It would mean instant expulsion.

Yet how glibly we all talk! And how we talk about things of which we are but partially informed! Our trouble is that we think we know, whilst all the time we are painfully ignorant. If we knew more we should say less.

Certain rules should guide our speech. For instance, it should be our practice to ask before we say anything: "Is it true? Is it necessary?"

Through the words of others we have been ennobled and inspired, but such words are the product of care. It is slipshod, vulgar speech which destroys the peace of ourselves and of others. We should avoid saying that which makes it harder for another.

One woman asked another, "What is tact?" She received this answer: "I can say best what it is not. If you had met Peter the Apostle and talked about a crowing cock, that would have been un tactful."

One woman visits another who is ill. She proceeds to tell, in detail, how a friend of hers suffered from a similar complaint and died an agonizing death.

This is no plea for the mealy-

mouthed or the weak; don't be afraid of speaking up to commend what you know to be right or condemn forcefully what is wrong. It should be our aim to "Speak true." It will save us from many a heartache to speak the truth. Men will come to understand us and to know we can be relied upon.

Fooling Rich Beggars.

The city street beggar who was arrested the other day and was found to have a luxurious apartment and an enviable bank account, could not get away with his deception of a kind-hearted public in Prague, capital of Czechoslovakia. They have devised a way there of keeping rich fakers from cashing in on public sympathy.

Beggars recently became so numerous in the streets of Prague that something had to be done about it. So the city has issued metal discs which are sold to citizens at a small cost and resellers aim to drop these in the cups of "unfortunates," instead of money.

These discs, when presented at established stations, give the genuine down-and-out just the kind and the amount of help that he needs. They are good for food and for a bed to sleep in and clothes, but no beggar can live in luxury and build up bank accounts with them, no matter how many he may get from charitably inclined citizens.

This system seems to have sorted the tricksters from the really needy. Out of an issue of more than half a million of these discs only a small proportion of them has been presented at the welfare stations. And several of the beggars who did attempt to exchange the pseudo coins for assistance were found to be professionals, much less in need than many of the people who gave them to them.

The beggar is becoming something of a problem in many cities and persons who dislike to pass an asker of alms who may really be in need are confused by the many newspaper accounts of supposed cripples and blind men who have been arrested and found to be far more prosperous than their appearance would indicate.

Professional beggars resort to all sorts of tricks. They twist their hands out of shape so as to appear the victims of paralysis or accident and often

carry crutches that they lay by when their day's "work" is over.

The exposure of these frauds undoubtedly works a hardship on many worthy men and women who deserve the tangible sympathy that the public gives them in pennies, nickels and dimes. But how is a person to know whether he's swelling the bank balance of a faker or bringing much-needed relief to an honest beggar?

It may be that cities will adopt the system that has worked out so well in the Czechoslovakian capital, and that the giving of tokens, good only for the necessities of life, will discourage the impostors who wax fat and wealthy in playing on our heart and our purse-strings.

Helen Keller.

I learned to think that everything has a lesson and a suggestion. "The loveliness of things taught me all their use." Indeed, everything that could hum, or buzz, or sing, or bloom, had a part in my education—noisy-throated frogs, katydids and crickets held in my hand until, forgetting their embarrassment, they trilled their reedy note, little downy chickens and wildflowers, the dogwood blossoms, meadow violets and budding fruit trees. I felt the bursting cotton bolls and fingered their soft fibre and fuzzy seeds; I felt the low sighing of the wind through the corn-stalks, the silky rustling of the long leaves, and the indignant snort of my pony as we caught him in the pasture and put the bit in his mouth.

Sometimes I rose at dawn and stole into the garden while the heavy dew lay on the grass and flowers. Few know what joy it is to feel the roses pressing softly into the hand, or the beautiful motion of the lilies as they sway in the morning breeze.

Another favorite haunt of mine was the orchard, where the fruit ripened early in July. The large downy peaches would reach themselves into my hand, and as the joyous breezes flew about the trees the apples tumbled at my feet. Oh, the delight with which I gathered up the fruit in my pinafore, pressed my face against the smooth cheeks of the apples, still warm from the sun, and skipped back to the house!

Those are red-letter days in our lives when we meet people who thrill us like a fine poem, people whose handshake is brimful of unspoken sympathy, and whose sweet rich nature impacts to our eager, impatient spirits a wonderful restfulness, which, in its essence, is divine. The perplexities, irritations and worries that have absorbed us pass like unpleasant dreams and we wake to see with new eyes and hear with new ears the beauty and harmony of God's real world. The solemn nothings that fill our every day life blossoms suddenly into bright possibilities. In a word, while such friends are near us we feel that all is well.

The hands of those I meet are doubly eloquent to me. The touch of some hands is an impertinence. I have met people so empty of joy that when I clasped their frosty finger tips it seemed as if I were shaking hands with a northeast storm—Helen Keller, in "The Miracle of a Life."

At Saint John, New Brunswick, the compass has changed its direction more than nine degrees since 1750.

Air cure for deafness has been tried with mixed results. Dr. Paul V. Winslow, New York City, the noted American ear specialist, tested the result of high flying on the ears of a patient.

WHEN THE LEOPARD'S COLLAR BROKE
RUNNING A ZOO IN THE VELDT

The leopard was loose. The animal nursery was in an uproar. Monkey screamed, baboons barked and roared, huge birds beat their wings against the cages and called shrilly. Pandemonium reigned. The nursemaid—rather, nurseman—was in bed when the big cat's collar broke, but he "jumped out of bed, grabbed a pair of pants and a rifle," and ran to the fracas. Skillum, the leopard, was faddling excitedly around the monkey cage, while the gibbering inmates scuttled from one corner to the other in fear of their lives. Skillum had been at Wynant Davis Hubbard's base animal camp at Tara, Northern Rhodesia, for over a year, and his foster father was very fond of him. While Mr. Hubbard hesitated for the barest second, wondering how to get the cat back, his wife came up, and we read on in Boys' Life:

I did not need to explain the situation to Margaret. One look was enough. There was that huge leopard already crawling over the top of the cage, snarling and grunting in his eagerness to get at the monkeys. What were we going to do? I did not want to shoot Skillum if it were in any way possible to catch him. We were very fond of him, and besides he was a valuable animal.

I looked at Margaret. "Do you think we can catch him by the tail?"

"I don't know. We can try. He knows us and I don't think that he will turn on us."

"All right. See if we can get him by the tail. If you do get a hold of him keep up a steady pull on the tail and he can't turn on you. I will cover you with the rifle."

It was a good theory, but would it work? Skillum had been a pet for over a year. But now that he was wildly excited over the monkeys would he remember that? Wouldn't he just turn and cut us all to pieces with his claws? A wounded leopard is the most dangerous animal in the world to face. What about one not wounded, but

crazed with blood lust and the excitement of the chase?

I walked over toward the cage. Margaret went to the other side. Skillum snarled and spit at us from the top of the cage. I walked a little closer, talking to him in a quiet voice. He looked at the monkeys and then made a sudden short lunge at me. I threw up my rifle and fired a shot into the air. At the same time I ordered him off. He obeyed and leapt to the ground. But the fascination of the monkeys was too strong. He started round and round the cage, growling and snarling. Every time he passed us he spit and snarled. Our only chance was to grab that switching tail of his and to pull for all we were worth. Skillum passed Margaret. I saw her start and then shrink back. He came past me, but I did not have the courage either. Then Margaret grabbed him. I heard her gasp as she took hold of the tail—I moved over with my rifle ready. She firmly dragged Skillum back to his wire, talking quietly to him all the way. Once at his wire we patted him, scratched his chin and talked to him while he quietly slipped a new collar around his neck and snapt on the chain.

It had not taken ten minutes, but we were shaking when it was done. That was putting our theories of handling wild animals to the acid test. Skillum had been raised by humans from the time he was a tiny kitten and had always been treated fairly and kindly. He knew no other type of handling, although he recognized discipline. He trusted us implicitly and we trusted him. We had never hurt him and never teased him. He obeyed us always, but because he wanted to, not because he was afraid of us.

You could not do this sort of thing with any other leopard that got loose. You must know your animal's individuality and take into consideration its foibles and its temper just as you would those of a human being. No two animals are just alike. Each one has its personality.

LITTLE FRAGRANCES

Ahmet Zogu Bey

Head of a feudal family which for centuries has ruled an unconquered federation of tribes called the Mail. He is 31, and first president of the two-year-old republic of Albania.

Didn't Handle Them There. Lady—"Do you handle canaries here?" Bird Fancier—"No, ma'am—it ain't good for their health. But we have some for sale."

80,000 Eggs a Day.

White ants are the most productive of all insects, having been known to lay eggs at the rate of 80,000 a day for a month.

To the Right.

Diner—"Say, waiter, I'll have lamb chops with potatoes, and have the chops lean." Waiter—"Which way, sir?"

Extra! Mr. and Mrs. Augustus Mutt Are Out of Jail.

Harmony.

All things had put their evil nature off: I cannot tell my joy, when o'er a lake Upon a drooping bough with night-shade twined, I saw two azure halcyons clinging downward And thinning one bright bunch of amber berries, With quick, long beaks. —Shelley.

CONDUCTING WOMEN

A NEW AND VERY WELCOME INSTITUTION.

Girls and Women Who Travel Alone Across the Atlantic Ocean Can Feel They Have a Real Friend in the Woman in Navy Blue.

When you say "au revoir" to your friends by the side of some great ocean greyhound, perhaps you wonder why there is a woman standing by. At first you may not notice her—her plain costume of navy blue is inconspicuous and unobtrusive. But she stands near the gangway till the last passenger is aboard, and she is known by the name of "conductress."

It was the wish of the Dominion of Canada that all ships carrying emigrants from Europe should employ a woman, with the rank and power of an officer, to look after the welfare of the unaccompanied woman seeking a living across the seas. To-day every British passenger vessel which calls at a Canadian port is the proud possessor of a conductress—the special friend and protector of the girl who travels alone.

On a bitter winter's day, in a howling gale, I commenced my seafaring career, says an Atlantic Conductress in answer. I had previously crossed the Channel in order to sign ship's articles at a Continental port, and my first duty was to attend the embarkation of a motley crowd of European emigrants—Czechoslovakians, Estonians, Hungarians, and Poles. A day later, at Southampton, came embarkation No. 2. This time I took over, from the capable hands of a woman officer of the Canadian Government, a party of British women who were destined to be future Canadians. The majority travelled third-class, a few travelled first; but all were unaccompanied girls—wives proceeding to husbands, domestics, school teachers, etc.

It is one of my duties to inspect all accommodation assigned to unaccompanied women, and to receive complaints, if any.

The girl who seeks a living in Canada is protected all the way. She is introduced to the ship's conductress at embarkation, to whom particulars of her name, destination, religion, etc., are given. She sees the conductress whenever she wishes during the trip, and at the port of arrival there is yet another Canadian Government woman to meet her, attend to her hotel or hostel accommodation, and place her safely on the train. Literally, the unaccompanied girl is the luckiest traveller, for at every place where she changes trains there is a woman to meet and assist her.

Strictly speaking, the work of a conductress is to conduct. But it does not end there. She is called upon in many emergencies, as being sole officer of her sex on the ship.

Every experience one has had may be valuable at sea. On my first trip I had to assist the doctor with a woman who was dangerously ill, so that any nursing qualifications are useful. Then, again, on the return trip, with a ship full of American tourists, I find myself taxed to the uttermost, giving them unofficial and personal information as to where and how to shop in London, Paris, or Brussels.

There are births at sea, and often funerals. There are gaieties, too; and I am always present at dances, concerts, sports, to do all I can to make things enjoyable for the girls in my care. It is essential to be one of them and to gain their confidence. "Unaccompanied women" range from little babies, travelling with their mothers to join fathers already settled in Canada, to old ladies up to sixty, joining sons. And every age in between. I have known a young girl, the ultra-modern, and the old-fashioned girl. But whatever the station in life, whatever the type, they all possess the same thing—courage.

On every trip I have at least one bride-to-be; some are young, and some are as much as fifty years old. One, on a recent voyage, was forty-four, going West to marry a man she had never seen. She had met him (on paper) through an advertisement, had satisfied herself that his financial position was good, and, armed with the necessary ring and trousseau, was bent on forsaking the single life. Her permit was in order, so the Canadian Government had satisfied themselves that the unknown bridegroom was in every way a good fellow.

I have flighty girls and staid girls; some who tax my vigilance to the uttermost, and some who cross-examine me so much on life in the Dominions that I feel like a witness in a court of law. Every girl is supplied with a pamphlet giving full and accurate details of her future country. It can never be said that the woman immigrant is misled or neglected.

In fair weather I attend the deck games; in rough weather I attend the seasick, to make sure they are getting everything they want.

"At present," said one bright young person, "I only want to die!" But next night, at the dance, she seemed to have made one of those miraculous recoveries which are common at sea.

A conscientious conductress has much to do; but her method of working is entirely a matter for her own judgment, so that initiative counts. There is no monotony, for no two voyages are alike. I may be called on in any difficult situation where a woman is concerned; for instance, to persuade a European emigrant to take a bath before landing.

"Oh, my dear!" breathed an elderly and domineering lady to me. "I should so love a position like yours! Tell me where I can apply." And, after a pause: "What a wonderful life you must have, flirting with the officers!"

But it is a great life, and a really useful, human work. As I write the painters are at work outside my room, for we are in port. All around is the noise of the docks, the sound of cargo being loaded. It is music in my ears, for I know it means that to-morrow we sail again.

One Hundred Thousand Acres Planted With Grapevines.

When products of Australia are considered there usually comes to one's mind wool and mutton, grain and butter. There are many others, and among these others are dried fruits, especially raisins and currants—products that point to the very temperate climate in parts at least of the great island continent.

More than one hundred thousand acres of the best of land in Australia are planted with grapevines. The grapes are grown for table use, for wine-making, for brandy, for fortifying other spirits, and for the production of raisins, which, of course, are dried grapes. So far as raisins and currants are concerned, the producing states are Victoria and South Australia, and most of these fruits are grown in irrigated districts.

On many of the areas devoted to producing raisins and currants are repatriated soldiers who saw service in the Great War, and both Federal and State Governments have taken a paternal interest in the irrigation settlements which—though growing citrus and other fruit—in the main depend upon obtaining regular and payable overseas markets for dried fruit.

The blocks of land devoted to each settler vary from 15 to 21 acres, although there are smaller and much larger individual holdings. Substantial metropolitan advances have been made by the Government to ex-soldiers whose qualifications for the work have been approved by an expert board.

During the season of 1925 there were packed in Australia about 50,000,000 pounds of raisins; and after supplying the home demand, there remained 40,000,000 pounds for export. A large part of this surplus is now going to be sent to Canada. The present annual importation of raisins into Canada amounts to about 38,000,000 pounds, having a value of \$3,222,000.

It is estimated that the 1925 pack of currants in Australia will amount to 24,600,000 pounds, and that the surplus available for export will amount to 15,600,000 pounds. It is expected that in the near future the production of currants will reach 30,000,000 pounds, increasing the exportable surplus. It is claimed that the Australian currants are of superior quality, are clean and packed under hygienic conditions.

Canada is now importing each year about 5,600,000 pounds of currants, having a value of \$554,310.

FOUR MILES A MINUTE.

Terrific Strain Caused to the Human Frame.

When trains first came in one of the objections levelled against them was that no passenger could survive a speed of twenty miles an hour. They would lose their breath or their hearts would fail. Yet trains came in and speeds increased to three times twenty miles an hour, and even then engine-drivers did not seem to suffer.

Eighty years later automobiles began to exceed these speeds, and by 1903 racing cars had reached eighty miles an hour. Brain specialists then asserted that human beings were not designed to travel at eighty miles an hour.

The specialists were wrong, for in September last a British car, driven alternately by Captain J. Duff and Mr. Wolf Barnato, was driven for twenty-four hours at a speed of ninety-five miles an hour, and both drivers withstood the strain.

But ninety-five miles an hour is nothing to the bullet-like progression of the modern airplane. The new British seaplane has a speed of something like four miles a minute, or two and a half times that of the racing car, and we are told that the physical results of such a speed on the pilots will be most serious.

Here at last it would seem that the medical men have some real grounds for their fears, for there can be no doubt about the terrific strain caused to the human frame by banking at a speed of a hundred and thirty yards a second.

You have seen a juggler put a glass full of water on the inside of a hoop and whirl the hoop without spilling a drop. That gives you some idea of the force called centrifugal, and it is this force that must be reckoned with in making a turn at any such speed. The blood is fairly wrenched out of the brain, and even a fit man may lose consciousness for a moment under such a fearful strain.

The World's Biggest.

The Eiffel Tower in Paris beats the buildings of the world for height. It is 880 feet higher than the cross of St. Paul's Cathedral in London. But this is a tower, and the distinction of being the tallest business house in the world belongs to the Woolworth Building in New York, which rises 792 feet above the pavement and sinks 120 feet below it. Even so, it is beaten in actual bulk by the Equitable Building in New York, which, on its forty floors and in its thousands of offices, accommodates 15,000 people.

A "Quiet" Week.

"A" hear that your wife is dead," said Sandy to his friend. "Aye," replied Donald, "she slipped away on Monday." "A'm sorry to hear that. When is the funeral?" "Next Monday." "Next Monday?" "Yes. It's like this," answered Donald. "The day we were married she says to me, 'Donald,' says she, 'you and me will have a nice quiet week together,' and, Sandy, we're gettin' it noo."

Correct!

Professor: "What is ordinarily used as a conductor of electricity?" Student (all at sea): "Why—er—." Wire. Correct! Now tell me, what is the unit of electric power?" "The watt, sir?" "Exactly, the watt. Very good. That will do."

MR. MacNAIR GIVES HIS EVIDENCE

FINDS "FRUIT-A-TIVES" BEST CORRECTIVE FOR CONSTIPATION

MR. S. MACNAIR.

Mr. S. MacNair of New Mills, N.B., is one of the thousands who owe much to "Fruit-a-tives". Full of gratitude he writes the simple truth as follows:

"I can honestly say that 'Fruit-a-tives' are the best intestinal regulator I have ever used. Other remedies, and I have tried a great many, cause pain and griping, but 'Fruit-a-tives' always act easily and effectively. I was inclined to be constipated before, but now I am feeling first rate, and most sincerely recommend 'Fruit-a-tives' to everyone."

"Fruit-a-tives" is the sworn enemy of constipation. Made from the intensified juices of fresh fruits combined with tonics, it is a natural medicine. It is not habit forming. Don't let constipation plague you. Get back the bloom of health, the sparkle in your eye, the feeling that life couldn't be better. Begin at once, with 'Fruit-a-tives'—25c and 50c a box anywhere—everywhere.

Blatchford's Calf Meal

The original milk substitute with a 125 year old reputation for efficiency and economy behind it. Raises big healthy calves with little or no milk. Furnishes exactly the food elements calves need for quick growth. Users everywhere recommend it.

Lowe Brothers OUTSIDE PAINT

Lowe Brothers "High Standard" Lead and Oil Paint will not only Protect, Beautify and increase the value of your home, but will save you money. High Standard is the most economical paint, figuring by the job cost, that you can buy.

By reason of the excellence of the materials used and the care exercised in its manufacture, "High Standard" covers half as much more surface than a so-called cheap paint.

High Standard is very easy to apply. It is ground so fine that it works easily under the brush, flowing out evenly and leaving no brush marks. It covers perfectly and produces a beautiful high gloss that endures for years. It fades slowly, leaving the surface in excellent condition for repainting.

High Standard is a high grade lead and oil paint made in thirty handsome shades and in all sizes.

A. SWEET & CO.

HARDWARE WINCHESTER PHONE 135

We offer to our customers at all times, strictly quality products at reasonable prices. In first as well as last cost they are the most economical and the most satisfactory. This is particularly true of Paint Products which vary exceedingly in quality and service. We stand behind Lowe Brothers High Standard Paints and Varnishes as the best and most economical paints sold in Canada.

Neptunite Varnishes

Are carefully prepared to withstand the element and severe exposure. They are light in color, work easily, flow freely and dry with a rich gloss. They will not turn white under the Hot Iron test and are unaffected by hot or cold water.

They produce a remarkable, beautiful, classic finish that will stand all kinds of hard wear without cracking or chipping. Neptunite costs no more than most good varnishes yet they last longer than most and present an extremely attractive and durable surface. Made in all sizes and for various purposes.

Mellotone Flat Paint

Beautiful, Economical, Sanitary, Mellotone is all these. Mellotone possesses all the soft, delicate beauty of water paint, combined with the durable elements of a lead and oil paint. It is specially made for interior decoration.

Anyone can apply it according to directions. It leaves no brush marks or overlappings. Mellotone presents that perfect, flat surface that is so desirable.

Mellotone may be washed with soap and water as often as necessary without injury to its finish.

Interior Floor Paint

Scrubbing is a thing of the past when you use Lowe Brothers Hard Drying Floor Paint. The finish produced by the floor enamel is so smooth and uniform that you can easily keep your floors clean by mopping.

Hard Drying Floor Paint is a varnish paint that dries over night with a high gloss. It is so easy to apply and so durable that its economy is assured. It covers perfectly and wears off evenly.

Comes in a variety of pleasing shades and in convenient sizes.

Everywhere—Women Endorse this Greatest of Elements

WOMEN from every Canadian community are testifying to the unfailing dependability, safety and satisfactory service of McClary's Speediron Element.

These testimonials are unsolicited. They come as free tributes from thousands of satisfied users of McClary's Electric Range.

Such nation-wide approval proves what McClary's have long claimed—that the Speediron is the most reliable and serviceable element on the market.

The Speediron is repairable, renewable and exceptionally economical. The coils are protected by a smooth, cast-iron, removable cooking surface.

Before buying, see this wonder element produced and used exclusively by McClary's. Made in the very style and size you require and sold at a price you can afford.

Miss Laura Munroe, nurse-in-training, in the General Hospital, Kingston, has returned to duty having visited her parents, Mr. and Mrs. Enos Munroe.

Mr. and Mrs. Cecil Rae visited relatives at Inkerman on Sunday.

Mr. Win. Sheldrick and daughter, Mabel, spent Monday evening at the home of Mr. and Mrs. Enos Munroe.

Mr. Peter Darling visited his daughter Mrs. Ward Smith of Chesterville.

Some from here attended the funeral of the late Mr. Mark Marcellus of Russell, on Tuesday last.

Mrs. Clark Hutt, of Rochester, N. Y., is visiting her parents, Mr. and Mrs. W. Froats.

Mrs. A. McLean of Almonte, has returned home having visited her parents, Mr. and Mrs. P. Darling.

Rev. A. J. Sinclair and Mr. Orak spent Saturday afternoon and tea at Mrs. Jamieson's.

Several from here attended the Anniversary Services and supper in the Presbyterian Church, Chesterville.

Cloverdale

Mr. Kenneth Cinnamon spent a few days last week the guest of Mr. Lorne Carkner, of Ormond.

Mr. and Mrs. Nelson Dockstader spent Saturday at the home of Mr. Ira Dockstader.

Mr. and Mrs. John Baker spent Monday at the latter's home.

Sugar-making has come to a close for another year.

Mrs. H. Coughler had the misfortune of having a runaway while on her way to the village last Tuesday with a very high spirited horse, but without any serious happenings.

Quite a number of the young people of Cloverdale, attended the dance in the King Cheese Factory on Friday night.

Mr. Willie Larmour has erected a new residence in Cloverdale.

Cloverdale correspondent notes that one of the Press advertisers has become the spokesman of the active Canadian hen. As the executive of C. F. C. has been fortunate in securing two large consignments of feed wheat which should enable the producers to produce at a profit and secure for the diligent hen something more than a mere worm for her scratching. Judging from reports from the various districts of the increased production of eggs and the happy cackle of the hen which is a sure sign that the wise old hen is working and digging to manufacture her raw material at home into a finished product. Trusting that the columns of the Press may secure a robust applicant for the Dundas Poultry & Egg Association to assist in handling the increased Poultry Products of Cloverdale and vicinity.

President Henry Stoodley reports that C. F. C. has received a comment of being the largest co-operative concern in East-

The United Church

(Contributed)

Next Sunday morning the Sacrament of the Lord's Supper will be held, and in the evening the choir will give an Easter Cantata entitled "King of Glory."

Last Sunday there was a good attendance at the morning service. Rev. J. A. Waddell had charge, and his talk to the Juniors was based on a story told by Rev. (Dr.) Ward of Emmanuel Church, Montreal.

It was about a beautiful Cathedral in the northern part of Europe, famed for a wonderful piece of sculpture—an angel's face done by an old man, who on finishing it died. He loved his work and put his very best into it. From this story it was shown that we all have a chance to do something for our Master that will help somebody else.

Last Sunday there was a good attendance at the morning service. Rev. J. A. Waddell had charge, and his talk to the Juniors was based on a story told by Rev. (Dr.) Ward of Emmanuel Church, Montreal.

The rendering by the Choir of Dr. Faber's hymn: "Hark, hark my soul angelic songs are swelling" was particularly pleasing. The leading solo parts were taken by Miss Jean Beach and Mrs. Durant.

From Luke 19:38 the Pastor gave a message appropriate for Palm Sunday. He described the enthusiastic welcome given to Jesus that Sunday as he came to Jerusalem. This was a fitting expression of the people's love and admiration. Now for the first time Jesus assumed the style of a King, but He taught them that His Kingdom was not to come in this way but by way of the Cross. This has been called the triumphal entry and from it we learn the humility of Jesus and the greatness of humility. The grace of humility is one of the finest and rarest fruits of a Christian life. Jesus was willing to humble himself and we as His followers must be willing to do likewise. There are times of triumph come to us and other times of apparent defeat. Let us not be unduly elated, but keep near God and retain the spirit of humility then when the Cross comes. God will be with us helping us to bear it.

Taking Luke 23:42 as his evening text, Mr. Waddell sketched the events leading up to the crucifixion, describing the agony of Christ on the Cross. This public testimony of the thief was a confession that he believed on the Lord and it showed that he was in dire need. There had come into his own life a real conviction of sin.

There are no days but bring to us something different from what we had planned. How can we stand it unless we have learned to trust in Jesus and to go to Him for comfort. He is ready and willing to pardon and to help us as He did the thief on the cross.

I breathed the truth into the air; It was accepted everywhere; For so swiftly it spread that I could not explain it was a lie.

I breathed the truth into the air; It fell quite flat nearly everywhere; For who in these days cares, forsooth, For a thing so stale as the simple truth?

For long months afterward—oh! how long!— I found the rumor going strong; But the truth, from beginning to end Was hotly denied by my dearest friend.

Harmony

Miss Jessie Carkner spent the week end in Winchester, the guest of her brother, Mr. Miah Carkner.

Mr. Ed. Merkley is still on the sick list. His many friends hope he will soon be well again.

Mr. Arthur Porteous held a dance in the factory on Friday night. A good time was reported by all who attended.

Mrs. Elgin Brisbois motored to Metcalfe on Friday.

Messrs Albert Blaine and John Burd, of Mountain, attended the dance in the factory on Friday.

Mr. Mac Carkner and the Misses Mary and Mabel spent Tuesday evening at the home of Mr. and Mrs. Henry Stoodley.

Tenders For Hoople Creek Drainage Work.

Sealed tenders addressed to the undersigned Clerk will be received until Monday, May 2nd, 1927, and will be opened at the Council Meeting at Osnaburk Centre at 10 a. m. Tuesday, May 3, 1927, for the dredging of the Hoople Creek Drain, located North of Aultsville Village and South of Finch Village.

The length of the Main Drain is 66,300 feet and the length of the Brownell Branch is 17,596 feet.

The estimated amount of excavation is as follows: Main Drain 24935 cu. yds. of earth, 14924 cu. yds. of hardpan and 673 cu. yds. of rock.

Brownell Branch 7978 cu. yds. of earth, 890 cu. yds. of hardpan.

Bulk or separate tenders for the two drains will be considered. No tender necessarily accepted.

A marked cheque payable to the T. Treasurer for 5% of the tender price should accompany tender.

Plans, profiles, specifications and tender forms may be seen at the offices of the undersigned.
