LOCAL COUNCIL'S RESOLUTION APPROVES NEW SITE FOR DOCK

With the passing of a resolution at the regular meeting of the Council on Monday last, approving the site for a Ferry Dock, the people of Morrisburg are at a loss to know why petitions, such as were circulated recently, should be necessary, in order to obtain a well-merited objective. The request, as we understand it is for the lease of a small portion of land on the riverfront, to accommodate the Ferry Company, at no cost nor risk to the Government.

Our citizens have surely not been greatly impressed with the opinions advanced on this matter, about which some of the parties taking part in these discussions know absolutely nothing, but who nevertheless stick to their opinions with unwavering tenacity in the face of all manners of reasoning.

In making a survey of the field of small towns and villages in Ontario, we fail to imagine one municipality, or a number of people in the municipality, who would stand in the way of the success of an individual, company, enterprise or industry, which would mean what the Ferry has meant to Morrisburg. Thousands of dollars will be spent on this project, in addition to the $60,000.00 already distributed here in the last five years by the party or parties seeking this new dock.

Inquiries have revealed that the facts in connection with the proposed new ferry dock are as follows:

Some years ago, a new dock was mooted to obviate the long and costly turn round by the Ferry in the Government slip. Plans for a new dock were drawn up which did not have the approval of the Ferry Company, and with the many years of low water these were found to be practically useless and obsolete.

The time arrived when work was commenced or about to commence and a contractor who tendered for the work, also drew the plans which were neither submitted to nor approved by any executive of the Ferry Company. When this company ascertained the class of work to be erected, opposition to the plans was registered through this paper, and petitions largely signed, and a resolution from the Morrisburg Council were presented to the Government Department concerned.

In face of all protests the work went on and the present wooden dock was the result.

Is it any wonder that the Ferry Company wish to build a dock that will be suitable for their own particular use and not a dock where their patrons have to drive several hundred yards over a trestle bridge of exceeding narrowness?

The Ferry Company having secured a suitable site on the Main Highway, propose to erect there a wharf which will be "filled"—not built on a trestle. This work is to be done at the Company's expense, and will immediately bring into circulation in Morrisburg several thousand dollars.

The Prescott Ferry and the Cornwall Bridge having commanding positions on the Main Highway, it is only reasonable that our local Ferry Company should wish to be placed in a similar favored position. Why not? Is the supposedly local opposition really local, or encouraged by other outside interests?

The main reason, if we are correctly informed, advanced against this proposed new dock, is that it will divert traffic from the town.

What traffic might this be?

All traffic, except East-bound traffic must still come through the business section, and it would be interesting to know just why a party bound for Morrisburg could not land on the Eastern boundry as well as in the heart of the town.

Our Council, as well as a majority of the citizens, are being commended for "rendering unto Caesar the things that are Caesar's". They are putting their shoulders to the wheel with a citizen of action, of whose equal there are few in this province; a man who would gladly and whole-heartedly help in securing assistance for any of our citizens, if such were necessary, and whose activities have greatly aided our hotels, our tourists' homes, our merchants, and our citizens generally.

How can anyone fail to recognize the incalculable benefit the local ferry has meant to this village under live-wire management? Is there any sane reason to be advanced why the management should be defeated in its objective?

MR. J. H. CURRIE HONORED

Several prominent Masons of Friendly Brothers Lodge, A.F. & A.M., No. 143, Iroquois, assembled at the home of Mr. John H. Currie on Sunday afternoon. It was the occasion of Mr. Currie's eighty-seventh birthday, and was a surprise to him. Afternoon tea was served by Mrs. Currie, Miss Currie and Miss Glenna Durant, after which Mr. Currie was presented with a gift of the fifty-year jewel from Grand Lodge.

Mr. Currie's only son, Dr. D.A. Currie of Morrisburg, was also present, and thanked the guests, on his father's behalf. Mr. Currie, Sr., although in poor health, also expressed his appreciation.

MR. P. B. McDONALD

After an illness extending over a period of several months, Mr. P.B. McDonald died at his home in Toronto on Saturday, January 4th.

The late Mr. McDonald, son of the late Mr. Thos. McDonald, former registar of the County of Dundas, and Mrs. McDonald, was born in Morrisburg in 1874. He for a number of years was engaged in his father's dry-goods store here, after which he taught school for several years. He afterwards settled in Toronto, where he was engaged, and after several years of recognized, faithful service, he became manager of the McKay Supply Co., which position he held until his recent illness.

In 1915 he was united in marriage to Miss Myrtle Stubbs, of Farrans Point, who survives. He is also survived by two brothers, Justin, of Morrisburg, and Thomas, of Vancouver, and one sister, Mrs. S.J. Delaney, of Prescott.

The remains were conveyed by C.N.R. from his home in Toronto, to his brother's home in Morrisburg on Monday afternoon, and the funeral to St. Mary's Church took place Tuesday morning. Rev. Father Coyle conducted the service. Rev. Father Foley of Cornwall, and Bro. R.T. McGrath, were present in the sanctuary.

The remains were placed in the family plot, St. Mary's cemetery.

PREMIER WILL MISS OPENING

Hon. Mitchell F. Hepburn will not return to Queen's Park until Feb. 1, it was stated on authority at the Parliament Buildings.

The Premier will miss the opening of the Legislature, and Hon. Harry C. Nixon will lead the Liberal forces in the House.

The Legislature has been summoned for Jan. 21. Acting Premier Nixon stated that the present schedule is to have the House approve of only one measure before an adjournment is asked for. The members will not likely sit again until well on into the middle of February.

The Ontario Government is seeking to put the Provincial income tax laws on the statute books as its first act of the second session of Ontario's Nineteenth Parliament. As soon as this bill is put through, the Government will ask for adjournment.

MR. J. J. PAYNE

The funeral of Joseph J. Payne, of Brinston, took place from the United Church there. He was in his 79th year, and lived all his lifetime in the township of Matilda.

For some years he was township treasurer, and in 1904 was appointed municipal clerk of the township, an office which he held for twenty years. He was a member of the Iroquois Cheese Board. Active in fraternal circles, he was a member of Connaught Lodge No. 445, I.O.O.F., Brinston, and of Friendly Brothers Lodge No. 143, A.F. & A.M., Iroquois.

The late Mr. Payne was twice married, first to Hannah Clow, daughter of the late Stephen Clow, who died shortly after marriage. His second marriage was to Mary Wright, daughter of the late James Wright, both of Brinston.

Woman's World

By Mair M. Morgan

SCIENCE OF BAKING

Modern inventions have made an exact science of baking and there is little reason for failure with even a delicate custard. Every stove manufacturer realizes the importance of dependable oven structure and builds his range on scientific principles.

The oven of today has its regulator which automatically controls the flow of gas, oil or electricity.

It is almost impossible to maintain consistent results in baking without the use of an oven thermometer of some sort. If your oven hasn't a regulator, but a thermometer. It will pay for itself many times over.

Of course, a knowledge of the heat requirements demanded in the cooking of each type of food is essential. Women who learned from experience that 12 corncobs would do the trick for a cake and that 2 maple sticks would keep the oven hot enough for a pie were the pioneers of the heat regulated oven and worked out for themselves what the manufacturer does for the present day homemaker.

Starting Cakes Off

Cakes require entirely different oven manipulation. The oven temperature should be low when the cake is put in and gradually increased until the required temperature is reached to complete the baking. Three hundred and fifty to 375 degrees Fahrenheight are good temperatures for most butter cakes.

An important point regarding cake baking is the position of the pan in the oven. The loaf cake should be placed in the centre of the oven so that the distribution of the heat may be even — top, bottom and sides. Layer cakes, because they bake more quickly, are less apt to rise unevenly.

Crisp cookies should be baked in a hot oven. Molasses cookies, which burn easily, require a cool oven of not more than 350 degrees Fahrenheit.

Cakes with fruit in them require a moderate oven, but they must be thoroughly baked because this type of cake improves as it stands after baking.

Prune honey cake will stay fresh for a full week, but it must be thoroughly baked in the beginning.

Pure Honey Cake

One cup cooked prunes, 2 tablespoons finely shredded orange peel, 1 cup granulated sugar, ½ cup strained honey, ¾ cup butter or other shortening, 3 eggs, ½ cup milk, 3¼ cups flour, 3 teaspoons baking powder, 1 teaspoon salt, ½ teaspoon soda, 8 prune pits.

The prune pits may be omitted and you may use nut meats. Pit prunes and mash to a pulp. Crack pits, remove kernels, peel off the brown skin and slice kernels fine. Cream sugar, honey and shortening. Beat in ½ cup sifted flour. Add eggs, well beaten, and mix thoroughly. Add prunes, orange rind and prune kernels. Mix and sift remaining flour, salt, soda and baking powder. Add alternately with milk to first mixture. Pour into three layer cake pans which have been well oiled and dusted with flour. Bake thirty minutes in a moderate oven (350 degrees Fahrenheit). Put layers together and cover top and sides with boiled frosting.

HOUSEHOLD HINTS

There will be no lump in the centre of the tablecloth when it is put on the table after laundering, if it is folded three times lengthwise before it is folded across.

A pretty, clear skin comes with good health, cleaniness, and plenty of oil to lubricate and stimulate circulation under the skin, according to one health authority.

When preparing turnips, peel them, then cut just as if there were a core in the centre. Discard this part, and the turnips will not have that strong unpleasant taste.

Salt has hygienic as well as culinary uses and is as much in place in a bathroim as in a kitchen. As a dentrifice sale is known to keep teeth white and sound and gums firm and healthy. As a mouthwash a half teaspoonful of salt in a glass of water is pleasant and refreshing. Head colds may be relieved by using a half teaspoonful of salt to a glass of water as a nasal irrigation.

KITCHEN CONVENIENCES

If the kitchen is small, this takes care of itself, but in large kitchens, it requires some study and experience to know just where it is best for a certain object to stand. Housekeepers there are who place the woodbox at the end of the stove farthest from the firebox. Five or six steps must be taken to replenish the fire when, if the box stood at the other end, the wood could be placed in the stove without a single step. Then there are other housekeepers who bend over a stove, sink or table that is too low for their height. The stove can be built upon blocks till it is the right height, and a way should be devised to make the table height satisfactory. It is a more difficult matter to remedy a low sink, but here one can put the dishpan on a table, and wash the dishes there. In order to prevent backache, do anything to avoid bending the back at an angle. Keep a high stool in the kitchen, for it is possible to do much more work while sitting down, than one would believe who had not tried it.

Another most convenient article for the kitchen is a box or bench on which the mopping pail may be placed when mapping the floor or washing paint. This bench saves one bending to the floor, each time the mop must be wrung out, as it is this stooping which makes the work so very tiresome. I am well aware, however, that many women even in these enlightened days, do not mop, but do all their floors on their knees. They thus spend an hour, when the floor could be done in half the time. But as they would rather die than change their old fashioned methods, nothing can be done about it. The bench used when mopping, can also be placed in the yard to elevate the clothes basket when hanging out the wash. This will save the trouble of stooping to the ground each time to get a clean piece of linen.

A convenience when one is cooking, is a wooden cleat, nailed to the wall just above the cooking table. A strip of elastic may be adjusted to hold the cook book open, and here may hang all the implements used in the process of preparing various articles of food, right within easy reach of the hand of the cook. Above the cleat a closet containing spices, salt, baking powder, and other things used in cooking, is a convenience.

COFFEE FACTS

This is the best cup of coffee I've had for weeks," said the man guest at dinner — and that started an argument with his wife that went on far into the night. Yet he was right—she was a careless coffee-maker.

Serving consistently good coffee is no mere matter of luck. The blend, choice of coffee, accuracy of measuring and last but not least, care of the coffee pot are all points that determine the quality of the cup your husband drinks.

When buying coffee, the blend is of first importance. Our mothers worked out blends to please the family taste. Today experts originate blends to please individual tastes.

Roasting Develops Flavor

The roasting of the coffee berry brings out the flavor and makes the berry brittle enough to grind. There are several different degrees of roasts —heavy or dark, light, medium, Italian and French. As might be expected, the degree of roasting affects the flavor and color of the beverage.

The kind of coffee pot you use decides whether you want your coffee ground fine, medium or coarse.

Always empty the coffee pot as soon as possible after using to prevent discoloration. Wash every part of it thoroughly in clean, hot, soapy water and rinse in clear, boiling water. Wipe dry with a clean tea towel and let it stand open to air. A stale odor which affects the flavor of the beverage develops if a coffee pot is kept closed. The pot which is used only occasionally should be washed and rinsed early in the day and allowed to air thoroughly. Scald it again just before making the coffee.

No matter how you make your coffee — by boiling, steeping, percolating or dip method — both coffee and water must be measured and the boiling, steeping or percolating stopped at the proper time. The drip method requires only the precaution of keeping the beverage hot until ready to serve.

Another important point in coffee-making is the necessity of serving the infusion as soon as possible after it is made.

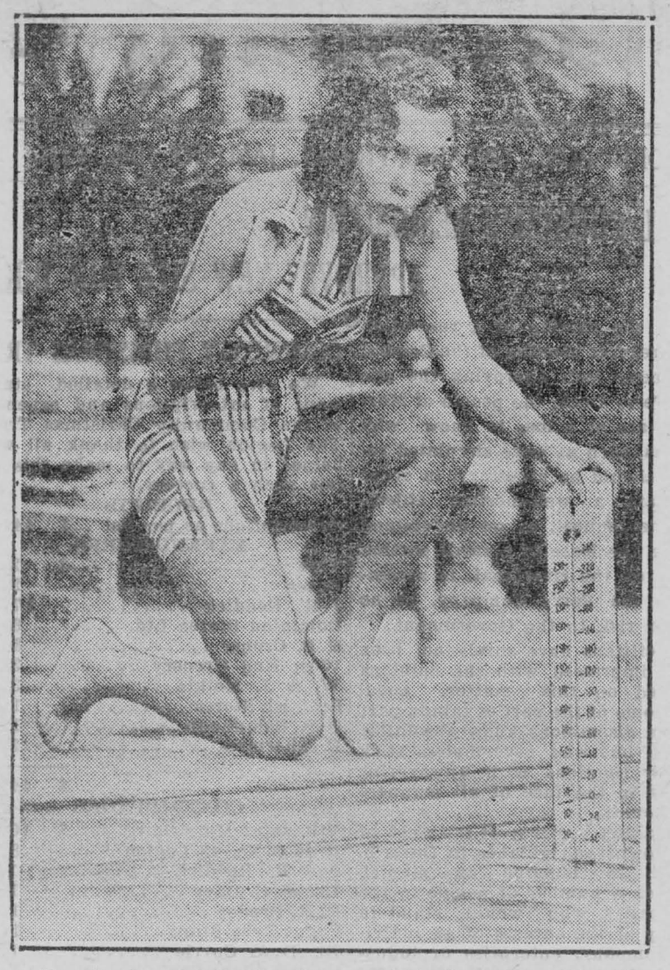
Proportion To Use

While the exact proportion of coffee to use in the making depends upon the individual taste, two tablespoons of ground coffee to one measuring cup of water makes a beverage agreeable to the average person. Two-thirds of a standard measuring cup is calculated as a serving of coffee. Consequently four measuring cups of water will make enough coffee for six servings.

After-dinner coffee served in small cups is stronger than the brew served for breakfast. Three to four tablespoons ground coffee may be used for each cup of water. Unless you use small cups, however, there need be no change in the usual proportions.

"Fame is a spotlight one minute and a bull's- eyethe next." — Babe Ruth.

No Chance of Receiving a Cold Reception



Dorothy Lee, dainty film charmer, tests the water with a thermometer before taking a dip in Hollywood pool. Southern California climate being what it is, she tossed it away and plunged in.

Super-Girl Wanter For Television

SOMEWHERE in the United Kingdom is a beautiful young woman with personality plus charm, a golden voice and photogenic features—if she can be found, and the British Broadcasting Corporation hopes she can. If so, she will be engaged to take a leading part in the forthcoming campaign to popularize television.

By "photogenic features," according to Gerald Cook, Director of Television, is meant good looks which television well.

Besides the superlative woman, a superlative man is wanted by the B. B.C. for television, two really first-class announcers. The idea is to begin with about three hours a day of short, snappy programs transmitted at times most suitable for public and private demonstrations.

Reader Offers Her 'Hate List'

"I've been reading your column," pens Marion Miles of Pennsylvania, "and I notice that once in a while you let loose with both barrels on some silly custom or habit of people which amuses you, or some contributor.

"I think it's a good idea, and I've been wondering why you don't turn the column open for pet peeves and gripes so some of us can get such things off our chests. What do you say?

"Anyway, unless I'm out of order, I want to give mine right now. I call this my 'hate list', and you can guess why.

"I hate people who say:

"'I knew it would rain if I left MY umbrella at home!'

"'My! my! it sure is a small world.'

"'Just wait until you're married—YOU'LL find out!"

"'It isn't the money—it's the PRINCIPLE of the thing I object to.'

"'This is a secret, but I KNOW you won't tell.'

"'I just washed my hair and I JUST can't do a thing with it.'

"'It seems like everyone tells ME his troubles.'

"'Don't worry—that won't help matters any.'

"And I have a special brand of hate for people who:

"Always are talking about their home town.

"Applaud before the act or show is over.

"Zup their soup just that way.

"Must do something or go somewhere on Saturday night.

"Laugh before it's time just to appear interested when you are telling a joke."

"I HOPE," adds the writer, "that I don't appear cynical. I'm not, really. I'm just griped."

NO, WE don't think you're so cynical. You're more of a Sulphite, according to the classification of Gelett Burgess. And we agree that most of your peeves are something to be peeved about.

Build A Town

(By Douglas Malloch)

Men build them houses, and sit down
And quite forget about the town,
As though a man could build a dwelling
Without foreseeing and foretelling
What sort of place his house shall stand
Whether he built on rock or sand,
And yet the home that he has found him
Depends upon the world around him
A house, however grand or new,
Depends upon the larger view,
And he who makes a garden pretty
Must also make as fair a city.
A better house has little worth
Unless upon a better earth.
A town will never grow about him
Well governed and well built without him.
And he who seeks to save a sum

Two Aprons—One Pattern

Smart coveralls! Made in jiffy! And just a little more feminine in type, as befits styles of this season's inspiration, is today's pattern (includes both models).

Dainty dimity print with rick-rack braid and plain crisp organdie with bias binds, made the original aprons. One can buy bindings already cut and pressed, which are extraordinarily easy to adjust.

Style No. 2818 is designed for sizes small, medium and large. The medium size requires 1¼ yards of 39-inch material with 8 yards of binding for ruffled apron; 2 yards of 39-inch material with 7 yards of braid for other apron.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of pattern wanted. Enclose 15c in stamps or coin (coin preferred; wrap it carefully) and address your order to Wilson Pattern Service, 73 West Adelaide Street, Toronto.

English Women's Stroll In Trianon Gardens Brings Unique Story

Extraordinary Human Experience Recounted by Former Principals of St. Hugh's College, Oxford

In the spring of 1901, two thoroughly educated and distinguished English ladies, the Misses Anne Moberley and Eleanor Jourdain, successive principals of St. Hugh's College, Oxford, took a stroll in the Gardens of Versailles. "We had very hazy ideas," they wrote, "as to where it was or what there was to be seen. Both of us thought it might prove a dull expedition." How amiss their expectation!

Following the path, presently a little, square country house came into view whose long windows, looking over an English garden, were stoutly shuttered. A lady was sitting on the terrace holding a paper before her, apparently engaged in sketching. In Miss Moberley's account (1901) is this description: "I supposed her to have brought her own camp-stool. It seemed as though she must be making a study of the trees, for they grew close in front of her, and there seemed to be nothing else to sketch. She saw us, and when we passed close by on her left hand, she turned and looked full at us. It was not a young face, and (though rather pretty) it did not attract me. She had on a shady white hat perched on a good deal of fair hair that fluffed round her forehead. Her light summer dress was arranged on her shoulders in handkerchief fashion, and there was a little line of green or gold near the edge of the handkerchief, which showed me that it was over, and not tucked into, her bodice, which was cut low. Her dress was long-waisted, with a good deal of fulness in the skirt, which seemed short. I thought she was a tourist, but that her dress was old-fashioned and rather unusual (though people were wearing fichu bodices that summer)." The sketching lady was Marie Antoinette according to the story.

Three months later when, back in England, Miss Jourdai called upon her companion and the discovery was made that only one of them had seen the sketching lady. At a moment when both were particularly on the look-out for someone to reassure them as to thein location, it was inconceivable that so conspicuous a person on the deserted landscape should have escaped the sight of either.

Call it fantastic, incredible — yes, even hallucination if you will, but the adventure in time-travelling to the Trianon of 1789 that befell two trustworthy ladies, in the Gardens of Versailles in the summer of 1901, yet remains topically vigorous as drawing room conversation in English homes today. An unexplained extension of human experience — no mere ghost story.

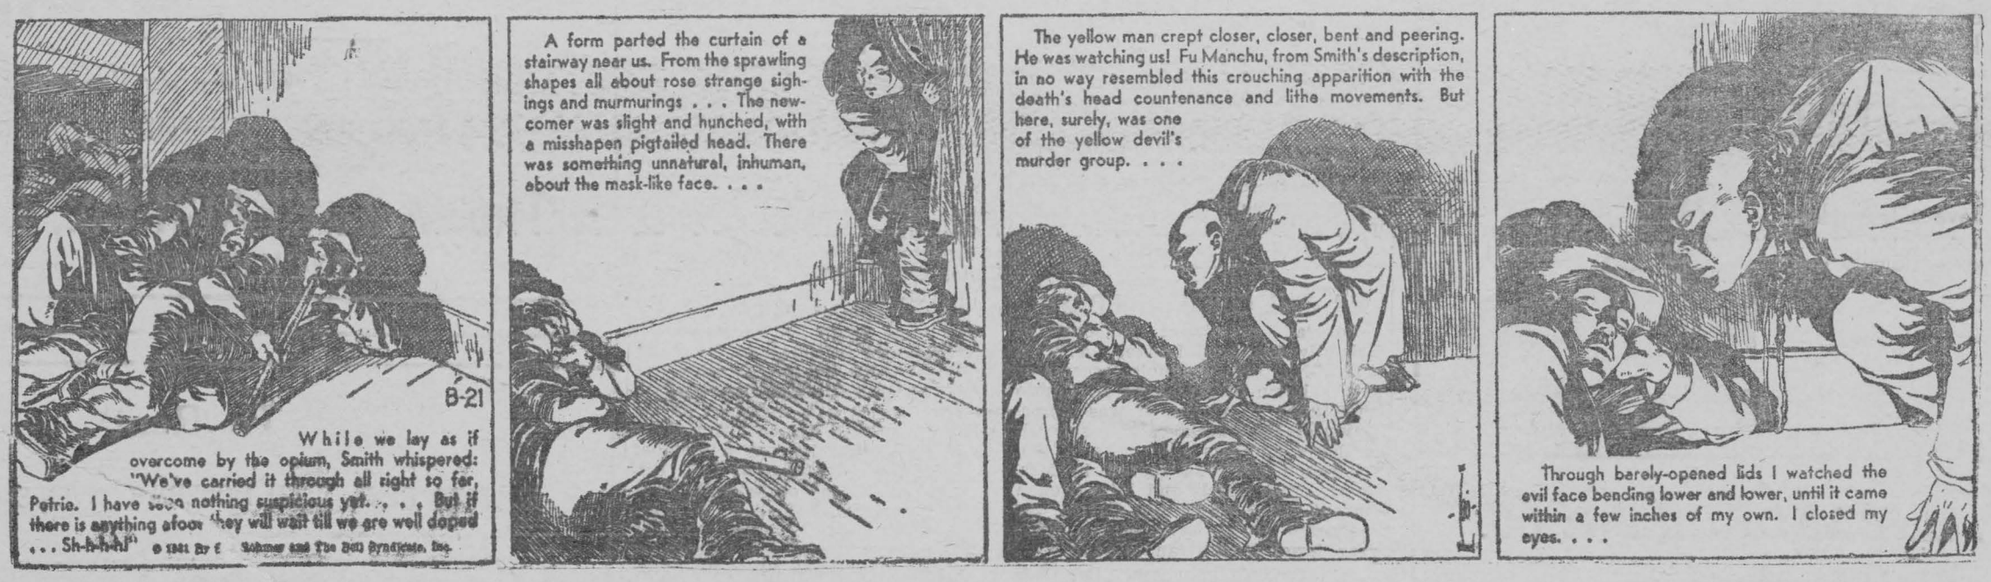
Mother Who Read To Me

I had a mother who read to me
Sagas of pirates, who scoured the sea,
Cutlasses held in their yellowed teeth
"Blackbirds" stowed in the hold beneath.
I had a mother who read me tales
Of Gelert, the hound of the hills of Wales,
True to his trust till his gallant death
Faithfulness blent with his final breath.
I had a mother who read me lays
Of ancient and golden and glorious days;
Stories of Marion and Ivanhoe,
Which every boy has a right to know
I had a mother who read me the things
That wholesome life to the boy heart brings;
Stories that stir with an upward touch —
You may have tangible wealth untold
Caskets of jewels and coffers of gold
Richer than I you can never be—
I had a mother who read to me.

—Strickland Gillian, in The Library Journal

FU MANCHU By Sax Rohmer

THE SEVERED FINGERS—A Ghastly Face.



The GREEN GHOST

by Stuart Martin

SYNOPSIS

Maud Barron and Hughes return to monition of disaster. She hears padding footsteps. Rushing into her father's study she finds him dead.

Dr. Sidney Foster, a friend, is joined by Detective "One Eye" Uttock, a mulatto, who has never lost a man.

Maud Barron awakes with a pre-England. Dr. Foster gives Maud his address in case of need. He receives a telegram informing him "The Ghost" has reappeared. Foster takes Elsie Monteith for drive. She confesses her love for him.

Hughes heard him quietly, his little dark eyes betraying, first surprise, then amusement, and finally a cold haughtiness. His answer was gruff and condescending, which sent a cold fury raging within Foster.

"I'm glad you apologised Foster. As a matter of fact I was on the point of handing you a cheque and telling you to quit. Under the circumstances you may stay until Maud feels entirely well. How long will that be, do you think?"

"That depends entirely on whether she is allowed to keep up present progress. It is fortunate you did not hand me a cheque, Mr. Hughes; for I would have felt compelled to return it."

Foster was stiff as a poker, his eyes glinting as he spoke. He bowed and went into the drawing room, feeling that he would have liked to hit Hughes on the jaw; but he had the satisfaction of having told him that he did not accept any ruling from him, and he was glad he had managed to do it without another scene.

Mrs. Gibbs and Maud were seated beside the fire, for though it was by no means wintry weather the evenings were cool. The latter looked up and invited Foster to a chair between them.

"Have you been up to see Elsie, Doctor?" asked Maud. "She has had some light food sent up.—"I'll ring."

The maid came at the summons.

"Ask Miss Monteith if she would like anything for her headache from Dr. Foster, or if she would like to see him about it?"

"I'm sure she isn't too well," continued Maud. "She was not like herself today; so quiet and looked thuroughly worried."

The maid returned.

"Miss Monteith, mum, says that she's in bed, and just going to sleep. She won't be down tonight. I didn't go inside the room. And she doesn't want anyone to trouble about her."

"I'll see her in the morning if she isn't better," murmured Foster.

MUSIC, THE FOOD OF LOVE

He picked up a book, ruffling the leaves with his thulb.

"I hope you are not overdoing it, Miss Barron. You've a lot of lost sleep to catch up, you know."

"You don't mind being left alone?"

"Oh, dear, no. I want to turn in early myself tonight, and I can manage to amuse myself with what's here."

He held up the book and waved an expressive hand towards the piano.

But when the two ladies had gone up he did not read his book. He went to the piano and began to play over the song that Elsie Monteith had sung to him,

If I were a blossom blown
On the summer wind, forlorn—

He played it over several times, letting the music sink into his soul, and singing it in a low voice as he played. It was a haunting air, with a touch of melancholy and a winsomeness that was impossible to forget.

When he had played it he walked up and down the apartment, hands in pockets, head bowed, a smile on his lips.

If I were a blosom blown
On the summer wind, forlorn—

She had sung it for him, he divined. Not until that moment had the singing of that song received its proper place in the scheme of things; but now he glowed inwardly at what he had suddenly realized. She had sung it for him.

He sat down and played it again, imagining that she stood by his side. He remembered every little gesture, every breath she took, every movement of her head.

The clock struck half-past ten. He rose, closed the piano, and turned out the lights. He went upstairs without making a sound on the heavy carpet. The idea came to him that he might have awakened Elsie with his playing. Her room was just above the piano.

"She will know that I played it for her," he murmured.

He was walking along the corridor towards his room when he stopped suddenly. From the direction of her room, which was just round the corner of the corridor, there came the sound of voices. One of them was raised in gruff, domineering, tones laying down the law, to which the other seemed to be protesting.

Another step and Dr. Sidney Foster saw with his eyes confirmation of what his ears had told him, but what he had refused to believe by that sense alone.

William Hughes was standing inside the room of Elsie Montith, a yard from the threshold. His pipe was in his hand and was pointed towards her as he spoke; but it was not at Hughes that Foster's eyes travelled and fixed. It was on Elsie Monteith; for she stood there, dressed in her long coat and with the small heliotrope hat on her head, and the rain glistened on the hat proving that she had just come into the house.

Hughes had an overcoat on and held his hat in his hand. His voice came distinctly to Foster's ears.

"I'm glad you warned me, Elsie. And now you know what you have to do."

"I know," she answered in a suffocating tone. "I agree. Good-night."

Foster drew back and hurried into his room in time to escape meeting with Hughes. He stood behind the door, the handle in his hand, listening to th retreating footsteps. A cold wave was sweeping over him. A sickness seized his heart. He felt physically weak, and he became aware that on his brow the perspiration was trickling down in large drops.

Seek 2,400 Planes Fr U.S. Air Force

Washington. — Decision to seek funds to give the United States an air force "second to none" emerged recently from a conference between General Malin Craig, army chief of staff, and Chairman McSwain, South Carolina Democrat, of the House military committee.

McSwain arranged to go before a House appropriations sub-committee to press for inclusion of money for 800 up-to-the-minute fighting planes in the war department's appropriation for the next fiscal year.

At a cost of around $70,000,000 annually, including accessories and ground equipment, he said, 800 planes would have to be provided yearly for three years to meet what the war department considers minimum needs.

"It isn't fashionable any more to keep the same husband too long."—Annette Kellerman.

Rural Schools

In an address recently delivered at Queen's University Dr. Duncan MacArthur, deputy minister of education for Ontario, openly deplored the fact that the boys and girls of the country had not the opportunities of receiving as good an education as those in urban centres. In speaking as he did he undoubtedly pointed out the great weakness in the educational system of this province. It is, of course, impossible to impart the same quality of instruction in isolated rural schools with poor equipment as is given in the towns and cities. Perhaps in some instances the people of those districts are themselves to blame because of their desire to procure cheap teachers. This is unquestionably a very short-sighted policy, inasmuch as the boys and girls in the country, because of their meagre opportunities, deserve to have the very best teachers that can be had.

The remedy for this state of affairs is the establishment of consolidated schools. It is not reasonable that these individual schools, with only a small number of pupils, should be maintained to the detriment of the instruction offered. In these days of good roads and motor buses it would be a simple matter to collect the children and convey them to larger schools supplied with the best teachers and all the necessary equipment. It is not a sufficient answer to say that many of the brightest students in the universities started in these isolated schools. If the advantages were greater, the number would be vastly increased. Some years ago the Hon. G. Howard Ferguson, when he was Premier of Ontario and Minister of Education, recommended a scheme of township schools, but owing to the opposition, raised against it nothing was done. Dr. MacArthur will prove himself to be a real benefactor if he can successfully carry out a scheme that will provide better facilities for the education of the children in the rural communities at a reasonable cost.—Brantford Expositor.

"Streamline Girl" Title is Awarded

Chicago—Now it's the "streamline girl of 1936" and the "streamline matron."

The holders of the titles are Miss Helen Bell, daughter of the Laird Bells, of suburban Winnetka, and Mrs. James Getz, daughter-in-law of George Getz, treasurer of the Republican National Committee.

They were chosen from scores of smartly dressed women attending the annual Emmerson House benefit ball last night by Mrs. Helen Hughes Dulaney, creator of new effects in modern art, and Walter Frazier, architect.

The judges' definition of "streamline" was "simplification of everything, absence of non-essentials in dress, and good carriage."

Air Hostess Picked Like Actresses

She Must Be Young, Slender and Attractive, Says Plane Line's Chief Stewardess

She must be attractive, she must be young, she must be slender. She must be able to turn down proposals without offending — and she must think only of her career.

Movie actress? Wrong. Air transport hostess.

"I often think it would be much easier to qualify for the movies," Miss Lena Kraft, chief stewardess for one air line said with a sigh recently.

"We have to watch our pounds just as much as Joan Crawford ever did. We can't weight over 118, you know."

That is a requirement met by thirty-two pretty young women who were trained in Kansas City for positions as hostesses on one of the big commercial air lines.

None is over 5 feet 4 inches tall. None is more than 26 years old. All are registered nurses.

A rigid three weeks' course was given the first group of hostesses—selected from hundreds of applicants the nation over—who will be placed on TWA transport planes.

"Most of them," said L. A. Rainey, a pilot and "professor" of the class, "will be based in Kansas City.

"Those going on eastbound liners will work two days and then have two days' rest. Those going west will make the round trip in two days and then rest three days."

"The schedule is for 110 hours of flying monthly. In that way, the young women can have time between trips to enjoy a normal social life," says The Associated Press.

There's often romance on a plane, too, take it from Miss Kraft.

"Proposals? You bet we get proposals," she said. "Still, having been nurses, we are used to it. About the first question we are asked is 'Are you married?' and the answer to that one is easy. If we were married we couldn't hold our jobs."

Not long ago a stewardess on Miss Kraft's staff dropped aviation for matrimony. Another is thinking it over now.

If You Want Your Family To Like Vegetables

Change the Ways in Which They Are Served and Add Variety

Upon the sales ability of the cook and her ingenuity hangs the problem of whether or not her family gets the proper amount and variety of vegetables. There are tricks in all trades and the cook must resort to many. When the doctor prescribes disagreeable medicine, he sugar-coats it. That is what the cook must do, figuratively speaking.

Here are a few hints for making vegetables popular. If they are that kind, cut them invitingly and serve raw like radishes. In this list come carrots, turnips, cauliflower hearts, koblrabi and beets.

ADD CELERY AND NUTS

Shredded and mixed with celery and nuts or even with fruits for salad, you may use many vegetables that would be refused if served straight.

Careless cooking is often the reason for the unpopularity of vegetables. Boiled just right, according to the kind of vegetable and served hot with plenty of butter, almost all vegetables are palatable.

A good sauce helps.

An unpopular vegetable served in combination with one that everybody likes is a good plan—carrots and peas, for instance.

Appetizingly browned in butter or French fried in deep fat, even parsnips could go to the top of the class—and baking is another aid.

Also you may disguise them in meat stews, pot roasts, and soups.

Souffles, scallops and casseroles offer unlimited possibilities.

So do gelatin dishes and loaves.

USED IN DESSERTS, TOO

Then, of course, there are marmalade and butters where you use carrots and tomatoes, and vegetable sandwiches with peanut butter or mayonnaise. Garnishes and cocktails you have already thought of, no doubt. But how about puddings, cookies, cakes and breads made with vegetable juice or finely chopped vegetables?

How To Be Happy Though Married

Denver, Colo. — For a long and happy marriage, F. E. Bush, 85, and Mrs. Bush, 70, celebrating their 60th wedding anniversary advise:

"Pay your bills.

"Don't argue with your husband—or wife.

"Don't use liquor or tobacco.

"Stay out of doors as much as possible.

"Lead a simple life.

"Do some physical labor every day."

DOCTOR TELLS HOW PEOPLE ARE FOOLED

Dr. Rabinowitch Debunks Some "Pure Olive Oil" As Cotton Seed Oil

MONTREAL — "So-called pure olive oil, packed in Italy and in Spain are in many cases made of cotton seed oil," declared Dr. I. M. Rabinowitch, M. D. C. M., D.Sc., F R.C.P., director of the department of metabolism at the Montreal General Hospital, and assistant professor medicine and lecturer in Pathological chemistry at McGill University, in a recent address here. "If there are any public health representatives in this city I may say without fear of libel, that I could name them 22 products of allegedly olive oil that are sold on the market that contain no olive oil or a very small percentage, but all contain cotton seed oil."

Dr. Rabinowitch dispelled a lot of ideas which housewives have in regard to the importance of such well-advertised words as standard, prime, first grade and so on. "How many people know that eggs bearing the word "standard" are the lowest grade on the market?" he asked, "Or that 'fancy California first grade asparagus' is the lowest possible grade, and that extra fancy, select and extra select go ahead of it?"

PUBLIC'S GULLIBILITY

As an illustration of the gullibility of the public the speaker instanced salmon, declaring that the psychological effect of advertising was that people thought salmon to be good had to be pink. "White salmon is just as good as pink salmon, but the difficulty as to get people to think of salmon in any other terms than pink salmon until an advertising agent thought up the phrase "This salmon is guaranteed not to turn pink.' Dr. Rabinowitch gave some examples of tests made in his laboratory at the General Hospital of soaps that contained from 28 to 51 per cent. of soap, of butter supposedly 1 1-8 cents cheaper that contained sufficient salt and water to make the actual butter cost 4 1-2 cents a pound more, of cleaning agents for floors that contained 18 per cent water, 2 per cent. sand and 80 per cent. sawdust with a little coloring.

Then he came on to the question of nutrition and dieting, and warned his audience about following any general dieting plan without consulting physicians, declaring that no two people were alike in the effect that certain foods had on them, and that those women who went in for indiscriminate dieting and perhaps lost 20 or 30 pounds found themselves within a year or so in the sanitarium suffering from tuberculosis.

HARMFUL EFFECTS

"Notwithstanding the advice which is given by apparently ethical medical men and which we read almost daily in the newspapers, I am going to point out the harmful effects of this system," declared Dr. Rabinowitch.

"I want to speak against the dissemination of medical knowledge amongst those who have not the proper training to fully appreciate that knowledge. The medical profession has not and we hope never will hesitate to spread that knowledge which by preventing disease will lessen individual suffering and tend to the promotion of national welfare, but I doubt if this has not led to practices not only of no benefit to the public but actual impairment in health. Amongst those who are giving such advice there are individual men whose ability to deal with this phase of the health problem cannot be questioned nor can there be any doubt of their sincerity, but there is no doubt in my mind that this high and laudable practice has led to disaster."

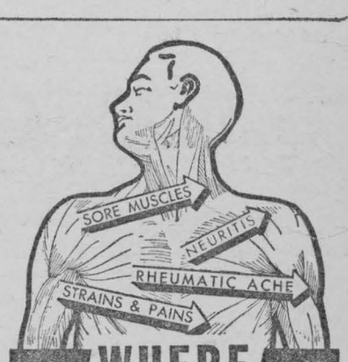
SCIENCE OF NUTRITION

After pointing out that the human system was continually breaking down and building up tissues through the demands made on it, Dr. Rabinowitch said that in order to keep healthy this breaking down and building up of constituents must be kept balanced — if the breaking down exceeded the building up a person lost weight and if the building up exceeded the breaking down a person gained weight, and the science that dealt with that was known as nutrition. There were other factors besides energy, and even if two people of the same age, weight and sex were given the same food and the same number of calories they would differ, for calories were not the only consideration in construction of diet. There were other constituents in food essential to life and promotion of growth, and these he listed as vitamins, and their efficient absorption through the gastro-intestinal tract.

"Some people are naturally fat and some naturally thin," declared the speaker, "and it is a tragedy to see people who are naturally overweight, according to standard, attempting to diet, when they are healthy in every other respect. They may lose weight but they end up in six months or a year in a sanatarium. These are not accidents or rare occasions but quite the common ending. It is important to recognize that the standard which we use in determining whether a person is normal, over-weight or underweight for height are statistical, they are averages based on large groups of people. The mere fact that you are not average may not and need not necessarily imply you are overweight — in other words the physician does not deal with averages but the individual, and that alone points out the harmful effects of indiscriminate diet.

"The problems of food and nutrition are not simple. There is no one diet which is suitable or all people nor is the same diet suitable for the same person at all times. Proper advice about diet demands knowledge of many things, and the physician alone is in the position to properly guide the individual in matters of nutrition and indiscriminate dieting inevitably leads to serious impairment of health.'

"Advancing years can have no terrors for those whose minds are occupied." — Frank H. Vizetelly.



WHERE PAIN TORTURES

Omega Oil RUB IT IN IT WON'T BLISTER

The Royal Bank of Canada Presents Strong Statement

Total Assets Have Crossed the Eight Hundred Million Mark — During Year Deposits Increased Over $50,000,000 — Liquid Assets at $423,673,881 Are Up From $382,172,287 and Are Equal to 58 Per Cent. of Total Liabilities to the Public.

Reflecting the definite improvement in financial conditions throughout the large field it serves, The Royal Bank of Canada is issuing to its shareholders a statement that shows very substantial growth during the year.

As a result, total assets have crossed the eight hundred million mark. Deposits have again duplicated the remarkable gain of the previous year by increasing more than $50,000,000. At the same time, holdings of high grade Government bonds have increased to $209,453,208, up from $150,708,385. Of special importance is the tendency of current loans to move upward, as a result of the gains that have been evident in many lines of business.

Shareholders will note with satisfaction the high esteem in which the Bank is held as reflected by an increase of more than a hundred million in deposits over the last two years.

Strong Liquid Position

The general statement, which is for the year to November 30, shows total assets of $800,919,700, up from $758,423,904 in the previous year. Of this large total, liquid assets have reached $423,673,881, as compared with $382,172,287 and are equal to 58% of total liabilities to year. Of this large total, liquid assets are cash on hand and deposits in other banks of $157,630,042. The outstanding change in liquid assets is an increase in the holdings of Government securities of $58,744,823.

Commercial Loans Up

Current loans of $328,821,416, against $326,782,534 at the end of the previous year, show a moderate increase which is encouraging when it is taken into consideration that as against increased demands from industry on account of improved business. Liquidation of slow loans carried during the depression has continued and the general experience on this Continent is that commercial loans of banks are still decreasing. Call loans in Canada also show a movement in an upward direction and are reported at $26,328,679, up from $23,430,645, a gain of close to $3,000,000. Call Loans outside of Canada at $19,216,857 are down $10,690,196.

This is likely due to the very low rates of interest obtainable in the leading financial centres of the world, mainly London and New York.

Large Gain In Deposits

Of interest to the general public, as well as to the shareholders, is the showing made in deposits. These now stand at $688,366,512 and are up $51,000,000 during the year. This follows on an increase in the previous year of over fifty millions, which makes the gain for the two years over 17 per cent. As was to be expected, Saving deposits in Canada have continued to gain and the decrease in interest-bearing deposits is understood to be due to a policy of cutting out of the payment of interest on a large proportion of the bank's deposits outside of Canada.

Profit and Loss Account

With lower interest rates prevailing, profits show a slight decrease, but were sufficient to provide for dividends and the usual charges and make a contribution to Profit and Loss Account.

Total profits amounted to $4,340,552, as against $4,398,217 last year. $2,800,000 was applied to dividends, $200,000 transferred to Bank Premises account, $200,000 to the Officers' Pension Fund and $1,037,772 for Dominion and Provincial Government taxes, leaving a surplus of $102,700 to be added to Profit and Loss Account, which now stands at $1,609,554.

The statements issued this year by leading Canadian institutions have shown that Canadian banks have never been in as strong a position as they are at present to meet commercial demands as they develop.

SCRAMBLED SENTENCE CONTEST

The Most Unique Profit-Sharing Prize Contest in History

There are five Classic Sentences in the following group of words, find these five sentences, then write them correctly, and legibly. "Trust men, and they will be true to you, a good word is an easy obligation;—is better than a years' mere study of books.—needs no definition of sin.—by the progress of a favoured few.—and they will show themselves great.—whoever has tasted of remorse—treat them greatly;—a single conversation across the table with a wise man—which costs nothing.—the progress of democracy can never be measured—but not to speak ill requires only our silence."

Send your result in on or before Jan. 3rd, 1935, with an entry fee of Twenty-Five Cents, no stamps. 10 percent. will be shared between those who send in two errors, 15 percent. with one error, 25 percent. for a correct list. All entrants will receive the results. The more entries received, the more PROFIT to SHARE.

Convention Dates

Arrangements have been- completed by the Agricultural Associations concerned to hold their annual meetings and conventions as announced below.(1936).

Ontario Association of Agricultural Societies (formerly Ontario Association of Fairs and Exhibitions)—Annual Conventon, Tuesday and Wednesday, February 4th and 5th commencing at 9.00 a.m. King Edward Hotel. Toronto.

Ontario Plowmen's Association, —Annual Meeting, Thursday, Feb. 6 commencing at 10.30 a.m. Director's Meeting at 9.30. King Edward Hotel Toronto.

Ontario Field Crop and Seed Growers' Association—Annual Meeting, Friday February 7, commencing at 9.30 a.m. King Edward Hotel, Toronto.

Ontario Vegetable Growers' Association—Annual Meeting, Tuesday, February 11th, commencing at 9.30 a.m. Royal York Hotel, Toronto.

Convention, Wednesday February 12th at 9.30 a.m. Royal York Hotel, Toronto.

Ontario Horticultural Association Annual Convention—Thursday and Friday, February 13th and 14th at 9.00 a.m. Royal York Hotel, Toronto.

Must be Abortion Free

A ruling which was not unexpected has ben made by the Health of Animals Brancch at Ottawa. Effective o n January 1 all cattle six months old or more of dairy or breeding type to be exported to the United States must be accompanied by certificate saying they are free from Bang's disease, also known as infectious abortion.

The certificate signed or endorsed by an official veterinarian of the country of origin must show that the animals are free from the disease, and have been subjected to a test within 60 days of the date of exportation showing negative results of the disease.

Official advice received from the Uuited States Federal Department of Agriculture by Dr. George Hilton, Canadian Veterinary Director General said the order does not include cattle exported for immediate slaughter or steers and spayed heifers and cattle for grazing or feeding which are not of the ordinary dairy breeding type. Dr. Hilton said the Health of Animals Branch is ready to assist farmers in taking the necessary measures to free their herds from the disease.

Alsike Seed Production

A survey at the end of October would indicate the following commercial alsike seed production in Canada this year:

Central and Western Ontario 200,000 pounds which is a decidedly light crop when compared with the 8 to 10 million pounds which used to be produced annualy n this part of Canada. A negligible crop is reported in North-western Ontario, which ordinarily produces a fair quantity of and only about 5000 pounds of reasonably pure alsike is indicated in the Timiskaming districts of Northern Ontario and Quebec.

About two carloads are reported in the Prince George production district of British Columbia. In addition there may be some 1000,000 lbs. of timothy containing more or less alsike in the Timiskaming districts of Ontaro and Quebec.

A shortage of alsike for normal Canadian requirments, which approximates 1,500,000 pounds per year seems inevitable for next spring but there may be some importations from the Uuited States and Europe to increase the supply.

The crop this year in Ontario is only fair in general appearance and in freedom from weed seeds, but any alsike that will grade under the Dominion Seeds Act should be in strong demand.

Prices paid growers in 1935 have not yet been established, but in 1934 when alsike was scarce also growers received from 20 to 25c per pound for no. 1 grade.

Avoid Scab in Potatoes

There is more than fertility of the soil to be considered in crop production. Potato growers can increase their yields by the application of fertilizer, this crop being one that responds readilyt the righ formulas Markets demand more than volume, however, and a scab-covered lot of tubers are likely to be rejected by the dealers. The germs of this disease are usually present in soils on which potatoes have been gfown for some years, the continuous planting adding to the trouble. The seed may be treated with formaldehyde or corrosive sublimate, but if placed in infected fround the scab will promptly appear. If lime has been applied within the previous year or two the conditions are even more favorable for the development of the disease.

The application of lime is recommended to stimulate the growth of clover and alfalfa, the two crops that are well fitted to improve the soil when turned under. The problem of the groweris to decide whether to continue to grow potatoes without this green manuring and avoid scab or to lime the ground and take chances. Where potatoes are not a main crop it is possible to plan a rotation in which liming is done for other crops and potatoes included after a five year period. Another plan is to choose scab resistant varieties, of which there are a few offered. Unfortunately these are not such high yielders though in course of time strains may be developed that combine productiveness with disease resistance, as already accomplished in wheat.

Expansion in Poultry Industry

The poultry industry in Southwestern Ontario has undergone rapdi expansion in recent years, growslowly from the small farm flock of a dozen or two hens to the large flock, and in some instances to the lager specialized poultry farms. At one time all the operations of breeding incubation, egg production, fattening and preparing for market were carried out on the farm under single management , but now in many instances we find major operations carried out at some specialized plant. However the general purpose poultry farm where all or nearly all the operations are carried out still remains thesafest undertaking and the backbone of the industry.

In conformity with other farm products poultry has had its lean years but a well-managed flock can generally be relied on to return some profit. The rule that only the best will survive under keen competition may be seriously applied to poultry keeping due to the small pofit per unit; a hen may lay one egg or she may lay 350 in a year, and the overhead of the poor hen is remarkably close to that of the high producer but there is a vast difference in the revenue.

A glance at the laying contest reports will disclose the remarkable difference between flocks, and probably more than any other factor. these contests, held in all the provinces under the Dominion Government management have done great service in stimulating selective breeding and pointing out the difference in the production of a good flock and a poor one.

COMPLICATED RELATIONSHIP

C.D. Spake, of Gastonia, N.C. says he is his own uncle.

Spake's grandfather, Daniel married Mrs. Spake's mother, Mrs. Bernethy. That made Mrs. Spake (C.D.'s wife) his grandfather's daughter. Andthat made his wife his aunt. If h iswife is his aunt, he reasons, he must be his own uncle. His mother-in-law is his grandmother and his grandfather is his father-in-law. Since his wife is his aunt, his children are his own first cousins.

MODERN, EFFICIENT BANKING SERVICE ..... THE OUTCOME OF 118 YEARS' SUCCESSFUL OPERATION

TESSIER MURDER HEARING FRIDAY

Charged with the brutal murder of Rene Tessier, 34, Cornwall railway worker, there on Aug. 31 last, Arthur Tremblay, 29, Cornwall carpenter, will be given preliminary hearing on the murder count at Cornwall on Friday afternoon.

Magistrate Raoul Labrosse, Vankleek Hill, Senior Magistrate for the district, will preside over the hearing, and Lionel Chevrier, M.P., is appearing on Tremblay's behalf.

Tremblay, who was named by a Coroner's jury as being responsible for Tessier's death, will be taken to Cornwall from the Carleton County jail, Ottawa. He is alleged to have struck Tessier about the head with a carpenter's axe and hammer. Tessier's body was found in Tremblay's small house on the northern outskirts of the city about an hour and a half after the murder, and Tremblay was arrested shortly afterwards. At the time of the arrest, his clothing was claimed to have been covered with blood.

Our Correspondents

WILLIAMSBURG

Born—At Smiths Falls, on Tuesday January 7, 1936, to Mr. and Mrs. Arthur Street (nee Evah Weaver) a daughter.

Mr. and Mrs. Bert Johnson and James, Donald and baby June, of Dixons Corners, were guests on Saturday at the home of Mr. and Mrs. Guy Strader.

Mrs. Roy Merkley of Elma, spent New Years at Ogdensburg, N.Y., the guest of her sister, Mrs. Joe Soules and Mr. Soules.

Mr. and Mrs. George Barkley, Mrs. Allen Barkley, Miss Ruth Barkley and little June Whitteker were guests on New Years Day of Mr. and Mrs. Rufus McIntosh.

Miss Hilda Merkley, after spending the Christmas holiday season at her home here, returned to Kingston on Sunday, to resume her studies at Queen's University.

Mrs. Maggie McIntosh, Mr. Bernice McIntosh, Mr. and Mrs. Merle McIntosh and family were Christmas Day visitors of the former's daughter, Mrs. Geo. Pollock and Mr. Pollock, at Berwick.

Miss Alice Loucks and Mrs. Arthur Loucks were guests last Friday of Mrs. Rufus McIntosh.

Mr. William Booth had a pleasant New Years Day at the home of Mr. and Mrs. Robt. Crombie, Elma.

The Misses Edna and Louva Johnson are taking a course at Cornwall Business College. Their many friends here wish them success.

Mr. and Mrs. Cecil Garlough of Nation Valley were guests on New Years Day at the home of the latter's parents, Mr. and Mrs. Isaac J. McIntosh.

Mrs. H.J. Barkley and family spent Sunday afternoon at the home of Mr. and Mrs. Rufus McIntosh.

Recent guests and callers at the home of Mr. and Mrs. R.C. Casselman: Mr. and Mrs. George Casselman, Evelyn, Earl and Hubert, Inkman; Mr. and Mrs. Lyle Casselman and Don and Mrs. Agnes Merkley, of town; Mr. and Mrs. Isaac Barkley, Graham, Wilda, Vaughn and Weldon Barkley of Cornwall; Mrs. Melvin Stanley and daughter Elleda of Russell; Mr. and Mrs. Ralph Thompson and Mr. Ed. Fitzsimmons, of Iroquois; Mr. and Mrs. Oscar Becker, Mr. and Mrs. Mahlon Casselman, Miss Myrtle Casselman of Morewood; Messrs Frank Casselman and Chas. Pitt and Mrs. Wm. Lane, Williamsburg.

Mr. and Mrs. Hugh McIntosh and Mr. L.C. McIntosh left on New Years' Day by motor for New York City, where they will spend a couple of weeks with Mr. and Mrs. Gordon Smith, travelling from there via Washington, D.C., through the Southern States to California where they wil spend a couple of months.

Mr. and Mrs. J.W. McIntosh and Douglas of Ottawa, and Mr. Robt. A. Merkley of Toronto, were guests of the McIntoshs' at SunnyBrook Farm on Sunday.

Mr. and Mrs. Edwin Whitteker and family were guests of the former's brother, Mr. Walter Whitteker and Mrs. Whitteker and family, at Berwick, on Sunday.

Miss Vivian Barclay left on Saturday for Brockville, where she will take a course at the Business College. She will be very much missed in the church and social activities of the town. Her many friends here wish her every success.

Mr. and Mrs. Albert Utman and family of Morrisburg, were guests of Mr. and Mrs. Roy E. McIntosh and family on Sunday.

A number of the young people of this community attended the New Years party held at the home of Mr. and Mrs. Robt. Crombie, Elma. All report a very enjoyable time.

Guests of Mr. and Mrs. J.D. Beckstead and Mrs. Jesse Seekings, during the holidays, were: Mr. and Mrs. L.M. Brown and daughters Bessie and Helen of Brockville; Mr. and Mrs. W.D. Payne and Mrs. Elizabeth Payne, Kemptville; Miss Alyce Cameron, of Morrisburg.

Miss Clova Barkley, after spending the Christmas holidays at the home of her parents, returned to Ottawa on Sunday, to resume her studies at the Normal School.

Mr. and Mrs. Strader McIntosh, accompanied by the former's parents Mr. and Mrs. Edgar McIntosh, motored to Kingston on Tuesday last, where Mr. and Mrs. E. McIntosh remained for a few months.

Mrs. Cecil Garlough spent a few days last week visiting her parents, Mr. and Mrs. Isaac J. McIntosh.

Mrs. Willis Strader spent a few days this week the guest of her brother, Mr. Chas. Kirkwood and Mrs. Kirkwood, at Toyes Hill.

Little Catherine, Jesse Abbott and James Seekings were guests last Thursday of Miss Alyce Cameron, at her home in Morrisburg.

Mrs. Strader McIntosh spent last Saturday in Iroquois, the guest of her aunt and uncle, Mr. and Mrs. John W. Marcellus.

Mrs. Mary Saddlemire met with a very painful injury on Saturday at the home of her son, Mr. Merton Saddlemire, when she accidentally fell, through an open trap door, to the cellar floor. In the fall she received many painful bruises to her body, and a cut on her head which required six stitches. She was attended by Dr. Ward Reddick of Morrisburg. On account of her advanced age, together with the shock and injuries, her condition was very critical for a few days, and although she is still suffering greatly, latest reports are that she is improving. Her many friends hope for a complete recovery.

GLEN BECKER

We are sorry to report the serious illness of Mrs. MarySaddlemire and her many friends wish for a speedy recovery.

Mrs. Ella Leizert of Kemptville, returned home on Sunday after spending the past week with Miss Lillian Vanallen.

Misses Eileen and Dorothy O'Shaughnessy, of Morrisburg spent Tuesday with their aunt Mrs. Dalton Saddlemire and Mr. Saddlemire.

Misses Mildred and Audrey Saddlemire spent one day last week with their friend, Miss Jean Beckstead.

Mr. and Mrs. Arthur Baker, of Elma and Miss Milly Barclay spent Sunday with Mr. and Mrs. Melvin Barclay.

Mr. Donald McLean returned on Sunday evening to resume his duties as teacher here after spending a two-week's holiday at his home.

Miss Pauline Saddlemire of Brockville and Miss Ruth Saddlemire of Cornwall spent the New Year's holiday with their parents, Mr. and Mrs. Dalton Saddlemire.

Mr. and Mrs. George Hall spent Monday evening at Mr. Daniel Durant's.

Mr. and Mrs. Stanley Saddlemire Mr. and Mrs. Howard Saddlemire, and daughters spent New Years at Mrs. Elery Casselman's, Iroquois.

Miss Mildred Saddlemire is spending this week with friends in Brockville.

Miss Greta Gallinger of Gallingertown spent the past week with her sister, Mrs. Clarence Loucks and Mr. Loucks.

TOYES HILL

The New Year was saddened by the sad news of the sudden death of Bertram Kirkwood, only son of Mr. and Mrs. Charles Kirkwood. He was in his usual good health till a couple of days before his death. He had attended High School in Winchester and the past year had helped Mr. Harold Millar in the cheese factory. The sympathy of the community goes out to the parents and sister of Bertram. It seemed so sad as he was only 17 years of age. The funeral was conducted by Rev. Mr. Turner at the Presbyterian Church, Winchester. Mrs. Turner presided at the organ. The remains were taken to Maple Ridge Cemetery.

Mrs. Berney Harper is at present a patient at the Civic Hospital in Ottawa. We hope that she soon recovers her usual good health.

Miss Lulu Hunter spent one day recently with her sister, Mrs. Wylie.

Mr. Dalton Coons' children have the measles at the time of writing.

Mr. Roy Casselman, Williamsburg spent Sunday with his father, Mr. Jas. Casselman.

Miss Marion Casselman spent a few days with her cousin, Miss L. Casselman.

Miss Leona Casselman went to Iroquois to resume her studies after spending her holidays with her parents, Mr. and Mrs. Jas. S. Casselman.

Miss Vera Haggerty returned to her school at Grantly, after her holidays with her parents, Mr. and Mrs. Erwin Haggerty.

Mr. Jas. Casselman, Miss Blanche Casselman of Winchester Springs, Miss Audrey Harper of Williamsburg, called on Miss Ruth Harper on Thursday.

Miss Bertha Anderson is spending a few days with Miss Alice Fader of Pittston.

Visitors of Mr. and Mrs. Wm. Millward on Sunday were Mr. and Mrs. Frank Timleck, Roy and Margaret, Mr. and Mrs. Geo. I. Fader and Alice, and Mr. and Mrs. Levi Casselman.

Mrs. Wm. Fader has returned home after spending a few days with Mr. and Mrs. Clifford Gilmer and Mrs. Herbie Wallace.

Messrs. Garnet and Basil Fader are spending a week with their grand-parents, Mr. and Mrs. Webb, of Williamsburg.

Rev. H. Burchel, of Montreal is spending the holidays with his father, Mr. Joe Burchel.

Mrs. O.A. Irvine returned home after spending a few days with her mother, Mrs. John McGregor, of Prescott.

Mr. and Mrs. Elisha McIntyre Sundayed with Mr. and Mrs. Arnold Fader.

PLEASANT VALLEY

Mr. and Mrs. Alex Hannah spent New Year's with Mr. and Mrs. F. Davidson.

Mr. and Mrs. Robt. Wallace spent Wednesday with Mr. and Mrs. Robt. Madden of Hollville.

Mr. ond Mrs. Wm. Fader called on Mr. and Mrs. H. Wallace on Wed.

Mr. and Mrs. W.J. Gilmer, Mrs. Earl Gilmer and Mr and Mrs. Hilliard Gilmer and family spent Wednesday with Mr. and Mrs. William Bolton, of Heckston.

Mr. and Mrs.Will Keck of Cardinal spent Sunday with Roy Keck.

Mr. and Mrs. Wm. Brown of Hyndman spent one day recently with their son Mr. and Mrs. Harvey Brown.

Born—to Mr. and Mrs. Delbert Murdock a daughter.

Mrs. J.A. Gilmer spent a few days with her daughter, Mrs. Orval Selleck of Groveton.

Mr. Roy Lennox of Burwash spent the holidays with his parents, Mr. and Mrs. Joe Lennox.

Mrs. Wm. Fader of Hanesville spent the latter part of this week with her daughter, Mrs. C. Gilmer.

GALLINGERTOWN

Guests at F.C. Gallinger's on New Year's Day were Mr. and Mrs. Geo. Weagant and family of Archer Miss Eileen Wells of Froatburn, Mr. and Mrs. David Alguire and Mary, and Messrs Darwin Weeger and C. Gallinger, of Cornwall.

Mr. A.W. Weagant is seriously ill. We hope for his recovery soon.

Miss Jennie Weagant of Cornwall spent a few days last week at Geo. Weagant's visiting her brother, A.W. Weagant who is ill.

Mr. Clair Gallinger, of Cornwall, spent a couple of days with his porents here. He was accompanied home by his aunt, Miss Jennie Weagant, who spent a couple of days with her friends here and at Archer.

Mr. Clifford Alguire of Harrison, was a recent visitor of David Alguire.

MEDICAL JOURNAL PUBLISHES OFFICIAL ACCOUNT OF DIONNES' LIVES

Montreal, Jan. 7—The story of the scientific care and feeding of the Dionne quintuplets was told by Dr. Allan Dafoe in an article published today in the journal of the Canadian Medical Association.

It reveals the careful study and planning of diets, the handicaps that surrounded their early lives, and their steady progress through a year and a half until they became "a rare collection of smiling, healthy babies."

The Callander physician again told of the infants' premature birth May 28, 1934, in a backwoods farmhouse and of the efforts to keep them alive. Incubators were soon installed, and each infant was kept in its incubator until a weight of six pounds was reached.

One of the early setbacks came in the fall of 1934, when each baby in turn "developed very quickly a severe type of intestinal toxaemia as shown by high temperatures, rapid pulse, abdominal distension and diarrhoea, and they gave me many anxious moments." Improper sterilization of diapers was believed the cause. Small doses of ferous chloride were given three times a day in feedings and preparations were made for carrying out blood transfusions. Each baby's blood was found to be "Jansky No. 1" type, but transfusions were not necessary.

The babies were transferred from their farm home to the new Dafoe Hospital in September, 1934, and immediately began to show a definite improvement.

During the first day of the infants lives, they were fed warm water with an eye-dropper every two hours. On the second and third days they were given 30 to 60 drops of a mixture containing 7 ounces of milk, 13 ounces of water and 1 ounce of corn syrup. A few drops of rum were added to all the feedings for the first week.

On the fourth day the supply of mothers' milk was available from Toronto, and the feedings of this were gradually increased.

A mixture containing cow's milk was later used, but discarded for evaporated milk, which included an addition of lacto-bacillus acidophilus until the babies were a year old. Introduction of tomato juice or orange juice into the diet came when the infants were about six weeks old. At two months, vitamin D was given daily, "first in the form of viosterol and then of cod liver oil".

The first solid food, a pre-cooked base-forming cereal, was used when the quintuplets were five months old. Little more than two months later assorted vegetables, cooked and strained, were added, followed by egg yolk and cooked fruit pulp of apples, apricots and prunes.

Dr. Dafoe related how every care has been taken to prevent exposure of the babies to infection, but in March, 1935, each "developed an upper respiratory tract infection which extended to the ears."

"It was necessary to perform paracentesis on both the ear drums of little Marie," he wrote. "They all recovered somewhat slowly without further complications.

The haemangioma (naevus type of tumor) on Marie's thigh required, during the year, three doses of radium emanations before it was completely obliterated."

In humorous vein, Dr. Dafoe wrote of the many letters containing advice and offers of help he received from all parts of the world. Goats and prize cows were offered, and a veterinary seriously suggested a sow be kept in the hospital and the babies directly suckled.

When intestinal toxaemia made its attack there came an avalanche of letters. "Watermelon juice, infusions of blackberry root, horsetail plant, sassafras and knot weed were said to have produced spectacular results in similar cases," the doctor wrote. "Whiskey was a common ingredient of many suggested remedies, and was to be used both internally and externally."

MISS SARAH MERKLEY

There passed away at the General Hospital, Brockville, Miss Sarah Merkley, in her 75th year. Deceased was born in Matilda, a daughter of the late Uriah Merkley and Elmira Duval. For the past 20 years she had resided with Mr. and Mrs. Harvey Merkley, Sr., in Cardinal.

The funeral service was conducted by Rev. W.W. Jones in Cardinal United Church, on Friday. Interment was made in Dundela cemetery.

She leaves to mourn her passing, two brothers: Henry of Iroquois, and Harvey Sr., of Cardinal; three sisters, Mrs. William Barkley of Dunbar, Mrs. Stirling Strader of Spencerville, and Mrs. Kenneth Beckstead of Cardinal.

MRS. MARGARET MAYETTE

Mrs. Margaret Mayette, 76, widow of John Mayette, died at 2 a.m., December 28, at her home on Oak Street, Waddington, where she had been confined to her bed for three months of illness.

She was born in Morrisburg, Ont., July 1, 1859, a daughter ofJohn and Josephine Annett Hammiral (Hummel). She was one of nine children, of whom only one survives, Mrs. Nancy Crobar of Ogdensburg, who has cared for Mrs. Mayette during her illness.

She had lived in Waddington for nearly sixty years, going there directly after her marriage to Mr. Mayette, who died March 28, 1933.

Funeral services were held Monday at 10 a.m. at St. Mary's Catholic Church, Waddington, Rev. Daniel O'Reilly celebrating the requiem mass.

HAUPTMANN HEARS DATE OF EXECUTION

TRENTON, N.J.— **Mark Kimberling** principal keeper, informed Bruno R. Hauptmann to-day (Tuesday) that unless the court of Pardons intervenes, he must die late next week for the murder of Charles Lindbergh Jr. He told Hauptmann the day and hour, reported to be 8 p.m., on Jan. 17th.

Hauptmann's set expression—deep peering eyes and a faint trace of a smile—did not change, Kimberling said. Neither did his story of how he obtained the ransom money.

To his spiritual adviser, the Rev. John Mathiesen, Hauptmann displayed the same confidence. I won't go out that door" he said nodding in the direcction of the big thick steel door a few paces away which leads to the death chamber.

Smilingly, he turned toward the steel grated front entrance to the death house. "I'll go out that one", he said.

Plans for Hauptmann's execution went forward.

Kimberling sent out invitations to the 18 official witnesses, most of whom will be newspapermen.

Coldly the invitations said:

"You are hereby invited to be present as a witness at the execution by electricity of Bruno Richard Hauptmann, No. 17400."

BERTON L. KIRKWOOD

On New Year's morning, the community of Toyes Hill was again reminded of the presence of the Angel of Death, when a promising young life was cut short, in the person of Berton Kirkwood.

The deceased had been enjoying good health, previous to his return from Winchester Saturday evening, when he was stricken with a severe pain in his head, the cause of which was an abscess on the brain. In spite of all that loving parents, friends and physician could do, on Wednesday morning he passed to the Great Beyond.

He was in his 18th year, was of splendid disposition, kind and tender-hearted, and carried sunshine wherever he went. A dutiful son and affectionate brother, he will be missed in the home, while in social circles his death is deeply regretted, his winning personality having made him a favorite with many.

He leaves to mourn the irreparable loss in the home circle, his parents, Mr. and Mrs. Charles Kirkwood, and one sister Doris.

The funeral, which was largely attended, was held from his late home to the Presbyterian Church, Winchester Springs. His pastor, Rev. W. D. Turner, conducted a very impressive service, assisted by Rev. K. Woodwark of the United Church, and Rev. S. Robinson of the Wesleyan Church. Miss Helen Becker of Williamsburg, very effectively rendered a solo, "Yes, There's One". Mrs. W.D. Turner of Winchester officiated at the organ.

The pall bearers, all close friends and neighbours of the deceased, were Grant Moore, Earle McIlreath, Norman Hunter, George Peterson, Merle Coleman and Harold Miller.

The floral offerings, symbols of love and admiration, were received from: The deceased youth's parents and sister; Merkley and Harold Miller; Grant, Irma and Janet Moore; Mr. and Mrs. Alex Davidson and Keith Kirkwood; Miss Beulah Kirkwood; Mrs. Ida Coons and family; Robert, George and Frank Kirkwood; Hy Shy Ny Club and Sunday School; Loyal Orange Lodge; Mr. and Mrs. Sterling Coons and family; Mr. and Mrs. Alex McIlreath and family; Mr. and Mrs. Joseph Steele; Mr. and Mrs. Willis Strader and family; Raymond Strader and Lorne Henderson.

Interment took place at Maple Ridge cemetery, the grave service being conducted by Rev. W.D. Turner.

The sympathy of the many friends is extended to the bereaved relatives.

MISS ELIZABETH DAVIDSON

Impressive tribute was paid to the memory of Miss Elizabeth Davidson, at the funeral which was held on Tuesday afternoon from her late residence, Winchester Springs, to Winchester Presbyterian Church, the service being conducted by the pastor, Rev. W.D. Turner, assisted by Rev. Woodwark, of the United Church. The choir was present, under the direction of Mrs. Turner.

Following the service, interment took place at Maple Ridge cemetery, pallbearers being Messrs Aden Casselman, R.A. Ball, Heber McIntosh, Wilburn Robinson, George Myers and Lorne McIntosh.

Deceased was born at Winchester Springs 87 years ago, a daughter of the late Mr. and Mrs. Alex Davidson, where she had resided all her life. She was a charter member of the Women's Missionary Society.

The late Miss Davidson passed away on Sunday. She is survived by one brother, William Davidson.

KEMPTVILLE SCHOOL RAZED BY FIRE

Fire on Wednesday destroyed the Kemptville High School, causing loss of about $50,000. James Ault, 58, butcher, a volunteer fireman, collapsed during the fire and died immediately. He was helping to drag a hose at the time.

The fire was noticed about 6.30 Wednesday morning by a man walking along the highway nearby. He ran for help, but by the time the volunteer brigade arrived, the fire had gained great headway.

HONOR NEWLY WEDS

The neighbors of Mr. and Mrs. John Thompson of Dixon Corners, about 80 in number, gathered at their home on Friday evening to welcome the bride to the community and to wish the popular couple a happy and prosperous wedded life. Mrs. Thompson was formerly Miss Donnella Latuurelle, of the staff of Hallville Consolidated school. The wedding took place late in December. Miss Jean Johnston read the following address, and Miss Lillie Cooper and Mr. Stanley Waddell, on behalf of the friends, presented the bride and groom with a mantel clock and pieces of linen. Mr. Thompson thanked the neighbors for their good wishes and useful gifts. Miss Helen Latourelle, ofthe staff of Iroquois High School, and sister of the bride, entertained with several humorous and sentimental readings, and interesting addresses(were delivered. Community singing was enjoyed during the evening. Before returning to their homes, lunch was served.

MORRISBURG-WADDINGTON FERRY LINE.

VOICE of the PRESS

CANADA, THE EMPIRE

THE WORLD AT LARGE

CANADA

THE MEN BEHIND

Mr. Howe, the new Minister in charge of railways, canals and marine, told the Ottawa branch of the Engineering Institute of Canada, when its members were his hosts at dinner, that in his tow departments were 152 professional engineers. The statement gave point to his observation that it was "a strange anomaly" that the Dominion Government, being possessed of so splendid a staff of technical experts in Ottawa, so long should have turned over to small local staffs the problems of Canadian seaports.—Ottawa Journal.

STEVE DIDN'T JUMP

Joe Humphries, famous ringside announcer, writing in a popular weekly publication spoils a great illusion this week. He declares that Steve Brodie, saloon-keeper, never jumped from the Brooklyn Bridge at all, but had a dummy thrown over loaded with iron, and himself and men were in a boat below. Brodie merely got his trousers wet, and faked the story to bring trade to his salon. And it certainly did. Too bad to have the story about Brodie "taking a chance" debunked after all these years. — St. Catharines Standard.

CENSORSHIP

We are willing to admit that books by such writers as James Joyce, D. H. Lawrence, Aldous Huxley should not perhaps be permitted within reach of immature minds, for such minds would only misunderstand them. But it is intolerable that grown men and women should be denied Lawrence, while children are given access to volumes which Lawrence would have refused to have inside his house. — Hamilton Herald.

LEARNING TO FLY

There is a record number of students taking instruction for private and commercial pilot licenses at the Winnipeg Flying Club this Winter. The curriculum includes air regulations, theory of flight, aircraft, engineering, air pilotage and meterology. And arrangements are being made to give courses in blind flying at the beginning of the New Year.

This interest in flying by young Canadians is good news. In a country with such long distances between centres of population, aviation must of necessity play an increasingly important role. And it is correspondingly important that there be an active supply and a reserve supply of fully qualified aviators and air engineers. The Winnipeg Flying Club's activities in this direction deserve commendation. — Winnipeg Free Press.

HIGHWAY FREIGHT TRAINS

The miniature freight trains which now move over the roads of Ontario are undoubtedly a source of considerable danger. It was bad enough meeting or passing large transports which had a tendency to hog the road and to obscure vision, but when trailers began to be attached to these transports, the dangers were doubled, especially at curves and on narrow stretches of highway.

The introduction of such unwieldly vehicles was not forseen when the highways of the province were laid out. Their presence has added materially to the hazards of traffic and in transport concerns wish to continue to operate them, it would seem only right that they should pay more for the privilege.

In view of the steady rise in the number of vehicles engaged in transport service, the time may come when it will be necessary to restrict their use to certain roads in congested districts, leaving other roads available only to light passenger traffic.

There can be little doubt that transports, often with trailers attached, are a source of ever-present danger and that the latter, in particular, are vehicles the extension of which should be discouraged. — Brockville Recorder.

TREES FOR EUROPE

As far back as 1920 the American Tree Association started sending seedling trees to the war-devasted countries of Europe, to be planted in zones where shell-fire had torn up the landscape. Since then some millions of trees have been sent overseas in this way and Canadian trees have likewise been supplied.

Today the results are a magnificent justification of this splendid idea. The trees are said to range from 15 to 20 feet high, are flourishing, splendidly, and have done much to replace forests blasted out of existence along the battle lines in France and Belgium. Other trees are growing in England and Scotland, to replace trees cut down for war materials. — Quebec Chronicle - Telegraph.

A KING WORKS HARD

There is a tendency to look upon positions with the Crown as velvety jobs. It is a mistaken idea. Some of the hardest worked men at Ottawa are the secretaries to the Governor General. That was the case particularly with E. C. Melville and A. F. Lascelles who were secretaries to Lord Willingdon and Lord Bessborough. They had many responsibilities and they handled them well.

It is not surprising therefore to find that Mr. Lascelles has been made assistant private secretary to King George. That will be a heavy task, too. There are people who think that royalty has an easy life; that with all manner of aides and servants and attention they have little else to do but enjoy themselves.

That is another mistake. Their Majesties are under constant strain in receiving deputations, entertaining and going about the country laying corner stones, opening public buildings and doing all the other things that the people expect monarchs to do. We can imagine nothing more tiresome than to be constantly on the go attending public functions, changing from one costume into another, probably being compelled to talk to people who are most uninteresting and going through all the ceremonies until their tiresome end is reached.

Being the occupant of a democratic throne is far from being what is commonly called a soft snap. — Lethbridge Herald.

LINDSAY COW MAKES GOOD

The hardy pioneer stock of Ontario is again suggested in a story from Lindsay, Ont., about a farmer and a cow. The cow disappeared on a farm near Kirkfield. The farmer kept on looking for her, but it was 23 days later that he discovered her wedged between two trees in a piece of "bush" at the rear of his farm. There she had been 23 days, without food, and subject to the exposure of the late November and early December weather. But the story says she is coming along under treatment, a little thin and battered, but still a going concern.

There was nothing weak or pampered about that Kirkfield cow and she should be used for breeding stock. There maybe a great field for the cow business if farmers can get a breed that will be able to go 23 days without eating. About five good meals would carry them through from end of grass season to the new herbage crop next Spring.

Is the Saskatchewan department of agriculture prepared to go into this matter? — Regina Leader-Post.

CONGRATULATIONS FROM CLINTON

For nineteen days, from Nov. 15th to December 7th, The Stratford Beacon-Herald was printed in The Times office, St. Thomas, but Monday the paper was printed at home again, after a strenuous week-end getting ready for it. The Beacon-Herald is to be congratulated on getting the paper out so regularly, without a day's intermission, since the fire which so badly damaged the plant the middle of last month. — Clinton News-Record.

THE EMPIRE

TRANSATLANTIC AIR ROUTES

Probably the first landing-place on the American coasts will be at Harbour Grace in Newfoundland, with a Canadian terminal in Nova Scotia. In this coutry the chances of various sites have been canvassed. Experts of the Air Ministry have recently been examining several places in Ireland. Possibly Cork or Bantry Bay may be selected. There is even some talk of placing the British terminus on the Clyde, though this seems highly improbable, since it would mean that a longer distance would have to be crossed. A terminal English site somewhere on the south coast would be more convenient for Imperial Airways' projected Atlantic service by the Azores, of which the first stage — New York to Bermuda— is also to begun next year. The Azores route offers considerably better weather than that between Ireland and Canada. On the other hand, it is much more roundabout, and one single stage is longer than the entire distance between Ireland and St. John's. — Manchester Guardian.

SPORT AND POLITICS

Sport has always been popularly supposed to be a great leveller. Such apparently is not the view of the General Council of the Trades Union Congress, which has received a severe snub from the Home Secretary for its effort to prevent the international match with Germany recently played in England. The Council protested to the Home Office on the ridiculous ground that as a large number of German supporters were coming over for the match they might regard the event as being of some political importance.

Knitting Trade Reports Gains

Industry Employing More Workers, Official says At Toronto

Toronto.—The woolen and knitting industry has been steadily increasing in Canada during the past five years, and October of this year saw an all-time high record for employment in the industry, with 34,000 employees working in 2p7 mills in 137 municipalities throughout the Dominion. This statement was made by H. W. Lundy of Paris, Ontario, president of the Canadian Woolen and Knit Goods Manufacturers' Association, at the seventeenth annual convention of the organization here recently.

For every 10 persons employed in the industry in 1930, there are 129

With the makeup of the population in Canada, and the geographical position of the country, Mr. Lundy said that Canadians have the desire for durability and quality which is British, the flair for style that is French, the seeking for new methods and equipment which is American, and the adaptability to meet conditions, which is Canadian.

The woolen industry employs 8,000 more workers today than in 1930, said Louis Blake Duff, Welland, and last year in two Ontario towns, Hespeler and Trenton, more than $6,000,000 was paid out to employees in the industry. He, too, stressed the fact that the woolen industry in Canada is contributing greatly toward the business recovery of the small towns of the country.

LORD TWEEDSMUIR STUDIES SKIING

New Governor-General Fast Winning Hearts of Canadians

Ottawa.—Lord Tweedsmuir, Canada's Governor-General, has not waited long to initiate himself into the spirit of this country's invigorating winter. His Excellency is learning to ski and is rapidly becoming an adept.

In his public addresses Lord Tweedsmuir has more than fulfilled demands. He has attended numerous functions and has spoken at all of them. His deliveries reveal the craftsman in the English language, the master of "the polished diction and the rounded phrase."

Even when he has prepared no set address His Excellency speaks faultlessly and fluently.

Not unnaturally, his literary works are enjoying a great vogue in Canada. As a historian His Excellency wrote a monumental history of the Great War, and also one of his own regiment, The Royal Scottish Fusiliers. His philosophical studies, as exemplified in "Men and Deeds," are scarcely so well known as his novels wherein his heroes, young men of upright character, get into all manner of scrapes and, His Excellency being a good story-teller, emerges from them triumphantly.

It has been indicated that "John Buchan" will write a story of Canada, accumulating material during his five years in the Dominion.

Number Crossing Border Increases In November

Fort Erie — Figures released here recently showed that 60,291 more persons crossed the border by the Peace Bridge during November than in the same month a year ago. In November, 1934, the number was 179,157; in November, 1935, the total was 247,449. Movement of motor cars across the border increased from 67,042 to 84,731, in November this year as compared with the same month in 1934.

Stay Married

CHICAGO — With 3,000 reconciliations of parted couples to his credit, Superior Court Judge Joseph Sabath celebrated his 25th anniversary on the Bench last week by disclosed his formula for happy marriage:

"The only way to stay married—is to stay married."

The 46,000 marital rifts he has handled during a quarter of a century has convinced him, he said, that divorces are always caused by "a little foolishness."

Whether it concerns finances, or a third person, or something else, the stumbling block usually is a triviality," the veteran jurist asserted.

The judge himself has been happily married since 1887. He has three children, and seven grandchildren, most of whom dropped into his courtroom to congratulate him.

"Life is no 'brief candle' for me.. It is a sort of splendid torch. which I have got hold of for the moment, and I want to make it burn as brightly as possible before handing it on to future generations." — George Bernard Shaw.

WANT DUST-FREE HIGHWAYS IN '36

Co-operation To Increase Tourist Traffic Asked For —Committee Report

OTTAWA—Development of Canada's tourist trade which brings millions of dollars into the country every year will be achieved by co-operative methods between the Dominion and provinces, it was decided recently by a committee of the Dominion-provincial conference.

DUST NUISANCE

EXPRESSING the conviction the dust nuisance on many highways jeopardized the tourist industry, the report urged a comprehensive plan to "achieve a condition of dust free highways."

The committee recommended a national committee to work in conjunction with tourist bureaus; development of national parks and their establishment in provinces now with out them.

The committee reported as follows

1. Whereas the scenic and recreational attractions of Canada from the basis upon which the ever-increasing tourist traffic depends and

Whereas the preservation and development of such historic, scenic and recreational attractions are vital to the promotional efforts now being made by the different tourist agencies in Canada, both public and private.

DEFINITE PLAN

Therefore be it resolved that the Dominion, the provinces and the local municipalities or districts should decide upon a definite plan designed: (a) To carry out a stock-taking of all Canada's tourist attractions, potential and actual; (b) Evolve a co-operative policy to ensure the preservation of all such resources; (c) To stimulate public interest in the idea of leaving nothing undone in the matter of making as well as keeping Canada beautiful.

2. Whereas the tourist industry is of vital interest to Canada.

Therefore, be it resolved that the promotional work already done by the various official tourist bureaus be acknowledged and that these services be continued and augmented, where possible.

PERMANENT COMMITTEE

And be it further resolved that a permanent committee be set up representing the various official tourist bureaus to maintain contact and to meet at least once a year for the purpose of co-operation and co-ordination of services.

3. Whereas federal authority has established national parks in several of the provinces, and

Whereas said parks provide recreational centres within the provinces and afford attractions to tourists which are of substantial economic importance, and

Whereas certain provinces have no national parks and, in consideration of the importance of such national parks as a factor in expanding tourist traffic, are consequently deprived of advantages enjoyed by other provinces,

NATIONAL PARKS

Therefore, be it resolved that such provinces as are not now provided opportunity to have such parks established within their borders to enable them to participate in all the advantages accruing from such development.

4. Whereas the future of our tourist industry may be jeopardized by the dust nuisance on many highways

Therefore, be it resolved that it is vital to the best interests of all the provinces that a comprehensive plan be devised and put into execution to achieve a condition of dust-free highways.

Canadian Flax Seed For Northern Ireland

For the first five years the Fibre Division has been rendering an extremely important marketing service. Canadian flax growers have found a ready and remunerative market in the North of Ireland for special pedigree fibre flax-seed. Original test propagations of Irish seed were made in Canada in the years 1928, 1929 and 1930 under the auspices of the Ministry of Agriculture of Northern Ireland and in co-operation of the Fibre Division, and each year since has seen an increased demand n Ireland for Canadian grown seed. The excellent results that have been obtained are indicative of an encouraging future for Canadian fibre flax-seed growers. Continued assistance in this important marketing program is assured by the Division.

U. S. Farm Incomes Jump 844 Millions

Washington — An $844,000,000 increase in the gross income from 1935 farm products as compared with 1934 was estimated recently by the United States agriculture department. The monthly crop report set the value of farm products at $8,110,000,000, while the 1934 value was $7,266,000,000.

"How we waste the precious time, the irretrievable moments, of one short life!" — Andre Maurois.

NEW METHOD OF ASSAYING

Enables Determination In 20 20 Minutes of Gold Values —Micro Spot Test

HAMILTON. — A new method of assaying ore, known as the "micro-spot" test and discovered by the science department of McMaster University, was announced in a recent issue of the McMaster Silhouette.

Professor W. O. Walker of the chemistry department and Miss Doris Hiscox, B.A., discovered and developed the method.

The discovery is said to be of great assistance to prospectors and will enable them to determine in 20 minutes the gold values of ores to an accuracy of one part of 500,000.

"Until now the problem of assaying has been the check-rein of gold mining, hindering the prospector in his coverage of the field," said Prof. Walker. "Prospectors hitherto have been forced to load themselves with the different samples of ore and bring them long distances to the assay offices, which in many cases requires weeks."

The test will provide a preliminary indication as to whether ore contains gold. It will in no way compete with present assaying offices.

Prof. Walker said he hoped the test may be developed to a point where it will tell definitely whether gold is present in ore to a sufficient degree to warrant mining; whether it is present in amounts worth from $5 to $10 a ton.

The tests will be carried out with a small, compact kit costing about $20 and no more bulky than a shoe box. Its contents will be a few liquids in specially constructed bottles, a few candles and reagents for dissolving the gold out of the ore. It is claimed no scientific knowledge is necessary for applying the tests.

Through the "micro-spot" test it is believed persons without experience can compete with veteran prospectors, and in this way the mining fields of northern Canada will be more quickly developed.

Ore Samples Supplied

The Ontario department of mines arranged to have ore samples supplied Prof. W. O. Walker, discoverer of a new assay method, T. F. Sutherland, deputy minister, said.

Samples were sent from the mines to McMaster University in Hamilton, where Prof. Walker and Miss Doris Hiscox, B.A., carried out tests in development of the new method.

Mr. Sutherland said the department had no comment to make on the discovery.

Air Transport To The Rescue

How a young bride outwitted the elements threatening to delay her marriage in Honolulu by resourcefulness plus the aid of modern air transport, was the romantic story related in Victoria, B. C., by Miss Jennifer Greenwood of Elstree, England.

The bride, Miss Gwynydd Watson of Devizes, Exeter, was married to Geoffrey Dawson of Honolulu immediately following the arrival of the Empress of Japan at the Hawaiian port on December 5.

But for the resourcefulness and assistance of Miss Greenwood, however, it is feared Cupid would have suffered a temporary defeat.

The storm experienced by the Aquitania on the Atlantic was responsible for the predicament the bride found herself in on arrival at New York.

Lashed by successive gales on the voyage from Southampton the Aquitania reached New York late. Miss Watson's train itinerary was arranged to permit her to catch the Empress of Japan at Victoria and the bride was frantic when she discovered she had missed her connections.

Miss Greenwood came to the rescue and suggested to the bride that it might be possible to keep her wedding date if she hopped aboard a plane to overtake the "Empire Builder" steaming westward.

Miss Watson acted with decision, seized a grip, flung her wedding gown and intimate accessories into it, and climbed aboard a plane for Chicago.

She was unable to make the connection at Chicago, so continued by another air liner to St. Paul, where she caught up with her train and entered Canada at Moose Jaw, continuing to the Coast and embarking on the Empress of Japan, which sailed from Victoria November 30 for Hawaii and the Orient.

With the bride's baggage, consisting of a large number of trunks, Miss Greenwood reached Victoria December 4 and sailed by the motor liner Aorangi for Honolulu. She will be too late for the wedding, at which she expected to be a guest, but she was able to aid her friend in her dilemma.

Miss Greenwood is going to visit her uncle, Mr. W. P. W. Turner, British Consul at Honolulu.

Rays Stronger

Magnetic Field Of Earth Extends More Than 100 Miles

Paradena, Calif.—Robert A. Millikan, California's specialist on cosmic rays, dispels another fallacy of terrestrial magnetism. The earth's magnetic field was formerly thought to be effective at no greater heights than 100 miles and essentially uniform in strength throughout.

In the course of his cosmic ray research, however, Dr. Millikan finds that the earth's field extends at least 10,000 miles into space with an intensity stronger on the side of the globe exactly opposite to North America.

His results were all obtained on the surface of the earth and showed a greater cosmic ray intensity from the north pole to the equator in the region of India than in comfortable latitudes in America. He extended these results out into space using the simple laws of magnetism which govern such things as motors and electromagnets.

Coast Boasts Rare Old Pippin

Vancouver.—Seeded 110 years ago, the oldest apple tree in the Pacific Northwest at Vancouver, on the lower Columbia, still flourishes. There was romance in its planting, and the history of it was written many years ago by Dr. J. R. Cardwell, a veteran horticulturist of Oregon and long president of the state horticultural society.

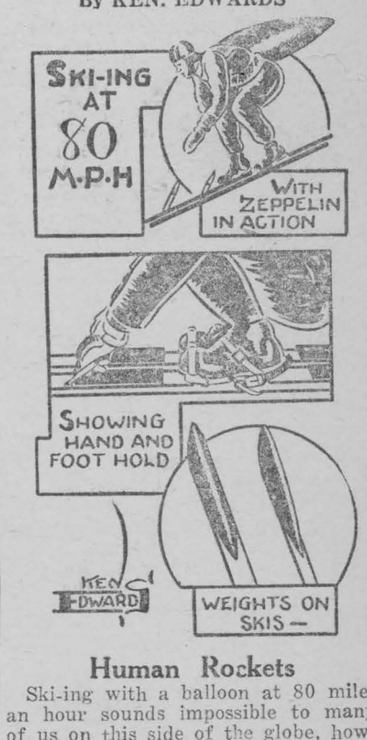
"The introduction of the first cultivated fruits in the country in 1824, by employees of the Hudson's Bay Company, is a pretty story with a touch of romance. At a dinner given in London in 1824 to several young men in the employ of the Hudson's Bay Company, bound for the far distant Pacific Coast, a young gentleman ate an apple, carefully wrapped the seeds in a paper and placed them in the vest pocket of the young gentleman, with the request that, when he arrived in the Oregon country, he should plant them and grow apple trees.

"The act was noted, and in a spirit of merriment other ladies present from the fruits of the table, put seeds of apples, pears, peaches and grapes into the pockets of all the young gentlemen. On their arrival at the Hudson's Bay Company fort at Vancouver the young gentlemen gave the seeds to the company's gardener, James Bruce, who planted them in the spring of 1825. From these seeds came the trees now growing on the grounds of the Vancouver barracks, as transferred to the government on the disbanding of the H. B. Company. One of these trees has recently been identified, marked and protected.

"Seeds from trees in the Hudson's Bay orchard were brought to the interior by employees of the company."

SPORT HOT SHOTS

By KEN. EDWARDS



Human Rockets

Ski-ing with a balloon at 80 miles an hour sounds impossible to many of us on this side of the globe, however in some countries this sport has been accepted with great enthusiasm

Zepplin ski-ing is a combination of two of the riskiest sports ever devised by man. In England a ban was put on gas bag jumping due to the appalling death rate that resulted. The modus operandi was for the participant to harness himself to a balloon but counter-balance his weight, then to step over hedges, barns or other structures by gently springing into the ozone.

Applying the same principle to ski-jumping you have the whole story in above illustration. Leo Gasperl, the Austrian, amazed and astounded spectators by attaining a speed of 84 miles an hour with streamlined gas bag and weighted skis of this desgin. Figure I in illustration shows position and action, figure II shows foot and hand holds., figure III shows weighted skis. Each one has 65 pounds evenly distributed over its length.

HAVE YOU HEARD

HONEST GOLF

"Sixes are made by dubs like me,
But only God can make a three."
—With profound apologies to Joyce Kilmer.

Harper — How do you play truant from a correspondence school?

Carter — Send them an empty envelope.

Teacher — Junior, name a bird that is now extinct.

Junior — Our canary. The cat extincted him this morning.

We reprint the following request. We haven't the slightest idea who the author is:

"Failures come to all persons who strive to do something. They are the mark of the man who tries. Few persons without scars have ever been in battle. Our greatest glory lies not in never failing, but in rising every time we fall."

Freshman — How about a date sometime?

Senior Co-ed — I can't go out with a baby.

Freshman — Pardon me — I didn't know.

You're not getting old until you hate to wear a new suit.

Visitor — How's the new swimming pool?

Superintendent of Insane Asylum—Fine! Its become so popular with the patients, especially those that can dive, that I am thinking of having it filled with water.

One philosopher advises us that small wives are easier to control." A stick of dynamite isn't very big either.

Tourist — Is this a high-class town?

Brushville Citizen — Yeah, they even have two bread lines — one for white and one for rye.

Sometimes we smile at the past,
yet tomorrow
We too shall seem quaint and old-fashioned.

Friend — Sorry, old chap, but I'm looking for a little financial succor again.

Man — You'll have to hunt further. I'm not the little financial sucker I used to be.

It's nothing to a man's credit if no one will trust him.

Prospective Boarder — Do you have much variety at your boarding house?

Regular Boarder — Well, we have three different names for the meals.

The easiest thing in the world for a man to do is to think of the right excuse at the wrong time.

Eloping Bride — Here's a telegram from father.

Eloping Groom — What does it say.

Eloping Bride — Don't come home, and all will be forgiven.

It is a fine thing to be a gentleman, but it is an awful handicap in an argument.

ASPIRATIONS

I would be true, for there are those
who trust me;
I would be pure, for there are those
who care;
I would be strong, for there is much
to suffer;
I would be brave; for there is much
to dare.

Big worries level off when you get to them, like the steep hills a motorist sees in the distance.

The Nurse — What do you think of the new baby sister the doctor left for you?

Little Girl — I don't blame the doctor for wanting to get rid of it. But why did he pick on us?

Pipe Smoker Not Traffic Menace

Stratford's Smoking-Drivers Scoff at Nebraska Man's Claims

Stratford's motorists who mix tobacco and driving are of the opinion —generally speaking — that the man who said a pipe smoker is a menace to traffic "is a crank or probably a non-smoker who doesn't know what he's talking about."

Stratford motorists were questioned concerning the dangers which lurk in the motorists' pipe bowls. The questions were suggested by a statement made by Ralph Duff of Nebraska City, manufacturer and authority on engines.

Mr. Duff's arguments were: A smoking pipe in front of a driver's face was as dangerous as a big smoke stack. He claimed ashes and smoke would interefere with the driver's vision to a great extent and probably be the cause of a smash. He also said that the pipe prevented a clear view of the rear vision mirror.

So much for Mr. Duff. Here is what Stratford pipe smoking drivers say:

"In the first place a pipe is no more dangerous than a cigar or cigaret; in fact when I drive, my pipe is generally out while I hold it in my mouth. You can't say that of a cigar or cigaret," was the way one man summed it up.

"The man's crazy," was the disgusted answer given by another driver." Generally the pipe is more safe than anything else that smokes. As for the rear vision mirror — I've never yet seen a man smoke with his pipe sticking directly up in front of his eyes. The usual position is either at an acute angle from either corner of the mouth or down almost resting on the owner's tie (if his wife isn't near)."

"The pipe gives less trouble than the cigaret or cigar," was the opinion of still another driver. "When a man's pipe goes out he generally just keeps on sucking at it but when a cigar or cigaret goes out the first thing he does is reach for a light. That's when the trouble starts."

Canada's Growing Buffalo Herds

An Edmonton despatch says: "The great herds of buffalo in Buffalo and Elk Island National Parks, both in Alberta, continue to thrive. According to their annual census the herd in the former reserve numbers 4,763 and in the latter 2.126, these figures being exclusive of the 1935 calf crop of about 1,200.

"These buffalo are wards of the Dominion Government. So that the ranges may not be over-grazed, and to preserve the herds in a healthy condition, about 1,500 anmials will be slaughtered this Winter, their flesh and hides sold. A few years ago, when the Government bought a small herd in Montana, U.S.A., it was feared the buffalo faced extinction."

J. B. Harkin, Commissioner of National Parks, gives The Journal two reasons why the excess buffalo are not turned loose in the North West Territories, instead of being slaughtered. First, he points out, moving buffalo North for 800 miles is an expensive operation; secondly the Department is anxious to get revenue from the surplus of the herd.

R. A. Gibson, Assistant Deputy Minister of the Department of the Interior states there are already from 8000 to 12,000 head of buffalo in the Wood Buffalo Park which is at the boundary between North West Territories and Alberta. This number is considered ample, and is made up of excess buffalo shipped from Wainwright over an extended period.

Mr. Gibson incidentally remarked that only 500 buffalo would be slaughtered this year instead of the original estimated 1,500. The reason for this is that the abattoir at Wainwright has been destroyed by fire. There are large herds at Wainwright and Elk Island and small herds at Banff and other points. The area of Wood Buffalo Park is 17,300 miles and this is where Canada's buffalo wander in a natural state.

One Detail Overlooked

Commenting the St. Louis Post-Dispatch — We fear the new Supreme Court building in Washington falls just a little short of perfection. Its architecture, of course, is superably and chastely Greek. Its appointments are designed to surround the deliberations of the justices with all possible beauty and comfort. But we have in mind that sign placed at each corner of the city block on which the building stands, reading, "No roller skating allowed" Roller skating is pretty bad, but there are many other noises that the court should have been guarded against. No provision is made, for example, for preventing some caitiff from passing the building at a crucial moment and emitted a loud sneeze.

SCOUTING

Here · There
Everywhere

A brother to every other Scout, without regard to race or creed

Declared Kitchener's Chief of Police in an address before the local Rotary Club: "The Programme of the Boy Scouts is a wonderful training for boys. They are taught obedience, truthfulness, to do a good turn at any time, not counting the effort it takes; construction instead of destruction. Very seldom do we hear of a youth who has had Scout training getting into trouble."

Calgary Scouts are again going in for boxing. A series of classes will be conducted at St. Stephen's Hall under the direction of a physical instructor and an amateur boxer, and a large enrolment is anticipated.

* * * *

Something new in entertainments was the "Snapshot Tea" given by the Scouts of Timmins, Ont. Each table was covered with "snaps" of local Scouts, camping, cooking and "just looking." Smartly uniformed boys waited on tables.

* * * *

The 17th Winnipeg (St Matthew's) Scout Group celebrated its 21st birthday with a banquet which was attended by 265 parents and friends and 75 former Scouts of the troop. Rabbi Solomon Frank, President of the Centre-East District Scout Association, was guest speaker.

* * * *

At the annual meeting of the Ridgetown, Ontario, Scouts held in Municipal Hall, Mayor Fred Kennedy was elected President of the Local Association to succeed ex-Mayor and Commissioner Andrew T. Ward, recently moved to Chatham.

Japan's Flour Export Gains

Competes With Canada And U.S. For Market In Far East

TOKIO—Japan's export of flour during the first 10 months of this year is reported at 11,083,000 sacks, an increase of 1,958,000 sacks over January-October, 1934.

Most of the export went to Manchukuo and Kwantung leased territory, 10.042,000 sacks, compared with 8,-814,000 sacks in the same period of the previous year. However, there was a marked gain in exports to the Philippines, 362,000 sacks compared with 135,000 sacks in the previous corresponding period.

Japanese flour is reported competing briskly in the islands with Canadian and American flour. Exports to China, Straits Settlements, and the Dutch West Indies, were respectively, 77,000 sacks, 15,000 sacks and 18,000 sacks. The first two represented increases of more than 100 per cent. but the latter was a drop of 26,000 sacks in January-October period 1934.

New Corn Can Resists Borer

Attempts Made To Cross Variety With Good Canadian

GUELPH—Possibility that a new type of golden bantam corn just reported produced at the Lansing, Mich., experimental station, and said to be resistant to the corn borer, will be a great boon to corn growers, is seen by Prof. L. Caesar, of the Ontario Agricultural College, provincial entomologist and director of the corn borer campaign in Canada.

Prof. Caesar, commenting on the new corn development, pointed out that the variety Maize Amango, which is the basis from which the new corn has been bred, is resistant to the borer, and in bad years has been left untouched by the pest.

Experiments have been tried in Canada, crossing it with native varieties, but the trouble has been to get a cross that is not only resistant, but is also a good quality for dolestic and feed purposes.

Feeding for Winter Milk Production

By LEONARD GRIESBACH
Dominion Experimental Station,
Fredericton, N.B.

The winter feeding of dairy cattle presents the problem of supplying an abundance of feed to maintain reasonable production at a profit. In order to feed cattle economically, the bulk of the feed should be produced on the farm and the quality of the feed is an important consideration.

At the Dominion Experimental Station, Fredericton, N.B., the object is to provide the highest quality roughage and thereby make possible a reduction in the protein content of the meal mixture. All hay intended for cattle feeding purposes is cut early in the season when the protein content is high. Provision is also made for an abundant supply of turnips or mangels for winter feeding and coarse grains, such as oats, are grown to form the bulk of the meal mixture. An effort is made to prevent the cows from falling off in production too rapidly at any time, as it is often difficult and expensive to bring up production after it has been reduced.

Roughages for dairy cattle should consist largely of good quality legumes or mixed hay and roots or silage. When these feeds are cheap and plentiful, the cattle are usually fed as much as they will clean up and from 30 to 50 pounds of roots per day, the amount of roots depending on the size of the animal and the supply available. When potatoes are fed to replace turnips or mangels, the amount should not exceed 20 pounds per cow per day.

The meal mixture being fed at the Fredericton Experimental Station at the present time consists of 200 pounds crushed oats, 150 pounds bran, 100 pounds oil meal, 100 pounds gluten feed, 5½ pounds salt and 11 pounds bone char. The amount of oil meal and gluten feed may be increased according to the quality of the roughage on hand. This meal mixture is fed at the rate of 1 pound to each 3 or 4 pounds of milk produced, the amount depending on the fat content of the milk.

Alcock and Brown Are Proven Right

L'Evenement, Quebec. — At the end of 1936 or at the beginning of 1937 a trans-Atlantic postal air service will be established between Great Britain and Canada. It is not a question of a fantastic prediction but of a well matured project. . . If the operation of the new route is retarded, the United States will itself create it, and that would be not merely a victory for them but they would reap a rich profit from it. Already mistress of the seas, proud Albion does not want any other nation to bear away the palm from her in the air. . . Canadian experts have discussed the matter at Ottawa and prepared a report which will be submitted to the British conference. After having considered several projects for air routes, these experts have come to the conclusion that the ideal one was to have the planes pass by the following points: Cape Breton, Havre de Grace and the Irish coast. That is to say, eighteen years after the first trans-Atlantic flight made successfully by Alcock and Brown in 1919, the path traced by the two pioneers is judged the most practical. Many experiments have been tried since then; many lives sacrificed. . . but Alcock and Brown were right.

TRANS-OCEANIC AIR TRANSPORT

Observes the Toronto Mail and Empire: The speed with which aviation has developed is one of the marvels of the age. Solo and other flights have been featured in the conquest of the Atlantic and of the Pacific Ocean. Regular air services carrying passengers have been established in various parts of the world. Great Britain has been one of the chief promoters of travel by air. The British Post Office hopes for the carriage of first-class mails between Britain and all parts of the Empire in the near future at ordinary postal rates. At present British internal air lines carry mails wherever practicable, without extra charge for air mail. According to a Washington announcement the "confident hope" of the British, United States, Canadian and Irish Free State Governments following a week of conference is that a regular transatlantic air service will be operative in 1937. The statement issued further says that four round trips a week by giant passenger mail planes will constitute the initial service. Regular services are projected via the northern route, by way of Canada, Newfoundland and the Irish Free State to England, and via the southern route, by way of Bermuda to England. In addition, a route from Bermuda to Puerto Rico, "to be extended by mutual consent" is sanctioned.

The British Post Office and Air Ministry have announced an agreement for a 7,000-mile air mail and passenger service from Britain to Durban, South Africa, to begin two years hence, or in 1937. The Post Office has plans for the carriage of all first-class mail by air without surcharge across the Atlantc.

The inauguration of a trans-pacific service by Pan-American Airways has led Imperial airways to launch experimental transatlantic flights. These will be undertaken in the near future. To this end Imperial Airways is constructing for operation within a few months the first of a number of flying boats.

Cherry Trees Line Avenue

VICTORIA—An avenue of gorgeous Japanese cherry blossoms, more than a mile in length, will line the way to the famous Butchart's sunken gardens, at Brentwood, under tentative plans of the British Columbia Government.

The cherry trees, 600 in number, will line both sides of the highway leading off the West Saanich road, to the garden for a distance of 7,000 feet from the entrance.

M. W. WILSON, President and Managing Director.
S. G. DOBSON, General Manager.

AUDITORS' REPORT

TO THE SHAREHOLDERS, THE ROYAL BANK OF CANADA:

We have examined the above Statement of Liabilities and Assets as at 30th November, 1935, with the books and accounts of The Royal Bank of Canada at Head Office and with the certified returns from the branches. We have checked the cash and the securities representing the Bank's investments held at the Head Office at the close of the fiscal year, and at various dates during the year have also checked the cash and investment securities at several of the important branches.

We have obtained all the information and explanations that we have required, and in our opinion the transactions of the Bank, which have come under our notice, have been within the powers of the Bank. The above statement is in our opinion properly drawn up so as to disclose the true condition of the Bank as at 30th November, 1935, and it is as shown by the books of the Bank.

M. W. WILSON, President and Managing Director.
S. G. DOBSON, General Manager.
Montreal, December 24, 1935.

LOCAL AND GENERAL

Mr. Eric Roy, who has spent several weeks in Montreal, has returned to town.

* * *

Mrs. Maud Crateau of Prescott, spent the week-end with Mr. and Mrs. L. Laurin.

* * *

Born—At Belfast, Ireland, on Sunday Jan. 5th, 1936, to Mr. and Mrs. Jack Fitzmaurice (nee Madeline Lavis) a son. Both well.

* * *

Mrs. Arthur Clay returned to Toronto on Saturday, having spent the holiday season in town with her mother, Mrs. R.J. Dillen.

* * *

The Annual Meeting of the Morrisburg Horticultural Society will be held in the Agricultural Office on Tuesday, January 14th, at 8 o'clock.

* * *

St. James Women's Guild will hold a food sale and afternoon tea in the Agricultural Office, Saturday January 18th. ac

* * *

DRESSES! A sale that will startle women who know dress values. Dresses valued from $6.95 for $2.95; 8.95 for 3.95; 10.95 for 4.95. Beautiful all woollen dresses greatly reduced. Starting Saturday January 11st, 1936, at A.B. McGANNON'S.

* * *

Another victory for Morrisburg Ferry Sailors in their unbeaten string to date featured Saturday night's Ottawa City Basketball game. The Sailors turned back Young Men's Hebrew Association by a decisive 35-12 margin.

* * *

A reception in honour of Mr. and Mrs. Fred Holmes, who were recently married, was held at their home, in Summers Settlement, on Tuesday. About 75 neighbours and frilends gathered and presented them with a beautiful floor lamp. The presentation was made by Mr. Wm. Hutt, while an appropriate address was read by M. Ellsworth Summers.

* * *

A bullet glazed the eye of a Melvins girl as she stepped from a door of the barn at her home, causing a nasty injury. Miss Leila Flegg, daughter of Mr. and Mrs. Chas. Flegg, had just stepped from the barn when the bullet, from a rifle in unknown hands, grazed her eyebrow. A blood vessel was ruptured in her eye. She is recovering nicely.

* * *

William Lewis of Matilda township, charged with being in possession of stolen goods, appeared before Magistrate John McCormick in Morrisburg last week, and was committed to stand trial before a judge in Cornwall. He will be held in the meantime at Cornwall.

* * *

On Tuesday evening, Earle Swerdfeger took very ill, and was taken to St. Vincent de Paul Hospital, at Brockville, where he underwent a very severe operation. His many friends and relatives wish him a speedy recovery.

* * *

Among those who have passed examinations qualifying them as registered nurses in Ontario, are Miss Addie Elizabeth Bouck, Iroquois; Miss Helena Korleen Murdock, Prescott; Veilda May Watkins, Iroquois.

* * *

Tuesday Jan. 14th—Big sale of Fur Coats. No fur coats to be put in storage this year. Every one must be sold. Reduced from 35 p.c. to 50 p.c. Come and inspect our wonderful stock.—A.B. McGANNON.

* * *

Mrs. Geo. Martin and her 12-year-old son, of Seeley's Bay, returning from Morrisburg last Thursday, after visiting her daughter, Mrs. Ernest VanAllen, met with a serious accident when her car skidded on King Street, in Iroquois, crashed into a tree, and landed on the pavement. Mrs. Martin sustained two broken ribs and a badly fractured pelvis. The boy escaped inury, except shock. The icy condition of the highway was the cause of the accident.

* * *

Valentine Shortis, who has been an inmate at the Ontario Reformatory, Guelph, since it reopened at the end of the Great War, was this week transferred to the Penetang Hospital for the criminally insane. Shortis was convicted on a charge of double murder at Valleyfield, on March 1, 1895. He was sentenced to Portsmouth Penitentiary, where he remained for many years. He was then sent to Burwash and later to Guelph. At the time of his conviction, the Governor-General of Canada refused to sign the death warrant for the execution of the convicted man, demanding consideration of the case. Finally, after much legal action, a reprieve was granted.

* * *

Mr. R.B. Buchan, who for the past eight years has been manager of the Bank of Nova Scotia at Carp, Ont., has been promoted to the position of manager of the Bank at Maxville, and left with his family at the week-end for that place. Mr Buchan took a very keen interest in sports, and was president of Carp Athletic Association. He was on the official board of St. Paul's United Church there, while Mrs. Buchan took an active part in the affairs of the church societies. She was also an officer of Huntley Women's Institute. Both Mr. and Mrs. Buchan will be greatly missed in the life of the community which they are leaving.

Mr. and Mrs. Harry F. Hines, (newlyweds) of Worcester, Mass. who have been spending their honeymoon with Mr. and Mrs. Jefferson Swerdfeger returned home on Friday.

* * *

COATS! Fur-trimmed coats as low as $8.95. Every one must be sold. Buy your coat—wear it now.—A.B. McGANNON.

TOWN LEAGUE HOCKEY

Last Friday saw the opening games of the Town League schedule played in the Morrisburg Arena before a good crowd of spectators. After two hours of playing, the four teams wound up all even, both games resulting in tie scores. In the first game, the Maroons and M.C.I. finished 1-1. In the other, the Maple Leafs tied the Black Hawks 2-2. No overtime was played in either case.

Scorers in the M.C.I.--Maroon tile were: Maroons, C. Reid (R. Smith); M.C.I., H. Coons (Martin).

The Maroons led the penalty parade, Donald Beckstead running foul of the referees no less than four times. Cliff Reid, Jitters Smith and Joe Agulnik also spent time in the cooler for the Maroons. Gib. Coons and Buck McIntosh were the school badmen, with two penalties each.

* * *

In the second game, the marksmen were: Leafs, Dillabough (Gamble), P. Smith; Hawks, B. Millward (Locke), Locke.

Penalties were against the Black Hawks who collected seven, against two for the Leafs. Art Coligan and Snyder got three each, and Charlie Weegar one; Ross McIntyre and Dillabough took penalties for the Mapleos.

* * *

The second doubleheader was played Tuesday night, the M.C.I. team shellacking the Black Hawks 4-1, while the Maroons and Leafs played a two-all tie.

Alf Gamble and Howie Eamon tallied for the Leafs, and Jitters Smith and Tuttle for the Maroons.

In the second game, Weir and Casselman each got two, Snyder being the only successful Hawk marksman.

* * *

The High School is now leading the League with 3 points. Maroons and Maple Leafs are second with 2 each, and the Black Hawks are trailing with only a single point.

* * *

A schedule cannot be drawn up as yet, due to the uncertainty as to the availability of the arena. Watch for bills announcing next week's games.

WOMEN'S INSTITUTE MEETING

The Women's Institute held their January meeting in the Agricultural Office on Monday evening, January 6th, and enjoyed a splendid address on "Newfoundland," given by Mr. George Powers. The speaker pointed out on a map, the shape, size and settlements on the island, tracing the history from the first settlers, and showing the advancements made in its mines, pulp and paper industries, education, fisheries, Government and conditions in general on the island. Mrs. Sam Casselman gave a report on the relief supplied to the needy, especially the children, in the form of warm clothing, including 12 suits of underwear, 1½ dozen pairs of mittens, 3 prs. overshoes, 3 prs. trousers, 1 sweater, 1 pair gum rubbers and 2 prs. stockings. Seventeen Christmas baskets were sent out, and were well filled through the generosity of the merchants and citizens, to whom the Institute are very grateful. The Institute also packed 400 boxes with candy and nuts for the Community Christmas tree.

In the absence of the President, Mrs. McLean, the Vice-President, Mrs. J.C. Casselman, occupied the chair. The members responded to roll call with a New Year's Resolution, and the Meeting closed with the National Anthem.

HONORED ON DEPARTURE

A happy time was spent at the home of Mrs. Geo. W. Strader, Williamsburg, on Thursday evening of last week, by about twenty young friends and school mates, who gathered to honor Miss Phyllis Graybiel and Jack Graybiel, prior to their leaving for their new home in Toronto. Their friends felt they could not let them leave the community without making some expression of regard. Following a program of games, contests and music, which was enjoyed by all, an address was read by Miss Ruth Locke to the guests of honor, expressing regret at their departure, and wishing them many friends in their new home. The presentation of a toilet set to Miss Phyllis Graybiel was made by Miss Marion Adey, while Douglas Barclay made the presentation of a pen and pencil set to Jack Graybiel, on behalf of all present.

Miss Graybiel and Jack both expressed thanks and appreciation for the gifts and address.

Delicious refreshments which all enjoyed were served by Mrs. Strader at the close of the evening's enjoyment.

MINUTES OF COUNCIL

The first meeting of the Council for the year 1936 was held in the Town Hall on Monday, Jan. 6th, at 11 a.m.

The returns laid on the table having shown the following named gentlemen elected for the year, and they all being present except Mr. Flynn, took their seats, after having made the necessary declaration of office:

Reeve—A. Flynn.

Councillors—Fred H. Broder, A.M. Jarvis, William R. Roach, John Harback.

Moved by Mr. Broder, seconded by Mr. Jarvis, that Mr. Roach act as Chairman.

Moved by Mr. Broder, seconded by Mr. Harback, that F.R. Chalmers be Clerk, at a salary of $300.

Moved by Mr. Jarvis, seconded by Mr. Harback, that this Council adourn to meet in the town hall tonight at 8 p.m.

Adjourned meeting of Council held in the town hall, Monday Jan. 6th at 8 p.m.

Members all present, Mr. Flynn having subscribed to the necessary declaration of office.

Moved by Mr. Broder, seconded by Mr. Harback, that J.M. Whitteker be treasurer, at a salary of $800, duties same as in 1935.

Moved by Mr. Broder, seconded by Mr. Harback, that Chas. R. Hummell be auditor at a salary of Forty dollars, duties to include auditing of school and relief accounts.

Moved by Mr. Broder, seconded by Mr. Roach, that Edward Lapierre be auditor at a salary of Forty dol lars, duties to include auditing of school and relief accounts.

Moved by Mr. Jarvis, seconded by Mr. Roach, that John Weston be assessor at a salary of Eighty Dollars.

LOST.

Moved in amendment by Mr. Broder, seconded by Mr. Harback, that a notice be inserted in the local paper that applications will be received for the position of assessor up to Jan. 15th.

CARRIED.

Moved by Mr. Harback, seconded by Mr. Broder, that Andrew McLatchie be a member of the Board of Health.

Moved by Mr. Harback, seconded by Mr. Jarvis, that Matthew Campbell be a member of the Board of Education for the ensuing term, 1936-7-8.

Moved by Mr. Jarvis, seconded by Mr. Broder, that Ben Carr, Ray Coligan and Erratt be poundkeepers.

Moved by Mr. Roach, seconded by Mr. Harback, that John Dain, Edward Duval and George H. Merkley be fence viewers.

Moved by Mr. Roach, seconded by Mr. Harback, that John M. Casselman be valuator of sheep killed by dogs.

Moved by Mr. Roach, seconded by Mr. Broder, that Herbert Clark be fire chief at a salary of fifty dollars.

Moved by Mr. Jarvis, seconded by Mr. Harback, that Dr. J.S. Goodfellow be medical officer of health at a salary of $50.

Moved by Mr. Broder, seconded by Mr. Harback, that R.F. Lyle, K.C., be town solicitor.

Moved by Mr. Roach, seconded by Mr. Flynn, that John Prunner be sanitary inspector.

Moved by Mr. Roach, seconded by Mr. Flynn, that Wm. Heagle be weed inspector.

Moved by Mr. Broder, seconded by Mr. Jarvis, that Leslie VanAllen be truant officer at a salary of twenty dollars.

Moved by Mr. Broder, seconded by Mr. Roach, that Gerald Coligan be constable at a salary of twenty-one dollars and seventy-five cents per month.

Moved by Mr. Flynn, seconded by Mr. Roach, that the committees for the year be as follows:

Electric—Mr. Roach.

Water Works, Sidewalks—Mr. Jarvis.

Roads and Sewers—Mr. Broder.

Town hall, police, town property, fire dept.—Mr. Harback.

The Reeve being a member of each committee by virtue of his office.

Moved by Mr. Flynn, seconded by Mr. Jarvis, that this Council request the Electric Committee and Mr. J.H. Meikle, electrical engineer, make a report on the best way to provide emergency electrical energy for the municipality.

Moved by Mr. Flynn, seconded by Mr. Roach, that this Council request the Minister of Public Highways for Ontario to construct the four and a half miles to Highway No. 31, north of Williamsburg, as this would be a great convenience to tourists visiting Ottawa and to people of this section of Eastern Ontario, and that a copy of this resolution be sent to the Minister.

Moved by Mr. Jarvis, seconded by Mr. Harback, Whereas George D. Howith has made application to the Department of Marine for a lease of a water lot in the Morrisburg Harbor with the intention of building a dock and filling and beautifying the lot at his own expense. The new landng will cut in half the time required for crossing the river, will beautify the harbor, and will mean immediate spending of several thousands of dollars in this town.

Therefore this Council places itself on record as favoring the granting of the required lease to George D. Howith and urges the Minister of Marine to grant the lease without delay.

Moved by Mr. Roach, seconded by Mr. Flynn, that Douglas Stitt be superintendent of the Electric Light Plant at a salary of $1420 per year.

Nay—Messrs Broder, Jarvis.

Moved by Mr. Roach, seconded by Mr. Harback, that John Ritchie be an assistant in running electric plant at a salary of $70 per month.

Moved by Mr. Roach, seconded by Mr. Flynn, that Geo. B. Stitt be assistant at the electric light plant until Jan. 31st, salary as last.

Moved by Mr. Harback, seconded by Mr. Jarvis, that Earl Phillips be superintendent of water works plant and caretaker of electric plant on canal bank at a salary of $60 per month.

Moved by Mr. Broder, seconded by Mr. Roach, that John Prunner be superintendent of roads and streets, caretaker of town hall and lock-up, at a salary of $70 per month.

Council adjourned, upon motion of Mr. Broder, seconded by Mr Roach.

VERN CLAYTON CASSELMAN

The Angel of Death visited the home of Mr. and Mrs. Aden Casselman, Williamsburg, on Tuesday afternoon, Dec. 31, 1935, and silently gathered into his arms their little son, Vern Clayton, aged two years and seven days. His illness was brief.

The funeral service was held on Thursday afternoon in St. Peter's Lutheran Church, where the pastor, Rev. C.R. Cronmiller, conducted the service. Rev. Cronmiller's message was taken from II Kings, 4th Chap., 26th verse, "Is it well with the child", and we can truthfully say, "It is well". God has transplanted a tiny flower to a larger sphere, where it may bloom in greater beauty, and those left behind are to make greater preparation to meet the loved one in the Homeland. The choir in attendance led in the singing of the children's hymns, "Sleep Baby Sleep" and "Around the Throne of God". Helen Casselman and Joyce Merkley sang "I Think When I Read that Sweet Story of Old," and the special anthem by the choir was "There's a Friend for Little Children".

Interment was made in the Williamsburg cemetery, with Glenn McIntosh, Ralph McIntosh, Dale Beckstead and Hubert Casselman acting as pall bearers.

Surviving are his parents; one brother, Rae, aged 6 years, and one sister, Marie, aged 9 years; grandparents, Mr. and Mrs. Frank Casselman and Mrs. P.E. Beckstead.

Floral tributes banked the little casket, and included: wreath from the family; sprays, Mr. and Mrs. Clifford Casselman and family, Miss Maxine Tennant, Mr. B. Roy Casselman, Mrs. P.E. Beckstead, Mr. and Mrs. Ross Beckstead, Miss Mary Beckstead, Mr. and Mrs. Heber McIntosh, Mr. and Mrs. Arnold Montgomery, Mr. and Mrs. Edwin Whitteker and family.

Relatives and friends from a distance at the funeral were: Mrs. Minerva Woods, Mr. and Mrs. E.S. Casselman, Iroquois; Mr. and Mrs. Heber McIntosh and family, Winchester Springs; Mr. and Mrs. Arnold Montgomery and family, Winchester; Mr. Aden Casselman, Sr., Mr. Aden Casselman Jr., Mrs. Eva McIntosh, Beryl McIntosh, all of Berwick; Mr. Frank Casselman, of Morewood; Mr. and Mrs. Merton Casselman, Dundela; Mr. and Mrs. Colin O'Shaughnessy, Morrisburg.

MR. D. PERCY EMPEY

Early Sunday morning at his residence in Brockville, the death occurred of D. Percy Empey, for many years a popular and efficient employe of the Recorder Printing Company, Ltd.

Born in Morrisburg in 1873, son of the late Mr. and Mrs. Gordon Empey, deceased was 62 years old, and had resided in Brockville since early childhood. He was educated in Brockville, and in 1888, before he was 15 years old, he became an employe of the Recorder Printing Co. Ltd., and learned the printing trade, later becoming a linotype operator, and continuing in that capacity until his last illness, which incapacitated him several months.

Besides his wife he leaves a step-daughter and step-son, Miss Laura Kennedy and Mordant Kennedy, well known athlete and membebr of the Magedomas Hockey Club as well as two sisters, Mrs. F.J. Clutterbuck, Brockville, and Mrs. Robt. Byers, of Elizabethtown.

* * *

Miss Ruth Reddick, a graduate of the Ontario Training School for Nurses in Brockville, arrived home on Tuesday after having completed a post graduate course in the General Hospital at Belleville.

* * *

About 150 parcels of land in the county of Lanark, including three islands in Rideau Lake, are to be sold at auction at the Court House at Perth at a Lanark county tax sale.

* * *

Matilda township's old council was returned by acclamation through the withdrawal of all other candidates nominated at Monday's meeting. No election will be necessary in the township. This will give Reeve Thos. Johnston his 12th term, and return Deputy Reeve Alfred Deeks and Councillors B.A. Strader, M. Zeron and O.A. Irvine.

* * *

While attending to her work on their dairy farm at Hulbert, Mrs. Joseph Thorpe had the misfortune to break her ankle. Dr. T. Hamilton of Brinston ordered her removed to Brockville General Hospital for an X-Ray. She was able to return to her home on Monday.

* * *

The people of the township of Mountain have shown their appreciation of a very competent board of councillors for the municipality of the township, when they returned the entire council by acclamation. A large choice of candidates was nominated who decided to withdraw in favor of the present council.

* * *

The Hendry Connell Research Foundation of Kingston has been incorporated under Dominion charter, it is announced, and Dr. Connell, discoverer of the "ensol" treatment for cancer, has assigned all patient rights to the foundation. In turn, the foundation has assigned to the Franklin Institute of Philadelphia the patent rights for the United States. Dr. Connell's discovery was made public several months ago. Ensol being used in the treatment of [illegible] at Kingston General hospital and the Hotel Dieu hospital. The Ontario Government is assisting Dr. Connell and his staff.

Born—At the Cornwall General Hospital, on December 18, to Mr. and Mrs. Will C. Cochrane, of Morrisburg, a daughter—Jessica Lillian.

* * *

Born—At Boucks Hill, on Saturday Dec. 21st, 1935, to Mr. and Mrs. Beryl Robinson, a daughter. Shirley.

* * *

Died—At her residence just west of Iroquois on Saturday, Dec. 21st, Mrs. Antonio Sisty, an aged and much respected resident. The funeral was held at the residence on Monday Dec. 23rd., and interment made in Point Iroquois cemetery.

* * *

Elections will be held in Winchester township, many new names appearing on the list. Those qualifying are: W. J. McConnell and J. Bogart, for reeve; Thomas Ralph, W. J. Stewart, G. W. Brooks and Geo. Ouderkirk for the office of deputy reeve. Five qualified as councillors, from which three are to be elected. They are Thomas Faulkner, Morris Servage, E. Summers, J. McGregor and William Brown.

* * *

In declining to allow his name to go before the ratepayers as a candidate for the reeveship, Mr. Bessin of Winchester said that the municipality was being served in this capacity by the present reeve, Mr. T. O. Keyes. He therefore announced his withdrawl, giving Reeve Keyes an acclamation. Other members of the council who were also acclaimed owing to the failure of the other nominees to qualify, were: Thos. A. Bailey, Ernest J. Christie, Dr. A. W. Sherwood and Hy Bessin.

* * *

Action against Samuel W. Jacobs, Cornwall business man, by the city of Montreal for non-payment of income tax was dismissed with costs in a judgment handed down by Recorder G. H. Semple. The court ruled that while Jacobs had established a residence for his wife and children in Westmount his "domicile" remained in Cornwall and therefore he was not subject to municipal income tax in Westmount.

* * *

Sidney Locke, Joseph Masson, Andrew Fraser, Clifford Leblanc and Clayton Leblanc of Cornwall have been arrested in connection with the burglarizing of David's store, Chesterville on the night of December 23. Daniel Fraser is held as an accessory. A disabled car on Highway No. 2 near Maple Grove the following morning led to the finding of the loot stolen from David's, hidden in a field a short distance from the car, which was later identified by Mr. David as his. Investigation by Constable Garnet McLean and Provincial officers of Cornwall and Morrisburg led to the arrests. They will appear in Cornwall on Monday next.

FIRST GAMES TONIGHT, TOWN LEAGUE

The curtain goes up tonight on the junior town league hockey stage, when the Maroons meet the M.C.I team, and the Black Hawks take on the Maple Leafs.

The Maroons have been greatly strengthened this year, and whilst the M.C.I. representatives are as yet an unknown quantity, the Maroons should take them to town, the more so since the Collegiate puckchasers will probably lack several of their star players. Cliff Hart will be absent, as well as Gerald Casselman. The M.C.I. has a great centre player in Ted Weir, who should be in the thick of the fight from the start.

The second game, between the Hawks and the Maple Leafs, should also furnish some thrilling entertainment. The Hawks have added Snyder, Locke and Raymond Reid to their line-up, while the Leafs will initiate Alfy Gamble and Earl Coir.

The first game will start at 7.15. Be on hand and help to develop a winning team for Morrisburg. Admission 10c.

OUR NEW YEAR'S WISH TO YOU

Here is hoping that
The weather man will be kind to us,
That our crops will be abundant,
That we will receive fair prices for our labours,
That there will be work for all.
That the new Government won't spend too much money, and
That our past debts can be paid without increased taxation.
Then all of us will be able to enjoy the necessities of life.

"SAILOR" CAGERS REMAIN UNBEATEN

With brilliant performances by the rival rearguardsmen outstanding, Morrisburg Ferry Sailors continued their unbeaten pace in the Ottawa City Basketball League by handing Ranger Seconds an 18-17 setback on Saturday night. It was the sixth consecutive triumph for the Ferrymen, and the first defeat in three starts for Rangers.

Outplayed during the first half, and entering the last session on the short end of an 11-4 count, Sailors rallied their forces round a spectacular defensive display by their guards, and outscored the opposition by 14-6 during the final twenty minutes. It was a remarkable, courageous comeback for the Sailors, and clearly emphasized the fact that Louis Bonnenfant's quintet is the one to beat for Ottawa City Basketball League honors this season.

RESULTS OF DECEMBER TESTS AT M. C. I.

Following are the results of examinations given in December at M.C.I.

This covers only part of the regular work, but parents are asked to do what they can to improve the standing of their children by encouraging home study. Class A is over 75 p.c., Class B 67 to 74 p.c., Class C 60 to 66 p.c., Class D 50 to 59 p.c., Class E 40 to 49 p.c. Class F below 40 p.c. Students who were absent or tried only one subject are not graded.

The GREEN GHOST

by Stuart Martin

SYNOPSIS

Maud Barron and Hughes return to monktion of disaster. She hears padding footsteps. Rushing into her father's study she finds him dead.

Dr. Sidney Foster, a friend, is joined by Detective "One Eye" Uttock, a mulatto, who has never lost a man.

Maud Barron awakes with a pre. England. Dr. Foster gives Maud his address in case of need. He receives a telegram informing him "The Ghost" has reappeared. Foster takes Elsie Monteith for drive. She confesses her love for him.

"I was probably to blame for the scene near the wood. I take the blame. I was too ready to pick a quarrel, and when I see him I will apologize for it. Please do not think that I am blaming him for the death of the dog. Not in the slightest.

"He is just coming in," said Elsie, who had turned to look out of the window. "Shall I call him up here?"

Maud waved her hand in opposition.

"I think we had better not raise the question at all with him. He might see it in the wrong way, and I hate any scene. Don't you think so, doctor?"

"You are right, undoubtedly. I would be the last to raise any question that was capable of misinterpretation. I only mentioned the quarrel we had, because it was part of the explanation which was due to you in another direction. It cannot have escaped your notice that Mr. Hughes and I are a trifle distant when we meet at table."

"I have noticed it."

"No one could avoid seeing it," said Elsie, and her eyes glittered as she looked at Foster.

"Well, I will take the first opportunity of apologising to him."

"Was that one of the reasons you wished to leave?" asked Maud, quietly.

He shrugged his shoulders. Elsie Monteith was looking inquiringly at him. Her face had gone very pale. He drew the conversation off the subject.

"About the dog, Miss Barron. Have I your permission to hand the affair over to the police for investigation? You see, it may be that there are poachers, or bad characters, about, who desired the death of the dog. If you get another dog the same fate may overtake it. But there is the question of the manner of the dog's death. That is what I can't get over."

"We often have gypsies coming up from Epsom way," said Elsie. These people have strange knowledge, and they are wandering tribes, you know."

"That is true, but I have never heard of any gypsies who had a knowledge of South American poisons."

"Oh, I don't know. There was a gypsy here just before you came. He pretended to tell fortunes, and he recognized a picture of Jamaica and one of Cuba that hang in the hall. Don't you remember, Maud?"

"Of course, I forgot that. He had travelled all over the world and knew Spanish America very well. I tried him in Spanish and he rose to the test."

"But you never asked him about poisons, dear," smiled Elsie wearily, as she rose to her feet and passed her hand across her brow. "If only Dr. Foster had been here he would have introduced toxicology into the conversation. My goodness, how tired I am. My head is splitting."

"Go to your room, Elsie, and lie down," said Maud. "She has had a headache most of the afternoon," she added to Foster. "I wonder if you could give her something to relieve it?"

"Surely, shall I give it you now?"

But Elsie laid a hand on his arm, and he felt the pressure of her fingers with which she conveyed the subtle intimacy between them. It was as if she were telling him not to be too favourable to her in front of Maud, that their secret was to remain a secret for the time being.

"My dear Dr. Foster, not all the drugs you have could remove my pet headaches. I've tried all kinds of things. It's nerves, that's all, and nothing cures me like a good sleep and perfect quietness. If I'm not down for dinner or don't appear for the remainder of the evening, you'll know I'm getting ready for to-morrow."

She gave his arm another squeeze and glided off.

"What does she mean by getting ready for to-morrow? Is she embarking on some project?" asked Foster.

[illegible] know. Am I to put the matter into the hands of the authorities?"

"Doctor, doctor, haven't I already said that you are to do as you think fit?"

"Very well. I think fit."

She held out her hand impulsively.

"I have always you to rely on, haven't I?"

"Always—so long as I can advise and bring you back to health."

"Thanks. And there goes the dinner gong. I am coming down tonight. I feel the drive has put life into me."

He was on the threshold when she called him.

"By the way, please take a look in to see Elsie later. I am sure you could relieve her of those headaches."

"Is she subject to them?"

"Only these last few days. I am not surprised. We are all a bit upset."

Elsie was not down to dinner, but Hughes was there, and after the meal Foster made a point of speaking to him. He followed him into the hall and made an apology for the scene near the wood. He took the blame, accusing himself of being too ready to flare up, and he hoped that Hughes would forget it.

To Be Continued.

Grandma Lindstrom Never Lost A Baby

Aged Swedish Nurse Assisted At More Than 100 Births

NO letters after her name, nor a specialist in obstetrics, yet she has the credit of having brought more 100 babies into the world successfully since she passed her 60th birth day.

This is the record of "Grandma" Lindstrom of the Athabaska district, who, now more than 80 has given up her work of love and care for others which has taken her, at times into bitter winter weather over miles of icy roads. No call from a frantic husband, whose wife was lying alone in some lonely shack has ever been ignored by the old lady who is known and loved by all the residents of the district for many miles.

She came as a widow of 62 from Sweden. From the time of her arrival Mrs. Lindstrom has been in demand as a midwife. Twenty years ago, roads in the Athabaska district were not what they are today, but no weather or roads were bad enough to stop her when he felt that her assistance was needed.

No student of medical books and generally obliged to work in some lonely little log cabin, poorly heated and lighted only by a coal oil lamp, "Grandma" Lindstrom has never lost a single baby, and on none of her cases has she ever had the assistance of the doctor.

Dancing In School Can't Help Discipline

LONDON, Ont.—London Board of Education decided recently that its young women school teachers should not be commended for teaching older boy students the art of ballroom dancing.

Teachers who spend much of their spare time teaching boys in their classes how to dance could scarcely expect to maintain discipline in the classroom, in the opinion of C. C. Carrothers, retiring chairman of the board. It was his speech which killed a motion commending teachers for their dancing instruction.

Chairman Carrothers said he was unalterably opposed to teachers giving lessons in ballroom dancing. "It certainly can't help discipline," he said.

Trustee Joseph Jeffery, who had asked that the teachers be commended for their extra-curricular activity, said he wouldn't use the word "ballroom."

"All right then," came back the chairman, "I'll say waltzes, fox-trots and tango. Yes, and the rhumba."

One Canary for Each Convict New Limit Set in U.S. Prison

From the Chicago Daily News

BACK of prison walls the abundant life has never been a ruling theory, and achievement of the more abundant life through the destruction of wealth would seem to be too subtle an idea for the eminently pragmatic minds of criminals and their keepers.

Nevertheless, the principles of AA A have taken firm root in Stateville down Joliet way. There Warden Joe Regan has decreed a reduction in the canary crop. It seems that many of the lads have been raising canaries for sale. What more fitting occupation Who should know how to raise cage birds better than jail birds? And could a canary born to live in a cage find a more congenial birthplace than among caged men?

The warden, however, thinks that 2,000 canaries are too many for Stateville. He has limited canaries to a quota of one per prisoner. Obviously one canary cannot produce more canaries. So the revenue of the canary raisers who have been selling the birds for $2 each is likely to be cut off.

Of course, Stateville's appreciation of music is likely to suffer, too. For the restriction edict is said to have been caused by a violent quarrel between two canary raisers over the respective singing abilities of their pets. The warden, it appears, will have no primadonna stuff in his "stir" — even among the impresarios of the feathered songsters.

This is doubtful policy. Some observers, noting the popularity of philosophical works and belles lettres with long-term and life patrons of prison libraries, have voiced the hope that, during the present dark ages, philosophy and the fine arts would somehow be preserved in state-maine d monastic retreats like Stateville. But what chance has musical criticism under this new canary AAA?

Collective Security Against Aggression Sought By Nations

Woman Who Attended League's Recent Sessions Tells of European Situation

That the League of Nations is irrevocably committed to halt Mussolini's invasion of Ethiopia was the opinion expressed in an interview with Boston Transcript by Miss Sarah Wambaugh. who has just returned from the League's Geneva sessions.

Technical adviser and deputy member of the Saar Plebiscite Commission and for many years an authority on various European questions, Miss Wambaugh said England's self-interest coincided closely with the present trend of League activities, but she scoffed at what she said is a frequent allegation that England controls the League for her own purposes.

"No one pretends that England controls Russia," Miss Wambaugh said. "But Russia is firmly supporting the League today. So are the Scandinavian countries, but it is self-interest for all of them rather than any leadership of England's that they are following.

"These countries all see their only hope lies in collective security against aggression. They know that any one of them might be some other nation's Ethiopia."

"The fact is that England is absolutely committed to the principle that any action must be League action," she said. As a consequence, she added, the present situation must develop either a war, a satisfactory agreement between Italy, Ethiopia and the League, or a complete yielding by Mussolini.

Miss Wambaugh said she saw a number of posters in Italy a few weeks ago which might be construed as threatening to England's African territories, one of which proclaimed: "To Whom is East Africa? To Us!"

"I believe that the Italian program is the greatest threat to British power that has ever occurred in my lifetime," Miss Wambaugh said. "And I do not regard it as merely threatening Lake Tsana or her African lands but as threatening her whole prestige in the Mediterranean."

Miss Wambaugh said that Germany appeared to be eager to maintain friendly relation with England at this juncture, and that the German public has manifested considerable feeling against Mussolini ever since his interference with the Austrian-German affairs at the time of the assination of Chancellor Engelbert Dollfus.

Names For New Warships

Observes the London Times — Among the names assigned to ships of the 1935 new construction program are Liverpool, Manchester, Gloucester, Cachalot, Sterlet, Bittern, Sheldrake, Kittiwake, Gleaner, Plover and Research. The three cruisers which receive the names of English cities will make up a total of eight in this new class. An innovation is made this year in order that Manchester may have a representative ship in the Fleet.

Cachalot will continue a series of marine monsters like Grampus and Narwhal, submarine mine-layers. The name of Sterlet will be the twelfth, all beginning with "S" and all names of fishes, which have been chosen for patrol type submaries since 1930. Bittern is a convoy sloop. Sheldrake, a name going back to 1806, and Kittiwake, new in the Navy, belong to coastal sloops. Gleaner is appropriate for a surveying ship.

Plover, bestowed on a costal minelayer, commemorates the capture of the Dutch ship Kievit (peewit, plover) by the Morning Star in 1653. A gunboat Plover was concerned in the Boxer operations of 1900, and there was a destroyer Plover in the late War. Research, borne by three earlier ships of the Navy since 1846, is a fitting designation for the new magnetic survey vessel.

Work Their Way Around The World

An attempt to work their way around the world in ships is being made by two young Vancouver sisters.

They are Clara M. Wilson, a school teacher, and Katharine, a stenographer. They started out on the first lap of their journey aboard the British freighter Harmatris, on which they signed as members of the crew, early last month. The Harmatris will take them to Sydney, N.S.W.

From Sydney they hope to catch a boat for India or the west coast of [illegible]stralia, work their way to [illegible] Africa and up the east coast [illegible]rica and then go through Eu[illegible]nd England, returning by New [illegible]and Montreal.

[illegible] sisters said they had no spe[illegible]otive for undertaking the ad[illegible]e, except for the desire to [illegible]he world."

THE OLD-STYLE SPELLING BEE

(Owen Sound Sun-Times)

The Rotary Club of the town of Simcoe staked something new in Norfolk county when a picked lot of champion spellers from all parts of the county participated in a spelling match to determine the county championship, senior and junior. Something new in a way; but really a revival of a very old-fashioned form of entertainment. Back in the olden days spelling matches, or spelling bees, were quite popular; but in recent year they have practically disappeared as a Friday afternoon feature in some of the public schools.

They were good fun and it was next to marvelous to look on and see difficult word after difficult word spelled correctly until one wondered when someone would slip. And there was always a long battle at the end, often ending in a draw, when the star spellers were left alone to uphold the honor of their side. Nowadays one wonders how long a spelling contest would last; for one of the penalties we seem to have paid for progress is loss of the knack—or gift—of correct spelling. The average business man has not time to bother about the correct spelling of a word—he dictates it to a stenographer and leaves it to her to do the rest. And the stenographer, if she is wise—and most of them are—keeps a dictionary in her desk for use in cases of emergency. Spelling is rapidly becoming a lost art.

People nowadays are looking for new ideas in the way of amusement; the endless round of teas, bridge and dancing becomes monotonous; amateur plays demand practice; musical affairs, unless fairly high class, do not attract. Why does someone not try the old-fashioned spelling bee?

It would be a drawing card, for instance, to stage a match between the City Council and the Board of Education or a picked team from the Board of Trade. The Service Clubs might fatten their exchequers by an inter-club tournament. Even a city spelling league might be organized. Perhaps a restriction might be put on that school teachers and public school pupils be barred or handicapped.

"We can well be grateful that more and more of our people understand and seek the greater good of the greater number."—Franklin D. Roosevelt.

"The public can stand a lot better motion pictures than it has received the opportunity to appreciate."—H. G. Wells.

Climbs Mountains To Please Husband

(From Edmonton Journal)

The holder of the women's mountain climbing record hates mountains and climbs them only to please her husband and children. This is not gossip. It is the frank statement of Mme. Hettie Dyhrenfurth who, in 1934, reached the summit of Queen Mary peak in the Himalayas, a giant of 24,500 feet and outdid the mark of 22,900 feet set by the late Mrs. Bullock-Workmann in 1906.

She says she thinks records are silly. Sports should be for the fun of it and, in her opinion, there is no fun in mountain climbing. She gives a graphic description of the blizzard that caught the party at 24,000 feet on her record-breaking climb and which resulted in ten Germans being frozen to death.

For nine days we stayed there, with avalanches roaring down the mountain, the snow so thick we couldn't see, no alcohol to cook on and the air so rare we could not make kindling burn and it took hours to bring water to a boil. We went around puffing for air. I tell you it was awful. The only reason I went on up and broke the women's record was because I could not get back without having some of the men take me back. So I went on. I could hardly breathe. When we got to the top we could not even see the view. I did all this for what? To break a record? Nonsense! And when the photographer asked me to smile for a picture I boxed his ears, I was so mad.

Mme. Dyhrenfurth explains, however, that if there is one thing greater in her life than her dislike for mountain climbing, it is her love for her husband. The latter, born in the Alps and commencing a distinguished climbing career at the age of ten, entertains the belief that the greatest sport in the world lies on the peaks that have never been scaled. So his wife goes on breaking records just because she knows it makes him happy.

Unquestionably, back of her protestations, there is more than the obedience of a dutiful wife. Apart from record breaking, Mme. Dyhrenfurth has made distinct contributions to the world's knowledge, and there must be a real satisfaction in such work whether one cares for the subject or not. Her frankness, however, causes one to wonder how the memoirs of the majority of men and women who have done things would read were they recorded with such unsparing honesty.

How many public heroes would have failed the mark had they not feared a dressing-down at home more than they did the perils to which they set their faces? How many games have been won because of love for another person rather than love for the game itself?

King of England Still Crack Shot

London. — Despite his 70 years, King George still retains the keen eye and the steady hand that made him one of Britain's best shots, and certainly the best shot among the world's monarchs for years.

Next to yatching, shooting has always been the King's favorite pastime and he has a collection of guns almost comparable in value to his stamp collection.

Whenever His Majesty gets away from the affairs of state at Buckingham Palace and retires to his country estate at Sandringham, one of the first things he does, his health permitting, is to ride out to the fields in search of grouse and pheasants.

And it takes a fast man to reload the King's gun.

The Book Shelf

BY MAIR M. MORGAN

"A VISIT TO AMERICA" by A. G. Macdonell (Macmillan's, Toronto) is delightful reading—one of the best, I think, of impressions gathered of that vast union of states, by a visiting British author. Mr. Macdonell has a deep sense of humor combined with a keen insight of human nature. One hilarious chapter deals with an afternoon's attendance at a football game. He covers a vast amount of territory—New York, Baltimore, Chicago, Salt Lake City, San Francisco and back. San Francisco evidently captured him completely. His recounter of the mad dash by auto, travelling at the rate of ninety miles an hour from San Francisco to Los Angeles is a hair-raising episode. A perfect gift to any Anglo-Saxon.

JEAN VAL JEAN as told by Solomon Cleaver, (Clarke Irwin, Toronto will delight the audiences all over Canada, who heard Dr. Cleaver tell this famous story.

This is the history of this little book: A young minister in Winnipeg some forty years ago decided, after two careful readings of Victor Hugo's Les Miserables, to tell the story in his own words in place of a scheduled lecture. It was received with such enthusiasm that before he had once committed it to paper, he had repeated it more than 800 times to our 100,000 people, and had been obliged to reject one invitation in every four which crowded upon him. From so many of those who have heard Dr. Cleaver have come requests for his story in permanent form, that he has been prevailed upon to have it published. By good fortune an excellent screen version of Les Miserables was produced recently in France, and the publishers have been able through the kindness of the Compagnie France Film to include fourteen scenes from the photoplay.

A CANADIAN HEADMASTER by Watson Kirkconnell. (Clarke Irwin, Toronto) is a brief biography of the late Thomas Allison Kirkconnell by his son. Dr. Kirkconnell taught in the schools of Ontario for fifty years, chiefly at Port Hope and Lindsay.

These are but bare facts concerning an unusual character of rare understanding. All pupils and teachers throughout the country should read it.

TOY BALLOONS by Florence Steiner (The Ryerson Press, Toronto) brilliantly illustrated by Elsie Deane. Contains some verse for children that is quaint and delightful. Florence Steiner in this volume of verse shows a deep understanding of children's whims and whimsies. All her work is based on actual happenings in the bewildering life of children.

For instance take this one:

Our rover seems just right to me
There's nothing missing I can see
But he doesn't show a pedigree.

The pup next door has one I know,
For Bob, who owns him, told me so.
I wish our Rover'd let one grow.

He has two ears and eyes deep blue,
A cool, soft nose, and four paws too,
And a little tail he'll wag for you.

Dad says he's finished perfectly
He looks as nice as nice can be,
But I wish he'd grow a pedigree.

CHAPPED HANDS? NO!

WILLIAMSBURG

Mrs. Ed. Axworthy returned to her home here last Monday, after spending several days in Montreal.

Mrs. Sara Merkley of Chesterville was a guest on Christmas Day at the home of her daughter, Mrs. Geo. W. Strader and Mr. Strader.

Mr. and Mrs. Jack Hill are spending the Christmas holiday season at her mother's home at Maxville.

Mr. and Ms. Leland Barkley and baby are spending the holidays at the latter's home at Candersport, Pa.

Mr. and Mrs. Alfred J. Casselman and family spent Christmas Day at Wales at the home of Mrs. Casselman's parents.

Mr. and Mrs. Jas. McMillan and little daughter Jean, spent Christmas Day at the home of the latter's father at Winchester Springs.

Mr. Alex McGruer, Jr. is spending the Christmas holiday season at his home in town.

Mr. and Mrs. Donald Barkley and the latter's mother, Mrs. Mary Hanes spent Christmas day in company with their daughter, Miss Evalene Barkley, nurse-in-training at the Civic Hospital, Ottawa, at the home of Mrs. Hanes' son, Mr. and Mrs. Ellis Hanes, at Ottawa.

The many friends of Miss Violet Trickey are pleased to learn that she is progressing nicely after her recent illness.

Mr. and Mrs. Willis Strader, Mac Strader and Lorne Henderson spent Christmas day with the former's daughter, Mrs. Oscar Barkley, and Mr. Barkley and family.

Mr. Lorne McPherson is spending a couple of weeks with friends in Vermont.

Mrs. Allan Farlinger of Mariatown, was a recent guest of her mother, Mrs. Nellie Marcellus.

Mrs. Lucy Silman and Jackie spent Christmas with her mother in Cornprior.

Mrs. Clayton Hummel, Joan and Mack of Tuckahoe, N.Y., spent Christmas week with Mrs. Cora Tupper.

Mr. and Mrs. Durham Wells, Madge and Graham, spent Christmas day with Dr. and Mrs. O.G. Bogart and Dr. and Mrs. D. Boucher at Kingston.

Mr and Mrs. Ellery Casselman and Mrs. Gordon Render of Iroquois were Christmas day visitors of Mr. and Mrs. Stanley Saddlemire.

Miss Dora Merkley and Miss Lucy Merkley, R.N. of Brockville, Mr. Robt. A. Merkley of Toronto, and Master Gerald McPherson of Williamsburg, motored to Detroit, Mich and spent Christmas day with their brother, Mr. Forbie Merkley and Mrs. Merkley.

Mr. and Mrs. Henry Garlough, Harry and Graham, Mr. and Mrs. Cecil Garlough and Mr. and Mrs. Grant Johnson of Massena, N.Y., were guests of Mr. and Mrs. Don Beckstead for Christmas day.

Mrs. Stirling Cornell and Miss Cornell and little niece, Nancy Cornell of Beaver Falls, N.Y., and Mr. and Mrs. Edgar McIntosh were guests last week of Mr. and Mrs. Jas. D. Beckstead and Mrs. Jessie Seekings.

Mrs. Chas. Dewland spent the Christmas season in Buffalo, N.Y., the guest of her sister.

Mr. and Mrs. Dwight Tupper and mother spent New Year's day with friends at Grantley.

Mr. Harvey Merkley and Miss Ida spent Christmas day with Mrs. Jane Barkley.

Mr. and Mrs. Myron Merkley, Mr. and Mrs. Ross Hanson, Mr. Roy Merkley and Gerald, were guests on New Year's Day at the home of Mr. and Mrs. Ward Casselman.

Mrs. Minerva Woods of Osnabruck Centre, spent a few days this week with her sister, Mrs. Lillian Beckstead.

CEDAR GROVE

Mr. and Mrs. Albert Fickes of Newington, were guests of Mr. and Mrs. Frank McConnell on Tuesday.

Mr. Cory Poapst of Newington, is visiting Mr. Willis Wereley this week.

Mr. and Mrs. F. McConnell, Mr. and Mrs. Garnet Gallinger, were guests of Mr. and Mrs. Reuben Gallinger, Aultsville, on Monday.

Mrs. Frank Dafoe, sons Keith and Glenn, are spending the week with friends at Iroquois.

Mr. and Mrs. Clarence Dafoe of Massena, spent Sunday with Mr. and Mrs. Ross Dafoe.

Guests of Mr. and Mrs. Fred Dafoe on Jan. 1st were: Mr. and Mrs. Ira Watson and family of Lunenburg Mr. and Mrs. Clifton Shaver and family of Osnabruck Centre; Mr. Cory Poapst, Newington; Mr. and Mrs. Edgar Shaver, Wales; Miss Dorothy Swerdfeger, of Osnabruck Centre; Mr. and Mrs. Ross Dafoe and family, Third Avenue; Mr. Arnold Amell, Farrans Point; Mr. Robert Dafoe, Third Avenue; Mr. and Mrs. Percy Pier, Mr. Ed. Pier, Osnabruck Centre.

Mr. Lloyd Wereley spent Wednesday evening at his home here.

Mr. and Mrs. Alvinza Crites of Farrans Point, Mrs. Delbert McMillan of Gallingertown, were guests of Mr. and Mrs. J. Beaupre on Jan. 1st.

STRADERS HILL

Mr. Acel Cook spent the week-end with Mason Hanson.

Mrs. Dora Wylie and Miss Hazel Carr of Toyes Hill, called at Mr. Herb. Hanson's Monday afternoon.

Mrs. John Casselman and Mr. Ivan visited Mrs. Aggie Cook on Sunday afternoon.

Mr. and Mrs. Ben Pennington of Williamsburg visited Mr. and Mrs. Edwin Johnston and family on Thursday.

Mr. Phil Strader of Guelph, is spending the holidays at his home here.

Those who took dinner with Mr. and Mrs. Ross Hanson on Christmas were: Mr. and Mrs. Clint Pitt, Mr. and Mrs. Ward Casselman of Williamsburg; Mr. and Mrs. Acel Hanson and little Ruth of Prescott; Mrs. Floyd Riddel and sons of Shanly; Mr. and Mrs. H. Hanson.

CHURCH ROAD

Mr. and Mrs. M. J. Beckstead, Cedar Grove, spent Sunday with Mr. and Mrs. J. Styles.

Mr. and Mrs. Percy Robertson and son Edward, were Sunday visitors at Mr. Orval Crowder's.

Mr. James Styles Jr., spent a few days the past week with Mr. Lloyd Barkley, Glen Becker.

Mrs. Wm. Dafoe spent the past week at her parental home, Mariatown. Mr. Froats is very ill at time of writing.

Mrs. H. H. Barkley spent the week end with her daughter Mrs. W. M. Styles.

Miss Dorothy Millward, Boucks Hill, spent a couple of days with Mrs. Roy Styles the past week.

Mr. and Mrs. Alva Henophy, Nudell Bush, were recent guests at Mr. Jacob Scchwerdfeger's.

A number from here attended the supper and Christmas tree at Trinity Church, Riverside, New Year's Eve and spent a very enjoyable evening.

SHORT COURSE IN AGRICULTURE

Arrangements for the Short Course in Agriculture and Home Economics to be held in the Town Hall, Winchester, from January 7th to the 31st, inclusive, are now complete.

In the Agricultural Course, the subjects which will be studied include, Live Stock Management and Feeding; Dairying; Poultry; Field Crops; Orcharding; Marketing and Farm Management. In addition to the regular lectures, there will be a number of special speakers as follows:

January 9th—Swine Marketing. —Speaker, Elgin Senn, Toronto.

January 10th—Poultry—Speaker, J. F. Fraser, Kemptville Agricultural School.

January 15th—Soils and Fertilizers—Speaker, R. J. Bryden, B.S.A., Ontario Agricultural College, Guelph

January 17th—Crop Management —Speaker, P. O. Ripley, Experimental Farm, Ottawa.

January 20th—Home Beautification and Floral Culture—Speaker, Professor A. J. Logsdail, Kepmtville Agricultural School.

January 22nd—Farm Forestry—Speaker, I. C. Marritt, B.Sc.F. Toronto.

January 29th—Weeds, Etc.—Speaker, W. J. Stephen, Toronto.

In addition to these special lectures, two afternoons a week will be devoted to Live Stock Judging and Instruction at the farms of various breeders in the district.

Mr. R. M. McKenzie ,B.S.A., of Pakenham, Ontario, will be the assistant in charge of the Course.

The Course in Home Economics will be under the supervision of Mrs. William A. Dunk of Brighton, who will lecture in Foods and Cookery, Laundry and Household Management. She will be assisted by Miss E. Sutton of Micksburg, Ontario, who will conduct the Course in Clothing. This Course will emphasize the problems in connection with being well-dressed, Further information with regard to these Courses may be secured from the Agricultural Representative's office at Morrisburg and a Short Course calendar will be sent to anyone requesting same.

These Courses are held free of charge through the courtesy of Winchester Town Council, and the Ontario Department of Agriculture. They should make for greater profit on the farm, and more interest and enjoyment. It is hoped that every boy and girl from 16 to 30 not attending school, will make it a point to attend these Courses, or at least part of them, and older members of the family are equally welcome.

A special program is being arranged for the first day, Tuesday, January 7th, and all interested should make it a point to attend that day.

MRS. SIDNEY M. DAFOE

There passed away at her home, Maple Crest, in East Williamsburg, on December 25th, 1935, Mrs. Sidney M. Dafoe, in her seventy fourth year.

Although in failing health her death came as a shock to her many friends.

Her maiden name was Elizabeth Cross. She was born Sept. 29th, 1861 on Croils Island being the daughter of William Croil Cross and Flora McLean, both of Scotland.

She spent her youth on Croils Island and attended the Massena High School She later graduated as school teacher and taught school on Croils Island.

On Occtober 17th, 1882, she was united in marriage to Sidney M. Dafoe of Aultsville. For eighteen years they resided on Croils Island. In 1900 they moved to the farm at East Williamsburg known as Weaver's Point.

She is survived by three children William R. Dafoe of Froatburn, G. Roy Dafoe of Miami, Florida, Mrs. J. Winston McMartin of East Williamsburg and four grandchildren. She is also survived by one sister, Mrs. Wm. J. McCarey of Brockville, [illegible] niece Mrs. Frank . Shaver of [illegible]ville and one nephew Wm. C. [illegible] of Brockville.

[illegible] was held at her resi- [illegible] December 27th, [illegible]son conducting the [illegible] as his text Hosea [illegible]m them from the [illegible]e. I will redeem [illegible] He was assisted [illegible]mmanuel's Presby- [illegible] Aultsville. The [illegible] during the service [illegible]s of Time are Sink- [illegible]No Night in Heaven."

"Forever with the Lord."

Interment was made in the family plot at St. Johns Cemetery, Riverside, beside her husband, who predeceased her six years ago, having been killed on the highway while crossing to his home on June 14th, 1929.

The pall-bearers were Messrs. John Willard, Wilbert Casselman, Samuel Wells, Harvey Wells. Floral offerings included two wreaths from the family; sprays from Mrs. Wm. J. McCarey, Mr. and Mrs. Wm. C. McCarey, Brockville, Mr. and Mrs. Frank T. Shaver, Aultsville, Mr. and Mrs. Herbert Sarginson, East Williamsburg, Cut Flowers from the Ladies' Aid of Emanuel Presbyterian Church.

Relatives from a distance included Mr. and Mrs. Frank T. Shaver, Aultsville; Dr. and Mrs. E. L. Brown Aultsville, Mr. and Mrs. George McLean, Finch, Mr. John Cross, Aultsville, Mr. Thomas Vallance, Miss Georgia and Florence Vallance of Woodlands, Mr. and Mrs. Gladstone McLean, Finch; Mr. Chas. Stubbs, Morrisburg, Mr. and Mrs. Arthur N. Dafoe, Mrs. Stanley W. Dafoe, Aultsville.

COAL GAS CLAIMS LIVES

A man and his 16-year-old granddaughter were found dead in an apartment over a store, Cornwall, when the man's son broke into the suite after obtaining no response from the occupants. They had been asphyxiated by coal gas.

Coroner C. J. Hamilton said Allan M. Kavanagh 65, and Aileen Kavanagh, daughter of P. M. Kavanagh of Montreal, had been dead about twenty-four hours. Their bodies were found in a hallway clad in night attire and in attitudes indicating they had been overcome as they sought to escape.

The bodies were found by W. J. Kavanagh, who broke down a door when his father, who helped him in a butcher shop beneath the apartment, failed to appear. The girl had been spending a holiday with her grandfather.

MRS. REUBEN MERKLEY

Marked tribute was paid on Tuesday afternoon to the memory of the late Mrs. Reuben Merkley of Williamsburg, at the funeral service which was conducted by the pastor, Rev. C.R. Cronmiller of St. Peter's Lutheran Church, Williamsburg, where she had worshipped during her lifetime.

The cortege which proceded from her late home, was large, and the church was filled with many from a distance, as well as neighbours and friends from the surrounding community, showing the high regard in which the deceased was held.

The choir led in the singing of the hymns, "Rock of Ages," "Asleep in Jesus" and "Abide with Me". "That Beautiful Land" was the special anthem rendered by the choir, and by request Miss Helen Becker sang "Does Jesus Care?"

Deceased, whose maiden name was Miss Sarah Whitteker, was born December 19th, 1879, in Matilda township, in the Caughnawaga district, a daughter of Mrs. Kate V. Casselman and her husband, the late John Whitteker.

Mrs. Merkley had not been in the best of health for some time, and her condition became serious during the past few days at the Ontario Hospital, Brockville, where she had been removed four weeks ago, and where she passed away on Saturday, December 28th, 1935. Her demise is regretted by a large circle of friends.

She was of a quiet, unassuming disposition, kindly and highly respected byall with whom she came in contact. Thirty-three years ago she was united in marriage to Mr. Reuben Merkley, who survives her, with two daughter, Miss Ida Merkley at home, and Mrs. Albert Smith of Chesterville; one grandchild; her mother, Mrs. John Whitteker; one brother, Jason Whitteker, and one sister, Miss Carrie Whitteker, all of Williamsburg; one sister, Ida Whitteker, predeceased her several years ago. She is also survived by several nephews and nieces.

The pall bearers were Messrs Conrad Whitteker, Roy E. McIntosh, Willis Strader, Bernice Strader, Wilbert Strader and John F. Casselman.

Beautiful floral tributes were in evidence: Gates Ajar, the Family; wreath, Mrs. John Whitteker and Mr. and Mrs. Jason Whitteker; sprays, Mr. and Mrs. Ross Hanson, Mrs. Agnes Merkley, Mr. and Mrs. Geo. W. Strader, Mr. Calvin McKinnon, Mr. Willis Miller.

Interment was made in Williamsburg cemetery.

Friends from a distance attending the funeral were: Miss Lucy Merkley, R.N., of Brockville; Mr. Robt. A. Merkley, Toronto; Mr. and Mrs. Ray Coons, Mr. and Mrs. Fred Coons, Brinston; Mr. and Mrs. Nathan Barkley, Dunbar; Mr. Roy Merkley, Elma; Mr. and Mrs. Angus Smith, Chesterville; Mr. Geo. K. Casselman, Dunbar.

A very general and kindly sympathy is extended to the family and relatives in their bereavement.

STREET OR R.F.D. .....

TOWN AND PROVINCE .....

Woman's World

By Mair M. Morgan

Children of assorted sizes offer mothers lots of problems. One difficulty is when they come home from school at different hours for their noon meal. You can't be constantly cooking, yet each must have hot appetizing, nourishing, easily-digested food. One answer is chowder and custard-like desserts.

There's a lot to be said for the chowder made with milk. It contains a large amount of nourishment, is easily digested and is not rich enough to produce the heavy feeling that frequently makes afternoon work so trying.

GUIDE TO DESSERT

Serve with the soup toast croutons or, toasted crackers to supply bulk; radishes and celery for crispness.

When an egg or meat salad is served with a chowder luncheon a simple dessert made without eggs is best—for instance, applesauce and canned or fresh fruit, fruit Betty with hard sauce, fruit tapioca pudding or plain rice pudding.

However, when a plain green salad is planned, rice custard puddings, custard bread pudding and desserts rich in eggs will fill the bill. This type of dessert actually supplies the food value ordinarily furnished in the main course of a meal.

The composition of the chowder is an important factor in determining the type of salad and dessert. If grated cheese is stirred into the hot soup just before serving the food value is increased. Eggs also increase its food value. If the chowder must stand for some time between servings, it's a good idea to add an egg to each individual portion as it is served.

Corn And Tomato Chowder

Two cups diced potatoes, 1 can corn, 2 cups tomatoes, 1 onion, 4 tablespoons diced salt pork, 4 tablespoons minced parsley, 1-4 teaspoon pepper, 1 teaspoon sugar, 1 1-2 cups milk.

Fry fat slowly from salt pork and sliced onion. Cook slowly until tender but not brown. Add potatoes, corn, tomatoes, pepper, sugar and parsley and 4 cups boiling water. Simmer until potatoes are tender and add milk. Serve with toast or toasted crackers.

Date Pecan Pie

One and one-third cups sweetened condensed milk, 2 eggs, 1-2 cup pitted dates, 1-2 cup pecan nut meats, 1 teaspoon vanilla, 1-8 teaspoon salt, 1 unbaked eight-inch pie shell.

Chop dates. Beat eggs separately, beating yolks until thick and lemon colored. Combine milk, dates, nuts, vanilla, salt and egg yolks. Fold in whites of eggs beaten until stiff. Turn into unbaked pie shell and put into a hot oven (425 degrees F.) for ten minutes. Reduce heat 300 degrees F. and bake half an hour longer. Cool thoroughly before serving.

If you want to serve this pie to quite small children use a graham cracker crust. This kind of crust is considered more desirable for small children than the usual pie crust.

DONT'S FOR HOUSEWIVES

Don't dry clean in the house.

Don't leave the children locked in the house and go visiting.

Don't forget to dry the family toothbrushes in the sun one day a week.

Don't let the family step out of their clothes and leave them on the floor. Insist upon their being hung up.

Don't let the children be wasteful with electricity and leave lights burning all over the house. Teach them to turn them off when leaving a room.

Don't leave half the contents of the food in the tin in which it came. If all is not used, turn the remainder on a china dish and put away in refrigerator to be used later.

THE KITCHEN FLOOR

Since most kitchen floors these days are covered with linoleum this type of covering is due for first consideration. Linoleums are made of a cork, on a cloth foundation and then the whole is waxed or vanished over the top. Because of its porous nature and usually colored patterns, it should be given very special care.

Way To Clean

When a housewife complains because her linoleum wears out in two years of use, provided she has purchased a good grade of linoleum, you can lay the blame for the wearing quite often at the feet of the person who cleans the floor.

Linoleum should be wasned in tepid water, never hot, and suds from white soap should be used. After the washing, the floor should be rinsed well, as soap will leave the linoleum streaked and if left on the linoleum will tend to dry out the oil in the finish.

One should be careful not to put too much water on the linoleum floor, as the water will seep through and soak up the seams and tend to rot the burlap on the back.

Scouring powders or harsh water softeners should be ruled out when it comes to washing linoleums. These tend to dry out the linseed oil binder and make the linoleum dry and crumbly, with the result that before long it is unfit for use.

Preserve The Oil

Quite often it is a good idea to add enough sweet milk to the rinsing water to make it a milky color, and the oil in the linoleum will be preserved.

Any number of floor finishers are sold commercially. These are rubbing waxes, waxes that give a gloss but require no rubbing, non-slip, no-rubbing finishes and lacquers and varnishes.

The best way to preserve the linoleum is to lacquer or varnish it first and then apply a coat of wax to protect the finish from scratches. When just varnish or lacquer are used, scratches from sand on shoes and scuffling will cause ugly marks and the whole floor will have to be redone, as the finish cannot be patched up. That is why it is advisable to apply the wax, because the lacquer will do its part to seal the pores.

As for waxes, it might be a good idea for every housewife to take enough time off to go and check up on the various kinds available. There are waxes that require rubbing in, there are others that are a liquid that need merely be applied with a soft cloth and then allowed to dry, and then will reward the worker by brightening the linoleum and giving it a lustre. There are also waxes that clean and wax at the same time, and this last type is especially good for linoleums, since the use of water is not necessary.

HOME HINTS

Dog Biscuit

A good substitute for dog biscuits can be made by placing stale bread in the oven until it is as crisp as pulled bread. It can be stored in a tin box and used with the dog's meat and gravy. his will save the expense of buying biscuits.

Identification

See that each purse, billfold, briefcase, or shipping bag contains a card bearing the owner's name, address, and telephone number, in case the article should be lost. The majority of people will keep an article if it bears no identification, but will return it if it does.

If the curtains are rather worn, and there is fear that laundering might tear them, place them in a er becomes dirty, remove the bag and repeat the process. By this method there will be no strain on the material.

Woman Golf Champion Joins Jolly Foursome

The women's U. S. national golf champion, Mrs. Edwin H. Vare, Jr., pictured with (left to right) Teddy Turner, Philadelphia open champion and form er New England P. G. A. champion; Gene Sarazen, former open champion, and Londe Fowler, of Bosto n, on the new links at Pinehurst, N.C., Country Club.

The "Queen Mary" Progresses

September saw the anniversary of the launching of the Cunard White Star liner Queen Mary, and next spring should see her begin her service across the Atlantic. The great vessel has not only provided numbers in the Clyleside area, but has caused the wheels of industry to revolve more quickly throughout the country. Lancashire, for example, has supplied bed linen; Birmingham, a city almost as far from the sea as it is possible to be in England, is supplying a large part of the lighting equipment; while from Yorkshire came oil, to make cores, used in the making of castings for the equipment of various parts of the ship, and so on. It would, indeed, be difficult to find an industrial centre which did not have some share in the building of this ship.

The entire hull and upper decks of the ship are now practically complete, and the many kinds of craftsmen required have begun to carry out the interior decoration and equipment, whichc will, of course, be on the most lavish and up-to-date lines.

Heavy Increase In Implement Sales

For the 12 months ending September 1935, Canada's imports of farm machinery and implements show a very heavy increase compared with the preceding 12 months. In the 12-month period ending September 30, Canada imported farm implements to the value of $5,454,781 compared with a total of $3,051,112 in the preceding 12 months.

As regards Canada's exports of farm machinery in the 12-month period ending September 30, her exports exceeded imports by a considerable amount. Total exports for the 12 months ending September 30 were $5,724,375.00. In the preceding 12 months our exports were valued at only $2,682,014; so that in the year the export business of Canadian implement factories increased by over 100 per cent.

In the 12-month period ending September 30 last, Canada imported 450 Diesel engines, 953 harvesters, plows valued at $58,847.00, 16 threshers and 2,189 tractors for farm use. Tractors as imported during the year were valued at $1,802,903.0 and parts for tractors in general use, $1,489,138.00.

Other imports in the above period included 277,041 cwt. of binder twine valued at $1,675,943.00 and so 3,578 washing machines and 5,299 pumps.

In the export business for the 12 months ending September 30, Canada shipped 190,680 cwt. of binder twine valued at $1,100,421.00. In the total farm machinery exports valued at $5,742,375.00 were included. 7,618 cultivators, 1,442 grain drills, 3,479 harvesters and binders, 4,431 mowers, plows and parts valued at $1,100,-851.00. A total of 814 reaper threshers were exported in the 12 months; also threshing machines valued at $505,-949.00. Canada also exported washing machines valued at $436,742.00; and 11 tractors were exported from this country.

Women May Serve On Australian Juries

Before the year closes women might be acting as jurors in Australia and also sitting on the bench. The Minister of Justice of New South Wales, L. O. Martin, has promised to introduce a bill to give women that privilege.

They would not be presiding magistrates, but act as assessors do in industrial courts. They would be permitted to express to the presiding magistrate, with becoming brevity, it is hoped, their opinions on the cases.

The desire to do this has long held a place in the thoughts of women who are active in public affairs, and they are bent upon translating ambition into fact. The Children's Court is their first objective. They claim that they are better qualified to deal with young children than the ordinary magistrate. The Children's Court, however, deals with cases of youths aged 18 years, as well as with younger ones, and even women advocates admit that a man is better able to deal with some older juvenile offenders than a woman.

They argue, however, that a woman's presence, coupled with a word in season to the man presiding, might be beneficial. Past and present magistrates do not all agree with that opinion. There are women justices of the peace, of course, in Sydney Certain ardent feminists ask why they should not sit on the Bench, but not even male justices of the peace sit on the Bench in Sydney. It is said in quarters most familiar with the working of the courts that they never will.

I tell you, my fellow-Christians, your love has a broken wing, if it cannot fly across the ocean. Christ said, "Go ye into all the world and preach the Gospel to every creature". —Babcock.

"I'd far rather play a secondary part in a good play than a star part in an inferior play."—Richard Bennett.

Judge's Train Jolt Aids Woman's Plea

VIENNA.—An Austrian law court recently held its sitting in an express train, descending a sinuous mountain track at speed, in order to reconstruct an incident which had caused a passenger to sue the State Railways for $700 damages.

The case concerned a woman crossing the Austro-Italian frontier by train who rose from her seat to show the customs officer her passport and claimed she was hurled by the jolt of the coach into the arms of a League of Nations delegate sitting opposite and sustained a slight nervous shock.

The counsel for the defence declared it the passenger's duty to be on her guard, while passing a hilly section, and nearly had State Railways acquitted. But the judge decided to have the self-same railway coach sent from Poland to Austria to re-enact the affair.

The reconstruction was so realistic that on the curve in question the judge found himself thrown into the arms of the counsel, with the result that the plaintiff was eventually awarded nearly $500 damages.

Test Shows Honesty Produces Better Liars

BURLINGTON, Wis. — Downright honesty is producing better liars than ever before.

"Liars this year are more original and subtle," O. C. Hulett, president of the Burlington Liars' Club, says. The club will choose the world champion liar for 1935 from 4,500 candidates.

"They're being honest by not trying any more to palm off as their own idea that old worn out one about the heat, making the corn pop in the fields. The result is real originality."

As an example, Hulett recounted the offerings of Mrs. B. J. Hall, of Mabel, Ore. She wrote:

"My husband and I were out touring and stopped at a hotel which we found was overridden with bedbugs. When we complained to the manager, he indignantly declared: 'Madam, there's not a single bedbug in this building.'

"We went back to our room and looked and lo and behold he was right. They all were married and had large families."

Arthur Brady, of Bristol, Penn., said his city's police have trained mosquitoes that are allowed to taste the blood of persons suspected of being drunken drivers.

Human-Interest Story

This is a simple little human-interest story, a true story of a man who was down but not out, whose head was "bloody but unbowed" in "the fell clutch of circumstance" — who has emerged triumphant from the night that covered him.

Two or three years ago this man drifted into The Ottawa Journal office. He was shabby and penniless, and because there was no alternative he was living at the Union Mission, doing such odd jobs as offered. He was well educated, had been trained in one of the professions, had held good jobs before the depression broke in upon his career. He wanted advice—and work—but no favors.

This man did not whine and grumble. He did not complain about his hard luck, did not blame anybody. He would have felt much more at home in the Chateau Laurier than in the Mission, but he accepted the Mission's hospitality with gratitude and in fact wrote for this page a couple of articles about that institution which some readers will recall. He was deeply interested in his fellow-unfortunates, the obvious perils of their nomadic life, but he saw that in an extraordinary emergency the State had not failed in its duty.

Presently the man drifted away. There were no farewells — his calls ceased, and that was all. Months passed with no word of him, and now comes a letter from a little mining town in Northern Ontario. He was at work, in his profession, was happy and contented, doing something useful, something that gave him support and prospects.

—Ottawa Journal.

Chic Home Frock

Fashioned like the good looking sports model with "little boy" collar for which you've always envied your brother. The useful shirred pocket adds touch of femininity.

Dark ground cottons, tweedy and linen-like weave cottons, of sports influence, are especially lovely for this simple to sew dress.

Style No. 2670 is designed for sizes 16, 18 years, 36, 38, 40 and 42 inches bust. Size 36 requires 3⅛ yards of 39-inch material with ¾ yard of 35-inch contrasting and 3 1-2 yards of braid.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of pattern wanted. Enclose 15c in stamps or coin (coin preferred; wrap it carefully) and address your order to Wilson Pattern Service, 73 West Adelaide Street, Toronto.
