The Chesterville Record.

VOL. XXIX, NO. 12. CHESTERVILLE, ONT., THURSDAY, FEB. 8, 1923. SINGLE COPIES 5c.

Cash and Credit

A person without money or property usually has little credit, even if his integrity is well known.

Credit is based on capital, and capital is the result of saving. Credit is not a gift; it is a growth. It comes through earnest effort long continued. Some day you will need it.

Saving is the first step to good credit.

Serious Tea Shortage

It is estimated that the world's production of tea last year only amounted to 620,000,000 lbs., and as the normal annual consumption is approximately 700,000,000 lbs., this tremendous shortage has caused quite a panic in tea circles. All indications point, Tea Men feel, to higher retail prices in the near future.

Special Service at Morewood

On Sabbath evening Feb. 11th at 7.30—The Rev. F. L. Jobb will conduct a special service in the Presbyterian Hall, Morewood. Familiar Hymns will be beautifully illustrated by Lantern Slides. A Lecture by Rev. Dr. Armstrong, Toronto called "A Tour in Korea" will be given. This lecture will be illustrated by eighty magnificient pictures of that country, people, customs, etc., taken by Dr. Armstrong himself. Everybody welcome.

Finch Loses to Berwick; Chesterville to Finch

Last night at Finch in a league hockey game Chesterville was defeated by a score of 4 to 1. Up to within ten minutes of the close of the game the score stood 2 to 1 in favor of Finch. The Chesterville boys have some very severe criticism of the referee whom they say as far as refereeing is concerned is a dandy fine postmaster.

On Monday night Berwick on their own ice won from Finch 9 to 6.

The last game of the schedule will be played tomorrow night on Chesterville rink with Berwick.

Morewood Friends Honor Mr. and Mrs. McVey

Mr. and Mrs. Robt. C. McVey left on Thursday for their new home in Smiths Falls. Before leaving their many friends gathered at the home of Mr. and Mrs. Wm. Gordon and spent a very enjoyable evening. Lunch was served by the ladies after which an address was read by Gerald Bouck, while Emerson Faulkner presented Mr. ... Mrs. McVey with a ... Charles J. Suffel Passes Away at Calgary

At Calgary General Hospital there passed away on January 25th, 1923, Charles Jarvis Suffel after a brief illness.

The deceased who was well known here was always of robust nature but his health had failed him during the past summer, although his condition was not thought to be of a serious nature. However, a rest was considered necessary and two months leave of absence was granted, in which he had planned to go to California about February 1st, with his wife and family in order to regain his health.

The deceased was at one time a resident of Chesterville and it was here where he entered the employ of the C. P. R. as operator, after which he was soon transferred to the West and given charge of a station. At the time of his death he was agent at Gleichen, Alta.

In this untimely passing, the wife and son have suffered a sad bereavement in the loss of a loving and attentive husband and father, and the C. P. R. has lost a trusted and popular employee.

There remains to mourn his loss a wife (nee Carrie Fulton), a son, Charles; a sister Mrs. Fred Grant of Medicine Hat, Alta. and a brother Mr. Jeib Suffel of Mountain.

The mother of the deceased, Mrs. Fanny Suffel, predeceased her son only a few months ago; his father the late Edward Suffel having died several years ago.

The deceased was a member of the Masonic, and Odd Fellows and C.O.F. fraternities. The lodges attended the funeral in charge of the Masons, was held at Calgary on January 27th. The profusion ... offerings attested the ...

FOR COUGHS AND COLDS

If your cold is not serious enough to require a doctor, we recommend

NYAL'S PINOL

25c and 50c bottles.

If you have a tendancy to Bronchitis try

NYAL'S CREO PHOS

It is a combination of Tasteless Cod Liver Oil Extract with Creasot, and sells at $1.

For the sneezing stage we have

ASPIRIN TABLETS

15c per dozen

A good line of HOT WATER BOTTLES
Of great value as chill chasers.

VIOLET-RAY OUTFITS
Recommended for Asthma.
$14.75

Eyes Tested—Glasses Fitted.

Using Dynamite to Freak Ice Jam

Dynamiting is in progress to break an ice jam which has been formed on the St. Lawrence at the head of the Long Sault Rapids, and which has had the effect of causing the water to back up and cover Mack's and Croil's Islands. The jam is resulting in shortage of power at Massena industries.

Chinese Baby Born in Cornwall

On Sunday last a new citizen arrived in Cornwall, in the person of a Chinese baby, son of Mr. and Mrs. Lin Wong. The child and mother, we are told, are both doing well. The mother of the child is about 28 years of age and has lived in Cornwall for about a year, coming here from Montreal with her husband, who is engaged in the laundry business in Cornwall.—Freeholder

Wants Wider Sleighs

A despatch from Albany, N. Y., says:—Every sleigh in the State would be sent to the junk pile in the event of the passage of a bill introduced in the Assembly last week by Webb A. Joiner, Republican of Wyoming. The Joiner measure would require that after January 1st, 1925, the runners of the sleighs must be 4 feet 8 inches apart, or the same width as automobile wheels. Violation of the proposed statute would be made a misdemeanor punishable by a fine of $10. The ordinary species of sleigh has runners about 3 feet apart.

Bullet Through Hand

Mr. Fred McMillan, a member of the Union Bank staff and one of Smiths Falls' best vocalists, accidently sent a bullet through the palm of his left hand during the noon hour at the bank on Friday. He was handling the revolver, one of 38 calibre, hammerless and of Smith & Wesson make, when it discharged, the bullet piercing Mr. McMillan's hand, going through a board and striking a few sheets of heavy paper lengthwise. It then fell on the floor and is now in the wounded clerk's possession, kept as a souvenir. The bullet in its course became flattened in part. Naturally the mishap created a sensation on the bank premises and soon after it was heard of around town a report became current that Mr. McMillan had lost the top of the index finger of one of his hands.

To Avoid Influenza

Despite our deplorable ignorance of many essential facts of influenza we have some precious knowledge which should be common knowledge in times of wide spread epidemic. We may help ourselves to avoid influenza by following the general rules on avoiding colds.

The infection is indoors, and the worse the more crowded we are. Be out of doors as much as possible; breathe through the nose: if actually coughed or sneezed upon, use a mild disinfectant wash for nose and throat; discourage the people who imagine that the mouth, and not the ear, is the organ of hearing, and who come close up to you and talk into your face; and do not inflict this danger on others. If people are deaf, a good way of causing them to hear is to talk into the ear, which is not the guardian of the vital respiratory passages.

There is some reason to suppose that certain foods are, in some measure, protective against some infections. Amongst these "protective foods," as they have been called, are these rich in vitamines, beginning, of course, with milk, the food of foods, and including its products, such as butter.

The valuable vitamine—A—which seems to have a real value against tuberculosis, and may exert an influence against many infections, is not found in lard or in margarine of vegetable origin, but it abounds in butter-fat and in cod liver oil. This is not the time of year for experiments in "banting." A good supply of good, simple, unsploit food is valuable in supplying the blood and for making its defensive munitions against infection.

According to the unanimous finding of the scientific committee—the most authoritative ever appointed anywhere in this connection—which studied alcohol in this country lately, that "mocker" is wholly destitute of any tonic or stimulant value. It tends to lower the body temperature, it exhausts the reserves which should be held for a real emergency, and it weakens the white cells, the home army of defence. Doctors who have published statistics of treatment of pneumonia and influenza, in earlier years, and two years ago, without alcohol, have placed on record numerous figures which have never otherwise been approached. Milk in

$20.000 FIRE IN KEMPTVILLE

Fire completely destroyed one of the oldest business blocks of Kemptville, the Guy Block, a frame building, in a blaze which for a while threatened the existence of the north end of the town on Saturday afternoon. The damage has been estimated at $20,000, part of which is covered by insurance. The below zero temperature considerably hampered the local volunteer fire brigade and put the steamer pump out of commission for some time. The high wind scattered sparks over the adjoining frame buildings and only the snow on the roofs saved the conflagration from becoming general. As it was, two buildings, the White House hotel and Todd's garage, caught fire but were saved from any serious damage.

The fire sufferers are: W.C. Guy, tailor owner of the block, whose store was almost destroyed; T. Moore, butcher; S. Kerr, flour and feed merchant; Kemptville Hydro Electric Commission; R. Burchill, barber store with residence above; the "R. B. P." club rooms; the lodge rooms of Orange Young Britons, No. 53.

The cause of the fire is unknown but it is thought that it originated from sparks from the chimney falling on a portion of the roof that was bare of snow. Owing to the high wind which fanned it to a blaze, the fire quickly spread and in a few minutes the whole block was a mass of flames. The fire broke out at 1.45 p. m and lasted until late in the afternoon.

The town firemen did heroic work and were able to save a few of the store fittings. Owing to the very cold weather they were greatly handicapped. Water for fighting the fire had to be drawn from the Branch, a tributary of the Rideau River, which ran at the rear of the block. This could only be secured after chopping a hole in the ice. After fighting the fire for nearly an hour, the steamer pump which, together with a chemical engine, comprises the town's fire fighting equipment, froze up. As the fire was at its height and the surrounding buildings were in great danger, Reeve Dr. W. E. Storey telephoned Fire Chief R. Burnett of the Ottawa fire department for assistance.

On receiving the call for assistance, Fire Chief Burnett loaded one of the city steamer pumps on a flat car at the C. P. R. yards, Ottawa, preparatory to sending it by special train to Kemptville. As the special train was about to leave, Reeve Storey telephoned a second time to say that the fire was under control and that assistance would not be needed.

The location of the destroyed block is on the main Ottawa-Prescott Highway which runs through the town, at the intersection of Prescott and Cloutier streets, immediately north of the Branch River, adjoining the main bridge. It was a two storey fra... one of the oldest ...

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.
