If You Don't Like Our Policy KEEP AWAY

XXVI1 No. 31 MORRISBURG, ONT. FRIDAY, OCT. 11, 1929

Potatoes

We have just unloaded a car of potatoes, very fine quality and although we think they are slightly on the green side for winter, we strongly advise buying a few bags, and getting the balance at a later date.

Millfeed

Bran and Shorts are up $1.00 a ton. However, do not rush in and force the price still higher.

The MORRISBURG FEED & PRODUCE Co.

MORRISBURG, ONT.

THIS IS

Stove Pipe Season

Secure your Stove Pipes now, before the real cold, wet weather comes. Make your selection from our large stock of Plain and Polished Pipes, also half lengths, Elbows, Tees, etc. Why use old, rusted, worn-out pipes that are apt to cause inconvenience and possibly fire. Our Stove Pipes are made to go together. They fit.

Plain Pipes 20c
Polished Pipes 25c
Heavy Polished Elbows 25c

See our MODERN QUEBEC HEATER with draw-out grate and all the latest improvements.

Our MODERN QUEBEC COOK STOVE will please you. Has five holes, large-size oven, nickel trim, draw-out grate. Very low price.

MODERN CIRCULATOR is a wonder heater, circulates heat instead of radiating it, takes all the cold air off the floor. A handsome heater for any room in the house. Low in price and very efficient.

BRIDE KILLED FOUR HOURS AFTER WEDDING

Miss Hilda Elizabeth Trower, 24 years of age, daughter of Mr. and Mrs. W.K. Trower, 84 Westmount Boulevard, and Colin Kemp Anderson, 28 years of age, son of Dr. and Mrs. Duncan P. Anderson, 4398 Western Ave., Montreal, were married at four o'clock Saturday afternoon, at Erskine United Church. Less than four hours afterward, the automobile in which the bridal pair were driving on their honeymoon was wrecked. Mrs. Anderson died at one o'clock Wednesday morning in the Western Hospital, Montreal, from a fractured skull and burns. It was reported late last night by Dr. Duncan P. Anderson, who is treating his son Colin, that the latter's condition is critical. The doctor stated that his son is suffering from serious head injuries and severe burns about his body. The head injuries may develop to be a fracture of the skull. The accident was caused by a tire burst.

PUT BODY IN DITCH THEN SPEED AWAY

Provincial police and highway traffic officers of the district are making every effort to locate a hit-and-run driver, who during Tuesday night struck and killed Dennis Donovan, aged 37, of Escott, who was drawing milk along the highway. The body, with the skull fractured, was found in a ditch, where it is presumed to have been laid by the occupant or occupants of the car that struck him.

Mr. Donovan, who formerly conducted a garage at Prescott, left his mother's house in Escott village at 11 o'clock Tuesday night, and carried a lantern. It is stated he returned to his home and later left it about midnight and set out on highway No. 2 walking in an easterly direction. Nothing more was heard of him until the body was found.

LUTHERAN CONVENTION

A joint Convention of the Sunday School Association and Women's Missionary Society, of the Eastern Conference, of the Evangelical Lutheran Synod of Canada, will be held on Wednesday October 16th in the Church of England hall, Morrisburg. The morning session will be given over to the work of the Sunday School, and the afternoon to the Women's Missionary Society. A joint rally service will be held in the evening. The Rev. D. Burt Smith, D.D. of Philadelphia, Pa., will deliver short addresses at both sessions of the convention, and preach the rally sermon at the evening service.

Dr. Smith is an associate editor of the Lutheran Young Folks, and an authority on Sunday School work.

The hours of the convention are 9.30 a.m., 2 p.m, and 7.30 p.m.

A very cordial invitation is extended to everyone to be present at any or all of the sessions.

FAREWELL TO MR. AND MRS. WILLIS SALMON

The W.M.S. of St. Johns Lutheran Church, Riverside, met at the home of Mr. and Mrs Willis Salmon to bid adieu to one of their members Mrs. W. Salmon, and to thank Mr. Salmon for his kindness to the society.

After enjoying each other's company for some time, an impromptu program was arranged, and proved quite a success, as each number was peppy, interesting and amusing. Those taking part on the program were as follows: Mrs. Geo. Casselman, Mrs. Jno. Casselman, Mrs. Robert Burns, Miss Helen and Mr. Jas. Salmon and Mrs. M. E. Schwerdtfeger. The program concluded by the reading of the following address:

Dear Mrs. Salmon:—

We, the members of the W.M.S., and friends, have met here this evening to say 'au revoir', and to tell you how much we appreciate what you have done for our society and to tell you how much we will miss you. You have always given freely of your time, strength and means, and although words cannot express our loss, we join in saying "God bless you and yours."

I wish also to say "thank you" to Mr. Salmon, who has always shown great hospitality, kindness and courtesy, particularly to the ladies whenever we met here, which was no few times. The family also have used us very kindly, and have always been ready to help when we needed them.

When we, in retrospect, turn over the pages of the past, our thoughts of you will always be pleasant ones, and we will be cheered when we think how often your kindly word, cheery smile and great optimism helped to lift the heavy load, to smooth the rough place or to brighten our path. Friends like you always hold a cherished spot in other hearts.

There are so many things we could say, if time would permit, but we will not tire you with a lengthy address. Suffice it to say, we are very, very sorry to lose you, but hope the new fields of labor will be more attractive than the old, and that you will have a larger and better opportunity to serve our Lord and Master, Whom we all love, and are trying to serve and follow.

And now to show our love in some small tangible way, we wish to present to you this gift which we hope you will enjoy, and use many times in your future home.

Thanking you again and hoping God may bless you, we say "Farewell".

Signed on behalf of the W.M.S.,
Mrs. M.E. Schwerdtfeger.

Mrs. Jno. Casselman presented the gift, which was a floor lamp. Mr. and Mrs. Salmon responded with well-chosen words of thanks, invited us to come to visit them in their home and reminded us that they were not going far away and that the old friendship would not thus be completely severed.

Then refreshments were served and after singing 'God be with You till We Meet Again', the guests repaired to their several homes.

MR. WM. THOS. BURRIS

The sudden death of Mr. William Thomas Burris, who passed away on Tuesday October 8th, has caused much regret among the people of his native town.

Apparently in his usual good health, Mr. Burris left home on Tuesday noon to complete the work of picking apples off the trees at the Rectory. He was assisted in this work by Mr. Wm. Baker, who, about five o'clock, noticed that Mr. Burris was missing, and on looking over the grounds, found him lying on the ground. Medical assistance was at once summoned, and upon arrival, the doctor pronounced the man dead. It is thought that the deceased had taken a weak spell, and falling from the ladder, had fractured his skull, death being instant.

The late Mr. Burris, who was 62 years of age, was born in Morrisburg, a son of the late Mr. Stephen Burris and the late Mrs. Isabel Burris. Leaving home early in life, he became engaged as clerk in a drygoods store at Wales, later working in Cornwall, Prescott and Brockville. For the last seven years he has resided in Morrisburg. He was for many years a member of the Oddfellows, having been presented two years ago by Zeta Lodge with the twenty-five years' membership jewel

He is survived by one brother, Mr. C.A. Burris, and one sister, Miss Jane Burris, with whom he resided.

The funeral, under the auspices of Zeta Lodge, was held on Thursday, from his late home, Church street, to St. James Church, where the service was conducted by Ven. Archdeacon Carson, a large number of friends being in attendance to pay their last respects to the departed. The remains were laid to rest in St. James Cemetery.

CALGARY OLD-TIMER DIES IN LOS ANGELES

(Calgary Journal)

A.A. Baker, who had resided in Calgary for seventeen years prior to his departure for Blairmore and later California, died recently in Los Angeles, while visiting his daughter, Mrs. Donald MacKay. The remains are being brought to Calgary for burial.

Mr. Baker was the first employee of the Imperial Drygoods Co. and had been with the company till this spring, when poor health caused his retirement.

He is survived by two son, Muir, of Toronto, and Carl, of Regina, and by three daughters, Mrs. Gordon Steeves, of Blairmore; Mrs. Douglas Robinson, Oliver, B.C. and Mrs. Donald MacKay, of Los Angeles. His wife died twelve years ago.

He is also survived by two sisters and one brother, Mrs. Arthur Merkley and Miss L. Baker, and Mr. Will Baker, all of Morrisburg.

FIRE AT HALLVILLE

Fire, believed to have been caused by combustion, destroyed all outbuildings and practically all their contents on the farm of Clarke Hyndman, of Hallville, nine miles west of Winchester, Monday night. The direction of the wind prevented the fire from spreading to the house.

Mrs Hyndman said the barn seemed to catch fire in an instant, and the flames spread rapidly to two adjacent buildings and a silo. In them were stored the results of the entire summer's work, none of which could be saved. She could not estimate the loss, but said there was some insurance.

Mr. Hyndman, while trying to get his calves out of the barn, suffered painful burns to the right arm. With the assistance of neighbors, he was able to get all the stock out except a few hens, which were destroyed.

NOTICE OF DISSOLUTION OF PARTNERSHIP

Notice is hereby given that Robert Roy Mullin, a partner, has retired srom the firm of Mullin Brothers, General Merchants, Morrisburg, and has sold his interest therein to Laura I. Mullin. The business will be continued under the name of Mullin Brothers.

All debts owing to the old firm must be paid at the store; any claims should be presented there.

We thank our customers for their past favors and request fair patronage for the new firm.

Dated this 10th day of October, 1929.

LAURA I. MULLIN
JAMES EDWARD MULLIN

ST. PAULS LUTHERAN CHURCH

Due to repairs in St. Paul's Church, services will be conducted in the Anglican Hall on Sunday October 13th. Morning service will be at 11 o'clock, instead of 10 o'clock. There will be no Sunday School. Service in the evening as usual at 7 o'clock.

Middle Age Gives Advice to Youth

A Searching Address by Sir Frederick Sykes Delivered Chancellor to the Students of Bombay University

"The Governor of Bombay gave some valuable advice to the new graduaes of the Bombay University in his first Convocation Address as Chancellor of the University.

"'When you go forth from this University,' he said, 'to face the impartial test of the world, think and go on thinking of yourselves as perpetually on probation. Education is a matter between a man and himself. The outward trappings of education, its institutes and its carriula, are all relatively obstructions, and the only thing which counts is what the individual student has been able to make of himself and of the opportunities at his disposal'."—Times of India.

Wisdom of Middle Age

"Middle age brings with it a certain belated kind of wisdom, for which it can claim no kind of credit. It is a wisdom, such as it is, which comes by the simple passage of years. For it is then that, in most cases, a man ceases to look exclusively forward, and begins to look backward as well. And looking back, he can see (not infrequently, with bitter regret) what he might have done, but has not.

"He can see in what directions he might have employed his time and his energies better. And he can see (though possibly this is an illusion born of vanity) what he would do now if he had those past years to live over again. And although I hold strongly that the least justifiable of all things is for age to impose its own sobrieties on youth though I feel that as a man grows older, he loses, in many ways, far more than he gains—yet I also feel that the elders will not be wholly fulfilling their duty unless they pass on occasionally some of the things that have struck them in that retrospective vision.

"The backward-looking vision — to the man of fifty, let me say, glancing back at what he was in his twenties—these dividing lines between one period and another tend to fade away. To the young man just emerging from College, his entrance upon what we call 'the world,' seems to mark a definite crisis. The first chapter of his life has been closed; another is opening before him. The transition is, in his view, epoch-making and momentous.

"But as we grow older life is seen as a continum. Viewed through the mist of years these landmarks disappear. We realize—and the younger among you will also realize, when a few more years have passed—that what seemed so definite a break was really no break at all. We see that on either side of that apparent gulf was the same personality, that the so-called 'change' did not change that, and that what we are to-day is the living product of a progress of gradual shaping, which stretches back unbroken to our earliest years.

"And it is because of this continuity of personality that we realize that it is impossible to place one's finger on a particular date, and say, 'Here ended my education.' Whether we are conscious of it or not, our education is always going on. We are making ourselves the whole time, and it makes little difference that, in such and such a year, we left an official educational institution and entered upon the larger School of Life.

"One of the most remarkable things in life is the enormous force of habit; and almost equally remarkable is the degree to which—if we have strength and persistence enough—a habit can be cultivated. A man can go far to make his own nature. It is merely a matter of having a clear idea of what he wants to do, and sticking to it.

"And this is just where the man of fifty or sixty, looking back upon life, sees his own, and almost everybody else's mistake. He says to himself: 'If I had only practised this or that quality or activity, deliberately, for a short time every day, what a vast difference it would have made!' For, in a span of twenty or thirty years, those short periods mount up and you will realize how much it is possible to do, if you only take hold of time and turn it to your own purposes, instead of letting it slip by you unused.

"I know that this is hard advice. When a man is young, and looking forward, he does not see how valuable are the minutes and hours. It is only later, when he looks back, he sees how much he has thrown away.

"There comes a time when the kind of qualities, which (let me say) enable a man to pass examinations successfully, cease to be of prime value. They are superceded by that group of qualities which, when we meet and talk with a man, and particularly when we have to deal with him over work, make us feel that here is a person whose judgment is to be respected.

"Chief among those qualities is disinterestedness of outlook; but almost as essential, perhaps equally essential, is it that a man should do his thinking for himself. He should be capable of forming his own conclusion on the basis of arguments which he himself has thought out and approved. He should be an originator, not an echo. Nothing is more unsatisfactory to deal with than a mind exclusively furnished with second-hand materials. And perhaps I may add, nothing is more uninteresting.

Meaning of Success

"When we speak of success, what do we mean? We mean, in a very large measure, how a man manages to impress himself upon others. Success is a thing that can very seldom be wrested from an unwilling world.

"As a rule, success has, to a great extent, to be conceded. The world lets this or that man go ahead, because (quite simply) it trusts him and admires his qualities; and the world, in those instinctive judgments, is usually exacting and nearly always honest. It may be deceived for a time; it is seldom permanently deceived; and when once it has found out its mistake, it is always unsparing.

"Life is one long examination in which success is within the reach of each individual according to the quality of the effort which he makes. It is not mapped out with clear roads; its safe passage needs individual courage, confidence and steadfastness in pursuit o fthe goal aimed at.

"Sometimes it may seem that the modern world, in the elaborate organization with whih it surrounds the life of each individual, tends to force all into a common mould, but this is only a partial view of its meaning. In the ever-changing problems which it presents, in the manifold demands which it makes on the character, there is still the widest scope for ambition, for originality, and herein lies the whole interest and fascination of the adventure which you are about to undertake.

GENIUS

The three indispensables of genius understanding, feeling, and perseverance; the three things that enrich genius are contentment of mind, the cherishing of good thoughts, and the exercise of memory.—Southey.

Work For Good

Work for some good, be it ever so lowly;
Work for some hope, be it ever so lowly;
Work! for all labor is noble and holy!
—Newman Hall.

THE "CANARY" MURDER CASE

© Charles Scribner's Sons

by S. S. VAN DINE AUTHOR of THE BENSON MURDER CASE

THE STORY THUS FAR:

The thing that baffles Vance most is the jewel case. It had been opened with a steel chisel after unsuccessfully being pried with a poker. Spotswoode had gone out with Margaret Odell the night before she was murdered. When he left her he told Jessup to call a cab. They heard a scream from her room, but when they reached her door were told everything was all right. The next morning she had been found strangled. Vance believes two men were in the apartment, one in a clothes closet, the other the murderer. Investigation discloses that Cleaver has been seen with her the most, and finger-prints in the apartment lead to the identification of Tony Skeel.

CHAPTER XVI.

He hung up the receiver and rubbed his hands together.

"Now we're sailing," he rejoiced.

Vance had gone to the window, and stood staring down on the "Bridge of Sighs," his hands thrust deep into his pockets. Slowly he turned, and fixed Heath with a contemplative eye.

"Is simply won't do, don't y' know," he asserted. "Your friend, the Dude, may have ripped open that bally box, but his head isn't the right shape for the rest of last evening's performance."

Heath was contemptuous.

"Not being a phrenologist, I'm going by the shape of his finger-prints."

"A woeful error in the technic of criminal approach, Sergeant," replied Vance dulcetly. "The question of culpability in this case isn't so simple as you imagine. It's deuced complicated. And this glass of fashion and mould of form whose portrait you're carryin' next to your heart has merely added to its intricacy."

(Tuesday, Sept. 11; 8 p.m.)

Markham dined at the Stuyvesant Club, as was his custom, and at his invitation Vance and I remained with him. He no doubt figured that our presence at the dinner table would act as a bulwark against the intrusion of casual acquaintances; for he was in no mood for the pleasantries of the curious.

Rain had begun to fall late in the afternoon, and when dinner was over it had turned into a steady downpour which threatened to last well into the night. Dinner over, the three of us sought a secluded corner of the lounge-room and settled ourselves for a protracted smoke.

We had been there less than a quarter of an hour when a slightly rotund man, with a heavy florid face and thin gray hair, strolled up to us with a stealthy, self-assured gait and wished Markham a jovial good evening. Though I had not met the newcomer I knew him to be Charles Cleaver.

"Got your note at the desk saying you wanted to see me." He spoke with a voice curiously gentle for a man of his size; but, for all its gentleness, there was in it a timbre of calculation and coldness.

Markham rose and, after shaking hands, introduced him to Vance and me—though, it seemed, Vance had known him slightly for some time. He took the chair Markham indicated and, producing a cigar, he carefully cut the end with a gold clipper attached to his heavy watch-chain, rolled the cigar between his lips to dampen it, and lighted it in closely cupped hands.

"I'm sorry to trouble you, Mr. Cleaver," began Markham, "but, as you probably have read, a young woman by the name of Margaret Odell was murdered last night in her apartment in 71st Street. . . ."

He paused. He seemed to be considering just how he could best broach a subject so obviously delicate; and perhaps he hoped Cleaver would volunteer the fact of his acquaintance with the girl. But not a muscle of the man's face moved; and, after a moment, Markham continued.

"In making inquiries into the young woman's life I learned that you, among others, were fairly well acquainted with her."

Again he paused. Cleaver lifted his eyebrows almost imperceptibly, but said nothing.

"The fact is," went on Markham, a trifle annoyed by the other's deliberately circumspect attitude, "my report states that you were seen with her on many occasions during a period of nearly two years. Indeed, the only inference to be drawn from what I've learned is that you were more than casually interested in Miss Odell."

"Yes?" The query was as noncommittal as it was gentle.

"Yes," repeated Markham. "And I may add, Mr. Cleaver, that this is not the time for pretenses or suppressions. I am talking to you tonight in large measure *ex officio*, because it occurred to me that you could give me some assistance in clearing the matter up. I think it only fair to say that a certain man is now under grave suspicion, and we hope to arrest him very soon. But, in any event, we will need help, and that is why I requested this little chat with you at the club."

"And how can I assist you?" Cleaver's face remained blank; only his lips moved as he put the question.

"Knowing this young woman as well as you did," explained Markham patiently, "you are no doubt in possession of some information—certain facts or confidences, let us say—which would throw light on her brutal and apparently unexpected murder."

Cleaver was silent for some time. His eyes had shifted to the wall before him, but otherwise his features remained set.

"I'm afraid I can't accommodate you," he said at length.

"Your attitude is not quite what might be expected in one whose conscience is entirely clear," returned Markham with a show of resentment.

The man turned a mildy inquisitive gaze upon the district attorney.

"What has my knowing the girl to do with her being murdered? She didn't confide in me who her murderer was to be. She didn't even tell me that she knew any one who intended to strangle her. If she'd known, she most likely could have avoided being murdered."

Vance was sitting close to me, a little removed from the others, and, leaning over, murmured in my ear.

"Markham's up against another lawyer—poor dear! . . . A crumplin' situation."

But, however inauspiciously this interlocutory skirmish may have begun it soon developed into a grim combat which ended in Cleaver's complete surrender. Markham, despite his suavity and graciousness, was an unrelenting and resourceful antagonist; and it was not long before he had forced from Cleaver some highly significant information.

In response to the man's ironically evasive rejoinder, he turned quickly and leaned forward.

"You're not on the witness-stand in your own defence, Mr. Cleaver," he said sharply, "however much you appear to regard yourself as eligible for that position."

Cleaver glared back fixedly without replying; and Markham, his eyelids level, studied the man opposite, determined to decipher all he could from the other's phlegmatic countenance. But Cleaver was apparently just as determined that his vis-a-vis should decipher absolutely nothing; and the features that met Markham's scrutiny were as arid as a desert. At length Markham sank back in his chair.

"It doesn't matter particularly," he remarked indifferently, "whether you discuss the matter or not here in the club tonight. If you prefer to be brought to my office in the morning by a sheriff with a subpoena, I'll be only too glad to accommodate you."

"That's up to you," Cleaver told him, hostilely.

"And what's printed in the newspapers about it will be up to the reporters," rejoined Markham. "I'll explain the situation to them and give them a verbatim report of the interview."

"But I've nothing to tell you." The other's tone was suddenly conciliatory; the idea of publicity was evidently highly distasteful to him.

"So you informed me before," said Markham coldly. "Therefore, I wish you good evening."

He turned to Vance and me with the air of a man who had terminated an unpleasant episode.

Cleaver, however, made no move to go. He smoked thoughtfully for a minute or two; then he gave a short, hard laugh which did not even disturb the contours of his face.

"Oh, hell!" he grumbled, with forced good nature. "As you said, I'm not on the witness-stand. . . . What do you want to know?"

"I've told you the situation." Markham's voice betrayed a curious irritation. "You know the sort of thing I want. How did this Odell girl live? Who were her intimates? Who would have been likely to want her out of the way? What enemies had she?—Anything that might lead us to an explanation of her death. . . . And, incidentally," he added with tartness, "anything that'll eliminate yourself from any suspected participation, direct or indirect, in the affair."

Cleaver stiffened at these last words, and started to protest indignantly. But immediately he changed his tactics. Smiling contemptuously, he took out a leather pocket-case and, extracting a small folded paper, handed it to Markham.

(To be continued.)

"You're not on the witness-stand in your own defence, Mr. Cleaver, however much you appear to regard yourself as eligible for that position."

His Hearing Restored

The invisible ear drum invented by A. O. Leonard, which resembles a miniature megaphone fitting inside the ear, entirely out of sight, is helping the hearing of a great many people. Mr. Leonard invented this drum to relieve himself of deafenss and head noises, and it does this so successfully that no one could tell he is a deaf man. A request for information to A. O. Leonard, 70 Fifth Avenue Suite 437, New York City, will be given a prompt reply.—Advt.

A Good Rule

The plain rule is to do nothing in the dark, to be a party to nothing underhand or mysterious.—Dickens.

The office cynic says he felt instantly relieved this morning when reading over the proposed new Tariff Bill, in full detail, to find unmanufactured lava on the free list.

Sammy (aged 7)—"Mamma, can I have another helping of turkey?" Stern Parent — "No, darling, you have had enough." Sammy — "But, mamma, II don't want enough. I want too much."

Ambassador Dawes proposes to introduce the loving cop into dinners of Senators, etc., the cup "to be filled with the national beverage." Nominations are now in order: grape juice, milk, ice cream soda, ginger tea, malted milk, or cider?

A contemporary says that he cannot think of anything that looks as awful as a woman regrowing her hair; unless it's a darn that a man tries to put in his sock.

Perhaps Prof. Clark is correct in saying that college does not increase a man's income. On the other hand, it teaches him how to live without hats and garters.—The New Yorker.

Aborigines' Welfare Studied in Australia

Canberra, Australia—A comprehensive policy for the protection and welfare of the Australian aborigines has been laid down by the Home Affairs Department of the Commonwealth Government. Great care is being taken and much expense involved in an endeavor to provide for this race. The total number of aborigines in Australia is now about 21,000, and they inhabit the vast empty spaces of North and Central Australia, where the white population is only about 400.

Nearly all of them are under supervision in some form or other. Many work on cattle stations, others are cared for by the missions, and a number of them are under direct charge of government officials appointed for the purpose. There are altogether about 40 official protectors of aborigines with full authority to relieve distress by the issue of rations and clothing, and all the missions receive government subsidies to aid them in their work. The station owners also do valuable work by providing accommodation and rations for the wives, families and relatives of the blacks employed on their properties. For instance, to employ 25 black boys on a cattle station generally involves the station owner in keeping of a colony of about 100, consisting of the families and relatives of those employed.

The task of attending to the welfare of the blacks is a very difficult one, largely owing to the childlike minds of these primitive people. They do not appreciate what is being done for them and frequently will not make use of the facilities provided for their comfort, and more often than not they prefer to live according to their native habits.

High Grade Rice

Sydney, N.S.W.—The final report of the rice harvest for this year from the Murrumbidgee irrigation area in this State shows that 23,000 tons of first grade grain was brought into store. There is a Rice Marketing Board, and this body rejected all rice below the milling standard, leaving growers to sell this as they pleased.

The total is more than is required for all Australian requirements. The harvest of last year yielded 18,000 tons, or 5000 less than this year's, and there is still 4000 tons of it on hand in the terminal wheat elevators at the waterside in this city. It is expected that this surplus will find a market outside Australia, as the rice is of special quality, and would be esteemed even by the people of rice-growing countries.

The woman doesn't always pay and pay. Sometimes she charges and charges.—Arizona Producer.

Stop Colds with Minard's Liniment.

Real Dyes are *easier* to use

DIAMOND DYES are used by practically the same method as any other dye. They go on easier, though—more smoothly and evenly; without spotting or streaking. That's because they are made from real anilines, without a trace of fillers to injure fabrics or give things that redyed look.

Diamond Dyes *contain the highest quality anilines that money can buy.* That's why they give such clear, bright, new-looking colors, which keep their depth and brilliance so remarkably through wear and washings.

Next time you have dyeing to do, try Diamond Dyes—at our risk. See that they *are* easier to use. *Then compare results.* You will surely agree Diamond Dyes are better dyes. The *white package* of Diamond Dyes is the highest quality dye, prepared for general use. It will dye *or tint* silk, wool, cotton, linen, rayon or any mixture of materials. The *blue package* is a special dye, for silk and wool only. With it you can dye valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The *blue package* dyes silk or wool only. The *white package* will dye every kind of goods, including silk and wool. Your dealer has both packages.

Diamond Dyes

Sun Proof

EASY TO USE-BETTER RESULTS

Diamond Dyes contain the highest quality anilines money can buy. And it is the anilines that count. They are the life of dyes; the source of their rich colors; brilliance and permanence.

A Steel Trail to the North

Up in the Far North—just under the Northern Lights—Canada is rushing to completion the greatest railroad building feat in history. Shining steel rails, 510 miles of them, are steadily pushing back Canada's last frontier at the rate of a mile a day, carrying it beyond the timber line, across the glacial ice of the Barren Lands, to Hudson Bay.

Why is Canada spending some $50,000,000 in building a railway to a point which is free from ice for shipping only four months in the year? There are four important answers to this question: (1) wheat; (2) cattle; (3) freight; (4) ore.

Annually Canada ships to England immense quantities of wheat and hundreds of thousands of cattle and horses. Now the shortest way to ship commodities from Western and Central Canada to England is from a point on Hudson Bay. By sending cattle over such a route rather than by the present route through Montreal, from two to three weeks of feeding and maintaining in transit would be saved, and the animals would be in much better condition when they reached England.

Back in 1911 the Canadian government, with the certainty of shipping wheat and cattle, and with the possibility that valuable ore might be discovered and mined by means of the northern railroad, began laying rails from The Pas where the prairie ends, to the mouth of the Nelson River on Hudson Bay, at the same time beginning to build a complete port at the terminal, with waterways, docks, warehouses, grain elevators, etc., sufficient to accommodate ocean-going steamers.

The project proved exceedingly difficult, but it was continued through the war with the idea that if German submarine should close the southern route between Canada and England, Canadian materials and men could be sent via Hudson Bay and north of Newfoundland.

The war over, the Canadian government inaugurated a policy of retrenchment, and work on the railroad was abandoned. During the next ten years what had been done on the 356 miles of railroad went to wreck and ruin. The roadbed sank into the muskeg. The ties decayed. It was impossible for anything heavier than a handcar drawn by dogs to run over it. Many Canadians thought it would never be rehabilitated.

But the advocates of the railroad got the government to resurvey the whole project. An impartial English railroad expert, Mr. Frederick Palmer, was brought over to give an unbiased opinion on whether it would be wiser to complete the railroad, or abandon it forever.

This was early in 1927, before the breakup of the ice and snow which cover the country for nearly seven months in the year. To get Mr. Palmer and his surveyors to Port Nelson, 500 miles away, would have taken weeks by dog teams. But man's new transportation aid, the airplane, was called upon and covered the distance in five hours. At the same time another very important survey had to be made hundreds of miles farther north. Again the airplane did the work, transporting men, food, fuel, clothing, tents, medical supplies, tools instruments, and other supplies. The planes flew in all kinds of weather, the thermometer dropping to 50 and 60 below sometimes.

At the end of his survey Mr. Palmer recommended that the railway be reconstructed and the road laid into Churchill, a point 60 miles north of Port Nelson which the ice survey had proved to be a better site for the port. The government began work at once. To save a year's delay 14 men, 800 pounds of dynamite and eight tons of other material had to be got to Churchill at once. Airplanes did it.

Now came the task of rebuilding the railroad. While work was going forward on the old railroad, tractors were sent to Port Nelson and everything that could be pried loose from the old construction was piled on sleds and hauled 60 miles over the ice to Churchill. Sections of the bridge, steel girders, piles and lumber were towed there on scows during the summer. It was a $6,000,000 moving day in the frozen north!

Meanwhile new ties had to be laid and old ones dug out of the old roadbed, new bridges constructed, new gravel dug and hauled from new pits and dumped into the muskey to fill it. Thus was the old road rejuvenated for 356 miles

The route over the new section of the country soon proved to be much more difficult than than over the old road had been. The Nelson River—as wide as the Hudson—had to be spanned. This was done successfully and permanently. Fifty miles beyond the Nelson River the timber line ends. The remaining distance is over the famous Barren Lands, where nothing but carbou moss grows. It is also nearly 25 per ent. water. Trenches had to be dug to drain the water from th route and corduroy logs laid as a foundation for the gravel and rails.

To prepare the roadbed laborers from Belgium, Holland and Scandinavia were imported by the government, to work on a yardage basis. This plan was found to be very satisfactory because the men could work during the long Arctic day as late as they liked. In the Barren Lands the laborers struck ice only a few inches below the muskeg. It was blue, showing that it was of glacial formation and must have been there fo rages. Even during the summer it was necessary to blast out the ice.

Then the freeze-up came. Every body expected that the work of track laying would stop. But the construction engineers believed that, since the ground was frozen so hard during the winter, it would save half a year if they could lay down the ties and spike down the tracks on top of the ice and snow. They determined to try to lay the rails the remaining 80 miles to Churchill. The following summer they would jack them up and fill in with gravel.

When the old railroad builders heard of this they said it could not be done. But it was done!! Through blizzards, snowstorms, freeze-ups and winds as high as 60 miles an hour the work train with the big track-laying machine at the front laid the track down on the ice and snow. The locomotive behind the train, with tractors, snowmobiles and dog teams by its side, and the airplanes overhead, literally pushed back Canada's frontier a mile a day across the ice and snow of the Barren Lands right into Churchill before the end of last March.

Since then men have been jacking up the tracks, draining the glacier formation, while gravel trains have been pouring in the foundation of the trail to the Far North.

The work is nearly finished now. The first passenger train, equipped with Pullman cars, will be running before the freeze-up. Jack Frost has been licked.

Meanwhile work on building the seaport is progresing. Most encouraging of all, copper and gold have been found in quantities so large that an 80-mile railroad spur has had to be built to the Flin Flon mine.

Sixty million dollars will be spent in this section of the country. Already thousands of men, women and children are following the trail of '29 to the last frontier of this continent—just under the Northern Lights.—Condensed from The New York Herald-Tribune Magazine.

Canada Improves Her Shipping Facilities

DRYDOCK UNDER SHADOW OF AN OLD FORTRESS

Size of Lauzon drydock, Levis, across river from Quebec City, is seen by comparison with steamer berthed in farther end.

Secure Control Of Airways Firm

Drury & Co., Montreal, Take Over Canadian Trans-Continental

Drury & Co., of Montreal, have acquired controlling interest in Canadian Transcontinental Airways Limited. The head office of the Canadian Transcontinental Airways Limited is in the City of Quebec and the company's airdrome is situated about four miles west of Quebec.

The company has several air-mail contracts, including Ottawa-Montreal, Montreal-Rimouski, Quebec - Seven Islands, Moncton-Magdalen Islands, Moncton-Charlottetown.

Col. R. H. Mulock has been appointed general manager of the company and Robert Cannon who was formerly general manager, has become vice-president.

In purchasing control of this company, Drury & Co. were acting on behalf of Aviation Corporation of Canada Limited, a company recently incorporated, which already controls International Airwas of Canada, Limited, Interprovincial Airwas Limited, successor to Fairchild Aviation Limited and Canadian Airwas Limited.

Ishbel Doesn't Use Make-up

Not Even Powder for Her Nose—On the Other Hand She's Not

Miss Ishbel MacDonald, healthy and engaging 26-year-old daughter of Britain's Scottish Premier, uses no make-up on her face, does not even powder her nose.

In a conversation with correspondents aboard the Berengaria she commented that she never used complexion helps preferring the natural complexion given her by years in the Scotch highlands.

"Make-up?" she answered a question, "No, I don't even powder my nose, although I sometimes have been urged to do so."

"I'm not fond of knitting and I am not a housekeeper," she said, adding she had been greatly misrepresented in her domestic leanings.

PROTECTING OUR GAME RESOURCES

Fair minded sportsmen are realizing that it is high time to pursue a policy of careful conservation and proper protection if Canada's game is to be saved.

Hensley: "I say, Jones! Can you define a pessimist?" Jones: "Yes, he's a man who, when given the choice of two evils, takes both of them."

Within its limits, the Royal Winter Fair is a national medium for drawing the nine provinces more closely together through ther community of interest in agriculture.

Nonagenarian Husband Buried Beside Heroine of Long Point

Epic Story of Abigail Becker Who Saved Lives of Eight Recalled

Simcoe, Ont.—The epic exploit of Abigail Becker, heroine of Long Point, was recalled when her nonogenarian husband was buried in Oakwood cemetery Thursday afternoon last.

The heroine died in 1905 and it is 75 years since her gallant efforts resulted in the saving of the lives of eight men from the ship Conductor, which foundered during the great storm of November, 1854.

Listed as one of the early heroines of Ontario, her deed commemorated by a poem in the old fifth reader, it came as a surprise to people even in Simcoe to learn that her husband had just died in Vancouver. The couple were married in 1869 and lived on a farm at Walsingham Centre, purchased with gifts to the heroine by Queen Victoria, the parliament of Canada and the merchants of Buffalo, in recognition of her bravery.

Here her 19 children were born. There were also two adopted children and six step-children.

Miss Eleanor Rohrer, who accompanied the remains of her father to Simcoe, announced that she intends to present to the Norfolk Historical Society the gold medal presented to her mother by the American Humane Society, on which is inscribed the story of her heroism. The rocking chair sed by her mother and the family Bible will also find a place in the museum.

A crayon portrait will be hung in the Abigail Becker room at the Simcoe hospital.—Mail & Empire.

Canada Will Move Slowly in Matter

Policy Towards Russia Will Be Decided Following Canvass

Ottawa.—News that the British Government is concluding pourparlers with the Russian Government for the renewal of diplomatic relations has not produced any immediate reaction here. It is likely that the Canadian Government will proceed slowly in the formation of its policy towards the Soviet republic until the sentiment of the whole Dominion can be canvassed on the subject. Cabinet does not meet until next week, and several important members of the Cabinet are absent.

Since Government recognition of the Russian trade commission was withdrawn several years ago, a number of trade agencies of the Soviet republic have been established in Canada. The attitude of the Canadian Government has been that while it cannot recognize the Russian Soviet officially until public opinion in Canada has been clarified on the subject, there is nothing to prevent the establishment of trade relations between the private citizens of this country and Russia.

Canada's exports to Russia have fallen off in the last few years. In the fiscal year ended 1926, Canadians sold to Russia goods to the value of $3,788,266. In the following year this figure dropped to $2,407,206. In 1928, Canada's exports to Russia were valued at $2,224,430, and in 1929 they increased to $2,983,629. Imports, which are increasing slightly, totalled in the last 12 months only $373,331.

These figures are taken from official records. It has been pointed out, however, that they may be incomplete because many shipments to and from Russia are reshipped in London, and orders are sometimes placed through London agencies.

Labor Members In Convention Slang the Chair

Called "Filthy Cur"—Kirkwood Resents His Exclusion from Program

Brighton, Eng.—An uproar resulted at the Labor party convention Thursday, when the chairman, Hon. Herbert Morrison, endeavored to apply closure after limiting discussion on Rt. Hon. Philip Snowden's address to only two speeches.

Kirkwood, Glasgow member of Parliament loudly protested. "This is twice you have deliberately kept me out," he shouted.

"You have no right to make a statement like that," the chairman returned. "Neither Kirkwood nor anyone else has any privileges here."

He was cheered.

More disorder ensued as the chairman said he had chosen those speakers he believed most likely to make a useful contribution to the discussion.

"You have no right to say that," Kirkwood returned, heatedly "My record in the labor movement will bear the fullest investigation."

"Kirkwood need have no worry that he would not be in the headlines," the chairman declared.

"You filthy cur!" another delegate shouted at the chairman. "Why do you say a thing like that?"

A formal protest against what he called the "studied offensiveness" of the chairman was here entered by James Maxton, chairman of Labor's left wing, the Independent Labor party, and the incident closed for the moment.

An established policy of the Royal Agricultural Winter Fair Association is to make the Royal Fair representative of every sub-division of the Dominion.

Traffic Officer Found Injured

Picked Up Unconscious Beside Wreck of Motorcycle

Hamilton.—Found lying on the roadside, inured fatally, it is feared, Traffic Officer Fred Bingley of Hagersville, as brough to St. Joseph's hospital Thursday night last. His motorcycle was wrecked against a tree. What occurred the officials are at a loss to know. Bingley is still unconscious and suffered a fracture of the skull, it is believed.

J. McDougall, Hamilton, was driving two miles south of Caledonia on the provincial highway about 7.30 o'clock when he saw the prostrate form just at the edge of the cement. A few feet away lay the motorcycle, smashed beyond repair. McDougall hurried into Caledonia with the injured man and after medical attention he was brought on to the local hospital. His left leg was badly crushed and there is a long deep laceration on the scalp. Bingley suffered also from loss of blood, but it is not known what time elapsed between the time of the accident and the discovery.

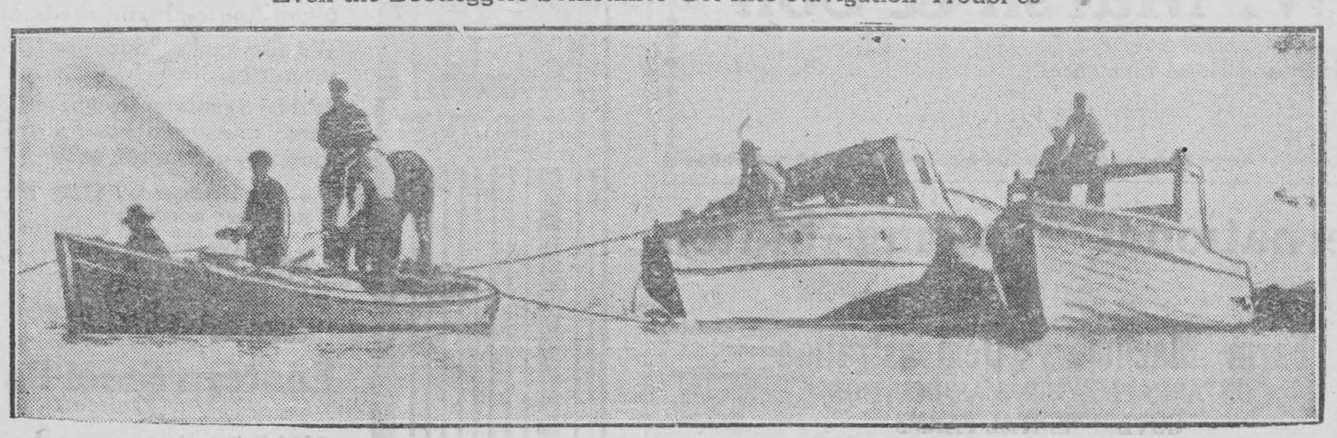

As an exhibition the Royal Winter Fair is unique. It is held indoors in its own permanent buildings, covering twenty acres, erected at a cost of $2,000,000, almost in the heart of Toronto.

NORTH MAGNETIC POLE IN CANADA

The north magnetic pole is located in Boothia peninsula on the Arctic coast of Canada and the south magnetic pole in South Victoria Land south from New Zealand.

The outstanding features that mark the Royal Winter Fair are:—1. Its distinctively national, all-Canadian character; 2, Its broad scope and wide variety; 3. Its international tone through the competitive entries from the United States.

The Markets

PRODUCE QUOTATIONS.

Toronto wholesale dealers are buying from country shippers at the following prices:

Eggs—Ungraded, cases returned, fresh extras, 44c; fresh firsts, 39c; seconds, 29c.

Butter—No. 1, 40¼ to 40¾c; No. 2, 38½ to 39c.

Churning creamFSpecial, 43c; No. 1, 42c; No. 2, 39c.

Cheese—No. 1 large, colored, paraffined and government graded, 20 to 20¼c.

PROVISION PRICES

Toronto wholesale dealers are quoting the following prices to the trade:

Smoked meats—Hams, med., 32 to 37c; cooked loins, 50 to 53c; smoked rolls, 28c; breakfast bacon, 26 to 37c; back, pea-mealed, 38 to 40c; do, smoked, 45 to 47c.

Cured meats—Long clear bacon, 50 to 70 lbs., 24c; 70 to 90 lbs., 22c; 90 to 110 lbs., 21c. Heavyweight rolls, 40c. Lightweight rolls, 25c.

Lard—Pure, tierces, 16c; tubs, 15¼c; pails, 16¾c; prints, 18 to 19c. Shortening, tierces, 14 to 15c; tubs, 14½c; pails, 15c; tins, 17c; prints, 16c.

Pork loins, 33c; New York shoulders, 22c; pork butts, 27½c; pork hams, 27½c.

GRAIN QUOTATIONS.

Grain dealers on the Toronto board of trade are making the following quotations for car lots:

Man wheat—No. 1 North, $1.48½; No. 2 North., $1.45½; No. 3 North., $1.42½; No. 4, $1.37½; No. 5, $1.26½; No. 6, $1.06; feed, 93½c (c.i.f. Goderich and bay ports).

Man oats—No. 1 feed, 68c; No. 2 feed, 65c

Man. oats—No. 1 feed, 68c; No. 2 feed, 65c.

Am. corn—No. 2 yellow, $1.12½ (all rail, del. Toronto freight).

Millfeed, del., Montreal freights, bags incuded—Bran, per ton, $34.25; shorts, per ton, $34.25; middlings, $41.25.

Ont. grain—Wheat, $4.30 to $1.32. Oats, 55 to 58c. Barley, 70 to 75c.

LIVESTOCK QUOTATIONS.

Heavy beef steers, $8.50 to $9.50; butcher steers, choice, $9.25 to 9.50; do, fair to good, $8 to $8.25; do, com., $5.75 to $7.50; butcher heifers, choice, $9.25 to $9.50; do, fair to good, $8 to $8.75; do, com., $6 to $7.50; butcher cows, good to choice, $6.50 to $7.25; do, com. to med. $5 to $6; do, canners and cutters, $3.50 to $4.50; butcher bulls, good to choice, $6.50 to $7.25; do, med., $6 to $6.25; do, bolognas, $5,25 to $5.75; bab beef, $10 to $14.50; feeders, good, $8 to $8.50; do, fair, $7 to $7.75; stockers, good, $7.50 to $8; do, fair, $6 to $7; calves, good, $15 to $16; do, med., $10 to $14.50; do, grassers, $6 to $7; springers, $110 to $125; milkers, $75 to $100; lambs, choice, $11; do, bucks, $8; sheep, choice, $6 to $6.50; do, med., $5 to $5.50; hogs, bacon, w.o.c., $12.75; do, selects, $1 per hog premium; do, butcher, 75c per hog discount; do, trucked in, 50c cwt. under w.o.c.; do, f.o.b., price $1.25 cwt. under w.o.c.

Unique Revolution Is Seen in Britain

Minister of Works Comments on Labor Conference at Brighton

London.—Right Hon. George Lansbury, Minister of Works, in commenting on the Labor party conference at Brighton, expressed his belief that Britain is undergoing a remarkable revolution.

This, he said, as certainly true and best demonstrated in the field of foreign affairs. The evacuation of the Rhineland, the signing of the optional clause in The Hague Covenant, the resumption of relations with the Union of Soviet Socialist Republics, the naval negotiations with the United States, the settlement of the vexing reparations question and the attempt to reach an agreement with Egypt, he pointed out, had all been achieved since the Labor Government got into power, and now efforts are being directed to secure satisfaction for Indian aspirations.

There are rumors that the Government intends granting Dominion status to India, an announcement concerning which will be made when Parliament reassembles. No confirmation of this can be obtained, and it is unlikely that the Government will do anything until the Simon Commission makes its report. In the opinion of ministers, however, Dominion status for India must come and India must take her place among the other Dominions of the Empire.

SIMON REPORT

How this can be achieved only the Simon report will show, but it is understood that Labor is anxious to add a settlement with India to its catalogue of achievements to present to the country at the appropriate moment.

Meanwhile Laborites are warning the Cabinet that while success in the field of foreign afiairs is gratifying, the acid test is unemployment. On Wednesday next Right Hon. J. H. Thomas will again meet the coal owners in an endeavor to learn from them how they are going to copete in the Canadi n market with American coal. He hopes to have also some results in the mixing of British and Nova Scotia coal, experiments in which are now taking place.

Mr. Thomas brought back quantities of Nova Scotian coal from his recent trip to Canada for this purpose and he believes that if proper mixing can be achieved, not only will British coal exports to Canada increase but also consumption of Nova Scotian coal will rise in opposition to American coal.

ONE THOUSAND WILL MARK THEIR LAST BALLOT ON OCTOBER 30TH

Mr. Editor.
Dear Sir:—

Allow me to give the public, through your paper, some thoughts on why the election was brought on one year before it should have been. There is nothing allowed by God that he cannot over-rule for good. The word of God says we can know his will. We believe we are coming to a crisis in the history of Ontario. The first thought is party. Party has no part in bringing the world to Christ. In fact, it was party that put Christ on the cross. Neither is there any virtue in organizations of the human man. No other name whereby we can be saved but through Christ. That is why we are told in Gods word, 'Take no thought what we will say. Why? Because God will meet our needs when it is required as He did to Abraham in offering his son Isaac. So, my friends, dont be led astray by human thought. God is not mocked. Whatsoever a man sows, of that will he reap. The word of God says no drunkard will inherit the Kingdom of God. I am aware of what the Ferguson Government say, but it is untruth. They are putting the temptation before them, and making it easier for them to become drunkards. Christ says His kingdom is not of this world. I left Party some years ago. It is the seed of opposition to christianity. And proof of that is why I am, if spared, going to vote for Norman Beach, the appointed candidate for temperance people, which was one week before the party selected their man.

I am not ashamed of the Gospel of Christ. I have no use for the secret ballot. It was introduced to do the crooked work of the parties. This election is proof of those who are the children of God, and if this test does not show the power of God to the ministers of Ontario, there will be other means used. I pray God to allow me to live till after the election.

I am on borrowed time. You ministers be consistent. Either support the Gospel of Christ or resign your relation to any church of Christ, and then you are at liberty to vote for liquor. This vote will have a great bearing when the second coming of Christ will be.

I hope to write you again. I have only touched on the truth of God's word.

Yours in Christ's teaching,
B. S. WICKWARE.

. . . Why you should ANSWER PROMPTLY

BY the time this woman finishes her hand of bridge and reaches the telephone the party calling will have given up. The tardy bridge-player will be told "Sorry — there's no one on the line now, Madam".

Both of them will be annoyed—the person calling and the person called. Both of them have wasted time. Remember—it takes three to complete a call—

There are over one million local calls in Ontario and Quebec every day which fail to get through. These uncompleted calls mean two million minutes a day wasted—congestion of traffic—constant irritation—a handicap to business.

Some of them are unavoidable and some of them are our own errors. But many of them are mistakes made by the person calling or the person called. It takes three people to complete a call.

We are constantly striving to reduce our own errors. We are now pointing out some of the common errors in telephone usage because our aim is to provide the best possible telephone service* and in telephone service, co-operation is essential.

Answer promptly when your telephone rings. If it is not conveniently located in your home, consult us about it. And when you make a call, wait a reasonable time before giving up and causing a "No one on the line now".

**Extensive new construction and replacements of both local and long distance telephone plant will mean an outlay in 1929 of more than $27,000,000.*

A STITCH IN TIME SAVES NINE

This age-old adage applies just as well to the eyes as to other things.

It is a peculiar fact, that in spite of the splendid facilities now availabe for the scientific examination and care of the human eye, many people disregard the Optometrist's existence until they have eye-strain to such a degree as to make them uncomfortable.

Many people who dread the thought of wearing glasses would never have to wear them, except perhaps for reading, if they would consult a competent Optometrist in time.

The best time to have your eyes examined is before you feel your eyesight failing, not after. It is dangerous to gamble with your eyesight.

Eyes should be examined at least every two years, and, under some conditions, more often. Phone for an appointment.

OUR CORRESPONDENTS

WILLIAMSBURG

Miss Blanche McGruer of Dixons was a week-end guest of Miss Marion Locke.

Mr and Mrs. Lynden Shannette of Ottawa spent last week-end at their parental homes.

Mr. Alfred Casselman of Queens University, Kingston, spent last week end with his parents, Mr. and Mrs. R.C. Casselman.

Mr. and Mrs Edgar Alguire and family spent one day last week with Mr. and Mrs Bert Whitteker, Kenmore.

Miss Jean Webb, Ottawa, is spending this week at the home of her father, Mr. A. Webb. Miss Webb is leaving shortly for Toronto, where she has secured a position.

We are pleased to report Miss Dorothy Buchan has returned home and is convalescing after her recent operation.

Mr. and Mrs. Reginald Perrault of Massena, N.Y., were guests of Mr. and Mrs. Ora McIntosh last Sunday.

Mr. and Mrs. F.J. Donevan and baby returned to their home in Oshawa the latter part of last week. They were accompanied by Mr. Edgar McIntosh as far as Kingston to spend a week.

Miss Opal Hess, R.N., spent last Sunday with Miss Lorraine Buchan.

The Misses Violet Trickey and Clara Hill and Messrs Grant Algire and Fielding Smith were in Merrickville over the week-end, attending the Convention of the Young Peoples League.

R. M. D. WILLIAMSBURG

Mrs. Wm. J. Whitteker spent Tuesday with her sister, Mrs. Wm. L. Casselman.

Misses Sarah and Mae Merkley and Mrs. Lillian Myers of Toronto spent one day last week visiting at the home of Mr. Frank Merkley.

Mrs Archie Casselman and daughter spent Wednesday with Mr. and Mrs. Harold Whitteker.

Mr. and Mrs. Joe Adams visited their daughter, Mrs. Archie Casselman.

Mrs. Debbie Whitteker and Mr. Robert Whitteker, Mr. and Mrs. Clifford Casselman and little daughter visited Mr. and Mrs. Willie Whitteker of Rowena.

Mrs. Thos. H. Casselman spent last week visiting Mrs. Mayme Shennette and Mrs. Stanley Saddlemire.

Guests at the home of Mr. Frank Merkley on Sunday were Mr. and Mrs. George Jackson and Mrs. Amie Collison of Massena, Mr. and Mrs. Lennnie Merkley and Miss Pauline Saddlemire.

Mr. Genzimer Whitteker and Mr. Robert Henderson visited Mr. and Mrs. Wm. L. Casselman.

GLEN BECKER

Mr and Mrs. Earl VanAllen and family motored to Ottawa Sunday and spent an enjoyable day there.

Mrs. Thos. Casselman of Williamsburg returned home on Friday after spending a few days with friends at Morrisburg and relatives here.

Mr. and Mrs. Geo. Hall and son John were callers at Dalton Saddlemire's on Saturday evening.

Mr. and Mrs. Gordon Render of Iroquois were Sunday visitors at Mr. Stanley Saddlemire's.

Mr. and Mrs. Wm. Beckstead and Mr. Omer Beckstead spent Sunday at Mr. Harvey Beckstead's, Froatburn

Miss Pauline Saddlemire spent a few days last week with her aunt, Mrs. Frank Merkley, Williamsburg.

Mrs. Mayme Shennette of Morrisburg and Mrs. Thomas Casselman of Williamsburg, spent Thursday last with Mrs. Stanley and Mrs. Howard Saddlemire.

Mr. and Mrs. Chas. Watson, accompanied by Mr. and Mrs George Eligh of Finch, Mr. and Mrs. Leslie Stephenson and baby Norma of Cornwall spent one day recently with Mr. and Mrs. Ed Vincent, Massena, N.Y.

Mr. and Mrs. Stanley Saddlemire and children spent Sunday with Mr. and Mrs. Roy Styles, Froatburn.

Mr. and Mrs Stanley Saddlemire spent Tuesday at Iroquois.

STRADERS HILL

Mr. and Mrs. Clint, Pitt and son Stanley were guests of Mr. and Mrs Ross Hanson Sunday.

Mr. and Mrs. Earl Johnston and baby were visitors at Mr and Mrs. Edwin Johnston's Sunday.

Mrs. Elizabeth Strader spent the week-end with Mrs. Eslie Pitt.

Mr. and Mrs. John Casselman spent Monday with Mr. and Mrs. Orlando Cook.

Miss Dora Hanson is spending some time at her home here.

Mr. Guy Strader made a business trip to Morrisburg Monday.

Visitors at Mr. Henry Hanson's Sunday were Mr. Tunas Hart and Miss Carrie Hart of Newington; Mr. and Mrs. John Bogart and Miss Willa Bogart of Elma, and Mrs. Sarah Weaver.

CEDAR GROVE

Mr. Robt. Dafoe spent Sunday with Mrs. Isaiah Gallinger of Gallingertown.

Mr. Harry Buchanan spent Monday in Cornwall.

Sunday visitors at the home of Mr. and Mrs. Milton Crites were Mr and Mrs. J. Fetterly of Grantley, Mr. and Mrs. Fred McIntosh, 2nd Con., Mr. and Mrs. Wilbert Crites, Pleasant Valley.

Mr. James Vance of Ottawa visited Mr and Mrs. W.A. Wereley over the week-end.

Mr. and Mrs. Julius Beaupre and Miss Jean were Sunday visitors of Mr. and Mrs. Simeon Crites, Gallingertown.

Mr A.C. Fetterly of Cornwall was a business caller in the Grove on Monday.

Mr. and Mrs. Fred Dafoe and Miss Greta spent Sunday with Mr. and Mrs. J Graduau, Bush Glen.

Mr. and Mrs. W. Dafoe, Santa Cruz, were the guests of Mr. and Mrs. Selim Shaver, Oct. 6th.

WILLIAMSBURG COUNCIL

The Council met at Williamsburg, on Saturday October 5th, 1929. Members all present. Minutes of previous meeting read and adopted. The bonds of the collectors were accepted. By-laws were passed appointing tax collectors and for levying the assessments for current year. The rates are as follows:

County rate, 18.3-10 mills; township rate, 6.5-10 mills; township school grant 6.8-10 mills.

The following accounts were passed:

Ben Barkley, part pay on 3 cord stone	$ 9.00
Chas. Hart, moving crusher	4.00
Jas. Cunningham, hauling gravel	8.53
Mrs. T. Gordon, cedar and gravel for Nash bridge	4.00
Lyle Casselman, work on Nash bridge	5.00
John Colquhoun, work on Nash bridge	2.00
Hugh McHaffie, hauling plank, Nash bridge	1.50
Corrie Brown, hauling tile	4.50
Henry Whitteker, work on bridges and crusher	23.00
P.E. Barkley, spikes for bridges	1.25
Nathan Tupper, work on culverts	5.75
George Dennison, part pay on 10 cord stone	30.00
H.A. Gallinger, work on road	5.00
Roland Froats, cedar for culvert	.35
Wm. Lane, part pay on 9 cord stone	27.00
G.W. Colquhoun, hauling cedar	5.40
Jas. Gow, hauling gravel	41.00
Ora McIntosh, work Whitteker gravel pit	25.00
Bernice Gallinger, part pay on 2 cord stone	6.00
Ezra McMillan, pay on salary as Road Supt.	62.50
Arthur Beckstead, services as fence viewer	2.00
C.W. Brown, services as fence viewer	2.00
Wm. Wallace, services as fence viewer	2.00
Arthur Beckstead, assisting engineer, H. Beckstead award	2.00
Howard Beckstead, assisting engineer H. Beckstead award	3.00
Leader Pub. Co., printing	10.00
Workmen's Compensation Board, bal. assessment	3.12
John Keeler, progress estimate Saddlemire drain	480.00
C.N.R., crossing gates account July and Aug.	67.80
A.J. Casselman, box stamped envelopes	11.00
P.J. Reddick, damage to crops, Saddlemire drain	10.00
Geo. Zeron, damage to crops Saddlemire drain	15.00
John Reddick, balance contract Casselman branch drain	510.92
Geo. Brown, services Casselman branch drain	93.75

The Council adjourned to meet again at Williamsburg on Saturday Nov. 2nd, 1929, at one o'clock p.m.

M.S. BECKSTEAD, Clerk.

AUCTION SALE

The undersigned will sell by Public Auction on the premises, Lot 11, Concession 2, Matilda, on Wednesday October 23rd, commencing at one o'clock, the following:

10 high grade Ayrshire milch cows, supposed to be in calf; 4 heifers, rising two years; 5 heifer calves; 1 bay horse, 5 years old; 1 brown mare, 12 years old; 1 colt, rising 3 years old; 1 bay mare; 1 brown mare; 1 brood sow; 7 shoats, weight 100 lbs. each; hens; 1 Frost and Wood grain binder; 1 Massey-Harris hay loader; 1 Frost and Wood mower, 6 foot; 1 Massey-Harris horse rake; 1 McCormick Deering cultivator; 1 Cockshutt 15-disc drill; 1 Cockshutt 2-horse cultivator; 1 scuffler; 1 set harrows, 12 ft.; 1 set harrows, 6 ft.; 1 14-disc harrow outhrow; 1 2-furrow riding plow, Cockshutt; 1 Perrin sulky plow; 2 walking plows; 1 roller; 1 truck wagon, hay rack; 1 milk wagon; 1 buggy; 1 Lister milking machine; 1 Canuck 3-h.p. engine; 1 pump jack; 1 set scales, 2000 lbs. 1 pr. sloop sleighs; 1 cutter; horse fork, rope and pulleys; cross-cut saw; forks and shovels; chains; 1 mow hay; 500 bu. mixed grain; potatoes; 16 cords wood; 3 water tanks; 1 grind stone; 1 wheel barrow; 1 colony house; 2 sets double harness; 1 milk harness; 1 single harness; mail box; Magnet cream separator; barrel churn; 1 30-gal. milk can; 2 milk pails; 2 strainers; 1 Beach range; 1 Quebec heater; 1 coal stove; 1 8-day clock; 1 extension table; 2 dressers and washstands; 3 beds, springs and mattreses; 1 feather bed; 1 side board; 1 couch; chairs and rockers; 1 organ quantity of canned fruit many other articles.

Ross Morrow, Auctioneer,
WM. R. WHITTEKER,
ac Proprietor.

NUDELL BUSH

Guests on Sunday at the home of Mr. Melvin McIntosh were Mr. and Mrs. Harold Dillabough, Mr. Harry McIntosh of Massena, N.Y. and Mrs. and Mrs. Fred McIntosh.

Mr. and Mrs Alva Henophy spent Sunday at Mr. Gilbert Becksted's, Froatburn.

Mr. and Mrs. Harvey Phillips were in Morrisburg on Monday.

Mr. Richard Markell called in Aultsville on Monday.

Mr. Patrick Henophy spent a few days with friends at Cardinal last week.

Mr. Arthur Henry made a business trip to Farrans Point on Wednesday.

Mr. and Mrs. Alva Henophy and family spent Tuesday in Cornwall.

Mr. George Anderson passed through here on Wednesday.

Mr. Harold McIntosh was in Aultsville on Wednesday.

Mrs. George O'Shaughnessy spent a few days at her home last week.

The Dundas County Prohibition Union

The Dundas County Prohibition Union desire to refute the rumor which is being freely circulated that their candidate, Mr. N. W. Beach, has or will be withdrawn. Mr. Beach and his workers,, who are meeting with encouraging results in this campaign, will continue the fight for the election of their Prohibition Candidate until the night of October 30th.

Dundas County Prohibition Union.

ANNOUNCING

1930 NASH "400"

WORTHY SUCCESSOR TO A GREAT SUCCESS

TWIN-IGNITION EIGHT

TWIN-IGNITION SIX

SINGLE SIX

Introducing a completely new group of motor cars with the richest new body designs that ever delighted the eyes of the motoring world, and with impressive new engineering of the most advanced character. ¶ When you view the 1930 Nash "400" models on display you will instantly recognize the fact that Nash today is decisively ahead of the entire industry.

Morrisburg Motors Limited

Sunday School Lesson

October 13. Lesson II—Keeping Fit For the Sake of Others (Temperance Lesson)—Daniel 1: 8-20. Golden Text—Know ye not that your body is the temple of the Holy Ghost, which is in you, which ye have of God, and ye are not your own? For ye are bought with a price; therefore, glorify God in your body.—1 Corinthians 6: 19, 20.

I. ABSTINENCE ON PRINCIPLE, Dan. 1: 8-20.
II. THE HIGHER MOTIVE, 1 Cor. 9:19-27.
III. THE DEMANDS OF VIRTUE AND HONOR, 1 Tim. 4:7-12; 2 Tim. 2: 1-5.

INTRODUCTION—The Golden Text of this lesson provides a good beginning. Paul is urging the Corinthian Christians, most of them his own children in the faith, to avoid evil-doing of every kind. He warns especially against sins of impurity, such sins as affect both mind and body. He takes high ground. "Know ye not," he says, "that your bodies are the members of Christ," 1 Cor. 6: 15. And in our Golden Text, "Know ye not that your body is the temple of the oHly Ghost which is in you, which we have of God, and ye are not your own." When a man believes that with all his heart, he will endeavor to keep himself physically and mentally clean. He will endeavor to keep himself fit for the uses of the Master, a fit instrument for service, a temple for the indwelling of his Holy Spirit.

The figure is slightly changed in 1 Cor. 3: 16, 17, and Rom. 12: 4, 5. Here the Christian community is thought of as the body of Christ, or as the temple of God in which his spirit dwells. The apostle exhorts, therefore, to keep this temple, the common life of Christ's followers, free from defilement, from "envying, and strife, and divisions" (v. 3), and as members of Christ's body to exercise our various gifts in harmonious co-operation, each desiring to serve the other as all serve Christ. Compare also 1 Cor. 10: 17; 12: 12-31; Eph. 1: 22, 23; 4, 11-13.

I. ABSTINENCE ON PRINCIPLE, Dan. 1: 8-20.

The story of Daniel tells us that a number of Jewish youths of character and ability, and of high rank were taken by order of Nebuchadnezzar from Jerusalem to Babylon to be educated there and trained for the king's service. Three years of training were prescribed with residence and entertainment in the palace. Four of these young men are mentioned by name, of whom Daniel was one.

Now the Jews had been, as many of them still are, very careful in observing their laws regarding clean and unclean foods. See Lev. 11: 1-47, and Deut. 14: 1-21 for the laws, and compare Ezek. 4: 14, and Acts 10: 14. The question arose, therefore, immediately, whether or not they should keep strictly to the customs and laws of their homeland and their fathers, or eat the king's meat, and drink the wine which was set before them. Daniel purposed in his heart that he would not defile himself, and his three companions areed with him. Whatever we may think of the necessity or value of such abstinence we cannot but honor the steadfast adherence of these young men to a high principle of religion and of clean living. The particular rules governing clean and unclean foods may not have been important (Rom. 14: 17), but the exercise of temperance, of discipline, of selfcontrol, at the dictation of conscience, was of the highest importance.

The prince of the eunuchs thought their health would suffer (v. 10) and that he would be held responsible. But the simple vegetable diet chosen proved to be more conducive to health and good looks than the king's meat and wine. The word "pulse" probably means here all kinds of vegetables. With bodily health went also knowledge and skill in all learning and wisdom. On that ground, also, as well as on the ground of obedience to ancient law, their abstinence was justified.

Paul has been discussing the question of Christian liberty. The question was raised regarding the eating of meat and other foods which had been offered in sacrifice to idols and then
II. THE HIGHER MOTIVE, 1 Cor. 9:19-27.
served at banquets, or sold in the market-place. ch. 8: 4. Must the Christian refuse to eat such food, or is he not free? Paul asserts Christian freedom, and admits that the food referred to is in no way injured or defiled, ch. 8: 25-27. But for the sake of others who have not that knowledge, and whose conscience is troubled, he advises refusal. See the whole very fine argument in ch. 8: 1-13.

Here in ch. 9 he is discussing the question of freedom in its wider application. He refers to his own experience, and mentions rights and powers which he unquestioningly has, but which he does not use for his work's sake, lest by so doing he should "hinder the gospel of Christ," vs. 12, 15. There is, he declares, a higher motive by which the Christian man is governed. That motive, in his own case, is to "preach the gospel," to gain men for Christ. Free as he is, as a Christian, to choose his way of life, he makes himself servant unto all, that he may win the more. No man is without law to God, and it is in the lad recognition of that higher law, written in no statute book, that he finds freedom. Paul draws an illustration from the custom of the races. 'In the races all the competitors run, but only one wins the prize. Let them run so as to win, exercising, like the athletes, self-control at every point, and for no corruptible crown like theirs," Peake.

III. THE DEMANDS OF VIRTUE AND HONOR, 1 Tim. 4:7-12; 2 Tim. 2: 1-5.

Paul is writing words of friendship and wise counsel to his younger friend and fellow-worker, Timothy. Converted to faith in Christ by Paul's preaching he had been the apostle's companion for some time on his second and third missionary journeys. At the time of the writing of this, and probably, also of the second, letter he was at Ephesus in Asia Minor, meeting serious difficulties, and in need of such counsel and encouragement as Paul could give. Here then Paul is advising Timothy regarding his own behavior. Certain false teaching has entered the church. "Shut your mind against these profane drivelling myths; train for the religious life," Moffatt, v. 7. The discipline of the body has some value, but religion is profitable in all things—having in it promise of the best in this life, and in the life to come.

The faithful saying, or "sure word." v. 9, is rendered by Moffatt, v. 10, "We toil and strive because our hope is fixed upon the living God, the Saviour of all men." This, then, is Paul's counsel that Timothy command and teach the kind of exercise and self-discipline which promotes true piety, himself setting the example. And this is that he may both save himself and them to whom he ministers, v. 16.

The admonition of 2 Tim. 2: 1, all will take to heart who minister in the church of Christ. Be strong . . . endure hardship . . observe the rules.

Facts for Coffee-Drinkers

Perhaps no report of investigations laid before the meeting of physiologists at Boston will be read with more general interest than that on the effects of coffee upon the human system. For the moment, researches concerning cancer and other diseases will seem of minor importance. No question affecting diet has probably been so much discussed, with so few positive results arrived at, as that of coffee-drinking.

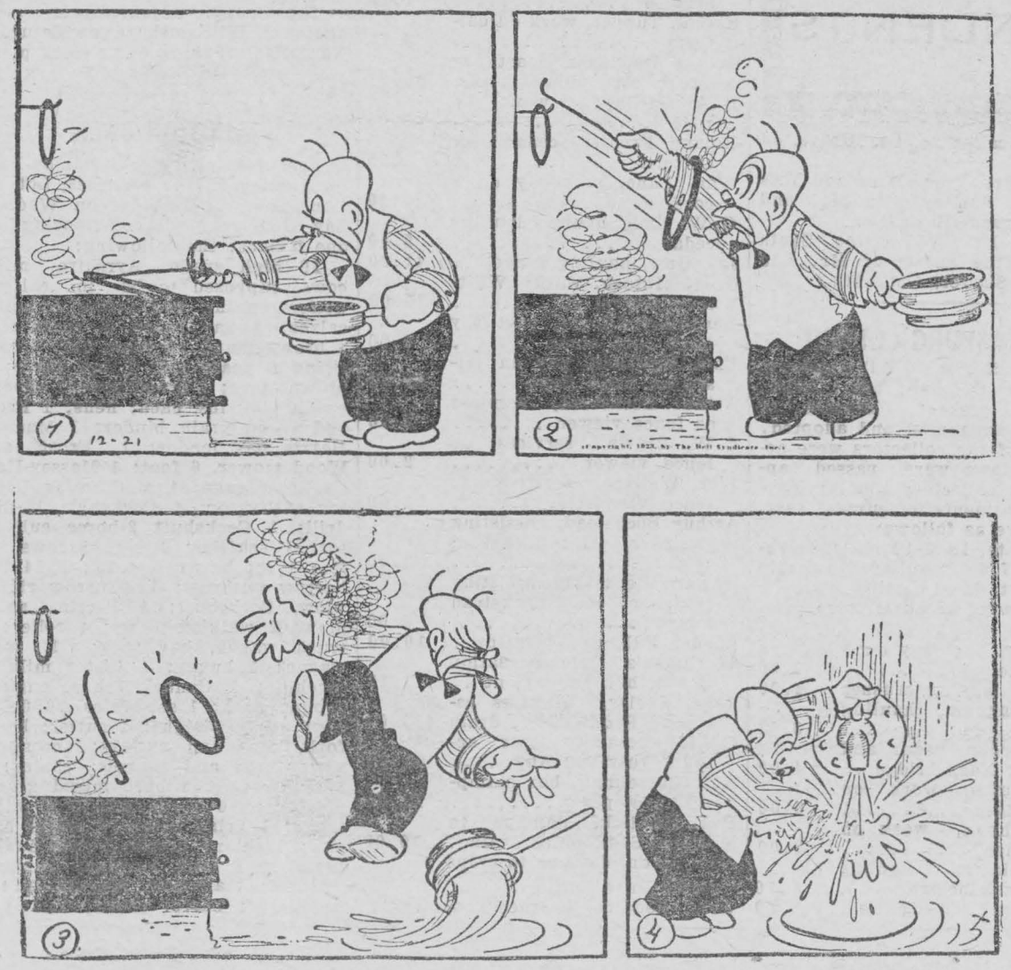

Now we have the conclusions drawn from a scientific and exhaustive study made in the Food Research Laboratories of New York. Experiments with a hundred young men were conducted for months and the results arefully noted and tabulated. One general and (for most people) gratifying conclusion was established. It is that coffee is not the cause of any organic disease. It does not harmfully affect the heart or stomach or kidneys. True, in the case of persons with a highly organixed nervous system, excessive coffee-drinking does lead to heightened blood pressure and disturbance of circulation. But there is nothing necessarily alarming about that.

The case is different when it comes to tracing minor physical and mental effects of coffee-drinking. Experiments seem to show that the initial sense of alertness induced by coffee is misleading. The young men who drank coffee were slower and duller and less accurate in the tests devised than were those who did not. Here, however, we are over the verge of physiology. Incurable coffee-drinkers will assert that everything depends upon the young men seleted, and that if the right choice ha dbeen made all would have come out to the praise and glory of coffee!! In any event, the study made is of wide public interest.

"I feel sad— I have just had my handwriting read." "What did the expert say?" "That from the way in which I made the 'h' at the beginning of the word 'elegant,' he knew I had been to school."

Farmer—"Hey, there! 'Ow come you to be up my apple tree?" Boy—"Please, mister, I just fell off an aeroplane."

ADAMSON'S ADVENTURES—By O. Jacobsson.

Farm Notes

ADVERTISING CANADIAN APPLES.

The Empire Marketing Board are doing an excellent service for the apple growers of Canada. An advertisement widely distributed in British newspapers, posters, and in other forms calls attention to the pyramids in the shop windows of glowing fruits in rosy reds, warm yellows, and mellow russets. Those wishing crisp apples are recommended to ask for Golden Russets. When softer fruit is wanted Jonathans are recommended, and for cooking it is suggested to the buyer to ask for Starks and Fallawaters.

Confidence in the packing of Canadian apples is expressed in the advertisement, which states that at the back of those jolly pyramids the apples are as good as at the front. Readers are assured that if they were to gather the fruit for themselves they could not pick and choose better than their Canadian cousins can do.

PORTABLE HOG CABINS.

While a substantial hog pen is necessary on a farm where pigs are raised to any extent, it is of great advantage to make use of small moveable cabins, particularly for housing brood sows under winter conditions or under summer conditions when on pasture. The small cabins are also useful as a shelter for growing pigs in summer when on dry lot or pasture. The Dominion Animal Husbandman, in his Report for 1928, published by the Department of Agriculture at Ottawa, recommends a cabin with a floor area of fifty square feet. A cabin of this size will comfortably house five adult brood sows when fed outside and given the run of the yard. Such a structure has been found at the Experimental arms to be inexpensive and in many instances may be constructed from material which is found on the farm. The A-shaped cabin popular some years ago has lost favor at the Experimental Farms as the sloping roof is apt to be broken away by the hogs when crowding inside. The walls should be perpendicular for three or four feet with a ridged roof above.

COST OF PRODUCING FARM CROPS.

In a study of the cost of producing farm crops in Eastern Canada, it was discovered that hay was the cheapest crop to produce and potatoes the dearest. The production of seven crops shows that per acre expense to have been $19.95 for hay, $25 for sweet clover silage, $29.86 for oats, $38.40 for oats, peas and vetch silage, $47.02 for corn silage, $59.72 for mangels, and $78.35 for potatoes. The study was made by E. S. Hopkins, Dominion Field Husbandman, and two of his assistants, A. Goslin and J. M. Armstrong. The results of their work, covering several years, are recorded in a new 48-page bulletin numberd 115 of the Dept. of Agriculture at Ottawa. The cost factors studied include the use of land, fertilizers, labor, and machinery, and such other incidentals as enter into the cost of the particular crops. These results were obtained by doing the work in the modern fashion and using good seed and doing the work well. In the case of the potatoes the yield was 264 bushels per acre, which made a cost of about 3 cents per bushel. The investigation included a comparison of cost as between small one and two-horse equipment and the wider and larger machinery operated by three and four horses and tractors of various sizes. In discussing the advantages of the tractor the authors expressed the view that one hundred acres of cultivated land is about the smallest area that would justify the operation of a tractor. This acreage, it is pointed out, is of the average for general farm conditions. One of the main advantages found in the use of the tractor is that it enables the farmer to keep his work up to date. In general farm practice there are many jobs that can be done more economically with horses than with the tractor. The place of the tractor, it is believed by the authors of the bulletin, is to supplement the work of horses and to provide power for belt work where conditions warrant its purchase.

CANADIAN EGGS ENJOY EXCELLENT REPUTATION

Canadian eggs have earned a fine reputation in the Mother Country as a result of the care that is taken in their production and in the grading and methods of marketing. From now on they will be required to meet a keener scrutiny in the British market. In accordance with a new regulation put in force by the British government all imported eggs have to bear an identification mark placed on each individual egg. Mr. W. A. Wilson, the Agricultural Products representative for Canada in Great Britain, has expressed his view of Canada's prospects under the new regulations that have been introduced by the Merchandise Marks Act and the Grading and Marking Act recently put into force. These measures require that all imported eggs be individually marked for identification with ink. In the month of August, Mr. Wilson writes, home produced eggs which were unstamped were particularly in demand in price range from two to ten shillings per long hundred more than stamped fresh eggs from any country. This, he says, is a direct outcome of the new "marking" laws, which has enabled consumers to know what they are buying. The production of fresh eggs in England, however, has but a limited season. When these no longer meet the demand, Mr. Wilson is quite hopeful that such Canadian eggs as are available will find a ready demand on account of their known good quality. The present time, however, Mr. Wilson regards as one when producers, dealers and experters should exercise their utmost care so as to ensure that the eggs go forward only in the freshest condition possible.

The Last Steps

Churches of Scotland to Unite; Merger Favored in Plebescite

Edinburgh, Scotland.—To ascertain finally the decision of the congregations of the United Free Church of Scotland on the subject of the impending union with the Church of Scotland, the Free Church congregations which indicated a desire for a further expression of opinion were authorized to take a plebiscite. The result announced was that of the 1,441 congregations in the church 117 desired a plebiscite; of these 64 were in favor of union and 33 against; 19 made no return and the remaining one had no preference.

Consequently the consummation of union, formally agreed upon last year, will proceed, the Duke of York, as high commissioner of the Church of Scotland, taking a leading part in the ceremonies next month.

The total membership of the thirty-three congregations of the Free Chrch voting against union was 8,441, but only 6,566 voted—4,600 being against union and 1,966 in favor. The total membership of the Free Church is about 536,000.

Naval Parity

Dr. Albert Shaw in the American Review of Reviews: At whatever cost, the United States must arrive at actual parity. If drastic reduction is too hard a doctrine for the British Government, then parity must be brought about by an energetic American building program. President Hoover understands this situation quite as well as any Senator; and he will not fail to uphold what is now an unalterable American determination. If he reaches the opinion that we can afford to modify the fifteen-cruiser program, he will in due time present his recommendations and his reasons to Congress.

All-Canadian Road to Yukon

Great Highway Projected by British Columbia Government

FINANCES IN SIGHT

Vancouver—With a Pacific highway link being completed in the south which will connect Vancouver by direct route with Ensenaba, and other Mexican ports, and the prospect of another link in the north to connect with Alaska and the Yukon, British Columbia itself is preparing to launch on the greatest road building program in the history of Western Canada.

For the present year the road program has totalled $7,100,000 and for next year department officials at Victoria estimate that double that amount will be needed to handle the various pressing demands already made for highways.

Higher Tax on Gas

Increase of the gasoline tax from three to five cents a gallon is forecast tentatively by the Government. If this is inaugurated, next year's road loan will probably be $5,000,000. This, in addition to the $7,000,000 which is made possible out of this year's tax returns, will mean at least a $12,000,000 road program.

The present three cent tax will produce $1,000,000 this year, it is estimated. In the last fiscal year it was $914,000, and it is growing at the rate of more than $100,000 a year. Altogether, out of gasoline tax and motor vehicle licenses, the province expects to have $2,500,000 to carry its road loans.

Many Millions

The loans now outstanding require $1,916,320 carrying charges, so that $633,600 will be left to cover $7,000,000 of next year's program aside from tax increase. Since 1919 when the present system of financing road programs was inaugurated the province has spent $28,432,000. All this has been financed out of gasoline tax and motor licenses. Annual loans have shown a consistent growth.

At present Vancouver is connected by all-paved highway with Los Angeles, San Diego and other Southern California cities. The new road connection into Mexico is already being projected.

Northward, Premier S. F. Tolmie has already sought Federal aid for a highway into Alaska and the Yukon. It would require 460 miles of new road in British Columbia and 125 in the Yukon. It would have the double advantage, Dr. Tolmie points out, of giving Canadians direct access to the Yukon without crossing the Alaskan panhandle, and would lure tourist traffic to the land of the midnight sun, just as Scandinavia is luring Europeans.

Dominion May Help

The highway would then run from Tia Juana, Mexico, to the international boundary, thence on the existing roadway to Hazelton, B.C.

Hon. Charles Stewart, Dominion Minister of the Interior, is declared to be willing to have the Dominion build the Yukon part of the road, but did not make promises regarding the B.C. section, it is understood.

Tolmie declared he was hopeful that the project would ultimately go through.

Literary Garbage

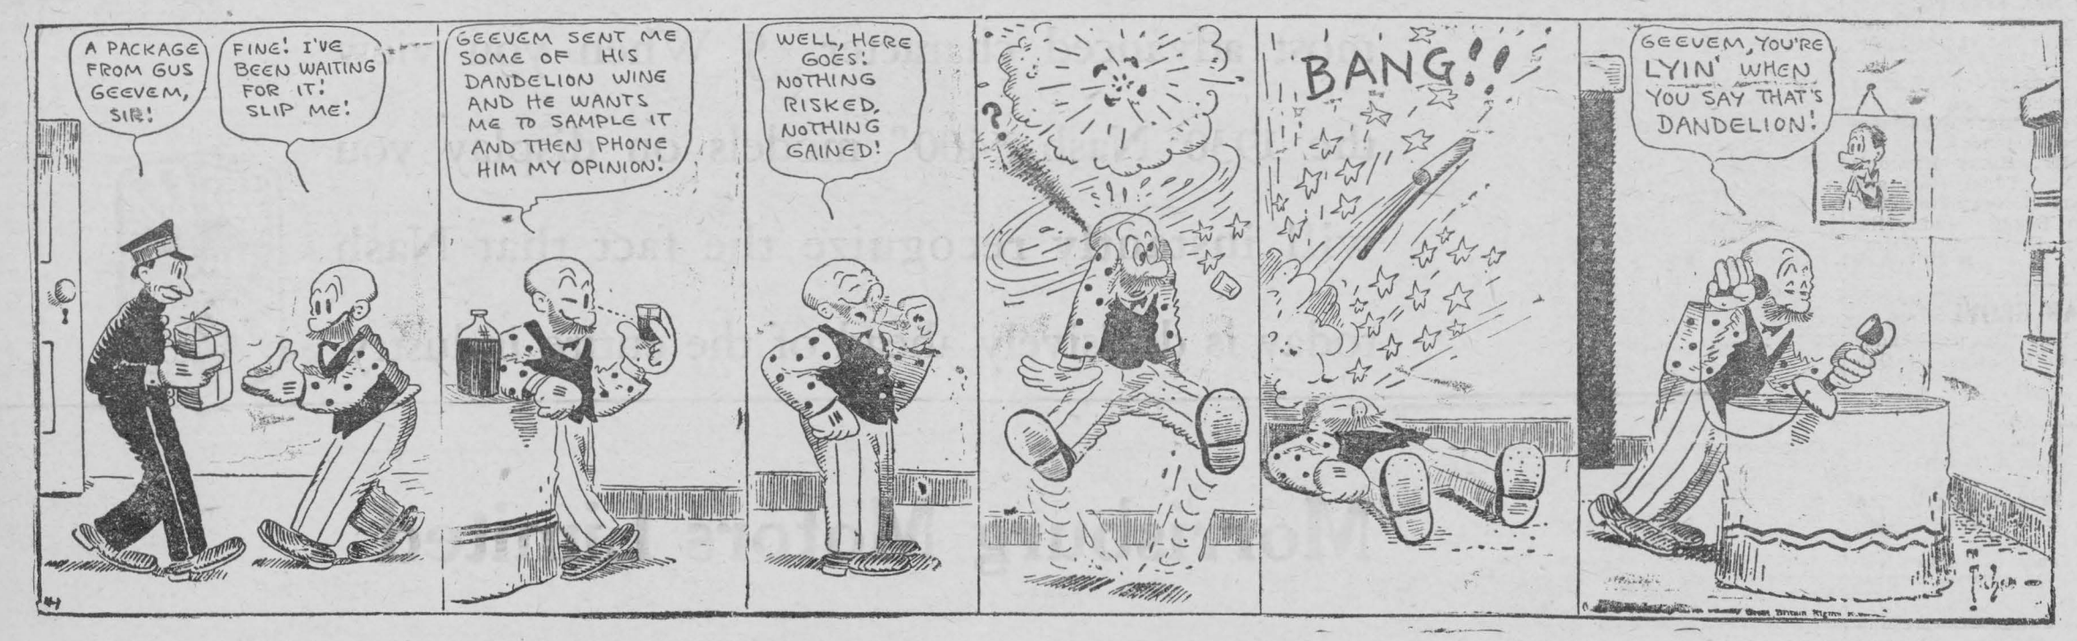

William Lyon Phelps in Scribner's (New York): The majority of "realistic" novels just now are both dull and dirty. It is hard to say in which of two respects they most greatly afflict the intelligent reader—boredom or filth. It is astonishing that sex which after all is a subject of general interest, can be made so dull. Many readers wander over these books, like dogs in a vast field ,searching from smell to smell and ignoring the odorless tracts between.

Comment is being made that Montreal knows very little about Montreal Still they occasionly catch glinmpses of it through gaps in the traffic.

Toto: Mr Smith, you are not dumb, are you?—Mr. Smith: Of course not! Why do you ask?—Toto: Big sister said that she had been expecting you to speak all winter.

MUTT AND JEFF— By BUD FISHER

Dandelion Beverage, Perhaps! How Does Geevem Get That Way.

"I had no colour"

MRS. FRED. PENNY, R.R. No. 4, Norwich, Ont., suffered from anaemia for over three years. Though taking medicine all that time, nothing helped her till she began Dr. Williams' Pink Pills.

"I had no appetite", she writes. "I could not sleep. My blood almost turned to water. I was weak and my heart would palpitate violently. I am thankful to say that in Dr. Williams' Pink Pills I found the relief I sought. My color returned, my appetite improved, my weight increased fifteen pounds, and it was not long till I could perform my work with ease."

If you are weak and easily tired, subject to headaches, are pale, without appetite, and your work seems a burden, do not delay. Start treatment at once by buying a box of Dr. Williams' Pink Pills at your medicine dealer's or by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ont. S-27

Dr. Williams' PINK PILLS

"A HOUSEHOLD NAME IN 84 COUNTRIES"

Queensland Found Rich in Minerals

Brisbane, Queensland.—Dr. H. Jensen, who was once the government geologis. for Queensland, has great faith in the possibilities of the mineral wealth of the state, and urges necessity for legislation to help the mining industry, which, he says, has been hampered.

Dr. Jensen is of the opinion that new payable gold reefs would be found at Gympie, if drilling were carried out in geologically selected areas.

Referring to the closing of the Chillagoe copper mines, he said that, if an additional £200,000 had been spent on the place, the smelters would have been a paying proposition; but, by closing them, the state had lost heavily.

Dr. Jensen also mentioned the arsenic deposits in Queensland, notably those at Cinnabar, which were probably the best in Australia, and also the wealth of the state in wolfram and molybdenite.

LUXO
FOR THE HAIR
Ask Your Barber—He Knows

Owl Laffs

Ignorance of the law against childern driving automobiles excuses no one.

Sweet Young Thing—"If you men would just quit looking at us girls in short skirts, we would quit wearing them."

"Yes. I suppose you would have to do something drastic.'

Definition of Co operation: "A Methodist minister on Sunday afternoon umpiring a baseball game between the Ku Klux Klan and the Knights of Columbus for the benefit of a Jewish orphan asylum."

If a bargain doesn't look the part it will be sure to act the part when you go to use it.

The filthiest lucre is a dollar bill that's been in circulation about two years.

Customer—"How much do you earn a week, my boy?"

Boy—"'Bout $250 for the firm; but I only get $14 of it."

Dealer—"Can I interest you in these new bridge lamps we have just received?"

Mrs. Dumb—"No, thanks. I don't play bridge."

Nothing is so good as it seems beforehand.

Don't you believe it! This rumor that girls are worried about holding their shape is the bunk. Yes, sir! They're leaving it up to some man.

People who are opposed to dancing may be afraid they'll be lost in the shuffle.

One of the heaviest loads to carry is a bundle of bad habits.

A Strong Recommendation

After using twenty bottles of your famous remedy I have recovered my strength sufficiently to beat you up for ever selling me such a fake medicine.

Henry—"I've just seen the world's greatest optimist."

George—"Who is he?"

Henry—"A fellow out room-hunting with a saxophone under his arm."

"I doubt if family financial problems ever will be satisfactorily solved until father does the purchasing and son and daughter pay the bills."

Ethel—"And do you think he will love me even more when we are married?"

Mabel—"Oh, sure! Why, he is just crazy about married women, my dear."

The conclusion a man comes to after being married awhile, is that he could have done much better—but knows his wife couldn't have.

It is said that the state of Utah has enough coal to supply the United States for the next 250 years. By that time most of us will have ceased to worry about coal supply.

If the old fellow who declared that "Beauty unadorned is adorned the most" was still living he could sure get an eye full of adornment these days.

If you don't want a man to hear what you say about him, be careful to say something good."

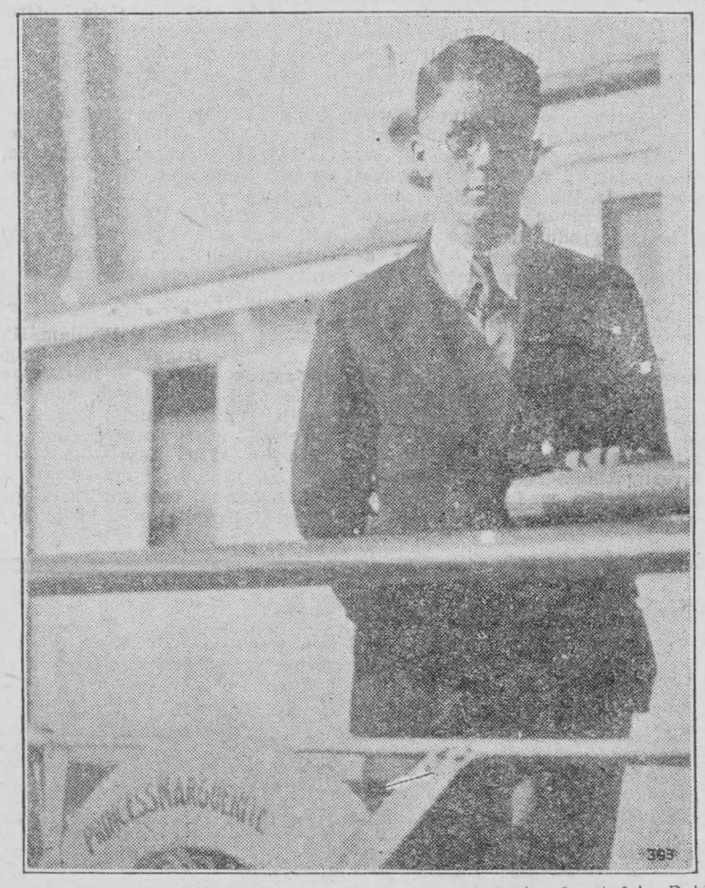

A college coach says, "Athletics are work, not play." Yes, especialy football.

"What's the matter? You look all broken up."

"A chiropractor owed me fifty dollars, and I let him take it out in trade."

A "rounder" always has a hard time to square himself.

Edison's Pupil Visits Canada

Walter Huston, Seattle boy who won the special prize donated by Robert Edison for research and inventive potentialities, was a visitor to Canada recently when he took Canadian Pacific coast steamship Princess Marguerite in a round trip from his home city to Victoria and Vancouver, Huston who is likely to become a second Edison will devote his life to scientific research, he says, following the example of his famous friend and mentor.

THE RESPONSIBILITY OF EVERY MOTHER

The child in the home is a never-failing source of joy, but, at the same time a never-failing responsibility to the fond mother. It not infrequently happens that minor ailments of the child distress and puzzle her. She does not know just what to do, yet feels them not serious enough to warrant calling in the doctor. At just such times as these it is found that Baby's Own Tablets are the mother's greatest help and friend.

Most childhood ailments arise in the digestive tract—the bowels become clogged and the stomach sour. Baby's Own Tablets are a never-failing relief for this condition. They are a mild but thorough laxative and through their action on the stomach and bowels they banish constipation and indigestion; break up colds and simple fever; allay the pain accompanying the cutting of teeth and promote health-giving sleep. Concerning them Mrs. W. Jenning, Mackay, Ont., writes:—"I have used Baby's Own Tablets and think so highly of them that I would not be without them. Please send me your little booklet on the care of children."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

CANADA HAS A BIG FUTURE

According to the Dominion Bureau of Statistics, the national wealth of Canada in 1927 was $27,687,000,000, and was increasing at the rate of $900,000,000 a year. If these figures are accurate, the per capita wealth of Canada two years ago was $2,909.

In 1922 the wealth of the United States was estimated at $320,000,000,000 and its population at 108,000,000. This gives a per capita wealth of about $3,000.

The ratio of wealth to population is thus very nearly the same in both countries. This may surprise some people who have listened to American boosters and Canadian pessimists.

There is nothing the matter with Canada. Indeed, in some respects she is better off than the United States. Alberta, for instance, claims that only one-sixth of her 60,000,000 acres capable of agricultural development are being farmed; she has 90,000 million tons of coal which have scarcely been scratched; she has 12,000,000 acres of forest reserves, and a large number of lakes which can support a thriving fishing industry.

No wonder her population has increased from 73,000 to 617,000 in a quarter century.

Saskatchewan with 8.78 per cent. of Canada's population, owns 10.83 per cent. of her wealth, and is still but little developed. Indeed, Canada's wealth is almost limitless, and with population flowing in to find it, work it and market it, Canada's future is far brighter than that of most countries on this globe.—From Detroit Free Press.

Inquisitiveness

The man who is inquisitive into the secrets of your affairs, with which he has no concern, should be an object of your caution. Men no more desire another's secrets, to conceal them, than they would another's purse, for the pleasure only of carrying it.—Fielding.

Minard's Liniment for Neuritis.

When to Marry

You Should Know the Right Time and When Your "Average" is Best

A girl's chances of marriage fall off sharply after she reaches the age of twenty-five, while the young man's chances increase for a time after that age, according to some provocative statistics gathered by the Metropolitan Life Insurance Company on the probability of marriage at various ages, from fifteen up. As the Minneapolis Star puts it, "the older a young man gets, the more likely he is to marry, whereas the older a young woman gets, the less chance she has of avoiding spinsterhood." This paper proceeds:

"The twenty-year-old girl has a better chance of marrying within ten years than the young man of the same age. By the time each reahes the age of twentyfive, however, the tables are turned, for the young woman has less chance as years go by and the young man more chance to take the marital vows.

"We don't quite know what the moral of this should be other than the obvious advice for girls to marry when they get a chance, and young men to take their time and be cautious."

Taking it for granted that these statistics will be studied feverishly, either with hope or with fear, by every reader who falls within the company's classifications, the Rochester Democrat and Chronicle goes deeper into the subject, trying not to appear too serious—thus:

"One learns that at the age of twenty a young man has a 41 per cent. chance of being alive and married within the next ten years, but whether this is to be taken as an encouragement of a warning, the company does not state. The girl of twenty has a somewhat higher percentage of matrimonial risk than the boy, but after that age her stock begins to go down, while for the young man it rises, and he is in increasing danger of the altar until he reaches middle age.

"The one momentous fact that we can discover from a study of the whole situation is that there is no period from the age of fifteen years upward that one is entirely immune from the possibility of marriage. To be sure, the percentage of likelihood declines as years advance, and it appears that a man of fifty-five has only a 10 per cent. prospect of marrying within the next five years. But so long as that percentage of possibility remains in any age, how can one be sure? Why may matrimony not strike in one place just as much as in another?"

Before the age of twentyfive, the survey shows the average young man is hardly marriageable, because he is not yet earning a living for two, plus the anticipated additions. Many, in fact, have not yet decided upon their line of work at that age, and, as the Louisville Times points out, most of them are still immature in judgment. "Yet," remarks that paper, "it is between seventeen and twenty-five, as a rule, that girls make the great decision of their lives, as often opposed as aided by their parents. It is an axiom of married life that every one marries a stranger. The wonder—as Robert Louis Stevenson asserted—is not that so many matrimonial barks go on the rocks, but that so many come safely to port."

Chance to Buy Scottish Island

Lonely Hebridean Isle, Landing Place of Bonnie Prince Charlie, in Market

London—The desire to be the sole owner of an island is a common one, but there are scarcely enough islands to go around. The opportunity to secure one is now available, and if its location is somewhat difficult, that drawback is largely compensated by its natural beauty and the unusual history that goes with it.

In the Outer Hebrides, where solitude may be had in wholesale quantities, lies the tiny island of Eriskay, about three miles long and two miles wide. It was in July, 1745, that Charles Stuart landed on this rocky spot and feeling the ground of his family's ancient kingdom under his feet for the first time, exclaimed: "I am come home." He brought with him from France some seeds of the pink convolvulus and sowed them in commemoration of his landing and of the sanctuary he had received in France. This plant still grows on Eriskay and it is believed not to exist anywhere else in the British Isles.

The people of the Hebrides ascribe a more modern claim to fame to Eriskay and one that will appeal to vastly greater numbers than its Stuart tradition. They believe that when Barrie sought a fitting place in which to locate his play, "Mary Rose," he chose Eriskay. Certainly the island is lonely enough to justify the setting.

HOW I LOST 28 LBS.

In a Safe, Easy Way

Read how one woman lost 28 lbs. of fat, without diet, without dangerous drugs or exercises.

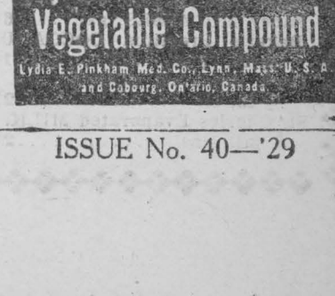

"I take a daily dose of Kruschen, and I have lost two inches round the waist and hips and 28 lbs. since last summer. I feel very well on it and people tell me I look very fit. I am 5 ft. 4 in. in height, 40 years old, and come of a stout family." Miss E. L.

Don't go lumbering about with a burden of unhealthy, excess fat—you can get rid of it easily if you get the Kruschen habit.

Kruschen Salts provides the easiest, safest and surest way to lose fat that you can possibly desire. By purifying your blood of harmful acids, helping the liver, kidneys and bowels to throw off waste material, they remove in a natural way the fatty deposits which poisonous waste matter has produced. Not only do you lose pounds in weight, but you lose years in appearance. Little by little, the ugly fat disappears—slowly, yes—but surely—and you soon feel wonderfully healthy, vital and energetic—more so than ever before in your life.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour.

Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

MIGHTY MONARCH OF THE AIR

MODEL 91 Lowboy $197.00 LESS TUBES

MODEL 92 Highboy $242.00 LESS TUBES

The New Majestic Models

have no HUM or "background" NOISE

Ask for a Free Demonstration — Let us prove this to you

THE Majestic brings you beauty of tone at any volume.

Power Detection with the new .45 Tubes has eliminated all trace of A.C. *hum* or "background" *noise* at *any* wave length. Another triumph of Majestic engineers is Automatic Sensitivity Control, assuring *equal* sensitivity and range at *all* points on the dial.

Music and speech sweep gloriously through *this* radio and come from its improved Super-Dynamic Speaker real as life and big as life—complete, satisfying, true!

Let us show you the new "Humless" Models and these sensational betterments.

Majestic ELECTRIC RADIO

Overflowing Power—Power—Power!
