MORRISBURG — ONTARIO

MRS. ELIZA LOUCKS

An estimable citizen of Morrisburg, in the person of Mrs. Eliza Loucks, passed peacefully away on Thursday morning last. Dec. 10th. following the effects of a stroke of paralysis about ten days before her death. Although the end was not unexpected, as she had been in failing health for the past two years, it came as a shock to her relatives and friends who mourn the loss of a devoted mother, and a kind and sympathetic friend.

The late Mrs. Loucks, daughter of the late Mr. and Mrs. Chas. Mattice was born in Russell 72 years ago In 1880 she was married to Mr. G. C. Loucks of this town, who predeceased her eighteen years ago Two daughters and one son and one step-daughter survive: Mrs. J. Tyo, New York; Mrs. Harry Pyper, Morrisburg, Mr. Charles Loucks, Detroit, and Mrs. H. C. Lake, North Tonawanda, N.Y. She is also survived by five sisters and two brothers: Mrs. John Armstrong, Morrisburg; Mrs. Robert Simpson, Ottawa; Mrs. Jos. Crisp, Winnipeg; Mrs. Garfield, Syracuse, N.Y.; Mrs. B. V. Foster, Iroquois and William and Langford Mattice, Iroquois

The funeral took place at her late home on Saturday afternoon at 2.30, Archdeacon C. O. Carson officiating. Interment in St. James cemetery.

Among relatives from a distance attending the funeral were Mr. Langford Mattice, Mr. Wm. Mattice and Mrs. B. V. Foster Iroquois and Mr E. Mattice of Lunenburg

The floral offerings included: Pillow from the children; Cross from grand children basket from son-in-laws; sprays from: Mr and Mrs. John Armstrong; Mr. and Mrs Harry Armstrong, Miss Amy Banks Mr. and Mrs. F. W. Robinson, town; Mr. and Mrs. Wm. Pyper, Montreal; Mr and Mrs. Harry Perkins, Massena; Mrs. Robt Simpson, Mr and Mrs. A. E. Kelly, Mr. and Mrs. P. J. Powers, Ottawa; Mrs. Chas. W Loucks; Mrs. Norman Mattice; Mrs. Ed. Peters and Mrs. (Dr.) Medler of Detroit; and a wreath from the St. James Guild.

MRS GEO. E. STYLES

The death occurred on Tuesday morning, December 8th, of Mrs. Geo E. Styles, a highly esteemed resident of Church Road, Riverside at the age of 68 years 10 months and 8 days. Her death came as a shock to her many friends, for although the deceased had been in failing health for some time, she was able to be around as usual.

The late Mrs. Styles, whose maiden name was Etta Prunner, was a daughter of the late Mr. and Mrs. Abraham Prunner of Church Road. She was united in marriage to Mr Styles 52 years ago. She is survived by her husband, two sons, Roy of Church Road, Ernest of Riverside two grandsons and one sister, Mrs. Bertha Tobin, who resides at home with her sister.

The funeral took place Thursday afternoon at 1.30 p.m. from her late residence to Trinity Church, Riverside. Service was conducted by Ven. Archdeacon Carson, who preached a very comforting and inspiring sermon. The pall-bearers were Nathan Tupper; Roy Schell; Wm. Dafoe; Archie Crowder; Frank Casselman and Sam Swerdfeger.

LATE MRS. A. C. SHAW

(Montreal Star)

The death occurred Dec. 8th, after an attack of pleurisy, of Mrs. Adeline Emma Shaw, wife of A. C. Shaw, of the passenger department, Canadian Pacific Railway. Mrs. Shaw was the daughter of Adeline and William Garvey, former residents of Morrisburg, and a niece of the late Hon. T. B. Pardee. Her death was quite unexpected, and a week or two ago she was in good health.

Surviving relatives are her husband, a daughter, Mrs. Johnston; a sister, Miss Garvey, North Augusta, Ont., and a brother, Aaron Garvey of Vancouver, Mrs. Shaw had lived for a time in Chicago and Winnipeg.

FOR SALE—Residental property, central location, Main St., barn, garage, stable, large lot, etc. Convertible into desirable place of business. Exceptional opportunity awaits prompt buyer. Don't wait, a number will want it; particulars furnished. Apply W. B. Cross, Real Estate Agent, Morrisburg ap

LECTURE IN AID OF THE BLIND

Under the auspices of the Womens Institute, an illustrated lecture was given on December 10th by Mr Gustar of the Canadian National Institute for the Blind, Toronto. The object of this Association is to "Ameliorate the condition of the blind of Canada and to prevent blindness." There are 6000 blind persons in Canada today. Blind children are taught at the Brantford Schools, while older persons thus afflicted, the trained in the Industrial Departments of the Institute for the Blind in useful handicraft occupations. The women and girls are taught to run high-powered sewing machines and to make whitewear, turning out hundreds of dozens of aprons and house dresses, and thus earning their living. The men make 'Hope' brand brooms at the broomshops for Canadian Blind men, established at Halifax, Ottawa, Toronto, Winnipeg and Vancouver. They also do basket work of all sorts, both in reed and in willow. Another feature is the Library and Publishing Department at 142 College St., Toronto, which has 15,000 volumes, printed in the Braille System. These along with magazines and music are circulated free to blind readers throughout Canada. The returned soldier graduates of the message classes are doing very excellent work. Where blind persons cannot take training at one of the regular centres, home teachers are sent, who are themselves either blind or partially so, and the handicrafts and reading writing of embossed characters are taught in these homes. The Prevention of Blindness Department has established Sight Saving Classes in Toronto Schools and in several other cities. Correct glasses and treatment often save children from the complete loss of sight, for the partially-sighted of today are often the blind of tomorrow. Any information regarding care or employment for the blind is gladly given by the Head Office, 186 Beverly St., Toronto.

NATION VALLEY SCHOOL

S. S. No. 5, Winchester Township, Wins Silver Trophy Given by the Canadian Horticultural Council

For a number of years the Inspector of Dundas County has been encouraging the teaching of Agriculture, systematically in the schools of the county. During the past two years attention has been particularly directed to the improvement and beautifying of the school grounds and many of the schools have responded to the appeal. The Department of Education allows a grant of $10 and upwards per annum for carrying on the work

This year, the Canadian Council of Horticulture offered silver trophies valued at $50 each for competition in each of the eleven divisions which they made of the Dominion.

Miss Lenora Merkley, teacher of S. S. No. 5, Winchester, decided to have her school enter the competition. A lawn mower, bulbs, shrubs and flower seeds were purchased, the grounds levelled and an artistic iron fence was built across the front. The pupils became enthusiastic and the trustees, particularly the chairman, Mr. George Merkley, gave considerable assistance.

The result is that the grounds have been made a credit to the section and the Provincial Committee of Judges have decided that the improvements are the greatest of any school entered in the competition in this district which includes nearly all of Ontario, east of Toronto.

The teacher, pupils, trustees and ratepayers are to be congratulated on their success in winning the Trophy and in thus bringing honor to the whole County of Dundas.

The presentation will be made at the school on Monday evening, Dec. 21st, at 8 o'clock by Mr. George Simpson, chairman of the committee for the Province of Ontario, assisted by the Secretary Mr. L. F. Burrows and Messrs. Macoun and Spencer of the Dominion Department of Agriculture.

KNOX CHURCH

The pulpit of Knox Church will be supplied next Sunday by Rev. Wm. Merrilees of Iroquois.

BY S. R. CROCKETT.

CHAPTER LIV.

WALTER MAC WALTER MEETS MARY BISSET.

When she came to herself Lilias found that she was supported in arms which clasped her firmly about the waist. Her head lay on someone's shoulder. This was very strange, yet somehow, as the buzzing in her ears ceased, she seemed to find herself in some strangely familiar place. She felt an incurious content steal over her. She was quite ready to stay where she was for ever.

"Mother," she said, "is that you?"

But even as she said it she knew that her mother was not there.

Then her eyes opened upon a world of dazzling whiteness, upon the blue of a brilliant sky infinitely removed.

Then her eyes lighted upon Walter Mac Walter. He was standing above her looking at her as she had seen him do last night. She shrieked aloud.

"Oh, take him away—do not let him come near me!"

Then a voice spoke in her ear, a voice she knew, yet could not remember whose it was. It said, "He will never come near you any more."

She perceived that two men whom she had never seen held her husband by the arms, while her son Kit, very hale and strong, stood behind with a strange, alert, triumphant look on his face.

But the voice behind belonged to someone else.

"Who are you?" she faltered, trying weakly to turn her head.

"Lilias, I am your husband!" said Christopher Kennedy, laying her gently back on the grass and looking down into her eyes.

* * * *

Joy does not kill, as the story-books aver. Perhaps for the reason that when it comes suddenly and unexpectedly like an angel from heaven, it is not at first believed in.

Slowly Lilias became aware that the elder of the two men who held her husband was speaking. The sense of his words seemed to come to her from an infinite distance.

"Listen, Walter Mac Walter," he was saying. "You know me. You have known me all your life. I am Daniel Bisset, brother of Mary Bisset, your dead—your murdered wife."

Walter Mac Walter tried to thrust his guards from him, but they held him fast, Hoggie Haugh hanging upon his arm with the grip of a giant, and Kit Kennedy standing behind ready to assist in case of need.

"Yes—murdered," said Daniel Bisset, solemnly. "We suspected it before. We know it now. From the place from which Mary Bisset fell you would have thrown Lilias Kennedy to-day, even as twenty years ago you sent my sister to her death."

"Lilias Kennedy!" The words came scornfully from the lips of the baffled madman.

"Aye, Lilias Kennedy, no other," said the Classical Master, coming forward—for his charge was now sufficiently recovered to sit up and (after the manner of women) begin to arrange her hair. "She is my wife, not yours. Alexander Strong, of Edinburgh, has found poor Nick French whom we thought dead. He has kept the original marriage lines of Christopher Kennedy and Lilias Armour. So long as I thought her happy I would never have come forward. I would have kept myself where she would never have known. But now—"

"It is a lie—a lie—a devil's lie"; cried Walter Mac Walter furiously, foaming at the mouth.

Then Daniel Bisset spoke again.

"It is a truth which the judges of the land will believe, as they will believe the witness of us four men—when you, Walter Mac Walter, are tried for the attempted murder of Lilias Kennedy and the accomplished murder of Mary Bisset, my sister and your wife!"

With a quick access of maniacal strength the prisoner cast his guards this way and that from him. Even then he would have sprung upon Lilias but for the shining tube of a revolver which looked at him from the right hand of the Classical Master. He heard his guards rushing at him from behind. With a quick swing he turned, dashed between them, knocked Kit down flat on his back, and ran along by the edge of the cliff in the direction of the gate at which he had left the black mare tethered.

But at the first dip of the ground, in a little sheltered hollow, he came upon a girl sitting. She held her hat in her hand as if enjoying the winter sunshine, and as he ran towards her she rose with a startled look on her pale face.

The maniac stopped dead in his career with a strange gasping cry.

"Mary Bisset! In God's name, Mary Bisset! Touch me not. Out of my way, fiend!" he shouted.

And swerving to the left to avoid the wraith of his victim, he stumbled upon the imminent verge of the cliff and fell outward and forward. He clutched at nothing as he fell, and as it were wrenched himself round, till his distorted face looked up at the accusing phantom who had confronted him so startlingly. That face vanished like a falling stone.

And from below there came an agonized cry of "Mary Bisset! Mary Bisset!"

Then silence.

EPILOGUE.

The fragments must be briefly gathered up. Lilias Kennedy began a new life from that day forth. Her husband, long tried in the fire, had come forth refined. These two went to the South of England for the winter, and Daniel Bisset accompanied them "for his health's sake," he said. But the Classical Master knew better.

"I thank you, Daniel," he said; next year I shall be able to walk without swaddling bands—by the blessing of God!"

"Amen to that!" said the Infidel Lecturer.

Mary Bisset gave up her situation and went with them, but her adopted mother refused to quit Edinburgh.

"I will keep the house open and the fireside warm against your return!" she said.

Dick listed in the Scots Greys, which were quartered at Piershill, and his father refused to buy him off in spite of his mother's many prayers.

"It is his one chance!" he said.

Kit went back to his college course, and when he came in spring to the Cottage under the Crae Wood he had two medals to show the Elder. But he had heard news that had saddened him. With one of the curious freaks of violent and passion-driven men, Walter Mac Walter had left all his property to Mary Bisset, the only daughter of his dead wife. Kit felt that now Mary was separated from him by a great gulf fixed.

He said this to Betty, to whom he communicated all his woes.

"Nonsense—try her," said that experienced person; "Rob tried me a score o' times afore I wad hae him. Only a fool ever takes it for granted that a woman will say 'No'!"

And Kit took Betty's advice.

* * * *

It was the bright heart of May when Mary Bisset came to Kirkoswald with her adopted father. Mr. and Mrs. Christopher Kennedy were already there, putting the place in some sort of order. They had refused to remain, however, in spite of many invitations.

"I can maintain my own wife, thank God," said Christopher Kennedy, Senior, with some pride. "I have been appointed Classical Master at the Edinburgh Athenaeum. It is not a great school, but it is better on that account for one so long out of practice. Lilias and I have taken a house, and we start work after the holidays. Daniel will be near us."

Mary Bisset was infinitely distressed that Lilias would not consent to receive any of the inheritance of Walter Mac Walter.

"I am not his widow. I never was your father's wife. I will have nothing that ever belonged to him. It is yours by right and by gift. But if you put my father and mother back in the Dornal they will die happy."

And so it was arranged, Rob and Betty jointly and severally agreeing to work the farm for them.

"But I wad like to see the Rob or the Betty that will mak' me ither than mistress o' my ain hoose," said Kit's grandmother.

"Fegs," said Willie Gilroy, who had come to see them comfortably settled, "ye are o' the same mind as my wife."

"What, Willie, ye are never married again?"

The Sheriff's officer admitted the accusation with a shake of his head.

"Wha is't, Willie?" cried Betty Landsborough, who was naturally much interested.

"It's juist Meg Patterson frae Clairbrand."

"But she's surely no young. Willie, hoo auld is she?"

"God kens," said Willie. "I misdoot she'll never dee recently, this yin. I think I'll hae to shoot her!"

* * * *

Kit found Mary in the renovated drawing-room of Kirkoswald. She was looking prettier than ever before, though very simply dressed. But the radiance of her eyes seemed somehow to fill the room, even as once it had filled Kit's heart under the Edinburgh gas-lamps.

He took her hand and bent his head towards her.

"What is it, Kit?" she said.

"You are a great lady now," he said, very low. "You are the owner of all this!"

The pretty girl was silent a little, looking up at his drooping head with a singularly sweet smile. Then she went a little nearer to him.

"Ask me if there is nothing else I would like better to be!" she said at last.

Then Kit asked, and found that there was.

(The End.)

When hoarse use Minard's Liniment.

He Understood.

Dad (angrily)—"You're the devil's son, child! Do you understand?"

Son (meekly)—"Yes, father, I understand."

Mapping the Sky.

A remarkable piece of mechanism has just been completed after fourteen years of hard work. It is a machine that reproduces the entire starry sky on the inside of a great white dome. Seventy-two projecting lanterns are used; forty-two project the stars, and the remaining thirty project the names of the stars.

Be reasonably sure before becoming unreasonably positive.

The spinning-jenny was patented by James Hargreaves in 1770.

Why is a poor singer like a counterfeiter? Because he is an utterer of bad notes.

Weighing 1,168 tons, there is an obelisk in Egypt that has never been raised.

Mother's Coughs and Colds Go Quickly

She cannot afford to be sick and neglect her household duties. At the first symptoms she prepares the way for quick recovery by the immediate use of Gray's Syrup—a household preparation of sixty years standing.

For further information apply to the Superintendent.

ECLIPSE FASHIONS

Exclusive Patterns

1172

THE SMART HIGH NECKLINE.

Fashioned in the mode of the hour—in jumper effect. The jumper type of frock has attained an assured position and is fashioned from a variety of materials. We have designed here an attractive model from striped flannel which simulates the two-piece effect, yet has all the comforts of the one-piece dress. The back is plain and in one piece, and the bodice front is joined to the skirt beneath a wide tuck. Two pocket tabs are set on to simulate pockets; or if really truly pockets are desired, slash the material on the line for the pockets, make an inset pocket and tack the tab over the opening. There are inverted plaits at the side seams, and the collar may be worn high as illustrated, or turned back to form revers. The long, full sleeves are gathered into narrow bands at the wrist. No. 1172 is in sizes 16, 18 and 20 years (34, 36 and 38 inches bust only). Size 18 years (36 bust) requires 3⅝ yards 36-inch, or 3½ yards 40-inch, or 3⅛ yards 54-inch material. Price 20 cents.

The designs illustrated in our new Fashion Book are advance styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, simplicity and economy will find her desires fulfilled in our patterns. Price of the book 10 cents the copy.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

Catching Snakes for a Living.

A writer in "The Wide World Magazine" gives an interesting account of a strange tribe of snake-hunters whom he met in the course of a trip through the Sunderbunds, a network of islands and creeks at the head of the Bay of Bengal. He writes:—

"They exist solely by means of catching snakes, which they sell to private collectors and the Zoological Gardens in Calcutta. By snakes I do not mean harmless grass snakes and the like; on the contrary, their choice is in the direction of the venomous and deadly cobra, the dread hamadryad, and the great python.

"I have seen these amazing people approach a deadly 'spectacled' cobra and catch it with bare hands with the ease and dexterity of a man picking up a piece of rope! They usually carry with them a long polished bamboo of fine balance and weight, having at its end a blunt, two-pronged fork, and also another bamboo with a sharp spearhead, but not once during the couple of days I watched them did the hunters have occasion to use these implements.

"The poison is apparently not extracted from the fangs of the snakes by these strange people—at least, so they told me. In view of that statement you can imagine my horror to see one of the women teasing a great eight-foot cobra, freshly caught, and not even wincing when the hideous thing struck at and bit her on the cheek-bone! Indeed, she laughed and continued her teasing, what time my mind was reeling with horror, for I expected at any moment to see the poor woman fall back and expire.

"A man, however, seeing the anxious expression on my face, explained that the members of this tribe were immune to the effects of the snake bites."

Work.

Love your land and keep it in good trim, so that your barns may be full of provision in due season. Whatever be your fortune work is best.—Hesiod.

GREEN TEA

Have you tried it? The tiny rich-flavored leaves and tips are sealed air-tight. Finer than any Japan or Gunpowder. Insist upon SALADA.

King Fulfills Promise By Reading Bible Daily.

A short time ago the newspapers printed a cable despatch from London to the effect that George V. reads one chapter of the Bible daily. This is keeping a promise which he made to his mother, Queen Alexandra, in 1881. If he has taken the authorized version in sequence, commencing with the first chapter of Genesis and reading one chapter each day, it would mean that he has read the Bible through thirteen times and has a good start on the fourteenth reading. It would take him a little more than two years and six months to read the Old Testament and three years and sixty-four days to read both Testaments.

Probably, like all other readers of the Bible, King George has his favorite passages. Undoubtedly he has read the Bible through from cover to cover at least once, not missing a single word. Having done this he would be at liberty to select his favorite passages and read them again and again.

It was an excellent habit which Queen Alexandra instilled in her son. If a king can find time to read a chapter of the Bible daily surely any other person can. It is an excellent example to the millions of persons who owe their allegiance to him. There is no more majestic prose or majestic poetry than that found in the Bible. In these days the Bible ought to be good reading for kings and for commoners as well. For an English king the English version is especially good reading.

Hubby—"Here's something I bought you for Christmas. I hope it fits."

Wifey—"If it don't I'll have a fit."

lt Water for Teeth.

e best thing to use for the daily sing of the teeth is salt water—a spoonful of kichen salt in one-third of a tumbler of water," said Sir Harry Baldwin, sugeon-dentist to the King, in a recent lecture. Pastes and powders, he continued, might be used for occasional polishing of teeth.

Pyorrhoea can be avoided if the edges of the gums are kept tight and hard by daily friction. Every part of the gums, back and front, should be rubbed vigoously with a tooth-brush night and morning. Although pyorrhoea does not cause pain, it is a serious disease that might eat through the bone of the jaws and penetrate to the nose.

destructive action of acids re- from stagnation of starch he mouth is the cause of the e teeth. Fruit is an excel- o stimulate the formation ine saliva, as an antidote

ERS WHO HAVE USED
ABY'S OWN TABLETS

Strongly Recommend
to Other Mothers.

Once a mother has used Baby's Own Tablets for her little ones she will use nothing else—actual experience teaches her that there is no other medicine to equal them for any of the minor ailments from which her baby or little ones suffer. Having found the value of the Tablets in her own home, she is always anxious that other mothers should share her knowledge. That is why Mrs. Creighton White, North Noel Road, N.S., writes the following:—"I have a baby seventeen months old and have given him nothing but Baby's Own Tablets ever since he was a week old. I know of no other medicine to equal them, and it is certainly a pleasure to recommend them to other mothers."

Baby's Own Tablets are a mild but thorough laxative that regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fevers and make the sickly baby well and happy again. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Twelve masts, each 800 ft. high, will suport the largest aerial in the world. This is at Hillmorton, near Rugby, where the British Government have the largest wireless station in the world.

If your foot slips, you may recover your balance, but if your tongue slips, you can not recall the words.

Rheims Reborn Now, Lacks Population.

Rheims, risen phoenix-like from the ashes of the war, is suffering from a new malady; "twice dead," writes a French observer. And the malady is one that is strange to most of the cities of the world, for Rheims is suffering not from overcrowding but from stagnation. The city has been rebuilt for a population which is actually almost twice that which it now has, and its streets and public places seem almost deserted.

During the war some 13,000 houses were destroyed in Rheims, and with the funds available from the reparation commissions, augmented in many cases by contributions from America, it was decided to rebuild the city along the most modern lines. After competitive plans for the new city had been submitted a program was laid down of which the first result was the erection of some 10,000 houses, all more spacious and up-to-date than their predecessors. At the same time the public services were extended to provide for a population of 120,000. An American architect was largely responsible for this new city and it has won general admiration—broad avenues and tree-bordered boulevards, arcaded streets, gardens. Rheims was reborn.

But to-day many of these beautiful new buildings are empty. Signs of "Building for Sale" and "House to Let," long since forgotten in Paris, are seen on every hand. There are empty office buildings and unleased hotels. There is an air of desertion about the city. Built for 120,000 people, barely half that number wander about its streets.

No Brains.

"Under the mistletoe once more I ask you to be my wife. Refuse me and I'll blow out my brains."

"Sir! You flatter yourself."

Longer Life for Shoes.

Winter weather is with us, and shoes are going to suffer. Stitches will rot; welts will open; leather will perish—unless preventive measures are taken.

To keep wet from penetrating soles, give the latter, when quite dry, two coatings of oak copal varnish. The soles of new shoes, by the way, must first be roughened with sandpaper, so that the varnish may penetrate.

Snow is destructive to stitches. It will penetrate between the uppers and the soles of shoes. Then, in due course, when the stitches rot and break, the welt opens.

To prevent that, prepare in advance a pot of mutton fat made by melting down the trimmings from an uncooked roast. Mix with the fat a tin of black or brown polish, according to the color of your shoes. Then, with a piece of pointed stick, or a small stiff brush, work a little of the fat (you may have to warm it first) between the uppers and the soles.

Uppers can be preserved if now and then you wash off the coating of blacking and oil them with a little paraffin. They will shine perfectly after two applications of polish.

To preserve the shape of boots or shoes that have got wet, cut off the feet, 4 inches or so above the ankles, of a pair of old stockings, insert them in the shoes, and then fill with oats well pressed down. The oats will absorb the wet and keep the shoes in shape.

Nothing to Boast of.

A bank in Boston, says the Globe of that city, takes on a number of young men during the summer. On their salary receipts is printed a legend something like this: "Your salary is your personal business—a confidential matter—and should not be disclosed to anybody else."

One of the new boys in signing this receipt added: "I won't mention it. I'm just as much ashamed of it as you are."

The difference between a goat and a Scotchman is this: The one delights in cold oat meal and the other delights in an old coat meal.

Minard's Liniment for Chilblains.

Deadly Tuberculosis.

The Public Health Service says that no age is immune against tuberculosis. Young infants succumb rapidly to it and, contrary to the general belief, persons over fifty years of age are by no means exempt, and deaths occur from it in a considerable percentage of the fatalities occurring in old age. About ten per cent. of all diseases among children under fifteen years of age are due to various forms of the disease, and about one-third of all deaths between twenty and forty are due to it—chiefly the pulmonary variety.

NEW STRENGTH FOR WEAK STOMACHS

Indigestion Disappears When the Blood is Enriched.

The urgent need of all who suffer from indigestion is a tonic to enrich the blood. Pain and distress after eating is the way the stomach shows that it is too weak to perform the work of digesting the food taken. In this condition some people foolishly resort to purgatives, but these only further aggravate the trouble.

New strength is given weak stomachs by Dr. Williams' Pink Pills because these pills enrich and purify the blood. This is the natural process of giving strength and tone to the stomach, and it accounts for the speedy relief in stomach disorders that follow the use of Dr. Williams' Pink Pills. The appetite revives, food can be taken without discomfort and the burden and pains of indigestion are dispelled. The following statement from Mr. Donald L. Latter, Lakeville, N.S., proves the value of these pills in cases of this kind. He says:—"A couple of years ago I had a bad attack of indigestion. I had little or no appetite, and what I did eat did not agree with me and caused me much pain. As a result of this trouble my general health broke down, and I finally had to give up my work. I had taken doctor's medicine but it did not give me any relief. Then a friend advised me to give Dr. Williams' Pink Pills a trial, and I got six boxes. Before I had completed the third box I found that they were helping me and by the time I had taken the six boxes every symptom of indigestion had disappeared, my general health had improved and I have since been in the very best of health. I look upon Dr. Williams' Pink Pills as a wonderful medicine for all who are run-down."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Companionship.

I count the shadows on the grass
Beyond remembering,
I catch the moonbeams as they pass,
And hear when wild birds sing.

A light I come, a wind I go,
Yet I am not alone:
Companionship is mine who know
That beauty is my own.

—George Elliston.

Take the pep from your dyspepsia with 15 to 30 drops of Seigel's Syrup in a glass of water as directed on the bottle. Any drug store.

Prince's Motto Mystery.

Few emblems have aroused more controversy than the Prince of Wales' crest and motto—three feathers and the words "ich Dien." The usual story is that when the Black Prince killed John of Austria at Crecy he assumed the latter's crest and motto, but a Welsh tradition indicates that when Edward I. promised the people of Wales a prince who could not speak a word of English, he presented to them his infant son, with the remark, Eich lyn, which means "Behold the man!"

It is further said that the feathers formed te rebus of Queen Philippa, mother of the Black Prince, representing her hereditary title, Countess of Ostre-vant (ostrich feather).

Now we are told that the giant replica of the Prince's crest, made of splendid ostrich plumes, that was seen at Wembley, is quite wrong, because the real crest is not made of ostrich feathers, and never was!

The truth is that the real crest is made from the feathers of the feriwah, a bird found in the denser jungles of Bengal.

If our water were as dirty as our air we should either have a revolution or cease to exist.—D. R. Veitch Clark.

WE WANT CHURNING

CREAM

We supply cans and pay express charges. We pay daily by express money orders, which can be cashed anywhere without any charge.

To obtain the top price, Cream must be free from bad flavors and contain not less than 30 per cent. Butter Fat.

FLAMES 100,000 MILES HIGH

They Flare Forth From That Seething Furnace, the Sun.

Number Four.

Secrets of Science.

By David Dietz.

Despite the fact that the sun is millions of miles away from us, astronomers have assembled a remarkable knowledge about the structure of the sun through the use of large telescopes and delicate astronomical instruments.

The first fact of interest is that the sun is not a stationary body as many suppose.

It is rushing through space at the rate of 12½ miles a second.

That means that since the astronomers of ancient Egypt began observing the stars 5000 years ago, the sun has moved two trillion miles.

Of course the sun carries the earth and the other planets along with it in this journey through the sky.

Secondly, the sun itself rotates on its axis just as the earth does.

It takes the sun 26 of our days to complete one revolution.

It is impossible, of course, to know anything about the centre or inner core of the sun, though there is great reason to believe that because of the intense heat of the sun, it is liquid.

We know, however, that the surface of the sun is a great white luminous molten sea.

This fact, and the time which it takes the sun to revolve upon its axis were both obtained by the observation of dark spots on the sun's surface known as sunspots.

The fact that these spots move across the disk of the sun prove that the sun is rotating.

The equatorial regions of the sun move with greater speed than do the polar regions. This proves the surface of the sun is liquid. If it were solid, like the earth, all parts would rotate with the same speed.

Above the sun's surface is a layer of cooler gases about 500 to 1000 miles in thickness.

Above this is a third layer of red surging fire composed of flaming gases. This layer is from 5000 to 10,000 miles in thickness.

It is invisible to us because of the intense white light radiated from the sun's surface which "drowns out," so to speak.

From this layer, great red tongues of flame shoot out in all directions, someimes for a distance of more than 100,000 miles.

This layer of red fire with its gigantic tongues of red flame becomes visible during a total eclipse of the sun when the main body of the sun is obscured from our view.

During an eclipse, a fourth layer around the sun is also visible—a sort of silvery halo. Astronomers believe this is composed of particles of matter shot out from the sun which are kept from falling back into the sun by the repelling force of the sun's rays.

These various layers on the sun are given names by the astronomer. The surface of the sun is called the photosphere. The next layer of gases is called the reversing layer. The layer of red fire is called the chromosphere, and the silvery halo is called the corona.

Next article: The sun-spots.

Keep Minard's Liniment handy.

If men were as clever as women they'd long ago have devised some way of making baldness fashionable.

Some people are so busy praying for more that they have no time to return thanks for what they have received.

WILLIAMSBURG COUNCIL

The Council met at Williamsburg on December 15th, 1925. Members all present. Minutes of previous meeting read and adopted. The report of the Engineer on the maintenance of the Grantley Creek Drain was read. The Reeve was authorized to secure legal advice on same before accepting it.

The Reeve, Clerk and Treasurer were appointed a committee to prepare the Financial Statement for 1925. The tax collectors were instructed to have their work completed by January 11th 1926. A by-law was passed for the payment of orders and accounts for the current year. By-law No. 847 was passed fixing the time and place for holding the nomination and appointing the polling places, Deputy Returning Officers and Poll Clerks as follows: Nomination in Froats Hall, Williamsburg on December 28th, 1925, between the hours of 12 o'clock noon and one o'clock p.m.

Poll No. 1—Wm. Prunner's house, Alfred Wells D.R.O.; Harry Baker Poll Clerk.

Poll No. 2—Robt. Cunningham's hall; Clarence Baker D.R.O.; H. A. Gallinger Clerk.

Poll No. 3—Chris Barkley's house, Chris. Barkley D.R.O.; Harvey Durant Clerk.

Poll No. 4—J. D. Beckstead's room; Levi Whitteker D.R.O.; Peter Barkley, Clerk.

Poll No. 5—George Hall's house; M. O. Barkley D.R.O.; John A. Reddick Clerk.

Poll No. 6—J. B. Barkley's Hall; J. A. Barkley D.R.O.; Elgin Herriman Clerk.

Poll No. 7—Chas. McMillan's house; John McLean D.R.O.; Walt. Carr, Clerk.

Poll No. 8—Orange Hall; Thos. Henderson D.R.O.; Abram Bailey Clerk.

Poll No. 9—Lee Duvall's store; H. G. Froats D.R.O.; Colin Carter Clerk.

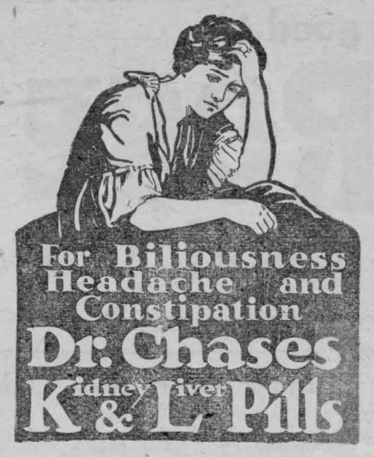

Poll No. 10—P. D. Schell's house Murray Styles D.R.O.; Fred Wells Clerk.

The following orders and accounts were passed:—

...UEL-SAVING DEVICES THAT COST NOTHING

...r is a fuel saver! The most ... of the hot summer days are ... on which the air is filled with ...ture. The thermometer on such ...asions may register only 75 degrees ...t the heat nevertheless seems in...ense. The same quality of heat ...haracterizes greenhouses.

It is in recognition of the effect of humidity that manufacturers of furnaces provide a water pan in connection with hot-air heating systems. This pan should always be kept filled. However, this water does little good on cold days when the furnace holds a brisk fire. The moisture it provides ... the air is evaporated long before ... reaches the living rooms.

...rest remedy for dry air is a ...thed receptacle for water in ...m in the house. A pretty ... is excellent for the purpose. ...g jardinieres that are decor... themselves, one can hang ...each register a small tin can that may be filled with water each day. Be careful to see that the pail cuts off as little of the stream of hot air as possible. If the ledge under the register is deep enough, a pint or a quart fruit jar may be used instead of a pail. The amount of water evaporated each day is always surprising. The moisture not only makes more comfortable the occupants of the house but preserves the furniture.

SPRINKLING COAL AND ASHES.

Many people have their coal thoroughly sprinkled before it is dumped into the bin. This is done not only because it lays the dust, but because a certain amount of moisture in the coal gives the gases liberated by the burning fuel more of a chance to throw off the maximum amount of heat. The fact that there is gas to be burned in the furnace is something many people seem to lose sight of. They are careful of gas and realize that it gives heat when it comes to them through pipes to their gas stoves, but they stoke their furnaces as if they were burning only coal.

Another good use for water is in connection with the removal of the ashes from the furnace. For this purpose, it is an excellent idea to keep fastened to a convenient hose bibb in the basement, a length of hose that will reach to the furnace and that has a nozzle that may be adjusted to a spray if necessary. The ashes may then be sprinkled thoroughly before they are taken from the ash pit. Ashes so treated can be removed in such a manner as to effect a saving in unburned coal. Thew the contents of the ash pit lightly, and by shovelfuls, into a corner of the cellar. A little practice will reveal a way to do this so that the damp ashes form a heap in the corner and the unburned ... falls out on the floor around the bottom of the pile. After the ashes have been disposed of in this way for a few days considerable fuel will be found that may be put back on the fire from time to time. Some people use it exclusively for banking the fires at night.

OUTSIDE AIR.

In the case of a hot-air system, a great deal of fuel may be saved in the winter through the use of a cellar window in connection with the outside-air intake. On bitter cold days the air often sweeps in through the intake and on up through the furnace into the rooms in so short a time that it does not have a chance to become heated. On the other hand, if the damper in the intake is closed and only the air in the house used, the circulation is apt to be poor and the air soon becomes "close" by being used over and over.

To avoid this, shut the damper in the intake and open in the cellar a window as far as possible from the water pipes so they will not freeze. This allows plenty of fresh air to enter the house in such a manner as to insure good circulation, but instead of trying to heat air of below-freezing temperature, air is employed which has been warmed considerably by its passage through the furnace room and by contact with the warm outside walls of the furnace.

Before retiring at night, it is a good plan to give the house a thorough ventilating and see that the outside intake is closed so the place need not be chilled by bitter-cold air entering when the furnace fire is low. Also throw a small rug or crowd newspapers down in front of each door to bedrooms where windows are kept open through the night. These precautions will make the house much more comfortable in the morning before the fire has had a chance to warm it.

HEATING WITH ELECTRIC FAN.

It is certainly aggravating to have a good fire in the furnace and little heat coming up into the rooms above, as so often happens with a hot-air system when the wind is in the wrong direction. With an electric fan one can create an artificial circulation of air that will raise the temperature of the whole house in a very short time. If two registers are on one pipe, close the register in the room where the heat is least needed. Cut away the top and bottom of a box that, stood on end, will inclose the register. Set the fan inside the box, close to the register, and run it at low speed. Direct the current of air toward the coldest part of the room. Unless such a box is used to cut off the cold air from being sucked in from the top and sides of the fan, the breeze will be cold instead of warm. If this device can be used in connection with the longest pipe from the furnace where poor circulation is apt to be the rule, most often on the first floor, just so much more heat will be available.

SERVING THE ...

"Oh!" puffed Puffety-Puff.

"My!" blinked Blinkety-Blink.

"Yes!" pattered Patter-Pat.

The three little kittnes, not the ones who lost their mittens, but the three little kittens of the Fluffy-Fluff family, huddled together in a corner of the farm kitchen, discussing their future.

"Yes," continued Patter-Pat, "that is just what we should do. We are old enough to serve the King."

Puffety-Puff puffed and Blinkety-Blink blinked at their brother who had been named Patter-Pat because he always talked so fast and so much.

"And must we live in the Palace?" asked Puffety-Puff.

"Of course," nodded Patter-Pat. "We must journey to the Palace and offer ourselves to the King for service. The King will then give us the work for which he thinks we are best suited."

"But," blinked Blinkety-Blink, "what will become of the farm if we all should go?"

"The farm? We must not think about it. Our duty is to serve the King," answered Patter-Pat.

"But," insisted Blinkety-Blink, "we can't let the farm take care of itself. One of us must stay here."

"But I want to serve the King," puffed Puffety-Puff.

"And it is our duty. Don't you understand?" pattered Patter-Pat.

Blinkety-Blink blinked thoughtfully for several moments, and then said: "I want to serve the King, too, yet I feel that it is my duty to stay here and care for the farm, if you two want to go to the Palace. The crop feeds many a family, you know. Will you explain about this to the King when you reach the Palace?"

"Very well," pattered Patter-Pat.

"Very well," puffed Puffety-Puff.

So the two little kittens, Patter-Pat and Puffety-Puff prepared for their journey, and were very happy to think that they would soon be at the Palace serving the King. Finally they went away, leaving Blinkety-Blink all alone to care for the little farm.

And as Blinkety-Blink worked, he thought: "Perhaps I'll be serving the King, too, if I do my work well and love him in my heart." This thought made him very happy, and he forgot that he was doing Patter-Pat's and Puffety-Puff's work too.

But Patter-Pat and Puffety-Puff were not having the easy time that they had expected. They had never traveled before, and were always losing their way, it seemed. And many times they were forced to sit by the wayside because the roads were rough and stony. At such times they were sorry that they had left the quiet, peaceful farm.

After a long, long journey, they spied the towers of the Palace in the distance. How happy they were! They forgot that they were weary, and began to hasten their steps. Presently they reached the Palace, but as they were about to enter the gates ... "What do you want at the King's Palace?"

"We have come to offer ourselves to the King for service," answered Patter-Pat.

"But every place is filled," said the Guard. "There are no places for you."

Patter-Pat and Puffety-Puff were sadly disappointed. "But may we see the King?" they asked.

"Have you not heard? The King is away making his yearly trip round the Kingdom and awarding those who have served him. It isn't necessary to come to the Palace to serve the King, you know. People are serving the King all over the Kingdom," the Guard explained.

Patter-Pat and Puffety-Puff were surprised, indeed. "How do they serve?" they wanted to know.

"That is not for me to tell you. You will s... ...urselves," answ...

Poor little Pa... Poor little Puffety-Puff! They had to go home. And all the way home they wondered how they could serve the King away from the Palace. When at last the two little travelers reached their home they found that Blinkety-Blink was holding a celebration. There were many neighbors present. And Patter-Pat and Puffety-Puff wondered what it was all about. But they didn't wonder long. They soon learned that Blinkety-Blink had been awarded a medal for service by the King, when he had stopped at the farm to investigate.

"And to think what we have missed!" sadly puffed Puffety-Puff.

"And we would have seen the King and been rewarded if we had stayed at home and done the work that we had to do," sadly pattered Patter-Pat.

But Blinkety-Blink, who was very happy in the thought that he had served the King by doing his duty, comforted his brothers. "The King will be round next year," he blinked.

Increase in Fruit Values.

As the Dominion Fruit Commissioner said in his address before the Pomological and Fruit-Growing Society of Quebec the particulars he was able to supply of progress in values do not look like blue ruin for the Canadian fruit industry. In some provinces there has been a decrease in the acreage devoted to fruit, but this simply means that the old hit or miss policy is disappearing and greater attention given to improvement in quality. Here is evidence of this furnished by the Commissioner, Mr. G. E. McIntosh: Prince Edward Island, less acreage, value increase of crop 23.33 per cent.; New Brunswick, less acreage, increase of orchard crop 81 per cent. and of small fruits 106 per cent.; Nova Scotia, increased value of orchard crop 156 per cent. and of small fruits 99 per cent.; Quebec, orchard crop increase in value 17.79 per cent. and small fruits 12.98 per cent.; Ontario, greatest reduction in acreage of any province, increased orchard value 72 per cent. and small fruits 159 per cent., and British Columbia, where being the maiden fruit province new orchards are coming into bearing, increase in orchard value 272 per cent. and small fruits 299.70 per cent. In connection with this phase of the situation the Commissioner gave utterance to a maxim that is well worthy of being taken to heart. He said, "In the long run it is as costly to grow poor fruit as to grow good fruit and yields little of that satisfaction which cannot be expressed in money."

Wintering Work Horses.

A farmer who owns efficient work horses naturally does not care to dispose of them in the autumn even though more than hea... a question of ... best they can be kept for several months at the lowest cost. An experiment conducted for five winters at the Cap Rouge, Que., Experimental Station with mares and geldings from five to eighteen years of age showed that the animals did well on one pound of mixed hay, one pound of oats straw and one pound of carrots or swede turnips for each hundred pounds of their weight. Horses that are worked hard in the autumn, remarks Dr. Langelier, the Superintendent, should be brought up to their normal weight gradually over two weeks before changing the feed. Two feedings a day are sufficient during the winter, and if the horses are turned out for a short while on fine days, or every day when protected from the wind, they will be all the better.

Olive oil added to putty will prevent its hardening.

WHY TANTRUMS?

Five Rules to be Applied to Their Cure.

BY ELIZABETH CLEVELAND.

Neddy, at three, is possessed of the seven devils called, for convenience, "tantrums." Whenever his world opposes him, when he can't go out, when he must come in, when Mother goes to town without him, when brother teases him, when sister takes his ball, when he doesn't want his dinner, when bedtime interrupts his play—his evil spirits seize upon him and drive him to cast himself upon the floor and kick and shriek with fury.

When he does this, Mother sometimes drags him to his feet with slaps or sharp words, filling the atmosphere with retributive unpleasantness and adding fear and personal resentment to the unholy turmoil which is Neddy's naughty state of mind. Sometimes Grandma and the aunties gather about him with reasoning (to which he is in no state to listen), or coaxing which flatters his instinct for tyranny. Somteimes brother and sister laugh and point derisive fingers, sending him into fresh paroxysms of rage. Sometimes Father descends upon the situation with, "I'll show you how to manage this young man!" and vainly tries by blows to conquer the savage demons—a treatment which leaves Neddy outwardly subdued but inwardly aflame with hatred.

All these methods are as wrong as wrong can be—wrong, because they are stupid, unscientific, unsympathetic and ineffective.

If Neddy should show symptoms of any bodily ill, the first thing an intelligent doctor would do would be to try and find out and, if possible, remove the cause of the trouble. In the same way, the intelligent grown-up should realize that the first step in curing tantrums is to understand their cause.

What makes Neddy act this way? What makes Neddy feel this way? There umst be an answer.

"He's always had a frightful temper," sighs Mother. "He inherits it from his father's side of the family." Well, possibly, to some extent, but that doesn't mean so much as we used to believe. There are several cases on record in which a child's inherited temper suddenly ceases to function when the child's environment is changed—cases enough to make us wonder whether Neddy's tantrums are not caused less by inheritance from father's temper than by living with father's temper. Anyway we can't do anything now about Neddy's inherited qualities so let us consider what his environment has been.

We know on good authority that he came into this world equipped with the power to get angry, for science tells us that every normal baby is capable of feeling anger from the very first. We also know exactly what makes a baby angry and it is just the one thing that makes us all angry—interference.

...eddy was taken from his mother's breast before he considered his dinner over, when his active little arms and legs were hampered by clothing, he screamed, clenched his fists, grew red in the face, showed all the familiar signs of "getting mad." Now that was the time to begin to be wise with him, but Mother thought he was "too little to discipline." She did not well enough understand the laws of habit-formation to know that every occasion when the baby accomplished his purposes by kicking and screaming, was fixing more firmly in his mind the practical value of tantrums.

Rule Number One for the treatment of tantrums is to begin with Tantrum Number One; and Rule Number Two is to see to it that baby does not get the thing he screams for.

Eleanor began to develop tantrums at five months old. She greatly enjoyed her bath and objected vigorously to being dried and dressed. When she was lifted from the water, she ... ened her little body and screamed wi... indignation. Ne... once did her ... ther make the mistake of putting h... back into the water "just for ... ment." Never once did ... accomplish its purpose.

Her mother did anot... which brings us to ... Three. At the firs... she ... ped the baby in a warm bat... deposited her safely on the ... left the room, returning ... the screaming stopped. A... ...e... of these treatments the baby ... ve up and allowed herself to be ta... from the water without screaming.

Tantrums require an audience. They always are aimed at ...pressing somebody demanding attent... When Margaret entered the nur... school she was the victim of mo... ...rrific tantrums. Whenever she ...d ... at home, she became at onc... ...re of an excited group, all s... ...ax... ing, arguing, all paying ... to her. At school, her ... ...y said, "If you're going to ... ... like that, you'll distu... the ot... dren. I'll have to put you i... by yourself until you're quie... is simple treatment was at once ... ful.

Of course the more ... habit is, the longer it take... it. One two-year-old ... hour on the first occasion he ... in a room alone with his mot... he was fit to be a member of ... But the second time he ... fifteen minutes and never th... So Rule Number Three i... ment of tantrums is to r... any flattering display ... concern.

"But why not go ... asks the practical ... "Why not settle t... time by making th... unpleasant that the ... to repeat it? Why not spank it out of him?"

This is probably the most fatal mistake we can make. It may, indeed, get quick results, but it introduces the very dangerous element ... and far-reaching effects.

We have seen that anger is caused by interference ... what the child wants. Our problem is to show the child how to want ... while, how to form wor... purposes. When these purposes are interfered with, anger may be a virtue.

So Rule Number Four, the really important and constructive rule in dealing with tantrums, is to reach not merely the expression of anger but the feeling of anger, and try to direct it rightly. Of course we have to say, "This conduct will not do. You cannot be allowed to ... this way in civilized society. ... rights of the whole group have to be considered. If you cannot con... yourself so that the group is not ... noyed, you will have to be remove... from the group until you can." ... we must also say with even mo... concern: "Now, let us see how ... came to be so angry. Suppose ... did take your ball? She is so li... she didn't know any better—" or ... knows better than to take it ... ut asking you and Mother must ... her understand that she isn't to do it ... more. But after all, it isn't worth ... tting so mad about. Try to think of ... mething else to play until ... turn is ... you. We all get in ... Mrs... and have to learn ... rid... hard when our little ... and ... personal projects are ... Mis... Or, "Yes, indeed, dear ... you for being mad a... ing his puppy. It mak... to think of it. Such a ... and such a mean, cruel ... won't get anywhere by ju... into a passion. We've got to do ... thing. We've got to see that ... puppy is taken care of. Let's all our energy for that."

If a laugh can be gotten out of ... situation, so much the better. Ru... Number Five, then, in the treatment of tantrums is to avoid a provocative attitude and maintain at all times toward the child a spirit of consistent affection and support.

In so far as these five rules are observed, the problem of tantrums will be solved.

Fun for Home Evenings.

If you know how to play jolly games and have the knack of making others enjoy them, the evenings the family spend at home will always be remembered. Friends will get the habit ... dropping in when they hear ... good time... party tri...

Interest in one's work is ... a rest cure—Mr. Clement Jeffrey

THE CHEESE INDUSTRY

... the Canadian ... market is apparent. ... has been a heavy movement in the past few months from the Province of Quebec to England, and the product has been so favorably received there that shipments are going forward continuously in ever greater volume, and it is felt that the Quebec product is now safely established in Great Britain. At October 1st, Montreal had shipped nearly 150,000 more boxes of cheese to the United Kingdom than in the previous year, and the volume of weekly shipments was still rising.

Cheese making has long been a popular industry in Canada, more especially in the Eastern provinces, where it was early established with the first settlements, and the great favor the manufacture has found in the Western provinces of recent years has to a large extent offset the decline exhibited in the East. The expansion of the Canadian condensed milk industry has been almost wholly the result of the diversion of milk from the cheese factories, and the increasing demands of towns and cities for milk, cream, and ice cream has made greater annual inroads on the industry. Cheese making is carried on only in those districts where large quantities of milk are produced, and it is to these districts that the city milk distributors turn for supplies.

PRODUCTION INCREASING.

Canadian cheese has always enjoyed a high favor abroad, and as far back as 1868 more than six million pounds left the country for foreign markets. At the Dairy Show held in London in 1921, where cheese-makers from all over the world met in competition, Canada secured the first three places in the Cheddar cheese class. It is, therefore, gratifying to find production and export are again on the increase, and Canadian cheese likely to again take the position it once occupied in world markets.

Production figures of cheese in Canada for the years 1922, 1923 and 1924 were respectively 135,821,116 lbs., 151,624,376 lbs., and 151,673,880 lbs., and the values $21,824,760, $28,645,192, and $24,518,734. The decline in value last year is explained by a reduction in the average price received per pound from 19 cents to 16 cents. Ontario is outstandingly the heaviest producer, accounting last year for 104,219,238 lbs., a substantial in... ...output but materially higher than that of 1922. The remarkable feature of the report is the manner in which cheese making is increasing in the Prairie Provinces of Manitoba, Saskatchewan, and Alberta, these three provinces between 1922 and 1924 having increased their production from 1,046,794 to 2,449,658, or by more than one hundred per cent.

The United Kingdom is Canada's outstanding customer for cheese, taking approximately 95 per cent. of the Canadian export in this commodity. Canadian cheese is, however, going in smaller quantity to practically every country with which the Dominion carries on business, and with an increase in production there must exist very favorable possibilities for developing this trade. Should the Western provinces continue to increase their manufacture of cheese and go after markets in the same aggressive manner they have done for their butter, this item is due to become a relatively more important one in Canadian trade.

Comfort for Grandma.

Keep the feet warm at night in order to feel rested and comfortable, but do not use hot-water bags or flat-irons unless absolutely necessary. They will cause chilblains and a tendency to take cold.

If the bed has light, warm coverings and an extra covering placed over lower half of bed one will be very comfortable. Something loose and thin may well be worn to cover feet and lower limbs. Try worn-out union suits, cut off below the waistline and with stocking feet attached.

A light knit vest with sleeves, under the gown, is better than one heavy garment or a burdensome weight of bedclothes.

Every one should have a hobby. Collecting oddities is lots of fun. A boy found a piece of a deer's horn out in his father's meadow and that set him to thinking about saving up the odd trinkets Nature strews about the fields. Now he has about a bushel of curious things such as stones, queer pieces of wood, Indian arrow-heads and shells. Every farm boy and girl can have such a little home-museum as this and it will give much pleasure.

Put the hinges on the barn door with small bolts instead of nails or screws. Then they will stay put.

WORLD GRAIN MARKETING RECORD ON PRAIRIES

With the grain movement in the West at its peak, a world record in grain marketing was reached on Thursday, November 19, when 3,447,624 bushels of all grains were marketed on Canadian Pacific Railway lines in Western Canada. On November 20, 3,559,000 bushels were marketed during the twenty-four hours, bettering even the world record of the day before. The nearest approach to these figures occurred in the banner year 1915, when on October 18 of that year 3,406,000 bushels were marketed.

These stupendous figures mean that the C.P.R. handled approximately 81 bushels of grain every second during the forty-eight hours of that period. If old-fashioned methods were prevailing, it would take forty thousand farmers' waggons to haul the grain across the prairies. If these teams were placed end to end they would form an unbroken line from Winnipeg to Brandon, or from Fort William to Schreiber, or from Regina to Saskatoon, or from Calgary to Field, or from North Bend to Vancouver, or from Toronto to Napanee.

From August 1 to November 20, 1925, inclusive, 148,078,445 bushels of all grains were marketed at Stations adjacent to Canadian Pacific Railway lines as compared with 109,651,136 bushels for the same period last year, an increase of about 35 per cent. Loadings show a similar increase over last year. One housand cars a day left Winnipeg each day during the present month — a car every seventy-five seconds.
