XXIII, No. 32 MORRISBURG, ONT. FRIDAY, AUG. 29, 1924

THE UNITED FARMERS CO-OPERATIVE COMPANY LIMITED

EGGS

Prices are advancing steadily and we aim to pay a little more than other buyers at all times. Be sure to get our prices before selling. Phone at our expense.

Flour & Feed

We still have good stock of all lines of feed and feed grains bought below present prices and are giving our customers the advantage of our fortunate purchases in these lines.

CORN

We will have a supply of Argentine Corn early in September for Fall Feeding. The price will be considerably below what we can offer it at today.

Binder Twine

We have a good supply of pure Manila Twine of best quality 650 foot grade. Place your order without delay.

SALT

We have a good supply of the best grade coarse salt in stock. We are sure the price is attractive. Get your requirements now.

THE UNITED FARMERS CO-OPERATIVE CO. LIMITED
MORRISBURG, ONT.

SCHOOL OPENS NEXT WEEK

Have you got a new Eversharp Pencil, only $1.00

Or a genuine Wahl Fountain Pen just as good as the Eversharp Wahl Pencils.

FREE

ONE EVERSHARP ERASER WITH EACH BOX OF LEADS ..... 15 Cents.

Harvesters' Binder Whips

A real Binder Whip, measures 13 ft from end to tip
Reg. $1.25, Special price 98 cts.

MORRISBURG — ONTARIO

MISS VELMA G ROBINSON

A very sad death occurred at the home of her parents, Riverside, on Monday, August 25th, when Miss Velma Grace Robinson, eldest daughter of Mr. and Mrs. Jas. Robinson, passed away. The deceased who was born in Grantley, was in her twenty-first year. Death came after an illness of bout six weeks, during which time she gradually weakened.

The funeral was in the Lutheran Church, Riverside, on Wednesday afternoon. The services were conducted by the Rev. Mr. Wilson of Finch, assisted by Rev Mr. Meader of Morrisburg, while Rev. Flagg of Morrisburg preached the burial sermon.

The funeral was under the direction of Daisy Rebekah Lodge of Morrisburg, of which the deceased was a member. After the services in the church, members of the lodge held their burial service. The remains were then conveyed to Grantley where interment was made.

The esteem in which the young lady was held was shown by the many beautiful floral offerings.

The funeral was a very large one and was attended by a host of friends and relatives from a distance. The deceased is survived by her parents, four sisters and eight brothers.

YOUNG GIRL DROWNED

Beatrice Converse, 16, of Fort Jackson, was drowned at 2.15 p.m. August 26th, while swimming at the pulp terminal dock in Waddington. It is thought she was seized with a cramp. Her cries for help were heard but other bathers were too far away to come to her assistance in time. A small boy attempted to save her but with no avail.

Miss Converse was visiting the Berry family in Waddington. She was a good swimmer.

WATT—HEAGLE

Miss Olive Gertrude Heagle youngest daughter of Mr. and Mrs. Frank Heagle of Regina, formerly of Morrisburg, became the bride of Charles Watt, son of Mr. and Mrs. George Watt of Albert Street, Regina, by a ceremony performed in Chicago, July 18th, by Rev. Colin J. Roberts.

Mr. and Mrs. Watt will reside at 817 Bowen Ave., E. Chicago.

PLAN TO MAKE MEMORIAL A PERPETUAL ONE

A plan to make the soldiers' memorial in Oshawa a perpetual one has been devised by Dr. T. E. Kaiser, of Oshawa who this week launched a scheme whereby the monument now being erected in memory of Oshawa's soldier dead will be replaced 500 years hence. The architect and builder of "The Garden of the Unforgotten," the name of that memorial, state that it will last at least five centuries. Lest the people living at that time will have forgotten the Great War and the part the citizens of Oshawa played in it, Dr. Kaiser is depositing $10 in the Bank of Montreal there, with instructions to leave it accumulate for 500 years.

The bank is to be custodian or guardian of the $10, and at 3 per cent., simple interest, the $10 will, in 500 years, amount to $327,680. At that time all but $1,000 is to be used for the erection of a new memorial, the $1,000 being again deposited as the nucleus for a fund for another memorial to be erected when the second 500 years have elapsed. In the crypt of the present monument will be deposited an order payable to the Mayor of Oshawa in 2424 of the accumulated revenues from the ten dollars.

BOY SOLOIST FROM GREAT NEW YORK CHURCH COMING HERE IN RECITAL

The noted boy contralto soloist from the church of the Transfiguration, New York (The Little Church Around the Corner) will appear in the Music Hall in Morrisburg, on Wednesday, September 17th under the auspices of the Ladies Aid Society of Knox Church. Young Rice is described by many of the greatest living critics as having the most phenomenal boys' voice ever heard on the American Continent. He has sung in some of the biggest New York churches as soloist since he was eleven years of age and is now making his third trans-continental tour when he will visit and give recitals in most of the cities in Canada and the United States.

SERVICES ST JAMES CHURCH

Sunday, August 31st.
8 a.m., Holy Communion.
11 a.m., Matins.
7 p.m., Evensong.
Trinity Church, Riverside.
2.30 p.m., Evensong.

THE COLLEGIATE INSTITUTE

Upper School Departmental Results:—

The Upper School results of the Departmental Examnations were received by the Principal, August 21st and sent to the candidate the same evening. Seventy-two per cent passed; 43 per cent. with Honor Standing. The certificate of standing of Vincent McMartin has been sent to Inspector H. B. Fetterly.

MIDDLE SCHOOL EXAMS—

The Middle School Results were sent from Toronto August 27th, received and sent to Press and to each student, August 28th. The following students of the different Forms wrote on one or more papers of Middle School.. Subjects regularly taken in Form III are: British History, Algebra, Chemistry and English. Subjects regularly taken in Form IV are: Ancient History, Geometry, Physics and English.

Form V Candidates—

Erroll Nephew: Latin Com. C.

Lorne Robinson: Compos. C, Ancient History C.

Mary Shannette: Latin Authors H1, Latin Compos. H1 French Authors H1, French Compos H1.

Dorothy Willard: Algebra *C.

Marion Lavis: Algebra C, Geometry *C.

Form 1V Candidates—

Francis Baker: Compos. H1, British History H3, Geometry H1, Physics H1, French Authors H1, French Compos. H1, Greek Authors H1, Greek Compos. H1.

Sadie Casselman: British History C, Ancient History *C, Geometry C.

Alister Colquhoun: Compos. H3, British History C, Algebra C, Geometry *C, Physics H1, Latin Authors H2, Latin Compos. H2, French Authors H2, French Compos. H1.

Grayce Gallinger: British History C, Ancient History *C.

Alice Gillard: Compos. C, Literature C, British History C, Physics H2, Chemistry C.

Pauline Harkness: Algebra *C, Geometry *C, Physics H2, French Authors H2, French Compos. H3.

Maxaleen Moore: Ancient History C, Algebra C, French Authors H3, French Composition H2.

Hugh Robinson: Composition C, British History H3 Geometry H2, Physics H1, Latin Authors, H1 Latin Compos. H1, French Authors H1 French Compos. H1.

Kenneth Tuttle: Literature C, British History C, Algebra C, Chemistry C.

Candidates of Form III—

Edith Armstrong, Compos. H2, Literature H3, British History C, Chemistry *C.

Jean Armstrong: Compos. H1, Literature H3, British History C, Algebra H3, Chemistry H2.

Annetta Barkley: Compos. C, Algebra C, Chemistry C*.

Morley Beckstead: Literature C, Algebra C, Physics C, Chemistry C.

Alice Casselman: Literature C, Physics H2, British History C, Algebra H2, Geometry C,

Pauline Casselman: Compos. H2, Literature C.

Charles Clark: Chemistry C.

Marion Coligan: Composition C.

Walter Connolly: Compos. H2, Literature C, British History C.

Dorothy Dain: Compos. H2, Lit-

A Frank Statement

OUR BUSINESS has been seriously impaired through lack of Capital to properly continue. The cause of this is our inability to collect our accounts when due. We have given those owing us every fair chance. Many of our appeals go by unheeded. We now have to choose between discontinuing business or collecting our past due notes and accounts.

SO THEREFORE

All accounts and Notes past due, unpaid will be handed the Courts for collection without further notice.

W. H. Fetterly, Morrisburg, Ont.

Central Meat Market

Aultsville branch ..... G. M. WHITNEY Manager.

CANADIAN BANKS TO PROVIDE FUNDS TO FINANCE HARVEST

A despatch from Calgary, Alta., says:—Canadian banks are once more prepared to come forward and provide any credit required to finance the harvesting of the crop in Western Canada this fall, according to a statement made here by J. A. C. Kemp, of Toronto, chief inspector of the Bank of Commerce, who is at present on a tour of Western Canada in company with C. W. Rowley, of Winnipeg, Western inspector of the bank for Western Canada.

"The banks have the best feeling for the farmers," said Mr. Kemp, "and bankers still have plenty of confidence in the West. All that is necessary for people to be a little bit careful, work hard, use what they have to the best of their ability and by practising the same spirit of economy as has been evident during the last few years and things are bound to come out for the best."

Mr. Kemp said that conditions in Ontario were good and this also applied to Quebec, the Maritime Provinces and British Columbia. There was every reason for the people of the West to be optimistic.

"Crops throughout the prairie provinces on the whole are satisfactory and there is every indication that the return will be better than was expected a few weeks ago," he said. "All the Western towns I have visited so far appear very active."

Influx of harvesters to the province caused unemployment to increase from 636 to 932 during the last week, according to the weekly report just issued by Walter Smitten, Commissioner of Labor. This condition was shown in spite of the fact that the placements made during the last week doubled those of the previous period. The placements last week totalled 636.

The local situation on Thursday showed no material change. There are plenty of men available to take care of the first big call for help in the harvest fields of the district and this is not expected for another week or ten days. The rain on Wednesday lessened the demand considerably.

According to local officials, harvesters from the east are being advised not to come to Alberta unless they first get in touch with the Alberta representative at Winnipeg. The object is to eliminate any possibility of the province being overrun by more harvest hands than there are jobs.

A despatch from Winnipeg says:—While general rainfall has prevailed over the Prairie Provinces during the past two days, prospects are for more settled conditions and rising temperatures. Although the mercury dropped considerably at many points during the night, there were no reports of frost and it is generally believed that the danger from this agency has passed.

Canadian Appointed Engineer of New Zealand Railways

A despatch from Wellington, New Zealand, says:—Percy Simms, a Canadian engineer, has been appointed assistant chief mechanical engineer of the New Zealand Government railways.

The importation of Canadian prize milch cattle into Japan, in order to offset the huge annual consumption of canned milks in that country, is the mission of a prominent cattle breeder of Osaka, Japan, who arrived in Vancouver recently on the "Empress of Canada." Purchases have already been made in Quebec, and it is understood that further purchases will be made in that province.

Sir David Bruce, chairman of the governing board of the Lister Institute of Preventive Medicine, who had a lot to do with the successful fight against sleeping sickness, is now touring Canada with the British scientists.

EACH DAY THE ROPE GETS SHORTER

—Columbus Dispatch.

Canada from Coast to Coast

Kentville, N.S.—Considerable activity is reported in the Annapolis Valley in connection with preparations to evaporate apples on a somewhat larger scale than last season. New plants have been erected, some have been enlarged, and one or two combinations have taken place.

Fredericton, N.B.—Sufficient storage facilities for the initial hydro development at Grand Falls have been found on the Canadian side of the boundary, according to a report of the hydro commission. Arrangements are now being made for the designing of a plant with an initial capacity of 60,000 horsepower.

Quebec, Que.—Between five to six million dollars is being spent this year for the purchase of gasoline to operate motor vehicles and motor boats in the province, either by local residents or visitors, according to statistics now being compiled by the provincial revenue department. The quantity of gasoline used throughout the entire year is estimated at 17,500,000 gallons.

Port Arthur, Ont.—The Thunder Bay Paper Co. has commenced work on the new addition to the mill, and gangs of men are now at work preparing the ground and putting in the foundations. It is expected that the changes will be completed by the beginning of October and that the capacity of the plant will be increased from 65 to 120 tons per day.

Winnipeg, Man.—Rye harvesting commenced on August 5 in various districts of Manitoba. This is believed to be the first cutting operation of the season, and is probably a record for Manitoba.

Regina, Sask.—That the farmers of Western Canada are now giving increasing attention to the improvement of their home surroundings is shown by the fact that two government forestry stations have distributed 5,250,000 trees this spring all to farmers. This is in addition to large quantities purchased from private nurseries.

Edmonton, Alta.—More than 150 traders from the Far North arrived here recently, bringing with them fur bales to the value of approximately $500,000.

Vancouver, B.C.—Announcement by Inspector of Fisheries Motherwell states that to date Sockeye salmon pack on Skeena and Naas rivers is 32,396 cases in excess of last year.

The Week's Markets

TORONTO.

Manitoba wheat—No. 1 North., $1.50½; No. 2 North., $1.45½; No. 3 North., $1.42½.

Man. oats—No. 3 CW., 60¾c; No. 1 feed, 60c.

All the above, c.i.f., bay ports.

Am. corn, track, Toronto—No. 2 yellow, $1.37.

Millfeed—Del., Montreal freights, bags included: Bran, per ton, $29; shorts, per ton, $31; middlings, $37; good feed flour, per bag, $2.05.

Ont. wheat—No. 2 winter, $1.15 to $1.20; No. 3 winter, $1.13 to $1.18; No. 1 commercial, $1.10 to $1.15, f.o.b. nominal shipping points, according to freights.

Barley—Malting, 70 to 75c.

Ont. flour—New, 90 per cent. pats., in jute bags, Montreal, prompt shipment, $7; Toronto basis, $7; bulk seaboard, nominal.

Man. flour—1st pats., in jute sacks, $8.20 per bbl.; 2nd pats., $7.70.

Hay—Extra No. 2 timothy, per ton, track, Toronto, $17.50; No. 2, $17; No. 3, $15; mixed, $13; lower grades, $10 to $12.

Rye—No. 2, 85 to 90c.

Straw—Carlots, per ton, $9.50 to $10.

Screenings—Standard, recleaned, f.o.b. bay ports, per ton, $22.50.

Cheese—New, large, 20c; twins, 20½c; triplets, 21c; Stiltons, 22 to 23c. Old, large, 23 to 24c; twins, 24 to 25c; triplets, 25 to 26c.

Butter—Finest creamery prints, 38 to 39c; No. 1 creamery, 36 to 37c; No. 2, 34 to 35c; dairy, 28 to 29c.

Eggs—Extras, fresh, in cartons, 45c; extra, loose, 43c; firsts, 37c; seconds, 30c.

Live poultry—Hens, over 5 lbs., 22c; do, 4 to 5 lbs., 20c; do, 3 to 4 lbs., 15c; spring chickens, 2 lbs. and over, 25c; roosters, 15c; ducklings, 4 to 5 lbs., 20c.

Dressed poultry—Hens, over 5 lbs., 28c; do, 4 to 5 lbs., 24c; do, 3 to 4 lbs., 18c; spring chickens, 2 lbs. and over, 35c; roosters, 20c; ducklings, 4 to 5 lbs., 25c.

Beans—Can. handpicked, lb., 6½c; primes, 6c.

Maple products—Syrup, per imp. gal., $2.50; per 5-gal. tin, $2.40 per gal.; maple sugar, lb., 25 to 26c.

Honey—60-lb. tins, 12½c per lb.; 10-lb. tins, 12½c; 5-lb. tins, 13½c; 2½-lb. tins, 14c.

Smoked meats—Hams, med., 27 to 29c; cooked hams, 42 to 43c; smoked rolls, 18 to 20c; cottage rolls, 21 to 24c; breakfast bacon, 23 to 27c; special brand breakfast bacon, 29 to 31c; backs, boneless, 36 to 40c.

Cured meats—Long clear bacon, 50 to 70 lbs., $17; 70 to 90 lbs., $16.50; 90 lbs. and up, $15.50; lightweight rolls, in barrels, $32; heavyweight rolls, $27.

Lard—Pure, tierces, 17½ to 18c; tubs, 17¾ to 18½c; pails, 18 to 18¾c; prints 20¼ to 20½c; shortening, tierces, 16 to 16½c; tubs, 16½ to 17c; pails, 17 to 17½c; prints, 18 to 18½c.

Export steers, choice, $7.50 to $7.75; do, good, $6.50 to $7; export heifers, $6.50 to $6.75; baby beeves, $7.50 to $10; butcher steers, choice, $6.25 to $6.75; do, good, $6 to $6.25; do, med., $5 to $6; do, com., $4 to $4.50; butcher heifers, choice, $6 to $6.50; do, med., $5 to $5.75; do, com., $3.50 to $4.25; butcher cows, choice, $4.25 to $5; do, med., $3 to $4; butcher bulls, good, $4 to $4.50; do, fair, $3.50 to $4; bolognas, $2.50 to $3.50; canners and cutters, $1 to $2.50; feeding steers, choice, $6 to $6.25; do, fair, $5 to $5.50; stockers, choice, $4.50 to $5; do, fair, $3.50 to $4.25; milkers, springers, choice, $75 to $90; do, fair, $40 to $50; calves, choice, $8 to $8.50; do, med., $6 to $7; do, com., $3.50 to $4.50; lambs, choice ewes, $13.50 to $13.75; do bucks, $11 to $11.50; do culls $8 to $11; sheep, light ewes, $6.50 to $7.25; do, culls, $2 to $4.50; hogs, fed and watered, $11.10; do, f.o.b., $10.50; do, country points, $10.25; do, select, fed and watered, $12; do, off cars, long haul, $11.50.

MONTREAL.

Oats—CW, No. 2, 65 to 65½c; No. 3, 63½ to 64c; extra No. 1 feed, 63 to 63½c; No. 2 local white, 62 to 62½c.

Flour—Man. spring wheat patents, firsts, $8.20; seconds, $7.70; strong bakers, $7.50; winter pats., choice, $7.20 to $7.40.

Com. bulls, $2.25 to $2.50; canner cows, $1.50; calves $7; lambs, $11 to $11.50; butcher hogs, $10.50; sows, $5.75 to $7.

After being rammed by an Italian ship off Cape Race the S.S. Matagama limped into St. John's harbor and settled in shallow water, where she was repaired, and is now back on the job.

MAN-POWER WASTE APPALLS SCIENTIST

Workmen Should Share Benefits From Canada's Wonderful Resources.

A despatch from Winnipeg says:—Does the West do the right thing by the men who harvest its wheat? This was the question asked by Sir William Ashley of the University of Birmingham, a noted economist, who addressed a luncheon tendered to visiting members of the British Association for the Advancement of Science at the Agricultural College on Thursday. "If I had to employ harvesters, I would be greatly disturbed by the annual newspaper stories reporting suffering and want on the part of the men who have been working on the farms," Sir William said.

"This practice of turning away men and forgetting about them, once they have served the farmers' purpose, is a shocking state of affairs. The Industrial Workmen of the World are organized to oppose this sort of this, and they are growing into a force which will have to be reckoned with," he warned.

"In her hydro-electric plants, Canada wields mighty power," declared the economist. "What use is she going to make of it in terms of human lives?

"When people get the spirit of true democracy in their bones they should develop a sense of pride which will not tolerate certain conditions in their community, but when I walk through a typical Canadian manufacturing plant I ask myself, To what extent do the workmen share in your advantages?

"What privileges are you prepared to extend to these men?" Sir William queried.

"See to it that this God-given advantage of mighty power is utilized to the fullest and best advantage so that all may benefit from the gift."

A movement has been launched for the raising of the necessary money to erect a monument to Longfellow, who immortalized the Annapolis Valley by his poem "Evangeline." The movement will be a joint effort of the people of the Maritimes and New England states.

N. ONTARIO'S WEALTH SHOWN TO SCIENTISTS

Touring Members of British Association Visit Mining Camps.

The silver mines of Northern Ontario interested the delegates to the British Association for the Advancement of Science while on their way to Vancouver in two special trains over the Canadian National Railways.

Both Cobalt and Swastika were visited, and in both places the mines, the mills and everything else that goes into the development of mineral wealth in these sections were thrown wide open for their inspection.

Cobalt was reached during the morning, the trains arriving 20 minutes apart, and arrongements were so perfect that large fleets of automobiles were waiting at the station for both trains. The visitors were driven about the town, and were then distributed among the various mines and mills in small parties so that each member was afforded ample opportunity of seeing exactly the manner in which operations are carried on, and of asking such questions as he found necessary.

To the geological section particularly the program proved of unbounded interest. Their eagerness was unlimited, and it is doubtful if so many people ever accumulated so much authentic information in such short time, and it should be a matter of considerble pride and satisfaction to Canadians to know that, with out exception, these experts, who have studied and visited mines and mining in all corners of the world were outpoken in their enthusiasm of the mineral wealth of this district and in their approval of the methods of its development.

The party was enlarged during the morning by thirty members of the botanical section, who joined the train at Timagami. They had spent the week-end in the Timagami Government forest reserve as guests of the Ontario Government. Guides took them over the entire district, and, in addition to collecting valuable specimens of Canadian plant life, they had the opportunity of inspecting several areas of virgin white pine. They were all much impressed with the variety and the virility of the flora in the Canadian woods.

King George Has Again Become Grandfather

A despatch from Goldsborough, Yorkshire, Eng., says:—Princess Mary, daughter of the King and wife of Viscount Lascelles, gave birth to her second child, a son, on Thursday morning, at Goldsborough Hall, one of the seats of the Lascelles family.

Princess Mary was married to Viscount Lascelles in Westminster Abbey on February 28, 1922. Their first child, also a boy, was born in London on February 7, 1923, and was christened George Henry Hubert Lascelles.

Most Powerful Single-Plane in World Takes Initial Flight

A despatch from London says:—The Cubarco, Great Britain's new aerial dreadnought, had its first trial flight on Thursday, at Brough Aerodrome.

It is the most powerful single-engine plane in the world, measuring 88 feet from wing tip to wing tip, and 54 feet from nose to tail. It carries a new 1,000-horsepower Fapier Cub engine. One staircase connects the central cabin with the pilot's cockpit, while another gives access to a compartment behind the wings, which will be the machine gun's tower.

The giant bomber will carry three tons of explosives. The stairways allow the crew to work in shifts during the flight.

Oldest Inhabitant Dies in Province of Alberta

A despatch from Edmonton says:—After an illness of only two days, Mrs. Anna Jones, aged 104, Alberta's oldest inhabitant, is dead at her home near Gainsford. She was in full possession of her faculties and was proud of the fact that she never had to wear glasses. She was born in Russia.

Whalers report that over a hundred pounds of ambergris have been taken at the whaling grounds, off the British Columbia coast this season.

Attired in the uniform of a boy scout, the Prince of Wales recently opened the big international Boy Scout jamboree at Wembley. With him is Chief Scout Sir Robert Baden-Powell.

MOST POWERFUL OF RADIO STATIONS

Giant Structure Being Erected at Hillmorton, England, Connects Ends of Earth.

A despatch from Washington says:—Interesting details of the giant radio station being constructed at Hillmorton, England, near London, are contained in an official report to the Dept. of Commerce. This station, which is expected to be the most powerful in the world, will be able to communicate, according to experts, with any stations now in existence in various parts of the world. The aerial of the new station will be a mile and a half long and half a mile wide, and will be supported by twelve masts of 300 tons each and 820 feet high. Each mast will be fitted with an elevator capable of carrying four men.

Sections of the mast are now in course of transport to Hillmorton. They are so large that they can be moved only at night and on Sunday when there is little or no traffic.

It is understood that it is with this station that the American Telephone and Telegraph Co. expects to establish trans-Atlantic telephone communication by radio, as announced exclusively by the Foreign Affairs News Service on August 14. With telephonic communication thus established on a commercial basis, it is expected that connections may be made with land lines.

Refrigeration Newest Way of Combatting the Moth

Moth balls and lavender bags now are out of date as a means of getting rid of moths, says a London despatch. The really latest method of exterminating these pests is to give them—pneumonia! This isn't as difficult as it sounds.

When it is found moths have got into one's best coat, that article should at once be placed in a refrigerator and left there several days, then suddenly exposed for a short time in a temperature of about 50 degrees, and then again refrigerated.

After this treatment it is said any article, whether clothes or furniture, will be entirely free of moths.

RED ROSE TEA "is good tea"

and the choicest of Red Rose Teas is the ORANGE PEKOE QUALITY

Surnames and Their Origin

LLOYD.

Variation—Lhuyd.
Racial Origin—Welsh.
Source—A given name or a descriptive one.

The family name of Lloyd is sometimes, though infrequently to-day, spell Lhuyd.

It is a Welsh name, rather commonly met with in England and particularly so in the Central Eastern section of the United States, notably in Pennsylvania, where the Welsh played an important part in the early colonization.

As a family name its use traces back both to the given name, and to its use as a descriptive surname, for the word means "brown," and like such Gaelic names as Dougall and Douglas, which meant dark, it became a given name.

Again it was used, as "dhu" and "dubr" have been used in Scotland and Ireland, as a sort of surname, descriptive either of the personal appearance of the bearer or of that of the particular branch of his family from which he came.

In short, in many instances, its development into a family name has paralleled that of the English family name of Brown, the meaning of which is the same.

GALBRAITH.

Variation—Galbreth.
Racial Origin—Scottish.
Source—A given name.

At the period when the Scottish clans were at the height of their power the Galbraiths formed a very important division of that most influential clan, the Macdonalds, North and South.

The Gaelic designation of this branch of the Macdonalds was "Chlann a' Bhreattannaich," or "descendants of the Britons," but they took as a family name the given name of their chieftain, who played an important part in the national affairs of Scotland about the time of James I., "Galbraich," of Baldernock.

Of course, in the earlier use of this name it was regularly prefixed by the "mac," indicating followers or descendants of the person named. But as has been the case with so many Scottish and Irish clan names, the prefix was dropped as superfluous after the translation of the name into English in later generations.

The strongholds of this branch of the Macdonalds were at Macrihannish and Rrumore, and prior to 1600 they held the island of Gigha for the Macdonalds.

"Lord Nelson" and the Cooks.

Yachting in the Mediterranean was on the whole "Blue Water," as Mr. A. S. Hildebrand calls it in his book of that name. But on one occasion at Almeria, Spain, when the boat was without the services of a cook, not only the water but the yachtmen also were blue. The ship chandler at that place, a man with one eye, says Mr. Hildebrand, kept asking what he could do for us. In the end we told him we needed a cook, and as he left he handed us his card, which we found bore the name "Lord Nelson."

Subsequently we asked the British consul whether Lord Nelson was dependable.

"He's about as good as the general run of them," was the reply. "He's about the only ship chandler here at any rate. Some of the others, younger men for the most part, have tried to break into his game from time to time, but he has money enough to undersell them, and he doesn't hesitate even to give away supplies for the sake of freezing out his competitors."

When we asked Lord Nelson to recommend us a cook he thought for a moment and at last muttered, "Pepe! There's a man for you. Good cook, good sailor. For six months he cook on Norway salvage ship; he go away, because ship no go to sea. Always he want go to sea. He marry my little girl. You see? And I try to make him go into ship-chandler business with me. But no. No, no. He love sea. Always sea. Good sailor? Whoof! Bad weather? More bad weather, better he like!"

Since the wind was in the east, we stayed three days in Almeria, and Pepe came and cooked for us. He was a good cook and neat and pleasant, but he was so fat that it was impossible to imagine his going aloft. We asked him whether he was willing to stay with us.

"Yes, I go," he said. "For six months I try get into ship-chandler business here in Almeria, but Lord Nelson, he give away meat, figs, wine, eggs, everything to ships that come. So I lose three thousand pesetas and give up. No got more money. I go. Where you go?"

When we told him his eyes grew wide with astonishment. He reflected for a moment and then said he thought the ship was too small for safety and resigned.

We sent for Lord Nelson again and asked for another cook.

"I know very man" he said without a moment's hesitation. "Speak English same as you; better than me. Name Martini. Good cook, good sailor. Been ten year at sea. American ship. Yes. Fine man. I tell him. You see."

Martini was quick and clever in the galley and had once made a voyage in a steamer to Newport News, but he was no man for going aloft, and it was hard to understand Lord Nelson's enthusiasm for him unless—sure enough, we learned on investigation that Martini had been trying to break into the ship-chandler business, and that Lord Nelson had had to give away supplies to defeat him.

The wind came westerly on the fourth day, and as we were making sail Martini appeared on deck with his bundle under his arm and, saying that his son was very sick, resigned. So we went to sea without a cook.

Genuine BAYER ASPIRIN

Say "Bayer Aspirin"

INSIST! Unless you see the "Bayer Cross" on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 24 years.

Handy "Bayer" boxes of 12 tablets
Also bottles of 24 and 100—Druggists

Aspirin is (the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid

History of the Cabbage.

Remarkable facts concerning the cabbage have been discovered by Professor Ruggles Gates, the botanist.

It is stated that cabbages, kales, cauliflowers, and brussels sprouts all originated in the wild cabbage, a native of the coast and the South of England. The cabbage as we know it was the first development of the wild plant, and from it came the cauliflower and the sprout.

Apparently there was no gradual development. It just happened spontaneously. In the case of the cauliflower there was an inflorescense, and the green flower turned to white and became succulent and fleshy, though not to the degree we know it to-day. As a food the cabbage is extremely valuable, because it contains lime and potash.

To be completely healthy people require roughage, coarse indigestible material, just as animals do. Cabbage furnishes roughage and supplies lime. It should be steamed, and not boiled or cooked in soup.

New Peaks Found in Cariboo Range.

Eight new mountains have been found and ascended in the Cariboo range of British Columbia by Prof. R. T. Chamberlain of the University of Chicago's Department of Geology, and Allen Carpe, New York, engineer, who have recently returned. One is among the highest in the Canadian Northwest.

Hitherto even old guides in Alberta were unfamiliar with the Alpine slopes of the range.

Chamberlain and Carpe also located the headwaters of the Thompson and Canoe Rivers, and they are the first white men ever to note the glacial sources of these two mountain streams.

They camped on the rocks as high as 10,000 feet, using a special powder for fuel.

To My Little Son.

In your face I sometimes see
Shadowings of the man to be,
And, eager, dream of what my son
Will be in twenty years and one.

But when you are to manhood grown,
And all your manhood ways are known,
The shall I, wistful, try to trace
The child you once were in your face.

—Julia Johnson Davis.

Failing Sight Arrested.

Failing sight, the result of rheumatic or other infection, or even the penetration of the eyeball, can be arrested within three days by injections of pure cow's milk into the lumbar region of the patient, according to Dr. Edward R. Gookin, of Boston, who arrived at New York recently after five months' study in Vienna of this new discovery by physicians of the hospital attached to the University of Vienna.

Dr. Gookin denied early reports that the milk injections are a cure for blindness. Those who are already blind, he said, may not hope for the restoration of their sight by this method, but those who are but partially blind from infection or penetration, or those in whose eyes the infection has just been discovered, have good reasons to hope that their sight will get no worse, and also that sympathetic ophthalmia (affection of the other eye) will be prevented.

For the milk injection treatment, said Dr. Gookin, no one Viennese doctor claims credit. It was discovered, he declared, by a group of doctors chief among whom, perhaps, are Docens Doctors Lindner and Guist. (Docens indicates something more than a doctor, or a combination of doctor and professor).

"Successful treatments have been given in so many cases in Vienna," Dr. Gookin continued, "that the discovery may be said to have passed the experimental stage. It is established as an absolute preventive in far more than fifty per cent. of cases. If the patient does not respond in three days then he is considered beyond hope and no other remedy is attempted.

"The discovery is particularly valuable in the case of infants whose eyes are affected at birth. Any eye trouble, resultant from infection, may be arrested in them at once by the milk injections. It seems simple enough for home treatment, but there are details which only a physician experienced in this work can handle."

"Pure, unadulterated cow's milk is the only ingredient. This is boiled for not less than four, nor more than five minutes. Then it is permitted to cool to body temperature, 98.6 degrees, before the injection is made. The amount injected in an adult is ten cubic centimetres, or 150 grains. This much is injected in the lumbar region once a day for three successive days. That is all. After that the infection, or falling sight, is arrested for good and all, or else the case is hopeless. The dose for infants under one year is one cubic centimetre once a day for three days."

Acute Sight Enables Birds to Spot Food.

Compared with birds, human wings have poor sight. It is well known that an eagle is capable of sighting its quarry from a great height, and is able to swoop down and seize it exactly in the centre of its neck.

Most birds have good sight, but in some the faculty is more developed than in others. The woodcock, for instance, has the remarkable power of flying at a great speed through dense thickets as though it were flying through an open space.

It is also astonishing to see the pace at which a bird will alight upon a tree or building. Only most acute sight enables it to do this accurately.

Then, how quickly birds discern food that has been left on the ground! Throw a piece of bread down at a time when no birds are near, and in a few moments a number of them will be on the spot.

SUMMER HEAT HARD ON BABY

No season of the year is so dangerous to the life of little ones as is the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt aid is at hand the baby may be beyond all human help before the mother realizes he is ill. Summer is the season when diarrhoea, cholera infantum, dysentery and colic are most prevalent. Any one of these troubles may prove deadly if not promptly treated. During the summer the mother's best friend is Baby's Own Tablets. They regulate the bowels, sweeten the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

"As She Is Wrote."

Over the office of a forwarding agent in front of the old Shinbashi Railway Station in Tokio is the alluring invitation to "Leave your luggage with us and we will send it in every direction."

Not far off still more remarkable advantages were offered on a milliner's shop-sign, bearing the somewhat equivocal legend: "Clothing of woman tailor: Ladies furnished in the upper storey"; and yet more misleading, "Respectable ladies have fits upstairs."

Clean Minds.

He—"Of course women should vote. They deserve suffrage as much as men—more, because their minds are purer and cleaner."

She—"Of course their minds are cleaner, but how do you know that?"

He"Because they change them so much oftener."

Man is Immortal till his work is done.—James Williams.

Minard's Liniment for Rheumatism.

THE DELICATE GIRL

What Mothers Should Do as Their Daughters Approach Womanhood.

If growing girls are to become well-developed, healthy women, their health must be carefully guarded. Mothers should not ignore their unsettled moods or the various troubles that tell of approaching womanhood. It is an important time of life. Where pallor, headache, backache or other signs of anaemia are evident you must provide the sufferer with the surest means of making new blood.

Remember, pale, bloodless girls need plenty of nourishment, plenty of sleep, and regular open-air exercise. But to save the bloodless sufferer she must have new blood—and nothing meets the case so well as Dr. Williams' Pink Pills. These pills increase the supply of new, red blood; they stimulate the appetite and relieve the weary back and limbs; thus they restore health and charm, and bring to anaemic girls the rosy cheeks and bright eyes of strong, happy girlhood.

You can get these pills through any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Stolen Duchess.

No one ever loved prominence more than Georgiana, Duchess of Devonshire; at her London mansion she was the centre of the social and political groups that swayed the kingdom. How delighted she would have been, therefore, could she have known that after her death she would be the most talked-of woman in the world!

Gainsborough, writes Mr. E. M. Dole in the Mentor, was at the height of his powers when the auburn-haired duchess ordered from him a full-length portrait. He made four preliminary sketches before deciding on the pose and the costume. After the picture had passed into the lady's possession, about the year 1778, she occasionally lent it for exhibitions; then it dropped out of sight. In 1841 a well-to-do haberdasher saw the picture in the cottage of an old seamstress, who had cut it down to fit a space over her mantel. He bought it for two hundred and seventy-five dollars and thirty-five years later sold it to a well-known London firm of art dealers at a profit of over fifty thousand dollars!

At this point there enters the sinister figure of Adam Worth, an American criminal, who in May, 1875, was directing from his luxurious apartments in London the operations of an international band of thieves and forgers. One of his aids had fallen into the hands of the police and was in Newgate Prison. While trying to decide what to do to get him out Worth, passing along Bond Street one afternoon, noticed the line of carriages drawn up before Agnew's, where the Duchess of Devonshire's picture was on view. Immediately he conceived a plot. He would steal the painting that had set London astir and hold it as hostage against the release of his confederate.

The next night he climbed through a window, cut the portrait from a stretching frame and carried it to a safe hiding place. When the robbery was discovered the world of art was thrown into convulsions. A day or so later the Messrs. Agnew received an anonymous communication stating that the picture would be surrendered if they would go bail for the prisoner in Newgate. A scrap of the convas was inclosed in the letter. The owners would enter into no negotiations that would associate them in doubtful proceedings, and Adam Worth found the stolen masterpiece on his hands.

Despite desperate efforts Scotland Yard got no clue to the perpetrator of the crime, and some time afterward the robber carried the portrait to America, concealed under the false bottom of his trunk. For twenty-five years the painting was sought by detective agencies all over the world while it lay concealed in warehouses in New York, in Brooklyn and in Boston.

In 1901 word came to Pinkerton's detective agency through Pat Sheedy, a notorious New York gambler, that the picture, the disappearance of which had never ceased to be the object of discussion in art circles and in the underworld, would be surrendered upon payment of the reward of five thousand dollars. After a life of extravagance Worth was penniless. A secret message was sent to Mr. Morland Agnew, and in Chicago a few weeks later the canvas was placed in his hands.

When exhibited in London the Stolen Duchess was viewed by hysterical crowds. J. Pierpont Morgan, after a few moments' examination, bought the picture for one hundred and fifty thousand dollars. At Mr. Morgan's death the painting came back to America and was shown for a while at the Metropolitan Museum of Art. In 1916 it went to Mrs. Herbert L. Satterlee, Mr. Morgan's daughter.

How's Your Practice?

"Well, Bloom," a physician asked a young colleague who was just starting, "how's your practice?" "In the morning hardly anyone comes," was the reply, "and in the afternoon the rush falls off a bit."

When sending money by mail use Dominion Express Money Orders. Safer than sending bills.

Bees' wings beat the air at the rate of 190 strokes a second.

When the Plain Tales First Reached the Hills.

In 1886 Mr. Rudyard Kipling, then a young man, was among the visitors at Simla, India. His sister, a nice pretty girl of eighteen—writes Maj. Gen. Sir George Younghusband in Forty Years a Soldier,—used to give me a dance now and then, and so I got to know him. Rudyard's mother and sister were there for the season, and he used to run up for a few days at a time when he could be spared. He was then sub-editor of what he called the local rag, the Civil and Military Gazette of Lahore.

It was at that time that he wrote Plain Tales from the Hills and Departmental Ditties. They used to appear on the outside page of the Civil and Military Gazette and curiously enough did not set the hills ablaze. Some people thought them "rather funny," and some wondered languidly, "Who the dickens is R. K.?" But the tales and ditties gave no offense at all for the simple reason that no one recognized himself, though he immediately saw how exactly the cap fitted some one else.

Rudyard Kipling was so seldom in Simla that I have always felt convinced that his sister helped him a great deal in the ground-work of his tales and ditties; she had a more intimate knowledge than he of Simla and its society. Miss Kipling was a bright, clever girl, and, though she did not say much, she saw everything distinctly. She was the bright damsel who, when Lord Dufferin asked her why she was not dancing, replied with a placid smile, "You see I am quite young; I am only eighteen. Perhaps when I am forty I shall get some partners." This quiet little dig at the middle-aged ladies who pranced about with the Hill captains while their daughters sat out appears in one of Rudyard Kipling's verses.

It was some years later that a traveling publisher happened to find the Plain Tales on an Indian railway bookstall and, grasping the genius of them, arranged to republish them. From that moment Rudyard Kipling became famous.

To a Boy Scarcely Three.

When you are old enough to know
The joys of kite and boat and bow
And other suchlike splendid things
That boyhood's rounded decade brings,
I shall not give you tropes and rhymes,
But, rising to those rousing times,
I shall ply well the craft I know
Of shaping kite and boat and bow,
For you shall teach me once again
The goodly art of being ten.

Meanwhile, as on a rainy day
When 'tis not possible to play,
The while you do your best to grow,
I ply the other craft I know
And strive to build for you the mood
Of daring and of fortitude,
With fitted word and shapen phrase,
Against those later wonder days,
When first you glimpse the world of men
Beyond the bleaker side of ten.

—J. G. Neihardt.

The Tyrant.

Young Mother—"What in the world makes the baby cry so?"

Ditto Father (wearily)—"I suppose he overheard me say that I managed to get a little sleep last night."

BACK ACHED TERRIBLY

Mrs. McMahon Tells How She Found Relief by Taking Lydia E. Pinkham's Vegetable Compound

Chatham, Ont.—"I took Lydia E. Pinkham's Vegetable Compound for a run-down condition after the birth of my baby boy. I had terrible pains and backache, and was tired and weak, not fit to do my work and care for my three little children. One day I received your little book and read it, and gave up taking the medicine I had and began taking the Vegetable Compound. I feel much better now and am not ashamed to tell what it has done for me. I recommend it to any woman I think feels as I do." —Mrs. J. R. McMahon, 153 Harvey St., Chatham, Ont.

Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has for nearly fifty years been restoring sick, ailing women to health and strength. It relieves the troubles which cause such symptoms as backache, painful periods, irregularities, tired, worn-out feelings and nervousness. This is shown again and again by such letters as Mrs. McMahon writes, as well as by one woman telling another. These women know, and are willing to tell others, what it did for them; therefore, it is surely worth your trial.

Women who suffer should write to the Lydia E. Pinkham Medicine Co., Cobourg, Ontario, for a free copy of Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women." C

Insect Bites!

Minard's takes the sting out of them. Take it to the woods with you.

MINARD'S "KING OF PAIN" LINIMENT

FOR SALE.

CHEAP, ON EASY TERMS, only $500 down or secured, balance at 7%. Improved farm, 125 acres in Township of Ekfrid, County of Middlesex; mixed soil, sand and clay loam; brick house with frame out-buildings. About a mile west of Middlemiss. Address: M. J. Kent, Box 419, London, Ontario.

Perennials.

I know a garden where the phlox
In purple phalanx grows—
Where lilies sprinkle incense sweet
With every wind which blows—
And down the path pink hollyhocks
Stand in tall, ordered rows.
The old sun-dial, weather-scarred,
Bears on its rugged face
Words which, with thoughtful finger-tips,
As child, I used to trace:
"Horas non numero nisi
Serenas," Herb o' grace
And comfort, nowadays, since life
Has mixed my sun with showers,
To know the dial yet proclaims—
Perennial as the flowers—
Its gospel: "Take no heed of rain—
Count just the sunny hours!"

—Mazie V. Caruthers.

Wonderful Bird Architects.

The mound birds of the East Indies are notable builders. In size they are about as big as an average barnyard fowl, but they build houses taller than the tallest man and sometimes fifteen yards round. As soon as the house is complete the hen bird lays her large red eggs in the heap and the natural heat hatches them. The hammer-headed stork of Africa builds what amounts to a three-roomed tenement, made of enormous sticks fixed between the branches of a tree. Any ordinary boy could creep into the lowest compartment.

Not Reproachful.

"Haven't I made you what you are?" asked the wife, proudly.

"Darling," answered the husband, "have I ever reproached you for it?"

Minard's Liniment Relieves Pain.

It is a vain man that grins to show how white his teeth are. People of sense avoid affectations.

Try MURINE FOR YOUR EYES

Wholesome Cleansing Refreshing

Nervous People

That haggard, care-worn, depressed look will disappear and nervous, thin people will gain in weight and strength when Bitro-Phosphate is taken for a short time. Price $1 per pkge at your druggist. Arrow Chemical Co., 25 Front St. East, Toronto, Ont.

Comfort Baby's Skin With Cuticura Baths

Don't let your baby suffer or fret because of rashes, eczemas, irritations or itching. Give him a warm bath, using Cuticura Soap freely. Then anoint affected parts with Cuticura Ointment. The daily use of Cuticura does much to prevent these distressing troubles.

Sample Each Free by Mail. Address Canadian Depot: "Cuticura, P. O. Box 2616, Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c. Try our new Shaving Stick.

Asthma and Hay Fever—A Guaranteed Relief.

"I have arranged with all druggists here, as well as in all other towns of Canada, that every sufferer from Asthma, Hay Fever, Bronchial Asthma or difficult breathing in this city can try my treatment entirely at my risk," Dr. R. Schiffmann announces. He says: "Buy a package of my Asthmador, try it, and if it does not afford you immediate relief, or if you do not find it the best remedy you have ever used, take it back to your druggist and he will return your money, cheerfully and without any question whatever. After seeing the grateful relief it has afforded in hundreds of cases which had been considered incurable, and which had been given up in despair, I know what it will do. I am so sure that it will do the same for others that I am not afraid to guarantee it will relieve instantaneously. Druggists, anywhere handling Asthmador will return your money if you say so. You are to be the sole judge and under this positive guarantee absolutely no risk is run in buying." Persons preferring to try it before buying will be sent a free sample.

Address R. Schiffman Co., Props., 1734 N. Main, Los Angeles Calif.

CARD OF THANKS

We wish to thank our neighbors and other friends who so kindly assisted us during our recent bereavement.

Mr. and Mrs. Jas. Robinson.

FARM FOR RENT

Farm, on the St. Lawrence River, consisting of 265 acres, 200 acres under cultivat ion, to rent on shares, including good farm stock, good farm house and barns, and all farm machinery required to work the farm.

This is a splendid opportunity for a good farmer.

Apply at LEADER OFFICE.

"Where do we sleep?"

"Has someone called up by Long Distance and reserved our rooms?"

If not, you will be running a greater risk this year than last. Some of the party have been looking forward for weeks, perhaps, to this trip. Double their enjoyment with the definite assurance of a good night's sleep.

Reserve your rooms by Long Distance — always — and make sure they will be waiting for you — in just a few minutes you will know.

The evening rate on Station-to-Station calls (after 8 30 standard time) is only about one-half the day rate. The night rate (after midnight, standard time) is only about one-quarter the day rate.

Every Bell Telephone is a Long Distance Station.

CORNWALL GENERAL HOSPITAL

This institution provides skilled nursing and care at very moderate rates to those able to pay, and without charge to indigent persons from the three United Counties, other than the Municipal Grants.

It is kept up by:

Fees from paying patients.

Grants from the Government and Municipalities

Donations and subscriptions from Churches Corporations, Societies and Individuals, the last being the largest source of revenue.

YOU ARE ASKED TO ASSIST IN THIS WORK

The nucleus of an endowment fund has been established by a legacy recently received, and parties remembering the Hospital in their wills may stipulate that bequests made by them shall go to this fund.

If you would like a copy of the last Annual Report, drop a card to the Secretary, who will be pleased to send you one.

OUR CORRESPONDENTS

WILLIAMSBURG

On Sunday, August 31st, there will be no services in the Lutheran Church Sunday School will be conducted as usual.

Master Eddie Shannette of Morrisburg spent last week with Mr. and Mrs. Ora McIntosh.

Mrs. Geo. Strader and baby, along with other friends left on Friday last to motor to Detroit, Mich., to spend a few weeks visiting there.

Mr. and Mrs. Malcolm Froats were guests of Mr. and Mrs. Ralph Empey last Sunday.

Mr. and Mrs. Donadd Barkley and Mrs. Hanes spent Saturday, August 16th in Brockville.

Mrs. Geo. L. Barklay and children Vivian and Erie are spending a few days this week visiting friends in Montreal.

The Misses Marion and Florence Dickey of Newington are visiting in the home of their uncle, Willie Dickey a few days this week.

Dr. and Mrs. Wm. King, Mr. Walter King of Buffalo, N.Y., passed through our village enroute to Winchester to attend the funeral of their brother-in-law, the late Mr. Lou Flora.

Miss Dora Merkley spent last Thursday in Brockville with her sister Miss Lucy Merkley.

Miss M. Lavina Tupper was a week end guest of her friend, Miss Dora Adams.

Mr. and Mrs. Fay Merkley and baby Marjorie and Eugene Webb and little Marie Merkley were visiting South Mountain friends on Tuesday of this week.

Mr. and Mrs. Earl Casselman of Smiths Falls, and Miss Nina Empey of Morrisburg were calling on Mr. and Mrs. Elgar Casselman on Monday enroute to visit the former's sister, Mrs. Preston Barkley of Boucks Hill.

Recent visitors at Mr. Edgar McIntosh's, Mrs. Frank Todd and Miss Mabel and Mr. and Mrs. Arthur Russell of Osnabruck, Sutherland Dickey of Newington, little Marie Merkley of Iroquois, Archie Shannette, the Misses Marion and Florence Dickey of Newington, Reuben Schell and Miss Florence Cook.

Mrs. F. Drummond of Otttawa spent last Wednesday with her aunt, Mrs. Alex. Shannette Jr.

Messrs. Howard Merkley and John E. Barkley were in Ottawa this week on business.

Married—At the Methodist Parsonage, Metcalfe, on Sunday, Aug. 10th, 1924, at four p. m., by Rev. Howe Miss Grace Geggie of Williamsburg was united in marriage to Mr. W. H. Knight of Metcalfe. A reception was tendered the happy couple on Thursday evening in the I.O.O.F. Hall by the young people of our village. On this occasion the bride and groom were the recipients of many beautiful and useful gifts, and numerous were the best wishes extended to them.

On Sunday August 24th, the old stork visited the home of Mr. and Mrs. Robt. A. Merkley and made a gift of a son and two days later, August 26th, the gift was repeated and Mr. and Mrs. Roy E. Barkley were favored with a young daughter.

Among the boys from this vicinity who went west on the Harvesters' excursion last week were, Walter Whittaker, Gordon Smith, S. Barkley and Geo. Casselman.

School will not open in S. S. No. 12 until Wednesday Sept. 3rd with Mr. Alfred Casselman as teacher. Alfred's many friends wish him every success.

We learned with much regret that Mr. Stanley McIntosh was taken to the General Hospital, Cornwall on Tuesday of this week where he underwent a successful operation for appendicitis. His many friends anxiously await the daily reports of his condition and the latest news is most gratifying.

We are pleased to report Mr. Bernice McIntosh able to be home and convalescing from his recent operation.

Miss Nellie Swayne returned home Saturday after spending several weeks with friends at Brockville.

GLEN BECKER

Mrs. Bell Deeks was a caller at Mr. Melvin Casselman's on Sunday last.

"Headaches, Bilious Spells, Are Now All Gone"

Mrs. John Ireland, Nobleton, Ont., writes:

"I was a great sufferer from severe headaches and bilious spells. I tried a number of remedies without obtaining any benefit until I was advised to use Dr. Chase's Kidney-Liver Pills. These completely relieved me, and made me feel like a new person. I am very grateful to Dr. Chase's Medicines for what they have done for me, and you may use my letter for the benefit of others."

The Woman of To-Day

THE DANGER IN INK.

A wise woman once removed the label "Poison" from an empty bottle and pasted it on the family ink bottle.

"Why, mother, ink isn't poisonous, and besides, no one ever things of drinking it."

"I know; but, if the label leads us to give a second thought to what we write, it will serve its purpose. Ink, my dear, has often proved to be a deadly poison to the affection of relatives, to friendship, to love. It will kill every affectionate impulse if used indiscriminately."

If it were possible to gather statistics on such an intimate subject, it would be found that seventy-five per cent. of the letters in the postman's bag are uninteresting, stupid, unnecessary, and are read only once by those who receive them. The letters of sweethearts and those of children to their mother do not come into that class; but even they are not above criticism, for the sweethearts write too many, and the children too few.

When you are away from home what kind of letter pleases you most?

Here is one received by a woman many miles from her kinsfolk and set aside as the one letter received in six months that did the most to make her heart glad:

Dearest Big Sister, We miss you very much. This morning I wore my blue and white gingham to school, and the teacher admired it. We had waffles for breakfast. Mrs. Sparks' tiger lilies are in bloom. Oh, what do you think? You could never guess. Minnie's gray cat has six kittens, and Minnie's mother says I can have every one of them. Won't that be just grand? Last night when we had lemon pie Father said you ought to be here because it is your favorite kind. He has a new hat. Mother is in the dining room mending a hole Uncle Jim burned in the table cloth with his cigar. Mother didn't say anything. I guess she wasn't glad about it. Auntie Green comes to wash to-morrow. Mother says I can put my doll clothes in. The new family across the street has a girl my age, and a baby. Mother says maybe they will let me take turns in wheeling the baby. The baby buggy is light blue. I think I shall be busy with my kittens. I haven't told mother about them yet. She seems too upset about the table cloth. It was her best. The one with the poppy pattern. I have on my blue hair ribbon. Father says I look like a butterfly. The kittens' eyes are shut. With love and a big kiss.—Alice.

There were letters from other members of the family. An older sister told of a party to which she had not been invited and the letter was in the nature of a wail; mother's letter, though dear, was devoted to suggestions to the recipient for safeguarding her health. Father's letter was a homily on the need of saving her money; brother wrote three lines, two of them about a new baseball mitt. Only one letter contained the news that her homesick heart longed for, and that was written by a child of ten! Guileless, sincere, loving, newsy, it was an ideal letter.

"I laughed over it, and I cried over it. I read it when I was depressed, and I read it when I was happy, because of the steadying influence it had on me. I really felt that I could not do anything that was not generous and kind, because of the influence of that letter. It visualized home."

In writing a letter put yourself in the position of the person who will read it. If you are writing to one who is resentful or quick-tempered, avoid jokes; never make comparisons; leave out all criticism of the recipient or of others who are common acquaintances. Never write, "Burn this." It is a long way to the furnace downstairs. Never write, "Don't show this to So-and-So." If you must give a confidence, don't label it as "secret," "private" or "personal." Slip it in casually, as you would slip in a comment on the weather.

Never write your troubles; the reader may have greater ones. Do not mention your ill health; it may cause needless anxiety, and you may be better when the letter is received. Never write a criticism. You might say the same thing with a disarming smile, but the smile doesn't appear in the ink. If you have won a great success, only mention it when you write to your mother. If you have failed, say nothing about it. Never seek praise or sympathy through the mails—or in any other way.

Don't write too many letters. If the recipient—unless it be your mother—is able-bodied and has had a good education and fails to answer your first letter and your second letter, take a lesson in pride and do not write a third. If your letters are welcome, they will bring replies.

When you fail to receive a letter don't blame the postman. The government is not interested in keeping your mail from you. When you read a letter that hurts put it away until you are in a more philosophical frame of mind. Never go near the ink bottle when you are angry.

Don't make excuses for not having written before. There are few reasons for procrastination that ring true. Devote no space in your letter to disappointment because the recipient waits so long to reply. Perhaps there is a reason you do not guess.

Answer promptly the letters from your father or mother and those of a business nature. Do not glory in the number of your correspondents; limit the list to those you sincerely like, and who you know sincerely like you. To reckon your popularity by numbers is a childish thing. Remember that old friends are more interested in the little intimate affairs of your life than new friends are. If a married brother does not write, do not blame his wife. When a man marries he sometimes shifts the duty of writing to his relatives to his wife's shoulders. She may not want to take his place in a matter like this, but she learns that unless she writes to his family they will never hear. Respect her for her attempt to make up for his omission.

There is the paper; a clean sheet of paper. There is the pen. There is the ink. And there also should be the label on the bottle in red and white—"Poison." For ink is poison unless you write in a spirit of helpfulness and understanding.

OUTDOOR STUDY.

The best kind of outdoor study is contemplation. Get a notebook, a book on botany, a book on birds, if you will, and pack your mind with fixed and irrevocable facts. But do not teach your child on that principle. A curious ignorance, gilded with a happy enthusiasm, is better than the labeling, pressing, analyzing knowledge that plays a large part in modern "nature study."

Let the children "run wild" without at first teaching them even rudimentary truths about the trees, grass, flowers, birds, animals or fishes. Teach them one or two things at a time and encourage them by letting them see that you appreciate their memories when they repeat the next day what they have learned about outdoors. Do not let them memorize names only, but teach them to memorize sensations. Teach them the sureness and beauty of nature, not merely the individual marks of her heraldry.

A bright small boy had been taught at school that the crawfish was an invertebrate. He showed little enthusiasm about the fact, but when he was taken to a stream and the queer clay-celled home of a crawfish was pointed out to him, when he saw the way the crawfish has of moving backward, the strength of its pincerlike claws, its waving prehensile beard filament and its strange surroundings, he became greatly interested and on his return to the class astounded his fellow pupils with his newly found and to him marvelous knowledge.

Enthusiasm is the very marrow of nature study. And the more you delve in nature's storehouse the more your enthusiasm grows. As you point out the things outdoors that are strange or beautiful the child will take them into its mind and repeat them without much appreciation. But by and by appreciation will come, and presently the child will conceive new and surprising ideas and startle you with an original train of thought.

"Were all these shells made in a shell mint?" asked a little girl.

"What put that into your head?" was the reply.

"Well, you told me that dollars were made in a mint."

A mighty mint indeed wherein the world was cast; a mighty Sovereign whose seal is stamped thereon!

Dusty hands are germ-carriers

Everywhere, every day, the hands are touching things covered with dust.

Countless times those dust-laden hands touch the face and the lips in the course of a day.

Consider—dust is a source of infection and danger.

Lifebuoy Protects

Take no chances — cleanse your hands frequently with the rich, creamy lather of Lifebuoy. Lifebuoy contains a wonderful health ingredient which goes deep down into the pores of the skin, purifying them of any lurking infection.

The clean, antiseptic odour vanishes in a few seconds, but the protection of Lifebuoy remains.

FORT WELLINGTON MILITARY CENTRE

RELIC OF EARLY CANADIAN HISTORY.

Restoration of Historic Blockhouse at Prescott Completed by Department of Interior.

On the recommendation of the Historic Sites and Monuments Board of Canada restoration work on Fort Wellington, Prescott, Ontario, has been undertaken and completed by the Canadian National Parks Branch of the Department of the Interior. It is the intention of the branch now to erect a bronze tablet bearing record of the salient facts in the history of the fort. The old fort is connected with the stirring and romantic events of the war of 1812, and especially with the capture of Ogdensburg by Colonel MacDonell and his Glengarry men. It was constructed in 1812-13, under the direction of Lieut.-Cols. Thomas Pearson and George R. J. MacDonell, as the main base for the defence of the communication between Kingston and Montreal, and named Fort Wellington in honor of the victory gained at Salamanca by the British under Wellington, July 22, 1812. It was here that MacDonell assembled the forces which took Ogdensburg on February 22, 1813, and here also, that Col. Young gathered the troops for the defence at the Windmill, November 11-13, 1838.

Figured in War of 1812.

Upon the declaration of war by the United States in June, 1812, the small unfortified village of Prescott, then consisting of about thirty houses, became at once a position of considerable military importance. It was the head of boat navigation upon the St. Lawrence and the starting point of ship navigation on lake Ontario. All military stores and the major part of other supplies for the garrisons in Upper Canada had to be conveyed from Montreal either by water carriage or by wagons or sleighs by the single passable road, closely following the north bank of the river, and, in many places, under direct hostile observation from the opposite shore. The expulsion of the American garrison on the St. Lawrence secured the line of communication from immediate danger and interruption.

When the immediate trouble was over, work was continued upon Fort Wellington and it was made a place of considerable strength. It continued to be a military post, occupied by a small garrison of regular soldiers until the autumn of 1837, when all troops were withdrawn to Lower Canada to restore order there. In 1838 the fort again became the scene of activity and Col. Young was sent there with a small garrison to occupy it, though it had fallen into considerable disrepair. Repairs were executed subsequently and in 1866 the fort was used in connection with the Fenian raids. It was also occupied in 1885, at the time of the Northwest Rebellion.

The site of the fort covers an area of 8½ acres, on which there is a blockhouse, officers' quarters, caretaker's dwelling and other buildings. The fort is surrounded by a moat with palisades and ramparts on which are two old guns. One of the most interesting of the buildings is a listening post, reached by an underground passage. The blockhouse has three storeys, the first two built of stone and brick and the third of wood.

For Sore Feet—Minard's Liniment.

Electricty Rules in Sweden.

Sweden boasts of many important industries. The country possesses immense iron and steel works, sugar mills, iron mines, pulp and paper mills, machine factories and the world's greatest match industry. Even the agricultural and dairying operations are carried on in a businesslike way and more than 50 per cent. of the rural district is electrified.

Jack's Adventures

BY LURA E. BENNETT.

PART II.

"Well, Maida, how is the new 'hired man'?" asked Mr. Carleton, when she took his supper in.

Maida told him the happenings of the afternoon, and he laughed heartily. "I should like to see him," he said, as she was about to leave the room.

Jack was taken to Mr. Carleton, while Maida finished her household duties for the night.

"Well, young man," began his employer, "you certainly do not look like the proverbial 'hired man.' "

"I assure you, sir, I feel like one," was the answer.

"Where were you last employed?"

"I-er-let me see." Jack was thinking fast. "Do you know, I have a very poor memory, but I think it was in New Mexico. You see, I travel about so much——"

"Did you walk from there, here?" Mr. Carleton interrupted in a sarcastic tone of voice.

"No, sir, I had a ride."

"On a freight train, I suppose," still sarcastic.

"Oh, no! You see people would take pity on me and ask me to ride in their automobiles," answered Jack, seriously.

"Come, young man, own up. What is your game?"

"There is no game, really. I was down to my last quarter and hungry. Your house looked inviting, so I stopped. Then I found you needed assistance, and I needed a job. So here I am."

"You know nothing at all about farm work, how—"

"I have learned many things this afternoon, sir," interrupted Jack. "I am quick to learn if I set about it. Why, I milked a cow! And I learned, too, that there is a right and a wrong side to the beasts."

The corners of Mr. Carleton's mouth were twitching. "Well," he said, gazing ceilingward, "to-morrow you can learn that there is a right and a wrong side to a plow. Maida will show you what I mean."

It was early when Jack awoke the next morning. Some one was moving about below. "Bless me," he muttered. "I suppose it is time for the 'hired man' to arise." As if in answer to that thought, the stair door was opened, and Maida called softly, "Jackson."

"Directly, ma'am."

No one was about when he went below. The row of shining milk-pails was gone, so he went on to the barn. He could not but admire the neat, trim figure of the girl as she arose from her stool with a brimming pail of milk in her hand, and Maida decided milking wasn't at all monotonous, when one had some one with whom to exchange pleasantries.

When they had finished breakfast, Maida said: "Father wants you to plow to-day."

"Yes. But I say," in a confidential tone; "do you know the right and the wrong side of a plow?"

She laughed and nodded. "You will have to catch the horses first."

"Horses? What for?" Jack seemed surprised.

"To draw the plow."

"I hope I prove a bright pupil," he said, with a resigned air.

Maida watched him as he stalked off toward the pasture to catch the horses. They seemed to know that he was strange, and would not allow him to come near them.

Maida walked toward the pasture, also. Jack saw her, and called: "Is there a right and a wrong side to a horse?" In answer, she gave a peculiar shrill whistle. Both horses heard, dashed past him, through the gate he had left open, and straight to the waiting girl. Gaily she waved her hand to Jack, as she turned toward the stable, followed by the willing animals.

"Well, I'll be darned!" he ejaculated, as he went back to the barn.

With Maida's help the team was harnessed, and Jack started off bravely to "put his hand to the plow." He fastened the traces, and started the team, walking along by the side of the plow. "I wonder what those sticks are for?" referring to the handles. Suddenly, the point of the plow struck a stone and left the furrow, the handle striking him a blow on the thigh.

"Jackson!" Maida's voice sounded as if she was amused. "You have to steady the plow by the handles." She came to his assistance, showing him how it was done, and got him started once more. "You see there is a right and a wrong side to a plow."

"I do not believe there is a thing on this farm, but what has a right and a wrong side to it," he said, as he started off. When noon came he was tired; by night he was dead tired, but he was game.

"You did fine to-day, Jackson," Maida told him. "Are you tired?"

Jack shook his head. "Not after I look about and see what you have done." He watched her in genuine wonder. She was continually busy at something. "How do you stand it?"

Maida laughed. "I have to stand it. The work has to be done, you know."

"I suppose so. But, Miss Carleton, will you allow me to tell you I think you are a wonder?" Jack's voice was very earnest.

She colored under his steady, admiring gaze. "Really, I am not half so wonderful as some women."

He shook his head. "I have known girls, but they were—" he paused. Before he finished the sentence, Maida was called by her father, and when she returned, Jack had retired.

"Does any one happen to know where Jack is?" Big John Allen looked from wife to daughter.

"Went with Dud Martin to visit Dud's aunt," answered Grace Allen.

Big John raised his eyebrows. "I met Dud to-day, and he told me Jack deserted him on the way out, for no apparent reason. They ran out of gas, and Dud went back two miles to a filling station. When he returned, Jack was gone, leaving a card with some fool thing written on it."

"Jack is old enough to take care of himself," said Mrs. Allen. Jack was her son and could do no wrong.

Big John shook his head. "He will never be old enough to take care of himself." Big John was so nicknamed in college because of his size, strength, and prowess in athletics. Later in life, the nickname had clung to him, for he was a "big" man in railroad circles. He tried to get Jack to join him in his business, but the son loved his leisure, and his mother upheld him.

"He needs to marry some good, sensible girl," growled Big John. "Maybe he could settle down and work then."

"Yes, John, I have his wife selected. Agatha Trumbull will make him an excellent wife."

"That baby-faced wax doll!" Big John exploded. "Why, she hasn't two ounces of brains!"

"John Allen!" expostulated his wife. "She is a dear, wonderful girl."

"Wonderful! Yes, wonderful because old doughhead Trumbull has seven figures in his bankbook! Pouf!" Big John called for his hat and cane, went out, shutting the door impressively behind him.

Meanwhile, Jack was enjoying himself. He was learning something new every day. He laughed aloud when he thought of what his fastidious mother and sister might say to see him in overalls. But dad! Well, dad was different. Dad had wanted to buy a farm, but mother and Grace had objected and—so had he. Still, even now, he would not care to live on a farm unless Maida could be there. He had known her less than two weeks—to be exact, he had known her eleven days, and they had grown to be good chums. Even Mr. Carleton, who now began to hobble about with the aid of crutches, liked to be included in their pleasantries and more serious talks.

It was Saturday morning. Jack was cleaning up the barn. Maida called to him to bring her the step-ladder.

Jack looked about. Just what did she mean? A long ladder hung on some pegs at one side of the barn. He looked at it, then finally took it down, with considerable trouble, and started toward the house.

Maida turned the corner by the house, as he reached it. The end of the ladder, which was a long one, missed her head by a fraction of an inch. He stopped short. "Gosh! that was pretty close!"

"Plenty," returned Maida. "But, Jackson, where are you going with that—?" she paused remembering she had asked for the step-ladder. She doubled up, then sat down, helpless with laughter. "I am going to wash windows," she gasped. "I can't use that!" She laughed heartily at the crestfallen look on Jack's face. Finally, she said: "Jackson, the step-ladder; a small, short ladder that folds up. It always hangs right under the one you have there."

Jack returned to the barn. There sat the innocent step-ladder, for he had to remove it from its hanging place, when he took down the long ladder.

"That is a step-ladder, Jackson," Maida laughed at him, when he came back.

He grinned good-naturedly, and stood watching her as she proceeded to polish the windows. "Another accomplishment," he remarked.

She turned to answer him, lost her balance, and fell.

With a bound, Jack caught her, saving her from a nasty fall. His whole being thrilled, as he held her in his arms so closely that for an instant she leaned against him. His arms did not relax until she pushed him from her, her face flame color, even to the roots of her brown hair.

"Thank you, Jackson," she said softly. "You saved me from a bad fall."

"Oh! I-er-you are welcome," he stammered, and his face was no less flaming than her own.

Immediately, Maida went into the house, and Jack's eyes followed her, then he went slowly to the barn. "Jack, my son, that was a pleasing sensation," he said aloud. "Boy! she was just made for a fellow's arms."

(To be concluded.)

Parts Wanted.

Irate Customer—"I bought a car of you several weeks ago, and you said if anything went wrong you'd supply the broken parts."

Dealer—"Yes."

Irate Customer—"I'd like to get a nose, a shoulderblade, an da big toe."

Is Your Wife Still Your Sweetheart?

If so, treat her to a meal at Mumby's Dining Room, west end of Grand Stand, Toronto Exhibition.

Exhibition Notice

Don't buy your Electric Fixtures or Appliances until you have seen our fine display of the latest designs, in the Manufacturers' Annex Building, under the Grand Stand, Booths 16 and 25. Special prices on all goods sold during the Exhibition. If not convenient to call, send for our New Electric Fixture Catalogue, larger and better than ever. Any other information or advice we can give you will be gladly supplied either by mail or at the Exhibit.

WRIGLEY'S
After Every Meal
It's the longest-lasting confection you can buy—and it's a help to digestion and a cleanser for the mouth and teeth.
Wrigley's means benefit as well as pleasure.

Gunners of the Insect World.

There are few animals better known than the skunk. Every woman has admired its handsome fur.

In its wild state the skunk roams the whole of North America from Canada to Florida, and although it walks about in broad daylight is rarely molested. The reason is that, if annoyed, it can discharge from a special gland a spray, the odor of which is extremely obnoxious.

The writer speaks from experience when he says that there is nothing else to compare with it, and that a whiff of it will make any human being deadly sick. A sporting dog, if "skunked," is useless for days, losing all power of scenting game.

There is a small beetle known as the bombardier, which defends itself, when attacked by discharging an acrid fluid. But this beetle's ammunition is not only offensive ;it is also volatile, and actually explodes with a sharp little report when it meets the air. A bombardier can fire a dozen charges of this kind in succession.

There are other insects which have this peculiar habit, one a kind of ant lion of which a specimen can be seen in the London Zoo. The spray is formic acid, and the range is about twelve inches.

Another insect gunner is the peripatus, which is something between a scorpion and a worm. It is about three inches long, and has legs and powerful jaws. Crawling up to its prey, it shoots out a pellet of intensely sticky stuff which renders its victim incapable of movement.

Minard's Liniment Heals Cuts.

An Alpine Village.

Their world stands all on end; no place at all
Is left for even the little fields to lie
That they have hung aloft like tapestry
Upon the granite reaches of the wall
That towers around them. There they cling and crawl
And still contrive between the earth and sky
To reap the fruit of their brief industry
Before the snows and the swift silence fall.

Then in the church the meager women pray,
And in the huts the patient cattle sleep,
And earth the vow of her white peace fulfills,
And heeds them not who with such passion pay
Into her icy breast the faith they keep
And still lift up their eyes unto those hills.

—Anne Goodwin Winslow.

AUTUMN CARE OF STOCK.

The care of live stock during the stormy weather of autumn, and when pastures are bare or dry, is an important factor in successful live stock husbandry. There are many farmers who feed well during the winter and spring, but allow their stock to receive a severe setback in the autumn; due largely to thoughtlessness for the comfort and food supply of the animals. The cause of the setback is the deterioration in the quality of the pastures as the summer advances, and the greater need of shelter in autumn than during the summer.

On the rich, succulent grass of June which acts as a tonic as well as a food, the cattle quickly make gains, and the changed conditions come so gradually as summer passes, that one is apt to be caught unawares, particularly when the pasture gets ahead of the stock early in the season and appears so much better than it really is. The dry, woody stalks of the grasses and clovers require the addition of succulent food to keep the cattle in condition to make profits for their owners. The most valuable of these succulent fodders are mixed grain (when cut in the milk stage), corn and sunflowers, when fed as soiling crops. Roots should be added in the late autumn when the above-mentioned fodders near maturity. It is very important in feeding, that all changes be made gradually, so that the digestive tract of the animal may not be disturbed unduly. Late autumn feeding should thus merge gradually into the early winter ration.

The shelter and protection of the animals from storms and cold are quite as important as the feeding during this period of the year. The clump of trees or windbreak that was of great value to the cattle during the hot days of summer, is of little value during the chill, driving rain or cold storms of autumn. It requires more mood than the animal can eat to supply sufficient body heat during a cold, wet storm, and the animal has to fall back on its reserve supply of fat to maintain its body heat. This results in a more or less serious loss of weight. Cattle should not be allowed to lie on water-soaked ground, or when it is covered with hoar frost. They should always be protected from rain storms and heavy winds that might chill them from about September 1 until they are permanently stabled. Frequently cattle that are in good condition at the close of summer go into winter quarters in poor shape, with their vitality greatly impaired due to lack of ordinary care on the part of their owners.

Just as soon as the flies disappear, the horned animals that are going to be fed for beef should be dehorned. This adds much to their comfort; they feed better and can be marketed with less loss from bruises. The teeth of young animals should be examined, and loose ones extracted. The teeth of old cows should also be looked over, to determine how their feed can best be prepared for them.

All the stock should be carefully examined for lice, ringworm, or other parasites and diseases. They should be treated for all these pests and diseases, which multiply and injure the animals much more quickly in confinement than on range.

THINGS I'VE LEARNED ABOUT SILOS.

Experience has taught me a lot about silos. Six years ago I was ready for my first one. Four neighbors bought together and saved about $20 on each tank because they could be shipped together and the agent got them all on one trip. Orders can be sent direct to the manufacturer where there is no agent, and part or all of the commission on the sales can be kept by the farmers.

It doesn't matter what kind of a silo you get. There is a competitor who wants to sell. Let 'em all bid; it may cut the price.

I used to think that the base for a wooden silo needed to be built on the rock. I've made three bases, each of the latter two lighter than the one before it. A ten-foot wooden silo weighs from 3,000 to 5,000 pounds. A wagonload of corn weighs that.

I don't use any floor. Put in a foot of straw and let the silo filler get busy. I don't have a foot of juicy water in the bottom. The soil absorbs the juice.

I have learned to build the foundation wall in circular farm. It saves material; it looks better. Half-inch or thinner house siding, wet and slowly bent to shape, makes the best form material. Use sod for the inside form. Use plenty of stones in the cement. It is cheaper and the mixture holds as well.

Use a sand-and-cement top coat. Make it smooth. Slope the whole wall to the outside. Staves set out at the bottom if it is level.

Setting up. Hire a man who knows to help you. Building a scaffold is cheaper than broken legs. Use the plumb or level often. Crooked silos are a nuisance.

Put a roof on—for looks and convenience only. I've one silo with and one without. Silage is better without a roof, I believe. Extend the roof three or four feet above the top of the silo. This gives you head and filling room. Fill in the space between the top of the staves and the roof with sheet or galvanized iron. When the silage settles you'll have full silo.

I used to keep three or four men inside filling. Now one man with a distributor pipe does as well. Men will increase capacity but won't improve the silage. Even distribution is the main point.

Fne cutting pays. Our cutter makes it a quarter of an inch. Finer cutting packs better and makes better silage.

Own your own cutter if possible. Two or three farmers can buy one cooperatively.

I've tried everything I've ever heard of for sealing silage until wanted for feeding—oats, straw, sawdust, tramping, roofing paper, newspapers—and it always spoils on top. Always wanted to try paraffin like women do for jell.

Keep the hoops tight or the silo painted or coated inside, depending on the kind. They all need some care.

Build a house at the bottom of the chute bigger than you think necessary. It won't be. Set two silos so one chute can be used. Cheaper. More convenient. Use windows in chute and house. —Earl Rogers.

Mineral Matter for Hogs.

An experiment in hog feeding has been carried on at the Experimental Farm at Agassiz, B.C., to determine the influence of feeding mineral matter to hogs. The mineral mixture consisted of ground bone meal, 8 pounds, ground charcoal 5 pounds, ground rock phosphate 5 pounds, and salt 3 pounds. This mixture was fed at the rate of 3 per cent. of the grain ration. The other foods consisted of a mixture of shorts, four parts, and one part each of corn meal, chopped oats, and chopped barley. The results showed that, in every instance where the mineral was fed, greater and cheaper gains were made. Some of the lots received boiled potatoes in addition to the other feeds. It is reported by Mr. W. H. Hicks, the superintendent who conducted the experiment, that the potatoes apparently had a good effect, especially on the health of the pigs, more particularly in relation to rheumatism, as no stiffness was present in any of the pens where potatoes were fed. Some of the pigs were fed regularly at meal time, while other pens had access to self-feeders. The pigs that had free access to the self-feeders and received no mineral were the greatest sufferers from rheumatism.

The Septic Tank.

It consists of a large concrete tank divided into two compartments by a vertical partition. The size for a single house is about 4'x8' and 3½' deep. This tank holds the sewage long enough for a certain kind of bacteria to destroy the solid matter. When the liquid accumulates to a certain amount a non-chemical affair called a siphon empties one of the chambers into a system of field tile, called the absorption bed, laid shallow under the ground. Any remaining sewage is destroyed in the soil by another kind of bacteria that live near the top of the ground. In this way these friendly bacteria are enabled to do a very valuable work for us. This is science applied to a useful purpose, so says Prof. R. R. Graham.

We supply bulletin and blue-print to any one wishing to build a septic tank. All necessary information is given in these, and by their helpful suggestions any handy man can build it. Cost for cement, siphon, fittings and tile amounts to about $52. The tank may be located close to the house and the tile laid under the lawn or garden.

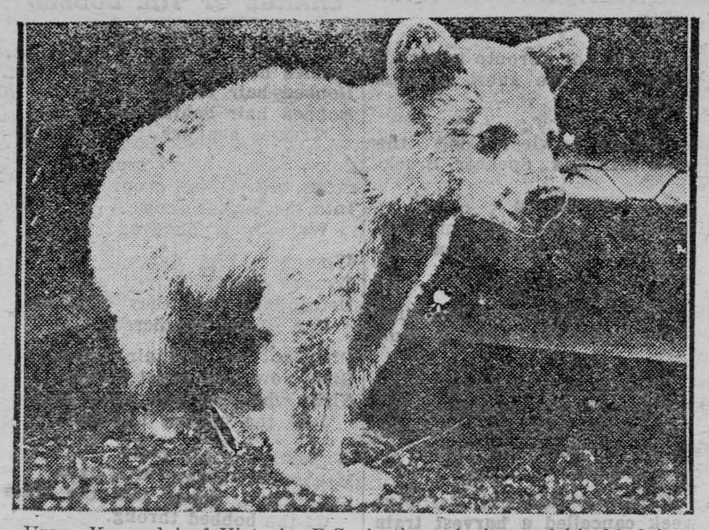

The Farm Water Supply.

There are two main sources, namely, well and spring (both hard water) and rain water (soft). Any one thinking of installing a modern water system and plumbing in his home should make sure that his water supply is both plentiful and safely protected from all possible sources of contamination. Much more water will be used daily under modern than under old conditions of service—about 30 gallons per person per day. Ask the O. A. College to assist you in solving the following problems in this matter of water supply, so says Prof. R. R. Graham:

1. How to increase the well and spring supplies of water.
2. How to safeguard these supplies from surface contamination.
3. How to make more use of the rain water supply.
4. How to get that fine spring water running through your house and stables by installing the hydraulic ram near the spring.

Iris and madonna lilies can be planted in August. Hollyhock seed can be planted for next year's flowering. Ever try the double hollyhocks?

He who permits his hens to roost upon the wagon wheels in winter, need not be surprised if there are no eggs. Comfort is a factor in egg production.

Ursus Kermodei of Victoria, B.C., is the only bear of his kind in captivity. He was captured recently on Princess Royal Island, northern British Columbia, by Indians, and carried by them into civilization. He is pure white in color, but differs from the Polar bear.

THE CHILDREN'S HOUR

THREE GOOD GAMES.

To play "Through the Circle," provide two pieces of elastic a yard in length and sew the ends of each piece securely together. Form players in two lines; at a given word the race begins. Each leader places one of the elastic bands over the head and goes through it; as the leaders step out, the next player in each line grabs the circle and does likewise, and so on down the line, three times, starting at the signal each time. The best two out of three wins. In case of accident, such as catching the elastic on a button, or breaking, the manager calls "Time," and the other side must stop until repairs are made.

"Jump the Shot" may be played by from ten to sixty or more players. A bean-bag tide to a rope is needed. The players stand in a circle, with one in the centre holding the end of the rope. This player swings the rope around so describe a large circle on the floor or ground, with a sufficient length of rope to place the bag in line with the feet of those in the circle. Players jump to avoid being caught around the ankles by the rope. Any one caught in this way must retire from the circle. The player wins who longest retains his place; or the one caught may be required to chance places with the centre player and in turn swing the rope.

To play "Seat Relay," divide players in two equal groups. Each group gets chairs and arranges them in an even line, far enough apart to allow roo mto run around each line without interfering with the other. A bean-bag is given to each leader. At the starting signal he quickly passes it to his neighbor, who passes it on to his neighbor, and so on to the end of the line. As soon as the last player gets it, he jumps up and runs down to the other end of the line and sits down in the leader's chair, immediately passing the bean-bag toward the end of the line again. (To make room for him every player in the line has shifted one chair toward the end of the line). The game continues in this manner, the whole line being ready to shift as soon as the bag reaches the end player, until the leader gets back in his original place. This ends the game. Lines one and two play simultaneously. The first one through wins.

THE SHIPWRECK.

The three little Woodland boys, Jackie Rabbit, Willie Woodchuck and Johnnie Muskrat, were thinking hard how they might get to shore as they drifted, drifted toward the Big Sea on their funny little ship, the old fishing log.

Of course, Johnnie Muskrat could get back, for he could swim. But he was trying to think of some way to get his two little friends back with him.

"If we only had a paddle," said Willie.

"Yes, and if we had wings we might fly," said Johnnie.

"Perhaps the wind will change and a merry little breeze will blow us to shore," said Jackie.

But no paddle drifted by and they did not have wings and the merry little breeze they wished for did not come. So it was three frightened little boys that sailed along their log ship.

As they drifted along the shadows on the shore grew longer. Soon the sun went to bed behind a hill, and still they kept on drifting. Then a little star appeared way up in the sky. Little Jackie Rabbit spied it first.

"Star light, star bright,
The first star I have seen to-night,
I wish you may, I wish you might
Bring me the wish I have to-night,"
sang Jackie.

"I bet I can guess your wish," said Willie. You wish you were home for a nice warm supper."

"I guess he's not the only one who wishes it," said Johnnie Muskrat.

But the three little Woodland boys kept on drifting, for they could not think of any way to get to shore. As it grew dark, they were tired, frightened and sleepy. Finally the old moon peeped his head over the hill, and to keep from getting lonesome, they told stories about him.

When it was only an hour past bedtime, they just couldn't keep awake any longer and one after another went to sleep. It was then that something happened.

"Kerplunk, perchug, slash, splash."

The old log ship had hit a stump and off went the three little sleepy Woodland boys into the water.

Fencing the Poultry Yard.

The first rule for fencing poultry is not to fence it at all, if you can get as good results by fencing the garden and lawn. Fowls on range will remain in a more healthy condition and also gather considerable feed that would otherwise be wasted.

But if they insist upon visiting the neighbor's garden, or range too much upon a public road, it will be necessary to fence them. In that case, one must be sure to allow them enough room. For a flock of 100 layers, a square lot 100 feet on a side is as small as is considered safe. If double yarding is practiced, from one-half to one-fourth as much may be sufficient, but where land is not too expensive, single yarding will probably prove more satisfactory.

Poultry netting should be stretched on posts about twelve feet apart. For the heavier breeds, this fence may be about five feet high, but for Leghorns, it should be as high as seven or even eight feet.

It will be easier to keep chickens in a yard where shade, feed, and water are always available. But if the flying habit starts, it must be curbed at once. When one flies out of the pen, others are likely to follow. You will find that certain chickens are the worst offenders at flying out, and in certain cases, it may be necessary to resort to cropping of wings. Of course, chickens immediately begin to grow new feathers, and use nutrients that should be expended for growth on eggs. Crop only one wing on each fowl.

For fences six feet or more in height, a neater job can usually be had by using two strips of netting. If the smaller size mesh is used at the bottom, the fence will turn little chickens at the minimum expense.

Happy Prospect Indeed.

"You say they anticipate a very happy married life?"

"My dear, all their relatives are so angry with them because they got married they've vowed they'll never visit them."

EATING RIGHT TO FEEL RIGHT

BY JULIET LITA BANE.

Since time began we have entertained many superstitions regarding food. Little girls have eaten bread crusts to make their hair curl, while older girls have eaten carrots to make them beautiful; yet how few people stop and think seriously and sanely about the food which they take into their bodies and put before their families. Scientists tell us that we have entirely new bodies every few years, how are you building yours?

While the whole truth about food is not yet known, there are some things that we do know, and if acted upon would save us much anxiety and actual suffering. The day is fast approaching when we shall have doctors (we have a few of them now) who will treat through food and the alimentary tract in a highly specialized way, just as certain schools treat the muscles.

If we choose food wisely we have a right to expect it to build for us new tissues, repair old tissues, regulate body processes, correct certain weaknesses and protect us from disease. But we must choose intelligently if we are to get these results.

We can not do what we have done for so many years—think of what "Walter would like best," and "what Susan positively refuses to eat," what is easiest to prepare, and what we have in the house. These things must be taken into consideration to a certain extent, but we must also have some other guiding principles.

Heretofore, our chief principal seems to have been to put everything we could think of on the table and trust to providence that we were getting the right things to eat. All sorts of ills followed. Many of them just "worked off," we paid no attention to them and in time they ceased to trouble us. Others were so insistent that we finally had to consult a doctor.

How many of these troubles were caused by improper food, we shall never know. But it is safe to say that food has caused more ills than have ever been suspected by either patient or doctor. Your doctor can not possibly know what foods you have been eating and often attributes your difficulties to other causes, when food either directly or indirectly was responsible.

Foods have been sorted out in many ways. Three divisions prove quite satisfactory: Foods for maintenance, foods for corrective purposes, and foods for protective purposes. In the first class we put the fats, the starches and sugars, the tissue-building foods, water and the minerals.

If you weigh too much, or too little, if you are troubled with constipation, or diabetes, or many of the other disturbances caused from lack of proper food, you can correct these troubles by choosing food wisely. The starches and sugars build fatty tissues if they are not all burned for energy and heat. Avoid them in large amounts if you would cut down your weight. Bulky foods such as watery vegetables, fruits, and cereals made from the whole grain are all very valuable in curing constipation.

A farmer said recently: "There is something to this feeding business. My son can feed the dairy cows and feed them less than I do, and it costs less, too, and they will give more milk than when I feed them. I'll tell you there is something to this if you just study it out."

And there is. The farmer is profiting by the facts that have been learned about feeding stock. It is just as important that he and his family profit by the information now at hand regarding food for themselves, for it has been proved beyond a doubt that there is more ill health in country districts than there should be.

When we read such articles as "The National Menace of Rural Bad Health," which appeared in one of our magazines not long ago, and read similar reports in other periodicals, we should think twice before making the boast which we have made for so many years that the country was a very healhtful place in which to live. One of the favorite reasons given by investigators for this condition is the fact that we have not chosen wisely in selecting food for ourselves and for our children.

A new phase of the question of feeding is the problem of taking food for protection against disease. Dr. E. V. McCollum, of Johns Hopkins University, has given us some interesting facts, but only a beginning has been made in this field. He recommends that we use whole milk, a quart a day for every child and at least a pint each day for grown-ups. We have not realized the food value and the protective value of milk. Dr. McCollum also recommends a large use of leafy vegetables for the same reason.

The classification of foods will prove helpful in the planning of meals whether for a family or a large group. Foods are grouped as follows:

Group 1.—Body building foods include lean meats, poultry, fish, oysters, clams, milk, cheese, eggs, dried legumes, nuts, and other protein rich foods.

Group 2.—Starchy foods furnish energy and consist of bread, crackers, macaroni, rice, cereals, breakfast foods, meals, flours and other cereal foods.

Group 3.—Fatty foods furnish energy and include butter, cream, lard, vegetable fats, salt pork, bacon, chocolate and other fatty foods.

Group 4.—Fruits and vegetables furnish mineral matter. They are spinach, peas, lettuce, potatoes, turnips, apples, oranges, berries, other vegetables and fruits, raw or cooked.

Group 5.—Sugar foods furnish energy. They are syrup, honey, jellies, dried fruits and candy.

All five groups should be represented in the diet every day, and about one-tenth of the entire amount should be chosen from the first group. This will insure enough building and repair material. A generous selection from the fourth group will insure the necessary bulk, mineral substances, and organic acids. Many times when a meal is analyzed one finds too much fat, too much protein, or too much starch, or perhaps not enough mineral matter present. With a little attention to selection, using this simple classification as a guide, the meal may be planned easily.

While it is not possible to say the last word on what to eat and what not to eat, there are many principles which if followed wisely would make for better health, which is the foundation of better living. It might be well to "think twice before you eat." At any rate think more about it in the future than you have thought of it in the past, act on the information you have, seek more information, and better health is sure to be your reward.

Planting Currants.

The best time to plant currants is in the autumn, says the Dominion Horticulturist, Mr. W. T. Macoun, who continues: If planted in the spring they will probably have sprouted somewhat before planting, and on this account their growth in the first season will be checked. Where the soil is in good condition, currants, especially the black varieties, make strong growth, and the bushes reach a large size; hence it is better to give them plenty of space, as they will do better and are easier picked than if crowded. Five to six feet is a good distance to plant. If planted closer, especially in good soil, the bushes become very crowded before it is time to renew the plantation. Strong one-year-old plants are the best, but two-year-old plants are better than poorly rooted yearlings. It is better to err on the side of planting a little deeper than is necessary than to plant too shallow. A good rule to follow is to set the plants at least an inch deeper than they were in the nursery. The soil should be well tramped about the young plants to prevent its drying out. After planting, the soil should be levelled and the surface loosened to help retain moisture.

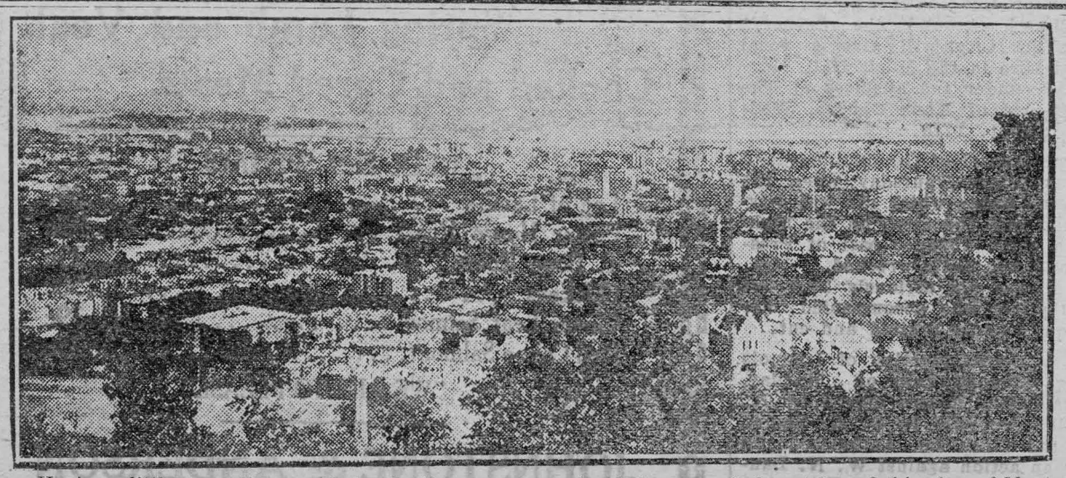

Would Be Wholly Undeserved.

"They say she'll probably win the peace prize."

"What, she! Why, to my certain knowledge that woman's responsible for at least a dozen marriages."

Yams belong to the Yam family, while sweet potatoes belong to the Morning-glory family. Irish potatoes belong to the nightshade family.

The windmill is the cheapest source of farm power, and it ought to have more credit than it gets. One drawback to its usefulness is that frequently it is placed too high up in the air. When the manufacturer sells the farmer a windmill, he wants to sell him a high tower to put it on. That is good business for the maker, but not always for the farmer, because there are some locations where the windmill will do better work nearer the ground, and there will be less danger from heavy winds. Give the old motor fair play, and it will do its fair share of the world's work and board itself.

Having a little spare time on his hands the cameraman decided on an airplane trip and this view of Montreal from Mount Royal, looking south, is the result.

LOCAL AND GENERAL

MORASH FOUNDRY

Reeve W. K. Farlinger is in receipt of a brass plate from some members of The British Association, bearing the following inscription:

"To the Glorious Dead of Morrisburg
1914—1918
From Some Members of
The British Association for the
Advancement of Science
Who visited their town, Aug. 4, 1924.

Instructions are given to have same placed on the Memorial Wreath which was recently received, and is now on the Soldiers' Monument.

* * *

Born—At Morrisburg, on Tuesday Aug. 26th, to Mr. and Mrs. Wilfrid Coligan, a daughter.

* * *

Mrs. Harry Armstrong and daughters Phyllis and Sybil have returned home after spending a few weeks at her home in Chatham, Ont.

* * *

Miss Von Doran spent a few days motoring in the Adirondacks last week.

* * *

Master Darwin Stata spent a few weeks in Kingston visiting his aunt.

* * *

Mr. S. G. Finnie spent the early part of the week in Montreal.

* * *

Mr. Paul Gormely is spending the week in Cornwall.

* * *

Miss McKinnon is spending the week at the Toronto Fair.

* * *

Dr. and Mrs. Huenergard of Kitchener, Ont., are the guests of Mr. and Mrs. Chas. Baker.

* * *

Mr. and Mrs. Rob. Cline of Massena, N.Y. spent the week end the guest of Mr. and Mrs. M. A. Barkley.

* * *

The station at Cornwall Junction, where the O. & N. Y. Railway crosses the C.N.R., was completely destroyed by fire on Sunday last.

* * *

Mr. and Mrs. E. Middagh and children and Mr. B. Connor have returned home from Moncton, N.B.

* * *

Mrs. R. J. Dillen arrived home Friday after spending several weeks in Toronto, the guest of Mr. and Mrs. Arthur Clay.

* * *

Mr. and Mrs. Sylvester Hutt of Montreal are visiting the former's parents, Mr. and Mrs. S. Hutt.

* * *

Mr. Archie Wright of Montreal is visiting his parents, Mr. and Mrs. Jas. Wright.

* * *

Miss Lottie Reed spent last week at the home of F. D. Stata.

* * *

Dr. and Mrs. J. N. Helmer of New York, are spending their vacation, camping on the St Lawrence, at the "Head of the Locks."

* * *

Merkley Bros. are exteuding their Shoe Sale five days, closing on September 6th. A further reduction has been made on all lines of footwear.

* * *

Mr. and Mrs. Goodell and Mr. and Mrs. Cousin of Watertown spent a few days at Mrs. Frank Stata's this week.

* * *

Mrs. J. J. Glew and daughter, Hilda. left Tuesday for their home in Calgary, Alta. after a months' visit with her parents, Mr. and Mrs. Edgar VanAllen, Morrisburg.

* * *

Born—At Medical Arts Hospital, Montreal, on Tuesday, Aug. 26th, 1924, to Mr. and Mrs. S. G. Finnie, a daughter.

* * *

Mr. and Mrs. Willis Hall and son of Chicago, who have been visiting relatives and friends in Morrisburg and vicinity returned home Thursday. They motored from Chicago some weeks ago. Mrs. Hall is the youngest sister of Mrs. Alex. Casselman.

* * *

Mr. A. M. Halliday of Prescott announces the engagement of his daughter, Norah Beatrice, to Edwin Arnold Myers, of Rouses Point, N.Y. son of the late Mr. G. E. Myers and Mrs. Myers of Morrisburg. The marriage will take place the last of August.

* * *

I have for sale property belonging to the late Col. Allison estate, including the beautiful Allison home on Main Street, and three frame dwellings at the east end — J. A. Riddell.

* * *

Callers at Star Theatre were Miss Bessie Robinson, Toronto, Mr. J. Kist, Mr. W. Smith, Mr. J. Koller, all of Detroit, Mr. Wm. Brennan, Mr. Flanders and Mr. Ward of Schenectady, Miss Lera Smith of Chesterville.

* * *

The Morrisburg Horticultural Fair Sept. 13th.

* * *

Mr. and Mrs. W. Austin Dobson, accompanied by the latter's mother, Mrs. S. Crysler, motored from Montreal Saturday and are spending the week with Mr. and Mrs. George Dawley, Riverside, and friends in Morrisburg.

Mr. R. P. Adams of London, Ont is spending a few days at the home of Mr. H. H. Bradfield.

* * *

Dr. T F. Chamberlain spent a few days in town last week.

* * *

Mrs. Harry Pyper is spending the week in Montreal.

* * *

Miss L. Wiggins of Toronto is visiting her parents Mr. and Mrs. Wiggins.

* * *

Mr. and Mrs. Dobson and Mrs. S. Crysler of Montreal were the guests of Mr. and Mrs. F. D. Stata last week.

* * *

Mr. and Mrs. McMillan and son, Foster McMillan, of Lachine, Que., are visiting at the home of Mr. G. B. Beckstead's.

* * *

Miss Madeline Stephenson of Prescott spent a week with Dr. and Mrs. G. M. Gorrel.

* * *

Mr. W. P. Stata and daughters Mrs. Houck and Miss Mildred Stata of Buffalo, N.Y., returned home recently after spending a few weeks with Mr. and Mrs. F. D. Stata.

* * *

Mr. and Mrs. Ross Strike and son returned to Perth on Monday after spending two weeks' vacation with the latter's father, Mr. A. H. Casselman.

* * *

Mrs. Cochrane, of Montreal, is spending a few weeks with Mr. and Mrs. W. C. Cochrane.

* * *

Miss Owen of New York City returned home Thursday evening after spending a week with Mrs. K. M. McGannon.

* * *

The Misses Pearl, Minnie and Frances Smith returned home on Wednesday after spending a couple of weeks with relatives in Watertown, N.Y.

* * *

Mr. and Mrs. Solomon Shaver of Winchester and Mrs. Annie Mouthrop are visiting at the home of Mr. and Mrs. R. G. Fetterly.

* * *

Rev. Father J. V. Meagher is in Kingston this week attending the annual retreat of the priests of Kingston Diocese.

* * *

Mr. and Mrs. Harry Wilson of Waddington, N.Y., were the guests of Mr. Chauncey Dumond and Dr. MacElroy on Wednesday.

* * *

Mr. J. Smyth Carter on his return to Toronto from England, stopped over and spent the week end with his father.

* * *

Ven. Archdeacon Carson returned home on Sunday last after an absence of nine weeks, during which time he visited his son Dr. Chas. O. Carson of Lydney, Eng., and other places of interest in England, France Ireland and Belgium.

* * *

Mr. L. F. McKenna of Montreal is spending a couple of weeks at the home of Mr. J. D. Daly.

* * *

Mrs. Thos. Campbell is spending a week in Kingston with her sister, Mrs. Alex. McDonald.

* * *

The Morrisburg Horticultural Fair Sept. 13th.

Mr. Frank Blancher of Brockville spent the week end with his son Dr. K. A. Blancher.

The engagement is announced of Lillian May, youngest daughter of the late Mr. A. J. Harrison and Mrs. Harrison, of Ottawa, formerly of Morrisburg, to Mr. J. Welton Spence, B. Sc., son of Mr. and Mrs. J. C. Spence, of St. Croix, Nova Scotia. The marriage to take place the latter part of September.

Henry Ford's palatial yacht, the Sialia, passed up the river on Wednesday, enroute from Montreal and the Gulf of St. Lawrence, to Detroit, Mich. Mr. and Mrs. Ford were the only passengers.

The Collegiate Institute and Public Schools will open on Tuesday, September 2nd at 9 a.m. All students are requested to be present on the opening day.

Local music lovers will welcome the news that the noted boy contralto, Cyril Rice, soloist at probably the best known and best loved church on this continent, "The Little Church Around the Corner," New York City, will give a vocal recital here in the Music Hall, Morrisburg, under the auspices of The Ladies Aid of Knox Church, Wednesday, Sept. 17th.

Mrs. Mansel of Cardinal, escaped serious injury Thursday when the Overland Sedan which she was driving ran into the ditch on the highway a short distance east of Prescott and was badly wrecked. Mrs. Mansel was not seriously hurt but a little boy who accompanied her was quite badly bruised and cut.

At a special meeting of Iroquois Village Council held on Monday, August 18th, it was moved by R. J. Ellis, seconded by G. A. Bouck, that the Clerk be authorized to enter an action against W. N. Lannin, Manager of the Riverview Dancing Pavilion, for violation of By-law No. 457, neglecting to take out a license as required by said by-law.

The Morrisburg Horticultural Fair Sept. 13th.

* * *

* * *

Mrs. Maude Lawless spent the past week with Mrs. Spencer, Brockville.

* * *

Miss Isabel Eager left on Monday to spend a few days in Beauharnois, Que.

* * *

Mrs. M. A. Hanson of Waddington, N.Y., spent Thursday in Morrisburg.

Mrs. Norris and children have returned home after spending the past two weeks with her husband, Captain J. V. Norris on the S. S. "Chicago Tribune."

The Canadian National Railways this week cancelled a harvest train which was to have taken harvesters from Western Ontario and which was scheduled to leave Toronto on Sept 3. This was done following advices from Western Canada that no further harvest labor was needed from the East.

Patrick C. Murdock, in charge of the Customs Department at the ferry dock, Prescott, will shortly retire. Mr. Murdock is one of the oldest men in the Canadian Customs Service.

CHARGE OF THE BOBBED BRIGADE

Bobbed hair to right of us,
Bobbed hair to left of us,
Bobbed hair behind us
'Tresses asunder.

Some with a heavy crop,
Some with a light crop,
Into the barber shop
Walked six hundred.

Women of high degree,
Women passed fifty-three,
Determined that they shall be
One of the numbered.

Girls not yet in their 'teens,
Girls now just sweet sixteen,
Girls who that age have seen
Join the bobbed hundred.

Women of every class,
Mother, daughter, little lass,
Sweetheart, sister, join the mass
Of the bobbed throng.

Clerk, stenographer, "Hello" girl,
Waitress, maid and office girl,
All have got caught in the whirl,
No longer wear hair long.

Some with bangs and some without,
Some are shingled 'round about,
Some in curls and some in doubt,
In case they have blundered.

Some of them do look real swell,
Some of them do look like——
It's something not just well to tell
Now the bobbed hair hundred.

Good Eyes

—AND—

Good Health

How few of us ever stop to think of the relation between good eyes and good health in spite of the fact that we would part with almost any member of the body rather, than our eyes, we abuse and neglect our eyesight more than any other human function.

We know that eyestrain is often responsible for headaches and nervous spells. For other ailments, we run to the Physician on the slightest provocation. We are even learning to make regular visits to the Dentist. Why do we not as regularly have our eyes examined by an Optometrist.

Efficiency is the watchword of to-day. You cannot be efficient with poor eyes.

'Phone for appointment.
