ENTIRE DISTRICT SENDING DELEGATES TO PRESCOTT

Delegates from Lancaster, Cornwall, Wales, Aultsville, Morrisburg, Brockville, Gananoque, Kingston, Delta, Athens, Newboro, Westport, Smiths Falls, Perth and Ottawa will attend the meetting to be held in Prescott on May 1st, for the purpose of organizing an Eastern Ontario Fish and Game Protective Association.

The meeting is sponsored by the Prescott Fish and Game Club, and the speakers will include the following:

Hon. George H. Challies, minister of game and fisheries for Ontario; A.C. Casselman, K.C., M.P.; Lieut. Col. A.C. McLean, chief of the committee of game and fisheries department; James A. Sanderson, M.L.A.; H.F. McLean of Merrickville, and others.

Registration of delegates will take place at 10.30 a.m., followed by the appointing of committees.

At the afternoon session, reports of committees will be presented, and the actual organization and election of officers will take place.

CHARGED IN DEATH OF LANCASTER MAN

Charged by provincial police with criminal negligence, following a coroner's inquest at Cornwall Thursday afternoon, Clarence Wheeler, 24, of St. Andrews, appeared in police court and was remanded until May 4. He was released on bail of $4,000.

The charge against Wheeler arose out of an accident on the provincial highway about 15 miles east of Cornwall on Friday evening last when Wheeler's car struck and fatally injuded Nelson Montroy, 39-year-old Lancaster township farmer.

After deliberating only a short time, the jury returned a verdit as follows: "That Nelson Montroy met his death accidentally by being struck by a car driven by Clarence Wheeler, and that the car was being driven in a careless manner".

MR. W. J. POLLOCK

There passed away on Wednesday, at his residence in Iroquois, William James Pollock, government employe there. The deceased, who was in his 53rd year, was a widely known and highly respected citizen, and a large circle of friends mourn his loss. In 1929 he married Mary Jane McLeod of Moose Creek, who survives him.

Also surviving are his mother; a brother Edward of Brockville, Roy of Inkerman, Thomas in Calgary; three sisters, Mrs. Charles Hanes of Aultsville, Mrs. Wesley Kirkey of Pleasant Valley and Mrs. William Lindsay of Domeville.

He was a past Noble Grand of Riverside Lodge No. 145 of the Independent Order of Oddfellows, and a member of the Encampment.

The funeral service will be conducted by that order, assisted by the Rev. Wm. Merrilees, pastor the Presbyterian Church at Iroquois, where he was a regular attendant. The funeral services will be held on Friday.

NARROW ESCAPE FOR ENGINE CREW

When a bolt blew out of the boiler of the huge locomotive pulling the fast Maple Leaf C.N.R. passenger train, at Cornwall on Tuesday, members of the engine crew miraculously escaped serious injury or possible death. The cab of the engine was filled with live steam, and the men were forced to make their escape by standing on an outside platform of the locomotive. The engine ran wild for a short distance, but the engineer succeeded in reaching the throttle through the cab window, and the train coasted into the yards at Cornwall.

No definite reason for the cause of the blowout has been arrived at, and it will be a difficult matter to determine. According to railwaymen the accident is a very rare one, and is considered quite dangerous. Fortunately the bolt which blew out on the locomotive of the Maple Leaf was near the floor of the cab.

At a point about a mile from the city of Cornwall, members of the engine crew heard a dull pop, and steam hissed out of the bolt hole, backed by pressure of 275 pounds. Except for being drenched by water and blackened by smoke, Engineer Paul Lalonde and the fireman were uninjured. J. Hamilton, a spare fireman, was slightly burned on the legs.

The train was delayed for about an hour after its arrival at Cornwall at 11 o'clock, and then was taken to Iroquois by the engine of a way freight. There it was met by a passenger locomotive from Brockville.

MR. WM. G. BARKLEY

By the death at the General Hospital on Saturday morning last of William G. Barkley, Iroquois lost another of its old and respected citizens. Mr. Barkley hod been in ill health for the past two months.

Deceased, a son of the late Mr and Mrs. Simon Barkley, pioneer residents of the district, was born in the third concession of the township of Matilda, on Feb. 5th, 1860, and his entire life was spent in Iroquois and district. His passing removes a familiar figure, at the time of his death being bread and sanitary inspector and truant officer in Iroquois.

When a young man he was married to Minnie Morrell, who survives. To this union were born nine children, eight of whom survive: Charles of Watertown, N.Y., Cecil and James of Moulinette, William and Ray of Cardinal, Gerald of Iroquois, Mrs Jones of Eaton, N.Y. and Miss Goldie of Rome, N.Y. He is also survived by fifteen grandchildren: one brother, Alex of Iroquois; four sisters, Mrs. Allan Richardson of Little Falls, N.Y.; Mrs. Wilbur Southard of New York City; Mrs. C. Newkirk of Richfield Springs, N.Y. and Mrs. Jas. Brontmire, Iroquois.

The funeral was held Monday afternoon in St. John's Anglican Church, where service was conducted by Rev. J.L. Homer. His six sons acted as pallbearers. The remains were placed in the vault at Point Iroquois, and later interment will be made in Iroquois.

ANNUAL MEETING, EASTERN ONTARIO JERSEY BREEDERS

The annual meeting of the Eastern Ontario Jersey Breeders Association will be held on Monday April 30th, at the Agricultural Representative's Office, Morrisburg. The business meeting will commence at 10 a.m., with luncheon at 12 noon at the Windsor Hotel. Following luncheon, Mr. A.E. McLaurin, General Secretary of the Canadian Council of Boys and Girls Clubs, will speak.

At 2.30 p.m., a demonstration will be held at the farm of Grisdale Bros., two miles east of Iroquois, on Highway No. 2.

All interested in the Jersey breed are cordially invited to the meeting and the demonstration.

IMPROVEMENT COMMITTEE SEEK CO-OPERATION OF CITIZENS

The first meeting of the Town Improvement Committee was held on Monday night last, and considerable progress was made. The general feeling seemed to be that too much should not be undertaken, but what was attempted should be done thoroughly.

Quite a number of the citizens were present and many valuable suggestions given. After considerable discussion, it was decided to improve the four entrances to the village, and for this purpose the following committee was selected:

Albert Burris, chairman; F.S. Broder for West Entrance; Miss Farlinger for East Entrance; Wm. Weegar for North Entrance, and Chas. Crober for Lock Street and the Ferry.

The president of the Legion, and the president of the Women's Institute, were asked to co-operate with the president of the Horticultural Society in making the Monument Square as attractive as possible. At present, a grant of $20.00 is received yearly from the Government for this purpose. The Horticultural Society is also asked to be responsible for guidance in the improvement of one of the town streets.

A Radio Interference Committee, composed of Miles Whitteker, chairman; Mason Duvall, John Thompson and D. Stitt was appointed to help clear the air. This committee promised some fireworks.

Mr. Flynn, reeve, intimated that he would be pleased to send a circular before clean-up day, asking each householder to co-operate with the committee in this effort to improve the general appearance of the town.

CONNAUGHT LODGE I.O.O.F. ROOMS DEDICATED

On Friday evening, the newly decorated and remodelled Connaught Lodge I.O.O.F. rooms at Brinston was the scene of an Oddfellows dedication ceremony, the first to be held in the district. The ceremony was in the nature of an open evening, with the friends and relatives of the members being present, and Grand Master Col. A.W. Gray of Brockville, who was in the chair. The ceremony was beautifully carried out under the guidance of Grand Marshall of Grand Lodge, Bro. W.T. Kingston of Cardinal, assisted by Brinston and Cardinal brethren. The altar blocks were built up to represent the various aims and emblems of the association. For the Rebekah portion of the ceremony, a number of members of Willow Rebekah Lodge of Cardinal represented the Rebekah Branch. Bro. Chas. Plumb, Past Grand Sire of the Encampment represented the Patriarchs Militant Branch of the order. At the close of the beautiful and impressive ceremony, the members and visitors were invited to the other hall, where an excellent supper was served to about 170 persons, after which D.D.G.M. Bro. Strader of Brinston introduced the various speakers, including especially Grand Master Col. Gray and Grand Marshall W.T. Kingston; W. Johnston, reeve, who welcomed the Lodges; H. Hamilton, P.D.D.G.M.; W.S. Johnston, P.D.D.G.M., Kemptville; Rev. and Mrs. Booth; A. Bell P.D.D.G.M.; Chas. Plumb, P.G. Sire, Grand Encampment. The members were delighted to have the oldes' member in the district, Bro. Fink of Iroquois, and Bro. Thos. Fairbairn of Prescott, as well as a number of other speakers.

A pleasing item was the presentationof a bouquet of flowers from the ladies of Brinston, by Bro. Bell, to Mrs. Booth, who received it on behalf of the members of Willow Rebekah Lodge.

The visiting brethren represented every Lodge in the district, and some of the outside lodges, and the occasion will surely be remembered by all.

STRANGE ABSENCE
by ALLYN SLOAN

SYNOPSIS

Jean Grahm and her brother, Euan, stay on the Riviera with Geoffrey Winston and his wife Doreen, who leads Euan on to gamble at the Casino. Jean coaxes him to go to Paris. While driving there, Jean finds a string of pearls in Euan's pocket. He snatches them from her and the car crashes. The accident is discovered by Jerry Grant ho takes her back to his hostess, Helen Gorse. Euan is missing. M. Rivaux investigates and he confronts Helen with the fact that Mrs. Winton's pearls are missing. Jean visits Euan's friend De Laurier and learns that Euan is in debt to him.

Jerry Grant meets M. Perichon, famous detective, who assist them. Jerry proposes to Jean but she asks him to wait.

The Baron insists on accompanying Jean to the Van Dyke party. The next morning Mrs Van Dyke reports the theft of her famous diamond. Jean's discovered missing. M. Perichon directs Grant and Washburn to the deserted villa. Grant enters and follows de Laurier into a subterranean cave. De Laurier knocks him out.

CHAPTER XXIV—The Panel Opens

Slowly Washburn crawled down the hill in the direction from which De Laurier had come. It took him some while even to find a way down to the sea, for he had dared not show a light and travelled entirely by the sound of the waves breaking gently against the rocks down below. He found it a distinctly nerve-racking experience, that creeping in the dark, never knowing whether he was being followed, or observed by some unseen watcher, yet he smiled, for it reminded him of his youth when he and Elsa had played at Red Indians, a very realistic game in which they had taken it in turns at being scalped. After some time his efforts were rewarded, however for he discovered a boat tied up to a tree trunk on the brink of the water. Never doubting that it was the boat which had brought De Laurier over, he untied it and set it adrift. The villian should not escape that way anyhow. There seemed nothing else of interest and certainly no sign of Jean. Washburn retraced his steps up the hill again, moving with the same caution. All this creeping about in the dark seemed a very slow business and he wondered how long he had been away from Grant, and what luck his friend had had. Regaining the top of the hill he peered at the villa, but as far as he could see or hear nothing of any sort had happened. Grant, however was not to be seen, and the American wondered uncomfortably whether he should not follow him into the villa. After all, two were better than one if it came to a fight.

Sneaking up to the door, he found that it gave to a gentle pressure, and moving with a catlike tread he stepped inside. Standing breathlessly still in the darkness, he listened, but hearing no sound, he crept towards the crack of light which shone faintly from the other room.

Evidently the place was deserted and hesitating a moment to fling an apprehensive glance about him, Washburn tip-toed into the room and stood blinking in the light. It was he saw, a species of lounge hall for a stair case led up in one corner, presumably to the rooms above. But where were Grant, and de Laurier, whom he had seen go into the villa? The complete absence of sound filled him with an acute apprehension. He felt it to be unnatural, as if someone were there invisible, yet watching him A mad impulse seized him to call out Grant's name, but he controlled the impulse and forced himself to be still.

The staircase winding upstairs in the darkness drew his attention, and he began to feel impelled to go up it. So continuing his stealthy crawl, he began to ascend. Half-way up a board creaked, sounding to him like a shot, and he caught his breath and broke into a cold sweat. Long afterwards the American declared that his examination of that empty house was the most nerve-wracking experience he had ever been through. There seemed to him something uncanny in the silence, and his imagination, unaturally alert, peopled the house with eerie sound. Once he had cowered behind a door, whilst his heart had performed terrible antics within him; yet a moment later he had discovered that the object of his fear had only been a blind cord swinging in the draught. Another time his own torch had reflected suddenly in a mirror, dazzling his eyes, and thinking it to be another man, he had whipped out his revolver. But at last he had been all over the house without finding a trace of Grant, or of anyone else. There were only four best bedrooms upstairs and two smaller rooms for servants, and only one had shown signs of habitation—a small room where the bed had been crumpled, and upon which ominously had been blood stains. At these Washburn had shuddered, wondering —even fearing—that they might have some connection with one of his friends. And Gosh! where was Jerry? the young man asked himself. Had de Laurier left the villa and had Grant followed him? If so, why had he not heard them as he came up the hill?

"Hell, this place is giving me the jim-jams," he said to himself, descending the staircase into the hall again. Evidently he was alone in the house; indeed, he had proved it, he told himself, trying to shake off the ghastly feeling that he was being watched. Yet he wished heartily that he could pluck out one of his eyes and stick it in the back of his head.

Standing in the hall with the revolver in one hand and scratching his head with the other, he wondered what to do; where to pick up his friend's trail. He was becoming seriously worried about Grant, fearing that he might become number three of the strange disappearances that had been troubling them so mysteriously. And any hope that they were to find Jean Graham in the villa was pretty well impossible since—

A sound caused him to break off and hold his breath. Yes, someone was moving in the next room. With every muscle taut and his eyes rivetted on the door. Washburn waited whilst the stealthy steps came nearer. The suspense was almost unbearable, and when the door began to swing open very slowly on its hinges, it was almost more than he could do to keep from springing forward. Yet with a supreme effort he waited to see his antagonist.

A black hat appeared and he raised his revolver, but a mild voice said: "It is only papa; do not kill him."

Well, for the love of Moses!" the young man gasped, relaxing and wiping his brow. Never had he been any more delighted to see anyone. "Say you've come just in time. I was going bug-house."

"Sh!" Perichon glanced about him. "Is there no one?"

Washburn explained in a whisper. "And he is not here?"

"Nope."

"C'est bizarre."

"You've said it. I feel as if I had lizards crawling all over me."

The Frenchman flung him a humorous glance: "No, I do not see any."

This amused Washburn. He chuckled and felt better.

"Me, I heard a shot," remarked the detective.

"You did? When?"

"Five, ten minutes ago. You did not hear it?"

"No. Say, d'you think anything has happened to Jerry?" whispered the young man a deep frown gathering between his eyes. "D'you think I'd better...."

"Sh!" hissed Perichon, grabbing him by the arm, and cocking his head attentively to one side Following his glance, Washburn saw him staring with fixed intensity at the wall behind him; then also became aware of some scratching sounds which came from it

The panel was opening!

CHAPTER XXV—Jerry Finds Jean

Jerry Grant opened his eyes and made an effort to move, but he was trussed like a chicken and could only lie and listen to the pounding of water in some distant cave and to the gentle purring of the waves breaking on the beach just beyond where he lay. Wriggling over on to his side however he managed to gain a kneeling position and when the giddiness had cleared a little from his head he stared about him.

He did not know how long he had been there, and there was no sign of De Laurier, but a row boat now ay on the sand in the mouth of the cave. by which he deduced that the Baron had been joined by whoever it was to whom he had been signalling, and that he had doubled back up the ladder again.

Becoming aware of bitter coldness and the clamminess of damp clothing, he turned his attention to freeing himself. Wriggling was apparently of no avail, and he crawled about until he found a sharp edge of rock, against which he began to rub his bonds. It was a painful process, for he rubbed his flesh as much as the material in his frantic effort, and it seemed to him as if his hands would be worn through. Luckily for him his tie that day had been a knitted one and after a while the silk began to fray. P[illegible] that the stuff gave he was hot again and panting beneath his gag. As soon as his hands were free, however, it was only the work of a few minutes to undo the handkerchief from about his mouth and feet, and to struggle stiffly to an upright position. For a moment he stood considering, whilst unconsciously he dabbed his raw hands with his handkerchief. He could escape by the boat, which was a comforting thought because it might prove impossible to regain the hall of the villa by the secret panel. But if he went by sea it would be a long way round and take him quite a time to reach the villa. He began to consider whether there might be another way up. Listening keenly he heard water smacking to his right almost behind him, which suggested there were other caves under the house. Feeling in his pocket or his torch, he was relieved to find, that it still worked, and going back to the ladder, he flashed it upon the rock walls.

Woman Alderman Now a Barrister

Margaret Crang of Edmonton is the Youngest City Council Member in Canada

Possibly the youngest woman to be elected alderman in all Canada, Miss Margaret Tryphena Francis Crang, 23 years of age, of Edmonton, has been admitted to the bar.

Before Mr. Justice Frank Ford in Supreme Court, Miss Crang, slender and attractive in her flowing gown, took the oath of allegiance to His Majesty the King, and of truthfulness in her profession.

"Miss Crang, this occasion becomes more pleasant at time goes on," remarked his lordship, who said it was a matter of great satisfaction to admit her.

Elected as Alderman

She first established herself in the public eye in Edmonton when she ran for aldeman in the November, 1933, civic election; and despite head shakings by veteran campaigners who insisted no woman had a chance of success, romped home with 10,853 votes, second from head of the poll.

It was a daring thing to do, but her friends say she is like that. Quiet and unassuming, but a forceful personality for all that, this girl won for herself the distinction of being the youngest woman ever to be elected an alderman in Edmonton, and, as far as can be learned, the youngest for that civic office in Canada.

Member of Labor Party

Like her father, Dr. Frank W. Crang, veteran school trustee here and in whose footsteps she is closely following, Miss Crang is a staunch member of the Labor Party.

Born in Edmonton, she matriculated from Strathcona High School and went on to a lengthly and brilliant academic career. At University of Alberta she graduated in arts in 1930 and two years later received her LL.B. The following year she received her high school teacher's diploma.

The young lawyer has had considerable practical experience in her profession, too. First, in the summer of 1930 she served in the legal offices of Parlee, Freeman, Smith, and Massie. Of more recent years she has been in the offices of Newell, Lindsay, Emery and Ford.

Chicago Teachers Get 24.5 P.C. Cut

Chicago—Chicago school teachers were notified recently that their salaries will be cut 24.5 per cent. next year. Civil service employees of the city will receive a 21.5 per cent. cut. The cuts in pay were included in the 1934 fiscal budget of $71,242,610 which included continuation of the 15 per cent. reduction in salaries made last year for city employes by the Council, and the cut in the school year from 10 to 9 months.

Modern Baby Rearing Methods Deplored

Baltimore—Modern methods of rearing babies were characterized recently by Dr. Knight Dunlap, professor of psychology at the Johns Hopkins University as "systemized neglect."

"A baby is not a vegetable. Neither is it an animal. It should not be eft alone to develop b itself or to devise ways of amusing itself. A baby needs social life, just as much as do adults."

Dr. Dunlap advised that babies be talked to, tossed in the air, and petted and coddled as much as possible.

"Right now," he said, "I am gathering information to determine if the thumb-sucking habit isn't due to a baby being left alone too often."

Dr. Dunlap who has studied children for the past thirty years and has children and grandchildren of his own said his observations show that "after all, grandmother and the Indians knew a great deal about babies."

"When a baby cried in grandmother's time, they figured something was wrong—and it was the same way with the Indians."

He added that there as something wrong when a baby cried and "someone should investigate."

Russia Rustles Trade in Brazil

Porto Alegro, Brazil—The newspaper, Federacoa, says the Soviet Trading Corporation of South America, Iuzhamtorg, with headquarters at Montevido since its injection from Buenos Aires in 1931, plans to launch Russo-Brazilian trade in the state of Rio Grande do Sul through a subsidiary company. The company will be capitalized at $1,000,000, the new newspaper said, and is planning to acquire $4,000,000 worth of hides and wool annually, in exchange for Russian gasoline and other products.

When political promises, like chickens, some home to roost, they may not find any roost there.

153 Eggs Laid In 154 Days

Agassiz, B.C.—A world record of 153 eggs in 154 days was claimed recently for two barred Plymouth Rock pullets participating in the annual egg-laying contest of the Dominion Experimental Farm here.

Pullet No. 3, owned by the Delta Land Company of Vancouver laid 150 eggs in consecutive days. She missed laying on the 151st day, and tied with No. 2 owned by A. Pennington, of Agassiz.

Relief Figures Decrease in B.C.

Victoria — Reduction of 14,000 in the number of persons receivng relief in British Columbia in February compared with the same month last year was shown in figures issued by the British Columbia Relief Department The total this year was 114,310 compared with 128,546 in 1933.

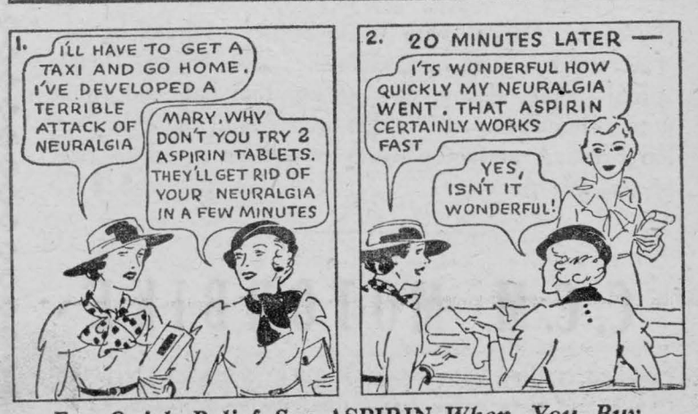
Almost Instant Relief From Neuralgia



For Quick Relief Say ASPIRIN *When You Buy*

Now comes *amazingly quick* relief from headaches, rheumatism, neuritis, neuralgia . . . the *fastest safe relief, it is said, yet discovered.*

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. *And thus is ready to go to work almost instantly.*

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S *quick relief*, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

WHY ASPIRIN WORKS SO FAST

Drop an Aspirin Tablet in a glass of water. Note that BEFORE it touches bottom, it has started to disintegrate.

What it does in this glass it does in your stomach. Hence its fast action.

By Mair M. Morgan

ROAST BEEF

Roast beef may seem humdrum and prosiac but if you serve it with individual Yorkshire puddings of delicate crispness and appetizing brownness, you have something else again to please the palate of both family and guest.

YORKSHIRE PUDDING

Drippings from roast beef, 1 egg, 1-2 cup milk, 1-2 cup flour, 1-4 teaspoon baking powder, 1-4 teaspoon salt.

Use the fat from the roast beef to grease custard cups. By the time the puddings need to go into the oven the roast will be almost done and there will be plenty of fat in the roaster. Heat the cups in a hot oven while mixing the batter. Mix and sift flour, salt and baking powder. Put egg, [redacted] dry ingredients in mixing bowl and beat with a rotary egg-beater for five minutes. Pour into prepared hot cups, making the batter about 1-2 inch deep in each cup and bake in a very hot oven (450 degrees F.) for 15 minutes. Reduce heat to 400 degrees F. and bake ten minutes. Turn off the heat and finish baking. It will take five or ten minutes. When puddings are well puffed baste once or twice with drippings from the roast. Serve in a border on the platter around the roast of beef.

An easy way to handle the custard cups in the oven and for basting is to put the cups in a large shallow pan.

BARBECUED BEEF

A delicious way to cook the top of the round of beef is to marinate it thoroughly in a hot barbecue sauce and then baste it frequently during the roasting with this same sauce. The finished roast is tender and flavorsome with a distinctive savoriness that whets the appetite. Here is the recipe for the sauce. The quantities given are enough for five to seven pounds of meat.

One-half cup butter, 2 tablespoons vinegar, 1-2 teaspoon dry mustard, 1 taespoon sugar, 1-2 teaspoon salf, few grains cayenne pepper, 1-4 teaspoon chili powder, 1-2 teaspoon Worcestershire sauce, 1-4 teaspoon tabasco sauce, 1-2 teaspoon black pepper, 1 teaspoon paprika, 1 teaspoon grated onion, 1-4 clove garlic (bruised), 2 cups water.

Put all the ingredients into a sauce pan, bring to the boiling point and simmer 20 minutes. Dip the roast in this mixture, turning it to be sure every bit of the surface is coated. Put the roast into a hot oven for 20 minutes, then reduce heat and baste with sauce. Baste every 15 minutes for the first hour and finish the roast in a moderately hot oven, basting once or twice.

SPRINGTIME DESSERT

A refreshing light fruit dessert and a piece of delicious cake make a perfect finish to dinner now that milder days are here. These two cake recipes will win you new baking triumphs.

Angel Food Cake

1-4 teaspoon almond extract
(8 to 10 egg whites)
1 cup sifted cake flour
1 cup egg whites
1-4 teaspoon salt
1 teaspoon cream of tartar
1 1-4 cups sifted granulated sugar
3-4 teaspoon vanilla

Sift flour once, measure, and sift four more times. Beat egg whites and salt with flat wire whisk. When foamy, add cream of tartar and continue beating until eggs are stiff enough to hold up in peaks, but not dry. Fold in sugar carefully, 2 tablespoons at a time, until all is used. Fold in flavoring. Then sift small amount of flour over mix- and fold in carefully; continue until all is used. Pour batter into greased angel food pan and bake in slow oven at least 1 hour. Begin at 275 deg. F. and after 30 minutes increase heat slightly (325 deg. F.) and bake 30 minutes longer. Remove from oven and invert pan 1 hour, or until cold.

Note: Remove eggs from refrigerator several hours before using. They beat up lighter and more easily when at room temperature and give increased fineness of grain and delicacy of texture to angel food cakes.

Hot Milk Sponge Cake
(3 eggs)

1 cup sifted cake flour
1 teaspoon combination baking powder
⅛ teaspoon salt
3 eggs
1 cup sugar
2 teaspoons lemon juice
6 tablespoons hot milk

Sift flour once, measure, add baking powder, salt; and sift together three times. Beat eggs until very thick and light and nearly white (10 minutes). Add sugar gradually, beating constantly. Add lemon juice. Fold in flour, a small amount at a time. Add milk, mixing quickly until batter is smooth. Turn at once into ungreased tube pan and bake in moderate oven (350 deg. F.) 35 minutes, or until done. Remove from oven and invert pan 1 hour, o runtil cold.

This mixture may be baked in two lightly greased 8x8x2-inch pans in moderate oven (350 deg. F.) 25 minutes; or in 12x8x3-inch loap pan in moderate oven (350 deg. F.) 30 minutes. Or turn mixture in 36 small cup cake pans, which have been greased very lightly on bottoms, and bake in moderate oven (350 deg. F.) 20 minutes, or until done.

Orange Banana Salad
(Serves 6)

6 oranges
2 to 3 bananas
Lettuce

Peel oranges, removing skin down to juicy pulp. Cut in slices and cut slices in half. Peel bananas and slice them. On individual salad plates covered with beds of shredded lettuce, arrange alternately half slices of orange and banana slices. Center with a pat of boiled dress- and a banana ball or cherry, if desired.

Orange Nut Bread

2 cups sifted flour
4 teaspoons baking powder
1 teaspoon salt
¼ cup sugar
¼ cup shortening
½ cup finely chopped nuts
1 egg
Orange juice
1 tablespoon orange marmalade

Sift dry ingredients together. Cut in shortening. Add nuts. Beat egg; pour into measuring cup; add enough orange juice to make 2-3 cup. Combine with dry ingredients and add marmalade. Knead a few seconds on slightly floured board. Let stand in refrigerator or cool place 1-2 hour. Then bake in loaf pan in moderate over (350 degrees F.) till done—about 45 minutes.

Note: A little more orange juice will be needed with some flour to make the dough soft.

Screens for Decoration

If you are a lover of screens, the new glass ones will delight your heart. With the variety of designs painted on them, they lend themselves well to any room done in the modern manner.

One modern bedroom with white walls, white furniture and a dark blue rug has two glass screens which are decorated with vivid green, deep sea figures.

Another Victorian living room has a large glass screen in one corner of the room. It is painted with quaint little Victorian figures in pale yellow and old rose.

Slip Covers

Slip covers cost much less than upholstering and when they are tailored right, and made of new materials then can be most effective and useful. Especially for homes with children or dogs, slip covers are a tremendous asset.

Buttons

Introduce buttons where you can—they are the essence of smartness. Whether running up your sleeve or down your bodice, they will make a trim finish and lend individuality to your new spring frock.

Care of Velvet

To press the seams of a velvet dress place a hot iron up-ended on a table with a damp cloth over it. Open the seam of the velvet with the fingers, and carry it back and forwards over the steaming cloth, seam side inwards. Do not hold the fabric so tightly as to stretch out of shape.

Household Hints

To have the best success with slicing bacon, place the rind down and do not cut through it. Slice the number of pieces you desire and then cut them free from the rind, keeping close to it and avoid waste.

When you are having a number of guests to a meal and require space in the kitchen to spread out dishes for the various courses, don't forget the card table. It will hold a great deal and come in handy for extra space.

It is nice to remove the pulp of the grapefruit the evening before using and place in the refrigerator over night. Sugar it lightly before putting away. Serve in sherbet glasses the next morning for breakfast. This is very attractive for the house guest and is also economical, as one large grapefruit will serve three or four persons.

Between Try-Outs

During a lull in the semi-final round of the Sunshine dancing competition held at Conway Hall, London, some of the entrants in bizarre costumes strolled in Red Lion Square.

Sunday School Lesson

Lesson IV.—Aprin 22. Our All for the Kingdom. — Matt. 19:1-30. Golden Text.— It is more blessed to give than to receive. — Acts 20:35.

TIME—March, A.D., 30, in the closing three months of Christ's ministry.

PLACE—Peræa, the part of Palestine, east of the Jordan.

PARALLEL PASSAGES — Mark coming.

"And behold." Matthew thus indicates his feeling that an important scene is coming

"One came to him." He came (Mark 10 : 17) as Christ was leaving the house where he had blessed the little children.

"What good thing shall I do, that I may have eternal life?" By "eternal life" the young man meant endless joy, endless purity and power and satisfaction and peace

"And he said unto him, Why askest thou me concerning that which is good?" When we ask a question of another, it is well to first ask ourselves why we ask it

"One there is who is good. "None is good save one, even God" is the way Mark and Luke report Christ's utterance.

"But if thous wouldest enter into life, keep the commandments." Are there not unmistakable signs round about us that we need these laws with all their roughness—that stern, hard 'not' as it was thundered out from the rocks of Sinai?

"He saith unto him, Which?" The young ruler, like most if not all of his class, was prepared for a discussion of debated points in theology.

"And Jesus said, Thou shalt not kill, Thou shalt not commit adultery Thou shalt not steal, Thou shalt not bear false witness." Our Lord quotes from the second table of the law, relating to our duties toward men, because those commandments are more obvious, and the young ruler could be perfectly sure that he had kept them.

"Honor thy father and thy mother and, Thou shalt love thy neighbor as thyself." This commandment, which is elsewhere given as Christ's summary of the second table of the law, is from Lev. 19 : 18.

"The young man saith unto him, All these things have I observed." From my youth up, he adds in Mark and Luke. But Christ would probe far deeper.

"What lack I yet?" Out of the vague feeling of his own personal unsatisfactoriness, in spite of his moral achievement, he blurts out this question.

"Jesus said unto him, If thou wouldest be perfect." Christ pointed out the only way in which the young man could fill out the lack which he felt, making himself whole and complete in his character.

"Go sell that which thou hast, and give to the poor, and thou shalt have treasure in heaven; and come, follow me." We are to note carefully (1) that this command was for the young ruler, who was rich (verse 22) and whose riches were a snare to him; it is not for any one whose worldly goods are not a snare to his soul; (2) that this command is accompanied by a great promise, that of eternal treasure, it was only a bidding to transfer his "great possessions" to a land where he should never lose them, and (3) that this command is accompanied be a great privilege, that of following Jesus.

"But when the young man heard the saying, he went away sorrowful; for he was one that had great possessions Alas! the great possessions had him!

"And Jesus said unto his disciples, Verily I say unto you" Another of Christ's emphases, rendered most suitable this time.

"It is hard for a rich man to enter into the kindom of heaven." Wealth brings with it numberless temptations—to undue ease and luxury, to many vices, to earthly ambition, to empty vanity, to idleness or to excessive toil—which a man of modest means is spared.

"And again I say unto you." Like all true teachers, our Lord knew the value and necessity of repetition. It is easier for a camel to go through a needle's eye, than for a rich man to enter into the kindom of God." The "needle's eye" is often supposed to be the small gate for foot passengers of a large city gate.

"And when the disciples heard it, they were astonished exceedingly." Imperfect description of their blank amazement.

"Saying, who then can be saved?" The reign of the Messiah had been pictured by the prophets and rightly, as a time of great and universal prosperity; but how could that be if all but the poor were to be excluded?

"And Jesus looking upon them" His intent gaze saw their amazement

"Said to them, With men this is impossible; but with God all things are possible." All things, even this most difficult of all things, to take out of human hearts the love of this world, and its perishable contents and idle pursuits.

"Then answered Peter and said unto him." He "answered" Christ's statment that it is very hard for the rich to be saved.

"Lo, we have left all, and followed thee." They had abandoned their work and some of them had probably literally left all to follow Christ.

"What then shall we have?" We must not be too hard on Peter. The disciples at this time were very material in their ideals.

And Jesus said unto them." To all the disciples and not to Peter alone. "Verily I say unto you." Our Lord does not chide them for their worldly spirit, but gives them with great emphasis the comforting hope which he knows the will sorely need in the coming years of trial. "That ye who have followed me." Not including Judas, who was following him only outwardly. "In the regeneration when the Son of man shall sit on the throne of his glory." The regeneration is the new birth of the world, when the kingdom of heaven is fully ushered in.

"Ye also shall sit upon twelve thrones, judging the twelve tribes of Israel." If the promise was to be of any use to them in the way of comfort and encouragement, it must be expressed in terms which were familiar to them.

"And every one that hath left houses, or brethren, or sisters, or father or mother, or lands, for my name's sake." That is, for Christ, name standing in Hebrew though for the entire personality.

"Shall receive a hundredfold." In this time, Mark and Luke add, and Mark inserts the warning qualification, "with persecutions." Of course this is not to be taken literally — a hundred fathers and mothers and wives and children—but it means what the psalmist said when he testified that he had never seen the righteous forsaken or his children begging bread.

"And shall inherit eternal life." That is the crown of it all.

"But many shall be last that are first; and first that are last." In these deep words there is message of hope to all who feel themselves last, the despondent, all who think themselves overmatched in the warfare of life.

Farm Products Pay Preachers in Georgia

Atlanta, Ga.—There is more than one way to pay a preacher's salary in the southern rural districts, according to Dr. Louie D. Newton, Baptist minister of Atlanta. Dr. Newton points out the plan which has been in practice off and on for three generations in Georgia—that of each rural church member setting aside the proceeds from one acre of his land as gift to his church.

The plan is working splendidly to pay preachers' salaries and church debts and enables each person to give with what he has abundantly. Crops may be donated, or money derived from the crops, or even chickens, hogs or butter and milk. The donation in spirit and kind is, of course, purely voluntary.

THE PAPER ON THE WALL IS REALLY VERY IMPORTANT

You Make Small Rooms Look Bigger and Dark Ones Lighter by Your Choice

April's the month when the house gets a chance to blossom out in new finery. And such finery this year! The new wallpapers are creations to make even a professional paper hanger gasp with joy and housecleaning is indeed a pleasure because it gives you a chance to use some of them, writes Margaret Currie in the Montreal Star.

Whatever your individual decorating problems may be, there are the right wallpapers with which to meet them.

If you have large, sunny rooms, look at papers with dark backgrounds. If not, then consider the lighter themes that put brightness and light into rooms that are a bit gloomy. Get generous samples and paste them, one at a time, on the wall. Stand back and try to visualize how the room would look if its walls were entirely covered by that paper. Call in the rest of the family and let them help to make decisions. After all, they have to live there too.

Now Patterns

Plaid wallpapers are favorites right now — large plaids — the bigger, the better. Large dots and broad stripes are next in favor. And then there are handsome patterns of classic dignity that harmonize with period furnishings. If you desire a distinctly modernistic touch, hang the striped patterns horizontally — vertically, if you dont.

Patterned papers are being used on ceilings as well as walls. Though they must harmonize with each other the ceiling paper's pattern should be smaller. (Personally we shouldn't like this, but it is new.

If you have a small foyer with a narrow stairway leading from it, use identical paper for the hall and stairway. It gives an illusion of greater size.

Don't try to match up the wall coverings of other rooms in your home unless, of course, the archway between two rooms is so large that they appear to be one huge room.

Plain wall papers are best for tiny rooms and dark, bright colors, such as emerald green, are most popular in this category. Floral designs—tiny buttercups, forget-me-nots, gay little rosebuds, ferns and larger flowers, maybe chrysanthemums — will please the nature-loving household. If you have a penchant for things nautical, look for anchor and diminutive ship patterns.

Pastel Back Grounds

For a young daughter or the whimsical member of the family, there are pretty papers with pastel background, printed in bowknot designs.

By the magic of new wallpaper, the bathroom may be transformed into a thing of sheer beauty. Mural wallpapers are good here. (Incidentally, they're suitable for any room in the house but they are, unfortunately, too expensive for the average budget.) But it doesn't take very much paper for a bathroom and perhaps you can indulge yourself in this one room. There's nothing prettier than a huge picture of a lily pond on the wall over the tub. On the opposite wall, another piece of mural wallpaper might show a larger pond with graceful swans swimming across it.

For Father's Den

The walls of father's den, another small room, would be lovely covered with mural wallpaper too. There could be a hunting scene on one wall and fishing or camping themes on the others.

The homemaker owes it to himself to see that her "work place" is bright attractive and cheerful and nothing can brighten up the kitchen like new wallpaper. There are such pretty designs to be had on washable paper. Cream with green, white with blue, pale yellow — these are only a few of the color schemes you may use to dress up your kitchen. Paint your chairs to match the design in your wallcovering, and use a little of the paint to give your food containers a new dress. Remember you usually live with your wall papers for several years so "take time out" to consider your choice carefully with regard to your pictures, draperies, light or lack of it, furniture and rugs before you finally decide.

Be sure you're right — then go ahead.

MUTT AND JEFF—

Size Nor Color Make No Difference

News And Information For The Busy Farmer

Furnished by the Ontario Department of Agriculture.

Spring Lamb Market

Observations of the Ontario Marketing Board would indicate that too many unfinished spring lamb are being offered for sale at th Union Stock Yards, Toronto.

Of the number of spring lambs reaching the Yards during the week of April 2, it is estimated that some fifty per cent. were not properly finished, individual weights being les than thirty pounds.

If producers are to profit through the marketing this otherwise choice product, it is recommended that spring lambs be properly finished to a weight of approximately forty pounds. This can be effected only through extending the feeding period.

Seed Grain Crops Early

The importance of early seeding cannot be stressed too strongly. An experiment carried on for 10 years at the Central Experimental Farm, shows that wheat, oats, barley and peas seeded as soon as the land is ready to work, give higher yields than when sown at later dates. The average increase of grain sown early over that sown two weeks later was 14 bushels for barley, 18 bushels for wheat and 4 bushels for oats.

Registered Seed Fair

What is believed to be the first all-registered-seed fair was staged at Renfrew, Ont., recently. This competition was under the auspices of the Arnprior and South Renfrew agricultural societies and was confined to registered seed growers of Renfrew County. In all, ninety entries were received from seventy-four registered seed growers in the county. Fourteen prizes were offered for barley, sixteen for oats, ten for wheat and nineteen for peas.

More Canadian Pears Wanted

The Canadian Bartlett pear canned pack has few equals and no superior in any world market. In thatevent, there is room here for growers to increase the quantity of Bartletts and reduce production cost of commercially desirable fruit, in order to gain a more complete command of domestic requirements and to take advantage of the opportunity to export. The annual pear crop in Canada does not exceed half a million bushels, and this amount appears to fall short of the fresh consumption and cannery requirements of the country, while the difficulty with regard to the latter is due largely to a shortage of suitable varieties.

Lamb and Wood Prices

Wool prices are an important factor in maintaining lamb prices. Lamb pelts are now in the dollar range of values, and this is an essential item in reducing wholesale carcass costs. Already, as a result of more encouraging lamb and wool prices, there are many inquiries for breeding ewes. It is to be expected that there will be a broad market for all classes of ewe stock in 1934. The strong demand for wools on British, Australian and New Zealand markets indicates a very healthy condition, in so far as the outlook for 1934 is concerned. World production is estimated to be lower, and the wool market for 1934 is encouraging.

Crop Improvement Evidence

Evidence of crop improvement that has resulted from the production and general use of registered and certified seed of wheat over a period of thirty years in Canada may be observed in the relativ high yield per acre of the crop as a whole, and in the sustained high quality for milling purposes, as reflected in the premiums generally received for Canadian wheat in the principal export markets. With other cereal grains, the results are very much in evidence in those areas where oats, barley or other kinds of grain predominate. In those areas in which coarse grains form the main cash crop, the crop as a whole is traceable as a rule within a few years to pure variety seed stock. It is from those areas that the best and most uniform quality grain for commerce is derived.

Bury Corn Stubble

Any corn growers this spring can do a great deal to save himself a lot of unnecessary hand-picking of corn stubble if he will use care and forethought in his method of dealing with his corn field," states L. Caesar, provincial entomologist. "If he plows the field carelessly and does not bury the stubble well, he is sure to drag it up in working the soil, and so will have alot of handpicking. Also, if he uses a toothed cultivator instead of a disc he will drag up a lot of stubble. In every county there are many men who deal with their fields in such a way that they rarely have to do any hand-picking. What one man can do another can often do as well, or nearly as well. So it is hoped that every one will try to exercise the necessary care this spring, and so save himself a lot of trouble in complying with the act."

Current Crop Report

Reports received from the Agricultural Representatives would indicate that the condition of fall wheat in Ontario is still in doubt. Certain sections report that the crop is greening up but a great many of the roots are weakened, and unless the weather is favourable, a considerable area will have to be cultivated and resown to spring crops. Farmers who are dependent on 1932 seedlings for heitr hay crop will be obliged to rely on annual hay crops. At auction sales prices are cnsiderably improved over last year, especially prices paid for horses. Maple syrup will apparently be a light run as the reports from practically all the maple syrup districts show a decrease in production.

Canadian Asparagus Outlet

Canadian growers of asparagus with suitable production conditions and conveniently situated for delivery may well study the possibilities of this crop, for some of the Canadian canners have found Canadian asparagus to be much superior to the Californian product. Consequently, there has been a very satisfactory demand, which has resulted in plans to expand output to a considerable extent. Although the acreage and yield of asparagus in Canada is relatively small, the latest figures show an increasing acreage during the past three years in Quebec, Ontario and British Columbia while at the same time the output of canned asparagus shows considerable expansion. There is also an increasing export market The yield of some 1,000 acres in Ontario is from 1,800 to 3,000 pounds per acre, approximately about 2-3 of the yield being sold ordinarily to canners at 8 to 11 cents a pound.

The Coddling Moth Has Not Been Wiped Out

Reports have been published recently to the effect that in Ontario apple orchards the codling moth was eradicated or reduced to insignificant numbers by the low winter temperatures. This is far from being the case in the Niagara district. An examination of overwintering caterpillars (786) made in a Vineland orchard this week indicates that codling moth mortality is only in the neighbourhood of 20 per cent. In other parts of the province, where much colder temperatures were experienced, the mortality will run much higher, but we feel reasonably certain that in all Ontario apple orchards sufficient larvae will have survived in sheltered spots to necessitate the application of the sprays outlined in the Ontario spray calendar.

Timothy Seed Production

Domestic production of timothy seed in Canada is still far short of consumption, so that still further production of this crop may be encouraged. Timothy ordinarily yields from 200 to 300 pounds of seed per acre, and growers have received on an average about 6½ cents per pound for the seed basis No. 1 grade, over the past three years. Canada uses annually about 10 million pounds of timothy seed, and until 1931 some 9 million pounds of this was imported from the United States. Domestic production since 1931 has been greatly stimulated by educational activities and the prospect of a large domestic market. As a result, production increased from less than a million pounds to some 5 million pounds in 1932, but declined considerably in 1933, due to unfavourable weather conditions.

Blood-Testing of Cattle

R.B. Faith, Director of Extension for the Holstein-Friesian Association of Canada, who was the guest speaker at the annual spring meeting of the Perth County Holstein Breeders' Club at Stratford said that blood testing for the control of Bang's disease has been making remarkably good progress in many pars of the province of Ontario since the work was first taken on by the breeders in a serious minded way more than a year ago, and he predicted that before long every large breeding area would be engaged in it. Already nearly two hundred herds had been found fully negative under the Federal policy, while a much larger number were under process of being cleaned up. The view was expressed by Mr. Faith that the day was not far distant, when breeders whose herds were not under test, would find it more difficult than happens to be the case at the present time, to obtain markets at profitable prices for surplus cattle which had to be sold, whereas those herds free of the disease would occupy a most favorable position in being able to capitalize on their achievement.

NOTICE TO CREDITORS

ESTATE OF HARMON HAYUNGA BARKLEY.

NOTICE IS HEREBY GIVEN pursuant to Trustees Act that all parties having claims against the Estate of Harmon Hayunga Barkley, late of the Township of Williamsburg, farmer, who died on or about the 6th day of March, 1934, are required on or before the 10th day of May, 1934, to send or deliver to the undersigned, Solicitor for Henry Barkley, Executor, full particulars of their claims duly verified.

AND FURTHER NOTICE is given that immediately after said last mentioned date, the assets of the Estate will be distributed among the parties entitled thereto, and having regard only to the claims of which the said Executor then has notice.

DATED at Morrisburg this 11th day of April, 1934

ARTHUR FLYNN.
Solicitor for Executor.

NOTICE TO CREDITORS

ESTATE OF WILLIAM JAMES MULLIN.

NOTICE IS HEREBY GIVEN pursuant to Trustees Act that all parties having claims against the estate of William James Mullin, late of the Village of Morrisburg, gentleman, are required on or before the 10th day of May, 1934, to send full particulars of their claim duly verified to the undersigned. Solicitor for Altha J. Mullin, Executrix.

AND FURTHER NOTICE is given that immediately after said date the Assets of said Estate will be distributed among the parties entitled thereto, having regard only to the claims of which the Executrix shall then have notice.

DATED at Morrisburg this 11th day of April, 1934.

ARTHUR FLYNN,
cc Solicitor for Executrix

SOY BEANS IN DUNDAS COUNTY

In 1930, Mr. Thos. Allen of Chesterville grew two acres of Soy Beans—one acre for hay and one acre grain. Since that time, soy beans have been grown, in a small way it is true, by at least ten farmers of Dundas County. Without exception, all of these men have a good word to say of the crop.

Last year was an exceptionally good year for soy beans, and Mr. Ross Durant of Winchester, who had an acre of hay, cut over 4 tons to the acre, and Mr. Ezra Bryan of Mountain cut 3 tons to an acre. Aside from the yield, soy bean hay excells all other roughages from the standpoint of nutritive value. It contains 11.7 p.c. of digestible crude protein, which is higher even than second cut alfalfa, which runs about 11.2 p.c., and much higher than first cut alfalfa, which averages around 9.3 p.c. Stock do not have to learn to like it, they like the first mouthful. In fact, Mr. Allen, who has grown the crop continuously since 1930, says "an animal would have to be pretty badly off feed to refuse soy bean hay". The average yield throughout the province last year was two tons per acre.

Soy beans give the best results on fertile loams, any good corn land is suitable for soy beans, and the crop will often succeed on land that is often too wet to grow corn.

Weeds are probably a little bigger problem with this crop than others, for that reason the soil should be well prepared, if possible worked up and the dirt given a chance to start, then worked up again. If the crop is intended for hay, about 1 1-2 bushels to 1 bushel and 3 pecks per acre is sown, using every spout of the drill.

Care must be taken, especially if the soil is mellow, not to get the seed too deeply planted. The depth of planting should not exceed two inches.

Inoculation of the seed before sowing is probably more important with soy beans than with clovers owing to the fact that the crop is now on most farms.

The last week of May would seem to be about the best time for planting in Dundas County. Just before the plants appear above the ground, or after they are well up it is always good practice to go over the field with a light harrow. Some plants will be pulled out, but the control of weeds will more than compensate for this. They should not be harrowed as they are breaking through the ground, but rather before or after they are well up. Some of the best growers harrow twice, just before they come through and then again when well up.

The proper stage for cutting as a hay crop is when the pods have reached half their normal growth, and the lower leaves have begun to turn yellow. Later cutting will result in heavy loss of leaves and woody hay. Usually this is along about the last week in August. The hay is cured the same as legume hay, 3 or days in the coil is usually sufficient.

When sown for seed, about 45 pounds per acre is applied, using every fourth spout of the drill, leaving the rows about 28 inches apart. In addition to harrowing, weeds should be kept under control by use of scuffler or cultivator. When the pods are nearly all ripe, and about 95 p.c. of the leaves have fallen, the crop may be cut with the grain binder, stooked in the field, and handled like any other grain crop. Care must be exercised in threshing soy beans, owing to their being easily split. The ordinary grain thresher is satisfactory providing the speed of the cylinder is reduced to half the speed of that required to thresh cereal grains, and the speed of the remainder of the machine maintained. The average yield of seed in Ontario is around 20 bushel per acre.

Soy bean is in a class with linseed meal as a stock feed. It carries around 33 p.c. digestible crude protein, and 16 p.c. oil. Owing to its high oil content, it should not be fed to market hogs, but all other classes of live stock do well on it. Owing to its oily nature, the seed is difficult to grind alone, but the difficulty is readily overcome by mixing with other grains.

Soy beans make a satisfactory soiling crop to be cut and fed green in mid-summer. Because of their high palatability, stock clean them up without any waste, and their high protein content makes them especially valuable for dairy cows.

The best variety for Ontario conditions is O.A.C. No. 211 and fortunately this variety is also the easiest to obtain.

MORRISBURG-WADDINGTON FERRY TO U. S. A.

New Standard All-Year Time Table
DAILY, EVERY 5 MINUTES
From 6.00 a.m. to 12.00 Midnight
CONTINUOUS SIGNAL SERVICE
The Fastest and Only Full-Year Five-Minute Service across the St. Lawrence, not excepting bridges or other ferries, from the Gulf of St. Lawrence to Lake Ontario.
RATES—Motor Car, $1.00; Passengers, 25c each; return free on the same day. No extra charge, Saturdays, Sundays or Holidays.
GEORGE D. HOWITH,
Vice-President & Managing Director,

FACTS ABOUT HYDRO — *No. 3 of a series of official announcements by the Ontario Municipal Electric Association, representing the Municipalities who own the Hydro-Electric System of Ontario.*

ONTARIO MUNICIPAL ELECTRIC ASSOCIATION

Why Hydro Buys Power

Hydro has always obtained its power supplies from whatever source has, from time to time, been determined to be most economical.

In the earlier years of Sir Adam Beck's administration, 98% of the power distributed to Hydro municipalities was purchased from private sources. Then it became economical to build or acquire generating stations. At the present time Hydro owns forty power-producing plants.

Power demands must be provided for—years in advance. The Commission was prevented, by international and other circumstances, from further development of Ontario's large power resources on the Niagara, St. Lawrence and Ottawa rivers. The only economical course left was to purchase—as the Commission did—low-cost power from available sources.

The following table sets forth the growth of your great Hydro undertaking through the years:

Growth of Municipalities and Consumers Served and Electric Power Generated and Purchased

Period	Average Number of Municipalities	Consumers	Peak Demand All Systems	Power Generated Horsepower	Per Cent.	Power Purchased Horsepower	Per Cent.
1910 to 1914 Incl.	45	77,853	91,338	1,863	2	89,475	98
1915 to 1919 Incl.	205	175,702	325,046	242,634	75	82,412	25
1920 to 1924 Incl.	345	343,280	769,952	726,867	94	43,085	6
1925 to 1929 Incl.	528	486,521	1,163,744	960,193	82.5	203,551	17.5
1930 to 1933 Incl.	728	603,880	1,514,040	974,084	64.3	539,956	35.7

It is the considered opinion of this Association that Hydro has pursued a cautious, business-like, and far-sighted policy in the purchase of supplementary power and that present power reserves are not excessive.

The general policy of the Commission respecting purchased power has been initiated with the approval of the municipalities and endorsed by the Hydro associations. These Hydro municipalities know the power requirements, and are obligated to supply the ever-growing demand for low-cost Hydro service in their respective districts.

ONTARIO MUNICIPAL ELECTRIC ASSOCIATION

BRINSTON

The regular meekly meeting of Brinston Y.P.S. was held last Friday evening in the basement of the church with a good attendance. From 7.30 till eight o'clock a singsong was enjoyed by all who took part.

The meetitng opened with hymn "Faith of our Fathers Living Still," after which Dorothy Wilson lead in prayer. The scripture reading was given by Miss Jean Clark. The offering was then taken. Stuart Adams gave some interesting current events, and Henry Capener favoured the group with a solo. The minutes of the last meetitng were read and approved. The roll call was answered by the name of a favorite book and its author. The hymn "Guide Me, O Thou Great Jehovah" was then sung. Papers prepared by Mrs. Douglas Hanson on "The Literary Heritage of England" were read by Dorothy Wilson, Denzil Locke and Ruth Wilson. The meeting closed with the hymn, "Blest be the Tie that Binds."

The group then took part in some games, under the direction of Brooks Hanes. Following this a lunch was served by the refreshment committee under the direction of Miss Beulah Strader.

"How I got Rid of Sleeplessness"

Mrs. Alex. Dupuis, R.R. No. 1, Renfrew, Ont., writes:—

"Some years ago I became completely run down, was unable to do my own work and could not sleep. I used Dr. Chase's Nerve Food with such splendid results that I was soon much stronger, able to do my own work, sleep well at nights and get up in the morning rested and refreshed."

CANADA

Murder Ratios.

—Murder is safer in the United States than in any other country on the globe which makes any pretense of civilization. The murder rate of 1932 in England and Wales was 0.5 per 100,000 of population! But in 108 representative American cities the murder rate last year was 10.5 per 100,000 persons. Chicago bumped off her citizens at the rate of 12.8 per 100,000. Detroit did almost as well, or badly, with 9.6 per 100,000. New York furnished the morgue 8.0 in every 100,000.—Brandon Sun.

* * *

Sidewalk Episode.

—It happened on King street east at the noon hour.

A lanky boy of about 13 years, trundling a bicycle through the maze of sidewalk traffic and very red in the face shouted: "Hey, lady; hey, there" to a woman a few paces ahead and with whom he apparently had been for some time intent on catching up.

In that wondrous, weighty work by Emily Post, the chapter, Sidewalk Salutations, makes no mention of "Hey lady; hey, there," as an approved form of greeting, when a young gentleman has occasion to address a strange woman, but even that stickler for niceties would put the seal of approval, we think, on the subsequent conversation.

"Gee whiz, lady," said the boy, "you should be more careful about your dough. You're dropping money all over the place. You dropped a half-a-buck back there about a block away. And here's some more I picked up, too."

The clasp of the handbag of "Hey, lady" had come unfastened, it seems, and an observant boy with a pair of widely-spaced eyes had noticed the occurrence and appointed himself guardian, pro tem., and chief pick-up-after.—Hamilton Spectator.

* * *

Laws of Chance.

—Card players who are continually bewailing their ill-luck of always receiving the same poor cards, will, perhaps, be reassured by knowing that the fifty-two cards, with thirteen to each of the four players, can be distributed in 53,644,737,756,488,792,839,237,440,000 different ways, so that there would still be a good stock of combinations to draw from, even if a man from Adam's time had devoted himself to no other occupation than that of playing at cards.— Prairie Farmer.

* * *

Or a Kind Providence.

—An actuary finds that singers as a whole do not live as long as other persons. We can only attribute it to the generally keen sense of justice—Kingston Whig-Standard.

* * *

Decline in Manners.

—The decline of manners has become clearly marked during the past few years and is by no means confined to the one sex. Ordinary politeness and civility have departed from the masses and their exercise is, apparently, something to be forgotten rather than promoted. It is now regarded in many quarters as the smart thing to be impolite and rude, and the influence of the home and the school, which has fallen down in so many other things, is equally negligible in this regard—Brockville Recorder.

* * *

—A writer submits that people should not applaud in the middle of a speech. Certainly not; it just encourages the speaker to continue—Regina Leader-Post.

* * *

Wages of Crime.

—It was an unhappy phrase which described a couple of gun-men as having "ten successful gas-station holdups to their credit." Still less defensible was the statement of the counsel for one of them that "with the exhaustion of his savings he was forced to crime for a livelihood."

Men are not forced to crime for a livelihood under present conditions in Ontario. Many do take to crime because they consider it an easy way to a soft existence. But the way is not easy, and the wages are hard.—Toronto Teegram.

* * *

Good for the Apples.

—The unusually severe winter weather that is just passing and that will long be remembered as one of the outstanding features of 1934, has been of singular benefit to Canada in at least one respect. It has wiped out the threat of a moth plague in the apple orchards of Ontario. This plague it was feared would ruin the crop this year. In 1932 some of the more dangerous moths that infest apple orchards had developed to menacing proportions. The coddling moth alone took about half the normal yield. The intense cold of the past winter is said to have killed this pest and thus relieved the orchards of a menace for a period of years, perhaps four or five.—Toronto Mail and Empire.

* * *

Learning to Fly.

—After only three hours instruction an English youth gave such evidence of mastery of an airplane that he was permitted to make his first solo flight. At another fling school a girl of 15 is leisurely taking lessons because she is too young to be granted a certificate as a pilot, but when she qualifies she means to run her own 'plane as a sort of taxi service.

Flying a 'plane after three hours instruction! How many motorists ventured out in a car alone after only three lessons of one hour each? Some people take weeks to learn and some renounce the attempt altogether. And during the first attempst there are bent fenders and damaged garages.

We speak from experience!

—St. Thomas Times-Journal.

* * *

The Sun Will Shine Again.

—The winter soon to be buried with flowers and sunshine has the name of being the longest, the hardest, the steadiest, the coldest, the meanest winter in the history of the North. There are actually people in this country who began to despair of it ever passing away. Yet it is now on its way. The sun will soon be shining; the fish (in the waters) will soon be biting; the birds will be singing; the flowers will be blooming; and life will be felt to be worth living even for the downcast.—Timmins Advance.

THE EMPIRE

On the Spot.

—The police of Prussia have had their powers enlarged. They have now the right to fine traffic offenders on the spot. The pedestrian who crosses a traffic thoroughfare diagonally will receive from the police officer who detects him brief instruction, and will have to pay a fine of 50 pfennigs. The cyclist who infringes the regulations will have to part with a mark. The motor car driver who makes excessive use of his horn, who parks his car where he should not, whose number-plate is illegible, whose lamps are not lit, or whose exhaust emits too much smoke, will be similarly instructed in traffic law and must pay for the information. Habitual offenders will have their vehicles taken from them and will have to make their further way afoot, their vehicles being reclaimable after a lapse of time and against payment of a large fine.—Glasgow Herald.

Needed by a Parson.

—On a card in a church in the City of London is to be found the following list of qualifications said to be needed by a parson:—

The strength of an ox.
The tenacity of a bulldog.
The daring of a lion.
The patience of a donkey.
The industry of a beaver.
The versatility of a chameleon.
The vision of an eagle.
The meekness of a lamb.
The hide of a rhinoceros.
The disposition of an angel.
The resignation of an incurable.
The loyalty of an apostle.
The heroism of a martyr.
The faithfulness of a prophet.
The tenderness of a shepherd.
The fervency of an evangelist.
The devotion of a mother.

—Belfast Weekly-Telegraph.

Oil in Britain.

—Recent borings have apparently raised hope of ultimately profitable workings in British oil fields, and the Government has quite properly decided to take control of the whole business if and when serious discoveries are made. This is a wise move. The history of the American oil fields is a sufficient warning to protect such an important source of national wealth from the tender meries of private enterprise, and the Government is to be congratulated in this matter on its vision and courage.—London Referee.

Farming In Britain.

—Now is the time to make the effort to improve the quality of our production, for farmers are in a progressive mood, and the agricultural planning already achieved.....has caught the imagination of the public. We are rebuilding agriculture on the threefold base of better production, better processing and better marketing, and while the new structure rises we are sheltering it from the blasts of insensate dumping with the shield of tariffs and quotas. But it is upon better production that the safety of the whole structure ultimately depends. Unless we can give the consumer the service of quality and cheapness that is due to him, all our marketing schemes will come to naught, the best intentions of the processers will be frustrated, and neither tariff nor quota will give the home producer the benefits he has not earned.—L. F. Easterbrook in The Nineteenth Century (London).

New Zealand Trade with Canada.

—Under the treaty the New Zealand dairy trade has no promise. It is fairly definite that New Zealand has no prospect of securing a butter market of any consequence in Canada for some considerable time. The treaty, however, has been of great aid to the wool industry. Formerly free all round, wool entering Canada is now free only to Empire countries. As a result there has been a great improvement in the direct trade from New Zealand, and without such a benefit, skins and hides have also gained a better market. In the circumstances New Zealand may congratulate itself. —Auckland Weekly News.

Executed With Will In Hand

This amazing photograph, taken in secret, shows Koloman Wallisch, Styrian defence leader, executed for his activities during the Austrian civil war. With his will in his hand he is seen in the jail courtyard at Loeben, Austria.

Women Teachers and Marriage.

—The University of Capetown has done the right thing in removing its ban on women who want to lecture though married. There is no reason why a woman who has been appointed to a particular university post because of her eminent suitability for it should be dismissed merely because she has taken a husband unto herself—or vice-versa. It may happen in special cases that she gradually becomes less eminently fitted. University teaching is a 24-hour-a-day job. The mere lecturing is nothing compared with the perpetual reading and research which is necessary for a giver of education to keep abreast with ever-widening knowledge. If a woman on marriage neglects her university work then she must expect to be superseded on the ground of inefficiency. But that is not likely to happen with the vast majority of women who wish to pursue an academic career and who work more for love of their subject than for the gain.—The Cape Argus (Capetown).

Diet Affects School Marks

May Explain High or Low Standing of Pupil

Chicago—A child's diet may explain the reason for the high or low marks he receives in school, according to the deductions of Drs. Seigfred Maurer, nutritionist, and Eva Ruth Balkan, psychologist, both of the University of Chicago.

Low grades may result from a deficiency in the diet and if given foods rich in Vitamin B-Complex the child will learn more quickly.

The statement is based on the results of tests made by the experimenters with 46 pupils of primary grades. The children tested were under-nourished and selected from poor homes where the parents were unable to supply proper food. The doctors gave the children vitamin B-complex tablets with their lunch, the chief meal.

The children were tested mentally before the tablets were administered, and then every thirty days. All showed a marked improvement in intelligence after the treatment.

Vitamin B-complex is protection against pellagra and beriberi, diseases affecting the nervous sstem. The vitamin is contained in milk, lean meat, east, eggs, green leafy vegetables and whole wheat.

Farm Population Reaches New Peak But Exodus Grows

Washington—The number of individuals living on farms reached a record peak of 32,509,000 on Jan. 1, 1933.

The Bureau of Agriculture Economics, in a new study of farm population, attributes the increase principally to an excess of births over deaths, since more people left farms for cities, in 1933 in a continuation of the farm exodus of the past decade than went from cities to farms.

The number of persons who moved to farms last year who 951,000, while 1,178,000 moved away. The farm-bound movement involved 1,544,000 persons in 1932 while those moving away numbered 1,011,000.

Comment by farmers stressed re-employment in urban industries and temporary employment in work-relief projects as major reasons for the increased movement from farms to cities.

New Traffic Laws In Old Country

Britain Seeks to Reduce Highway Fatalities

London, Eng.—Along with figures showing that 7,000 persons were killed in highway accidents in Britain last year the government published its new road traffic bill, designed to meet the increasing problem of road safety.

The fatalities increased from 6,667 in 1932 while the number of injured rose from 206,450 to 216,328 and accidents from 184,006 to 191,782. The increases were all in England and Wales, Scotland's figures remaining stationery.

One feature of the new bill is the re-introduction of a fixed speed limit of 30 miles an hour in urban areas, these being designated as areas where a system of street lighting is maintained. Lower limits apply to motor trucks and they are required to carry a special colored disk for identification.

New applicants for driving licenses must pass a stiff test of competence but on the other hand pedestrians failing to comply with regulations are liable to a fine. Authority is given to prescribe street crossing places for them.

If the bill does not succeed in reducing the toll of accidents, then more stringent measures will be used, it is intimated.

Haileybury Heroine Dies in Ontario

Josephine Kennedy, Inspector Of Mother's Allowances Performed Many Deeds Of Courage

Sudbury.—In the sudden death at Thessalon of Miss Josephine Kennedy, inspector of mothers' allowances Northern Ontario has lost a heroine of the Haileybury fire of October, 1922.

Amid the terror and confusion that prevailed during the holocaust, Miss Kennedy delivered a baby in an empty house which the flames threatened to devour.

She had spent a whole night in Lake Temiskaming when through the smoke she heard a voice crying from the shore, "My God, will no one do something for my wife?" Miss Kennedy, a nurse with a war record, went to the woman's side. As the flames crackled fiercely, she gave all the assistance possible.

Miss Kennedy glanced through a window and hope replaced the despair in her heart, for the flames of a burning telegraph pole just outside were blowing away from the house. The wind had changed and the new born baby, its mother and the heroic nurse were safe. So grateful was the mother that she called her baby boy Kennedy Edwardson.

The courage with which Miss Kennedy carried on in her difficult position with the mother's allowance board for the Sudbury, Thunder Bay and Sturgeon Falls district, and the hardships which she encountered, were perhaps less well-known since the nurse was prone to minimize the arduous features of her work. Her friends related how, all alone, she would drive a dog team through the lonely bush to visit an isolated family or walk along unfrequented paths to make possible speedier relief for a family in need.

Essex Wheat Acreage Set at 100,000

Toronto—The Ontario department of agriculture in its weekly crop report indicated mixed prospects for wheat in the province but reported good sales of horses in some quarters. Damage to orchards was reported from some districts.

The department reported in southern Ontario Essex County has 100,000 acres of fall wheat, almost twice as much as usual and that it appears all will survive the winter. In Brant, it said, many farmers reported damage to last year's seeding and that some damage had been done to orchards and raspberries.

In Lambton County, it said, there has been good demand for horses and Michigan institutions have taken numerous two-year-old fillies and breeding mares at good prices. In Lincoln, it reported, slight bud growth made it difficult to obtain an estimate of winter damage to orchards.

In the central part of the province Hastings County reported prices for horses at $125 to $150 a head with good demand.

The report said 25 per cent. of cattle herds in Frontenac County were in poor condition and that some losses were expected. It mentioned heavy losses among pigs. Feed supplies for cattle were reported low in Carleton County.

Throughout the northern parts of the province snow continued to cover the ground, affording good protection for grain in most instances.

Lady Aberdeen Will Carry on Pub'c Work

Former Governor General of Canada Remained a Liberal to the End

Declaring she would carry on her public work as before the death of her husband, the Marquess of Aberdeen, one time Governor-General of Canada, Lady Aberdeen revealed in her bereavement the affection and loyalty which was the foundation of the life partnership of "We Twa."

" I won't be long after him," said Lady Aberdeen to a representative of The London News Chronicle. Her husband died as he wished to die—working to the last, she said.

Lord Aberdeen was buried in the family interment ground at Haddo House "among his ain folk—he always wanted it that way." The coffin was made at Haddo House from the beech trees on the estate and it was lined with the Gordon tartan.

Change Your Face if You Don't Like It

You Can Get a New One Through Plastic Surgery —If You're a Woman

New Orleans.—Why not be pretty if you aren't and want to be? If you don't like the face you have today you can get a new one through plastic surgery, says Dr. J. Howard Crum, a New York surgeon.

The process bears its reward, Dr. Crum told the annual convention of the American Cosmeticians Association here.

Once, he said, he was rewarded with a forced hug around the neck and a dainty kiss from a former New Orleans girl whose homely countenance he had transformed into beauty in a public demonstration of his art.

Then a similar facial operation made a Tampa, Fla., woman more beautiful than the blonde woman she told the surgeon had "vamped her husband" and his affections were won back.

Again a woman who had been a penitentiary inmate for 20 years sought his aid to remove her "hardened face" that she might not be recognized in the operation of a beauty parlor. It worked and his patient "went straight."

But this surgeon said he now confines his practice to women. Once he changed the face of a man after he had been assured that the police had nothing against the patient, but the man within three months was picked up with a set of burglar tools.

Jewelled Manicure Of Precious Stones To Match the Gown

New Orleans.—Miss 1934 will wear jewels on her fingernails, multiple curls in her windswept coiffure and at the same time using harmless tints to change from blonde to brunette, or vice versa, according to her mood.

So say the members of the American Cosmeticians Association attending their annual convention here.

Revealing beauty secrets, the visiting beauticians announced that the supreme sensation among the year's innovations is the new jewelled manicure with precious stones. Harmonizing with the gown, in the centre of each fingernail.

For the coed, it will be to sport her college pennant on her thumbs at the more important athletic events, and in the evening she will match her gold or silver eyeshadow with nail polish of the same color.

There are hair tints to match every gown, from Chinese rust to starlight blue and the coloring, according to the beauticians, will wash out with the morning tub.

Women Throughout Ages Have Achieved Important Reforms

Calgary Women's Club Told to Study and Organize for Peace

There is no value in study of peace without conviction that peace is the one goal to be desired in the opinion of Bishop L. Ralph Sherman, of Calgary. The question cannot be settled in study groups alone, he told the Women's Canadian Club at a meeting called for organization of groups for a program as outlined by the League of Nations Society in Canada.

If another war came would you be brave enough to withstand its hysteria, its so-called 'romance' and stand firmly against the tide of feeling if it were against you? His lordship asked his audience.

Following the bishop's challenge, Mrs. E. J. Thorlakson said women throughout the ages had achieved great reforms. In the difficult times of 1934 Canadian women could learn to think for themselves and not merely accept a traditional [illegible] on such questions as world [illegible].

They could study and organize for peace. They could make it a living cause, for which to work unceasingly. They could join hands with the women of the United States to make the women of North America a vital force for peace in the world.

Higher Education For Non-College Youths Planned

Ontario Teachers Seek Broadening of Course For Older Pupils

Toronto. — Teachers of primary, secondary and special schools and of colleges, with trustees and ratepayers to the number of nearly 3,000, gathered here recently to secure assistance in their work, and to try to further the task of resolving the educational system of Ontario into a process of practical value to the youth of the country.

One forward-looking suggestion arising from the provincial council of the Ontario Second School Teachers' Federation is that for modification of the high school curriculum to enable the giving of greater attention to the needs of pupils who do not intend to enter university and who will probably leave school at the end of two years. The matriculation is regarded as the standard for obtaining a position in business and industry, but the suggestion is that a campaign of propaganda be undertaken to induce parents to permit children to enter the proposed course.

If the department of education of the province is willing to establish this course, it is proposed that it appoint one person for a year previously to popularize the course. He would do this by means of inspiring articles and by addressing various interested public bodies, to the end that the employer will not expect an applicant for a position to have matriculation standing.

The proposed course is for two years, but third and fourth year training for pupils able and willing to go on is provided.

Phobias Due To Former Experience

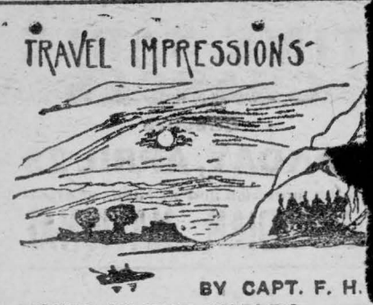
Horror of Blood, Revulsior From Cat's Fur, Dislike Of Some Foods

Montreal. — If you dislike certain foods, recoil from the feeling of the fur of a kitten, shudder at the sight of blood, or have other reactions not based on the intrinsic merits of the thing reacted to, the reason can generally be traced to some previous experience connected with the situation of the moment, according to Miss Mary Sandall, psychologist of New York, who addressed the Montreal Women's Club.

Uncomfortable reactions such as these might be resolved if one could discover the connection between the emotion and the experience that gave rise to it. For example, Miss Sandall explained, a woman who disliked bananas, and continually refused to taste them, was probably influenced by what is known as a "conditioned reflex" built up through having been made ill by eating an unripe banana when she was a child. If she could recognize the reason for her reaction and eat a good banana she would break her dislike to that fruit, the speaker said.

Describing the way in which attractions begin, she said, a baby has not an innate love for his own mother, and would learn to love a nurse or an aunt just as much if in her care.

The baby's body is a mass of nerve ends, and patting or stroking, consequently elicits a coo or laugh from the infant. This is the material out of which all love is made, she said. The child cuddled and petted too much may have difficulty in later life as he may not receive the same sort of affection



BY CAPT. F. H.

SIGHTS IN THE WORLD'S CAPITAL.

LONDON — that magic word—in spite of fluctuations of trade and commerce, is still centre of things. It is by far the largest city in the world, having an area of 443,455 acres and a population of 8,202,818 in 1931. This shows an increase of over 700,000 since the census of 1921. London is the political and commercial capital of the British Empire and is, in some respects, the most fascinating city in the world—why this should be even those who love it best are unable to tell. Tradition, history and the glamor of old things are in its very atmosphere. The conservatism of a city that knows its importance and maintains its pageantry and old customs, observed even down to the meanest denizen of the streets, is, perhaps, one of its attractions.

I am not going into the history of London, nor am I going to describe places and things everybody reads about. This article will deal with human interest happenings and may be continued in next week's issue.

Street Scenes.

The sights of the London streets are too many for one article to enumerate. The flower girls—old women, bonneted and shawled, sitting behind their baskets full of luxurious and colorful blooms, chiefly at Piccadilly and Oxford Circuses; the silk-hatted gentlemen who, selling racing tips, remove their black eye-masks and fade away into the passing throng on the approach of a "bobby"; newspaper vendors who, either stand at corners with the glaring posters, supplied by the papers, beside them on the walls or railings, or else display these posters on a wire rack in front of them and attached to their shoulders; the natty little uniformed messenger boys; the street vendor, demonstrating and selling his mechanical toys—these are all common sights of a London street.

Street Musicians.

Almost every type of instrument and every kind of voice is to be heard on the streets of London. Sometimes a group of disabled men, playing brass and wind instruments, in the fashion of the German band of olden times on our city streets, will be seen slowly marching along the roadway, two of their associates soliciting contributions; the hurdy-gurdy is a common sight; individual singers, accompanied by an accordion or a small street organ are frequently seen; the queues which line up in front of the gallery entrances at the popular theatres find entertainment, during the period of waiting, by all types of jugglers and musicians.

One night, last summer, while walking down Regent Street, I was attracted by the sound of a flute, beautifully played. Coming to a corner I was surprised to find that the musician was a young girl who played the most difficult selections with artistic skill. As I stopped to listen to her, an obliging taxi driver came over from his cab—parked in the centre of the street—and told me that the girl musician was also the possessor of a very fine voice. One afternoon, coming from the Caledonian Market, I encountered a one-man band: with a mouth organ, attached to him in such a way that he had the free use of of his hands, an accordion and set of [illegible]ms, cymbals and triangle, operd by a foot paddle, he was creatquite a din. Sometime one might a shocks, such as I did one day. nding idly by the curb, watching ple and things go by, I was start- by a loud, raucous voice bellow- almost in my ear. One of these ging singers had suddenly decided make his stand at this particular t and, with no other preparations, n throwing his hat on the side- k, he had started operations.

Sidewalk Artists.

All over London you will find sidewalk artists who either sit against church or garden railings and display their drawings—in chalk, water colors or oils—to the passerby or make their sketches on the flag-stone sidewalk. These latter sketches are made with chalk of various colors and are often quite artistic. Of course they have to be renewed each day and when the work in finished, the artist will patiently sit beside it and mutely solicit the pennies which are thrown into an upturned cap on the sidewalk in front of him.

Some of these pavement artists are philosophers. Here are three sayings which I copied from the sidewalk, near Cleopatra's Needle on the Thames Embankment:—

A tombstone always has a good word for a man when he is down.

There is no mistake so great as being always RIGHT.

A man who never made a mistake never made anything.

The Charm of London.

I have a song at home, in which is this line, "London is a big place — lots of people in it." I am sure that the charm and attraction of this or any other city does not lie in its buildings, although, in the case of London, the buildings themselves intrigue the visitor. To me the people are the most interesting feature of this tremendous place and human nature is exemplified in all its variety to a greater extent here than any other place that I have visited.

THE BRITISH ISLES.

England, Scotland, Ireland and Wales—just think of visiting them for the first time, or, if you have been there before, think of renewing your previous experience.

It is worth while to build up an estate of memories for the future: it is worth while DOING IT NOW.

Captain Reid's all motor, all British tour sails on the "Empress of Australia" on June 21st. You can take 31 days, 45 days or continue on the whole trip for the 52 days.

It costs nothing to enquire—it is a wonderful opportunity.

Or, if you want to go to the Continent or the Passion Play, there are seven itineraries available, ranging from 27 days to 57 days and in price from $341 to $778.

Write to Captain F. H. Reid, C. P. R. Building, Toronto, or telephone WAverley 6646.

RHEUMATISM GOES WITH EXCESS FAT

Both Banished by Kruschen

When one realises that the cause of overweight is closely associated with the cause of rheumatism, it is easy to understand how it is that the two troubles can so easily be overcome by the same remedy.

The experiences told in the following letter are typical of those of many other sufferers:—"I first started taking Kruschen Salts for rheumatism in my ankle joints. Being rather stout, I thought perhaps they would remedy both troubles, and you cannot realise how surprised I was with the effect. I don't feel anything of my ankles now. And not only that—my weight has reduced 19 lbs. in just three weeks. I am still reducing, and yet I eat what I like, and I feel a different woman in every way."—(Mrs.) B.

Gently, but surely, Kruschen rids the system of all fat-forming food refuse, of all poisons and harmful acids, which give rise to rheumatism, digestive disorders and many other ills.

A SIMPLE QUICK WAY TO RELIEVE ACID STOMACH

HERE ARE THE SIGNS:

Nervousness	Frequent Headaches
Neuralgia	Feeling of Weakness
Indigestion	Sleeplessness
Loss of Appetite	Mouth Acidity
Nausea	Sour Stomach

Auto-Intoxication

WHAT TO DO FOR IT:

TAKE—2 teaspoonfuls of Phillips' Milk of Magnesia in a glass of water every morning when you get up. Take another teaspoonful 30 minutes after eating. And another before you go to bed.

OR—Take the new Phillips' Milk of Magnesia Tablets — *one tablet* for each teaspoonful as directed above.

If you have Acid Stomach, don't worry about it. Follow the simple directions given above. This small dosage of Phillips' Milk of Magnesia acts *at once* to neutralize the acids that cause headache, stomach pains and other distress. Try it. You'll feel like a new person.

But—be careful you get genuine *Phillips'* Milk of Magnesia, or *Phillips'* Milk of Magnesia Tablets when you buy—25c and 50c sizes.

ALSO IN TABLET FORM

Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

MADE IN CANADA

Phillips' Milk of Magnesia

ATTRACT THE BIRDS

Miniature Log Bird Houses, Bird Shelters, attractive and practical. Approved by Jack Miner. Ask your local storekeeper or send us $1 and we shall mail to any address post free. Hardwood Specialties Ltd., Annapolis Royal N.S.

POULTRY RAISER CONQUERS "ROUP"

Praises Minard's Liniment As Remedy for Roup or Bronchial Flu

Read in this letter from G. Minvielle, Fort Garry, how he checked Roup (Bronchial Flu) when it broke out among his young hens. "After trying other remedies and obtaining no results whatever," writes Mr. Minvielle, "I tried Minard's Liniment, five to six drops on the tongue and sometimes more, depending on the birds. I am positive that it helped me out a lot." Minard's Liniment is a tried and proven remedy for sprains, burns, bruises and skin diseases, as well as for Bronchial and Rheumatic trouble. For sale by all druggists. 37

THE SALVATION ARMY

ANNUAL

Self-Denial Appeal

"If each man in his measure would do a brother's part,
To cast a ray of sunshine into a brother's heart,
How changed would be our country,
How changed would be our poor!"

TO cheer the hearts of men, to minister to physical need, and to inspire new hope has been the work of The Salvation Army since its inception. Kindly help us in your **fullest measure.**

Your donation may be sent to:

COMMISSIONER JAMES HAY

20 Albert Street — — TORONTO, ONT.

Football Player's Ambition to be Chef

Hands that Snapped the Pigskin Working Over the Mixing Bowls

Salt Lake City—Between activities on the football field and the boxing ring, 200-pound Harvey Brown is learning to make salad dressing and buy potatoes.

Hands that snapped the pigskin back to quarterback during the grid season, now are working over the mixing bowls in the domestic science department at the University of Utah. He always liked to cook, so he went in for it in a big way, his objective being a job as chef in a hotel or hospital.

He plans to take all the courses the university offers in cooking and may work for a degree if he does not have to take too many subjects that would be "embarrassing."

"Sewing, for instance," he explained.

Asking about his class marks, Brown said they are "just about the same as the girls."

Electric Goods Canada Made

90 Per Cent. of Supplies Used Manufactured in Dominion

Toronto—Study of Dominion statistics reveals the fact that more than 90 per cent. of the electrical apparatus and supplies that are being used in Canada are the products of domestic manufacturers. In all, 169 manufacturing plants are engaged in the production of apparatuc required for the generation, transmission and utilization of electrical energy. Of these 15 are in the province of Ontario, 22 in Quebec, 9 in British Columbia, 8 in Manitoba, 4 in Alberta and one in the Maritimes.

Ontario is rather in a class by itself as regards a market for electrical products, particularly that class produced for domestic, industrial and institutional use. Market reports show that 41.3 per cent. of the consumer income is located in Ontario, as is also about half of the industrial buying power of the country. Another rather astonishing point is that one-third of Canada's total buying power is within a radius of 100 miles of the city of Toronto.

Gentleman Jim"

"I never knew anything like Omega Oil for putting the limbs and body into shape after prolonged exercise. It takes out soreness, and keeps it out."

So said the late James J. Corbett, conqueror of John L. Sullivan. Famous athletes and their trainers have long known that Omega Oil goes deeper, and can be rubbed in without blistering. Every household needs it. It takes out the pain and stiffness from sore strained muscles and ligaments so quickly. 35 and 60 cts. at all druggists. Sole Agent: John A. Huston Company, Limited, Toronto.

[illegible]ish 'Tech' School First of Kind in China

Shanghai—Work has been started on the $500,000 main building of the Lester School and Henry Lester Institute of Technical Education, designed to afford technical education for students of all nations and the first school of its sort to be erected in China.

By the will of the late Henry Lester, a Briton long resident here, this institution will serve internationally but offer special inducements to Chinese. It will contain a laboratory and testing machinery of the most modern type. There will be five large workshops including an engineering machine shop and a materials testing laboratory with a 50-ton universal testing machine.

Commenting upon the laying of the foundation stone recently, the British-owned North-China Daily News of Shanghai said: "The establishment in Shanghai this year of the first full-time technical school after the British pattern marks a notable achievement on the part of British enterprise. The British system of technical education has taken 100 years to become thoroughly established."

Long Life Span Held Due to Child Training

Toronto— It is possible that by "proper living, throttling of preventable, death-dealing maladies, and the improvement in medicine" man might ordinarily live to the age of 100, a gathering of medical men and students were told recently by Dr. William D. Haggard president of the American College of Surgeons and professor of clinical surgery at Vanderbilt University medical school, Nashville, Tenn.

He declared: "Without a doubt longevity is due to child training. Bad child training, allowing tantrums, and brain storms eventuate into neurosis and crime. The children of psychopathic parents should be taught inflexible self-control. Inordinate mental and physical strain should be guarded against in middle life."

Potato Seed May be Short

Canadian farmers intending to plant potatoes this year, especially Irish Cobblers, are advised by "The pamphlet issued by the Dominion Department of Agriculture on agricultural conditions, to reserve their seed requirements at once, as the spring demand will probably exceed the supply. The production of certified seed potatoes in Canada in 1933 was the smallest in some years. Since harvest, the crop has also been considerably reduced by frost, especially in the Maritimes. While the usual Cuban demand is limited, there has been a strong early season market in the United States. The 1933 crop in the latter country was very short and a continued demand for Canadian seed is expected.

CONSIDER THE HAMMER

It keeps its head.
It keeps pounding away
It doesn't fly off the handle.
It finds the point then drives it home.
It is the only knocker in the world that does any good.
It makes mistakes, but when it does it starts all over.
It looks at the other side, too; and thus often clinches the matter.
If you are inclined to lose your head and fly off the handle, consider the hammer

Fewer Rich Men

The latest figures published by the commissioners of inland revenue reveal a decline in the number of England's rich men. When the statistics for the present year become available, however, it is likely that the improvement in industrial conditions may well have resulted in an increase.

The commissioners' report shows that the number of persons with annual incomes of more than £30,000 fell from 1,160 in 1930-31 to 897 in 1931-32. The number of millionaires — men with incomes of £50,000 a year and over — was 333 in 1931-32. For the previous 10 years the number averaged between 500 and 600.

From 1919 to 1929 the number of American millionaires rose from 65 to 513. Then came the Wall street crash and the number fell in one year to 150. In Britain the number has been much more steadily maintained.—Overseas Daily Mail.

SOURED ON THE WORLD? - THAT'S LIVER

Wake up your Liver Bile —No Calomel necessary

Many people feel sour, sluggish and generally wretched make the mistake of taking salts, oil, mineral water, laxative candy or chewing gum, or roughage which only move the bowels and ignore the liver.

What you need is to wake up your liver bile. Start your liver pouring the daily two pounds of liquid bile into your bowels. Get your stomach and intestines working as they should, once more.

Carter's Little Liver Pills will soon fix you up. Purely vegetable. Safe. Sure. Quick. Ask for them by name. Refuse substitutes. 25c. at all druggists. 51

Issue No. 16—'34

MORE TOBACCO FOR THE MONEY!

and POKER HANDS *too—with*

TURRET FINE CUT

That's what Turret Fine Cut gives to men who "roll their own". In every way you're ahead when you smoke this famous cigarette tobacco ... you get more tobacco for the same money —milder, cooler, more enjoyable cigarettes—and Poker Hands that can be exchanged for valuable free gifts!

You can only get these advantages—more tobacco, greater satisfaction and extra value—with Turret Fine Cut.

It *pays to* "Roll Your Own" with

Handy Garden Insecticide

Pyrethrum which poisons sucking insects, is obtained in the form of a palebrown to yellowish powder and it consists of the pulverized flower heads of certain chrysanthemums species which grow chiefly in Balkan countries, but are now being grown on this continent. It is commonly used on vegetables and fruits which are soon to be eaten since, although deadly to insects, it is nonpoisonous to human beings. That is its most extraordinary feature. It deteriorates very quickly when exposed to air, and for this reason purchasers should be sure it is fresh and has been stored in air tight containers. It can be used as a dust, either pure or mixed with four times its weight of cheap flour. As a spray for fruit and vegetables, it is commonly used at the rate of one ounce to a gallon of water.—Vegetable Insects bulletin, Dominion Department of Agriculture.

Free RUBBER RINGS ..for your Separator for a Limited Time

YOUR OPINION is wanted! In exchange for it we offer Two Rubber Bowl Rings for your separator; any size or make... free and postpaid. • • •

Without discussion, the House of Commons on Friday last voted $2,250 to Jack Miner, famous Kingsville, Ont., naturalist, to enable him to carry on his bird sanctuary.

• • •

Very Rev. Dean A.J. Hanley, pastor of St. Francis Xavier's church, Brockville, left Sunday night for Pinehurst, N.C., to spend a few weeks convalescing.

• • •

Provincial Bailiff Fisk visited Cornwall this week, and removed 11 prisoners from the counties' jail, to serve the balance of their sentences in provincial institutions. Sixteen prisoners remained in the counties' institution.

• • •

Trespassing on the C.N.R. tracks at Cornwall, in search of unused coal resulted in the death Friday afternoon of Mrs. Jno. White, of that city. Mrs. White was struck by the fast Montreal-Toronto passenger train at a point a half-mile west of Cornwall. An inquest will be held.

• • •

Colonial Coach Lines, Limited have placed orders for the purchase of eight new deluxe coaches, to be built by Canadian manufacturers at a cost exceeding $100,000. These new articles are to be placed in service next summer, and are to be delivered by June 1st.

• • •

Formerly one of the teachers in Iroquois public school, Miss Luella J. Burnside, who joined the staff of the Ontario School for the Blind at Belleville last year, has now been appointed head supervisor of the new wing recently added to that institution.

• • •

Ross Graham, former issuer of Ontario motor licenses at Kingston, appeared in police court on Wednesday, and pleaded guilty to theft of $2,025 from the Ontario Government. He was sentenced to nine months in the Ontario Reformatory.

• • •

Monday, June 4, will be a holiday in celebration this year of the King's birthday. A proclamation published in the current issue of the Canada Gazette, traverses the holiday from Sunday, June 3, His Majesty's actual birthday anniversary to the following day. King George was born in 1865.

• • •

Ontario license plates for 1935—perhaps not pleasant to think of so early in 1934—will be colored orange and black, it has been announced at the Ontario Reformatory, Guelph, where the plates are manufactured. They will carry black letters on an orange background.

• • •

Canadian Industries Ltd., Cornwall's newest industry, will commence excavating work on their million-dollar salt and alkali plant early in May, according to an official announcement made at Cornwall. The actual cost of the plant is estimated at $900,000, while an additional $300,000 will be spent for equipment. It is expected that the building will be completed within three months' time.

• • •

On Wednesday afternoon at 2 p.m the home of Mr. and Mrs. J. Sheldick, Leonard, Ont., was the scene of a pretty wedding, when their daughter, Lillian Elizabeth, became the bride of Wilfred Lawrence Foster, son of Mrs. A. Merkley, Quill Lake, Sask. The bride was attended by her sister, Mrs. T. Dashney of Navan, Ont., and Miss Muriel Durant of Morrisburg. Mr. T. Dashney of Navan attended the groom.

• • •

Mr. R.C. Caldwell, president of Caldwell Linen Mills, Iroquois, is donating a trophy cup emblematic of the St. Lawrence Lawn Bowling Association championship. The inter-club matches of the past three seasons have been very popular with the members of all the clubs in the group and they should be even more keenly contested this season, with a fine cup to carry home after the final matches.

Miss Ruby Shannette, nurse-in-training at Cornwall General Hospital, was a guest of her mother, Mrs. Mayme Shannette, on Sunday.

• • •

Mr. and Mrs. Irwin Hilliard, of Toronto, are guests of friends in town.

• • •

Mrs. Rachel Timmins of Winchester, who, with her husband, was one of the pioneer settlers of The Boyne celebrated her 98th birthday on Sunday last. She was able to attend service in the United Church there, and Rev. Jno. McKay, pastor, spoke a few words of appreciation and asked the congregation to rise in honour of this wonderful woman.

• • •

The death occurred on Friday last in an Ottawa hospital, of a former resident of Winchester, in the person of David Halliday, in his 79th year. The late Mr. Halliday was born in Chesterville, later moving to Winchester. Thirty-five years ago he took up residence in Ottawa, where he had since lived.

• • •

Philip Gagnon, 48, native of Winchester, Ont., died at Detroit, Mich., from carbon monoxide gas poisoning. His body was found slumped over the wheel of his auto in his garage. A piece of garden hose carried the gas from the exhaust pipe into the auto.

• • •

Patrick Kirby, a well known, lifelong resident of Winchester township, passed away at his home on Friday last, after several months' illness, in his 80th year. Mr. Kirby was prominent in municipal affairs, being reeve for several years and councillor for about 15. In politics he was a Liberal. He was secretary-treasurer of the school board of section No. 9 for 18 years.

• • •

Appearing before Magistrate McCormick, Alex Waisman of Chesterville was found guilty of dealing in pelts of fur-bearing animals without the necessary license, and fined $10 and costs. Louis Ziggman, of Brockville, who appeared on a charge of reckless driving, pleaded guilty and paid a fine of $10 and costs. This charge was laid by Traffic Officer Rose of Morrisburg a few days ago, when Ziggman, who was driving a truck, crashed through a guard rail just west of Iroquois and snapped off a hydro pole.

• • •

Voluntary statement in the case of James Cross, Aultsville, who is facing a manslaughter charge in connection with the death of Miss Mary Hayes, at Montreal, on April 11, was postponed until Friday, on his appearance before Judge Lacroix at Montreal on Tuesday. The hearing was postponed at the request of the defence attorney, who announced that he wished to examine two witnesses of the automobile accident that resulted in Miss Hayes' death on that date. Miss Hayes was fatally injured when struck by an automobile, allegedly driven by the accused.

• • •

The steamer Britannic, which wintered at Cornwall, is expected to leave for Montreal May 1. The steamer would leave May 2 from Montreal for Kingston, it is understood. It is being fitted for the season's schedule. The steamer this year will be in charge of Captain Osias Lefebvre of Valleyfield. It was built in 1856 and is the oldest sidewheel steamer on the St. Lawrence.

• • •

"Tiny" Jones, star goalie during the past season, writes from Rockhaven, Sask. (his home town) to one of his friends in Morrisburg, expressing his appreciation to the Tigers, the management of the Arena, and all the citizens for the kindness shown him during his sojourn in Morrisburg. Tiny says: "I enjoyed the winter in Morrisburg very much, and think the people are very fine. I appreciate everything they did for me." Thank you, Tiny. "till we meet again".

• • •

Merle Crowder, well known young resident of Ogdensburg, passed away recently at the home of his mother at Mountain, after a short illness. He had been a patient in Ogdensburg hospital for some time. He was born at Mountain 31 years ago, and when 19 years of age moved to Ogdensburg. The funeral service was held in the United Church at Mountain, and was attended by a large number of friends.

• • •

Following an illness of six months duration, Mrs. Rhoda Fetterly passaway at her home north of Chesterville, in her 91st year, on Friday morning, after a residence in that community of 74 years. She was born in the township of Winchester, youngest daughter of the late Andrew Summers and his wife, Christian Shaver. In 1860 she was married to the late Ezra Fetterly, who died 17 years ago. Of nine children born to them, six survive, also 19 grandchildren and 17 great grandchildren.
