Fair at Crysler

The Finch Agricultural Society fair will this year be held at Crysler.

Price of Sugar Declining

Right in the midst of the canning and preserving season housewives will find good news in our advertising columns. where a reduction in the price of sugar of fifty cents per hundred pounds is announced.

Held Up Returning From Store

The other evening a hold-up was successfully carried out on our streets when a young girl returning from a store with her purchase was waylaid by four other young people and relieved of what she had purchased, the value of which amounted to a dollar and a half. Much indignation was felt by the parents who are understood to have appealed to the powers that be only to be advised to keep their children off the street at night and they would not be robbed.

Will There Be a Flower Show

This is the month for the perfection of bloom in our flower gardens, and the logical time to have a flower show, especially displaying gladoli. It was understood when the Horticultural Society distributed bulbs free this spring that a show would be held during August. If all those who are likely to have entries for such a show would notify Miss Moad, secretary of the Horticultural society at once, the details could soon be arranged.

The Late Lloyd Countryman, Morewood

On Wednesday morning July 18th, a deplorable accident occurred on the Faulkner Farm north of Morewood, which caused the almost instant death of Lloyd Countryman, a bright and promising citizen of that place. It appears that Lloyd as he was familiarly known and Mr. Ernest Faulkner neighbors, were assisting each other with the hay harvest. Lloyd went over to Mr. Faulkner's place about 9 a. m. and shortly after went up into the hay loft to assist unloading the first load of the day. Only a few minutes later Mr. Faulkner heard a noise and upon looking up the alleyway, was horrified to learn that Lloyd had fallen down the hay chute, a distance of 20 feet, striking his head on the cement floor, and was unconscious, from which state he never revived. Medical aid was at once summonsed. Drs. D. S. McDougall and W. A. Brown, were soon present but nothing could be done to save his life. The opinions of the medical men were that bleeding had taken place inwardly in the head causing paralysis, and this with concussion of the brain, caused death about one hour later.

The deceased was the eldest son of the late Ezra Countryman and Mary Summers, and was born at Morewood, Sept. 26th, 1890. He received his early education at the North Winchester Public School, and was also a regular attendant of the Methodist Sunday School there. He was of a quiet disposition, very determined and full of ambition and energy. These qualities, well directed were fast leading him to the front in his calling as a successful farmer. On June 14th, 1916, he was united in marriage to Hazel, youngest daughter of Mr. and Mrs. Henry Dillabough of Morewood. Outside his sorrowing young wife he leaves to mourn his loss, his widowed mother, three brothers and two sisters, viz:—Ch... of ...ald of ...r N. ...tewart ...e funer- ...he 20th, ...attended. ...beautiful ...ial con- ...ner- ...is ...y

CONNAUGHT

Berry picking has been a very exciting time in this vicinity this season.

Mrs. William Cook of Rochester, is visiting relatives through here.

Misses Estella and Geraldine O'Riley of Peterborough, are spending their summer vacation with their uncle, Mr. John Grady.

We are glad to report that Master Emmett Norton who had been seriously hurt a few weeks ago is able to be around again. Emmett is now spending a few days with his grandparents Mr. and Mrs. William Galvin of Berwick.

Mr. and Mrs. Thomas Kearns of Detroit, Mich., and the latter's mother Mrs. William Galvin, Frank and Sadie were calling at Mr. Gordon Murphy's on Friday last.

Mr. and Mrs. John Beehler and children spent Sunday afternoon at Riverside.

Mrs. Herb Morrisey and children of Brockville, spent a few days last week with her sister Mr. Patrick Cain.

Crop Insurance

Government experts who have been studying the question of crop insurance are of the opinion that the farmer should be able to obtain all necessary insurance in one policy covering against damage from deficiency or excess of moisture, plant pests, storm, frost, hail, hot winds, and all other dangers, and damage except by negligence of the planter, when damage is so severe as to bring the yield materially below the investment in the crop. They are of the opinion that prices are not insurable. They have not decided upon the form of insurance carrier which should be most encouraged to develop this insurance. It is held that the cover required by the farmer is not insurance guaranteeing him profits when nature fails to furnish them, but protection against crop damage so severe as to ...ger him financially. Such pro... it is claimed can be furnished at ...nable cost. It is held that the far... himself should carry all risks that ...e borne without inconvenience, and ...rotected against serious unavoidable ...azards.

The Cheerful Idiot

Nervous Old Invalid: "Really, Mrs. Mene, I think it is quite time the passage walls were re-papered."

Landlady: "Pardon, sir; but I'm waiting to see 'ow your 'ealth goes on. Coffins is such things to knock the paper off coming downstairs."

Why They Leave Farms

Brandon Sun—Everybody points lessons to farmers. Sometimes the people should be taught. The workers, too, might read something from occasional facts. For instance New York city workmen are paid for not too excessive toil rather considerable sums. The farmer's produce is less well paid for. It would take 762 eggs to pay a plasterer for one day's labor in the swirling metropolis of New York. Seventeen and one-half bushels of wheat would remunerate a bricklayer for one day of his services. The wheat represents a year's receipts from half an acre on the farm. A hog weighing 175 pounds would partially recompense a carpenter for eight hours of labor. A painter would feel adequately paid if he received twenty-three chickens at three pounds each for his labor with the brush. The output from fourteen cows fed and milked for twenty-four hours, would just barely equal a plumber's wages for one day.

Born a Land Lubber

Bill Conn's son wrote home to his daddy from near China on a navy cruise: "I'm enlisted, all right, dad, and sailing a rough sea. God bless the man who invented farms and trees, and mountains and long walks in the country. This life is great, but, dad, if I ever get my left foot on shore again I'm going to keep my right foot moving after it!"

Potatoes!

Here, at last, is the Potato Pot in SMP Enameled Ware. All up-to-date housewives are getting them. So handy, so easy to manage. Note the strainer spout for pouring off water. Note the upright handle which locks the pot cover on when straining. Insist on SMP Enameled Ware, smooth as china, and as strong as steel. Just say

SMP Enameled WARE

A Handy Pot

This splendid pot is invaluable for boiling potatoes and can also be used for cooking other vegetables, stewing meat, etc. A very handy dish.

Three finishes: **Pearl Ware**, two coats of pearly grey enamel inside and out. **Diamond Ware**, three coats, light blue and white outside, white lining. **Crystal Ware**, three coats, pure white inside and out, with Royal Blue edging.

Douglas Packing Company, Limited, Cobourg 60

How to Make Delicious Plum Jam

...sh well about 2½ ... 4 level cups (2 ... large kettle, ... boiling, ... minutes. ...) sugar, and mix well. Use hottest fire and stir constantly before and while boiling. Boil hard for 1 minute. Remove from fire and stir in ½ bottle (scant ½ cup) Certo. Skim and pour quickly.

Whole Carload of Hens

A whole carload of live hens is to be shipped from Port Hope about August 1st. The local branch of the Department of Agriculture, is arranging to send out, on July 25th, a staff of trained poultry cullers to visit the farms in the neighborhood of Port Hope and select the good layers from the poor ones. The fatter class, which are unprofitable to keep on the farm, are usually the fattest hens and, while they are culls in a laying flock, often bring fair prices for killing. A poultry car has a capacity of 3,000 birds and already about 1,000 hens have been arranged for.

Another Queer Duck

Mr. Wm. Rome of the 8th Con., West, Culross, has a lively young duck that is a sure enough freak, says the Teeswater News and when the editor saw it on Tuesday it was quite lively. It has four perfect feet and legs, the extra legs coming out above the natural ones, but the tail or hind end of the body is a bit twisted to the right. It used both feet on the right side, but the left foot sticks up too high to be of any use. It is over a week old and seems quite healthy.

Frontenac Cheese Men Complaining

Frontenac County Cheese Producers who have been selling to buyers from the United States, are complaining that their product was unexpectedly placed in third grade and that the returns was not satisfactory. The cheese manufactured was made for the demands of the United States trade which has not required the higher standard of Canada and Great Britain. Cheese turned out last week by Frontenac factories was for British export and was of much higher grade than that made for American consumption.

Move River to Get Drowned Boy's Body

A river's course has been changed so that a mother might see once more the body of her son. Sunday the body that of 12-year-old Clyde Patnor was buried at Cioso, Cal.

Clyde fell into the Yuba River and was swept over the falls. His body never came up, but engineers of the Pacific and Electric Corporation offered to get it. The company authorized their task and all work of harnessing the falls, on which the men had been engaged was stopped.

It cost them days and nights of ceaseless toil and cost the company $20,000 before with dynamite and steam shovel the thousands of tons of earth could be removed and the Yuba's course diverted. Then wedged between jagged rocks at the foot of the falls the engineers found the boy's crushed body.

Prevention OF Typhoid Fever

Typhoid fever is an infectious disease; it cannot occur unless the germ gets into the body and finds their conditions favorable to its growth. The disease is not contagious in the strict sense of the word, it is not necessary to come into close relationship with one who is either sick with the disease or has recently had it in order to acquire it; the germs may be carried in food or drink.

The main channels of infection are the water supply and the milk supply. In most of our cities the water is in no danger of being contaminated, and so is the milk in many cities where it is required to be Pasteurized. As a result the death rate from typhoid fever in cities has fallen remarkably, the few cases that do occur come usually through salads and uncooked vegetables that have been either washed with impure water or contaminated by flies, which carry the germs on their feet. Flies are active carriers, they make frequent flights from heaps of filth to the kitchen or to the dining table and are partial to bowls of milk, which is an excellent breeding fluid for the germs.

It is in rural districts that the danger of acquiring typhoid fever is still serious. One case occurring in a farmhouse the drainage from which is into a stream may give rise to hundreds of cases among people who drink the water from the stream or use it for washing, for brushing the teeth, for cleansing dishes or rinsing out milk cans or perhaps for washing salads. It is during the summer vacation on the farm or in camp that the city dweller is likely to be most exposed to the disease, and it is then that he should take special precautions. If you are not sure that the water in the well or in the stream beside which your tent is pitched is free from contamination, you will do well to boil it before either drinking it or washing with it. Don't drink any milk unless you know w... comes from and are sure that no ... cently ill with typhoid has had a... to do with handling it; don't d... that is, without first boiling or Paste... ing it. Finally, screen your food so th... flies cannot get at it before, or especially after, it has been cooked. Without neglecting those obvious rules of cleanliness you might take the preventive inoculations before leaving home; then you would not have to worry about typhoid fever any more than our soldiers w... about it during the war.

Fiendish Attempt To Kill Children

Topings, a Deseronto youth, aged about 20, is said to be a fugitive with a posse of provincial and local police in pursuit, the charge against him being that he broke into Thompson's garage in Deseronto early on Sunday morning and made off with an automobile.

It is said that he turned up in the vicinity of Read, drove members of two families to church, later dined with one of them, took a party of six children for a joy ride in the afternoon, and then abandoned the automobile and the six children on a lonely piece of road when police officers hove in sight.

It is said that he opened the auto to its fullest speed just before he jumped, leaving the children to their fate. Fortunately, fate was kind to them for the automobile ran up the side of a hill, struck a boulder, and overturned, but none of the children was injured.

Saving Ammunition

He (with great dignity)—Then this is absolutely final?

Co-ed—Absolutely. Shall I return your letters?

He—Yes, please. I think they're good enough to use again.

FRESH

Tea—to be good—must be fresh

"SALADA"

TEA

B 835

is always fresh and possesses that unique flavour of 'goodness' that has justly made it famous.

CHATTING OVER THE DAILY PAPER

I see by the papers this afternoon that the anthracite miners by the time I would be getting home from work would have their strike well started. It was to start when their day's work was done at three o'clock. Did you get that? A good man is only getting well settled down to his afternoon job at three o'clock the time of day the miners have their day's work done. It is very easily seen their harvest is not handled the same as that of the farmers of Dundas.

I noticed a peculiar thing in the papers about butterflies last night. Down in New York city the past day or two millions of butterflies have been passing through in a southeasterly direction. They are referred to as the milkweed butterfly, and I think they are the kind you call Monarchs in Dundas. It seems that every year at this time the same thing happens, these butterflies leave their breeding grounds in Canada and the Northern States and commence what to them is a flight of death. They go along the coast for many miles finally flying out to sea where they drop exhausted into the water and die by the millions. Science has failed to explain what prompts them to seek death in this way.

Many peculiar decisions are made on different points in the enforcement of the liquor laws. The Province of Manitoba is appealing against a decision of a Magistrate who declared that liquor could not be seized in the automobile of a citizen of the United States when it was being transported across the border. Just why an American has any more privileges in the transportation of liquor than a Canadian is not explained.

Is it not wonderful the price that is paid for carelessness. When it is not someone getting carelessly run over by an auto it is something else. What is in my mind is the drowning of a little child in a tub of water at Tullamore in Peel county. The mother had just stepped into the garden after giving her twins a bath when one of them fell into the tub and was drowned.

How would you like a buffalo steak? I see that the Dominion of Canada is going to kill off about two thousand of its big herd in the National Park at Wainwright, Alta. For a number of years the Government has been protecting these animals so successfully that now they have too many for their feeding grounds and it is the intention to thin them out to the extent of about two thousand, selling the meat and hides. Last year 250 were disposed of in a like manner.

Did you ever notice particularly the hours at which the most serious auto accidents happen? Of course they happen at all hours, but I mean the joy riding kind. It looks to be kind of open season for them after midnight when sports are hitting the high spots for home before the break of day. A magistrate up in London has committed a couple for running down a night gang of laborers on the car track and injuring several. Before striking the men they had to run through a barricade on the street.

The wheat crop in Saskatchewan is reported to be running about twenty bushels to the acre on the average, fluctuating from ten to thirty.

We seem to be approaching that happy time we have all at sometime wished for when working between meals would be taboo. Dr. Charles Steinmetz has prophesied that before many years have passed the working day will only be of four hours length. When working days for farmers get down to four hours, the dinner hour for most people will have gotten down to five minutes and it will not be because people eat too fast.

It is not given to many married couples celebrate the 69th anniversary of their wedding together, but such an occasion was celebrated last week by Mr. and Mrs. Hugh Walker of Guelph, Mr. Walker is 88 years of age and both are in the best of health.

A bed of gypsum has been discovered in Northern Ontario a mile wide facing on the Moose River and extending back for a distance of ten miles. Gypsum is used in the manufacture of calcimines, cement for building purposes, plaster and many other ways.

Godfrey Laflame, a well-known farmer of Summerstown, met his death in the early hours of Thursday morning last, when his Ford car which he was driving crashed into a telephone pole, breaking the latter off and overturning the car in such a position that Mr. Laflame was pinned down with the car on his chest gradually choking him to death.

Saturday last there happened in Japan one of the most destructive earthquakes ever reported from that land where earthquakes are of every day occurrence. More than a hundred thousand lives are reported lost with untold damage to property. It is rather hard to imagine how many killed one hundred thousand compare with. The city of Ottawa has somewhat more than that population which had the catastrophe taken place there would have been wiped out at one stroke. More than detached interest in the news is felt by Dundas county people from the fact that Rev. Foster Hilliard, son of Mr. and Mrs. Irwin Hilliard of Morrisburg, is a missionary of the Methodist church stationed in the city of Tokio. Many Canadian missionaries are in the devestated area from whom no word has yet been received but it is believed that as it is the summer season when most of them would be in the mountains that they will not be among the casualties. Earthquakes in Japan are of daily occurance, three or four tremors be felt most of which do no damage.

A large number of people in the vicinity of Chesterville who are always interested in the performances of that great pacer Single G. will be grieved to know that he was beaten in a race at Readville, Mass., last week by Margaret Dillon in the Free-for-All in 2.02¾.

The wonderful new medicine for the cure of diabetes has now been made available at many points through the province free of cost to those who are unable to pay for it. A notable cure was reported from London last week of a boy who had been brought from South Africa for treatment in a diabetic coma and nearly dead a few weeks ago. Today he is a plump and jolly little chap looking forward to returning to his home. Experts regard thus as the most remarkable example of the efficiency of the insulin treatment yet experienced.

Cheese at the different boards throughout the country sold last week at from twenty-two and a quarter to twenty-three and a half cents per pound. In Cornwall over two thousand boxes of white and yellow sold for twenty-three and three-quarters, while thirteen hundred boxes sold in Belleville for a quarter cent more. At St. Hyacinthe six hundred boxes sold at twenty-two and a quarter.

Willie's Guess

Visitor—How do you do, Willie?" I've come to stay at your house a week and I'm sure you can't guess who I am.

Willie—I'll bet one thing.

Visitor—What?

Willie—I'll bet your no relation of father's.—Boston Transcript.

Cornwall General Hospital

This institution provides skilled nursing and are at very moderate rates to those able to pay, and without charge to indigent person from the three United Counties, other than the Municipal Grants.

It is kept up by;

Fees from paying patients.

2, Grants from the Government and Municipalities.

3. Donations and Subscriptions from Churches Corporations, Societies and Individuals, the last being the largest source of revenue.

You are asked to assist in this work

The nucleus of endowment fund has been established by a legacy recently received, and parties remembering the Hospital in their wills may stipulate that bequests made by them shall go to this fund.

If you would like a copy of the last Annual Report, drop a card to the Secretary, who will be pleased to send you one.

J. T. KIRKPATRICK, President. F. D. McLENNAN Sec'y-Treas

Value of Birds

While the robins steal our cherries and the blackbirds our garden peas, the value of birds far outweigh their damage.

The numerous members of the fly-catcher family assist the swallows in ridding the air of insects.

One of our common fly-catchers is the phoebe. It is a dull, dusky, gray bird—"a wee, sad-colored thing," as Lowell says. It is partial to water and its favorite nesting place is under a bridge. The phoebe has the common fly-catcher habit of sitting on a favorite perch and, when an insect appears, dashing out after it, then immediately returning to its perch. When perching, it has a habit of vigorously wagging its tail and turning its head.

Eighty-nine per cent of the phoebe's food consists of insects. About one-fourth of its food for the year consists of flies.

Our largest fly-catcher is the king bird. It has a white breast and a white band at the tip of the tail. The kingbird has been called the "bee-martin," because it is accused of stealing bees. Of 281 stomachs examined, only 14 contained bees. There were only 50 bees in all and 40 of those were drones.

Fly-catchers are great fighters, especially when defending their young. The little kingbird will attack a hawk many times its size and can drive a crow from its vicinity.

The phoebe builds a beautiful mud plastered nest and covers it with lichens.

Had His Quarry

The flaxen-haired Scandinavian called at the county office and stammeringly asked for a license. "Hunting license?" inquired the clerk. "Oh, no," said Ole. "I ban hunting long enough. I want to be married."

Here and There

Nearly four thousand men were recruited by the Canadian Pacific Railway agents in England for work in the harvest fields of the Canadian West.

A sudden demand for wheat in Scandinavian markets has caused increased activity in the movement of grain through Vancouver. Four boats left with bulk wheat for ports of Norway and Sweden, marking the first direct grain shipments from the Canadian Pacific coast to Scandinavia.

The rapid increase in the export butter trade of Saskatchewan during the past year or two has been the outstanding feature of the provincial dairy industry. Recently the Saskatchewan Co-operative Creameries made a shipment of 25,000 lbs. of butter to China.

The export of gold bullion, gold coin, and fine gold bars from Canada, except as deemed advisable by the Minister of Finance, and as licensed by him, is prohibited until July 1, 1924, by proclamation issued in the current issue of the Canada Gazette.

Breaking all 1923 passenger traffic records, the Canadian Pacific S.S. "Metagama," westbound from Glasgow via Belfast, docked recently at Quebec, and Montreal the same evening, with a record number of 382 cabin and 1,078 third-class passengers.

"There are hundreds of first class farm workers in Scotland anxious to come to Canada, and the finest material Canada could wish for, but their wages are sufficient to barely support them and they are unable to accumulate funds for the passage." This is the opinion of Thomas Scotland, of the Canadian Pacific Railway Colonization and Development office in Glasgow, who recently arrived in Canada with a party of Scotch immigrants bound for the western provinces.

To J. K. L. Ross, director of the Canadian Pacific Railway, goes the honor of catching the world's record fish with rod and reel. At St. Ann's Bay, N.S., he landed a tuna weighing 712 pounds; length, 9 feet 2 inches; girth, 6 feet. Commander Ross used a Vom Hofe tuna rod and reel, No. 39 thread line, with mackerel for bait. His catch took three and a quarter hours to land.

The world's wheat crop this year is estimated at 3,318,000,000 bushels, as compared with 3,104,000,000 bushels last year, an increase of 214,000,000 bushels, according to figures carefully compiled by the International Institute of Agriculture at Rome. The estimated shipments from supply countries of the world for this year is 690,000,000 bushels, of which Canada is expected to supply 290,000,000 bushels, or about one-third.

Canadian trade with Australia is on the increase, according to returns made public by the Bureau of Statistics. Canadian exports to Australia for the twelve months ending with June were $19,824,239 as compared with $12,200,468 for the corresponding period ending June, 1922. Canada's imports from the Commonwealth have also increased. The imports from Australia for the last twelve months were $1,545,829, as compared with $1,275,871 for the year previous.

Something New

The Jubilee Policy of the Sun Life of Canada is the last word in Life Insurance.

A policy holder has the privilege at the end of five years to change his policy to any out of four different plans, which changed circumstances might demand.
Also with double indemnity and total disability privileges.

If considering Life Insurance it will be worth while to investigate.

E.B.LYNCH, Gen. Agent, CHESTERVILLE

REAL ESTATE

I an now ready to sell your village or farm property. If you have any property to sell list it with me. No transaction too small to receive my attention. None too large to handle.

FOR SALE

IN CHESTERVILLE

2 desirable dwellings for sale—for particulars apply to C. W. Casselman.

DWELLING

Dwelling on double lot with good hen house situated on St. John St. Chesterville. Apply C. W. Casselman.

MAINLY ABOUT PEOPLE

Mr. Leslie Cass made a business trip to Montreal last week.

Mr. H. G. Carter of Detroit is spending a few days in town.

Mr. F. E. Price spent the week end in Montreal.

Miss Olive Forbes, spent the week end with her parents in town.

Miss Alice Murray of Smiths Falls, is visiting her cousin Miss Minnie Neelin.

Grant and Jessie Nugent of Hawkesbury, Ont., spent the past two weeks with friends at Dunbar.

Miss Susie Annable, Principal of Winchester Public Schooi was the guest of Mr. and Mrs. W. N. Fulton on Friday last.

Mr. "Ing" Fetterly of the Molsons Bank staff at Belleville, spent the week end and holiday with his mother in town.

Miss Kathleen McCloskev left Monday for Kingsville, where she will be on the teaching staff of the high school.

Miss Isabel Clement has accepted a position on the teaching staff of Elora high school for which place she left on Monday.

Dr. W. A. Brown and Mrs. Brown and children enjoyed a motor camping trip to Toronto last week where they visited the big fair.

Miss Alice Smith of Ottawa, and Mr. Launcelot Bolster of Montreal, spent the week end with the latter's parents Mr. and Mrs. A. E. Bolster in town.

Mrs. Mahlon Swerdfeger and daughter Freda have returned home after spending a few weeks visiting in New York State, the Mountains, and Saranac Lake.

Misses Eldred and Edna Fulton and Helen Lacey went to Kemptville on Monday where they will become students at the High School.

Mr. A. H. Forbes was called last week to Carey's Mills in New York State, by the death of his brother Thomas, who carried on the business of wheelwright at that place.

Mr. Peter Johnstone and family of Ottawa, and Mr. and Mrs. Hayze of Shawville, Que., were week end guests of Mr. and Mrs. James Johnstone.

Mr. George Carlyle, Miss Bessie Carlyle and little Jessie Johnstone, visited Hawkesbury and Ottawa friends last week returning by Montreal.

Chesterville people are pleased to welcome again as citizens Mr. and Mrs. J.C. Simser and family, who have again taken up their residence in town.

W. M. Saucier and A. Roberts motored to Cameron's Island in the St Lawrence at the week end where on Monday they indulged in the first duck hunt of the season.

The death occurred in Albany, N. Y., on Monday evening of William Moran, son of the late John Moran. About a month ago Mr. Moran made a visit to friends in this vicinity when he appeared to be in good health. No particulars have been received at time of writing other than he died unexpectedly.

Rev. R.J.M. Glassford of Winchester, conducted very impressive ordination and communion services in the Presbyterian church on Sunday morning last when Messrs. W. G. Reaburn, Roland Shaver and Frank Hummel were ordained and inducted as elders. Five new members were also added to the communion roll.

Several Chesterville young folks who graduated into the teaching profession at the recent Normal examinations took up their duties with the opening of the schools on Tuesday, among them being Miss Gertrude Weegar who went to Perth Road, Mr. Alex. Lawson to Maple Ridge, Mr. Bert Beattie to Cahore, Miss Lila Weegar to the Primary room in Chesterville school and Miss Reta Beckstead to a school in the vicinity of Smiths Falls.

The Prince of Wales sailed yesterday for Canada on a visit to his ranch in Alberta. He is accompanied by three members of his suite. He will land at Quebec a week from Sunday and proceed direct to his ranch where he will remain until the second week in October. When returning it is his intention to spend a couple of days with the Governor General, Lord Byng. Mr. W.L. Carlyle an old Chesterville boy is manager of the Prince's ranch.

MAINLY ABOUT PEOPLE

Mrs. Della LaGrove is visiting her sister at Elma.

Miss C. Paillard of Montreal, spent the week end with Mr. and Mrs. Geo. Onderkirk.

Whittaker the Optician will be in Chesterville on September 11th Finch 13th.

Mr. Alfred Harradine of Massena, spent the week end and holiday with his family here.

Mr. and Mrs. Chas. S. Beckstead and Mr. W. A. Beckstead are attending Toronto Fair this week.

Mr. Jack Walsh of the Bank of Nova Scotia, was in town for the week end and holiday.

Dr. S. H. Hutt visited Ottawa and Montreal during the week end and holiday.

No, Patrick you are mistaken, a blowout is not caused by a fork in the road.

Miss Agnes McCloskey of Ottawa, spent the week end and holiday at the McCloskey House.

Mr. and Mrs. Ed. Vandusen and Mr. A. D. McIntosh are visitors in Toronto this week taking in the exhibition.

Mr and Mrs. Orren Wert of Cornwall, spent the week end with Mr. and Mrs. George K. Casselman, Dunbar.

Rev. and Mrs. Hector Beach of Metis Beach, Que., and children are visiting friends at Dunbar and Colquhoun.

The Ladies of Trinity Methodist church will hold a Harvest Home Dinner on Sept. 18th, from 6 to 8 o'clock, in the Dining Hall of the Church.

Mr. O. L. King spent Sunday with his wife at St. Alban's Hospital where Mrs. King is making satisfactory progress after undergoing an operation.

Mr. and Mrs. Fred Roberts and two children and Mr. Russell Hummel of Lachute, motored to Chesterville and spent the week end and holiday with the latter's grandmother, Mrs. John Hummel.

Miss Catherine Haggart of Maxville, paid Chesterville a flying visit on Sunday accompanied by Miss Lillian Pink of Montreal, Mrs. D. F. McRae of Maxville and Mr. J. McRae Dyer and Mr. Kenneth Cameron of Ottawa.

Miss P. G. Murphy returned home on Tuesday from a three months holiday in Rochester, Niagara Falls and Conesus Lake Beach, N. Y. She made the trip home by way of steamers Toronto and Rapids Prince.

Mr. and Mrs. W. H. Connor of Canton, N. Y., made a short call on Chesterville friends the fore part of the week. Mr. Connor reports crops for the most part pretty good in the part of the state in which he lives, although the corn is not as good as is usual having been affected by a lengthy dry spell in July.

Farmer Guilty of Arson

Stratford.—A jury on Saturday night after deliberating about three hours, found John Wright, a Wallace township farmer, guilty of arson. Sentence will be delivered by Judge James L. Killoran on January 4th. Wright's arrest followed a blaze at his farm just outside of Listowel on the early morning of November 27th, when his barn was completely destroyed and his home damaged by the fire. John Murray acted on behalf of the crown and Maurice Andrew for the accused.

Indignant Man: "You advertise to cure consumption, don't you?"

Dr. Quack: "Yes, sir! I never fail when my instructions are followed."

Indignant Man: "My son took your medicine for a year and then died."

Dr. Quack: "My instructions were not followed. I told him to take it for two years."

His First Coup

...tion,
enthusia...
served in the...
Russian Revolutio...
Culbertson family an...
an account of $3,000,000
says the Bolsheviks owe him ...
fiscating his father's oil property.

After the war he hung about Paris and Geneva living in the mysterious manner of other refugees without visible sources of income. It was at this time he turned to cards. In the cafés he became known as not only a poor player but a stubborn one. He was not so much interested in winning as in learning why a certain play was made. He became a bore, and people declined to play with him. It is related by Andrew A. Freeman in The Outlook that one evening he dropped into a Paris gambling club with 100 francs in his pocket. He put a 20-franc chip on the table and as he did so he became involved in an altercation with another player who had stepped on his toe. They retired to fight and when Culbertson, somewhat dishevelled, returned, he found that his 20-franc chip had miraculously multiplied itself into 20,480. It was after this coup that he left Europe and went to the United States, looking for a job. He might never have become noted as a card player but for the accident of meeting Miss Josephine Dillon with whom he fell in love, and who later on became his wife. Miss Dillon was a well-known player and teacher of bridge, and she convinced Ely that he had the qualifications to make a great player.

A Revolutionary Player

Bridge as he played it in those years was less a diversion than hard work. He kept a record of every hand he played or saw played. He dissected the play to detect where the mistakes had been made and why. At the end of the month he produced a statistical chart such as great business executives used to keep in their offices before they threw them out of the window in 1930. A revolutionary at heart, he came to the conclusion that there was something radically wrong with the game. He insisted that the fault lay with the teachers and for a considerable time before his fame was established, he was the most disliked bridge player in any community he haunted. Gradually he evolved a theory of his own which now has millions of adherents and which is being tested formally in the games against Lenz. Certainly he has had more advertising out of bridge than any character since Horatius. Naturally he is not popular. In a controversy over the Vanderbilt Cup, a bridge trophy which the Culbertson team won in 1930, the manager of the Knickerbocker Whist Club posted a notice to the effect that Culbertson had won only after being warned by the committee.

An Ungracious Record

The charge was that he and his partner had withheld their score card until that of the members of his team of four was heady to be turned in. Culbertson said, in effect, that the manager was a liar. The manager then pointed out that no national tournament committee had been called in session in the last two years to consider a protest unless Culbertson had been either a plaintiff or a defendant. We gather that Ely, aged 39, is regarded as a young upstart and bounder in most circles, where he is not accorded the veneration withheld in these circles from Babe Ruth or Prof. Einstein. His one vice, apart from card playing, is smoking cigarettes. He does all his writing in bed. He has three secretaries, and his sole vanity is a pair of suspenders with gold buckles. He never walks. If he wants to go even half a block he uses a taxi. With a former member of the Russian duma he is now collaborating on a book to show the inevitablity of a war between Soviet Russia and the United States. So far in the present contest Culbertson has distinctly outtalked Lenz.

Recovered Ring

When Mrs. Ruby Torrence, of Prescott, visited Gouverneur, N. Y., a few days ago, she left a diamond ring in a room in the municipal building. Although she detected the loss immediately, the ring, valued at $300, was not to be found. Police advertised the loss of the ring, and it was returned by a young girl from DeKalb Junction, who said she had found it in the building but did not consider it of value. She received a reward of $25 for its recovery.

Chinese Students to Try Tears

Nanking, China. — The Chinese government was faced with a new problem to-day when word was received from Hangchow that students had organized a "crying party" to protest Japanese activities in Manchuria.

The students plan to come to Nanking and cry lustily before the tomb of Sun Yat-Sen, father of the republic, in the hope that their tears will move officials to adopt a policy more in line with the students' ideas.

...ld.
...nich we
...eyes and can
...powerful tele-
...on which we live and
...have our being is only the
fragment of a grain of sand or a speck of dust.

Looking out from our insignificant abode upon the universe around us, our first impression is something akin to terror. We find the universe terrifying because of its vast meaningless distances, terrifying because of its inconceivably long vistas of time which dwarf human history to the twinkling of an eye, terrifying because of our extreme loneliness, and because of the material insignficance of our home in space—a millionth part of a grain of sand out of all the sea-sand in the world. But, above all else, we find the universe terrifying because it appears to be indifferent to life like our own; emotion, ambition and achievement, art and religion, all seem equally foreign to its plan. Perhaps, indeed, we ought to say it appears to be actively hostile to life like our own. For the most part, empty space is so cold that all life in it would be frozen; most of the matter in space is so hot as to make it impossible; space is traversed, astronomical bodies continually bombarded, by radiation of a variety of kinds, much of which is probably inimical to, or even destructive of, life.

Here is another statement to give us pause and make us gasp. It relates to the magnitude of the universe. Light travels at the rate of 186,000 miles a second, and, according to Jeans, the most remote sun discernible through the most powerful modern telescope is so far removed that the light which strikes our eye when we gaze at it left that remote sun before man appeared on earth. As the human race is believed to have been resident on this globe something like 300,000 years, the immense extent of the universe staggers the imagination. In the presence of such immensities, our planet appears to be insignificant to the last degree. And as for us who intabit this speck of dust in the scheme of things, it cannot be said that our troubles are of very great importance. So the next time you haven't the money to buy a new suit, don't get too excited about it!

...Burd, Mr. and
...ne Feeley and son Henry
...Wednesday at Mr. Thos. Feeley's, Cannamore.

Mr. and Mrs. Norton spent Sunday afternoon with Mr. and Mrs. Charlie Aggett.

Mrs. John Burd, of Mountain, spent the week end with Mr. Alvin Burd and family.

Mrs. Howarth and grandson, Tom Taylor, visited the capital on Saturday.

Mr. and Mrs. Henry Armstrong spent Friday with Mr. and Mrs. Freeman Burd.

Quite a few from this vicinity attended the Ladies' Aid annual meeting at the home of Mrs. Richard Wert of Crysler.

Mr. and Mrs. Thos. Feeley and son Harold. of Cannamore, spent Sunday afternoon with Mr. and Mrs. Lorne Feeley.

DIED

Smith—Mrs. George Smith, Cannamore, Ont., on December 19th.

IN MEMORIAM

Merkley—In sad and loving memory of Ellery Merkley who fell asleep in Jesus three years ago, Dec. 30th, 1928.

Not now, but in the coming year,
It may be in the better land,
We'll read the meaning of our tears
And there, sometime, we'll understand.

—Sadly missed by loving wife and family, mother and sisters.

IN MEMORIAM

Hummel—In loving memory of my dear mother, Mrs. John Hummel, who died December 25th, 1930.

One year ago this Christmas,
Mother dear, you left us.
Gone, but not forgotten,
by son Hermon and family.

IN MEMORIAM

McArthur—In loving memory of my dear mother, Mrs. Daniel McArthur who departed this life on Dec. 20th, 1919.

Twelve years have passed since that sad day
When the one we loved was called away.
Mother has gone to a higher region
Far beyond a world of care
We shall meet our loved mother
In our Father's Mansion there.

...gton Dramatic Club Presents Play at Grantley

The Dramatic Club of Newington Anglican Church presented a comedy, entitled "The Adventures of Grandpa," in the United Church at Grantley, on Thursday evening, to a fairly good audience. The pastor of the church, Rev. G. N. Maxwell, acted as chairman, welcomed the Newington friends and introduced Rev. S. V. Crossley, who presented the various members of the cast, namely, William Johnston, Will Bender, Anson Hoople, Misses Elva Rombough, Elsie Bancroft, Dorothy Bancroft, Mrs. George Helmer, Mrs. Will Bender, in addition to himself.

Extra numbers were: Opening chorus, by the cast; quartette and instrumental selections on violin and banjo, by W. Johnston and Mr. Mattice.

Luncheon was served to those taking part at the close, by the Ladies' Association of Grantley.

SOME WATER FACTS

EVERYONE KNOWS that water is essential to the proper growth and development of all plant life. Here is some indication of its magnitude as disclosed by science:—

A sunflower with a combined leaf area of 11 square yards will evaporate some 75 quarts of water from its leaves during growth.

A corn plant uses about 16 quarts during its lifetime.

An acre of cabbage requires over 2,000,000 quarts of water a season.

Some of the hardwood tree species give off as much as 80 quarts of water per day by evaporation.

It takes over 600 pounds of water to produce one pound of dry alfalfa.

Over 98 per cent of energy absorbed by plants from the sun is utilized in the evaporation of water from all surfaces. Along this line studies conducted by experts of the Federal Department of Agriculture show that—

It takes nearly 1,700 quarts of water to produce one pound of wheat, 1,425 quarts of water to produce one pound of oats.

CARD OF THANKS

I wish to thank the Ladies' Aid and the Missionary Society for the kind letter of sympathy during my recent bereavement.—Mrs. Howard J. Kittle.

CARD OF THANKS

We wish to thank our friends and neighbours for their kindness and sympathy and the beautiful floral offerings during the sickness and death of our wife and mother.—Geo. E. Smith and family.

"Do you play hockey?" inquired a doctor, as he examined his patient's shins.

"No," replied the patient; "I play bridge, and my wife is usually my partner."

...IS SEASON OF GOODWILL, we extend to our customers, one and all, our sincere thanks for another year of happy business relations. May they long continue to be a source of mutual satisfaction.

And with cordial wishes that the joyous Christmas season may bring deep and abiding happiness to you all.

ONE AUTO IN THE ARCTIC

(Edmonton Journal)

THERE IS ONLY ONE automobile in the Arctic, and that's at Bernard Harbor.

Ray Ross, Hudson's Bay Company agent at Bernard Harbor, who reached Edmonton recently after rescue from the ill-fated Baychimo, has owned the car since 1926 and operates it every summer.

"What does he do in the winter for storage?" is the natural question.

"Easy,' 'answers Mr. Ross; "I just leave it. When spring comes I just put in new spark plugs and start 'er up."

Mr. Ross didn't worry much about steam-heated garages for his trusty car over the winter. He just got out of the car when winter came, and waited until spring to get into it again—after changing spark plugs. The Arctic snows sift and drift over its chassis, but that doesn't seem to disturb the "workings' 'in the least.

And no lights are needed. In the Arctic summer there are only a couple of hours of darkness at Bernard Harbor—and Mr. Ross sleeps sometime.

Mr. Ross was a member of the crew of the Baychimo which was lost last week, either sunk or carried away by the drifting ice. Some weeks before the vessel had set out to round the treacherous coast of Point Barrow, but was trapped in the sea ice, and the ship's company went ashore. Some members of the crew and passengers were taken on by aeroplane, while others remained at the scene of the disaster.

Mr. Ross has been an agent of the Hudson's Bay Company in the Arctic for many years.

"Jones is looking for a fight. He threatens to kick me. What would you advise me to do?"

"Sit down whenever he appears."

...d Crops

This will help the Worried Farmer Solve His Financial Difficulties, Says the President of the Ontario Field Crop and Seed Growers' Ass'n in this letter to the Farming Population of the Province of Ontario

To the People of the Province of Ontario:—

During the past few years and more, especially during the past year, as pointed out by important financial and agricultural periodicals the income of the Ontario farmer has been cut in two with a very small decrease in the inevitable necessary overhead charges that must be met on time and with cash.

This unfortunate condition must re-act on general business conditions, and I think we will agree that this unbalanced condition will be remedied only by facing it square in the face.

I know the people of Ontario fairly well and have unbounded faith in their adaptability to suggestions that might improve the situation.

Our field crops have an important bearing on the prosperity of our people. Their ultimate marketing through the medium of live stock is a matter for provincial consideration.

To begin, we have too much cleared land. Travelling about will convince anyone that a large area of land should be producing forest products. As 98 per cent of a tree comes from the air, and as very poor rocky land will produce splendid forest it would be a matter of common sense to reforest many thousand of acres.

Our first step would be to conserve our wood lots that still exist by fencing and keeping out live stock to allow baby trees to grow. Forests grow very rapidly and soon come into service and value. Britain, Denmark, Norway, and Sweden and many other European countries have reforested with consequent improved climatic conditions giving bird life a chance to control insects and moderating weather conditions.

I have been informed that we imported sixteen million tons of coal from the United States in 1930. How much more or less than the amount ...Dominion Loan it ...pay for this imported ...it was in the cellar or ...am not prepared to say. ...price of fuel is evidently quite ...ady. When we first started it was at a very moderate cost, gradually increasing until now we cannot do without imported coal. Our most important field crop has slipped through our fingers in Southern Ontario. Forty years ago a village of two thousand people required two thousand cords of wood to keep it warm. That gave work to our farm helpers in winter. All the money for fuel was distributed in the community. The bricklayer, the cheesemaker and others cut wood and received their own fuel in exchange at a very moderate cost. To-day these mechanics have to have double pay as they are comparatively idle in winter.

Over 125 years ago the Highland Agricultural Society took up the matter for farm woodlots.

In the first issue of the "Canada Farm" in 1864 on the first page you will find the first article published was on "Forest Management" from which I quote:—

"This wholesale destruction of the forests of Canada is an evil that begins, at least in many localities, to demand a check. Firewood grows scarce and dear, the landscape is becoming naked, it is difficult to procure suitable timber for various uses, the shelter needed by many crops in exposed situations is removed and unfavourable climatic changes are taking place which can be clearly traced to the wholesale and indiscriminate destruction of timber."

I would suggest that at this time each municipality appoint a consulting forester from amongst its own people who could show people how to harvest many mature trees in our woodlots and not diminish our supply.

There should be a market for posts and poles. Hydro and telephone building in Ontario gives a good market for our own products. The Ontario woodlot would yield a good cash crop. Basket material is wanted. Ash is needed for handles and tongues for farm implements. I was looking over several woodlots in a township of Western Ontario recently. The township area is 61,000 acres; of this acreage 6,000 is woodland. I saw three rock elm for which $80.00 was offered. These were in an area previously harvested in 1876. The owner tapped 535 maples and sold 125 gallons of maple syrup. The farmer calculated on three-quarters of one cord an acre per year without diminishing the wood supply. Solid wood selling at $12 a cord represents a splendid field crop.

The work of Weed Inspectors in Ontario during the past few years has borne great fruit. Last year there were many summer f...ws (land on which all vegetati... ...roved by ploughing an... ...during the growing season).

The value of this practice is re...red to by John Hobson, of Guelph, in a prize essay published in the annual report of the Board of Agriculture of Upper Canada, Vol. IV, 1860, as follows:—

"The expediency or inexpediency of pulverising and cleaning the soil by a bare fallow, is a question that can be determined only by experience, and not by argument. No reasons, however ingenious, for the omission of this practice can bring conviction to the mind of the farmer, who, in spite of all his exertions finds at the end of six or eight years that his land is full of weeds, sour and comparatively unproductive."

The British millers many years ago announced to the people of Western Canada that quality of wheat is maintained only by growing it on clean land.

With clean crops and consequent better quality we should carefully consider the importance of the value of good live stock as a medium whereby our field crops should be marketed.

Jersey Island, only 45 square miles in area, has loaned more money to the British Empire than any area of its kind in the world. This island has the world's record for an acre production of potatoes. Very high class live stock has made the Jersey Island farmer the richest in the world.

it.

Anyone buying clover or grass seed should ask to see the control sample certificate which must accompany all grass and clover seed sold for seeding purposes This certificate, furnished by the Dominion Seed Branch tells the name of the weed seeds contained in the sample.

The live stock population statistics show that we will be short of good producing stock to consume our products. It is important to keep the balance and not have an over abundance of feed with no animals to consume it.

Let us hold steady under the trying conditions and as Disraeli suggested be ready when opportunity comes.

The farmer's wife and his family deserve great credit for adjusting themselves to unbalanced conditions. They have in many cases returned to the old crafts to help along and like the mother in the Cottar's Saturday Night,—

"Wi' her needs and her shears
Gars and claes look amaist as weel's
the new."

Fooling the Undertaker ....

The village undertaker so persistently inquired after the sick that he was called "Old Death Hunter." An invalid old lady, in particular, was his game, and one morning calling on her as usual, he was told that the poor dear thing was gone. "Ah, at what hour did she depart?" By the ten o'clock train."

ARE YOU GOING TO DRIVE YOUR AUTOMOBILE WITHOUT PROTECTION?

The Highways Traffic Amendment Act of 1930 effective Sept. 1st, places a very heavy responsibility on the owner of a car.

will be remember for the good she
has done and the sacrifices made. The
influence of this life she leaves to her
family is a wonderful heritage, in-
deed.

The funeral service was held at her late residence on Sunday, Dec. 13th, at two p.m., conducted by her pastor, Rev. R. E. Newman, of the United Church, Chesterville, of which church she was a member of good standing.

The pall bearers were all Munro nephews: Messrs. Enos, James, John E., Calvin, Hector, and Jno. A. Munro.

The floral tributes were many and beautiful, including: pillow from Mr. and Mrs. Enos Merkley and family; wreath, Mr. and Mrs. Geo. C. Merkley; spray, Mr. and Mrs. Arthur Bailey and family; wreath, Mrs. Lutheria Bolton, Mrs. Etherington and Mrs. Squire.

Those attending from a distance were: Mrs. Bolton. Toronto, and daughter, Mrs. Etherington; Mrs. A. E. Meldrum, Mr. and Mrs. P. Carscadden, Mr. and Mrs. J. E. Gray, all of Ottawa; Mr. and Mrs. Jno. Froats and son, Mr. Harvey Froats, of Morrisburg.

A large concourse of relatives and friends followed the remains to the last resting place in Maple Ridge Cemetery, testifying to the respect held for the departed.

Elma

Mr. Oscar Beckstead is spending a few days in Cornwall on county business.

Mr. and Mrs. W. A. McMillan and Mrs. Carkner were in Ottawa on Saturday.

Our school is closed for the holidays and our teacher, Miss D. E. Wallace, will spend the holidays with her parents at Winchester.

Mr. and Mrs. Luther Deeks, Mrs. Anson Deeks and Mrs. Jas. Herriman spent Monday in Chesterville.

Why Some Men Are Winners

London Advertiser—The statistician of the Swift Company in the United States has been analyzing that company's experiences with young men. He finds that only 1 out of 10 make good. The fault with the nine has been on their own part. The opportunities of good employment and advancement have been open to the ten; but only one out of ten has had the sense to take advantage of the opportunities. It is pretty much the same in every occupation and in every part of the world. Men are their own hindrances.

The statistician gives five principal reasons why young men who have been taken into service by the Swift Company have been failures nine to one; and the nine have lost their jobs.

The first is lack of sense or responsibility: neglecting work and letting some other persons do the worrying.

The second is shirking: Unwillingness to work hard. Arriving late and leaving early; take extra time at lunch hour, and wasting time in telephone conversations and other ways.

The third is lack of thoroughness: Unwilling to master one thing before going at another.

The fourth is false notions of salary and promotion. Not realizing that the key to promotion is to do more than one is paid for. The mistake is expecting to be paid for more than one does—which would ruin any worker.

The fifth is lack of principle. This is shown by concealment of mistakes. untruthfulness and constant making of excuses.

These reasons may be said to be generally applicable. The young man who wants to succeed will be interested in his employer's business—so interested that he will not be a mere clock watcher: He will always be willing to take on work and do it thoroughly: And he will be honest with himself and his employer. Such a young man usually succeeds.

A Bug in a Rug.

The Khan, in Toronto Telegram.

My ambition in life is to live in a house by the side of the road and be a friend to man. It would make me supremely happy to stand out at the gate when night was falling, when the snow was blustering and when the winter winds were howling through the hills and hand each wayfarer a sleeping bag. He would take his sleeping bag and mosey off to the barn or the straw stack, yeah, he could lie down in any fence corner and sleep—snug as a bug in a rug till morning. From our earliest infancy we have heard of the bug in a rug and never took the hint. The concrete experience and intelligence of the ages have agreed that the supreme example of comfort is a bug in a rug. To be as snug as a bug in a rug means that you are delightfully warm, your feet are not cold, nor your nose nor your shoulders. If there is another bug in with you why all the better; the point I'm trying to make is that if you are as snug as a bug in a rug you needn't care whether school keeps or not.

We are told that the foxes have holes. This might be freely translated thus: Foxes have sleeping bags. For what is that hole in the ground but a sleeping bag? That sleeping bag is one of the wonders of the universe. You go to work and dig a hole in the ground and see if you can keep the water out of it. But a fox can do it. His sleeping bag is as dry as a bone all the year round. It is a marvellous sleeping bag, defying frost and damp and absolutely free from draughts, the things that carry off nine-tenths of the human race

Consider Brer Bear. He dwelleth in a hollow stub. What is that hollow stub but a sleeping bag. Only this and nothing more. When he wants a snooze he crawls into his sleeping bag and that's all there is to it. I never cut down a hollow tree. The Lord of the forest meant it as a sleeping bag for some of his precious wild things—a pair of coons perhaps, or chipmunks or black squirrels or a benign and marvellous owl, the most amazing thing that hath wings. Oh, a multitute of wonderful creatures find a home in the hollow tree or a vacant stump! And they do line it with grass and moss and fur and feathers and be hold—a sleeping bag!

Preparing the Bees For Winter

(Experimental Farms Note).

All work in the apiary has for its ultimate object the securing of a good crop, and hence the preparation of bees for winter means more than the safe wintering over of the colony.

The first step in preparing bees for the winter is also the first of the beekeeper's year as well as his first step towards securing next season's crop. About the middle of July preparations are commenced by seeing that each colony is headed by a vigorous young queen in order that the maximum number of young bees may be reared to carry the colony through the winter. Should the fall flow be insufficient to cause a large amount of brood to be reared, stimulative feeding will have to be resorted to; that is, 1 part of sugar to 1 part water or dilute honey mixture must be fed. Colonies that are weak, those covering less than six frames, should be united; this may be done by the newspaper method; or two weak colonies may be brought together and wintered in one hive if it is divided by a close fitting division board. This latter method provides the beekeeper with surplus queens early the following season.

Having secured a large force of young bees, the next step is to see that each colony has sufficient stores to not only carry it through the winter but also through the early spring till pollen and nectar are coming in, thus enabling it to build up rapidly. The stores provided should be of the best; no unwholesome honey containing a high percentage of solid matter should be given. If natural stores are deficient, a syrup of two parts of the best granulated sugar to one part water should be fed. This being last stored will be the first consumed and, as it breaks down into gas and water, will defer solid matter accumulating in the intestines. Colonies in ten frame Langstroth hives to be cellar wintered should weigh at least sixty pounds without their covers, while those wintered outside seventy pounds or more.

Protection from the cold is very necessary, as it not only retards the consumption of stores but also conserves the energy of the bees.

Colonies wintered outside should have at least three inches of packing underneath them and about their sides with six to eight inches of packing on top. The most economical case is the quadruple, as each colony has the warmth from its two neighbors. Colonies should be placed in their cases and packed underneath and about sides before feeding. For feeding, ten pound honey pails in the cover of which fine holes have been made, are considered very satisfactory.

Colonies to be placed in the cellar are usually left on their summer stands till they have had their last cleansing flight; this is usually in the second or third week in November.

In all preparations the beekeeper should keep the ultimate object in view—strong colonies in the spring.

Obliging

Tramp--Your dog just bit a piece of flesh out of my leg, mum.

Woman—Glad you mentioned it. I was just going to feed him.

How The Watch Disappeared

A judge was pointing out to his court that a witness was not necessarily to be regarded as untruthful because he altered a statement he had previously made. "For instance," he said, "when I entered this court today I could have sworn I had my watch in my pocket. But then I remembered I had left it in the bathroom at home.

When the judge got home that night his wife said, "Why all this bother about your watch—sending four or five men for it?"

"Good heavens," said the judge, "what did you do?"

"I gave it to the first one who came—he knew just where it was."

To Holders of Victory Bonds Due Nov. 1st, 1923

The Parliament of Canada has authorized a Refunding Loan to meet the payment of Victory Bonds due 1st November, 1923.

The new loan may be had for terms of five years and twenty years, paying interest at the rate of 5 per cent per annum.

TO CASH SUBSCRIBERS

This issue presents a most attractive investment. The security is the very highegt and the income raturn high.

The bonds are offered for cash at the following prices :

Historical Research for The Dominion

Wm. Webber, Montreal, Marquis of Sligo, Captain E. Griffiths, R.N.R., "Empress of France," Marchioness of Sligo,

AFTER a two-year holiday, completing a mileage of 46,000 miles on Canadian Pacific railway and steamships, the Marquis and Marchioness of Sligo returned to their London home. During their stay in the Western hemisphere, the Irish peer diverted from his main course of travel, visiting all the leading republics of South America and in the latter days of his travel diverted his course to Southern China, where he narrowly escaped by some few minutes being taken by bandits.

Prior to his departure on the S.S. "Empress of France," the distinguished visitor forwarded to the Canadian Government an interesting document found in the Sligo family correspondence, being a letter from the Hon. Henry Browne, who was associated with the capture of Quebec.

For some time past, the Marquis has been occupied in gathering data about his family and the part they played in the history of Canada and the Dominion is to reap the benefit of his research. The Marquis began his researches with the famous picture of the death of Wolfe, by West, and after careful investigation he has succeeded in identifying a number of the individuals who surrounded the general as he lay on the ground. Chief among these is Lt. Henry Browne who was the standard bearer in the Louisburg Grenadiers which fought on the right of the line in Wolfe's army. In the picture the Lieutenant is shown holding the standard. Later, according to evidence gathered by the Marquis, his ancestor helped to carry the general off the battlefield after he had died,

Boy Dies From Blood Poisoning

Gerald McMahon, the twelve year old son of Mr. Alfred McMahon, passed away this morning from the effects of blood poisoning caused by a rusty nail having run into his toot a few days ago. Friday last it was first noticed that anything was wrong when a doctor was called at which time the trouble seemed to be in the knee of the other leg from the injured foot and not until later was it recognized as being so serious. Everything possible was done but the progress of the poison could not be arrested.

GRANTLEY

Mr. and Mrs. Wm. McIntyre of Finch, spent Sunday with Mr. and Mrs. Arthur Beckstead.

Mr. Ted Crawley of Morrisburg, spent the week end with Mr. Bert Myers.

The young people enjoyed a big corn roast here one night last week.

Visitors at Milton Carr's on Sunday were Mr. and Mrs. Geo. Eligh and daughter May of Finch, Miss Ida Barkley of Newington, and Mr. and Mrs. Alf. Wells and family of Aultsville.

Mr. and Mrs. Ed. Perault and family spent Sunday with Mr. and Mrs. Wm. Bailey, Nation Valley.

Miss Gladys Carr is spending a few days with friends at Aultsville.

Mr. and Mrs. Frank Darling spent Sunday with Mr. and Mrs. John Bogart's of Chesterville.

Mr. and Mrs. Thomas Black spent Sunday at the home of Mr. Arthur Beckstead.

Mr. and Mrs. Tommy Carr spent Sunday with Mr. and Mrs. Reuben Weegar.

Misses Bessie and Helen Taylor spent Sunday with their uncle Mr. A. Bush, Finch.

Mr. and Mrs. John Pitts and family of Gallingertown, Rev. Mr. Baron, Mrs. J.T. Kearns and son Hubert and Mr. Tommy Lapierre of Chesterville spent Sunday at Mr. Alex. Taylor's.

GOLDFIELD

Miss Gladys Nephew B.A. left on Saturday for Toronto to attend the Faculty of Education.

Mr. Ambrose McMahon B.A. left on Saturday for Toronto to attend Osgoode Hall.

Mr. R. McMahon of Los Angeles, Cal. is spending a few weeks at the home of Mr. and Mrs. Jas. McMahon.

Misses Blanche and Ethel McMahon of Ottawa, spent the week end at their home here.

Mrs. C. Burton of Aultsville, is spending a few weeks visiting relatives here.

Mr. and Mrs. R. McMillan and family of Avonmore, visited the former's parents here on Sunday.

Mr. and Mrs. C. Wolfe and children of Ottawa, were week end guests at the home of Mr. and Mrs. Roland Droppo.

Mrs. H. Gillies spent a few days in Ottawa recently.

Mr. Jas Froats I. P. S. visited the school here on Friday.

A number from here attended the Rural School fair held in Berwick on Monday.

The meeting of the W.M.S. of St. Luke's Presbyterian Church, Finch, was held at the home of Mrs. John Casselman on Tuesday.

The farmers are busy filling silo.

CANNAMORE

A large number from here attended Russell Fair last week.

Mrs. John Glasgow was the guest of Mrs. Wm. Campbell on Sunday last.

Mr. Frank Robinson was not at work on Monday, on account of his grandfather's death at Mountain.

Mr. and Mrs. W. J. Wert spent Sunday at Northfield.

There would be considerably less work for the farmers next year if weeds were cut from roadsides this fall.

Hands Blown off By Dynamite Caps

Edward Delyea, 56, of Harlow, Ontario, employed in construction work on the Addington road, was opening a box of dynamite caps yesterday morning when they exploded, inflicting terrible injuries on him. He was rushed to the hospital at Kingston and both hands were amputated at the wrists. Mr. Delyea, who is frightfully cut about the face and body, is expected to recover, despite the fact that he lost a lot of blood and is suffering greatly from shock.

BERWICK

Mr. George Ouderkirk of New Liskeard is visiting relatives here.

Mr. and Mrs. John Biccum and two children of Watertown, N.Y., and Mr. and Mrs. James Cragon and son of Philadelphia N. Y., motored last week to town and were the guests of Mr. and Mrs. Manson Alguire. Mrs. Alguire is an aunt of Mrs. Biccum and Mr. Cragon who also visited relatives at Maxville, Moose Creek and Chesterville.

The Reverend sisters of the Hotel Dieu, Cornwall, were calling in town on Friday.

Master Ellis Blair who is attending school at Ottawa spent over Sunday in town.

Miss Alice Fetterly of Business College, Cornwall, was the week end guest of Mr. and Mrs. A. Summers.

Miss Ruby Green of Newington, was the guest over Sunday of her grandmother Mrs. Dutt.

Miss Mary Curran is visiting relatives at Nortolk, N.Y. and other places.

Two little strangers arrived in town last week, born to Mr. and Mrs. Mack Montroy, a son, Sept. 20th and to Mr. and Mrs. Pat Raymond a son, Sept. 21st.

Mr. and Mrs. Duhame of Long Lake, N.Y., motored to town last week and were the guests of the latter's mother Mrs. Dutt.

The Rural School fair which was held in town on Monday was a success when a large crowd turned out for the day's sport.

Mr. George Barrigher went to Chesterville on Tuesday to work on the concrete street.

Mr. J.J. Dutt is spending a couple days in Moose Creek this week.

Mrs. Wm. Hutt is able to be out around again after her illness.

RIVERSIDE

Mr. Elburn Summers of Ottawa, was a week end visitor at the home of Mr. Dougal McMillan.

Mr. Mills Foster has men busy erecting a silo this week.

Mr. R. C. Bogart arrived home from Saskatoon on Tuesday after a pleasant trip.

A large number from here attended the School Fair at Berwick on Monday.

Riverside School won first prize for best school as well as many other prizes. Congratulations.

Mr. and Mrs. W. H. Brownlee of Finch, visited at the home of Mr. R. C. Bogart on Sunday.

Mrs J. Pollock is visiting her daughter Mrs. Blake Nephew for a week or so.

Mrs. Wm. McMillan of Goldfield, is visiting her daughter Mrs. Dan Pollock this week.

Miss Margaret Summers of Watertown, returned home on Monday.

Mrs. Bernard Shaver spent the week end at her parental home.

Mr. and Mrs. Eli Swerdfeger, Mrs. E. Swerdfeger of Cornwall, and Mrs. Fred Peck and son of Ottawa, visited friends here on Sunday.

Written to the Memory of the Late Mrs. Gertrude Feeley

Why is the home so lonely?
Why are the days so long?
And why this feeling of sadness?
Is it that mother is gone?
She left in the early evening
Her heavenly crowns to win
And Angels just then whispered,
"Beautiful Soul, come in."

She's finished her early mission,
And gone to the better land
Where with her dear departed,
She sits on Christ's right hand.
The lips closed to those who loved her
Are now singing praises to him,
All glory to God on high,
And peace on earth to men.

Oh! death, why enter our household
To rob us of mother we love,
And leave us to fight life's battles
While some are yet so young,
With mother to cheer and encourage,
Life's trials would not seem hard,
And not having her to prompt us
I fear will our progress retard.

She was gentle, patient and kind,
Her lips never a harsh word spoke
And seeing them close forever,
We wonder our hearts near broke,
Her life was a life true and tender
In every sense of the word,
She talked with us loving and kind,
And taught us the word of God.

A soul so dear to the master
Look on thy children here
And teach us thy footsteps to follow,
And feel that thou art ever near.
May we be like the kind and loving
And when this our life is done
May we meet with the kindest of mothers
In the realms beyond the sun.

A sympathizing friend,
Macworth, Sask.

Acknowledgment

I wish to thank the Provident Assurance Company and Mr. Jas. Clement their representative for prompt adjustment and payment of damage sustained by a fire in my house recently.

The Farmer's Difficult Problem

(Youth's Companion)

The most difficult problem that the farmer has to solve is how and when to market his crop. Crops are produced within a brief season, and most of them are marketed soon after they are harvested. The most natural time to sell live stock is in the fall, and the most natural time to sell wool is in the spring, just after shearing.

But the farmer has learned that it is not always best to sell his crop when everyone else is trying to sell; and he has observed that the consumer must eat and wear clothes twelve months in the year. He has also observed that it is the business of the so-called middleman to take the food that comes from the farm and hold it until the consumer asks for it. He notices that prices often rise after the rush of fall selling is over and remain high until the next crop is on its way to market; and he believes that it is his duty to himself to hold his crop until it is needed or until he can get from the consumer a price that assures him a fair return for the labor that he has spent in raising the crop.

But any man who engages in farming soon learns that prices do not move in the orderly fashion here assumed. He finds that sometimes potatoes are high in the fall and cheap in the spring. He learns that what gives promise of being a good price year proves oftentimes to be a year of low prices; or that, after he has sold in the belief that prices have reached their high point, they sometimes continue to go much higher. Many farmers think that it is all a matter of luck—that they have no influence whatever on the prices that they get for their produce that the middlemen set the prices so as to get the farmers' crops for as little as they can, and that afterwards they raise their prices to the consumer so as to get as much as they can.

But even if we admit that the middlemen do look for good bargains both in buying and in selling, that does not explain the great price-level movements that cover weeks and months of time, and affect the market prices of the entire world. Those price movements follow the size of crops and the market demand and in ordinary years can be vaguely foreseen months ahead. A great war or a financial panic may upset the estimates, but in the usual course a short crop of wheat the world over means high-priced wheat here in the United States; but a short crop of wheat in Martin County, Minuesota, or Kearny County, Kansas, may not mean anything at all so far as prices are concerned except a smaller return to the farmers of Martin and Kearny counties. A local shortage is easily made up by production elsewhere, but a general shortage, especially when one of the great exporting nations is concerned, is a matter of world-wide interest.

In the same way we can foretell with a fair degree of accuracy the shortage or oversupply of any kind of farm product, if it is of enough importance to interest those who buy and sell for a living; and, as we eat much the same amount of food and of the same kind one year after another, the man who knows how many potatoes there are in the country on November 1 can tell you, if he knows where they are, whether prices in March are likely to be high or low. Or, if we know whether the pig crop is good or poor, we can tell roughly whether hogs the following winter will bring a good or a poor price.

For almost any commodity that the farmer raises there are two and sometimes three sources of information. There is first the crop-reporting service of the United States Department of Agriculture. Its estimates are made up from reports sent in by thousands of farmers in all parts of the country on the condition of the crops in their neighborhood from the time they are planted until after harvest. The crop reports are published in the papers of the nation on the tenth day of each calendar month, but they do not mean much unless the reader studies them in comparison with similar reports of other years and also in the light of what is happening to the crops of other nations.

The International Institute of Agriculture at Rome, Italy, issues a monthly report on the crops and crop prices of all the leading nations of the world. That, like the report of the United States Department of Agriculture, is made up from the reports of observers whose estimates taken together strike an average.

Both of the reports, each of which supplements the other, will be sent to anyone who will write to his Congressman for them.

Besides those reports, some of the larger banks; including the Federal Reserve banks, issue frequent statements of business conditions that are of value to the man who is looking ahead to see what the probable market conditions will be. If labor disputes are looming up and factories are shut down, prices cannot be high, for the consumer lacks money with which to purchase. But if economic conditions in Europe are improving, there is more than a chance that trade will quicken and that prices on all export products will strengthen.

Then finally, there are the reports to be found in the trade journals that serve particular business interests. There are milling journals for the dealer in wheat, produce journals for the grower of and the dealer in cantaloupes strawberries, potatoes, cabbage and all the other fruits and vegetables. And there are live-stock daily reports, both government and private. The information is based on the best knowledge the trade has of what is really happening, and so presented as to make it accessible to anyone who wants it.

And out of his experience, aided by such information as he can gather, the producer comes after a time to know what is best for himself—whether to market his crop as soon as possible after he has harvested it or to hold it until spring; but there is one rule that may be followed with unfailing safety. That is: A man never loses money by selling when the price is high enough to cover the cost of production and add a fair profit.

Weather Forcasts: Brain Storms

"How's your wife, Blinks?" asked Jinks. "Her head troubles her a great deal," admitted Blinks.

"What's the trouble? Is it neuralgia?"

"No," said Blinks. "She wants a new hat"

Cornwall General Hospital

This institution provides skilled nursing and are at very moderate rates to those able to pay, and without charge to indigent person from the three United Counties, other than the Municipal Grants.

It is kept up by:

Fees from paying patients.

2. Grants from the Government and Municipalities.
3. Donations and Subscriptions from Churches Corporations, Societies and Individuals, the last being the largest source of revenue.

You are asked to assist in this work

The nucleus of endowment fund has been established by a legacy recently received, and parties remembering the Hospital in their wills may stipulate that bequests made by them shall go to this fund.

If you would like a copy of the last Annual Report, drop a card to the Secretary, who will be pleased to send you one.

I. T. KIRKPATRICK, President. F. D. McLENNAN, Sec'y-Treas

Plenty of Feed Necessary

(Hoard's Dairyman)

It is difficult for some dairy farmers to understand why cows will give more than their rations would warrant. It seems to be their idea that if a cow continues to sustain her flow of milk on a certain ration she is adequately fed and to give her more would be a waste of feed. We know that cows will draw upon their bodies for a certain length of time for nutrients and the milk flow will not indicate immediately whether it is sufficient for the cow's needs. It has required much investigation to determine how much nutriment a cow requires to keep her in good health and produce a good flow of milk.

In the early days milk was produced very largely on grass. The cow freshened in the spring and when the grass dried up in the fall, the cow stopped milking and she was wintered on a poor and insufficient ration for milk production. The cows handled in this manner did not produce much milk and the strain of their work was small. We still have men who feed sparingly in the winter and obtain fair results,—results that could not be obtained if the ration throughout the year did not contain more elements than it supplies in the winter months. These men forget that while their cows are upon grass that they store certain elements of nutrition which will be used for milk production during the winter when they are receiving inadequate rations.

Professor C. H. Eckles carried on an experiment some years ago, when at the Missouri Experimental Station, to determine factors which influence the percentages of fat in milk. He took a mature jersey cow and fed her a maintenance ration, that is, just enough to maintain her body without supplying any nutriment for milk production. He says, "She was compelled either to cease producing milk or to make it from the reserve in her body. This was continued for thirty days. At the end of this time she was producing only one pound of milk per day less than in the beginning, but was so weak she could hardly get up without assistance. During this time she lost 115 pounds in her weight and produced over 90 lbs. of solids in the milk from her own body."

These men who become confused, who doubt the statements made regarding variety of feeds essential to milk production and that an adequate quantity of protein and mineral matter must be supplied, should remember that high producing cows take more nourishment than those who freshened in the spring and went dry in the fall and that entirely new conditions must be met. Further, they must bear in mind that the cow, in manufacturing her milk, will draw upon the nutrients stored in her body in the form of flesh and bones unless she is supplied with a sufficient quantity of these nutrients in her daily feed. Milk production is the function of motherhood and the mother is always willing to give of herself that her young may be properly nourished. It is not good feeding when the dairy farmer appeals to motherhood to supply the nutrients for milk production which should have been provided in the cow's ration.

BONDS

Are Mortgages on Fixed Assets

When a township issues debentures (or bonds) it gives a mortgage on the whole township for security to the buyers of the bonds for the loan of their money for a definite number of years at a satisfactory rate of interest.

If the amount required is large it is divided into small mortgages, (that is, bonds or debentures) of $500 or $1,000 each, with the same security behind each, so that investors with small sums may take advantage it.

Bonds or debentures are rated the safest kind of an investment.
