Chemists Expose Cheap Paint Deception

BY ACTUAL TEST BASED ON THE DOLLAR VALUE

Do you realize a job requiring $2.20 worth of cheap paint, may be done better with $1.10 worth of LOWE BROS. HIGH STANDARD PAINT?

FOR HARD, DRY, LAND

Fleury=made Shares

Are superior to all. They are made of a special mixture of iron, which produces a quality share that outwares others and gives the user more value for his money.

Quality of Material permits long points without breakage and without the point wearing "stubby". The share is largely self-sharpening, resulting in extra long wear. Fleury-made Shares do not cost the buyer any more than others.

"VADA DIRECT" WINS FIRST AT OTTAWA EX.

(By Ed. Baker, Citizen)

Daniel Driscoll of Iroquois, is a very remarkable man. At 78 years of age he was able to drive his own horse to victory in a half-mlie heat race for gentlemen drivers at the Central Canada Exhibition yesterday.

Some years back, Steve Phillips, an octogenarian of Chilecothe, Ohio, also drove the winner of a race for harness horses and it was considered sensational news.

Mr. Driscoll is an affable old gentleman who derives much pleasure from his association with harness horse racing men. But he is far from a novice in the sport.

Many years back, Mr. Drisoll drove his own horses in races in Eastern Ontario and across the border in the state of New York.

In recounting some of his experiences yesterday, the Iroquois veteran told of driving the mare, Rita Clay, by Zombo Clay, numerous races years back. And laughingly told of being in a couple of "wrecks." Behind his own horse, Billy Allan, he was in a bad spill at Morrisburg, and in another at Ogdensburg, N.Y In the latter, his neck was badly injured and he was out of commission for several weeks, but came around in good shape.

Naturally Mr Driscoll loves horses. He has been a horse lover as long as he can remember.

The little pacing mare, Vada Direct which he drove to victory yesterday, is the apple of his eye. He bought the mare last year from a man down in the Eastern Townships and has been up on the sulky in all her training this year

Vada Direct is by Empire Direct and out of Tomboy Thompson, a mare by Mobel, that was a famous sire years back at the Walnut Hall farm near Lexington, Ky. The little mare possesses plenty of courage as wel as speed. Yesterday she folowed a fast pace set by Charity Sauns and carried the latter to a break in the home stretch the first heat.

The victory of Dan Driscoll and his pet pacer was one of the features of this year's racing at the Ex.

CYCLIST STRUCK BY AUTO

Clayton Castleman, 40, of Aultsville was badly bruised and cut about the legs, this (Friday) afternoon, about 2.30 o'clock, when the bicycle, on which he was riding, was struck by a car driven by William J. Collins, of Toledo Ohio. The accident occured at the eastern boundary of the Village of Aultsville Castleman was given first aid by Dr. Brown, of Aultsville. It has not yet been decided whether or not Colins will be charged with a violation of the Highway Traffic Act.

STRIKERS ARE ASSURED NEGOTIATIONS

Officials of Courtaulds Limited Cornwall, and heads of the union, after preliminary discussion yesterday decided to continue negotiations today (Friday) regarding settlement of the strike which has affected 1,-700 rayon workers. Neither side of the dispute divulged the nature of the talk beyond that the "essentials of the preliminary discussions have been understood and agreed upon.

Suspended sentence, in the meantime, was given to nine pickets of the mill who were arraigned in Magistrate's court on charges of illegal picketing. Magistrate P. C. Bergeron reserved decision until next Monday in the case of Frank Love, union organizer also charged with the same offense.

Love has been held in custody since last Wednesday without bail. He was released Wednesday, however, on $4000 bail, following representations by J L. Cohen, Toronto, his solicitor.

There were no demonstrations at the plant, but police had to remove a number of people from the court at the time of the hearing of the pickets when one of the windows in the court room was broken.

Meanwhile the strike, declared in demand of union recognition and bet ter working conditions, has entered its third week It is understood, haw ever, the union will present a new set of demands at the Friday conference.

MISCELLANEOUS SHOWER FOR MISS ELSIE HEWITT

Miss Elsie Hewitt was guest of honor at a miscellaneous shower held recently by Mrs. O. L King at her residence on Albert Street, Chesterville. Many beautiful gifts were received by the bride-elect, who expressed her appreciation. Joint hostesses with Mrs. King were Mrs. W. N. Fulton, Mrs. R C Tait, Mrs. S. H. Hutt, Mrs. G. H. Hunt and Mrs A. J. Forward.

The large number of guests were entertained during the evening by piano solos by Miss Shirley King, humorous readings by Mrs. L. Marcellus, and a vocal solo by Mrs. W. N. Fulton. Dainty refreshments were served by Mrs. D. McElheran, Miss Aura Graham, Mrs. L. Marcellus and Miss Lera Fetterly with Mrs. C. T. Fulton and Mrs. L. H. Doering presiding at the tea table.

ASSESSMENT APPEAL ADJOURNED

After hearing seven assessors of Dundas county municipalities, Counties Judge Francis T. Costello adjourned on Tuesday afternoon until September 8th the hearing of an appeal launched by Cornwall Township against the equalized assessment fixed by Stormont, Dundas and Glengarry counties' council last June.

Witnesses included: Ira W. Beckstead, Matilda township; James M. Flegg, Matilda township; Edgar Kenny, Mountain township; James Lane, and John W. Weston, Morrisburg; P. W. Empey, Winchester, and Percy J. Prunner, Williamsburg, Assessors of Winchester, Osnabruck and Finch townships, and Finch village have been summoned for the September 8th hearing.

C.J McDougall, Cornwall, is appearing for the appealing township; W. B. Lawson, K C., of Chesterville; Donald MacDonald, K.C. Alexandria, and Lionel Chevrier, M. P., Cornwall, for the counties, and J. G. Harkness, K.C., for Cornwall. Arthur Flynn, warden of the counties is holding a brief for Morrisburg.

GRAHAM—HEWITT

A very attractive wedding was solemnized Tuesday morning in Trinity United Church, Chesterville, when Elsie M. Hewitt, daughter of Mr and Mrs. P. G. Hewitt, Chesterville, was united in marriage to C. Allison Graham, son of Mr. and Mrs. Charles Graham, also of Chesterville. Rev R C. Tait officiated.

The church was beautifully decorated with gladioli, phlox and ferns The guest pews were indicated with large white organdie bows.

The bride looked charming in a gown of white satin, made on princess lines. The neckline was softly draped and held in place by rhinestone clips. The sleeves were long and tight-fitting, ending in a point over the hand. The veil of silk hemmed with seed pearls, was held in place by a wreath of orange blossoms. She carried a bouquet of Tallman roses. The bride was attended by Miss Jean Fulton as maid of honor and Misses Betty Bolster, Helen Hamilton, Aura Graham, Madge Campderros and Mary Pomeroy of Enosbury Falls, Vermont, as bridesmaids.

The groom was attended by his brother, Keith of Montreal. The ushers were Fred Gamble of Montreal and Edward McCann of Brownsburg.

The Wedding March was played by the bride's father. During the ceremony the choir rendered "O Perfect Love." Mr. Trevor Allison, cousin of the groom sang "Because" as the register was being signed.

Following the ceremony at the church a wedding breakfast was served at the Allison Tourist Home Morrisburg.

Later, the bridal couple left for a short trip to Algonquin Park. The bride travelled in a navy and grey ensemble. On their return they will take up residence on the groom's farm near Chesterville

WILLIAMS—COUGLAR

The marriage was quietly solemnized at St. James' Church on Saturday evening, August 22nd, the Rev. S B. Holmes officiating, of Jane Perrin, second daughter of Mr. and Mrs. Harry E. Williams, to Mr. H. Dwight Cougler, younger son of the late Mr and Mrs. Owen Cougler, of Williamsburg. The bride, who was given in marriage by her father, and was unattended, wore an English tweed ensemble with matching hat and a corsage of Talisman rosebuds. Following the ceremony, Mr. and Mrs. Cougler left by motor on a trip to New York through the Adirondacks, and will return home by way of Hamilton and Toronto, later taking up residence in Perth, where Mr. Cougler is a member of the staff of the Bank of Montreal.

CHAS. TOUSAW

Charles R. Tousaw, prominent insurance broker of Montreal, died suddenly at his summer home at Iroquois Thursday. He was in his 70th year. Born at Iroquois, he received his early education in that town and at an early age entered the dairy business in Ventnor, Ont He later entered the same business in Inkerman and Aultsville. In 1895 he went to Montreal as superintendent of the dairy he was then working for and in 1900 he took over the Standard Dairy.

He was prominent in Masonic circles and a 32-Degree Scottish Rite Mason.

He is survived by his wife, formerly Emma A Anderson of Aultsville; his daughter, Miss Edna Tousaw of Montreal; two sons, Albert A. Tousaw of Montreal, and George M. Tousaw of Halifax; two brothers, John A. Tousaw of Philadelphia and Ansel Tousaw of Iroquois; four sisters, Mrs Philip Welch, and Mrs. George Briggs of Cardinal, Ont., and Mrs. William Merkley and Mrs. Eden Merkley of Iroquois.

The funeral service will be held Saturday and interment will be in the family plot in the Iroquois cemetery.

FOR SALE

Faulty Brakes

The man or woman who takes out a driver's license performs a voluntary act which involves an implied contract with his fellow citizens. Surely one of the items of that contract is a declaration on the driver's part that he possesses and will exercise that speck of sense which tells him that brakes are life-savers. It is no life-and-death matter if the engine won't turn over, but a car that can't be stopped within a reasonable distance is the equivalent of a mad elephant.—Winnipeg Tribune.

Tilted Workers

Colgate University research professors have made the astonishing discovery that the man who tilts back in his chair and cocks his feet on the desk can work faster than the fellow who sits in a normal position. Tests on a group of students revealed that the young men could add figures 7.1 per cent. faster and 14-1 more accurately with their feet elevated. Just the same if we catch anyone around our office with feet where arms ought to be we are afraid that what we say will sound rather old-fashioned.—Midland Free Press.

Try Common Sense

Another slogan which might be employed in an attempt to bring home to drivers, pedestrians and all others who make use of the highways the extreme folly of reckless and careless practices is "Try Common Sense," for it is lack of this ordinary, everyday, saving possession which lies at the root of a good many of the accidents which are occurring.—Brockville Recorder.

Dissenters

Strange as it may seem, there are still a few old-fashioned parents here and there who refuse to do what their children command them to do.—Windsor Star.

God Collection

The Metropolitan United Church of London was robbed of more than $800, representing two collections on Sunday. Congratulations mingle with condolences on the part of pastors with less generous flocks.—Toronto Mail and Empire.

An Australian Verdict

The leading women's publication of Australia took a straw vote as to whether the Dionne quintuplets should be returned to their parents or left in the charge of Dr. Dafoe. There were 24,000 answers with 16,000 in favor of the continuance of state care. This majority verdict would probably be substantiated in all other civilized lands.—Brantford Expositor.

Dr. J. W. Dafoe

Dr. J. W. Dafoe who is termed the Dean of western journalism, though 70 years of age, appears as stalwart and vigorous as a man half that age, and Mr. Brockington, in referring to his long service to the people of Manitoba through his paper, the Winnipeg Free Press, stated that he believed he would go on so indefinitely that they would have to shoot him on the resurrection morning.—Coleman Journal.

Suspended for Life

In the expressed hope that it will make an impression on our own lawmakers and magistrates the Montreal Star reprints an item from an English paper which records the fact that

"Vivian Stacey Saunders, aged 30, dairy farmer,, of Lane End High Wycombe, Bucks., was convicted at High Wycombe on two charges of driving a goods motor-van while under the influence of drink. He was suspended from driving for life and fined £10.

The St. Thomas Times Journal agrees heartily with the attitude taken by the Star. It observes that while suspension for life from driving a motor vehicle is a serious penalty it must be kept in mind that driving while drunk is also a serious offense.—Toronto Telegram.

A Busy King

The new King's automobiles are smaller than those used by King George, whose autos were exceedingly large and roomy. He had, in fact, the largest private cars in the world the wheel base being 157 inches, and the width 65 inches. Still, the new car which King Edward has purchased is large by ordinary standards, having a small desk in front of his favorite seat at which he will be able to write. King Edward is a busy man; indeed, he does not like to be idle. —Stratford Beacon-Herald.

Natural Pose

A farmer, visiting his son at the university, took the boy down town to have his photograph taken. The photographer suggested that the son stand with his hand on his father's shoulder.

"It would be more appropriate," remarked the father, "if he stood with his hand in my pocket." —Rural Progress.

Works Both Ways

Isn't this amused condemnation of the geographical ignorance of our visiting tourists being overdone? It would be just as possible, no doubt, to make a collection of the "faux pas" committed by Canadians on tour in the United States. Poking fun at the "innocent abroad" is an ancient and rather discredited pastime.—Hamilton Spectator.

Comparatively Simple!

The Marquess of Willingdon, recently returned from a five-year term as Viceroy of India, has been offered the presidency of the British Broadcasting Corporation. Having made the Hindus and Mohammedans behave fairly well, His Lordship shouldn't experience much difficulty with interference, static and swing music.—Windsor Star.

"Good Will"

A large Japanese fleet has arrived at Amoy, China, on what is termed a "good will tour." On the other hand it is more than probable that the animating idea is to impress upon the Celestials the folly of displaying too much will on their own account.—Brantford Expositor.

EMPIRE

A Great Leader

Welcome to Sir Robert Borden, war-time leader of Canada, a splendid statesman in the Empire cause, foremost of the Empire Prime Ministers who ruled us in the dark days. He departed from the scene after the war, taking with him the deepest respect and love of the people. He was compelled during the war to do many stern and determined acts. There is now no man more admired and respected for his courage. The Empire wishes well of this devoted public servant who has contributed so much to the well-being of the British peoples.—London Express.

An Old Complaint

British goods may be the best in the world, but our salesmen and sales methods, says Mr. Bogenlung-Jensen, a big Danish retailer, are the world's worst. It is chastening for us to learn our short-comings from foreigners. Once was the time when British goods were so good that they sold themselves. Now they have to meet the blast of high-powered salesmanship. Since we as a nation are skilful enough to make good stuff, we ought to be able to acquire the skill to sell it, at home and abroad.—Manchester Chronicle.

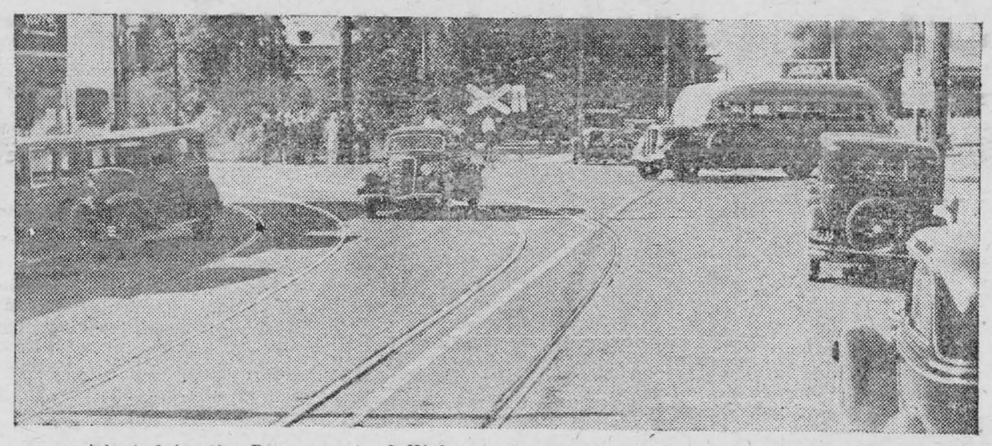

The Song of the Shirts

The fable of the melancholic Sultan who was told he would not recover till he had slept in the shirt of a happy man and, sending forth his emissaries to the four quarters of the earth, found only one happy man—who had not a shirt to his back—has a very apt modern application, particularly as to the end. Happy, indeed, is the country nowadays that is not plagued with shirts, or "blessed" with them, for the blessing has very much the appearance of a plague in disguise. Unfortunately, "shirtomania" is catching. Even Egypt has developed it, and from the very beginning it is causing trouble. At first, there was merely an insignificant body of "green shirts" who found that the adoption of their underwear as a uniform gave them an importance that they would never have been able to obtain, or merit ,otherwise. Then the Wafd founded a counter-organization of "blue shirts," and the trouble began. The Egyptian Army is shortly to be increased in strength. Now, if thfese young lads must needs wear a uniform, as it seems, and if they are so bursting with patriotic energy as they maintain, let them have their uniform by all means (a shirt if they insist), but let it be khaki.—Cairo Sphinx.

Why?

We can't figure out how it is that nature insisted on putting all the vitamins in spinach and liver and onions instead of apple pie and chocolate cake.

An Aid To Safety Program

Adopted by the Department of Highways for standardized use throughout the province and deemed by traffic experts to be an important step in the Department's recently-launched highway safety program, a new traffic-actuating control system is now being installed at a number of heavy intersections at Ontario points including Toronto, Ottawa, Newmarket and Grimsby, The new robot system replaces the stop and go system, at present in general use on a fixed time schedule, and has the passage of the vehicles themselves actuating the lights, with no waits for the motorist when there is no cross-traffic in proximity, explains A. V. Armstrong of Northern Electric, who is supervising the installations throughout the province. ABOVE shows the traffic control at Niagara Falls, Ontario, where the first installation in Ontario has just been put in operation.

New Robot Signal System Facilitates the Traffic Flow

Important Step in Safety Program — Already Installed at Strategic Points—To Be Standardized Throughout The Province

Adopted by the Department of Highways for Ontario and deemed by traffic experts to be an important step in the Department's new highway safety program, a traffic-actuated signal system is now being installed at several Ontario points which will obviate the necessity for the motorist's waiting for a green light when there is no cross-traffic in proximity. According to tests, the new robot system reduces accidents, facilitates traffic flow, lessens the municipal cost of traffic control, as well as saving the motorist's time and temper.

Its use is expected to be standardized throughout the province at heavy intersections, traffic experts state. The first installation in Ontario went into operation at Niagara Falls, Ontario, at the Bridge and Victoria Sts. intersection, believed to one of the most dangerous in Canada in that this presents a network of railway and street-car tracks over two bisecting highways that are thoroughfares for a heavy flow of tourist traffic to and from Canada at this border point.

The system is also in operation at Newmarket, Ontario, where the Yonge-Eagle intersecting highways are important traffic arteries to Muskoka, Lake Simcoe and other vacation areas. The robot signals are also in use near Grimsby, Ontario, where provincial highways No. 8 and No. 20 cross. Installations are also planned in Toronto and Ottawa urban intersections.

While the signal light system, at present in general use, changes the stop and go lights on a fixed schedule, the new robot system has the passage of the vehicles themselves actuating the signal lights, explains A. V. Armstrong of Northern Electric, who is supervising the installations throughout Ontario. Waits for the green light at intersections where there is irregularity in traffic flow will no longer be necessary and there will be no inordinate delays for cross-traffic motorists. When the car crosses over traffic detectors, placed flush with the highway surface well back from the signal-equipped intersection, this passage establishes a contact with the control mechanism and assigns the right of way by means of the standard traffic signals —green, amber and red.

The safety and time-saving factors are particularly noticeable where there is a marked irregularity in traffic volume. Cars approaching the red light are given the right of way immediately unless traffic on the other thoroughfare is using the intersection. The waiting cars receive the right of way at the first break in the opposing traffic, this reverting at the first opportunity to the thoroughfare on which the countinuous traffic was interrupted. By this means, the intersection will be in constant use when traffic offers, and there will be no irritating delays for either the main stream of traffic or the cross-traffic.

Meaning of "Ottawa"

Observes the Brantford Expositor—Q.—What is the meaning of the name "Ottawa"?—T.Y.

A.—The word Ottawa comes from the Indian word "adawe" meaning "to trade," "to buy and sell," a term used by the Cree, Algonquin, Nipissing, Montagnais, Ottawa, and Chippewa Indians. It was supplied to the Ottawa tribe because from the earliest times, traditional and historical, they were noted as inter-tribal traders and barterers. They mostly dealt in cornmeal, sunflower oil, furs and skin, rugs or mats, tobacco and medicinal roots and herbs.

English Boys Liked Travel in Canada

LONDON — Deep appreciation of the hospitality and kindness extended by Canadians to a party of English school-boys toured the Dominion for six weeks in June and July is expressed by W. H. Stevenson, director of the tour.

Mr. Stevenson, writing to The Canadian Press, said: "The boys have had a wonderful experience which they will never forget. They have learnt in a short time a great deal about the politics, industry and life of the country generally and have gained knowledge which will enable them all their lives to take a real interest in Canadian affairs and the welfare of the Dominion.

"All of us hope to return to Canada some day and renew the many friendships we have made, but, whether this be possible or not, we shall all treasure the happiest memories of our Canadian tour and of the great kindness with which we were received by Canadians in every part of the Dominion."

WHOLESALE PROVISION PRICES

Wholesale provision dealers are quoting the following prices to the Toronto retail trade—

Pork — Hams, 22½c; shoulders, 15½c; butts, 18c; loins, 22c; picnics, 16c.

Lard — Pure, tierces, 12½c; tubs, 13c; pails, 13½c; prints, 13c.

Shortening — Tierces, 10¼c; tubs, 10¾c; pails, 11¼c; prints, 11¼c. Tax to be added to all shortening prices.

HAY AND STRAW

Hay quotations in Toronto as provided by Toronto dealers are: No. 2 Timothy hay, baled, $9.00 to $10.00 a ton; No. 3 Timothy hay, baled, $7.00 to $8.00 a ton. Oat and wheat straw baled, $6.00 to $7.00 a ton.

GRAIN QUOTATIONS

Following are quotations on Toronto grain transactions for car lots, prices on basis c.i.f. bay ports—

Manitoba Wheat—No. 1 Northern 1.07⅛; No. 2 Northern, 1.04⅞; No. 3 Northern, 1.01⅝; No. 4 Northern, 97⅛c; No. 5, 90⅝c; No. 6 wheat, 89⅝c; feed 74⅝c.

Western oats—No. 2 C.W., 54½c; 3 C.W., 51½c; extra No. 1 feed oats, 52c; No. 1 feed, 49c.

Manitoba barley — No. 3., CW., 65¾c; No. 5 C.W., 63¾c; No. 1 feed screenings, $28 per ton, delivered most Ontario points.

Ontario grain, approximate prices track shipping point—Wheat 95c to 97c; oats, 43c to 45c; barley, 55 to 60c; corn, 83 to 85c; rye, 60 to 61c; malting barley, 96c to 98c; milling oats, 43 to 45c.

A file of 14,000 foreign standards, specifications, and related material is kept in the American Standards Association library.

Wants Them Gayer

It is announced that the color of British Columbia's motor license that during that year of grace we plates has been chosen for 1937, and will sport a nice, cheerful black on cream, comments the Vancouver Sun.

It is a wonderful combination for funerals. But surely it does not suggest the youthful exuberance of a vigorous young province whose chief city has just been celebrating a Golden Jubilee.

Indeed, the general crumminess—if we may say so — of our British Columbia license plates, year after year, has been the subject of considerable comment among visitors from other provinces and states and wherever our touring natives have carried them abroad.

We do not wish to criticize the good taste of the mysterious gentleman who picks these colors and designs our plates.

But while the cars from other sections of the country come in here bearing plates of graceful shape, artistic lettering and bright, pleasing colors, our plates are ugly, clumsy and drab.

Even the colors are muddy.

For the sake of our artistic population, cannot Victoria do something about it ?

Cannot we get bright, pleasing colors ?

Our present and past plates look so cheap it is pitiful.

Water Romance

NEW ORLEANS.—Clad in bathing suits, Elsie Hagner and Merlin Andrews climaxed a romance which started in the water several years ago by taking their marriage vows in the surf of Lake Pontchartrain last week.

A crowd estimated at more than 20,000 persons cheered lustily while the couple, standing knee deep in water, were married by the Rev. J. A. Simpson.

Mr. Simpson, who balked at discarding his ecclesiastical garb for a bathing suit, stood on a diving platform.

Andrews, lifeguard at the beach, met Miss Hagner several years ago when he rescued her.

The bride wor a white satin bathing suit.

Japanese Couple Make Vow of Love

TOKIO.—Divorce lawyers would do a slender business if all married couples were to take such an oath as was found on a piece of paper dropped inadvertently by a young Japanese waitress.

The girl had just been married and the paper fell from her purse while she was at work. It was an oath of love exchanged with her husband and read:

"We will not quarrel.

"We will shut our eyes to the defects of the other.

"We will understand each other."

Below were the signatures of husband and wife.

Mr. Newrich: Let's go see "The Last Shot." They say it rivets your attention from the start to the finish.

Mrs. Newrich: No, let's go to something that's not so exciting. It's bad society manners to be interested in the show.

WAYSIDE READING MATTER — By GLUYAS WILLIAMS

PROBLEMS OF EVERY DAY LIFE

By Dr. M. M. Lappin

Seeking Escape

An anxious mother has written for my advice regarding her little girl, and it seems to be a case of what psychologists call "defence mechanism". She writes: "Some days our little girl (aged 12) complains of various kinds of pains and does not want to go to school. I have had her examined twice by our doctor who says she is quite fit and there is nothing wrong with her. We have noticed that her pains come regularly on the same days and if I allow her stay from school, the pains she complains of seem to pass away after a few hours and she is all right . . . "

If you are doubtful about your family doctor's decision have another doctor look her over just to make sure, but I am inclined to think he is right, although as I have said before in this column, I do not give medical advice.

It may be that, if you go into the matter you will find the cause of all her trouble in school. Perhaps there is a teacher whom she fears, or a subject she does not like, and the wish to escape, working subconsciously or unconsciously within her, produces the symptoms of which she complains. Then, when she has escaped the dreaded ordeal, the symptoms disappear and she is all right again.

Now it is not quite true to say that such pains are imaginary. They are very real, but they are produced by fear, so do not harshly accuse the child of shamming or of deception. Get to the root of the matter by inquiring what takes place at school on those particular days when your little girl complains of these symptoms. You will probably discover it is something that can be easily rectified.

If you discover that it is some difficulty at school which she ought to face up to and is seeking to escape, then you must encourage her to face up to it. Show her there is nothing to fear, and make her feel that even her teachers do not expect from her more than the best she can do. Should you find that it is some particular teacher of whom she is afraid, a talk with the teacher might put the matter right and create a better understanding between teacher and child.

At all events, children ought to be trained to face life and that can never be done by over-indulging them with kindness and sheltering them from every difficulty and hardship. It will not do to give in to your little girl. If the doctor insists there is nothing organically wrong, then he is probably right, and you must look for the cause elsewhere. You will probably find it just where I have indicated you will.

Of course you must not be cross with the child and scold her. That would be cruel and would only tend to aggravate the symptoms. Be kindly, firm and reasonable and show her how these fears must be overcome, otherwise she will never be able to meet the problems of later life.

NOTE: The writer of this column is a trained psychologist and an author of several works. He is willing to deal with your problem and give you the benefit of his wide experience. Questions regarding PROBLEMS OF EVERY DAY LIFE should be addressed to: Dr. M. M. Lappin, Room 421, 73 Adelaide St. West, Toronto, Ontario. Enclose a 3 cent stamped addressed envelope for reply.

FINANCIAL FLASHES

Following the recent inspection of the Jubilee Long Lac Gold Mines property, a further group of men are on their way to the property to augment the crew already engaged on the ground for stripping and trenching purposes. The company is reported amply financed to thoroughly prospect the property adjoining Roche Long Lac in the eastern section of the Little Long Lac area.

Darwin Gold Mines has opened up spectacular values in raising operations in the new east-west vein on the 6th level, according to Mine manager Frohberg's report on July operations. Raising had progressed at the time of the report, to 36 ft. above the drift with the vein consisting of high grade quartz with large amounts of finely disseminated gold. Work for the period ended Aug. 8th has opened up 108 ft along the 8th level of the Grace vein, with the vein continuing in a strong condition and showing medium values. The Grace vein was only recently intersected on the 8th level. The Nyman vein was exposed at surface as an orebody 100 ft. long and carrying good values across a 3 ft. width.

Big Master Consolidated Gold Mines announce that no further offering of treasury shares will be made at the present time. Diamond drilling has now commenced on the new shoot found lying 1,115 ft. north of the shaft to determine its downward extent. This shoot is 140 ft. long, with a width of 3.9 feet and has an average value of $21.49 in gold per ton. Drifting continues on the second and third levels. A new compressor and hoist recently purchased has now been delivered to the property.

A new vein showing good values has been uncovered between the No. 1 and 2 veins on the Red Lake property of Faulkenham Lake Gold Mines, according to T. W. Dean, vice-president and managing director, who is visiting the property. No. 1 vein, which is a feldspar porphyry dyke, has been sampled for a length of 750 ft. Some 23 ft. sampled gave an average value of $21 over an average width of 36 inches. The dyke, which is from 10 to 15 ft. wide and well mineralized, has been traced for 1600 ft. No. 1 vein, which is widening to the east, has been opened for for another 100 ft. Drilling has started on the Faulkenham Lake group of claims, and it is expected the vein will be cut shortly. A crew of men have started further surface exploration on the Pipestone Bay group of claims, and it is planned to drill this property as soon as possible.

The new vein intersected in the 201 crosscut at Golden Gate Mining Co. has now been drifted on for some 30 ft., with the last face assaying $46.55 over 24 inches. At the point of intersection the vein assayed $13.30 over an equal width. The crosscut is being continued to intersect the high-grade discovery opened on surface some 200 ft. from the shaft. It is eypected that the vein will be reached within the next three weeks. Recent results at the property are reported to have attracted a group of financial interests, and it may be expected that an enlarged campaign of underground development will be started at an early date.

The Nile is the longest river in the world — four thousand three hundred miles long. The Niger is two thousand five hundred miles long. and the Zambesi one thousand six hundred miles.

CHRISTMAS CARD AGENTS

CANADA'S finest, most complete line of boxed assortments; all new, no leftovers. Our exceptional values mean more sales and bigger profits. Also an exclusive line of exceptional personals at $1 per dozen. Samples shipped free. Write A. Talbot and Company Limited, London, Ontario.

The "Countess" Is Dead

Springbank Snow Countess, 81871, sixteen-year-old Holstein cow, the world's greatest life-time producer of butterfat is dead. She died at the Springbank Farm of her owner, Mr. T. R. Dent, Woodstock, Ontario, on Sunday August 9. In December of last year at 15 years of age she completed her latest R.O.P. test with 18991 lbs. of 4.30% milk, 882 lbs. of butterfat; setting a new lifetime mark over all breeds, with a total production of 9062 lbs. of fat. Her highest year production, 1125 lbs. fat from 25,763 lbs. milk, was made in her 6-year-old form. She is the only cow that ever lived to have made three records above 1100 lbs. of fat or five above 1,000 lbs. fat; six above 900 lbs. fat or eight above 800 lbs. fat.

HAVE YOU HEARD

If things are not coming your way . . . . . get in their way.

Teacher—Junior, tell me the definition of the word 'widow'.

Junior—A widow is a woman that lived so long with her husband that he died.

Host—I shall have to put you two fellows in the same room.

Guests—That's all right.

Host—Well, I think you'll have a very comfortable night. It is a featherbed.

At two o'clock in the morning one of the guests awoke his companion.

Guest—Change places with me, Dick. (groaning) Its my turn to lie on the feather.

The man of character cannot do inferior work and keep his self respect.

Mathematics Professor — If there are 52 weeks in the year, and superheated steams equals the distance from Bombay to Paris, what is my age?

Student—Forty-four, sir.

Mathematics Professor — Correct, and how did you prove that?

Student—Well, I have a brother who is twenty-two and he is only half nuts.

The customer gazed pensively at the barber. Something about him seemed rather odd:

Customer (at last)—I say, isn't it unusual to see a barber with long hair and whiskers like yours?

Barber (nodding) — Yes, but it's good business. Every man who sees how they look on me asks for a hair cut and shave.

A rising young artist was showing a critic through his studio:

Artist (stopping in front of one of his early efforts)—This picture is one I painted to keep the wolf from my door.

Critic — Indeed! Then why don't you hang it on the door knob where the wolf can see it?

How true it is that half of the men who look at their watches don't know what time it is after they have looked.

Cynthia—Daddy was quite pleased to hear you starting out to be a poet.

Her Newest—Oh, is he? That's great.

Cynthia—Yes, the last boy friend I had he tried to throw out was an amateur prize fighter.

Most things come to them who hustle while they wait.

A man injures himself every time he wrongs another.

Distracted Wife (at bedside of sick husband)—Is there no hope, doctor?

Doctor—I don't know. What were you hoping for?

Say what you please a belt was really never made for a man with a rotund abdomen. This is the voice of personal experience.

Harris—My son is acting in the big new film.

Friend — How interesting. What part is he taking?

Harris — He is the furtive step heard retreating in the distance.

We keep on fooling ourselves long after we have ceased to fool others.

Modesty!

Writes the Toronto Star: "Last year in a dry period we published an editorial calling for rain and a request has reached us to do the same again. We are reluctant to do it because such an unnecessary abundance of rain fell last time that we hesitate to take a step that might utterly flood the country. But we have the matter under advisement. Unless a reasonable rain falls soon we shall run chances and take another whack at it.

Managing Hotels

O. O. McIntyre, New York Columnist, writes: "The intricacies of managing big hotels has fascinated me, My pet loafing places are the big inns just to see things tick. Few books have fascinated me like Arnold Bennett's Imperial Palace, which followed his months of intricate study of the Savoy in London. The Savoy's manager-director, Reeves-Smith, is likely the supreme hotel genius of the world. And yet the least known. I know people who have resided at the Savoy on and off for years, but never laid eyes on him. Men with the fame of Ritz and Escoffier were mere employes of his, whose genius he recognized in nascent stage and burgeoned into full flower.

Reeves-Smith has had 40 years of hotel management, looking out after two other big London hotels aside from the Savoy. He permits no personal publicity to go out about him. He eats in a private suite alone.

Among his duties, which he will delegate to no one else, is personal supervision of the vast Savoy wine cellars, containing $3,000,000 of rare vintages and extending clear under the Thames. Millions have heard of Ritz and Escoffier, but scarcely one in a million knows about Reeves-Smith. If they hear of his name they think of the actor.

Recalls Conditions In Spain Back in '28

Saskatoon Resident Says Signs of Discontent Manifest Even Then

SASKATOON, — Mrs. Alvin Thiessen, wife of a Saskatoon librarian, sees in the troubles of Spain the outcome of a condition she saw presaged in 1928, when she lived there teaching the English language to a wealthy Spanish family.

Mrs. Thiessen stated the senora under whom she worked lacked a realistic conception of the change which was even then stirring in the hearts and minds of the masses. A charming hostess in her 50-room hacienda, and kind to her personal servants, she accepted the miserable condition of the peasant population in one-room huts as inevitable.

"The youth of Spain — both peasants and workers in the industrial centres — were becoming more and more restive," Mrs. Thiessen said.

"I had been out of Spain some years when the Popular Front gained victory in parliament, Feb. 13, 1936. But I am certain that the internal rifts in the Leftist Government and, because of these its lack of a definite policy, spurred the Spanish Rightists on in their hope to make a successful military coup and dismember the constitutional government."

"Looking back to my days in Spain, I think of the port of San Sebastian, on the Bay of Biscay — rock promontories on either side of the blue water, with grey ruins of ancient Spanish castles stretched up to a bluer sky. Once a holiday resort—a Spanish riviera—it was lately a Fascist stronghold, more recently reported in the hands of the Government."

"But southwards where the summer days are hot, the peasants of the brown plains are armed. They have the land where rain falls seldom on dusty fields and greyish olive trees. From that land comes their scant living and they will fight to keep it."

Give Good Measure In Binder Twine

There has been little complaint as to the quality of binder twine sold in Canada in recent years. The law requires that each ball of binder twine sold, whether Canadian made or imported, bears a label showing the number of feet per pound in the ball. These statements as to length, for example 500, 550, 600 or 650 feet to the pound, are checked by inspectors of the Seed Branch of the Dominion Department of Agriculture.

A certain tolerance is allowed under the Act in consideration of variations which naturally must occur. However, of the three hundred samples or more tested annually, more than half have shown a greater length to the pound than the label called for. In samples which did not meet the guarantee, the deficiencies in length per pound were inconsiderable, and only in occasional cases did the deficiency exceed the limit allowed. Since 1930, the proportion of samples found to have shortages has not amounted to three per cent of the total number of samples tested, the proportion in 1935 being less than half of one per cent.

Edmonton Artist's Work Exhibited By Empire Society

EDMONTON. — Two paintings on exhibition by the British Empire Society of Art in London will bring to English residents a vivid picture of far Alberta.

They are from the brush of Mrs. O. J. Walker, former University of Saskatchewan student now recident in Edmonton.

One of her oil paintings at this annual exhibition is "The Industy of a Vanishing Race." It is a figure study of a squaw doing bead work at the Stony Plain Indian reserve. The background shows Chief Pound-maker's tepee, which is a museum piece at the University of Alberta.

"Canadiana," the second, will bring to English onlookers a breath of the Canadian winter. A snow scene, it shows the barracks of the 19th Alberta Dragoons on 100th Avenue, Edmonton, with trees and buildings laden in whiteness.

News And Information For The Busy Farmer

Furnished by the Ontario Department of Agriculture.

Crop Conditions at End of July Worst on Record

Crop conditions repoted at the end of July are the worst reported for Ontario since records of condition figures have been established. Intense heat from July 9th to 15th and an entire absence of rainfall over about two-thirds of the Province during the first three weeks of the month, caused severe injury to all crops. In Elgin, Essex, Kent and in counties east of Kingston, moisture supplies were generally sufficient and the best crops are suited in these counties. Fall wheat, fall rye, first cutting of alfalfa, and to a large extent, the main hay crop, were sufficiently advanced to be only slightly reduced in yield by the drought, which set in towards the end of June. Spring grains will be reduced in yield and estimated 20 per cent. for the province as a whole, with the loss in the counties of Brant, Welland, Wentworth and Haldimand, averaging close to 50 per cent. On quite a number of farms in this small area sping grains have been cut green to supplement the shortage of green fodder. Late grains are poorer than early sown fields Buckwheat, potatoes, roots, pastures and second growth alfalfa are in poor condition throughout most of the province. The milk flow is considerably below normal except in Eastern Ontario, and many farmers are feeding winter rations of hay and grain. The rains of July 23rd and 2th checked the effects of the drought temporarily, but failed to provide any great amount of soil reserve moisture, and rains are again badly needed in Southern, Central and Western Ontario.

The harvestign of fall wheat and fall rye is completed, while the cutting of early oats and barley is nearing completion in Southern Ontario, about 50 per cent. completed in Western and Central Ontario, and has commenced in Eastern Ontario. Fall wheat turned out a very good crop, with the estimated yield placed at 23 7 bushels per acre as compared with a final yield of 22.7 bushels per acre as compared with a final yield of 22.7 bushels in 1935, and 15.8 bushels in 1934. The preliminary estimate of the yield of fall rye is 16.8 bushels pe ace as against a final yield of 17.6 bushels and 15.5 bushels in the various two years, respectively. It is too early yet to predict safely the yield of spring grains, but it is fairly certain from the condition figures at at first of August, that the production per acre for these crops will be produced to the extent of approximately 20 per cent The extremely high temperatures which prevailed in the middle of July forced the premature ripening of spring grain, and together with insufficient moisture supplies, have resulted in light filling of grain and short straw. The exception for Eastern Ontario has again to be made here, as reports indicate that spring grains are only slightly below average, due to late seeding and appear to be filling well. The yield of hay and clover, and first cutting of alfalfa, will generally ensure sufficient fodder for winter feeding purposes. although a number of individual farmers may find it necessary to purchase part of their needs. The first cutting of alfalfa is placed at 1.76 tons per acre as compared with estimates of 2.02 tons in 1935 and only 1.08 tons in -934. New seedings of hay and clover have been affected seriously by the dry weather. The scarcity of pasture and aftermath in hay fields is resulting in loss of weight by live stock.

Crop conditions are particularly spotty this season. While rainfall was general on July 23rd and 24th, some sections missed the rains more or less completely. Crops on clay loams or low locations are in much better condition of crops in each of the five crop districts into which Ontario is divided, namely, Northern Eastern, Central, Western and Southern.

Humus Important to Tobacco Soils

The importance of humus in the soil cannot be over-emphasized. In most cases its supply determines very largely the productivity of the soil. Soils lacking in humus invariably are found to be in a poor state of tilth, more subject to drouth effects, and as a rule do not produce as good quality crops as soils which are well supplied with organic matter

The term "humus" should not be confused with that of organic matter. Humus includes only that part of the organic matter which has passed the most active stage of decomposition in having lost its physical structure and which, as a rule, has become thoroughly incorporated with the soil mass. Generally speaking, it is the activity in the decay of organic matter to form humus and not the organic matter itself which plays the important role in soil fertility and productivity. The part therefoe, that humus plays might be considered both direct and indirect. During the process of the decaying of organic matter the soil is teeming with life because millions of tiny organisms are at work, most of which are beneficial in assisting to render plant food nutrients available.

Organic matter in the form of humus increases the power of soil to take up moisture and retain water and soluble materials in water. Soils with a generous supply of decomposed matter are more resistant to extended periods of drougth, Humus greatly improves the mechanical conditions of soils, rendering sticky soils more crumb-like, easier to work, and enables them to receive, distibute, and hold water more effectively. At the same time, the soil receives better aeration. Most of the soil's nitrogen comes from organic material, the nitrogen being held in reserve in a slowly available form which is subquently converted into another form of nitrogen more quickly available to the plant. Mineral elements are also rendered more readily available in soils with a satisfactory humus supply.

How to increase the humus content of tobacco soils, and at the same time maintain a fertility level which will not affect the maturity and general leaf qualities of tobacco, is a problem which has required some consideration. The humus content of many of the lighter tobacco soils is naturally low and unless some organic matter is added regularly the productivity of these soils will eventually reach a point where crop yields will be seriously affected.

Experiments conducted over a period of years at the Dominion Experimental Station, Harrow, and the projects in progress at the Experimental Substation, Delhi, show that under proper soil management humus can be maintained to the advantage of the tobacco crop. Soil building must replact soil robbing, and this can only be brought about by etter-balanced crop rotations, green manuring, and some live stock on the farm to keep up the supply of stable manure. These sources of supply for the formation of humus in the soil are possible on every farm and cannot be overrated.

Drought Hits Royal Ranch and Auction of Cattle Arranged

Forty head of the 160 registered, Scotch shorthorn cattle on Edward's ranch near Pekisko will be disposed of by auction , Oct. 26, Proffessor W. L. Carlyle, E.P. ranch manager said to-day.

The sale will be held on T. A. Russel's Bonnie Brae farm at Downsview, Ont., outside Toronto, he said. The sale will enable Eastern breeders to improve their herds.

A shortage of feed on the Royal Ranch as on other holdings in drought-stricken Southern Alberta, was a factor in deciding the disposal of the catle.

JAMIESON MEMORIAL

Prizes Awarded 1936

Form V—Highest standing for 2 years' work in Form V at M.C I. goes to Wilfrid Larmour His total for 2 years was 6 I's, 2 II's, 2 III's 2 C's Highest standing for 1 year's work in subjects of Form V goes to Herbert Coons. His total for 1 year's work was 4 I's 3 II's, 3 III's.

Form IV—Highest standing in Middle School subjects goes to Arthur Colquhoun. His standing for the 2 years' work was 10 II'S and 2 credits. Highest standing for work in Form IV was a so won by Arthur Colquhoun but goes by reversion to Stuart Martin. Their standings respectively were 7 II's, 2 C's and 4 II's, 4 C's.

Form III—Highest standing in Form III goes to Mary Blancher. Her total including Promotion subjects, was 5 I's 2 II's. The Prize for the greatest improvement over the previous year's work was awarded to Phyllis Stephens.

Form II—Highest standing in Form II goes to Hazel Robinson, who had a year's standing of 84 per cent. The prize for the greatest improvement over the previous year's work was awarded to Brock Smith who brought his standing in Form I of 79 per cent. up to 84 per cent which was just one mark below Hazel Robinson.

Form I—Highest standing in Form 1 goes to Marian Loucks who had a year's standing of 79 per cent The second prize goes to Mary Laurin, who had a standing of 76 per cent. The third prize goes to George Barlow who had 74 per cent.

Commercial—Highest standing on Diploma awarded goes to Velma Gilder with a standing of 75 per cent. Highest standing in first year goes to Yvonne Pigeon with 70 per cent.

COLLEGIATE RE-OPENS TUES.

The Morrisburg Collegiate will reopen on Tuesday, Sept. 1st with the following staff:

Mr Maxwell A. Epplett, B.A., Principal, Specialist in Mathematics and Physics.

Mr. Geo. C. Powers, B.A , Specialist in Classics and Physical Culture.

Miss Margaret L Fuller, B.A., Specialist in English and History and Art.

Miss J. Doris Paddon, B.A., Specialist in French and German and Physical Culture

Mr. Harold E. Swerdfeger, B.A., Specialist in Science.

Mrs. Evelyn B. Leavens, -B.A., Specialist in Commercial subjects.

The following courses will be given:

1. Matriculation course which is entrance to University and the Arts, Science and Professional courses

2. Teacher's course leading to Normal School Public School Teacher's Course.

3 General Course which leads to the High School Graduation Diploma.

4. Commercial Course in 3 years leading to the High School Commercial Course in one year.

The office at the Collegiate will be open for registration on and after Thursday, August 27th. Night registration by appointment.

WILLIAMSBURG WOMEN'S INSTITUTE

The Williamsburg Women's Institute met at the home of Mrs. M. O. Trickey recently with 20 members and visitors in attendance. The president. Miss Meda Whittaker, presided over the meeting. In the absence of the Secretary, Mrs. C. Macdonald, Mrs. J. O'Brien read the minutes of the previous meeting which were adopted. Mrs. E Axworthy, the treasurer, read the financial statement which showed a good balance on hand. Mrs. Axworthy also read the report of the lawn social, stating that $74.25 was cleared at this venture A donation of $500 was handed in for the care of the cemetery and was most acceptable.

At this meeting it was decided to hold a memorial Dedication Day in conjunction with the Oddfellows and to work with them in regard to this matter.

An instrumental selection by Miss Ethel Gordier was much enjoyed. A paper "Husbands' opinion of the Women's Institute" was read by Miss Drake and replied to by Mrs. M. W. Locke. It was most interesting and caused much enjoyment.

Mrs. J. Hawkshaw sang a solo, "Under the Sky", her own composition, which was well rendered and appreciated. Little Miss Catherine delighted the gathering with a vocal solo "A little Rendezvous in Honolulu "

Miss Minnie Pharoah, R.N., demonstrated an invalid's tray for the three meals, also telling of the nutritious value of each vegetable used. Miss Pharoah also demonstrated the use of diet charts.

Community singing was next on the program and several sacred as well as secular songs were sung, being led by Mrs. Dick McDonald

Refreshments were served by the hostess assisted by Miss Violet Trickey and Mrs Wm. Kennedy and a social time was enjoyed. Miss Drake moved a vote of thanks to Mrs. Trickey for the use of her home for this meeting.

MAN ARRESTED FOR ABDUCTION OF GIRL

Missing from her home since Tuesday last, a 15-year-old girl was returned to her parents on Saturday and William Lewis, 45, a neighbor, was lodged in Cornwall County Jail on a charge of abduction.

Lewis was arrested Saturday night near Kemptville by Constable Moise Dousett of Williamsburg, who brought him to Cornwall Sunday morning The charge of abduction was laid by the girl's father, under Section 315 of the Criminal Code, relating to the abduction of a girl under 16 years.

According to the Provincial Police the girl's family lives in Matilda Township, and Lewis was a neighboring farmer.

The 45-year-old man and the young girl, the police say, disappeared on Tuesday night, allegedly in a car belonging to the girl's father.

The father immediately launched a complaint with the Williamsburg police. It was not until Saturday that he swore out a warrant for Lewis's arrest, according to Provincial Constable Frank Rose, who is in Cornwall on special duty.

Lewis appeared in court on Monday and was remanded for a week by Magistrate P. C. Bergeron Crown Attorney Harkness declared later that the Crown would ask for another remand when Lewis again appears in court.

According to Constable Rose, it is the second time Lewis and the girl had disappeared. The first time,, according to police, the girl's brother had been with them.

Lewis has not asked for any bail.

HONOR NEWLYWEDS

A very interesting weding was solemnized by Rev Wm Merrilees at the Manse, Iroquois, recently, when Miss Mae Bell, R.N., youngest daughter of Mr. and Mrs. Andrew Bell, Brinston, became the bride of Mr. Stanley Waddell, only son of Mr. and Mrs Wm. Waddell, Brinston, and principal of Dixons Corners public school. The happy couple spent thenr honeymoon in Chicago, at the home of the bride's sister.

Upon their return they were given a rousing reception, when members of the Presbyterian church, Dixon's Corners, and the ratepayers of S. S. No. 11, assembled at the home of the bride's father. Rev. Mr. Merilees addressed the gathering and expressed his good wishes to the newlyweds. On behalf of the congregation, Mrs. Howard Boyd read the address, and Mr John Thompson presented a silver tea service Mrs. Waddell made a suitable reply. On behalf of the ratepayers, Mr. Bert Johnston read an address and Messrs Lawrence Bell and J. Johnston made a presentation of a spinet desk and a desk lamp. Mr. Waddell made a suitable reply. Messrs. Wilf Cooper and Jos. Barton had charge of affairs. The ladies of the congregation served lunch.

Miss Parker has many friends in Morrisburg where she has been a requent visitor at the home of Mr. and Mrs. F.J. Barlow.

PROMINENT RUSSELL MAN COLLAPSES AT FACTORY

W. Edwin Hamilton, aged 58, prominent farmer and a life-long resident of the Russell district, died suddenly from a heart attack at the North Russell Cheese Factory, shortly after nine o'clock Monday morning

Mr. Hamilton was taking milk to the plant and collapsed outside. Taken to his home, he was pronounced dead by Dr. D S. MacDougall. News of his sudden passing came as a great shock throughout the district, where he was held in high regard. He suffered a heart attack last spring and had not been in the best of health since then.

A son of the late Thomas Hamilton and his wife, Matilda Loucks, he was born in the Russell district on July 18th, 1858, and lived there all his life. His home was three miles north of Russell village.

MR. THOS. JOHNSTON

Mr Thomas Johnston, retired hotel keeper of Iroquois, passed away suddenly Monday at the residence of his daughter, Mrs. Geo. Bouck. He was in good health until two weeks ago Born in Augusta township, son of John Johnston and Jane Deans, the deceased was in his 86th year. A few of his early years were spent in farming in Augusta township until he went to Chesterville and learned the hotel business, moving to Iroquois in 1897 where he bought and successfully operated the Grand Central Hotel. He was married to Mahala Berry of Mountain, who predeceased him in 1918. This union was blessed with three children of whom Mrs. George A. Bouck alone survives.

Later he married Ella Ferguson and to this union was born one son, John of Iroquois. He was a member of the Presbyterian church and was an active Liberal.

The funeral service was held on Wednesday afternoon at the residence and burial took place in Mountain. Surviving also are one half-brother, William Johnston of Mountain and three full sisters, Jane of Mountain (Janet) Mrs. Cleland of Mountain and (Mary) Mrs McGee of Kemptville

SUNDAY SCHOOL LESSON

LESSON IV. — August 30.

BEGINNING THE WORLD MISSIONS

Acts 11:19-26; 13: 1-12.

GOLDEN TEXT — And he said unto them. Go ye into all the world and preach the gospel to the whole creation. Mark 16:15.

THE LESSON IN ITS SETTING

TIME. — The church at Antioch was founded in 42 A.D. The missionary journey of Paul and Barnabas was in 47 A.D.

PLACE. — Antioch was situated in the northern part of Syria about 20 miles from the seacoast, on Orontes River. Cyprus was an island located in the Mediterranean Sea opposite to and about sixty miles from Syria. Salamis was a seaport located at the eastern end of the island, while Paphos was a seaport located at the western extremity of the same island.

"They therefore that were scattered abroad upon the tribulation that arose about Stephen." This refers back to the persecution and scattering of the Christians from Jerusalem mentioned in Acts 8.4. "Travelled as far as Phoenicia". The country immediately north of Palestine on the Mediterranean coast, part of the Roman province of Syria, in which were the great cities of Tyre, Sidon, Beirut, and Tripolis. "And Cyrus". An island sixty miles from the Syrian coast, and forty-five miles from the coast of Asia Minor, approximately thirty-five hundred square miles in area, about three times the size of the State of Rhode Island. "And Antioch, speaking the word to none save only to Jews". These missionaries were Jews themselves, and felt more confidence in confining their efforts to fellow Gentiles.

"But there were some of them, men of Cyprus and Cyrene". Cyrene was a city of Libya in northern Africa, west of Egypt. (See Acts 2:10; 13:1). "Who, when they were come to Antioch, spake unto the Greeks also, preaching the Lord Jesus". Those to whom the Christians preached were Gentiles, who were probably worshipping in the Jewish synagogue in Antioch, though they were not proselytes, i.e., they were not Greek-Jews.

"And the hand of the Lord was with them: and a great number that believed turned unto the Lord". No one person is mentioned in this account of early missionary activity. These men were not sent out under the auspices of the Jerusalem church. They went everywhere preaching the Lord Jesus because he was precious to them, because love for him filled their hearts, because Christ had changed them and given them new life.

"Now there were at Antioch, in the church that was there, prophets and teachers". Prophets were men inspired by the Holy Spirit with a direct message from God (Acts 2:17; 1 Cor. 12:28; 14: 1-15). They must have been present in most of the apostolic congregations (1 Cor. 12:28, Eph. 4:11; Acts 11:27; 15:32), and apparently ranked next to the apostles in authority. "Barnabas, and Symeon that was called Niger". Nothing is known of this man except that he was of Jewish origin, as his first name indicates. "And Lucius of Cyrene." This is a Latin name, though his birthplace or home may indicate that he was of the Jews who abounded in Cyrene and the other parts of northern Africa. "And Manaen the foster-brother of Herod the tetrarch, and Saul. The Herod mentioned here must have been Herod Antipas. It should be especially noticed that the name of Saul appears last. He is not given first place, even after his first missionary journey, by the officers of the church (15:25). Officialism is slow to recognize work not done in its own way.

"And they ministered to the Lord, and fasted, the Holy Spirit said, Separate me Barnabas and Saul for the work whereunto I have called them. It may be that the church was now assembled together with the express purpose of talking and praying about the great task of carrying the gospel to the heathen. Barnabas had already been called of the Lord to labor among the Gentiles.

"Then, when they had fasted and prayed and laid their hands on them, they sent them away". Barnabas and Saul were not here ordained to be apostles, they were apostles before this. It was, however, a service of solems dedication, in which these men received the blessing of fellow-Christians in the church at Antioch.

"So they, being sent forth by the Holy Spirit". Every work for Christ is a partnership with God. We work together with God (2 Cor. 6:1). A missionary not sent forth by the Holy Spirit is doomed to the deepest disappointment, and perhaps tragedy. "Went down to Seleucia". The seaport of Antioch, at the mouth of the Orontes River, mentioned only here in the New Testament. "And from hence they sailed to Cyprus". Probably the missionary apostles were induced to take this route because Cyprus was the birthplace of one of them.

"And when they were at Salamis." This was the nearest port of Cyprus for voyagers from Seleucia located at th eastern end of the island, and mentioned only here in the New Testament. "They proclaimed the word of God in the synagogues of the Jews: and they had also John as their attendant." This is not John the apostle, the author of the fourth Gospel, but John Mark, the author of the second Gospel, the cousin of Barnabas. The word here translated attendant is used elsewhere by Luke to designate an officer or servant of the synagogue in Nazareth (Luke 4:20).

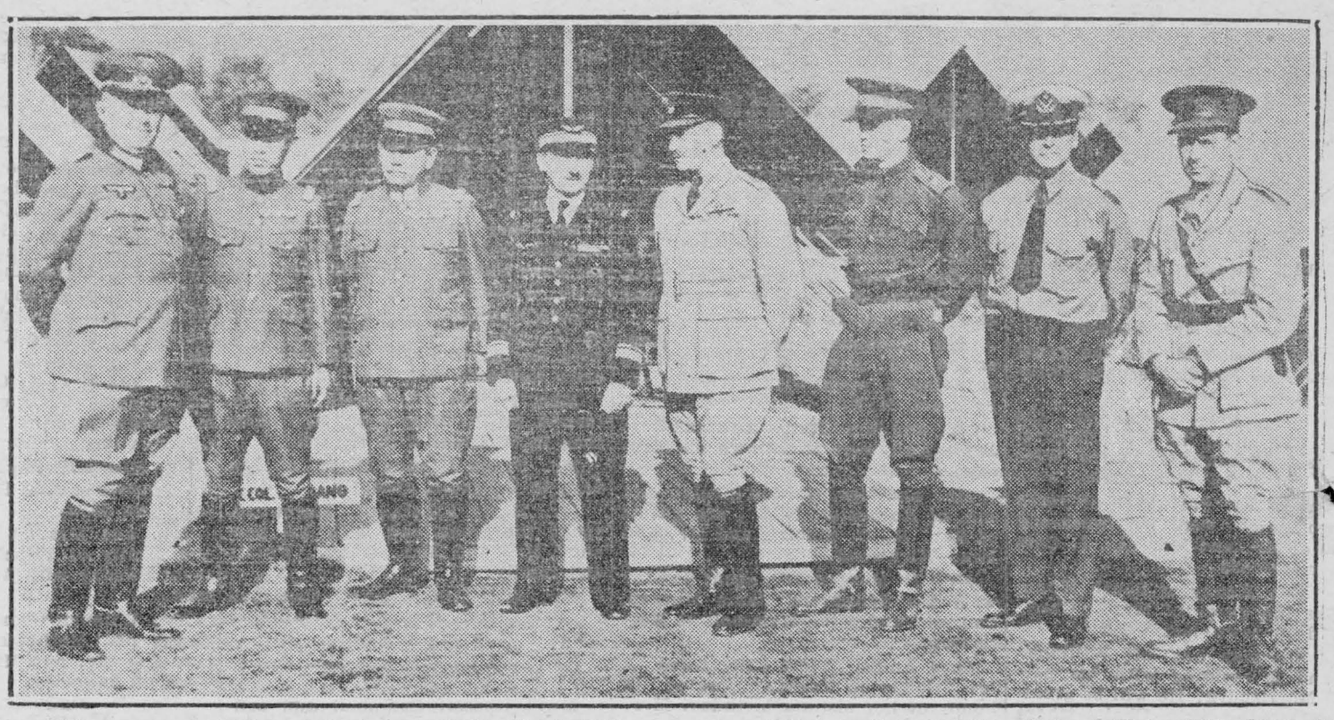

"And when they had gone through the whole island". The phrase would seem to indicate that they had preached the gospel in all the important places throughout Cyprus. "Unto Paphos". A seaport near the western extremity of the island, the modern city of Buffo, and the seat of the proconsul, the administrative centre of the island since its annexation by the Romans in 58 B.C. "They found a certain sorcerer, a false prophet, a Jew, whose name was Bar-Jesus." Cf. the record of Simon the sorcerer (Acts 8: 9-25) and of Sceva (Acts 19: 11-16). The word here translated sorcerer simply means wise man. He represented in his single personality both the modern fortune-teller and the modern man of science.

"Who was with the proconsul, Sergius, a man of understanding." Cyprus was a province which had become so thoroughly Roman as not to need the presence of troops, and was governed by a civil magistrate under the rule of the Senate. An inscription was discovered at Soloi on the north coast of this island, dated in the proconsulship of Paulus, and probably refers to this very person. A person like the proconsul, keenly interested in nature and philosophy, would enjoy the society of Bar-Jesus. "The same called unto them Barnabas and Saul, and sought to hear the word of God." Certainly this man had heard of the Jewish faith and of the doctrine of one supreme holy God. He, like great multitudes of other intellectual men of his time, was dissatisfied with the idolatrous and sensualistic religions of the Mediterranean world.

"But Saul, who is also called Paul." This is the first time that we meet the name Paul. Why he should take this name in preference to the name Saul is not known, but we do know that here the great apostle is entering upon a new period of life, and a new name could not be taken at a more appropriate time than this. "Filled with the Holy Spirit, fastened his eyes on him, and said, O full of all guile and all villainy." The first word has reference to deceit, and the second to innate wickedness. "Thou son of the devil, thou enemy of all righteousness." (Cr. John 8:44) There is hardly a more terrible indictment of one man by another in all the Bible than this fierce denunciation proceeding from the lips of the apostle Paul. "Wilt thou not cease to pervert the right ways of the Lord?" The word here translated to pervert is the same word translated in verse eight to turn aside.

"Then the proconsul, when he saw what was done, believed, being astonished at the teaching of the Lord." So remarkable is the conversion of a Roman proconsul, thus early in the history of the Christian church, that some, including Renan, regard the statement as absolutely incredible. But the narrative, aside from our belief in inspiration, is utterly free from any details that would indicate the narrative to be one written out of the imagination of later generation.

Foreign Observers Who Are Watching Army Maneuvers in West

—Maneuvers of the Second Army near Battle Creek, Mich., are being studied by these foreign officers. Left to right: Lieut. Gen. Friedrich von Boatticher, Germany; Maj. Masao Konish, Japan; Lieut. Col. T. Asano, Japan; Maj. Norbert Champsaur, France; Squadron Leader Walsh, Canada; Capt. Hiuttich, Mexico; Commander Puga, Chile, and Maj. G. McCarter, Canada.

Origination of Algoma Names

J. W. Curran, writing in the Sault Daily Star. — Mamainse, first written Mamens by the French. A corruption of "nameys," small sturgeon. Refers to the good sturgeon fishing there.

Neebish — First spelled Onipish by French. Ottawa word for a particular "water" or channel. Directed canoemen to follow it instead of the longer route to the Soo via the eastern side of Sugar Island.

Garden River — Translation of the original Ojibway name, "Kiti-Gawn," garden or field. In the old days the Ojibways grew their corn there, and some of the old corn mounds can still be seen.

Searchmont — After a Philadelphian who was interested in the original Chergue works.

Batawing — The old Indian name of the Soo. Spelled first Pouatig, "rapids there". Used by residents. Outsiders called it Pou-it-ig-oo-ung, "rapids there."

Parisian Island — Named, it is said, by French missionaries of the 18th century. Proper name is "Isle Parisienne."

Montreal River — Probably by early Montreal fur traders. The old Indian name was "Gawasajewun," "falling down rapids". Describes the miles of froth from rapids on the lower 40 miles of the river.

Rankin Location — After Col. Rankin who secured it as a copper concession about 1860.

Coppermine Point — Refers to the old mine there.

Whitefish Island — Refers to the superior fishing there.

Gawas — "Falling down". Refers to rapids.

Campment D'Ours — Bear Camp.

Manitoulin — Manitou, or Muneedo, the great spirit, plus it is suggested the word isle. Thus "Manitou's Island." An Indian says he is going to "Manitowaning" and does not use the word "Manitoulin." Manitowaning is literally "Manitou's cave here." The reference is to the cave at Manitowaning.

Nipigon — The original full name was Animipigon anim, dog; nipi or neebee, lake; goung, there. This is the Ojibway pronounciation. The first map name was "Aliminipigan," thus showing it was of Cree origin. There is no "l" sound in Ojibway, but there is in the Cree language. "Dog Lake".

Tarentorus, Korah — Can any reader give the origin of these names?

Meggison Lake — Really Mocassin.

Shikwampa River — Walled in by rock. The river is confined at one place.

Bruce Mines — The first settlers were from Bruce County.

Spanish River — A corruption of an Indian word undoubtedly.

Prince Township — After Judge John Prince, first magistrate of Algoma. Said to have been a natural son of William IV.

Garbo Might Live on Isle

Actress Secures Data About Isolated Atoll In South Seas

HOLLYWOOD, — The question if Greta Garbo plans another move "to be alone"—live in a house on the South Sea Islands—was asked recently among her friends.

Natalie Bucknall, head of the research department at the studios where the Swedish star is under contract, said Miss Garbo has asked for all available printed matter and pictures relative to the South Seas.

"I was surprised," Miss Bucknall said, "inasmuch as her present picture, "Camille," has nothing to do with that locale and neither do any of the films on her immediate schedule."

The same day, Cameraman Edward Woehler said, Miss Garbo asked him to show her pictures of the home of the late Frank Murnau, director, built on a remote island near Tahiti. Murnau made "Tabu" and other island pictures before his death four years ago and built a home on one of the least inhabited Atolls.

"She asked for a complete report on the island, how far it is from any habitation, and the present condition of Murnau's home," Woehler said. "I gathered from her questions that she was considering buying it."

As usual, Miss Garbo was not available for a statement.

He Wants More Work

—Mayor S. Davis Wilson of Philadelphia, Pa., pictured leaving the White House after asking President Roosevelt to use his efforts to have construction awards for warships placed at Philadelphia Navy Yards.

Ousted Chief's Meet

—Dr. Clinton Wunder (left), of New York, member of the Townsend board of directors and a national speaker on the organizing staff, and J. B. Kiefer, central region director, who were ousted form the Townsend movement, shown as they met in New York City. "Inefficiency" was the official reason for ousters.

—If he removes his hat in an elevator, it means he has (1) good manners and (2) hair.

Have a Bowl of Fun at Late Supper For Four in Beverly Hills

Claire Windsor, lovely actress, enjoys a huge laugh during late supper party in the Brown Derby, Beverly Hills night club, with Frank Hoyt (left) of New York City and Mr. and Mrs. John Warburton (right).

Blotters of Metal

And Wicks, Also, That Will Burn in the Kerosene Lamp

Metal can be made to absorb ink like a blotter; and used as a wick in a kerosene lamp. This is nothing unusual to industrial scientists. Often they must work with "porous" metal, which can do these things.

To make it "porous" a metal is first prepared in powder form by a chemical or an electrolytic process. The powder is subjected to a pressure of several thousand pounds to the square inch. The compressed metal which results is heat-treated in a furnace. After it comes out of the furnace it is the finished product — "porous" metal. It looks and feels like ordinary metal, but it is much lighter.

The fine grains of powder have been pressed together just tightly enough to leave microscopic tiny cracks and crannies between the grains. To the naked eye the crannies are invisible. A drop of ink runs downs between the powder grains. The metal, in other words, blots the ink exactly as a paper blotter does. A piece of "porous" metal placed in some kerosene acts like a wick. It can be lit with a match; used instead of the regular fabric wick of cotton.

Farm Problems

Conducted by

PROFESSOR HENRY G. BELL

with the co-operation of the various departments of Ontario Agricultural College.

Question — We have difficulty in getting a drill at the proper time for wheat seeding. Can I get just as good results if I put the fertilizer on broadcast and harrow it, as I likely would get if I drilled it?

Answer—General results indicate that best results from fertilizer on wheat are obtained where this available plantfood is drilled into the wheat seed bed. The probable reason is that when 200 to 250 lbs. fertilizer is applied to the acre, if it is sown through the fertilizer dropper of the fertilizer-grain drill, it will fall into the holes made by the disc, fairly near to the seed. By the time the seed is germinating, the fertilizer will have dissolved and will be ready to give the growing crop immediate help. If the same amount of fertilizer on the other hand has been sown broadcast and harrowed in, the application amounts to so little fertilizer per cubic foot that when it is harrowed into the soil, the particles are so widely dispersed that even if they do dissolve there is usually very little help given to the young crop. It is an established fact that much available phosphate of the broadcast fertilizer becomes fixed in slowly available or unavailable forms, whereas if the same fertilizer is drilled, more of it remains in forms which are immediately available to the crop.

Question—My neighbor and I were discussing how heavy you can fertilize wheat profitably. I say about 100 lbs. to the acre. What do you say?

Answer—The question as to how heavily you can fertilize wheat profitably will depend in no small degree on the character of the soil on which the crop is grown. If the field is in reasonably good condition, you should be able to realize results from more than 100 lbs. of fertilizer per acre. This Department of Chemistry, O.A.C., has tested rates on eight different farms in recent years. The average yield without fertilizer was 24.1 bus. per acre. With one bag or 125 lbs. of fertilizer per acre the yield increased to 30.5 bus. per acre. There was a gain of 6.4 bus. of wheat for an investment of approximately $1.50. Where the fertilizer was increased to two bags per acre, the yield was increased to 36.9 bus. per acre or there was a gain of 12.8 bus. of wheat for an investment of approximately $3.00. At anything like normal prices for wheat, you can see that the larger quantity made decidedly the larger profit. Of course, this can not be increased indefinitely, but in normal conditions, 200 to 250 lbs. per acre should give excellent returns on the money invested, both in the added vigor which the fertilizer gives to the wheat(which is virtually protection against winter killing), and in the increased yield itself. Additional fertilizer will also have a highly beneficial effect on grass and clover seed which is sown with the wheat.

Red, Ripe Tomatoes

Do you know that 75 years ago tomatoes were considered poisonous? They were planted in the garden because the vegetable was considered beautiful — but taste them — oh no. There is no record of who tried them as food, but whoever it was — they merit a vote of thanks.

Now that tomatoes are plentiful try some of these interesting recipes:

Grilled Tomatoes

Wash tomatoes and cut in slices about ½ inch thick. Sprinkle lightly with sugar, salt and pepper and dip in fine cracked crumbs. Brown quickly in butter in a frying pan, first on one side and then on the other. Serve at once.

Veal Cutlets

Veal steak cut ½ inch thick, 1 egg, 2 tablespoons melted butter, fine dried bread crumbs, 1 teaspoon salt, ¼ teaspoon pepper, 1 cup water.

Cut the veal in neat pieces about the size of a silver dollar. Season with salt and pepper and dip in melted butter. Roll in crumbs, dip in egg, slightly beaten, and roll again in crumbs. Saute until well browned on both sides. Add water, cover closely and simmer slowly for 45 minutes. If the oven is going for baking, cook the cutlets, closely covered, in the oven. Serve with the gravy in the pan.

Devilled Tomatoes

Three tomatoes, salt and pepper, flour, butter for sauteing, 1 teaspoon mustard, ¼ teaspoon salt, few grains cayenne, yolk of 1 hard-boiled egg, 1 egg, 2 tablespoons vinegar, 4 tablespoons butter, 2 teaspoons powdered sugar.

Wipe, peel and cut tomatoes in slices. Sprinkle with salt and pepper, dredge with flour and saute in butter. Place on hot platter and pour over dressing made by creaming butter, adding dry ingredients, yolk of egg rubbed to paste, egg beaten slightly and vinegar, then cooking over hot water, stirring constantly until it thickens.

Baked Tomatoes

Wipe six small tomatoes and make two one-inch gashes on blossom end of each, having gashes cross each other at right angles. Place in pan and bake until thoroughly heated. Serve with sauce for devilled tomatoes, adding, just before serving, 1 tablespoon heavy cream.

Stuffed Tomatoes

Prepare six medidum-sized tomatoes. Take out seeds and pulp, sprinkle inside of tomatoes with salt, invert and let stand half an hour. Cook 5 minutes 2 tablespoons butter with ½ tablespoon finely chopped onion. Add ½ cup finely chopped cold cooked chicken or veal, ½ cup stale soft bread crumbs, tomato pulp and salt and pepper to taste. Cook 5 minutes, then add one egg slightly beaten, cook 1 minute and refill tomatoes with mixture. Place in buttered pan, sprinkle with buttered cracker crumbs and bake 20 minutes in a hot oven.

Tomato Canapes

Three ounces cream cheese, 2 tablespoons Rocquefort cheese, 2 tablespoons heavy cream, ¼ teaspoon salt, shake of cayenne, 2 medium-sized tomatoes, toast, mayonnaise.

Mix the two cheeses together with cream and seasoning, until smooth. Cut rounds of toast the same size as tomato slices. Spread with cheese mixture, cover with slice of tomato and garnish with mayonnaise and parsley.

THIS WEEK'S WINNER
FISH AND VEGETABLE SALAD

2 cupfuls of cold boiled fish (canned salmon or tuna may be used)
1 cupful of mayonnaise
1 cupful of coursely chopped celery
1 tablespoonful of capers or chopped pickle
1 cupful of cooked peas
2 medium sized cooked beets
2 hard-cooked eggs

Add to the fish, the celery, peas and capers, or pickles. Mix with the mayonnaise, taking care not to break the fish into too small pieces. Pile lightly on crisped lettuce leaves and garnish with alternate slices of cold boiled beets and hard-boiled eggs.—Miss Pearl Hunt, Huron St., Southampton, Ont.

Attention!

Send in your favorite recipe for pie, cake, main-course dish or preserves. We are offering $1.00 for each recipe printed.

HOW TO ENTER CONTEST

Plainly write or print out the ingredients and method and send it together with name and address to: Household Science, 73 West Adelaide Street, Toronto.

Make Permanent Pets Of This "Doggy" Laura Wheeler Pair

DOGS IN SINGLE STITCH PATTERN 1275

Pekinese and Boston Bull—so hostile in real life, so friendly in single stitch are as "doggy" a pair for picture or pillow as one could find! They'll provide you with interesting pick-up work for leisure moments, and make prize donations for that fair. Follow the color suggestions with your pattern, and use wool, silk or cotton. Pattern 1275 contains a transfer pattern of a pekinese's head 7¾ x 10 inches and a bull pup's head 6¾ x 8¾ inches; a color chart and key; material requirements; illustrations of all stitches needed.

Send 20 cents in stamps or coin (coin preferred) for this pattern to Needlecraft Dept., Wilson Publishing Co., 73 West Adelaide, Toronto.

Another "No-Soil" Farmer

We have a suspicion that when farmer readers scanned our recent article about farming without soil in England they would say "Oh yeah?" to themselves or something equival. ent. Since then we picked up another newspaper and therein found a paragraph from Berkeley, Cal., about Professor W. F. Gericke, of the University of California, who has been experimenting along similar lines. Professor Gericke has a "soilless farm," or garden, and by means of chemicalized water has grown flowers and vegetables. The professor expresses the belief that farming can be conducted on a large scale by these methods.

Evidently, as "great minds think alike," scientists have been working along the same lines at the same time on both sides of the Atlantic.—Stratford Beacon-Herald.

Official Statement Drought Conditions

This Year's Harvest Poorest In Several Years Says Report

"It is now definitely known that the harvest this year in Western Canada will be one of the poorest that has been garnered for several years. In many of the districts there will be practically no crops at all, and the live stock situation in certain areas presents serious difficulties, but at the same time the conditions do not call for sensational statements," states Dr. H. Barton, Deputy Minister, Dominion Department of Agriculture. "Serious though the present situation is, a number of the published statements have magnified the gravity of the conditions as at present existing and have made predictions which, at present, are not justifiable.

"Such extreme announcements emanate from a variety of sources. Many are unofficial, and lack authority as well as accuracy. While not intended to do so, these reports create unnecessary alarm and unduly disturb the market situation. Another result of these exaggerated statements is that those producers who are fortunate enough to have surplus crops at their disposal are tempted to hold their feed and seed grain in anticipation of fancy prices, and run the risk of being compelled to accept less than they could have obtained.

"In many cases of threatened disaster in the past, various adjustments as to supply and demand have greatly relieved, if not entirely overcome, the difficulty of shortage of certain commodities in some districts.

"Departments of the Provincial Governments and the Dominion Government, are taking energetic steps in conducting a survey of the entire situation and in exploring possibilities in order to make the best possible provision for meeting an emergency where it may exist and to reduce to the minimum inconvenience and hardship."

Spain's "Regime"

The constitution of the second Spanish Republic contains the following fundamental principles, observes the Financial Post:

Spain is a Democratic Republic of workers of all classes, organized in a regime of liberty and justice; it has no official religion and all citizens are equal before the law.

Spain renounces warfare as an instrument of national politics. The colors of the republic are red, yellow and purple.

Legislative power rests with the people who exercise it by means of the Cortes, or Congress of Deputies, elected for four years by universal suffrage, equal, direct and secret, on the system of proportional representation.

All citizens over 23, without distinction of sex or civil status, are eligible to vote.

The presidency of the republic is a post associated with very definite financial remunerations, notwithstanding the Communistic principles of the Left wing government. Salary and allowance of 2,250,000 pesetas per annum are provided for the republic's chief executive.

The Cortes may propose a vote of censure on the government or any of its ministers, on the request of 50 of its members, but the cabinet or the minister in question is not obliged to resign in consequence unless the vote of censure is passed by an absolute majority of the chamber.

The president holds office for six years, and he cannot be re-elected until six years after the termination of his last mandate.

The constitution allows to all citizens freedom of opinions and ideas, but may hold these rights in suspense by a government decree in cases of impending danger to the nation.

"Vainglory, I suppose, is part of an actor's stock in trade and gives him confidence."

—Sir Cedric Hardwicke.

Brief Comment

If King Edward keeps on flying, pistol tossers are going to have a difficult time — Kitchener Record.

The June bridegrooms are now commencing to turn from cigarettes to the pipe. — Brockville Recorder and Times.

No doubt the tariff will ultimately get the blame for what the drought has done to crops this year. — Financial Post.

Farmers are learning that before they begin saving for a rainy day, they must have the rainy day. — Guelph Mercury.

Some people aren't satisfied with getting everything for nothing. They demand to have it delivered. — Quebec Chronicle-Telegraph.

A Compliment

Canada was paid a compliment at the Fourth International Conference on Anti-Locust Research, recently held at Cairo, Egypt. The Conference considered that the formation of the Canadian Committee on Grasshopper Research and its close co-operation with workers in the United States was the type of organization required. It was also shown that the work in Canada has progressed nearer to a solution of the grasshopper problem than in any of the other 24 coutnries which sent delegates to the Conference.

Neew-style Rail Cars Being Tried in England

COVENTRY, Eng.—Speed, silence and economy are the triple advantages claimed here for new pneumatic-tired rail cars now being tested for the London, Midland and Scottish Railway.

No Unemployed In This Ontario Town

"There is not a single able-bodied man on relief. The town is not one cent in arrears on its bonded indebtedness and does not owe the bank a penny," declared E. G. Odette, summing up conditions in Tilbury, his home town, during a recent banquet there to celebrate the district's business progress. Mr. Odette who is Ontario's chief liquor commissioner is shown, at right, chatting with Ross Mackinnon, left, and A. E. Barit; heads of the automotive firm which is the town's chief industry.

Pre-cooling Save Fruit in Transit

At the joint request of the Nova Scotia Department of agriculture and the Masstown Strawberry Growers' Association, a representative of the Transportation Division of the Fruit Branch, Dominoin Department of Agriculture, gave a practical demonstration of the governments system of pre-cooling fruit by the use of fans From June 29 to July 17, 1936, fifteen carloads of strawberries were pre-cooled, and the advantage of the system was amply manifested in the fine condtion in which the fruit arrived at the points of destination.

During the past few years, the work of the Transportation Division has been the means of preventing considerable loss in transit both by sea and rail. Pre-cooling, as it is commonly called, simply means the removal of field heat from fruit after harvesting and before it is shipped to market. With strawberries, as with other fruit, there is a tendency to pick and shop fruit that is not fully mature, because deterioriation is not as apparent as in mature fruit. Fruit is mature when it has reached that stage when the normal process of ripening will continue after the fruit is picked and enable it to develop full flavour. In order that mature well-coloured, and fully developed fruit may be placed within reach of the consumer, the Transportation Division of the Dominion Fruit Branch recommends to producers and shippers the fan pre-cooling system which has proved its efficacy in all the fruit-producing areas of the Dominion.

There are 67 women police in London, as compared with 56 last year.

Upside Down Room

—We've just heard (perhaps you've known about it for years) about the rich and wicked Englishman with the appallinng sense of humor and the upside down room, observes the London Advertiser. It seems that, like many of the world's droll the breath of life to him was the grief and dismay of his friends, so he had built in his house the upside down room. Chairs, tables, a carpet and the customary floor furnishings of a drawing room, were fixed, bottom up, to the ceiling. Paintings and electroliers and false windows were arranged, top down, along the walls, and the doors, instead of joining the baseboard, ran up to the moulding. From the centre of the floor a crystal chandelier of outsize proportions stood directly up into the air.

The whole effect was calculated to give the sober man the screams and give one in wine the "Zionchecks." The favorite trick of the wretch was to ply house guests with liquor. Then after they had set fire to the footmen and tossed ormolu clock down the stair well and had relapsed into what Milt Gross calls a "dip slip," he caused them to be transported to the upside down hoom and gently laid on the floor beside the upright chandelier.

Then he would arise half an hour early in the moring and watch them regain consciousness from a cunningly hidden peephole. After their first shrill screams of terror most of the victims clung in hideous postures to the chandedier. Others flattened themselves out on the floor, hoping by some physic process as yet unknown to overcome gravity. Still others attempted to stalk the walls and climb down through the mirrors and electric fixtures.

"The minds that can be influenced by flattery are really small, however great they may appear."

Elinor Glyn.

Medical Profession Make Great Strides In Maternity Work

Nine Advances to Ease and Safeguard Motherhood Discovered Within the Last 25 Years.

Nine great advances in ease of motherhood have been made by the medical profession in the last 25 years. Eclampsia, the convulsions which caused frightful suffering, have become almost a rarity. Un-numbered lives have been saved by the elimination of this single complication.

Coupled with ridding motherhood of this risk are increasing knowledge of diet, vitamins and gland products for this period. The great diet change lies in feeding starchy foods, eggs and milk with fresh vegetables. Formerly the expectant mother was fed on "delicacies" even if they nearly killed her.

Third is the effort to alleviate pain. This began with the much-heralded twilight sleep. It is not solved. The trouble with all artificial pain relief is risk of injury to the baby. But the recent anagesics, or pain relievers, known as barbiturates, are making progress.

Fourth, and more dramatic than any other, is the dating of motherhood. Within a week to 10 days aftern conception it is possible now for a physician to know that motherhood is on its way. One method considerably used is to note secretions of the pituitary gland, at the base of the brain. They change, and injected into immature female mice they give visible evidence.

Transfusions are the fifth boon. They save many lives and much suffering.

X-rays have removed the danger from one worrisome question — the chance of a Caesarian operation. The rays warn definitely when it is needed, and long enough in advance to perform the operation more safely. The result is that once rare Caesarian operations are now no more than other abdominal operations.

Anaemia is another hobgoblin nearly gone. It may arise from the unborn child drawing heavily on the mother for essential elements for skeleton building. Feeding lime salts, or milk with plenty of root vegetables, replenishes the store.

The daily sickness for weeks or months that has been a burden for many mothers is now mostly relieved. Its cause was a toxic condition, from food. Adding carbohydrates to the diet is one treatment.

Rated by medical men as the most important is the ninth advance. This is substitution of normal activity for the old idea of invalidism and "delicate condition." Instead of isolation at home, today's mothers are advised to get outdoor exercise, fresh air, suitable food, adequate rest, freedom from worry and care, to feel assured of the safety of childbearing.

Best of all, the medical profession is not satisfied. The present death rate of mothers in the United States, it asserts, should and can be cut 50 per cent.

One concern in Birmingham, England, has just received orders for 20,000,000 British flags to be used during the Coronation next year.

Trolley buses are replacing street cars in London.

Toronto's Relief Costs Show $737,818 Decrease

TORONTO—Toronto's direct relief costs for the first seven month's of the year were $5,571,889, a decrease of $737,818 from the corresponding period a year ago, it was reported recently.

There were 69,166 individuals on relief during the peak week in July, compared with 97,676 Jan. 1 and 112,475 at the beginning of 1935.

Immigrants exeeded emigrants in Great Britain and Northern Ireland in the last year by 16,463.

The first issue of stamps bearing the head of King Edward VIII will be made next Tuesday and will continue until September 5. After that George V stamps will be supplied until stocks are exhausted The new stamps are of the same size and color as the present issue but plainer and more vivid. The head of King Edward VIII stands out against a shaded background.

* * *

A large number of people attended the funeral service at Kemptville on Wednesday afternoon of Mrs. Reuben Scoville in St. John's United church, which was conducted by Rev. J. H. Miller, D D of Huntingdon, Que. The deceased was a well known resident of Kemptville and was in her 93rd year. She was formerly Mary Jane McLelland. Her husband and three children predeceased her and she was the last surviving member of eleven children.

* * *

While attending to duties about her home recently, Mrs. Clarence McMullen of Dixon's Corners was severely burned about the face and arms when a gasoline stove she was using to cook berries, exploded, setting fire to the home. Only prompt action by volunteer firefighters saved the McMullen home. The interior of the kitchen was badly damaged and the flames spread to other parts of the house before being checked. Mrs. McMullen was attended by Dr. T A. Hamilton.

In an event billed as the Gentlemen's Road Race, at the Central Canada Exhibition, yesterday, Dan Driscoll, 78-years old horseman of Iroquois drove his bay mare, "Vada Direct" to victory, placing first in each heat. The race consisted of two half-mile heats. Fourth place in the same event went to Parker Locke, son of Dr. M W. Locke, of Williamsburg, who drove his father's chestnut mare, "Charity Sauns". June Volo, another of Dr. Locke's horses, driven by Jimmy Connors, placed fourth in the 2.09 pace class.

* * *

Dr. Currie and Mrs Currie, after an absence of six weeks, during which time they attended the unveiling of the Canadian Memorial at Vimy, France, and other places of interest in England, Belgiam and Scotland, returned home on Sunday. During their period of sight-seeing abroad, nothing impressed the doctor and Mrs. Currie more than the hospitality of the French people to the Canadian soldiers. Continuous entertainment furnished unceasing joy for the visitors; joy, which was mingled with sorrow as the survivors of "Vimy" visited the cemeteries and looked upon the crosses which marked the spot where comrades had fallen, recalling to their memories, all the horrors of the Great War. Dr. Currie is taking a week's rest before entering into his professional duties. He expects to be at his office some time next week.

* * *

Dr. J. H. Grisdale, former Manager of the Ottawa Experimental Farm, now of River Road East, and Errol Nephew of Finch, have been instrumental in a shipment of purebred dairy cattle shipped to Chester, England. Not for some time past has a shipment of this kind been sent to the O'd Country, and these came principally from the three United Counties, Stormont, Dundas and Glengarry, and from farms in the vicinity of Avonmore, Chesterville, Dalkeith, Finch, Inkerman, Greenfield, Maxville, Mountain and Winchester

* * *

Wednesday afternoon about 5 o'clock at a point two miles west of Alexandria Bay, N.Y , the Seawyn, palatial cruiser owned by Ed. Winn, noted radio and screen comedian, was struck by a speed boat in the St. Lawrence River. The prow of the speed boat, driven by a man named Linkron, according to reports received tore a large hole in the portside of the Seawyn above the water line. When the speed boat was extricated from the hole it sank in about 200 feet of water. One of the men aboard the speed boat lost an eye as a result of injuries sustained in the mishap.

Burton J. Chant, a farmer living near Portland, Leeds county, suffered the loss of 16 cows struck by lightning during Sunday morning's storm. A barn owned by Clifford Phillips, near Easton's Corners, was destroyed at the same time. It included a crop of hay which was also lost but neighbors saved some implements and prevented the fire from spreading.

* * *

William Lewis, 45, of Matilda township, was arrested near Kemptville on Saturday night and was brought to Cornwall. He appeared before Magistrate P. C. Bergeron Monday on a charge of abducting a 15-year-old Matilda township girl He was remanded for one week

* * *
