HOW DO YOU FIGURE IT?

We Mean Your Paint Cost.

Here's an ad. advertising paint at 49c a quart. Here's another featuring paint at 69c a quart. Here's still another at $1.00 a quart. Still they come at $1.35 a quart—and higher! Which should you buy? You get what you pay for and no more! The lower down you go in the price scale, the less the performance, the worse the appearance, the harder the application, and the greater the uncertainty of good results.

We sell LOWE BROTHERS Famous Line of Paints and Varnishes. The comparative price of Lowe Brothers' Paint is $1.25 a quart—a price at which both quality and economy are assured. **One quart of Lowe Brothers Paint will go as far as two quarts of cheap and inferior paint**. It will hide better, look better, wear longer, brush on easierj—and requires much less for a given job.

Square foot coverage and hiding is the measure of economy in paint—not the "price per gallon". If you think you need a quart of cheap paint, buy just one Pint of Lowe Brothers' Paint, and prove for yourself our claim that Lowe Brothers Paint is at once the cheapest and best paint you can buy.

One Pint of Lowe Brothers Paint will go as far as one Quart of Cheap and Inferior Paint.
See Us Before Painting.

DUNDAS COUNTY BRANCH O. C. P. A. FORMED

At a meeting of the provisional directors of the Ontario Cheese Patrons' Association held at Hotel Winchester, Winchester, on Wednesday night, May 2nd, the organization of a county branch for Dundas was presided over by Mr. A.W. McIntyre, vice-president of the O.C.P.A. assisted by Mr. J.A. Simpson, local agricultural representative. Jay Bolton, cheese inspector for the townships of Winchester and Mountain, and J. Coby, cheese inspector for the townships of Matilda and Williamsburg, were also present, and took part in the discussion.

The newly-formed organization will be known as the Dundas Cheese Patrons' Association, and will be operated by the following executive, which was appointed for one year: President, W.J. Stewart, Morewood; vice-president, William Lane, Williamsburg; secretary-treasurer Douglas Hanson, Matilda; directors, Haldane Cummings and Archie Smirle, Winchester, William McIntyre, Dan Shaver and William Cleland, Mountain, Arthur Nash and Percy Prunner, Williamsburg, and Charles Harkness and John Thompson, of Matilda.

The preliminary duties of the county branch are to visit every cheese factory in Dundas county and seek the co-operation of the owners and cheese-makers, and to explain in detail the aims and objects of the Ontario Cheese Patrons' Association. All factories linking up with the Association will become affiliated once the workings of the Association have been fully explained. The majority of farmers are very much in favour of the system and are looking forward to better prices for milk and cheese during the coming summer.

RESULTS QUEEN'S UNIVERSITY

Among the 352 students of Queens University who have received their degrees in Arts and Science, are the following:

Bachelor of Arts

Honors—Barbara Brown, Aultsville; Catharine Cameron, Finch; Eileen McCarthy, Prescott; Ruth Weston, Morrisburg.

Pass—Mona Barr, Morrisburg; Mary Clement, Chesterville; John Colquhoun, Morrisburg; Sally A. Farlinger, Morrisburg; Reginald Jamieson, Prescott; Francis Judson, Brockville; Margaret Marselis, Chesterville; Phyllis McCarthy, Prescott.

Bachelor of Science

Pass—George Shannon, Prescott.

Among the prize-winners in the Faculty of Arts, are:

Arts Research Scholarship, resident, $500—Barbara Brown, Aultsville.

Medal in Latin—Barbara E. Brown.
Medal in Greek—Barbara E. Brown.

PLEA IN BEHALF GOVERNMENT EMPLOYES

Problems of long term temporaries in their respective ridings were submitted by four government members of Parliament to the Civil Servics parliamentary committee on Wednesday afternoon. Chairman J. Earl Lawson promised careful consideration of the problems submitted.

A.C. Casselman, Cons., Grenville-Dundas, spoke about 60 employes in the marine depot at Prescott, and asked that these men be blanketed in as permanent civil servants. He spoke also about employes on St. Lawrence and Rideau canals, who, he claimed, are not getting fair treatment. He referred to some elevator employes working ten hours a day, whereas government regulations call for an eight-hour day.

Frank T. Shaver, Cons., Stormont, spoke of twenty temporary employes on the Cornwall canal, many of whom have served 20 years. "No private corporation would operate as the government has done with some of its temporary and permanent employes doing the same work, yet getting different wages," Mr. Shaver declared.

The committee adjourned, to meet again next Wednesday morning.

MR. ORLANDO COOK

There passed away on Sunday last, at about 11 p.m., at his home in Strader's Hill, Mr. Orlando Cook, son of the late Harvey Cook and Mrs. Cook. The deceased, who was born at Straders Hill 28 years ago, has been in failing health for the past two years, following a serious operation.

He leaves to mourn his loss, his widow, formerly Agnes Casselman; two young children, Mahlon, 7 years and Evelyn, aged 2; his mother Mrs. Pearl Cook, of Iroquois; three brothers, Lloyd, of Hanesville, Acel, of Strader's Hill, and Arthur; one sister, Olive, of Iroquois.

The funeral was held from his late residence to Dundela United Church on Tuesday May 8th, at 2 p.m. The service was conducted by his pastor, Rev. S. Burman, assisted by Rev. Sisco, of Cardinal. The remains were interred in the cemetery at Dundela.

MYSTERIOUS DISAPPEARANCE OF KEMPTVILLE GIRL

Missing since Monday of last week from the home of her uncle, F. Gerbrandt, Ottawa, Edna Bronson, of Kemptville, was found there by her mother early the following Friday morning in an unconscious condition. According to information received from Kemptville, the girl was given medical attention during the day, but had not recovered consciousness.

DUNDAS COUNTY SOFTBALL LEAGUE ORGANIZED

Monday night in Winchester Town Hall, the organization of the Dundas County Softball League was effected comprising eight clubs, who will play a single schedule, followed by a play-off series between the three leading teams, second and third place teams playing off for the privilege of meeting the leaders of the league for the championship.

Decision was reached to play a straight schedule with seven home games. Each team will pay an entrance fee of $2, and a list of players for each club must be in the hands of the executive before the opening of the league. A meeting of the executive will be held on Friday night to draft rules and frame the schedule.

Officials elected were: Honorary presidents, Hon. Geo. H. Challies, Dr. Mahlon W. Locke; president, G.C. Lacey, Chesterville; vice-president Walter Loucks, Williamsburg; secretary-treasurer, Chas. Cross, Winchester; team representatives, Morrisburg, George D. Howith; Williamsburg, Fred Loucks; Winchester, Melvin Scott; Chesterville, A.J. Laforet; Hallville, Lester Brown; So. Mountain, A. Scott; Mountain Station, E. Evans; Straders and Toyes Hill, Brock Harper.

MINUTES OF COUNCIL

Regular meeting of Council for May was held in the Town Hall, on Monday the 7th, at 8 p.m. Members all present.

Moved by Mr. Flynn, seconded by Mr. Roach, that the Minutes of previous meetings as read be adopted subject to the correction on condition that the cheques issued for parties on relief be made payable to bearer and credited against the amounts parties have received on relief since January 1st, 1934.

Moved byMr. Becksted, seconded by Mr. Weston, that a grant of One Hundred Dollars be made to the Public Library.

Moved by Mr. Roach, seconded by Mr. Weston, that Tuesday and Wednesday, May 15th and 16th, be "Clean Up" Days.

Moved by Mr. Roach, seconded by Mr. Weston, that the particulars of the claims of the village against the "Royal", "Phoenix" and "British Mercantile" Insurance Agencies be handed to the town solicitor with instructions to take immediate action if he approves of the claims as being valid.

Moved by Mr. Flynn, seconded by Mr. Beckstead, that the water-works committee be instructed to get full information regarding a motor-driven pump for the water-works and submit the particulars of the different pumps with guarantees as to their efficiency, and prices, to the Council without delay.

Moved by Mr. Beckstead, seconded by Mr. Roach, that the petition of O.J. Barkley and others, filed with the Clerk, re early closing, be accepted and acted upon and that the Town Solicitor be instructed to prepare an Early Closing By-law pursuant to the petition, but having in mind the desire of the Morrisburg Merchants' Association that it shall not apply to the sale of tobacco, it being also understood that the Morrisburg Merchants' Association will enforce the by-law.

Moved by Mr. Flynn, seconded by Mr. Coligan, that the first sittings of the Court of Revision be held in the Town Hall, Monday the 4th day of June, 1934.

Moved by Mr. Roach, seconded by Mr. Weston, that the Electric Light By-law be amended so as to do away with a flat rate entirely, and an amending by-law be prepared accordingly.

Nay—Mr. Flynn. CARRIED.

Accounts to the amount of $2,129.36 were passed.

Council adjourned.

Canada

BELIEVE IT OR NOT

Here is something that reads like fiction in these days of hard times, shrinking values and uncollected taxes:

"City Treasurer M. M. Morse, of Ogdensburg, states that the city ended its fiscal year March 31 with a cash surplus of $50,729.75 after setting up a reserve fund of about $10,000 to meet outstanding claims. There was $12,923.37 to the credit of the school fund and $37,729.76 to the general city fund. Cash on hand was $61,596.23 and tax arrears, $1,836.80." —Pembroke Standard-Observer.

WHAT MOTORISTS PAY

More than 27 per cent. of the total revenues collected by the governments of the different provinces of Canada is contributed by owners of automobiles in the form of taxes on gasoline and license fees. The report states that the total amount paid by automobile owners to the provincial treasuries in the fiscal year 1932-33 was $45,499,458, of which gasoline taxes accounted for $24,948,280 and $20,551,173 was in license fees. In the Province of Ontario 35.9 per cent. of the total government revenue is paid by motorists; in Quebec, 32 per cent.; in Nova Scotia, 27.2 per cent.; in New Brunswick, 27.3 per cent.; in Alberta, 24.1 per cent.; in Prince Edward Island, 22.7 per cent.; in Saskatchewan, 19.8 per cent.; in British Columbia, 17 per cent., and in Manitoba, 15.45 per cent. —Prescott Journal.

$165,000,000

When figures get up into billions, imagination clogs. But while our mind blurs over those new statistics telling that Canadians spend $4,750,000,000 a year, have incomes of $4,600,000,000, one figure amidst a maze of others stands out very clear. It is the figure which tells that we spend on education $165,000,000 a year. That for ten million people.—Ottawa Journal.

"CHEQUE ARTIST"

Ontario communities having public hospitals are being paid a visit by a "cheque artist." He goes to a flower shop, says he wants to send flowers to a friend in hospital, orders something worth $3 and tenders a cheque for $5. A fictitious name is given of the supposed patient, with the request that the flowers be delivered. Receiving $2 in change, the rascal departs. Smallness of his cheque and his aesthetic tastes and human sympathy combine to disarm suspicion. It is presumed that the flowers are reclaimed. In Renfrew the situation is such that the fraud could at least be attempted.—Renfrew Mercury.

ADVERTISING

Tell me not in mournful numbers advertising is a dream, for the business man who slumbers, has no chance to skim the cream. Life is real! Life is earnest! Competition's sometimes fierce. In the business field of battle, collcoddles have no place; be not like dumb driven cattle, be a live one in the race. Lives of great men all remind us we must bring the bacon home, and, departing, leave behind us footprints on another's dome. Let us then be up and doing; otherwise we may be done; still achieving, still pursuing—advertise and get the mon.—From Publicity.

NEWSPAPERS

A preacher came at a newspaper man this way: "You editors do not tell the truth. If you did you could not live; your newspaper would be a failure." The editor replied: "You are right, and the minister who will at all times and under all circumstances tell the truth about his members, alive or dead, will not occupy his pulpit more than one Sunday, and then he will find it necessary to leave town in a hurry. The press and pulpit go hand in hand, with whitewash brushes and pleasant words, magnifying little virtues into big ones. The pulpit, the pen, and the gravestone are the great saint-making triumvirate."

And the editor turned to his work and told of the unsurpassing beauty of the bride, while, in fact, she was as homely as a mud fence.—North Hastings Review.

HARD UP?

An eighty-year-old former bricklayer, a bachelor, who was drawing an old-age pension from the British Columbia Government, certainly had his nerve about him. He died in Seattle while on a business trip and authorities not only found nearly $1,900 in his hotel room, but also discovered that he had an estate worth more than $12,000! Rather hard up!—The Barrie Examiner.

A CONTEMPTIBLE TRICK

One of the meanest and most contemptible of men is he who throws poisoned food out where he knows the neighbor's cats or dogs will pick it up. He may have been annoyed at the yowling of cats on the back fence but that is no reason for causing indiscriminate slaughter among the children's pets. The following words of an editor from a nearby town are quite applicable to people of this district who throw poison to dumb animals.

"There has been an epidemic of deaths especially among cats lately, and no other causes has been assigned except that of poisoning. Some of the poor brutes have lingered for days in misery before dying. We could understand a man in the fury of the moment of being awakened by unmusical choruses under his window, firing his shotgun into the noise, but to prepare, deliberately, a mess of poison and leave it where it will murder both the offenders and any other wandering creature, is quite beyond us. There is something subnormal about the man who will rob a small boy of his pet.—Ingersoll Tribune.

KEEP OFF THE GRASS

Much damage is being done lawns and boulevards at present by people walking across or riding bicycles on the grass. As the ground is wet and soft on the surface, muddy paths are quickly worn or the ground is churned into a pile of mud that will not produce grass in the coming months. —Lindsay Post.

The Empire

OPEN SEASON FOR PEDESTRIANS

"It's a fine day," says the Englishman—and takes out his car to kill some one. That, at least, has been the recent routine, resulting last year in 7,202 killed and over two hundred thousand injured. But this Easter has been much less murderous than precedent had led us to expect, and it may be that road users are really beginning to realise that a motor is a lethal weapon which can only be made compatible with civilized life if used with great skill and caution. It is from this point of view—the effect on the psychology of roadusers—that the Minister of Transport's new traffic legislation should be judged. . . It is a case for risking some injustice to individual motorists; nothing will so much hasten the growth of careful driving as the fear of a strictly enforced penalty against carelessness. —The New Statesman and Nation (London).

THE WAY OF NEWS

By means of their correspondence and of the news agencies with which they deal, the feelers of a newspaper reach to every corner of the globe. An assassination may take place in Afghanistan, a political coup in Bukharest, a discovery in Africa, or a ship may founder off the Azores, yet before twenty-four hours are out the news will be dished out by the newspapers to the residents of this colony, or any other place where they are able to support a press organization. It is not necessary to dwell on the specialized process to which the news is subjected on its way to Hong Kong from its incidence in that far away spot, and in its final form in the newspaper column. Suffice it to say that the organization which this entails very often escapes the notice of the man in the street.—The Hong Kong Press.

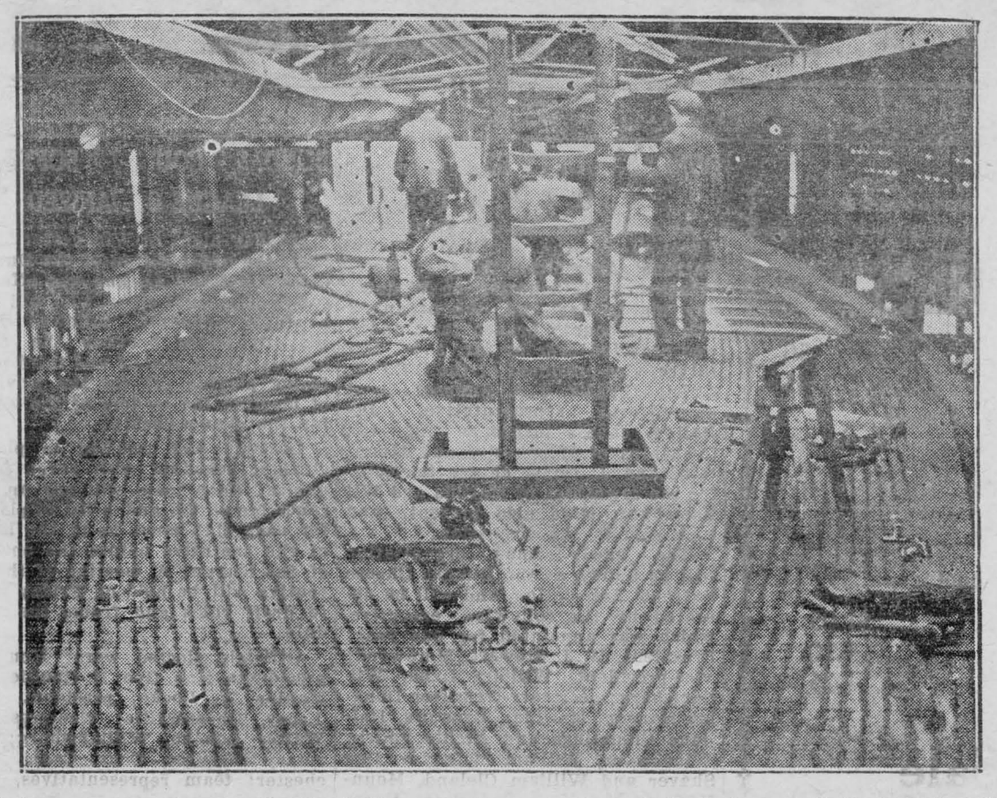

THE CAMPAIGN FOR TEA

In an attempt to rationalize the industry, the producers of Ceylon, India and the Dutch East Indies have now entered into an agreement whereby wasteful competition will be eliminated, and each will have its own fields for development. In this country the producers of India and Ceylon are to have a free hand to build up the market for their own teas, for at present the Dutch East Indies supply 160,000,000 out of the 500,000,000 pounds which we drink every year. In Canada and South Africa the Ceylon producers are attempting to popularize their own wares, and in the United States, India, who has already been making inroads on the coffee-drinking habits of the people, is to continue her efforts. The Dutch are to make a determined drive on the continent of Europe. But above and beyond all these markets there lies one of almost unlimited potentialities — the Union of Socialist Soviet Republics, whose tea consumption has declined by more than 50 per cent. since the years before its birth. It is believed that if reasonable credit facilities could be given to the Russia Government, they would be able to take as much as 100 million pounds a year, an order which would enable an immediate large reduction to be made in the restriction quota.—Philip Jordan in The Fortnightly Review (London).

THE STUDENT ON THE LAND

Undoubtedly a scheme of this character (to place unemployed university students on the land) assumes a spirit of adventure and enterprise on the part of those who desire to take advantage of it. To most persons accustomed to city life and inured to the sedentary habits of the student, outdoor work, involving some fatigue and a good deal of manual labor, may in its early stages appear repulsive. Indian university men are known to possess rather orthodox notions of personal dignity and a positive distaste for manual labor. But if recent tendencies are a guide, the strength of such prejudices is weakening in the face of the compelling circumstances of our time. Nevertheless the cautious attitude of the Committee towards the colonization of the large unoccupied tracts of the United Provinces is justified, as it is necessary in the first instance to make sure that sufficient men of the type that will make good colonisers would be willing to enter the scheme.

BRITAIN'S ENTRY NEARING COMPLETION

Workmen are seen here putting the finishing touches to the deck of the Endeavour II, the British yacht which is to challenge for America's Cup.

Ailments Guards

Intestinal Ills Protect You Against Infantile Paralysis

Chicago. — To minimize your chances of catching infantile paralysis, stay in a region where stomach and intestinal ailments are common—that is the prescription drawn from discoveries by Dr. John A. Toomey, of Cleveland.

Dr. Toomey reported new theories about infantile paralysis to the American College of Physicians.

His research showed that apparently there is some connection between infantile paralysis and diseases of the digestive tract, and that people in regions where intestinal troubles are prevalent develop an immunity that protects them from the infantile paralysis virus.

Dr. Toomey said that in south eastern United States, where intestinal troubles are more common than in some other sections, and in China, where they abound, infantile paralysis is not prevalent. Presumably, this is because south eastern Americans and the Chinese have more immunity.

Three new conclusions regarding infantile paralysis were drawn from evidence, disclosed by Dr. Toomey's experiments.

Its most probable channel of entry to the human body is through the mouth, stomach and intestines.

It is caused by a combination of a virus—an organism too small to see under any microscope—and poisons produced by other kinds of bacteria that live in the intestines of most humans.

Immunity against it is produced either by immunity against the infantile paralysis invirus the body through the digestive tract contradicts the former belief of many scientists th tait entered through the nose along the olfactoyr nerves, "the sense of smell route."

His experiments indicate the virus spreads from hte intestinal tract of the human body by way of the fibres of the sympathetic nervous system to the chain of nerves that runs down either side of the spine and from there first to the loins and then upward to the neck.

$136,000 Is Awarded To Broker Firm

Halifax.—The Montreal brokerage firm of McDougall and Cowans was awarded $136,000 by the Supreme Court of Nova Scotia recently in its $148,000 suit against T. C. Glennie, the Nova Scotia lumberman who made and lost a small fortune in the wild stock market of 1929.

Glennie was sued by the brokerage company for the amount of his losses on its books after the 1929 crash. He had run up a $10,000 stake to more than $500,000 and then had seen his huge profits turned swiftly into a deficit.

Before a Supreme Court jury he successfully contested his claim that the losses were caused by inefficient handling of his account by the firm. But the full benech reversed this verdict in a majority decision recently. though the judges differed in opinions as to the amount due the firm.

The company's counsel indicated they would be satisfied to have the amount reduced by $12,000 to meet the finding of Mr. Justice R. H. Graham and an order to this effect was granted.

Short of "F's" and "K's"

Here is an authentic extract from the first issue of a Western newspaper:

We begin the publication of the Roccay Mountain Cyclone with some phew diphphiculties in the way. The type phounders phrom whom we bought our outphit phor this printing ophice phailed to supply us with any ephs or cays, and it will be phour or phie weeks bephore we can get any. We have ordered the missing letters, and will have to get along without them until they come. We don't lique the loox ov this variety ov spelling any better than our reader, but mistax will happen in the best regulated phamilies, and iph the 'ph's' and 'c's' and 'x's' and 'q's' hold out we shall ceep (sound the 'c' hard) the Cyclone whirling aphter a phashion till the sorts arrive. It is no joque to us—it's a serious aphpiair.

New Regulations

The Minister of Education makes the following announcements with regard to Second Year Normal Course, commencing in September, 1934-5: 1. Interim Certificates issued in July 1930 to teachers will be extended one year. If they wish to continue teaching after that date, they will be required to return for the Second Year Course in September 1935. 2. Teachers who completed the 1st Year Normal School Course in 1929 and whose Interim Certificates were extended to July 1934, will be obliged to return to Normal School in order to take their positions. This Course will be given each of the Normal Schools. Forms of application may be obtained from the Deputy Minister of Education after July 1st.

Let's You Eat And Grow Thin

Baltimore—Dr. George A. Harrop, Jr., of Johns Hopkins has worked out an eat-and-grow thin diet

Bananas and skimmed milk are the answer. Moreover the patients do not go hungry, the doctor says.

As tried out at the Metabolism clinic of the Johns Hopkins University patients eat four to six bananas and drink three or four glasses of skimmed milk daily for two weeks. They lose six to ten pounds.

Then follows a two weeks off diet period, in which they eat, meat, fish eggs and vegetables, but refrain from fats and starches. Then back to the diet again for two weeks losing six to ten pounds more. Some, by following this alternating system, have lost 50 pounds in a few months.

For milder diets the bananas are increased to seven or eight and the milk to four glasses. Dr. Harrop, authority of treatment of disease by diet, began the experiment to reduce waistbands but on hearing of deaths from reducing drugs he became willing to make his findings public.

Coffee and tea are allowed, but no cream or sugar. It's considered advisable to drink large amounts of water

Bombing of Rabbits Successful Plan

Liberal, Kan.—Southwest Kansas nimrods have conceived the idea of bomb-hunting rabbits from airplanes

In a recent rabbit drive near Hereford, Tex. Doc Henderson and Ovart Pinkerton dropped bombs on scurrying cottontails from planes and although 300 foothunters participated in the drive, the air-hunters accounted for 2,000 of the 3,000 rabbits obtained.

Health in China

For centuries the Chinese have paid their doctors to keep them well rather than to cure them when they were sick. Many an effort has been made by inquisitive visitors to China to check up this well-known bit of scientific information. The results have been discouraging, however, showing that until recently the Chinese have had no doctors worthy of the name to practise preventive medicine, or any other kind. Even though the Chinese doctor story is evidently a myth, it carries a valuable suggestion. Positive health, periodic health examination, early diagnosis, prevention of disease, make up the message that is begining to prevent much suffering and save many lives.—The Canadian Medical Association Journal, November, 1933.

WINNING DEBS

The most beautiful debutante and the debutante with the most character, selected recently at the Blue and White Ball in New York. Miss Betty Kipp, left, was selected as having the most character and Miss Joan Power, the most beauty.

Focus New Hopes In Ireland's Bogs

Motor Spirits Distilled From Lowly Turf and Potatoes

Dublin—Peat from Ireland's bog lands is making a bid to drive the wheels of industry and transport as well as warming cottage firesides and cooking griddle cakes.

A scheme for producing industrial alcohol from potatoes and turf has been planned by the Fianna Fail Government. It is intended to mix the home-produced alcohol with imported gasoline in order to reduce the country's present petrol bill of more than £500,000 a year. Five distilleries and one refinery are scheduled for erection during 1934.

Further indication of the importance turf is expected to play in the future development of the Free State was given at the recent annual meeting of the Grand Canal Company here. While regretting a loss of revenue following the introduction of tariffs, Mr. John McCann, who presided, said that the company anticipated compensation from a big extention of turf carrying as a result of the campaign for increased utilization of native products.

A committee of investigation has already reported favorably here on peat for motor spirits, and in 1925 Irish turf was successfully tested in France for this purpose. Further work in developing this new use for the Free State's widespread bog lands will be one of the tasks of the Industrial Research Council which is being established by the Government.

In the meantime potatoes are to be used as the raw product in the distilleries. The scheme will at first be experimental rather than a commercial proposition with little interference, it is pointed out.

Discussing the project in the Dail, Mr. Sean F. Lemass, Minister of Industry and Commerce, said that the distilleries would utilize about 25,000 tons of potatoes a year at a price near 35 shillings a ton. The by-products of the industrial alcohol, he said, were a valuable cattle food, and farmers would be encouraged to use them. The first year's working of the distilleries would be taken as an indication of the advisability of developing the project on a big-scale commercial basis.

Referring to the Government's plan for wide activities of the Industrial Research Council, Mr. Lemass pointed out that in recent years rapid progress has been made in other countries in the organization of research work.

But the time had come, the Minister continued, when the Government must take part in an intelligently planned system of research. It was intended to compose the council of honorary members with specialized knowledge. They would be entitled to travelling and incidental expenses. In addition there would be a permnaent secretary, and a small staff and library. The annual grant called for was estimated at £5,500.

One of the functions of the council will be to advise the Government on the granting of assistance to inventors whose activities are likely to have beneficial national results.

65,000 Words

Columbia 'U' Commission Finds Poverty Evils Can Be Cured — If

New York.—The Columbia University commission of economic reconstruction reported recently, in 65,000 words, that society could overcome the evils of poverty and unemployment if:

1. It continually utilized to the full the productive capacity which is actually available.

2. It equitably distributed the national income.

"What happened during the war," says the report, "when the volume of goods taking war and peace products together, increased at the very time when millions of the younger and more vigorous workers were withdrawn from productive functions, is an indication, highly peculiar though conditions then were, of the manner in which potential productivity lies utilized in normal times.

3,000,000 Lbs. Of Wool Stolen

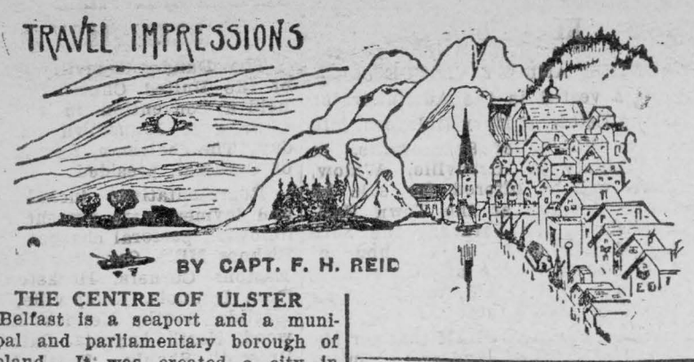

Denver.—Reports of operations of cattle rustlers and horse thieves are an old story here, but depredations at the expense of sheep men have been rare until recently.

Thefts of wool are now being reported from all sections where sheep are raised. Sometimes the wool is pulled from the backs of live sheep, but more often the animals are killed and the wool pulled from the dead carcases a few days later. The wool is also removed from animals that have died from natural causes. Such "dead" wool is worth about half the price commanded by this year's clip.

It is estimated that 3,000,000 pounds of wool have been stolen in the last few months in the region from West Texas to Montana.

DROUGHT RELIEVED

Heavy rains are saving crops near Buenos Aires, Argentine, from the drought.

THE CENTRE OF ULSTER

Belfast is a seaport and a municipal and parliamentary borough of Ireland. It was created a city in 1888 and, according to the 1926 census, has a population of 415,000. Since the formation of the Irish Free State, Belfast has been the Capital of Northern Ireland, the first parliament of which was opened by King George in 1921. In 1932, the Prince of Wales formally opened the new Legislative Buildings—a beautiful marble pile, just on the outskirts of the city at Belmont.

LARGEST IN THE WORLD

We are so accustomed, on this side of the water, to think of having the largest of this, that or the other thing, that it is difficult to imagine a city, of about half the size of Toronto, to excel in so many endeavors. Belfast has the largest shipbuilding plant, the largest tobacco factory, the largest rope works and the largest flax spinning mills in the world—some record. In normal times, these industries give employment to both sexes; a most desirable condition in any city. This is the more remarkable when it is considered that the district does not possess the advantages of coal or iron. In addition to the industries mentioned, the aerated waters and the whiskies of Belfast are known throughout the world.

A TRYING TIME

The depression has hit Belfast, as it has struck other places. The shipbuilding and the linen industries, particularly, have suffered, and unemployment, among those who do not earn enough to build up any reserve, always causes unrest.

My party visited Belfast in the fall of 1932 and, at that time the economic situation was acute. Added to this was a certain political tension, due to the fact that the new Parliament Buildings were to be opened in November and there were those in the city, of Republican tendencies, who made it their business to foment discontent. It was also stated that disturbers from the Irish Free State—which has always opposed a division in Ireland—were in Belfast to add to the disaffection.

UNREST AND STRAIN

The streets were filled with restless groups of people, walking rapidly but aimlessly from place to place. There were over 3,000 policemen in Belfast and they were standing on the corners, in groups of four to six, watching for possible trouble. Now and then an armoured car would be driven down the road or a car on which were police with a machine gun. It looked as if everyone was on the streets; women and girls, carrying babies wrapped in the shawls that covered their heads and shoulders; men with scarves around their throats and their caps pulled well over their eyes. There was a sinister and ominous tenseness in the air—everyone was anxious.

A TUSSLE WITH THE POLICE

My wife and I had gone out for a walk. We proceeded up one street and, as we returned, we deviated by way of a cross street, which led us to Sandy Row, at the foot of Boyne Bridge—any Belfast man can tell you where that is. Seeing some excitement, at the middle of the bridge, which arches over the railway tracks, we went to investigate and were almost knocked down by a crowd that was being pursued by the police. Hugging the bridge railings, we let the mob rush by and returned to the foot of the bridge and interestedly watched the mob—composed of men, women and children—preparing to attack the police with stones and bricks, picked up from the roadway. At this juncture, I happened to glance to my left and, to my consternation, I noticed a squad of police, who had stolen around the block, emerging from the shadows with drawn batons rushing to surprise the crowd from behind. We were thus between two fires and, of course, we should not have been there at all. However, there was no time to lose, so hastily pushing my wife against a wall and getting close to it myself, we awaited developments. A man, who, a second before, had stood beside us, was knocked flat; others were slugged without any discrimination and a miniature riot was in progress.

THE BRITISH ISLES.

England, Scotland, Ireland and Wales—just think of visiting them for the first time, or, if you have been there before, think of renewing your previous experience.

It is worth while to build up an estate of memories for the future: it is worth while DOING IT NOW.

Captain Reid's all motor, all British tour sails on the "Empress of Australia" on June 21st. You can take 31 days, 45 days or continue on the whole trip for the 52 days.

It costs nothing to enquire—it is a wonderful opportunity.

Or, if you want to go to the Continent or the Passion Play, there are seven itineraries available, ranging from 27 days to 57 days and in price from $341 to $778.

Write to Captain F. H. Reid, C. P. R. Building, Toronto, or telephone WAverley 6646.

Fortunately, just at that moment, a smart shower of rain commenced to fall; this served to dampen the ardour of all the participants more than anything else could have done. Our adventure was over.

I'll tell you something about an ocean trip next week.

TYPOGRAPHICAL ERROR

The typographical error is a slippery thing and sly,
You can hunt until you are dizzy but it somehow will get by,
Till the forms are off the presses, it is strange how still it keeps,
It shrinks down into a corner, and it never stirs or peeps,
That typographical error, too small for human eyes,
Till the ink is on the paper when it grows to mountain size.
The boss, he stares with horror, then he grabs his hair and groans;
The copy reader drops his head upon his hands and moans—
The remainder of the issue may be clean as clean can be,
But that typographical error is the only thing you see.

Beatty Bros. of Fergus Add New Lines

Fergus.—Beatty Bros. Limited announced recently purchase of three outstanding lines from the Goold Shapley and Muir Company of Brantford, Ont. The departments purchased include the popular line of Brantford Windmills, Hand and Power Pumps, and Grain Grinders, Patents, Dies, Patterns, etc., in connection with these lines are also included in the purchase and are now being moved to the Beatty Factory at Fergus.

An ounce of tomato seed will produce 1,500 plants; cabbage seed 1,800 plants, and celery seed 3,000 plants.

WORKED ONLY ONE WEEK IN TWO

Sciatia Kept Him At Home

It is the wife who sends us this information about her husband's troubles. She writes:—"For some time past, my husband has been able to work only one week in two, on account of sciatica. He suffered so much from it that he could scarcely move for the pain. We tried many things, but without result. Then we saw in the papers an account of the good results that had been obtained from Kruschen Salts, and we decided to give them a trial. For twelve months past, my husband has been taking his 'little dose' of Kruschen every morning. Now, he has no more trouble with the sciatica, and is working regularly."—(Mrs.) M.

Doctors estimate that one-half of civilised humanity suffers from partial constipation. This condition results in an unsuspected residue of waste matter, which poisons the blood and produces sciatica, as well as many of the mystery aches and pains from which people suffer. Kruschen keeps the organs of elimination in perfect trim, so that every particle of poisonous waste material is expelled gently, regularly and completely.

"The California Boiler Maker"

"Among the thousands who use Omega Oil as a daily rub down, no one thinks more of it than I do. It is a liniment of amazing strengthening and soothing power."

James J. Jeffries, for long the Champion heavy-weight of the world, found that Omega Oil went deeper, and limbered up those great muscles quicker. Omega Oil should be in every household for strains, sprains, stiffness, and sore aching muscles. Rubbing doesn't blister the skin. At the druggists 35 and 60 cts. Sole Agents: John A. Huston Company, Limited, Toronto.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile —No Calomel necessary

For you to feel healthy and happy, your liver must pour two pounds of liquid into your bowels per day. Without that bile trouble starts. Poor digestion, slow elimination, poisons in the body. General wretchedness.

How can you expect to clear up a situation like this completely with mere bowel moving salts, oil, mineral water, laxative candy or chewing gum, or roughage. They won't wake up your liver.

You need Carter's Little Liver Pills. Purely vegetable. Safe. Quick and sure results. Ask for them by name. Refuse substitutes. 25c at all druggists. 64

Motor Sales Great Gain

Studebaker Reports the Best Month for Two Years in Sales

Walkerville, Ont.—Cheery evidence of prosperity is found in a report released recently by the Studebaker Corporation of Canada, Limited.

According to C. S. Fletcher, sales manager of the Studebaker Corporation of Canada, Limited, Studebaker shipments for the moth of March just finished exceeded any single month's shipments for the previous 21 months.

That this increase is a definite trend is further borne out by the fact that Studebaker entered April with more bonafied orders on hand than have been shipped for any of the past 22 months. April is predicted to be the best month, with one exception, for the last four years.

In the early part of February, shortly after the big metropolitan motor shows in Canada and the States, the Studebaker officials foresaw a huge shortage of cars in the early spring. Plans were immediately laid for greatly increased production and large commitments were released to all suppliers. The Studebaker plant has been going at top speed since that time, but despite these early preparations it has still failed to catch up with the large bank of orders now on file.

To quote Mr. Fletcher, "This remarkable increase in our business is attributed to the introduction last February of the Special Dictator series, a line of Studebaker automobiles listing at less than $1,000 at the factory, and to the intensive advertising exploitation which has been put behind these cars.

"The last few years have brought drastic revisions in public buying methods. The great majority of people are no longer fooled by superficial appearance. They are extremely cautious about parting with the dollar and are looking keenly for value and quality in their anticipated purchase.

"To take every advantage of the great wave of buying this year which has already definitely manifested itself, we have made very comprehensive sales and advertising plans.

"We have every reason to believe that Canadian commerce is definitely on the up-grade, and we feel that our product, backed up by sound merchandising plans, will enable us to be among the first to feel the effects of the strong recovery trend."

Such reports as these, indicating a very decided up-turn in business throughout the world generally, are definitely gratifying to everyone interested in Canadian business. It is hoped that the business improvement reported by the Studebaker Corporation of Canada, Limited, may be similarly prevalent throughout the Dominion.

No Remains Found

Montreal,—Stumbling with a box of dynamite and detonating caps in his arms, Daniel Plouffe was blown to pieces. So severe was the explosion a coroner's jury was told that no part of Plouffe's body was recovered Plouffe had been using the explosives to blast stone for an extension to his house. He was moving the box for fear children might find it and be endangered.

Issue No. 18—'34

Prince Inspects Giant Cunarder

Glasgow—To a chorus of buzzing machinery and the rattle of hydraulic riveters, the Prince of Wales was recently hoisted in a tiny steel cage 200 feet up the side of the giant Cunarder "534" on her stocks at Clydebank He went up for a looksee."

The Prince came to Glasgow to open a Boy Scouts' exhibition and he stood bareheaded while 15,000 Scouts and Girl Guides shrilled excited cheers.

Later he seized an opportunity to see work progresing on the giant liner in the hands of some thousands of laborers.

The ascent in the cage was to reach the "A" deck, where he plied the officials with questions from the bird's eye vantage.

A Man's Prayer

Let me live, oh mightly Master
Such a life as men should know,
Tasting triumph and disaster
Joy and not too much of woe.
Let me run the gamut over,
Let me fight and love and laugh,
And when I'm beneath the clover,
Let this be my epitaph:
Here lies one who took his chances
In the busy world of men,
Battled luck and circumstances
Fought and fell and fought again.
Won sometimes but did no crowing,
Lost sometimes, but didn't wail,
Took his beating but kept going,
Never let his courage fail.
He was fallible and human,
Therefore loved and understood,
Both his fellowmen and women,
Whether good—or not so good—
Kept his spirit undiminished,
Never laid down on a friend,
Played the game till it was finished
Lived a sportsman till the end.

Its easy to be broad-minded in matters that affect us only slightly, or not at all.

India To Display At C.N.E. This Year

India now takes its place in the "Show Window of the Nations." The Canadian National Exhibition was notified by cable from the India office in London that the Indian Government has approved participation in the Exhibition this year and the display from the picturesque Indian Empire will be located in the Government Building.

Child Welfare Section League of Nations Meet

GENEVA—The effects of the economic depression on children and young people was the main subject under discussion at a meeting of the child welfare committee of the League of Nations which began recently.

Also on the committee agenda was a proposal that official documents and particularly birth certificates shall not reveal the fact of illegitimacy so that the child may not be hampered in life from the start.

Storage holdings of dressed poultry in Canada on January 1 of this year amounted to 11,649,762 pounds, some 40 per cent greater than at the same date on the previous year.

Test of Fairness

I tried out an abridged questionnaire, addressed to eight boys and girls, ranging in years from seven to 13. They were all children of good families, of normal intelligence, of fairly comfortable circumstances.

I asked them just one question "If you were an aviator, about to take part in an air race, the winnings of which would bring you a large prize and much glory; and if by accident you discovered unguarded the 'plane belonging to your closest rival, the person most likely to beat you in the race, would you damage that person's 'plane so it could not compete with yours? If not, why not?"

Here are the eight answers just as they were given to me:

1. (Boy, 10.) No. I wouldn't because you always get caught doing anything like that

2. (Boy, 11.) If I was sure I wasn't found out. I would give the money to my mother. (Evidently something gnawing at the conscience here.)

3. (Girl, 10.) I would think it was a good thing if I could keep the other 'plane from starting, because if it did I might not win the race.

4. (Boy, seven.) I don't know how to fly.

5. (Girl, 13.) I don't think it could happen because they always have watchmen at hangars.

6. (Boy, nine.) No, I wouldn't do it because he might find out and damage my 'plane.

7. (Girl, eight.) He would deserve it if I did it, because he ought to watch his 'plane before a race.

8. (Boy, 12) The important thing is to win a race when you are in it, and if I could do anything to help me win, I would think it all right to do.

Average Man Uses Only 700 Words

How many different words does the average person use in his ordinary conversation? In a hasty look at the dictionary one might assume that his vocabulary represented a reasonable percentage of its voluminous pages Yet he may be surprised to learn that the average American goes through life without the need of more than 700 words in which to make himself understood.

The American Telegraph and Telephone Company decided to investigate the number of words used over the telephone in order to give a scientific aid to its engineers in devising mechanism best suited to American speech.

Out of a total of 80,000 words in the conversations selected at random from the New York toll circuits, to which the investigators listened-in, there was no more than 2,240 different words. On an average, each speaker used only 700.

As a means of communication the telephone does not lend itself to the art of general conversation. Only on rare occasions does one employ its mechanical assistance for other purpose than the moment's need.

The ordinary telephone talk is not to be classed with those delightful periods of human contact when conversation responds to the stimulus of a fascinating personality. Speaking face to face is apt to pump from an intellectual well sonorous phrases and a magnificent variety of words which the telephone does not tap.

But it is a sad truth that in the usual conversation our thoughts do not require sumptuous garb. The average of 700 words may be sufficient to cover the patios of the office, the golf course, the stock market or the weather. In those subjects which so often predominate in the fine and gentle art of daily speech, the telephone doubtless holds its own.—Menominee Herald-Leader.

News And Information For The Busy Farmer

Furnished by the Ontario Department of Agriculture.

Ontario Pastures

Over 23 per cent. or one acre out of every four of the improved lands in Ontario is in pasture. The estimated total returns on pasture in the form of live stock products from June to October yearly is approximately $40,000,000. Of this, $34,000,000 is derived from dairy produce. Results from experiments have shown that by proper management and improving fertility of the soil returns could be increased from 100 to 200 per cent, on a very large proportion of pasture.

The Best Varieties of Grain

A new pamphlet bearing the above title and prepared by the Cereal Division, Experimental Farms Branch, is now ready for distribution. This pamphlet lists the varieties which are recommended province by province across Canada in the case of wheat, oats, barley, peas and flax for seed.

A separate pamphlet prepared jointly by the Cereal Division and the Ontario Agricultural College dealing with both spring and winter wheat in Ontario, is also available.

Help Egg Production

Two factors that have most to do with the revenue from eggs are the prices received and the rate of production. Unfortunately, the price paid for the product is not always subject to the will of the poultryman, but the rate of production is in his hands and his alone. A much higher yield is within reach of any breeder who will give some care to his flock. A good male has been known to pay for himself many times over. At one of the Dominion Experimental Branch farms, a careful selection of breeders has resulted in an average increase over five years of 73 eggs per hen, the production being raised from 141 to 214. The Egg Laying Contests also have demonstrated what is possible to be done in good farm flocks. Since the contest started in 1919, the average yield has increased from 120 to 178. The average production in the 1931-32 contest was 175 eggs, and as this average was taken from a total of 4,370 birds, entered by 437 breeders in the 13 contests throughout the whole Dominion, the average may be taken as fair for the better classes of breeders in Canada. Further, the hatchery approval and cockerel distribution policies of the Dominion Department of Agriculture are at the disposal of those building up poultry flocks.

Protection for the Shallow Well

Water of deep origin has probably travelled some distance and been filtered through a large depth of earth so that the danger of surface pollution is reduced to a minimum.

If a deep well cannot be sunk for reasons of expense or otherwise, it is desirable to take great care to protect the shallow well from surface pollution. This may be done by lining it with concrete or puddled clay to a depth of 10 to 12 feet, carrying the protection up one foot above the surface of the ground. Surface water will then be filtered through at least 10 feet of earth seeping into the well.

Oats for Hay and Pasture

The dry season of last year followed by a long, cold winter has resulted in feed supplies being pretty well used up and many farmers face a shortage of haay. Under these circumstances, it becomes necessary to sow some kind of annual crop in the spring which can be cut later. For this purpose there is nothing better than oats or a mixture of peas and oats. Oats grow fairly well in cool weather and for this reason seeding some oats as soon as the land is ready so as to get a crop of hay early in the season. Peas thrive in cool weather also when mixed with oats improve the quality of the feed. Two bushels of oats and one of peas is the correct rate of seeding.

Orchard Sod Treatment

A very interesting experiment in the comparison of two systems of sod treatment in orchard management has been in progress for many years at the Dominion Experimental Station at Fredericton, N.B. Forty-three Fameuse and thirty-one McIntosh apple trees are under observation. In one block, the grass it cut and removed as hay. In the other block, the grass is cut and left as a mulch around the trees. No additional mulching material of any kind has been added, and the fertilizer treatments have been identical on the two blocks. For the 14-year period, 1920-1933 inclusive, the average yields per tree are considerably higher under the sod-mulch system and clearly indicate the advisability of this treatment. With the Fameuse variety, the average annual increase per tree has been 3.33 pecks, and with the cIntosh 2.76 pecks per tree.

Sanitation in the Brooding Quarters

Colony houses are preferable for brooding purposes as they can be moved to fresh ground. Feed and water containers should be scrubbed clean daily. Litter should be kept clean and sweet.

Stands covered with small mesh wire should be used to place feed and water vessels on, preventing chicks from picking up disease germs in the waste feed spilled on the litter. Do not use mouldy feed or dirty water.

Where hens are used for brooding dust often to control vermin, using Sodium Fluoride or Sulphur. Blue Ointment weakened with lard or vaseline may be used in the young chicks and mothers.

Study of Distribution Indicated as Necessary

A survey of conditions at the Union Stock Yards, Toronto, made by the Ontario Marketing Board, would indicate that there is a definite need for a more even distribution of live stock offerings during the five trading days of each week.

At present, by far the greatest volume of live stock is offered on Mondays and Tuesdays. The result of this condition is that a considerable percentage must be held over sometimes until Friday, necessitating the expense of one or two extra days of feeding in addition to freight and other charges.

This angle of marketing must receive more study if losses in live stock are to be reduced to a minimum.

Bees Suffer Heavy Winter Loss. High Honey Prices Indicated

"This is the year when those capable beekeepers who have carefully studied their business and know how to meet emergencies should make profits," says Dr. E.J. Dyce, Provincial Apiarist for Ontario, and he continues:

"Reports from all parts of Ontario indicate that between 30 and 40 per cent. of the colonies died during the winter, and that an additional 20 per cent. of the colonies are so abdly weakened that they will be unable to gather a honey crop. The loss has occurred mainly among the small side line beekeepers who neglected to properly care for their bees last fall.

A backward spring, combined with heavy colony losses and serious winter injury to clovers in many sections of the Province, indicates an abnormal shortage of honey again this coming season.

Eastern Ontario Farm Exchange Agency

Persons interested in Selling or Buying Farm Property are invited to get in touch with the undersigned.

Valuation of Land and Buildings a Specialty. Farms inspected and reported upon as to suitability for: different types of farming; particular farm crops; orcharding, etc., and as to needs, possibilities and costs of drainage.

DUNDAS-GRENVILLE PRESBYTERY CONVENES

The Dundas-Grenville Presbytery of the United Church of Canada held a convention in the United Church at Johnstown on Wednesday. The chairman, Rev. A.L. Sisco of Cardinal, presided.

Representatives including clergy and laymen were present from the following pastoral charges: Augusta, Bishops Mills, Cardinal, Chesterville Eastons Corners, Heckston, Inkerman, Iroquois, Kemptville, Matilda, Matilda South, Merrickville, Morewood, North Augusta, Oxford Mills, Prescott, Shanly, South Mountain, Spencerville, Williamsburg, Winchester and Winchester Springs.

The devotional period of the morning session was in charge of Rev. Chas. Adey, and the business period was opened by the minutes and correspondence read by the secretary, Rev. Hector Beach of Oxford Mills. Rev. Sisco announced in his report, that the tenth annual meeting of the Montreal-Ottawa conference would be held in St. James church, Montreal, opening on May 31st.

Dr. Tanner, home mission superintendent of the Montreal-Ottawa Conference, addressed the gathering, explaining the action of the board on all items of business under its supervision. A discussion in reference to the salary of the secretary was participated in by the following: Rev. Lacey, Maynard; Rev. Sisco, Cardinal; Rev. Tuttle, Heckston and Rev. W.R. Johnston, South Mountain.

The nominating committee included Rev. H.L. Morrison, Kemptville; Rev. D.N. Coburn, Prescott; Rev. A.L. Seaton, Shanly; N.J. Beach, Winchester and E. Gilroy, Spencerville.

Rev. Johnston presented Gordon Wilson and Stuart Adams, both of Brinston, as candidates for the ministry.

Rev. R.E. Newman of Chesterville conducted the devotional exercises in the afternoon, after which Rev. Johnston reported the committee meeting held at noon. The following were recommended to conference as ministerial candidates: Gordon Wilson, to attend Queen's University Stuart Adams, to attend McGill and Theological College, Montreal; Gordon Dangerfield, Kemptville, to be returned to the United Theological College, Montral to complete B.D. course; Gordon Whitehorne, Spencerville, to return for second year at McGill; Donald Toppin, premier of the boys' parliament, to attend Queen's.

Reports were received on pensions and obituaries by Rev. Coburn; missionary and maintenance by Rev Morrison; christian education by Rev. J. Mackay, Winchester, with announcement of establishing a camp to accommodate 80 boys at Broder Island, Morrisburg, in July; summer school at Point Iroquois July 22 to 27; young people's camp at L'Orignal from August 7 to 17; evangelism and social service by R.W. Armstrong, Merrickville, who announced that a resolution from Presbytery had been sent to the provincial government, protesting against the sale of beer and wine. Mrs. J. Holt Murray of Prescott reported for the presbyterial.

Rev. R.E. Newman, Chesterville, and Mr. Hamilton were appointed to hold a conference on rural problems under the leadership and direction of Dr. Watt, Kingston.

Following is a list of the lay delegates to the MontrealOttawa conference: August, Geo. M. Brown; Bishops Mills, Albert Weir; Cardinal Hugh Adams; Chesterville, D.G. Hutt; Eastons Corners, Wm. Polley; Hallville, E.E. Smith; Heckston Samuel Brown; Inkerman, F.G. Hutt; Iroquois, R.J. Ellis, Kemptville, A.M. Parkinson; Matilda, Calvin Ellis; Matilda South, Howard Locke; Merrickville, Kenneth Whaley; Morewood, A.B. Allison; Morrisburg, Arthur Nash; North Augusta, Alex Brown; Oxford Mills, W.H. Edwards; Prescott, W.S. Johnston; Shanly, G.I. Fader; South Mountain, Edwin Gilroy; Spencerville, J.E Lawrence, F. Toppin; Williamsburg, C.W. Norval; Winchester, Melvin Dawley, N.W. Beach; Winchester Springs, Irwin Haggerty.

The nominations from Presbytery for the tenth annual conference, by Rev. D.N. Coburn were read as follows: candidates for ministry, Rev. W.R. Johnston, South Mountain; colleges and higher education, Rev. W.P. Wornell, Spencerville; evangelism and social service, Rev. A.W. Seaton, Shanly, R.J. Ellis, Iroquois; foreign missions, Rev. T. Knowles, Iroquois, W.S. Johnston, Prescott; historical and church property, Rev. H. Beach, Oxford Mills; home missions, Rev. D. Morrison, Hallville, E. Gilroy, South Mountain; law and legislation, Rev. A.L. Sisco, Cardinal; M. and M. fund, Rev. H. L. Morrison, Kemptvile, N.J. Beach, Winchester; obituary notices, Rev. Chas. Adey.

The secretary was authorized to write letters of sympathy to Mrs. Wilson of Brinston; Mrs. J.B. Hicks, Ogdensburg, and Dr. MacRae, Morrisburg, who have recently been bereaved.

Dr. A.E. Armstrong, secretary of the foreign mission board, Toronto, addressed the gathering, describing the missionary problem of the United Church of Canada.

The evening session opened with a service of song. The worship period was conducted by the chairman, Rev. A.L. Sisco. Addresses were delivered by Rev. H.L. Morrison of Kemptville, and Rev. Dr. Armstrong of Toronto.

TOOK THE WHEEL

There are 5 cars to choose from in the low-price field . . . **YET MORE THAN 1 OUT OF 3 BUYERS PICK NEW 1934 CHEVROLETS**

NATURALLY we are proud to have created Canada's most popular automobile. All the more so because people are counting *values*—comparing *quality*—checking on *delivered prices*—as never before in automobile history.

Chevrolet has always been stronger on *proof* of value than on mere "claims". People recognize this in Chevrolet's many exclusive features: Fully-enclosed, *protected* "Knee-Action", Body by Fisher, valve-in-head six cylinder engine with Blue Flame head, Fisher built-in Ventilation, exclusive YK frame, to mention just a few.

And just as long as motorists go on comparing, checking and testing, Chevrolet will hold and *increase* its great sales leadership. *Because Chevrolet refuses to compromise on quality.* The industry's leading engineers . . . the great General Motors Proving Ground . . . and an organization with "an ear to the ground and an eye to the future" . . . take care of that. Low delivered prices—easy GMAC terms.

The Council adjourned to meet again at Boucks Hill, on June 2nd, 1934, at 10 o'clock A.M. as a Court of Revision on assessment roll and general business after court of revision.

M.S. BECKSTEAD, Clerk.

HYDRO CONTRACTS REDUCED FROM 20 TO 5 YEARS

The policy of the Provincial Government since 1921 in paying part of the cost of supplying electric service to Rural Consumers in order to make rural electric service possible in districts which otherwise could not be served, has resulted in the construction of over 9,200 miles of rural lines to serve over 62,000 Rural Consumers located in various parts of the Province. So general has become the use of electric power for rural service throughout the Province that, in many districts, it is considered an economic necessity, and, based on past experience, the Commission has, for some time, been considering the reduction of the "term" of rural contracts.

At a recent meeting, the Commission decided to recommend to the Councils of the Townships in which rural Hydro-electric service is supplied, that rural electric service has become so well-established as to justify them reducing the term of all existing and future rural contracts from 20-years to 5-years upon the conditions of a letter now being forwarded to these municipalities which reads as follows:

"The Commission has, for some time, been considering the reduction of the 'term' of the Rural Contracts, and, at its meeting on April 13th, 1934, approved of recommending to the municipalities that all existing and future rural contracts be for a period of 5 years from the date on which the customer commenced to take and use electric energy, instead of 20 years as at present. The contracts will continue in force after the 5-year period has expired on a year-to-year basis, unless cancelled by one year's notice, in writing, by either party after the expiration of the 5-year period.

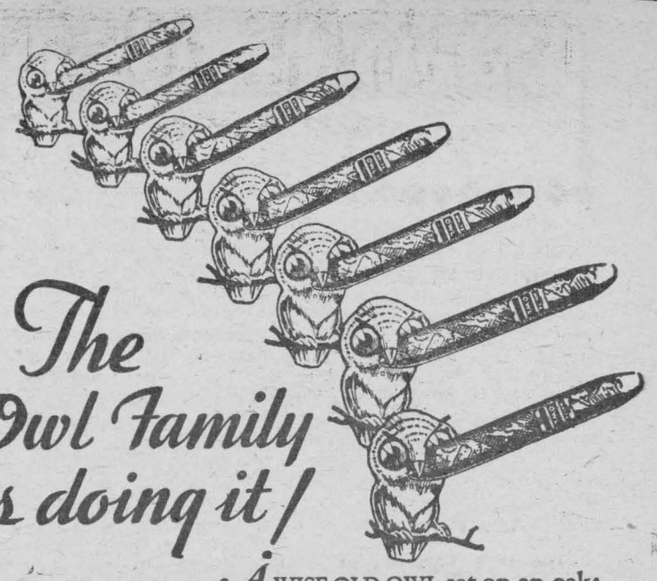

It is provided, however, that this change shall not take effect unless until the Councils of all of the various townships forming part of each Rural Power District pass by-laws approving of such amendment in existing and future rural power contracts.

A consumer, who has a loan under the Rural Power District Loans Act, shall not be entitled to avail himself of cancellation of his rural contract with the township until after all obligations under the said loan have been discharged.

This proposed change in term of contract does not apply to 'guarantee' contracts.

Should your Council decide to approve of the suggestion of the Commission in regard to this matter, it will be in order for you to pass a by-law, copy of which I am enclosing herewith, approving of this amendment in the power agreements between your Township and Rural Electric Consumers located in your Township."

W.W. POPE,
Secretary.

Assurance of SAFETY

The first requirement of the investor, particularly the small investor, is assured safety; income yield is of lesser importance. That is why so many hundreds of thousands of Canadians regard their savings deposits in this bank as the best type of investment. The income may not be so attractive as the promised yield of certain securities, but it is sure and steady, while the principal itself is safe and always remains at full face value.

STRANGE ABSENCE
by ALLYN SLOAN

SYNOPSIS

Jean Graham and her brother, Euan, stay on the Riviera with Geoffrey Winto and his wife Doreen, who leads Euan on to gamble. Jean coaxes him to go to Paris. While driving there Jean finds a string of pearls in Euan's pocket. He snatches them from her and the car crashes. The accident is discovered by Jerry Grant who takes Jean back to his hostess, Helen Gorst. Euan is missing.

Jean visits Euan's friend, de Laurier, and learns that Euan is in debt to him. Jerry Grant me ts M. Perichon, famous detective, who assists them. Jerry proposes to Jean but she asks him to wait.

The Baron insists on accompanying Jean to the Van Dyke party. The next morning Mrs. Van Dyke reports the theft of a diamond. Jean is discovered missing. M. Perichon directs Grant and Washburn to a deserted villa. Grant enters and follows de Laurier into a subterranean cave, de Laurier knocks him out, gags, and binds his arms. Grant works his way free and finds Jean. de Laurier returns and attacks Grant.

Chapter XXVI Cont.

No answer. Just a stertorous panting in the darkness. Holding her breath, Jean listened. Someone was moving—creeping. She felt as if she must scream with the awful tensity of it. But suddenly a fearful din broke out. First the sound of a scuffle; two men swearing panting, straining, then a revolver spat, echoing deafeningly against the stone walls; a flash of light accompanied by a cry from Grant; then silence, broken only by a horrible sobbing groan.

Jean tried to utter, but not a sound came. A terrible cold wave of weakness broke over her, in which she sank down and down into unimaginable depths of unconsciousness.

* * *

Meanwhile in the hall upstairs, M. Perichon and Washburn stood flattened against the wall, watching the slow opening of the secret panel. The older man's hand rested restrainingly upon Dan's arm, in case any premature exhibition of youthful impetuosity should frighten away their quarry. As he watched, Dan scarcely breathed, asking himself who was going to appear. Would it be de Laurier? Jerry—or even Jean?

Whoever it was moved with catlike caution, stepping slowly and with silent tread out of the panel. Dan flung a amazed glance at Perichon, for it was a stranger who had appeared, a short, dark little man, whom to his knowledge he had never seen before.

Guardi, for it was he, had moved one step away from the panel, which had begun to shut, when he saw Perichon and Washburn. With a smothered cry he sprang round, and with ungraceful haste endeavoured to re-enter the panel. But Perichon's revolver barked, and with a yell the man fell over the threshold of the doorway, and the panel as it swung to, caught and held him in its iron grip.

The two men hurried to the assistance of the imprisoned man. Forcing back the door, Washburn fixed a chair across the opening so that the panel could not close, whilst Perichon drew out Guardi, who was unconscious.

"Say, you didn't kill him, did you?"

Perichon shook his head. "No, I hit him in the leg only—here. But the door was not so kind. I will call a gendarme to take him to hospital."

"But who is he?" asked Dan.

"An Italian called Guardi, de Laurier's—how yo.. say—jackal."

"Yeah, but where is de Laurier—and Jerry? Something pretty serious must have happened to keep him all this time." The American's brow was deeply furrowed as he gazed at the Frenchman. Perichon, however, with his habitual inconsequence, ignored the remark and moved towards the door.

"Me, I will call a gendarme."

Dan stood a moment gazing down at Guardi, then moved to the panel. Making sure that the chair propping it open was firmly fixed, he stepped into the rock chamber, and gazed about him. A cold damp wave of air mounted to him, and the loud boominng and wash of the sea. Moving a few steps he saw the ladder down which Grant had climbed some while ago, and looked over. Then with a flashlight he began a methodical examination of the walls and floor, so in a moment he discovered something which had escaped Grant . . a large iron ring in the floor. It resisted his first jerk, so laying down his torch he took both hands to it. In a moment it yielded, loose stones and sand falling as he lifted the door of the trap. Lying down and leaning over, Dan thrust his head into the hole, and with his fish lamp sent a ray of light down into the darkness. At first he saw only a cellar with an overturned table and an extinguished lamp lying on its side on the ground; then he saw that an iron ladder, rusty but apparently firm, led down into the chamber.

Dan got up and went back through the panel. He found Perichon in the hall, supervising the removal of Guardi.

"Say, I've found a trap door in here. I'm going down," he announced.

The Frenchman went with Washburn and gazed down into the darkness of the cellar.

"Gee, I heard something There's someone there," suddenly whispered the boy.

"You'd better take this." Perichon handed him his revolver. "Allez!"

With Perichon holding the flashlight above and his own in his hand, Dan climbed down the ladder. As soon as his feet touched ground he sent a ray of light round the cellar. Almost at once it fell upon the body of a man, lying on its face by the wall.

"I've got someone," Washburn called up to Perichon. Bending, he turned the man over. "Say, it's de a-Laurier. He looks kind of dead to me."

"Papa comes." With remarkable agility Perichon swarmed down the ladder and joined Dan beside the Baron. "Um, it is nearly finish with him," he muttered, shaking his head.

"Gee, she doesn't look any too good to me," muttered Dan, as he arranged a coat beneath her head.

But Dan was swinging his light about the cellar again. "That's O.K. but where's Jerry and Jean? I'm worried about them, I can tell you. Hullo, there's another door here." Crossing to it quickly, Dan passed into the other, outer chamber where originally Grant had found Jean. "Here's another room," he called over his shoulder. "Like a rabbit warren, this place." He stood flashing his light methodically along the wall and floor. Only damp stone walls were revealed until he reached the corner, where upon a pile of rank straw he discovered Jean's unconscious form.

"Jean!" he cried, bending over and lifting her head. For a moment her appearance frightened him, but finding that her pulse was beating he gathered her into his arms and started back to the other room. It was only when Perichon's light fell upon the girl that he noticed she wore Grant's tweed jacket. "Say! She's got on Jerry's coat!" he exclaimed.

"So! That, then, is the work of M. Grant." Perichon nodded at de Laurier's form.

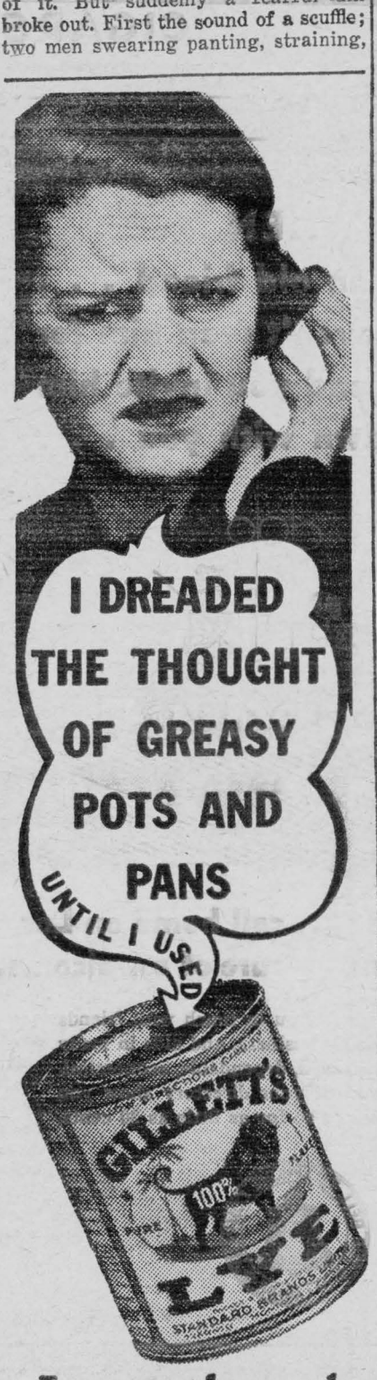

"But where is he?" stammered Dan.

"We must find him. Come."

"Yeah, and we must get Jean out of this quick."

Between them they hauled the still unconscious girl up the ladder and into the hall, where they laid her upon the floor.

(To Be Continued.)

It cuts through grease—makes messy kitchen jobs easy!

DON'T be a slave to kitchen chores. Just use a solution of one teaspoonful of Gillett's Pure Flake Lye dissolved in a quart of cold* water. It puts an end to stubborn stains. Lifts grease and grime off like magic!

Gillett's Lye is indispensable for all your heavy cleaning . . . for stopped-up drains . . . for toilet bowls. Order a tin from your grocer today. Say good-bye to hard rubbing and scrubbing!

*Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—Be sure to get the new revised Gillett's Lye Booklet . . . it tells how this powerful cleanser and disinfectant will lighten dozens of household tasks. Contains full information for soap making, thorough cleansing and other uses on the farm. Write for *free* copy to Standard Brands Limited, Fraser Ave. & Liberty St., Toronto, Ont.

GILLETT'S LYE EATS DIRT

Release Jack Miner's Geese

Birds Transplanted to Manitoba as Experiment

WINNIPEG—A new experience recently awaited 25 Canadian geese from the bird sanctuary of Jack Miner at Kingsville, Ont. Brought by train from the east, they were to be released near the city.

The plan to transplant the geese was sponsored by the Manitoba Free Press and the Provincial Government. Study will be made of the birds' migratory habits.

The geese were released near Grant's Lake, 20 miles northwest of here, annual spring landing spot for flocks of geese on their return to the northland.

Pitkin Forecasts New Machine Age

Cleveland—Walter B. Pitkin, whose two books of the past year stayed simultaneously for months in the best seller division, sees a new machine age, through the rosiest of rose-colored glasses.

The Columbia University professor, speaking here, predicted a new machine age, no farther than just around the corner, which will relieve man of tiring, exhausting work, thus increasing the span of life.

Instead of trying to fit ourself into jobs, jobs will be created to fit ourselves, Pitkin further ventured.

TOO MUCH SUGAR COATING

Hilda Hichmond

Mrs. Wood, a young mother whose children would soon start to public school, was anxious to know what she could do to help them. At the beginning of the previous school year she had seen her neighbor, almost daily, bribing, coaxing and arguing to get her twin sons started with the other children.

"What was wrong there that they did not want to go?" asked Mrs. Wood of the primary teacher whose class the twins attended.

"To much 'sugar coating' at home," answered Miss Doane, frankly.

This, she went on to say, was not good for any child. This mother had never allowed her boys to feel that there were hard tasks to be performed and difficult lessons to be learned in the first years of their lives, and so they had not formed the habit of attack and had missed the joy of achievement. She had waited on them, had paid them for each little service and had tried to eliminate every hardship from their young lives. Miss Doane said the children best prepared for school entrance were those who had learned to wait on themselves, to sit quietly for short periods of time when there were guests, to perform little errands and chores without being rewarded for each act, and who knew how to work and play with others. "This," she added, "is what boys and girls learn in kindergarten. I wish we had one here."

So Mrs. Wood conducted a little survey of herself and her children to check up on the various items. She found that she was waiting on her children more than was necessary and was "paying" them in pennies and treats much too frequently. On the other hand she had many strong points to her credit as she had always talked with them about school in a very happy way, speaking of it as being a great pleasure and one to which they would be admitted when they were sufficiently big and brave and strong. She had been firm in not allowing them "treats" that would upset digestion — a frequent cause of naughtiness in school — and she had seen to it that they were fair and generally unselfish in their play. So with this good foundation on which to build she gradually eliminated the other habits not so desirable. She played school with the children, representing it as a very delightful experience and she gave them specific duties including keeping their play desks in good order. At other times she set them tasks in the kitchen and dining room. And, although it made considerable extra work, she invited many other boys and girls to the house to play. She soon saw a great change in the children. She had tried to keep them babies before, now she put emphasis on their development and the joy of added responsibilities.

"How did you know all these things?" she asked the teacher who had guided her. Miss Doane laughingly answered, "I have dealt with babyish children too long not to know or not to have the desire to help when I can."

The teacher was always eager that the little pupils who came to her should get the very most out of their first school year, and that was what the properly prepared children usually did.

Illegal to Give Expensive Presents

Quebec Law is Intended To Forestall Credit Dodgers

Montreal—"It is actually illegal in the Province of Quebec for a husband or a wife to give the other an expensive gift, but that doesn't mean you cannot give them some little gift like a diamond necklace or a car or a house, even," was a message of legal advice to newlyweds given by R. L. Calder, K.C., at a "ladies' night" dinner of the Young Men's Canadian Club.

"The law is intended to forestall attempts by unscrupulous people to dodge their creditors by registering some substantial piece of property in the names of their wives," Mr Calder explained.

The low of Quebec was in reality "a singularly benign legislation" insofar as protection of a married woman's rights was concerned. Mr. Calder pointed out. Equal partnership in communal assets was one point favorable to the wife, he said, and furthermore she had rights of dower which entitled her to a slice of the property before 50-50 distribution of it was made in the event of separation. Immovable property possessed before marriage was not incorporated into the communal assets upon marriage, he said, but money, although an inheritance, was the sole property of the legatee.

Weekly Air Service Will Link Austrialia-England in 1934

Canberra, — A regular weekly two-way air service between England and Australia will be inaugurated here in December it was officially announced last week. The Australian government accepted the proposal of a new Australian company The antipodes terminal will be first Brisbane then Adelaide There will be five airplanes in use

Catching Suckers

This week we secured a copy of the old home-town paper, writes the Stratford Beacon-Herald. For a spell we looked through the names of people who had been away for Easter and those from the outside world who had been home, but that was not at all satisfactory. There were so few names which we recognized.

Then we looked over the advertising columns, but the names of the merchants were different; only two did we see which were the same as they used to be when we went to the store with the coal oil can. The store keeper in those days used to stick a small potato on the spout to keep the oil from spilling out, but of course that has nothing to do with what we started to say.

There were three or four church notices, but the names of the preachers were different. Of course ministers do move about considerably, that is to be expected.

But there was one item in the paper which sounded like the good old days. It mentioned no names, but it said this:

"Some of the boys are busy in the evening catching suckers in the creek"

We are glad the people who are running the paper today put that little piece of news in it. It was something to take hold on; it showed that all anchorage and connection with the place had not been severed. They used to catch suckers in the creek a good many years ago; they are still doing it. The creek, the suckers and the habits of the folk have at least remained. Splendid.

Lighting Our Troubles

The visible portion of the spectrum which Newton discovered, is only a small part of the radiatoins known to exist. Just beyond the violet end are the well-known ultra-violet rays which have no penetrating power.

Just beyond the red end of the spectrum are the infra-red rays, and it is suspected that these although they are a long way, so far as wavelength is concerned, from the various radiations obtained from radium and the X-rays,fi have a similar, though not so powerful penetrating power. A beam of this invisible light will affect a photo-electric cell although some portion of the body is interposed, between lamp and cell, an electrical change, in fact, which can be measured and recorded. It is suggested that since X-rays show up only the more dense portions of the body, these infra-red rays may be complementary to them and show up the softer tissues.

FRUIT ON LAPEL

Pin a colorful bunch of fruit to your lapel and you'll be right in line with the latest fashions.

Quick Relief Now From Neuralgia

Real ASPIRIN *Starts Taking Hold in Few Minutes*

Now comes *amazingly quick* relief from headaches, rheumatism, neuritis, neuralgia . . . the *fastest safe relief, it is said, yet discovered.*

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. *And thus is ready to go to work almost instantly.*

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S *quick relief*, be sure the name Bayer in the form of cross is on every tablet of Aspirin.

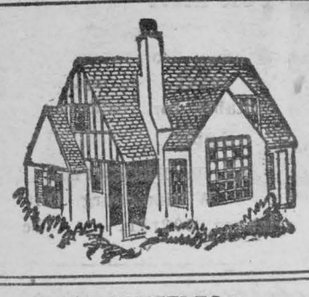

WHY ASPIRIN WORKS SO FAST

Drop an Aspirin Tablet in a glass of water. Note that BEFORE it touches bottom, it has started to disintegrate.

What it does in this glass it does in your stomach. Hence its fast action.

Woman's World

By Mair M. Morgan

SOUFFLES

The elusive, difficult souffle, which it is popularly supposed only a chef can make, is within every housewife's reach. It's only a question of learning a culinary secret — that a small quantity of quick-cooking tapioca will keep the souffle from falling while in the oven, or while it is being served at the table. Here are two souffles — one for dessert and one for a main course — which will do you honor.

SPICW APPLE SOUFFLE

1-3 cup quick-cooking tapioca
½ cup sugar
½ teaspoon salt
2 cups milk
2 tablespoons butter
¼ teaspoon cinnamon
⅛ teaspoon nutmeg
1½ tablespoons lemon juice
1 cup grated raw apple
3 egg yolks, beaten until thick and lemon-colored
3 egg whites, stiffly beaten.

Combine quick-cooking tapioca, sugar, salt, and milk in top of double boiler. Place over rapidly boiling water, bring to scalding point (allow 3 to 5 minutes), and cook 5 minutes, stirring frequently. Remove from boiling water and add butter, spices, lemon juice, and apple; let cool slightly while beating eggs. Add egg yolks and mix well. Fold in egg whites. Turn into greased baking dish. Place in pan of hot water and bake in moderate oven (350 deg. F.) 50 to 60 minutes, or until souffle is firm. Serve hot with whipped cream. Serves 8.

CHICKEN SOUFFLE

5 tablespoons quick-cooking tapioca
½ teaspoon salt
Dash of pepper
½ teaspoon chopped onion.
1 cup milk
1 cup chicken stock, or 1 cup water and 2 bouillon cubes (chicken flavor)
1 cup finely cut, cooked chicken
2 tablespoons chopped parsley
3 egg yolks, beaten until thick and lemon-colored
3 egg whites, stifly beaten

Combine quick-cooking tapioca, salt, pepper, onion, milk, and stock in top of double boiler. Place over rapidly boiling water, bring to scalding point (allow 3 to 5 minutes), and cook 5 minutes, stirring frequently. Add chicken and parsley. Remove from boiling water; let cool slightly while beating eggs. Add egg yolks and mix well. Fold in egg whites. Turn into greased baking dish. Place in pan of hot water and bake in moderate oven (350 deg. F.) 50 to 60 minutes, or until souffle is firm. Serve at once with creamed peas or with sauce made of chicken stock. Serves 6.

TASTY HOT-POT

Any cold beef, mutton or pork may be used up to make this tasty hot-pot.

Cut the meat into neat pieces, roll it in seasoned flour, then fry in dripping until brown. Drain off the fat and place the meat in a casserole.

Fry a sliced onion, carrot and turnip, and add these to the casserole. A sheep's kidney sliced and fried also makes a very palatable addition.

Season with pepper and salt and a teaspoon of mixed herbs, pour over ¾ pint of stock, cover, and gently heat in the oven for two hours.

While the hot-pot is cooking, boil a few previously soaked lentils and, when soft, add to the casserole. Half an hour before serving, add a few potatoes brushed over with dripping. When ready thicken with flour.

NOVEL FRUIT DISH

Here is a light dessert that will delight both young and old. Through it children will get liberal quantities of milk in a way that will please. It is economical and easy to prepare.

CHOCOLATE MARSHMALLOW

1 package powder for chocolate junket
1 pint milk
1 cup confectioners' sugar
¼ pound marshmallows
¼ cup boiling water

Prepare powder for chocolate junket according to directions on package. Chill in refrigerator. Cut marshmallows in pieces and melt in double boiler. Dissolve sugar in boiling water, add to marshmallows, and stir until thoroughly blended. Turn into a bowl and cool. Just before serving, put topping on chocolate junket.

A SAVOURL DISH

This unusual recipe is well worth trying, and may appear on the menu as a vegetable dish accessory to the meat course, or it may be served alone as a savoury.

Take half a dozen green peppers, divide lengthwise and remove the core, seeds, and stringy portions. Prepare a savoury filling by mixing together a teaspoonful each of chopped onion, parsley, and tomato pulp. Shell and chop finely a dozen Brazil nuts and add to the mixture. This nut meat improves not only the flavour but also the nutritive value of the dish. Add two tablespoonfuls breadcrumbs, a little butter, and blend all these ingredients with an egg. Fill the peppers with the stuffing and place them in a shallow baking dish with a cupful of stock and bake slowly for about half an hour.

If a little cold meat is added to the other ingredients, the dish becomes sufficiently substantial for a light supper or luncheon.

TO CLEAN OIL PAINTING

Dust the oil-painting thoroughly before rubbing with slices of raw potato. Discard each slice at the first signs of soiling Dry very thoroughly with a soft muslin and then rub in the merest suggestion of refined linseed oil, and polish gently with a soft silk duster.

VEGETABLES

A skillful use of seasonings is one of the distinguishing characteristics of practically all really good cooks. Everyone knows that the vegetable dish calls for salt and pepper, but the cook who deservedly ranks as a culinary artist also knows that a dash of sugar is needed to blend the other seasonings and bring out the natural flavor of the vegetable.

CARROTS ITALIENE

Cut twelve medium size carrots into two-inch lengths. Cook until tender in salted water to which a teaspoon of sugar has been added. In the meantime. cook two chopped onions in melted butter until lightly browned. Mix with the carrots and dust with flour. Salt and pepper to taste. When the flour is thoroughly browned add a cup of soup stock. Cook gently for about ten minutes and serve very hot.

PARSNIP SOUFFLE

Cook four medium-sized parsnips in boiling water. When tender, remove the skins and rub through a colander. Mix together one teaspoon salt, one-eighth teaspoon pepper, one teaspoon sugar. Add the seasoning and one tablespoon of butter to the parsnips. Melt two tablespoons of butter in a saucepan, stirring in two tablespoons of flour and one cup of milk. Add to the parsnips, together with the yolks of two well-beaten eggs. Beat the whites of the eggs until stiff and fold into the mixture. Put in a buttered baking dish and bake for 25 minutes in a moderate oven. Serve immediately, or the souffle will fall.

HOUSEHOLD HINTS

When possible, always use a vanilla pod instead of vanilla essence. One will last quite a long time, so long as you wipe it after you have used, dry it, and keep it in an air-tight jar. There is no comparison between the flavours.

A crushed raw potato applied to a burn will give instant relief and will, in most cases, prevent a scar.

Never store preserves, pickles or jams on the top shelf of store- cupboard or pantry. Keep them lower down, as hot air rises and may induce fermentation.

Stick labels inside the jar in which dry goods are to be stored. This ensures a clear and easily decipherable label.

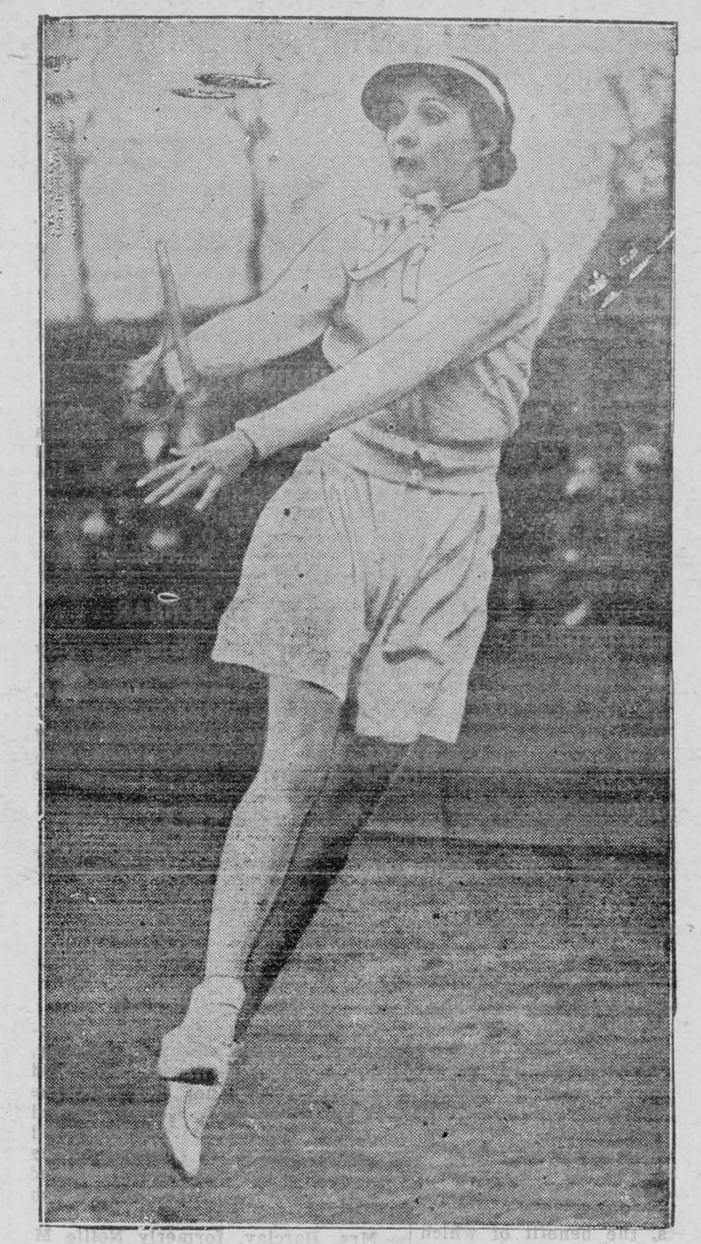

Cover your cupboard shelves with oilcloth; it is easy to keep the shelves clean and tidy.

When cleaning sinks, bowls or baths rub the cloth on the soap before using scouring powder.

When frying fillets of fish, always put them into the frying-pan with the skin uppermost. You will find them less likely to break if cooked this way.

When using up cold cooked fish for fish cakes, try shredding it with a fork. If it is cut with a knife, it is liable to become heavy.

A GOOD SHOT

Real form is being exhibited here by Miss N. B. Brown during the Surrey hard court championships at Roehampton, England, recently. Miss Brown is seen just after the completion of a back-hand drive.

Little Women Fashion Again

Louisa Alcott and Alice In Wonderland Start New Vogue

Along with the many other revivals has come a revival of old fashioned children. The current motion picture versions of Louisa M. Alcott's "Little Women," and Lewis Carroll's "Alice in Wonderland" are responsible.

The prim little pinafores and cute be-ruffled frocks worn by Meg, Jo, Beth and Amy have been smartly modernized and fashioned for the girls of 1934. They have all of the charm of the originals and none of the extra volumes of materials. For younger members of the family who are getting their first introduction to "Little Women," there are dolls which wear the same little frocks.

Today's youngsters may step up and see themselves dressed just as they have always seen Alice in their mind's eye. For there are any number of versions of the Alice frock and pinafore, charmingly interpreted for modern maids.

England is influencing the fashions of young America just as it is her smart mother's. Traditional British simplicity will be the keynote of clothes for both boys and girls. Epaulette styles, Norfolks and balmacaans are being featured strongly for girls' coats. They will be made of the roughish tweeds that brother has always had all to himself before this year.

A girl's first suit is one of the milestones in her life. This year's are unusually smart consisting of jumper dresses or suspender skirts with a contrasting jacket or three-quarter length coat. Blouses are in plaids and checks, and just as gay as the young lady pleases. They are made of cotton for school days, and soft silks that are washable for very best.

Girls adore to wear prints in the manner of their smart older sisters. For spring there are many in light and bright backgrounds with tiny prints that are in perfect taste for youth.

Stone Panels Depict London's "Criers"

A great business building being erected in St. James Square, London is to have as one of its architectural features five carved stone panels depicting the criers of London. There will be the Town Crier, the Lavender Girl, the Organ grinder, the Tinker and the Orange Man. The panels will be between the first and second stories. There is a personal touch about them, for the heads of all children grouped round in the scenes will be the heads of the five children of the two architects of the building. They are all between 3 and 11 years old.

Sunday School Lesson

Lesson VII. (19).—May 13. Christianity and Patriotism (Temperance and Good Citizenship).—Matthew 22: 1-23:39.

GOLDEN TEXT —Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind. This is the great and first commandment. And a second like it is this, Thou shalt love thy neighbor as thyself.—Matt. 22: 37-39.

Time —Tuesday, April 4, three days before Christ's crucifixion.

Place. — The temple in Jerusalem.

Parallel Passages. — Mark 12: 13-40; Luke 20: 9-47.

"Then went the Pharisees." The Pharisees were the Jewish legalists.

"And took counsel how they might ensnare him in his talk." They did not got to Jesus in search of truth, for they believed themselves to be the fountain of all righteousness. They were hecklers.

"And they send to him their disciples." Those whom they had carefully trained in all their doctrines and ways. "With the Herodians." Advocates of the reigning house of Herod, subservient to the Romans, the natural opponents of the Pharisees.

"Saying Teacher we know that art true, and teachest the way of God in truth." In this statement the questioners were false and hypocritical, for they did not believe Christ to be a true teacher, but the opposite. "And carest not for any one: for thou regardest not the person of men" This is an invitation to Christ to be bold in his reply and to express his real convictions.

"Tell us therefore, What thinkest thou? Is it lawful to give tribute unto Caesar, or not?" "Caesar" was the official title of the Roman emporer.

"But Jesus preceived their wickedness." He read the black secrets in their hearts. "And said, Why make ye trial of me, ye hypocrites? "The special form of the hypocrisy was that the questioners had come, not avowedly as disputants, but as 'just men.'"

"Show me the tribute money. And they brought unto him a denarius." The "shilling" of the King James Bible, a Roman silver coin worth about seventeen cents.

"And he saith unto them, Whose is this image and superscription?" This question goes to the root of the matter. "The denarius bore the stamp of the emperor. Clearly it belonged to him and must be paid to him."

"They say unto him, Caesar's." Doubtless they said it with a scowl of hatred for the Roman.

"Then saith he unto them, Render therefore unto Caesar the things that are Caesar's; and unto God the things that are God's." Whatever the Caesar of the hour may require us to render to him, what we are bound to render to God remains the same. The two things are different in kind, so different that they never need interfere with each other.

"And when they heard it, they marvelled, and left him, and went away." They marvelled at his readiness of response, at the depth of his wisdom.

"But the Pharisees, when they that he had put the Sadducess to silence, gathered themselves together." It would be a feather in their caps if they could succeed where the Sadducees had failed, so they mustered up spirit to try in their turn.

"And one of them, a lawyer, asked him a question, trying him." He was a scribe, familiar with the law.

"Teacher, which is the great commandment in the law?" "Of the six hundred and thirteen precepts and commandments in the injunctions of the scribes some of course were of major and some of minor importance.

"And he said unto him, Thou shalt love the Lod thy God with all thy heart (the emotions, affections), and with all thy soul (spiritual powers, will, purpose), and with all they mind (intellect, thought, mental ability). "Strength," the physical powers, is added in Mark and Luke.

"This is the great and first commandment." In our present age, with its emphasis on social well-being, we are all too likely to forget the "great and first commandment."

"And a second like unto it is this." As Christ's first commandment summed up the first table of the law, so his second commandment summed up the second table, the two commandments forming a complete presentation of the law of God. "Thou shalt love they neighbors as thyself." This is quoted from Lev. 19 : 18. "Think how you love yourself. Do we not recognize at once the fact that, if we loved every one like that, it would revolutionize society?"

"On these two commandments the whole law hangeth, and the prophets." That is, all the precepts of the Bible are included in those two wonderful rules.

Styles Are Set By Film Stars

What Greta Garbo Wears Makes a Lot Of Difference

What Greta Garbo wears this week in a film depicting the life of an adventurous queen may have a lot to do with the fashions that will be queening it at some future date. For even though the best fashions go to the Grand Couture for their inspiration, it cannot be denied that the costumes of the film stars have a great influence.

Ostrich Boas were seen some two years ago in a film which featured Marlene Dietrich. In a not far future countless evening dresses wearing boas made their appearance — and many women bought feathers by the yard to rejuvenate an old gown.

Joan Crawford's becoming frou-frou has been copied and copied for fashionable young America. When Mae West was recently featured as a gay lady of the nineties immediately there was a revival of plumes, and jewelry and opulence.

Just as a few years ago all smart young Americans let their bobs grow out in the manner of Greta Garbo, today they are cropping it and training bangs to curl softly in the fashion of the vibrant young Katherine Hepburn.

There are certain manufacturers who receive the right to copy the clothes worn by film stars. The costumes are usually labeled as such, and their sale confined to one store in town.

Tree Survey Due For Walkerville

Walkerville Parks Board plans a survey of shade trees in the municipality, with a view to eliminating some trees in spots where they are too crowded. That action was decided upon at a meeting in Willistead when it was reported that requests along this line were being received from a number of residents.

In the elimination process, trees that are not too large for transplanting will be moved.

Victim of Progress

London—Clifford's Inn, one of London's quaintest most historic and most paceful corners may shortly be demolished.

Registered letters arrived at all the flats and offices there, giving three months' notice to all tenants.

The letter explained that the owners of Cliffords Inn—the office of works—are proposing to "redevelop the property," and it is believed that modern offices and shop may take the place of the 400-year old houses.

The Inn lies off Fleet St., and Fetter Lane. Its use by students of law dates back to 1344.

The manner of your speaking is fully as important as the matter, as more people have ears to be tickled than understandings to judge.—Chesterfield.

By BUD FISHER

LOCAL AND GENERAL

May 13th is Mothers' Day.

* * *

Mr. Ernest Duke, of Montreal, is the guest this week of friends in town.

* * *

Dr. Marion Hilliard, of Toronto, formerly of Morrisburg, will sail for England early in June.

* * *

Born—At Morrisburg, on Friday May 4th, 1934, to Mr. and Mrs. Harold D. Coligan, a daughter.

* * *

Bill Sherman has been bringing home some nice catches from the Rideau.

* * *

The death occurred on Thursday morning, at Dunbar, of Mr. John Eli Barkley. The funeral will be held on Friday.

* * *

Miss Genevieve McDonald, nurse-in-training at St. Vincent de P Hospital, Brockville, spent the first of the week with her parents, Mr. and Mrs. J.D. McDonald.

* * *

FREE!! Congoleum 6 x 9 Gold Seal Rug to the person guessing lucky number. See our window, and ask for an Entry Blank at W. MARSH & SON'S Furniture Store.

* * *

Mrs. J.W. Weston attended the annual Convocation and graduation service held at Queen's University on Wednesday, where her daughter, Miss Ruth, received an honor degree.

* * *

Mrs. R.G. Hodge was a guest of friends in town during the week. Mrs. Hodge will sail on Saturday from Quebec, for England, where she will join Mr. Hodge and son, Billy.

* * *

Miss Eleanor Farlinger, R.N., of New York City, is spending the week with her parents, Mr. and Mrs. F.E. Farlinger. Miss Kathleen Farlinger, B.A., of Renfrew Collegiate staff, will spend the week-end with them.

* * *

Albert Mercier, of the village of Casselman, was found guilty on Friday last of assaulting a police officer and was sentenced to pay $25. fine, when he appeared in police court at that place.

* * *

If your eyes need attention, come and see G.W. Goodwin, of the Goodwin Optical Co., Ottawa, Saturday afternoon, May 12, at Henderson's Drug Store. Phone No. 7 for appointment. ac

* * *

Mr. George S. Tracy, accountant in the Bank of Montreal at Exeter for the past four years, has been transferred to the main branch of the Bank, Corner of Yonge and Front Streets, Toronto.

* * *

Mrs. C.L. Hazell spent the week-end in Ogdensburg with Mrs. Frank Herbick, who is a patient in th Hepburn Hospital there. Friends will be pleased to learn that Mrs. Herbick's condition is slightly improved.

Visiting relatives in Brockville after a series of conferences in Ottawa with members of the Dominion ministry, Hon. T.D. Pattullo, premier of British Columbia, spent part of the week-end making an unheralded inspection of Fort Wellington at Prescott. He was conducted over the fortification, dating from the war of 1812 and now incorporated in the National Parks system, by a youthful guide who, unaware of his identity, gave him a series of lectures in regard to the fort and its history, and then, true to the regulations, declined to be reimbursed for his service.

Misses Ethel Mellan, of Queen's University, and Margaret Mellan, of Brockville, are guests of relatives in town.

* * *

Mrs. F.E Farlinger, Misses Eleanor and Sally Farlinger, attended Convocation, at Kingston, on Wednesday, when the latter received her B.A. degree. Miss Sally Farlinger remained in Kingston until Thursday, when she returned home, accompanied by Miss Nora McInnis, of Kingston, who will be her guest for a few days.

Up to a thousand men in Ottawa, Hull, Arnprior and Braeside who have not been in employment for several years will be at work again in the next few days, through the decision of the J.R. Booth Company to re-open its Ottawa lumber mill, closed since the fall of 1931.

* * *

The Morrisburg Women's Institute realizing that money could never be more profitably spent, sought the consent of the parents, and had the diseased tonsils of five Morrisburg children removed at the General Hospital, Cornwall, last week, Dr. Crewson performing the operations gratis. No organization in Morrisburg are known to spend their hard-earned money more judiciously than the Women's Institute, their past record showing that they have, on several occasions, undertaken just such commendable work. Six more similar operations, we understand will be performed in the near future.

One of the oldest and best known land marks in Dundas County, near Elma, built by Mr. Adam Beckstead in 1856, was totally destroyed by fire on Thursday last. For some time the dwelling had been occupied by Mr. Weldon Beckstead, son of Mr. and Mrs. Oscar Beckstead of Elma. The fire may have originated from a defective chimney, and was first noticed by a farmer driving by, the occupants of the house being in the barn at the time. The sturdy walls of this remarkable dwelling which have outlived four generations, and which closed its doors to no traveller in need in the days when horse-drawn vehicles was the only means of transporting their produce from the rear of the county to Morrisburg, still remain standing. While a portion of the contents were saved, it is estimated that the loss will amount to fully $2,000 partly covered by insurance. Fortunately, about 200 cords of wood in an adjoining shed, was saved.

Thrown over the railing of the Ottawa and New York Central Railway bridge spanning the south channel of the St. Lawrence river, when the railway section motor car on which he was riding with other workmen on December 1st of last year, was derailed, Adelard Tessier, 60-year-old Cornwall man, met a watery grave, and late Thursday afternoon the waters of the river gave up its victim.

MR. ALLAN A. LOUCKS

A lifelong resident of Williamsburg Township in the person of Mr. Allan A. Loucks, passed away at his home at Riverside on Monday May 7th. Mr. Loucks, who was in his 79th year, was born on Sept. 24th, 1855.

Surviving are his widow; two daughters, Mrs. Rousell Scott of Watertown, N.Y. and Lulu, at home; one son, Wilfrid Loucks of Detroit, Mich.; two sisters, Mrs. R. Nudell of Poughkeepsie, N.Y. and Mrs. Geo. Baker of Ogdensburg, N.Y.; two brothers, Wm. E., of Detroit, Mich. and Geo. F. of Essex; and three grandchildren.

The funeral was held on Wednesday May 9th, at 2 p.m., from his late residence to St. John's Church, Riverside, where Rev. Mr. Mehlenbacher conducted the service. The remains were interred in St. John's cemetery.

The pall bearers, all neighbours of deceased, were: Messrs Jas. McKenzie, Garnet McKenzie, Geo. Dawley, Harvey Wells, Fred Hayunga and G.A. Dillabough.

MRS. A. BARCLAY

The funeral of Mrs. Amzin Barclay, who passed away on Sunday, after a lingering illness, was held Wednesday from her late residence at Dixons Corners to Rowena United Church, where service was conducted by Rev. Burman of Dundela. Many beautiful floral offerings received testified to the high esteem in which deceased was held.

Mrs. Barclay, formerly Nellie M. Hare, was a daughter of John and Catharine Hare, and was born in 1862. Her early life was spent as a school teacher. Her husband predeceased her 11 years ago. Left to mourn are one daughter, Mrs. Clarence Wallace of Rowena; a son, Royal, of Saskatchewan; a brother, Henry Hare of California; four sisters, Mrs. N.H. Gage, California, Mrs A.E. Cross, Alabama; Mrs. J.J. Hayes, Calgary and Mrs. Chas. Tracy, Saskatchewan. Four grandsons also survive.

MRS. JESSIE LOUNT

Mrs. Jessie Lount, widow of Chas. Lount of Cornwall, died Saturday at an Ottawa hospital, after a brief illness. She was in her 63rd year.

Mrs. Lount was born at Wyevale, Ont., and after her marriage made her home for many years in Cornwall, where her husband was town superintendent. Since her husband's death three years ago, she had resided with her daughter, Mrs. George C. Thompson, in Ottawa. She was a member of the United Church, and will be remembered for her prominent church work. While in Cornwall, she was a member of the Women's Missionary League.

Surviving are one daughter, Mrs. Geo. C. Thompson; four sisters, Mrs. C. Webb, Midland, Mrs. W. Scott. Wyevale, Mrs. T. Dickenson, Allenwood, and Mrs. C.F. Dorsey in Alberta; also one brother, James Reid, of Wyevale.

The funeral was held from the above address on Monday at one p.m., and interment was made at East Williamsburg.

GILMOUR—EASTMAN

A quiet wedding took place at the United Church parsonage, Iroquois, Saturday afternoon, Rev. T. Knowles officiating, when Basil Sylvester Gilmour of Pleasant Valley, and Hannah Jane Eastman of Mountain Station, were married. The bridesmaid was Miss Martha Eastman of Mille Roches, and Mr. Floyd Gilmour, brother of the groom, was best man. The bride wore a gown of white satin, and the bridesmaid was in blue.

Immediately after the ceremony the bridal party motored to the home of the bride's parents, where a wedding supper was held. A reception in the evening was attended by many guests.

Mr. and Mrs. Gilmour will reside in Iroquois.
