MOST DISASTROUS FIRE IN YEARS

The citizens of Morrisburg were awakened on Wednesday, about 2.20 a.m., at the sounding of the fire alarm, and soon hundreds of citizens were on the scene and witnessed the most disastrous fire which has visited Morrisburg in many years. Our Collegiate Institute, after having done faithful service for 35 years, was leveled to the ground, with the exception of two rooms, in less than an hour. While the four outside walls are still intact the roof and interior, including fittings, valuable curios, and other donations, some of which can never be replaced; private equipment, piano, phonograph, typewriters, tablets and pictures, chemicals, pupils' books, amounting in money value, well up to eight or ten thousand dollars, were totally destroyed. A number of the souvenirs were of inestimable value, being contributions from friends.

The fire, which was of unknown origin, was first discovered by Mr. Nelson Bowman, who gave the alarm. At that time flames were confined to the main entrance, but soon spread to the science room, after which several explosions from the chemicals occurred, throwing liquid fire 100 feet into the air which illuminated the sky for miles and fell to the ground like sky rockets—a most thrilling sight that will never be forgotten by those who witnessed it.

Hundreds of people, including the Principal and the other teachers of his staff, stood helplessly looking on, while pupils and ex-pupils sobbed as the fire demon lashed a fiery tongue on its way to destruction, laying into twisted steel and ashes, valuable souvenirs, desks and other fittings which had comforted the pupils, while a faithful teacher imparted his or her knowledge.

Two sets of hose were brought to play on the rear of the building and adjoining buildings, and due to the fact that the roof was covered with iron, and the night calm the local brigade, with the assistance of volunteers, succeeded in confining the fire to the one building. The loss, nevertheless, is very heavy, and is covered by only \$12,000 insurance.

Sharp at nine o'clock, Wednesday morning, the pupils, with almost full attendance, took their seats in the basement of the Methodist and Presbyterian churches and St. James Hall, which were placed at the disposal of the Board, and classes will continue to be held in these rooms until further notice.

An emergency meeting of the School Board, Council, and other representative citizens was held in the Town Hall, Wednesday, at 4.30 p.m. at which Mr. Jas. L. Casselman, chairman of the Board of Education, and Mr. I. Hilliard, K.C., were appointed to go to Toronto and interview the Department of Education with regard to cost of replacing our loss with a more modern institution.

The Board of Education now have a real problem on their hands, and one which calls for the faithful co-operation of fellow-citizens. To the chairman, much credit is due for the meritorious standard of the present local educational system, and it is expected that his services in a time of emergency will be even more enthusiastically rendered than in the past. He has already exercised good judgment in his decision to go to head quarters and get first-hand information in the matter of cost, modern plans, grants and other vital matters, before public discussion begins. He seeks and expects, on behalf of the Board, the assistance and good will of every fellow-citizen, the teachers, and the pupils. On the other hand, the citizens demand from the Board, a thorough investigation into the origin of the fire.

The corner stone of the Morrisburg High School was laid in 1885, under the direction of Contractor, James Gillespie, and was ready for use in February 1886. Mr. J. S. Jamieson, who was at that time and until a few years ago, principal of the school enjoys an enviable reputation for having done probably more than any other man in this community, towards moulding the characters of youth, and fitting them for usefulness in their future stations. Many valuable collections were donated to the school, which can be traced to his personal devotion to duty, and which he valued very highly. No citizen witnessed the destruction of the equipment and building in which he labored so faithfully for many years, with greater regret, than did the highly esteemed ex-Principal.

Shortly after assuming charge, his classes increased in numbers very rapidly, and in 1888, the size of the building was found to be inadequate, and an addition had to be constructed, as well as a gymnasium 30x60 feet, which was not damaged by fire. The school was raised to the rank of a Collegiate Institute in 1890 with a staff of six specialists, and since that time it has made remarkable progress, until at the present day, with its efficient staff, under the direction of Mr. W. C. Froats, M.A., B. Paed, it ranks second to none in the Province.

To the present population of Morrisburg, little credit is due, for the financial investment involved in the cost of the old building, and we should not feel burdened, and criticize too severely, the cost of up-

MRS. ALLAN J. MURRAY

On Tuesday at the General hospital, Brockville, where she had been a patient since February 22, there passed away a well known and highly esteemed resident of Brockville for the past 15 years, in the person of Mrs. Allan J. Murray, 37 King street west.

The late Mrs. Murray before her marriage 16 years ago, was Miss Emma Catherine Lavis, daughter of the late William Ira Lavis, and of Mrs. Lavis of Morrisburg, where she was born. She was in her 37th year. With her husband, well known moulder in the service of the James Smart Mfg. Co. plant, she went to Brockville in 1910, and had since been a resident of Brockville. She was very well known among a wide circle of friends and was esteemed by all who enjoyed the pleasure of her acquaintance.

The late Mrs. Murray, who was a Methodist in religion, bore her long illness and intense suffering with remarkable patience and cheerfulness, and in her demise the bereaved relatives have the sympathy of many friends. The high esteem in which the deceased lady was held was evidenced by the large number of beautiful floral tributes received from friends and different societies and Ladies' organizations in Brockville and elsewhere.

The funeral service was conducted at Brockville, Thursday afternoon at two o'clock at the family residence by Rev. Frank M. Wootton, after which the remains were conveyed to Morrisburg by motor accompanied by her relatives and a large number of sorrowing friends. Interment was made in Fairview Cemetery. The service at Morrisburg was conducted by her cousin the Rev. M. I. Robinson, of Iroquois.

WILLIAM H. GARVEY

William H. Garvey, barrister, of the firm Macdonald, Garvey & Rowland, Toronto, collapsed in a Yonge street car Tuesday morning. He died shortly afterward in St. Michael's Hospital. Born in Williamsburg, Dundas County, about 69 years ago, Mr. Garvey received his early training in law with the firm of Thompson, Henderson & Bell, and was called to the Bar in the Easter term 1891. Later he entered partnership with the late Walter Macdonald, with whom he remained until the latter's death. Mr. Garvey became a well-known figure in the mortgage and loan business, to which he devoted special attention.

He is survived by two brothers and two sisters—Aaron Garvey of Toronto; Mrs. Arthur Shaw and Miss Garvey of Montreal. Mr. Garvey resided at the Charles Court Apartments, 30 Charles St., East.

KATCHA KOO

Brilliance of Oriental Ladies, resplendent in becoming head dresses and gay tunics, effectively sombered here and there by an Eastern slave in brown clothes and properly sober face, will greet the eye when the curtain rises on the Act of the mystic, fantastic KATCHA KOO, to be staged at the Morrisburg Music Hall, May 5 and 6, under the auspices of the Union Sunday Schools.

With the usual finish of Morrisburg talent, and the "pep" which is always brought to all amateur productions, the rehearsals indicate that "Katcha Koo" will be one of the best entertainments ever presented here. The mystery of the Orient and the practical patriotism of modern times are artfully combined amid weird and spectacular scenic effects, shadowed lights, Oriental tapestry, brilliant costumes and the lit of sweet melodies.

The story of "Katcha Koo" abounds in funny situations. The title role of Katcha Koo, the Holy Fakir, gives opportunity for Mr. J. P. Gormley to display his excellent comedy work, while Dr. Davy as the Maharajah of Hunga enters into the part of this wily potentate with zest.

Richard Winnett and Ross Moore are the young Canadian adventurers whose careers are about to end with either poison or starving lions. The Maharajah's quartet of wives, Eunice Weegar, Mrs. Amber Millar, Mrs. Ralph Fetterley and Mrs. Earl Tindal, are charming and attractive.

Mrs. Chattie Gaddin, the wealthy widow, as portrayed by Jane Dillen, and her two daughters Hylda Nash and Winnie Farrer provide screamingly funny comedy, and the slaves of Maharajah, Urbannah and Solejah, who are constantly doomed, are ably taken by Amy Banks and Edith Armstrong.

The many charming drills and dances, which include some of the smallest children of the town and the costuming in Oriental color will greatly enhance the beauty of the production.

Katcha Koo is truly unusual. It is a John B. Rogers production, which is an assurance of quality. Rehearsals are in charge of Miss Jane Fry of the John B. Rogers Producing Company. All scenery and costumes will come direct from the Rogers studios in Postoria Ohio.

A complete cast of characters will be announced later.

Keep. How many, who received their education at this institution, at their fathers' expense, would today sacrifice their education for the amount of their fathers' investment? Courage must not be found wanting—we owe it to our children.

Tea as a Beverage

Tea first became known in China nearly 3000 years before Christ. In that country tea was greatly prized, both for its remarkable qualities as a beverage and for the almost religious ceremony attached to the drinking of it. Up to the sixth century, tea was used only for medicinal purposes. Even in the seventeenth century it cost \$25.00 to \$50.00 per pound. All tea caddies were constantly kept under lock and key. Today when even fine quality like "SALADA" costs less than one-third of a cent per cup, it is not surprising that the consumption of tea is increasing tremendously.

"SALADA"

Kit Kennedy

BY S. R. CROCKETT.

CHAPTER XVII. AN OFFER OF MARRIAGE.

When employed upon the business of the law Willie Gilroy's customs did not alter with the weather or the seasons. He was a small man, with very long arms that hung level with his knees. He wore a battered stovepipe hat as straight up and down as if it had been made with a gross of others in one tube and then cut into lengths to suit the wearer's stature. His legs were out of proportion to the length of his body, and he walked with a long stretching stride which did not vary either up or down hill.

What the Sheriff's officer's meditations were on the way to the Black Dornal it would be hard to tell. Certainly they had nothing to do with the message that took him there, which was to serve a certain legal paper upon Matthew Armour.

Kit had gone to bed when Willie Gilroy arrived. The key were just leaving the byre after milking-time, under the capable superintendence of Miss Betty Landsborough. Now cows are dignified and matronly animals. They do not like to be hurried, and there is a sympathetic and an unsympathetic way of putting them out of the byre.

Rob Armour's way was the unsympathetic—not so Betty's. Rob, a general squire of dames, always wanted to get away to visit at the neighboring farmhouses. So he let the chains fall one after another with a rattle into the stalls, brought down his hand with a surprising "clap" upon each cow's flank, and said in a loud, stable-yard voice, "Hup, you beast!" The motherly, cud-chewing matron so dealt with turned about with surprise and resentment in her slow-moving heart. She gave her tail a flick of protest, and immediately pushed her horns into the flank of her neighbor in front, who in her turn slid on the threshold, in the place where it is always slippery. Thus, according to the methods of Rob Armour, the black Galloway and flecked Ayrshire cows poured tumultuously into the Dornal yard, and took their ways to the hill pastures strangely disturbed in their minds. It had always an effect on the milk next morning when Rob Armour undertook the putting out of the milk-givers the night before.

"But with Betty Landsborough on the quarter-deck how different both method and result!"

She had milked them with a hand light as a caress.

"Now, Flora," she would say, as it came to the turn of some placid and glossy beauty—as it were at the bovine climacteric of "fair, fat and

forthly"—at any rate in the plenitude of her milk.

Then Flora would move a little to make room at her side, and Betty would sit down upon her stool and lean her brow against a soft flank. There was no holding back of milk under such a persuasive hand, which could humor a cow as well as a galling, and yet could set bounds to both that neither might pass.

Then when the milking was done, and the reaming luggies of white milk carried to the milkhouse for the mistress of Black Dornal to deal with according to her art, Betty came back to the byre. Every cow—Flora, Meg, Blossom, Hettie, Beauty, Speckle—turned her head, red-horned Ayrshire and black curly-polled Galloway alike, to see if it was Rob Armour or another who was to put them out. When it was "another" a perfumed sigh of bovine thankfulness pervaded the byre. Each cow knew that the deed would be done sympathetically, and that they would go forth out of the byre and up into the croft so quietly that (a great point with a self-respecting animal) they could discuss both their ends and their neighbors' morals all the way.

"Gently the-n-n!" said Betty, as each neck chain fell into its place, not with loud clank, but with a faint musical clinking. "Gently, beauties!" And so all in order, as if milking had been a pleasure, each Flora and Blossom and Speckle took her even way out of the byre, orderly and calm, giving her head a little shake just to settle the neck hair, where the links of the chain had irked its glossy surface.

Only once the voice of Betty Landsborough rang out determinedly.

"Gae way frae there, Rob Armour," she cried; "gin the pui beasts set their e'en on you they will no gang quietly to their pasture. Ye are a ram-stam, overgrown, headstrong bullock. Get awa' wi' you!"

"Oh, Betty," said the voice of Rob Armour from the stables to which he had retreated, "haste ye wi' the key and I'll walk wi' you doon to Whinnyligatt. I ken that we are gaun to the shop there the night!"

"Deed, I'll gang nae sic gait wi' you, Rob Armour! Tak' yoursel' aff to the Crae and get Leezie to gang wi' you to the shop o' Whinnyligatt. She's no particular!"

"Betty, I'll never speak to Leezie again, gin you will come wi' me the night!"

"Come wi' you I will not, so gang your ways, Rob Armour!" answered Betty Landsborough with finality.

Service in a countryside so primitive as Whinnyligatt argued nothing of social inequality. And Betty Landsborough, the daughter of the cooper in the village, a man with a good business connection, took her place not as servant but as helper, almost as daughter in the house of Black Dornal. She was a handsome girl with dark rippling hair, a pretty, firm mouth, a clear complexion, and the dark blue Irish eyes which, like the sky reflected in a hill tarn, light up a plain face and ennoble a beautiful one.

Betty took her way to the High Croft behind her cattle humming a heart-free snatch of song and twirling a little slip of willow in her hand. She carried the wand for form's sake, but she never laid it upon one of the meek file of cows before her, which, observing precedence as completely as humans at a state reception, had each their appointed order of coming and going, not to be departed from on pain of horning and forfeiture of social standing.

Betty Landsborough put up the bars slipping them into their slots with a little familiar clatter and fastening the cross pin of each. And now with her face to the brown moorlands she stood awhile thoughtfully gazing into the west, thinking the sweetly tangled thoughts of a young maid before "he" comes to gather all the strands into one, and to make sky and earth, the night and the day, the flower and the tree, the sun, the moon and the stars of heaven speak only of

CLIPSE FASHIONS

A Quaint Little Bloomer Dress

Frocks for little folks are becoming more interesting every day, and there is almost as great variety as for the grown-ups. What little girl would not adore this quaint and winsome little bloomer frock No. 1025? It may be made of gingham, chambray, percale, cotton rep or the dainty, patterned English prints. The kimono sleeve upper portion is attached to two semi-circular skirt portions, forming an apron effect, and tied at either side with bows of material or ribbon. The pattern also includes bloomers gathered into knee-bands. Elastic is inserted at the waist. The pattern is cut in sizes 4 to 10 years and requires 1 1/2 yards of 32 inch material for the dress and 1 1/4 yards for the bloomers. Pattern mailed to any address on receipt of 20c in silver, by the Wilson Publishing Co., 73 West Adelaide St., Toronto. Orders filled same day as received.

"him, him—" of what he will say next time, of what he said last time, of what he is doing now, and in especial when he will come again!

Barring a flirtation or two with lads whose names, as far as her affections were concerned, were certainly writ in water, Betty was heart-whole, untouched by love, ignorant as yet of the breathing of that divine breath, which goes round the world stirring to good and evil after their kind the hearts of men, yet making either preferable to the dead stagnation of selfishness.

As she stood looking into the sunset across the pasture bars the lately bereaved Willie Gilroy, Sheriff's officer and proven expert in matrimony, came down the heather, walking as it were in six-league boots—so disproportionate to his size, and especially to the sagging and swaying mourning "weeper" in his hat, were the strides with which he conquered the breathless miles.

"A guid and heartsome evening to you, Betty!" said Willie, cheerfully; "ye are takin' the air?" Betty turned and looked at the little man with the large tolerance which in moments of good nature we may extend to a spider—even to an earwig.

She was a perfectly healthy and healthily perfect country lass, well aware of being pretty enough to choose whom she would marry, but who was not in any hurry to finish the job.

Betty was completely happy at the Dornal. She was fond of her mistress, afraid (but not too much afraid) of her master. In matters of the heart she took it out of her master's sons, and especially out of Rob, the eldest, and she was devoted to Kit Kennedy. She considered herself with justice a fortunate young woman.

"Guid e'en to you, Maister Gilroy!" she said, coldly, recognizing the Sheriff's officer. "I heard o' your loss and I'm vexed for it. But what brings ye

COLOR IT NEW WITH "DIAMOND DYES"

Beautiful home dyeing and tinting is guaranteed with Diamond Dyes. Just dip in cold water to tint soft, delicate shades, or boil to dye rich, permanent colors. Each 15-cent package contains directions so simple any woman can dye or tint lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings, everything new.

Buy "Diamond Dyes"—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton, or mixed goods.

sae far frae Cairn Edward at this time o' night?"

Business, business, Betty, nothing less," said the little man; "my work will not permit me a day's rest even at this trying time. The Queen's service must be attended to."

"Aye, it maun come hard on you—at your time o' life!" said Betty, who, like all her sex, could not get up any sympathy for the too frequently bereaved.

The Sheriff's officer, with the remembrance of his brother's advice in his mind, did not relish the allusion to his age.

"Betty," he said, "I hae kenned you a lang time—"

"Aye," interrupted Betty, "I hae heard my mother say that ye were a man weel up in years at my christening. I dinna mind whether she said ye were at hers as weel!"

"Na," said Willie Gilroy, "I am no near your mither's age—no near!" "Some folk age quicker than others," Maister Gilroy, said the girl, with sympathy in her voice but mockery in her eyes, "and we a' ken that ye hae had your experiences. Let me see, was Margit your fifth or your sixth?" "Fourth!" cried the Sheriff's officer eagerly, "only my fourth!"

Betty did not deign to answer, but turned and began to walk slowly back to the farm, swinging her willow wand to and fro in her hand daintily as she did so.

"Ye'll hae far to gang," she said; "I wadna be keepin' you!"

"Oh, nae hurry," said Willie, "nae hurry ava! I am gaun nae farther than the Black Dornal." He paused to give effect to what he was going to say. "I'm some dootfu' that ye will be wanting a new place at the time, Betty!"

Betty Landsborough turned upon him sharply.

"Ye dinna dare to tell me," she cried, with the inconsequence of all women with regard to the instrument of affairs legal, "ye dinna dare to say that we hae brocht ony o' your nesty law-papers to vex my maister. Rob Armour will wring your neck like a chuckie's if ye hae."

The little man wagged his head.

"Neither Rob Armour nor half a dozen Robs dare deforce the messenger o' Her Majesty the Queen when in the performance o' his duty," he said grandly. "I cannot help the errand on which I am sent."

"It's a puir, puir business," said Betty.

"Maybe, maybe," the Sheriff's officer went on, with offended dignity, "but it's an honest business. And yin that brings in a fair share o' guid siller. Aye, it boils the pot, and that is mair than all the stock on the farm o' Black Dornal will do. I hae a peace-warnin' to deliver to Mathy Armour, eider though he be, that will send him oot o' this comfortable doonstittin'. An' I hae it frae a creditable source that he's sair behind-hand at the bank."

Betty Landsborough said nothing. With a sinking heart she contemplated the ruin of that worthy household where she had been so happy. She knew well what servant lasses had often to put up with in other places, and the house of the Ruling Elder had been a haven of security and peace to her.

But the Sheriff's officer had yet more to say.

"Aye," he continued insinuatingly, "ye'll be wantin' a new place, Betty, and that afore lang. Weel, ye ken me. I'm a man that weemen folk has been partial to a' my life, though I say it mysel'. Noo, Betty, I speak to you as a friend, do you think that ye wad like to come an' keep hoose for me?"

Betty turned upon him a regard so fixed and stern that the least sensitive man might have taken warning.

But Willie Gilroy was completely panoplied in the armor of his own conceit.

"Dinna be bashfu' Betty; I ken it's kind o' overcomin' at first, but I assure ye that I mean it seriously," he said, trying to subdue a certain condensation.

"To be your hoosekeeper—ye want me to be your hoosekeeper—and Margit (your sixth) hardly could in her grave! What do you tak' me for?"

Betty finished her sentence with a vehement question, and bent towards the little man as if she would have annihilated him on the spot.

But Willie Gilroy was not warned even by this. He expected that Betty would be overcome.

"I tak' ye for a sensible lass," he went on, "that kens a guid offer when she gets it. Faith and mind I dinna say, but if ye are a guid lass and biddable, and your faither (wha is weel-to-do) does the richt thing by ye, I michtna e'en mak' ye in time Mistress Gilroy. Of coorse I dinna promise that, till we see hoo ye turn oot. The offer is 'without prejudice,' as we say in our business. But still I'll not say but what I micht. Ye are a snod bit lass, a guid worker and no that ill to look upon!"

The Sheriff's officer put his head a little to the side after the manner of a cock sparrow.

"Eh, what say ye to that?" he asked, perkily. "That's a fair offer, Betty, is it na? Ye didna expect the like o' that when ye left the onstead o' the Black Dornal to caa' oot the kye. What say ye to that—what say ye to that, my bonnie woman?"

"That!" cried Betty Landsborough, briefly.

And as the word left her mouth a firm hand, impelled by a strong right arm, took the astonished Willie on the ear with a bang that cracked like a pistol shot, and he staggered across the road to the hedge before he could recover himself.

"That's my answer to an impudent atomy that ought by rights to be on the tap o' a barrel organ wi' a red jacket on and a brass plate for pennies in his hand. Ye vrad ask Betty Landsborough to be your ninth or tenth, after comin' to pyke oot her maister's e'en. Gin ye dinna want mair and waur, Willie Gilroy, never daur to speak to Betty Landsborough again!"

(To be continued.)

The stain of life is selfishness. The antidote is public spirit.

For Sore Feet—Minard's Liniment.

"Clothes last longer when washed properly"

says
Mrs. Experience,
who tells how
to wash them.

"Some women actually rub holes in clothes trying to get them clean with harsh, ordinary laundry soaps, which are only half soap anyway. No wonder they say, 'Washing is so wearing on clothes'."

"The easiest way I've found to wash clothes—easiest on clothes and easiest on myself—is by using Sunlight Soap. No boiling or hard rubbing is needed—the pure Sunlight suds penetrate through and through each fabric, loosening dirt and dissolving grease spots. Then in rinsing, all dirt and soapy matter just runs away."

"And as every bit of Sunlight is pure, cleansing soap, it lathers generously, does not fade anything washable and is far more economical. Sunlight keeps your hands nice and soft. Levers, Toronto make it."

Sunlight Soap

Inventors, Read This.

An English writer had noticed in a newspaper an advertisement saying that a successful inventor invited suggestions for things that ought to be invented responded with the following verses:

I'd rather like a golf ball which would give a plaintive squeak
When hidden in long grass to guide the steps of those that seek;
I'd simply love a razor blade which did, in practice, shave
As many times as those concerning which the advertisements rave.

I wouldn't mind on winter nights a new electric sheet
Through which—on getting into bed there glowed a gentle heat;
Belinda, who considers cheeks the proper place for roses,
Would like, she says, to see an unobtrusive muff for noses.

I'd like a collar-stud which never rolled into a chink;
I'd like a fountain pen that held a pint or two of ink;
I'd like a 'phone which always gave the number it was told,
And, oh, I should be thankful for a cure to stop a cold!

I'd like a car that ran itself on kindness and fresh air;
I'd like a way of making sure that summers would be fair;
I'd like—but why extend the list I think my little rhyme
Contains enough to keep the wizard busy for a time.

Comets have been known to exceed a hundred million miles in length and ten million miles in breadth.

An Undesirable Partner.

Miss Perch—"I'll never dance with Mr. Lobster again."
Miss Minnow—"Why?"
Miss Perch—"He pluches so hard when he holds you."

Minard's Liniment Fine for the Hair.

A Strange Worm.

A scientific expedition has found in the Olympic Mountains a strange worm that lives only in ice. It is thin, black and about half an inch long. In one place the ice was fairly covered with the worms. Taking one of them in the hand kills it. In fact, they are so sensitive to heat that they crawl into the ice from shelter whenever the sun comes out. The expedition could not bring home any live specimens, but it made a number of photographs of the worms.

"The Standard by which other Irons are Judged."

Stories About Well-Known People

Curwood's Death Threat.

James Oliver Curwood, the well-known author, lives in Owosso, Michigan, where there have been complaints lately that bootleggers are attempting to sell liquor to boys and girls. The author made the sensational announcement a few days ago that if any liquor is ever furnished to his twelve-year-old son the vendor in question will be killed and James Oliver Curwood will do the killing.

His Greatest Ambition Was Never Fulfilled.

A traveler just back from India says that in a recent chat he had with the viceroy, Lord Reading, the latter recalled an interesting incident of his youth.

"My first visit to Calcutta," Lord Reading said, was when I was a boy of fourteen. I ran away to sea and went to India before the mast. The next time I came as viceroy.

"On the first trip I made one resolve. I was so impressed with the smart appearance of the Bengal pilot who came aboard to take charge of us that I determined to be a Bengal pilot and dress like him. That resolve—my

dearest wish—has never been fulfilled."

"A Wee Bit Laddie."

The Prince of Wales drove through a Scottish town, accompanied by the Provost, the latter resplendent in scarlet robes of office and a plumed hat, and the Prince wearing the uniform of a Highland regiment. A child who saw them drive by rushed home in great excitement.

"Mither, I've seen the Prince!" she exclaimed. "He looked fine in a red cloak and a feathered hat, and by him was sitting a wee bit laddie in tartan breeks."

A British Jack Miner.

Lord Grey of Fallodon appears this spring in a Miner role. In other words he is the British counterpart of the Canadian bird-lover, Jack Miner. On his English estate he has converted two little ponds into a home for wild fowl. The birds have now come to recognize his love for them and return the great statesman's affections. As soon as his footsteps are heard they flutter up to get the food he is sure to have ready for them.

A HAPPY CHILDHOOD IS A MATTER OF HEALTH

Little children quickly get out of sorts but by prompt treatment they can be just as quickly set right again. Most of their troubles arise in the first place from the stomach and bowels; that is why a good clearing out is the first thing the doctor prescribes. Mothers, why not let Baby's Own Tablets keep your children well? Unlike that ill-smelling, rank tasting castor oil so dreaded by most children, the Tablets are pleasant to take and their action, though thorough, is gentle and causes no discomfort to either the baby or the growing child. Baby's Own Tablets are a never failing remedy for relieving constipation and indigestion; thus they break up colds and simple fevers, expel worms and make the teething period painless. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Novel Ending.

When little Bessie, who is fond of listening to the children's hour on the wireless, knelt down to say his prayers the other night, he finished in an unusual way.

At the close of the customary string of petitions, he said: "This concludes our programme for to-night. Good night and Amen."

A tiny field ant has been known to hold in its jaws a weight three thousand times heavier than itself. If a man had proportionately the same strength in his jaws, he could lift 275 tons.

WE WANT CHURNING CREAM

We supply cans and pay express charges. We pay daily by express money orders, which can be cashed anywhere without any charge.

Our Present Price is 37 Cents Per Pound Butter Fat.

Nett to you at your station.

Price is subject to change without notice. To obtain the top price, Cream must be free from bad flavors and contain not less than 30 per cent. Butter Fat.

Hills in Heaven.

God grant there be hills in Heaven
For those who have fought their best,
For those who have struggled and striven
And look to the heights for rest.
God grant there be quiet places
And heath where the hill-winds pass.
Where we bury our hot, shamed faces
In the cool, wet mountain grass.

The sea with her magic portals,
The vale with her plough-turned sod—
These whisper a while to mortals,
But the peaks talk on with God.

To the yeomen their fields be given,
And the captains—give them their sea!
But I pray there be hills in Heaven
To stand through Eternity.

—Will H. Ogilvie.

SPRING IMPURITIES DUE TO POOR BLOOD

A Tonic Medicine a Necessity at This Season.

Dr. Williams' Pink Pills are an all-year-round tonic for the blood and nerves. But they are especially valuable in the spring when the system is loaded with impurities as a result of the indoor life of the winter months. There is no other season when the blood is so much in need of purifying and enriching, and every dose of these pills helps to enrich the blood. In the spring one feels weak and tired—Dr. Williams' Pink Pills give strength. In the spring the appetite is often poor—Dr. Williams' Pink Pills develop the appetite, tone the stomach and aid weak digestion. It is in the spring that poisons in the blood find an outlet in disfiguring pimples, eruptions and boils—Dr. Williams' Pink Pills clear the skin because they go to the root of the trouble in the blood. In the spring anaemia, rheumatism, indigestion, neuralgia and many other troubles are most persistent because of poor, weak blood, and it is at this time when all nature takes on new life that the blood most seriously needs attention. Some people close themselves with purgatives, but these only further weaken themselves. A purgative merely gallops through the system, emptying the bowels, but does not help the blood. On the other hand, Dr. Williams' Pink Pills enrich the blood, which reaches every organ in the body, bringing new strength and vigor to weak, easily tired men, women and children. Try Dr. Williams' Pink Pills this spring—they will not disappoint you.

Among those who have proved the value of Dr. Williams' Pink Pills is Mr. Austin Wile, Hemford, N.S., who says:—"I have reason to be deeply grateful for what Dr. Williams' Pink Pills have done for me. An abscess developed in my head, and the doctor who was called in said my whole system was poisoned. My appetite completely failed and I grew so weak I was unable to do any work. The doctor's medicine did not help me so I decided to try Dr. Williams' Pink Pills. At this stage I was reduced almost to a skeleton, and my friends did not look for my recovery. I soon found, however, that the pills were helping me and after taking them for about two months I was fully restored to health. My case was known to all my neighbors and my recovery looked upon as almost a miracle."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Throwing Buns at Brides.

The throwing of rice as the happy couple who have just been married emerge from the church, or set out on their honeymoon journey, has almost given way to the throwing of the more harmless confetti.

The custom of throwing rice probably came from the East, where rice is the staple food and where plenty of rice means comfort and prosperity. Thus, to throw rice means: "May you never lack a good meal!" or, in other words, "May your married life be prosperous!"

The Romans used to scatter corn in a bride's path, and in Poland the neighbors throw handfuls of wheat, barley, oats, or even beans, at the bride's door.

In Italy nuts take the place of cereals, and one can imagine that the Italian children have a happy time picking them up, just as German children, in country places, pick up the cakes and tiny buns flung from cottage widows at a passing bride.

New Tobacco Tin.

The history of the development of tobacco is a record of innovations, modifications and devices planned to make its use more enjoyable. The latest of these is a vacuum tin in which one tobacco company is now packing several of its brands. It is claimed for the new container that it preserves unimpaired the flavor and fragrance and retains all the natural moisture.

Gray hair is beautiful in itself, and so softening to the complexion and so picturesque in its effect that many a woman who has been plain in her youth is, by its beneficent influence, transformed into a handsome woman. —Miss Oakley.

OGDEN'S LIVERPOOL

Ogden's CUT PLUG

Fourteen Advantages of a Pure-Bred Bull of Good Breeding and Good Individuality.

1. Economical and Rapid Improvement.—One pure-bred bull will improve the herd as rapidly as 50 pure-bred cows.
2. Lasting Influence.—The value of a pure-bred bull is not seen entirely in the first generation, but continues in the following generations.
3. Fewer Bulls Necessary.—One pure-bred bull properly managed will do the work of four scrub bulls, as they are managed at the present time.
4. Advertisement Valuable.—Well bred stock attracts the attention of buyers.
5. Creates a Demand for Our Local Pure-bred Bulls.—The breeder of pure-bred stock in Ontario are sometimes discouraged because of lack of demand for their stock.
6. Affords Opportunity Gradually to Work Into Pure-bred Business.—If there is a pure-bred bull in the community it is an easy matter to purchase one or two pure-bred cows and soon be in the pure-bred business.
7. Co-operation Possible.—If there are as many as four or five pure-bred bulls in the community there is an excellent opportunity to co-operate by exchanging bulls, pooling cattle, etc.
8. Pure-bred Bulls Will Sell for More Than Scrubs After Their Period of Usefulness is Over.—A 2,000-pound pure-bred bull is worth more for beef than a scrub which usually weighs 1200 to 1400 pounds.
9. Prepotency Important.—A pure-bred bull will have calves more like himself than the dam. This is due to concentrated blood lines.
10. Uniformity Increases Value.—Buyers will always pay more for a uniform bunch of cattle than for a mixture of scrub and pure-breds.
11. Offspring is Worth More.—A calf is worth \$5 to \$10 more, a yearling \$15 to \$20 more and a two-year old \$25 to \$30, if sired by a pure-bred bull.
12. Better Living.—The pure-bred bull means more money which in turn makes possible better homes, better schools, better churches, better roads and a better and more satisfying country life.
13. Good Influence on Owner.—When a man has pure-bred livestock on his farm he naturally takes more interest in it and feeds and cares for it better than he otherwise would.
14. The Farmers' Gain is Not Somebody's Loss.—A farmer can raise a better calf and no one is the poorer. He thus creates wealth.

It was Charles's first visit to the country and everything was interesting. He came running in from the barn exclaiming, "Oh, Mama! I saw some white pigs and an also." "An also?" asked his mother. "Yes, a black also," repeated Charles. His mother was bewildered until the little fellow told her what his uncle said, "Here are some white pigs and a black, also."

For Sore Throat Use Minard's Liniment

For Colds BAYER ASPIRIN

Proved safe by millions and prescribed by physicians for

Colds Headache
Pain Neuralgia
Toothache Lumbago
Neuritis Rheumatism

Safe Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists. Aspirin is the trade mark (registered in Canada) of Bayer, manufacturer of Monocystol and Salicylic Acid. "A. S. A." White it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

A Volunteer Fireman.

Lady—"I hate to bother you again, but would you mind giving me just one more glass of water?"

Clerk—"Why, certainly not, madam, but would you mind telling me why you want so many? This is the fourth."

Lady—"Well, I know you'll just die when I tell you, but I'm trying to put out a fire in my room."

Annual Meeting of Bovril Company.

Presiding at the annual general meeting of the Bovril Company, Sir George Lawson Johnston emphasized the fact that the Company had maintained its pre-war prices in the face of a most difficult trade situation and the payment of very heavy taxes and were able to show record sales and record net profits. This was due largely to the increasing demand for "Bovril."

The year just closed showed net profits of £390,992. The capital employed is between twenty and twenty-five million dollars.

It is difficult to be always true to ourselves, to be always what we feel we ought to be. . . . As long as we do not surrender the ideal of our life, all is right. Our aspirations represent the true nature of our soul much more than our everyday life.—Max Muller.

BETTER IN EVERY WAY

After Taking Lydia E. Pinkham's Vegetable Compound

Ingomar, N. S.—"I took your medicine for a run-down condition and inward troubles. I had pains in my right side so bad at times that I could not walk any distance. I saw about Lydia E. Pinkham's Vegetable Compound in the newspapers and have taken five bottles of it. I am better in every way and you can use my letter to help other women." —Mrs. ALVITA M. PERRY, Ingomar, N. S.

Nervous Breakdown Relieved

Toronto, Ontario.—"It is pretty hard to explain your feelings in nervous troubles. I felt low spirited, had pains in my head and eyes, always crying, and did not want to go anywhere. I do knitting and fancy work, and I would get irritable after a few minutes of work. I have been in Canada five years and have been this way ever since I came. I am taking Lydia E. Pinkham's Vegetable Compound and I sleep better and it seems to make me eat, and I must say I am feeling more jolly. I have great faith in your medicine because of what it has done for my husband's sister and she recommended it to me." —Mrs. A. SMITH, 10 Burleigh Avenue, Toronto, Ontario.

All druggists sell this dependable medicine, and women suffering from these troubles so common to their sex should give it a trial now.

Progress in Marketing Lambs

A Study of the Toronto Market shows that 31% of the lambs marketed during 1923 were Bucks. In 1924 only 9% of the Lambs marketed were Bucks. This meant that the producers not only saved the two-dollar penalty, but got an increased price through selling a better quality of mutton.

Will the Sheep Breeders Continue This Progress in 1925?

THE NEW UNITED CHURCH

Morewood, Ontario.

Early in January when the voting was completed it was found that the Presbyterians had registered an adverse vote for union. At once the minority, feeling that they were going with their church into union, met at the Manse and organized a large committee. Soon this committee met the Quarterly Official Board in the Methodist Church, where a Building Committee was selected for 'it was fully desired that a new church would be erected in the Village. The two congregations—the Presbyterian Minority, and the Methodist—met and mutually pledged themselves to enter the United Church as soon after June the 10th, as such action could be legally done. At a congregational meeting it was decided to erect a new church building; at another such meeting the people selected a splendid site along the main highway leading to Ottawa. The building will stand in the west of the Village where it will have a southern exposure. At present an architect is presenting detailed plans to the committees for their consideration. The sketch shows well-proportioned, attractive and an up-to-date structure. There is a strong spirit of hopeful optimism regarding the construction of the new church, the union of the two congregations, and the deepening of religious life that will come to the people of our community.—Press Com.

A meeting of G. W. V. A. will be held at Club Room on Monday, May 8th, at 8 p.m.
All Comrades are requested to attend.

DUNDAS CO. LOCAL COUNCIL, M. T. F.

The Dundas Local Council of the Ontario Men Teachers' Federation is now 75 per cent strong and is still growing. Only six out of twenty-four men teachers are as yet non-members and it is expected that these will join up in the near future.

The Council held its second meeting at Winchester recently and, in spite of bad roads and exceedingly inclement weather, a good number were present. Everyone entered heartily into the spirit of the meeting and plans were made for some worth-while activities in the near future under direction of the Council. A tentative schedule of places and dates of meetings was drawn up and agreed upon by those present. Not the least important of the activities proposed is that of arranging a County School Fair under direction of the Council and in co-operation with the work of the District Representative of the Department of Agriculture in conducting the Rural School Fair. It has since been learned that Mr. Springstead, the local District Representative heartily approves of the idea. The plan is to have an Exhibition, and Contest of the Winners of the School Fairs in certain entries, this County Fair to be held immediately after the completion of the School Fairs, and at some central place, as nearly as possible equidistant from all points of the county. A committee was named to look into the matter and report at the May Meeting.

A number of other discussions came up dealing in general with Federation ideas, and in particular as to Dundas County. After the business meeting a sumptuous banquet was held at which a number of those present spoke on matters of interest to all teachers. The last meeting before the summer holidays will be May 30 when it is expected the record for attendance will be broken, and by which time almost 100 per cent membership will have been reached.

FIRE AT SPENCERVILLE

Fire broke out on April 20th in the Village of Spencerville, nine miles from Prescott, and destroyed the residence, garage and barn owned by Dr. P. A. McIntosh, who is widely known throughout the country having twice contested that riding as Liberal candidate. The fire originated in the garage and rapidly spread to the adjoining buildings.

Stock consisting of a valuable horse, a cow and several sheep were burned. Dr. McIntosh also lost his car and a portion of his household furniture. Several hundred people gathered from the surrounding district, and but for their united efforts in protecting other buildings the village would have been swept as a high wind prevailed at the time and the village was without fire protection other than the volunteer bucket brigade.

The Prescott Fire Department were called to the scene of the fire and rendered valuable assistance. The loss is heavy and is partially covered by insurance.

RENNIE'S SWEDE TURNIPS

FOR a bumper crop of Swede Turnips for stock feeding in Fall and Winter, sow Rennie's specially selected Northern grown Seed.

Rennie's Swede Turnip Seed is carefully tested for germination and purity, and will yield heavy and profitable crops.

Better Times Follow THE USE OF A PRIMROSE

AS SOON as you begin using a Primrose Cream Separator, it will start a whole train of better conditions for you.

1. You will get one-fourth to one-third more cream from the same amount of milk.
2. You will have cleaner, sweeter cream in better condition for butter making.
3. You will have an ample supply of warm, sweet, pure skim milk for feeding calves and pigs.
4. You will raise your heifer calves at smaller cost and thus build a better herd.
5. You will eliminate one of the commonest sources of cattle diseases—factory skimmed milk.
6. You will retain on the farm the fertility that is in the grain you feed.
7. You will have an all-the-year-round cash income from the sale of cream.
8. You can raise more and better hogs and make a better profit on them.
9. You can have better chickens and more eggs.

Mr. and Mrs. Orvin Dillabough, Mr. and Mrs. A. B. McConnell spent Monday at Ottawa.

Messrs. Dean Loucks, Norman McLeod, Ralph Dillabough, and Miss Ella Steinberg, returned to Ottawa after spending the holidays at their respective homes.

Mr. and Mrs. Walter Steinberg spent Sunday at Cardinal.

Mr. Wm. Elliott returned home from Winchester where he has been taking treatment.

CEDAR GROVE.

Mr. and Mrs. Geo. Hall and family have moved to Aultsville.

Mrs. Frank McConnell and Miss Muriel spent a couple of days last week with Mr. and Mrs. Sterling Dillabough, Riverside.

Mr. and Mrs. Oscar Lane and children spent the 19th. with Mr. and Mrs. Fred Dafoe.

Mr. and Mrs. Jas. Bryan and daughter Miss Helen were guests of Mr. and Mrs. Wm. Myers the 19th.

Mr. Loverin of Finch, the Raleigh agent was in the Grove on Monday.

Mr. and Mrs. Jas. Styles and Mr. and Mrs. Murray Styles and baby of Froatburn, and Mrs. Robert Cassleman and son of Louisville Landing, N. Y. visited Mr. and Mrs. Mason Beckstead on Friday.

Miss Audrey Froats, of Gallinger-town spent a few days with Miss Margaret Myers.

Mr. and Mrs. Jack McConnell and sons of Gallinger-town were recent visitors at Mr. W. A. Wereleys.

Messrs Charles, George and Frank Dafoe were in Morrisburg on Monday.

Miss Mabel Wells, of Aultsville, visited her aunt Mrs. W. T. Dafoe and other friends here Saturday.

Mrs. Mason Beckstead and children spent Wednesday at her parental home, Froatburn.

Mr. and Mrs. Clarence Dafoe of Massena, N. Y. visited friends in the Grove on Sunday.

Mr. Robert Dafoe has returned home after spending some time with friends in United States.

Mr. and Mrs. Wm. Myers and daughter Miss Nora motored to Morrisburg on Tuesday.

Mr. Ralph Fetterley, was calling in the Grove on Monday.

Mr. and Mrs. D. D. McLeod and daughter Miss Jean of Moose Creek, are recent callers in the Grove.

The young peoples society of Gallinger-town, will present a Four Act Play entitled, "Farm Folks," in Fraternity Hall, Aultsville, Wednesday evening April 29th commencing at 8 P. M. Miss Muriel Stewart elocutionist, will assist with the programme. Watch for posters.

GRANTLEY

At the time of writing, we are glad to see Mrs. Don Carr able to be around again after here recent sickness.

Mr. Don Carr and son Claude spent Saturday with Mr. and Mrs. Wm. Carr of Boucks Hill.

Miss Charlotte Carr, spent Sunday the guests of Mr. and Mrs. Alonzo Murphy.

Visitors at Milton Carr last week were Mr. and Mrs. Stanley Wells, of Hoasic. Miss Hazel and Gladys

NOTICE
All accounts owing me must be paid before June 1st after that date they will be handed in for collection. Beginning May 1st, my business will be conducted on a strictly cash basis.

ADAM FROATS,
Williamsburg.

PASTURE

Pasture for young stock, 2 1/2 miles west of Morrisburg.
Apply, STUART WEIR,
Farlinger Farm,
Morrisburg.

"Child's Eyelids Inflamed Stuck Together and Bled"

Mr. E. P. Kimball, Entwistle, Alta., writes:
"Our little girl from birth was troubled with inflamed eyelids and in spite of several remedies, grew worse until at the age of sixteen months her eyes could not be opened after sleep without bleeding, a waxy discharge sticking the lids together and adhering with great tenacity. The child's grandmothers were consulted by mail, and both responded with a little sample box of Dr. Chase's Ointment. These were used as directed, and lasted until we could obtain a further supply from Edmonton. Improvement was very marked from the first application. The waxy discharge was easier removed and did not reappear. Inflammation subsided and has not returned."

Woman's Sphere

CO-OPERATIVE HOUSE-CLEANING.

For years the "men folks" had helped each other during the busy season, had co-operated to the extent of using one tractor plow, one hayloader and other expensive farm machinery and had found that this in a measure solved their farm help question. Last spring their wives decided that co-operation would work as well inside the house as out, especially at house cleaning time, and the experiment worked out so well that it will become a permanent plan.

There were five women, living each on a farm but at no great distance from each other, and as time for the annual spring cleaning arrived they met and discussed the problem as women will.

Finally one suggested, that as no woman can go into another's house and clean exactly as that one wishes, in fact, if the truth be told, that no woman likes to have even her dearest neighbor poking into unused closets and sweeping dark corners, that another and better way of helping could be devised.

Every woman knows that uninterrupted cleaning is a pleasure, but that the stopping to get meals, to put the baby to sleep, or to watch the older children is nerve wracking when she is trying to get mattresses beaten and bedding in before night.

The plan devised by these five gave each a week in which to clean and dates were arranged ahead. The first two days the women cleaned bureau drawers, cupboards closets, etc., work that did not interfere in any way with meal getting. The third and fourth days were given over to real house-cleaning. On the third day one neighbor entertained her and her family for dinner, the provision being that she should not dress but should come exactly as from her work, the men were under the same obligation, and the children came directly from school.

The second day another neighbor was hostess, the guest going back to her work rested and refreshed.

In two families there were children under school age, and these were taken to the home of one of the women (not the one who entertained for dinner) and kept during the day, being returned to their own home by the one who cared for them, instead of the tired mother going for them.

At the end of the cleaning these five women found that what had been most dreadful of tasks, under the new way was a real pleasure, and that her house cleaning week had put no severe strain upon either her strength or the patience of her family.—Mrs. L. M. T.

CONFETTI WEDDING BELLS.

To shower confetti from bells is a novel and charming idea for a wedding. The bell is shaped from cardboard and covered with silver or gilt paper; or it could be covered with flowers. The bell is filled with confetti and a circle of paper is fastened across the base. Ribbon streamers

are attached to the sides of the bell underneath the paper, which is ripped apart when the ribbons are pulled and releases the confetti on the bridal couple passing beneath.

VOTES FOR WATER SYSTEM.

I believe the majority of women living on farms will agree, that while there are dozens of conveniences—time savers, and labor eliminators for the home, that by installing a water system with proper drainage, more time can be saved and more downright drudgery done away with, than could be accomplished by any one method.

Think of the time and back-breaking energy expended between the pump and the kitchen table, to be followed by carrying all waste water still farther away. What an exasperating way the water pail has of being empty when one is in a great hurry and fagged to the breaking point.

What a safeguard to the health of the family and the improvement of conditions in the back yard, could be accomplished by the expenditure of a few dollars invested in drain-pipe, and a kitchen sink.

A water system would lift a load of weariness off the shoulders of the busy housewife, that cannot be reckoned in dollars and cents.—Mrs. C. F. P.

HOW TO MAKE KNIT RUGS.

I am knitting rugs and have made a very serviceable one for the bathroom from the heavy mottled blue and brown work socks cut around and around. Cast on four stitches, widen one at each end until you have ten or twelve on the needle. Knit plain the length desired, then narrow one at the end each time until there are four stitches left, and bind off. The strips to go around this are knit plain with ten or twelve stitches on one side taken off each time without knitting, making it curve. The last strip is knit in points. Cast on four stitches and widen one each time until you have twelve, then narrow one each time until there are four again and repeat. On the side opposite the points the first stitch is taken off each time without knitting.—Mrs. E. H.

IS THE OVEN TOO HOT?

The proper oven temperature is an important consideration in the successful preparation of food. Many a last minute failure in a carefully prepared recipe is due to too slow or too quick an oven. Oven temperatures for various foods suggested by the home economics department at South Dakota State College are as follows:

Custards and meringues require a slow oven which ranges in temperature from 250 to 300 deg. F. Sponge cake, angel cake, bread, ginger bread, plain cake and cookies are baked in a moderate oven with a temperature of from 350 to 400 deg. F.

A hot or quick oven, 400 to 450 deg. F., is best for parker house rolls, popovers, baking powder biscuits and some quick breads. For biscuit and pastry, a very hot oven of from 450 to 500 degrees is required.

The Fly Campaign.

The house fly seems to have been born in the world with the single idea that its greatest utility was to plow through the most loathsome filth to be found in the neighborhood, then with its hairy legs and suckerlike feet reeking with disease breeding bacteria, it enthusiastically darts for the nearest open door, scampers rapturously over our dining equipment, dives headlong into our food, marches sedately over the lips of sleeping babies, leaving a trail of disease-breeding filth in its rear.

As a medium for propagation the laurel wreath should be draped over the brow of the common house fly. At the age of two and one-half days she is able to deposit approximately 150 eggs. These eggs, deposited in their ideal breeding bed, which, owing to the heat it generates in fermentation in horse manure, will hatch into maggots in eight hours. The maggots reach the pupae stage in three days under favorable conditions. The pupa becomes a full grown fly in from three to six days. Think of that, an individual ten and one-half days old being the grandmother of several thousand at the end of sixteen days, and the great grandmother of better than a million in the course of a month.

While various remedies, such as screens, sticky fly paper, poisons and traps, prove effective in reducing the number to an appreciable extent, the logical point of attack should be at its source. While it is far more economical, both as to retaining the full fertilizing value of the manure, and checking the fly menace, to draw the manure to the fields each day, the average farmer finds himself, during the busy time of the year, unable to spare the time for this purpose.

While numerous experiments, such as manure pits constructed of cement, and made flyproof, slatted racks where manure is piled, the fly maggot crawling down between the slats and dropping in a water tank placed below, have been tried and found effective; it would seem that such equipment would be beyond the scope of the average farmer. It would seem for him

that the most logical solution was the chemical treatment of the manure. Experiments where a half pound of powdered hellebore was mixed with ten gallons of water, stirred well and allowed to stand twenty-four hours, then sprinkled thoroughly through ten cubic feet of manure, was found to destroy from eighty-eight to ninety-nine per cent. of the fly larvae. As this solution is slightly poisonous it should not be left standing where it might be drunk by cattle or horses. It was found that hens picking over the manure that had been treated suffered no ill effects. Experiments where one pound of powdered borax was sifted over the surface of about sixteen cubic feet of manure, then sprinkled with water, was found to destroy about ninety per cent. of the larvae, while a large proportion of borax over the same amount of manure destroyed ninety-eight to ninety-nine per cent.

It was found that mixing with each bushel of manure one-half pound of calcium cyanamid with one-half pound of acid phosphate then wet down with water not only added to the fertilizing value of the manure, but destroyed approximately ninety-eight per cent. of the fly larvae as well.

Minerals for Pigs.

"Good clean pasture, plenty of water, a little corn and some minerals are the things most needed by pigs to bring them through the summer in good shape," a successful farmer declares.

"I never ring a hog. When I find hogs rooting I know they want something they are not getting in their ration, and I give them a mineral mixture. During the summer I feed them only a moderate amount of corn, just enough to keep the pigs growing nicely, and finish them up the following spring, weighing around 250 to 300 pounds."

Most of the poultry profits are made in the first six months of the year.

Where oxen are the crib is clean but much increase is by the strength of the ox.—Prov. xx, 4.

ECLIPSE FASHIONS

1029

A Nightgown that is Practical as well as Dainty

Almost every home sewer delights in making her own dainty undergarments. There are so many beautiful lingerie materials in the shops that there is no difficulty in finding the right material, whether it be fine nainsook, silk mull, French voiles, cotton crepe or crepe-de-chine. The gown illustrated is very easily made. It may be finished at neck edge and armholes with narrow binding and tied together on shoulders with narrow ribbon bows. The pattern includes a berth which may be of all-over lace if a more trimmed garment is desired. No. 1029 made in sizes 36, 40 and 44 inches bust. Medium size requires 3 1/2 yards of 36-inch material without the berth; 5/8 yard more with berth.

Pattern mailed to any address on receipt of 20c in silver, by the Wilson Publishing Co., 73 West Adelaide St. Toronto. Pattern mailed same day order is received.

All successful agriculture of the world has been developed around legumes.

The farmer plows in hope, plants in faith, harvests in prayer and markets by accident.

The Rock Garden.

The rock garden is worthy of more appreciation than it receives. Often trouble is taken to remove rocks in the vicinity of the dwelling to make way for a level lawn or flower plantation. Many on the other hand who have studied the possibilities of the rock garden will haul rocks for long distances to build up one of the most interesting features that can be added to the home grounds. Steep banks are difficult to maintain. They are torn and washed by the rains and are seldom beautiful. These, however, are easily converted into attractive rock and wild gardens. Stones and boulders may be inserted in the bank to give the appearance of a natural rock outcrop. Pockets of good soil can be made in which to plant flowers, of which there are many suitable kinds. Rough stone steps and a winding path add attractiveness and interest.

After the rock garden has been constructed little can be done in the way of fertilization of the soil. For that reason whatever soil is used in the construction of a rock garden it should be made at least moderately fertile. Many of the plants most useful in the rock garden need little special manuring. Some of them indeed flourish best on rather poor soil so long as it is well drained. Rock gardens are usually best adapted to plants requiring dry and well drained situations. There are many plants very suitable for rockery purposes. The larger the rocky the more robust and luxuriant plants can be used. Where large rocks make up the rockery two or three masses of herbaceous perennials should be set in. These if chosen to come into bloom at different times, add variety and contrast. Between these can be filled with ferns and low growing flowering plants, and in the open spaces still remaining low creeping plants should be used. These will cover most of the rocky surfaces, although some of the stones should be left exposed to give a rugged beauty to the garden.

Many of the native plants are suitable for rockery purposes. The Bitter Sweet vine would hang over or climb rough surfaces. The Virginia Creeper and Wild Clematis are also useful where rocky spaces of considerable size have to be covered. Many herbaceous plants are entirely suitable for the rock garden, and the more of these that can be used the greater will be the charm secured, because variety is one of the desirable features of a garden of this character. For sunny positions the moss pink and wild geranium are particularly suitable. The Columbine, Wake Robins, Fox Gloves, Violets and Ferns are among the plants that will succeed even in partial shade. The Sedum, also called Stone Crop, of which there are many kinds, are particularly useful for rock work, as they are low-growing and have a creeping habit. Most of them are evergreens, adding greatly to their attractiveness. In the early sum-

FARMERS' FAVORITE COLORS

BY THE PAINTER.

White seems to be the farmers' favorite color for houses. In a recent survey of many farm districts 78.7 per cent. of the farmers expressed a preference for that color. Red is nearly as strong a favorite for barns and is well in the lead for outbuildings and machinery. Gray, cream, brown, green, yellow, slate and blue come next in preference in the order in which they are given. There seems to be no special reason for these choices of color, merely a question of preference. Some farmers believe that red, gray and brown "do not show dirt." Tradition seems to have a strong influence in their choice of color schemes.

More country people are beginning to recognize the value of colors in connection with trees and shrubbery, and to paint their buildings to harmonize with the landscape. There is considerable sameness in farm life and undoubtedly the cheeriness of bright colors strongly influences farmers to paint their buildings with bright, inspiring colors.

In going about our countryside and our suburban districts, it is apparent that as a whole houses do not possess any particular distinction and charm; that for the greater part they are uninteresting, and give us the feeling that something about them is wrong. When we look at them critically, we see that this is due in part to architectural faults and lapses; but the comprehending eye realizes that in the main it is a matter of color. We give scant thought to the colors that we paint our houses, to the tint of the body color, to the contrast of the colors of body, trim and roof, and to the relation of the colors to the surroundings, natural and artificial.

The strong contrasts of deep brown,

light buff and brick red, eminently suitable to an English half-timbered design, would be impossible for a colonial farmhouse, and the colors appropriate to a Dutch Colonial house might be most unsuitable for a Georgian design.

It is almost always the case that a house looks best when it blends into its background and surroundings; the roof, therefore, when against the sky, should be of subdued tone and color, but can be brighter when against foliage or other buildings. White, a large house can be dark, a small one cannot afford to be, for dark walls, or light walls with dark trim will make it seem still smaller.

In selecting color combinations, the best results are usually found in varying shades of the same color, as for example, the walls buff, the trim ivory and the roof brown. There is then more harmony than in a house with white walls, green shutters and a red roof.

While patchiness should be avoided, there should always be a contrasting relief to large surfaces of one color, as trim and shutters in a contrasting color or tone will relieve the monotony of evenly toned walls. Ornamental work should not be brought out by painting; a porch column, for instance, should be one color throughout and not different colors for shaft, base and cap. No material should be painted in imitation of some other material, as brickwork, for instance, or the graining of wood. It should be remembered that a mass of color seen from a distance gives a very different impression from a patch of the same color seen near by, which undoubtedly explains why so many houses look quite different from what their owners expected.

Xuxu's Advice.

"Oh, dear! I'll never catch a fish!" exclaimed little George Hart.

He had been fishing all the morning, with never the faintest nibble. He was confident his bait was all right, for he had drawn it up, examined it nearly a hundred times, and he could not understand why the fish would not bite. The other boys could catch plenty.

When he started out early in the morning, his uncle warned him that if he didn't bring some fish home for dinner he would punish him severely. Consequently, George was in the pangs of despair, because he could catch none. He never once thought that his impatience which led him to pull up and inspect the bait was really the cause of his failure. Every so often or two up would come his hook with no fish, of course. When he threw it back he scared away those that were congregating in front of him.

"I may as well give up and go home, and get the whipping!" he finally exclaimed.

"I don't think I would, just yet." The boy turned quickly and beheld the oddest little dwarf he had ever seen or heard of.

He was dressed in green, from top to toe, with small, twinkling emerald eyes, and such a winning, good-natured expression that George did not feel a bit afraid of him.

"Well, my lad, what seems to be the trouble?" questioned the pigmy in green.

George poured out all his troubles to his new friend.

"I can help you out of your difficulty, if you will do as I tell you."

George assured him he would be only too glad to obey his suggestion. "Then," said the dwarf, "throw your line in the water."

George obeyed. "Now hold it there till I tell you to pull it up," continued the dwarf.

George left his line in the water for quite a while. Finally he remarked that something must be the matter with the bait, and he would pull it up and examine it.

"Let it remain in the water," said the gentleman in green, quite sternly.

Pretty soon the cork dipped under the surface, and the boy became all excitement.

"Now pull the line up, quick!" said the dwarf.

George did as directed, and drew in the largest fish he had ever caught.

"Now I must leave you," said the dwarf. "If you will always keep your line in the water long enough for a fish to bite, and not jerk it up every five minutes, you will catch all you want."

George told him he had learned something worth knowing, and he would follow the advice given him.

"But I would like to know your name," said George.

"My name is Xuxu."

"That's a queer name. Haven't any other?"

"Xuxu," said the little fellow with a sly wink, as he started off, "is another name for Patience."

"Now I understand it all," said George. "Patience is the one thing I lacked, but to-day I have discovered that no one can succeed at anything in this world without patience."

Heavy Horses in the West.

An indication of the demand for well-bred heavy horses in the West is furnished by the success of a sale of pure-bred Clydesdales at Brandon winter fair. A two-year-old first prize animal brought \$6,000, another two-year-old \$3,000, and a four-year-old weighing 2,140 pounds also \$3,000.

A HOME WITH A BROAD FRONTAGE

No. 1324

DESIGNED BY W. W. PURDY

The design here shown is that of a home with 48 feet frontage, requiring at least a sixty foot lot on which to build. The plan is exceptionally well arranged for one who does considerable entertaining. Entrance is through the vestibule, direct into the center hall, with the stairway to the second floor in the opposite end. Wide plaster arches separate the living and dining room from the entry hall. In the end of the living room is a fireplace of tile design and carried to the ceiling. French doors open on a small iron balcony in front and rear. The kitchen

portion is complete with cupboards, breakfast alcove, and rear entry in which is located a refrigerator which is iced from the rear stoop. There is a small pass pantry which contains additional cupboard space. The stairway to the basement leads to the street door and on down into the basement, which contains the usual laundry, fruit and vegetable room, large storage room, and an amusement room with an additional fireplace underneath the living room.

On the second floor are three chambers. The owner's chamber

in front over the living room has a fireplace and a private bath. Two additional bath rooms are located on the second floor.

The exterior is white cement plaster over metal lath, with a soldier course of brick at grade. Roof is variegated slate. Floors throughout are hardwood with tile in bath and linoleum in kitchen and pantry. The woodwork is ivory enamel.

It is estimated that this home can be built, exclusive of heating and plumbing for from ten to twelve thousand dollars.

ONTARIO'S PARLIAMENT COMPLETES SIXTEENTH SESSION

Redistribution, Church Union and 4.4 Beer Bills Give Legislators Strenuous Time.

With the House and the Public Accounts Committee running in double harness for the last four days of the session, the race by the Ontario Legislature to complete its business before Easter was won by only a hair's breadth.

The Redistribution Bill, which was given third reading, achieves in effect the object it was sought to attain, namely, equalization of population in the urban ridings and equalization in rural ridings, although with a smaller unit. It was hoped that the number of representatives could be held at 111, but it was found necessary to make an increase of one. Ten new seats are created, five in Toronto and one each in London, Windsor, Hamilton, Ottawa and the Yorks. Nine of the present ridings disappear, mergers being put into effect in Lennox and Addington, Durham, Northumberland, Middlesex, Wellington, Bruce, Huron, Norfolk and Grey Counties.

In some ways the final day was unique. In the first place the House was in session at four distinct times, although officially only three.

During this time they disposed of no fewer than 74 distinct measures, of which about twenty had to go through the committee stage and a dozen through second reading and committee before reaching third reading, undoubtedly setting up a legislative record.

The House was twice divided, once as indicated with a Government majority of 56 to 14 and once on Hon. W. E. Raney's motion for a six months' hoist to the 4.4 beer bill. The previous day Mr. Raney had intimated that he might divide the House on the increased indemnities but he did not do so, merely making an aside comment on the impropriety of issuing

members' cheques before the bill had been given third reading. Mr. Raney gave no reason for his return of mind, but quiet chuckles were passing through the House, Mr. Raney's followers had pocketed their increased indemnities.

The session brought to a conclusion, a memorable one on account of the importance of many of the measures passed. The 4.4 beer bill struck the dominating note of the session and occupied most of the time of the House being discussed in the debate on the speech from the throne, again in the budget debate, at first and second readings and in committee, during the agricultural debate and at such other times as members could drag it in.

Church Union was a subject much to the fore throughout the session, as was also redistribution, but these matters were dealt with almost wholly in committee and it was not until the close of the session that they were projected on to the floor of the House to supply two final rectic debates.

Apart from these measures there were others which slipped through the House with much less turmoil. The bill requiring all automobile drivers to hold a license caused little stir, although it may affect close to a million people, and is the precursor, according to the Minister of Highways, of present expressed intention of legislation that will require all drivers to pass a capable test. The gasoline tax and the beverage tax were also important as measures which will considerably supplement provincial revenues. Important changes in the school laws were effected and also in the Highway act, while a host of minor amendments were passed for the better regulation of the province in general.

PRINCE VISITS NIGERIA IN SPITE OF PLAGUE

Royal Tourist Decides to Carry Out Programme and Take Chance of Infection.

Accra, Gold Coast, West Africa, April 12.—In view of the disappointment in Nigeria over the change in the plans of the Prince of Wales to visit Lagos, on account of the outbreak of plague, a conference was held to-day at which it was decided to carry out, virtually in full, the fixed program, although the Prince probably will land at the Port of Harcourt, instead of Lagos. The cruiser Repulse, which is being used by the Prince for his trip to Africa will sail from here Tuesday morning.

Notwithstanding the great heat, the Prince again to-day put in a full day. He attended divine services in the morning, reviewed ex-service men, and spent an hour in the Gold Coast Hospital. This afternoon he motored eight miles to Achimote College.

Yesterday he enjoyed a 70-mile motor ride from Bosoma, on the railway, in the interior, to Accra. Fifty miles of the road is cut through a luxurious jungle, the rest being open grasslands. At one village he was greeted by the local Chief, who is the millionaire owner of cocoa lands. The native Chief wore a golden crown, and escorted the Prince back to his car under a massive multi-colored umbrella.

The Prince also alighted at Nsawan, where another gorgeously arrayed Chief presented him with a gold inkstand and pen. The Prince immediately wrote his signature, as a sort of test of its serviceability. The Chief also gave him an antelope, which shortly afterward was slaughtered and eaten.

The natives gathered at various points along the route and whenever the Prince and his attendants appeared greeted them heartily.

Transportation Cost of Alberta Coal

A despatch from Montreal says:—Twenty-five thousand tons of Alberta coal will be shipped and distributed at various Ontario points about May 1, purely as an experiment to determine transportation costs and other factors entering into the price of coal to the people of Ontario, according to Howard Stuchbury, trade commissioner for Alberta. Arrangements have already been made between the Alberta and the Federal Governments, while the latter has granted a sum of money for the purpose. The movement will be entirely over the National Railway lines.

RESCUED FROM ICE POCKET AT NIAGARA

Steeplejack Was on Verge of Collapse from the Ice Spray.

A despatch from Niagara Falls, Ont., says:—Harry Waite, a steeplejack employed by the New York State Reservation, had a miraculous escape from death recently when he was imprisoned in an ice-pocket at the foot of the American Falls.

Waite, who was scaling the cliff near the Maid of the Mist landing to loosen large boulders to prevent them falling on tourists visiting the foot of the Falls, had completed his job, and made a 12-foot jump to the ground, when he was caught in a pocket. He miscalculated the distance to the ground and fell into the hole and was unable to crawl out.

After being imprisoned for forty minutes, with the icy spray falling on him, he was seen by a tourist and was rescued by Reservation police. He was given medical aid and taken home.

He says the spray was slowly sapping his strength and he would have collapsed within a few more minutes, when his rescue would have been difficult, if not impossible.

Dutch Parliament Against Married Public Servants

A despatch from Amsterdam says:—The lower chamber of the Dutch Parliament, with the tacit assistance and consent of the Conservative women members, has passed a bill authorizing municipalities to discharge women teachers in the elementary schools upon marriage. The measure follows the policy which the Government has recently adopted with respect to married Government employees.

Two Sailors Lose Lives in Montreal Harbor

Montreal, April 12.—Lee Lambert, aged 21 years, and Raymond Boisvert, aged 26, both residents of St. Antoine de Lotbiniere, and sailors aboard the oil ship Colin W., were drowned in the harbor on Saturday evening when their dinghy was swamped. The bodies were recovered this afternoon. Two other sailors of the same ship—Romeo Bergeron and Emile Delisle—were rescued from the fate of their companions by the quick work of a watchman and a Canadian National Railways constable.

HISTORIC DOCUMENT REFERS TO WOLFES ORDER AT SIEGE OF QUEBEC

London, April 12.—Two documents never before published, one of which is of great historic interest to Canada, have been exhibited to the Gaelic Society by William MacKay. One is addressed: "To David Bruce, Judge Advocate of the King's Army in Scotland, commanded by His Royal Highness the Duke, July 5, 1746," contains instructions for the arrest and treatment of prisoners accused or suspected of treason or rebellious practices. The other document is headed: "An order given by General Wolfe at Point Levis on the River St. Lawrence and near Quebec," and consists of instructions to British officers and the army about to take part in the siege of Quebec and battle of the Plains of Abraham. Wolfe was at the time commander-in-chief of the British army.

The authors of these two documents, the Duke of Cumberland and General Wolfe, says the Morning Post, fought together for King George at Culloden, the former being 25 years old, and Wolfe 19. It is reported that as Cumberland and Wolfe rode over the battlefield after the battle, a wounded Highland officer named Fraser smiled defiance at Cumberland, whereupon the latter turned to Wolfe and said: "Shoot me that Highland scoundrel who dares to look at us with such contempt and insolence." Wolfe replied: "My commission is at Your Royal Highness's disposal, but I can never consent to become an executioner." Tradition states that the Fraser Highlanders at Quebec had great regard for Wolfe for his refusal to obey Cumberland's order.

ENGLAND'S HEALTH STUDIED BY EXPERTS

Canadian Official Takes Part in Conference Held in London.

St. John, N.B., April 12.—Dr. A. E. Woodhouse, of the Department of Public Health, Ottawa, secretary of the Canadian Tuberculosis Association, returned to-day on the liner Montrose from a six weeks' exchange of health officials convened in London by the League of Nations. At the meeting were representatives of Canada, Denmark, Holland, Russia, Estonia, Lithuania, Poland, Serbia, Greece, Italy, the United States, France and Germany.

They met in London, where they were given an opportunity of studying the administration of health in England for six weeks and then were given a chance to attend a meeting of League officials in Geneva and to report on what they had learned. Through the good offices of the League they were able to visit Leylin, Switzerland, where they observed the method of sun treatment for tuberculosis conducted under the leadership of Dr. Rollier.

Many Excursionists Killed in Wreck

A despatch from Barcelona, Spain, says:—At least twenty-four persons lost their lives when an electric train, crashed into the wall of a tunnel, after taking fire, near Carria, on the outskirts of Barcelona. About 100 passengers were injured. The train, filled with Holy Week excursionists, was going down hill, approaching the tunnel, when a motor in one of the three cars became short-circuited. The brakes refused to work, and the train, in a mass of flames, crashed against the tunnel wall.

Firemen from Barcelona rushed to the scene and, after extinguishing the flames, set to the work of rescue. Eighteen bodies were recovered. Several of the seriously injured are not expected to live.

Hostility Displayed Against Balfour

Ceirut, Syria, April 12.—The Earl of Balfour sailed this morning on the steamer Sphinx for Alexandria, Egypt.

General Sarraill, French High Commissioner for Syria, who came down last night from Damascus to attend the official Easter Mass, visited him before his departure. The police closely guarded the approaches to the steamer until she left, and Lord Balfour did not go ashore after he had once gone aboard.

Ceirut has been quiet, and official reports from Damascus show that the agitation there has died down, though at one time on Good Friday there was some fear that the Moslems would attack the Jews, and troops were sent as a precautionary measure to guard the Jewish quarters.

Flying Passengers Entertained by Moving Picture Shows

A despatch from London says:—Arrangements for the first airplane movie show have been completed at the Croydon Airport here. A projector has been installed in the space behind the passenger compartment, usually occupied by freight, in one of the Imperial Airways cross-Channel planes. The screen is on the forward bulkhead between the passenger cabin and the pilot's cockpit. There is room for 14 passengers to be entertained while flying from London to Paris.

Solution of last week's puzzle.

CUT CHANNEL HALF MILE THROUGH ICE

Aged Man Rescued Drowning Youth by Towing Him Ashore.

A despatch from Huntsville, Ont., says:—Word has just been received of a remarkable rescue in Peninsula Lake to which Ross Brooks, son of E. J. Brooks, of Hillside, owes his life. Young Brooks, who lives at Grassmere attempted to cross the ice on an arm of the lake, near his home, when about half a mile from the shore the ice gave way and he found himself unable to climb out.

His cries were heard on shore and William Green, a neighbor over twenty years of age devised a plan of rescue. Unable to cross on foot he procured a canoe and with the assistance of an axe, broke a channel through the half mile of intervening space to where the young man was holding on to the edge of the ice surrounding the opening.

It took Mr. Green over an hour to reach Brooks whom he found still conscious, but too weak to longer make any outcry. Unable to lift him into the canoe, he secured his hands to the gunwale by a rope and towed him through the half mile channel to shore. He carried him to a nearby house and phoned to Dr. MacDonald, of Huntsville, who says the young man is comparatively out of danger, although his body was completely numbed. He was in the water nearly two hours.

There is a feeling locally that Mr. Green should be awarded the Royal Humane Society's medal for his act of rescue.

Liner Physician Treats Ailing Sailors of Other Vessels

A despatch from Plymouth, Eng., says:—Dr. Erskine Gray, of the Cunard liner Antonia, was kept busy on the last voyage of the Antonia from New York to Plymouth with calls for medical assistance from other vessels.

Four times daily for five days he prescribed by radio for a sailor who had been badly injured on the steamer Bosworth, hundreds of miles away. Then the American steamer Antinous reported its captain seriously ill. Dr. Gray diagnosed the case as one of pneumonia, and for three days prescribed treatment, which proved successful. Several other cases of minor nature, from ships many leagues distant from the Antonia, also were treated by radio.

British Business Men Seek Hidden Treasure in Alaska

A despatch from Hull, Eng., says:—Headed by John Riley, of this town, a party of business men are planning an expedition this month into Alaska on a search for hidden treasure. Riley is the only man who has an exact knowledge of the whereabouts of the treasure in question, which, he says, consists of a vein of pure silver from two to eight inches thick and weighing probably hundreds of tons.

Riley claims to have discovered the vein during the great Klondyke gold rush of twenty-five years ago, and has persuaded three men to join him in the quest. If successful, an airplane will be used to convey the silver to

Dr. W. C. Alvarez
Of the University of California, has invented a machine to record disturbances in the stomach in much the same manner as a seismograph for earthquakes.

Spain and Canada Sign Temporary Trade Pact

Madrid, April 12.—After protracted negotiations a provisional agreement to be followed by a definite treaty has been arrived at between the Spanish and Canadian Governments, under which the former grants second column benefits to Canada and Canada concedes the intermediate tariff to Spanish imports.

The principal matters in which Canada is interested are agricultural machinery, motor cars, tires, chemicals, aluminum and codfish, whilst Spain is concerned for wines, grapes, corks and olives.

These negotiations are particularly interesting from the fact that the Canadian Government did not adhere to the Anglo-Spanish treaty, and sent as negotiator a trade commissioner, who was supported by the British Ambassador and the commercial secretary to the embassy here. The ambassador signed the agreement—which comes into force on April 30—on behalf of Canada.

Farmer Instantly Killed at Crossing

A despatch from Windsor, Ont., says:—Joseph McCarthy, 55 years old, a well-known Maidstone farmer, was hurled to instant death when his team of horses took fright and plunged into the path of an approaching Michigan Central Railway freight train at the Maidstone crossing.

McCarthy was returning to his farm, near the village after completing a business deal, and was driving a buggy. Before he could hold them in check, the horses suddenly reared and galloped madly to the crossing. In the crash, two cars were derailed. Both horses were instantly killed, and the buggy reduced to matchwood. McCarthy was picked up dead some distance away.

The development of one's personality cannot be accomplished in isolation or solitude; the process involves close and enduring association with one's fellows. If work were purely a matter of technical skill, each worker might have his cell and perform his task as in a prison. But work involves the entire personality, and the personality finds its complete unfolding, not in detachment, but in association. Hamilton Wright Mabie.

CROSS-WORD PUZZLE

SUGGESTIONS FOR SOLVING CROSS-WORD PUZZLES

Start out by filling in the words of which you feel reasonably sure. These will give you a clue to other words crossing them, and they in turn to still others. A letter belongs in each white space, words starting at the numbered squares and running either horizontally or vertically or both.

- HORIZONTAL**
- 1—Familiar fruit
 - 6—Hostler
 - 11—To ring musically
 - 12—To thwart
 - 14—Suffix to form plural
 - 16—Part of a priest's dress
 - 17—A law school degree (abbr.)
 - 18—Joint account (abbr.)
 - 19—A serpent
 - 21—Grand Lodge (abbr.-pl.)
 - 22—Man's name
 - 23—An obstruction
 - 24—Entice
 - 25—Forward
 - 26—Forming an image of
 - 29—Girl's name
 - 31—Man's name (familiar)
 - 33—Suffix meaning "of the nature of"
 - 39—Secretary (abbr.)
 - 41—Tell, relate
 - 44—To win
 - 46—Mistakes
 - 48—Numbers (abbr.)
 - 49—Insane
 - 50—To go wrong
 - 51—In no manner
 - 52—Latin word meaning "in the same place" (abbr.)
 - 53—Small compact mass of soft matter
 - 54—Torn piece of cloth
 - 56—A college degree (abbr.)
 - 57—Satiates
 - 58—A prescribed place
 - 60—Scrapple
 - 61—Royal

- VERTICAL**
- 2—A society for the relief of sick and wounded (abbr.)
 - 3—Interjection
 - 4—Wanderer or wayfarer
 - 5—Symbol
 - 6—A measure of capacity
 - 7—Decisions, as of a judge
 - 8—Aged
 - 9—Meaning "all correct" (abbr.)
 - 10—Allow as a deduction
 - 13—Forgive
 - 15—The sun
 - 18—A container
 - 20—Province of Canada (abbr.)
 - 23—Poet
 - 27—Indefinite article
 - 28—Preposition
 - 30—A nobleman (abbr.)
 - 32—Part of verb "to be"
 - 33—Covertly sarcastic
 - 34—Blows
 - 35—To make alive
 - 36—Physician's title (abbr.)
 - 37—A South Atlantic State (abbr.)
 - 38—Raised level space
 - 39—Presently
 - 40—Pertaining to a rib
 - 42—A wreath for the head (rare)
 - 43—Great fright
 - 45—To move with a jerky motion
 - 47—To take away from wrongfully
 - 53—Conflict
 - 55—To silence
 - 57—A continent (abbr.)
 - 59—Southern State (abbr.)

LOCAL AND GENERAL

Automobile Bumpers renickelled MORASH FOUNDRY

Mr. A. A. Summers spent Easter in Toronto.

Mr. Garnet Cheley, of Ottawa, spent Sunday at his home here.

Mr. J. G. Brandstetter of Ottawa, was home for Easter.

Mrs. G. E. Myers, is leaving Friday for Toronto to visit her daughters.

Mrs. Austin Salmon, will entertain the Riverside Sewing Club, in the P. M. of April 30th.

Mr. and Mrs. Duprau, of Ottawa, motored to town and spent the week end with relatives.

Mrs. Mary Becker, attended the funeral of the late Mr. Asa Hutt, of Maple Ridge, on Thursday.

For skin irritation you will find Monarch Salve a safe and sure cure. At all drug stores, 50c.

Mr. Douglas Poapst, of Ottawa, spent Wednesday evening with Mr. and Mrs. O. B. Beckstead.

Miss Helen Reed has returned, after spending Easter week at her home in Harrowsmith.

Miss E. Styles of Belleville spent the Easter Holidays with her sister, Mrs. E. Rombough.

We are pleased to note that Mr. A. G. F. Drew is able to be out again after a five months' serious illness.

Mrs. F. Fentiman and children spent Easter week at her home in Ottawa.

Mrs. E. Dewitt and daughter of Montreal spent a few days this week with her mother, Mrs. S. Rice.

Miss Stella and Master Ross Becker spent the Easter Holiday with friends in Winchester.

Mr. and Mrs. B. Weegar of Ottawa spent the Easter Holiday with the former's mother, Mrs. Harry Weegar.

Rev. A. T. Carson of Ottawa spent a few days last week with his parents, Archdeacon and Mrs. Carson.

Miss Thomas of the Helena Costume Co., of London, Ont., will be at W. & J. Meikle's with a large display of Summer Dresses on Thursday, April 30th.

Mr. and Mrs. F. D. Stata and son Darwin, spent Easter with friends in Kingston and Harrowsmith.

Mr. George Tracy, of the local staff of the Bank of Montreal, has been moved to Westport, Ont., where he has been promoted to accountant.

Dr. and Mrs. D. A. Currie, Mr. Chas. Summers and Miss Lorna Dent of Ottawa spent the Easter holidays with Mr. and Mrs. A. A. Summers.

Mr. and Mrs. MacLean and Mrs. Hartley and children, and Mr. and Mrs. E. Emmerson, all of Ottawa, spent the week end and Easter Monday at O. B. Beckstead.

Monarch is a pure antiseptic Ointment for soothing and healing all skin troubles. Also cuts and burns. It strengthens the roots of the hair and prevents baldness. 50c. at all drug stores.

Mrs. J. H. Hanes and Mrs. Henderson and son Harry of Chesterville, spent Thursday at the home of O. B. Beckstead.

Mr. and Mrs. L. W. Holmes and daughter, Ruth of Ottawa, spent the holidays at the home of W. T. Armstrong.

A very quiet wedding took place on Tuesday evening April 14th. at the home of Mr. and Mrs. A. C. Casselman, when Rev. Mr. Iseler, of Williamsburg, united in marriage their youngest son Garnet Wellington to Miss Nina Charlette Urana daughter of Mr. Gordon Empey, of Maxville Ontario. Mr. and Mrs. Casselman, will make their home in Sault Ste. Marie, Ont.

Mr. and Mrs. Donald Redmond, and Mr. and Mrs. Will Henderson visited the latter's sister Mrs. Mary Becker, on Monday.

Miss Kathleen and Mr. Alexander Farlinger, of Queen's University arrived home this week to spend the summer holidays with their parents Mr. and Mrs. F. E. Farlinger.

Owing to unforeseen circumstances the Radio Show, which was to have been held on the 24th. and 25th. of this month has been postponed till next Fall. The dates will be announced later.

Mrs. Orry Harper sold her home last week on Church St., to Mr. Mahlon Mattice.

Miss Beatrice Little, of Toronto spent the Easter Holidays with her mother, Mrs. Eli Casselman.

Mr. and Mrs. Chauncey, Dumond MacElroy of Mount Vernon, N.Y., arrived in town on Thursday, to become a permanent resident of Morrisburg.

Miss Alice Barry, graduate Nurse of Winnipeg, and formerly of Morrisburg, has accepted a position in one of the largest hospitals in St. Louis.

After an absence of two years, Mr. John Casselman arrived in town last week to take up permanent residence in Morrisburg. He will be joined by Mrs. Casselman and son Carman, early in May.

Miss Marion Courtney of Riverside was operated on by Dr. Alguire, assisted by Dr. Lowden of Morrisburg, at the Cornwall Hospital last week. She is making a fine recovery.

Dr. J. S. Paxman will be at Ouderirk's Hotel, Morrisburg, on Monday, Wednesday and Friday, from 9 to 11 a.m.

A large and appreciative audience witnessed the play staged at the Music Hall, on Wednesday night, under the auspices of St. James Church. The management had put forth every effort to make the entertainment worthy of their established reputation as entertainers and the praise which they received from the local theatre goers, was well merited. The play was a credit to those who took part as well as the management.

Mr. T. E. Cleland, was last week appointed inspector for the Canada Accident and Fire Assurance Co., their head office being in Montreal. The Company was fortunate in procuring the services of Mr. Cleland, who is recognized as one of the best men in Eastern Ontario. He has had ten years' experience, having been with the Great West Life for the last six years. During this time he has figured among the prize winners in contests. We congratulate Mr. Cleland on his well merited promotion.

An aged resident passed away last week in Iroquois, in the person of Mr. James Pollock in his eighty-second year. Most of his life was spent on a farm in Mountain Township, but a few years ago, with his family, he settled in Iroquois. Besides his wife, who is a sister of Mr. Irwin Hilliard, K.C., he leaves two sons and two daughters.

LIKE A SPARE TIRE

It's useless to darn the trousers or the luck either after you've torn them on a nail or otherwise damaged them beyond repair. But the extra pair will save the day for a suit that would otherwise have received "the last rights" then and there.

So why not investigate our two-part suits, fully guaranteed at
