DAMAGES CLAIMED IN FATAL ACCIDENT

Claiming \$30,000 damages against the Shell Oil Company of Canada, Limited, and Joseph St. Amour, writs were issued on Friday in an action by Frances Maude Elise Thoms and her 4 children under 21 years of age. The action, which will probably be heard at the sittings of the Supreme Court of Ontario which commence at Ottawa on May 17, arises out of an accident on April 1 of this year near Winchester in which a Shell Oil Company truck driven by St. Amour was one of the vehicles involved, and three persons were killed and seven were injured.

Mrs. Thomas is the widow of Albert Ernest Thoms, one of those who were killed in the accident. Counsel for the plaintiff is S. Ruper Broadfoot, K.C.

FIERY CROSSES SEEN NEAR WINCHESTER ACCIDENT SCENE

With the burning of the second cross on Highway 31 at Winchester within the past week, a practical joker is evidently set on giving Winchester folks a case of the jitters. Just why the crosses are burned is not known, no tell-tale evidence having been found after either incident. Early on Thursday morning of last week the first cross was set fire to in the vicinity where the fatal motor wreck happened recently, and the other early Wednesday morning almost opposite the gate to the quarry a short distance south of the railway. The latest one to burn was said to have been made out of considerably heavier lumber than the first which was a rather small affair.

AMATEUR PLAY CONTEST

The Luther Leagues of Williamsburg Township will present three One-Act Plays: "The Whirlwind", "In Doubt About Daisy", and "The Chinese Water-Wheel", in an amateur contest in Parish Hall at Dunbar, April 30th; in Castleman Memorial Hall, Morrisburg, May 5th, and in St. Peter's Sunday School Rooms, Williamsburg, May 7th. Time, 8 p.m. Admission, adults 25 cents; children 15c. You will be the judges.

MRS. MARY FERGUSON

Mrs. Mary Ferguson, mother of Rev. D. A. Ferguson, who was minister in the Presbyterian Church in Williamsburg for five years previous to November 1918, died at the home of her son, Port Perry, Ont., on Thursday April 15th, 1937. This lady, the widow of the late Donald Ferguson, Orillia, Ont., made her home with her son and was an active Church and Missionary worker in her time of activity. Many in this community will remember her as a bright and interested member of the community in which she lived, devoted to every good cause. The late Mrs. Ferguson was was 86 years of age, having been born on May 11th, 1851, and had enjoyed good health till the close of her life. Of a family of six children, three sons survive: two in the West, one in Ontario (Rev. D. A. Ferguson, the manse, Port Perry) with whom she resided.

Announcement of the death of Mrs. Ferguson was received with much sorrow by her many friends in this community, who join in extending their sympathy to the bereaved.

LADY TWEEDSMUIR IS GUEST OF INSTITUTE

The Chesterville branch of the Women's Institute was especially honored when the members were hostesses to Her Excellency Lady Tweedsmuir at a delightful luncheon in the community hall at one o'clock. The guests were received by Mrs. James Hanna and Mrs. George Reaburn, representing the institute, and an address of welcome was read by Councillor George Barkley on behalf of the village.

Accompanying Her Excellency at the head table were her lady-in-waiting, Mrs. Pape, Mrs. Melvin Durant, institute president, Miss E. McGee, secretary, Mr. and Mrs. Geo. Barkley, Rev. R. C. and Mrs. Tait, Rev. G. O. Davies and daughter and Rev. Geo. Extence.

Following the luncheon, Her Excellency was introduced by Mrs. Durant, after which Lady Tweedsmuir gave a short address on "Poetry" which was greatly appreciated. She likewise brought a message from the British Isles to her Canadian Institute friends and recalled numerous amusing incidents in connection with her topic. Miss McGee, local secretary, expressed the thanks of the institute to the speaker and expressed the hope that, as an outcome of a closer bond having been established, Her Excellency would find it convenient to again visit Chesterville during her stay in Canada. Little Miss Kathryn Durant then presented Lady Tweedsmuir with a beautiful bouquet of roses after which two solos were contributed by Miss Marion Casselman and Mr. Hubert Lloyd. Mrs. Percy Gilroy accompanied at the piano.

During the luncheon hour, an orchestra composed of Mrs. George Merkley, the Misses Marjorie Hanna and Marcia Hughes and Messrs Jack Fulton and Harold Williamson, furnished musical numbers. Over 175 were present at the luncheon, including institute members and friends from Morrisburg, Winchester, Iroquois, Brimston, Morewood, Berwick and other nearby places. The hall was artistically decorated

O. F. ALLISON URGED TO ACCEPT NOMINATION

An old Morrisburg boy in the person of Mr. O. F. Allison, is likely to be the Conservative Candidate for the County of Northumberland at the next Provincial election.

A recent issue of the "Saturday Morning Post", Cobourg, says:

"With the possibility of the Hepburn government going to the country in a few weeks as a result of the Oshawa strike situation, many names have been mentioned as the standard bearer in Northumberland for the Conservative party, among them the most prominent mentioned is Mr. O. F. Allison, of Cobourg. Mr. Allison is a successful business man at present engaged in the coal and wood business. He has served in the town council for several years. He is popular with all classes in the community; has always taken a deep interest in the welfare of the working classes, and his friends feel that he will make no mistake if he accepts the party nomination.

"He is a lover of sports, past president of the Cobourg Baseball Club and an enthusiastic lawn bowler. Through his efforts and that of the late E. W. Hargratt the Cobourg Curling Rink was built some years ago. He is also a member of the official board of Trinity United Church, Cobourg.

AGED MAN PERISHES AS BOAT GOES OVER FALLS

George Meldrum, 84-year-old resident of Cryslar, lost his life in the Nation River Monday when his row-boat, from which he was fishing, got caught in the swift current, was swept over the Cryslar Falls and hurled onto the rocks below.

The body, which was recovered about three quarters of a mile below the falls by Romeo Ceurier and Lionel Gelineault, was examined by Dr. J. Gormley of Cryslar who declared that death was due to heart failure and that no water was found in the lungs.

Mr. Meldrum was in the habit of going out fishing in the river shortly after six o'clock each morning. He had come out to fish at a point opposite his home which is about half a mile away from the dam.

T. Butler, who was on the bank of the river just above the dam, told Dr. Gormley that the boat seemed to get caught in the current and was swept along to the falls despite every effort the elderly gentleman could make to bring it out.

When the boat reached the dam, he said, it turned completely over and hurled Mr. Meldrum head first to the rocks at the bottom. It had all happened so quickly, he said, that there was no possibility of the man being saved. The body was recovered about three-quarters of an hour after the accident.

No inquest was held. The funeral was held on Wednesday.

Mr. Meldrum was born in Cambridge, Ont., a son of the late Mr. and Mrs. Robert Meldrum. In 1872 he moved to Berwick with his parents at which place he lived until his retirement in 1921.

Surviving besides his wife, the former Margaret Fleming, are one sister, Mrs. Allan Merkley of Calgary; three daughters, Mrs. C. W. Hollingsworth of Marmora, Ont., Mrs. A. Riddle of Brownlee, Sask., and Mrs. H. R. Fitzpatrick of Crossfield, Alta.; and five sons, Melvin at home, Tom at Perth, Rupert at Ottawa, and Ivan and Ethan of Buffalo, N.Y.

CRITES—FETTERLY

A very pretty wedding was solemnized on Monday last at the home of the bride's parents, Mr. and Mrs. Joshua G. Fetterly, at Grantley, when their daughter, Jeessie Eva, was united in marriage to John Wilbert Crites of Aultsville, Rev. Hector M. Beach of Finch, officiating.

The bride was becomingly attired in blue flat crepe with accessories to match, and carried a bouquet of primroses. The couple were accompanied by Mr. and Mrs. Harold McIntosh of Aultsville, cousins of the bride.

The ceremony was performed under an arch of evergreens luxuriously banked with flowers. The wedding march was played by Mrs. James Cunningham.

The wedding dinner was served to about 35 guests, and amid the best wishes of their many friends, Mr. and Mrs. Crites left for a motor trip to Natural Bridge, Paris, Syracuse and other points in the United States. The bride travelled in a suit of grey tweed with hat and shoes to match.

The groom's gift to the bridesmaid was a gold compact, to the best man, a gold stick pin, and to the organist a china dish. On their return, Mr. and Mrs. Crites will reside in Aultsville.

DIED AT WADDINGTON

Resident of Waddington for the past 25 years, Frank S. Hitchcock aged 74 is dead there of pneumonia. He spent most of his life at Louisville Landing and was married in 1883 to Miss Julia N. Prunner, of East Williamsburg. Mrs. Essie Prunner of East Williamsburg, is a surviving sister.

SUNDAY SCHOOL LESSON

LESSON IV

The Obedience of Noah — Genesis 5:28 — 9:28
Printed Text — Genesis 8:20-22; 9:8-17

Golden Text — "By faith, Noah, being warned of God concerning things not seen as yet, moved with godly fear, prepared an ark to the saving of his house." — Hebrews 11:7.

THE LESSON IN ITS SETTING

Time — The traditional date for the flood is about 2350 B.C. Recent archaeological discoveries would place the flood nearer 3000 B.C. Ancient chronology is far from being settled, and we need not examine this difficult problem in this lesson.

Place — Where Noah was when he built the ark, we do not know. Mt. Ararat on which the ark rested after the flood, is in Armenia, near where the Tigris River has its source, almost directly north of the city of Babylon.

"And took of every clean beast, and of every clean bird, and offered a burnt offering on the altar." For a list of animals counted as clean in the sacrificial rituals of Israel, see especially Deut. 14. The burnt offering is the first to be described in the book of Leviticus (chapter 1), and, of course, was one in which not only was an animal offered in sacrifice, but one in which the slain animal was not consumed on the altar with fire.

"And Jehovah smelled the sweet savor." The sacrifice of the patriarch was as acceptable to God as refreshing odors are to the senses of a man. "And Jehovah said in his heart, I will not again curse the ground any more for man's sake, for that the imagination of man's heart is evil from his youth; neither will I again smite any more everything living, as I have done while the earth remaineth, seedtime and harvest, cold and heat, and summer and winter, and day and night shall not cease." This declaration is not a revocation of the curse of Gen. 3:17, nor a pledge that such curse would not be duplicated. The language refers solely to the visitation of the deluge, and promises, not that God may, not sometimes visit particular localities with a flood, but that another such world-wide catastrophe should never overtake the human race.

"And God spake unto Noah, and to his sons with him saying, And I, behold, I establish my covenant with you, and with your seed after you; and with every living creature that is with you, the birds, the cattle, and every beast of the earth with you; of all that go out of the ark, even every beast of the earth. And I will estab-

lish my covenant with you; neither shall all flesh be cut off any more by the waters of the flood; neither shall there any more be a flood to destroy the earth." The word my points to a covenant already in existence, though not formerly mentioned until the time of Noah.

"And God said, this is the token of the covenant, which I make between me and you and every living creature that is with you, for perpetual generations; I do set my bow in the cloud, and it shall be for a token of a covenant between me and the earth." The wordnow refers, of course in this narrative, to what we call the rainbow, i.e., a bow arc of several colors appearing in the heavens during or after rainfall, 'formed opposite the sun by the refraction and reflection of the sun's rays in drops of rain. The word rainbow is not found in the Old Testament, and only twice in the New Testament (Rev. 4:3; 10:1). It is not said that the rainbow first appears at this time, for, undoubtedly, due to the invariableness of the laws which do cause rainbows, there must have been many before this time, whenever the physical conditions creating a rainbow existed, but what the passage does tell us is that now, for the first time, God appoints this phenomenon as a token of his pledge to never again curse the earth with a flood.

"And it shall come to pass, when I bring a cloud over the earth, that the bow shall be seen in the cloud. And I will remember my covenant, which is between me and you and every living creature of all flesh; and the waters shall no more become a flood to destroy all flesh. And the bow shall be in the cloud; and I will look upon it, that I may remember the lasting covenant between God and every living creature of all flesh that is upon the earth. And God said unto Noah, this is the token of the covenant which I have established between me and all flesh that is upon the earth." The activity ascribed to God should be particularly noticed. Four times is he said to establish his covenant (9, 11, 12, 17); once he is said to set his bow in the cloud (13); once he is said to bring clouds over the earth (14); and twice it is said that he would remember his covenant (15, 16); and once that he would look upon the bow in remembering his covenant (16). "And there are no obligations on the part of men or of the creatures. This covenant is God's only. It is contingent on nothing done by the recipients. God binds himself whatever be the conduct of men. This covenant is the self motivated promise of an unconditional mercy.

Farm Problems

Conducted by
PROFESSOR HENRY C. BELL
with the co-operation of the various departments of
Ontario Agricultural College

1. Question: "Have you any evidence to show beneficial results to grain crops when salt is applied? Would 250 lbs. per acre cause injury? Does salt cause more moisture to be available to the growing crop?" — R. P. Huron County.

Answer: The use of salt with sugar beets was common practice in England some years ago. Salt does not add any plantfood, but the sodium of the salt lets loose the potash out of the soil. Sugar beets are particularly potash-loving crops on account of the starch and other carbohydrates that they contain, hence the liberation of potash helps in their growth. I find records where English farmers used salt on soils growing barley. The same reaction results there namely that the barley crop benefited from the potash which the salt let loose. Malsters, however, found that the addition of salt lowered the quality of the barley for malting purposes.

The sowing of salt at 250 lbs. per acre would not be injurious to crops. In a short time, however, it would be injurious to the soil, in that it leads to the depletion of the potash of the soil. In the case of sugar beets or mangels, it may be that the help which these crops receive from salt is to some extent due to the fact that the beet plant is thought to have originated near the sea. Salt has no plantfood value whatever. As far as we know, it acts only as a stimulant.

When it is applied in quantity, it does draw moisture from the air, but

at the small rate of application which would be possible to put on the soil, I cannot conceive any beneficial effect resulting from the application of salt due to the moisture it gathers.

I never advise the use of salt because as I have already said, it is nothing but a whip or stimulant to the soil.

Question: "Would it be possible to sow fertilizer after the grain has been sown? I am not going to be able to procure a fertilizer drill at time of sowing, but could get one shortly afterwards. Would it be possible to sow the grain with an ordinary drill and follow later with fertilizer? If this is possible, how much later could this be done to get the best results?" — C. B., Perth County.

Answer: I would not advise trying to add fertilizer to the field after the grain has been sown. I am afraid the discs and shoes would tear out the young sprouting seeds to such an extent that it would do more injury than good. The one exception to this is a top dressing of nitrate of soda, sulphate of ammonia or cyanamid. This can be made by broadcasting the nitrogen carrying material on top of the wheat. This is common practice in England in the Spring, especially on wheat and barley. Understand, broadcasting does not work the fertilizer into the soil. It simply scatters the material on top. The moisture of the soil and any rain that falls dissolves this material and about five bushels per acre improvement usually results.

barley, peas. Banner oats (a late variety), and Alaska oats (an early variety) were seeded at five different dates at two weeks intervals. The object of this experiment was to learn the most suitable date to seed these crops under Ottawa conditions and also learn which of the crops was best adapted for late seeding in the event of a delayed seeding. The experiment was conducted in a rotation of grain, clover, thus allowing for duplicate plots of grain seeded

at the varying dates, one crop following clover, the other following grain.

The results of these dates of seeding grain experiments at Ottawa indicate that wheat and peas should be sown as early as possible in the Spring. Barley and Banner oats may be seeded without loss of yield as late as May 15, and Alaska oats (the early variety) as late as June 1. Buckwheat may be seeded at any time during June, preferably about the beginning of the month. It should be remembered that the results of these experiments conducted at Ot-

tawa may not be applicable to other points with different climate and soil conditions. As a rule, however, wheat, oats, barley, and peas should be seeded as soon as the soil is sufficiently dry to permit working satisfactorily.

Barley adapts itself to growth over the longest range of seeding dates and, if necessity demands that a crop be seeded late, barley is a suitable crop. Alaska oats is also a very suitable crop for this purpose.

ONLY ROYAL HEIR IN 600 YEARS

The infant son of the Crown Prince and Princess, the only royal heir born in Norway for nearly 600 years, was christened, Harald, in Oslo, recently. He is shown in his first portrait with his sisters, Princess Ragnild (left) and Princess Astrid. The last heir-presumptive born in Norway was Olav Haakonsson, in 1370.

Picturesque Corps Parade for Easter

The picturesque Yeoman of the Guard, wearing the uniform of their 16th century forebears, photographed during their annual Easter morning parade and service at the Tower of London.

Will Reside In Montreal

Mr. and Mrs. Frederick Bouchier Taylor, of London, England, who are coming to reside in Montreal, in the early summer. Mr. Taylor is a painter-etcher and has received great praise in England for his work. A son of Colonel and Mrs. Plunket B. Taylor, of Rockliffe Park, Ottawa, he is a graduate of McGill University, having won a scholarship, and lived here prior to going to England to study. Mrs. Taylor is a daughter of Mr. and Mrs. Delamere Magee, of Toronto. The marriage took place in London, England, last December.

tawa may not be applicable to other points with different climate and soil conditions. As a rule, however, wheat, oats, barley, and peas should be seeded as soon as the soil is sufficiently dry to permit working satisfactorily.

Barley adapts itself to growth over the longest range of seeding dates and, if necessity demands that a crop be seeded late, barley is a suitable crop. Alaska oats is also a very suitable crop for this purpose.

Barley adapts itself to growth over the longest range of seeding dates and, if necessity demands that a crop be seeded late, barley is a suitable crop. Alaska oats is also a very suitable crop for this purpose.

Swan Aided in Hatching Eggs

LOS ANGELES.—It begins to look as if a policeman may be assigned to help a swan hatch her eggs. The park has asked the Police Chief to station a patrolman near the swan's nest daily during the hatching process. It was George R. Mitchell, president of the Humane Education Society, who said that originally the swan had nine eggs, but somebody had pushed the bird off the nest and stolen five.

Movie-radio gossip

By DOROTHY

So many people complained about the moderately-happy ending of "Lost Horizon" that the director changed it several weeks after the picture had started its triumphant run in New York and Los Angeles. The ending that the rest of the country will see makes it appear very doubtful that Ronald Colman will ever fight his way through a blizzard to the heavenly peace of Shangri-la high in the Tibetan hills. With either ending this is a picture that everyone will want to see.

Fruits and vegetables are the heroes and heroines of a movie being shown extensively in the producing regions of the South and Far West. The picture, designed to bring the big city auction markets to growers, dramatizes the selling process on a typical auction market where thousands of cars of fruits and vegetables are translated into millions of dollars in revenue to the growers every year.

List among your future film favorites Ella Logan whom you will soon see in Universal's "Top of the Town." She is the enchanting singer with a thick Scottish burr to her voice who, accent or no, used to shout swing music over the radio with Abe Lyman's band. I like her best when she sings simple songs, but swing addicts rave about her ability to improve new hi-de-hos.

"Seventh Heaven" was previewed in Hollywood this week, and everyone

Simone Simon

agrees that it brings more glory to Jimmy Stewart than to Simone Simon, though she is pert and appealing in the role that brought Janet Gaynor fame. Simone arrived at the preview wearing a hair ribbon tied in a bow just over her forehead, and was so noticeably nervous that she fidgeted with her coat, her dress, and her hair ribbon all evening. She was accompanied by Anton Litvak.

ODDS and ENDS:— A make-up girl at the Paramount Studio has 12 wrist watches given to her by grateful stars. Just to be different, Frances Dee gave her an alarm clock at the finish of "Souls at Sea" . . . Ann Sothern will probably win the airlines award for the most persistent air-commuter of the year. Whenever she has two or three days to spare, she dashes off to Chicago to see her husband, Roger Pryor, who is leading a band there. . . Everyone at Paramount is glad to have Marlene Dietrich back, particularly the electricians and carpenters on her set. She brings such luscious Viennese cakes and cookies to them.

Husband (reprovingly)—Didn't I hear you tell your friends that your pretty dress came from abroad?

Wife—Not exactly, dear. You see, it's last year's dress which I turned inside out. I simply said 'It's from the other side.'

The Mail Goes Through

"Old Bill" Trainer, interviewed by the Lethbridge Herald—"As far as I can remember, the hardest trip I ever had to get the mail through was around the middle of January this year. The snow was at its deepest and the thermometer around 30 degrees below zero.

"I left Manyberries as usual around daylight with my sleigh and team with the mail piled behind and it wasn't so bad in my closed-in cab with the heater going. I arrived at Comrey alright that night and the next day I set out for Onefour. The drifts were bad through Devil's Dive and Lost River where there is no traffic, and as I was going down Lost River hill the drifts were about six feet deep and one horse got down. Well, I unhitched the other horse and managed to pull him out and go on again.

"The next day I made the trip to Wildhorse without any trouble and the following day I started the return trip. I got to the postoffice at Carlson's alright, but leaving there, there was such a terrible blizzard, and there being no fences, I got off the trail and got lost in a two-mile stretch. Well, I kept on going till finally we struck a fence and following it I arrived at the farm house, where I stayed the night. The rest of that trip wasn't so bad but that was one time that it took me all of seven days to make the trip which I make in Summer in less than two days."

Seeding Dates For Grain Crops

Result of Five Years' Experimental Seeding at Different Dates

An experiment to test the best dates for seeding grain crops was commenced at the Experimental Farm, Ottawa, in 1925 and carried on for five years in which wheat,

GARDENING

By GORDON L. SMITH

With many vegetables the season can be greatly extended by using very early, as well as late, types. In garden peas, for example, the time of maturity will vary from about 50 days to 75. Instead of planting only one variety it is advisable to include at least three. Early sowing is essential but in certain parts of the country a fall crop with a quick-growing variety is also possible. In corn, the very early Bantam types mature weeks ahead of the regular season and some of the late, both white and yellow kinds, are on until frost or even after.

READY-MADE GARDENS
The gardener is advised for the quickest possible results, to purchase a certain quantity of started plants of both flowers and vegetables. These are usually purchased from the greenhouse, florist or seed house. It is important to get the varieties wanted, and on this account it is a splendid idea to consult a good Canadian seed catalogue before placing an order. The gardener can look over the various

varieties offered in the catalogue and should make sure that the particular varieties wanted are in the boxes of the plants bought.

Among the flowers which can be purchased as started plants are the cosmos, zinnias, petunias, marigolds, salpiglossis, nicotiana and a host of others. Cabbage, celery, tomato, head lettuce, egg and dumper plants in the vegetable line are all sold as started plants.

WHERE SPACE IS LIMITED
The spareholders with only a little land to spare should concentrate on those vegetables which give the biggest returns for the smallest space occupied. Among such kinds are beans, carrots, onions, lettuce, swiss chard, spinach, cucumbers and beets. In the lesser-known vegetables, are the leaks, egg and pepper plants, broad beans and cos lettuce. These can all be grown in almost any part of Canada. Experts advise the inclusion of something new in the vegetable line each year so that variety can be gradually widened.

Expect \$2 Wheat

So much was said and written about the tremendous world wheat surplus and how it was depressing wheat prices that it comes almost like a bolt from the blue to read that actually no surplus existed since the cry first went forth.

A news dispatch from London states that "It is agreed that the prevailing belief of recent years that a 'chronic over-production' existed was fallacious. An analysis of production and that what appeared to be over-production actually was the refusal of producers to liquidate surplus stocks accumulated in two most exceptional crops."

If that be so, asks the Kitchener Record, why did some statesmen who should have been in the know advocate a sharp reduction of acreage sown to wheat? The whole thing is conflicting and leaves the average man perplexed.

At any rate it is evident that the price of wheat is going up steadily. We are well past dollar wheat at which figure the prairie farmer was calculated to earn a margin of profit, provided he had a crop.

However dollar wheat will look like small potatoes if predictions come true for in some quarters it is anticipated that the price of wheat will go to at least \$2.10 in July. That would be early enough for the farmer who can't afford to hold his grain to cash in on the sharp advance in this all-important product of the Prairie Provinces. Imagine what such increased purchasing power would mean to the industrial East!

Apple Trees Killed By Frost Replaced

More than 11,000 young apple trees, 11,236 to be exact, were planted in Middlesex County in 1934 and 1935, and county growers are optimistic of regaining the export market lost as a result of the frost damage in the winter of 1933-34. The report on apple tree planting is made by J. A. Johnston, Dominion fruit inspector who pointed out that many valuable trees in Baldwin and King orchards were lost by frost.

"The types of apple trees planted are such that our export business should rise again to the 1933 peak level when over 11,000 barrels were sent of Great Britain," he said. Spies, McIntosh, Delicious, now and Baldwins, are the most popular varieties being replanted.

An increased export demand for evaporated and canned apples has provided a new outlet for the country's supply and Mr. Johnston believes this trend will also prove an aid to the grower. Approximately 6,700 barrels of last year's crop were canned, evaporated or made into cider.

Mr. Johnston pointed to the 1936 crop of 40,600 barrels against the small harvest of 22,700 in 1935 in supporting his views that Middlesex is again climbing to the production pinnacle. As the 1936 crop was unusually heavy he does not expect the 1937 one to be more than medium, although the weather this winter has been favorable for orchards.

Delving into the historical records it is found that of the 150 banks, 44, or 30 per cent, are 100 or more years of age. As would be expected, oldest of the lot is an English bank, Coutts & Co., which dates away back to 1692.

Control Mold On Products of Farm

Scientists Devise Method to Save Millions of Dollars

AMES, Iowa.—Iowa State College scientists announce discovery of a cheap, practical method of controlling mold—the leech-like growth that tears the life-blood of plants and taints food.

Dr. I. E. Melbus and Dr. George C. Kent, botanists, said three years' experimentation yielded a substance—a "toxin"—that will retard the fungus and mold growth on corn, barley, fruits and vegetables.

They estimated farmers may be able to save millions of dollars yearly by applying the toxin on fruits, grains and vegetables.

Losses due to fungus disease on all economic plants, they said, has been estimated as high as \$1,500,000,000 annually, compared with insect damage estimated at \$1,000,000,000.

Mold, the botanists explained, is the common family name for the large group of sometimes visible parasites. Higher in the biological scale than bacteria and numbering possibly hundreds of species.

Charity often means that we are willing to pass the hat if other people will fill it.

Friend—Are you going to be bothered much with your income tax this year?

No, I have just figured out that at the highest tax rate they can charge me the government will owe me over \$100.

It isn't what you say you are going to do that counts—it is what you actually do that turns the trick.

READ IT OR NOT—The American Buzzard is the fastest flying bird.

Some folks burn their bridges behind them, and some burn theirs before them.

You might better be called a tightwad by the crowd than called to account by your creditors.

Neighbor—What was your husband storming about last night?

Neighbor—Oh, it was so silly of him. He got angry. He found I had used his tennis racket to strain potatoes.

Many a man who think he is the picture of health is only the picture of high blood pressure.

Jane—Don't you thing its awful? Charlie never comes home until after midnight.

Susan—You ought to be happy. My husband starts out at that time.

Some men do what their wives tell them to do and some men are not married.

His Father—As it is your birthday, I'll cancel the \$5 you borrowed the other day, so you won't owe me anything.

Clarence—If its just the same to you, Dad, I'll take the \$5 in cash.

It is better to be loved and lost than to have loved promiscuously, and makes less work for the courts.

There will always be those who think they know your duty better than you know it.

Here's Progress

Once it would take a woman as long as 14 minutes to get the correct change for a theatre ticket out of her handbag. Incredible, isn't it? Why, in 14 minutes you can cook 3 pounds of macaroni, buy a dozen two-cent stamps, call Scranton, or Ironton, Pennsylvania.

But now we have the zipper handbags for ladies. Everything opens with a lightning zip—outer handbag, compartments, change, purse, all fly open at the touch.

How long does it take the lady to get the price of a theatre ticket together now? Fourteen minutes. — Judge.

A-1

Along Canada's Mining Highway

British Columbia reports indicate financing of the large B.C. Nickel deposit by a Canadian-U.S. Syndicate holding contracts for disposal of concentrates to Japanese interests.

Alberta reports Brown Oil Corporation No. 1 and 2 wells deepening rapidly, also drilling under way on Plains Petroleum's No. 2 well. A new oil field is indicated by this company's No. 1 well. Acidizing of the Foundation well in Turner Valley is taking place to enhance production.

In Manitoba, Sherritt-Gordon is preparing for resumption of production.

Ontario's fields are most active. Madsen in Red Lake is moving ahead with its shaft sinking and development plans. Hardrock in the Long Lac Camp is developing new high grade in the west shaft section. The McLeod situation underground is reported to be better. Hutchison Lake will be drifting on two levels shortly.

In Porcupine, important ore is reported on Preston East Dome's 200-foot level west drive. The Virita Porcupine has announced diamond drilling arrangements — Pamour reports improving operating results — Kirkland Lake Gold reports a most im-

portant ore development at depth south of the Macassa line. The Larder Lake field, from fifteen to twenty-five miles east of Kirkland Lake, is the scene of intense activity. Kerr Addison, by diamond drilling, is enlarging its most important ore limits. Martin Bird continues to develop new ore on three levels underground. Omega steadily prepares for future enlarged production. Upper Canada has attained its 500-foot level shaft objective with underground ore development to begin shortly.

Chesterville reports important results in diamond drilling, with Noranda reported as having entered the company's affairs as a substantial shareholder. Pelangio Larder reports diamond drilling to commence at once. Armistice has already started to drill. Arjon, adjoining Kerr-Addison, is preparing for active work and Barber-Larder has surface work under way. Cole has obtained the services of a prominent engineer to direct their diamond-drilling and surface operations.

Quebec areas are making record progress. The Quebec Manitou section to the east of Lamaque is developing a boom, with many properties obtaining finances.

Newspapers Earn Praise Says Head

University President Says Radio Will Never Supplant Them

LONDON, ONT. — Simple reasoning convinces him that the radio cannot usurp the functions of the newspaper, Dr. W. Sherwood Fox, president of the University of Western Ontario and distinguished educationist, told the annual convention of the Ontario-Quebec division, Canadian Weekly Newspapers Association here.

"Chew the Cud" Putting the question to the delegates, Dr. Fox replied himself: "I've reached an answer which is satisfactory to me. As I know newspaper readers, they like to ruminate over articles which interest them — chew the cud, as it were."

"Well, you can't do much chewing of the cud over what goes in one ear and out the other, which is the radio broadcast. On the radio you hear one thing one second and a long string of other things in succeeding seconds." Bruce M. Pearce, retiring president of the division, exhorted the weekly editors to "give more leadership than we do at the present time."

The small paper, he maintained should do its part in "fighting Communism. Fascism and all the other isms in Canada — because, after all, there is no reason for them in this country."

"The press is one of the indispensable things of civilization," declared Dr. Fox. "It is essential in maintaining civilization and also in developing it to greater human achievement."

It was the "desire and the need" for news which created the newspaper, he continued, reminding that ancient Rome had bulletins on stone which were placed in the forums. The first English paper, he said, was published about 1620, and in strange comparison to today, it published foreign news almost exclusively.

Guide To Civilization

"People of those times thought that local news was too incidental, too trivial, too near at home," he explained. "It has been left to us in modern times to appreciate the value of local news." It is also interesting to note, he asserted that American newspapers also dealt very little with politics, the people getting the latest on that phase of life through "pamphleteers."

"People who criticize newspapers he said, 'don't realize that if there is anything wrong with the papers it is only a reflection of wrongs which have first come into society. Today, newspapers have developed to the extent where they have the power of affecting society as well as reflecting it. They have become a vital guide in civilization."

Dr. Fox held that, during the depression years, the "greatest influence for good" came through the editorial attitude of the average newspaper.

"In spite of the bewilderment which may have been created in the news columns," he said, "the editorial columns of both the weeklies and the dailies have talked to the people in a tone which indicated that panic was not the way out."

"Editorials stressed the need of calmness, and cool deliberation of the facts before remedial action was taken. So I want to pay tribute to the power of the press during the days of depression."

While the circulation is "relatively small," the strength of the weekly paper always impressed him, declared the Western "U" president. "Its editor remains a human being in relation to his readers and that is a wonderful fact," he said. "That contrasts with the editors of the great city dailies whose identities are lost."

Dr. Fox told the gathering some of the facts about the University of Western Ontario which are not generally realized. Next year, Western will celebrate its 60th birthday he said, and it is older than all but three English universities.

With its registration of 2,614 students, Western is larger than any other Western Canada College with the exception of the University of Manitoba, he informed. Its registration is two and a half times larger than that of Dalhousie University, and in arts registration it is larger than either Queen's or McGill.

Dr. Fox held it "unfair" to compare Canadian college problems with those in the United States. Canada, he stated, has only 20 universities exercising degree-conferring powers, while the United States has 880 universities in similar positions. In proportion to the population of Canada, the United States would have 240 colleges, he said.

He concluded with an admonition on the responsibility of an editor. "If the editor has diplomacy, he will know that sometimes the longest way round is the shortest way home," he declared. "Following that precept he can lay before the people good sound constructive thought and make them believe that they want it."

The Awful Child Wants To Know

"Why is the Government giving Army recruits a special diet?"

"To make them fit and strong."

"Why?"

"To fight somebody, I suppose."

"Why weren't they fit and strong before?"

"Because they didn't have enough to eat when they were children."

"Why didn't the Government give them a special diet then?"

"Because nobody realized they would be wanted as soldiers."

"Does the Government only feed people up when they've got to fight somebody?"

"Obviously."

"If they had been given a special diet when they were children would they be fit and strong now?"

"Yes, and half as big again. There would also be enough recruits to fill the Army twice over."

"Why?"

"Because all those rejected as unfit would be fit."

"Well, if they fed all the children now they would have plenty of soldiers when they grow up, wouldn't they?"

"Yes, why don't they do it?"

"Because that would be waste of money."

"Why?"

"You can't expect the government to feed children who may not be wanted as soldiers."

There are 1,024,000 persons by the name of Johnston in the United States.

MOTHERS, DAUGHTERS

NO need for women or girls to suffer every month from periodic pains, headache or side-aches. In girlhood Dr. Pierce's Favorite Prescription is a very beneficial tonic. This is what Mrs. Sarah Jordan of 32 Darling St., Brantford, Ont., said: "At one time I was so sick I could hardly hold my head up and I felt nauseated. I was frightfully upset, hardly slept a wink at night and any effort would leave me ready to cry. Also, I had pains in the back of my head. I had used Dr. Pierce's Favorite Prescription only a short while when it helped me wonderfully. The nausea no longer troubled me and the headaches and pain disappeared." New size, tabs. 50c.

There are 1,024,000 persons by the name of Johnston in the United States.

The sweetest story ever rolled

And how the roll-your-owners do love their Ogden's, Ogden's Fine Cut—such a sweet, fragrant cigarette tobacco. It tells the full story of smoking pleasure, especially when you use "Chanticleer" or "Vogue" papers. And to make the story sweeter still—you now get a larger package of Ogden's for 15c.

Boy Is Chess Champion After 12-Hour Battle

WINNIPEG.—Still a little pale from the 12-hour battle that gave him the Manitoba chess championship, eight, 12-year-old Abie Yanovsky gave a play-by-play account of his last and what he called his "toughest" victory. "I had to win it to stay in the running," he said with an embarrassed smile. "You see, I had lost one game before that, while A. Helman, my opponent, hadn't lost any. That gave him a half-point lead on me for the championship. A draw wouldn't have been any good."

News And Information For The Busy Farmer

Furnished by the Ontario Department of Agriculture.

Apple Export Figures

In spite of an unusually large crop of good quality apples in Great Britain in 1936, and a consequent large pack of gallon apples, the export of apples from Canada to the British market was greater than in 1935 by nearly 20,000 cases, the exact figures being 205,415 cases in 1936 and 188,050 cases in 1935.

Straw as an Absorbent

Straw when used as bedding for live stock will absorb from two to three times its weight of liquid, and if finely cut will soak up about three times as much liquid as when uncut. Further, the absorptive capacity of dry sawdust and fine shavings is from two to four times that of ordinary straw.

Horses of not more than \$150 in value imported into the United States from Canada are dutiable at \$20 per head; horses over \$150 in value are subject to a duty of 20 per cent. ad valorem. Prior to January, 1936, the duty on horses of not more than \$150 in value was \$30 per head. From 1931 to 1935 there was a slow but steady increase in the number of Canadian horses imported into the United States and in 1936 the imports rose to 17,156 head for the not more than \$150 classification and 3,326 head for horses over the \$150 figure.

Early Tomato Production

The best prices for tomatoes are paid for early, ripe fruit, but the grower must not make the mistake of having the plants cost more than is reasonable.

The Dominion Horticulturist recommends early sowing coupled with the use of early maturing, good varieties. The sowing should be made just early enough to have stocky, well-grown plants in bloom and ready for planting out at the sign of settled weather.

Soils unduly rich in nitrogen tend to promote rank wood growth and a small amount of fruit. Low nitrogen, high phosphoric acid and a medium amount of potash are essential to good results.

Help to Make Canada More Beautiful

The unlovely things and unattractive places in Canada that displease the eye are made by man. It is time he set out to undo some of the damage that has been done. There are primrose paths for all to tread who care to make them. An amazing amount of worry can be spared under along those paths in a bright spring afternoon. Since Adam tilled the first garden many pastimes have come to claim their thousands while have passed out of the picture while gardening has stood through the centuries. There must be something in it. Buy some flower seeds, plant some flowers or shrubs this spring. Help to make Canada more beautiful.

Current Crop Report

According to reports received from many points in Ontario, Fall wheat appears to have come through the winter in very good condition and recent rains have helped it wonderfully. While in some districts Fall wheat is very brown on top, it is still green at the crown, and fields that had a good top and root system are coming through splendidly. Work on the land has commenced in many parts of Southern Ontario and some seed has been sown. Fruit farmers are busy spraying their orchards. Grey County reports an auctioneer selling a three-year-old calf for \$181. At another sale cows sold as high as \$69, with their calves as foot selling for another \$10. At another sale the total sales amounted to over \$2,100, of which \$1,800 was paid in cash. Wellington County also reports numerous auction sales, and similar reports come from other counties. In many cases sheep and cattle are bringing good prices, while seed grain generally brings a premium. The run of sap is light in Dundas County, with maple syrup selling at \$1.50 to \$2.00 per gallon. Grenville and Prescott & Russell also report a very poor season for maple syrup. In Renfrew County five machines for treatment of grain for smut and other seed-borne diseases have been installed, all of them doing considerable business.

Vermin in Poultry

It seems impossible to get growth in chicks or satisfactory production from the laying flock if vermin is present. The hen doesn't seem to be able to eat enough feed to keep vermin alive and at the same time keep up normal production. The hen and chick must depend upon the poultryman to keep down the pests which cut into the profits. If the birds have good dry dust in which to work, body lice are fairly well kept in check. The powder, or nicotine applied to the roosts shortly before the birds go on the roosts is effective.

The nests sometimes become infested and for this reason all nests should be frequently cleaned, and dusted with insect powder, then fresh chaff or straw put in the nests. One should avoid using in the nest a disinfectant with a strong odor or straw that is musty. It is well known that eggs absorb odors. There is really no excuse to have the poultry plant over-run with vermin, but it multiplies fast in warm weather, and if preventive or con-

trol measures are not used the hens will soon be tormented and production will drop.

Seed Treatment

Farmers are now busy making preparations for spring seedling. Good crops and heavy yields are directly associated with the use of clean, healthy seed of the best quality. The animal losses, due to the ravages of seed-borne bacterial and fungous parasites, are much greater than the average farmer realizes. For this reason, all seed should be treated before it is sown, regardless of its quality.

Seed treatment of wheat, oats and barley has been greatly simplified in recent years with the appearance on the market of organic mercury dust. These dusts, when properly applied, effectively control the smuts of oats, covered smut of barley, bunt or stinking smut of wheat and the other seed-borne fungi and bacteria that are responsible for the blights and root rots commonly found in cereal crops. Due to their easy application, effectiveness and stimulation to germination, they are rapidly replacing formalin and copper carbonate. They are not, however, recommended as a control for the loose smuts of wheat and barley. These smuts are not affected by the use of the ordinary seed treatments, but can be controlled by the hot water treatment.

In apply organic mercury dusts to the seed, care should be exercised to follow instructions as outlined on the container. The amount of dust recommended should be evenly distributed over the seed coat. Insufficient dust will be ineffective in control, and an excess will injure germination. Grain, after being treated with mercury dust, should not be fed to live stock or poultry, or used for human consumption. It can, however, be kept over, under suitable storage conditions, and used as seed the following year.

DEDICATION

To create a service so sublimely beautiful as to alleviate the sorrow of parting, is to render a service to mankind. To this our service is respectfully dedicated.

MRS. TIMMINS CELEBRATES

101st. BIRTHDAY

Mrs. Andrew Timmins, Winchester's beloved centenarian, celebrated her 101st birthday at her home on Main street Thursday, where she received the felicitations of her numerous friends. One year ago, on the occasion of her 100th anniversary, she was especially honored by the municipal council, the school boards and the different church societies. At the same time, she unfurled the goodwill flag, which was presented to this municipality by the city of Winchester, England. She recalls this incident quite clearly and hardly realizes that a year has passed since it took place.

In Good Health

Mrs. Timmins is still quite active and enjoying good health. She often walks down town to do shopping and assists with the housework. She enjoys a good hearty laugh, and looks forward to the visits of her great-grandchildren, whom she loves to entertain. She is, in many respects, a remarkable personage with mind and body alert and her perception of people and things as keen as ever.

Mrs. Timmins is the daughter of the late George Saffell and his wife, Hannah Pearson, natives of Yorkshire, England. She was born near Prescott on April 22, 1835, and has lived during the reign of five British sovereigns. Her husband, whom she married in 1854, passed away in 1917.

Only Survivor of Family

They were privileged to celebrate both their golden and diamond wedding anniversaries together. Mrs. Timmins is the only surviving member of a family of twelve children. A brother, George, passed away at the age of 95 years.

Members of her family are Henry Timmins, of Toronto; Stanley Timmins of Calgary, Alta.; Chester Timmins of Winchester and Mrs. John Dale of Red Deer, Alta.

This lovely old lady thinks that the modern inventions are wonderful, such as the motor car, airplane, radio, electric lights, telephones, electric house appliances, etc., but her long life of hard work and the meager inventions of the early days has made her incapable of adapting these labor-saving devices to a luxurious life which she so much deserves, so she is still content and insistent to carry on in her own old way in doing much of her own house work. But her welfare is in the efficient hands of her grand-daughter, Mrs. Mabel Allison, who lives with her.

HULBERT

Mrs. John Merkley of Inkerman, is visiting Mrs. Jas. Morrison.

Mr. and Mrs. Wm. Flegg and Mr. and Mrs. Lloyd Montgomery spent a few days in Montreal.

Mrs. S. D. Thorpe called on Mrs. Ralph Adams on Thursday afternoon. Mrs. Lee Montgomery called on Mrs. Ralph Adams on Sunday afternoon.

Miss Ruth Ellis of Ottawa spent the week end at her home here.

Mr. and Mrs. Ross Anderson and baby of Glen Stewart spent Sunday with Mr. and Mrs. Morley Sullivan.

Mr. Lyle Merkley and children called on his aunt, Mrs. Jas. Morrison.

MR. AND MRS. CARM

LOCKE HONORED

A large number of friends assembled recently in the dining room and parlour of the Brinston United Church in honor of the recent marriage of Mr. and Mrs. Carmi Locke.

Mrs. Howard Bell read an appropriate address, while Miss Ruby Boyd, on behalf of those present, made the presentation of two occasional chairs.

Following was the address:

Dear Wilda and Carmi:

We felt that we could not let the opportunity pass, since you had already taken the matrimonial plunge, of wishing you every success in your venture, also a long and happy wedded life. This should be the happiest hour of your life. It is the hearts hour, full of blissful contemplation and rich promises.

You, Wilda, have known since your childhood and your genial and cheerful disposition has won for you many friends here. The years you have attended the Sunday School and several as Sunday School organist, has won you a place here.

Although you have been among us, Carmi, for some years, to a great many of us, you are a stranger. We welcome you now to our church and community, and hope you will find a host of true friends among us.

We earnestly hope that for you both your future may be filled with happiness.

We therefore ask you to accept this gift not for its intrinsic value but for the spirit in which it is given.

Signed on behalf of your neighbors and friends.

Mr. Locke made a suitable reply after which all joined in singing "For They Are Jolly Good Fellows." A sing-song was then enjoyed, followed by lunch.

HOME IMPROVEMENT PLAN

The hall bedroom, the scourge of all city houses a decade or so ago, finds new use today with the magic of modern decoration. No longer regarded as a cluttered up space with heavy furniture, its walls dark and dreary, and the sun which streams through its one window too bright, or the room too dark and airless with drawn blinds.

Funds may be obtained from any bank under the generous terms of the Home Improvement Plan at a very low rate of interest for the rejuvenation of these rooms and they often become one of the most attractive in the house.

A housewife decided to do over such a room in her house. The woodwork was painted ivory and a light figured wallpaper used on the walls. The ceiling was painted a pale blue, the color of the sky. Floors were repainted and varnished.

Venetian blinds hung at the windows, allowing air without too much sunlight on a hot day. Net curtains were used to take away the feeling of bareness without cluttering up the place with silk or chintz.

Furnishings of the room, bought out of the family's funds were simple. A spool bed, a dresser, a small but comfortable chair and a table were all that were needed. The result was a cheerful room which was its own welcome to the overnight guest.

IROQUOIS CHEESE BOARD

The annual organization meeting of the Iroquois Cheese Board was held in the town hall on Saturday afternoon last with the President, Harry L. Foster, presiding.

The meeting was addressed at some length by the President, also Thos. Johnston and Alex. E. McGruer, representing Lowell and Christmas and A. A. Ayers & Co. respectively, Montreal exporters.

The following officers were elected:

President—H. L. Foster.

1st Vice-Pres.—Edmund Thompson.

2nd Vice-Pres.—Eli Merkley.

Sec.-Treas.—J. Arnold Johnston. Board of Arbitrators—Eli Merkley, Edmund Thompson, W. J. Lennox, James Tindale, A. E. McGruer, Roy Johnston, Arthur Thompson and Thomas Johnston.

The meeting expressed strong disapproval of the legislation of the Ontario Legislature allowing the Cheese Patrons' Association to collect a fee of five cents per 100 pounds of cheese manufactured and sold, and passed a resolution protesting such legislation, which was carried unanimously. The Secretary was instructed to send a copy of this resolution to the Ontario Minister of Agriculture.

Beginning May 1st regular meetings will be held in the town hall every Saturday at 9 p.m.

MR. ALEX. ROSE

The funeral of Alex. Rose of Ottawa was held on Tuesday afternoon to South Mountain United Church cemetery, Hallville, where the service was conducted by the Rev. W. R. Johnston, pastor of the United Church. The late Mr. Rose was in his 57th year and was the son of the late Alex. Rose and Elizabeth Cassidy.

He was born in the township of Mountain where he lived until eight years ago when he moved to Ottawa. He conducted a business at South Mountain and later he and his wife moved to Hallville where they operated a boarding house. Deceased was highly esteemed and a large gathering of former acquaintances and friends were present at the funeral to pay their last tribute to respect.

He leaves his widow, the former Annie Niblock and one son, Earl of Ottawa; also one sister, Mrs. Niblock of North Bay.

IMPROVING HIGHWAY

WEST OF BROCKVILLE

Announcement was made this week by George T. Fulford, M.L.A., on his return from Toronto, that laying of a concrete surface on No. 2 highway for a distance of approximately four miles west of Brockville will be carried out this season, continuing the establishment of a four-lane modern boulevard highway which was started last year. Completion of rock excavation along the route of this improved highway has yet to be effected, along with considerable grading. When this has settled, it is proposed to commence the laying of the concrete surface.

Mr. Fulford stated that he believed a solution had been reached of the difficulties attending relocation of the bridge spanning the Rideau canal at Newboro. The existing steel structure is to be replaced this year in view of the fact that is unsafe to accommodate the heavier traffic now offering, and an agreement has been reached between the provincial Highways Department and the Dominion Department of Public Works whereby the cost of building the new bridge will be shared between them. It is proposed to erect a concrete structure with a width of 30 feet spanning the canal at high level.

BORN AT WILLIAMSBURG

Dr. Albert S. Henhoffer, aged 62, Kitchener veterinary surgeon, died suddenly at his home Wednesday following a heart attack. Born in Williamsburg, Dr. Henhoffer attended school there, in Kitchener and in Guelph.

COMING P RIVER

One of the first ocean-going vessels to ascend the St. Lawrence to the lakes this season will be the freighter Zenda of the Inter-provincial Line, which loaded cargo for the lakes at Saint John and Halifax this week.

Miss L. Dafoe spent Monday in Morrisburg.

Mr. and Mrs. Milton Crites and son, Elburn, were visitors of Mr. and Mrs. J. Beaupre, Sunday.

CARDINAL JUNIORS

TENDERED BANQUET

Citizens of Cardinal held a banquet in honor of their junior hockey team, winners of the St. Lawrence Junior Hockey League title and the Gill Cup. Following the supper, a short program was rendered. W. P. Walker, reeve of the village, acted as chairman and toastmaster. He expressed sincere congratulations on behalf of the citizens of the village. The National Anthem followed the toast to His Majesty the King.

A. S. Fraser proposed the toast to the Junior Hockey Club and congratulated the boys on their success and expressed a hope that they might do as well in senior hockey in future years. Miss Helen Bush rendered a vocal solo of her own composition, a tribute to the juniors.

On behalf of the hockey club Jimmy Sim replied to the toast and expressions of good-will on behalf of the town. The coach, Gordon McKenzie also spoke.

John Pontbriand, captain of the team, expressed his thanks. Each of the players in turn rose and spoke briefly.

The senior hockey club players were present as guests. R. H. Wallace spoke on behalf of the senior team, expressing their thanks to the citizens for loyal support.

Each member of the senior hockey team spoke briefly, adding their congratulations.

Dr. S. P. McPhee delighted the audience with a vocal solo. Doris Darling and Dorothy Prosser rendered several guitar selections. Other officials who spoke were Jim Thompson, captain of the senior team and Albert Pontbriand, president of the junior league.

A presentation was then made to the juniors by the Women's Institute, each member of the team receiving a windbreaker bearing a crest. The presentations were made by R. A. Cousins, principal of the Continuation School.

Five beautiful shields were also presented to the officials.

MISS BLANCHE SUMMERS

The whole community was saddened by the sudden death Tuesday April 13th, of Miss Blanche Summers, eldest daughter of Mr. and Mrs. Ralph Summers, of Aultsville. Miss Summers was born on January 16, 1916 in Williamsburg township, but had been a resident of Aultsville for the past 12 years. Her happy, pleasant disposition had made her a general favorite and her early death is mourned by a wide circle of friends.

There were a large number of friends and relatives present at the funeral which was held at 1.30 on

Friday, April 16 from her parents' residence to St. Paul's Anglican Church, Aultsville. The service was conducted by the rector, Rev. Frederick G. Strange and interment took place in the Anglican cemetery at Riverside.

There were many beautiful floral offerings.

Among the friends and relatives present from a distance were: Mr. and Mrs. John Smith, Fred Smith, Mr. and Mrs. Douglas Smith, Mr. and Mrs. Howard Smith, Mr. and Mrs. Douglas Stitt, Mr. and Mrs. Henry Swerdfefer and family, Mr. and Mrs. James Swerdfefer and family, Clinton Beckstead, Kenneth Beckstead, Mrs. Oris Smith and daughter, of Morrisburg; Mr. and Mrs. Samuel Summers, Irvin Summers, Mrs. Roberts, Mr. and Mrs. Frank Rombough, Mr. and Mrs. Ralph Cook, Mrs. Bolton, of Cornwall; Mr. and Mrs. Thos. Holland, Norman Holland, Mr. and Mrs. Stanley Gallinger, of Massena; Mr. and Mrs. Milton Casselman, Mrs. W. B. Casselman, Mr. and Mrs. Gus McDonald, of Riverside; Mr. and Mrs. George Summers, Mr. and Mrs. Earl Bowman, of Gallingtown; Mr. and Mrs. Adam Gaynor, Mr. and Mrs. Earl Gaynor, of Winchester; Mr. and Mrs. Andrew Burt, Mr. and Mrs. Jack Bowman, Wales.

The nearest surviving relatives are the parents, Mr. and Mrs. Ralph Summers; four brothers, Lorne, Howard, Garnet and Ronald, and two sisters, Gladys and Phyllis, all at home; also her grandparents, Mr. and Mrs. John Smith of Morrisburg.

MR. HENRY JUBB

Iroquois lost one of its oldest residents in the death of Henry Jubb in his 97th year. Mr. Jubb farmed in that district for the past 80 years and was well known and respected.

He was born in Yorkshire, England, and at the age of 17 left for Canada with two other young men, Henry White and Henry Margatroyd. They crossed the ocean in one of the old sailing vessels, the voyage taking six weeks.

The three Henry's as they were called, settled in the township of Edwardsburg.

Mr. Jubb in early life married Hannah Barclay, who predeceased him 12 years ago. They had one son by adoption, Herbert Jubb of Iroquois, where the late Henry Jubb had resided for the past few years. Besides his son he is survived by a nephew, Harry Jubb of Toronto and one niece, Annie Wilson of England. The funeral was held to the United Church, Iroquois, service being conducted by Rev. T. Knowles. Interment was in Point Iroquois cemetery.

Picadilly THEATRE Williamsburg

THIS FRIDAY and SATURDAY, APRIL 23-24

DOUBLE BILL, 1st Feature, "CLARENCE" with Roscoe Karns. 2nd Feature, "HIT THE SADDLE" with the Three Mesquiteers. Ray Corrigan, Bob Livingstone, and Max Terhune. A dizzy domestic comedy, with thrills, action, and plenty of humor.

MONDAY and TUESDAY, APRIL 26-27

"JOHN MEADE'S WOMAN" featuring Edward Arnold and Francine Larrimore with a lengthy supporting cast in which George Bancroft, Gail Patrick, John Trent and Sidney Blackmer, Willard Robertson and Jonathan Hale stand out. This picture is personal drama full of human interest that will appeal to all.

WEDNESDAY and THURSDAY, APRIL 28-29

"HER HUSBAND LIES" with Ricardo Cortez, Gail Patrick, Tom Brown and June Martel. A beautiful romance which teaches a lesson on the wiles of gambling.

FRIDAY and SATURDAY, APRIL 30, MAY 1

"Our RELATIONS" with Stan Laurel and Oliver Hardy. 70 minutes of hilarious laughter.

NOTE—Special prices for children on Saturdays only. Saturday Matinees 10c; Saturday evenings 35c, if unaccompanied by parents.

Proof

Twenty-five square inches in oval shape is the amount of the average tire which touches the road when the tire is correctly inflated. This amount of tire on each wheel must support your car when brakes are applied.

Unretouched "footprint" of a Goodyear "All-Weather" Tire which has travelled 16,936 miles

Let us explain "FOUR-WAY traction"

Only Goodyear gives you the extra safety of four-way-pointed diamonds in the centre of the tread. This means better car control under all road and weather conditions. Come in and see demonstrations that prove Goodyear's long wear and greater safety.

Tea for every Taste "SALADA" TEA

Love Huntress

By H. GLYNN-WARD

Claudia Townsend meets Dick Whalen at a hockey game in Seattle one night. Her interest in Dick infuriates Wallace Bornell, rich young lumberman, who wants to marry her. To get Dick out of the way, Wallace offers him a job in one of his lumber camps in British Columbia. Claudia, meanwhile, persuades her father to give Dick a job in his office. However, they

have to go to Victoria for a few days to settle the matter. Claudia wires to Dick on Friday to tell him that the job is his but when the telegram comes Bornell manages to intercept it. Hurt by Claudia's failure to keep her promise, Dick accepts Bornell's offer. He goes to the lumber camp at Burns Lake, and a short time later, he discovers that the Bornell company is stealing lumber. He asks the boss, Braddock, for an explanation, but he puts him off and the next day starts for Seattle. That night, Dick writes a letter to Claudia.

CHAPTER V

When Claudia Townsend returned to Seattle from Victoria, she was buoyantly happy. She had managed to arrange the job for Dick, and she telephoned her father's office immediately to ask for Mr. Whalen.

The answer — "No Mr. Whalen in this office" — left Claudia unbelieving. She asked to speak to her father.

"Well, Claudia," he said, "your young man never turned up! Had to give the job to the next man. I guess he didn't want the job."

Confused and hurt, Claudia rang up the Hotel Metropole and asked for Mr. Whalen.

"Mr. Whalen checked out on Saturday morning," was the answer.

"But—" she said excitedly, "where did he go?"

"Mr. Whalen left no address, Miss," the clerk told her. "He told us he'd send an address later."

Claudia was sick with disappointment. Dick had gone — after all she had promised to do in his behalf — and he had left not a word for her!

"Could you tell me if a telegram was delivered to Mr. Whalen on last Friday? It is very important!"

"Yes, ma'am—" came the voice a few minutes later — "a telegram was delivered to Mr. Whalen on Friday evening."

The shock left Claudia trembling. Obviously, she told herself, Dick Whalen had amused himself with her, and gone out of her life without a word when it suited him. What a fool she had been! Better even to have listened to Wallace Bornell's advice not to run around with a man too much, who was an utter stranger.

But though Claudia tried to harden her heart and not care, she had been more attracted to Dick Whalen than by any other man she had ever met. She had fallen in love with him and she realized now that no other man could possibly fill the gap left by him in her heart.

Claudia was not the sort of girl to show how much she had been hurt by a man who had snubbed her. Now she threw herself into all the excitement that offered, accepting all invitations and lived in a continual whirl.

"Claudia, you are doing too much," her mother said one day. "Why don't you go up to Banff for the winter sports with the Hodgsons?"

But Claudia did not want to leave Seattle with so much going on. Even from herself she tried to conceal her real reason for staying — hope that word might come from Whalen. At the hotel they had finally received and given her Dick's address at Burns Lake, British Columbia. She had never heard of Burns Lake.

It made her even more bitter to know that he had settled somewhere and still did not write her a line. She

Wages Increased

Swift Canadian Co., Limited, announce an increase in wages at their Dairy and Poultry Plants, located at Stratford and Belleville. In accordance with the policy of the company to keep abreast of the times, they have established a minimum rate of 35c per hour for male employees, and 27½c per hour for female employees, and have also established an equitable differential for employees occupying skilled and semi-skilled positions.

The increases were worked out between the management and the employees through the plant assemblies, composed of representatives elected by the employees and representatives appointed by the management.

It is their hope not only to keep abreast of the times, but to be known as one of the good employers with whom men and women can join their efforts to their lasting satisfaction, so that they would want to find their life-work within the company.

Average Weekly Pay In Britain Is \$10.75

LONDON.—The average weekly wage of nearly 2,000,000 British factory workers is 10.75, a census recently compiled by the Ministry of Labor shows.

Among the million workers in the textile industries many earn as much as \$18 a week, making hosiery, while others make as little as \$11 a week spinning flax and hemp.

Men average \$13.75 a week in the textile groups, but the wage average of all workers is lowered to \$9 by the wages paid to women and girls, some of whom receive only \$3.25 a week.

Tailpiece — Scotland Yard, co-operating with police of Europe and the United States, have prepared a complete list of all the unwelcome visitors — international tricksters, confidence men, and pickpockets, who were expecting rich hauls. They will be kept under a strict watch.

Linens Acquire Untold Loveliness Done In Laura Wheeler Cutwork

CUTWORK PEACOCKS

PATTERN 1145

A regal peacock, his tail spread, inspired this rich design that's just the thing for scarf ends, dinner cloth, chair sets, or pillow! In years to come you'll treasure the linens you adorned with this exquisite cutwork motif. It's simple to do, mainly without bars—and the smaller accompanying designs are ideal for napkins or towels. Pattern 1145 contains a transfer pattern of two motifs 9½ x 12½ inches, two motifs 6½ x 8½ inches and four motifs 2 x 2½ inches; material requirements; illustrations of stitches used; color suggestions.

Send 20 cents in coin for this pattern to Needlecraft Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Write plainly PATTERN NUMBER, your NAME and ADDRESS.

tossed her head and tried her best to forget him.

Meanwhile, Wallace Bornell pursued his adventure. He was with Claudia more than ever before.

"Claudia," he said to her once, "don't you know that I'll move heaven and earth to get you? You may as well say yes now!"

Claudia toyed with the idea. Here was a man who loved her madly, was immensely rich, had position, and was well known to her family and friends. It would be an excellent match. She told herself she wouldn't marry Dick now if he came to her on bended knees!

Impulsively one day she decided to accept Wallace. She went to the telephone to call him, but then changed her mind and went out for a lonely drive in her car to think it over. She had carefully refrained from asking Bornell if he knew where Dick Whalen had gone. She knew that Wallace had known how much they had been together, and she did not want to risk his sarcastic smile.

Coming back through town she had to pass the building which housed the Bornell Lumber Company's office. She looked up at it, smiled and parked her car. She would run up and see Wallace in person. She had made up her mind now.

It was late in the afternoon and Claudia met the stenographer leaving by the outer office door.

"Oh, do you want to see Mr. Bornell?" the girl asked.

"Yes, is he in?"

"Yes, but let's in conference in the inner office—"

"That's all right," said Claudia. "I'll wait here." The girl closed the door and left her alone in the luxurious outer office. She sat down to wait.

Claudia could hear voices from the inner office, Bornell's and another man's. Then chairs moved back — they were coming out. The handle turned, the door opened a crack — then discreetly the man pushed it to again. A crack still remained, open enough to allow Claudia to hear what was being said.

She listened idly, at first, an unwilling eavesdropper, as she realized that the talk was serious and confidential. Then suddenly she caught a name — the name that was uppermost in her heart — and she sat rigid, listening with every nerve.

"...won't lie heavy on my conscience!" the man was saying. "He's got what's coming to him all right for nosing into things that ain't his business. Whalen's just the sort to turn spy and inform the government. Then where'd we be?"

Claudia bent forward, straining to hear the next words.

"We'd be cleaned out of business, Braddock, lose all our holdings in that country! We'd be ruined!" This voice was Bornell's, and it sank hoarsely on the last words. "You do as I say. Get rid of him—and quick!" His voice dropped too low to be heard.

"Easy enough," said the other man's voice a moment later. "There's aplenty up there with a grudge against Whalen. One fellow specially, and it happens I've got something on him! You'll stand by me, Mr. Wallace, should anything come of this?"

"I've said I would—" came Bornell's quick, irritated voice, "only hurry up about it! Communicate with me by wire, using the word accident."

"I'll see to it."

They were coming out. Claudia, her heart pounding with anger and excitement, hurriedly opened her vanity case. They mustn't know—mustn't suspect that she had heard! If it really was Dick Whalen they had been talking about—then he was in danger.

Woman's World

By Mair M. Morgan

The Proof of the Pudding

If your family is like most of the families in this country, they will turn up their noses at ordinary bread pudding. They take it for granted that it is a makeshift dessert and they feel that the place for any left over bread is in stuffings, not puddings. But here is one way to make real bread pudding that will fool them and surprise you.

The addition of rich, flavoursome chocolate seems to make all the difference in the world in the taste and gives you a lovely looking dessert. No one will turn up their noses at this Chocolate Bread Pudding, but they will pass their plates back for more. It's a wholesome, nourishing dessert and good for every member of the family, even the youngest.

Since this really is an economy dessert, get the best chocolate you can buy. It makes the pudding and will prove to be an economy in the long run. Well, you all know what they say about puddings, so let your family prove it.

Chocolate Bread Pudding

½ squares unsweetened chocolate, cut in pieces; 3 cups cold milk, 1 cup of sugar, ½ teaspoon salt, 3 eggs, slightly beaten, 1 teaspoon vanilla, 1½ cups ½ inch cubes stale bread.

Add chocolate to milk in double boiler and heat. When chocolate is melted, beat with rotary egg beater until blended. Combine sugar, salt, and eggs. Add chocolate mixture gradually, stirring vigorously. Add vanilla. Place bread in greased baking dish. Pour mixture over it. Place dish in a pan of hot water and bake in moderate oven (350 degrees F.) 50 to 60 minutes, or until the pudding is firm. Serve hot with hard sauce, or whipped cream or cold with cream. Serve six. It adds to the appearance of the pudding if from two or three tablespoonsfuls of the hard sauce or whipped cream is placed on the top of the pudding just before serving.

New Ways With Cheese

Cheese and Spaghetti — Break up 1½ oz. spaghetti into a small piedish and simmer in water for half an hour. Then mix 2 teaspoonfuls flour and ¼ teaspoonful mustard with 2 oz. grated cheese. Season well with pepper and salt and cook for half an hour. Serve on rounds of toast.

Cheese and Tomato Salad — 3 oz. cheese, 2 medium-sized tomatoes, seasoning, salad cream, lettuce leaves. Grate the cheese finely, then skin and chop up the tomatoes and mix to a paste with the cheese, adding seasoning to taste. Serve the mixture on individual plates surrounding with lettuce leaves. Sprinkle the salads with a little finely-grated cheese and decorate with small pieces of tomato.

Cheese Savoury — Spread seasoned cream cheese on small rounds of previously cooked short pastry. Over the cheese place a round of tomato and a dash of mayonnaise, and top each with a slice of olive. Place in

paper containers, sprinkle with finely-grated cheese, and garnish.

Cheese Moulds — Pour 1½ cups milk over 2 cupfuls soft breadcrumbs; add 3 well-beaten eggs, 1 heaped cupful of grated cheese, 1 teaspoonful of salt, pepper to taste, and 1 tablespoonful of melted butter. Pour into buttered moulds and bake from 20 to 30 minutes in a moderate oven.

Painting A Kitchen

With grease and smoke in the air, kitchen walls, ceilings and woodwork quickly become dingy. For cleanliness therefore, the preparations used should be of a kind to which grease and dirt will not hold. Enamel is the best for a kitchen, its glossy surface making washing easy.

The first step in re-painting a kitchen is to clean the walls and the woodwork. All the surfaces of a kitchen pick up a film of grease. This must be taken off, for paint will not hold over it. It can be removed with a washing soda solution or with a mixture of ammonia and water.

If the old surface is glossy the gloss must be dulled in order that the new paint may hold. This can be done by rubbing with sandpaper or steel wool. A washing soda solution will cut the gloss.

When washing soda or a similar chemical has been used, thorough rinsing should follow to take off all the traces. Painting should not start until all the surfaces are thoroughly dry.

15,000 Canadians Going To London

OTTAWA—Fifteen thousand Canadian residents are likely to go to Great Britain this year mainly but not wholly to the Coronation.

Two thousand new passports for them were issued in February, 3,000 in March, and there will be over 4,000 this month from present indications. The yearly issue is between 24,000 and 25,000 and they are good for five years. Anyone having such a passport can use it now without the necessity of coming back here for renewal or certification.

"Cleaning outhouses is easy with GILLET'S LYE"

"Yes—I use it regularly... It drives away odors fast"

Keeps outside closets clean and sanitary

● Keep your outhouse sanitary... odorless this easy way—once a week sprinkle half a tin of Gillett's Pure Flake Lye over contents of closet. It cleans thoroughly... quickly destroys contents.

There are countless uses for this powerful cleanser. It frees clogged drains, cuts right through grease, wipes off stubborn dirt, saves you hours of drudgery. Keep a tin always on hand.

Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET — The Gillett's Lye Booklet tells how to use this powerful cleanser for dozens of tasks. Send for a free copy to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ont.

Weak Yeast can cause Spoiled Bread!

Royal protects you against
home-baking failures...
It's always full-strength!

**PHEW! IT'S
SPOILED AGAIN. I
SHOULD HAVE
USED ROYAL**

Each cake of Royal
Yeast is sealed in an
air-tight wrapper...
It stays fresh...pure!

GOOD bread needs a vital yeast... one that's full-strength, pure, dependable! That means Royal... the only dry yeast that comes sealed in an air-tight wrapper—securely protected from contamination—its keeping-qualities insured!

Seven out of 8 Canadian housewives today prefer Royal when they bake with a dry yeast. They know it's dependable! For 50 years, it has been the standard of highest quality.

Don't risk baking failures with faulty yeasts! Always depend on Royal!

Send for FREE Booklet!

To get uniform results in bread baking, it is important to keep the sponge at an even temperature. The "Royal Yeast Bake Book" gives instructions for the care of dough. Send coupon for free copy of the book, giving 23 tested recipes for tempting breads, coffee cakes, buns and rolls.

News from Niagara

Some of the fruit growers have the habit of clipping a branch from their peach trees, putting it in water, to watch for the extent of the blossoms. In one case, the result was magnificent which indicates that the peach crop is safe for 1937, except for the usual hazard of Spring frosts. — St. Catharines Standard.

One Way Out of It

"It might be dangerous to kiss one's wife in public on Sunday in Toronto the Good," chortles Hamilton Spectator. Obviously, then, the thing to do is kiss someone's else's. — Woodstock Sentinel-Review.

The Quick Stop

First inventor: "I'm going to invent an auto brake that will bring a car going 40 miles an hour to a dead stop within 20 feet."
Second inventor: "Fine. Then I'll invent a gadget to keep the driver from going through the windshield when it does." — Ottawa Journal.

Quint's Popularity

One of the requests of Princess Chieko of Japan during the short stay of herself and her husband in Canada was for a photograph of the Dionne quintuplets. These little ladies have certainly advertised the Dominion more than any other agency. — Brantford Expositor.

On the Wall

At a wallpaper show in Boston one pattern included a kitchen towel and glove draped across a curved piano keyboard. In the background a plant with branches of bathroom glasses, cullers, a reading lamp, an ice cream cone, a huge flower with an alarm clock centre, a closed tulip and strings of teacups. Just why the can opener and the ash can should have been left out of it is a bit of a puzzle. — Brantford Expositor.

Stay Under Fifty

There may have been some excuse for people thinking the 35-mile limit a joke and behaving accordingly. But with the limit raised to 50 miles, such an excuse vanishes. Rare, indeed, is the individual who finds it really necessary to travel in excess of such a speed even in the course of business, although we are well aware of the fact that higher speeds are maintained by the people who do not care for others on the road any more than they do for their own hides. A speed of 50 miles an hour is high enough for all ordinary legitimate travel. In view of this, the provincial authorities will be remiss in their duty if they do not proceed to keep close watch upon traffic. — Brockville Recorder and Times.

Hope He's Right

Dean Inge has produced another book in which he discusses many things. One of his prophecies is that there will not be a devastating European war because of the lack of funds. He depicts Germany in such bad financial shape that he doubts whether the Hitler regime can last very much longer, and Italy he avers is not in much better case. The Rev. gentleman has frequently proved himself a good forecaster. It is to be hoped that he is also one in this instance. — Brantford Expositor.

Radiant Costs

Discovery of radium in Canada (in the Great Bear area) is said to have broken the Congo trust, which previously kept the precious substance at \$75 a gram. If this be true, it is not the least of Canada's contributions to the good of mankind. — Ottawa Journal.

Endorses De Luxe

Titied ladies have endorsed the products of industry for a consideration—notably cosmetics and cigarettes. But they, and all other endorsers, are amateurs compared with the priceless Dionne quintuplets. Annette, Emilie, Ceile, Yvonne and Marie are, appropriately enough, five figure endorsers. They swear by a certain brand of breakfast food and are paid \$15,000 with no obligation to eat the product, at least not every morning. They endorse a famous make of soap, and, behold, their bank account is given a \$27,500 boost. Easy money, girls, but honestly earned. As surprising as the prices paid for their endorsements is the variety of things they approve. Cod liver oil, "tiny town togs," lollypops, tooth paste, jewelry, corn syrup, children's purses and bags, shoes, dolls and ribbons—all are grist for the Callander mill which, it is revealed, has now ground out \$765,000. — Ottawa Citizen.

Safer Glass

Shatter-proof glass, familiar to everyone who looks through a modern windshield, is made like a sandwich—a couple of layers of silicate glass stuck together by a thin filling of celluloid film, cellulose acetate film, or polymerized film. The glass will break but the pieces stick to the binder. Now a German firm is making something different. Its product has an organic base (polymerized methy ester) instead of silicate, is lighter than regular shatter-proof glass, and according to tests will stand 8 to 10 times the blow. When it cracks, the edges aren't sharp. — Brandon Sun.

Domestic Science

Many a man who longs for things like his mother used to make forgets that his wife may long for cheques like her father used to make. — Guelph Mercury.

Building and Taxation

Some means of encouraging the entry of capital into building is obviously necessary if an increase in building activity is considered desirable—and it is generally agreed that a recovery in building would do more than anything else to bring prosperity back. Increased taxation will not encourage building. It will, as the Real Estate Exchange suggests, do just the reverse, because it will make it less likely that capital invested in building will learn a reasonable return. — Vancouver Province.

Cost of Monarchy

The fact to remember is that what the King and the Royal Family receive from the British nation is very considerably less than the revenue the King hands over to the nation. Under the circumstances, Great Britain is not likely to request contributions from the Dominions. — Saint John Telegraph-Journal.

Mankind and Medical Science

Many centuries ago, Leopold, Duke of Austria, and stern captor of Richard the Lion-Hearted, lay groaning and helpless on the battlefield. His horse had fallen on him, smashing his leg to bits. All the attending physicians agreed that the royal patient had to have his limb amputated. But in that dark and illiterate age not one of the Duke's doctors, the best in Europe, knew how to perform such a hazardous operation. In desperation Leopold seized a mallet and sword and slashed off his leg in order to abate the pain. He died from the loss of blood that gushed from the wound. To-day the meanest resident of the worst slum on this continent can secure medical treatment denied a few hundred years ago to barons and kings. The contrast points the moral and ennobles the meaning of the great story of medicine—the tale of a man's glorious humanity to man. — Edmonton Bulletin.

THE EMPIRE

South Africa Drying Up

For 60 years men who have taken an intelligent interest in the soil of the Union have known that it has grown steadily worse. Even in the most fruitful parts its quality now often falls below the standard usually accepted for agricultural purposes in such progressive countries as the United States of America. And this fact is more intimately connected with the question of moisture than with any other factor. South Africa, people say, is drying up. The rainfall is the same, but the water is not distributed and stored in the way which Nature originally arranged for itself. There used to be a balance between the rainfall and the amount and character of the vegetation. That balance has been disturbed by man. He brought his flocks and herds and seed, and with the destruction of trees and bushes, with the grass-burning and over-grazing, and with the trampling of animals, the havoc was gradually worked and the country now stands in the presence of a grave national danger. — Cape Argus.

Cause and Effect?

We are as sincere in our desire for world peace as the most ardent pacifist, but we believe that pacifist agitation has increased and is still increasing the danger of war. Before Britain embarked on her re-armament programme, practically every major world power was barking "War!" Today they are even more articulate for—Peace. Is it merely a coincidence that their attitude has changed since Britain announced her vigorous defence policy? — Hong Kong Press.

"Now that the rulers can speak to millions of people over the radio they don't keep things a secret any more." — H. Phillips Oppenheim.

Province Hard
Hit By Strikes

Plants in Many Cities Are Closed By Oshawa Walkout

TORONTO. — As the General Motors strike at Oshawa enters its second week, reports from Ontario towns and cities indicate the effect the walkout is beginning to exert on the industry of the Province.

From Windsor comes word that curtailed production in the General Motors plant there may affect 1,000 workers. Five hundred were forced to also leave when the main plant at Oshawa closed down, as there was no outlet for motors manufactured at the Windsor branch. With the further curtailed production of parts, 400 more men may lose their jobs. Some 300 may also be laid off at the Walker Metal Products plant, where iron castings are made for General Motors cars, and eighteen have already been laid off at the Kelsey Wheel factory.

Woodstock Plant

Work on General Motors parts stopped Wednesday at the Woodstock plant on the Eureka Planter Company. Sufficient orders from other sources have so far kept the full staff busy.

At St. Catharines, McKinnon Industries, subsidiary of General Motors, reported advice from the parent company at Oshawa, "to hold up work on material supplies for their use except on special service parts."

Manager W. A. Wecker said a cur-

tailment of hours affecting 600 employees would have to be made. The hours would not be cut drastically, however, because a number of unfilled orders for other plants would help in maintaining employment.

John Conroy, of the Conroy Manufacturing Company, at St. Catharines, said between 35 and 45 men would be laid off at his plant because production had been lowered 70 per cent as a result of the General Motors strike.

At Hamilton

Officials of the Thompson Products and Hayes Steel at Hamilton said that efforts were being made to rearrange production to keep men at work.

Hamilton industrial concerns which received more than \$1,000,000 worth of business from General Motors last year, have suspended work on large orders from General Motors, because of present labor trouble at Oshawa, but local workmen are not expected to lose their jobs as a result. Orders from other sources will enable the firms to continue peak production, it was reported today. Steel Company, Union Drawn Steel, Burlington Steel, Canadian Drawn Steel, Firestone Tire, Westinghouse, United-Carr Fastener and other companies have been given orders from Oshawa.

Car dealers report they will be without new machines if the strike is prolonged, and this might result in reduction in sales staff.

A check at Chatham revealed that no factory there was affected by the Oshawa strike. The Ontario Steel Products and Chatham Malleable and Steel Works are carrying on production on a normal scale.

Children With Pneumonia
Get Cold Air Treatment

LONDON, ENG. — Lives of hundreds of children suffering from acute primary pneumonia are reported to have been saved by a novel cold air treatment introduced by Dr. H. L. Wallace of the Royal Edinburgh Hospital for Sick Children.

Writing in the current issue of the British Medical Journal, Dr. Wallace says:

"During recent years it has been the practise in one of the wards of the hospital to submit every case of pneumonia on admission to an intensive open-air regime.

"This is carried out irrespective of the season of the year or of the weather conditions, with one exception of fog, each child being placed on the windward side of the ward beside a widely opened window so that the cold air without plays directly on the face of the child."

An essential precaution it is pointed out, is that the patient should be warmly clad to prevent chilling, the face being the only part of the body exposed to the air. All cases of pneumonia are thus treated, both day and night, until the temperature falls and remains at a normal level.

Dr. Wallace says this rigorous method of treatment has been thoroughly tested in more than 300 cases. The impression of physicians and nurses attached to the ward, he writes, is that exposure to a moving current of cold air is the means of saving lives of the children of all ages afflicted with an acute, primary form of the disease.

It brings comfort to the patient, aids appetite and helps to render unnecessary other forms of treatments which might prove exhausting to a young child.

Sees New High
In Tourist Trade

Transport Minister Hour Asks Courtesy and Fair Dealing For Visitors.

OTTAWA. — An all-time tourist traffic for Canada in 1937 was forecast this week by Transport Minister Mr. Howe. He based his expectation on the number of inquiries received by the Canadian Travel Bureau and the generally improved business conditions in United States.

Coupled with the Minister's forecast was a reiteration of his advice given a year ago to all agencies associated with or catering to tourist travel to exercise courtesy and fair dealing in their treatment of the visitors. "The Canadian Travel Bureau has received 26,896 inquiries since the first of the years," said Mr. Howe, "an increase of 93 per cent over the number received in the corresponding period of a year ago. These inquiries give every indication that our tourist industry in 1937 is to be much larger than a year ago."

"The Government's tourist advertising and publicity campaign in the U.S. is bringing most favourable results and the daily average of inquiries at the present time is more than 600. We have now developed a splendid co-operative tourist effort with the Provinces and the large transportation companies while the Customs and Immigration regulations have been adapted to meet the modern demands of the traveller, and reciprocal shopping privileges have been extended.

Blind Pickets Aid Sightless Sitdowners

Coming to the aid of blind men and women who began sit-in strike against philanthropic organization's weaving shop in New York City, these two blind men picketed in front of the building with the help of girl sympathizer.

50,000 Cattle
Shipped to U. S. A.

Profits Up to \$30 Per Head Seen for Canadian Stockmen — the Winter Loss Slight

OTTAWA. — Canadian cattlemen, with several hundred million dollars invested in the beef-raising industry, are now more jubilant about prospects for a profitable year than they were a couple of months ago when a million head of range cattle in the Prairie Provinces were said to be threatened with starvation by reason of the severity of the winter and the serious shortage of feed.

No Excessive Loss

Senator Daniel Riley, President of the Western Stockmen's Association and regarded as an authority in the cattle industry, has now been advised that the losses, sustained by Western ranchers, due to pastures having been buried for weeks under several feet of snow, have not been excessive. And some time ago it was feared thousands of head of cattle out on the ranges would perish because the customary chinooks had not been as frequent as usual.

But what particularly pleases cattlemen in Ontario and Western Canada is the steady demand for Canadian cattle in the markets of the United States. Already this year more than 50,000 head have been marketed all across the line at profitable prices. Thanks to the Canadian-United States trade agreement, efficient Canadian stock feeders have made as much as \$25 and \$30 a head profit on choice beef cattle, sold for consumption in the United States.

The trade agreement which went into effect a year ago last January provided for a reduction in the American Customs tariff on Canadian cattle from three to two cents per pound and for a quota of 155,000. As a matter of fact, however, Canada actually sold 191,000 head of cattle and 50,541 calves in the United States last year, or about 36,000 cattle in excess of the quota.

Bigger Profit Made

Some of these animals were pure bred stock and beef cattle of weights not covered by the quota. It is estimated that for every good steer the Canadian farmer got \$10 more in the United States than he would have gotten but for the reciprocity pact.

It is interesting to note that in the year 1934, before the trade agreement was in operation, Canada sold only 6,341 head of cattle in the United States and only 226 calves. Those in close touch with market conditions will not be surprised if well onto 200,000 head are exported to the United States this year, as 50,000 head were shipped across the border during the first quarter. These were chiefly animals which had been stall-fed in Ontario or fattened on feed lots in the West. Ontario supplied some 15,000 head of the shipments to the United States thus far this year.

Sporting Comment
By KEN EDWARDS

Hi folks! Here we are back with you again with a few facts and figures from the sport area.

The other night while the writer was out with an old boy from Upper Canada College, Wally Syrett, by name, a golfer of honorable mention and a man of statistics like his father, the topic of speed arose. A topic on which Mr. Syrett is quite fluent.

Our informant was saying "we all know that Sir Malcolm Campbell has driven his beloved Bluebird hundreds of miles an hour and that Gar Wood broke the world's speed record on the water, but does the ordinary sport fan know that the golf ball has been also known to travel at the rate of 190 m.p.h.?"

"And take baseball for instance. The maximum speed of a baseball is 95 m.p.h."

"Does the fan know, too, that big Willie Tilden once socked a tennis ball which was reputed to have travelled 150 miles an hour?"

"Then comes a cricket ball, says Wally, at a maximum speed of 90 m.p.h. Then a football at 50, followed by a billiard ball at 22 m.p.h."

And for these facts, Wally, old kid, I know our followers say "many thanks."

Flash! Flash! — Did you know that nine of the eleven pitchers on the Phillies' roster are 6 or more than 6 feet tall?

Yes! the gals are at it now. Way down in Richmond, Va., a few weeks ago a championship wrestling bout was staged between champion, Miss Clara Mortensen, of California, and Miss Clarice Davis, of Iowa. The gents that take these two gals "forever and a day" will just be bears for punishment, that's all. Nevertheless at this little scramble the lassies packed in 4,000 fans.

Well, guess we better rattle along — say, didja' hear about the Scotchman that took his boy out of school because he had to pay attention! — Please excuse it gang.

So long till next week.
KEN.

News in Review

More Jobs, Less Relief

WINNIPEG. — More jobs and less relief featured the first quarter of the year 1937 in Winnipeg. Figures from the single men's relief office showed a decrease of nearly 1,000 in those obtaining assistance. At the end of March, 7,547 jobs had been found for unemployed men compared with 6,680 in the first quarter of 1936.

Taken By Death

BRAMPTON. — Frederick James Peaker, one of Brampton's best-known residents, and one time member of the famous Brampton Excelsior lacrosse team, died this week in his 69th year. He was the son of William Peaker, who emigrated from England. For many years the late Mr. Peaker was attached to the Brampton Fire Brigade. He was also a prominent curler. He is survived by four brothers: Dr. E. A. Peaker, Toronto; Dr. Kenneth Peaker, Toronto; Dr. O. A. Peaker, Brampton, and George Peaker of Toronto; and two sisters, Mrs. D. E. Baynon, Toronto, and Mrs. Frank Hillock, Brampton.

Regina First in Canada to Go On Daylight Saving

REGINA. — Regina citizens are going about their business on Daylight Saving time. The only Western city to adopt "fast" time, the clocks were moved ahead one hour last Sunday. All towns of the district are on the Mountain Standard time.

Riel Rebellion Veteran Dead

SAVARY ISLAND, B.C. — Captain George Johnston Ashworth, 74, newspaperman, barrister and veteran of the Riel Rebellion died here this week. — Captain Ashworth, pioneer Vancouver resident, had been employed by the Vancouver World, the News-Advertiser and the Vancouver Sun, retiring from active work a few years ago. Edward and J. J. Ashorth of Toronto are brothers.

Prosperity Returning

BRAMPTON. — Prosperity is returning to the Brampton district slowly but surely, it was indicated by the customs returns for 1936-37, as compiled by the chief of the Brampton Customs port, Col. R. V. Conover. Last year, receipts of the port amounted to \$57,248.92 in duty, \$154,992.29 in sales tax and \$38.04 in sundries. Duty paid in the preceding fiscal year of the port was \$77,304.47, but sales tax was only \$122,520, giving a net increase in collections of \$12,416.56.

Advertise For A Wife

WATERFORD. — It pays to advertise.

George Lossing, of Port Rowan, got tired of living alone, and advertised for a wife.

So far he has received 100 letters from omen anxious to join him in the wedded bliss. One woman in Picton stipulates that the happy date must be set at some distant date.

His chief problem now is which one to choose.

Drove At 80 M.P.H. To Sick Daughter

WINDSOR. — Because he was rushing to the side of his daughter, critically ill in Alabama, Charles D. Carson of Toronto, who sped through Tilbury at 80 miles an hour was let off with a \$5 fine. Carson did not appear, but in a letter to Magistrate Smith said he made the trip from Toronto to Birmingham in one jump.

Against Recruiting Women For Ministry

TORONTO. — No special effort should be undertaken at this time to recruit women as candidates for the ministry was the recommendation that was brought before the Board of Christian Education of the United Church of Canada at the annual meeting held at Emmanuel College.

"It would be well if women applicants should not be received as candidates, at an earlier age than 22 to 25 years, when their character and their adjustments to life would have become relatively stable," read the recommendation.

Nurses Avert Panic

PENTANG. — Fire caused by a defective chimney in the Penetanguishene General and Marine Hospital caused a minor flurry of panic among the dozen patients in the institution when smoke started eddying through the corridors.

A few patients became terrified but their fears were set at rest by courageous nurses. No material damages resulted from the blaze and smoke damage was largely confined to the nurses' quarters on the top floor.

\$4,700,000 Public Works

VICTORIA. — Premier T. D. Pattullo has announced a works program for British Columbia involving expenditure of \$4,700,000.

The Premier said negotiations between the Province and the Federal Government over a joint works program had been completed with the decision to spend \$1,700,000 mainly on road construction. In addition, he said a \$3,000,000 loan obtained by the Province in the East would be spent to improve roads wherever necessary.

LOCAL AND GENERAL

Miss Marjorie Deeks spent last week in Toronto and Hamilton.

Miss Dorothy Weir arrived home from the Brockville General Hospital on Wednesday.

Messrs. Ryerson and Gerald Casselman, students at Queens University, Kingston arrived home this week.

Miss Gould Smith is in Ottawa the guest of her sister, Mrs. J. S. Craig.

Mr. Johnny McCoy left on Saturday for Windsor, where he will join the crew of the S. S. Birchton.

Messrs. Glenn Dawley and Albert Grabe of Orangeburg, N.Y., are week-end guests of Mr. and Mrs. Ed. Cameron.

Burton Hummel, well known resident of Williamsburg, passed away Wednesday morning at four o'clock in the Brockville General Hospital.

Mr. Jack Hummel, son of Mr. and Mrs. Frank Hummel is in Hotel Dieu Hospital, Kingston, where he is receiving treatment.

Miss Marion Locke of Queen's University arrived home this week to spend the holidays with her parents, Dr. and Mrs. M. W. Locke.

The Eusebia Class of the United Church will hold an "At Home" in the Lecture Room, April 23rd. Tea and Musical 8.30-6. Admission 25c.

Mr. Percy Reid left the 12th of April to join the crew of the W. C. Warren at Buffalo. Mr. Clifford Reid left of the 21st to board the Coteau, at Quebec.

The death occurred Thursday morning after a lengthy illness, of Mr. Horatio Barkley, of Dunbar. He is survived by his widow and a grown up family. The funeral will take place at Elma church, Saturday afternoon.

Died—Suddenly at Tacoma, Wash. on April 10th, Mrs. E. E. Young, sister of Mrs. Lee Merkley, of Inkerman, and daughter of Mr. and Mrs. Thomas Grey, of Cereal, Alta., formerly of South Mountain.

On the occasion of Lady Tweedsmuir's visit to Chesterville, both coming to and leaving Chesterville for Ottawa, the vice-regal car was escorted by Traffic Officer Eugene Rose of Morrisburg.

The many friends of Mrs. W. J. Stewart of Morewood will be pleased to learn that she has been able to return to her home after undergoing an operation in the Ottawa Civic Hospital some weeks ago. Mrs. Stewart is much improved in health.

A cow is entitled to eight feet of highway just as much as an automobile is. Mr. Justice Forest ruled in a Montreal court Saturday in dismissing an action by a motorist against the animal's owner for \$167.75 damage sustained by the auto when it struck the cow.

Mr. George William Robinson, a life-long resident of Williamsburg, passed away at his home last night, after a short illness. Deceased who had celebrated his 82nd birthday on April 15th, was taken suddenly ill early Sunday morning. He passed into a coma, and never regained consciousness. The funeral will be held on Sunday, April 25th, at 11 a.m. in the United Church, Williamsburg. Rev. C. A. Adey officiating. Burial will be in Williamsburg cemetery.

Born—To Mr. and Mrs. Cyril Loper on April 15th, a daughter.

Second place for general proficiency in cavalry regiments in Canada has been awarded the 5th Hussars of Canada, of Prescott, now amalgamated with the Princess Louise Dragoon Guards, Ottawa, according to announcement by the Department of National Defence. The First Hussars of London, Ont., won first place.

Norman Martin, 22, who is alleged to have looted the till of a Cornwall service station on April 9 and fought his way free of the tackle of George Meyer, station attendant who caught him in the act, was sentenced by Magistrate P. C. Bergeron, on Monday, to fifteen months in the Ontario Reformatory.

Leman A. Guild, publisher of the Gananogue Reporter, a weekly newspaper, died at Kingston, Monday. A native of Leeds County, Mr. Guild took over the Reporter ten years ago after having been general manager of the Kingston British Whig for many years. He was prime mover in the establishing of a Rotary Club in Kingston 15 years ago.

Traffic Officer Eugene Rose narrowly escaped serious injury Tuesday evening when the hind wheel of his motor cycle seized while travelling between 65 and 70 miles an hour, in the discharge of his duty on Highway No. 2. The machine skidded a long distance before it stopped and only the coolness and presence of mind of the officer prevented him from being thrown forward, with possible fatal injury. The machine had to be towed to Morrisburg and was shipped to Toronto for repairs.

Well known foot specialist and class-mate of Dr. Locke of Williamsburg, Dr. G. G. Leach, passed away at his home in Toronto on Monday, aged 67, after a short illness. In Toronto Dr. Leach operated a clinic similar to that of Dr. Locke and each September he was in the habit of going to Williamsburg to act as assistant to Dr. Locke during the busy fall months. He was a native of Rosemeath, Ont.

A pretty but quiet wedding took place in Morrisburg at the home of Rev. Smith, when Doreen, only daughter of Mr. and Mrs. Theodore Hutt of Iroquois, was united in marriage to Bertel Bernie son of Mr. and Mrs. William Perry of Cardinal. The bride looked charming in a blue ensemble with accessories to match. The couple were attended by Mr. and Mrs. McDonald of Iroquois. They left for a short honeymoon in Eastern Ontario and on their return will reside in Cardinal.

Dundas-Grenville Presbyterian of the Women's Missionary Society will hold its eleventh Annual meeting on May 6th, in South Mountain United church, with the president, Mrs. R. S. Peterson in charge. Miss Elizabeth Read, a returned missionary from Africa and Mrs. D. R. Carson of Ottawa, will be the guest speakers.

At the oratorical contest held in the auditorium of the High School, Iroquois, on Thursday evening, April 15th, Warwick Knowles won first prize in the Senior class with the subject, "Two Microbe Hunters." The prize was a silver cup. Warwick is a native of Toronto, second son of Mrs. Maida Parlow Knowles and her husband, the late Arthur Knowles. For the past six years they have lived on the Parlow humstead farm, east of Iroquois.

Harry L. Foster was re-elected president of Iroquois Cheese Board at its annual meeting recently when strong disapproval was also voiced at the legislation of the Ontario government allowing the Cheese Patrons' Association to collect a fee of five cents per 100 pounds of cheese manufactured and sold. A resolution of protest was passed and the secretary was instructed to send a copy to the Ontario minister of agriculture. Trading this season will take place each Saturday afternoon commencing May 1st.

More than 100 friends of Mr. and Mrs. Fleming Lapierre of Winchester, recently married, attended a presentation held Friday night at the home of Mrs. Eli Lamoureux at Cloverdale, the home of the bride. Pearl Dockstader read the address and miscellaneous gifts were presented on behalf of the community by Lill Hughes. Members of the Chesterville senior hockey team and former players attended, and a short address was given by Matt Flynn of Chesterville. The presentation of a floor lamp and parlor table was made by Percy Plantz and Melvin Harper, also of Chesterville. Mr. Lapierre voiced the couple's thanks and the bride's book was signed by those in attendance. Refreshments were served. Mr. and Mrs. Lapierre will reside at Garden Mills, near Sudbury.

Loan No. 9576

IROQUOIS WOMEN'S INSTITUTE

There was a large attendance of members and guests at the regular monthly meeting of the Women's Institute held at the home of Mrs. Earl Merkley on Friday evening, April 17th.

Two guests were present from Winchester, Mrs. J. E. Singleton and Mrs. Moffatt, the former being the District President, Mrs. Houlehan, of the Matilda Women's Institute, was also present.

Mrs. Singleton was heard in a lucid talk on various matters of importance and in connection with the co-operative program of Home Economics, literature for which has been lately received from the Department. The plan embodies a training school with a local leader in a centre chosen when plans are completed. There is a number of subjects to choose from.

DDr. J. R. Miller's talk on Health and Child Welfare was very interesting and well received. Many points of a most helpful nature were stressed.

The Misses Marjorie Milligan and Irene Beaupre rendered two pretty songs, which won much applause. Miss Jean Thompson was their accompanist on the piano.

The President, Mrs. Wm. Brew, read an article on the Coronation. A contest was conducted by Mrs. Geo. Banford, the prize, a teapot, being won by Mrs. Arthur McNis.

Mrs. Wm. Brew and Mrs. Earl Merkley were appointed as members of the Home Improvement Committee.

At the close of the meeting a short social time was enjoyed.
