MORRISBURG — ONTARIO

MR. THOMAS SOUTHWORTH

Mr. Thomas Southworth, Managing Director of M. J. O'Brien Limited died at his home, Ottawa, Sunday, in his sixty-ninth year, after a month's illness. He was born near Brockville and was formerly owner and editor of The Brockville Recorder.

In 1895 he went to Toronto to become Director of Colonization and Forestry for Ontario, remaining until 1907, when he became Secretary-Treasurer of the Steel and Radiation Company. Later he became Managing Director of the Deloro Smelting and Refining Company, a subsidiary of M. J. O'Brien Limited.

He was at one time president of the Brockville Liberal Association; a member of the Canadian Mining Institute; and a member of Ionic Lodge and the Ontario Club of Toronto.

He leaves a wife, formerly Mary Elizabeth Taylor, Gananoque; two sons, William T. and Herbert S. of Toronto; three brothers, Mr. Lev. Southworth of this town; Dr. S. S. of Bolinas, California; and Dr. Stollard of Goldfield, Nevada. The remains were taken to Toronto on Monday, where burial was made on Wednesday.

MR. A. C. KAUFMAN

Mrs. Lev. Southworth has been advised of the sudden death of her brother, Mr. A. C. Kaufman, in New York City, a leading official of the Postal Telegraph Co., who spent his youth and received his early training in telegraphy in Brockville.

Born at Lyons, Iowa, November 9, 1866 the late Mr. Kaufman moved to Brockville with his parents, the late Mr. and Mrs. F. E. Kaufman, in 1870 and after having attended the local schools learned telegraphy with John W. Baker, then agent for the Montreal Telegraph Co. After attaining proficiency, he was employed in the Montreal agency of that company, whence he was transferred to the service of the Postal Telegraph Co. being located at Pittsfield, Mass. Subsequently he was promoted to be superintendent of the Sixth District Eastern Division, of the company at Albany, N.Y., and for several years past had been identified with the cable service of the Western Union Telegraph Co., with headquarters in New York.

Mr. Kaufman was recognized as being one of the most efficient officers of the telegraph company by which he was employed.

CORRESPONDENCE

Resolved, "Whereas substantial gains and much benefits have already accrued from the operation of The Ontario Temperance Act, and whereas the people generally have appreciated the great difficulties in the enforcement of the Act.

"And whereas the period during which the Act has been in force and on trial has been extremely short when one considers the length of time the open bar prevailed in our Province.

"Therefore, be it resolved that we urge upon the Honourable G. Howard Ferguson, the Prime Minister, and our Government that we are strongly opposed to any modification in the Ontario Temperance Act, believing it to be the best and most favourable prohibitory law which our Government can pass and the one which develops greater sobriety among our people and minimizes and drives out drunkenness from our people.

"Secondly—That we strongly request that should the Government ever decide to submit the question to the people it should not be brought on until The Ontario Temperance Act has had a more adequate trial as we feel assured that with the good work which is being done in enforcement that the law will continue to demonstrate its effectiveness and benefit. In the event of such submission it should be in the form of a Referendum containing such questions and conditions as approved by the Legislature, thus causing the Electors to assume full responsibility for the conditions and know definitely the law that would be effective after such vote.

"Thirdly—That any provision for freer access to intoxicating liquors would tend toward the former deplorable conditions which existed under the open bar.

"Finally—We pledge our Government that we will urge upon our citizens a greater and more sympathetic assistance to the Officers charged with the enforcement of the Act.

The above is a true copy of a resolution passed at a meeting of the Dundas County Temperance Organization held at Winchester Springs on March 7th, 1924 at which representatives were present from all parts of the county, and forwarded to the Prime Minister.

J. D. STEWART, Chairman
N. W. BEACH, Secretary.
Winchester, Mar. 8th, 1924.
The Methodist congregation here passed and forwarded a similar resolution to the Prime Minister.

RADIO CLUB ORGANIZED

(Contributed.)

A meeting of Radio Fans was held in J. M. Whitteker's office last Saturday evening to discuss the advisability of organizing a Radio Club. The attendance was not as large as was anticipated, but there was plenty of enthusiasm, with the result that a Radio Club was organized and the following officers elected:

President—J. Miles Whitteker.

Vice President—Wm. R. Roach.

Secretary—Donald A. Brandstetter.

Treasurer—George S. Tracy.

A membership committee was elected composed of Harold Jarvis, Paul Gormely, and Donald Brandstetter. This committee will call on all Radio set owners for the purpose of securing as many charter members as possible. A nominal fee of one dollar was named for charter members.

A by-law committee was also elected composed of Keith Bowman, Wm. R. Roach and J. M. Whitteker to draft by-laws to be submitted to the next meeting of the Club which will be held in the President's office on Wednesday March 19th, at 7.30 p.m.

One of the reasons for forming the Club was to try to improve Radio reception in town, although the activities of a Club can be spread out to include all matters pertaining to Radio. No definite plans have yet been made but they will be put into shape as soon as possible. It is the intention to make the club of mutual benefit to all who are interested in Radio and wish to join, and membership will likely be open to "all citizens of Morrisburg and surrounding district who own sets or are interested in Radio. The success of the Club depends on the support it receives from Radio Fans, and it is hoped that a large number will become members so that by meeting together from time to time we can increase our knowledge of Radio and our skill in "tuning in." If, by mutual help, we can make Radio of greater benefit to all and enable our members to get the best results from their sets our organization efforts will not be in vain.

The efforts of the Club will likely be along educational lines and there is plenty of room for that kind of work. You have only to tune in almost any evening to hear, mixed up with the music, the numerous squeals and whistles, grunts and groans that are sent out into the air by other receivers in town. This shows a lack of knowledge of the tuning art. Doubtless the operators of these sets do not know that they are causing any disturbance but rather blame the other fellow. By learning what goes on inside your set when you twist the controls you will be able to twist them intelligently and get music instead of nothing but howls and mushy music and putting everybody else out of business.

Join the Radio Club. Be a booster for better Radio. Remember the date of our next meeting, Wednesday March 19th at 7.30 p.m. at J. M. Whitteker's office.

WOULD SPIKE PROPAGANDA AGAINST ST. LAWRENCE PLAN

John Millar, Progressive member for Qu'Appelle, Saskatchewan, proposes to move that the House Railway Committee inquire into the saving that may be effected on transportation of grain by deepening the St. Lawrence waterway, and apart entirely from any saving through the Welland Canal. Mr. Millar, in his motion, remarks that an active propaganda is being carried on by American and Eastern Canadian interests and that "this propaganda is grossly misleading in some respects, and particularly in regard to the saving to be effected on the transportation of wheat."

RESTORE RAG-BAG TREASURES.

Winter days are dyeing days. Old Mother Winter covers the drab and dreary fields and trees with a radiant white dress. Just so does Mother cover up the dull, faded colors in only partly worn garments that have filled the rag-bag, and restore them to a freshness and wearability that helps immensely in reducing the family clothing bill. But the results of Mother's work is more lasting than that of Mother Nature, because she uses the fadeless dyes.

In dyeing any kind of material, it is always more practical to use the best dyes. All fabrics dry at least two shades lighter than they appear when they are in the wet dye. It is safe to dye a sample first, dry it, and make changes in the dye after you have decided which color you like best. If you are dyeing a deep shade on a light colored material, it is best to build up the color, getting all you can the first time, and then beginning over again with a fresh dye bath. This will help to prevent crocking.

If you are buying new material to dye, buy the light shades rather than white, for any material that has been dyed will take color more readily the second time. Natural linen color makes a wonderful base for old-blue or rose.

Yellow velours dyed red give a rare orange. The old-fashioned damask table-cloth with a faded red pattern dyed blue will come out blue and plum or violet. It will make lovely sofa pillows. If checked gingham in tan and white are dyed blue, they will come from the bath in unusual combination of blues that will look pretty for upholstering the wicker porch-chairs.

GRAHAM PUDDING IS FINE EATING.

Those who are fond of graham should try graham breakfast mush, made by stirring graham flour into boiling water, salted to taste, until moderately thick, then allow to cook slowly for five minutes, stirring occasionally. Serve with sugar and milk or thin cream, as preferred.

Graham Pudding—Two teaspoonfuls of graham flour, one cup of molasses, same of sweet milk, one teaspoonful of soda, same of salt, half cup of chopped raisins, one tablespoonful allspice. Stir thoroughly, turn into pudding pan and steam one hour. Serve with your favorite pudding sauce. Very much resembles suet pudding, with much less work. My recipe for pudding sauce is: One heaping tablespoon of butter, melted over hot water, mix in two tablespoonfuls flour, rub well together, then slowly add a pint of boiling water, beating continuously. When well cooked, flavor and pour over pudding.—Mrs. R. O.

WRONG IDEAS ABOUT CONSTIPATION.

There are people so constipated that they are never clean. They have an unclean skin, an unclean color, and an unclean odor. They pass their days in a condition of poor health and their lives are soured and stunted without their actual knowledge of the reason. Such people find constipation a real curse. A diet of spinach and other greens would go far to sweeten and brighten their lives.

Far more people are there who are so obsessed by the fear of constipation that they never allow the bowels to perform their normal function. They must be forever dosing themselves with this pill or that salt, perhaps because of some inordinate fear that nature, in resentment that man no longer sways his body on all fours, will refuse to allow his scavenger system to function.

This dread of constipation is decidedly overworked and capable of causing serious damage to the victim unless good judgment is in control. If the patient who happens to miss the daily evacuation of the bowels simply says, "I must attend to that. I must

drink more water. I must eat some fruit, or spinach or head lettuce every day," well and good.

But that is not the usual outcome. Eating fruit or drinking water is too normal a method of correction to commend itself to the average person as a remedy for constipation. He must have something strong (and usually nasty). A pill or a dose of salts are the common agents employed and since one dose calls for another the taker soon becomes a regular devotee of the pill habit. Far better for him to make up his mind that nothing very terrible happens if the bowel evacuation is occasionally missed; that individuals differ; that there are people for whom clearance of the bowels every two or three days is normal. Have a daily bowel habit if possible, cultivate it, encourage it, but do not try to drive it by taking pills and purgatives or you will soon be the worst kind of a constipated human being.

A PRACTICAL UNDERGARMENT.

4406. Nainsook, crepe, silk and muslin are good for this model. It is especially suitable for stout figures, affording comfort and ease.

The Pattern is cut in 4 Sizes: Small 34-36; Medium, 38-40; Large, 42-44; Extra Large, 46-48 inches bust measure. A Medium size requires 2 yards of 36-inch material.

Pattern mailed to any address on receipt of 15c in silver, by the Wilson Publishing Co., 73 West Adelaide St., Toronto. Allow two weeks for receipt of pattern.

Mutton and Macaroni.

When the cold mutton has lasted so long that the housewife dreads putting it again before her family, let her try it under this guise. Cut the cold meat into cubes. To two cups of meat have one cup of cooked macaroni, two cups of tomato sauce, one cup of cracker crumbs, two tablespoonfuls of butter, salt and pepper. In a well buttered enamelled ware bake dish put a layer of macaroni, bread crumbs and tomato sauce, then a layer of mutton with bits of butter, pepper and salt. Alternate until the pan is filled. Sprinkle bread crumbs on top with enough extra butter to brown them. Serve in the dish in which it is cooked.

The Rueful Kangaroo.

The kangaroo slipped on the ice. And both feet upward flew. He sat down unexpectedly. Which made the kanga rue.

Standardization will come by education, co-operation and legislation.

CHAPTER XXXV.—(Cont'd.)

Kirby tapped gently on the glass. The lights inside flashed on. From one view point he could see almost half the room. He could go to the other side of the blind and see most of the other half.

A man sat down in a chair close to the opposite wall, letting his hands fall on the arms. A girl stood in front of him and pointed a paper-knife at his head, holding it as though it were a revolver. The head of the man fell sideways.

Kirby tapped on the window pane again. He edged up the sash and stepped into the room.

The young woman turned to him eagerly, a warm glow in her shell-pink cheeks. "Well?" she inquired. "Worked out fine, Rose," Kirby said. "I could see the whole thing." "Still, that don't prove anything," the other man put in. He belonged to the staff of a private detective agency with which Kirby was dealing.

The Wyoming man smiled. "It proves my theory is possible. Knowing Olson, I'm willing to gamble he didn't sit still on the fire escape and let that drawn blind shut him off from what was going on inside. He was one mighty interested observer. Now he must 'a' known there was a clothes-line on the roof. From the street you can see a washin' hangin' out there any old time. In his place I'd 'a' hopped up to the roof an' got that line. Which is exactly what he did, I'll bet. The line had been tied to the posts with a lot of knots. He hadn't time to untie it. So he cut the rope. It's been spliced out since by a piece of rope of a different kind."

"How do you know that's been done since?" the detective asked.

"A fair question," Kirby nodded. "I don't find out about that when I talk with the landlady of the Wyndham. If I'm right you can bet that cut rope has puzzled her some. She can't figure out why any one would cut her rope down an' then leave it there."

"If you can show me her rope was cut that night, I'll say you're right," the detective admitted. "And if you are right, then the Swede must 'a' been right here when your uncle was killed."

"May have been," Kirby corrected. "We haven't any authentic evidence yet as to exactly when my uncle was killed. We're gettin' the time narrowed down. It was between 9.30 and 9.50. We know that."

"How do you know that?" the professional sleuth asked. "Accordin' to your story you didn't get into the apartment until after ten o'clock. It might 'a' been done any time up till then."

The eyes of Kirby and Rose met. They had private information about who was in the rooms from about 9.55 till 10.10.

The cattleman corrected his statement. "All right, say between 9.30 and 10.05. During that time Hull may have shot my uncle. Or Olson may have opened the window while my uncle lay there helpless, killed him, stepped onto the window again, and slipped down by the fire escape. All he'd have to do then would be to walk into the Wyndham, replace the rope on the roof, an' next mornin' leave for Dry Valley."

The detective nodded. "If he cut the rope, Lemme find out from the landlady whether it was cut that night."

"Good. We'll wait for you at the corner." Ten minutes later the detective joined them in front of the drug store where they were standing. The hard eyes in his cold gambler's face were lit up for once.

"I'll say the man from Missouri has been shown," he said. "I let on to the dame at the Wyndham that I was after a gang of young sneak thieves in the neighborhood. Pretty soon I drifted her to the night of the twenty-third—said they'd been especially active that night and had used a rope to get into a second storey of a building. She woke up. Her clothes-line on the roof had been cut that very night. She remembered the night on account of its being the one when Mr. Cunningham was killed. Could the boys have used it to get into the store an' then brought it back? I thought likely."

"Bully! We're one step nearer than we were. We know Olson was lookin' in the window from the fire escape just outside." The detective slapped his thigh. "It lies between Hull and the Swede. That's a cinch."

"I believe it does," agreed Rose. Kirby made no comment. He seemed to be absorbed in speculations of his own. The detective was reasoning from a very partial knowledge of the facts. He knew nothing about the relations of James Cunningham to his uncle, nor even that the younger Cunningham—had been in his apartment the evening of his death. He did not know that Rose had been there. Therefore his deductions, even though they had the benefit of being trained ones, were of slight value in this case.

"Will you take the key back to the Chief of Police?" Kirby asked him as they separated. "Better not tell him who was with you or what we were doin'."

"I'm liable to tell him a whole lot," the detective answered with heavy irony. "I'm figurin' on runnin' down this murderer myself if any one asks you."

"Wish you luck," Kirby said with perfect gravity.

CHAPTER XXXVI.

A RIDE IN A TAXI.

Kirby was quite right when he said that Hull would go with them. He

was on his way downtown when the taxi caught him at Fourteenth and Welton. The cattleman jumped out from the machine and touched the fat man on the arm as he was waddling past.

"We want you, Hull," he said. A shadow of fear flitted over the shallow eyes of the land agent, but he attempted at once to bluster. "Who wants me? Whadjawant me for?"

"I want you—in that cab. The man who saw you in my uncle's room the night he was killed is with me. You can either come with us now an' talk this thing over quietly or I'll hang on to you an' call for a policeman. It's up to you. Either way is agreeable to me."

Beads of perspiration broke out on the fat man's forehead. He dragged from his left hip pocket the familiar bandanna handkerchief. With it he dabbed softly at his mottled face. There was a faint, a very faint, note of defiance in his voice as he answered.

"I dunno as I've got any call to go with you. I wasn't in Cunningham's rooms. You can't touch me—can't prove a thing on me."

"It won't cost you anything to make sure of that," Kirby suggested in his low, even tones. "I'm payin' for the ride."

"If you've got anything to say to me, right here's a good place to unload it."

The man's will was wobbling. The cattleman could see that.

"Can't talk here, with a hundred people passin'! What's the matter, man? What are you afraid of? We're not goin' to hit you over the head with the butt of a six-shooter."

Hull flung at him a look of startled terror. What did he mean? Or was there anything significant in the last sentence? Was it just a shot in the dark?

"I'll go on back to the Paradox. If you want to see me, why, there's as good a place as any."

"We're choosin' the place, Hull, not you. You'll either step into that cab or into a patrol wagon."

Their eyes met and fought. The shallow, protuberant ones wavered. "Oh, well, it ain't worth chewin' the rag over. I reckon I'll go with you."

He stepped into the cab. At sight of Olson he showed both dismay and surprise. He had heard of the threats the Dry Valley man had been making. Was he starting on a journey the end of which would be summary vengeance? A glance at Lane's face reassured him. This young fellow would be no accomplice at murder. Yet the chill at his heart told him he was in for serious trouble.

He tried to placate Olson with a smile and made a motion to offer his hand. The Scandinavian glared at him.

The taxicab swung down Fourteenth, across the viaduct to Lake Place, and from it to Federal Boulevard.

Hull moistened his lips with his tongue and broke the silence. "Where we goin'?" he asked at last.

"Where we can talk without bein' overheard," Kirby answered.

The cab ran up the steep slope to Inspiration Point and stopped there. The men got out.

"Come back for us in half an hour," the cattleman told the driver.

In front and below them lay the beautiful valley of Clear Creek. Beyond it were the foothills, and back of them the line of the Front Range stretching from Pike's Peak at the south up to the Wyoming line. Grey's and Long's and Mount Evans stood out like giant sentinels in the clear sunshine.

Hull looked across the valley nervously and brought his eyes back with a jerk. "Well, what's it all about? Whatjawan?"

"I know now why you lied at the inquest about the time you saw me on the night my uncle was killed," Kirby told him.

"I didn't lie. Maybe I was mistaken. Any man's liable to make a mistake."

"You didn't make a mistake. You deliberately twisted your story so as to get me into my uncle's apartment forty minutes or so earlier than I was. Your reason was a good one. If I was in his rooms at the time he was shot, that let you out completely. So you tried to lie me into the death cell at Canon City."

Hull's bandanna was busy. "Nothin' like that. I wouldn't play no such a trick on any man. No, sir."

"You wouldn't, but you did. Don't stall, Hull. We've got you right."

The rancher from Dry Valley broke in venomously. "You bet we have, you rotten crook. I'll pay you back proper for that deal you an' Cunningham slipped over on me. I'm gonna put a rope round your neck for it. I sure am. Why, you big fat stiff, I was standin' watchin' you when you

knocked out Cunningham with the butt of your gun."

From Hull's red face the color fled. He teetered for a moment on the balls of his feet, then sank limply to the cement bench in front of him. He tried to gasp out a denial, but the words would not come. In his throat there was only a dry rattle.

He heard, as from a long distance, Lane's voice addressing him.

"We've got it on you, Hull. Come through an' come clean."

"I—I—I swear to God I didn't do it—I didn't kill him," he gasped at last. "Then who did—your wife?" demanded Olson.

"Neither of us. I—I'll tell you—the whole story."

"Do you know who did kill him?" Kirby persisted.

"I come pretty near knowin', but I didn't see it done."

"Who, then?"

"Your cousin—James Cunningham."

(To be continued.)

BABY'S STOCKING BALL.

A nice soft ball can be made for baby out of old stockings. See that they are sweet and clean. Then cut them into bits and stuff them into an unworn part of the leg. Sew it up on each side, and then roughly outline, in colored darning cotton, a puppy-dog face on the front.

TO WASH CLOCKED STOCKINGS.

When washing silk stockings that are clogged in a contrasting color, do not hang them up to dry until a piece of material has been inserted in the leg between the clogged portion and the rest of the stocking. This simple precaution will keep the stockings from being ruined by discoloration from the embroidery.

TO REMOVE A RUSTY SCREW.

The next time you are vainly endeavoring to extricate a rusty screw, save time and effort by heating the poker red-hot and holding it on the screw's head for a short time. Apply the screw driver at once while the screw is still hot and you'll find it will come out easily.

Minard's Liniment for Dandruff.

STRAIN THE BROTH.

It is the part of wisdom never to neglect the straining of broths made from boiling meats before they are used for soups or gravies. Small particles of bone are always likely to be present and, as many of us know to our cost, can work havoc if not removed in time.

A Thousand Cooking Uses.

For soups, sauces, gravies, savoury dishes, meat jellies, beef tea, and restoring the flavor to left over dishes.

OXO

CUBES

In tins of 4, 10, 50 and 100.

After Dishwashing! CAMPANA'S ITALIAN BALM

Is simply wonderful for keeping the hands beautifully white and soft and smooth. Positively prevents redness and chapping. Use it at once after washing dishes, and note the improvement of your hands.

Keep a bottle handy by the kitchen sink

dred and fifty pounds and wonder how
the bed can support such a weight?
To wipe your mind clear of your cares
in order that it may be fresh to grap-
ple with them when you get up?

The two greatest handicaps of the
Canadian housewife to-day are poor
feet and tense nerves. It is in her
own power, and hers alone, to over-
come them by saner methods of work,
rest and play.

POULTRY

My program of feeding includes the
buying from my local farmer's ex-
change and mixing the feeds myself.
I want a clean, tight floor, where the
grains can be heaped in a great pile
and shoveled over. For scratch feed
I know of nothing better than equal
parts of good whole oats, clean crack-
ed corn, and wheat. I will let the
other fellow have the other things. I
feed this grain in deep litter and keep
the birds just hungry enough to eat
up what I give them and work dili-
gently for the scattering grains.
Scratch feed is fed twice a day, only.
At times when wheat was high in
price, I have fed a mixture composed
of one hundred pounds each of wheat
and barley. At present prices, I am
leaving out the barley.

Dry mash is kept in the hoppers all
the time and the birds have the priv-
ilege of eating as much as they will.
A very fine laying mash is made by
mixing one hundred pounds each of
gluten feed, wheat bran, ground oats
and beef scrap, and two pounds of fine
salt. I used that ration for a number
of years. Later I cut out half of the
beef scrap and fed the birds all the
skim-milk they would consume. This
is a very intensive egg-making ration
and birds must be kept in good health
to consume it, hence I feed a wet mash
once a week, composed of equal parts
of bran, middlings and corn meal, the
liquid used to mix the mash contain-
ing epsom salts at the rate of one
pound for each one hundred birds. I
measure out the amount of grain to
be prepared, dissolve the salts with
water and mix the mash. I like this
way to administer the salts rather
than in the drinking water.

Every day, unless the weather is
very cold, I feed something in the line
of green stuff. This is grown on the
farm. Cabbages are used during the
fall and early winter and mangels are
stored to round out the latter part of
the cold season. I simply hang up a
head of cabbage, leaves and all, or a
large mangel wurzel and the hens do
the rest. Every year I grow sun-
flowers and the heads are cut and
thrown to the hens during the moulting
season. There is always a box of
wood ashes for the hens to flutter in
and pick out the bits of charcoal. Hop-
pers of grit and ground oyster shells
are also always at hand. Clean water
rounds out the bill of fare. There must
be plenty of it, and I warm it during
the cold weather.

Caring for Hardwood Floors.

Hardwood floors add greatly to the
attractiveness of a home, but they
should be kept in good condition. It
is far easier to keep them in perfect
condition by a small amount of con-
stant care than it is to neglect them
for a while and then try to obliterate
scars and scratches.

Floors that have been finished and
waxed should be re-waxed every
month, or more often if wear requires
it. If floors are reasonably clean,
they can be wiped off with a damp
cloth and then waxed. If they are
dirty, the dirt apparently being mixed
with the wax, wipe the floors care-
fully with a rag wet with gasoline
and allow to dry before applying wax
again.

Floors that have never been finished
may be made to look well by applying
a coat of paste wood filler. Wipe off
the surplus and allow to dry for
twenty-four hours before applying
wax.

The best wax for floors is the paste
form. Apply with a cloth in a thin,
even coat and then polish with a dry
cloth or weighted brush. If a second
coat is necessary, allow the first to
dry two hours and then apply a sec-
ond coat in the same manner. For a
final polish, place a piece of carpet
under the weighted brush.

The weighted brush is almost neces-
sary for waxing floors, and one will
last almost a lifetime. They can be
purchased for about \$4 or \$5.

Blowtorching the Weeds.

No matter how zealously one har-
rows and cultivates the fields, weeds
usually go to seed along the fences. A
thrifty patch of quack grass between
the posts where it is hard to eradicate
will pollute a lot of ground the fol-
lowing year.

Therefore it is a good plan to burn
these protected strips in the fall as
soon as the vegetation is dry enough
to burn. One method used success-
fully for several years by one farmer
is to use an ordinary gasoline blow-
torch. Due to the intense heat pro-
duced, grass and weeds that are not
even dead can be burned clear to the
ground, thus destroying any seed
which may have previously fallen.

With the torch in one hand and a
wet gunny sack in the other, this
farmer goes up one side of the fence
with the flame close to the ground. He
leaves a continuous trail of fire that
quickly burns itself out. But when the
fence corner is reached, he crosses
over and goes back on the other side,
either to finish any spot which may
have failed to burn or to extinguish
the fire in any smoldering post.

Why I Take Auto Insurance

I have driven a car for eight years.
In that time I have covered fully 100,
000 miles, with no serious accidents,
and only one that could be called such.
My driving has been about evenly di-
vided between country and city.

I have never been able to get com-
parative statistics on rural and urban
auto accidents, but what reaction I
get from drivers, together with my
own experience and observation, leads
me to the conclusion that the major-
ity of accidents occur on open country
roads.

A driver of an auto bus recently
recited that the majority of the acci-
dents of his line occurred on the open
country roads. He and others point
out the same reasons for this that I
had observed from traveling over our
rural roads.

In the first place, less provision is
made in the country to give warning
to the driver. Chief among these is
the lack of lights. In cities lights are
always burning at street intersections
and frequently between. These lights
aid in the identification of unlighted
objects, either moving or standing.
Not a few accidents happen in the
country from lack of these lights
which, of course, could not be econ-
omically provided. The end of a cul-
vert that restricts the average width
of the road, trees by the roadside,
turns, unlighted vehicles, etc., all con-
spire to make driving dangerous and
accidents easy.

Pedestrians walking on the highway
is another source of danger to the
night driver. This is particularly
true where one happens to meet the
pedestrian approaching from the op-
posite direction. In turning off the
strong light one often cannot observe
a person walking as well as he should.
This situation moved the writer to
provide a spotlight which keeps the
right hand side of the road well light-
ed, even when meeting other cars, and
his own bright lights are off.

This decision was quickly arrived
at after an experience on a country
road. There was a slight turn in the
road to the right. Just around the
bend three men were standing. The
head lights were angled to the left
of these men naturally, and when I

swung into the straightaway it was
only by the quickest redirection of the
car that I saved myself from running
them down. I then and there decided
to provide a spotlight which I have
since had in commission.

Road intersections are often diffi-
cult to locate. In this respect travel-
ing is much improved, but still there
are many places where one cannot
discern the crossroads and an on-
coming auto hid by bushes or a corn
field, or other obstruction may be un-
observed until too late.

We have mentioned ditches. These
furnish a real source of danger to the
country driver. In the cities the curb
tends to hold one to the street. But
during wet weather in summer, or
icy weather in winter, the ditch is the
bogie man who keeps the driver won-
dering what is going to happen.

I would mention the greatest men-
ace to country driving, and that is
the speedster. A few experienced peo-
ple can drive hard and fairly safely;
but the majority of those who exceed
the limit do not know how to handle
cars, and, when the machine is travel-
ing fast, they, too frequently, get a lit-
tle excited and lose their head. Then
things happen, and they are just as
apt to happen to the other fellow as
to the one who is at fault. Our laws
cannot be too strictly enforced in this
matter of speed. In spite of the good
work our provincial and county auth-
orities are doing, the fool speedster
is the biggest menace to the open
country driving that we now have.

Finally, the rate of speed allowed
on country roads adds to the possi-
bility of accident. When a car is going
twenty or twenty-five miles it is easy
to avoid smashups, but increase that
speed to thirty and thirty-five miles,
and the chances are increased by geo-
metrical progression.

Recently I was obliged to travel by
auto some eighty miles at night,
when a sleet was falling and freezing
to road and windshield. The cleaner
would not remove the ice from the
glass, and, after many stops we were
obliged to open the windshield and
face the driving storm. The sensation
and narrow escapes of that night
made it real easy to extend my auto
insurance for another year.—B. W.

Wiring Frames.

The value of good combs containing
the maximum number of cells of
worker size and well anchored in the
frames is well known to the pro-
gressive beekeeper. There are, how-
ever, many beekeepers who either do
not use any system of support within
the frame or are applying a system
that fails to give the support neces-
sary in order to stand the rough usage
of the honey extractor, the combs
must be well reinforced; otherwise
they will break and in some cases be
thrown completely out of the frames.
When foundation is given to the bees
it must be held in place or the res-
ultant combs will be made crooked.
The foundation also needs to be sup-
ported or the weight of the bees will
cause many of the cells immediately
below the top bar to become stretched
and in some cases cause it to break
entirely from the frames, especially if
the summer is very hot and the honey
flow heavy. These stretched cells will
either be used for drone production or
for the storage of honey. This, of
course, will reduce the area necessary
for the production of worker brood.

To secure the support and rigidity
needed for the combs it is necessary
to adopt some system of wiring the
frames, either horizontally or verti-
cally across the frames and these wires
firmly imbedded into the foundation.
There are several methods of wiring;
more than can be given in this short
article. The two following methods
have given very good results: In the
frame of Langstroth dimensions four
wires are generally used but these do
not prevent sagging below the top
bar. Better results are obtained by
using five horizontal wires with the
top wire one-half inch below the top
bar, the second, one inch below the
first and the other three at equal dis-
tances apart, the lower one being
about two inches above the bottom
bar. The other method is four hori-
zontal and two diagonal wires. The
first horizontal wire is about one inch
below the top bar, and the rest at
equal distance apart. The two diag-
onal wires are run from the ends of
the lowest horizontal wire in the
frame to the centre of the top bar,
where it can be fastened either by a
small staple or nail. Number 28 tin-
ned wire is used and in all cases is
made as tight as possible. In Jumbo
frames five horizontal wires are used
in addition to the diagonals. Vertical
wiring has not proved very satisfac-
tory. Imbedding the wires into the
foundation can be done with the spur
wire imbedder, or by electricity, the
latter being the quicker and giving

the best results. Where the diagonal
wiring is used the sheet of foundation
is better placed between the horizon-
tal and diagonal wires.

Few beekeepers use supports in the
shallow extracting combs but it is
safer to stretch two horizontal wires
across the frame, as it makes the comb
that much stronger.

Although vertical wiring of frames
has not proved very satisfactory, a
foundation in which a number of ver-
tical wires are imbedded permanently,
and which is giving good results, can
now be purchased from some of the
dealers in bee supplies.

The Sheep's Feet.

During the winter, when the flock
is confined to the pens, their feet will
require trimming to keep them in
good condition, so says the Animal
Husbandry Department, O.A.C. Weak
pasterns and some of the commoner
diseases of the feet may be prevented
by a little attention in regard to trim-
ming. A strong, sharp pocket-knife
may be used for this, or clippers made
for the purpose may be purchased.
Not only do the toes grow out very
long but the sole of the hoof will turn
under. Both should be pared, giving
the hoof the proper shape. The par-
ing may be done more easily after the
sheep have been running out in the
wet grass or snow for some time, as
this tends to soften the brittle hoof.

Fruit and vegetable growers who
look ahead will, even now, be taking
stock of their supply of fertilizers and
spray materials and will make up
their orders for the amount required
to see them through the season.

You Can't Break This Hame Strap

The "Horsepower"
Hame Strap is one of
the famous Griffith
Chrome Leather
Harness Specialties.
More than twice as
strong as ordinary harness leather, and is
always soft and pliable. See it at your dealer's.
It has been tested 250% for sample (30c in the
West).

Using the Human Machine

Is It Kept Oiled and Clean and Used, Not Abused?

BY IDA S. HARRINGTON.

When "the forties" or even the thir-
ties, find a woman with the spring and
elasticity gone from her body, it nat-
urally suggests the question, "How
did it happen?" The home-maker her-
self will say, "Housework did it." The
physical culturist will say, "Lack of
proper exercise did it," and will pre-
scribe "daily dozens" and deep breath-
ing.

One flaw in the prescription lies in
the fact that any system of exercises
must be practiced regularly, as an
extra to the day's work, either in the
morning when one is hurried or in
the evening when one is tired. An-
other flaw lies in the fact that the
most conscientious followers of set-
ting-up exercises continue to do their
household tasks in the same hard old
ways. They see no relation between
physical culture and household routine.
Does it not suggest itself as com-
mon sense that the remedy for ills
that come from wrong posture lies in
making the physical tasks of house-
keeping a means of physical grace?

Posture. Perfect health is impos-
sible with poor posture. Unfortunately
these are two "wrongs" to choose from
and only one "right." The first
"wrong" is the slouching "self-pity"
posture. The shoulders are bent,
lungs cramped, head and abdomen
sagging. There is a general settling
of the body, suggesting the small
boy's query, "Mother, have you begun
to shrink yet? Grandma has!"

The excuses offered for this pos-

ture are, "I feel so tired all the time,"
and "my feet trouble me so." The wo-
man who maintains this posture is
hard to live with because she is so
sorry for herself. She has, indeed
"let down," mentally and physically.

The other "wrong" is the "Phar-
isee" posture. The form is held rigidly
erect, chest high, shoulders tense,
back scooping in at the waistline, toes
turning out, weight on inner edge of
feet. The mental attitude back of this
posture is, "Of course I'm tired, and
of course my feet ache but nobody
shall catch me slouching!" The woman
who maintains this posture is hard to
live with because her nerves are tense.
Her over-erect posture is the result
of will-power rather than vitality.

Both "wrongs" assign to the mus-
cles the work of holding the body up-
right. Right posture is a matter of
body balance, not of muscular effort.
Muscles are needed for other things
than maintaining the perpendicular.

Standing. With the best manage-
ment in the world a certain amount of
standing is unavoidable in the daily
routine. How do you stand? First,
measure yourself against the wall
(head, shoulders, and heels touching)
and see if you are as tall as you ought
to be. Next see whether you can be
tall without being tense. To make
this test, have the small of the back
as well as head and shoulders touch
the wall. If you have a bad case of
"swayback" you may have to move
your feet some distance from the wall
before the small of your back will
touch but little by little you can learn
to bring your heels nearer the wall
without hollowing the back, until they
actually meet. At first this will give
you a feeling of tilting forward but
it will help to balance you with your
weight on the balls of your feet.

Feet. How are your feet? Are you
entirely unconscious of them? If not,
is it because you have abused them?
No home-maker is any stronger than
her feet. To secure painless feet,
choose your working shoes with care.
A good shoe has a straight inner line,

and the height of the chair
should make it easy to rest both feet
on the floor. A good position is to
cross the feet so that both rest on
their outer edges. If it seems neces-
sary to cross the knees, at least make
it as little harmful as possible by
toeing in with the under foot and
resting it on its outer edge.

Lifting weights. How do you lift
weights? When the vacuum cleaner
must be moved where it cannot be
pushed, do you crumple up at the
waist line, start lifting with one side
of your body and, when the job is
half done, bring the other side into
play? Try bending both knees, hold-
ing the body easily erect, and use both
arms from the first moment you begin
to lift. This is the most revolutionary
of household exercises and will not
come at the first trial but it is worth
acquiring. It distributes the effort
of lifting. Furthermore, practice in
bending the knees while keeping the
body erect, with back and abdomen
flat, will help you to acquire body bal-
ance. Do you ever, in carrying a
heavy chair, support it with the mus-
cles of your abdomen, allowing your
arms to remain slackers? The pos-
ture that results is not only unlovely
but harmful. Make both arms help,
keep off your heels, don't screw up
your face and the task will be bene-
ficial rather than harmful.

Reaching. How do you reach? Do
you make it hard by standing a foot
or two away from that high shelf, set-
tling back on your heels, protruding
your abdomen and dragging your ribs
up with your arms as you raise them?
Or have you learned to make it easy
by standing squarely in front of the
shelf, keeping the body balanced and
raising only your arms?

Sleeping. How do you stoop? Is that
low oven a grievance or have you
made it a means of physical grace?
Does a look into the oven suggest a
crumpling up of your body and a rush
of blood to your head? Or do you
drop easily to one knee, do you keep
erect, do you go on breathing?

Scrubbing. How do you scrub a
table? With set jaw and tense fore-
arms, using a back-and-forth motion?
Or do you know that the scrub-brush
won't get away even if you hold it
lightly, that scrubbing in circles will
bring into play the ball-and-socket in
your shoulder which is there for a
purpose, that your jaw has nothing to
do with the case?

Resting as an investment. Have you
discovered that to postpone a five-
minute rest period when the body is
poisoned with fatigue is penny-wise
and dollar-foolish? Do you know that
real rest depends on three things:
change, fresh air and relaxation? Are
you disappointed in the results when
you "rest" by lying with set jaw,
frown on your forehead, thinking of
the jobs ahead and "supporting" the
bed instead of letting it support you?
Or have you learned to let go, to pre-

ROWENA

Mr. and Mrs. Peter Harkness and Mrs. Alex. Shaver spent Sunday evening with Mr. E. Shaver and family.

Mr. and Mrs. Ernest Marcellus spent Sunday evening with Mr. and Mrs. W. Seeley.

Mr. and Mrs. Milton Locke spent a couple of days last week in Iroquois.

A number from here attended the funeral of Mrs. Wm. Bouck of Haddo on Sunday.

M. and Mrs. Wm. Barclay, Mr. and Mrs. Donald Brouse were Tuesday guests of Mr. and Mrs. Milton Locke.

Mr. and Mrs. Ernest Marcellus attended the funeral of Mr. W. S. Daffoe of Third Avenue, Aultsville, on Thursday.

Mr. and Mrs. Wellington Seeley were guests of Mr. and Mrs. McKenzie Seeley on Friday.

Miss Lena Seeley and Miss Dorothy Smith, our "Normalites"

THE CONFEDERATION CANAL AND POWER COMPANY

NOTICE is hereby given that an application will be made to the Parliament of Canada at its next session for an Act to incorporate a company under the name of "Confederation Canal and Power Company," with a capital of five hundred million dollars, for the following purposes, viz.:

1. To acquire, purchase and take over all the works, rights, undertakings, property, assets and liabilities of The Transportation and Power Corporation, Limited (incorporated by letters patent under The Companies Act, Part I of chapter 79 of the Revised Statutes of Canada 1906 and amending Acts).

2. To construct, improve, maintain and operate a combined canal and ship channel or deep waterway, for the passage of ocean liners, from a point below the City of Montreal to the head of the Great Lakes, such channels and canals to be not less than 35 feet in depth, and of sufficient width to enable ocean liners to meet and pass at reasonable speed at any point. The route of the proposed canals and ship channels to be as follows, viz.:

(a) From a point at or near Charlemagne, in the County of L'Assomption, Province of Quebec, via Rivière des Prairies, Lake of Two Mountains, and the Ottawa River, to the City of Ottawa; thence via the Rideau River to Kemptonville Creek, in the County of Grenville; thence by construction of suitable canal to the St. Lawrence River at or near the town of Prescott; with power to construct all such works as may be necessary or incidental thereto. Included in the above will be the acquisition and enlargement of all existing canals along the said route, or the construction and operation of other canals suitable for their purpose in lieu thereof; or

(b) As an alternative route to the foregoing: To improve and make navigable for their purpose, the Richelieu River from a point at or near the City of Sorel, in the Province of Quebec, to Chambly Basin; to construct a suitable canal from the said basin to the east side of Hungry Bay, County of Beauharnois; to improve as far as necessary the channels in Hungry Bay, Lake St. Francis and the St. Lawrence River, to the Town of Cornwall, Ontario; to construct a suitable canal (or acquire and enlarge the Cornwall Canal), from Cornwall to Dickenson Landing, Ontario; to improve the channel of the St. Lawrence River as far as Farran Point, Ontario; to construct a canal or acquire and enlarge the existing canal at same point; to improve the channel of the St. Lawrence River from said point to Morrisburg; and to construct a canal or enlarge the existing canal at Morrisburg; to improve the St. Lawrence River channel to the Town of Iroquois, Ontario; there to construct a new canal or acquire and enlarge the Galop Canal.

To improve the St. Lawrence River channel from Iroquois or Prescott, as the case may be, to its source at Lake Ontario; and also the channel of the said lake to a point in the County of Lincoln, Ontario, on the south side of the said lake; thence to construct a canal through the Counties of Lincoln and Welland to Lake Erie; also a canal from Lake Erie at some point in or near the County of Elgin, Ontario, through the Counties of Elgin, Middlesex, Lambton and Huron, to a point on the east shore of Lake Huron, within the Counties of Lambton or Huron; also to construct a suitable canal or acquire and enlarge the existing canal, at Sault Ste. Marie, Ontario; with all powers which may be necessary and incidental to the construction, completion and maintenance of their said works.

3. To construct, acquire and operate and dispose of terminal, docks, warehouses, and such other works as may be necessary for their purposes; to acquire, generate and produce, hydraulic, electric or other power, and to dispose of their surplus energy and to construct and maintain transmission lines for the delivery thereof; to obtain franchises or contracts from municipalities; to construct and operate water works, power plants or tramways; and to acquire, lease or charter and operate vessels of all kinds.

4. To acquire by purchase or otherwise, or by expropriation under the provisions of The Railway Act, 1919, all lands, public or private, water lots and water rights as may be necessary for the construction and operation of their works.

5. To deal in lands on or near the banks of their canals and channel; to take stock in land companies in connection with such lands, and to guarantee their bonds; to issue bonds and debentures and to divide their works into sections for bonding purposes; and generally to have all powers necessary or incidental to their undertaking.

6. The works and undertakings of the company to be declared for the general advantage of Canada.

Dated at London, Ont., January 19, 1924.

J. M. McEVOY,
Solicitor for the applicants,
London, Ont.

spent the week-end at their respective homes here.

Mrs. Wellington Seeley and son Graham were the guests of Mrs. Richard Thompson, Stampville, on Monday.

Mr. and Mrs. John Reddick, Master George and Miss Ethel, and Mr. and Mrs. George Mullin were guests of Mr. and Mrs. Harry Smith on Sunday.

MOREWOOD

Mr. and Mrs. Wm. Countryman spent Friday at Chesterville.

Mr. and Mrs. Allan Swerdfeiger and children spent Sunday at Mr. Ernest McConnell's.

Mr. Cecil McConnell of the Bank of Nova Scotia, Kingston, is spending his holidays with friends here.

Mr. Emerson Swerdfeiger of Prescott is spending a few days at his home here before going to Massena.

Guests at Mr. W. J. McConnell's Sunday were Messrs. Colin MacGregor, Hugh Fetterly, Earle Gordon, Emerson Swerdfeiger, Cecil McConnell and the Misses Hilda and Pearl Swerdfeiger.

The Misses Margaret and Christina Coulthart spent the week end at Mrs. Milton Shaver's.

The young people of Morewood enjoyed a dance at Mr. W. J. McConnell's Monday night.

Miss Gladys Swerdfeiger spent the week end with Miss Margaret Carlyle.

Mr. and Mrs. M. Fetterly of Russell spent Sunday at Mr. Wm. Countryman's.

Mr. Ralph Allison spent the week end with his uncle at Smiths Falls.

Miss Eva Reveler returned home after spending the past week at Ottawa.

Mrs. David Nadeau of Crysler is visiting her son Mr. John Nadeau.

Miss Muriel Jobb spent the week end with Miss Effie MacGregor of Felton.

Mr. and Mrs. Samuel Barrington and son spent Thursday at Russell.

Messrs. Gordon Fraser, Oliver McRae, Grant MacGregor, Gerald Bouck, and Emerson Swerdfeiger attended the hockey match at Ottawa Tuesday night.

GRANTLEY

Mr. and Mrs. John Clark of Boucks Hill spent Sunday with Mr. and Mrs. Don Carr.

Mrs. Ed. Perrault and son John spent Sunday with Mrs. Geo. Baker Chesterville.

Mr. and Mrs. Alex. Taylor spent Saturday with Mr. and Mrs. Tom Swerdfeiger, Gallingtontown.

Mr. and Mrs. John Merkley of Nation Valley spent Sunday with their son, Mr. Wm. Merkley.

Mr. Milton Carr spent Sunday at the home of Mr. Alf. Wells, Aultsville.

Mr. and Mrs. Chas. McMillan and family spent Sunday at Mr. Wallace Myers.

Mrs. Martha A. Watson has returned to her home at Aultsville after spending two weeks with her niece Mrs. Milton Carr.

Mr. and Mrs. David Warner and daughter, Osnabruck Centre, spent a few days with friends here.

Mr. and Mrs. Bert McMillan spent Sunday with Mr. and Mrs. Wm. Hollister, Osnabruck Centre.

GLEN BECKER

Mrs. Cephrenus Shaughnessy and the Misses Greeta and Maud Colquhoun were guests of Mr. and Mrs. Charles Watson on Tuesday.

Callers at Mr. Willis Mattice's last week were Mrs. Mary Saddle-mire, Mr. and Mrs. James Merkley, Mrs. Allen Beckstead, Mrs. Merton Saddle-mire, Mrs. Frank Powell, Mrs. Albert Becker Boucks Hill, and Master Kermit Watkins, Iroquois.

Mr. and Mrs. Neal Hunter and children spent the 12th at Mr. Reuben Hunter's.

Mr. Isaac Hall spent Tuesday evening at Dalton Saddle-mires.

Miss Lila Saddle-mire spent last week end with Mr. and Mrs. Frank Merkley, Williamsburg.

Mr. and Mrs. W. S. White and Mr. and Mrs. Harold Coyle of Maria, town spent one day last week at Mr. W. Mattice's.

Mr. and Mrs. W. Saddle-mire spent part of Tuesday at Morrisburg.

Mrs. Thomas Casselman and Mr. Archie Casselman spent Friday of last week with Mr. and Mrs. D. Saddle-mire.

BRINSTON

Mr. and Mrs. Percy Hess, South Mountain, were guests at Harry Cook's on Monday.

Mrs. H. Wylie and son of Toy's Hill spent Saturday with her parents, Mr. and Mrs. Andrew Riddell.

Miss Phillips of Williamsburg spent Sunday at the home of Mr. and Mrs. John Adams.

We are glad to report Mrs. Arnel Johnston is able to be around again after her recent illness.

Mr. Thos. Hamilton received word on Monday of the death of his niece Miss Florence Bouck at Calgary, formerly of Mountain Station.

Mrs. Elizabeth Ennis is spending this week with friends in Mountain.

Nurse Strader returned to her home in Iroquois after spending the past week at H. A. Johnston's.

Mrs. Jos. Clow and Mrs. John Barkley spent Monday at Hainesville with Mr. Harvey Thompson and mother.

A number of ladies from town were entertained to a quilting bee at the home of Mrs. Jacob Bouck one day last week.

Mr. Thos. Hamilton is spending this week at Ottawa with his son Ernest, Mrs. Earl Merkley is attending to the Post Office during his absence.

Mr. and Mrs. Jas. Zeron of South Matilda visited town friends a couple of days last week.

The two Y. P. classes of this Sunday School were entertained at the home of Miss Beatrice Peterson on Saturday evening.

Worry is only Fear Fear of Self—Fear of Others— Fear of the Future

AND what is the cause of worry? Lack of nerve force, energy, vigor. The man or woman who has good health and is living a full, successful life does not worry.

It is when the nervous system gets run down that worry comes to sap vitality from your body and to torment your mind.

There is not much use in advising one not to worry unless you can also offer some means of restoring the depleted nervous system.

The most rational and most successful treatment available to all is Dr. Chase's Nerve Food.

It is popular because it does not merely afford temporary relief but gradually and certainly restores vitality to the run-down nervous system.

Dr. Chase's Nerve Food can make a better human being of you, mentally, physically—everyway.

The benefits felt will be in the way of new energy, new vigor and confidence.

The futility of worry will dawn on you and you will be able to see the bright and hopeful side of the future.

You will realize that you have the reserve force necessary to withstand the strain of life's work and ward off disease and discouragement.

But do not expect this change in a day. Some perseverance is necessary on your part.

The reconstructive process is slow but certain. The depleted nerve cells must be nourished back to health.

You will soon notice signs of improvement which will encourage you to keep up this treatment until the desired results are obtained. The important part is to get the building-up process started now—to-day.

You will notice that while the price of Dr. Chase's Nerve Food has been increased to 60c. the box now contains 60 pills instead of 50 as formerly.

Likewise Dr. Chase's Kinney-Liver Pills are 35c. for 35 pills, instead of 25c. for 25 pills. Edmanson, Bates & Co., Ltd., Toronto.

OUR CORRESPONDENTS

WILLIAMSBURG

Mr. and Mrs. C. W. Norval and Miss Amanda Robson spent a couple of days last week in Ottawa.

Messrs. John F. Casselman, Angus B. Strader and Guy Strader were in Ottawa this week attending the hockey match between Ottawa and Montreal.

Mrs. Chas. Phifer spent Wednesday of this week with Mr. and Mrs. Rob. Merkley.

Mrs. Ella Froats is spending a couple of days this week in Boucks Hill with Mr. and Mrs. Johnny Barkley.

We are glad to report Mr. Johnny Barkley convalescing after his recent serious illness.

Mr. P. B. Fetterly of London, Ont. Mr. and Mrs. Eddie Whittaker and Mrs. Hugh McIntosh were guests of Mr. and Mrs. Frank Casselman this week.

Mrs. J. D. Beckstead and Mr. and Mrs. George Beckings of Ganungue were guests at Sunny Brook Tuesday of this week.

Mrs. George Strader spent last week in Chesterville with her parents, Mr. and Mrs. C. Merkley.

Mrs. George Shannette spent a few days this week with her daughter, Mrs. Gilbert Beckstead.

Mr. and Mrs. J. C. Fetterly and little June Fetterly spent last week end with Mr. and Mrs. Jacob M. Garlough.

Mrs. R. C. Casselman spent last Thursday with Miss Julia Hollister.

Mr. Isaac J. McIntosh and family have left our village and moved on their farm this week.

Mr. and Mrs. Ernie Shannette spent Tuesday of this week with the latter's parents, Mr. and Mrs. A. Reddick.

Miss Catharine Barkley of Dunbar spent last week with Mr. and Mrs. Ora McIntosh.

Mrs. W. B. Colles and little daughter Betty were called to her home in Chatham last Saturday on account of the death of the former's mother. The many friends of Mrs. Colles extend sympathy in her sad bereavement.

The neighbors of the Whittaker Bros. are enjoying "listening in" on their radio these evenings.

Mrs. John Hanson spent a few days recently in Morrisburg with her mother, Mrs. E. P. Foster.

Mr. Edgar Algire and children spent last Saturday at the home of Mrs. Mary Shannette.

Mr. and Mrs. Fred Cunningham and baby were guests at the former's parental home recently.

Mr. and Mrs. Isaac J. McIntosh and children spent last Sunday with Mrs. Sanna Merkley.

CHURCH ROAD

Mr. and Mrs. William Dafee and two sons were recent guests at Mr. Sydney Dafee's East Williamsburg.

Mr. and Mrs. Jas. Rice spent one day last week with friends here.

Mr. Ralph Swerdfefer is on the sick list.

Mr. and Mrs. W. Murray Styles spent Sunday with Mr. and Mrs. R. J. Swerdfefer.

Mr. and Mrs. R. Mattice were Sunday guests at Mr. Sam Swerdfefer's.

Messrs. Styles and Swerdfefer unloaded a car of feed on Monday.

Mr. Frank Wells of Hoasic was a caller at Mr. Lucius Froats' Tuesday.

Mr. J. Duvall and family have moved back to their farm at Pigeon Island.

FROATBURN

Born—To Mr. and Mrs. Grant Tupper, on the 10th, a daughter.

Mr. and Mrs. Ernie Styles spent Sunday at Mr. J. Swerdfefer's.

Dr. Locke passed through Froatburn on Wednesday.

We all welcome Mr. and Mrs. Geo. Dillabough to our midst.

Mrs. Harry Bowman is spending a few days at her parental home in Froatburn.

Mr. Grant Tupper and Mr. William Beckstead called at Mr. Bill Henophy's on Tuesday.

Mr. and Mrs. Milfrid Swerdfefer and Mr. and Mrs. Jacob Swerdfefer and Mr. and Mrs. R. Swerdfefer were recent callers at Mr. Gilbert Beckstead's.

Mr. and Mrs. Roy Schell spent Monday evening at Mr. Stanley Forward's.

Messrs. Ross Schwerdfeger and Murray Styles unloaded a car load of feed this week.

Mr. and Mrs. W. Beckstead spent Tuesday at Mr. Grant Tupper's.

Mr. Lagora Millward and Mr. Jacob Swerdfefer spent Monday in Morrisburg.

ARCHER

Mr. and Mrs. Percy J. Pruner and family and Mr. and Mrs. Neil Bodette of Nudell Bush spent Sunday with Mrs. H. S. Weagant and family.

Mr. H. G. Weagant of Massena, N. Y., spent Sunday with his family here.

Mr. and Mrs. Broder Millward and children of Riverside spent Monday with Mr. and Mrs. Nelson Pruner.

Miss Helen Ellis spent Wednesday evening last with Miss Clara Baker.

Mr. and Mrs. Isalah Fetterley and daughters, Mrs. John Wells and Master Trevor and Mrs. William Dafee spent Monday with Mr. and Mrs. C. Baker and family. They were accompanied home by Mrs. C. Baker who intends staying a few days.

Mr. Maurice Pruner of Aultsville is working at Mr. Roy Cunningham's.

ham's for a few days.

Mrs. Henry Heagle and son Elmer were in Aultsville on Monday.

Mrs. Walton Baker of East Williamsburg called at Mr. C. Baker's on Tuesday afternoon.

Mrs. Herbert A. Gallinger and son, Bernice spent Tuesday afternoon in Aultsville.

Mrs. Clarence Baker and daughter, Miss Clara, spent Thursday last at "Hedge Mount Farm", East Williamsburg.

Messrs. Robert Shaw and Ralph Cunningham were in Aultsville on Tuesday.

MARIATOWN

Mr. and Mrs. Harold Coyle visited Mr. and Mrs. Willis Mattice, Glen Becker, this week.

Mrs. J. Watkins and daughter of Iroquois spent the week end with Mr. and Mrs. Harold Coyle.

Mr. Earl Carter was a caller at Mr. and Mrs. Colin Carter's, Sunday.

Mr. and Mrs. H. D. Swerdfefer spent Saturday with Mr. and Mrs. M. A. Swerdfefer, Cardinal.

Mrs. R. C. McVey had the misfortune to break her left arm on Saturday. We are pleased to learn that Mrs. McVey is getting along very nicely.

Mr. and Mrs. William Dafee and family of Froatburn were visitors at Mr. and Mrs. J. H. Froats' Thursday.

Mrs. William Gordon of Morewood visited a couple of days this week with her daughter Mrs. R. C. McVey. Master Gordon McVey accompanied her home on Thursday.

Mr. and Mrs. H. D. Swerdfefer spent a couple of days this week with Messrs. Howard and Arthur Bell, Brinstons.

Visitors this week at Mr. and Mrs. J. F. Beckstead's were: Mr. and Mrs. F. Stewart, Morrisburg, Sunday tea, and Mr. and Mrs. Jas. Seeley, Iroquois, Tuesday.

Mr. and Mrs. Floyd Merrell of Dundela spent Sunday with Mr. and Mrs. Harvey Duvall.

Mr. and Mrs. C. Bouck spent Sunday with Mr. and Mrs. J. Zeron.

Mrs. J. F. Beckstead attended the quilting at Mr. James Gillespie's, Morrisburg, Wednesday.

CEDAR GROVE

Mr. and Mrs. Colin McMillan and baby are spending a couple of weeks with friends in Cornwall.

Miss Ethel Copas spent the week-end with Mr. and Mrs. Stuart Wier, Farrans Point.

Mrs. Short of Morrisburg is spending some time with her niece, Mrs. Geo. Hall.

Mr. and Mrs. Oscar Lane and daughter, Keitha and Jean spent Saturday with Mr. and Mrs. Jesse Casselman, Riverside.

Mr. and Mrs. Robert Dafee visited Mr. and Mrs. S. Dillabough, Aultsville, on Saturday.

Mrs. Melissa Hollister and daughter, Lena of Ottawa spent a few days last week with friends in the Grove.

Miss Nellie Stacey of Iroquois spent the week-end with Mrs. W. T. Dafee.

Mr. and Mrs. Fred Dafee and daughter Greta and Mr. and Mrs. Percy Pier visited Mr. and Mrs. Fred Cunningham, Archer, on Sunday.

Messrs. Lyn Pitts and David Gallinger of Cornwall were recent guests of Mr. and Mrs. Robert Dafee.

Mrs. Geo. Countryman and son Milton of Bush Glen were guests of Mrs. W. T. Dafee on Saturday.

Mr. Harold Buchanan has rented the late Mrs. Gove's farm for the coming year.

Mr. and Mrs. Jack McConnell and Mr. and Mrs. R. F. Gallinger and Miss Fern visited Mr. and Mrs. Frank McConnell on the 6th.

Mr. and Mrs. Stanley Dafee and daughter, Mary, of Aultsville, and Mrs. Wm. Boats of Sandtown have returned to their homes after spending the past month in the Grove.

The saying "In the midst of life, we are in death" was forcibly brought to our minds on Tuesday, when Mr. Wm. T. Dafee was called home. Mr. and Mrs. Dafee, accompanied by Mrs. Geo. Dafee, returning home from a Ladies Aid meeting when Mr. Dafee complained of a severe pain in his head and became unconscious passing away about an hour later. Mr. Dafee was 68 years of age. He was a man of sterling qualities, and his genial manner had won for him a host of friends by whom he will be sadly missed. Besides an aged mother, Mrs. Sarah Dafee, he is survived by his wife, one daughter, Mrs. Garnet Grigg of Blucher, Sask., and two sons, Lloyd of Eatonia Sask., and Frank at home; also one sister, Mrs. Melissa Hollister of Ottawa; and three brothers, Chas. F. and Geo. S. of Aultsville and Allan of St. Paul, Minn. His pastor, Rev. A. W. Stewart conducted the funeral service at the home on Thursday. Interment in Aultsville cemetery.

Many beautiful floral offerings were placed on the casket.

EAST WILLIAMSBURG

A very pleasant evening was spent one day last week at the home of Mr. Milton Castleman's the evening was spent in games and dancing music being furnished by Mr. Ralph Summers, Farrans Point.

Mr. and Mrs. Charlie Edwards spent a few days last week at Montreal.

Mrs. Zeron of Osnabruck Centre has been attending her daughter, Mrs. Harvey Wells, who has been ill.

Mr. Willie Naidow of Cornwall spent the week end at his parental home.

Mr. J. Wallace of Cardinal spent Monday evening with his friend Mr. Willis Dennison.

Mr. and Mrs. Walter Watson and sons Basil and Winston spent Monday with friends at Finch.

Mr. Lyman Ault, Finch, spent Thursday last with his sister.

MENDELSSOHN CHOIR OF TORONTO AC- CLAIMED AS FINEST IN THIS HEMISPHERE

A despatch from Philadelphia says:—Once more the mighty Ninth Symphony of Beethoven conquered on Thursday night in what was undoubtedly the finest performance of it in Philadelphia for 25 years. This result is due to the combination of the finest chorus in the Western Hemisphere and the finest orchestra, under a leadership which was little short of inspired—and the Ninth demands all three if it is not to become monotonous. The novelty was the work of the Mendelssohn Choir of Toronto, which furnished the choral section.

There can be no question that this is the finest choir on this continent to-day. The singers who came to Philadelphia numbered 234, but apparently every one was a picked voice;

there was no "dead wood" in the organization which sang Thursday evening. They sang perfectly, and that is all that need be said as to the general performance. Larger choral organizations have appeared here, but none so perfect in every detail of singing as this one. In quality of voice, balance of parts, shading, above all, volume when required, instant response to the leader, whether it was Mr. Stokowski or Mr. Fricker, unanimity of dynamics and all of the thousand and one other details which go to make up perfect choral singing, the Toronto organization is at the very top.

Here is a chorus which can really sing the Ninth Symphony, and nothing more need be said.

MINERS VOTE DOWN WAGE SETTLEMENT

Nova Scotia Coal Districts Threatened With Trouble Following Repudiation.

A despatch from Halifax says:—The coal miners of Nova Scotia voted almost two to one in Thursday's referendum against the new wage scale negotiated last month at Montreal between the representatives of District No. 26, United Mine Workers, and the British Empire Steel Corporation. The vote was 5,617 against and 3,145 for ratification of the new scale, totalling 8,762.

The repudiation of a contract carrying with it an increase in wages, negotiated by the responsible officials of the district and the international representatives, has created a situation that is without parallel in the history of the United Mine Workers' Association.

The Provincial Executive will place the matter before President Lewis and the International Executive Board at once.

Mustafa Kemal Pasha

Who is first President of the Turkish Republic, and has abolished the religious system of the Ottoman Empire.

Paris Plans to Honor Heroes of Seine Floods

A despatch from Paris says:—This year's Seine flood provided Paris with a little known epic, but none the less heroic, comparable with the legend of the Dutch boy who plugged a hole in the dike with his thumb. The French heroes were two husky laborers, Beraud and Regnier, who, when the Seine embankment collapsed, letting the water in to the tunnel of the Invalides Railway, worked for twenty-eight hours running, carrying 100-lb. sacks of sand to build a new rampart, preventing damage to adjoining property which would have cost millions of dollars.

Beraud was dragged from his post half asleep and Regnier collapsed while arguing with his comrades to keep the work going. He died in hospital. The Municipal Council has proposed a gold medal for Beraud and a pension for Regnier's widow.

British Village Smith Must Change His Ways

A despatch from London says:—The village smith, according to no less an authority than the Rural Industries Intelligence Bureau, will soon be down and out unless he adopts modern methods.

"The smith," says Mr. J. Wedgwood, secretary of this bureau, "those at least, who try to make their living by shoeing horses, are dying out. The wheelwrights are in even a sadder plight."

"We are endeavoring to show the blacksmith how he can extend his trade. What we feel is that as the age is getting more and more mechanical, so village mechanics ought to be getting busier and more numerous, rather than dying out. The motor trade is putting horsed traffic into the background, but the employment of power and mechanical appliances by the agriculturist is also greatly on the increase."

Reports to the Dept. of Lands and Forests for Quebec state that the recent snowfalls have changed activity in lumber camps from cutting to the hauling of timber, which is available in large quantities. It is estimated that the lumber cut this year will be a record one.

No More Crests on Britons' Passports

A despatch from London says:—Day by day the slump in the picturesque, due to the retirement of the Tories and the coming into the office of the Labor Party, becomes more apparent.

For years the ordinary Briton, faring forth to the Continent or to the ends of the earth, felt, when he looked at his passport, that he was going on the grand tour, for did his passport not begin with these grand, rolling words: "We, George Nathaniel, Marquess Curzon of Kedleston, Viscount Scarsdale, Knight of the Most Noble Order of the Garter, Knight Commander of the Most Exalted Order of the Star of India, etc., etc., request and require, in the name of his Majesty, all those whom it may concern to allow Mr. Blankety-Blank-Blank to pass freely, without loss or hindrance, and to afford him every assistance and protection of which he may stand in need."

The passport was signed "Curzon of Kedleston" and ornamented with a beautiful print of his arms, with the motto, "Let Curzon holde what Curzon helde"—altogether an impressive tout-ensemble.

But Curzon, no longer holding what Curzon helde, a new name appears on British passports, without arms, motto or honors, except that its holder is "a member of His Britannic Majesty's Most High Privy Council."

Thus the old order passeth.

Trains to be Ferried Across the North Sea

A despatch from London says:—The first North Sea train ferry will commence operating about March 15. This long-heralded project which, it is argued, should in expanded form make the proposed Channel tunnel less of a need, will connect Harwich on the English coast with Zeebrugge in Belgium. The distance is eighty-four miles, and the voyage will require nine to ten hours.

The ferryboats, of which there will be three to start with, can each accommodate fifty-four of the short European type of freight cars.

It is estimated that the cost of loading the boats will be about \$1 per ton, instead of \$3 to \$5 per ton, when the contents of each individual freight car have to be transferred between train and boat.

The principal goods reaching England through Harwich at present are vegetables and dairy produce. The cheaper transport should make some difference in prices because of bringing perishable goods to the markets in fresher condition.

Rural Mansions Become Hives of Small Homes

A despatch from London says:—A new use for English country mansions, which rapidly are becoming a drug on the real estate market, due to the inability of present-day owners to find means to keep up these homes in style, is forecast by an experiment being tried out in Rolleston Hall, the fine baronial mansion near Burton-on-Trent.

A syndicate which has purchased the former consists mostly of old families, and as Rolleston is situated in the heart of the Meynell hunting country, plans are being made to convert the hall into six separate houses.

The partitioning, which is unprecedented in the case of such a palatial mansion, will be carried out vertically and not horizontally, resulting in reconstruction into houses and not flats.

Ancient Cornish Tongue May Sound Once Again

A despatch from London says:—A seventh language will be added to the collection of distinct languages, aside from dialects, now spoken in the British Isles, if the effort being made to revive the use of Cornish as a living tongue is carried out successfully.

It was generally believed that the language formerly spoken in Cornwall, the most southwesterly county of England, had died out, but speakers at a meeting of the London Cornish Association, held here, claim it is still used in remote parts of the county, and steps are being taken to develop it.

The languages already spoken in the British Isles are, aside from English, Irish, Scottish, Welsh and Manx—spoken on the Isle of Man—and the old Norman French, spoken on the Channel Islands.

The Prince of Wales makes his first appearance since he was thrown from his mount, on the occasion of a benefit football game between Oxford University and the Tottenham Hotspurs.

SMALLPOX CLAIMS TWO MORE VICTIMS

Amherstburg Man and a Baby Die—No New Cases in Windsor.

A despatch from Windsor says:—Two deaths from smallpox were reported at Amherstburg, the victims being a 14-months' baby and Adolph Shaw. No new cases were reported in this city for the past 24 hours and health officials are inclined to take a more optimistic view of the situation.

A despatch from Chatham says:—A case of smallpox has developed in Raleigh Township according to Dr. J. C. Bell, health officer for the township. The Health Board of the municipality held a meeting at Merlin at which strict measures were decided upon. The case is said to be of a malignant type.

British Soldiers' Bodies Still Found in France

A despatch from London says:—According to the report of the Imperial Graves Commission for 1922-1923, bodies of British soldiers are still being found along the western front, where the fiercest fighting took place during the war. Since November, 1921, 6,107 isolated bodies have been discovered and reburied in cemeteries, 1,054 being identified at the time, but others were identified subsequently here through a study of the effects found with the remains.

The number of these bodies found is decreasing, but they still are discovered in the Ypres salient, on Vimy Ridge and in the Somme, particularly in the regions of Thiepval, Mouquet farm, Delville and Hangard wood. More are expected to turn up when the French have cleared Bourdon, Trones and High Woods, at present impenetrable on account of the dense undergrowth and the presence of considerable quantities of unexploded ammunition.

Ancient Shrine of St. Alban Found in Danish Village

A despatch from London says:—A recent despatch from Copenhagen tells of the discovery of the remains of an ancient shrine in the village of Tjaerborg, near Eesbjerg, dedicated to St. Alban. The frontispiece of the shrine is richly ornamented with allegorical carvings of the Charlemagne period.

The shrine is believed to have been taken to Denmark by the Danish Vikings, to pass into private possession early in the seventeenth century.

New records have been set up in the production of raw material from the forests of British Columbia during the past year. It is probable that the mills will be found to have produced the largest amount of lumber yet recorded in the history of the province. The total amount of timber scaled in the province last year was 2,542,280,000 feet, as compared with 1,899,158,000 feet in the previous year.

Here are two of the models which will be used in the miniature naval battle to be fought in tanks at the British Empire Exhibition. The modern model is H.M.S. Vindictive of Zeebrugge fame.

ANCIENT EGYPTIAN SACRIFICE OFFERED AT TOMB OF TUTANKHAMEN

A despatch from Luxor, Egypt, says:—The re-opening of the tomb of Tutankhamen on Thursday for inspection by some 200 visitors, guests of the Egyptian Government, was preceded by the picturesque ceremony, following the custom in the days of the Pharaohs, of sacrificing two bulls in the centre of the tomb. The first party, made up of Ministers and high officials, were present.

Thousands of natives and sheiks, in gorgeous costumes, crowded the gaily beflagged streets, singing to the accompaniment of Egyptian instruments. After the sacrifice the Government party was entertained by feats of horsemanship performed by the sheiks.

The whole party, including the foreign diplomats, members of Parliament and Commissioner Allenby, were then taken across the Nile on a Government steamer and to the

Valley of the Kings in automobiles through a road lined with soldiers. After refreshments served in a big tent, groups of eight entered the tomb, where the lid of the sarcophagus had been removed since the Egyptian Government took charge of the tomb. A large platform was erected, from which the visitors had an excellent view of the gold-covered figure of the Pharaoh.

Neither Howard Carter, the chief excavator, nor any of his staff was present at the ceremony, which was superintended by Prof. Lacau, the French Egyptologist, and the Egyptian Minister of Works.

The tomb will now be closed until March 10, when it will be reopened for ten days to permit the public to inspect it. The guests were given a banquet here on Thursday night, which was followed by an Egyptian fete and a fireworks display.

RACE FOR POSITION OF MOSLEM LEADER

King Hussein of the Hedjaz, Descendant of Prophet, Choice of Arabians.

A despatch from London says:—Because of the direct descent of King Hussein of the Hedjaz from the Prophet Mohammed and other favoring factors, his designation as Caliph by the Arabs of his Kingdom and the Moslems of Mesopotamia and Trans-Jordan, ruled by his two sons, is regarded by British observers as likely to find acceptance in a large part of the Islamic world.

Not all of Islam is considered well disposed toward the Arabian Monarch, however, and a bitter contest between the Arabian Moslems and some other sections of the faithful over the mantle of the Prophet is looked for in many quarters.

The first sign of a split in the Oriental world was seen here in the order of the Angoran Government warning the Turks against pilgrimages to Mecca and Medina, in Hussein's dominions, because it was declared they might be in great danger there.

As far back as 1915 the British Government informed Hussein that it would not view his elevation to the Caliphate with displeasure; that it believed he would be acceptable to 70,000,000 Moslems under British tutelage in India.

A despatch from Geneva says:—Abdul Medjid, the deposed Caliph of Turkey, accompanied by his family, arrived on Friday night at Territet, on the north shore of Lake Geneva.

Sections of Derbyshire and Nottinghamshire feel quake. An earthquake shook large sections of Derbyshire and Nottinghamshire Thursday night and early Friday without, however, any appreciable damage being done.

The tremors shook the whole Alfreton district of Derbyshire, shortly before eleven o'clock Friday night. House furnishings were rocked by the shocks and the alarmed inhabitants rushed into the streets. Shocks also were felt early on Friday in northern Nottinghamshire.

At Sutton in Ashfield chimneys were toppled over by the tremors. A policeman at Mansfield declared his house shook so much he was nearly thrown from his chair.

Uncle Sam Seeks to
Bar Canadian Wheat. A despatch from Washington says:—An increase of 12 cents a bushel in the tariff rate on wheat was ordered on Friday by President Coolidge.

Acting under the flexible provision of the tariff act and on the basis of the tariff commission's recent inquiry, the President at the same time ordered an increase of 26 cents a hundred pounds in the duty on wheat flour and a decrease of 50 per cent. on the ad valorem rate on mill feeds.

A school for bakers is to be erected in connection with the Ontario Agricultural College, Guelph. The building is to be erected by the Bread and Cake Bakers' Association of Canada, and building operations are expected to commence early in the spring.

British Doctor Sees No
Hope for Fat Persons. A despatch from London says:—"If you're fat and can't get thin there's no help for you." That is the verdict of Dr. Edwin Lancelot Ash, who holds that week-end golf will not provide an antidote for middle-aged persons inclined to grow stout. But a certain amount of fat before an individual is 60, Dr. Ash contends, is a reserve in case of sudden strain or illness, though, in his view, it is better to be thin after 60.

"There is fallacy in the idea that health is a matter of feeling well," Dr. Ash insists. "One very seldom comes across a man or a woman who says he or she is thoroughly well; and, curiously enough, even the physically well often are troubled with some nervous or mental ailment." The doctor says walking is the best form of exercise.

Greater Toronto has a population of 709,000. Toronto proper has a population of 634,225. These figures were prepared by the publishers of the Toronto directory and, according to the same authorities, this city, in 1922, had a population of 627,520 and the suburbs 62,568. The increase in the suburbs for 1923 is just about double what it is in the city proper.

The Week's Markets

TORONTO.

Manitoba wheat—No. 1 Northern, \$1.13½; Manitoba oats—No. 3 CW, 46c; No. 1, 45c. Manitoba barley—Nominal. All the above, c.i.f., bay ports. Ontario barley—65 to 70c. American corn—No. 2 yellow, 98½c. Dressed poultry—Spring chickens, 4 lbs. and over, 30c; chickens, 3 to 4 lbs., 25c; hens, over 5 lbs., 28c; do, 4 to 5 lbs., 24c; do, 3 to 4 lbs., 18c; roosters, 18c; ducklings, over 5 lbs., 24c; do, 4 to 5 lbs., 25c; turkeys, young, 10 lbs. and up, 32 to 35c; geese, 22c.

Beans—Can. handpicks, lb., 7c; primes, 6½c. Maple products—Syrup, per imp. gal., \$2.50; per 5-gal. tin, \$2.40 per gal.; maple sugar, lb., 25c.

Honey—60-lb. tins, 11 to 11½c per lb.; 10-lb. tins, 11 to 12c; 5-lb. tins, 11½ to 12c; 2½-lb. tins, 12½ to 13c; comb honey, per doz., No. 1, \$3.75 to \$4; No. 2, \$3.25 to \$3.50.

Smoked meats—Hams, med., 24 to 25c; cooked hams, 35 to 37c; smoked rolls, 17 to 18c; cottage rolls, 19 to 21c; breakfast bacon, 23 to 26c; special brand breakfast bacon, 28 to 30c; backs, boneless, 28 to 30c.

Cured meats—Long clear bacon, 50 to 70 lbs., \$13.50; 70 to 90 lbs., \$13; 90 lbs. and up, \$17; lightweight rolls, in barrels, \$37; heavyweight rolls, \$32.

Lard—Pure tierces, 14½ to 15c; tubs, 15 to 15½c; pails, 15½ to 16c; prints, 18 to 18½c; shortening tierces, 14½ to 14¾c; tubs, 14 to 15c; pails, 15 to 15½c; prints, 17 to 17½c.

Heavy steers, choice, \$7.50 to \$8; butcher steers, choice, \$6.75 to \$7.75; do, good, \$6 to \$6.50; do, med., \$5 to \$5.75; do, com., \$4.50 to \$5; butcher heifers, choice, \$6.75 to \$7.50; do, med., \$5 to \$5.75; do, com., \$4.25 to \$4.75; butcher cows, choice, \$4.75 to \$5.05; do, med., \$3.50 to \$4; canners and cutters, \$1.25 to \$2.00; butcher bulls, choice, \$4.25 to \$5.25; do, com., \$2.00 to \$3.00; feeding steers, good, \$5.50 to \$6.50; do, fair, \$4 to \$5; stockers, good, \$4 to \$4.75; do, fair, \$3.50 to \$4; milkers and springers, \$80 to \$120; calves, choice, \$10 to \$12; do, med., \$8 to \$10; do, com., \$5 to \$7; do, grassers, \$3 to \$4.50; lambs, choice ewes, \$14 to \$15; do, bucks, \$12 to \$14; do, fat, head \$4 to \$4.50; do, culls, \$7 to \$8; she light ewes, \$7.50 to \$8.50; do, culls, \$2 to \$3; hogs, fed and watered, \$8.25; do, f.o.b., \$7.75; do, country points, \$7.50; do, selects, \$9.05.

MONTREAL. Oats—Can. West. No. 2, 55c; do, No. 3, 53½c; extra No. 1 feed, 51½c; No. 2 local white, 50½c. Flour—Man. spring wheat pats., 1sts, \$6.30; do, 2nds, \$5.80; strong bakers, \$5.60; winter pats., choice, \$5.65 to \$5.75. Rolled oats—bag of 90 lbs., \$2.05. Bran—oats—Bag of 90 lbs., \$3.05. Bran—\$28.25. Shorts—\$30.25. Middlings—\$36.25. Hay—No. 2, per ton, car lots, \$16.

Butter, No. 1 pasteurized, 41½c; No. 1 creamery, 40½c; 2nds, 39½c. Eggs, fresh extras, 37c; fresh firsts, 35c. Potatoes, per bag, car lots, \$1.55 to \$1.60. Com. dairy type cows, \$3 to \$4; canners, \$1.50; com. bulls, \$3 to \$3.25; real good calves, \$9.50 to \$10; do, mixed lots, fairly good quality, \$8.50 to \$9; hogs, thick, smooths, and shops, \$8.25 to \$8.50.

NERVES RESTORED HEADACHE GONE

A Grateful Letter From a Well Known Vancouver Nurse.

"In the summer of 1922," says Mrs. Mary Hill, of 31st Avenue West, Vancouver, B.C., "I became very anxious about my young daughter's health. She was attending a commercial school, and between her close study and exceptionally hot weather she became very much run down. I noticed that she looked white and seemed constantly tired, was depressed over her studies, and irritable and peevish about the house. I got several tonics I had heard well spoken of, but they did not seem to help her. At this stage an advertisement of Dr. Williams' Pink Pills, telling of a similar case, was brought to my attention, and I decided to give this medicine a trial. You may judge of my surprise and delight when I noticed an improvement in her condition, almost before the first box was finished. She continued taking Dr. Williams' Pink Pills for some time, gaining in health and strength. Her headaches, backaches and depression disappeared, and she again looked well and happy. She has since, I am glad to say, kept perfectly well and passed her examinations with credit."

"I must have worried more than I knew over my daughter's health, for though I have earned my living as a maternity nurse for the past 12 years, even the most trying cases did not seem to exhaust me until last fall, when I seemed to give out suddenly. I became so nervous that I had to decline work, and I suffered from headaches and a constant feeling of depression. I attributed my condition to the fact that I was entering a critical time of life. It was my daughter who suggested that Dr. Williams' Pink Pills might do me as much good as they had done her, and after a faithful use of them for a time this proved to be the case. My nerves regained their steadiness, and my general health improved so much that I felt able to undertake my nursing duties again. I have taken the pills occasionally since, and thanks to them have been able to stand the strain of my work splendidly and still feel as well as ever. I am very grateful to Dr. Williams' Pink Pills and am thankful to have found such a reliable medicine for use in my home, and I can conscientiously recommend it to any suffering woman or coming under my care or influence."

You can get these pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Nothing New.

"Government scientists have succeeded in constructing a scale that records one-billionth of a pound."

"Old stuff. My coal dealer's been using one of 'em right along."

THE REASON FOR ALUMINUM.

Because tea deteriorates very rapidly if exposed to air many tests and experiments have been made to find an efficient means of packing it so as to preserve the flavor. The "SALADA" Tea Company first used lead packages but some years ago adopted aluminum foil, aluminum being more durable and lighter than lead, besides, of course, being absolutely sanitary and air-tight. This method of packing is admitted to be the most effective known to preserve the flavor of tea. All "SALADA" is sold in air-tight aluminum packages.

From Farm to Premiership.

The genial Prime Minister of New Zealand, Mr. Massey, can look back upon a remarkable career, for he began his career as a farmer.

An Ulsterman by birth, Mr. Massey started farming at the age of fourteen in his adopted country, where he joined his parents, who had gone there as settlers.

Mr. Massey tells the story of a man who, denouncing politics to a friend, declared that he would sooner put up for the local assembly than for the House of Commons.

"Yes," said his friend, "and you would stand a better chance of getting in."

Young Men and Women

Who may be afflicted with pimples and blackheads or any other facial blemish or skin trouble, are invited to write us. For 32 years we have been successfully treating Skin, Scalp, Hair and Complexion Troubles, including Superficial Hair, Moles, Warts, etc. We manufacture the Princess Toilet Preparations. Booklet "K" mailed free.

HISCOTT INSTITUTE LIMITED
610 College St., Toronto

Surnames and Their Origin

ROPER

Variations—Corder, Cordier, Corday. Racial Origin—English and French. Source—An occupation.

Roper is a common name in this country. But few persons, perhaps, realize that it is exactly the same name as that born by the Charlotte Corday of historical fame.

Like Cooper, Tupper and other family names of similar classification, it took its origin in the description of the original bearers' profession.

In England of the Middle Ages the use of the termination "er," a relic of the ancient Teutonic "were," meaning "man," was much more prolifically used than it is to-day. The man who made an article, or who worked with an article, was described quite regularly by the addition of "er" to that article. So, where we would speak to-day of a ropemaker the medieval English called him a "roper," or a "corder" if they used the Norman-French word, though sometimes he was also known as a "cordwainer."

As the French language developed on the continent the tendency was to insert an "i" before this termination "er," thus giving the form "cordier." And, in time, as the pronunciation of the final "er" changed in French from what it remains in English to-day to "ay," the name came to be pronounced "corday." The family name of Corday, then, is simply explained as an occasional local variation of "simplified" pronunciation and spelling.

Good-Bye to Oxfordshire.

Good-bye to England—land of little towns

And a great history. Good-bye, sweet lanes

Full of bright angel children, and old men, Ruddy and gentle; and the oaks and beeches,

Elms that engulf a hamlet in the sky, Majestic, beautiful, benignly towering Over a tiny green and grassy vill—

Thatched and depressed with ivy and the beehives—

And infant shops with Lilliputian toys, Odd nothings sold for a penny with a smile,

From clean bowed windows out of wonderland.

These are her jewels, these small sacred towns,

Unique in the universe! These miniatures,

Initials on a mediaeval text, Brilliant as Chaucer's death-defying page,

Enrich the map of England. Such she was,

Is, and shall be, whatever else the fates,

Conspiring in their gloomy cavern, threaten,

Or the dark skies forecast, or foes at home—

Enemies, or the Avengers of the world—

Wreak on her distant realms through peace or war.

—John Jay Chapman.

STOMACH MISERY, GAS, INDIGESTION

"Pape's Diapepsin" is the quickest, surest relief for indigestion, gases, flatulence, heartburn, sourness or stomach distress caused by acidity. A few tablets give almost immediate stomach relief. Correct your stomach and digestion now for a few cents. Druggists sell millions of packages of Pape's Diapepsin.

Sing That Cold Away.

Singing is one of the best preventives of a cold.

The common cold, as most people are aware, is an inflammatory condition of the lining of the upper respiratory passages. Though disease germs are probably always the cause, the way for these is opened by the inhalation of irritant particles of dust and cold air.

Singing, besides giving proper control of the breathing, teaches us to expand our lungs fully, thus providing valuable and healthy exercise for the whole respiratory machine. It inculcates the habit of breathing rhythmically through the nose, and so ensures thorough warming and filtering of the air before it reaches the respiratory passages.

By teaching us to breathe properly and by producing in us a sense of joy and well-being, singing tends to increase our resistance against infections of all kinds. It promotes the digestion and assimilation of our food, and thus builds up substantial reserves.

Singing is, above all, the language of the emotions, and is probably far older than articulate language. It thus provides us with the means of relieving our feelings, and the consequent effect on our health is astounding.

Lastly, by calling up the nobler and pleasanter emotions, it tends to drive away care and anxiety, which owing to the subtle bio-chemical changes they cause in our blood, render us more likely to catch cold.

Marroni, the inventor, says that he has perfected a method by which he can send radio messages as a beam, projected in any desired direction. Moreover, the new form of transmission requires only a small part of the electrical energy needed to broadcast throughout a circle the radius of which is the same length as the beam.

MacCORKILL

Variations—MacCorkle, MacCorkle. Racial Origin—Scottish. Source—A given name.

Here is a family name which, though purely Scottish Gaelic in its origin as such, traces back ultimately to Norse sources, and if you hear this name there is a good chance that you have a line of ancestry reaching back to the Vikings through Scotland.

The name of MacCorkill or MacCorkle was borne by one of the branches or sept of the Clan Gunn, which was decidedly one of the fighting clans of the Highlands, its history lying with that of the MacGregors in records of desperate fighting.

But the given name from which MacCorkill is derived is Thorketil, a relic of the old pagan Norse religion, and the meaning of which is "Thor's kettle." The kettle or cauldron was an utensil which played a large part, figuratively, in the worship of the Vikings, and is found to-day as an element in a lot of family names, and even still in given names in the Scandinavian countries.

There is a great deal of Norse blood in Scotland, principally along the north and west coasts. At one period a considerable part of the coast was in the hands of Norwegian settlers, who retained their allegiance to the Norse kings, and who later took their places among the Celts of the Highlands in full Gaelic clan organization.

New Record Set by Sun Life of Canada.

Evidence of widespread prosperity is afforded by the statement published by the Sun Life Assurance Company of Canada covering its transactions for the year 1923. This Company, which is international in its character, operating in over fifty countries, reports substantial advances in all departments.

Of particular public interest is the fact that no fewer than 318,443 policyholders are assured under ordinary contracts issued by the Company, while in addition 22,731 employees of a great diversity of industries are protected under Group Insurance policies.

The business in force at December 31st last reached the tremendous total of \$703,765,243, showing an increase for the year of \$72,360,378. The new business written during the year amounted to \$119,804,657, the policies actually issued and paid for being 35,975, for a total of \$107,391,255. During the year the payments to policyholders and their beneficiaries in respect to Death Claims, Matured Endowments, Profits, etc., amounted to \$22,145,979, bringing the total so paid since the organization of the Company to \$151,916,489. This amount exceeds the total business in force with the Company fourteen years ago, and affords stirring testimony to the degree in which its function is being fulfilled.

Profits paid or allotted to policyholders reached the amount of \$4,417,068. After setting aside \$3,500,000 for unforeseen contingencies, the net surplus over all liabilities and capital stock advanced by \$3,603,447 to \$17,872,868.

The record is one in which the Directors of the Company express their own satisfaction—a sentiment which will be widely shared. It is interesting to note that the Company, in order to facilitate the constant quest for new business, and to maintain the high standard of service to which they have accustomed their policyholders, have established a number of new divisions during the past year, and have further developments of a similar character in contemplation.

From the Canon's Mouth

One ambition of Canon Hay Aitken, Vice-Dean of Norwich Cathedral, is to beat John Wesley's record of preaching 27,000 sermons. But Father Time may intervene. The Canon is eighty-two; and, starting when he was seventeen, he has now delivered 22,000 sermons.

He has never preached from a written one, and as it is stated that Wesley made one sermon serve many times it is possible that the Canon has already delivered more original discourses than the founder of Methodism.

Ask for Minard's and take no other.

Twins for Both.

Everything is divided equally. The rich man has his twin six and the poor man his six twins.

Remember a hot dish for the children's lunch.

Mother! Give Sick Child "California Fig Syrup"

Harmless Laxative for a Bilious, Constipated Baby or Child.

Constipated, bilious, feverish, or sick, colic Babies and Children love to take genuine "California Fig Syrup." No other laxative regulates the tender little bowels so nicely.

It sweetens the stomach and starts the liver and bowels acting without griping. Contains no narcotics or soothing drugs. Say "California" to your druggist and avoid counterfeits! Insist upon genuine "California Fig Syrup" which contains directions.

Extreme Cold Might End Polar Flight.

Just how cold it is at the North Pole? If the temperature is lower than 45 degrees below zero Capt. Roald Amundsen's postponed attempt to cross it in an airplane is likely to fall when and if he attempts it, German pilots say, although that degree of cold would hardly make a Manitoba farmer bring out his earmuffs. Forty-five degrees below zero, Fahrenheit, veteran German pilots recall, once stopped the war in one sector when no other elements or earthly agencies could do it, and therefore it is likely to stop Amundsen.

Early in 1917, they recall, the Germans were striving to regain some trenches in the vast swamps between Mitau and Riga, which had been taken by the Russians in a Christmas surprise attack. The operations were constantly being slowed up by the cold until the bitterest day came on February 3. On that day, despite the intense cold, airplanes started for an attack, but were soon forced to land, as the oil froze in the engines. Motor cars with ammunition, tractors drawing guns and the hydraulic recoil mechanism of the guns all were frozen solid. In the meantime the same thing happened on the Russian side, and the battle which had been planned to be an intensive one simply froze up.

The pilots believe that the same fate might overtake Amundsen. However, it is the general belief that in July the temperature at the North Pole is somewhat higher than 45 degrees below zero.

WINTER WEATHER HARD ON LITTLE ONES

Our Canadian winters are exceedingly hard on the health of little ones. The weather is often so severe that the mother cannot take the little one out for an airing. The consequence is that baby is confined to overheated, badly ventilated rooms; takes cold and becomes cross and peevish. Baby's Own Tablets should be given to keep the little one healthy. They are a mild laxative which regulate the stomach and bowels and thus prevent colds. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Clergyman's Dilemma.

A clergyman, introducing some new hymn books, gave the clerk a notice after the sermon. The clerk had one of his own to give with reference to baptism of infants. He announced: "All those who have children they wish baptized, please send in their names at once."

The clergyman, who was deaf, assuming that the clerk was giving his notice, arose and said: "And I want to say for the benefit of those who haven't any, that they may be obtained from me any day, between 2 and 4 o'clock, the ones with the red backs at twenty-five cents and the ordinary little ones at fifteen cents."

Avoid loss when sending money by mail—Use Dominion Express Money Orders—the safe, convenient, inexpensive way.

A canal in England is now equipped with an overhead electric trolley that furnishes power for a motor-driven propeller in the stern of each barge. The result is said to be highly satisfactory. The barges attain a speed of four miles an hour, and, since only one man is needed on each boat, the operating costs are greatly reduced.

ASPIRIN

Beware of Imitations!

Demand

Unless you see the name "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over twenty-three years for

Colds
Toothache
Neuritis
Neuralgia
Headache
Lumbago
Rheumatism
Pain, Pain
Accept "Bayer Tablets of Aspirin" only. Each unbroken package contains proven directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer Manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Smoke OLD CHUM

The Tobacco of Quality

Sealed Package 15¢
(which keeps the tobacco in its original condition)
also in 1/2 lb. tins

Harbor Talk.

More lonesome than a lonesome ship at sea,
The sailing moon rides beautifully by.
Blown from such purple harbors as may be
In unimagined corners of the sky,
She is not careless where she gazes down
On sleepy streets the silver silence fills,
But thoughtful ever of a little town
And foolish-fond of little, wooded hills.

Seafolk are given so to telling tales,
I think the moon, when she puts in at last,
May spin a story where she reefs her sails;
And there her talk of shortlands that she passed,
Is all of glimmering meadows, ghostly still,
A sleepy town . . . a lonesome little hill.

—David Morton.

Money has wings; but, alas, it is not a homing pigeon!

No remedy can cure all ailments of the human body, but an immense number of people suffer from aches, pains and diseases when their blood is deficient in iron. It is the iron in your blood that enables you to get the nourishment out of your food. Without iron your food merely passes through you without doing you any good; you don't get the strength out of it. There is one universally known tonic that has helped thousands because it contains iron like the iron in fresh vegetables and like the iron in your blood.

NUXATED IRON

is an eminent physician's best blood prescription, standardized. It is recommended for all anaemic and run-down conditions. It has helped thousands of others. It should help you. Ask for it at any drug store.

LUMBAGO

Rub the stiff parts with Minard's. It eases pain, relieves stiffness.

Strong Nerves

Pure organic phosphate, known to most druggists as Bitro-Phosphate, is what nerve-exhausted, tired-out people must have to regain nerve force and energy. That's why it's guaranteed. Price \$1 per pkg. Arrow Chemical Co., 25 Front St. East, Toronto, Ont.

Relieves Dyspepsia

M.D. advises: "Persons who suffer from severe indigestion and constipation should take after each meal and at bedtime, fifteen to thirty drops of the Extract of Roots known to the Drug Trade as 'Mother Selgel's Curative Syrup.' Get the Genuine at your druggist."

Try every day to consider a masterpiece—a picture, a musical composition, a poem or some bit of good prose literature. Constant association with masterpieces makes for intellectual elevation and leaves little room for cheapness either of thought or of speech.

Keep Minard's Liniment in the house.

MOTHER OF TWIN BOYS

Tells How Lydia E. Pinkham's Vegetable Compound Relieved Her of Inflammation and Great Weakness

West St. John, N. B.—"I was in a general run-down condition following the birth of my twin boys. I had a great deal of inflammation, with pains and weakness. Finally my doctor recommended Lydia E. Pinkham's Vegetable Compound. He said that your medicine would be the only thing to build me up. I am sure he is right, for I am feeling much better and am gaining in weight, having gone down to ninety-three pounds. I was in bed for over a month, but am up again now. I have recommended the Vegetable Compound to my friends and give you permission to use my letter."—Mrs. ELMER A. RITCHIE, 82 Rodney St., West St. John, N. B.

There are many women who find their household duties almost unbearable owing to some weakness or derangement. The trouble may be slight, yet cause such annoying symptoms as dragging pains, weakness and a run-down feeling.

Lydia E. Pinkham's Vegetable Compound is a splendid medicine for such conditions. It has in many cases relieved those symptoms by removing the cause of them. Mrs. Ritchie's experience is but one of many.

You might be interested in reading Mrs. Pinkham's Private Text-Book upon the "Ailments of Women." You can get a copy free by writing the Lydia E. Pinkham Medicine Co., Cebourg, Ontario.

Notice

That now is the time to see about your building and repairing. Just call us up and we will come and see you about it. We can help complete your ideas and give you information as to cost, etc. This service is free. Don't hesitate. Get it settled now and relieve your mind.

Call us up or drop a line. We'll do our part. Phone 87J, write or come and see. P.S.—We saw every day, so hustle in the logs while the roads are good.

The Morrisburg Lumber Mills

PHONE 87J—LOCK BOX 71

Real Value

The man who places his repair work with a handy man or sends it to a cut rate establishment, for the sake of, what is frequently, a purely visionary saving of a dollar or two, is very apt to later find that instead of a saving, the transaction actually stands him a considerable loss.

You certainly have a right to expect real value for the money you expend in repairs, at a legitimate repair shop.

The TRUE VALUE of repairs, properly executed, can perhaps be better reckoned in days, weeks, and months of subsequent satisfactory performance, than in terms of mere dollars and cents of initial cost.

We believe we are giving the public the cheapest service obtainable in this locality today (all things considered) We aim to deliver real and true value on every transaction and if we succeed in this our customers must surely profit as well as ourselves.

Help us to succeed, and come in for your full share of the customers' profits.

TINDAL'S GARAGE
