

Our Subscribers in U. S.

Notice of Change in Rates.

The new postal arrangement between the United States and Canada, which comes into effect on May 8th, compels us to pay postage on newspapers crossing the line, at the rate of 4 cents per pound.

The postage on each subscription at that rate will cost us 52c per year, and on account of this we are obliged to raise the price of subscription to \$1.50 per year for all papers to be delivered in the United States.

Subscriptions paid before this date will be continued until expiry of the time paid for.

Any subscribers in the U. S. who send us only \$1.00 will receive credit for the time that amount will pay for, namely, 8 months.

Local and General

Whitaker, the Optician, will be at Morrisburg Aug. 26 to Sept. 9

Miss Tom Pruner is visiting her aunt in Buffalo, N.Y.

A. L. Fisher, the seed man, of Brockville, was in town on Monday.

Dr. Lyle, of Massena, N. Y., is visiting his parents here this week.

Mr. Jas. Phifer, of Louisville, N. Y., was a Leader caller on Wednesday.

Miss Anna Mattice, of Glen Becker, returned on Tuesday from Thousand Island Park.

Mrs. Henry Clark and daughter, are visiting her mother, Mrs. Simon Barkley, of Winchester.

Mrs. W. H. McGannon will resume her piano teaching the second week in September, 1907.

Miss Ethel Casselman returned on Saturday from a two months' visit at Winsted, Conn.

Mr. Joseph Gokey, of Gorham, N.H. is in town for a few days and incidentally took in the fair.

Mr. Arthur Kennedy, of Boston, spent a few days with his sister, Mrs. Roberts, this week, and took in the fair.

Mr. and Mrs. G. F. Deane, of Lansdowne, were the guests of their daughter, Mrs. W. A. Munro, over Sunday.

Miss Pearl Beckstedt, of this town, who is teaching at Winchester, spent the two days of the fair at her home.

GIANT TRIPLETS "Currency" "Bobs" and "Stag" Chewing Tobaccos, in big plugs. Quality always the same.

Services in St. James' Church on Sunday will be at 8 a.m., at 11 a.m., and at 7 p.m. Service in Trinity Church will be at 2.30 p.m.

Rev. Mr. Gabriel, of New York, will occupy the pulpit of the Methodist Church, Morrisburg, next Sunday, morning and evening.

Brockville Fair, Wednesday, Sept. 11th. Str. Brockville leaves Morrisburg at 8 a.m. calling at Iroquois, Cardinal, Ogdensburg and Prescott. Return tickets 50c.

Mrs. George Dillen, sr., and Miss May Baker are in Toronto this week attending the exhibition and are the guests of Mrs. W. H. Reddick.

Dr. W. W. Murphy and wife, of Los Angeles, who have been spending the past month in Canada, spent Sunday with his brother, L. E. Murphy, of the Leader.

In connection with Brockville fair a special train on the G. T. R. will leave Brockville at 7 p.m. for Cornwall, stopping at intermediate stations, Brockville to Cornwall.

The Ladies Aid Society of Knox Church will hold their monthly tea in the lecture room of the church on Thursday, September 12th. All are invited to attend.

Mr. and Mrs. N. D. Lewis, at their residence on Tuesday last, entertained at luncheon Hon. R. Pyne, Minister of Education, Mr. G. H. Meldrum, Montreal; and W. C. Campbell, Prest. of Acme Can Co., Montreal.

The special ticket issued by the Central Canada Exhibition Association, 6 for \$1.00, good either for the grounds or grand stand, will be offered for sale only until Sept. 14th, so that those who are thinking of saving the half dollar on the half-dozen tickets should not put off making application for the same beyond the 13th prox. They can be secured by application to the Exhibition Offices, 26 Sparks St., Ottawa. They have had a splendid sale in Ottawa and as the offer is open to every patron of the fair there should be no hesitation in making the necessary request.

The Township of Williamsburg S. S. Association will hold their annual convention in the Presbyterian Church at Colquhoun on Tuesday, Sept. 17th, 1907. Afternoon session commences at 1.30, evening session 7.30. All S. S. workers are invited to attend. A good programme is being prepared and everything is being done to make this convention a success.

The milking machine that was in practical operation at the Ogdensburg fair last year, excited a great deal of attention among farmers. This year Mr. H. H. Noble, of Gouverneur, will have one of the famous Burrill, Lawrence, Kennedy milking machines in operation three days of the fair; milking six cows, giving three exhibitions a day of this wonderful labor saving machine. Would advise all those interested to come and see it for all farmers have got to come to it sooner or later.

The Str. Brockville's time-table to Brockville fair is as follows:
Wednesday, 11th, lv. Morrisburg 8 a.m.
" " " Iroquois 9.15
" " " Cardinal 10.30
" " " Ogdensburg 11.35
" " " Prescott 11.50

On Thursday, 12th, leave Iroquois 9.15 and other points as above. On Friday, 13th, leave Ogdensburg 12.30 p.m., Prescott 12.45.

James J. Logan exhibited eight white Orpingtons at the Toronto exhibition and secured first on cock, 2nd on cock, 2nd on hen, 2nd and 3rd on cockerel, heavy class. A big competition, including Mrs. Dawson, of Niagara-on-the-Lake; Mr. Bogue, of Kingston, and others who are celebrated Orpington fanciers and exhibitors. This speaks well for "Jimmie's" strain.

Re-opening services will be held in the Presbyterian Church, Winchester Springs, on Sunday, Sept. 15th, at 11 a.m. and 7 p.m. Rev. W. A. McIlroy, of Ottawa, will preach. Special music and collection. Monday evening a grand sacred concert will be held. See bills for particulars.

Commencing next Sunday, train No. 7 will run through from Montreal to Toronto. Train No. 6 will run on Sundays from Toronto to Brockville on its week-day schedule, and will be continued from Brockville to Montreal on present schedule of train No. 76.

Brockville Fair, Wednesday, Sept. 11th. Str. Brockville leaves Morrisburg at 8 a.m. calling at Iroquois, Cardinal, Ogdensburg and Prescott. Return tickets 50c.

Judge Liddell held a court of revision on Wednesday in the town hall. The Conservative party was represented by Mr. I. Hilliard, and added 14 names to the list and struck off 7. The Liberals were represented by Mr. R. F. Lyle, and added 29 and struck off 14.

Mr. George Vassaw, sr., and James Lout, of Nudell Bush, are attending the Toronto fair this week. Before coming home they intend to visit Niagara Falls, Buffalo, Wyebridge, Collingwood, and Wyeval, Ont.

The remains of James Gordon, a former resident of Mariatown, arrived here on Wednesday for burial, he having been accidentally killed in Montreal. Interment took place in Hanes' cemetery.

Miss Von Doran arrived home from a two months' trip to the continent on Saturday last. The trip was a most enjoyable one and Miss Doran looks as though it had agreed with her.

Mr. and Mrs. Geo. Rutherford, of Lisbon, N.Y., with her two sons, were visitors at the fair, and are now visiting at Mrs. Rutherford's former home, North Williamsburg.

Mr. George Barclay, a well-known plasterer, of Brockville, was a Leader caller on Monday.

Miss Vida Thompson, of Inkerman, is visiting at the residence of A. H. Hunter, Church street.

Mr. John McLaughlin and wife, of Avonmore, spent Sunday in town, guests at Mr. John Armstrong's.

Mr. and Mrs. Gordon McClary, of Athens, were in town Tuesday and Wednesday taking in the big fair.

Miss Grace Merkley went to Quebec to meet her friend, Miss Von Doran, on her return from the Old Country.

For Quality and Quantity ask your dealer for the new big plug of "Bobs" "Stag" and "Currency" Chewing Tobaccos.

Mr. F. Casselman will be "at the top" Tuesday afternoon, Sept. 10th, at the residence of her father, Mr. F. B. Curran.

Mr. George Hanson, foreman of the British Whig job room, Kingston, spent Sunday and Monday at his parental home here.

Brockville Fair, Wednesday, Sept. 11th. Str. Brockville leaves Morrisburg at 8 a.m. calling at Iroquois, Cardinal, Ogdensburg and Prescott. Return tickets 50c.

Mr. Charlie Russell, of Brockville, the winner of the Marathon race at Ottawa this summer, was a visitor in town on Monday and Tuesday.

The annual conference of the Deaneery of Stormont will be held in St. James' Hall, Morrisburg, on Thursday and Friday, 19th and 20th insts.

Mrs. J. J. Carmichael and two children returned home on Monday to Schenectady, N.Y., after spending the past month with her sister, Mrs. C. Moore, below town.

The guests of Mrs. Henry Clark during the past week were: Miss Sadie McBride, (of Russell); Mr. Chelmer, of Ottawa; other and brother, of Winchester; Mrs. Simon Barkley, Mr. Chas. Barkley, nephew, and Mr. Harvey Barkley, of Winchester.

NOTICE—We can secure free board for a student who is willing to do a few chores nights and mornings; one accustomed to cows preferred. This place must be filled at once so apply immediately to the Brockville Business College.

J. C. Rockwell's "Sunny South" Co. was the Music Hall attraction during the two nights of the fair. Their exemplification of the happy ways of the colored cotton pickers of the South was good. The singing of the female quartet was also good. Taking all in all they seemed to please the large audiences with their singing and dancing.

Mr. G. Alfred Pruner, of Montreal, formerly of Morrisburg, spent Sunday and Monday in town. It is four years since he was here before, and notices many changes in the place. He was very expressive in his appreciation of The Leader, stating that he was much displeased when by chance it failed to arrive.

Miss Minnie Howitt, the adopted daughter of Rev. Wm. and Mrs. Howitt, passed peacefully away on Friday night last at 11.15, after a protracted illness, aged 25 years. She was a most estimable lady and had won many friends during her residence in Morrisburg. On Saturday the remains were taken to Huntingdon, Que., for interment, being accompanied by Mrs. Howitt and daughter Helen. Rev. Mr. Howitt being away on his holidays at the time of her death.

The live stock exhibit at the Central Canada exhibition this year will undoubtedly be better than ever before. In addition to the many entries received from Western Ontario there will be a number of exhibits from lower Quebec and the Maritime Provinces. The Dominion Exhibition is being held this year at Sherbrooke and many exhibitors from the Maritime Provinces who are coming to the Dominion Exhibition will come to Ottawa the week following to show at the Ottawa fair. A great number of these have already sent in their entries so that the statement that they will exhibit is beyond question.

THE BIG FAIR OVER

BEST EXHIBITION OF HORSES EVER SHOWN IN MORRISBURG

The Inclement Weather Greatly Marred the Proceedings.

The big fair of the Dundas Agricultural Society was officially opened on Tuesday last by the Hon. Dr. Pyne, Minister of Education for Ontario. In a few introductory remarks appropriate to the occasion, the Hon. Dr. was introduced to the visitors at the fair by the President, Mr. J. Wesley Allison. The Minister briefly referred to the fact that he had undertaken the pleasurable duty at the special request of the Premier, Hon. J. P. Whitney, who had promised to be present, but owing to being called to England on important business, could not fulfil his promise. He mentioned the deep interest taken by the Premier in all that pertained to Ontario, especially the County of Dundas, and when the establishing of agricultural schools was first mooted, he insisted that the County of Dundas should be provided with one. The Hon. Minister was surprised to find that Morrisburg was so beautifully situated, and had no idea that in Eastern Ontario there was such a village presenting so many advantages, and where the possibilities of making it an industrial centre of first importance. He also referred to an inspection made that morning to the Steel and Tin Plate Works, and how amazed he was to find that a plant of such magnitude and splendid construction had been erected here, and how fortunate they were in having so important an industry.

His concluding remarks were in eulogy of the village and its inhabitants, and wished all success.

The weather conditions dealt out for the big Brockville Fair this year were indeed satisfactory, hence the show was not up to the standard of former years, as it was almost next to impossible for the exhibitors to get to the fair with their stock. However, it was conceded by all that never was there a better exhibit of horses, and in some of the classes, especially in the three-year-old class of 15½ hands and over, did the judges have their work cut out for them in their decision, as never before were there five finer looking horses brought into competition.

The poultry exhibit was the largest ever seen here, and the competition was keen.

The exhibit in the main building was good, and the fancy work of the ladies, while not of a great quantity, was of such a quality as to establish the fact that we have in this vicinity ladies who are adepts in the manipulation of the needle.

Messrs. Howard & Cowan had a grand display of their stoves and ranges, which are manufactured here in Morrisburg, and the favorable comments heard on all sides, should make a big sale for them.

The competition in the bread and bun lines was large, and there were some excellent specimens.

Mr. Munro, the newly-appointed teacher of agriculture in our Collegiate Institute, was on hand with a varied assortment of weeds, insects and other pests, that the farmer has to contend with, and was ready and willing at all times to explain the nature of them, and how best to get rid of them.

The work of the Japanese troupe on the stage in front of the grand stand received much applause, as did also the singing of the female quartet of the Sunny South Co.

Perhaps the most attractive card was the exhibit of Mr. Allison's fine string of horses. Never before was there such a costly lot of horses exhibited on the fair grounds here. In his team of chestnut stallions "Dalton King" and "King's Counsel," for which he had refused \$18,000, he certainly has a great team, and which should be used by all who can at all afford it for the improvement of their stock.

Owing to the heavy condition of the track, but one trotting event took place, that of the 2.22 class, which took five

heats to decide. There were four starters. The summary is as follows:—

Laura G....	1	2	1	2	1
Factory Girl....	2	1	2	1	2
Doc B.....	3	3	3	3	3
Lena C.....	4	dr.			

Time—2.45, 2.40, 2.42, 2.45, 2.44

For the running race on the first day, there were four starters. The summary is as follows:

Lady Basso....	1	1
Miss Fisher....	2	2
Directum....	3	3
Union Jack....	4	4

Time 57, 58½.

In the running race on the second day there were five entries as follows:

Miss Fisher....	3	3	dr.
Lady Basso....	1	2	1
Billie Derounin....	2	1	2
Directum.....	5	dr.	
Union Jack....	4	4	dr.

Time—57, 56, 56.

A Pleasant Outing

The writer had recently the pleasure of spending a couple of weeks by the lower St. Lawrence, and at the request of the editor has penned the following lines. Cap a l'Aigle, the scene of the visit referred to, is about eighty miles from Quebec and is reached either by the R. & O. boats, which call daily during navigation, or by the government steamer "Champlain," which connects with the J. C. Railway at River Ouelle. This ferry, which is a fast, staunch ice-breaker, runs all the year, and for months is almost the only way of getting in and out for many of the people on the north shore.

Near this place a disbanded regiment of Highland soldiers was settled many years ago; these men married wives from among the earlier French settlers, their children followed the practice of their fathers, and now nothing remains to mark their descent from their Highland ancestors but their names.

In language, religion and customs they are French and one is surprised to meet with people bearing old Scottish names as thoroughly French in every way as any of the inhabitants.

The country hereabouts is very rocky and hilly and in many places the shore line rises straight up from the water one or two hundred feet, and the land continues to rise rapidly as one goes farther inland.

In the hill-sides are many fine springs giving rise to small streams which provide a plentiful supply of fine water for all purposes, and one sees these streams in many places running into troughs by the wayside for the refreshing of man and beast.

The landscape is diversified and very beautiful and from many points of vantage magnificent views are obtained. The inhabitants are a simple-minded people, kind and courteous in their relations with each other and with strangers, and in the main very cleanly in their surroundings. In many respects, however, they are very primitive in their modes of life and with few exceptions seem to have very little ambition to improve their present position, being content to live as their ancestors have lived.

Their methods of farming are not up to-date or such as one might expect in an old settled locality, everything is done in a "one-horse" fashion, although one occasionally sees an ox used in place of the horse. They plough their land with one horse or ox and harrow in the grain with a drag which reminds one of the pictures seen of farming in the far East.

When they come to harvest the crops they cut the hay with a scythe or one-horse mower, and the grain with a sickle or a one-horse reaper, and then draw it into the barn with the old-fashioned cart which one sees everywhere.

Notwithstanding the general backwardness of the country and the barrenness of much of the soil the people seem to enjoy themselves and are very happy and contented. They take life easy and do not seem to wear out their strength in worrying over matters. They are given to visiting a good deal and drive about either in buckboard buggies with a cover on one end or in the far-famed caleche in which all visitors to this section desire to drive once at least.

These caleches are high two-wheeled rigs on leather springs which seem to the unaccustomed traveller to jerk in every direction at the same time, and

he fears that he may be thrown from his lofty seat as he is driven at break-neck speed by his jehu.

For many years this has been a summer resort, and is generally frequented by those who desire a quiet, inexpensive and restful place.

Here one gets the benefit of both the invigorating mountain air, blowing from the spruce, pine and balsam woods, and the refreshing salt-water air from the river, which is here about fifteen miles wide.

Schools of porpoises are to be seen disporting themselves in the river almost daily, and a whale occasionally appears and makes his presence known by his "blowing."

The experience of most persons who once visit this quiet, beautiful and refreshing spot is such that they long to return on some future occasion.

CHEESE PRICE UP AGAIN.

Bids on the Board Reach 12½—Small Portion of Offerings Sold on the Board.

Saturday's meeting of the Brockville Cheese Board was attended by a few more salesmen than on the previous Saturday. The registrations, however, showed no increase, the offerings being 1300 white and 1895 colored, making a total of 3195 boxes.

When the sale of cheese was taken up the bidding was at first decidedly slow though Mr. Gardiner's opening offer of 11½ was a strong indication of an appreciable advance in price. His offer was rejected as were also three offers of 11¼ made by Messrs. Bate, Bissell and Patton, at long intervals between offers. So slow, indeed, was the bidding that President Bracken intimated his intention of adjourning the Board but before doing so he asked how many of the salesmen were present who would be willing to meet an hour earlier next Saturday for the purpose of considering the advisability of abandoning all further attempts to sell on the board this season. In response to his question a majority of the salesmen signified their intention to attend.

On resuming the sale of cheese Mr. Bissell offered 11¼c. without effecting a sale, and immediately afterwards repeated that offer which Mr. Dickie raised to 12c. without obtaining a box. A number of ineffectual attempts to buy at 12 cents were then made by various buyers when 12½ was offered by Mr. Bissell who took 400 boxes at that price. Mr. Dickie took 275 boxes, and Mr. Patton 710, which constituted all the sales made at the board, making a total of 1385 boxes.

ON THE KERB.
On the kerb sales were made at from 12c. to 12½c., the last mentioned figure for only really fancy lots. If anything colored had the preference and while considerable white changed hands at 12c., the general ruling was 12¼c. At these prices about 7,000 boxes were sold.

The ruling price for the corresponding week last year was 12 11-16c.

Jubilee Services.

The congregation of St. James' Church will celebrate, with special and appropriate services, the fiftieth anniversary of the formation of the parish of Morrisburg, during the week beginning on Sunday, 15th inst.

The programme for the week giving the names of the preachers, and of the subjects, will appear in next issue.

Mr. Andrew Broder, Dundas' popular representative in the Commons, is one of the speakers who will accompany the Conservative leader, Mr. R. L. Borden, in his tour through Ontario, which commences on Saturday, 7th.

Another instance of blowing out the gas almost cost A. A. Beattie his life. He was a guest at the Commercial Hotel, Brockville, Saturday, and on retiring took this method of extinguishing the light. Next morning a chambermaid on her rounds found the door of his room locked, and the smell of gas coming through the fanlight, which fortunately had been left open. The door was forced, and Beattie was found unconscious. Several hours elapsed before he showed signs of life. The jet was found wide open. The fanlight and also the window being slightly open, allowed a portion of the fumes to escape.

A FORBIDDEN MARRIAGE

BY LAURA JEAN LIBBEY

Author of "When Lovely Maiden Stoops to Folly," "A Cruel Revenge," "The Heiress of Cameron Hall," "Ione," "Parted at the Altar," Etc.

By this the detective judged them rightly to be mistress and maid. He had also made a startling discovery. Waldemar Waldron had married the general's daughter.

"Ah, my lady, you have been crying again," said the girl, bending pitifully over the slender form buried in the cushions of the blue plush armchair. "Brides should smile, not weep. There's time enough for that in after years."

"I know it," replied Reine, thoughtfully. "I would have no cause for one heart pang if papa would only answer my letters, and say that he forgives me for eloping with Waldemar on my bridal eve. I have written him again," she continued, drawing a dainty, cream-tinted envelope from her pocket, "begging him to pardon Waldemar and me. We are so happy together."

"I hope he will, my lady," said Honora, earnestly. "It's a pitiful thing to be estranged from one's family on account of marriage. A husband is no fickle nowdays, a girl never knows when she has to fall back on those at home for support again. There, there, now," she continued, "I knew in my blunt way I'd be sure to say something to offend you. I don't mean anything amiss, though, Mrs. Waldron. Your husband will never prove fickle and false to you. He perfectly adores you."

Reine looked up and smiled through her tears.

"Yes, Waldemar is fond of me," said Reine, thoughtfully, as though persistently assuring herself of the fact.

"Do not forget to remind me tomorrow morning to give this letter to my husband to mail to papa," she said, rising and placing the cream-tinted missive on the marble table.

"I shall not need you any more to-night, Honora. You may as well retire."

With these words she passed out of sight behind the sweeping folds of heavy velvet that shut out the interior of the inner apartment from view.

Imagining herself alone, the maid picked up the envelope, glancing to my husband to mail to papa," she said, rising and placing the cream-tinted missive on the marble table.

"I shall not need you any more to-night, Honora. You may as well retire."

the news should be broken to the old soldier, for, glancing up suddenly, they saw him standing before them in the doorway like a marble statue. He had heard all that had passed between them, but neither a groan nor a sigh had escaped his ashen lips.

Married, was she! and to the man he detested! She had defied him, and fled with the lover whom he had sent away. Standing there, he remembered the vow he had made to Waldemar Waldron—"If my daughter marries you, not one dollar of my money shall she have. I'll leave it first to the paupers in the almshouse."

Bernard Chesleigh rose suddenly to his feet, advancing anxiously toward the general, but the old soldier waved him away.

"Leave me alone," he said, hoarsely. "It is the greatest kindness you can do me, to leave me by myself to fight out this fierce battle."

Not a muscle of his face moved as the detective laid the letter, in his darling's well-known, delicate chirography, before him; nor did his face soften when he had read that piteous appeal for forgiveness to the very end.

"She defied me, and chose that villain!" he said, harshly, as he locked the letter carefully out of sight in his private desk. He had loved her well, but never could he overlook this. In the future—he had no daughter.

By noon the next day the romantic story of Reine Hastings' marriage was flashed broadcast over the wires. It created a profound sensation. Women, of course, took sides with the lovely young bride who had fled with the lover she loved best. They said, too, that the old millionaire would be sure to forgive her. But those who knew the stern old general well, answered, "that not even in the hour of death would he pardon her."

CHAPTER XV.

Waldemar Waldron was amazed when he heard the next morning how cleverly the young detective had gained an entrance into the Towers, and had discovered the object of his search there. Still, he comforted himself with the fact that it saved him the trouble of breaking the intelligence in person to the irate old general.

All that day he confidently expected a summons from General Hastings, bidding him bring his wife at once to Fairlawn; but no such summons came. A second and a third day passed; still Reine's father maintained the most rigid silence toward them.

Waldemar Waldron was more disturbed by this line of action than he cared to own. His funds were running low. He should certainly be stranded unless the old gentleman came to their rescue without delay.

Reine was seated in her room that afternoon, when he entered hastily and unexpectedly.

"Have you heard from your father yet, Reine?" he asked anxiously.

Her fair face flushed with pleasure to see how earnestly he desired a reconciliation with her dear father. Ah, how kind of heart her handsome Waldemar was!

"No, dear," she answered, crossing over to the divan upon which he had flung himself, and twining her white arms round his neck in a caressing, pretty fashion.

"Haden't you better write again?" he interrogated, impatiently.

A lovely smile dimpled the crimson mouth; she was so pleased. She opened her writing-desk at once and began another letter to the father who had so idolized her in the past.

Waldemar watched the white hand gliding swiftly over the page, and the lovely golden head bent over it; but it was not of her beauty he was thinking just then.

He was wondering in what words he should broach the subject of money to her, when she gave him the very opportunity he desired.

"Shall I tell papa we are going on a bridal tour, and if he wants to see me—and you, too, dear—that he must send for us at once?"

A deep sigh broke from his lips, and he covered his face with his hands.

"I fear we shall have to postpone it, my darling," he said; and then he told the same old story that is on the generality of men's tongues; end; that he had endorsed a note for a man, and now he had to pay, and if he could not raise the amount ruin stared him in the face. It was always a man's supposed friend who beat him.

Poor Reine's lovely face grew white as a lily leaf with fear.

"Oh, Waldemar, you are so kind-hearted; of course, you couldn't refuse your friend. But, oh, what a predicament it leaves you in!" Suddenly her lovely face brightened.

"Don't let it worry you, Waldemar, dear," she cried, with a dazzling smile. "I know where we can get the money. I will write to papa for it. He will send us double the amount."

The skin rids the system of more urea than the kidneys?

Nearly one fifth of the waste products of the body is eliminated by the skin. Suppose there is some unsuspected, unseen skin trouble—the pores are closed—the skin is unable to rid the system of its share of the waste.

Then the blood carries this waste product to the kidneys—immediately they are overworked—they strain to throw off the extra load. What the kidneys can't possibly eliminate, the blood takes up again and deposits on the nerves.

Then come the dull aches in back, hips and head—the nerves unstrung and irritated—the urine charged with impurities and highly colored—and you fear you have "Kidney Trouble."

Nonsense. Your kidneys are overworked—not diseased. What you need is "FRUIT-A-TIVES" to act on the skin.

Fruit-a-tives

(or Fruit Liver Tablets)

open the clogged pores—start up healthy skin action—and let the skin perform its natural function. This instantly relieves the kidneys of overwork—the back-aches stop and the complexion is beautified. There is no excessive waste matter in the blood to bring dull headaches—the urine is cleared—the bowels are opened and regulated—and the kidneys strengthened.

"FRUIT-A-TIVES" act directly on the three great eliminating organs—Skin, Kidneys and Bowels—make them well and keep them well. That is why "FRUIT-A-TIVES" cure so many cases of apparent kidney disease that are really skin troubles.

"FRUIT-A-TIVES" are fruit juices—in which the natural medicinal action of fruit is many times increased by the secret process of making them. Valuable tonics and antiseptics are added and the whole made into tablets—the finest formula known to medicine.

Buy them try them—and cure yourself at home. 50c. a box—6 boxes for \$2.50. At all druggists or sent on receipt of price.

106

FRUIT-A-TIVES Limited, OTTAWA.

"Perhaps it would be the correct thing to give the old gent a pretty strong hint as to how we are situated," he answered, trying hard to subdue the ring of triumph in his voice; "but be sure to add that I am working hard," he was on crossing his white hands over his lap, "and that we are wonderfully happy."

After she had written it, he took the letter in his hands, scanning it eagerly, pretending to admire the delicately curved chirography, but in reality to see if she had put it strong enough about the money. He was satisfied on that point, and the letter was sent to Fairlawn.

Reine never doubted but that her father would respond at once with a generous check.

She wrote so pleadingly, so earnestly, that the stern old general laid down the letter, completely unnerved by the reading of it.

"I shall not send it; certainly not," he said to Bernard Chesleigh. "I foresaw all this when that scoundrel asked me for my child. I knew he only wanted her money. Scarcely married a fortnight, and calling upon me for assistance. But not a farthing of my money shall go to the spendthrift who stole my daughter from me. I have sworn it, and a soldier never breaks a vow. I shall write and tell her I am sorry for her, but I cannot and will not send her a dollar. I shall tell her plainly that all such applications to me will meet with a prompt and decided refusal."

In vain Bernard Chesleigh attempted to use his influence with him in Reine's behalf; the old gentleman kept his words, adding, as a postscript, that it would be well for Waldemar Waldron if he never crossed his path.

Reine and her husband were at luncheon when the general's letter was brought them.

"Open the letter at once, Reine," said Waldemar eagerly, pushing his food away untasted. "Let us see how large a check he has sent us."

He could scarcely restrain his intense impatience until the envelope was torn open and the letter extracted.

Lo!—no check was visible! In the greatest dismay, Reine read aloud the few stern, terse lines her father had penned.

She had scarcely finished ere it was dashed from her hand, and Waldemar Waldron was crushing it beneath his heel, with a face so pale with passionate rage it was frightful to behold.

"So that's the stand the stupid old fool intends to take, is it?" he cried. "Who dreamed that he would stick to his miserable vow when once we were married?"

In vain his young bride tried to stem the torrent of the wild imprecations that he hurled upon the head of the offending general.

"Waldemar!" she cried, in horror, "remember you are speaking of the father whom I love."

But she might as well have attempted to stay the mighty current of lava of a burning volcano.

"Waldemar!" she sobbed, kneeling at his feet and raising her little white hands in terror, "I pray you

to hush if you love me! Oh, my love! my love! you are breaking my heart! Do not make me regret the sacrifices I have made for your dear sake."

He turned on her like a flash. "Greatest!" he sneered. "I wish to heaven I had been two hours later on that accursed Christmas night, so you are destined to be a millstone around my neck."

The girl rose from her knees with the dazed light of a stricken tawn shining in her lovely, tearful blue eyes.

"Waldemar," she said, and she wondered at the strange, hollow sound of her own voice, "tell me, do you love me less because my father refuses to send us money?"

"I certainly do not love you the better for it," he returned, his hollow, caring little in his reckless rage how the cruel words hurt her.

At that moment her old father's words came back to her:

"He wants your fortune, my child, not you. Such a man is incapable of the beautiful sentiment, love. Money is his god."

She was only sixteen—little more than a dreaming child—yet that she was beginning to dimly realize that there were indeed bitter drops in love's alluring cup that she had imagined would be always so sweet.

"Waldemar," she said, beating back the agony that was almost overpowering her, "tell me the truth. If I had been a penniless girl instead of the prospective heiress of Fairlawn, would you have married me?"

He might have spared that trusting, bleeding heart in his answer; but he did not.

"A man with my tastes, and with no means to gratify them, would be

worse than a fool to throw himself away on a pretty pauper when there are so many women with plenty of money to be had. I thought, of course, that I was marrying an heiress, and a pretty mess I have made of it, it seems—curse the luck."

"Then the love you have lavished upon me was only a pretence. Ah, Heaven, Waldemar, could you, my idol, be so base?"

"Have done with this silly nonsense about love," he cried, impatiently. "Two weeks of it has sickened me almost to death of the very word."

She staggered back, leaning heavily against a marble fluted column, her face quite as pale and cold as the lifeless statue, sobbing out that "the heart in her bosom was breaking."

He saw a strong shudder run through the girl's figure; he saw her raise her white arms as though in prayer. The golden lashes drooped pitifully, the uplifted, appealing white arms fell helplessly to her side, and she dropped, face downward, upon the floor at his feet.

She uttered no cry, spoke no word, but fell in the silence and stillness of death.

He had not meant to go so far—to reveal to her what he was—a desperate fortune hunter; but the keen disappointment of finding no check, and awakening to the truth that he would get nothing from the general, enraged him beyond the pale of reason.

He looked upon her for an instant. The golden hair, the still, white face; and the blue merino robe she wore all seemed one confused mass to him.

He raised her in his arms—striding hurriedly toward her own apartment—and laid her down—poor, crushed, bruised flower—laid her down with a muttered curse at the folly of marrying in haste.

He never kissed her, or took, with gentle hands, the tangled golden hair from her white face, but, ringing the bell sharply for Honora, her maid, he turned on his heel, and without one backward glance at the white face on the pillow, hastened from the room.

(To be continued.)

PLANTING TROUT.

One Point on Which the Old Man Wanted More Light.

It was the policy of the officers of a certain railroad line in all their advertising matter to place great stress on the excellence of the trout fishing to be reached by their lines, and in order to provide the trout it was necessary from time to time to plant the advertised streams with fry.

On one occasion an old gardener named Connelly, who had charge of the station grounds, was sent out with the cans of fry, procured from the state hatchery, and a railroad map marked to show exactly where to plant the tiny fish.

Connelly returned that night, however, with part of the fry still unplaced. He needed further instructions from the general passenger agent, who had marked the map.

"Say, mister," said Connelly, scratching his perplexed head with one hand and pointing to the can with the other, "shall I plant thim fish wid the tails up or down?"

"Why," shouted the irascible agent, "you thundering blockhead!"

"Aisy, aisy!" murmured Connelly. "Of'm no such blockhead as ye'd think. The spot on the map where ye towid me to plant thim trout is all biled down to mud. If thim small fish is to go in that stream at all, at all, 'tis wan by wan they'll have to go in, like banes. All I'm askin' is this, is it heads up ye'll have thim, or tails?"

Free, for Catarrh, just to prove merit, a Trial Size Box of Dr. Shoop's Catarrh Remedy. Let me send it now. It is a snow-white, creamy, healing, antiseptic balm. Containing such healing ingredients as Oil Eucalyptus, Thymol, Menthol, etc., it gives instant and lasting relief to Catarrh of the nose and throat. Make the free test and see for yourself what this preparation can and will accomplish. Address Dr. Shoop, Racine, Wis. Large jars, 50 cents. Sold by D.

CROP REPORTS.

Fall Wheat and Clover Injured by the Cold Weather.

Reports from the fall wheat sections of Ontario indicate that the very cold weather of the past month has been hard on that cereal. In many places the crop is reported a failure. The warm weather in March caused the wheat to grow rapidly, but the frosts of April, without either rain or snow, have withered the tops of the grains and in some cases so badly that it is feared that most of the plants are killed.

Reports from the Western States are somewhat similar. More encouraging reports, however, are to hand from Alberta. In that province the crop has passed the crucial point and with the usual growing weather from this on is likely to give a good account of itself at harvest time.

The clover crop has also suffered severely from the same cause and at the moment prospects are anything but bright for a big yield of this valuable fodder crop. On the whole, the situation is not the most hopeful, and unless conditions change quickly and good growing weather prevails, a bumper clover return for this part of Canada need hardly be expected.

A great many farmers, more particularly in Eastern Ontario, do not grow fall wheat, and consequently will not be affected by a failure of this crop. But not so with the clover crop. Every farmer should grow clover, if for nothing else than to increase the fertility of his land. And a great many of them do grow it and consequently a failure of this crop will, on the whole, be more serious than a failure in fall wheat.

SOIL CULTURE.

Surface Tillage for the Purpose of Conserving Moisture.

It is well established by the experience of farmers as well as by direct experiments that a layer of loose, dry soil three or four inches deep is effective in preventing the excessive drying of soils.

The implements employed in cultivation will vary somewhat with the crop and with the stage of growth. Tillage of ground before the crop is up and when the plants are very small, especially listed crops, should be with the spike tooth harrow with

DOUBLE CULTIVATOR.

Equipped with blade-like shovels for surface cultivation.

The teeth set to a considerable depth. Weeds are most easily destroyed when they are coming up. The harrow is very useful for this purpose, and at the same time it produces a soil mulch. A distinct advantage in the use of the harrow is the rapidity with which the ground may be gone over. The spike tooth harrow or the disk harrow should also be used in summer culture intended to conserve moisture for a future crop.

When the plants are too large to be cultivated with the harrow, any of the modern double cultivators will do good work in cultivating corn and similar crops, but when equipped with gangs of three to five narrow shovels that throw the soil but little they are still more efficient for surface cultivation unless the ground has become weedy from inability to cultivate it because of wet weather. Blade-like shovels that run nearly horizontal and cut off a thin layer of soil are effective unless there be too much trash. These blades can be so adjusted that the soil will pass over them, forming a loose layer, which on drying will protect the moist soil below.

In cultivating the soil as thoroughly and frequently as the best farming requires the labor will be excessive unless tools be used that enable a man to cover a large area in a day. Plenty of team power should be available on a modern farm, and three or four good horses to one driver are more economical than two when the land is such that large tools can be successfully operated. Farming with one horse to a man is poor economy and will absolutely prevent the good farming necessary to conserve the soil moisture.

The disk harrow and the spike tooth harrow have already been suggested for certain kinds of work. No better tools need be desired for the work for which they are designed. They are made in sizes for two horses and

A GOOD IMPLEMENT.

Used for maintaining soil mulch in tall corn.

for four horses. In using the disk harrow it should be lapped halfway in order to leave a level surface. Disks fourteen to sixteen inches in diameter do better work than those of greater diameter, but the draft is heavier. Except in special cases double cultivators or two row cultivators should be used.

Single cultivators are useful in cultivating crops that have become too tall for the double cultivator and in small areas, as in truck farming, but no tool of less capacity than the double cultivator should be generally employed in field work.

HUMOR

AN AUTO AT HOME.

How to Rig Up One as Offered by a Funny Man.

A workman's home is incomplete without an automobile. His children cry for it. For this reason we give below a simple rule for constructing a horseless rig at home. Already we have received thousands of letters from all over the world thanking us for this clever arrangement. Ever since publishing our easy method Tom Edison has been acting sullenly, and Nikola Tesla envies us. And, though perhaps we might jeopardize the friendship of these great men, yet we will go on publishing these scientific hints to the poor and thus enlighten those who have been groveling about in the dark so long owing to the extortionate price of gas. Here is our wonderful scheme laid bare:

Go to your family plumber and ask him for a galvanized bathtub. Owing to the stagnancy of business just at present, he will willingly give you one free of cost just to make room in his overcrowded shop. Then take the wheels from some one's wagon or private surrey and fasten them to the tub, making sure that the axles are strong enough to hold a large family.

After this has been done go to the butcher and purchase four large bolognas. Put a hole in each end, and through one of the holes blow severely until you have blown all the meat out of the hole at the other end. When the skin is entirely meatless, blow up the skin with a bicycle pump and fasten on to the tires of the wheels. After this go down cellar and take the works out of a gas meter and fasten to the axles holding the wheels. As a gas meter keeps on going around whether you are burning gas or not, you will see at once that it will keep right on going when attached to the axles, causing the axles to revolve and thus making the vehicle go along automatically.

Put a few chairs in the tub and purchase a tin horn at a novelty store. Great care must be exercised in one thing, however—be sure a piece of soap has not been left in the bathtub. This might cause the chauffeur to slip up and lose control of the machine. A piece of limburger cheese can be placed in the back to give it the odor of a real motor car.

The above information is offered gratis, and we will gladly give more details upon receipt of letter asking for same. Each letter, however, must be accompanied by an advertisement contained in this issue and \$7.—F. P. Pittsford Judge.

A Lucky Man.

"By George! That man Crosby was a lucky chap."

"I fail to see how a man who gets all smashed up in a railroad accident can be regarded as lucky."

"He carried an accident insurance policy which provided that the amount of his insurance should be doubled in case he got killed in a train wreck or in a steamship accident. If it had been me I'd bet I'd have just lain down and died a natural death and never got a cent out of it."—Chicago Record-Herald.

A Puzzler.

An old white haired dandy living on a plantation, not feeling well, had the doctor pay him a visit. The doctor told him as he was getting old he must eat plenty of chicken and stay out of damp night air. "But, sah," said the old dandy, "how can you expect me to stay in de house at night and still get my chickens?"

His Rising Day.

"He never did rise in the world till he stumbled over a lot of dynamite," the village gossip said, "an' even then, like so many men in the risin' business, he never did know what he riz fer!"

Indigestion

Stomach trouble is but a symptom of, and not in itself a true disease. We think of Dyspepsia, Heartburn, and Indigestion as real diseases, yet they are symptoms only of a certain specific Nerve sickness—nothing else.

It was this fact that first correctly led Dr. Shoop in the creation of that now very popular Stomach Remedy—Dr. Shoop's Restorative. Going direct to the stomach nerves, alone brought that success and favor to Dr. Shoop and his Restorative. Without that original and highly vital principle, no such lasting accomplishments were ever to be had.

For stomach distress, bloating, biliousness, bad breath and sallow complexion, try Dr. Shoop's Restorative—Tablets or Liquid—and see for yourself what it can and will do. We sell and cheerfully recommend

Dr. Shoop's Restorative
D. T. HENDERSON.

A QUEER CUSTOM.

Curious Basket Ceremony of Siamese Ancestral Worship.

If the "basket supper" of worthy tradition is a feature of New England church sociability, the orient has a fashion of its own connected with baskets and religious ceremony. Mary Cost, in her book on Siam, tells of a custom which forms a mysterious part of Siamese ancestral worship.

The ceremony is called krachat, which means basket. When the time for observing it is at hand, the king commands the princess to make large baskets and to buy articles with which to fill them. Around the palace booths are built, covered with red and white cloth, and here the baskets are displayed. The king himself goes out to inspect them.

The baskets are filled with all sorts of things, from rice, sweetmeats, sugar, cakes and onions to articles of a more lasting nature. The baskets are woven in all sorts of curious shapes. One may be in the form of a cart hauled by two buffaloes covered with tobacco instead of hair and with many useful things in the cart. Tree baskets have all sorts of articles hanging to the branches, such as saws, knives, handkerchiefs, and so forth. Bushel baskets are pierced with doors, in and out of which run automatic dolls covered with coins. Some of the baskets are immense, being sixteen feet long.

The show lasts a week, at the end of which the priests draw lots for the spoil.

The Gypsy Moth.

As most of our readers know, the gypsy moth will attack all fruit, shade and woodland trees, although it shows a preference for apple, white and red oak, willow and elm. It will devour on occasion nearly every useful grass, plant, flower, shrub, vine, bush, garden or field crop and kills both deciduous and coniferous trees. The life history and habits of the gypsy moth have been printed again and again in these columns and are explained in fullest detail in bulletins supplied free of cost on application to the department in each state having the moth pest in control. The gypsy moth, in the egg state, will yield to a treatment of creosote. Apply it with a small swab or paint brush. Creosote mixture may be purchased at agricultural warehouses or seed houses at 50 cents to \$1 a gallon, depending on quantity.

An English Dairy Cow Ration.

An English farmer's dairy ration for a herd of high class Jersey cows is as follows: During the summer each cow is fed daily, in addition to grass, two pounds of crushed oats, four pounds of wheat bran, two pounds of cottonseed cake, two pounds of bean meal, fifteen pounds of mangels, ten pounds of cut hay and eight pounds of long hay per head.

The grain and cake are mixed with the cut hay, scalded and fed in the other feeds, one in the early morning and the other in late afternoon. The roots are fed after milking in the morning, and the long hay is fed after milking in the evening.

The Cultivation of Corn.

The early cultivation of corn is important. Use the weeder if you have one or a smoothing harrow with the teeth set at a slant. Either of these run crosswise of the rows will fill up the slight depression left by the planter and leave the field level. The main object is to destroy weeds and keep any crust broken, remarks Farming. If this is well attended to, the later cultivations will be much easier.

Few Plants Injurious to Sheep.

It would seem from recent investigations by the department of agriculture that very few plants are poisonous to sheep, says Farm Progress. In a report on the subject by S. B. Nelson of the Washington station notes are given on losses which have occurred to sheep from time to time and which have generally been attributed to the action of poisonous plants. The flora of one region in the western ranges noted for the occurrence of poisoning contained fifty-five different plants, most of which were gathered in fresh condition and fed to sheep. As a result it was found that only a few produced injurious effects. Out of all the lupines only one, *Lupinus ornatus*, was poisonous. Neither arnica, wild cherry nor any of the other plants of the kind that were tested caused the slightest symptom of poisoning.

Vaseline as an Egg Preservative.

An experiment station in Germany kept eggs eight months, testing 20 methods. Most of the eggs spoiled, but all of those preserved with water glass, lime or vaseline were good at the end of the period. The vaseline method is a new one and consists simply of coating the eggs with the petroleum product and keeping them in a cool place. The covering of the grease-like substance keeps the air out of the pores. This method requires little expense, a ten cent bottle of vaseline being sufficient to preserve ten dozen if the substance is heated until it is semiliquid and the eggs are rolled around in it. Care should be taken to see that every part of the shell is covered. The vaseline also may be applied cold.

When a variety is supplied more food is consumed and there is better digestion.

CASTORIA.

Bears the Signature of **Dr. H. H. Fletcher**

A Good Barn Plan.

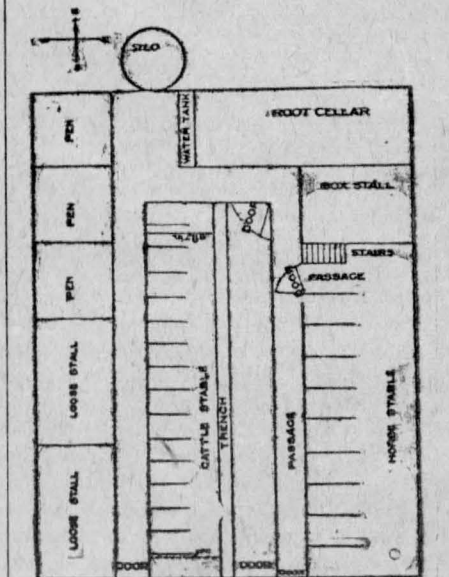

The accompanying illustrations show the plan and barn of Mr. Thos. McDonald, Huron Co., Ont. The convenience of its construction for feeding and caring for stock will be seen at a glance. A barn of this style say 50 feet or 60 feet by 70 feet, would

VIEW OF BARN.

be hard to equal for a hundred acre farm.

The framework of a barn of this style and size calls for the upright purline post, with, in the case of a barn sixty feet wide, the centre purline posts about twenty feet apart, and with smaller purlines between them and the corner posts. In the stable below, the purline supports should stand at the head of the horses on one side and at head of the cattle on the other. In this way they occupy but little room. An important point in the construction of this stable is that no high partitions are used, thus allowing good light. Its handiness for feeding roots, silage, etc., will be seen at a glance. The plan of having the driveways in the barn

PLAN OF STABLES.

PLAN OF STABLES.

across the passages in the stable below will also be readily appreciated. This makes the space between the head of the stall and the edge of the trench seven feet at one end and six and a half feet at the other, so that the stable can accommodate both large and small cattle and with perfect regard to their comfort and cleanliness.

The Farmer Tool House.

A good farmer needs good tools, and good tools deserve a good tool house, which means one with plenty of room to use the tools as well as to keep them handy and safe. A large, well-stocked tool house goes far to solve the rainy day problem. If the farmer and his man are handy with tools, there will be plenty of work for all weathers and at all times of the year. Almost anybody may easily become a good enough carpenter, blacksmith, painter, harness-maker and plumber—that is, good enough for farm emergencies and far use of time that would otherwise be wasted. Lack of convenient tools and place to use them is all that prevents saving many a dollar.

Right Breathing Cures Catarrh

Simple Way to Kill Catarrhal Germs in Nose, Throat and Lungs

The only natural and common sense method known for the cure of catarrhal troubles is Hy-o-mei. It is breathed through an ingenious pocket inhaler, so that its medicated air reaches the most remote air-cells of the nose, throat and lungs, killing all catarrhal germs, soothing the irritated mucous membranes, and restoring a healthy condition.

If you suffer from catarrhal troubles, such as offensive breath, raising of mucous, frequent sneezing, husky voice, discharge from the nose, droppings in the throat, loss of strength, spasmodic coughing, or a feeling of tightness across the upper part of the chest, you should begin to use Hy-o-mei at once. It will destroy all disease germs in the nose, throat and lungs, and provide the blood with additional ozone.

We do not want anyone's money unless Hyomei gives relief and cure, and we absolutely agree that money will be refunded unless the remedy gives satisfaction.

All druggists should be able to supply you with Hyomei, or we will send it by mail on receipt of price, \$1.00, and every package is sold with the distinct understanding that it costs nothing unless it cures. Both's Hyomei Company,

The Handy Dandy Dust Pan

Something every lady should have

This New Foot Pressure Dust Pan leaves both hands free to use the broom; no more stooping; no more back-aches. The pressure of the foot on the spring rest holds the extreme lip of the pan close to the floor and takes up the sweepings at the first attempt. It is made of the heavy I X quality—well japanned and specially tempered foot spring, which going to the extreme front corners, keeps them from getting battered or bruised, making the pan much more durable. Every lady is delighted with it. When once used, will use no other.

The New "Spring Wire Broom Attachment"

Saves the broom—keeps it firm for a clean sweep—gives it spring and life, and is greatly appreciated for sweeping carpets and especially heavy piled carpets.

It is made of specially tempered, coppered, spring wire. Attach to the broom as shown in cut. When down to the desired height from floor, about 4 or 5 inches, just spring the top ends back to lock on the handle.

Will last a lifetime.

The Leader

ISSUED EVERY THURSDAY FROM
ITS OFFICE ON MAIN STREET,
MORRISBURG, BY

The Leader Publishing Co.

LEWIS E. MURPHY,
Editor and Manager

THURSDAY, SEPTEMBER 5, 1907

THE NEW MINISTER OF RAILWAYS.

In tendering its congratulations to the Hon. George P. Graham on his elevation to the important position of Minister of Railways and Canals, The Leader feels it voices the sentiment of every voter of whatever political faith, of old Dundas County, where he is so well and favorably known.

The Opposition in the Provincial Legislature has lost a respected leader, while the Federal Government has added a conscientious and able worker to their ranks, who will not spare time or energy to administer his department in the interests of the whole community. While George P. is a Liberal through and through, he is possessed of that manliness to concede that his opponents should have some consideration at his hands, and we firmly believe that his department will not be so "lop" sided as has characterized it under some of his predecessors in office.

The taking away by Sir Wilfrid of the management of the Intercolonial Railway from the Maritime Provinces may prove of benefit to that road, from the fact that the "patronage" business cannot be worked to so good advantage. As to the management of the canals, we trust that he will at once see the necessity of lighting the locks and canal here at Morrisburg by electricity.

Williamsburg Council.

A regular meeting of the council was held in Boyce's Hall, Williamsburg, on Saturday, August 10th. Members all present. Minutes of the previous meeting were read and adopted. The road superintendent of the S. W. ward was instructed to hire men and teams to clean out certain parts of the Casselman-Dawley drain, commencing thirty or forty rods north of where the drain turns east on A. Broder's land. G. G. McEwan, C.E., of the Village of Winchester, was appointed township engineer under the Ditches and Watercourses Act. The sum of \$50 was granted to gravel the west townline south from headline between 5th and 6th concessions, provided Matilda Council grant a like amount. J. H. Boyd was given permission to pile up 50 cords of stone on rear part of lot No. 13, 4th concession, at \$1.50 per cord, seventy-five per cent. to be paid when stones are piled and balance when crushed. All uncrushed stones to be deducted from measurement and removed at his expense. The clerk was instructed to notify the road superintendent of the northwest ward to sell the township's portion of work on the Anson Becker award ditch. The sum of \$15 was granted for the improvement of the nine-mile road, front part of 6th concession, work to be performed under the supervision of James E. Becksted and James H. McMillan. Samuel L. Casselman was appointed to make progress estimates on the Moffatt-Fetterly drain. The reeve was authorized to purchase from the Climax Road Machine Co., Hamilton, Ont., three set of moulds, 10, 15 and 20 in. respectively, for making tile, and three extra bottoms for each set. The change asked for by Jo. in Southworth and R. O. Gallinger, in the Moffatt-Fetterly drain to be made and the engineer sent on, provided they agree to pay his time and necessary expense. The reeve and treasurer were authorized to borrow from the Molson's

Bank, the sum of \$5,000 to pay the quarterly salaries of Public School teachers, until the taxes are collected. Orders were passed in favor of the following:—Chesley O'Shaughnessy, 264 ft. of cedar, \$14; Wm Hanfee, repairing bridge, front road, \$150; Nelson Casselman, repairing bridge, front road, \$150; W H Fetterly, 4,000 feet of tamarac plank, \$80; Frank Carr, 35 rods of wire fence, \$7; Walter Featherston, 165 loads of gravel, \$27.75; H H Barkley, 25 rods of wire fence, \$5; Joseph Bailey, 504 ft. of cedar and two day's work on bridge, 2nd and 3rd concessions, \$28.20, and hauling gravel on Gravel road, \$3.00; J H Boyd, part payment on 30 cords of stone, \$33.75; 112 rods of wire fence, \$16.80, and 64 ft. of cedar, \$2.56; Nelson Casselman, cedar and work on bridge, 2nd and 3rd concessions, \$8.20; Henry Hall, work on bridge, 2nd and 3rd concessions, \$2; council, court of revision and special meeting re McMartin drain, \$20; A. M. Barkley, serving subpoenas re Hess law suit, Barkley creek drain, \$2; Geo. Lane, certified copy of assessment roll, for Cornwall, \$10; Geo. McIntosh, 107 loads of gravel, \$26.75; Silas Swerdfefer, 71 loads of gravel, \$7.10; Geo E Casselman, 24 days' work on Deek's bridge, \$4.12. The council adjourned to meet at Williamsburg on the 7th day of September, at ten o'clock a.m.

4. Teams of harness horses, 15 hands 2 inches and under shown to an appropriate vehicle, \$20, \$10, \$5, H. C.

"BLUE DEVILS"

Get Rid of Indigestion and
Things Will Look
Bright and
Joyous

Even in the present era of prosperity and good times, everything appears black to those people who are suffering wretchedly from some form of indigestion. Where digestion is quick, complete and easy, there is a joyous and hopeful outlook, but indigestion causes depression.

The want of a safe, effective cure for sick headache, indigestion and stomach troubles, was always felt until the prescription known as Mi-o-na stomach tablets was put up in popular form and proved its invaluable success in the many forms of indigestion.

After a few days' use of Mi-o-na stomach tablets, the headache, dizzy feeling, drowsiness, bad taste in the mouth, coated tongue, nervousness, sleeplessness, distress after eating—all these symptoms of a weak stomach—will disappear and perfect digestion and a good skin will show that the vital machinery is once more running smoothly.

Mi-o-na is to be taken before each meal, and it will stimulate the secretive and digestive juices, and strengthen the whole of the digestive system so that the unpleasant full feeling will be absent and indigestion prevented.

We absolutely agree that your money will be refunded should you buy a 50-cent box of Mi-o-na stomach tablets and not be satisfied with the results. Mi-o-na is sold by druggists everywhere, or will be sent by mail on receipt of price, 50 cents. Booth's Mioma Company, Buffalo, N.Y.

MILKING MACHINES.

Some Points in Modern Mechanical Cow Milkers.

Many dairymen find it difficult to secure milkers at a compensation that will allow a fair margin of profit, and especially is this true of many western dairymen.

Milking machines have been more or less talked about and experienced with for the past twenty-five years, but it is their present status that interests the dairy farmer, and Profes-

FOOT POWER MILKER.

or Oscar Erf of Kansas sums this up very neatly:

First.—A milking machine will milk cows as thoroughly as the average milker.

Second.—Some cows give more milk when milked with a machine than when milked by hand; others give less.

Third.—It is extremely necessary for the man in charge to fully understand how to operate a milking machine.

Fourth.—To reach the highest degree of success cows should be selected and bred to respond to machine milking. If this factor is taken into consideration, machine milking will be as successful as the best hand milking.

The cut of a foot power milker is reproduced from a report of the bureau of animal industry on practical studies of a milking machine. This machine is designed for use in small herds and has no stationary fixtures. It consists of a suction pump worked by foot power, two pieces of rubber hose and eight suction cups to be attached to the teats of the two cows, which can be milked at the same time. The milk passes through the cylinder and also through the valve in the pump piston itself. The valve works between the two cows and works the pump with its feet. On opening the spigot the suction rapidly draws the cups over the teats, and the milk begins to flow into the milk pail, which is hung on the spout of the pump. The teat cups are hollow and conical. Nearly an inch from the

POWER MILKER IN USE.

large end the cup is almost closed by a soft rubber diaphragm. This disk, being elastic, fits air tight around the different sized teats.

With power milkers of the class shown in the second cut the milk is drawn by intermittent suction. The suction may be created by either a vacuum pump or a steam ejector. Connected with the vacuum pump is a vacuum reservoir and a pipe running the whole length of the cow stable, with a connection valve or vacuum cock between each pair of cows.

Farm Pointers.

A little grain each day with a little pasture will insure the hogs making a very rapid growth.

As long as an animal is not growing its keep is expensive no matter what it is fed.

No one ever failed in farming by doing work too well, or expending too much labor, if done judiciously.

It is much better to use for breeding animals of average size, smooth, round, plump, and intensely active and vigorous.

It takes food to maintain muscular activity, and food must also be used as a fuel to keep the animal warm.

It is better to underfeed than to overfeed a horse. The first is only a temporary evil but the last often permanently injures the animal.

The churn should never be filled much over half full, and then if the temperature is just right it will churn most easily.

It is always discouraging to be constantly raising inferior animals for which a less price must be taken than others receive for stock which cost no more to raise.

Good tillage is not keeping down the weeds, it is stirring the soil deep and often causing the direct benefit of the crop.

A PLAGUE OF BIRDS.

Protection Has Rendered Them a Nuisance in England.

A prophecy uttered in conversation two years ago by a famous Hungarian naturalist is coming true. He said that in England the birds so assiduously protected would presently turn and rend us. There is no doubt, as many horticulturists and farmers are now beginning to complain, that the balance of nature is being upset. The raid against sparrows organized by Kent farmers is the opening of a wide campaign against several species.

The sparrow is the worst. He has learnt all the vices. He even lives in flats. He has even learned to eat buds.

The bullfinch is rarer, but much more destructive, except to corn. In some of the fruit growing centres trees have been almost killed and entirely stripped of every leaf by tribes of bullfinches, and from an examination of the ruin it is found that the bird itself, not the "worm in the bud," is the object. The farmer is beginning to regard the rook as hardly less offensive than the bullfinch, and a raid similar to the Kent farmers on the sparrow is being meditated. The rook is a natural friend of farmers, especially is he a sworn foe to that most pernicious of pests, the daddy long-legs, but as soon as his numbers increase beyond a proper measure, as in parts of England they have increased, he loses all proper instincts, and serious damage from his depredations is reported.

Many are convinced that sparrows, rooks, carrion crows and starlings should be systematically reduced in the interest of farming all over England, since life has been made so easy for them. But they have acquired verminous inclinations and lost their proper instincts. Extermination, of course, except in case of the sparrow, would be worse than over-protection, but even on behalf of other birds the time has come for redressing nature's balance.

Crows and Pigeons.

In recent years farmers in many parts of the country have been suffering heavy damages by the greatly increased number of crows and wood pigeons, says The Yorkshire Post of Scotland. In the neighborhood of large rookeries much damage is done to farm crops every year, and over a large extent of the country the wood pigeon pest is almost equally destructive. It is, therefore, not surprising that county authorities are moving in the matter. In Dumfriesshire the subject has been thoroughly taken in hand on the initiative of Mr. Johnstone Douglas, convener of the county. The wise step has been taken of calling in the aid of the gamekeepers, who are to give all the assistance they can to the farmers in the reducing of the numbers both of crows and wood pigeons. It is recommended that where there are rookeries the young crows should be destroyed before the potato and turnip crops make their appearance. Leading proprietors of the county have authorized their gamekeepers to further the work of destruction as much as possible, both by themselves and in conjunction with farmers. It would be well if this excellent example were followed largely throughout the country, for by such measures much may be done to lessen the losses inflicted by these winged enemies.

To Raise a Carcass or Weight.
One of my neighbors uses a kind of derrick for lifting carcasses or other heavy weight, says a writer in American Cultivator. After lifting the hog or steer is hung from a common stationary butcher's hook. The lifter is substantially made, the post being of chestnut, tapering from eight inches

FARM DERRICK.

at the bottom to three and one-half inches at the top. Make the iron bearings connecting arm and wheel with stout wrought iron two inches wide, as there are strain and liability of breaking at these points. The wheel was from an old chain pump. It stopped when wanted by blocking a spoke. A blacksmith helped make the iron parts. The lifter can be used without a wheel, simply winding the haul rope around a peg in the post to hold at the right place.

Spraying Potatoes.

Spray potatoes with bordeaux, in which is used some poison, such as paris green, at the rate of four to six ounces in fifty gallons. For early potatoes the first application should be made in June and for medium varieties from July 1 to July 15, while late potatoes may not require treatment before the third week in July. Repeat the application at periods of from two to four weeks. Usually three treatments are sufficient for both the beetles and the fungous troubles as well.

Burial of Sir John Moore.

The city of Corunna, where Sir John Moore was killed, is a seaport at the entrance to the estuary of the Mero river, 315 miles northwest of Madrid. The famous poem by Charles Wolfe is a misrepresentation of the scene of the burial, for Moore was not buried at night with "our lanterns dimly burning," but in the early morning of a rainy day, and the assemblage of English officers round the grave was dispersed by heavy artillery fire from the French batteries, the gunners mistaking the purpose of the gathering.

Diplomacy.

"John," she said, "I notice that almost everybody is wearing earrings now."

"But, my dear," replied John, "if they had such small and shell-like ears as yours they wouldn't clutter them up that way."

Thus did diplomacy, at least for the moment, stave off a contemplated touch.

A Bad Habit.

"No," growled Jigsby, "I don't like that coat at all. I don't want it."
"But," protested the tailor, "the only trouble with it is that it's too large for you. I can alter it—make it smaller for you."

"If you do that, you'll merely contract a bad habit, that's all."

Vigorous Talk.

Diggs-Smith's wife is deaf and dumb. Diggs—Does she talk with her fingers? Diggs—I think so. Smith hasn't a dozen hairs left in his head.

What loneliness is more lonely than
Distrust?—Ellot.

For Sale

Having decided to go farming, I desire to sell my property at North Williamsburg, consisting of about one acre of land, with mill building and machinery for grinding grain. The building contains two finished dwellings. The machinery comprises a 15-h. p. gasoline engine and a Vessot grinder of equal size, all new in 1906. Will sell the machinery with building, or separately, on easy terms.

M. G. CASSELMAN
North Williamsburg, Aug. 12, '07.

Farm For Sale

The N^o. 1 of the W^o. of lot No. 10 and the N^o. 2 of the E^o. of lot No. 11, both in the 2nd concession of the Township of Williamsburg, containing 125 acres more or less. Upon the said premises are a good frame house, good barns and outbuildings. There are 50 acres under cultivation, 40 acres in bush and the balance in pasture. This is a rare bargain.

For further particulars apply to
JAMES R. STYLES,

AULTSVILLE

Mrs. Andrews, of Louisville, N. Y., and Mrs. Hanes and daughter, of Chesterville, Ont., are guests of Mr. and Mrs. A. Whitlow.

Messrs. Dalton and Arthur Loucks, of Montreal, spent Sunday with their parents here.

Mr. Regina Edwards, of Prescott, Ont., spent Sunday and Monday with friends here.

Miss Edith Clark, and Messrs. W. Lane and R. Fetterly, of Morrisburg, spent Sunday with friends here.

Misses Laura and Della Cook, of Morrisburg, spent Sunday at F. Van Allen's.

Mr. and Mrs. Frank Campbell, of Raymondville, N. Y., were in town on Tuesday.

Mrs. Geo. Cook returned home last week after spending a few days with friends in Madrid and Lisbon, N. Y.

Rev. and Mrs. G. I. Campbell who have been visiting at Mr. Ira Campbell's the past week, returned to Ottawa on Tuesday.

Dr. Will Brown and Miss Gertrude Brown, of Chesterville, were guests of Dr. E. L. Brown over Sunday.

Miss Annie Hepburn and Mrs. Casselman, of Morrisburg, were calling on friends here on Saturday.

Mr. Short, of Chase's Mills, N. Y., was in town on Saturday.

Mr. Geo. Adams, of Finch, spent Sunday with friends here.

Mrs. N. Morgan and Mrs. J. S. Morgan and family returned home last week after a few weeks spent at Iroquois and Morrisburg.

Mr. and Mrs. Geo. Stitt, of Port Arthur, are visiting the latter's parents, Mr. and Mrs. H. Lapointe.

Misses Bessie and Mabel Wallace, of Grantley, are guests of their grandparents, Mr. and Mrs. M. Beckstead.

Miss Erma Dafee, of Third Avenue, spent Sunday with friends here.

Mrs. Meeker is spending a few weeks with friends in Quebec.

All the sports of the town took in the Cornwall-Shamrock game in Cornwall on Saturday.

Mr. and Mrs. Elgin Alguire spent a few days in Montreal this week.

Mr. Harris Baker has returned to the Cornwall Commercial College to resume his studies.

Mr. Ernest Johnson is spending a few days at his home here.

Messrs. Geo. Markell and Wm. McCarty, of Brockville, spent Sunday and Monday with their families here.

A party of Mexican Gipsies going west passed through here last week. It was like an old time caravan with its accompaniment of dogs and children. The western country could not have been all that they desired as they returned, going east again on Tuesday.

Miss Lillie Conliff, of Ogdensburg, N. Y., spent the past week at her parental home here.

Miss Weagant, of Archer was the guest of Miss Minnie McNairn last week.

A harvest dinner under the auspices of the Methodist Church of Aultsville and Gallington will be held in Duffin's Grove, just north of the village, on Sept. 11. A good programme of addresses and music by the local clergy. Rev. Hagar, of Moulinette, and Rev. T. Roy, of Osnaburck Centre, and music by Mrs. Kerr, of Morrisburg, and local talent, will be given in the afternoon and a sacred concert in the evening will be given in the Methodist Church, Aultsville. Short addresses will be given and recitations and music by Miss McAmmond and Mrs. Kerr, assisted by local talent. Dinner served from 11.30 to 2, and tea from 4.30 to 6.30. Tickets for dinner, 25c., tea 15c., concert 15c. Should the day be fine this should prove a most enjoyable outing. If the weather is unfavorable dinner and tea will be served in the basement of the church.

A large number from here attended the concert given by the young people of St. Paul's Church at Osnaburck Centre on Friday evening last. About \$25.00 was realized.

Piles get quick and sure relief from Dr. Shoop's Magic Ointment. Please note it is made alone for Piles, and its action is positive and certain. Itching, painful, protruding or blind piles disappear like magic by its use. Large nickel-capped glass jars 50 cents. Sold by D. T. Henderson.

LUNENBURG.

John Mattice, Montreal, spent Sunday here.

R. W. Helmer was in Cornwall on Thursday last.

Miss Ida Patterson, of Cornwall, after a few weeks' visit, returned home on Saturday.

Nurse Shaver, of Cornwall, is the guest of Mrs. Henry Moak.

Miss Gladys Noaks, Montreal, was the guest of Miss Mabel Mattice over Sunday.

Misses Lera Gillis, Laura Shaver and M. Claude Helmer left this week to attend the Cornwall High School.

Contractor Leacy, of Prescott, Township Reeve, J. W. Ranson, and Deputy Reeve, W. C. Markell, were Township business visitors here Monday.

A large crowd attended the lacrosse match in Cornwall on Saturday.

Earl Farrow, Ottawa, spent a few days this week with Glen Shaver.

Jas. Ault has completed his concrete side-walk which improves the looks of his place and the street as well.

The Methodist Church is now undergoing repairs and services are being held in T. S. Gillies' hall.

Mrs. A. Helmer visited Mrs. A. Shaver, Harrison's Corners, Sunday.

OSNABURCK CENTRE

Mr. and Mrs. Alonzo Wereley and daughter Aggie, of Lunenburg, visited relatives at the Centre this week.

Mr. and Mrs. Colin Shaver, of Milwaukee, Wis., returned to that city on Friday night, accompanied by the former's cousin, Glen Osgood, of St. John's, Mich., who has been visiting a host of relatives for the past five weeks.

Mr. Howard Minard, of Winnipeg, was called home to see his father, Lindsay Rupert, who is very low.

Miss Alice Young returned to Portage la Prairie, again this week.

Most of the farmers have their grain cut, which looks exceedingly well considering the amount of rain which has fallen throughout the season.

Geo. N. Shaver made a record trip to Cornwall on Thursday of this week.

Royal Baker, of Montreal, has been here some of his old friends of Osnaburck, a visit.

EAST WILLIAMSBURG

Miss Edna Anderson, of Morrisburg, was the guest of Nettie Salmon's last week.

William Flynn and son Harry, of Aultsville, passed through here on Thursday.

Mr. John Wells has returned home after spending a few weeks with his son, Amos Wells, in Montreal.

Mr. and Mrs. Edgar VanAllen spent Wednesday in Morrisburg.

Miss Louise Cook, of Aultsville, visited friends here on Thursday.

Will Dafee, who has been spending a few days at his home here, returned to Brockville on Wednesday.

Misses Laura and Della Cook, of Morrisburg, are visiting at Frank VanAllen's.

Mr. and Mrs. Alfred Wells and little daughter spent Thursday at Samuel Wells'.

Mr. and Mrs. William McCarey and son Willie and Mr. and Mrs. Frank Shaver were guests at S. M. Dafee's on Sunday.

CASTORIA.

to be imposed on by the parties who demand extreme prices for their land, and as a result the new street will not go through. It is hoped the parties in possession of these Main street lots will build. It will be interesting to watch the stand taken by the next assessor. Possibly real estate will be on the decline by that time and these lots may be purchased at a reasonable figure.

Mr. Jas. Drinkwater is on the sick list.

The race track is in fine shape and some first-class races may be expected during the fair.

Mr. John Clark, an old pioneer of Dundas County, died Sunday morning. His funeral sermon was preached Monday afternoon. The remains were interred at Maple Ridge.

Some of our sports took in the lacrosse game in Cornwall Saturday. They had not returned Monday and were possibly visiting Dan.

Levi Baker is spending his holidays with friends in Montreal.

Rev. James Earle (missionary to China), who leaves here next week, was the recipient of a purse and a farewell address from the members of the Methodist Church Monday evening in the League meeting. He replied very suitably.

GLEN BECKER

Mr. C. M. Munro, of Nation Valley, was here on business Wednesday.

Mr. Simon Barkley, of Winchester, visited friends here on Tuesday.

Willie Bowman has returned home after spending a few days in Roussell.

Mr. Raymond Mouthrop, of Roussell Falls, N. Y., is spending a few days here the guest of his brother, Fred Mouthrop.

Quite a number from here attended the lacrosse match at Cornwall on Saturday.

Messrs. George, Fred and Harry Barkley, of Brockville, spent Monday at The Maples.

Miss May Merkley spent Sunday the guest of Miss Carrie Spent Sunday.

Mr. Alex. Whittaker spent Sunday with friends here.

CLOVERDALE.

Miss Maud Shaver spent Saturday at Aultsville.

Mr. and Mrs. George Dillabough were visitors at Ezra Dillabough's on Monday, the 26th.

Mrs. E. Gove and Miss Beatrice Higgins, spent Wednesday evening at Mrs. G. H. Shaver's.

Mr. and Mrs. Robert Dafee were the guests of Mr. and Mrs. Charles Dafee on Friday.

Mrs. A. F. Reveler and Miss Annie Reveler spent Friday at Geo. Dillabough's.

Masters Harold and Herbert Shaver, second concession, visited their cousin, Miss Maud Shaver, on Friday.

Mrs. Ezra Dillabough spent a few days this week with friends at Flagville and Heuvelton, N. Y.

ARCHER.

Mrs. Ed. Wells and children, of Aultsville, visited at Mrs. Wells' parental home, (Mr. John Cramer), on Thursday and Friday of last week.

Mr. and Mrs. A. W. Weagant were in Aultsville on Friday.

Mr. Alonzo McNairn, of Aultsville, was a business caller in our hamlet on Thursday.

Mrs. Robert Shaw and daughter Annie, were in Gallington on Friday.

Herbert Gallinger and Arthur Heagle took in the excursion to Cornwall on Saturday last.

Mrs. Froats has returned home after spending a few weeks with her sister, Mrs. Wells, at Hoasic.

Frank Wilman was in Aultsville on Saturday evening.

Miss Mary Weagant returned home on Sunday accompanied by Miss Evelyn Donnelly, of Nuell Bush, who spent the day with her.

Norman Weayer was in Aultsville on Friday.

Mrs. George Markell and Miss Flora McArthur, of Markell, visited at Maple Hill Farm on Monday.

Charles Froats was in Aultsville on Wednesday of last week.

WINCHESTER SPRINGS

Mr. and Mrs. Hugh Allison, Bouck Hill, were the guests of Mr. and Mrs. Tom McQuaig on Sunday.

Mr. and Mrs. Chas. Gray, of Berwick, spent a few days this week with her grandparents, Mr. and Mrs. Solomon Coons.

Miss Maggie Davidson is visiting friends at Kemptville.

Mr. John B. McQuaig has rented his house and lot above the village to Mr. Joseph Niblock. Mr. McQuaig intends about the last of the month to move to Winchester.

Miss Bessie and Mary McIntosh and Miss Jessie Carruthers spent Wednesday last with friends at Williamsburg.

Mr. and Mrs. Stanley McIntosh spent Sunday with the former's parents at Williamsburg.

Mr. and Mrs. Garron and daughter, Jennie, spent Wednesday with friends at Nation Valley.

Many of our young people took in the concert at Dunbar last week.

Mrs. James Launshway and sister, Mrs. Rose, of Mountain Station, visited Mr. and Mrs. Wm. Davidson last week.

Mr. Oren Casselman and son, Arnold, were visiting friends at Williamsburg on Saturday.

Mr. and Mrs. Percy McIntosh and family spent Sunday with the latter's parents at Williamsburg.

Mr. and Mrs. Thomas Eastwood, of Williamsburg, visited friends here this week.

Don't say a word to the reeve and deputy-reeves of Williamsburg and Winchester about our unfinished, disgraceful bridge. Election will soon be here and then we will again hear their fine promises. Will the people of this place listen then or will it be time to act? Enough said.

Miss Gertie McIntosh, who has spent the summer with her sister in Toronto, returned home Saturday.

I'll stop your pain free. To show you first—before you spend a penny—what my Pink Pain Tablets can do, I will mail you free, a Trial Package of them—Dr. Shoop's Headache Tablets, Neuralgia, Headache, Toothache, Period Pains, etc., are due alone to blood congestion. Dr. Shoop's Headache Tablets simply kill pain by coaxing away the unnatural blood pressure. That is all. Address Dr. Shoop, Racine, Wis. Sold by D. T. Henderson.

OGDENSBURG, N. Y. FAIR AND HORSE SHOW

SEPTEMBER 24, 25, 26, 27, 1907

THE PEER OF ALL--SOME IMITATE, BUT NONE EQUAL

Educational, Interesting and Entertaining

IT IS ONE OF THE LEADING OUT-DOOR HORSE SHOWS of both the United States and Canada and will bring together horses as fine as can be seen at any exhibition in the world. The exhibition of Cattle will be large in number and in quality cannot be excelled. The show of Poultry will be immense and all fanciers in this line will be more than pleased. All who are interested in Sheep and Swine will find many animals that will attract their attention. The display of Dairy Products will be unusually large. Trotting, Pacing and Running Races every day. Remember all entries of Horses, Cattle, Sheep, Swine and Poultry must be made on or before Tuesday, September 17th.

Floral Hall

"A Thing of Beauty is a Joy Forever."

This year Floral Hall will be a thing of beauty. The managers have made arrangements at great expense with the celebrated florist, John Lawrence, for the erection of a mammoth pyramid of cut flowers, flowering plants, ornamental plants, etc., etc., in the centre of the hall.

It will be magnificent and will be viewed with pleasure and admiration by thousands who visit the Fair.

MUSIC

Those who listened to the music at the Ogdensburg Fair and Horse Show last year, remember it with pleasure. This year it will be excelled.

Signor Guiseppe Sirignano

Acknowledged to be the greatest leader Italy ever sent to our shores, will be present with his famous

Banda-Roma of Forty Pieces.

It is considered to be the finest Italian musical organization in the United States. This band will be on the grounds the last three days of the Fair.

Grand Concert

Thursday evening, September 26th, a Grand Operatic Concert will be given in the Opera House by

Miss Bessie Abbot

Of the Grand Opera House, Paris, and the Metropolitan Opera House, New York. Miss Abbot is one of the greatest of living sopranos and her singing has attracted the notice of the music loving people of the world.

Signor Campanari

Of the Metropolitan Opera House, New York. One of the leading baritones of the day. Has no equal.

Signor Ed. Castellano

Grand Opera House, Milan. One of the finest tenors in this country.

These artists will be assisted by the full Banda-Roma. No such musical treat was ever offered in this section of the country.

The Managers extend a cordial invitation to the people of Northern New York and Canada to attend and exhibit.

The Greatest and Best of all.

It will be a Gala Week

ROBT. J. DONAHUE,
Treasurer.

LOUIS C. NASH,
Secretary.

Farm For Sale

The undersigned hereby offers for sale his farm, being the old Frank Beckstead farm, on Lot 23, in the 4th Concession of Williamsburg, containing 180 acres, 120 acres of which are under cultivation, 5 acres of wooded land, and the balance rough pasture; all well fenced; frame house, built about five years, well finished; good barn and stables; four wells on property; within three-quarters of a mile from cheese factory and schoolhouse; six miles from Morrisburg and 14 miles from Bouck's Hill. Will be sold with or without stock. Apply to

D. B. STILLSON,
Bouck's Hill P. O.

THE HAY BARRACK.

Small Outdoor Shelter For Hay With Movable Roof.

Whenever we refer to the hay barrack used in Pennsylvania, New Jersey and other eastern states we are asked what a barrack is. We therefore show one in the accompanying figure, says Rural New Yorker.

The picture was made by E. E. Hor-

A HAY BARRACK IN NEW JERSEY.

ton of Morris county, N. J. As will be seen, a barrack is a small outdoor shelter for hay. Four strong posts support a square roof which may be raised or lowered as desired. The hay is pitched into the barrack as it would be into a stack, and after it settles the roof is let down to keep out the rain. It is really a square stack with a roof.

Poultry Notes.

From the large number of incubators that are being sold, we conclude that the business of hatching chickens this season will be more extensive than ever, but whether there will be more chickens raised to maturity, is another question.

At this time of the year people get enthusiastic over the hatching of chickens. They rush to the dealer for an incubator, or chase all over the country for some sitting hens, as if a few days made a great difference in the hatching of them. This enthusiasm and activity may be all right, but after the chicks are hatched, their interest seems to wane, and they do not give the proper care and attention to the raising of the chicks, and here is where our protest comes in.

A great many people make no preparation whatever for the rearing of the chicks. They will buy incubators, but think they can get along all right without a brooder, whereas the latter is as much a necessity as the former. In fact, one without the other is worthless. It pains us to see and hear of so many chicks being hatched and then learn of their dwindling away and dying by the hundreds. The hatching of the chick is only one part of the business, and the most important part comes afterwards in the raising of the same.

Warmth, sunshine, proper food, and proper care are the four requisites in the rearing of chicks. The farmer must be provided in the shape of a good brooder or a brooding hen. They should have all the sunshine possible. The proper feed is now considered to be the dry feeding method, consisting of different varieties of small grains and seeds, with clean water for them to drink. The proper care is to see that they are kept free from lice and their quarters scrupulously clean. If these directions are followed the difference between the chickens hatched and the chickens raised will be much less.

Playing Railroad.

Irate Parent—Here! What is all this racket? Bobby—Please, papa, we are playing a train of cars, and I am the locomotive. Irate Parent—You are the locomotive, eh? Well, I think I'll just switch you.

Well Acquainted.

Magistrate—Stay! I cannot allow you to address the bench in this familiar manner. Prisoner—Beg your honor's pardon, but you and me has met so often we seems like old friends.

It is only by labor that thought can be made healthy, and only by thought that labor can be made happy.—Ruskin.

The Red Badge of Bravery.

Once in Northern India a detachment of soldiers were led against a band of robbers who had entrenched themselves in a strong position at the head of a narrow gorge. The troops were marching along the valley between the steep sides, when a sergeant and eleven men separated from the rest by taking the wrong side of the ravine. The officer in command signalled them to return, but they mistook the signal for a command to charge. For a moment they looked up the rocky heights, and saw their enemies above the ramparts. Then, with a ringing cheer, they clambered up the steep side. At the top were seventy robbers sheltered behind a breastwork. It was a desperate encounter, but against such odds it could not last long. Six fell on the spot—the rest were hurled backward into the depths below.

Now it was a custom in that nation when any of their bravest fell in battle to distinguish the most valiant by a thread tied round the wrist—a thread of red and green silk, red denoting the greatest courage. Some little time afterwards the English troops found the twelve bodies stark and gashed, but round the wrist of each was tied the scarlet thread—the distinction of the hero.—Rev. Mark Grey Pearce.

AN OLD PROVERB.

"A Penny Saved Is a Penny Earned" Is Almost Universal.

Like most of these wise old proverbs, "a penny saved is a penny earned" is probably, in some form or other, universal. In Germany there are three forms of it—"A penny saved is a penny gained" ("Ersparter Pfennig ist so gut wie erworben"), "A penny saved is twopenny got" ("Ein ersparter Pfennig ist zweimal verdient") and "Penny is penny's brother" ("Pfennig ist Pfennig's Bruder"). In Spanish, "A penny spared is a penny saved" ("Quien come y dexa, dos veces pone la mesa"). In Dutch, "A penny spared is better than a florin gained" ("Een stuiver gespaard is beter dan een gulden gewonnen"). In Danish, "A penny in time is as good as a dollar" ("En Skilling er i Tide saa god som en Daler"). In French, "Saving is getting" ("Qui epargne, gagne"). Similarly in German, "Saving is a greater art than gaining" ("Sparen ist grossere kunst als erwerben"). Danish, "Money saved is as good as money gained" ("Den Penge man sparer er saa god som den man avler"). Italian, "Money is money's brother" ("Il danaro e fratello del danaro"). But money is no gain when it "advances meacocks" ("Deniers avancent les bedouins"). English, "Penny and penny laid up will be many," and "Who will not keep a penny shall never have many"—he who is prodigal of little can never have a great deal.—London Notes and Queries.

THE TELEPHONE.

What It Means When the Operator Announces "Line Busy."

It is easier for an operator to establish a connection than reply, "Line busy." Recollection of this simple fact may perhaps smooth out the asperities of a state of mind evoked by a hasty conclusion that the operator simply is shirking. Follow a call into the main exchange, for example. You ask for a certain number. The operator immediately informs you the line is busy. How does she know? Simply by a little auditory click in the receiver when she tries to "plug in" on the line asked for. She cannot tell you who is talking on the line, how long it has been in use or how long it is likely to be "busy." All the information she possesses is a click, but it is sufficient to advise her that some one of the 150 other operators in the exchange had a prior call from or to that number. Had the line been clear the effort to complete the connection would have been no greater than that required to get the click; hence the task of informing a caller that the line is busy is just so much extra labor—in fact, it involves a double burden, as the subscriber will usually repeat the call until he is able to transact his business. Obviously, therefore, the desire of the operator is to establish the connection when it is first called for. She has no motive in doing otherwise.

Ducking the Scold in Old Times.

The last instance of curing scolds by ducking them carried out in England was in 1801 at Kingston-on-Thames. A contemporary newspaper records such an event in 1745: "Last week a woman that keeps the Queen's Head ale house at Kingston, in Surrey, was ordered by the court to be ducked for scolding and was accordingly placed in the chair and ducked in the river Thames under Kingston bridge in the presence of 2,000 or 3,000 people." In Queen Elizabeth's time ducking was the universal punishment for scolds, and it appears that each town had then at least one of these penitential chairs in ordinary use. Dr. Johnson once said to Mrs. Knowles, "Madam, we have different modes of restraining evils—stocks for the men, a ducking stool for women and a pound for beasts."—Westminster Gazette.

Consolation Somewhere.

They had been husband and wife for three months only when the young wife commenced to show signs of disappointment with the bargain she had made.

"I am so unhappy," she confided to a girl friend who paid her a visit.

"Why, dear?" inquired the other.

"I am beginning to think that my husband married me for my money."

"Well," remarked the philosophical confidante, "it ought to be some consolation to know that he isn't such a big fool as he looks."—London Tatler.

Schopenhauer on Courage.

I cannot well explain why cowardice seems contemptible and personal courage a noble and sublime thing, for no lower point of view enables me to see why a finite individual who is everything to himself—nay, who is himself even the very fundamental condition of the existence of the rest of the world—should not put his own preservation above every other aim.

The Doctor's Lessons in Patience.

Among my professional acquaintances, writes a young doctor in the Saturday Evening Post, perhaps 15 per cent of all bills rendered come to nothing, or practically that, unless their value as teaching a lesson in patience be considered.

Not Lost.

Traveler (to ferryman crossing the river)—Has any one ever been lost in this stream? Boatman—No, sir. Some professor was drowned here last spring, but they found him after looking for two weeks.

50c. at Drug Stores or by Mail. 89 THE CASLIN CHEMICAL CO. LIMITED, WINDSOR, ONT.

Youthful Essayists.

In the Hull elementary schools a prize was offered for the best essay on the evils of drink, and nearly 12,000 pupils competed. Extracts from their compositions were given by Dr. Eccles in a lecture before the Society For the Study of Intemperance. He quoted the following gems:

"Today many people are in jail for committing suicide while under the influence of drink."

"Alcohol has an effect upon a medical man's conclusions."

"Doctors say that fatal diseases are the worst."

"Doctors say that the increased death rate shortens lives."

"Some people think that the abuse of drink is right; some take it as a medicine."—London Tit-Bits.

In the Waist.

She was examining her new waist by the aid of the big mirror. "Dear me," she exclaimed pettishly, "I can't see anything pretty in this!"

"Well, I can," chuckled the young man who was sitting on the sofa.

"Really! And what do you see pretty in it?"

"Why, you."

And then she blushed and said she thought the waist was just too lovely for anything.

Progress.

Progress in the sense of acquisition is something, but progress in the sense of being is a great deal more. To grow higher, deeper, wider as the years go on, to conquer difficulties and to acquire more and more power, to feel all one's faculties unfolding and truth descending into the soul—this makes life worth living.

Tart Reply.

Mrs. Hanton (maliciously)—You were such a charming debutante, my dear, fifteen years ago. Mrs. Ingles—Was I? I only remember you made such a lovely chaperon for me when I came to London Tit-Bits.

"Why Wrote to Any Husband?"

"Hanging it all, my cigar's gone out," he said. "It spoils a cigar, no matter how good it may be, if you let it go out." "A cigar," she observed, "is in that matter not unlike a man."

A Popular Recreation.

"Where are you going, Sandy?" said one Scotchman to another. "Down to the club," said Sandy. "And what for?" "Just to contradict a wee bit."

PRICE OF A LIFE.

Willing Murderers Plenty in the Slums of London.

I am told that a ten pound note will buy a man's life in London—that any unsuspecting person can fall into the Thames on a dark night or break his neck going round a slippery dark corner or fall under a van if a little bit of crisp paper changes hands, says a London writer.

I know that a very distinguished playwright, wishing to work out the plot of a melodrama, went into a high class den of thieves, made friends with some of the leaders and unfolded to them as something he wished to put into execution the plan he had devised for his villain's act.

He told his listeners that there was a very important financier he wanted out of the way for forty-eight hours while he played the very dickens on the Stock Exchange with the stocks the financier controlled. He suggested to his listeners that an attractive lady and a yacht would be the simplest means of insuring this object.

His hearers concurred. They knew the very yacht for the purpose. A shipper and a crew could easily be produced, and concealing the lady there would be no difficulty whatever.

"Then, after the forty-eight hours, we will of course bring him back," said the dramatist brightly, thinking of his fourth act.

A cloud came over the faces of his audience: "Well, gov'ner, of course, if you wish it, but it would save such a lot of questions being asked if he just went quietly overboard," the spokesman suggested.

THE WHITE LADY.

Warning Death Phantom of the Reigning House of Prussia.

On the night before the battle of Snafield Prince Louis of Prussia and his adjutant, Count Nostitz, were chatting in the Schloss Schwarzburg-Rudolstadt. The prince was anticipating victory when he suddenly turned pale and rushed from the room, pursuing through the hall a shadowy white robed figure. The sentinel saw it also.

Next day Nostitz and the prince saw the white lady on a hill wringing her hands in despair as the Germans fell back. A few minutes later Louis was killed and Nostitz wounded. Nostitz told the story to his son, and the son to Unser Fritz.

The white lady's first appearance was when she was seen in the palace at Baireuth in 1486. She appeared eight or ten times in the next century. When the French officers were quartered in Baireuth she frightened them, in particular General d'Esparne, who, the day after he had been defeated, refused to "sneak" on the wall and cried: "It is I! That means my death!" He was killed soon afterward.

The superstitious Napoleon wouldn't sleep in the castle, but the white lady went to see him elsewhere. She was seen before the death of the beautiful Queen Louise, of Frederick William III., of Frederick William IV., of Unser Fritz himself and of many other members of the reigning house of Prussia.

A NEW STRAWBERRY.

Very Promising Variety That Makes a Beautiful Fruiting Row.

The following description of the King Edward strawberry introduced in 1905 and here shown is given by the Ohio Experiment Station:

Large, bluntly conical, very slightly necked, regular, uniform; color bright, fresh crimson when fully matured, glossy and attractive. Flesh light in color, firm, fine grained, mild, sweet and good in flavor. Flowers

KING EDWARD STRAWBERRY.

perfect. First blossoms May 7, full bloom May 21. First ripe fruit June 9; period of heaviest fruiting June 15 to 23; largest single picking June 18—three and one-half quarts; last picking June 25; total yield for the season eleven and one-half quarts. Plants large, vigorous, light green in color, making a beautiful fruiting row. A very promising variety originating in Holmes county, Ohio, where it is reported as having done exceedingly well again this season.

Farm Notes.

A cool-headed driver makes a cool headed horse.

Quick fattening lowers the cost of production.

In successful farming the principle that like begets like must be controlling.

The chances of good crops are always improved by thorough tillage and heavy fertilization.

One of the best places to apply manure is on clover sod intended for corn.

Breeding and stock-raising need not be without well defined purpose and positive results.

One advantage in a good system of rotation is that the mechanical condition of the soil is improved.

The management and care of the stock of the farm will decide to a great extent its profitability.

There is no economy whatever in raising an animal that will not meet ready sale at good prices.

After a good soaking shower is the best time in the world for hand weeding, but the poorest for hoeing.

Feeding, locality, and judicious selection of parents on both sides are powerful factors in producing good stock of all descriptions.

A clover crop adds largely to the amount of organic matter in the soil, and facilitates the absorption of moisture.

While a well balanced ration is desirable, a proper balanced ration is as well as in food constituents must be considered.

The horse must always be handled with kindness, care, and firmness to insure its being a sure, safe, and obedient animal.

Produce sold from the farm is gone forever. That which is fed on the farm leaves a residuum of good manure to keep up the fertility of the land.

The Trouble With Clover.

One of the serious difficulties confronting the progressive farmer who would maintain a crop rotation in which clover forms a part is that encountered in the serious winter killing of his clover, and this is a condition that is often encountered in many sections of the north.

With clover seed that is worthy the name costing all the way from \$9 to \$11 per bushel the sowing of very much of it looks to the average farmer like a good deal of a speculation. True, considerable benefit results from a ploughing under of the first season's growth, but this is inconsiderable compared with that which comes from taking off a crop of hay and ploughing under the second growth in the early fall. It is hoped that the hardy Siberian alfalfa, seed of which was secured by Prof. Hansen, will be adapted to the north central states and serve as a substitute for the red clover, which is always profitable when it does not winter kill.

Dock the Lambs Early.

One of the gravest mistakes and most needless ones a shepherd can make is to leave the docking of the lambs till they are large or several months old. This trimming business can be attended to when the lambs are young and before heat and flies make the job an unnecessarily painful and risky one. When lambs are a few days old, the tails can be taken off with scarcely any pain and with no risk whatever.

A few days later the other work can be done, and all will be well. To defer this is only to make a harder job of it and a more risky one, and often a flock of lambs is set back by it fully a month's growth. If done early, the lambs will notice it but very little, and if the weather is favorable, not at all.

About a Poultry House.

A hen will roost out on a tree all winter and seldom catch a cold, but shut her up in a warm house with a little crack in the wall and she will wake up some morning with her eyes swollen shut. Leave one whole end of the house open if necessary, but close up all the small openings. If a cold is noticed bathe the head with coal-oil and inject a few drops into the nostrils.

A GHOST STORY.

The Crowd of Phantoms That Dazed Three Young Women.

An experience wherein phantoms presented themselves to view in prodigious numbers simultaneously is related by a young lady whose name, at her request, is withheld, the narrative being indorsed by her sister, who was with her at the time. She writes:

"One autumn night my sister and myself, with our maid, were returning from evening service in the village church. There was a thick fog. The moon was full, but it made a sort of steam in the fog instead of shining brightly. Suddenly I saw a man at my sister's side, who had come there without making a sound. I pulled her sleeve, whispering, 'Let the man pass.' As I spoke the man disappeared.

"In another moment we were all bewildered at the sight around us. It was as if we were in a crowded street, innumerable figures surrounding us. Men, women and children were moving briskly about, some singly, others in groups, but all without a sound. Some seemed to rise out of the grass on either side of us and to come out on the other side. The women were dressed in bygone fashion, with high bonnets and shawls and large flounces on their dresses.

"There was one very tall man who took great strides, though perfectly motionless. We approached our own gate, where we should turn in, and then we had a long driveway to walk up before we could reach the house. I think that by the time we had reached the gate all the figures had disappeared except this one tall man. He had quite a different look from any of the others—more horrible altogether. As we entered our gate, to our intense relief, he passed by along the road and vanished. Of course we were all very frightened. The maid and my sister were crying aloud."

In a case like this, where the same spectral phenomena are witnessed by several persons, the value of the testimony obviously is multiplied a hundredfold, for, while one individual may be a victim of a hallucination, such an illusion can hardly be shared by many. What, then, is to be said in answer to such evidence, furnished by deponents of unimpeachable character and reputation for truthfulness? To suppose that they are combining in the manufacture of a lie is scarcely reasonable. —Joseph M. Rogers in Lippincott's.

The Invention of Armor.

The idea of the invention of armor for the protection of the body from weapons came from the ancients, who, noticing the natural armor of various kinds of animals, particularly the armadillo, imitated it. In early times before metal was used in armor making the warriors used rough hides of great thicknesses, and the first armor ever worn was made from slices taken from the hoofs of horses and fastened together with pegs. Fish scales and the scales of tortoise were also gathered and fastened together until they formed a thick layer and were used as armor. The armor of the middle ages was a continuation of the ancient kind, made in the form of scales of iron or steel. Certain kinds of mail used in early times in England were copied from the shells of crabs and lobsters.

First Thought In Danger.

"Talking of the foolish things one thinks about even when in the midst of danger," remarked one of a group the other night, "I had promised my wife never to travel at night, and it is something I have always avoided, but necessity compelled it a few weeks ago, and as luck would have it there was an accident and the cars were derailed. As the one in which I had my berth was rolling down an embankment and I was in the midst of blankets, pillows, grips, etc., the terrible thought flashed across my mind: 'What shall I tell Molly? Here I am traveling at night!'"

The Earliest Anchors.

The earliest anchors of which we have any record were of wood, and gradually, through the iron anchor of one hook and the anchor in the shape of a rake, there was evolved the anchor with the straight thick shank, the two curving arms with flattened extremities and the long cross stock. The process of storing one of these old anchors was a long and laborious one. It was hove close up to the capstan or windlass; a man was let down by rope to hook on a huge tackle, by which the anchor was then hoisted, still perpendicular, to a stout projecting timber. Then the lower end had to be hoisted up horizontally by another tackle and the whole made fast. In the modern stockless anchor a chain is attached to it at the balancing point, and this is passed through a pulley at the head of the anchor davit. When the anchor is high enough, davit and all swing round until the anchor is over the billboard, where it rests and is secured by chains.—London Globe.
