

## Valuable Information to Our Members

One of the basic Principles of a Co-Operative Organization is giving valuable information to its members.

Our Live Stock Shipping Department like all other of the Co-Operative Company has proved a great success. Owing to increased business offering and our desire to meet the wishes of our shareholders we will load every Monday hereafter. The returns for the past two shipments netted the farmers for

January 17th, Hogs \$16.30; Calves \$14.50.  
January 31st, Hogs \$16.00; Calves \$14.00.  
Call on us for further information or Phone 38.

### FEED DEPARTMENT

We have on hand corn, wheat, oats, bran, shorts, at reduced prices.

We handle Cane Mola Molasses at 42 cents per gallon by the barrel (50 gallons). It is a good feeding tonic. Give it a trial and be convinced.

We expect increased business for the next two months in order to keep our staff steadily employed. It is therefore up to you Mr. Farmer to give us a BOOST and remember the more business we do the less our overhead expenses will be and the more will be paid to you in Co-Operative Dividends.

THE UNITED FARMERS CO-OPERATIVE CO., LIMITED  
DUNDAS COUNTY BRANCH  
Morrisburg, Ontario.

## Stewart Hand Power Horse Clippers

It will save you time, labor, and money, and will keep your horses and cows in better health.

One of the Most Highly Perfected Machines, it runs easily and clips very fast. The Clipper parts are interchangeable; gearing is all closed in a metal casing so that dirt and dust are excluded. Clogs are cut from solid metal. It has a 6-foot flexible shaft, enabling all parts of the horse to be easily reached. The one-nut tension allows easy adjustment. Blades are carefully hardened, ground and polished to a very keen cutting edge.

Complete Clipping Machine \$14.75

### HORSE CLIPPER PLATES

Top and bottom plates for both the old and new style Stewart Power Clippers.

Horse clippers, Genuine Newmarket, accurate, clean and smooth; centre adjustment. Plates have 3-inch cutting surface; 9-inch steel handles with hardwood grips.

### STUFFED COLLAR PADS

Are the only guarantee against bruised, galled and chafed shoulders. They are better than other kinds, being soft, springy and absorbent. They make possible the continued use of a horse collar long after its worn condition would otherwise compel its discontinuance. It gives the hook a firmer hold and prevents pulling off, even though fabric is weakened by long usage. Life of pad is thus materially lengthened.

MORRISBURG — ONTARIO

### WILLIAMSBURG COUNCIL

The Council met at Williamsburg on Saturday, February 12th, 1921. Members all present. Minutes of previous meeting were read and adopted. The Reeve was authorized to get legal advice and to take whatever steps necessary to secure the payment of all unpaid taxes. A petition was adopted and forwarded to the Hon. E. C. Drury, Premier of Ontario, praying the Legislature to adopt the report of the special committee of the Legislature, providing for a more equalized distribution of the cost of transmitting Hydro light and power throughout the Province. Morley-Bowman and Henry Wells were given till the 16th of February to complete the collection of taxes in their wards. The tender of Alva Sullivan for the Swerdfeger Drain debentures at par was accepted. F. M. Eagleson of the village of Winchester was appointed Township Engineer under the Ditches and Watercourses Act. As the Ontario Legislature passed an act at last session making it compulsory for all dogs to have tags after the first of April 1921, a by-law was passed to that effect. The auditor's report was received and adopted and the Clerk was authorized to have the abstract statement published in the Record and Leader. As the Auditors report shows over \$8500.00 of unpaid taxes at end of December, the Reeve and Deputy Reeve were appointed a committee to enquire into the matter and to recommend some plan to the council whereby taxes would be more promptly paid. The appointing of a township road supt. was laid over for further consideration. The following officers were appointed for current year.

Tax Collectors—  
S. E. Ward—Geo A. Casselman.  
S. W. Ward—Morley Bowman.  
N. E. Ward—Henry Wells.  
N. W. Ward—Ora McIntosh.  
Fence Viewers—Isaiah Fetterly, Owen Coughlar, Merton Saddlemire, Wm. Thompson, Geo. A. Fetterly, Chas. Brown, H. G. Froats, Wm. Wallace, Melvin McIntosh, Adam Carlyle and Arthur Beckstead.

Pound Keepers—J. D. Dain, Alf. Hall, Rufus Casselman, C. O'Shaughnessy, Niles Cramer, George Cramer, Jessie I. Casselman, T. F. Merkley, Geo. McKenzie, Elgar Casselman, W. A. VanAllen, Jacob Whitteker, Isalah Fetterly, Frank Wells, Abram Bailey, Edgar Barkley, Geo. H. Merkley, James Gow, John M. Casselman, Wesley Dawson, Len Barkley, Abram Hess, Frank Casselman, H. H. Barkley, James Pruner, Henry Garlough, C. H. Casselman, John Weegar, Chas. Hart, Bernice McIntosh, R. Mattice, Rube Carkner, Rube Hunter, Howard Merkley, Adam McHaffie, Arthur Thom, Roy Schell, Peter Droppo, R. O. Gallinger, L. Dillabough, John Warren, A. H. Beckstead, Thos Casselman, Orrin Casselman, Miles Mar sells, John Dillabough, Peter Merkley, Geo. Cunningham, Ah. McMillan, John Barkley, Isalah Whitteker, Silas Merkley, George Casselman, Calvin Gallinger, C. D. O'Shaughnessy, Mason Robinson, Geo. Hess, Sam Swerdfeger, Ezra Garlough.

The following accounts were passed  
R. I. Pruner, salary, collector \$25.00  
Guy Loucks, dragging road .. 5.00  
Frank Whitteker, salary as auditor .. 15.00  
Anson Becker, salary as auditor .. 15.00  
G.T.R. maintenance, crossing gates .. 26.13  
S. D. Thorpe, grant County Board of Agriculture .. 15.00  
Leader Publishing Co., printing re township .. 78.13  
Leader Pub. Co., printing re Swerdfeger Drain .. 5.25  
The Council adjourned to meet again in Froat's Hall Williamsburg on Saturday March 5th, 1921, at 1 o'clock.

M. S. BECKSTEAD, Clerk

### HERBERT'S GREATER MINSTRELS

It has been a long time since the theatre goers of this city have had an opportunity to see an old time minstrel show, given by genuine negro talent from the south land, and giving the same performance that we are wont to see given by white performers, in burnt corn disguise. The name of Herbert may not mean much to you who live many miles from the home and regular territory played by this company. In the south land the name is well known to theatre goers, as the embodiment of all that is famous as the best singing organization that ever graced a minstrel first part setting. In addition to the sweet singing voices, that make harmony such as is seldom heard, it is an accepted fact that no such dancers in all the world of minstrelsy can in any way compare with the nimble-footed artists with this company. Herberts Minstrels will be at the Music Hall February 25th. The best dressed minstrel parade ever offered will be on the streets at 3.10 p.m., and with it will be the Great Adams—a wonder surprise.

### MISS MARY O'BOYLE

Miss Mary O'Boyle aged 16 years, daughter of Mr. and Mrs. W. J. O'Boyle passed away at St. Vincent de Paul Hospital, Brockville, on Wednesday morning, February 16th 1921. About two weeks ago she suddenly became ill with an attack of appendicitis, and was removed to Brockville where she underwent an operation. Although her physicians were from the first, doubtful about her recovery, it was hoped that the faithful and tender care of nurses and relatives would pull her through the severe physical strain of a critical operation but complications set in and all that was done proved of no avail.

The news of her death was received with general regret, and particularly so by her school mates, with whom she had become a favorite.

Deceased was born in Montreal, and came to reside in Morrisburg with her parents in June last. She is survived by her parents, three sisters and one brother: Kathleen, Cecilia, Annie and Bernard, all at home.

The funeral took place from the family residence to St. Mary's Church at 9 a.m. Friday morning, Rev. Father Scott officiating. The remains were placed in the vault.

### MR. JOHN HALL

At his home in Glen Becker, on Friday, February 11th, there passed away an aged and respected resident of the township in the person of Mr. John Hall, at the advanced age of 81 years. The funeral service was held on Monday afternoon at 1 p.m. in the Lutheran Church, Williamsburg, Rev. Isler officiating.

He is survived by three sons, Geo. William and Isaac of Glen Becker, and Clinton of San Francisco; also survived by three brothers and one sister, Luther of Dundela, James of Glen Becker and Mel. Hall in the United States, and Mrs. Lucy Phillips of this town.

### SUCCESSFUL MASQUERADE

The Masquerade and ice races held on the local rink on Monday was one of the most pleasing events of the season. The rink was well lighted, the ice was good, and the weather was perfect. Over two hundred people from town and surrounding were in attendance.

The prizes were awarded as follows.

#### RACES—

- 1—Roy Casselman.
- 2—Wm. Snider.

#### COSTUMES—

- 1—"Jester" Harriet Stony.
- 2—"Witch", Florence Cook.
- 1—"Indian", Ralph Ashton.
- 2—"Indian Chief", John Casselman.

### PUBLIC SCHOOL

Sr. First Class—  
Ralph Ashton, Edna Uiman, Rita Laurin, George Baker, John VanAllen, Rose Taylor, Percy Reid, Craig Merkley, Glenn Hummell.

Jr. First Class—Sheridan Casselman, Arthur VanAllen, Raymond Empey, Robert Merkley, Jean Meikle, Donald Myers, Giles Harper, Arlington Gamble, Arthur Gogo, Eric Roy, John Hartell.

Sr. Primer Class—Muriel Weegar, Malcolm Pruner, Helen Janack, Jean Vipond, George Smith, Spencer Clark, George Weegar, Mary Hummell, Ida Gogo.

Number enrolled 30. Average attendance 26.

### M. SMITH.

ROOM F CLASS A—  
Marjorie Duprau, Annie O'Boyle, Audrey Myers, George Aikman, Lloyd VanAllen, Gertrude Casselman, Marion Mullin.

CLASS B—  
Audrey Daley, Kathleen Clark, Herman Smith, Eleanor Miller, Darwin Stata.

CLASS C—  
Ora Casselman, John Millward, Ronald Ryan, Ruskin Cotnam, Aden O'Shaughnessy, Hubert Holmes, Marjorie Hutt, Dorothy Beckstead, Joseph Bourette.

CLASS D—Gertie VanAllen, Teresa Empey, Marion Gamble.  
No. enrolled 41. Average attendance 33.

### GERTRUDE CAMPBELL

### OATS AND FEED

I expect one carload of oats and feed the early part of the week. Oats will sell at \$2.00 per cwt.; and Standard Feed at \$1.65 per cwt. We also have in stock ground barley, Standard Feed and Corn.

H. A. MERKLEY,  
Morrisburg, Ont.

### BORN

Powell—At St. Catharines, Ont., on February 11th, 1921 to Mr. and Mrs. Frank Powell, a son—still-born.

### BORN

Weagant—At Hoasic, Friday, Feb. 11th, to Mr. and Mrs. Robert S. Weagant, a son.

### BORN

Casselman—To Mr. and Mrs. Grant Casselman Williamsburg, a daughter, Geraldine Gertrude.

## The Voice in The Night

### PART II.

However, even thus protected, I suffered severely. It was as dark as nothingness. My horse was a bay; and even his rump was invisible to me as I sat in the seat of the buggy. The rain was like a cloud-burst; and, to make matters worse, the wind was almost directly in my face. Thus the rain and the flying drift were blown in over the robe, and, even through my heavy coat, I was drenched and cold. The journey was not a pleasant one. I passed gradually outside the town, left the last houses behind me, and struck the mud of the country roads. The wheels of the buggy lurched into puddles and slid in the thick mud, and stuck and pulled loose with little sounds like those made by the removal of a cork from a bottle. I could hear the feet of my horse plunging through the mud, but I could not see his efforts. It was folly to attempt to guide him; and so I let the beast pick his own way through the night.

In the end, he brought me safely to my destination, and I saw a lantern in the carriage shed to guide me. I drove in and blanketed the horse and made him fast. He was of an independent turn of mind, and had, now and then, left me at the home of some patient and trotted off to his home stable. I had no wish to be left alone on such a night, and I was careful to fasten him securely.

Then, taking the lantern, I made my way to the house. Even in this brief passage, the dreadful thrust and buffeting of the wind and rain seemed to sap my strength. I found a side door. It opened under my hand and I entered.

The woman who had sent for me was alone in a room on the lower floor. I knew she had no servant, and so did not knock or summon her to the door. When she saw me in the doorway, from the room where she was sitting, she rose hurriedly and came toward me, and I saw distress and terror in her eyes.

Now, there was little for her to fear in all the world. Though she was wealthy, it was well known that the furnishings of this house were meagre and that she never kept valuables here. It was her custom to leave all her doors and windows unfastened; for, as she often told me:

"If anybody thinks they'll find anything here, I want them to feel free to try it."

She could not be in fear of thieves; she was a woman of sense and courage; and so, I was at a loss to account for the manifest anxiety which distressed her. She did not leave me long in doubt, however. I laid my wet coat over a chair before her open fire, sat down beside her, and she said abruptly:

"Doctor Price, James is here."

James was the young man, the son of her husband's brother, the dissolute and reckless creature she had determined to disinheritor.

"Has he distressed you?" I asked.

"He has frightened me," she said frankly. "He is intoxicated."

"He is—in the house?"

"In his room upstairs," she assented. "We dined together. He had been drinking before that. I reproached him for it."

I nodded, listening in spite of myself for any sound from the young man in the upper room. But the wind was so blustery, and the rain's totto on the windows so constant, that if he made any noise it was instantly smothered in the tumult of the night.

"He jeered at me when I begged him not to drink any more to-night," said the woman, my patient. "He angered me; and I told him—perhaps it was unwise to do so—of the will which you witnessed, Doctor Price, in which he receives only a few dollars."

"That was not wise," I agreed.

"He was furious," she assented. "He cursed me, and he swore he would even the score with me."

Now, while this woman was not ill, her heart was in a serious condition. She had worked very hard in her youth, and the physical effort had weakened her. She was in no immediate danger of death; yet, at the same time, shock or fright might lead to a seizure of the gravest nature. I determined to speak to the young man before leaving the house, and warn him of this danger. The woman seemed to guess what I was thinking.

"He frightened me, and I felt a little sick, Doctor Price," she said. "I told him you had advised me to avoid shock or fright. He laughed outright at that, and said: 'Sooner you go, the better I'm pleased.'"

For a moment there was no other sound except the trumpeting and thumping of the wind and rain. Then I heard a step on the upper floor and rose quickly. "I'll speak to him," I said.

But she detained me. "Wait, please," she whispered. "There is something else."

I turned back and stood beside her; and she drew from the bosom of her

dress a folded paper. I guessed what it was, recognized it as the will she had drawn years before. She handed it to me. I took it stupidly, and held it in my hands.

"Take it back with you," she whispered. "He knows it is in the house. I told him. He will try to get it."

I thrust the document into my pocket. "I will see that he does not get it," I said. "But I shall stay here with you to-night."

She rose alertly, all the anxiety gone now, proud and erect; and she smiled at me. "Nonsense, Doctor Price," she said. "Take it with you and go. Once it is gone, I have nothing to fear. I am not afraid of a drunken puppy—not for myself. But I do not wish him to destroy that paper."

She was a strong, fine woman; and I saw that it was true. She was no longer afraid. She was more than a match for the young man in everything save physical strength; and she did not fear his strength. There was a compulsion in her eyes and in her voice as she told me to take the will and go, which I could not resist.

"Deliver that, in the morning, to the trustees of the hospital," she said, naming the institution which was to receive the bulk of her estate. "Warn them to preserve it carefully till my death."

"But—I will speak to the young man before I go," I protested.

She shook her head. "There is no need," she said. "Once that document is gone, he can do no harm here."

There was nothing for me to do but obey her. She guided me to the door, and I took the lantern which I had brought in with me and bade her good-night. We heard no further sound from the upper floor. I opened the door quickly and slipped out and closed it before the rain could beat in; but she opened it and stood there, silhouetted in the lighted doorway, and watched me find my buggy and start my return journey. As I drove away, she was the last thing I saw; and I never saw her again alive.

She died, quite peacefully, in her bed a few weeks later. An old woman who came to the house every morning with eggs, discovered her body. As I started home that night, it seemed to me the fury of the rain had increased. A winter rain is so much more chill and drenching than a summer tempest. There had been snow on the ground when this downpour began, two days before. But the snow was gone and the rain still continued.

The wind was blowing colder, however, so that I said to myself as the horse turned into the homeward road, "This is turning to snow—to a blizzard."

The wind had shifted somewhat, during the evening. It had been in my face as I drove to the house. Now, instead of being at my back, it blew straight across the road. The curtains of the buggy sheltered me from its direct assaults; but it made little eddies and whirls inside the curtains and brought flying drops that half-blinded me. The force of the wind was so great that, at times, it made the buggy sway dangerously; and I was prepared, more than once, to jump free if the vehicle should overturn.

(Continued in next issue.)

### Prodigious Infants.

Long before the war it was boldly stated that a man was too old at forty. But now it looks likely that soon the cry will be "too old at fifteen!"

A small boy of eight summers recently tackled twenty or thirty of the best chess players in the world, setting them all problems they could not tackle; another child appears on the scene, who, at the age of seven or eight, pens a diary, which the greatest literary lights describe as wonderful; while we'll soon have quite a small library of juvenile novels.

It was regarded as a phenomenon when Chatterton wrote immortal poems at the age of twelve, when Mozart composed in his fifth year a concerto so difficult that only the most practised artists could play it, when the infant son of Evelyn, the diarist, could read Latin and Greek at three and a half, when Macaulay had written a poem as long as "The Lady of the Lake" at eight, and when Millais carried off a gold medal for painting at nine! But now it's becoming quite the usual thing.

In 1867, the United States bought Alaska, from Russia, for \$7,200,000. A disgruntled public criticized the purchase as a shameful waste of money. Now, every year, the Alaska salmon industry alone brings more money than the sum paid for the whole country.

### "Haven't Got Time."

Opportunity tapped at the door. With a chance for a brother within. He rapped till his fingers were sore. And muttered, "Come on, let me in. Here is something I know you can do. Here's a hill I know you can climb." But the brother inside very quickly replied:

"Old fellow, I haven't got time."

Opportunity wandered along. In search of a man who would rise. He said to the indolent throng:

"Here's a chance for the fellow who tries."

But each of them said with a smile:

"I wish I could do it, but I'm very busy to-day."

Very busy to-day, and I'm sorry to say That I really haven't got time."

At last opportunity came

To a man who was burdened with cares,

And said: "I now offer the same

Opportunity that has been theirs.

Here's a duty that ought to be done,

It's a chance if you've got time to take it."

Said the man, with a grin, "Come

along, pass it in!

I'll either find time or I'll make it."

Of all the excuses there are

By which this old world is accursed,

This "Haven't got time" is by far

The poorest, the feeblest, the worst.

A delusion it is, and a snare;

If the habit is yours you should

shake it.

For if you want to do what is offered

to you,

You'll find time to do it, or make it.

### When Power Comes.

It was in a Christian Endeavor meeting that he made the great discovery. As is generally known, each Endeavorer pledges himself "to take some part, aside from singing, in every Christian Endeavor prayer meeting, unless hindered by some reason which I can conscientiously give to my Lord and Master"—a pledge that has been of incalculable value to the Christian church. He made his discovery the evening on which he was to make his first attempt to fulfill his pledge.

He was afraid. He was just a boy fifteen years old, but he was already deeply conscious of a call to the ministry. He longed to rise and do his part, but he trembled at the thought of it. The Endeavorers with whom he met had a high standard of attainment; the speeches were thoughtful, the prayers had a fine, devotional atmosphere. He did not think that he could do so well as the others.

He decided that he would try first to take part in prayer. He did not believe in actually composing a prayer beforehand, but he tried carefully and consciously to prepare his mind, for he was sure that the inspiration that he hoped for would most surely come to a mind and heart ready to receive it.

It worried him to feel so nervous. "Surely," he thought, "since I have prayed for strength, I should have it now; yet I feel as weak as water." The great moment drew nearer and nearer, yet he felt no fitter for the ordeal; if anything, he grew more agitated.

"I am not strong enough for it," he said to himself, "and yet I have prayed for strength to do my duty and fulfill my pledge. Why has not God answered my prayer?" Then suddenly a thought flashed into his mind like a ray of light and illuminated his problem. "How do I know, until I try, that God has not given me strength? It is not for the time of waiting but for the action that I have asked his help. I will find out by trying."

The great moment had come. He, the beginner, was on his feet, and it was as if some secret door in his soul had opened, through which poured a flood of prayer. It was not a long prayer; it was simple, perhaps here and there it was crude; but it had burning sincerity that everyone felt. So it was with this youth, who has since become a most effective minister of Christ, learned one of the greatest lessons of life—that God's power comes when faith is perfected in action. "Faith without works is dead."

We all know the fate of the lazy woodchuck who trusted to one hole.

Minard's Liniment for Burns, etc.

## Canadian Talc and Its Uses

Among Canada's more useful non-metallic minerals, talc is probably the most adaptable and widely used, entering into the finishing process of some of the most common commodities.

Talc, sometimes designated soapstone, asbestos, French chalk, mineral pulp, talcalay and verdolite, is found in Cape Breton and Inverness counties in Nova Scotia; Frontenac, Hastings, Leeds, Lennox and Renfrew counties and Kenora district in Ontario; Beauce, Brome and Megantic counties in Quebec, and in the Leech River section of the Victoria mining division of British Columbia. In color it ranges from white to greyish green, while to the touch it has a soft and apparently greasy or slippery feeling. It is a non-conductor of heat and electricity and is resistant to most chemical action.

Its chief uses are as a filler in the finishing of book papers and as a dressing for white cottons, also in the finishing of window blind cloth. Talc is largely used in the manufacture of rubber goods and to overcome the friction between inner tubes and the

### When Nations Make Gifts.

Belgium recently presented Britain with a beautiful statue, which has been erected on the Thames Embankment, in gratitude for the hospitality extended to Belgian refugees.

Just as individuals give each other presents, so occasionally do nations. The Lincoln statue, which has lately been erected near Westminster Abbey, is the gift of the American nation to the old Mother Country.

In Westminster Abbey itself is a beautiful window, depicting scenes from Bunyan's "The Pilgrim's Progress," which was also a gift from America.

Before the war even Germany made England a present of a statue. It may still be seen in front of Kensington Palace, in Kensington Gardens, in which house Queen Victoria was born. This statue of William of Orange—William III. of England, was presented to England by the ex-Kaiser.

But undoubtedly the grandest present of this kind which one nation has given to another, is the great statue of Liberty which greets every incoming ship to New York. It was given by France to the United States to commemorate the memorable connection that exists between the freedom of America and that of France.

### Glass from Soot.

We have all heard the story of how glass was invented—that shipwrecked sailors built fire on the sands and that the heat of the fire melted the sand and turned it into glass.

Sad as it is to turn down the legends of our childhood, this one must go with the rest. Apart from the fact that glass was known to the Egyptians 5,200 years ago, no ordinary fire could melt sand. Another objection is that glass is not made of sand alone, but of a mixture of flinty sand with an alkaline earth such as lime.

Few of us realize to what extent we depend on glass. We might put up with talc or oiled silk for windows, but just think how many people would be reduced to practical blindness without spectacles!

Where would science be without the microscope and telescope? Without glass we should know nothing about microbes or the causes of disease. Botany and natural history could never have progressed at all.

In old days the sand used for the best glass was that brought from Mount Carmel to the mouth of the river Belus; to-day we get our best sand from Epinal, in Belgium, Paris, and Co. Donegal, in Ireland. This is mixed with sulphate of soda in order to produce the best flint glass.

All sorts of things are used in the manufacture of different kinds of glass, including flue dust, which supplies potash and lead in the form of red-lead or lead rust. For coloring glass, such metals as iron, copper, nickel, manganese, aluminium, cobalt, and chromium are employed.

### His Apology.

"Why Jimmie," exclaimed the mother of a precocious five-year-old son, "aren't you ashamed to call auntie stupid? Go to her at once and tell her you are sorry."

"Auntie," said the little fellow, "I'm awfully sorry you are so stupid."

### Irish Economy.

Mrs. Maloney—"Why, Pat, what ever are you doing? Why, that's the third time you've shaved yourself to-day!"

Pat—"Don't say a word! A penny saved is a penny earned, and it's three times I've shaved myself to-day, an' that's a shilling earned!"

Minard's Liniment Relieves Colds, etc.

When a man is generous to a fault it is usually to one of his own faults.

Fish hooks have been made in the same shape for 2,000 years.

Discovery at the wrong time that the oil supply in the crankcase has run low is a common experience of motorists. A standard grade of lubricating oil is now obtainable in a two-quart can, of easily carried form, with an oblique conical top, terminating in a nozzle. The contents are easily emptied directly into the crankcase, without a funnel, and without soiling the hands.

covers of bicycle and automobile tires. Finely-powdered white talc is used in the making of enamel and other paints while the poorer grades are dusted on roofing paper and tar felts before rolling, to prevent sticking.

In the preparation of toilet articles, however, talc is most generally known, being the base for talcum powders, tooth pastes and powders, shoe, glove and other lubricating powders, and as a filler or loader for the cheaper grades of toilet soap.

The coarser grades of talc are used for electric switchboards, laboratory table tops, sanitary fittings, stove and furnace linings and acid tanks, as a dressing for fine leathers and as a lubricant.

Talc, owing to the ease with which it can be served, is often used in the production of statues and ornaments, and can be sawn into slabs for surfacing. The adaptability of talc is constantly finding new uses for it, and an increasing production is evident. In 1919 18,642 tons was mined, of a value of \$116,295. The greater portion was exported to the United States and Cuba, but a considerable portion was marketed in Canada.

### A Word With Mother.

Are you a "fun spoiler"? This is how a little friend of mine designated grown-up people. I heard him say: "They're all fun spoilers, and mother's the worst one of all." How it set me thinking. I was sure that I couldn't possibly be included in that category, but, when I reflected on the many games I had ruthlessly interrupted and the apparently arbitrary demands I had made on my children at times when they were most deeply absorbed, I was forced to admit that I, too, had been all too often a "fun-spoiler." We mothers are a thoughtless lot, and are apt to forget that the rights of the children as individuals are quite as sacred as our own right to liberty.

When we want a child to do something for our convenience, we do not hesitate to call him away from his play to do it, even if he is in the middle of placing a beam in a shack he is building. We demand our small daughter's immediate and cheerful attention at the crucial moment in her doll's dressmaking when, if she drops her work, the stitches will all be lost. To them these matters are of tremendous importance, and we should respect them. We should give them the thoughtful consideration that we are training them to give us. This is not to say, of course, that children should not learn the lessons of obedience, cheerful service and unselfishness. It does mean, however, that the parents should not demand a service without stopping to consider the children's side of it, whether it will interfere with some task he has set himself, or even "spoil his fun." The service should be asked as a favor, and time allowed for the completion of the matter already on hand.

If we expect children to appreciate the loving things done for them by their elders, we must render appreciation for the things the children do for us. If it seems necessary to call a child away from play to perform some errand or household duty, the child should be consulted, the favor asked, and a reasonable time given for adjusting its thoughts to a change of occupation. Due consideration should be given to their plans and if possible we should arrange our work so that their play shall be reasonably free from interruption.

Ever since that little lad gave me an unconscious warning, I pause before summoning my children to carry out my wishes, even when I know my way is right, and murmur to myself, "Fun spoiler." Then I try to be as considerate of their convenience and happiness as I like others to leave me free to follow out my plans, always allowing for the proper guidance and oversight that is a mother's duty. Children are individuals with individual growth and progress to make, and it is not the parents' place to form and mold children to their own personal wishes, but to help them unfold in the best way for their own good.

### Estimating Table Costs.

"How can I find out if it pays me to take boarders at one dollar a day," asks a woman who is trying the experiment. "We buy in quantities and it would take too long to wait until the food is all eaten and average it up. How can I estimate the cost of the canned foods I use?"

For a woman who has never kept accounts, nor given her table any thought beyond buying what she wanted and eating it up, the problem would be rather difficult. Doubly hard for farm women, who take so much from the garden without a thought as to what it cost for seed, labor in planting, cultivating, harvesting and getting ready for the table. Here is one of the best arguments possible for carefully kept farm accounts.

Of course, the only way to find out if it pays is to find out what it costs. And as no accounts have been kept, the thing to do is to begin at once to measure everything that goes onto the table, down to the flour to thicken the gravy. This isn't as hard as it sounds. For instance, a standard brand of breakfast food contains ten cups of food. Two cups will provide the cereal for breakfast for six persons. The cereal in question costs twenty-five cents a box, which gives five cents a day for the six, or five-sixths of a cent a day per person.

Similarly, if twelve oranges are sixty cents, and each person has a half an orange for breakfast, the cost of that individual's portion is easy to reckon. Sugar is still easier, there are exactly two cups to the pound. Buy an accurately marked measuring cup; find out how much the sugar bowl holds, and keep track of how often it is filled. A sack of flour contains twenty-four and a half pounds. Four cups of sifted flour equals one pound; two cups of solid butter or of lard equals a pound. It is better to have scales and weigh flour, butter and lard, but if you have none, accurate measurement will do.

Two weeks of careful work, keeping accurate accounts should do. In keeping accounts, do not charge up to the boarders any household supplies they do not use. For instance, if you do not do their washing, do not charge up laundry soap, starch, blueing, etc. But toilet soap which they use, matches, kerosene or lights of any sort, heat, etc., should be reckoned.

If you do not remember how much you paid for your canned fruit or vegetables, how much sugar was used, how long it took to can, etc., the cost will be hard to find. If you have kept your figures, the cost of a can is easy. Elberta peaches last year sold in our neighborhood for \$2.75. One bushel netted twenty quarts. One cup of sugar to the can, makes ten pounds—twenty cups. This sugar was eighteen cents in the spring. This made the actual cost of peaches and sugar figure up to twenty-two and three-fourths cents per can. It took seven hours to can the bushel, for which the charge would be forty cents an hour. A woman would charge forty cents an hour to do the work. Dividing by the number of cans, twenty, gives fourteen cents cost of labor to be added to each can, or thirty-six and three-fourths cents, actual cost of a can of peaches, exclusive of the fuel. To make any money selling those peaches one could not charge less than forty cents per can, and should have more. "One can of peaches will give about twelve generous dishes."

It goes without saying that one could not expect to make money from boarders at a dollar a day, and give elaborate meals. A breakfast of fruit, cereal, toast or hot breads, and bacon, or eggs, or country sausage; dinner of meat, one vegetable, potatoes, bread and butter, a salad or canned relish, and simple dessert; supper of one hot dish, bread and butter and dessert, would be sufficient to keep everyone "fed" up, and give a chance to make a little. With this sort of scheme, the board money should pay all table expenses, but would not do any more.

Breakfast can be made interesting by changing the kind of cereal and fruit. Don't serve oatmeal every morning, nor flakes. With all the foods there are in the market, one could have a change every day for a month. And don't think you must have grape fruit or oranges. Give the folks baked apples, apple sauce, prunes, canned fruit, home-made jam and hot toast, and store fruits once in a while. The great thing is to ring in changes.

### Women! Use "Diamond Dyes."

Dye Old Skirts, Dresses, Waists, Coats, Stockings, Draperies, Everything.

Each package of "Diamond Dyes" contains easy directions for dyeing any article of wool, silk, cotton, linen, or mixed goods. Beware! Poor dye streaks, spots, fades and ruins material by giving it a 'dyed-look.' Buy "Diamond Dyes" only. Druggist has Color Card.

### The Useful Lion.

According to some of the farmers of East Africa, the lion should be protected as a useful animal, notwithstanding the fact that once in a while he kills a man. The lion, they maintain, is a great destroyer of noxious herbivorous animals, such as zebras and antelopes, which are a scourge to the fields.

In one district, they say, no less than 346 lions were killed in one season by hunters, and they estimate that this represents the saving of 35,000 to 40,000 zebras and antelopes, which would otherwise have fallen a prey to the lions that were destroyed. Of course the hunters shoot zebras and antelopes also, but this fact, they think, does not counterbalance the destruction of those animals that would have been effected by the slain lions.

Machinery has been invented in Norway for making anchor chains that are said to be as good as hand made.

402 Yonge Street, Toronto

### The Bad Boy Proposition.

There are no bad boys. We make this statement confidently, knowing that it will be endorsed by educators and all who have spent their lives in working on the boy problem. We will defend it in spite of all the broken windows, stolen apples and canned dogs in Christendom.

There are weak boys, boys who lack resourcefulness, boys whose ideas of right and wrong are distorted, but there never was a boy who did not naturally—consciously or unconsciously—do things that he believed to be right.

The trouble comes when parents, teachers and others who are responsible for the youngster's development fail to fill his time with useful activity. The forces of nature must operate. We cannot stop them while we take our afternoon nap. The wind must blow, the water must flow, and the boy's brain and muscles must work.

We put a wind-mill in the path of the wind and it draws water as joyously as it upsets the chairs on the verandah and whisks the family wash from the line. We put a water-wheel in the stream and it grinds the grain with the energy which it could otherwise dissipate in washing out its banks and routing out the trees.

These things we know; yet we too often permit youthful energy, our most valuable asset, to run riot. We even attempt to dam it and then complain because it slops over and does damage.

The Boy Scout programme is the mill in the stream of boyhood. It provides something useful for every boy to do every minute. Knot tying, first aid and bandaging, signalling, trailing and tracking, fire-building and extinguishing, camp cooking, swimming, earning and saving money, hiking, map making and map reading, practical study of flowers, plants and trees, earth and sky, are included in the Scout's programme for the year. After these a much broader field is opened, including foundation work in all the principal trades and professions.

A boy's first idle moment is the starting point of whatever trouble he makes in the world. It is also the big opportunity of the man who is wise

enough and patriotic enough to turn natural energy into constructive channels. Already over 250 Scoutmasters are directing the activities of some 9,000 boys in the province of Ontario, and the movement is only a little more than ten years old. Men interested in devoting part of their leisure time to this "nation building" work should write to Boy Scout Headquarters, Bloor and Sherbourne Sts., Toronto, for further information.

## A WOMAN'S RIGHT TO GOOD HEALTH

### Most Troubles Afflicting Women Are Due to Poor Blood.

To every woman belongs the right to enjoy a healthy, active life; yet nine out of ten suffer from some form of bloodlessness. That is why one sees on every side pale, thin cheeks, dull eyes and drooping figures—sure signs of headaches, weak backs, aching limbs and uncertain health. All weak women should win the right to be well by refreshing their weary bodies with the new, rich, red blood that promptly transforms them into healthy, attractive women. This new, red blood is supplied by Dr. Williams' Pink Pills, which reaches every organ and every nerve in the body. Through the use of these pills thousands of women have found benefit when suffering from anaemia, indigestion, general weakness and those ailments from which women alone suffer. Among the many women who tell of the good Dr. Williams' Pink Pills have done them is Mrs. L. Hicks, Round Hill, N.S., who says: "I became very much run down in health; my blood seemed weak and watery, my strength failed, and I was so easily tired that my work was a burden. I had often read about Dr. Williams' Pink Pills and decided to try them, and I can truly say that after using three boxes I found myself gaining, and under a further use of the pills all my old-time energy and vitality was restored. Out of my own experience, I can strongly recommend this medicine."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

The teak, which supplies one of the strongest timbers known, grows slowly, attaining a height of only 150 feet in over a century.

Japan has 20 women journalists.

Minard's Liniment Relieves Distemper

## Surnames and Their Origin

### SLOANE

Variation—Sloan.  
Racial Origin—Irish.  
Source—A given name.

Sloan is one of the most ancient family names in the world, dating, as it does, to a period shortly after the time of St. Patrick in Ireland, some six or seven centuries before there was any real tendency toward the formation of family names in England, and, indeed, some four or five centuries before many of the Irish clan names came into existence.

It was, like virtually all Irish clan or family names, derived from a given name by the addition of a word designating "descendants of" or followers of. Such names were commonly formed at any time when a chieftain achieved a sufficient following and respect to give him the proper power in that peculiar social organization of the ancient Celts in which blood-ties were the chief bonds.

It was in this manner that the name of Sloane originated, on the rise to prominence of one "Siollan," son of "Eoghann Caoch." The given name of "Siollan" means in Irish "the skinny one" or "the thin one," and it was probably given as a result of characteristics displayed in the new-born infant. The clan name was formed by the combination of this name, infected in the possessive case, with the word "ua" or "ul," signifying descendants or followers. This word later came to be designated simply by "O." Thus, the Irish form of the clan or family name is "O'Siollan."

Sloane, of course, is but the Anglicized version of it, which in the course of transition from one tongue to the other, has lost one of the syllables and

changed in spelling considerably, though the difference in pronunciation is not so great as might be imagined.

### COOPER

Variations—Cowper, Copper, Turner.  
Racial Origin—English.  
SOURCE—An occupation.

The family name of Cooper is really the same as our modern word cooper, used to designate a barrel maker, and the family names of Cowper and Copper are but variations of it.

It does not follow that the original Coopers, Cowpers and Coppers, however, were all barrel-makers. In fact, the original coopers did not ply their trade at all in the same manner as the modern cooper. They did not make their products from staves and hoops. On the contrary, they worked mostly with the medieval ancestor of the modern turning-lathe, thus narrowly escaping bestowing the name of Turner upon their particular posterities, as did others of their co-workers.

Our modern word "cup" is, so to speak, the first cousin of the modern word "cooper," and really is a more direct descendant of the medieval word. They made them for all purposes and in all sizes, and out of a great many different materials, though for the most part out of wood, though sometimes out of metal. Chaucer has a passage which explains that wood was a material they often worked in because it was easily turned.

Entries of such names as "Adam le Kuppere" and "Richard le Kuppere," as well as the forms "le Kuppere" and "le Cowper" and "le Coopers," are to be found in the tax and census records which have come down to us from medieval times in England.

## A Winter Night.

As I strode down the long slopes of the road  
Between the pastures, all was  
flawless white,  
Save where the lofty pines upon  
the height  
In the pale moonlight like dark statues  
showed.  
The little woodland stream that by  
me flowed,  
And sang in springtime as in sheer  
delight,  
Was silent now, as is an hermit  
Who broods on God in his austere  
abode.

I was alone, yet I was not alone,  
For some mysterious spirit called  
to me  
Out of the night in an exalted tone  
That was as rapture blent with  
melody,  
"Wait for a time when to thee shall  
be shown  
What seemeth sorrow meaneth  
ecstasy!"

### Wisps of Wisdom.

The greatest of faults is to be conscious of none.

The thunder of business often sours the milk of human kindness.

Yesterday has gone, to-morrow may never come; do it to-day.

Prefer diligence before idleness, unless you esteem rest before brightness.

Education is life's apprenticeship; its chief aim is to teach us how to think.

Success is a thing that some are content to envy in others—and some achieve for themselves.

When a man hasn't a good reason for doing a thing, he has one good reason for letting it alone.

If you lack confidence in your own judgment, you can't blame other people if they share the feeling.

The man who wins is the man who holds on until he can hold on no longer—and then doesn't give up.

Let the man who has to make his fortune in life remember this maxim: Dare, and the world always yields. If it beats you sometimes, dare it again and it will succumb.

### Garden Seeds Needed.

To plant a 100-foot row of vegetables in the garden, buy seeds as follows: Beans, one pint; beets, two ounces; cabbage, one packet; carrots, one ounce; cauliflower, one packet; celery, one-fourth ounce; Swiss chard, two ounces; sweet corn, one pint; cucumbers, one ounce; egg-plant, one-half ounce; kohlrabi, one packet; lettuce or mustard, one-half ounce; muskmelons, okra or onion seeds, one ounce; onion sets, one quart; parsley, one packet; parsnip, one ounce; peas, one to two pints; peppers, one packet; potatoes, six to seven pounds; pumpkins, radishes, salsify, spinach or squash, one ounce; tomatoes, two packets; turnips, one-half ounce; watermelons, one ounce.

## STORMY WEATHER HARD ON BABY

The stormy, blustery weather which we have during February and March is extremely hard on children. Conditions make it necessary for the mother to keep them in the house. They are often confined to overheated, badly ventilated rooms and catch colds which rack their whole system. To guard against this a box of Baby's Own Tablets should be kept in the house and an occasional dose given the baby to keep his stomach and bowels working regularly. This will not fail to break up colds and keep the health of the baby in good condition till the brighter days come along. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### After the Storm.

One of the soldiers of the Rainbow Division, United States, had been boasting to a British Tommy about his glories.

"Lumme!" said the Tommy. "I know why yer calls it hat. Rainbows is things that comes out after the storm's over, ain't they?"

### MONEY ORDERS.

Send a Dominion Express Money Order. Five Dollars costs three cents.

### Whale of a Fish Story.

At a convivial gathering in connection with an angling club a sailor listened attentively while the members told of the big fish they might have landed had not their lines given way at the critical moment. The manner in which they recounted their exploits would have brought tears to the eyes of the most hardened storyteller.

But a sailor never knows when he is beaten.

"Well, mates," he began. "I never did any fresh-water fishing, so I expect you are telling the truth. But I remember on one occasion, having nothing better to do, we cast a line at sea and awaited results. Soon we got a bite, but for the life of us we could not bring in our catch. Then an idea struck us. We fastened the line to the windlass and proceeded to haul in, when the boat gave a lurch, the line broke, and the monster escaped."

One of the company, with biting sarcasm, suggested that it must have been a whale.

"A whale, be hanged!" replied the sailor; "we baited with a whale!"

### AUTO REPAIR PARTS

For most makes and models of cars. Your old, broken or worn-out parts replaced. Write or wire us describing what you want. We carry the largest and most complete stock in Canada of slightly used or new parts and automobile equipment. We ship C.O.D. anywhere in Canada. Satisfaction or refund in full our motto. Shaw's Auto Salvage Part Supply, 323-331 Dufferin St., Toronto, Ont.

### Japs Are Fond of Metaphor.

Judging from some specimens quoted not long ago in the Journal des Debats, the Japanese employ a wealth of metaphor when advertising their wares. A Tokio stationer announces that "the paper I sell is as solid as the hide of an elephant." A fishmonger promises to deliver all orders at customers' houses with the rapidity of a shot fired from a rifle. "My extra special vinegar," a grocer declares, "is as sour as the tongue of the most shrewish mother-in-law." A large multiple shop begs the public to "come into our stores. You will meet with an overwhelming welcome. Our assistants are as amiable as a father who is trying to marry off his daughters without giving them any dowry. You will always be greeted as cordially as a spell of sunshine coming toward the close of a pouring wet day."

### Sandalwood.

Sandalwood is the production principally of the native state of Mysore, India, and the district of Coorg, in both of which places the industry is almost a monopoly of the government forest reserves. Due to the development of the sandalwood oil extracting industry, the exportation of the wood has steadily declined, while that of the oil has increased.

Sandalwood is the most famous of all scented woods. Its use for perfumery and incense dates back thousands of years. The later Greek considered it one of the greatest luxuries, and no festivities were complete without it. Sandalwood figures prominently in religious ceremonies and burial rites in China and other Oriental countries.

### "Pape's Diapiesin" for Indigestion.

"Pape's Diapiesin" is the quickest, surest relief for indigestion, Gases, Flatulence, Heartburn, Sourness, Fermentation or Stomach Distress caused by acidity. A few tablets give almost immediate stomach relief and shortly the stomach is corrected so you can eat favorite foods without fear. Large case costs only 60 cents at drug store. Absolutely harmless and pleasant. Millions helped annually. Largest selling stomach corrector in world.—Adv.

I never saw so many fields yellow with mustard as I did last summer. One thing is sure, we can not buy seed at random and expect all timothy or clover. A careful analysis is the only thing that will settle the question of mustard and other foul seeds or good grass seed. We have only to put a big spoonful in an envelope, address it to the Dominion Experimental Farm, and back will come the correct analysis. Then it is our fault if we have fields of mustard after that.

The large farms in South Lincolnshire, England, are so perfect that they are more like factories than farms.

### Those Having Sick Animals SHOULD USE

Good for all throat and chest diseases, Distemper, Garget, Sprains, Bruises, Colic, Mange, Spavins, Running Sores, etc., etc. Should always be in the stable. SOLD EVERYWHERE.

## DANDERINE

Stops Hair Coming Out; Thickens, Beautifies.

A few cents buys "Danderine." After a few applications you cannot find a fallen hair or any dandruff, besides every hair shows new life, vigor, brightness, more color and abundance.

### Oh, For One Fault.

"How do you like your new car?" asked Jack Driver.

"Great!" replied Mr. Rhode Hogg. "It runs so smoothly you can't feel it. Not a bit of noise; you can't hear it. Perfect ignition; you can't smell a thing. And speed—why, it whizzes! You can't see it!"

"Must be some car," ventured Jack Driver. "Can't feel it, can't smell it, can't hear it, can't see it! How do you know it is there?"

### Had An Inkling.

"Agnes, dost thou love me?" asked a Quaker youth of one at whose shrine his heart's holiest feelings had been offered up.

"Why, Jack," she answered, with a downcast look of her eyes, we are commanded to love one another, are we not?"

"Ay, Agnes, but dost thee regard me with the feeling the world calls love?"

"I hardly know what to tell thee, Jack. I have greatly feared that my heart was an erring one. I have tried to bestow my love on all, but I have sometimes thought, perhaps, that there was getting rather more than thy share."

### "Cascarets" To-night For Constipation

Just think! A pleasant, harmless Cascaret works while you sleep and has your liver active, head clear, stomach sweet and bowels moving as regular as a clock by morning. No griping or inconvenience. 10, 25 or 50 cent boxes. Children love this candy cathartic too.

The ideal soil for a peach-orchard is a warm, gravelly hillside. Even sandy soils are excellent for peach-growing if the sand is not too fine and the drainage bad. Heavy, cold clay soil is unsuited to the peach. Plum trees are naturally adapted to stiffer soils than the peach.

You are not capable of correct judgment, of using good sense, when there is fear or doubt or despondency in your mind. Sound judgment comes from a perfectly working brain.

For cold in the Head and Chest use

## BAUME BENGUÉ

has immediate effect.

Children Cry FOR FLETCHER'S CASTORIA

## Rheumatism Entirely Gone

After Twenty-seven Years of Suffering—Swelling and Puffiness Has Disappeared—Not a Pain or an Ache Left.

A most astonishing cure of rheumatism and eczema has been reported here, and Mrs. Ray is enthusiastic in telling her many friends how cure was effected.

Rheumatism and eczema frequently go together, and in this case caused the most keen distress imaginable. All the swelling and puffiness resulting from many years of rheumatism have disappeared, and there is not a pain or an ache left.

Mr. G. H. Ray, R.R. No. 1, Kincardine, Ont., writes: "Mrs. Ray has been using your Kidney-Liver Pills. She was very bad with rheumatism and eczema, and had had that fearful itch for twenty-seven years. It was simply terrible what she suffered. I persuaded her to try \$1.00 worth of Dr. Chase's Kidney-Liver Pills. She is now on the last box, and let me tell you she scarcely knows herself, she is so free from both these diseases. All the swelling and puffiness caused by the rheumatism has gone away, and she has gone down in weight 18½ pounds. She never has an ache nor pain, biliousness nor sick headache all these months. She often says herself 'How glad I am that I know what to do instead of paying doctors so much to make me worse.'"

There is only one way that the poisons in the blood can be cleaned away and the cause of pains and aches removed, and that is by the healthful action of the kidneys, liver and bowels. Because Dr. Chase's Kidney-Liver Pills act directly and specifically on these organs and insure their activity they remove the cause of rheumatism and other dreadfully painful and fatal diseases. One pill a dose, 25 cents a box, all dealers or Edmanson, Bates & Co., Limited, Toronto.

Look for "A" and signature of "B" in the box you buy. Receipt Book.

Mr. Kenneth Wells who has been spending the past week at Nudell Bush spent Sunday at his parental home.

Mr. and Mrs. Will. Dafeo and family of Froatburn spent Saturday at the former's parental home.

A very pleasant evening was spent at the home of Mr. and Mrs. Joe Bailey's on Friday, February 11 to bid adieu to Mr. and Mrs. Bailey and family. Before lunch was served the following address was read by Miss Lois VanAllen.

Dear Mr. and Mrs. Bailey,

It is with pleasure mingled with deep regret that we, your friends and neighbors have assembled here this evening to bid you farewell prior to your departure for a new home. We keenly feel the loss we are about to sustain with your withdrawal from our midst, but our best wishes for health and prosperity go forth with you and we shall look forward to the time when you may be able to come among us again. You have been with us so long that we feel we cannot let the occasion of your leaving us pass by unnoticed, so as a slight token we beg of you to accept this humble gift, trusting that it may in some slight degree express our regret at losing you. Our loss shall be another's gain. Signed on behalf of our friends and neighbors.

Walter MacGibbon.

Walter Baker.

George McKenzie.

Eddy VanAllen.

Miss Viola MacGibbon then presented Mr. and Mrs. Bailey on behalf of the friends and neighbors, with two handsome leather rockers.

Mr. Bailey thanked the friends for their kindness on behalf of Mrs. Bailey and family. The evening was afterwards spent in games and dancing.

### CEDAR GROVE

Mrs. John Dafeo who has spent the past two months with her daughter, Mrs. Melissa Hollister in Ottawa, has returned home. She was accompanied by Mrs. Hollister who is at present visiting friends here.

Mr. and Mrs. W. A. Wereley and children, Miss Lola and Master Lloyd visited friends in Newington on Saturday.

Mr. and Mrs. Ellison Dennison and Miss Mabel visited Mr. and Mrs. Selim Shaver.

Mr. and Mrs. Albert Fickes and Master Ellis visited Mr. and Mrs. Frank McConnell on Thursday.

Mr. and Mrs. Wm. Myers and children, Marguerite, Winston and Marion, visited Miss Sadie Buchanan on Thursday.

Miss Aggie Shaver visited her sister, Miss Ellison Dennison Archer recently.

Mr. Morley McConnell spent Sunday at Mr. Sidney McConnell's, 2nd Concession.

### BRINSTONS

Presentation and Farewell to Mr. and Mrs. A. B. Small.

It was with feelings of regret that the patrons, accompanied by their wives, of the Maple Grove Cheese Factory gathered at the home of Mrs. S. Coons on Tuesday evening, February 1st, to bid farewell to Mr. Small, who having spent twenty seven years in the industry of cheese-making has decided to go into farming. Mr. Small has purchased the beautiful home and farm of Daniel Driscoll of this place.

After partaking of a sumptuous supper the evening was spent in games and music.

An address of appreciation was read by Basil Strader and Edwin Johnston presented Mr. and Mrs. Small on behalf of the patrons of the cheese factory, with two handsome leather rockers.

Mr. Small made a fitting reply on behalf of Mrs. Small and himself, thanking them most sincerely for the beautiful gifts, after which everyone joined in singing, very appropriately, "For He's a Jolly, Good Fellow", a title befitting to Mr. Small.

Children Cry for Fletcher's

# CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

## What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

## Buying Nursery Stock.

Because of the high cost of nursery stock it seems that plantings have been reduced during the past few years. Many small fruit gardens have not been started. Some orchards have not been filled in where trees have died. Commercial orchards have not expanded as might have been the case if nursery stock had been cheaper.

At least some of the nursery companies are quoting stock at reduced prices. It will now pay the farmer to obtain catalogs and recent price lists and make at least some plans for increased plantings of first-class fruit. It pays to deal with reliable nurserymen who advertise in good farm papers. This is safer than buying of brokers who do not raise their own stock.

Tree agents are often criticized because of the poor quality of their stock. But an agent for a firm of known reliability is worthy of patronage. We should not fail to remember that many beautiful shrubs, profitable berry patches and thrifty orchard trees are growing now on farms where they would never have been planted had it not been for the persistent efforts of some nursery stock agent. Some of the agents may have sold poor varieties. But let us give the good ones a little credit for their work.

Nurserymen as a whole are very honest men who are in the business because they love fruit and flowers and like to deal in such products. They like to give satisfaction and do so in a large majority of cases. They know that their beautiful and expensive catalogues will not bring orders and repeat orders if they have the name of sending out poor quality stock that is not true to name.

Many of the offenses charged against nurserymen are due to carelessness on the part of the buyer. Possibly they may cover and expose the roots of trees so they dry out. Then some of the trees die and it is blamed on the nurseryman. Sometimes the name tags are left on trees until the trees strangle. When live stock get in a young orchard and trim the leaves from young growing trees, it places a tax on the strength of those trees and many of them may die.

Trees that are carelessly planted may fail to thrive. Some seasons are more favorable to tree growth than others. The value of nursery stock cannot be determined at the time of sale and this makes the purchase uncertain and gives a chance for future misunderstandings. Several years after trees have been planted the fruit may prove untrue to name. Often this is due to mistakes in the nursery. Sometimes it is the buyer's fault. He may forget what he ordered or forget which trees he planted in a certain plot. He may send only a small order in co-operation with a neighbor. They may divide the trees hurriedly without carefully studying the tags and each grower may plant the wrong variety.

It is difficult to tell the variety of fruit a young tree will produce by the appearance of a young tree and

only experienced fruit growers and nurserymen are able to tell and they might occasionally be mistaken. The inexperienced buyer has to place all trust in the nurseryman at the time of sale and for several years afterward. It is not surprising that a few mistakes occur. It is a wonder that so many buyers of trees have such good luck as they do.

In buying nursery stock it pays to know the varieties of commercial importance which have succeeded in the neighborhood. Do not pick out your nursery stock entirely from the fine pictures that appear in the catalogues. The nurseryman and the experimental station can afford to make variety tests. The farmer can only do it on a very small scale. Even that does not pay unless there is time for experimenting and a deep interest in obtaining first-hand information.

Nursery companies are always presenting new varieties to the public and often wonderful claims are made. Sometimes the new varieties which were so loudly praised ten years ago will seldom be heard of now. It simply means that they didn't make good. But the old standard varieties are still for sale and proving fairly profitable whenever planted. Every once in a while a new fruit proves of unusual value and good enough to partially replace some older variety. Information about such fruits can usually be obtained from the experimental station. They have facilities for knowing how certain fruits are turning out and may be able to tell more about them than the nursery catalogues.

The farmer who expects to order nursery stock of certain new varieties should plan, if possible, to visit a practical grower who already has fruit of that variety in bearing. A very short visit will bring out points about growing, packing and marketing that variety of fruit which will prove useful information.

In the modern nursery every possible effort is made to keep the buds and scions carefully separated. The trees from which they come are carefully marked as to variety. It gives the buyer of nursery stock a large measure of safety. In the future growers may not be sorry if they make a few additional plantings of standard varieties during the coming spring.

## Fine Feathers or Eggs.

The exhibition and bred-to-lay qualities can be combined to some extent and it is often done, but the combination is not frequently obtained in the low-priced stock which makes up the bulk of the utility of farm flocks. Too often the farmer who wishes heavy egg-laying stock will buy an exhibition cockerel in preference to a cockerel from a high-producing hen.

The fine-looking bird may have no pedigree of value and yet it will look better. It is true that cockerels from high-producing hens seem to have the power of producing high-producing pullets. It might not always be true but it is the one cheap way we have of trying to improve our farm flocks. A cockerel from a fine laying hen is well worth trying out as a means of producing a more profitable farm flock. Experiments have proven that it often works successfully.

For example, the Barred Rock is a breed rather difficult for some beginners to handle because of the double mating system. They find it hard to produce the beautiful barred to the skin specimens which will. At the same time we find the Barred Rock a great favorite on the general farm. The farm flocks are not bred for exhibition but for eggs and meat. This year I have seen several farm breeders buy exhibition males with great pleasure and turn down males from a bred-to-lay flock because those birds were not as pretty and not barred to the skin like the fine quality exhibition stock.

## HIDES-WOOL-FURS

If you have one hide or skin or a dozen, ship them along. You will receive payment at the very highest market price. Try us with your next lot.

WILLIAM STONE SONS LIMITED  
WOODSTOCK, ONTARIO  
ESTABLISHED 1870

Of course all bred-to-lay birds should be very typical of the breed they represent. They must not look like scrubs. But when a hen lays two hundred eggs or more she is of great value as a breeder if she is vigorous and her progeny are also producers. Such a hen should not be discarded because her head points and color are not a sure guarantee of a prize. If she can produce cockerels of great vigor and fair type for the breed, those cockerels should be given a chance to produce fine laying pullets. The best of them should be used even if they are inferior in markings to the birds in a prize-winning strain.

Every year fine-appearing birds are being located which are also good layers. Our best exhibition strains contain some good layers and they are being located and used to good advantage. But the buyer of a new cockerel must not expect exhibition appearance in the bred-to-lay bird, especially if the bird is bought at a

low price. If you wish winners you must go to the specialty breeders who are in that business. If you wish layers you must obtain stock of a bred-to-lay strain. Then do not kick if the bred-to-lay strain of cockerel does not win prizes. And do not expect the pullets from the exhibition cockerel to be high egg producers.

The combination of prize-winning and heavy laying is sometimes combined but as poultrymen we must have an aim with our birds. We can have the best success in winning prizes when we strive for prizes alone. We are the most sure of high egg-producing flocks when we breed from the best layers and do not worry too much about the exhibition points. The breeders of one type are apt to make fun of the breeders of the other. But both have their place in the poultry world. What we need is more flocks with as much beauty as possible combined in hens that are high normal layers with the ability to produce offspring of similar quality.

## The Growing Child--Article VIII.

### Retardation.

Retardation is that condition or state in which a child finds himself when he fails to be promoted to the next higher class in school. He is then known as a "repeater," and some children "repeat" a grade two or more times. In every school system there is a certain percentage of retardation. If the system is good, from a hygienic and educational standpoint, the amount will be comparatively small; if it is bad, there will be a much larger amount of retardation.

The cost of retardation to the state, to the parents and to the child is very great, whether the cost be measured in dollars or in values less material, but equally important.

To many children the failure to advance with the class to which they belong is a source of keen mortification, and the repetition of the same work has a deadening effect. Such children are apt to lose interest and ambition, and the effect on their character is very detrimental.

The causes of retardation may be found in the child, in the school or in the home; may be mental or physical and may be unavoidable or preventable. If a child is actually of deficient mentality, retardation will inevitably show itself sooner or later. The only thing that can be done in such a case is to place the child in a special class or institution where he will receive such training as will fit him for any work which he is capable of doing.

However, many children are retarded who are quite normal mentally. The child with defective vision or hearing is very apt to fall behind his class because he fails to see or hear many things which the other children learn through sight or hearing. If he has obstructed breathing, due to adenoids, the sluggishness and inability to concentrate his attention may be partly responsible for his failure to make satisfactory progress. Defective teeth may possibly react on his health and frequently do keep him home because of toothache. In many cases malnutrition may be one of the causes of retardation.

The physical defects enumerated do not in every case cause retardation, but they are so often associated with it that their recognition and correction are imperatively demanded.

### General Home Care.

To secure the best results in health work among children there must be close co-operation between the home and the school. The work of the teacher will be much less difficult if the child has been trained in hygienic habits at home, and the mother will find her efforts supplemented and her work strengthened by the teaching of hygiene in the schools and the oversight of her child by the medical inspector and school nurse.

Among the factors affecting the health of the child which are entirely controlled by the home, sleep is important. Children from six to ten years should have about ten or eleven hours of sleep in the twenty-four, and from ten to sixteen years the amount of sleep should be about nine hours. Every child should sleep alone (as far as this is possible) in a quiet, well-ventilated room. He should go to bed at such an hour as will make it possible for him to secure sufficient sleep and awaken naturally early enough to get to school on time without undue haste or the neglect of any duty he should perform before leaving home. The more outdoor life a child has the better he will sleep usually. On the other hand, a heavy meal in the evening, the use of tea or coffee, much home study in the evening, obstructed breathing, earache, toothache and similar conditions are apt to interfere with the child's sleep.

If a sleeping porch is not available the windows in the room should be open so that the child may have plenty of fresh air. He may be protected from drafts by the use of screens, and from cold by soft light covers and hot water bottles, when necessary. During the day living rooms and schoolrooms should be flushed several times with fresh air for a few minutes at a time by opening the windows.

A child's clothing should be such as to prevent any part of his body from chilling, but at the same time should not be so heavy as to cause him to perspire on slight exertion. The habitual use of too heavy clothing predisposes to "colds," while too thin clothing causes a heavy drain on the child's vitality. To attempt to harden a child by undue exposure is not wise. In

winter long stockings should be worn, and the feet should be protected from wetting by rubbers.

The feeding of children is of the greatest importance, and apart from the quantity and quality of the food the time and manner of the meal should receive much consideration. Regularity of feeding should not cease when the child is weaned. Teach him to expect his meals at regular hours, and his appetite and digestion readily adapt themselves to a schedule that is strictly adhered to. Let the meals be cheerful, social occasions. The food is more easily digested when eaten in a happy atmosphere than when consumed in gloom or acrimonious argument.

The question of recreation for a schoolboy or girl is sometimes a difficult problem. Outdoor play and sports are ideal, but the "movies" and similar entertainments have a strong appeal. A child attending school should not go to evening entertainments of any kind on any evening except Friday or Saturday and the child should not keep late hours then or go habitually. This applies to children in the upper grades. Younger children's entertainments should be very infrequent, and never in the evening.

### Open-air Classrooms.

Open-air classes were originally intended for tuberculosis children, tubercular convalescents and the tubercular. It was felt that their physical condition should not interfere with their education nor their education aggravate or intensify their physical disability. Hence open-air classes were established in order that these children might be educated under conditions favoring their recovery. The work was then extended to include anaemic, delicate and "run-down" children, and has included normal children. Indeed, some of the best private schools in the country conduct all their lower classes in open-air rooms.

Whether these are called "real open-air rooms" or "open-window rooms," the principles upon which they are run, the methods and the results are much the same, provided sufficient window space is available to allow the room to be properly called an open-air room.

Excellent work may be done in an open-air class located on the roof of a building, on a sheltered balcony, in a tent or shack, or in a regular classroom with all the windows removed from their frames. There must, of course, always be a roof or some kind of covering to prevent rain from falling into the room, and there should be some kind of wall or screen to serve as a wind-break.

In some cities the new school buildings are equipped with one or more open-air classrooms. Sometimes large hinged windows, reaching almost from the floor to the ceiling, occupy one or more sides of the room. Such rooms can be immediately converted into open-air rooms.

For the complete success of open-air classes it is essential that warm clothing and good food be looked upon as necessary adjuncts to the fresh air. If the child is allowed to become chilled, the good effects of the fresh air will be nullified. A warm outer wrap and covering for the head, felt boots or other protection for the feet, a sitting bag, blanket and any other covering needed for the study or rest period (sometimes spent in lying or sleeping on cots) must be provided for each child.

Food furnishes fuel for the body and hence is a source of heat. Children in open-air classes need extra food for this reason, as well as to help in their upbuilding. Hot soups, cocoa and similar simple, nourishing warm foods should be supplied.

The teacher of an open-air class should be particularly well qualified for her work. She should know something of food values and the general hygienic requirements of children. If she has, in addition, an instinct for social service, her value will be all the greater. An open-air class furnishes a splendid opportunity for the formation of invaluable health habits.

In almost all cases the results of open-air classes have been very good. The children usually gain in weight more rapidly than the average, the appetite improves, nervousness decreases and the blood takes on a much redder hue. The pupils generally are more alert and interested, sometimes

**When your grocer sells you a package of Red Rose Tea (Crimson Label) at 30 cents he makes a little less profit than if he sold you a package of cheaper tea. The extra price is all in the quality.**

advancing more rapidly in their grade than other children.

To the more or less family or community spirit developed in an open-air class the children respond with helpful co-operation.

(The End.)

## Seven Tractor Reasons.

There are many advantages in the use of a farm tractor.

1. It does work when it should be done.
2. The tractor only consumes when it does work.
3. The number of teams may be reduced.
4. One man handles more horsepower.
5. It will do belt work; saves man labor.
6. It will work any length of time on the hottest day.
7. Tractors are adapted in size to any sized farm, etc.

The great disadvantage in the use of the tractor is the lack of competent operators.

## Convenient Sanding Block.

It is impossible to use a piece of sandpaper efficiently with the hand, or to use it in connection with a block and attempt to keep it in place by hand. Shop workers will therefore welcome the sanding block suggested.

A slot is simply chiseled out in an ordinary block of convenient size and a strip of lath or wood is fitted into it. Sandpaper is then wrapped about the block with the free ends extending into the slot and the strip is screwed in place in the slot. This will draw the paper taut and a perfect sanding block will be the result. The sandpaper can be changed when necessary. For sandpapering floors, a handle may be hinged to such a block.

## Dwarf Apple Trees.

Dwarf apples are O.K. for the man who wants fruit in a hurry. But the trees are more expensive and more trees are needed to the acre. The yield per tree is less than for standard trees, but the acre yield is not so much reduced as you might expect.

If dwarf trees are set too low, the scions will throw out roots, and the trees will no longer be dwarfs. You have to keep these roots cut off.

The best proposition is to use dwarf trees for fillers, to bear before the standard trees are old enough. The dwarfs have to be cut out when the other trees begin to crowd them.

The man with a small acreage can well afford to buy dwarfs. I have seen several good-paying orchards.

Success is made, not by lying awake at night, but by keeping awake in the daytime.

## Poultry

A cellar is usually considered the best location for an incubator. But any vacant room will be satisfactory if it has some ventilation and the family will co-operate by walking quietly about the house and not banging doors. Incubator thermometers often require so much observation that it takes many trips down the cellar stairs to keep the machine regulated. Many poultrymen and women have avoided that work and brought out good hatches by running the incubator in the kitchen.

Of course, an incubator cannot be located near a stove as the temperature of the outside air will have a direct influence on the air in the machine. In some homes when an incubator has been in the kitchen they have discontinued using the kitchen stove for three weeks and used an oil stove for cooking. Then the house is heated by a furnace or stoves in another room and it is possible to keep the kitchen heat uniform enough so that the incubator can be fairly well regulated.

Buyers of hatching egg boxes can save money by purchasing them in quantities and ordering early so shipment can be by freight. Nothing is gained trying to ship hatching eggs without proper packages. It takes too much time to make home-made packages and the breakage will be large if they are made wrong. One setting of eggs sells for enough to buy about a dozen or more packages and it takes only a few minutes to pack and address a commercial container.

Never try to hatch eggs that have been chilled. It is a waste of eggs and time. When saving eggs for hatching they must be gathered frequently and stored where they will not be too cold nor too hot. A temperature of about fifty degrees Fahrenheit seems the most satisfactory. Even then eggs for hatching should be stored no longer than necessary as the fresher the eggs the better they are apt to hatch.

Seeding 135 acres of flax in one day is quite a record. This is claimed by an Ontario farmer, who used a light tractor pulling two twelve-foot double-disk drills.

Winter is the time when the tractor can best be spared for a couple of weeks for a thorough overhauling. Before overhauling a tractor, a systematic outline should be secured from the factory, if it is not contained in the instruction book. Such an outline will simplify the work and insure every part receiving the proper attention.

## Home Made Bread

Home made bread is without doubt the cheapest and most healthful food that can be produced for human consumption. It is the most completely digested solid food in the world, over 90% of it being transformed into health and strength. It yields nearly twice as much nourishment as rice or potatoes, and is ten times as nourishing as an equal value of meat. No bread is more truly wholesome or more perfectly satisfactory than that baked at home in which Royal Yeast Cakes are used.

Scientists have discovered a new and truly wonderful use for Royal Yeast Cakes. Physicians are prescribing it with remarkable success for conditions attributed to poor blood conditions. Soak a cake of Royal Yeast for half an hour in a cup of lukewarm water with one teaspoon sugar. Then stir well and strain once or twice through muslin and drink the liquid. BETTER results will be obtained by allowing it to soak over night and drinking half an hour before breakfast. Repeat as often as desired. Send name and address for free booklet entitled "Royal Yeast for Better Health."

# SMUTS WINS VICTORY IN BITTER ELECTION FIGHT IN SOUTH AFRICA

General Election Returns Give Gen. Smuts' South African Party (Loyalist) a Majority Over the Secessionists and All Others of 22 Clear Seats.

A despatch from Capetown says:—General Jan Christian Smuts, the Prime Minister of the Union of South Africa, and his Coalition of the South African and Unionist parties have won 43 seats in the House Assembly in the bitter election fight against the Secessionists, who had only 12 seats to their credit. Labor had won nine seats and the Independents one seat. Altogether there are 135 seats to be filled.

The returns received to date were mainly from urban districts and it probably will be several days before the full report from the country is available.

The followers of Gen. Smuts claim that he is certain of victory, since the bulk of his strength heretofore has been in the country districts.

General Smuts has been returned for Pretoria West by a big majority. The feature of the results, so far as known, is the collapse of the Labor party. Apparently the Labor party will only have nine members in the new Assembly, against 21 in the last House. Col. Cresswell, Leader of the Laborites, was defeated in Treynville.

The urban results have been very encouraging to the South African party, but the country returns are causing anxiety to the Government. The Minister of Justice in the Smuts Administration has been defeated by a Nationalist in Potchefstroom.

Sir Abe Bailey, well known in racing circles, retains Krugersdorp.

Enormous majorities were given the South African party in Durban and Cape Town, while the Labor party suffered a severe reverse in the Rand district. In Cape Town the South African party gained two seats, in Durban three, in the Rand eight and in East London one.

The victory of the party headed by Prime Minister Smuts is attributed to the fact that workingmen voted against the secession issue raised by General Hertzog, and did not pay much attention to sectional issues raised by Labor leaders.

A later despatch from Johannesburg, Union of South Africa says:—Latest returns of the South African election show the following results: South African party, 73; Nationalists, 43; Labor, 9; Democrats, 1; ties, 2.

## SNOWDRIFTS 20 FEET HIGH IN NFLD.

### Express Train Stalled 100 Miles from St. John's.

St. John's, Feb. 13.—An express train was fighting its way through snowdrifts twenty feet high to-night, 100 miles from this city, and doubt was expressed that it would be able to reach St. John's before the middle of the week.

On board are a number of passengers from Canada and the United States, besides the mails from the continent.

The point where the worst obstacles were encountered was the twenty-mile long neck of land, averaging five miles in width, which connects the main part of Newfoundland with the irregular south-western peninsula on which this city is located. A blizzard swept the island during the greater part of last week, terrific gales swirled over this narrow barrier between Trinity Bay on the east and Placentia Bay on the west and piled up huge banks of snow.

Yesterday it rained and the severe cold to-day formed a hard crust on the snow, making it more difficult to remove from the railroads and streets. No passenger train has left St. John's since noon last Sunday and it is probable that none will be sent out before Tuesday.

# WIRELESS SERVICE BETWEEN LONDON AND PEKING SOON ACCOMPLISHED FACT

Chinese Government Establishing Great Radio Stations, Making a Stride Forward in the Opening Up of China and Affording Unlimited Scope for British Enterprise and Trade in the Far East.

A despatch from London says:—It will soon be possible to send a wireless message from London to Peking, owing to efforts being made by the Chinese Government, according to Henry Barnes, the Shanghai correspondent of The Daily Mail.

There is a fine spirit of enterprise and a touch of romance in what is being done. A chain of wireless stations is being established which will link Peking, the seat of the central Government, with Kashgar, 3,000 miles away, in Chinese Turkistan, he says. Kashgar will then be within reach of the wireless stations in India and so with countries farther afield.

The wireless chain may be said to follow the line of a great trade route which was ancient before the Romans landed in Britain. For thousands of years this track has been a highway from the uplands of Central Asia into China, and has been trodden by countless races and tribes of men both in peace and in war.

The scheme, which is boldly planned, is being carried out by the

Marconi Wireless Telegraph Company to the order of the Chinese Government. One great high power station has been equipped at Urga, in the Province of Kansu, 800 miles from Peking, and these two places are already in communication. Urga is also in touch with Shanghai and Hankow and messages can be received from the long distance stations in America.

Another similar station is being established a thousand miles farther on, at Urumachi, and, all being well, it will be in operation in about three months' time. Subsequently the terminal station of the series will be erected at Kashgar.

Thus a stride forward is being made in the opening up of China. Modern methods of communication will assuredly be extended in other directions. It is permissible to hope that railways will be developed on a big scale in the near future, and therein lies unlimited scope for British enterprise and the advancement of British trade relations with the 400,000,000 of inhabitants of China.

# BRITISH OIL INTERESTS BUY TITLE TO CAUCASUS OIL FIELDS

Remarkable Political-Commercial Bargain Which Speculates on the Downfall of Bolshevik Power in Russia Within Ten Years.

A despatch from Paris says:—The Shell and Royal Dutch oil interests are reported on good authority to have concluded a rather remarkable political-commercial bargain which amounts to betting that the Bolshevik regime in Russia will fall within ten years.

Under this arrangement, which, it is understood, was consummated in Paris, the British oil interests have bought from Russians who held title to the property under the Czar's regime the rights to oil from the Grosnyi district in the Caucasus. The basis of the agreement is a payment now of from five to ten per cent. of the estimated value of the production from those fields in return for which British interests are assured the exclusive control of all production of that district.

There is a time limit of 10 years to the agreement—in other words, if at the end of 10 years the old owners are unable to regain their property the deal is off. Naturally, if the Bolsheviks fall this year and are replaced by a regime which recognizes the old property rights, the British interests may get the oil quickly.

Considerable secrecy surrounds the deal. But it is learned it is of such magnitude that lawyers who handled the deal here got a commission of several million francs. The payments made by Shell and Royal Dutch are said to run into many millions of francs, gold.

A number of Russians owning property in the Grosnyi fields are refugees in Paris and are engaged directly in the negotiations, it is said.

It is a common report in Russian colonies here that a number of Russians recently have had much money to spend—men who didn't have so much a short time ago.

Negotiations are said to be under way by both British and French oil interests to make a similar arrangement for the control of oil in the Baku district. This district is now under doubtful control, being held by Soviet organizations of Azerbaijan, whose subservience to Moscow appears at this time doubtful. A pipeline from Baku to Batum on the Black Sea, built by the Czarist Government, runs through Azerbaijan and Georgian territory. This is the richest oil district of the Caucasus.

## Connaught's Speech Makes Good Impression

Delhi, India, Feb. 13.—A great impression was produced by the Duke of Connaught's speech at the inauguration on Wednesday of the Council of State and the Indian Legislative Assembly, in which he made an earnest appeal for the cessation of bitterness and the mutual obliteration of mistakes made in the past.

The Viceroy, Baron Chelmsford, and Lady Chelmsford and the ruling Princes and chiefs witnessed the ceremonies, which were solemn and dignified.

## Louvre Transformed Into a Fort

Paris, Feb. 13.—As a result of numerous robberies of art treasures recently the Louvre has been transformed into a fort. Steel shutters have been placed at all the windows and high voltage wires with the current turned on have been swung before the entrances and exits nightly.

An army of watchmen armed with shotguns and revolvers are on duty.

In case of attempted robbery an air-raid siren on the roof will be sounded, alarming the whole city.

## St. John's Uses Tank to Level Snow Drifts

A despatch from St. John's, Nfld., says:—Newfoundland is fighting to beat back its worst snow siege in 30 years, with monumental drifts blocking its gates after a four-day blizzard.

Railroad, steamer and highway transportation still was suspended on Wednesday night, although the storm had ceased.

The first sally from this city against the besieging element was made by a whippet tank captured by Newfoundlanders in the war, which was put to work crunching down snowbanks on Water street, the city's main thoroughfare.

Royal Winter Fair Ready Next Fall  
C. F. Bailey, General Manager of the Royal Agricultural Winter Fair, Toronto, who told the Swine Breeders gathered at Toronto that he expected the institution to be ready by December next.

## GERMANS PREPARE COUNTER PROPOSALS

Committee of Industrial Leaders and Financiers at Work.

Berlin, Feb. 12.—A German committee of fifteen industrial leaders and financiers to-day began work on drawing up German counter-proposals on reparations, to be submitted to the London conference when it meets March 1. The work is proceeding along the lines of examination of the Paris terms to register German objections and exceptions, and secondly the actual drafting of counter-proposals.

The work is still in the initial stages, but the indications are that Germany will request the right to make payments over a term of thirty years and that the counter-proposals will closely follow the provisions laid down in the Treaty of Versailles.

## SINN FEIN WORK AT MANCHESTER

Suspicious Blazes Break Out Simultaneously in Lancashire Mill Towns.

Manchester, Feb. 13.—Two outbreaks of fire in business premises here last night and attempts to create outbreaks in two other places have led to the belief that another Sinn Fein campaign of incendiarism has been planned. Neither the fire brigade nor the police will definitely declare for this theory, but the fact that the outbreaks occurred about the same time in the evening, and that in one case men fired several times at watchmen, leaves little doubt in the minds of the public.

Mill fires in neighboring Lancashire towns were discovered during last evening, two outbreaks being reported from Oldham and another from Rochdale, the latter being less serious than those in Manchester. It was at a warehouse in the yard of the Holt-town district that the shooting took place. Several men, says a watchman, suddenly confronted him. One of them told him to stop where he was and give no alarm. Threatened with being shot if he disobeyed, he first did as he was told, but when the men went into the warehouse the watchman seized the opportunity to bolt and give the alarm. He scarcely got clear of the yard gate when there came reports of shots, and bullets rattled on the pavement, fortunately missing the fugitive. The police were informed, but were too late to catch any of the men. They found what appeared to indicate malicious attempts to fire the premises.

## Germans Try to Recover Palestine Trade

London, Feb. 13.—Sir Alfred Mond, member of the Zionist Organization's Economic Council for Palestine, returned from Palestine Friday night, and, according to The London Times, stated he was impressed most favorably with that country's possibilities. He warned British traders that Germans were making strenuous efforts to recapture their former monopoly of its markets, and urged the building of strong trade connections now in view of the future importance of commerce with Palestine, which he described as being in the process of active development.

## Weekly Market Report

**Toronto**  
Manitoba wheat—No. 1 Northern, \$1.89%; No. 2 Northern, \$1.86%; No. 3 Northern, \$1.82%; No. 4 wheat, \$1.74%.

Manitoba oats—No. 2 CW, 48%; No. 3 CW, 44%; extra No. 1 feed, 44%; No. 1 feed, 42%; No. 2 feed, 38%.

Manitoba barley—No. 3 CW, 83%; No. 4 CW, 69%; rejected, 58%; feed, 58%.

All above in store, Fort William.

Ontario wheat—F.o.b. shipping points, according to freights outside. No. 2 spring, \$1.75 to \$1.80; No. 2 winter, \$1.85 to \$1.90; No. 2 goose wheat, \$1.70 to \$1.80.

American corn—Prompt shipment, No. 2 yellow, track, Toronto, 90c.

Ontario oats—No. 3 white, 47 to 50c, according to freights outside.

Barley—Malting, 80 to 85c, according to freights outside.

Ontario flour—Winter, in jute bags, prompt shipment, straight run bulk, seaboard, \$8.50.

Peas—No. 2, \$1.50 to \$1.60, outside.

Manitoba flour—Track, Toronto: First patents, \$10.70; second patents, \$10.20.

Buckwheat—No. 2, 90 to 95c.

Rye—No. 2, nominal; No. 3, \$1.50 to \$1.55.

Millfeed—Carlots, delivered, Toronto to freights, bags included: Bran, per ton, \$40, firm; shorts, per ton, \$38; white middlings, \$41; feed flour, \$2.40.

Eggs, new laid, cartons, 62 to 64c; new laid, 59 to 61c. Butter, creamery prints, 56 to 59c; fresh-made, 59 to 61c; bakers', 38 to 45c. Oleomargarin, best grade, 29 to 32c. Cheese, new, large, 31 to 31½c; twins, 31½ to 32c; old, large, 32 to 33c.

Maple Syrup, one-gal. tins, \$3.50.

Honey, extracted—White clover, in 60-30-lb. tins, per lb., 23 to 24c; do, 10-lb. tins, per lb., 24 to 25c; Ontario No. 1, white clover, in 2½-5-lb. tins, per lb., 25 to 26c.

Churning cream—Toronto creameries are quoting for churning cream, 60c per lb. fat, f.o.b. shipping points, nominal.

Smoked meats—Rolls, 30 to 33c;

hams, med., 38 to 41c; heavy, 33 to 36c; cooked hams, 53 to 57c; backs, boneless, 55 to 60c; breakfast bacon, 42 to 50c; special, 50 to 56c; cottages rolls, 35 to 37c.

Green meats—Ouz. of pickle, 1c less than smoked.

Barrelled Meats—Bean pork, \$35; short cut or family back, boneless, \$46 to \$47; pickled rolls, \$53 to \$56; mess pork, 38 to 41c.

Dry salted meats—Long clears, in tons, 23 to 25c; in cases, 23½ to 25½c; clear bellies, 29½ to 30½c; fat backs, 22 to 24c.

Lard—Tierces, 22½ to 23½c; tubs, 23½ to 24½c; pails, 23½ to 24c; prints, 24½ to 25c; shortening tierces, 14½ to 15½c per lb.

Choice heavy steers, \$9 to \$10; good heavy steers, \$8.50 to \$9; butchers' cattle, choice, \$8.50 to \$9.50; do, good, \$7.50 to \$8.50; do, med., \$6 to \$7; do, com., \$4 to \$6; butchers' bulls, choice, \$7 to \$8; do, good, \$6 to \$7; do, com., \$4 to \$5; feeders, \$7.75 to \$8.75; do, 900 lbs., \$7.25 to \$8.25; do, 800 lbs., \$5.75 to \$6.75; do, com., \$5 to \$6; canners and cutters, \$3 to \$4.50; milkers, good to choice, \$85 to \$120; do, com. and med., \$50 to \$60; choice springers, \$90 to \$130; lambs, yearlings, \$9 to \$9.50; do, spring, \$10.50 to \$11.50; calves, good to choice, \$15 to \$16; sheep, \$6 to \$7.50; hogs, fed and watered, \$15 to \$15.25; do, weighed off cars, \$15.25 to \$15.50; do, f.o.b., \$14 to \$14.25; do, country points, \$13.75 to \$14.

### MORASH FOUNDRY

Miss G. VonDoran and Miss Grace D. Merkley are spending a few days in Toronto.

Blue Serge Suits, tailored to your measure, \$35.00 to \$50 at A. H. Casselman's.

Mrs. P. Drummond of Ottawa is visiting her brother, Messrs. Harry and Ross Moore, this week.

Mr. L. Empey of Ottawa spent the week-end with relatives in the county.

Mrs. J. W. Allison is spending a few weeks in Windsor, the guest of Mrs. Burr.

On Sunday, February 20th Dr. Margaret Ohara, B.A., C.S.I., one of the pioneer lady medical missionaries of the Canadian Presbyterian Church, will address the evening service in the Presbyterian Church at 7 p.m. Dr. Ohara, who is at present enjoying a well earned furlough, the third in twenty-nine years; has an interesting story to relate. She was the second lady doctor to volunteer for Indian Medical Mission Work and has labored in the native state of Rutlam, even since she went out. If you desire a first-hand account of what the Missionaries are doing, come and hear this splendid woman, whose whole life has been spent in the Master's service. Dr. Ohara will also give a special address to the ladies on Sunday afternoon at 3 p.m. This meeting is open to ladies of all denominations who are interested in Mission Work. A cordial invitation is extended to all.

Mr. and Mrs. J. H. Meikle and Mr. and Mrs. B. B. Tucker were in Montreal on Wednesday.

Miss L. E. Myers of Montreal is the guest of Mrs. Stuart and Mrs. Brady this week.

Mr. Frank Stewart spent the early part of the week in Montreal, attending the Custom Cutters' Convention, where Mr. S. Regal of American Fashion Co., New York, gave several demonstrations.

A real family gathering is scheduled for Grimsby, Ontario, August 25, 26 and 27, 1921, when an old Boys and Girls reunion will be held. If any of our readers are from that vicinity send in your name and address to the Old Home Committee, Grimsby.

Mrs. Ryerson of Toronto who accompanied Dr. D. C. Casselman home on Sunday, returned on Wednesday night, accompanied by Master Ryerson and Miss Mary Casselman. Mr. George Meikle will return home on Saturday after spending several weeks in Florida.

Mrs. Adam McHaffie has purchased the home now occupied by Mr. and Mrs. C. A. Stillson.

Young Men's Suits, regular \$33.00 now \$26.50 at A. H. Casselman's.

Person holding No. 16 for crochet cap call at Gladys Clark's.

Mrs. Roy Stewart and Miss Nora Markell of Wales spent the week-end the guest of Mr. and Mrs. R. G. Merkley.

Mr. Douglas B. Smith of Montreal spent Sunday in town.

The rapidity with which the scheme of the Ontario Government to reforest areas of non-agricultural land in well settled counties is being taken up, shows that the people are waking up in regard to the disappearance of timber forests. Along with the plan for a demonstration plantation of five acres in each township progress is now being made with the more ambitious scheme covering tracts of from five hundred to one thousand acres under the ownership of counties. The counties of York, Ontario, Simcoe, and Norfolk have already started on the plan, and other counties and even some urban municipalities are discussing the acquiring of a municipal forest in this city.

Miss Audrey Allison is spending a few weeks in Toronto.

Mrs. W. Dewett of Montreal is visiting her mother, Mrs. S. Rice.

Men's and Youths' long pants regular \$4.50 and \$4.25, now \$3.85 and \$3.65 at A. H. Casselman's.

Mr. and Mrs. Ernest Deeks and family of Iroquois, spent Sunday at the home of Mr. J. M. Deeks.

"The goose with the golden egg" and "Jim Jones" hen that laid the large egg has now become familiar to us all, but this week, something new in the egg line was brought into this office. A local business man is in possession of a hen that lays two eggs at a time—one perfectly formed egg with a hard shell, within another perfectly formed shell which contains a larger portion of white, but minus the yolk. The egg is on exhibition at The Leader Office.

Those who contributed to the Valentine Food Sale in aid of the Public Library, will be interested to hear that the proceeds amounted to \$116.72.

Mr. Geo. L. Brown, C.E., engineer for Escott Township, was in Ottawa this week as a member of a delegation which waited on the Minister of Public Works urging upon him the necessity of constructing a dock at Rockport.

The remains of Mr. Roy Gillard, son of Mr. David Gillard of Boucks Hill, who died in Rochester, N.Y., were conveyed to Morrisburg on Wednesday, February 16th. The funeral will take place on Saturday, from the family residence Boucks Hill to Trinity Church, Riverside, at 2 p.m. Interment at Riverside cemetery.

WHITTEKER the Optician will Wales, January 15th. Morrisburg, Jan. 17 to Feb. 5.

Rev. C. Baldwin of Aultsville, conducted the services in the Methodist Church here last Sunday in the absence of the pastor who was on the Inkerman circuit, preaching anniversary sermons at the Vancamp appointment. The Matilda District meeting is being held this week at Cardinal Thursday afternoon and evening. The sessions will be in the interests of the Sunday School work and Friday morning the business meeting.

### IN MEMORIAM

In memory of Flora Bell, wife of Samuel Casselman who died Feb. 16th 1920.

"This day brings back to memory a loved one gone to rest."

### IN MEMORIAM

In memory of our dear boy, Willie Stata. He suffers not; 'tis over. We know he is free from pain. Christ took him to his bosom. There forever to remain.

We miss you in the early morn, And when the shades of night are near.

We look upon an empty seat And in silence drop a tear.

There is sorrow in our home Our idol? from his birth, No more his childish prattle hear While we remain on earth.

Oh, memory, that blessed gift In mental vision our boy we'll see That God, has to mortals given, Until we meet him there, in Heaven

We are trusting in God's Wisdom As we trusted heretofore, And as the years are passing by We will trust him more and more.

Father and Mother.

### NOTICE

Dated this 19th day of February, A.D. 1921.

LAWSON & CASS,  
Chesterville, Ont.  
Solicitors for Executors.

### ACCIDENT TO STEAMER CRESCO

(Ogdensburg News, Oct. 12, 1920)

On Friday evening last, while the steamer Cresco was coming in at the river dock, the cylinder head blew out, disabling the boat.

The passengers grew somewhat alarmed when they discovered they were drifting helplessly in the current, toward the shoal where the barges of the steam-barge Porter were on ground last spring. Mr. John Mallan, Jr., happened to be near the dock, and taking in the situation at a glance he took possession of a small boy and rowboat and started at once for the disabled steamer. A rope was thrown Mr. Mallan and he rowing as no other man in Cardinal could row succeeded in turning the Cresco sufficiently to allow her to drift north, where she was safely landed and all the passengers put on the canal bank.

Capt. Wm. Stitt, of the tug Davis, brought the passengers up the new canal to Bridge Street dock, from which place they proceeded to their homes. The Cresco was taken to Waddington next day, and on Monday morning went to Ogdensburg for repairs in tow of the steamer Mary.

No person received any injury save that caused by fright among some of the ladies.
