BUY W-S-S WAR-SAVINGS STAMPS

High Prices are Predicted

For Eggs and Poultry, owing to Export Demand

We Export to Great Britain direct

It will pay Farmers handsomely to feed and care for their Poultry Flocks.

Farmers of Canada lose millions of dollars annually from bad methods of producing and handling eggs. Considerable loss is preventable because it is due to partial hatching of the fertile eggs which have been allowed to become warm enough to begin to incubate

Heat is the great enemy of eggs both fertile and infertile. Summer heat has the same effect on fertile eggs as the hen or incubator. Farmers are urged to follow these simple rules, which cost nothing but time and thought, and will add dollars to the poultry producers' returns.

1—Keep the nests clean and provide plenty of clean straw in and around the hen house.

2—Gather the eggs twice daily.

3—Keep the eggs in a cool, dry room or cellar until the collector calls for them.

4—Market the eggs at least once a week.

5—Sell, kill or confine all male birds when the hatching season is over.

6—Make application for membership in the Dundas Co-operative Association, Limited, and participate in the profits on the sale of your eggs and poultry.

BEAVER BOARD

FOR BETTER WALLS & CEILINGS

Why Live with Cracked Walls and Ceilings When They're Easily Covered Up

Beaver Board will cover them up for all time and you'll never have the job to do of fall plaster again. While Beaver Board is doing away with the danger of falling ceilings it is covering up old dingy wall paper on walls and ceilings it is giving you an ideal surface for painting and decorating.

Many an old homestead has been revived with this knotless, crackless manufactured lumber. Room after room has been made over—one at a time if you please—without mess or litter.

Beaver Board is real lumber. It is built into large panels from the strong, pure fibres of the spruce tree. Each panel is treated with the patented *Sealtite* process which prevents warping. If you need to build or re-build, restore or enlarge ask us how you will profit by using Beaver Board.

QUEBEC HEATERS

Sizes No, 3 and No. 4, with and without grates, nicely finished, plain and nickel plated trimmings, square or round tops.

Priced from $10. up

You ought to see the two in one combined **Quebec Heater and Cooker,** with four hole top, fine baking oven, towel drying rod, grate and ash pan. Just a dandy economical heating and cooking stove - and cheap too.

OPPORTUNITY KNOCKS AT OUR DOORS

Manager Waddington Condensary to Subscribe 51 P.C. Cost of Morrisburg Plant; Offers $3.15 Cwt. Milk Shipped to Waddington

The Farmers' meeting, which took place on Saturday evening last in the town hall, was largely attended, and was capably addressed by Mr. McKay, Manager of the Waddington Condensary, who is filled to the brim with sound, practical wisdom, qualified by 30 years' experience in the manufacturing business. He gave a beneficial talk to the large attendance.

The object of the meeting was to sound the farmers of this district by calling for an expression on the proposition of abandoning cheese-making in the local cheese factories, and ship the milk across the line to Mr. McKay's Waddington plant. The price offered for November was $3.15 per cwt. for 3 p.c. milk-test. In the event of the acceptance of this offer by a majority of the farmers of this district, the local cheese-factory will be disposed of to Mr. McKay, and a receiver appointed at this point to take in the milk and ship it to Waddington, N.Y., at a cost of 15 cents per cwt. for transportation, which is paid by the buyer. The shippers have to comply with the rules of the U. S. Board of Health which were explained by the speaker, including: The inspection of the herds by a Veterinary; the testing of the milk, and the steralizing of milk cans, the latter being done by the receiver free of charge. The only charge being a $2.00 fee for the inspection of herds. The farmer furnishes his own cans.

The speaker was very fair to his hearers, giving them the benefit of his long, and successful experience in dealing with farmers, and pointing out certain unfavorable conditions which sometimes arise, one of these being a flood of milk in certain months of the year. Mr. McKay assured the meeting that in the event of taking over this patronage, he would take care of it under all circumstances. In this connection he stated that should conditions arise that did not warrant the shipping of milk to Waddington, he would immediately bring the local factories into operation and resume the making of cheese. He was willing to furnish bonds to the extent of one month's delivery, placing the maximum possibility at about 180,000 pounds.

No one who heard Mr. McKay in the hall will question his fairness and generosity in dealing with the matter, but there still remains room for deeper consideration of the future well-fare of the people of this district. The acceptance of a bit of surplus currency for the farmers' milk does not necessarily mean that he is benefiting by it. It is just the contrary; it is a case of the Canadian farmer receiving the price of his milk plus a bit of a surplus towards the destruction of Canadian markets. How much does the condensary at Waddington increase the value of farms in this district? How much would the farms in this district increase in value if a condensary were built in Morrisburg? Let the farmer answer these two questions and compare both answers.

In an interview with Mr. McKay after the meeting, we asked him as a man of 30 years' experience, what were his views as to the prospects for a condensary in this locality in the near future. He stated that on either borders, being a one-sided country to draw from, condensaries were handicapped, but the State Roads made it possible to draw milk, by means of motor truck, for a radius of more than ten miles, which would be impossible over the present conditions of Canadian roads The genial,, enterprising, American Capitalist then admitted that the Canadian Farmer would be well advised to seize the present wonderful opportunity he has of urging the completion of the good roads system, when one realizes that it would mean approximately 25 cents per cwt. on the milk he produces, and a comparatively great saving on all his products. Mr. McKay stated that he was prepared to subscribe 51 per cent. (a controlling interest) towards a condensary in Morrisburg. This statement is surely worthy the serious consideration of the farmers of this district.

At the present time, we understand the farmers are receiving $4.00 per cwt. for a limited amount, and also for a limited time, for milk in Montreal, which nets about $3.60. Therefore it should be unquestionably clear to the farmers of this district, that the $3.15 offer can be treated only as a mere stepping stone to a condensary for Morrisburg. Every pound of milk exported by farmers of Aultsville to Massena, and every pound of milk exported by farmers of this district to Waddington, contributes towards dotting the American border with condensaries; and every condensary built on the American Border increases the value of American farms; and by contributing towards the upkeep of American condensaries, we are decreasing the value of Canadian farms and Canadian prosperity in general. "Uncle Sam" does not believe in milking Canadian cows for the fun there's in it.

A Canadian condensary must inevitably be the outcome, and the only logical move is to accept Mr. McKay's two offers.

Shall the Citizens of Morrisburg, and the Farmers of this district seize this opportunity; shall they allow this valuable asset to be drawn beyond their reach ?

FARMERS CALL LABOR TO BOOK

1,000 Delegates From Soil, in Resolution, Demand that Strike Habit Cease.

Kansas City, Nov. 2—Organized labor cannot count on the farmers to join in any efforts to further shorten the hours of labor or increase wages. Furthermore, organized labor must very shortly heed a concerted demand from the farmers that it not only cease agitation along these lines, but that it use its best efforts toward "exerting a steadying influence" in these turbulent times, particularly by refraining from striking.

This stand of the farmers of the United States is outlined in resolutions adopted by the International farm congress at its annual three-days' sessions here.

The resolutions begin by "pointing with pride" to the splendid war-production record made by the farmers, and a pledge to "continue to produce in such measure as may be required to meet any further emergency." Then, after "renewing to the hosts of labor our expressions of friendship and good-will" the resolutions proceed to view with apprehension and disfavor the turbulent conditions existing, particularly in the ranks of organized labor.

The resolutions "deplore the calling of strikes in times like these for any reason other than a grave emergency.' They oppose the unionization of police officers or any other officials or employees in public service; view with disfavor and alarm the growing tendency towards idleness among all classes of people; voice a vigorous protest against the wide margin between prices paid the producer and those charged the consumer; condemn profiteering, particularly in the necessities of life, and oppose further government operation of railroads.

SUCCESSFUL BAZAAR

The members of the Congregation of St. Cecelias Church, Iroquois, are greatly elated at the success of their Bazaar which was held in the Town Hall on Thursday, October 30th. The hall was tastefully decorated, and the various tables and booths arranged in the most attractive manner. A large assortment of goods consisting of food, clothing and various kinds of toys and novelties were disposed of, and in spite of unfavorable weather, there were plenty of customers to keep the ladies in charge of the various tables quite busy and still smiling. The result of the Grand Drawing was as follows:

1st. Prize, Ten Dollar Gold Piece, donated by D. C. Bush, Morrisburg, won by W. C. Coir, Morrisburg.

2nd. Prize, Five Dollar Gold Piece, donated by Rev. J. A. Meehan, won by F. J. Brennan, Regina, Sask.

3rd. Prize, Silver-handled Umbrella, donated by William Tallmire, won by T. N. Tanney, Iroquois.

4th Prize, Silver Fruit Dish, donated by Martin Kavanagh, won by Margaret Caulfield, Prescott.

The drawing took place in the presence of the large audience which filled the hall for the splendid musical and literary entertainment which followed the Bazaar. John P. Dunn of Prescott made the announcements and presented the prizes, while Miss Evelyn Pendergast of Cornwall drew out the winning tickets. The concert began at 8.30. Mr. Dunn made an ideal chairman, and his remarks in introducing the various numbers were much enjoyed.

The Program

1—Selection by the Iroquois Orchestra.

2—Solo, "Dear Old Pal of Mine", Mr. Ingram of Ogdensburg.

3—Quartette, by four little girls, Phyllis and Edna Coupland, Patsy McIvor and Eleanor Kavanagh.

4—Solo, Mrs. W. Kavanagh of Cornwall.

5—Lecture, "The Canadian Nation" Major Rev. Dr. J. J. O'Gorman.

6—Instrumental Duet, Miss Collard and Miss Burnside.

7—Solo, Miss Evelyn Pendergast.

8—Piano Duet, Misses Annie Smith and Patsy McIvor.

9—Solo, Mr. Ingram.

That the concert was a success was quite evident from the generous applause given to the various numbers, but certainly the most notable feature was the Lecture. Speaking on what is evidently a favorable topic, Dr. O'Gorman was at his best. With the simple unstudied eloquence of sincere conviction, he made the story of Canadian National development so attractive that the interest never flagged. His lecture was indeed a splendid treat, and was very much enjoyed by all.

In the name of his Iroquois Congregation, Father Meehan desires to express his sincere thanks to all those who contributed to the success of the Bazaar and Concert. The net proceeds are over $400.00.

GERMAN MOTION PICTURE FILMS OF U-BOAT MURDERS FOUND

Camera Men on Submarine Took Views of Undersea Vessels Shelling British Ships—Were Designed For Exhibition in Germany.

A despatch from New York says:—Motion picture films taken from the archives of Grand Admiral von Tirpitz in the former Kaiser's admiralty, and showing allied vessels being torpedoed by German U-boats during the world war, have been brought here by J. H. Macksum, a Knights of Columbus secretary. The films, which were designed for exhibition by Germany on the day of its triumph, were made by camera men on a submarine which was commissioned to cruise about the Irish Coast and photograph merchant vessels after they had been attacked by undersea craft. This boat used more than 40,000 feet of film.

"It was largely through the influence of the present German Government that the films came into my possession," said Mr. Macksum, who had charge of the motion picture work for the Knights of Columbus in France and Germany. "During the revolution the Admiralty offices were raided by the mobs and the canisters containing the celluloid reels became scattered about. At Coblenz I made friends with a former high ranking army officer and he secured the films from a revolutionary leader whom he knew posessed them."

The pictures depict the U-boats shelling four British vessels while those on the ships were swimming for lifeboats and rafts. A torpedo leaving the tube of a submarine and speeding toward its victims is also shown.

CANADA SELLS SURPLUS WHEAT

Receives Cash For Every Bushel of Grain.

A despatch from London says:—With contracts with Britain, Belgium and Italy for the supply of wheat signed, and contracts with France, Poland and Portugal for wheat, barley and flour, now under negotiation, Canada sees her way clear to the disposal of the whole of the year's exportable grain surplus. So far over 800,000 tons of wheat are actually contracted for. It is expected there will shortly be an announcement of the sale of 200,000 tons of wheat to France, which will be paid for on a cash basis, and a sale of flour, which will probably be financed under the French credit of $25,000,000. It is understood Poland is dickering for wheat, but there is difficulty in the matter of payment, and Portugal has enquired for Canadian barley. Canada has not sold a bushel of wheat except for cash, as it is considered our foreign credits should not be used for the supply of such a necessity, wheat being almost legal tender in Europe these days. The Dominion's greatest difficulty has been to sell flour, and France may therefore be allowed to use her credit to pay for what she takes in that line.

High Prices For Canadian War Goods

A despatch from London says:—Dealers and the general public are very keen to get hold of surplus Canadian military stores. A five-day sale, including a varied assortment of 2,400 lots, realized £8,300. Some prices obtained were phenomenal. Canadian grey blankets, costing 29 shillings a pair new, sold for 19 shillings a pair after four years' wear. Tools brought higher prices than the original cost. New boots fetched 21 shillings a pair. Repaired pairs went at 11 shillings. Repaired boots, not guaranteed, made 5 shillings 9 pence. Much used typewriters—128 Underwoods—realized 20 per cent. over cost. The highest price obtained was £25.

British Warships to Carry Commercial Men

A despatch from London says:—British commercial travelers and the representatives of business houses are to be permitted passage aboard every British warship leaving the country for abroad. This, according to Sir Hamar Greenwood, Under-Secretary for Home Affairs, who made the announcement before the Association of British Chambers of Commerce, is "a move unique in the history of the Empire." Walter Hume Long, the First Lord of the Admiralty, has given his assent to this special service, Sir Hamar declared.

French and Arab Troops To Replace British in Syria

A despatch from London says:—Andrew Bonar Law, Government leader in the House of Commons, announced that the Government was arranging with France and Prince Feisal, son of the King of the Hedjaz, for the immediate withdrawal of the British troops from Syria and the assumption of the duties of occupation by the French and Arabs, pending the conclusion of the peace treaty.

Ontario's New Prime Minister

Ernest Charles Drury, who is likely to be Ontario's next Premier, farms 250 acres at Crown Hill. Crown Hill is one of those little places that lost its postoffice when rural mail routes were organized, but it is about five miles from Barrie on the "Penetang" road. Two hundred acres of Mr. Drury's possessions were selected and pioneered by Mr. Drury's great-grandfather in 1819, and have been in possession of the family ever since. The new Leader is a good, practical farmer, with the added advantage of a course at the Guelph College and the degree of B.S.A. He hasn't specialized in his farming to any great extent, though perhaps he takes more pride in his herd of dual-purpose Shorthorns than in anything else. Of late years he has given much attention to the U.F.O. movement, with particular relation to the tariff. Always he has been active in the community life at Crown Hill. The fact that the church and the school are almost at his door made easy his attendance at these meeting places.

E. C. Drury, who has been chosen leader of the United Farmers-Labor parties in Ontario.

The new Leader is a little over forty years of age, is strong and well built, and has a determined look. His family consists of wife and five children, three boys and two girls. His eldest son will be able to run the farm while father runs the politics of the Province. In religion Mr. Drury is a Methodist.

Treaty Effective On Armistice Day

A despatch from London says:—The German Peace Treaty may come into effect on the anniversary of Armistice Day. It was announced by Cecil Harmsworth, Under-Secretary for Foreign Affairs, in the House of Commons, that the Government hoped the treaty would be formally ratified on November 11 and come into force the same day.

Payments Made Russia By Britain in Two Years

A despatch from London says:—Cecil Harmsworth, Under-Secretary for Foreign Affairs, in the House of Commons, said that Constantin Nabokoff, who represented Russia at London, had received from Great Britain, between March, 1917, and March, 1919, when payments ceased, more than £184,000,000.

Grain and Live Stock

Breadstuffs.

Toronto, No. 4.—Manitoba wheat—No. 1 Northern, $2.30; No. 2 Northern, $2.27; No. 3 Northern, $2.23, in store Fort William.

Montreal, Nov. 4.—Butcher steers, $9.75 to $12.50; med., $8.50 to $9.50; com., $7.50 to $8.50; butcher heifers, good, $8.50 to $9.50; med., $7.50 to $8.25; common, $6 to $7.25; butcher cows, good, $8 to $9.50; med., $6.25 to $7.50; canners, $4.50 to $4.75; cutters, $5 to $6; butcher bulls, common, $5.25 to $6. Good calves, off cars, $10.50; heavy calves, $10 to $12; good veals, $14 to $16; medium, $9 to $13; grass, $6 to $6.50; ewes, $6.50 to $8.50; lambs, good, $13.75; common, $10.50 to $12.50; hogs selects, off car weights, $17; lights, $15.75 to $16; sows, $12.

DIVIDE REMAINING GERMAN WARSIHPS

Majority to Go to France and Italy, Consent of Allies.

A despatch from Paris says:—The Germans must make reparation for the destruction of the Scapa Flow fleet, but this must be paid in other naval material or in property of the German Government which otherwise would not be subject to reparations.

This is the decision of the Supreme Council after hearing reports on the matter, these reports holding Germany responsible for the sinking.

In this connection it is learned that the United States and Great Britain are about to consent that the remaining German warships shall be divided instead of being destroyed, the majority going to France and Italy. This represents a victory for the French.

40,000 Died of Starvation In Petrograd in One Month

Stockholm, Nov. 2.—A despatch to the Tidende from Helsingfors says the famine in Petrograd is assuming terrible proportions. Forty thousand persons have died from starvation within a month, it is declared.

Petrograd has been without bread for the last two weeks, thousands of persons dying daily, according to information brought to Helsingfors yesterday by a Finn who escaped from a prison camp at Moscow on Oct. 12.

Arab Horse Given To King George

A despatch from London says:—The Arab stallion and a 250-year old golden sword which belonged to a Monarch of Persia were presented to King George at Buckingham Palace by Sheik Ahmed, a nephew of the present ruler of Koweit.

GERMANY MUST MAKE GOOD ALL VIOLATIONS OF ARMISTICE

Compelled to Surrender Cruisers and Destroyers to Replace Those Sunk at Scapa Flow and Surrender Equipment of Equal Value to Battleships.

Paris, Nov. 2.—Demand will be made of Germany that all violations of the armistice shall be made good. This has been called upon by the Supreme Council, which has completed the protocal to the German treaty.

The protocol provides that Germany shall surrender cruisers and destroyers to replace those sunk at Scapa Flow, and also surrender floating drydocks, lighters, trains, tugs and other naval equipments equal in value to that of the first-class battleships destroyed, which Germany cannot replace.

There is no provision in the protocol as to how the warships and naval supplies shall be divided among the Allied and associated powers. Germany has been asked to send a commission to Paris to sign the protocol and attend the formal ratification of the treaty.

The Supreme Council has completed its reply to the Bulgarian request for changes in the peace treaty, and will probably submit it to the Bulgarian representatives to-morrow, granting ten days for the signature.

UNITED STATES FEDERAL ORDER FAILS TO CHECK MINERS' WALKOUT

United Mine Workers of America Go Out Without Leadership — Federal Government Seizing Coal Supplies.

Chicago, Nov. 2.—Information obtained from the bituminous coal fields of the United States, in which more than 400,000 members of the United Mine Workers of America have been ordered out on strike, to-night indicated that there would be nothing which could check the momentum of the walkout despite the temporary restraining order which was issued Friday in the United States District Court at Indianapolis. Deprived of the directing heads of its leaders, as a result of injunction, the membership of the union was prepared to enter the first full working day since the strike order became effective in an effort to demonstrate its ability to halt the production of soft coal throughout the nation.

The operators, so far as available reports show, have not yet made plans to combat the strike, notwithstanding the fact that troops, both Federal and State, have been sent in many instances to localities from which they might best guard the coal properties in the contingency of violent efforts to prevent non-union men from taking the places of the strikers. On the other hand, there has been no reported picketing activity by members of the unions. Both operators and strikers apparently had decided to await developments before either of them takes a further definite step in the controversy.

Reports from various railroad centres showed that seizure of coal in transit, as ordered by the Federal Government, had begun. Hundreds of coal-laden cars in transit were taken over by directors of the Fuel Administration, and were side-tracked to await possible distribution under the administration's priority schedule.

CANADIAN EGGS ON LONDON MARKET

Throngs of Citizens Feast Eyes on Shipment of Rare Food.

A despatch from London says:—A throng of Londoners round the Canadian Government shop in Charing Cross on Friday feasted ravished eyes on a window full of magnificent Canadian eggs. In the good old days eggs and bacon was the world-renowned breakfast of the Englishman. That was before eggs rose to 11 cents apiece and promptly disappeared from currency—an economic cataclysm which cast a gloom on the Englishman's whole existence, and must be held to account in some degree for the prevailing unrest. In the announcement, attached to the astonishing eggs, that "Canada will ship six million dozen eggs to Great Britain this year" the Londoner, weary of the Food Controller's manna, caught the first glimpse of the post-war land of promise.

CANADA TO GET SHARE OF COAL

United States Will Not Discriminate Against Canada.

Ottawa, Nov. 2.—There will be no discrimination against Canada in the matter of coal supply from the United States, the Government has been informed, and Canada will have her share of the output the same as before. This was the statement of Sir George Foster, Acting Premier, to the Canadian Press to-night.

Sir George stated that the coal outlook, which is made serious by the present tie-up in the United States mines, was receiving serious consideration from the Government.

"We have been assured," he said "that Canada will be treated the same as in other years in regard to supplying us with coal. As long as there is coal available there will be no discrimination against us because we are on this side of the boundary."

Considerable uneasiness is felt in many quarters, however, if the strike should last long enough to eat up the supplies already on hand, in which case, of course, the export from the United States would be materially reduced, if not altogether cut off.

Unique Gift to Prince From Montreal Hebrews

A despatch from Montreal says:—Gifts of many kinds have been presented to the Prince of Wales during his tour of the Dominion, but one that differed from the rest was that presented to him during his visit to the Baron de Hirsch Institute. A tablet of gold, on which were carved the Ten Commandments, was presented to the Prince, the tablet being handed to him by Sylvia Lillian Cohen, the nine-year-old daughter of Mr. Lyon Cohen. The commandments were in Hebrew characters, but the words "Presented to his Royal Highness the Prince of Wales from the Jewish citizens of Montreal" were in English.

MILLION FROM LINER PASSENGERS

Enterprising Victory Loan Canvasser Has Already Sold $624,000.

Halifax, Nov. 2.—A new record in Victory Loan campaigning was made last night, when J. C. Stredder raised the total subscriptions from the Cunarder Mauretania to $315,00, giving the liner eight crests on her Prince of Wales' flag, one more than the Adriatic carried away from Halifax on Thursday. This brings the aggregate subscribed by passengers, mostly Americans and British, on transatlantic liners in Halifax during the week up to $624,000.

Mr. Stredder, who is a local insurance manager, conceived the idea of canvassing the liners coming to Halifax. His first adventure on the Adriatic met with a fine response, and when he brought the Lieutenant-Governor aboard to present the Prince of Wales' flag Mr. Stredder started a new drive, backed by British M.P.'s and enthusiastic Americans, which brought the Adriatic's total to $275,000 before she called.

The Lapland came next, and Mr. Stredder and his aide, A. S. Carten, extracted $32,000 from her passengers. Two days on the Mauretania have yielded $317,000, with the prospect of more to come.

Monday morning Mr. Stredder boarded the Carmania, which has among her passengers Sir Thomas Lipton, and before the week is out expects to have a round million from the liners.

Sugar Shortage May Become More Acute

A despatch from Ottawa says:—The sugar shortage in Canada promises to become more acute, owing to non-arrival of raw sugar, consequent on the longshoremen's strike at New York. The Canadian Trade Commission has taken a firm stand against further export of sugar, and also advises that as a temporary measure, the demand for sugar for domestic use should be met by the refiners before the manufacturers of products containing sugar are supplied.

J. P. Morgan Subscribes $1,000,000 to Loan

A despatch from Montreal says:—Sir Frederick Williams-Taylor, general manager of the Bank of Montreal, authorizes the announcement of a subscription to the Victory Loan of $1,000,000 made by Messrs. J. P. Morgan Company, New York, through Bank of Montreal, their representatives.

It is believed that this is the first direct subscription by Messrs. Morgan to any of the public issues made by the allies.

Many Trains Discontinued By United States Railroads

New York, Nov. —Sixty-one inches of the trains on the various road and nine New York Central railroad will be on the West Shore to conserve discontinued temporarily of the coal the fuel supply becau official strike, it was announced here to-day.

BRINGING UP FATHER

THE NERVOUS SCHOOL CHILD

Needs Rich, Red Blood to Regain Health and Strength.

Many children start school in excellent health, but after a short time home work, examinations, hurried meals and crowded school rooms cause their blood to become weak and thin, their nerves over wrought and their color and spirits lost. It is a great mistake to let matters drift when boys and girls show symptoms of nervousness or weak blood. They are almost sure to fall victims of St. Vitus dance, or drift into debility that leads to other troubles. Regular meals, outdoor exercise and plenty of sleep are necessary to combat the nervous wear of school life. But it is still more important that parents should pay strict attention to the school child's blood supply. Keep this rich and red by giving Dr. Williams' Pink Pills according to directions and the boy or girl will be sturdy and fit for school. The value of Dr. Williams' Pink Pills in cases of this kind is shown by the statement of Mrs. Pearl G. Harrington, Kingsville, Ont., who says:—"I have often felt that I should write you and let you know what Dr. Williams' Pink Pills did for me. At the age of thirteen I was afflicted with St. Vitus dance. The trouble became so severe that I had to be taken from school. I was given medical treatment but it did not help me, in fact I was steadily growing worse. Then a friend advised my mother to give me Dr. Williams' Pink Pills, which she did, with the happiest results, as the pills completely cured me and I was again able to take up my studies and attend school. Again about three years ago I was attacked with nervous prostration and once more took Dr. Williams' Pink Pills, and after using five boxes was fully restored. I cannot praise these pills too highly as I believe they will cure any case of St. Vitus dance, or restore anyone who is weak, nervous or run down.

You can safely give Dr. Williams' Pink Pills to the most delicate child, or take them yourself with equally good results when you need a blood tonic. These pills are sold by all dealers in medicine, or will be sent by mail, post paid, at 50 cents a box or six boxes for $2.50, by The Dr. Williams' Medicine Co., Brockville, Ont.

On many farms there are more or less piles of half-rotted manure lying around the barnyard that are in the way at threshing time, but would be valuable if scattered [illegible] tures.

A Medal Medley.

The Trafalgar medal was struck in pewter for the lower deck. The seamen were annoyed at its shoddy appearance, and most of the recipients threw their decorations into the sea.

The Soudan medal of 1896-7 has a ribbon in which yellow and black are separated by a narrow stripe of scarlet. These colors were chosen to symbolize the driving out of the black Dervishes from the yellow desert by the "thin red line."

Another ribbon which has an interesting significance is the yellow, blue, and yellow suspender of the Khedive's Soudan medal. Here we have typified the blue Nile running through the sandy plains of Egypt.

The authorities have never been in a hurry over issuing medals; there are two instances on record when those entitled to rewards have been called upon to wait fifty years for their decorations.

The Victoria Cross was designed by Queen Victoria and the Prince Consort. For a long while it was made of the bronze obtained from cannons captured in the Crimea. Now, the makers use cannon taken in the Boxer Rising.

For Jellabad a very ugly medal was struck, and those who received it grumbled in no measured terms. A really artistic piece was then provided, and all who possessed the first were requested to exchange it for the second. Not one per cent. of the recipients applied for the better medal!

Until the year 1914, the Long Service ribbon for the Army was similar to that for the Victoria Cross. The only difference was in width, the latter being a fraction of an inch wider. Such was official intelligence.

No less than eleven ribbons recognized by the authorities are entirely blue.

After Waterloo, the Chief Engraver of the Mint was commissioned to prepare a fitting medal for presentation to the leaders of the victorious armies. He did so, but took thirty years to complete the work.

The medal for Culloden was the first to be provided with a ribbon of definite pattern. Before then, each wearer suspended his decoration with any sort of ribbon he pleased.

"Hard Service."

That is the motto of Lord Allenby, the hero of the Palestine Campaign.

He is known in the Service as "the Bull," not because of his massive physique—he is said to have the biggest neck in the Army—but on account of the manner in which he changed and drove away incompetent officers.

He is a man of original sayings. "I would rather have a drunken army than a stale one," is one of them.

How the Eskimo Gets His Meat.

That meat production can be developed in the arctic and subarctic regions of Canada is believed by the Government, which is investigating reindeer with a view to introducing them into the far northern regions of that country.

The reindeer lives principally on the moss, which covers thousands of miles of country in Canada, Alaska, and Siberia, and is a domesticated animal. It is not generally known that the reindeer is not a native of Alaska, but was introduced there in 1891 by Sheldon Jackson, then general agent of education in Alaska.

He discovered that the natural food supply of the Eskimo was fast disappearing with the incoming of the white hunters, and that unless something was done the Government either would have to feed 20,000 natives or else let them starve.

The solution was the reindeer which he introduced in 1891, and later an appropriation was received from the Government for carrying on this work.

Most Appreciative.

The impulsiveness of great men has led to amusing incidents. This story of Rossetti, who was an ardent lover of rare and beautiful china, is one in point:

The great man dined one evening with friends who had learned from him the joys of china collecting. The dinner was served in beautiful specimens of various sorts of ware, and, for the better display of the dishes, was set out on the table. The salmon was served in an especially precious dish. When the cover was removed, Rossetti started, leaned over to examine the dish, took it in both hands and turned it upside down to see the marks on the back. The salmon, of course, fell out on the table cloth, but Rossetti paid no attention, and only exclaimed:

"The very dish I was going to get to-morrow!"

The lady was so elated at having got the dish ahead of her guest that she quite forgave the irreverent treatment of her salmon and of her table cloth.

NOTHING TO EQUAL

[redacted] medicine dea[illegible] at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Where Water Melons Grow.

Melons were first extensively cultivated in France early in the seventeenth century, but were known to the ancients from the commencement of our era. The Egyptians grew them.

They are said to have been carried to America by Columbus, and to the Malay Archipelago by the Portuguese. No other fruit is so variable in foliage and habit, or undergoes so many metamorphoses by crossing its varieties, all of which are fertile.

They are grown extensively in Asia, but little care is bestowed on their cultivation, and they consequently never improve. They grow on sand banks left dry by the falling rivers; if near a town a portion of the crop can be sold, but most of it is valueless, as it rots if taken any distance by cart or boat. With improved communication there might be a sale for most of it.

Minard's Liniment Cures Garget in Cows.

Did You Ever Try This to Wake Up a Boy?

"What is the best method of waking a soundly sleeping person?" is a question quite a few millions of persons would like to have answered, there being few who have not or do not continue to exhaust every scheme and method known to them to rouse some heavy-headed members of their families in time to eat breakfast and get to office or school on time.

"With an odor, undoubtedly," a well-known physician replied to the question. "The sense of smell is the most easily aroused of any of the five. We have trained ourselves to disregard noises—else we would get no sleep at all in a city. In the country, the same sounds which we utterly disregard in town would awaken us instantly. To shake a person is more or less successful, as a rule, but often it serves to only half rouse the sleeper, and he turns over and goes to sleep again, or, if he does wake, he is apt to be in a bad temper. Any really unusual noise is effective, but one can't think of a new noise-making method every morning.

"When an odor is used, however, the sleeper wakes at once—is wide awake. Almost any odor will answer, if not too faint. Perfume of any kind is especially good. Ammonia, camphor—in fact anything with a decided odor will do, but it should not be too powerful, or the awakening will be violent."

BIFF!

Stop jolting Liver and Bowels with violent drugs, but take "Cascarets."

"Dynamiting" bile out of your system with calomel and other sickening purgatives is all wrong. Salts, Oil, and Cathartic Waters act by flooding the bowels with the digestive juices which are vital to the stomach. Cascarets are different. They act as a tonic to the bowel muscles, which is the only sensible way to relieve a bilious attack, a sour, acid stomach, or constipated bowels. There is no griping or inconvenience. You naturally return to regularity and cheerfulness. Cascarets cost very little and they work while you sleep.

Valuable Old Violins.

Violins made by Stradivari are rarely worth less than $5,000. One recently realized $15,000 and a cello $20,000. Yet Antonio Stradivari sold his fiddles for about $20 each! An old Strad, like an old coin, always fires our imagination. Sometimes they do represent a fortune, but, unfortunately, there are so many spurious instruments about that many a person is doomed to disappointment.

A druggist can obtain an imitation of MINARD'S LINIMENT from a Toronto house at a very low price, and have it labeled his own product.

This greasy imitation is the poorest one we have yet seen of the many that every Tom, Dick and Harry has tried to introduce.

Ask for MINARD'S and you will get it.

Taking Census in India.

Taking a census in India always arouses the popular superstitions and dread of unknown evils. After the last census of the Bhils their chiefs insisted on a new Imperial obligation that "in future no Bhil woman should ever be weighed," they fearing that the plumpest and heaviest women, the national beauties, were being checked off for appropriation by the census makers.

It is always safe to send a Dominion Express Money Order. Five dollars costs three cents.

Raise good, big draft horses and sell them before they wear out.

Occasional lots of clover seed contain the seeds of such weeds as wild mustard, bladder campion or other serious pests. It is never safe to use seed whose weed seed content is not known.

YES! MAGICALLY! CORNS LIFT OUT WITH FINGERS

You simply say to the drug store man, "Give me a quarter of an ounce of freezone." This will cost very little but is sufficient to remove every hard or soft corn from one's feet.

A few drops of this new ether compound applied directly upon a tender, aching corn should relieve the soreness instantly, and soon the entire corn, root and all, dries up and can be lifted out with the fingers.

This new way to rid one's feet of corns was introduced by a Cincinnati man, who says that, while freezone is sticky, it dries in a moment, and simply shrivels up the corn without inflaming or even irritating the surrounding tissue or skin.

Don't let father die of infection or lockjaw from whittling at his corns, but clip this out and make him try it.

"SYRUP OF FIGS" CHILD'S LAXATIVE

Look at tongue! Remove poisons from little stomach, liver and bowels

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear.

Mother! You must say "California."

BITS OF HUMOR FROM HERE & THERE

Slugs to be Shot.

Aunt Jane was desirous of purchasing a gun for her nephew. The shopkeeper produced a couple.

"This one shoots caps and this one slugs," he said.

"Oh, thank you," exclaimed Tommy's aunt. "I'll have the second one, for we're troubled terribly by those slugs."

A Very Raw "Rooky."

New Recruit (to Quartermaster)—"Can I have my puttees changed, sir?"

Quartermaster (eyeing puttees—"But your puttees are new—you've only had them a few days. Why do you want them changed?"

New Recruit—"They're too tight, sir."

Money in "Antiques."

X.—"Gee whiz! Is that Smithson who just went by in his motor-car? When I knew him a few years ago he had a second-hand furniture shop."

Y.—"He still has. Only he has moved it to a fashionable street and labelled the same stock 'Antiques.' "

Their Demands.

Street Cleaners—"We demand narrower streets and wider brooms."

Firemen—"All buildings must be built of asbestos. We want cooler flames."

Policemen—"We must not be required to catch motor bandits. Inspectors must go."

Garbage Men—"All trash must be neatly dusted before being thrown out."

Milk Men—"Later mornings; fewer babies."

Minard's Liniment Cures Distemper.

Transparent Mountain.

In the island of San Domingo there is a remarkable salt mountain, a mass of crystalline salt nearly four miles long, estimated to contain nearly ninety million tons, and said to be so clear that medium-sized print can be read through a block a foot thick.

DON'T NEGLECT A RHEUMATIC PAIN

Go after it with Sloan's Liniment before it gets dangerous

Apply a *little*, don't *rub*, let it *penetrate*, and—good-by twinge! Same for external aches, pains, strains, stiffness of joints or muscles, lameness, bruises.

Instant relief without mussiness or soiled clothing. Reliable—the biggest selling liniment year after year. Economical by reason of enormous sales. Keep a big bottle ready at all times. Made in Canada. Ask your druggist for Sloan's Liniment.

SITUATIONS VACANT.

ARE YOU LOOKING FOR AN OPENING to prove your ability? Or, are you just drifting along on the principle that "everything comes to him who waits"—without much thought of your efficiency? If you are in the latter class, be up and doing—train your mind and memory so as to be ready for Opportunity when it comes your way. In other words, Pelmanise! If you know you have ability, why not use the waiting moments to improve your efficiency and incidentally acquire that Personality which means so much in seeking Success? Small town or big city, or on the township side line, it matters not—the Pelman System is conducted by mail. "Mind and Memory" tells you all about it. It is a book that's free and lays no obligation upon you to enroll, though you'll be surprised to find how moderate is the fee required. Write for the book and particulars to-day to the Pelman Institute, 765 Temple Building, Toronto, Canada.

The Most Healthful and Economical Drink

INSTANT POSTUM

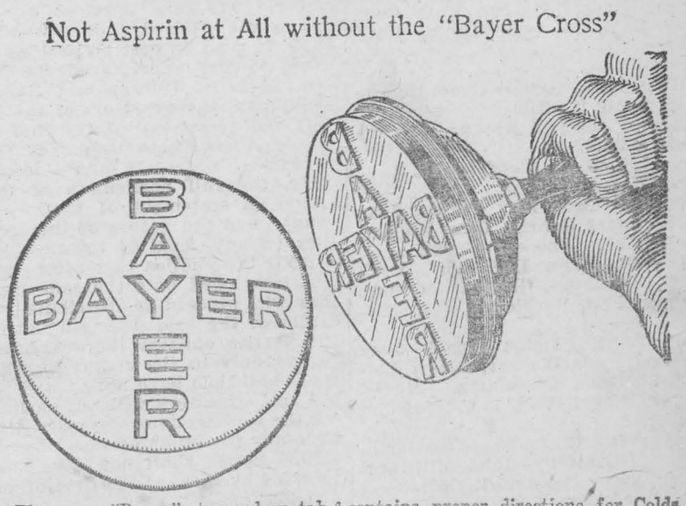

Made in a moment, in the cup, and there's no waste.

It Satisfies!

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

The name "Bayer" stamped on tablets positively identifies the only genuine Aspirin,—the Aspirin prescribed by physicians for over nineteen years and now made in Canada.

Always buy an unbroken package of "Bayer Tablets of Aspirin" which contains proper directions for **Colds, Headache, Toothache, Earache, Neuralgia, Lumbago, Rheumatism, Neuritis, Joint Pains, and Pain generally.**

Handy tin boxes containing 12 tablets cost but a few cents. Druggists also sell larger "Bayer" packages.

There is only one Aspirin—"Bayer"—You must say "Bayer"

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

HONOR ROLL

Morrisburg Collegiate Institute, for the Months of September and October

All the pupils in attendance have just received reports showing the standing made in all the subjects of their courses. These reports are to be signed by the parents and returned to the principal within one week.

The following is the list of those who made honor standing in one or more subjects, the number following the name indicating the number of subjects in which honor standing was obtained.

MATILDA DISTRICT

W. M. S. CONVENTION

The Womans Missionary Society Convention of the Matilda District was held at the Brinston Methodist Church, on the afternoon and evening of Tuesday, October 21st.

Notwithstanding the falling rain and muddy roads, a good representation of the missionary workers of the District were present. The District Superintendent, Mrs. I. Hilliard of Morrisburg, presided.

The report from Auxiliaries, Circles and Bands, showed a growing interest, and a forward movement all along the line. Matilda bears the proud name of the Banner District of the Montreal Branch, being first in organization, as well as first in funds raised. There are 24 Auxiliaries (2 new ones); 13 Mission Circles and 13 Bands—a total of 50 working organizations. Over $5,000 was the amount raised last year.

This year's objective of our General Board—20 p.c. increase in membership; 20 p.c. increase in funds; and 20 new missionaries was emphasized.

A special offering of $10,000 is also asked for in order that a new centre of work may be opened among the Ruthenians at Radway Centre, Sask. The need is very urgent, and every Auxiliary is asked to send a special gift for this object before Christmas.

The promise of a bright future for the missionary enterprises of the church was given in the time and attention devoted to the problems of the young people's work. Mrs. Pierce of Brinston, gave a paper on this most important subject, which was rich in plans and suggestions for Circles and Bands. The discussion which followed showed that the members are alive to the supreme importance of this department.

Tithing also had a place on the program, when such questions as: "Can you explain how nine-tenths of the tither's income can go as far as ten-tenths?" How can a woman tithe who doesn't hold the purse strings?" &c., were discussed.

It was a great privelege to have the presence of Miss Howie, for many years a missionary in Japan, and for the past five years engaged in Home Work among the Orientals of Vancouver. Her address which presented the needs, importance and successes of this work in Canada was [illegible] national, influencing as it does not only Canadian life but that of Japan also. There are 13,000 Japanese and 20,000 Chinese in B. C.. This rapidly growing Oriental population is the problem of the West, and is the door of opportunity to the Christian Church. The Japanese respond readily to missionary influence, and are a people of ability, generosity and loyalty, who may be developed to become an asset to Canada, rather than a menace. The work of the W. M. S. is chiefly among the women of whom there are 1200 in Vancouver. In the kindergartens we have a 125 children from 3 to 6 years. This is the surest work of all. Workers are needed. The call comes urgently to the young women of our Christian homes.

The sessions were enlivened by music rendered by the Brinston choir. Very beautiful solos were given by Mrs. Chas. Strader and Mrs. Willis Coons.

A sumptuous tea was served by the ladies of Brinston. One of their number, Mrs. Sharra, gave a very cordial welcome to the visitors, and greetings from the Presbyterian W. M. S. were brought by Mrs. Lee Harkness. Suitable response was made by Miss Howie. The delegates returned home saying, "We wouldn't have missed this Convention for anything," and there is no doubt but that its influence shall be felt in the prayer, the work, and the offerings of this year..

NOTICE TO CREDITORS

In the matter of the Estate of Zenas Levi Hall, late of the Village of Morrisburg, in the County of Dundas, Gentleman, deceased.

NOTICE is hereby given pursuant to section 56 of the Trustee Act (R. S.O. 1914, Chapter 121) that all creditors and others having claims or demands against the estate of the said Zenas Levi Hall, who died on or about the 26th day of September, 1919, are required on or before the 24th day of November, 1919, to send by post prepaid, or deliver, to the undersigned Solicitor for Aden H. Mr. and Mrs. Ross Wells spent Sunday at Riverside.

Mrs. G. Hall has returned home after spending some time with her mother in Morrisburg.

Mr. and Mrs. J. Beaupre and Miss Nora Beaupre spent Tuesday in Morrisburg.

CANADIAN EGGS SIGN OF PROMISE

Throng of Londoners Feast Ravished Eyes on Shipment of Rare Food

(The Globe.)

Lon., Eng.—A throng of Londoners round the Canadian Government shop in Charing Cross today feasted ravished eyes on a window-full of magnificent Canadian eggs. In the good old days eggs and bacon was the world-renowned breakfast of the Englishman. That was before eggs rose to 11 cents a piece and probably disappeared from currency—an economic catachysm which cast a gloom on the Englishman's whole existence. and must be held to account in some degree for the prevailing unrest, even as the Scotch laddie remarked: "No salt in my porritch. There's my day spiled." However, in the announcement, attached to the astonishing eggs, that "Canada will ship six million dozen eggs to Great Britain this year" the Londoner, weary of the Food Controller's manna, caught the first glimpse of the post-war land of promise.

If Canada could send but six hundred million dozen eggs Britain would thankfully absorb them, A cockney girl's comment succinctly expressed the general opinion of the exhibit. In hushed admiration says she to her beau: "Topping, ain't it?"

The Canadian Eggs referred to above were "Dundas Eggs" supplied by the Dundas Co-operative Association, Limited. The display was also a demonstration of the way Canadian Eggs are packed and graded for export, the grades consisting of "Fresh Specials"; Fresh Extras"; "Fresh No. 1's" and Fresh No. 2's" It will be remembered by our readers that reference was made to this exhibit in our columns at the time the shipment went forward to London, England.

BRITISH WOMEN ARE PATRIOTIC

Halt at No Sacrifice as Shown in "The Great Love"

The noble sacrifice made by the most distinguished women in the higher circles in England, are adequately shown in David Wark Griffith's remarkable photoplay, "The Great Love" which will be shown at the Music Hall, Morrisburg, one night only, Friday, November 14th.

Since the beginning of the great war, England has sent the flower of its nobility to the front and untold thousands have laid down their lives upon the ensanguined battlefields of France and Belgium. At home the women and men have united in the great work of caring for the wounded and in prosecuting the relief activities so essential to the successful conduct of the war.

With special orchestra and up-to-date Vaudeville. Seats on sale at Chalmers' jewelry store.

WELCOME HOME

The Riverside Red Cross met at the home of Mr. and Mrs. John Smith on October 3rd, to welcome home their son, Pte. Thomas Smith, from Overseas. The house was tastefully decorated with flags and flowers. After refreshments had been served, an address was read by the President, Mrs. Lorne Robinson and little Laura Hopkinson made the presentation of a pair of "Military Hair Brushes." the gift of the Red Cross.

This being the last soldier boy to return to Riverside, the balance of the Society's money is to be donated towards the "Memorial" in Morrisburg, in memory of the two Riverside boys, viz: Pte. Harry Wells and Sgr. Garnet Lavis, who made the supreme sacrifice.

IN MEMORIAM

In loving rememberance of my wife, Lera Casselman, who departed this life, October 31, 1918.

Now she sleeps where the daises nod,
And the clover hangs its head,
Where the wild birds come and the wild bees hum,
Above her lonely bed.
And the spirit enrobed in light,
Is crowned where the Angels are tonight.

WALTER GARLOUGH

MARRIED

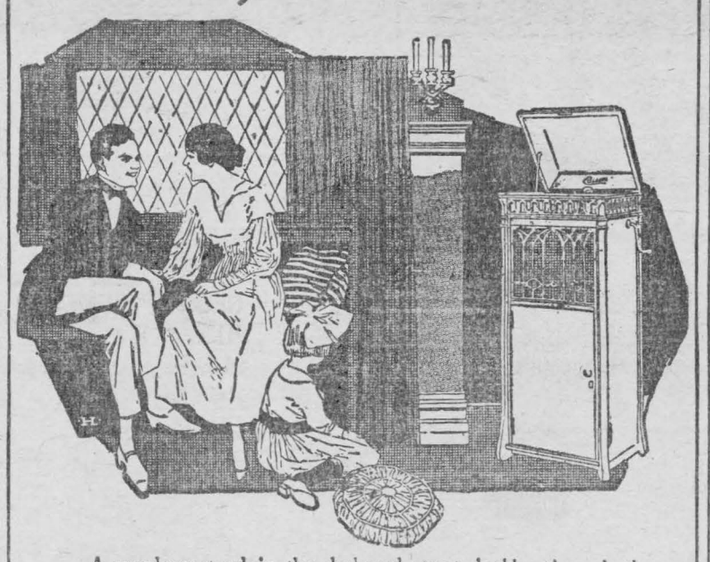

Kingsley—McPherson.—At Trinity Church, Cornwall, on Nov. 3rd., 1919, by the Rev. W. Netten, M.A., rector, Clarence Kingsley of Massena, N.Y., to Ada Brydges McPherson of Aultsville.

Home, Sweet Home

A wanderer stood in the darkened street, looking through the window at a happy family within. The scene pictured the longing in his soul for the home he did not have.

The man slipped away unseen, and one day wrote a song—the song of his soul. And this song became immortal; the most beautiful and pathetic heart-song that the world has ever known.

The man was John Howard Payne, and the song is "Home, Sweet Home."

You may RE-CREATE in your own home this immortal song if you own

The NEW EDISON

"The Phonograph with a Soul"

"Home, Sweet Home," "Swanee River," "Kathleen Mavourneen," "Silver Threads Among the Gold" and hundreds of other heart-songs are at your command; waiting to be RE-CREATED for you by the magic of this greatest of all instruments, with all the richness of melody and depth of expression that you have longed for in the phonograph—just like the living artist.

If you love real music, ask for a copy of the beautiful book "Edison and Music;" and "What the Critics Say," the booklet that proves Edison superiority. 247

The Slip of the Sign

By EARL R. RICE.

The terrific storm that raged over a Western city one night in June a few years ago put scores of telephone, telegraph and electric-light wires out of commission. On the following day many men worked overtime in repairing the damage.

Among them was John Vincent, a young repair man in the service of the Abelson Electric Sign Company. At half past six o'clock, after working all day, he went to the top of one of the tallest buildings in town to repair a sign there. Ordinarily the job would have gone over until another day, but a great convention was being held in the city, and a large retail firm with goods to sell that had their store in the building demanded that their huge sign be put into working order. Boomerfield & Specklitt's peerless products were useful, indispensable and cheap, and the flaring sign that so informed the public from the top of the skyscraper had to give its nightly message.

"Fix it up," was the order that the company sent to the young repair man; and although John had worked long and hard that day, he promised to do his best.

As the elevator rose swiftly to the fourteenth floor, the last below the roof, John said to his assistant, "We'll hurry this piece as fast as we can. If it's too bad, we'll make temporary repairs and come back in the morning. It's the last job for the day, and I'll be glad when we get down."

"So will I," said the assistant. "Half a dozen jobs like this is enough for one day. I've been dizzy ever since we left the last one."

John laughed. "After you have been with us a while you'll get used to the high ones. I felt that way at first."

But as they stepped out of the cage, John looked [illegible] assistant. "You're all right, Brown?" he asked.

"Yes," Brown replied. "Or I will be when we get to work."

Together they proceeded to the roof, where John looked the situation over. Boomerfield & Speckitt's sign was twenty-five feet high by thirty feet wide. The front leaned slightly forward. The upper framework was of light but strong iron strips, and the lower part was of heavier stuff. The bolts that tied the joints together seemed heavy and strong, and those that fastened the whole structure to the roof were nearly an inch thick. The bottom of the frame rested scarcely a yard from the edge of the roof, and there was barely space enough for a man to walk between it and the battlement in front. The forward tilt of the sign brought the upper part of the frame almost in line with the ledge.

Here and there a stack or chimney pierced the flat, sanded roof, and over near one corner of the sign a flagpole rose skyward. John noticed that the flag at the top of the mast had been supplemented by a convention banner, and that in the fitful breeze both flags now swung out at full length, now hung limp round the pole.

Much to his satisfaction, John found that the big sign had suffered little damage. A few broken bulbs and some loosened connections were apparently all that needed attention. Those that were on the lower part of the frame where he could reach them he soon took care of.

"Now for those near the top," said John. "Hand me the stuff, Brown, and I'll go up."

Working from side to side as occasion demanded, John climbed slowly up the back of the iron frame. Perched twenty feet above the roof, he worked deftly. He took this dizzy task coolly—it was all in his day's work. Looking down, he said to his assistant:

"Where is that coil of wire we brought? I've got to fasten this brace. The bolt is out."

"Just a minute," said Brown. "I think it's over with the tools." He stepped round to the end of the sign. "Here it is. Sall I throw it up or bring it?"

"Throw it," said John.

Catching the wire, he quickly clipped the needed length, twisted it into place with his pliers, and threw the coil over his shoulders.

"I'll have to have another half dozen bulbs," he announced a moment later.

"You've got the last of the box," said Brown.

"Then get the box we left by the elevator. Be as quick as you can, for I'm getting tired."

Brown disappeared down the stairway. John, waiting in the twilight, looked anxiously up at the work above.

"I'll see how many I need," he thought.

Climbing higher, he shifted his position over toward the end of the sign. As he did so, he felt the frame shake slightly, but he did not worry about it. As he turned again toward the middle of the sign, however, he was startled to find that the whole structure had tilted dangerously over toward the front. His weight on the upper bars had thrown the centre of gravity outside the edge of the roof, and slowly but surely the heavy frame was settling over the ledge. He looked down, and for a moment his head swam, for his view was clear—straight to the crowds in the street ten stories below.

The danger of his position flashed upon him and for a moment paralyzed every nerve. Only for a moment, however, did he hesitate. He turned quickly to get down from the upper bars; as he did so the coil of wire round his shoulders caught over a projecting end of iron and the downward pull of his body wedged it fast. He pulled to free himself, but the effort only tightened the coil.

Even fractions of a second were precious. He could feel the steady slipping and buckling of the framework; in fact, the sign had sagged so far that the whole upper half hung over the street. John groaned as he thought of what would happen when those iron bars, massed into a great projectile, went hurtling down into the crowd below. But those bars must not fall! He must save those men and women on the sidewalk, and himself, too!

"O Brown!" he called. But Brown did not answer. Through some misunderstanding, the box he had gone to get had been moved, and he had signaled to the elevator boy; he was waiting there, wholly unaware of his mate's danger.

"It's no use! I've got to do it myself!" John said to himself.

There was need of haste. In its forward thrust the great sign was at an angle of nearly forty degrees from the perpendicular. Soon the uprights along its front would rest on the masonwork battlement and the final strain would come. If they broke, the upper part of the frame would go crashing down. If the uprights held, the weight at the outer end of the lever thus formed would probably tear loose the bolts holding the sign to the roof, and the whole affair would go hurtling into the street. In either case, death threatened John and the people below.

Scarcely daring to move, John twisted his shoulders round till he could draw himself down and out of the coil of wire that held him. As he did so he had to face the street, and in that moment he saw what he should have to do.

An iron brace that had run straight up the front of the frame had sprung loose at its lower end and now swung dangling in the air from its fastening near the top. It occurred to him in a flash that if he could reach that swinging bar and thrust the end of it against a window top below he could stop the tipping sign long enough for help to arrive. But to do it he must be quick.

Cautiously he thrust out his hand to grasp the bar. It was eight inches beyond his reach.

He dared not climb higher, for that would hasten the fatal plunge. Thrusting his hand into his pocket for a tool, he brought out his pliers, and with trembling hand again reached out.

Out, out he stretched his arm and body until it seemed that he must fail. But no! The teeth of the pliers closed over the edge of the brace as a gust of wind swayed it toward him. Drawing it in, he guided the lower end toward the ledge below. He was not a moment too soon, for an instant later the weight of the frame settled with a faint jar upon the brace. Holding his breath, John waited. Would it hold? His chest heaved, his eyes stared, his muscles ached as he shrank back from the threat of that terrible fall.

But it held. A feeling of security came to him, and he backed away toward the roof and safety!

He had hesitated only long enough to clip a strand of wire and pull it after him. As soon as he was safe over the ledge and saw the sanded roof below him, he leaped down from the buckled frame, carried the wire to the chimney forty feet away and made it fast round the bricks.

When Brown came up the stairway a minute later he found John wild-eyed and faint. But the big sign was safely anchored. Together they cut the rope from the flagstaff and added its strength to that of the wire.

"It will miss one night of advertising, but that's better than what might have happened," said John as they finished anchoring the sign.

(The End.)

Minard's Liniment for sale everywhere.

Woman's Sphere

Consistency.

Consistency is one of the fundamental qualities of discipline, and from my own experience I have found it to be most important. It should always be accompanied by kindness. More mothers have troubles with their children because of their own inconsistency than for any other one reason.

Johnnie comes home from school and asks, "Mother, may I go over to Billy Baker's to play?" and Mother, knowing that Billy's influence is not good, refuses. Johnny displays more or less temper, but Mother is firm, and Johnnie stays at home. A few days later, however, Johnnie makes the same request, and Mother, who is entertaining a caller, lets him go for a little while. This is a case of inconsistency, and, in order to save one scene, Mother is laying a good foundation for many more. The probability is that had she replied, "Mother has told you before," the matter would have ended there, or even if he had cried a little and "made a scene," the son would have had a valuable lesson and learned that Mother meant what she said. His love for the moment might have been shaken, but eventually Johnnie would have been a happier boy and his love and respect for his mother would have been greater.

The value of consistency cannot be overestimated. The tiniest baby should be dealt with kindly but firmly. A mother can develop the teasing habit in her child while he is still in his cradle if she lacks this quality of consistency. At one time when her baby cries she does not pick him up, for she says, "It is not good for him and he is forming bad habits." But the next day, if she is nervous and unwilling to endure his noise, she yields "just for once." The result is that she gives in to her child more or less through his later childhood.

Again, with an older child, the mother will partially concede, a sort of compromise, and the child is keen enough to know that he has gained his point, and each time he will seek to gain a little more, until the mother realizes when it is too late that her problem is great and her word really has very little weight.

My advice is: Be considerate in your requirements of a child, and then be consistent in seeing that these requirements are carried out. Irritable, nagging mothers and unattractive, nervous children would be almost unknown if the former could realize the importance of kindness and consistency. Lack of sympathy and strained relations between parents and their older children often spring from habitual inconsistency.

Perhaps the most important thing of all is this: When you make a legitimate request you must know within yourself that you expect it to be carried out. Then if you are disobeyed you must calmly, but definitely and emphatically, see to it that your request is complied with. This method cannot be practiced to-day and neglected to-morrow, but must be consistently followed.

The future happiness, character and well-being of your little one depend entirely upon firm, wise and consistent guidance. It is these fundamental qualities of mother-discipline that train the strong-willed little sons and daughters into splendid men and women.

Let's Start a Propaganda in Favor of Work.

The crying need of the world to-day is for workers. Certainly there was never a time when so much work was waiting to be done, nor when so few people were willing to do it. The manufacturer in his plant, the farmer in his fields, the merchant in his store and the housekeeper in her kitchen are all uttering the same cry, "Send us help."

At that there seems to be plenty of people who might work. But no one seems to be standing about waiting for the jobs that are open for them. It begins almost to seem as if no one really wanted to work.

It is rather foolish to place the blame for present conditions on any class, though capital is trying to shift it all on labor and labor is blaming capital. Everybody is more or less to blame. Such is the nice adjustment of things in this world that no one can claim to be all right, and everybody else all wrong.

I've been wondering a great deal lately just how far we mothers have been wrong? How much of the responsibility for present conditions must we assume? Just what has been our attitude towards work, real work that is productive, like farming or cooking or sewing or washing or manufacturing? Have we held these jobs up before our children as the most desirable for them? Or have we warned them to steer clear of hard work and look for something easy and pleasant?

We have always worked hard ourselves. Too hard by far, the most of us. And we've hoped with all our hearts that when our children grew up they might have things easy. We've talked it before them, what a dog's life was the farmer's, and how housework was nothing but slavery. Unconsciously our sons and our daughters have absorbed the idea that the necessary work of life was sort of beneath them. They have gotten the impression that life for them should be a sort of holiday, a place where they could do a smattering of work in a haphazard way and demand a big salary for it. They have not come up with the good old-fashioned training we had ourselves.

Don't you remember when you were coming along that mother's favorite maxims were, "All play and no work makes Jack a lazy boy," and, "What soever thy hand finds to do, do it with thy might?" When you were being brought up the schools hadn't discovered that children were to be taught without their knowing it, that study was to be made play for them. Your mother never heard that children were to be allowed self-expression; she had an idea that children were to be given certain tasks to perform at stated times, and to be taught to mind, be respectful to their elders and obey the law.

You are the result of your mother's training, a law-abiding, hard-working, sober citizen. The present generation is the result of our training, a world full of idlers, looking for short hours, light work, high pay and considerable license where law touches their personal liberty.

We are reaping what we have sown. It is rather late to correct our faults, but when we're brooding over present conditions and laying the blame on others, let's try [illegible] of our thoughts. Let's try to repair as best we can, and start a current of thought in favor of real, honest work, work of the kind the world needs.

Learning From My Neighbors.

A large part of what I know about farming has been learned from my neighbors. From some I have learned things I ought to do; from others, things I ought not to do.

Andrew Baker, whose farm corners with mine, is one of the men from whom I have learned much. Andrew is a specialist in raising hogs. He has studied pork and porkers since he was a boy, with a diligence and reverence for his subject that would do credit to a college professor. He has fed hogs of all ages and sizes, and in all the ways imaginable. He can tell you all the details of feeds, and how to make the most out of them.

One day last week I went over to spend an afternoon with Andrew. I had not seen him for nearly two months, and was sure he had much to tell me. He likes to talk on his favorite subject—pigs. As I had hoped, he was out with his pigs, going from one lot to another, studying the results of some experiments he was carrying on. So deep was his study that he did not notice me drive up. I hitched my horse, and was about to slip up and give him a friendly slap on the shoulder, when he turned suddenly and saw me. His face lit up with a smile as he gave me a hearty greeting.

"Hello, expert!" I said as I walked up to shake hands. "What are you up to now?"

"In the first place I am no expert," said he; "and as for what I am doing, I am trying to figure out why I don't know more about my business—why I sometimes succeed and sometimes fail."

I soon found myself listening intently to his account of what he had been doing.

"There," he said, "is a pen of five hogs which I have fed as farmers often do, in a pen where it is muddy, as you can see. If you want a hog to eat his head off, that's the way to do it. I weighed those pigs yesterday, and they have made an average gain of about .3 of a pound a day for the last two months. They have had all the corn they could eat, but nothing else, and they have gained only seven pounds for each bushel of corn they have eaten. You see their condition. It is really cruelty to animals, but I wanted to satisfy myself on this one point."

We walked over to another pen where there were five other pigs fed cornmeal and tankage. He said they had made very satisfactory gains, but at too high a cost. Even with present high prices for hogs it did not pay him to feed that way. "But come out here in this clover field," said he. "I am not ashamed to show you what I am doing there. Those pigs are harvesting hay and converting it into pork."

It was a thrifty sight to see the thrifty, growing hogs wading through clover that almost covered them. From all sides came the grunt, which, in pig language, means satisfaction, contentment, and good health. It was really good to see their clean, glossy coats. There was certainly no tuberculosis nor cholera amongst them.

"I weighed these pigs at weaning time," said Andrew; "then again in June. Their feed was corn, a little tankage, and this clover pasture. They had made an average gain of a pound a day, and had made 25 pounds of pork for every bushel of corn fed them. I weighed them again yesterday. Since June they have gained three-quarters of a pound a day, and for every bushel of corn fed they have produced 17½ pounds of pork. You see," he continued, "as they become older they take on weight more slowly, and it takes more feed to make a pound of gain."

"What do you do," I asked, "when the price of corn goes up?"

"If there is too great a rise in price, and not a corresponding rise in the price of hogs, I simply cut down the feed of corn a little and make them consume more pasture. Of course, there is a limit beyond which this should not be carried. Just at present I could pay $2 a bushel for corn and still make money. It's all in the pasture. I can't afford to raise hogs without it. Next year I hope to have an alfalfa pasture; that is the best of all."

We crossed the clover field and walked through the woodlot. As we emerged on the other side we came upon a field of a beautiful green crop that was new to me.

"What is this?" I asked as we waded out into the luxuriant growth that came up under our arms.

"This," said he, "is my winter pasture."

"Winter pasture!" I exclaimed. "But won't the frost kill it? And besides, how can the hogs reach up to pasture this stuff?"

Andrew laughed at me for this, but immediately explained:

"You see, these pods are beginning to harden. In a few days these leaves will begin to turn yellow. Then we will cut and shock the crop, and put it in the sheds and barn. During the winter we feed it out in racks as hay to our hogs. It takes the place of pasture, you see; saves the expense of buying high-priced feeds, and makes every pound of corn do its best in producing pork. It furnishes the exact food elements that are needed with corn, and prevents entirely such results as you saw in that first pen. This soybean crop," he added, "is one of the most valuable I grow on my farm."

I could but marvel at the completeness of his plans—every season of the year provided for to produce pork most efficiently, and at the lowest possible cost.

It was getting late, so I bade Andrew good-bye, and turned my horse down the road. On my way home I stopped a moment to see another neighbor who had moved into the neighborhood only the year before. I had hoped to learn something from him, too, but in this I was disappointed. In a bare lot by the roadside on his farm were about 50 shotes that would weigh 100 to 125 pounds each. They were not fat, and from their appearance I judged that they were not thrifty. I saw some wagons in the barn lot ready for loading.

My new neighbor told me he had sold his hogs, that they were not doing well, and that he could not afford to feed corn at the present high prices. He also said he was going out of the hog business. I took in the situation, and decided not to argue the matter for fear I might lose friendly relations with him. I invited him to come over some time and spend an afternoon with me, and incidentally told him what a delightful visit I had had that afternoon on Andrew Baker's farm. I suggested further that we all get together occasionally to discuss our farm problems.

I turned from this farm with a heavy heart. "There," said I to myself, "is a man not living up to his opportunities."

Saving Labor and Fertility With a Litter Carrier.

A good litter carrier used for conveying the manure from behind the stalls to the spreader or manure pit is in my opinion an absolute necessity on every well-managed farm. With one of these carriers properly installed you are able to clean out the barn thoroughly in about one-half the time it ordinarily takes to do the job by any other method. The work of cleaning out the stables is not only made much easier, and done better too, perhaps, but the task is less disagreeable than forking and wheeling, especially during the warm months of the year. The manure can also be put, with little effort on our part, just where we want it. Hired help does not object to cleaning the stables often and thoroughly when the barn is equipped with a good carrier. The result is a clean barn that is presentable at all times.

I noticed in a government estimate some time ago that more than $100 is lost annually on the average farm by not properly caring for the manure. This estimate undoubtedly is very low, as the average farm is not equipped properly in the handling and storing of manure. A manure carrier and a pit as well are unquestionably good investments on a farm of average size.

It has been carefully estimated that a dozen cows will produce about $400 worth, or better, of manure each year. Now, unless some provision is made to save the liquid manure the value of this output yearly will be only about one-half of its original value. This alone ought to prove even to the most skeptical that a manure pit made of concrete is a good investment for us.

The litter carrier and manure pit go hand in hand. They are both useful. The former saves labor and time, while the latter saves all the fertilizing value to be found in the manure, which alone is an item of great importance.

A Land Measure.

I have made a land measure with which I can quickly measure a field or strip of fence. It is made from three pieces of boards two inches wide and five and one-half feet long, fastened together in a triangle. I mark one corner with some bright-colored paint, then roll the measure along, counting each time the marked corner comes to the ground. Every count is one rod. To find the number of acres in a square field, multiply the width by the length and divide by 160.—J. U.

It is harmful to silk stockings to iron them.

Keep Your Machinery Under Cover---It Pays

To house machinery does not always do so much good as is commonly supposed. To house machinery under any condition and not properly care for it otherwise is very poor care. Machinery may be just as well off in the shade of a tree, as if it is stored in a leaky, open, poorly drained shed, or in a combined machine shed and hen roost.

There is no question but that it pays to house machinery properly, as it not only adds a great deal of life to the machine, but it also adds to the general appearance of the farm. Where a man is interested enough in his machinery to house it properly, he is also interested enough to care for it otherwise.

A great deal of farm machinery can be placed in a small space if properly arranged. When storing the machinery, it should be placed in the shed according to the time it will have to be removed. The machinery that will be used late the next season should be placed in the back part of the shed and that which is to be used early in the season should be placed in front, so that it will not be necessary to remove a great deal of machinery in order to get what is needed first.

The following list of machinery can be housed in a two-storey shed 20 x 30 feet. The shed has a small side door and a large double door at one end:

On the first floor: A set of blacksmith tools with bench (repair work is done in the shed), riding plow, two cultivators, beet cultivator, binder, mower, grindstone, hayrake, grain drill, two smoothing harrows (two sections each), slip scraper, and lister.

On the second floor: A hay-tedder (taken apart), several light tools, stoves (stored while not in use), some household goods, and other articles too numerous to mention. When there are large crops, grain is sometimes stored on the second floor of the shed. The owner of the shed unhesitatingly states that it is plenty large enough for the implements on 160 acres, providing the wagon and buggy can be stored in some other building. The time required for storing this machinery and removing it each year is estimated by the owner to be one-half day for himself and hired man.

It is not always necessary or advisable to construct a special building for storing farm machinery. Often a very good place can be made in the barn or other buildings. By taking some of the parts off certain machines, they can be easily stored in what otherwise might be waste space.

It is a common practice to build a machine shed on the side of some other building. Such a shed can be built cheaply, and if properly closed to keep out the weather and poultry, is a good investment.

Characteristics of a Good Implement Shed.

1. It must be thoroughly drained so that the implements do not stand in a wet place.
2. It must protect against sun, wind and moisture.
3. It must not be too expensive.
4. It should be located in a convenient spot and so arranged as to be easily used.

The material from which the shed is made will depend upon the cost and the locality. Very good sheds are made of wood-frame construction, covered with sheet iron. Other good ones can be made of wood-frame construction, sided with barn siding, drop siding, or with ship-lap. Shingles, corrugated iron or patent roofing make good roofs for machine sheds.

Clean and thoroughly oil machinery at the end of the season. With such machinery as the binder or mower it is a good plan to thoroughly oil all bearings and wearing parts just before finishing the season. After removing all dirt, wipe the entire machine with an oiled rag or waste. The wearing parts especially should be well greased with tallow or axle grease. If the entire machine is to be housed, these wearing parts do not need to be removed from the machine; but if not, they should be removed and stored in a dry place.

Cultivator shovels, plowshares and attachments which have been removed and greased should be placed where there is no chance for them to get damp. A good plan is to place them in a gunny sack and suspend them from the rafters of the shed or barn.

As the machinery is being stored, all which need repairs or paint should be labeled so that it can not be overlooked, and repairs can be made in the winter when farm work is not crowding.

It pays to keep the farm machinery thoroughly painted. This is especially true with machinery largely constructed of wood. The paint fills all pores and cracks, prevents checking, prolongs the life of the machine and also adds very much to its appearance. Two or three dollars' worth of a good, ready-mixed paint for outside use, or carriage paint, applied each year to the machinery, will add many times the cost of the paint to the value of the machinery.

Busy Balance Wheel.

The balance wheel of an average watch makes 300 vibrations every minute, 18,000 each hour, 432,000 in a day, or 157,788,000 a year.

Always ice a cake while warm.

Cream puffs take 25 minutes to bake.

Health Talks

By John B. Huber, A.M., M.D.

Address communications to 73 Adelaide St. West, Toronto

Questions and Answers.

I am 18 years old and a high school student. I am 5 feet 2 inches high and weigh 120 pounds. I am somewhat athletically inclined. My friends torment me—call me "shrimp" and things like that. My father is 5 feet 6 inches tall and weighs about 150 pounds. My mother is only 5 feet tall. Now here are my questions: Will I grow any taller? People tell me that I will not. Because my parents are of the short kind, does it necessarily mean that I'll have to be short? Are there any ways of making children grow? In other words, how can I grow? I do want to be so much taller than I am. I shall be grateful to you all my life if you can make me grow.

Answer—You will have up to 21 to attain your full growth. After that not much can be done to make you taller. Plenty of exercise may add an inch or two. Short parents have been known to have giant sons. But why should you care, Rufus? It isn't height that makes the man. Think of Grant who just barely got into the fighting class. And Napoleon who wasn't much over four feet. On the other hand I have known some welter weights not fit to black anybody's boots!

Coaling Up the Human Machine.

Food is material which supplies energy for the bodily activities, which enters into its structure and which so regulates the vital processes as to produce and to preserve health.

Calories represent the energy value of food and the energy requirements of our bodies. One person's requirements vary from 2,300 to 3,500 calories the day, less for the desk worker, more for the manual laborer.

Vitamines are substances existing in whole grain cereals, fruits, vegetables, bread, rice, milk, etc. They are essential to the growth and regulation of the bodily processes. They are found in cereals and vegetables in or near the husks or skin; hence the importance of not wasting these important and essential food parts.

Protein is the foodstuff necessary for building muscular tissue. It abounds in lean meat, milk, white of egg, wheat, cheese, beans, etc. Protein also furnishes heat and energy, but not to so great extent as do carbohydrates and fats.

Carbohydrates are starches and sugars. They are found mostly in cereals, vegetables and fruits.

Fats are found in butter, cream, oils and bacon; they also supply energy and heat. An excess of them helps for an energy reserve in the body.

Poultry

It seems strange how suddenly the nature of a male bird can be changed. Here we have two full brothers, reared together, apparently happy in each other's company. All of a sudden something turns up, a challenge follows, and war is declared.

Fighting in the poultry yard must be prevented. Birds are not only disfigured by fighting, but frequently, especially during cold weather, canker results from bad wounds. These wounds should be promptly treated—first washed with hot water and then anointed with carbolated vaseline. Kept in a dry, comfortable pen or cage alone for a few days, the sores will heal quickly and the bird will be fit to put back into the pen.

To permit a whipped bird to remain in the pen with his hens may tempt the hens to pick at his sores and make his condition worse. Besides, he will be mopish and lose appetite, and it will take a longer time for him to recover.

In going in and out of the different yards, a careless attendant is likely to leave gates open, or the latches on the doors may work loose, or some other inexcusable piece of negligence may let males together and a deadly combat between the two best males on the place, resulting in a severe loss.

Hens, too, are apt to become quarrelsome at times, especially to a newcomer, and frequently do damage to each other. But they soon forget their grievances.

Fight Insects in Autumn.

Now is the time to start next year's campaign against the insect foe. Do not wait until the cabbage plants are being riddled by the cabbage worm next spring or until the squash vines wilt before the attack of armies of small but very hungry squash bugs. These may be the descendants of individuals which could have been killed the fall before.

One of the best times to fight some of our common injurious insects is in the fall of the year. The cabbage worm, squash bug, and many other notorious "bugs" pass the winter among the stalks and vines of the last season's crop or hide away in rubbish about gardens and fields. Many of these will be destroyed if potato vines, squash vines, cabbage leaves and stumps and other crop remnants are gathered and burned soon after the harvest. All boards, brush, weeds and other rubbish should be added to the bonfire.

White grubs, wire worms, cutworms and other insects pass the winter in the ground, oftentimes in earthen cells shaped by their own feet. Many of these will not be on hand in the spring to start new families if their winter homes are disturbed by the plough this fall. Some would be killed by exposure after having their cells broken open; others would become the prey of birds and animals, while still others would be buried too deep for them to emerge in the spring. Fall ploughing, whenever possible, or spading in the garden is one of the important methods to use in insect warfare.

There are some insects that we are certain to have in injurious numbers each year and so it is wise to use preventive measures against these, rather than wait until the crops are attacked. Much good can be accomplished along this line by cleaning up crop remnants and rubbish and by fall plowing.

One Way to Trap Fox.

Old trappers know that the fox will nearly always show marked interest in anything that looks like the remains of a camp fire. Usually, too, he will dig around in the ashes, doubtless entertaining the belief that something in the way of food has been left by his enemy—man.

Therefore, when out trapping fox it is a good plan to make a bed of ashes. On this bed of ashes place scraps of meat, being careful not to touch the meat with the bare hands, for that would give it the human scent and scarce away the quarry.

Bait the ash bed three or four days, allowing the foxes to visit it undisturbed. Then set your trap, carefully covering it with loose ashes. Next, burn a little grass over the place where the trap is set, to make the place look natural. Stake the trap securely, or else have a good clog on the end of your chain. Then put fresh bait near it, using leather gloves doing this, as well as in previous operations.

The fox, satisfied by reason of previous visits that the ash bed is a fine source of supply, and a safe one, too, will be almost sure to spring the trap.

Another good place to make a fox set is on logs or saplings that bridge streams, one trap at each end. Then if the first one fails to catch him you still have a chance with the second.

In all operations for fox, be careful that you do not let the human scent get either on traps, food baits, or scents.

SPOHN'S DISTEMPER COMPOUND TRADE MARK

BETTER HORSES IF THEY HAVE

Spohn's Distemper Compound

When your horses are subjected to changing weather conditions of winter and spring, their systems become run down, with the result that they are very susceptible to **Distemper, Influenza, Pinkeye, Coughs and Colds. SPOHN'S** will keep your horse in good condition, so his system can ward off disease. Buy of your druggist.

SPOHN MEDICAL CO., Mfrs., Goshen, Ind., U.S.A.

MR. FARMER! DOES TRAPPING PAY?

WHAT YOU RECEIVE:

1 Bushel Wheat, $2.15 1 large Muskrat Skin, $2.50
1 Bag of Potatoes, $2.50 1 Red Fox - - $25.00

Do not stop growing wheat and potatoes, but Start Trapping

Raw Furs

Make your fall and winter months as profitable as your spring and summer.

While the prices quoted above are not accurate to a cent, they serve for comparison and show the enormous returns you can make from trapping. You get as much and more from one large Muskrat skin as you do for a bushel of wheat, and ten or twelve times as much for one fox skin as for a bag of potatoes. All other lines of furs will show as favorable a comparison. Write us for price list and quotation on traps.

LOCAL AND GENERAL

The Stove Business Complete—We will sell you a stove, buy your second-hand stove; repair or re-nickel your stove, and give you any advice in our power. Come in and see our new heaters—they go like a snow-ball in summer. —MORASH FOUNDRY.

Just 1 Point—SATISFACTION—When you buy at Bush's, satisfaction must be yours—Satisfaction in price; in quality; in appearance; in style, in wear.—D. C. Bush.

Mr. Archie Carson of Lennoxville College, Que., spent the week-end with his parents, Rev. and Mrs. C. O. Carson.

It's the assurance of quality that makes buying at Bush's a pleasure.—D. C. Bush.

An obituary notice of the death of Mr. Ezra Saddlemire, who died at his home, Glen Becker on Monday was received too late for publication this week.

Mr. Kenneth Courtney spent a few days in Cardinal with his sister this week.

Mrs. Joseph Heiney is in Montreal this week visiting her son, Harry.

Help the Cornwall Hospital by sending or bringing to the Meikle Carpet Rooms on Wednesday, Nov. 12th, donations of fruit, vegetables, or money, etc. The Womens Institute will gladly pack and ship anything suitable.

Mr. Will Casselman of Ottawa is spending a few days with his parents Mr. and Mrs. Henry Casselman.

Although there are upwards of 100 phonographs on the market today, it can be definitely stated, only the few will survive. The foresight of W. H. Fetterly & Co. in selecting the standard makes has earned the name applied to their stores "The Home of the Greater Phonographs."

Mrs. G. W. Farrell and family have returned to Montreal after spending the summer months in Morrisburg.

Mrs. W. G. Pyper and children are visiting at the residence of Mr. Jno. Pyper.

Miss Grace Gillard of Brockville spent the week-end in town.

Miss Clare Summers is spending a week in Toronto with her sister, Mrs. Mac Curry.

We receive two shipments of Northway Coats every week. Buyers come to us from every corner of the County and from miles beyond.—The Variety and Values bring them.—D. C. Bush.

Miss Catherine MacArthur, who spent the week-end with her mother, returned to Ottawa on Monday.

Miss Lillian Harrison of Ottawa spent the week-end with her parents, Mr. and Mrs. A. J. Harrison.

Mrs. A. A. Summers is visiting her parents, Mr. and Mrs. Stores, Canton, N.Y.

In Northway Coats we are showing all-wool heavy cloths in Kersey's Cheviots, English Frieze, Whitney Chinchillas, and Silver-tone Velours, at $20 to $50; Salts Plush, Self Collar and Cuffs at $30 to $46.50, with beautiful Plush and Fur trimming, $45 to $65.—D. C. Bush.

Moore, the candidate of the United Farmers of Liberal, was elected on Monday in the Provincial by-election for Cochrane. His majority over the Liberal and Government candidate is about 125.

[illegible] passed away at Ormond, on [illegible] after a week's illness, Catherine McArthur, wife of Donald McGregor, aged 70 years.

Special values in Furs, Mink, Golden Fox, Black Wolf and Sable —D. C. Bush.

The local officials, Messrs. Brown, Casselman and Beckstead, are in attendance at the sitting of the Counties Council, held in Cornwall this week.

Hear the new Edison Music Re-Creation at W. H. Fetterly & Co.—"Home of the Greater Phonographs."

An interesting case was up on the carpet at Winchester this week—the Lord's Day Alliance vs. the Milk Condensary Co. of Chesterville, for a violation of the Lord's Day Act. The case was adjourned upon demand by the former.

Write for your requirements—hundreds are doing it and finding it pays. It is our constant endeavor to serve our Mail Order Customers promptly and satisfactorily.—D. C. Bush.

Dr. W. T. Cowan, member for Regina, made a statement in the House at Ottawa on Tuesday which cost him a "cuff under the jaw." Col. J. A. Currie, it is said, was attempting to interrupt the speaker, when Dr. Cowan butted in to Curry by saying that the speaker was not dodging out of the trenches into a dug-out anyway. After adjournment Currie walked up to Cowan and slapped him across the jaw, inflicting a slight wound, and the doctor came back with his walking stick—All this adds to the dignity of the Union Government.

WOMEN'S INSTITUTE

The most interesting feature of the report o the delegate, Mrs. Hilliard, of the Annual Convention at Ottawa. Schools and their interests received a large share of attention. One speaker considers the Women's Institute thegreatest factor in National development.

Appeals having come from the Cornwall Hospital, it was decided to canvass next week. Anything suitable will be received at the Meikle Carpet Rooms on Wednesday the 12th inst. from 1.30 p.m. A generous response of fruit, vegetables and money met Mrs. E. Dillabough's canvass of Mariatown.

A resolution was unanimously passed by the Institute reiterating its former pronouncement on being opposed to the custom of canvassing the voters in elections, and expressing the hope that Candidates will give their ideas from the public platform.

OBITUARY

LATE REV. W. S. JAMIESON

A well known Methodist minister, the Rev. William S. Jamieson, M.A., brother of our esteemed townsman, Mr. J. S. Jamieson, M.A., died at the family residence, 119 Powell avenue, Ottawa, early Sunday morning, October 26th, 1919, aged 77 years. He had been ill for several weeks, suffering from nervous breakdown. His friends were not alarmed about his condition until a few days ago, when serious complications arose, and he gradually sank, the end coming on the above-mentioned date. Deceased was well known throughout the surrounding ditsricts. He was born in North Gower, and educated there. After teaching school for two years he entered Victoria University, where he obtained his M.A. degree in 1899. Ordained in Quebec in 1916 he was elected president of the Montreal Methodist Conference. His widow and four daughters survive him; also three brothers, Thomas of Ottawa; Dr. A. Jamieson of Arnprior, and James of Morrisburg; and two sisters, Mrs. John Elliott, Pakenham, and Miss Mary Jamieson, Kars.

The funeral took place Tuesday afternoon, October 28th, from his residence. The service was conducted by Dr. Aikens and Dr. Rose, assisted by Rev. Radley, president of the conference, Rev. Mr. McFarlane, and Rev. F. A. Reid, a former colleague.

The address was given by Rev. Dr. Rose, who has been associated with him in a ministerial way for the past thirty years. In a very beautiful way he referred to the general courtesy and noble ideals of the late pastor, which truly marked him as a Christian gentleman, and one of Nature's noblemen.

The family have the sympathy of their many friends throughout this district.

DR. A. WEAGANT

(Free Press, Winnipeg)

Dr. Allen Henry Weagant, dentist, died of pneumonia Saturday morning at the General Hospital. He resided at 896 McMillan avenue and was associated in business, at 526 Somerset block with Dr. Herbert Weagant, dentist, and Dr. Alex. Weagant, physician. He was born at Williamsburg, Ont., in 1851, being a son of the late Samuel P. Weagant, He graduated with honors at the Royal College of Dentistry, Toronto, and practised for many years at Smiths Falls, Ont. He came to Winnipeg in 1906, where he resided, until his death. His wife, formerly Anna Maley, of Kemptville, Ont., survives. He is also survived by one brother, Alex., of Aultsville, Ont., and three sisters, Mrs. Allen Gallinger of Vancouver, Mrs. Russell and Miss Jennie Weagant of Brooklyn, N.Y.

The late Dr. Weagant was a veteran Odd Fellow, and an Anglican in religion.

RECOUNT IN GRENVILLE

The recount demanded by Mr. G. Arthur Payne, U.F.O. candidate in the Grenville riding, took place on Tuesday in the Registry Office in Prescott, Judge Dowsley presiding.

G. Arthur Payne and Hon. G. H. Ferguson, declared elected, by the recount by a majority of 81, were both present. P. K. Halpin, Prescott, and G. W. Holmes, Toronto, appeared for Mr. Payne, and H. J. and H. A. Stewart, K.C., Brockville, and A. C. Casselman, Prescott, appeared for Ferguson.

BIRTH

Salmon—At the Cornwall General Hospital, Oct. 23rd., to Mr. and Mrs. Edson Salmon, Morrisburg, a daughter.

OVERCOATS

FOR the professional and civilian who insist on staple garments of quiet and good taste, we suggest a "CHESTERFIELD" in greys and dark colors. This overcoat can be made to suit the many different seasons by selecting weights and texture recommendable to the different temperatures.

Clothes made by us bear the guarantee that any garment not satisfactory may be returned.

Curtiss Aeronola
Is in Town

What is it? It is a talking machine, but not like any one you have heard previously.

It is designed and made by Curtis Aeroplanes and Motors Ltd., the firm that built so many aeroplanes for the British and Allied Governments.

They say it is "the last word in Talking Machines" and we agree with them.

But there is nothing we can say here that be half as convincing to you as seeing it and hearing it yourself. So come in and let us demonstrate it to you. We will be pleased to demonstrate it whether you buy or not.

Our Victrola Department is complete in every detail, 25 different styles of talking machines to choose from, ranging in prices from $40.00 to $250.00.
