General Elections October 26.

Upon his return to Ottawa yesterday morning from Niagara Falls Sir Wilfrid Laurier proceeded to Government House and obtained Earl Grey's consent to the dissolution of the Tenth Parliament of Canada. A meagrely attended meeting of council convened at 3 o'clock and it was then decided that the appeal to the country ehould be made on the date mentionsd, namely, Monday, October 26, nominations on the 19th.

Stabbed In a Row.

As the result of a quarrel between Italian sectiou men at Morrisburg Thursday night, Gallio Puno stabbed Sug Vetro in the back with a stilleto, the blade striking the latter's collar bone and inflicting a nasty wound about an inch deep and two inches long. Puno escaped, but the county constable is after him.

A few lines of China to clear at a bargain, 5c & 10c. at Fulton Bros., Chesterville.

Fatal Runaway.

Mr. Archibald McDonald, aged about seventy, of the seventh line, Beckwith, seven miles from Carleton Place was almost instantly killed at Carleton Place, Saturday forenoon through being thrown from his wagon by his team running away.

One Goes to Manitoba and Another Leaves.

Rev. J. M. Kellock, a former pastor of the Presbyterian Church at Morewood, and at present stationed at Howick, Que., has received a call to Elva, Man., and has accepted. He leaves for the West about the middle of October. The call came to Mr. Kellock without his being heard by the Elva congregation. He is a son in-law of Mr. Andrew Kennedy, of Winchester. The one leaving Manitoba is Rev. E. S. Logie, a former pastor of St. Paul's Church, at Winchester, but now at Hartney, Man. He has received a call from the Sudbury, Ont., Presbyterian congregation, and has accepted it.

Race Track Men Got Into Fight.

Just as the R. and O. liner "Rapids King" was pulling into the Cornwall canal Monday night a fight broke out among a crowd of race track followers west bound from Blue Bonnets. The trouble came during a card game and a man named Ike Coyne, of St. Louis, Mo., was stabbed on the head and arm by Gus Porter, of Louisville, Ky.

The Cornwall police were called in and arrested Porter, but by this time Coyne had disappeared. Porter was locked up and will be remanded.

J. M. Gibson's Trip.

Mr. J. M. Gibson, the newly-appointen Lieutenant-Governor of Ontario, may not assume office until the middle of next month. It is said that he will make a trip to Colorado before entering upon his duties. He will then, after receiving his commission as Lieutenant-Governor, take the oaths of allegiance and office before the clerk of the Federal Executive Council or a Chief Justice of the High Court. Until he is sworn in Sir William Mortimer Clark will continue to act.

Trading Out of Town.

When the catalogue comes from the city departmental store, reader, draw an easy chair to the table where the light will shine full upon the page and put on your glasses that no bargain may escape your eye What a wonderful book it is to be sure. Wonderful for what it does not contain as well as what it does.

You will miss some things which you would be glad to see. Where is their offer to pay cash or exchange goods for your wheat, oats, corn, brans, butter eggs and hay?

Lyttle—Milross.

The marriage of Miss Nellie Millross, daughter of Mr. Johiel Milross, to Mr. Edward J. Lyttle, of Winchester, was quietly solemnized on Thursday at St. David's Church Parsonage, Wales, the ceremony being performed by the Rev. C. O. Carson. The bride. who was unattended, wore a pretty gown of navy blue broadcloth, white silk blouse hat to match. The happy couple left on the 4 40 train. They have the hearty congratulations and best wishes of a host of friends.

NATURAL GAS EXPLOSION

Two Persons Killed and Several Fatally Hurt at Brantford.

A despatch from Brantford says: An explosion of natural gas on Friday afternoon totally destroyed three buildings on the south side of Colborne street, near Lorne Bridge, and caused the death of two persons, the possible fatal injury of two others, and the serious injury of three.

THE DEAD.

Joseph Blayborough, aged 26, died at hospital.

Two-year-old child of Mrs. Horning, died at hospital.

INJURED.

Albert Holstock, face and hand burned.

Mrs. Horning, badly cut and bruised; condition critical.

Charles Horning, aged 6 months; condition critical.

Henry Smith and wife, badly cut and bruised.

BUILDINGS DESTROYED.

The buildings destroyed were:—Theatorium, 43 Colborne Street; billiard parlor, owned by Jas. P. Doyle, 45 Colborne street; bake shop, owned by Courtland Smith; bowling alley, John Bouey, 45 Colborne street, occupied by Mrs. Mary E. Lake; grain warehouse, occupied by J. F. O'Neal.

Buildings partly damaged:—Boston Chinese Cafe, 47 Coloborne street, tailor shop of W. P. Henderson, 49 Colborne street; lunch parlor of J. L. Williams, 51 Colborne street.

SHOOK WHILE CITY.

The explosion, which occurred about two o'clock, was felt throughout the entire business portion of Brantford and on the north side of Colborne Street and on King Street the plate glass windows were blown in for blocks. The fire department and willing workers were quickly on the scene of the disaster. Fortunately there was no one in the Theatorium or the restaurants nearby or there might have been a serious loss of life. The buildings all collapsed and fell into the street. Mrs. Horning and her children, who occupied rooms above the destroyed buildings, were buried in the debris, and when dug out were found to be suffering from serious injuries. They were hurried to the hospital where the two-year-old Horning lad died at 6 p.m.

Blayborough and Holstock were sitting on the steps of the theatorium when the explosion occurred. They were waiting for an employe of the theatre, who was a friend of theirs, to open up. Holstock is a well known local baseball player. Blayborough was an employe of the Massey-Harris Co., but for the past two weeks had been doing some work around the theatorium. He was thrown right across the road and struck a telegraph pole, sustaining fatal injuries to the back of the head. He was 26 years of age and highly thought of.

RIGID ENQUIRY.

There were no new developments on Sunday in connection with the recent explosion catastrophe. Mr. Holstock at the hospital and Mrs. Horney at her father's house are both reported as doing nicely and no further deaths are anticipated. There will be a rigid investigation and every endeavor will be made to place the blame where it belongs. There are all sorts of theories afloat to explain the disaster, but it is thought that it was an escape of natural gas into the buildings from the main being dug on Colborne Street.

LEADING MARKETS

BREADSTUFFS.

Though the deliveries of sheep and lambs were heavy, the calves held steady.

Select hogs were firm in price at $6.70 per cwt., off cars, Toronto.

WORKMEN PLEAD FOR BREAD

Twenty-five Thousand Unemployed in Glasgow Streets.

A despatch from Glasgow, Scotland, says: A remarkable scene was witnessed at the offices of the City Council on Thursday afternoon. Crowds of the unemployed gathered in George Square before the Council convened, and a delegation of twelve was admitted to the meeting. The Councillors received the delegation by rising from their seats. The spokesman of the unemployed said that never before had there been such distress in Glasgow.

"Every human unit," said this man, "is entitled to food. We make no outrageous request; we are only here to plead for the souls of men and women. They demand work."

The Chamberlain of the city replied with deep emotion. He said the Council had received the delegation in a spirit of brotherhood, and that it would do all in its power to help those who needed work.

Large bodies of troops were held in reserve in anticipation of rioting and attacks on property. The men, however, have decided to refrain from demonstrating for one week, in order to give the Council an opportunity to adopt measures for the improvement of the situation. The police arrested a Socialist who incited a man to resist arrest. He threw pepper in the eyes of the constables before they secured him.

On Wednesday night three thousand of the unemployed organized a midnight march to one of the best quarters of the city. Mounted police scattered the crowd and frustrated its intention. Several arrests were made.

Estimates of the number out of work in Glasgow and in the towns along the Clyde run as high as 180,000. This is the estimate of the Socialist orators, and men in a position to know call the figures absurd, but the most conservative admit that the number must reach 25,000

WOMAN BURNED TO DEATH.

Lighted Match on Floor Ignited Muslin Dress.

A despatch from Halifax, N. S., says: There has been an epidemic of deaths by burning in Halifax during the past few weeks. The fourth such accident occurred on Saturday night, when Henrietta Evelyn Garroway was burned to death. Miss Garroway, who was a member of the Public school staff of Halifax, had been reading to her father, who is nearly blind. She went to her room to change her attire preparatory to going out. The match she used to light a lamp she threw on the floor. It caught her muslin dress and in an instant the whole dress was in flames. She cried out and her father ran upstairs and did what he could, but without avail, and in a few minutes she was dead. There was great danger of the house taking fire, but men ran in from the street and saved the house.

TRIPLE DROWNING.

Launch Capsized in the Upper Rapids at Fort Frances.

A despatch from Fort Frances, Ont., says: A triple drowning fatally occurred at Pither's Point, on Monday morning, consisting of Capt. Sissons, John Lockhart, jun., and Pat Atchison. They were running the upper rapids under the railway bridge, when the launch was capsized and all three were drowned. Capt. Sissons was well known in Fort Frances, being a solicitor, and captain of No. 5 company 96th Lake Superior Regiment, and was a prominent Mason and Oddfellow. John Lockhart, jun., was head sawyer at Lockhart's mill and Mr. Atchison was foreman at the same mill. The bodies have not been recovered.

BUILDING DEMOLISHED.

Two Men Killed in a Boiler Explosion at Huber's Corners.

A despatch from Berlin, Ont., says: Gamien Huber of Huber's Corners, near Lynwood, and William Hetig of Newton were killed on Monday afternoon in a boiler explosion in an apple jelly factory at Huber's Corners. No person knows the cause of the explosion, as the two men were alone when it occurred. Neighbors, drawn to the spot by the noise, found the scalded bodies of the two men lying in the field near where the factory stood. The building itself was blown to pieces. The boiler which blew up was that of a second-hand engine. Both men were married and had families.

KILLED IN A RUNAWAY.

Farmer Thrown From Rig at Carleton Place.

A despatch from Carleton Place, Ont., says: Archibald Macdonell, aged about 78 years, a much respected farmer from the 7th concession, Township of Beckwith, was killed almost instantly in a runaway here on Saturday. His team got frightened at some object on the street and dashed along at a terrible pace, throwing him out of the rig opposite the Mississippi Hotel. His head struck on the pavement, and he expired in about ten minutes after being thrown out.

Angelo Mazzo was stabbed to death in Cleveland by a man who had followed him from Sicily seeking his life.

An express parcel worth $50,000 has been stolen from the Wells-Fargo Express Company at Portland, Ore.

In the Supreme Court at Rochester, N. Y., the injunction restraining the Independent Order of Foresters from increasing their assessment rates was sustained.

Several Japanese were killed in a fight with Portuguese in an Alaskan cannery.

At Washington, on Tuesday, Orville Wright broke all aeroplane records by remaining in the air 62 minutes and flying 38½ miles.

Dr. F. T. Ruslin, who was found dying from a bullet wound in Omaha a week ago, had been attempting suicide for three years, even injecting tetanus and typhoid germs into his system.

FOREST FIRES ARE RAGING

People in the Settlements Are Alarmed at Their Approach.

A despatch from Fort William says: When the sun went down on Wednesday night it looked as though it was making a plunge into a mass of flames. All night the south-eastern heavens showed red and some people here declare that ashes and cinders were carried through the air, coming from either the stricken settlements on the south shore or from the burning districts in the Whitefish Valley.

For the last week there have come stories of burning forests. The whole south side of Mount McKay has been burned over and on Wednesday morning a telephone message from Hyman says that the people of that settlement are very uneasy. Only a few miles south of them the fires are burning and one settler has already been burned out. In the unsettled portions of Gillies and Scoble small fires are burning, but there is no possible way to check them except a heavy rainfall. The fire back of the mountain is in the Township of Paipoonge, but up to the present has not reached any of the settlements.

SOLID WALL OF FIRE.

A solid wall of flames twenty-five miles in length is said to stretch from Grand Mariao to Chicago Bay on the international boundary line. The Pigeon River Lumber Company's camp at Chicago Bay is said to be destroyed. The flames are now approaching close to Hymers on the Gunflint branch of the Canadian Northern and the settlers are said to be very anxious. The flames are devouring everything in the White Fish Valley. There is a bad fire at Silver Mountain and Gunflint. Two Pigeon River lumber camps on the International boundary are destroyed. The fire in the Indian reserve is still burning, but the Indians have it in check. There is another large fire burning on Thunder Cape, near Silver Island.

RAISED TO FIFTY DOLLARS

Money Qualifications Required of Immigrants.

A despatch from Ottawa says: An order in Council has been passed raising the minimum money qualification of $25 now required of all immigrants coming to Canada to $50 for the period from January 1st to February 15th. The doubling of the money qualification during mid-winter is with a view to restricting as far as possible the arrival of any immigrants without independent means during the period when employment is not easy to obtain. The restrictive immigration regulations adopted by the Government early this year have had the desired effect in cutting down immigration by considerably over one-half, and the total immigration for the year will, it is expected, be only a little over 100,000.

STEAMERS COLLIDE.

One Boat Beached Fifteen Miles Below Quebec.

A despatch from Quebec says: Owing to the heavy smoke on the river on Saturday, caused by forest fires, a serious collision took place between the S. S. Corinthian, Allan Line, outward bound, and the S. S. Malin Head, of the Head Line, inward bound. The accident occurred at Point St. Laurent, Island of Orleans, about 15 miles below Quebec. The steamship Main Head is beached near the scene of the collision, and the steamship Corinthian arrived here on Sunday evening, and is moored at the Allan Wharf. Both steamers are reported to be badly damaged.

C. P. R. STRIKE TRAGEDY.

Striking Mechanic at Winnipeg Fatally Injured.

A despatch from Winnipeg says: The first tragedy in the C. P. R. strike occurred on Monday night, when Robt. Kirk, a striking mechanic, was shot and fatally injured by John Pepper, a strike-breaker from Ontario. Pepper says Kirk approached him and abused him as a scab. He feared an attack and shot. The bullet entered Kirk's bowels and he is said to be fatally injured. Pepper is in jail.

SCALED THE JAIL WALL.

Prisoner at Brantford Makes His Escape.

A despatch from Brantford says: About a month ago Wm. Parker was convicted on a charge of horse-stealing and sentenced to jail here. He served nearly a month's time. Wednesday forenoon about 11 o'clock he escaped by scaling the jail wall, and officials are now searching the country for him.

HORSE HOLDS UP TRAIN.

Dashed Across Grand Trunk Steel Arch Bridge at Falls.

A despatch from Niagara Falls, N. Y., says: On Thursday morning a runaway horse, which started its mad flight in the Central freight yards, on the American side of the river, ran across tracks, over switches and out upon the upper deck of the Grand Trunk steel arch bridge. It crossed to the Canadian side, where it fell into a cattle guard, stopping traffic. It was rescued with difficulty.

MAY BUILD TO PEACE RIVER.

C. P. R. Has Surveyor Pearce Reporting on North Country.

A despatch from Winnipeg says: William Pearce, railway surveyor, of Calgary, was sent north some time ago by the C. P. R. to look into the conditions of the country in the Lesser Slave Lake and Peace River districts. He travelled through that country and will now take a report to his company. It is stated, though not officially, that this is the first move of the C. P. R. towards building a line into the north country.

UNDESIRABLES APPLIED.

Immigration Branch Deported Over 1,031 People.

A despatch from Ottawa says: A return issued by the immigration branch of the Interior Department shows that from the 1st of January to the 31st of July 1,031 people have been deported from Canada to the countries whence they came. During the same period, 486 people were refused admission to Canada at ocean ports.

LIEUT.-GOVERNOR OF ONTARIO

Hon. J. M. Gibson's Appointment Finally Announced.

A despatch from Ottawa says: By the Governor in Council on Wednesday afternoon an order was passed appointing Colonel the Hon. J. M. Gibson of Hamilton to be Lieutenant-Governor of Ontario, in succession to the retiring Lieutenant-Governor Sir Mortimer Clark, whose five-year term of office expired last spring.

Count de Toulouse—Lautres, a swindler with an international reputation, has been arrested at Antwerp on a charge of cashing stolen coupons.

STILL RULES THE WAVES

Great Britain's Largest and Heaviest Warship Launched.

A despatch from Portsmouth, England, says: The St. Vincent, the largest and heaviest battleship ever built for the British navy, was launched successfully here on Thursday. The weather was fine and the sea smooth, and a great crowd saw the vessel take the water. As the warship slipped from her blocks she was christened by the Countess Beauchamp.

Counting the three cruising battleships of the Invincible class, the St. Vincent is the eighth vessel of the Dreadnought type to be launched in this country. The Admiralty has observed its usual reticence with regard to the details of the design and construction of the St. Vincent, but from certain figures that were given out it is manifest that the experience gained from the construction of the Dreadnought has been utilized in this vessel. It is believed that some of the additional weight of the St. Vincent is to be accounted for by heavier armament for protection against torpedoes, and by improvements giving greater security to those controlling the movements of the ship while in action. A number of foreign naval attaches attended the launching, on the invitation of the Admiralty.

The St. Vincent was laid down in December of last year. She is supposed to be of about 19,250 tons and her cost has been given at $9,500,000.

A PHYSICAL WRECK

MR. RENE ST. JEAN.

A Resident of Ottawa Finds Relief in Pe-ru-na.

MR. RENE ST. JEAN, 210 St. Patrick street, Ottawa, Ont., Can., writes:

"I believed a year ago that I could stand anything. I worked hard, kept irregular hours, and did not mind the loss of a few meals, but in six weeks I had changed to a physical wreck.

"Eight bottles of Peruna **brought back my strength.**"

Mr. A. O. Harding, 503 W. 146 St., New York City, formerly one of the leading druggists of Prescott, Ont., has been presented with a twenty-five year Medal of Honor in Odd Fellowship. He writes as follows:

"Ever since I have been handling Peruna, I have had a fine trade. Once a family buys a bottle, I am sure of selling them more, and it never fails to bring additional customers.

"I have nothing better for catarrh in all of its various forms. As a household remedy it is without compare, splendid for mothers and excellent for children."

TOO RISKY.

Although the tramp had seen a great deal of life, he was no judge of character, otherwise he would never have said what he did to Miss Cornelia Hawkins. When she said that she would give him a good dinner if he would saw and split wood enough to pay for it, he attempted to appeal to her sympathy.

"Madam," he replied sadly, "I'd be glad to saw and split the wood, I'd be glad to do anything, but I'm not physically strong. I have a weak heart, madam, and I have to look out for it. You see, I carry my life in my hands, as it were," he said, with what was meant for a wan, pathetic smile.

"Indeed!" and Miss Hawkins gave an incredulous sniff as she glanced at the palms outstretched for aid. "I suppose that's the reason you don't wash 'em—for fear of getting drowned?"

Passer-by—"Here, boy, your dog has bitten me on the ankle." Dog—owner—"Well, that's as high as he could reach. You wouldn't expect a little pup like him to bite your neck, would yer?"

When a man brags about himself it's a sign that others merely tolerate him.

Its Power Grows With Age. — How many medicines loudly blazoned as panaceas for all human ills have come and gone since Dr. Thomas' Eclectric Oil was first put upon the market? Yet it remains, doing more good to humanity than many a preparation more highly vaunted and extending its virtues wider and wider and in a larger circle every year. It is the medicine of the masses.

THE DIFFERENCE.

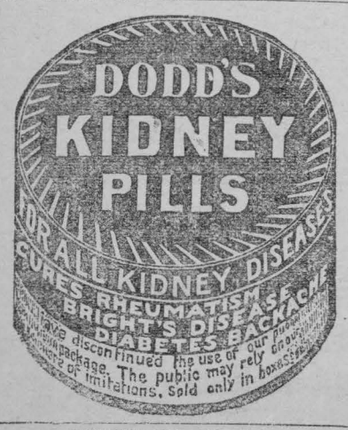

John—What is ability?

Will—Ability is that to which a man owes his own success.

"And what is luck?"

"Luck is that to which all others owe their success."

Business men will not admit failure if they can compromise for 10 cents on the dollar.

WAITING FOR A FORTUNE.

Mr. Blinkey Not Worrying Over It, but All Ready for It.

Like many another man, Mr. Blinkey is always hoping that something will turn up. He's an intelligent man and he knows perfectly well that there isn't one chance in seven hundred and eighteen thousand million billion that he'll ever get a dollar that he doesn't work for and earn; and still he's always hoping and thinking that something might happen.

And so when he gets to the office in the morning he looks in the letter box there, not really with the expectation of finding a fortune, but nevertheless thinking that there might be something; not disappointed if there isn't, but wishing that he might find there a check for a million dollars from somebody or somewhere, or notice of some fortune that had been left to him that he was now to come and claim.

It's just the same when he goes home at night. He's been away all day, time enough for forty things to happen, for forty fortunes to come in, and he knows there hasn't any come, and still it is not an absolutely impossible thing, and so he's always kind o' hoping that he'll hear some good news when he goes home.

He never does, he finds everything going along there placidly; there hasn't been any fortune sent in or brought in, and he knows they'd speak of it if there had been; but sometimes he says to Mrs. Blinkey jokingly:

"Anybody leave us two million dollars to-day?"

"No," says Mrs. Blinkey smilingly.

"One million?"

"No."

"Half a million, maybe," says Mr. Blinkey.

"No, nor half a million," says Mrs. B.

"Perhaps it was a hundred thousand dollars. We could do with that."

"No, nor a hundred thousand."

"Not a dollar?" says Mr. Blinkey.

"No, not even a dollar," says Mrs. Blinkey.

"Well, then," says Mr. Blinkey, "I guess I'll smoke my pipe," and he does this right cheerfully. But he's always hoping.

SAVE THE CHILDREN.

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather months. Stomach troubles, cholera infantum and diarrhoea carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets cure these troubles, or if given occasionally to the well child will prevent the trouble coming on. And the mother has the guarantee of a government analyst that the Tablets contain no opiate or harmful drug. Mrs. Geo. Mineault, Jr., Mont Louis, Que., says:—"Before giving Baby's Own Tablets to my little one she suffered greatly from colic and stomach troubles, and cried a great deal. The Tablets soon cured her and she is now a plump, healthy child who does not look as though she ever had an hour's illness." You can get the Tablets from any dealer in medicine or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

GENERAL INFORMATION.

Tit-Bits of Knowledge About 'Most Everything.

Robert Womack, who discovered Cripple Creek, the world's greatest gold camp, and sold his claim for $625, is reported to be living on charity at Colorado Springs, and a subscription for his relief has been started. The camp has yielded $297,500,000 in gold since 1891.

The Chicago Pullman Car Company recognizes the value of politeness as a business asset. The company has just distributed the sum of $875,000 amongst its conductors and porters who have been

SALADA
CEYLON TEA

The finest tea grown in the world is the standard of quality used in preparing "Salada" Tea. Sold only in sealed lead packets.

reported upon as showing proper courtesy to the company's customers during the past year. A sum equivalent to a month's pay has been sent to each man.

So large is the profit resulting from the sale of margarine as butter that, it was stated at a meeting of the Middlesex County Council, some shopkeepers are willing to run the risk of being fined. The Council were informed that in some cases shopkeepers were making from £16 to £17 a week profit, and the fraud was most prevalent in the poorer districts.

Butchers' boys in white overalls and aprons formed a guard of honor at the wedding of Miss Barker and Mr. Bashford, at Reigate, England. When the ceremony was over they strewed their aprons on the path for the newly-married couple to walk over. A stalwart butcher drove the carriage, and two others, with shin bones dangling from their sides, acted as footmen.

An amusing instance of the use of trade labels is reported from a Crown Colony in West Africa. A Commissioner asked a dusky chief to produce his copy of a trading agreement, and was amused to find that the "honest" trader who had secured the trading concession from the chief had detached a label from a beer bottle of a well-known firm and affixed it to the agreement as a Government stamp.

A singular revival is taking place in Paris for wearing the tooth of a wolf or badger set in gold as a mascot. An old superstition connected the wearing of such ornaments as provocated of good fortune. The custom of wearing a thumb ring is also being resuscitated, and at this present time a charming young actress on the English stage is demonstrating the vogue, partly, no doubt, because it is in keeping with the period in which she is living in the play, and partly in recognition of the fashion Paris is patronizing.

Writers on arboculture have from time to time called attention to the gradual disappearance of cedar trees in this country, and it seems that there is a dearth of cedar wood generally. This has set the chemist to work, and a Berlin firm is now making an excellent substitute for the cedar casings of blacklead pencils from potatoes. It is said that the potato case submits itself to the penknife as easily as does the cedar wood, and, what is more important, the cost is very much less.

A Pill For Generous Eaters. — There are many persons of healthy appetite and poor digestion who, after a hearty meal, are subject to much suffering. The food of which they have partaken lies like lead in their stomachs. Headache, depression, a smothering feeling follow. One so afflicted is unfit for business or work of any kind. In this condition Parmelee's Vegetable Pills will bring relief. They will assist the assimilation of the ailment, and used according to direction will restore healthy digestion.

The Best Friend—"I hear her old husband shows her a dog-like devotion." The Casual Gossip — "Yes; they say he is always growling at her!"

Spots and blotches on the face and neck are often merely signs of foul blood. Apply Weaver's Cerate to obtain immediate relief and take Weaver's Syrup to rid the blood of pollution.

Getting in touch with men of affairs may lead to success—but the difficult part is to get them to stand for the touch.

Nothing looks more ugly than to see a person whose hands are covered over with warts. Why have these disfigurements on your person when a sure remover of all warts, corns, etc., can be found in Holloway's Corn Cure.

DEAR BOUGHT.

The Husband (during the quarrel) "You're always making bargains. Was there ever a time when you didn't?"

The Wife—"Yes, sir; on my wedding day."

$30,000 PER POUND.

Market Price of Snake-Venom Works Out at About This Price.

Snake-venom has proved so useful to medical science that the collecting of it is fast developing into a recognized business. Sold by weight, it fetches a higher price than any of the precious metals, the market price working out at about $30,000 per pound—troy. And when one considers how dangerous and difficult it is to obtain the venom, these prices are easily understood.

The snakes must be captured alive. To do so, many hunters catch the reptiles with their hands, holding their slippery prey firmly till the poison is deposited in a bag or box.

Sometimes the entire poison-sac is cut out. The operator lays open the snake's head, and, having detached the sac, seals it up until required. Other operators irritate the reptile, causing it to bite through indiarubber bands, and deposit the poison on a glass plate below. A venomous snake has two poison-fangs in the upper jaw, and when goaded, it pierces the indiarubber, and pours its streams of poison upon the glass plate. The poison is afterwards scraped together and placed in hermetically-sealed phials. The operator's work, as may be imagined, is often more dangerous than that of the collector.

A full-grown snake seldom ejects more than one grain—troy weight—of poison at a bite; so, while the market-price is high, it takes some earning.

Ladies in Poor Health

Everywhere, especially those discouraged by failure of previous treatment are invited to write for a free trial of my home treatment, with interesting booklet, all post-paid in plain wrappers, with the most reliable references and proofs which will encourage the most disheartened. You can thus **quickly satisfy yourself, without cost** that this treatment is what you long have sought. I will reply promptly to all who write. Address,

MRS. M. SUMMERS,

TOO DANGEROUS.

Shopman — "Rolling-pin? Yes sir; here's one made of glass; the latest thing out."

Henpeck — "But Great Scott, man, that thing would probably break and cut my head all to pieces!"

Good Digestion Should Wait on Appetite.—To have the stomach well is to have the nervous system well. Very delicate are the digestive organs. In some so sensitive are they that atmospheric changes affect them. When they become disarranged no better regulator is procurable than Parmelee's Vegetable Pills. They will assist the digestion so that the hearty eater will suffer no inconvenience and will derive all the benefits of his food.

Beauty is only skin deep, but a man's cheek is often estimated at more than its face value.

It will be noticed in the Singer Sewing Machine Company's advertisement that there are three addresses at the bottom of the announcement. Any one writing will please address them at the nearest one of the three places to his post office.

Smart—"Sad about the church organ being burned down, wasn't it?" Girls—"Why couldn't they put it out?" Smart—"Because none of the firemen could play on it."

If your children moan and are restless during sleep, coupled, when awake, with a loss of appetite, pale countenance, picking of the nose, etc., you may depend upon it that the primary cause of the trouble is worms. Mother Graves' Worm Exterminator effectually removes these pests, at once relieving the little sufferers.

The largest mass of ice in the world is probably the one which fills up nearly the whole of the interior of Greenland, where it has accumulated since before the dawn of history. It is believed to form a block 600,000 square miles in area, and to average a mile and a half in thickness. According to these statistics, the lump of ice is larger in volume than the whole body of water in the Mediterranean; and there is enough of it to cover the United Kingdom of Great Britain and Ireland with a layer about seven miles thick.

A school for dogs has been established in Paris. The object is to teach them politeness. The animals are trained to welcome visitors by jumping up, wagging the tail, and giving a low bark. When the visitor leaves, the dog accompanies him to the door, constantly wagging his tail, and bows his farewell by bending his head to the floor. He is trained, likewise, to pick up a handkerchief, glove, or fan that has been dropped, and return it to the owner.

Singer Talks

3. The Extravagance of Cheapness in a Sewing Machine

¶ Every woman knows the foolish extravagance of buying anything for her house just because it is "cheap."

¶ Every woman also knows that what seems "dear" at first is often "cheapest in the end."

¶ Yet the woman who will urge her husband to buy a thoroughly good overcoat because he gets several season's wear out of it, often buys some unknown sewing machine for herself because of its "bargain" price.

¶ Now the Singer Sewing Machine costs very little more than thrown-together, catch-penny machines. Yet *one* Singer will outlast *several* of the ordinary kind.

¶ The Singer has earned the reputation of running as smoothly at the end of its twentieth or thirtieth year as the day it was bought. Considering this, the Singer is in the end the cheapest machine to own.

Sold only by

Exhibition At South Mountain.

The fifteenth annual exhibition of the Mountain Agricultural society, which closed on Friday was probably the most successful in the history of the organization. Favored with ideal weather on both days, large exhibits in practically every branch, and bumper crowds, the directors have every reason to congratulate themselves. The number of cattle exhibits this year was perhaps not so great as in some previous years, but the high grade of those on Friday more than made up for the lack in numbers. In the main building the display of ladies' fancy work was particularly fine, keen competition for the premier honors taking place between Mrs. A. Bowen, Kemptville; Mrs. Jno. Duffield, Lombardy, and Mrs. L. M. Durant, of Inkerman. In dairy products and goods of domestic manufacture Mrs. L. M. Durant, of Inkerman In dairy products and goods of Domestic manufacture Mrs. Alex. Gregory of South Gower and Mrs. J W. Gilroy were close competitors.

There was a large increase in number of horses shown in the many different classes, and also a great improvement in the quality and breed, Mr. Fitzsimmons, one of the expert judges employed by Ontario Government, giving as his opinion that he had found the general all round quality and breeding so high as to make it difficult to place one before the other in awards. Among the largest exhibitors Messrs. J J. Black and Son, of Winchester; J. N. Corriston, Kemptville; S. Baker. W Forrester, Alex Wilson, Alex. Barclay, Mountain.

Dr P A McIntosh, Spencerville and J W Gilroy, Mountain, carried off nearly all the prizes in poultry, Dr McIntosh being by far the largest exhibitor in his class on the grounds, having a very large number of splendid birds entered in many of the classes The exhibit of poultry, while not so large as on some other years, was of very good quality.

As noted above, the exhibition of cattle was not as large as compared with former years, but the several heads judged more than made up in quality for lack of numbers The Ayrshires of Elgin Montgomery, South Mountain and the Holsteins of E Grav, Ventnor, were all fine animals, while Charles Patton, Jr, of Mountain had also a a fine herd of Holsteins on display

Mr John Billings and Mr James R Morrison were the heaviest exhibitors of sheep and swine, and these classes have kept up their reputation of former years of only showing those of the highest grade Many of the decisions were difficult for the judgos to make, so close and keen was the competion

On both days of the fair good programs were carried out in front of the grand stand in the afternoons. On the first day a green running race and the 3 minute class took place on the second day three races were contested, viz, 2 35 class, 225 class and free for all All events were closely contested

The officers and directors of the Mountain Agricultural society are: President Ben Storey, South Mountain; vice-president, A Redmond, South Mountain; second vice-president, J S Anderson, South Mountain; secretary, Martin Kavanaugh, South Mountain

Directors; Albert Guy, Wm Timmins, Inkerman; Jas Morrison, Hulbert; W S L Merrill, Mountain; Robert Mulholland, Van Camp's; Herb Walter, South Mountain; Wm Shaver, Herb McIntyre, Mountain, A Cummings, Heckston

To Stop a Crying Baby.

It may be cramps, perhaps, colic, pain or gas on the stomach—but in any case a few drops of Nerviline soothes the pain and allows the child to sleep peacefully. Nerviline cures minor ills, such as colds, headache, internal and external pains as well as any doctor,—safe to use because a small dose is required. Mothers, you will find Nerviline an invaluable aid in preventing and curing sickness. Keep a bottle right at hand, some day you will need it badly. Sold everywhere at 25c.

Mrs. J. E. Earle Dead.

News was received here on Saturday afternoon of the death of Mrs. J. E. Earle of Winchester. Mrs. Earle was visiting her sister Mrs. M. J. Casselman at Morrisburg and was taken ill with typhoid fever. She was recovering from that disease and was expected to have been out of danger but heart trouble seems to have been the cause of her death. On Friday she became worse and Mr. Earl was communicated with and he arrived there before she passed away at noon on Saturday, but was not conscious. The remains were conveyed to her late home at Winchester, from where the funeral took place on Sunday afternoon at 1.30 o'clock, services being conducted in the Methodist church by her pastor, tne Rev. Mr. Webster, being assisted by the Rev. Mr. Yule, Presbyterian minister, after which interment was made in Maple Ridge cemetery The deceased is a daughter of Josiah Casselman of Winchester Springs. She leaves to mourn her death a husband and an only daughter Della.

The RECORD, with a large circle of friends, extends sympathy to the bereaved family.

Have You Warts?

You can cure them painlessly by Putman's Corn and Wart Extractor. Never known to fail. Be sure and get "Putman's" in 25c bottles.

Death of John Robinson.

One of the best known and most highly esteemed residents of the county, in the person of John Robinson died at Winchester early Sunday morning, aged 64 years and 6 months. Mr. Robinson was born in the township of Mountain where he owned and resided on one of the best farms in the township. He also engaged in the lumbering and the manufacture of cheese, succeeding in amassing a handsome competence. Four years ago last March his wife died, which deeply affected him. Broken in health, a little over three years ago he came with his daughter Annie to reside in town. He gradually grew weaker until about two years ago he became a confirmed invalid. During his long and trying illness he was never heard to complain, but heriocally bore his sufferings with patience and marked cheerfulness until the end. It is safe to say that Mr. Robinson did not have an enemy. He possessed a heart unlimited in its generosity. He never refused an appeal for aid, and both well to do and the poor have benefited by his warmth of heart. In fact his fortune suffered through this prominent trait of his character. In religion he was a Presbyterian and in politics a staunch Conservative. Three daughters survive him, Mrs. Stanley Timmins and Mrs. Chester Timmins of this town, and Miss Annie at home. One brother, Mr. James Robinson of Mountain, and one sister, Mrs. Wm. Anderson of the Boyne are also survivors The funeral service was held at St. Paul's church at 2.30 on Monday, being conducted by the pastor, Rev. Geo. Yule, assisted by Rev. J. Webster of the Methodist church. The remains were afterwards interred Maple Ridge cemetery. The pallbearers were Messrs. Christopher Irving, Jas. Irving, David Christie, Wm. Campbell, Alex. Ross and W. J. Fraser.—Press.

Fulton Bros. of Chesterville, handle the celebrated Lakefield Portland Cement.

Great Danger In Headaches.

It's often dangerous to consider headache a trifling ailment. If the head aches the stomach is out of order and some serious disease may be impending. To tone up the stomach, to give it healthy action, nothing in modern medicines is so successful as Dr. Hamilton's Pills The concentrated vegetable extracts in Dr. Hamilton's Pills have a quieting effect on the stomach and remove all disorders. Your headache will be cured and they won't return, if you use Dr. Hamilton's Pills. Sold everywhere.

Fire At Charleston.

For over two hours fire carried destruction in its wake at the village of Charleston, twenty miles from Brockville. It originated by a spark from a saw-mill, which alighted on the roof of a barn owned jointly by C. J. Banta, of New York, and Norman Dowsley. It was a large frame building, and the flames fanned by a heavy northeast wind, spread to a house occupied by M. Hudson. The barn and the house together with a portion of the contents of the latter, were completely destroyed. From there the fire leaped to the watefront, and four boathouses, owned by G. G. Parish, Wm. Jacks, Justus Smith, and Dr. Lillie, were burned. Assistance to fight the fire was summoned from Athens and the brigade, with a large number of citizens, responded, but the fire had gained too much headway, and all that could be done was to stay its progress Insurance was carried on the burned buildings and their contents, but the losses will not be covered.

Council Meeting.

A regular meeting of the Chesterville Municipal Council was held in the town hall on Monday evening.

Members all present except J. Jordan.

Minutes of previous meeting read and adopted.

Moved by T. J. McGee seconded by Charles Chambers, that the petition of the rate-payers on main St. South, between Church St and South St. Asking for a cement sidewalk, be laid over till next year, as the Council considers it too late in the season to construct same. Carried.

Moved by T. J. McGee seconded by Chas. Chambers, that the clerk be instructed to notify the collector to furnish bonds by Oct. 1st. Carried.

Moved by T. G. McGee seconded by J. C Simser, that this Council adjourn to meet, Friday evening Sept. 18th for the purpose of striking a rate for the year 1908. Carried.

Wm. Cox's barn near Cobourg was destroyed by lightning.

LOCAL AND DISTRICT NEWS.

Mountain township's tax rate this year is 7½ mills lower than for 1907.

A moving picture show will appear in the town hall here on Monday evening next.

Harvest Thanksgiving Service will be held in Holy Trinity Church Sunday morning at 10.30.

Sir Wilfrid Laurier will address a meeting in Victoria Rink, Cornwall, on Wednesday, Sept. 30.

Whittaker, the Optician, will be at Chesterville on October 14th and Finch on October 15th.

Kemptville Council are considering the idea of lighting the town with gasolene lamps of 1,500 candle power each

Mr. Horton Shirkey this week completed the purchase of the farm just west of the white crossing from Mr. R. D. Fulton. Mr. Morrell has had it leased for a term of years.

If you have any photos to be enlarged, drop a postal card to E. J. Beaucage, box 64, Chesterville, and he will call on you.

Mr. Asa Hutt, of this place, appeared before Wm. Bow at Winchester on Monday, charged with an infraction of the liquor license act, and was fined $75 and cost.

Dr. C. T. Scott, of Douglas Church, Montreal, will preach in the Methodist Church here next Sunday at both services. On Monday evening following Dr. Scott will speak to young men only at 8 o'clock.

The Williamsburg Township Sabbath School Convention will be held in the Lutheran Church, Dunbar, on Thursday, Sept. 24th, commencing at 1.30 p.m. An excellent program is to be rendered.

A meeting of the Liberal-Conservative association of the County of Dundas will be held at Winchester Springs on Monday, Sept. 28th, at 1.30 o'clock, p.m., for the purpose of selecting a candidate for the coming Dominion election and other general business.

The executive committee of the Grenville County Liberal-Conservative association met in the town hall, Spencerville, on Monday last. The president Mr. B. Moshir, of Merrickville, presided, and nearly every member was present. It was decided to hold the regular convention at Spencerville on Tuesday, September 22, at 10.30 a.m., for the purpose of nominating a candidate for the federal parliament. The meeting to select delegates will be held on the evening of the 21st inst.

A very quiet but pretty wedding took place last week at the Macpherson house, Kemptville, when Miss Ena Ella Macpherson, eldest daughter of Mr. and Mrs. George Macpherson of that place, was married to Mr. Louis S. Brady of the Fifth avenue bank, New York city. On account of the serious illness of the bride's father, the ceremony was performed in the house of Rev. W. P. Reeve, rector of St. James' Church. Miss Susie M. Macpherson, sister of the bride, was bridesmaid, and Mr. Robert Brady, of Harvard, brother, was groomsman. Many beautiful presents were received by the bride. The young couple left at once for Ogdensburg, en route to the Adirondacks, where they will spend their honeymoon. They will reside in Katonah.

"E. C. Crooks represented the Crooks & McLean Marble Co. at the annual convention of the National Retail Monument Dealers association held in Chicago Aug. 26th, 27th and 28th. Mr. Crooks was honored by being elected National vice-president for New York state. The Crooks & McLean Marble Co. has shown a remarkable growth in a business way since the firm started in a limited way in Cartage ten years ago. The business grew and prospered from the start. So much so that in 1903 a branch was established at Gouverneur under the management of J. Walter McLean. In 1905 another branch was started at Boonville and this season Norwood was added to the list, making four shops in all and 35 men on the pay-rolls.—Carthage Tribune." The above mentioned is a son of Mr. John McLean, of this place, and brother of William McLean, of Limerick.

She is White as a Ghost.

Is it a matter of pride to be pale as a lily—certainly not. What every woman wants is strength, color, vigor. Buoyancy and health are the right of every woman, and these she need not lack if she only uses Ferrozone. It gives appetite, creates strength, enriches blood, gives vigor to the nerves, color to the cheeks and brightness to the eyes. Ferrozone is at once convertible into health, beauty and strength. There is power in Ferrozone—try it and know what you have missed.. 50c at all dealers.

Met With Accident at Lancaster.

Mr. William Robertson, of the third concession of Charlottenburg, who met with a serious accident on the Main street crossing at Lancaster on Saturday afternoon, was taken to the Royal Victoria Hospital, Montreal. Mr. Robertson had gone to town for a windmill and other machinery for use on the farm, and was on his way home. At the crossing he noticed a freight train shunting on a siding west of him and gave his whole attention to steering clear of it. But owing to the rattling of the heavy machinery on his wagon he failed to hear an oncoming express from the East, which at that moment dashed past, tearing through the rear of his wagon. Mr. Robertson was thrown violently to the track sustaining very serious injuries to the head as well as a fracture of the shoulder. He had not recovered consciousness since the accident, when he was moved yesterday morning to Montreal for treatment.

Money to Loan.

$500 on good security. For particulars apply at this office.

Lost.

IN the village. Pair of eye glasses in leather Case. Finder rewarded by leaving at McGee's Store.

How Are Your Nerves?

The daily grind of life burns up a man's vitality faster than he renews it.

He gets shaky, starts at trifles, tosses in his sleep, is ready to fly off the handle any minute.

The nervous man is nervous because his blood is so thin his nerves are starved to death.

He needs Ferrozone!

Its first action is upon digestion.

It stimulates secretion of gastric juice, ensures perfect digestion, prepares the food so it can be at once assimilated.

Hence the blood is nourished, is fortified, made redder, richer, stronger.

To the whole organism is imparted a vim, endurance and reserve of vigor that the nervous man never new before.

The restorative power of Ferrozone is marvelous. In a month it will make you feel like new, just as it did Mr Karl E Newsome of Rothesay, who writes: "I owe a debt of gratitude to Ferrozone which saved my life after a severe siege of nervous prostration. About a year ago my health gave out. I was in such a weak, irritable condition I couldn't work, and found that three doctors done nothing for me. My druggist recommended Ferrozone as the best preparation for nervous troubles, so I commenced with one tablet at meals. Every box of Ferrozone I took did me more good than the previous one, and it wasn't very long before I was strong enough to move around again. In three months I was completely cured. Ferrozone braced up my nerves, gave me a strong, healthy constitution, and is certainly a marvellous restorer and tonic." Try Ferrozone-sold everywhere by druggists in 50c boxes.

Cornwall will Protest.

At a meeting of the Cornwall lacrosse executive Tuesday it was decided to enter a protest against Saturday's game being awarded to the Nationals. The protest will be on several points. One will be because Pelletier was not eligible under the two years' resident rule having played with Cornwall part of last season. A kick will also be made that the result of the game was seriously affected by Broderick being knocked out of the game and that Sauve's punishment was inadequate to the offence as the rules call for a 20 minute penalty for a deliberate foul.

John McLeod, the contractor for the carpentering of the Leslie street school, Toronto, who made a mistake of over $3,000 in figuring for his tender, must finish the job at that loss or sacrifice $4,000 in work already done.

Mrs M. Burnais, of Montreal is visiting her parental home.

Mrs. John McLaughlin has returned to Canton.

Mrs. D. McMartin visited friends in Beamsville recently.

Mrs. John Patterson and daughter spent a week with friends in Grimsby.

Miss Annie Campbell has returned to Martintown.

Mr. and Mrs. A. Kearns spent Wednesday with friends in Chesterville.

Several from this vicinity attended Winchester fair.

The Late M. L. L. Connolly.

Martin Lewis Connolly died at Cardinal on Monday aged 78 years. The deceased was born in the parish of Easkey, County Sligo, Ireland. He was only two years old when his family emigrated to Canada. Some forty years ago he entered the service of the Grand Trunk Railway Co., where during twenty-three years he was bridge and masonry inspector on the Quebec and Portland branches of that road at Lennoxville. About fifteen years ago he left Lennoxville for Montreal, where he was inspector of works in the Brock tunnel and the famous Curran bridge. About nine years ago he was appointed inspector of the Gallops section of the Soulanges Canal, and then took his residence in Cardinal, where he just died.

Guarding Against Typhoid.

As autumn approaches, there is, almost invariably, says the Toronto Star, an increase in the number of typhoid cases in rural sections. There is reason to believe that much of this disease is due to the fact that wells at this season are nearly dry and that the impurities collected at bottom become mixed with water made use of for domestic purposes. In all cases in which the purity of the water is not absolutely beyond question steps should be taken to have it analyzed. Supplies sent to the chemical department of the Agricultural College, Guelph, will be analyzed free of charge. Another cause of contagion is found in the presence of house flies, which may gather disease germs on their legs or wings, and transfer same to human food to which they are allowed acess. The best means of limiting the danger from flies will be found in the removal of all collections of filth and the filling up of any marshy places which may be near the house.

Young Man Accidently Killed.

Peterboro, Ont., Sept. 9.—Roy McKelvie, son of J. R. McKelvie, Norwood, propietor of the Belvidere summer hotel Crowes Landing, Stoney Lake while out duck hunting was accidently shot by the discharge of his own gun, death being instantaneous He was 22 years of age and was to have been married to day.

Smallpox at Kingston.

Kingston, Sept. 10.—A case of smallpox has developed here, the victim being a young bank clerk named Newton, residing on Wellington street. He had been to Toronto and was taken ill shortly after returning. The patient was promptly isolated. and the house placed under quarantine. It is believed the disease was contracted while in Toronto.

CATARRH NOW CURABLE.

But Never by Medicine Swallowed, Snuffs, Sprays or Douches.

Catarrh is not a blood disease and that is why it cannot be cured by any medicine taken into the stomach. Catarrh is a germ trouble contracted from the germ-laden air you breathe inward. These germs fasten themselves in the tissue and air cells of the breathing organs, multiply by millions, cause sneezing, coughing, raising of mucous, discharge from the nose, difficulty in breathing, hoarseness, dryness and stoppage of the nose, tickling in the throat, and other symptoms that can only be reached by the dry air principle of Hyomei.

It medicates the air you breathe with the curative powers of the Australian Eucalyptus Forests where catarrh is unknown.

The reason you get relief in a minute or two from Hyomei is because it destroys every catarrhal germ in the air you breath, and its dry, penetrating aroma will reach the innermost recesses of the air passages, killing millions of germs a minute. Their destruction means freedom for oppressed respiratory organs. W. G. Bolster sells Hyomei under a guarantee of satisfaction or money back. Price $1 00.

CRYSLER.

James Currie attended the Toronto exhibition.

A. O'Donnell and P. W. St. Louis were in Ottawa on Monday.

Mr. and Mrs. McLeary of Cornwall spent the week with James Currie.

Miss Dey of Finch was visiting her sister, Mrs. (Dr.) Crain, last Saturday.

Miss Fleming left on Tuesday for Ottawa where she will attend college.

Mr. and Mrs. Albert Lafrance of Montreal spent Sunday with the former's uncle J. B. Lafrance.

Miss Robilliard returned home on Friday from a visit to her father, who resides in Boston, Mass.

J. Kearns and J. Braithwaite spent Sunday and Monday with the former's parents at Metcalfe, Ont.

W. Braithwaite and B. D. McDougall played with the Berwick team in a lacrosse match against Tupper Lake in that place this week.

Crysler was again visited by fire on Tuesday, when Mr. Laroche's residence was burned. The people of the house were absent and the cause of the fire is unknown. About 11 o'clock flames were seen coming out of the back door and the alarm quickly spread throughout the village. As soon as the people heard of the fire they rushed to the scene and did splendid work. The whole village might now be in ruins had it not been for their brave efforts. One and all gave a helping hand and the fire was confined to one house. Mr. Laroche lost everything. He has an insurance of $300 with Messrs. Page and Landry.

A quiet wedding took place at St. Mary's church, Crysler, on Tuesday, when Clotilde, daughter of Bazil Turpin, was married to John Jiluen of Maxville, by Rev. Father Leahy. The bride, who was given away by her father, was attended by Miss M. Leveiler. The groomsman was Andrew Julien. After dinner at the bride's home, the happy couple drove to Maxville, where they will reside. The best wishes of their many local friends follow them.

OSNABRUCK CENTRE.

The death of a highly esteemed resident of this village, Mr. Curtis Hollister, occurred on Sept. 3rd, at the Royal Victoria Hospital, Montreal, aged 42 years. The deceased had been in poor health for some time. The removal of such a life from our midst leaves a vacancy and a shadow that will be deeply realized by the many friends of the deceased, and will prove a serious loss to the community feels the deepest sympathy with the bereaved relatives. We expect our hope that even so great a loss to us all may be over-ruled for good by him who doeth all things well. The funeral took place on Sunday at the Advent Church. The sermon was preached by the Rev. L. Buro, who was assisted by Rev. Mr. Caldwell, of Woodland. The deceased leaves a widow, one son and one daughter to mourn for him; also the following brothers and sisters: Wm. Hollister, of this place; Nelson, of Ottawa; Henry, of Houghton, Mich.; Mrs. Harry Jackson, of Oshawa; Mrs. John Shaver, of Aultsville, and Miss Lizzie Hollister, of this place. The pall-bearers were Messrs. S. H Morgan, Edwin Collins, S. G. Eaman, Lindsay Rombough, George Alguire, Osborne Hartwell.

What is Progress?

History has so fully established the fact of ebb and flow in the business activities of the world, that it has reached almost the force of law. Periods of prosperity are invariably followed by times of depression of greater or lesser duration. Each business enterprise is constantly a quiver with the possibility of success or reverse, though in the individual case the reverse may long be averted by the caution and accunen of its guiding minds. In the wider general field even this precautionary circumstance is wanting. There is one who sets himself intelligently and determinedly to sweep back the more threatening wave of depression which affects not certain lines of business only, but all business, and no one has yet risen to make the whole field his care, and establish all business as an invincible and universal progress. The clouds dip and lift uncertainly; but the drama goes forward certainly with its constant surprise and unprovided features which not unseldom outstragem the would-be stage directors. So far as we have a law business progress it is a fluctation, of advance and retreat. It is cheering to feel that in general the advance is greater than the retreat; but the advantage lies ever with the man who provides against contingencies. It is true that in Western Canada to day, and here are perhaps more then elsewhere there is features, which promise to relegate the day of depression to an indefinite future; yet there are those who feel that the present pace of material enterprise cannot be sustained. There are those who argue that it cannot be sustained without spiritual disaster more serious in its effects than business depression. "Man does not live by bread alone," is more than a message of inspired writ; it is the unassailable testimony of history; the infallible assertion of human consciousness.

Rural Mail Delivery.

Ottawa, Sept. 11.—Hon. Rodolphe Lemieux, Postmaster-General, and Dr. Coulter, Deputy Minister, are making a short tour through some of the border States across the international boundary, with a view to gathering information as to the working of the rural mail delivery system The feasibility of adopting the rural mail delivery system in certain sections of Canada has been under the consideration of the Government for some time. and the data gathered by the Minister and Deputy will be submitted to the Cabinet on their return.

The Canadian Presbyterian Foreign Mission committee at its meeting in Toronto considered an urgent appeal to take some part in the work in Korea.

AULTSVILLE.

Miss Wilhelmina Dafoe, who has been spending the summer in the west, returned home last week.

Jacob Vincent, an old resident of this place, died on Monday, Aug. 31, at Cornwall. His remains were brought here the same evening, and the funeral was held on Wednesday to the Methodist Church, Rev. Wm. Service officiating. Ed Vincent, of Norwood, N.Y., a son of the deceased, attended the funeral.

John Ezard, father of Mrs. M. Beckstead, who had been ill at her home here for several weeks, passed to his reward on Tuesday, Sept. 1, at the advanced age of 73 years. He was born in Yorkshire, England, in 1825. He was married at Hull, England, in May. 1848. to Miss Hannah Granger, and eight years later the young couple and their little family came to Canada, settling north of Toronto, in the Township of Vaughan. To them nine children were born, six of whom are living, four sons and two daughters, namely: George and John Ezard, of Osnabruck Centre; Mark and Jas. Ezard, of Caledonia, N.Y.; Mrs. M. Beckstead, of this place, and Mrs. Isaiah Neville, of Osnabruck Centre, to whom with his aged widow, the sympathy of the entire community is extended. The deceased was a kind neighbor, a loving father, and a faithful Christian. The funeral took place on Thursday, Sept. 3, from the home of his son-in law, M. Beckstead, to Pleasant Valley Church and cemetery, Rev. T. C. Cassidy officiating. The pall bearers were Chas. Duval, Alvin Markell, Wm. Alguire, Eli Shaver, Samuel Morgan and Geo. Morgan.

GOLDFIELD.

Judson Droppo was in Finch on Tuesdao.

George Smith took in the Winchester fair on Sept. 9.

An electric and wind storm passed over this section on Sunday.

H. C. Clarke returned home on Monday, after spending a week in Uncle Sam's domains.

William Farrell of Mountain spent Saturday here. Silas Farrell of this place accompanied him home.

Miss Rose McMahon spent Tuesday in Cornwall the guest of her sister, who is training for a nurse in the Hotel Dieu.

Miss Jane Barkley who is visiting her parents in Williamsburg for a couple of days last week, has returned to resume her duties.

D Cramer of Aultsville is spending a few days with James Young.

Mr. and Mrs. Joseph McPherson spent Wednesday in Winchester.

Miss Christena Pearl Annable returned home to Winchester on Wednesday, after a vacation of two months with her uncle, Archie Gillies of our nook.

5,000 Cured of Hay Fever.

Instead of sending patients to the mountains, doctors are now prescribing "Catarrhozone." It relieves quickly and permanently cures Hay Fever.

All druggists sell Catarrhozone. Plenty to cure Hay Fever for $1.00.

Kingston Board of Health and Smallpox.

Kingston, Sept. 16.—The Kingston board of health is going to guard against a smallpox epidemic like Brockville had last winter. It has decided to notify the city council and board of education to enforce the provisions of the vaccination law, and ask the council for a larger and better smallpox hospital than the one now in use. There have been about ten mild cases of smallpox here since last spring, not one of which was ever vaccinated.

CANADIAN PACIFIC

EXCURSIONS

Sept. 17th, 18th and 19th.

Valid to return until Oct. 5th, 1908.

RATES FROM CHESTERVILLE:

A SHADOWED PATH;

Or, The Curse Of The Family

CHAPTER XXVII.—(Cont'd).

"To her death," replied Judith, "to how, when a note came summonig me to her side, he kept it back; to how, when a second messenger arrived, he would have prevented my departure by force; to how, I flew down to Brompton, and rushed in at the door, but was stayed on the threshold, and numbed by the words 'too late;' to how, ill, and wretched, and loathing, I was hurried from place to place, led still through the world by him.

"From country to country he dragged me; but at last we came home, to a sterner tyranny on his part, to a more irritating defiance on mine. You talked of hating authoresses, Mr. Gartmore; had I not been one, I should have died then. Shut out from all living sympathy, I made friends out of my pen and paper and talked to them, when, if I had not talked, my heart would have broken.

"It was during that period I finished a work which has since been successful, and it was with that, and a few trinkets, I fled from home one dreary winter night, and took my way to London."

"What made you leave him at last?" demanded Mr. Gartmore.

"Because everything I valued — every relic I possessed of hers — her Bible—a lock of her hair — all the dear mementoes I had hidden and cherished—he flung into the fire; because into the chamber where I had been weeping and praying, he brought angry words, and ungovernable passions. Do you see this?" she asked, taking up a mass of her luxuriant hair; "he retained a handful of it as a trophy when I fled from his house, lonely and desolate."

"And what did you do without friends or money, or——"

"I made all," she answered, "money, friends and home. I came to London, and fell sick. I was watched through my illness by Dr. Duvard. I made friends of poorly clad children, and care-worn women and struggling men. I wrote, and was successful. I achieved fame and did not value it; obtained wealth, and tried to make a good use of it. I found that the good one can do unto others does good to oneself. I found it possible to be content, if not happy, even on this earth, and had just made the discovery, when one day he laid a hand on my arm, and dispelled the vision."

"He, Mr. Mazingford?"

"My husband," she acquiesced. "Had I loved him, I would have poured out my heart's blood for his sake, but hating him as I did, can you wonder I refused to write for his pleasure?—that I would listen to no terms—believe no promises—consent to no arrangement? that I believed any pain would be light in comparison to the mental humiliation, and moral degradation of obeying his commands—that prisoner and captive though he kept me, I still had strength enough left to enable me to defy him?"

"And then," suggested Mr. Gartmore, as she paused, "what did he—what did you do then?"

"When I defied him to do his worst(I thought there could be no worse than what I had already experienced), he told me there were ways and means of bringing refractory wives to their senses; what was the way he adopted do you think?"

"I cannot tell; some diabolical device, probably——"

"He drugged me, one night; and when I came back to a consciousness of where I was, I found myself in a private lunatic asylum."

"The cursed villain!" ejaculated Mr. Gartmore, passionately; "well——"

"Oh! it was not well—it was ill," she returned. "How shall I tell you what I endured in that vile place? how shall I speak of that which is not past, which will never be altogether past in my memory? True, bodily, I felt nothing—for I suppose as both husband and doctor knew I was sane, they deemed it best to treat me as such. But the things I saw—the shrieks I heard—will never fade from my eyes—will never cease to ring in my ears, till I am laid in my coffin——

"I tell you, Mr. Gartmore," she added, with trembling lips, "that the power possessed by the Autocrat of all the Russias, is limited in comparison to that held by the owner of a private madhouse; and the man who ruled over the destinies of those wretched lunatics was less a man than a fiend! less a human being than a demon."

"Where was this place?" demanded Mr. Gartmore.

"At Crafton," she answered. "If I had not shrunk, like a coward, from the idea of detection, and dread of his vengeance—what an exposure I should have made long ago, of that den—but now I can think of no one but myself—my life is one eternal horror of detection. I believe if I were to see my husband, I should die. With health broken, and nerves weakened, and strength failing I sit here inactive."

When she had finished, her visitor turned to the fire and looked at the flame through a film, that caused it to grow dim and lustreless before him. Then, after a long pause, he raised his head, and said sharply, and as if indignant that any one had found the means to touch his heart:

"You have told me all this, to rouse my sympathies—to make me feel interested in you and yours—to soften me in order that you may mould me more easily to your wishes. You would not have spoken so freely, had you not had an object in view."

He uttered the words in a querulous, irritable tone. Judith received it as a real expression of his opinion; and accordingly, after favoring him for a moment with a contemptuous glance, she answered:—

"And what, oh, most wretched, miserable man, do you consider my object could have been? Do you think your hoards of useless gold can heal a broken heart—do you imagine any efforts or care, or help of yours, could soothe a broken spirit like mine? Mr. Gartmore, you are worse than foolish to let suspicions and doubts bar every avenue to your heart—but what are you to me that I should give myself the trouble of talking thus?" she said, abruptly checking herself. "I am sorry to have wearied you with the details of a story, which could not possibly interest you—farewell, sir."

She held out her hand to him, as with heightened color and sparkling eyes she concluded the foregoing peroration, and her visitor took it, though not in token of departure.

"Tell me what to do," he said; "you have spoken hastily and plainly, but I like you the better for it. The path you bid me take I will follow in this matter. Miss Crepton is, I presume, the girl I have so often seen crossing the hall with a parcel in her hand."

"I suppose so, but I have never seen her," answered Judith; "this is the note I have received from her; it was enclosed in one from Dr. Duvard, who appears to take an interest in her, whether for his own happiness or not, I cannot say."

Mr. Gartmore read the letter, and then said:—

"Now, what can I do in this business—how can I help her in these literary efforts?"

"By influence, if you have it — by money, if you have not," Judith answered.

"And what is your opinion of her talent?"

'Never having read a line of her writing except this note, I cannot judge, only I feel pretty certain had there not been something in her book, Mr. Larocca would never have promised to publish it."

"Even with your name?"

"Even with my name," acquiesced Judith; "but if you give the girl a 'start' she must then depend altogether on her own merits. It is merely the first getting into print which requires help — to pass through the publishing office is in literature the first step—once out, however, a work must stand or fall alone—for the reputation that is blown like a bubble, will burst like one also."

"True, acquiesced Mr. Gartmore, "and Doctor Duvard?"

"I will communicate with him."

'And if I take up this business, you must permit me to go through with it alone?"

"Unless you require my assistance, I shall never interfere by word or deed."

"Good—as for yourself, I suppose you do not wish Miss Crepton informed of who you are?"

"You need never mention my name in any way—you go to help her from yourself, not from me. I have now done with the business, and there is no necessity for me ever to appear in it again."

"And may I see you occasionally?" he enquired.

"I think you had better not," said Judith sadly. "I am safer knowing no one—seeing no one — talking to no one. The state of my health requires Dr. Duvard to visit me; besides, I can trust him implicitly."

"And can you not trust me?" he asked.

"You are more in the world I once was one of," she replied; "while he knows nothing of the people who formerly knew me—at least he knows none of them intimately. I could trust you thoroughly, but you live amongst a set that are certain of no secrecy of thought, no liberty of action. Servant and friend would be curious concerning your acquaintance—all things considered, I am better alone."

"As you wish," answered Mr. Gartmore; "but is there nothing I can do for you before I go? If you would like to sue for a separation —for a——"

"Too late," she cried despairingly—"too late. Did I not tell you man could not help me, nor woman neither—but God will. Not very far before me in the distance I see a separation such as you could never procure for me. It is coming slowly but surely. Let me only have peace and quiet till then."

Mr. Gartmore uttered no reply in words, but he held out his hand to the woman who spoke thus, and looked in her face with silent sympathy.

A long pitying glance, and earnest friendly pressure, and he left the room quietly, and sorrowfully.

For a few minutes he stood as if irresolute on the landing-place, and then having apparently made up his mind to some course of action, he commenced ascending the staircase, while Judith, after a pause, devoted to painful reflection, flung the spectre "self' once again into the shade—and taking up her pen wrote two notes are she retired for the night.

The first was to Doctor Duvard, and ran as follows:—

"Come to me to-morrow, and I will give you Miss Crepton's address. On my own account also, I want to see you. First, about disposing of the new work—second, concerning my health. I have finished my last work to-day, and lay down the pen for ever. I believe Miss Crepton is quite well; but if you have an interest in her, you can soon learn all particulars for yourself.

"Yours,

"J. M."

And the other was to Alice.

"Dear Madam,

"In reply to your letter of —— inst., which only reached this day, I shall be very happy to forward your views, if in my power. At the same time if you can do without an Editor I would rather not stand sponsor to your work, as it will hereafter prove more advantageous to you to have introduced yourself to the public than to have been introduced by any one else. Should you, however, fail in all other means of getting into print, you are at perfect liberty to make whatever use of my name you choose, and if such a step prove necessary you can show this note to Mr. Larocca as your authority for calling me the Editor of your book.

"You are entering upon a toilsome profession, but wishing you every success in your endeavors, and satisfaction in their results,

"Believe me,

"Yours truly,

"J. SPIERSON."

Folding both notes in a parcel, Judith sent them down to Mr. Gartmore, who posted the missives for her first thing next morning, when he sallied forth much pleased with the results of his interview with Alice on the preceding night, of which interview it may be well to speak in a fresh chapter.

CHAPTER XXVIII.

The fire was low on the hearth, and the solitary candle only dimly illuminated the apartments Alice Crepton called hers. Night was the time when phantoms born half of reality and half of ideality in that mysterious world lying dimly in the brain of poest, authors, musicians, and painters, came forth from their hiding places—walked across the narrow apartment, talked, looked, moved, and felt as they might have done had they been actual persons, and not the mere dream-like memories of experience, the spectres of fancy, or the ghastly forms of that awful shadowy train, lengthening at every step, which we all bear after us—the innumerable but never-forgotten departed.

Dull and dreary, by the cold, sober light of day, ten feet by twelve, poor, shabby, and mean; the moment a sort of lull fell on the heart of London; the moment the curtains were closed and the paper spread, and the pale face bent eagerly over the sheet, the scene seemed changed, as if by the wand of an enchanter.

Some write for fame, and some for vanity, and some—how few most of us could give a guess, for pure love of the art.

Alice, however, was one of the latter. Had a guinea never been likely to result from all her toil; had she known that not one of her works was ever destined to see the light of Heaven shining upon it in a bookseller's window, she would still have sat in her little room, conjuring up all sorts of strange forms, for pure love of their society. She was as true an artist as ever lived. Her heart—her soul—her purpose, centred in her books, and those who feel this are those alone who have the patent right direct from the hand of Nature, to go forth and tell what their mouth findeth to speak, to the remainder of their more practical fellows.

(To be Continued.)

Telling the truth accidentally is apt to be embarrassing.

About the Farm

TESTING QUANTITY AND RICHNESS.

A plan of testing dairy herds has been outlined in some detail by the Massachusetts Experiment Station. The cost is figured at from $2 to $6 per cow yearly, the variation depending mainly on the number of members who co-operate to make the tests.

In order to be profitable it is claimed that a cow should produce about 2,800 quarts of 3.5 to 4 per cent. yearly without forced feeding assuming the produce to be sold at the average prices received by shippers of wholesale market milk. If the cows are kept for creamery butter, each animal, it is asserted, must produce three hundred pounds of butter to show a satisfactory profit. It goes without saying that most large herds contain many animals that do not come up to this standard of profit and the cow-testing plan is intended to help the owner to weed out these cows without mistake.

It is advised to begin when the cow is fresh and weigh the milk for three consecutive days each month, recording the weight. The sum of the three days' yield multiplied by ten gives the amount produced for a month. Repeating this plan every month and year after year gives a record that is complete enough for practical purposes, and enable the farmer to know pretty nearly what his cows are doing in quantity of yield. A special milk-weighing scale can be bought at the supply stores for $3, although any spring balance can be used, setting the scale to allow for the weight of the empty pail.

To find the richness of the milk and the yield of butter is not so simple. It is advised to sample the milk of each cow on the second, fourth and seventh months, preferably about the middle of the month. The average of the three tests will fairly indicate the quality. These tests can be made at the nearest creamery, many creameries offering to do this work for patrons. Directions for taking samples for testing may usually be obtained from the creamery management. Dairymen who have the Babcock tester and materials can do the testing themselves.

HOG FEEDING EXPERIMENTS.

1. Considered from the point of gain per head per day, skimmed milk and blood meal produce very similar results when used as supplements to corn, when 18 pounds of skimmed milk is fed for each pound of blood meal; or on the basis of one pound of digestible protein in the form of blood meal.

2. The profit made during the entire experiment differs less than one dollar. From this data we concluded that blood meal and skimmed milk have a similar feeding value when fed on the basis of an equal number of pounds of protein, and as supplements to either old or new corn.

3. Hogs fed old corn made gains slightly in excess of the hogs fed new corn in the ear. The difference is so slight that we conclude that there is very little to choose between these two forms of corn as regards average gain per head per day.

4. Hogs fed old corn made a profit slightly in excess of hogs fed new ear corn.

5. There is no difficulty in using blood meal for hog feeding if it is fed with a small quantity of middlings or some other palatable food, exercising reasonable care to get the hogs started right and not to overfeed at any time.

6. Where a good market is offered for skimmed milk, a margin of $1.00 between the cost and selling price of the hogs is necessary in order that this by-product may form a part of the ration fed to fattening hogs.

FARM NOTES.

The pasture should be as carefully managed as the best hayfield on the farm, for it is one of the most profitable parts of the farm.

Someone has said that tillage is fertilization. This may not be literally true, but it is true that with intelligent and thorough tillage thin land will nearly always produce better crops than richer land with insufficient tilage.

If we can make our cheese and butter better than others we can sell it for more money than others do. The men who succeed put force, vim, push, energy and thought into their work, and they are evidences of the value of emphasis in farming. Competition is the emphatic man's opportunity. The greater the competition the more particular buyers become, and so the perfect goods go right to the top.

A majority of farmers, we think, have too many acres, and would make more money and do less hard work if a part of their land was sold and the money invested in improving the acres left. Is not the farm too large when it badly needs underdraining, and the owner has no capital with which to do it? When the stock is ill-bred, or the buildings poor and inconvenient, the owner cannot improve either without running in debt. Many farmers act as though they considered the great object in life to be to die possessed of many acres, while undoubtedly it ought rather to be to enjoy comfort as they pass along the journey.

WARSHIP OF A NEW TYPE

H. M. S. INDOMITABLE UNIQUE AMONG WORLD'S NAVIES

Britain's Sea Fighter a Combination of Dreadnought and Lusitania.

H. M. S. Indomitable is the idol of the hour. The record which she has established for warships on her passage from Quebec to Cowes will probably stand for a long time. Certainly it did not need the embellishments with which some of the papers tried to adorn it, says a London letter.

Taking the figures which suited them, they wished to make the official record a 25.1 knot passage. The King, however, has ordered that the passage shall be reckoned from land to land, from South Point, Belle Isle, to Land's End, and with this the average works out at 24.8 knots.

At one time for four consecutive hours she steamed 26.4 knots. Her average from Belle Isle to Fastnet, off Cork, was 25.13 knots. The average for the whole voyage from Quebec to Cowes was 21.4 knots.

During the whole time she was in wireless communication with one side or the other, sending and receiving messages at a distance of 1,600 miles and establishing a record for ship borne messages.

The true significance of these figures can be appreciated only in conjunction with a consideration of the class of vessel to which the Indomitable belongs. At present she is still unique in the world's navies, but she has two sister vessels just being completed for sea, the Invincible and the Inflexible. These vessels do not come under the designation of either battleship or cruiser.

HER ARMAMENT.

Except the Dreadnought there is no battleship in the world as heavily armed as the Indomitable and in no fleet in the world is there any vessel larger than a torpedo boat destroyer which approaches her in speed. She may be called a combination of the Dreadnought and the Lusitania and is more heavily armored than battleships of the Royal Sovereign class, which ten years ago were considered models of completeness in protection.

She has a belt of Krupp cemented armor, seven inches thick amidships, and carries eight 12 inch guns of a new and most powerful type, so mounted that they can all be brought to bear on either broadside. Each gun weighs 58 tons and fires an 850 pound projectile with an initial velocity of 3,010 feet a second. At 3,000 yards the shell can make a hole through 22 inches of wrought iron and at a range of nearly three miles can penetrate 17½ inches of iron.

These guns are carried in four turrets, protected with 10 inches of armor; are controlled electrically, working with the greatest swiftness, ease and accuracy.

By the end of the summer Great Britain will have three of these mighty vessels actually in the service, and in a couple of years the squadron of four will be complete, representing an expenditure of $29,000,000. Yet this enormous cost of more than $7,000,000 for each vessel is regarded as an economical expenditure.

The four ships of the Indomitable class will mount as many big guns as eight battleships of the older design, costing some $5,000,000 each. They will need only about half the number of officers and men, while the cost of repairs, general upkeep and stores will also, it is estimated, only amount to about half.

CAN MAKE 27 KNOTS.

The Indomitable was laid down by the Fairfield company at Govan in March, 1906, and launched late in March, 1907. In April, 1908, she was handed over for her trials. Full particulars of these have not been revealed. The contract speed was 25 knots, but it is believed that she actually attained 27 knots for a considerable period. Her voyage from Quebec shows that she can easily maintain more than the contract 25 knots.

Her displacement as given in the Navy List is 17,251 tons, but it is probable with the sinkage to deep load displacement due to maximum coal and storage supply—she took on 3,000 tons of coal at Quebec,, and carries oil fuel as well—that she has something like 21,000 tons. Her length at the water line is 530 feet, 30 feet longer than any preceding cruiser, her beam is 78 feet 6 inches, draught about 26 feet.

The eight 50 calibre 12 inch guns are mounted in pairs in barbette turrets. One turret is forward, another abaft, and the other two amidships, placed in echelon. With this arrangement they can all be fired on either broadside, or broad on the bow or quarter, and six of them directly ahead or astern. Other guns are said to be about sixteen 4 inch guns of the new model for anti-torpedo boat work.

The machinery consists of Babcock & Wilcox water tube boilers designed for 41,000 horse-power, with Parsons turbines.

The advantage of such vessels are too obvious to need detailing. The critics of the Indomitable allege the great cost of the class as a disadvantage, depriving the Admiralty of the power of constructing an adequate number of vessels for commerce protection. The new classes for smaller cruisers are supposed to give an answer to this objection, while the conditions of commerce defence are not held to exclude the Indomitable class from exercising a decisive influence in association with smaller cruisers.

"A MIRACLE IN WHEAT."

The Story of This Marvellous Wheat Is Not True.

This paper printed an article from the Saturday Evening Post about a wonderful new wheat which one Adams is said to be raising on his farm in Idaho. If the claims for this wheat were true it would revolutionize farming the world over, but so far as further investigation has brought out, they are not true. The Saturday Evening Post dispatched a thoroughly reliable man to Idaho to examine the wheat on the ground, and his wired report, which follows, pretty thoroughly disposes of this agricultural marvel:

"Assertions of huge crops or good flourmaking quality not justified. Adams' only claim of proportion of two hundred bushels an acre is with an eight of an acre patch two years ago. For last year admits farm average only thirty bushels. So far this year only twenty-five to thirty-five an acre. Offers excuses such as weeds and undersowing. Not true that wheat has been successfully grown elsewhere. Misleading to say frostproof, for admits some injury by snow. Flourmaking qualities unknown. Adams was given experiment station analysis last year and told with it that milling test was necessary to show the quality with certainty. Has not had the test. The wheat in appearance is much like certain large, coarse wheats not valuable for flour.

GETTING EVEN.

She had refused him, and he stood twirling his moustache and looking quizzical until she was in a tearing temper.

"What are you standing there for?" she demanded, stamping her foot.

"Well, I am wondering," he said, slowly, "whom are you going to marry, since you won't marry me."

"It's none of your business," she flamed, angrily.

'Oh, yes it is," he drawled. "At any rate, I'm interested. I shouldn't like you to marry a fellow I didn't think well of, you know since I came near marrying you myself."

It seemed to her that she should faint with indignation.

"You never came near marrying me," she at length managed to gasp. "I didn't think even of marrying you, and as to whom I do marry, you have nothing to do with it. I shall marry anybody I please!"

"That's just it," he returned, thoughtfully; "suppose you don't please anybody?" Then there was nothing left to her but raving hysterics.

When a rich man is seriously ill, he sees a lot of folks standing around waiting for his old shoes.

THE GREAT LONE REGIONS

TO BE ADDED TO QUEBEC, ONTARIO AND MANITOBA.

Quebec Gets Summer Resorts — Ontario Coal and Clay Lands— Manitoba a Navigable Harbor.

The great lone regions to be handed over to the Provinces of Manitoba, Ontario, and Quebec are terra incognita, even to most Canadians. Some details of the country from Government and other sources will therefore interest many readers. It will be seen from what follows that Canada possesses in the added areas vast stretches of territory with varied resources and possibilities similar in many respects to those developed in the Yukon, the Cobalt region, the prairie section, and the famous fertile belt of the Canadian West.

Ungava, which goes to the Province of Quebec, is a wild expanse of lakes, rivers, hills, and valleys, with scattered forests, practically unknown, except, in patches here and there, to explorers for timber limits and minerals, tourists, Indian hunters, and trappers. It is greater in extent than the Province of Quebec, itself, the area of which, without the addition of Ungava, is computed at 251,873 square miles. What this means may be gathered from comparison with the States of the Union. Texas, for example, the largest State in the Union, contains 265,780 square miles; Quebec is nearly as large as California and Colorado put together. When Ungava, with its 446,000 square miles and more, is tacked on to Quebec, three or four Provinces of the average dimensions of a majority of the States of the Union could, so far as area is concerned be carved out of the enlarged Province.

Ungava is bounded on the Atlantic side by the Labrador strip; on the north by Hudson Bay Straits, and on the west by Hudson Bay and James Bay. Much of the territory is rough, and a considerable percentage of the heavy timber has been swept away by fire, leaving possibly about half the surface within the tree limit carrying forest growth chiefly fit for pulp. Vegetables and grains are grown at various posts of the Hudson Bay Company, but the agricultural possibilities in many parts are not great; and there are wide patches of barren land. But in portions that slope toward James Bay the land is "very good," and will be of commercial value in the future, and the climate is "not bad."

UTILIZING WATER-POWER.

There are excellent water-powers in the rivers. Dr. Low, Director of the Geological Survey, in giving evidence on the subject before the Senate Committee, stated that the greatest water-powers in the Province of Ontario are small in comparison with those of Grand Falls, Hamilton Inlet, the head of which is on the Canadian side of Labrador. The waterfall at Grand Falls is a good deal larger than that at Niagara, having about nine million horse-power, none of which have yet been utilized.

The fisheries are excellent all through Ungava. Large lake trout, similar to those found in Lake Superior, and whitefish are very abundant, as also are brook trout in the rivers and smaller streams. Lake trout have been caught, weighing as much as fifty or sixty pounds, but the average runs about eight pounds. There are also landlocked salmon, as well as codfish in Ungava Bay, and the sea-run salmon are noticeably good. There are reindeer or barren-ground caribou in Ungava, and the woodland caribou. The best fur skins in the world are obtained on the Labrador side.

Dr. Low places a high estimate on the future commercial value of the Labrador iron ores. The Geological Survey has only explored about thre or four hundred miles of the surface of Ungava. Lead ores appear in the ancient rock on the east coast of Hudson Bay.

The galena so far discovered does not carry much silver. Copper has been found, as well as a conglomerate very similar to that around Cobalt, but as regards gold there is not as yet much practical information. There is some mica and asbestos. Dr. Bell, late acting director of the Geological Survey, in a report on this region, said: "All around James Bay, and on the eastern coast of Hudson Bay" (in Ungava, now to become part of Quebec), "there are numerous indications of iron and coal so close one to another that by taking advantage of the cheap means of transport afforded by the navigation in these localities the whole country around James Bay might become another Pennsylvania." Inexhaustible quantities of magnetic iron have been located in the islands bordering the eastern coast of James Bay and also most promising signs of galena. Gold, silver, and copper are there, and quantities of lignite.

Dr. Low says Ungava's climate generally is "fairly cold," even in the summer time. The spring lasts longer than in the settled regions of Canada and the United States. The summer, such as it is, begins "some time in June," and it ends about the first of November. There is a marked difference in the climates of the northern and southern regions respectively, and frost every month of the year in some localities in both the northern and southern territory, except on the east shore of James Bay near the Quebec boundary and a few miles inland, where the temperature rises at times to 80 and 90. In a report to the government of Quebec on Ungava it is stated that the temperature at James Bay is more equable than in the interior. Many large rivers from the south empty their waters into the bay, the southern division of which is shallow for a considerable distance from high water mark, the result being that the water in this portion is seldom cold in summer. The effect produced on the climate by such a vast extent of water with a temperature described as relatively lukewarm, is that "vegetation has never been spoiled by an untimely frost." The country subject to this influence everywhere exhibits exceptional productiveness."

To Ontario will be added all the territory lying between the new western line of Quebec and the new eastern line of Manitoba, comprising the southeast end of the immense territory of Keewatin. The annexed territory will carry the Province up the west coast of James Bay and along the south shore of Hudson Bay for some distance, thus including the region "around James Bay," shared in part with the Province of Quebec, which Dr. Bell in one of his survey reports declared "might become another Pennsylvania." The question of the undeveloped mineral wealth of this region is dealt with by various authorities, official and unofficial, at great length, but the above will perhaps serve the present purpose.

PRAIRIES AND DEEP CLAY.

A great expanse of land within the extension of the northern boundaries of Ontario is practically a prolongation of the fertile prairies of the Northwest, the chains of hills intersecting it forming but a slight proportion of the whole region, the remainder of which is declared to be mostly a deep and fertile clay, extending far and wide toward the northwest and the north. The testimony of missionaries and Indians who have traversed the region between the Rockies and Hudson Bay is cited as conclusive on this point. Nothing more beautiful lies in the fertile belt between Manitoba and the Rocky Mountains, it is asserted, than in the parts extending east from Manitoba to Lake Temiskaming, and missionaries and the Indians claim that similar areas stretch northwest and north for hundreds of miles.

Manitoba gets the whole of the great Keewatin region that lies west and north of the eastern strip of the territory which is comprised in Ontario's extension; and south of a line continued east from the north line of the sister Provinces of Saskatchewan and Alberta to Hudson Bay. This turns over to Manitoba the coming port of Fort Churchill, which is to be the northern terminus of the projected Hudson Bay Railway. Keewatin extends from the Arctic seas southeast down as far as the present north line of Ontario, and is computed to contain 470,416 square miles of territory. The latest official map shows that some nine or ten-twelfths of it have never yet been prospected except along some of the principal rivers. Consequently very little is really known about the interior and far north beyond the fact that it is a great hunting and trapping ground for the Indians, and contains within the explored tree limits forests of timber and stretches of more or less fertile land with good indications of minerals and very extensive water-powers. Where there are Hudson Bay posts, garden truck in a general way is found to flourish and good crops of grains are produced. Gold has been discovered and copper and iron pyrites, some containing small deposits of gold. A good deal of the country prospected from the rivers is already known to be fit for agricultural pursuits side by side with much that is rocky or swampy and unfit. In the southern parts the climate, so far as ascertained, seems as a rule, fairly good and suitable for settlement. Summer frosts are said to be rare, and the official reports express the opinion that settlers south of the Nelson River would not be likely to encounter more difficulty in that respect than in any settled part of the Northwest. The summer there is described as probably equal to that of Saskatchewan. The length of the summer days is an advantage. There is more sunlight during the summer than is experienced in Ontario or other points farther south, and that is pronounced a distinct help to the vegetation of the country.

Take it altogether, the enlargement of the boundaries of the three Provinces marks a stage in Canadian development that must inevitably be followed by good practical results. So far as extent is concerned, the three Provinces will be able to stand carving up into eight or ten when the population and business justify its being done.

SOURCES OF THIS ARTICLE.

The sources from which the above information is summarized are mainly official. They include the synopsis of evidence taken before a select committee of the Senate of Canada in the session of 1906-7, published under the direction of that indefatigable authority on Canada's northern domains, Mr. R. E. Young, D.L.S., Superintendent of the Railway Lands branch of the Department of the Interior, and edited by Captain Ernest J. Chambers, Gentleman Usher of the Black Rod of the Canadian Senate; the invaluable reports of Dr. Low, director, Geological Survey; and Dr. Robert Bell, former acting director, Geological Survey; the National Transcontinental Railway report on the resources of the country between Quebec and Winnipeg, compiled by Dr. H. M. Ami of the Geological Survey, and reports of missionaries to the Quebec government.—M. O. Scott, Colliers.

SNIPS AND SNAPS.

Few things are as good as we expect them to be.

An ignorant man owns a deep well of happiness.

Dame Rumor usually has a large circle of friends.

Matrimony is a good school in which to learn meekness.

Skilful men usually know how to disguise their skill.

For a row, one weak girl and a piano take some beating.

Neither a song nor a sermon is as appetizing as a loaf of bread.

Put a little more in than you take out, and your purse will soon fill.

A thing is not valuable to some men unless they pay a big price for it.

A spice of danger is a warning to some folk, and an invitation to others.

Being good may be monotonous, but so are most profitable employments.

Motor-cars aren't in it with gossips when it comes to running people down.

The man who does his best and says little about it is the man to be friends with.

Most of us talk better when we are complaining than when we are praising anything.

FROM BONNIE SCOTLAND

NOTES OF INTEREST FROM HER BANKS AND BRAES.

What is Going on in the Highlands and Lowlands of Auld Scotia.

A Glasgow boy of 11 has caught an 18 pound salmon with a trout cast at Kildonan.

At the Lammas lamb sales at Newton St. Boswells recently, 30,000 lambs were presented.

Recently Gatehouse water supply got poisoned by dead trout in the dam, and gave the folk a scare.

During the fair week 634 drunks were dealt with in Glasgow—considerably fewer than usual.

Lord Curzon is to deliver the next inaugural address of the Edinburgh Philosophical Institution on 20th October.

The mortality in Edinburgh during the week ending 1st inst., was 86, equal to an annual death rate of 12.74 per 1,000.

Showers of snow fell on Ben Nevis on Aug. 10th, and the upper reaches of the mountain were freshly coated next day.

The Royal Infirmary, Edinburgh, has received $25,000 more from the estate of the late Miss J. M. Arnott of Chapel, Fife.

Recruiting for the Kirkcudbright battery of Royal Field Artillery has been carried on very steadily, and the strength is exactly 100.

Miss Main, aged 15, while cycling down a steep thoroughfare at Banff, lost control of her machine, collided with a wall, and was killed.

William Nicol, flesher, Thurso, has to pay for a cow bought in open market, killed same night, and the carcase condemned next day for tuberculosis.

A large and richly-carved memorial cross in silver-grey granite to the memory of the late Lochiel, twenty-fourth chief of the clan, has just been completed at Inverness.

At a hotel in Aberdeenshire all boots put out to be cleaned are blackened; even yellow or tan-boots return blackened if their wearers don't keep them inside their bedrooms over night.

Nairn games, now the principal athletic event of the north, were held in glorious weather, when a record crowd, estimated at over 20,000, was present, including many notable personages.

A cow belonging to Mr. Parker, Meiklelaught Farm, Saltcoats, gave birth to a still-born calf, which had eight legs, four ears, two tails and one eye, but had neither mouth nor nose.

While Kate Laing, aged 10, Glendymill, Glenfarg, was standing in front of the kitchen fire, her pinafore became ignited, and she was immediately enveloped in flames, dying soon after.

It is proposed that the general line of the roadway at Ayr Auld Brig is, as far as possible, to follow the line of the old roadway, the new general line to be slightly varied to suit the stonework of the bridge.

The trustees of Burns's Cottage at Alloway have just added by purchase to their memorials of the poet a splendid copy of "The Brigs of Ayr" in his own handwriting. It is on eight pages of foolscap, and is in beautiful condition.

People can depend only on themselves—and a good many people can't even do that.

Duncan M. Stewart is Said to be Missing.

Montreal, Sept. 11.—A warrant has been issued for the arrest of Duncan M. Stewart, late general manager of the defunct Sovereign bank and today High Constable Bissonette is searching the city for him but so far without avail.

Stewart is charged with issuing false returns to the government and the present action has been instituted by the Dominion finance department at Ottawa The charge is that in March and April Stewart sent returns to the government which were false

George Watson, K. C. of Toronto, has been instructed to look into the matter. Up to within a few days ago Stewart was believed to be living with relatives in the city. Today he was not to be found, and it is thought that he has left for parts unknown.

Hamilton consumed 228,856,230 gallons of water during August.

Sir. C. H. Tupper is laid up from a spider bite inflicted at Banff.

Four prisoners escaped from Brantford jail.

FIRE IN A TUNNEL.

Two Hundred Men Caught But Only Two Perished.

Windsor, Ont, September 15.—Two huudred men wera trapped in the Michigan Central tunnel on this side of the river by a fire which started from some unknown cause last midnight along the heavy timbers in the shaft filling it with a dense, suffocating smoke. All but Walter W. Kimball a night superintendent, of Windsor, escaped. Kimball reached the surface in safety but returned to aid others and was lost in the blinding smoke. He has been married only two months. Many men fell in the wild rush for the surface following the alarm of fire, overcome temporarily by the smoke, but were assisted to safety by others. Three of the tunnel men were seriously affected by smoke but were brought around. One man man who lost consciousness was Charles Cakebread, of the Windsor fire department. The fireman rushed bravely into the shaft but the smoke was too dense to exist in, and after he fell, they had to withdraw until the shaft was cleared of smoke by turning on full air pressure and expelling it. The shaft was nine hundred feet long The fire started about 150 feet from the mouth. The working force was 300 men, but, fortunately, 100 had just gone to the surface for lunch. The property loss will be only a few thousand dollars and it will not in any way impair the tunnel work.

Later—A second death as a result of the fire has developed, the victim being Burt Johnson, aged 22 years, single, a laborer.

Succeeds Prof. Shortt.

Kingston, Sept 11.—Mr. O. D. Skelton, M.A., Ph.D., has been chosen to succeed Prof. Shortt in the Sir John Macdonald chair of political economy in Queen's University. His appointment will be ratified by the Trustee Board at its meeting next month. Mr. Skelton hails from Mille Roches, near Cornwall. He graduated as master of arts at Queen's, being a medalist in classics. While acting as classical tutor he took up political science work. He then went to Chicago, where he toor the degree of Ph.D. in political economy, with honors. Afterward he studied in England. On his return he occupied an editorial position on the Book Lovers' Magazine, and remained with that periodical until it ceased publication. Then he returned to Chicago University, and was for a time press agent in Harper's office. He gave up that position to return to Queen's as assistant to Prof. Shortt. Mr. Skelton has written a great deal for political science journals. He has had several United States offers, including one from the University of Chicago, but decided to remain at Queen's. He is highly recommended by Prof. Short, to whom he owes his present appointment.

His assistant will be Mr. W. W. Swanson, M.A of Queen's, who is also a Ph D., graduate of Chicago University and at the present a tutor there; Satisfaction is expressed that two young Canadians, both Queen's graduates, have been found right at hand to succeed such an eminent Canadian as Prof. Shortt.

Prof. Shortt leaves on Monday for Ottawa to assume his duties as civil service commissioner.

Jailers Must be Vigilant.

Hon. W. J. Hannah has ordered a close season in the provincial jails.

"In future whenever the escape of a prisoner is due to carelessness on the part of a jail official, immediate suspension is to follow."

Such is the warning issued from the provincial secretary's office in view of the too frequent forcible freedom adopted by prisoners of late.

Hilbert Hinnegan, turnkey at Sarnia, has been dismissed for disobeying rules and regulations, a prisoner having escaped from a corridor there three weeks ago.

J. M. Rogers, K.C., of Perth Dead.

Mr. J. M. Rogers, K.C., a leading member of the profession in the town of Perth, died yesterday after a few days' illness. The funeral will take place Friday afternoon. Mr. Rogers was the present reeve of Perth, an ex-mayor of the town, and an ex-warden of the county. The deceased leaves a wife and five children.

London cleared $1,000 on this year's Old Boys' re union.

Brantford citizens are agitating for permanent pavements.

The Woodstock police authorities are making a dead set on the tramp fraternity.

OUR NATIONAL DANGER.

Time to Cry a Halt Before Complete Wreck Results

There are thousands, both men and women, who do not take time to eat properly. They rush through life, and as a result we have an age of indigestion, nervousness, irritability, sleepless nights and morose disposition. Our national danger is stomach weakness, due to the strenuous life.

Mi-o-na tablets strengthen the walls of the stomach and stimulate secretion of the digestive juices. They make the stomach comfortable and cure indigestion.

Sick headaches, palpitation, yellow skin and coated tongue are a few of the many distressing results of indigestion that Mi-o-na never fails to cure.

W. G. Bolster sells Mi-o-na in 50 cent boxes, and guarantee to refund the money if it does not give complete satisfaction.

Dairy Convention at Prescott Next.

At a meeting of the executive of the Eastern Ontario Dairymen's Association held in tha Rossin Hoose, Toronto, on Tuesday, it was decided to hold the next annual convention in the town of Prescott on January 6, 7 and 8, 1909. There were three or four applications for the convention, one came from Perth another from Cornwall, and one each from Brockville and Prescott. Brockville and Prescott each offered to grant a donation of one hunred dollars, provide free hall and sufficient accommodation. Perth and Cornwall offered no inducements. Prescott sent up a deputation, namely, the president of the Board of Trade, Mr. Evanson, and Councillor Elliott; Brockville was represented by Messrs. D. Derbyshire and R G. Murphy, both members of the association. The majority of the executive were in favor of holding the convention at Prescott and it was finally decided to go there. Chief Supt. Publow said that Prescott had the accommodation. They needed instruction and it was the duty of the association to hold the convention where it would do the most good. Mr. J. H. Singleton said he would like to have seen the convention held at Smith's Falls or even farther east, but as Prescott was seemingly the only town making a strong bid for it, he would favor holding the convention there. He deplored the fact that so few farmers from the immediate vicinity attended the convention when it was held at Brockville.

Killed by Natural Gas Explosion.

Brantford, Sept. 12.—Three deaths have resulted from the natural gas explosion which wrecked nine buildings and caused damage to the extent of $50,000. Albert Holstock, aged 26, Joseph Blayborough, aged 25, and the two year-old child of Mrs. Horning died in the hospital. Mrs. Horning and another child are in a crital condition.

Alex Gardner, of Lake Vernon, near Huntsville, was killed by being struck by the tongue of a threshing machine.

Henry Cannon, held on a charge of forgery, made his escape from Barrie jail, but was recaptured in the railway yard.

The office of T. H. Eastabrooke, tea merchant, St. John N.B, was robbed before daylight, and $530 stolen from the cash box.

Decrease of customs dues at Montreal for the first five months of the year show a decrease of nearly two and a half million dollars.

"Never enter a barrom," was the advice of Dean Mathieu to the students at the opening of the fall session of the law faculty of Laval university.

Though the Vancouver police were in readiness, the anti-Asiatic rally on the anniversary of last year's riot parade was a very tame affair. The hall was about half full and not demonstrative.

The Montreal Engineering company has asked the Calgary council for a 25 years' franchise for a street railway, the line at the end of the period to be turned over to the city at its actual value.

James McCresney, who escaped from Kingston asylum in June and had been hiding in the woods around Rowmanville ever since, has been recaptured by Constable Jarvis. He had fifty dollars on him.

The building trade of Montreal has picked up. Last month the permits totaled 146, representing a value of $691,250, as compared with 119 permits. in the corresponding month of 1907, and a value of $411,935.

Ontario postmasters are uttering a protest against the preseat scheme of their salary increases. They think that instead of an increase being based on the percentage of outgoing mail alone, it should be based on all the mail handled.

County Constable Pickard, of Hamilton, has met with a magnificient reward for assisting to recover a roll of notes, value $175. The money was lost by a young farmer named Swazey, and was found by two boys lying on a rubbish heap on the Swazey farm. Only $141 was recovered, the rest having gone in various ways. For his share in investigating the case the constable was rewarded 50 cents.

NERVOUS DEBILITY

OUR NEW METHOD TREATMENT will cure you and make a man of you. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and ulcers heal up; the nerves become strong as steel, so that nervousness, bashfulness and despondency disappear; the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and mental systems are invigorated; all drains cease—no more vital waste from the system. The various organs become natural and manly. You feel yourself a man and know marriage cannot be a failure. We invite all the afflicted to consult us confidentially and free of charge. Don't let quacks and fakirs rob you of your hard-earned dollars.

☞ NO NAMES USED WITHOUT WRITTEN CONSENT.

THREATENED WITH PARALYSIS.

BEFORE TREATMENT

AFTER TREATMENT

Peter E. Summers, of Kalamazoo, Mich., relates his experience:

"I was troubled with Nervous Debility for many years. I lay it to indiscretion and excesses in early youth. I became very despondent and didn't care whether I worked or not. I imagined everybody who looked at me guessed my secret. Imaginative dreams at night weakened me—my back ached, had pains in the back of my head, hands and feet were cold, tired in the morning, poor appetite, fingers were shaky, eyes blurred, hair loose, memory poor, etc. Numbness in the fingers set in and the doctor told me he feared paralysis I took all kinds of medicines and tried many first-class physicians, wore an electric belt for three months, went to Mt. Clemens for baths, but received little benefit. While at Mt. Clemens I was induced to consult Drs. Kennedy & Kennedy, though I had lost all faith in doctors. Like a drowning man I commenced the New Method Treatment and it saved my life. The improvement was like magic—I could feel the vigor going through the nerves. I was cured mentally and physically. I have sent them many patients and will continue to do so."

CURES GUARANTEED OR NO PAY

We treat and cure VARICOCELE, STRICTURE, NERVOUS DEBILITY, BLOOD AND URINARY COMPLAINTS, KIDNEY AND BLADDER DISEASES and all Diseases peculiar to Men.

CONSULTATION FREE. BOOKS FREE. If unable to call write for a Question Blank for Home Treatment.
