HENRY'S Shorthand School Ottawa, Ont.

No School in Canada offers a better training, or ensures a more successful future. Henry's leads all others, and ranks among employers as "THE SCHOOL OF HIGHER EFFICIENCY"—a fact borne out by more than 600 pupils who have, since January, 1913, left other Ottawa schools to come to it.

Therefore, it is not surprising that business men, in advertising for stenographers, should specially say, "Graduates of Henry's School preferred."

For particulars about our course, apply to:
D. E. HENRY, Director.
62 Bank St.

Buildings Burned at Crysler

Shortly after ten yesterday morning fire of unknown origin starting in the attic of Thomas Boisclair's residence quickly spread to the home of Mrs. E. Cardinal, and both were destroyed. Oscar Dignard's livery barn and other buildings nearby caught fire but only suffered slight damage. Assistance from Finch and other nearby places helped save much damage as the whole village seemed doomed.

When Oxen Furnished Power

It's a long, long cry back to the days when oxen were used to till the fields in this district, back more than fifty years ago, but a trace of these sturdy forerunners of the horse has been found by Oscar Foster, on his farm a mile west of town on the Ridge road. While working the ground Mr. Foster turned up what he thought was a broken horseshoe but which proved to be one half of an ox shoe. Edward Foster, father of the present owner, was the first settler on this farm. He cleared the land and sowed the first crop. Although Oscar does not remember when his father kept oxen, the shoe was in all probability dropped by one of the pioneer's animals while working in the fields.

Oxen shoes were in two pieces, one piece being fitted to each part of the hoof. The specimen brought to The Record Office has a caulk at the toe and heel and a protruding flat part on the inside which was brought to bear on the bottom of the foot.

IN MEMORIAM

In loving remembrance of my dear sister who passed away May 21st, 1929.

I often sit and think of her
When I am all alone,
For memory is the only thing
That grief can call its own.

Sweet memories linger forever,
Time cannot change 'tis true,
Years that may come cannot sever
My loving remembrance of you.
Ever remembered by her sister,

BUTTERMILK

Buttermilk may be purchased at any time from McElheran's Dairy at six cents per quart. 29

Insurance

EVERY MAN who wants to protect his own interests on the busy highways of to-day with the Highway Traffic Laws as they now are, knows he cannot afford to be without insurance on his automobile.

We represent good reliable companies and can write your fire or automobile insurance, and our rates are right.

BASEBALL MEETING

A meeting for the re-organization of the baseball club will be held this evening at eight o'clock in the sample room of the Flynn Hotel, for the purpose of disscussing the situation and electing officers for this season. It is understood that Mountain, Winchester, Morewood and Chesterville will make up the circuit, but affiliation with the Eastern Ontario division will not be effected. It is hoped that all interested in baseball will be present on time.

Wilbern Ball, Maple Ridge, Died on Saturday

On Saturday afternoon, May 16th, there passed peacefully to rest after years of ill health a well known and much respected farmer, in the person of Wilbern Ball. He spent his whole life of fifty-seven years on the farm where he died. He is survived by his widow, one son, Sheldon, and one little granddaughter, Ileen Ball.

The funeral, which was very largely attended, was conducted at the home by the family pastor, Rev. Newman, on Monday afternoon, May 18. He was laid to rest by four neighbours, namely, Sam Fulton, John Allison, Spearman Fawcett, and Archie Black, by the side of his father and mother, Mr. and Mrs. Allen Ball, in the family plot in Maple Ridge cemetery.

Peacefully sleeping, resting, at last,
Life's weary days of suffering are past,
Peacefully sleeping far away on that shore,
Called by our Saviour to suffer no more.

BORN

Sanders—At Passadena, Calif., on Friday, May 8th, to Mr. and Mrs. Jack Sanders, a son. (Donald Keetch.)

Staples—At Toronto, on Saturday, May 16th, to Mr. and Mrs. W. E. Staples, a daughter.

Ditched on Ridge Road

Sunday afternoon when Mr. Alf. Harradine with his son Donald, accompanied by his mother and father, Mr. and Mrs. A. Harradine, Florence Harradine and Gwelda McGillvray, of this place were returning from Ottawa their car was side swiped on the Ridge Road by another going in the opposite direction and put in the ditch, but fortunately remained upright. All received severe shaking-up and Mrs. Harradine sustained bruises to her face. The car was not damaged other than where struck at the rear mud guard. They were assisted out of the ditch by the car that struck them.

Bowling Opens Victoria Day

Having taken full advantage of the weather conditions the bowling green has been put in first class shape with almost a month's work on it, and is now in better shape than in any previous year at this time. On the holiday, Monday next, all interested in the sport, whether experienced or just a bit interested in it, are invited to the greens at two o'clock to enjoy an afternoon's bowling. Prizes will be competed for and a good turnout is looked for.

Mrs. Jane Baker, Crysler, Died at Home of Daughter

There passed away on Saturday, May 16th, at the home of her daughter, Mrs. Walter Coulthart, Morewood, one who was highly respected in the person of Mrs. Jane Baker.

The deceased was born at Mariatown, Matilda township, February 3, 1844, soon after going to Crysler with her parents, the late Peter Crysler and Maria Coughler. In 1861 she was united in marriage to Leonard Baker, also of Crysler, who predeceased her 35 years ago. Of this marriage were born nine children, six of whom survive, namely, Messrs. Lennox and Charles Baker, of Cannamore, Mr. Oliver Baker, of Mountain; Mrs. Walter Coulthart, Morewood; Mrs. Geo. Cheney and Mrs. Wm. McKendry, of Russell. She also leaves to mourn her loss two sisters, the Misses Rachel and Margaret Crysler, of New York State, forty-six grandchildren and six great-grandchildren.

The funeral service was conducted at the home of her daughter, Mrs. Walter Coulthart, by a former and much beloved pastor, Rev. J. M. Kellogg, of Vernon, who took for his text that old and comforting passage, "Come unto Me all ye that labour and are heavily laden and I will give you rest." He was assisted by Rev. A. Nimmo, of the Presbyterian church, Morewood, and Rev. R. W. Armstrong, of Morewood United church. The hymns were favourites of the deceased, No.'s 410, 412, and 795 from the Presbyterian Book of Praise.

The pall bearers were six grandsons, Hugh Coulthart, Allen Cheney, Cecil McKendry, Clifford, Stanley and Carson Baker. The flowers consisted of a wreath from the family, spray, Mr. and Mrs. Elgin Finlayson; spray, Kenneth and Walter Bush, Lois Finlayson and Arnold Swerdfeger, great-grandchildren; cut flowers, Mrs. Walter Steven.

Interment was made in Crysler cemetery.

Riverside

A number from here attended the farewell for Mr. and Mrs. Jas. Killoran and family at Berwick who are moving to Cornwall. Our loss is Cornwall's gain.

Mr. and Mrs. Dan Pollock visited friends in Morrisburg on Friday of the past week.

Mr. and Mrs. Fay M. Droppo and Thelma, Mr. and Mrs. L. B. Shaver and family, Mr. John Shaver, Mr. Bruce Shaver and Mr. Gordan Bogart were week end visitors at the home of Mr. R. C. Bogart.

Miss Jane McMillan, of Sandtown, visited at the home of Mr. A. D. McMillan during the past week.

Mr. and Mrs. Dan Pollock and Milton spent Sunday evening with friends at Avonmore.

Mrs. Donald McPherson spent the week end with Mrs. Ranald Murphy.

Miss Margaret Grady and Mr. Bernard Grady visited Mr. and Mrs. Geo. McMahon at Chesterville Thursday.

Cedar Grove and Hoasic news letters have been unavoidably left over.

Young Couple Honoured

The home of Mr. and Mrs. Archie Black was the scene of a very pleasant gathering on Tuesday evening when a number of friends and neighbours gathered to pay a tribute of respect to Mr. and Mrs. Orlin Barkley after the return from their honeymoon. The early part of the evening was spent in games and music.

At eleven o'clock Rev. A. H. Sproule invited the bride and groom to come forward when Mr. Leon Marcellus read an address and a silver tea service from the staff of the Nestlé's Food Company, of which the bride was an office employée, was presented by Miss Florence Cramer as well as two beautiful fibre chairs from friends and relatives by the Misses Hilda Bailey and Kathleen Bogart. The bride was the recipient of other gifts.

Mrs. Barkley replied in a brief way thanking them for the presentation, after which the party sang "For They Are Jolly Good Fellows." A dainty lunch was served by the young people and the merry group dispersed wishing Mr. and Mrs. Barkley happiness and prosperity through life.

Nice Job; Nice Salary, And Then Some

Ottawa.—A draft copy of the bill to authorize creation of a new tariff board, given first reading in the House of Commons Friday, indicates the salary arrangements for the three members. The chairman will be paid an annual salary of $12,000 and the other two members $10,000. Each member is to hold office for ten years, unless removed for cause, but shall be retired when he reaches 70 years of age. At the end of the 10-year period members shall be eligible for reappointment if not disqualified on account of age. No member of the board may be a member of the House of Commons within two years of his retirement.

On retirement a member of the board is to receive an annuity equivalent to one-fifth of the annual salary if he has served at least five years, and one-quarter of the annual salary is he has served ten years.

The secretary of the board is to receive a salary of $6,000 a year and is to be retired at 65 years of age under the Civil Service Superannuation Act. The members of the board, the secretary and all employees are to reside in or near Ottawa.

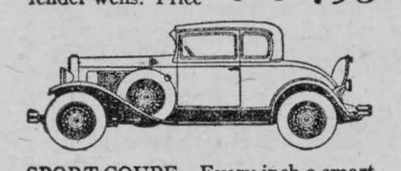

Chevrolet presents Twelve Attractive Models

Heber Hooks Dies After Short Pneumonia Illness

(Oneonta Herald, May 11)

Heber Hooks, of 54 River street, well known throughout this vicinity through which he travelled as the representative of the Tide Water Sales Corp., died at his home Saturday evening at ten o'clock following a six days' illness with pneumonia which was complicated the last day by a severe attack of asthma to which Mr. Hooks had been subject for many years.

As an unusual coincidence, yesterday morning Mr. Hooks received a telegram notifying him of the death of his brother, John W. Hooks, which occurred at Dansville Sunday morning at nine o'clock after a short illness Neither had known of the illness of the other, and the notices of death were probably delivered within a few minutes of each other.

Funeral services were held Tuesday afternoon at two o'clock from his home on River street, conducted by Rev. George H. Phillips, of the First Methodist Episcopal Church. The Masonic fraternity, of which Mr. Hooks was a member, assisted in the service. Interment was made in Glenwood cemetery.

Heber Hooks was born at Shenandoah, Pa., December 28th, 1876, the son of Charles and Susan (Hitchings) Hooks. There he married Laura Powell in 1895. They moved to Pottsville, Pa., in 1897 and that was their home for about 20 years, Mr. Hooks going to Chesterville, Ontario, Canada, in 1917 for the Nestlé's Food Company. He came to Oneonta with the Nestlé's Food Company in 1921 and was engaged here with them for about a year. He later was employed by Daniel Franklin and Daniel Robinson of this city and for two years served the Empire State Oil company.

About six years ago he engaged in the restaurant business at Schenectady, but for the past three years had represented the Tide Water Oil Sales corporation in the Oneonta territory. He was a man with wide circles of friends and keenly devoted to his wife and family. He was a member of Oneonta lodge, F. & A. M., Oneonta Aerie of Eagles, and of the Pottsville, Pa., Patriotic Sons of America.

Surviving are his widow; three sons, John Hooks, of 1 Jefferson avenue; Albert Hooks, of 518 Main street, and Kenneth Hooks, who resides at home; one sister, Mrs. Mary Hughes, Pottsville, Pa.; one brother, Fred Hooks, of Shenandoah, Pa.; and six grandchildren. To them the sympathy of hosts of friends is extended.

Health Service

Prepared by the Canadian Medical Association.

HAND TO MOUTH

Of all the diseases which afflict mankind, by far the largest are due to bacteria, or disease germs—our invisible foes.

They are invisible to the naked eye but are revealed by the microscope. They have been studied, and the habits and characteristics of some of them are well known. They have their individual peculiarities whereby they differ one from the other; some go singly, others in pairs; some are oval, others are rod-shaped; one likes one kind of food better than others do; and so the list might go on to a great length. While disease germs differ one from the other, they have points of similarity. For instance, they must get into the body if they are to cause disease, and most of them find their way in through the mouth. Another point which they have in common is that they are unable to withstand drying or sunshine. As a matter of fact, they die off fairly quickly outside of the body. To exist, they need moisture, warmth and darkness.

It is obvious, then, that it is desirable to keep disease germs from passing between our lips into the dark, warm, moist interior of the body where they have every opportunity to cause mischief.

One frequent way for this to happen is when the germs we have picked up on our fingers and hands get into our mouths because of the habit we have of touching our lips, of putting the fingers into the mouth, or of touching food with unwashed hands.

A considerable amount of disease is a hand-to-mouth affair. As we go about our daily routine, our hands are certain to become soiled. We shake hands with a person who has just coughed or sneezed behind his hand, or who has used his handkerchief that is soiled with secretions. We touch numerous articles which have been touched by other people with hands soiled by their body secretions. As our hands are usually warm and moist, these conditions favour the existence of the germs.

It does not matter if germs are on the hands as long as they stay there. The unbroken skin is a barrier to germs. The danger lies in introducing any germs which may be on the hands into the mouth or nose. This danger can be avoided if we make it a point never to put our unwashed hands to our faces, excepting when using a handkerchief, and never to touch food unless we have thoroughly washed our hands.

No matter how clean they look, the hands should always be given a thorough washing before meals or before preparing food, and they should be wiped on the person's own towel only. It is quite as dangerous to use a common towel as it is not to wash at all.

Questions concerning Health, addressed to the Canadian Medical Association, 14 College Street, Toronto, will be answered personally by letter.

"So he married the widow! I thought he had his eye on the daughter?"

"So he had, but the widow had her eye on him."

Willie: "Pa, what's a garden plot?"

Father: "The bugs and worms planning to eat up your stuff."

SUMMER HOMES

should have this FIRE PROTECTION

FAR from every hope of aid if a blaze takes hold, the inflammable construction of the average summer home makes it a source of danger and anxiety.

Minimize the fire hazard by lining inside walls and ceilings with inexpensive Gyproc Wallboard that *does not burn.*

This building material is made from gypsum rock into sheets 4 to 10 feet long, 4 feet wide and 3/8 of an inch thick. It nails and cuts as easily as lumber and with minimum waste.

Find out from your dealer how inexpensive Gyproc is; how easy to erect. Ask him for full information about its application or request a direction sheet from him.

Besides being fire-resistant, Gyproc has structural strength and insulation value. It is also draught and vermin-proof.

By panelling, you can save the expense of decoration, yet Gyproc is an excellent base for Alabastine, Gyptex or wallpaper.

RAPID WORK

WHO WOULD THINK, to look at a big railway locomotive, that it could by any possibility be put together in less than one day? London Engineering described in detail the accomplishment of such a feat. It was done at the Stratford works of the Great Eastern Railway of England. The locomotive was a "standard freight locomotive of the six-coupled type, weighing more than thirty-seven tons and able to haul a load of five hundred and sixty tons." From the driving of the first rivet to the application of the final coat of varnish, the work occupied less than ten hours!

The fastest piece of work of this kind previously on record was the erection at the Altoona works of the Pennsylvania Railway Company, of a freight locomative of the four-coupled type in sixteen hours and fifty minutes. It is said, however, that the two cases are not properly comparable. For the Pennsylvania engine and frames had already been erected, with all their cross connections, the cylinders fixed, the motion parts set, and the crosshead, weigh-bar and other parts put in place.

In the recent work at Stratford, on the other hand, absolutely not a stroke of the work of erection had been begun. The various parts of the locomotive, as made to standard guage and dimensions, were gathered together, but not a rivet was in place, nor were any two pieces put together.

The start was made at nine o'clock in the morning, and eleven minutes afterwards the first rivet was put into the frames. The cylinders were set and fixed in one hour and seventeen minutes. Four hours and seventeen minutes from the start the boiler was in place, and an hour and twenty minutes later the engine was wheeled.

The wheels were supplied just as they left the shops, and the eccentric sheaves had to be fixed, and the axle boxes, connecting-rod, and coupling rod brasses fitted by the erectors.

Eight hours and twenty-two minutes from the start the valve setting was completed and the painting of the engine was begun fifteen minutes later. In nine hours and forty-seven minutes from the start the engine and tender were completed in every detail.

One hundred and thirty-seven men were employed, divided as follows:—On the engine, eighty-five, of whom thirty-nine were fitters; two were smiths, and forty-four were boiler-makers, rivet boys, etc.; on the tender were employed fifty-two, namely, sixteen fitters, sixteen boiler-makers, and twenty labourers.

The work was done in seven hours of one day, and twohours and forty-seven minutes of the following forenoon. The locomotive was put into regular work the day it was completed, and has been running continuously since.

The average time for building an engine and tender is eight days.

GET BETTER QUALITY BY THINNING APPLES

THE thinning of apples is a very necessary orchard practice if a high quality crop is going to be obtained. The amount of thinning desirable is dependable upon many factors and must be modified to suit such considerations as the variety, the individual condition of the tree, the habit of bearing, the season, pruning, and local market requirements.

Just what can be gained through proper thinning out of apples is suggested by tests made at the Fredericton Experimental Station of the Dominion Department of Agriculture, where trees of the Wealthy apple were thinned to eight inches between fruit, to four inches between fruit. and the results from these trees checked against unthinned trees.

While thinning decreased the total yield there was an appreciable increase in better quality fruit in the thinned trees.

Thinning was done in July after the fruit had fully set and attained some growth so that spacing and selection was comparatively easy.

The average yield per tree was 2.21 barrels for the unthinned trees, as compared with 1.67 barrels for the trees thinned four inches apart, and 1.49 for the tree thinned to eight inches. But the average yield of No. 1 apples from the unthinned trees was .35 barrels, while from the trees thinned to 4 inches it was .70 barrels and from the trees thinned to eight inches between fruits the average yield of No. 1's was 1.04 barrels.

Presented in another way, the trees thinned to eight inches between fruits gave an average yield of 505 apples grading No. 1; the trees thinned to four inches gave 384 apples grading No. 1, and the trees which were not thinned out gave an average yield of only 200 apples grading No. 1.

These preliminary tests show rather conclusively that thinning is an essential practice, at least with the Wealthy variety, if a crop with a high percentage of No. 1's is to be produced. Not only does thinning increase the yield of No. 1's, but a corresponding improvement in quality is also made, ensuring a product which would command a premium if marketed in any considerable quantity.

As quality becomes increasingly important in the marketing of apples, the value of thinning becomes so self-evident that it is bound to become a much more general practice than it is at present, and will probably soon become a practice essential to success in orchard management.

Judge: "If you were there for no dishonest purpose, why were you in your stocking feet?"

Burglar: "I heard there was sickness in the family, your Honour."

Widow: "I want the gravestone to say, 'To my husband,' in an appropriate place." And the inscription read: "To my husband. In an appropriate place."

CLOTHES
= = For Men = =

The days for work have come and it is essential that your clothes be comfortable and strong. For men we have

The famous CARHART and HEADLIGHT Overalls and Pants along with several other reliable makes.

Such Shoes as GREB and WILLIAMS make are what yon need for strong support for heavy lifting and long hours on your feet. Remember if your feet hurt you hurt all over and you cannot be yourself with a cheap ill-fitting work boot.

WORK SHIRTS of real strong chambry, cut coat style, full size and triple stitched, at half the price formerly paid.

IN ARROW SHIRTS for fine wear we have a large assortment of pastel shades with Van-Arrow collars attached. To go with these we have a large assortment of Brennetta Crepe ties in all the popular plain shades.

LADIES' WEAR

Underwear We have a large assortment of Watson's Underwear in the famous lock stitch, non-ravel silks of Bloomers, Panties, Brassieres and Vests in smart summery shades.

Holeproof Hosiery in the new 1931 shades which have a closer guage, meaning heavier weights in Service, Semi-Service and Chiffon silks. Also a full-fashioned pure thread silk stocking in the popular shades, Pilot, Grain and Strut, at a price never before imagined.

Ladies' Dresses in the gay new fashions and tub-fast colors, at prices you used to pay for a house dress.

MISS EVELYN EMPEY WAS THE WINNER
of the Beautiful Congoleum Rug displayed in our window last week.

CARD OF THANKS

We, the undersigned, take this opportunity of extending to our many friends and relatives who so kindly assisted us in our recent sad bereavement our sincerest thanks.—The Hunter Family, Finch, Ont.

SAFE DRIVING
will save money

A new plan of Automobile Insurance, sponsored by two Canadian companies, provides *reduced premium rates based on the individual merit of drivers.*

10% REDUCTION for two years driving without accident.

15% REDUCTION for three years driving without accident.

20% REDUCTION for four years driving without accident.

Discount applicable to Public Liability, Property Damage and Collision Premiums.

Human Life Is In Your Hands

Our merit rating policy is offered with a sincere desire to encourage careful driving and to foster a keen regard for life and property. Remember, it's the man at the wheel that counts — in his hands lies the safety of children, pedestrians and passengers.

The need for safety is imperative. Life and property are being sacrificed unnecessarily by careless and thoughtless drivers. Do your part. Help in the crusade for saner and safer driving. Talk, think and practise safety.

The SAFE DRIVER Comes Into His Own

Our merit rating policy rewards every safe and sane driver for his *care, courtesy and common sense.* He is no longer classed with reckless motorists. Instead, his premium rates are adjusted in accordance with his personal record of careful driving.

Under the New Financial Responsibility Law, no matter how careful you may be, you need the complete protection of our Automobile Policy.

CARE

1. Watch children—Slow down!—Sound horn!
2. Look out for pedestrians near street cars.
3. Read and observe all warning signs, especially at railway crossings.
4. Do not stop or park on highway, especially on curves or near the crest of hill.
5. Keep your car in good mechanical condition, especially brakes, steering, tires, lights and horn. Repair immediately even slight defects. Have your car inspected at least twice a year.

COURTESY

1. Do not dawdle along middle of road. Give all faster moving traffic right of way.
2. Do not speed up when overtaken by faster moving traffic.
3. Do not cut in closely ahead of the car you have just passed.
4. Be considerate of all others on the highways. Don't be mean or obstinate.
5. Be considerate of your passengers. In the event of a crash, they invariably receive more serious injuries than the driver.

COMMON SENSE

1. Drive at speeds in keeping with safety of others and with your experience as a driver—never fast in crowded traffic or on curves or bad roads.
2. Keep on the right side of the road except when passing.
3. Never pass on blind curves or when nearing crest of hill. Always be sure there is ample time and space.
4. Obey all traffic signals; stop at through streets and highways; go through all intersections slowly and only when way is clear.
5. Give clear signals before turning or stopping in traffic.

"It's the man at the wheel that counts"

If you can qualify for this policy, see us today. Full details furnished gladly on request.

BERRYHOLM POULTRY FARM

"THE HOME OF BETTER POULTRY"

Baby Chicks, Brooded Chicks, Custom Hatching

Twenty thousand is the number of chicks that we have placed in Dundas this year and twenty thousand more is about the number yet to go out from our farm. A good many of these are booked but can as yet supply either Rocks or Leghorns any time in May or June.

LET US TAKE THE RISK

Let us brood them for you the first week, over the danger period. We have the proper equipment for this work and at one week will give you chicks as large as chicks at two weeks brooded in the ordinary way. These are proving more popular each year. Over half our chicks are going out as week olds this year We would like to have you come and see them whether you buy or not.

Prices of Day Old Chicks as follows :

In lots or	May 13th and 20th	May 27th and June 3rd	June 10th and 17th
100 or more	$14.00 per hundred	$13.00 per hundred	$12.00 per hundred
500 or more	$13.00 per hundred	$12.00 per hundred	$11.00 per hundred
1000 or more	$12.00 per hundred	$11.00 per hundred	$10.00 per hundred

Week Old Chicks $3.00 over the above prices.

THURSDAY, MAY 21ST, 1931.

CONVERSION BONDS PRESENT FINE OPPORTUNITY

ONE OF THE FEATURES of the new Government Conversion Loan that seems likely to appeal strongly to holders of the Dominion Government bonds maturing 1931, 1932, 1933 and1934, is that the new bond offered in exchange not only retains for the holder all the privileges of his own bonds, but provides for him an investment of the highest grade, and one that will have a lifetime of at least fifteen years after his present bonds are matured. That is, none of the valuable privileges that were accorded during the war years, when the price of money was much higher than it is today, is taken away. If he holds the War Loan bond maturing in 1931, which carries a five per cent interest rate, he will receive a similar rate of interest on his new bond up to the date of the maturity of the 1931 issue. So with the Victory Loan bonds maturing in 1932, 1933 or 1934, all of which carry interest rates of five and one-half per cent that reflected money conditions prevailing during the War years of 1917 and 1918, and the year afterwards, 1919. The new bond that is offered to him in exchange for what he now holds will carry not only what may be called its "regular" interest rate of four and one-half per cent, but will provide for the additional interest rate of one-half of one per cent in the case of the 1931 bonds, and of one per cent per annum in the case of the 1932, 1933, and 1934 maturities.

After the dates of maturity on the outstanding bonds have been reached, the interest rate will revert to the prevailing rate of interest on these high grade bonds, namely four and one-half per cent, and continue up to the maturity of the conversion bond. It therefore follows that anyone who holds the bonds with a higher rate of interest than is covered by the new "conversion bond" that carries for its lifetime a four and one-half per cent interest rate, may make the exchange at once and still be assured of the full rate of interest he would receive if he held his present bonds until their maturity.

In the two of the four groups of outstanding Dominion Government bonds that it is sought to convert into the new long term issue, there is a tax-exempt feature that is highly valued, at least by those with substantial incomes, and that has resulted in a higher price being paid at all times for these bonds, namely the 1931's and the 1933's. The 1933's were issued during the second Victory Loan campaign, in 1918, and the tax-exempt feature was continued, as had been provided in the 1917 Victory Loan issues, in order to make the bond more attractive, and thus insure a larger subscription. The total subscription of that year, 1918, amounted to over $600 000,000. In order that the holders of what is known as the War Loan Bond of 1931, as well as the Victory Loan of 1933, may not be making a sacrifice in exchanging their bond for the new conversion bond, the Department of Finance at Ottawa has provided that the interest to be paid on the new bonds—in the one case up to the end of 1931, and in the other case up to the end of 1933—may be regarded as exempt for Income Tax purposes.

Thus, both in regard to the higher rate of interest carried by the bonds, and in the tax-exempt feature of two out of four of the bonds whose conversion is now being urged, the holders will retain all the advantages that now rest in the older bonds, and in addition will have an investment that will continue for a period of twenty-five years (or fifteen years at least if it is decided later to redeem the new bonds), and all this time the rate of interest to be paid on the new bonds of four and one-half per cent per annum represents the maximum rate now being paid on the highest grade of Dominion Government or Provincial Government bonds being offered to the public.

TOMATO JUICE IS ECONOMY FOR FAMILY

IN SPEAKING to the Chamber of Commerce at Peterboro, the Hon. T. L. Kennedy, Minister of Agriculture for Ontario, paid particular attention to the effort being made to replace California orange juice with Ontario tomato juice. This move now has hearty approval and he said:

"Last week the orange growers had the back page of the Saturday Evening Post. It was a splendid advertisement, beautifully done and giving the message of 'Orange Juice for Health.'

"It is fully known now by medical men that tomato juice contains the same health-giving vitamins as orange juice. I say drink orange juice if you want to, but you will get the same beneficial results if you drink tomato juice. We are going to launch an advertising campaign to tell the people that tomatoes and oranges have the same vitamins and that they should drink tomato juice," declared Colonel Kennedy.

OUTDOR MEALS

By Etta Bitta Pye

WHEN PACKING a lunch to be eaten in the open, do not forget the dainties with a pronounced flavour, such as pickled onions, vegetables, beets, cucumbers and cauliflower. They are greatly needed to give zest to the outdoor meal. Here are two excellent suggestions:

Picnic Sandwiches.

Butter slice of bread. Place lettuce leaf thereon. Cover with diced pickle—sweet or sour. Spread another slice of bread with cold baked beans and combine two slices. These sandwiches may be made and eaten right on the picnic grounds.

Outdoor Platter.

Cook steak, chops or ham as usual. Prepare potatoes. On large paper plate place meat, potato, and such cooked or green vegetables as you have ready. Between the meat and the vegetables use pickles of various kinds as garnishes and relishes.

Jimmy had been ailing for a couple of days . . . but she didn't think it was serious — till this afternoon . . . she called the doctor . . . hospital tomorrow . . . just a minor operation, but it couldn't wait.

Whatever would she do? She *must* be with Jimmy . . . but there was the baby too. If mother were only there . . . but a letter couldn't reach mother till late tomorrow.

Then she thought of the telephone. In two minutes she was speaking to her mother. Yes, she could catch the evening train — would be there at 8 in the morning.

What a relief! Now she could go about her preparations for the morrow. The telephone had made everything easy. And the cost of the call had been less than a dollar.

Evening rates on "Anyone" (station-to-station) calls begin at 7 p.m. Night rates begin at 8.30 p.m. Just give "Long Distance" the number you want — it speeds up the service.

THE BELL TELEPHONE COMPANY OF CANADA

ONTARIO

A Message from the Premier

on the subject of

Highways and Highway Safety

Probably no single development in the history of our province has had more widespread influence upon the lives and habits of our citizens than the automobile.

Ontario was one of the first provinces to recognize the importance of this modern means of transportation, and first, also to adopt a progressive policy of road building and road maintenance.

Today, of Ontario's 72,000 miles of roads, more than 38,000 miles are improved gravel, 7,000 miles are paved, and 69 per cent of all roads are surfaced.

These roads are not only a remarkable convenience, but, as well, they are a responsibility. The seriousness of the responsibility is evidenced by the fact that in Ontario last year, 524 persons lost their lives through automobile accidents. All available statistics would seem to indicate that most of these accidents were avoidable—and were caused by either thoughtlessness or wilful violations of the common-sense rules of the road.

The Ontario Department of Highways is about to publish in the press of Ontario, a series of educational advertisements, in which an effort will be made to keep drivers and pedestrians alike, alive to the necessity for the continuous exercise of care, courtesy and common-sense in the use of our highways. Suggestions made in these announcements will be, in effect, a digest of all the information gathered from every section of the world which has been found to be of assistance to drivers and pedestrians in avoiding highway accidents and making these same highways of inestimably greater value and benefit to every citizen.

The first of the announcements referred to will be published at an early date. Your attention is invited thereto, and your co-operation in making our streets and highways safe is earnestly solicited.

News and Information For the Busy Farmer

Furnished by the Ontario Department of Agriculture.

Favourable reports on crop conditions are received from most parts of Ontario. Recent rains have helped matters and little damage by frost is reported. There are large increases in the acreage of early potatoes and clover and alfalfa seedings in many districts.

The Weed Menace

A. R. G .Smith, Western Ontario Weed Control Supervisor, and Chas. Galbraith, of the O. A. C., have been touring the Western part of the province, holding meetings in each county, and issuing instructions preparatory to the annual campaign against the weed menace. Despite strenuous efforts exerted last summer, they point out, the sow thistle is not under control. It continued to spread during the growing season of 1930, and is in every township of Ontario. Mr. Smith declared that it would be necessary to tighten up the administration of the Weed Act to keep the sow thistle from widening its area and he urged more stringent enforcement of regulations pertaining to all noxious weeds. Efforts to have the sides of roads levelled will be made to permit mowing to have easier access to weeds. Weed cutting at the side of the road before the seeds ripen is having good effects. A motto for inspectors was adopted. They should make use of "personality, persistence, persuasion and publicity."

Treating Seed Potatoes

Naturally, the aim of the potato grower is to produce the biggest and best crop at the lowest possible cost. This is dependable upon a number of factors, such as good soil, quality of seed, spraying and cultivation. While the importance of these features is unquestioned, very often the prospect of a good crop is ruined through neglect to practice seed treatment which is aimed to reduce the enormous losses and inconvenience caused by scab, black leg and rhizoctonia, all of which occur in every province in Canada. The commonest method used to treat seed potatoes is formalin treatment. A solution of one pound of formalin to forty gallons of water is made up and placed in a barrel. The seed potatoes, uncut, are placed in a sack and suspended in the liquid for two hours when the bag is pulled up and the solution allowed to drain back into the barrel. Then the seed may be cut and planted.

Graded Beef

In reply to a questionnaire issued in connection with the Federal Beef Grading Service to over 1,200 housewives in the twelve leading cities of Canada, 65 per cent of the ladies sending in replies stated that the official mark in red or blue was their guide in buying beef of dependable quality; the other 35 percent stated that as yet they knew nothing about branded beef. Those who bought by grade stated without exception that they were satisfied with the quality of the branded product, while a majority of those who were not then familiar with branded beef stated that they would buy and use more beef if they could be sure of getting beef of dependable quality.

Rations For Poultry

The Poultry Department, O. A. C., has for some years past been carrying on a series of nutritional studies in connection with poultry feeding with the financial co-operation of the Empire Marketing Board, London, England. Bulletin 362, issued by the Ontario Agricultural College, contains the results of these studies over a period of three years.

The method of carrying out the experiment is described in full detail in the bulletin, and a list of eight conclusions is given at the end. The general plan of the experiment was to study the influence of such animal proteins as milk, fish scrap, beef scrap, and tankage as they might affect hatchability and egg production.

Milk in combination with beef scrap or fish scrap together with cod liver oil, appears to be the most satisfactory feed used in these trials where hatching power of eggs, number of eggs produced, and pounds of feed required to produce one dozen eggs are considered.

The bulletin may be obtained by writing to the Publications Branch, Department of Agriculture, Parliament Buildings, Toronto.

There's Money In Eggs

With eggs selling at 17 cents a dozen, one can still make money if he operates his poultry flock on a business basis, was the statement made recently by a leading Ontario poultryman. Feed costs are lower and the propects of lowered production through flock depletion is inducing many farmers and poultrymen to make sure of having a good flock of laying pullets this fall by buying approved chicks in lots of from 300 to 500 or more.

Cull Them Out

As soon as the spring spurt in egg production commences to lessen there are certain hens in every flock that should be culled out and marketed. The sooner they are gotten rid of, the bigger will be the flock profits. Labour is reduced, feed costs are lowered and the profitable birds are given more room in the laying house and on the range. Poultry also should sell for more money per pound in the early part of the summer than later, so there is a material gain in disposing of the non-productive birds. One of the simplest ways to cull the flock is to go over the birds when they roost at night. Pick out those with shrivelled, rough combs and shrunken, hard abdomens. A bird with a large amount of hard fat around the abdomen is not in laying condition.

Reducing Crop Costs

The ever-present problem with the farmer is how to reduce crop costs. This can be done in two obvious ways: first, producing more at the same costs; and second, producing the same at a lower cost.

Perhaps the most important method of reducing the cost of producing crops is to increase the yield. Most of the items incurred in the cost of producing crops at the same whether the crop is large or small, so that every effort should be made to produce large yields by the adoption of all better farming practices.

Another method of reducing the cost of production is the use of larger machinery and more labour-saving equipment. Considerable improvement has been made in recent years in the introduction of larger and better machinery, making possible the elimination of considerable manual labour. Where the farm is large enough to warrant the purchase of such machinery, this method constitutes an effective means of reducing costs. The substitution of more profitable for less profitable crops is another advantage which may be derived from the cost of production studies.

THE PRUNING OF TREES ALONG POWER LINES

THE DESTRUCTION of beautiful trees to make way for electric wires of various sorts has long been a sore subject not only with owners but also with the public in general. We are glad to learn that the Hydro-Electric Power Commission of Ontario has established a forestry section to prune trees in such a way as to meet its requirements without needless sacrifice of their beauty. Scientific tree pruning was brought to its attention in 1929 and a group of trained men were employed to give the matter a trial. During the year these experts pruned approximately 5,000 trees, extending over 80 miles of transmission lines. The Hydro Bulletin states that this work was accomplished without a single complaint from adjacent property owners —"something which can rarely, if ever, be said of our previous methods."

Further experiments continued in 1930. Two competitive organizations were employed pruning slightly more than 7,000 trees along some 340 miles of provincial highways with much the same results as in 1929. The Department of Public Highways showed its appreciation of this progressive step by co-operating with the experts working under Hydro direction. The forestry division has been established as an integral part of the operating department but its services are available to the other departments and also to municipalities on reasonable notice. The Bulletin states that many nature lovers who recognized the ability of the men employed and the interest manifested by the commission in public property and roadside beauty have written expressing gratitude for this advanced step.

The Hydro Bulletin frankly admits that while the commission is interested in maintaining the best possible appearance of the trees this new step "is a real benefit in building public goodwill." Other utilities and corporations engaged in stringing wires along streets and highways should take notice.

Father: "Well, my boy, any college debts?"

Son: "Nothing, sir, but what with diligence, economy, and self-denial you will be able to pay."

FLIES

are sure to get in

even with the house screened. Hang up Aeroxon—the fly catcher with the push pin and longer and wider ribbon. Aeroxon is irresistible to flies because the glue is fragrant and sweet and will not dry—good for 3 weeks' service.

At drug, grocery & hardware stores.

Suspicious Torontonians

Toronto.—"Here y'are, lase and gemmen. Step right up and buy one. Fi'dollah gole pieces on sale for two n' half. Line forms onna right."

When Toronto's sophisticated citizenry heard that on a downstown stree, they cast a wary eye towards the spieler. A few walked a little closer to the man who was offering five dollar gold pieces for $2.50, cash. The cop on the corner drifted over. He picked up one of the coins, bounced it on the sidewalk, tested it with his teeth, reached down and hauled out $1.90, all he had. Then he moved on. The newsboy stopped shrieking his wares and gave a look. Then he derisively yelled "papers."

"What's the catch?" a citizen asked the merchant. "Notta catch, buddy, notta catch. Selling fi' dollar gole pieces for two n' half. Want one?" "Naw," said the citizen. Finally, four persons in succession paid their $2.50 and received one of the shiny pieces. The merchant moved on to another corner. Again his strident voice drowned out the city's roar. He sold another coin. Only had one left. "Won't some lady buy the last one?" he asked. A group of ladies backed away from his outstretched hand. One, braver than the rest, suddenly laid two one-dollar bills and a fifty cent piece on the line and took the coin.

And, strangely enough, every one of the gold pieces was worth exactly five dollars in any bank. The spieler was selling them as an advertising stunt. Perhaps 1,000 people heard his offer—only six were brave enough to take the chance.

To the Holders *of* WAR LOAN AND VICTORY BONDS

A Statement by the Minister of Finance

»«

IN THE dark days of the War, Canadians loaned to the Government of the Dominion many hundred millions of dollars to enable the operations of the Allies to be carried to a successful conclusion.

When Canadians loaned their money to the Government, they received bonds which were promises to repay them the sum loaned with interest at the rate of 5% or 5½% per annum. On the 1st of October next, $53,000,000 of these bonds become due; on the 1st of November, 1932, the maturity will be $73,000,000; on the 1st of November, 1933, $446,000,000; and, in 1934, $511,000,000 must be provided for.

It would not be prudent, either in the interest of the security holders or the country itself, to wait until these loans become due before providing for their payment or conversion. Action must be taken well in advance of the due dates to protect the credit of the country. The Government believes this an opportune time to afford Canadians the opportunity to exchange the bonds, which they own maturing in the next few years, for new bonds of the Dominion of Canada carrying interest at the rate of 4½% per annum, which is a very attractive return. Prior to the maturity date of the present bonds, those who accept this offer will, of course, continue to be paid interest at the rate as provided by the bonds they exchange.

Canadians who have always shown confidence in their country are earnestly invited to exchange the bonds they now own for bonds of the new issue. By so doing, they will render less difficult the task of providing for the future finances of the country, will enhance its credit and will greatly assist the Government in the present period of worldwide readjustments.

No money will be asked for and no new bonds will be sold at this time. It is proposed to limit the present conversion to $250,000,000, but the Government has the right at its discretion to increase the amount if Canadians indicate a general desire to continue their investments in the securities of their Dominion. The subscription books will close on the 23rd of May.

I earnestly seek the active support of my fellow Canadians in making this conversion, which is one of the largest financial operations our country has undertaken in recent years, creditable alike to Canada and its citizens.

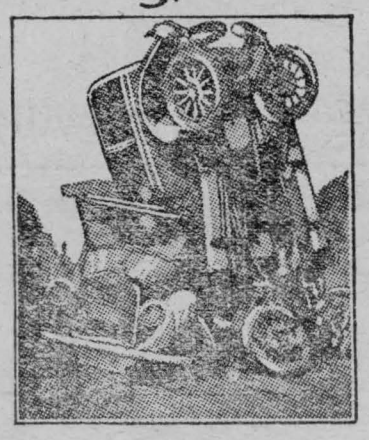

R. B. Bennett

Minister of Finance.

AUTOMOBILE INSURANCE

Before placing Insurance on your car, get particulars of the new plan, where you are allowed a reduction of 20 per cent from the recent reduced rates. Discount applicable to Public Liability, Property Damage and Collision Damage.

DRIVE in SAFETY

with an Automobile Insurance Policy to protect you against the hazards of Fire, Theft, Collision, Property Damage and Public Liability.

Every Automobile Owner in Ontario should know about the new Financial Responsibility Law effective since September 1st. The new law makes necessary the abi lity to pay for damage.

In its general application, it requires that the motorist responsible for damage to person or property of others MUST PAY either personally or through insurance OR BE BARRED FROM THE ROAD.

The sensible thing to do is to carry Automobile Liability and Property Damage Insurance. It is better to have this insurance and not need it, than to need it and not have it.

HAIL
LIGHTNING
FIRE
WIND

People who depend upon their crops should not be without some kind of the above insurance.

The loss of crops and barns, sometimes dwellings, is a serious matter to all farmers.

The claims paid through this office, just recently, have been large.

We aim to satisfy our policyholders, and do our utmost on their behalf.

Possibly you believe that you are carrying enough insurance. Think for a moment what a total loss would mean to you. This, as you will admit, is quite possible.

Information regarding various forms of insurance glady given, you are under no obligation whatsoever, just call or write.

Mainly About People

Mr. and Mrs. W. N. Fulton and Gordon spent a couple of days in Ottawa this week.

Mr. Tommy Carpenter, of Toronto, is spending a vacation at the Dominion House.

The annual meeting of the Women's Institute will be held in the Library on Wednesday, May 27, at 2.30 p.m.

Mr. Geo. Beattie, of Cornwall, exreeve of Winchester Township, who gave The Record a call at the week end, is carrying his right hand in a sling as the result of severe laceration in a power machine.

Mr. and Mrs. P. G. Hewitt, Mr. and Mrs. C. T. Fulton and Mr. W. M. Saucier attended the funeral of Mrs. Hewitt's uncle, the late Samuel Morrison, in Vankleek Hill yesterday afternoon.

Mr. P. D. Grady, of Cleveland, arrived in town yesterday morning to spend the summer. Pat O. runs the swallows a close race in their northern flight and was only beaten by a few days. The return of Mr. Grady is always as welcome as that of the birds.

The relatives and friends in this vicinity extend congratulations to the Misses Eldred and Ruby Edgerton, of Orchardside, and Miss Helen Beehler, of Crysler, on being successful in passing their final examinations in the Bellevue Hospital, New York.

Rev. D. A. McPhee, parish priest of St. Columban's at Cornwall, had a very narrow escape from injury or death when his auto plunged twenty-five feet in to the canal basin of Cornwall dry dock, landing in three feet of water Father McPhee had been summoned to a sick call early in the morning and is supposed to have dozed at the wheel.

Arrangements are being made by which the pupils of the High, Public and Separate schools of the village will participate in a joint programme in their observance of Empire Day to-morrow (Friday) afternoon, from three to four, in the Music Hall. Addresses will be given by the local clergy, municipal and school boards representatives, interspersed by musical numbers. Parents and friends are cordially invited to be present and spend the hour with the school children. There will be no admission fee.

Grantley

Mr. and Mrs. Elburn Carr, Mr. Claude Carr and Miss Durant spent Saturday in Cornwall.

Mr. and Mrs. Will Grant and children were guests on Sunday of Mr. and Mrs. Don Carr.

Mr. and Mrs. Charles McMillan took dinner on Sunday with Mr. and Mrs. Bert McMillan, Chesterville.

Mr. and Mrs. John Bogart, Miss Willa and Clifton, and Mrs. John Locke spent Saturday with friends in Cornwall.

Guests on Sunday of Mr. and Mrs. John Locke were :Mr. and Mrs. Rach and brother and baby daughter, Mr. and Mrs. Aime and daughter, Mrs. Bateman and daughter and Miss Irene Locke, all of Cornwall.

Mr. and Mrs. Joe Featherston spent Sunday in Cornwall visiting Mr. Tommie Featherston who is ill in the hospital. All hope for a speedy recovery.

Lowe Brothers PAINTS AND VARNISHES
SAVE THE SURFACE AND YOU SAVE ALL
MADE IN CANADA

GIVES BEST RESULTS

For Economy & Service

You can buy paint as low as $3.00 per gallon—but one gallon will cover only 600 square feet or less and therefore cost 5 cents per square foot.
Lowe Brothers Paint is sold for approximately $5.00 per gallon—but it spreads 250 to 300 square feet farther. Hence the cost per square foot is little or no greater. In every respect it is superior and more economical. *Figure your Costs on Square-Foot-Basis.*

For All Exterior Work
Use Lowe Brothers' "High Standard" Paint. Comes in a variety of attractive modern colors. Gives a rich, high gloss—brushes easily—great hiding properties—covers 850 square feet per gallon, one coat.

Neptunite Spar Varnish
Is recommended for use on stained, grained or varnished ceilings. Is not affected by heat or cold—will not turn white—it is easily applied and gives a tough durable finish. (If paint is desired use "High Standard" Outside Paint.

For Roofs and Fences
Use Lowe Brothers Rich Tone Shingle Stain. It is unexcelled for use on side and roof shingles, and on rough sawed sidings. Made in popular shades of Green, Brown and Red. Also made in Black.

For Porch Furniture
Lowe Brothers Quick Drying Enamel for use on all kinds of furniture. Dries in four hours—easily applied and does not require special thinner. See color card for 18 modern and attractive colors.

Come in and see us before painting

Porch Floor and Step Paint
Is specially designed to withstand the extremes of weather—scuffing of feet, and the severe wear to which the porch steps and verandah are subjected.

Outside Doors and Pillars
Use Linduro Enamel for a finer job. Impervious to weather and withstands the extremes of temperature. Gives a tile like smoothness and hardness.

FULTON BROS.
CHESTERVILLE - ONT.

CARD OF THANKS

We wish to thank the Hartford Insurance Company for the prompt and satisfactory settlement of damages sustained by a recent wind storm, and to its agent, Mr. James Clement, for his interest in the matter.—Grady Brothers.
