HENRY'S Shorthand School
Ottawa, Ont.

THIS INSTITUTION offers a superior training and thereby ensures a more successful future. It leads all others—a fact fully established by more than 625 pupils who have left other business schools to come to it—and ranks among employers as **"The School of Higher Efficiency."**

It is not surprising then that business men, in advertising for stenographers, should definitely state "Graduates of Henry's School preferred."

Get particulars about our course.

Bruin and the Ice Crop

Tuesday was Candlemas Day when it is supposed six weeks of winter will follow if the bear sees his shadow on that day when he emerges from his winter hibernation. It all depends just when bruin took his peek out whether he saw his shadow or not in this district. We may have bears hereabout to do the looking, was one not shot last fall a few miles south of Chesterville? And it is probably just as bad for a bear to live alone as a man. If half the six weeks yet of winter provides an abundant ice harvest from the Nation, it will ease the minds of many farmers and others who have envisioned empty ice houses if the mild weather continued much longer. Eli Harper reports several inches of ice in some of the bays now and with three or four nights of heavy frost it would be in good shape to cut.

$35,000 Fire Loss at Summerstown Station

Tuesday afternoon the village of Sumerstown, about twelve miles down river from Cornwall, suffered a fire loss estimated at more than $35,000 when the following buildings were destroyed or damaged:

General store, owned by J. A. Abrams, in the heart of the village. The stock, consisting of groceries, drygoods, hardware, grain, and miscellaneous goods, was valued at about $20,000, and the building at $5,000 to $7,000. Insurance of about $12,000 was carried.

The home of J. A. Abrams, with contents; total loss estimated at $2,500.

House owned and occupied by Mrs. Charles Geneau, with contents. Loss estimated at $3,000.

House occupied bv W. J. Poirer and owned by Mrs. Geneau, with contents. Loss of $1,500.

Blacksmith shop operated by Poirier and owned by Mrs. Geneau, with tools and equipment. Loss estimated at $1,500.

A general store, in which the village postoffice was located, and owned by T. B. Conroy, was damaged to the extent of about $1,000.

There was fear at the height of the fire that a gasoline storage tank buried in the ground within a few feet of Abrams' store, might explode. However, it was afterwards discovered a safety valve had prevented the flames from entering the main tank when the service pumps caugth fire.

Molasses Blaze

Six tons of molasses, in the basement of the store, burned with vivid flame and gave off dense clouds of smoke. Canned goods exploded with deafening reports, shooting heavy tins high into the air.

Alan McDonal first discovered the fire when he saw flames breaking through a small frame dwelling belonging to W. J. Poirier. The alarm was given over rural telephones, and assistance came but lack of fire fighting appliances handicapped their efforts, and only due to a sudden shifting of the wind was the whole village saved from destruction.

Finch Wins in Overtime Trim Winchester 5-4

Finch won a stirring 5-4 overtime victory over Winchester in a Central Ottawa Valley Hockey League game played at home last night. With the score deadlocked at the finish of the regular playing time, Gove tallied the winning counter in the second overtime session.

The teams:

Finch—Goal, McMillan; defence, Stark and Ouderkirk; centre, Preston; wings, Gove and Robillard; subs, Dutt, McIntosh, Cadieux, McQueen.

Winchester—Goal, Workman; defence, Scott and Seguin; centre, McLean; wings Carkner and Laushway; subs., Thompson, Pratt, McDonald and Render.

Referee—Bill Smith, Ottawa.

Summary::

Fisrt Period

Winchester, Laushway (Scott)..	4.00
Finch, Gove (Robillard	1.00

Second Period

Finch, Robillard (Stark)	2.00
Finch, Stark (Dutt)	2.00
Winchester, Seguin (Laushway)	1.40
Winchester, McLean	4.00

Third Period

Winchester, Laushway	2.00
Finch, Peston 17.00	

First Overtime

No Score.

Second Overtime

Finch, Gove	7.00

The Presbyterian Ladies' Aid will hold a Pancake Supper and Entertainment in the Presbyterian Hall, Morewood, on Wednesday evening, February 10th, at 6.00 o'clock. Come and have a good time. Admission—Adults 25c, Children 10c. 14

Chesterville Hydro Users Will Get Agreeable Surprise

When you open the envelope enclosing your hydro bill this month, don't think that your eyesight has gone back on you when you see a cheque for a sufficient amount to pay about fourth months' charges, or to be exact an amount equalling a third of the payments you made during 1931, that is, if you paid your bills each month taking your discount for cash payment. You will only receive the amount as calculated on the net amount as if paid taking the discount.

This windfall comes at a most opportune time for all users of hydro in Chesterville, and according to whether you have been a large or small user so will your cheque be. With a very large surplus accumulating, the new council, which is the Hydro Electric Commission for Chesterville, made representation to headquarters in Toronto showing where Hydro users in Chesterville were entitled to this consideration, which was quickly acceded to and instructions immediately sent forth to have cheques covering the rebate accompany this month's bills which would be due on the twentieth of the month.

With the lowering of the tax rate last year by ten mills, followed by a 33 1-3 per cent rebate on the hydro bills, Chesterville has been placed in a most enviable position, and we suggest to the Council the desirability of bringing this matter as prominently as may be before the industrial commission of the Canadian Pacific Railway with a view to attracting further manufacturing plants to Chesterville where transportation is good and living conditions the best. We understand the rebate on current accruing to the Nestlé's Milk Products Company amounts to nearly $500, which only represents a very limited use of power supplied through the local Commission, the Nestlé's having installed an electric plant for their own purposes.

Popular Young Girl Honoured On Departure for Montreal

Miss Madge Campderros was twice honoured by her Chesterville friends this week before taking leave for Montreal where she has entered training in the Montreal General Hospital. At the weekly choir practice in the United Church Thursday evening her fellow members presented her with a handsomely bound copy of the new Hymnary with her name engraved in gold, as a token of appreciation for the wonderful services she has given that organization.

After the hockey match Monday night the young folks of the village met in the Library Hall to say goodbye to Madge. Dancing was enjoyed for a time and about 11.15, as all were joined in a circle in the midst of a "Paul Jones," order was called and Jack McAvoy presented Miss Campderros with a substantial purse of money, conveying to her as he did so the regret all felt at her departure from Chesterville where she is so popular, and where her voice and violin have added much to the merit of many entertainments, both as a soloist and with the High School Orchestra. Madge thanked her friends for their thoughtfulness and shortly after the singing of "For She's A Jolly Good Fellow" the party broke up.

United Ladies' Aid Meets

The regular monthly meeting of the United Ladies' Aid was held at the home of Mrs. Lyle Marcellus on Wednesday afternoon with an attendance of 35 members. The meeting opened with singing followed by prayer by Mrs. Newman and scripture reading by Mrs. M. Durant. The business included the adoption of a motion to make a substantial contribution from the funds on hand. After from the funds now on hand. After a short programme the meeting was closed with singing and the Lord's prayer in unison. The hostesses were Mrs. Marcellus, Mrs. Rowe, Mrs. W. N. Fulton, Mrs. Cameron, Mrs. Geo. Hummel and Mrs. Windsor.

Fire at Winchester Monday

The home of Mr. Samuel D. Billings, Ottawa street, Winchester, was partly gutted by fire early Monday, caused, it is thought, by overheated stovepipes. The fire had gained considerable headway in the attic before being noticed by the family. The fire brigade was promptly on hand after the alarm was sounded and succeeded in soon getting the blaze under control, although the contents of the house were removed. Insurance.covers the loss. Mr. Billings has rented rooms in the Anderson Block and the family will reside there until their home is repaired.

Firemen Answer Two Calls Fires Cause Little Damage

Chesterville's volunteer firemen were called out twice during the past week, but in each case the blaze was discovered early and extinguished with little damage before the fire fighters arrived.

Thursday afternoon about 2.30 an alarm was sounded which sent members of the brigade scurrying for Dr. H. H. Casselman's residence on Main Street North, where a pan of grease which had become overheated on a cook stove caught fire. The blaze soon burned itself out and no damage was done.

The second alarm came about 9.30 yesterday morning and, if the blaze had not been discovered in the nick of time, would have developed into serious proportions. The stove pipes at Rene Smith's home on Church Street burned out upstairs and were red hot when discovered, setting fire to the wall paper. The family was on the point of leaving for the day as the danger was noticed.

This makes a total of three fires in as many weeks to which the firemen have been called and in none of the cases has it been necessary to turn on the water. Last summer the council supplied the fire department with waterproof coats and hats and they have not yet had a drop of water on them, the firemen threatening to throw wather on them soon if they do not get the hose working and get splashed up.

Council Had Quiet Session

The Village Council met in the clerk's office on Tuesday evening for the February session and, aside from passing a number of bills in connection with unemployment relief work, had very little business to transact. Eighteen men are now employed on this year's relief scheme and a big pile of stone has already been broken.

The closing of the tax collector's roll has been extended to March 1st, there being approximately $1800 in unpaid taxes.

Finch Held Scoreless 5-0 Fyke's Fourth Shut-Out

The largest crowd of the season Monday night at the local arena saw the league leaders pull off a spectacular win over their old rivals from Finch when the latter were submerged in a 5 to 0 score. The ice was in perfect condition and to the particular liking of the home boys, who, from the first whistle, uncorked the best exhibition of hockey seen here this season, and which should go a long way in convincing those who doubted the ability of this year's squad of juniors that they are capable of showing the finest brand of hockey.

The Finch bunch certainly looked the goods in the initial practice, but some of the bright lights of former years have lost their speed or are not playing the hockey they used to flash in this league. More was expected of Hughie Robillard but Gove and Preston outshone their mate on the first string forward line and played more aggressive hockey. Henry Ouderkirk made his first appearance here with the visitors and played an outstanding game but his lone rushes were almost invariably carried to the corners out of harm's way. Towards the end of the escond period Preston tried to team up with him on two-man rushes but it met the same stonewall when they reached the territory guarded by LaPierre and Helmer. One of the best scoring chances Finch had all evening came about half-way through the second, when a face-off was pulled in the corner from the Chesterville nets. Preston got the rubber at the draw, passed it out to Robillard, who slipped it over to Gove, who was unguarded in front of the nets, but the latter gummed up the play and failed to get the shot away that should have been a counter.

Chesterville's counters came steady and sure with a pair in the first when McAvoy took a pass from Clarmont two minutes after the start and drove the rubber home, which was repeated in less than two minutes with Clarmont netting the disc and LaPierre getting the assist.

Going into the second period with two down, Finch made a bid to even it up and stepped the fastest of the night. Stark made a good try, stepping around Jarvis, and driving a hard one into Fyke's pads. Immediately after , LaPierre almost handed Finch a counter when he almost deflected a hard shot into the twine when the puck glanced off his glove on a long shot. LaPierre displeased the Finch fans when he decided he would keep the visitors travelling as he hoisted the puck to the far end a few times. McAvoy klicked in the third counter on the best play of the night. Clarmont stopped Henry Ouderkirk on the right boards and swung away with Jarvis to whom he gave a pass, the latter whipping it over to McAvoy on the other side, the latter beating McMillan cold on a rifle shot which the goalie never saw. He went to his knees for the play while the puck smashed in over his shoulder.

The third produced another brace of counters, McMillan being responsible for both of them. After fifteen minutes Clarmont smashed a high one at the net which McMillan reached after and dropped inside and repeated the trick two minutes after on a shot from Arn Lynch. Ouderkirk made another good stab when he grabbed the puck with the whole Finch bunch up, went in behind the net and passed the rubber out, but Fyke was equal to the occasion making a nice clear to keep his sheet clear for the fourth game of the series.

Dagenais, James and Lynch did the subbing, all turning in good games, and coming along fast for the finals of the series.

The teams:

Finch—Goal, McMillan; defence, Ouderkirk, Stark; centre, Gove; wings Preston, Robillard; subs., Dickey, Stark, McIntosh, Dutt.

Chesterville—Goal, Fyke; defence, Helmer, LaPierre; centre, Jarvis; wings, Clarmont, McAvoy; subs., James, Dagenais, and Lynch.

Referee—G. Foster, Ottawa.

Counties' Estimates Reduced Members' Rate $7 Per Day

Acceeding to demands of rural ratepayers for strict economy during 1932, the council of the United Counties of Stormont, Dundas and Glengarry, in session at Cornwall, slashed its estimates to effect a reduction of approximately $90,000. The bulk of this saving was made possible by a decision that new construction on the county road system should be suspended for 1932, thus cutting a proposed appropriation for road purposes from $200,000 to $125,000.

Counties' Council approved a bylaw providing for a reduction of the per diem allowance of its members from $8 to $7.

Paid on $7 Basis

As the by-law was retroactive, councillors were paid on the $7 basis for their attendance at sessions during the past week.

On the recommendation of a subcommittee, council took no action to cut the salaries of counties' officials. "Even a drastic cut insalaries would "Even a drastic cut in salaries would not be noticed in the tax slip of the average taxpayer," the committee reported.

"Your committee has studied salaries paid similar officials in other counties throughout the province and feel that, while we believe our officials to be, if not superior, at least equal in faithfulness and efficiency to the best, they are at the same time receiving much lower salaries than any who have come to our notice. In view of this, we cannot recommend any considerable reduction in salaries."

Appoint Officials

The sub-committee reported that of Refuge would be $2,000 less in the cost of maintenance of the House 1932, and that $20,000 less will be required for debenture retirement.

Appointments made by council were as follows: High School trustees Ross McCrae, Williamstown; D. A. McDonald, Alexandria; A. E. Hall, Cornwall; Harvey Froats, Morrisburg; Judson Merkley, Iroquois; W. J. Hanna, Chesterville; Dr. J. J. McKendry, Winchester; Clark Smith, Morewood; Edward Cameron, Avonmore; Donald Cameron, Finch; Duncan Kippen, Maxville. Advisory Road Board: Dr. J. H. Munro, Maxville, for three years; H. H. Nesbitt, Winchester Township, for two years; J. A. Lafave, Cornwall Township, one year; Warden H. C. Nugent, Finch Township, ex-officio. Auditors: F. B. Brownridge, Cornwall, and L. J. Hutt, Finch.

Old Age Pension Board: J. R. McLachlan, W. H .Gallinger, D. A. McIntosh, E. A. VanAllen, and J. E. Crowder. Cemetery Commission: D. J. McPherson and J. H. Ross.

Legal Fees $6,000

The appeal entered by urban municipalities against the counties' equalized assessment, heard in county court in Cornwall in November and December, cost the counties approximately $6,000 in legal fees alone, according to accounts submitted for payment of five solicitors.

The county roads appropriation set at $200,000 by J. G .Cameron, county road engineer, was discussed for five hours in committee before approval was given to a report calling for expenditure of $90,000 for maintenance and $35,000 for necessary construction.

In council, an amendment was introduced calling for a greater appropriation for construction but this was defeated 27 to eight.

GOING TO HAVE A TALKFEST

Cornwall Freeholder.—Cornwall is going to make a determined stab at being one of the few Canadian cities in which the Olympic word champions will appear, following the Olympic Games at Los Angeles. A movement is already on foot in this direction.

Died in New Westminister, B.C

Mr. Robert Earl, who for many years lived east of Morewood, and was well known in this vicinity, passed away recently at his late home in New Westminster, B. C., where he resided with his eldest daughter, Mrs. Ida Earl Haines. He had passed his 84th birthday last December but for the last two months had not been in good health. He was twice married and both wives predeceased him. There survive three sons: George and Milton, of Kemptville, and Eddie, of Ogdensburg; also three daughters, all of whom live in the West.

Burial took place in New Westminster.

HEALTH SERVICE

of the

CANADIAN MEDICAL ASSOCIATION

WHY ISOLATE?

MAN is the reservoir of the diesase germs which afflict him. Disease germs do not grow in nature outside of the human body or animal body, and most of them die fairly soon after leaving the body.

Disease germs leave the body which harbours them in its secretions or excretions. It is the transference of the germ-laden secertion, occurring usually in a fairly direct manner, which accounts for the spread of the diseases which are caused by germs.

In order that the spread may be prevented, every effort should be made to control the transfer of secretions from the sick to the well. It is well for this reason that the sick person is isolated or separated from his fellows. Isolation does not do the sick person any good; it is carried out for the protection of those who are well.

One way to isolate is by removal of the case to an isolation hospital, and where isolation at home is not practical, this should be done. Many cases can, however, be quite satisfactorily cared for at home, provided proper precautions are taken.

The patient must have a separate room. If a nurse is not engaged, the care of the patient should be undertaken by some member of the family. A gown, or overall, for the attendant is kept just inside the room, This gown is put on by the attendant when entering the sick-room, and taken off when leaving the room.

The importance of adequate hand scrubbing cannot be over-estimated. After attending the patient, and always before leaving the room, the hands and fore-arms should be thoroughly scrubbed, for at least two minutes, with a nailbrush in soap and water, and then rinsed in an antiseptic solution.

Dishes used by the patient are placed in a pan of water and boiled, or are washed and kept in the patient's room. Any food from the patient's room is burned.

All clothing, towels, etcetra, from the patient's room are actually boiled, or are soaked in an antiseptic solution for one hour.

All discharges from the nose and throat should be destroyed by burning, or should be mixed with an antiseptic. In diseases such as typhoid fever, the excreta must be mixed with an antiseptic.

The person who is caring for the patient should take the precautions mentioned, and should not have anything to do with the preparation of food in the home.

Home isolation is satisfactory provided the attendant takes such care as is outlined above, that other members of the household or family are kept out of the room, and that care is maintained until the danger of spread is passed, and that such care is not relaxed too soon, simply because the patient feels well.

News and Information For the Busy Farmer

Furnished by the Ontario Department of Agriculture

A Farm Programme

A farm programme for 1932 was presented in a recent address by W. R. Reek, superintendent of the Ontario Experimental Farm at Ridgetown. In it he favoured rearing rather than the purchase of feeder cattle, a type of cow that will make a cream cheque possible as well as a steer, a consistent hog breeding policy to avoid the disastrous results of jumping in and out, a well-cared-for stock of poultry, a cash crop suitable for the soil and locality, clean seed—and thrift, The practice of thrift was applied to all farm operations and to the production in garden and otherwise of many home necessities. The automobile was not condemned as a piece of farm equipment, but Mr. Reek declared that parents and young folk in the family should sit down and talk the situation over and settle on a policy or practice that would reduce the operating expenses of the farm car to reasonable limits and lessen the annual depreciation.

Marketing Ontario Beans

For the purpose of arriving at more efficient methods of marketing Ontario dry beans, growers and dealers held a meeting at Ridgetown recently. On the invitation of these two groups, the Ontario Marketing Board, as represented by W. B. Somerset, chairman, and J. A. Carroll, secretary, took part in this conference.

Tentative plans were agreed upon and, when the gathering dispersed, all members expressed themselves as well satisfied. They feel that the bean industry is well on its way to becoming stabilized. Consumers need have no fear that the result of such a meeting will mean price control. "As a matter of fact, commented Mr. Carroll, "the materialization of our present plans will result in a better quality of bean reaching the consumer, in a more efficient manner and, it is hoped, in larger quantities.

"It seems strange," re continued, "that an Ontario produced food of such high nutritive value, and of such low cost should be almost ignored by our shoppers so far as popularity is concerned. I feel that if this product and its many attributes were brought to the attention of the shoppers of the province a different story could be told regarding the sale of Ontario dry beans. At present we are working to that end."

Weekly Crop Report

Exceptionally mild weather during January in all parts of Ontario aided the farmer in feeding his live stock which is being carried through the winter on less feed than usual and in better condition. A keen demand for dairy cattle that have been T. B. tested is noted and several carloads have gone to the United States. The mild weather has made it difficult to keep roots, vegetables and fruits in storage.

Tobacco Progresses

Tobacco is likely to overtake cheese as Ontario's formost overseas export, according to Hon. T. L. Kennedy, Minister of Agriculture. Value of tobacco grown in Ontario in 1931 was more than $6,500,000. About 15 years ago it was negligible. "There is no doubt but that tobacco will rank as one of Ontario's greatest industries," declared the Minister. "The British market is taking an increasing amount of Ontario-grown tobacco and the domestic consumption is also increasing. The Canadian High Commissioner in London informs me that our tobacco is highly regarded in England." The 1931 crop, due to favourable weather conditions, was the largest and of the finest quality in the history of Ontario.

Research is Important

The need of fundamental research in agriculture was discussed by Prof. W. R. Graham of the O. A. C., who showed how labratory findings had been translated into farm practice with highly beneficial results. At the O. A. C. it was learned that turkeys hatched and brooded in the labratory soon fell victims to disease when fed lettuce with particles of soil adhering, but when the lettuce was washed clean there were no ill effects. Out of this simple finding grew the practice of feeding young poultry in clean troughs every night. The final outcome was that poults have been reared in large numbers at the Norfolk Turkey Farm with less mortality than occurs in chicks. Several other instances were given to show how agriculture profits immensely from the results of fundamental research.

New Process For Honey

Dr. Dyce, who has achieved prominence in connection with the invention of a new method of processing honey, is and has been for several years a member of the O.A.C. Faculty. The discovery of this new process was made as the result of research conducted by him while on leave of absence and taking post-graduate work at Cornell University. The process is now recognized as being of great value to the honey industry and Dr. Dyce is deserving of commendation for having applied for patents in both the United States and Canada, and for turning these over to Cornell University for the United States and to the O. A. C. for Canada.

Stated briefly, the process is one of pasteurizing the honey at a certain definite temperature to prevent fermentation and then cooling it rapidly to avoid loss of flavour. Ten per cent of previously processed honey is stirred into the liquid honey after it is cooled. This acts as a starter which promotes rapid granulation, so that within a few days, at a lower temperature, the whole mass takes on a fine, smooth, uniform semi-solid texture; is safe from fermentation, and retains its natural delicious flavour. The processed honey is very satisfactory for table and kitchen use. It has lost its drippiness and can be cleanly and conveniently lifted with a spoon or spread with a knife. The process is now being adopted by the Ontario Honey Producers' Co-operative.

Union's Valuable Work

In spite of the agricultural depression there was renewed interest in the work of the Experimental Union last year, according to Prof. W. J. Squirrel, secretary, who gave an interesting report at the annual session showing that the number of co-operative experiments with field crops in Ontario during 1931 was 3,159. This was more than in 1930 and greater by 375 than the average number of co-operators in the period of 1925-29. He reminded his listeners that the Union had been responsible for the introduction of crops such as Dawson's Golden Chaff, O. A. C. No. 104, and Imperial Amber, varieties of winter wheat; Rosen Rye, Banner O. A. C. No. 174, and O. A. C. No. 144, late oats; O.A.C. No. 3, and Alaska Early Oats; O.A.C. No. 21 barley, as well as some of our best varieties of field peas, sunflowers, mangels, and, of course, the well-known Ontario Varigated and Grimm alfalfa.

Forty-Eight Fertilizers Discarded

After consultation with federal and provincial authorities the Eastern Canada Fertilizer Manufacturers' Association have announced an agreement to confine their sales of mixed fertilizers in Ontario in 1932 to some 28 formulae in place of the 75 which are now listed at Ottawa. Fertilizer formulae are now made up of related combinations of the three principal plant foods nitrogen, phosphoric acid and potash, in varying quantities. Fertilizer and soil experts agree that a range of 12 to 15 formulae are sufficient for any type of soil. By reducing the number, manufacturers will be able to produce fertilizers more economically, and this should result in lower cost and increased tonnage.

The man was in the hospital after his first serious attempt to knock a train off the tracks.

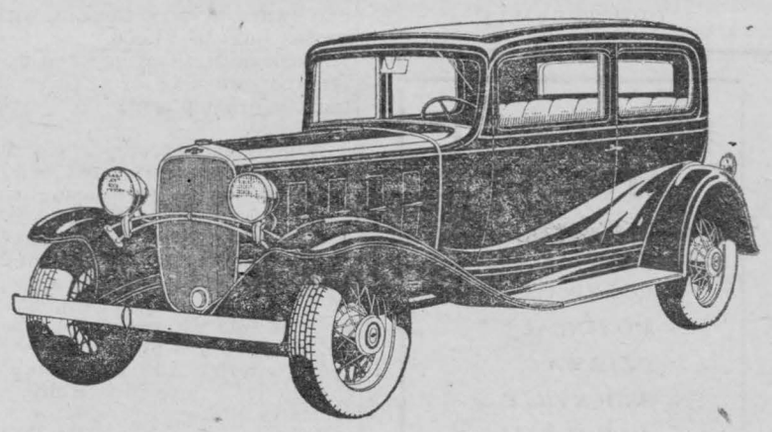

"I fear I can be of very little assistance to you," he was comfortably assured by the doctor, "I'm a veterinary surgeon."

"Ah," exclaimed the victim, "you are just the man for my case. I was a jackass for attempting to cross the track ahead of that train."

Strange But True

Los Angeles, Calif., is about eighty miles further east than Reno, Nevada.

Pride Appeal and Pocketbook Appeal « «

the Chevrolet type of economical transportation has them both

NAME all the qualities of a motor car that go to inspire its owner with lasting pride—and you name the very things that make the new Chevrolet Six the Great Canadian Value.

The fine modern Chevrolet Six is listed as low as $635 (at factory, Oshawa, taxes extra). Match this low price—actually one of the lowest motor car prices in the world — with Chevrolet's desirable new features: A 20 per cent. increase in power! Smoother, more economical six-cylinder engine with down-draft carburetor! Silent Syncro-Mesh gear-shifting! Simplified Free Wheeling!

HORSES EARN THEIR KEEP

Experimental Farms Note

THERE ARE probably no more interesting or useful publications distributed by the Federal Department of Agriculture than the reports of the several Experimental Farms and Stations operated throughout Canada. They are replete with specific studies as to costs, yields, profits, and methods, which provide invaluable guides to the farmer in the profitable operation of his business.

W. W. Baird, superintendent of the Experimental Station at Nappan, N. S., in his current report provides a fine example of the practical nature of much of this material in his reference to the cost of horse labour. He shows on the one hand what it costs to keep a heavy draft horse on a yearly basis—$198.15; and charging against this the number of hours of horse labour worked during the year —1,925, he arrives at a cost of ten cents per hour. With this as a working basis he charges against the cost of horse labour—$192.60. the cost of feed during the year—$111.76, leaving a credit balance of $80.74, which the horse earned over cost of feed.

S. Ballantyne, Superintendent at the Kapuskasing Station, dealing with the same subject, supplies us with figures showing an average cost of horse labour per hour for 1930 of 6.6 cents, and this seems to be fairly well in line with his records which show an average of 6.3 cost per hour for the past eight years.

These figures provide a complete picture of the cost of horse labour because every element of cost has been taken into consideration, charges being made for feed, labour, interest on investment, shelter, harness and repairs, and shoeing.

If Experiment Farm reports filled no other office than to serve as a guide to the farmer in figuring his costs of operation, they would certainly more than fully repay the effort and cost involved in securing the datum and making it available to farmers in publication form.

TROTZKY FORESEES REVOLT OF SOVIET RUSSIAN WORKERS

A COLLAPSE of Soviet Russia's five-year plan is indicated in a series of articles contributed to the Los Angeles Examiner by Isaac Don Levine, borne in Russia, educated in the United States, for a time editor of the foreign news department of the New York Tribune, author of "Stalin" and biographer of Lenin. His exposure is the more effective in that it is based on official Soviet sources.

Mr. Levine gives the five-year plan credit for three achievements, still in the experimental stage, namely, a tremendous reduction in illiteracy, the modernization of primitive agriculture, and the erection of many metallurgical, chemical, and other industrial plants. On the other hand there have been eight definite and disastrous failures. Stalin's conduct of the five-year plan is said to have set Russia's national economy back at least twenty years.

Among the failures is the destruction of livestock by peasants on a scale unprecedented in history. According to official figures, the Soviet Union had in 1928 over 230,000,000 horned cattle, sheep and pigs. Then came Stalin's agrarian revolution. At the close of 1930, Grinko, one of Stalin's chief executives, stated that there were left in Russia less than 153,000,000 head of livestock. Within 18 months the peasants destroyed nearly 78,000,000 of their domestic animals for food. When one considers that these animals formed the most precious possession of the impoverished peasant one can visualize the despair responsible for the nation-wide slaughter. There is nothing in the five-year plan about the struggle for bread, meat, soap, clothing. As late as Nov. 18th, 1931, the Moscow Pravda, official organ of the Bolshevist Party, proclaimed the necessity of "mobilizing the masses in the struggle for bread."

Currency has been inflated for the second time since the revolution. The ruble is officially quoted by the State Bank in Moscow at 51 cents but actually it is worth about 2 cents. Hence the average worker's pay of 70 rubles a month condemns him and his family to semi-starvation. Why do the workers of the Soviet Union, the labour paradise, migrate continuously? Why does Stalin have to resort to special measures to keep them attached to their lathes? "The growth of the mobility of labour," answers Trotsky in a recent article, "signifies that in the conditions of the third year of the five-year plan the working classes do not feel quite happy." Trotzky adds this significant comment: "One should not be deceived; the physical movement of the workers may portend their political movement."

The collectivization of farming has not eradicated the instinct of private property in the peasant. The Soviet press is full of evidence that the large masses of the peasantry regard the produce of their labour as their own. So long as that produce consists largely of bread even the dictatorship is powerless to take it away from the people who need it. The transportation system has broken down and the housing cries in cities and towns is continually growing more acute. Mr. Levine concludes that Stalin's grandiose experiment, whatever the verdict of history may be, is a luxury which the harassed people of Russia did not court and which they can ill afford.

WHAT MAKES MILK QUALITY

Quality When Applied to Milk Embraces Five Factors

AS IT APPLIES to milk, the term "quality embraces five factors. These are: Food value, freedom from dirt, keep quality, safety to health, and freedom from off-flavours and odours. When determining the quality of milk supply either from the standpoint of the urban or rural producer all these factors in proper relation have to be considered.

As defined by the Division of Bacteriology of the Federal Department of Agriculture, the food value of milk apart from its vitamin content depends almost entirely on the amount of fat and not-fatty solids it contains. The richer the milk in these constituents, the higher its food value. The minimum standard set by Federal regulations requires 3.25 per cent and 8.50 per cent solids not fat, but a milk which barely conforms to this requirement would in these days of keen competition be unsatisfactory to the discriminating consumer. However, conditions have changed from that day when the richness of the milk could be determined by the depth of the cream layer at the top of the bottle. The reason for this lies in pasteurization, which tends to reduce the depth of the cream layer.

The bottom of the milk bottle is the gauge for the second quality factor—freedom from dirt. When the bottle is held up if there is an appreciable amount of dirt in the milk a noticeable sediment can be observed at the bottom of the bottle.

Good milk should keep at least 24 hours in a properly iced and cooled refrigerator, and spoilage in a shorter period indicates considerable growth of bacteria prior to delivery. Much dissatisfaction with respect to the keeping quality of milk arises from carelessness on the part of the consumers themselves in their neglect of the milk after it is delivered. Bottles of milk are often allowed to remain outside in the hot sun, or in a hot kitchen, for hours, while all too frequently the temperature in the refrigerator is far higher than it should be. Keeping quality is improved through pasteurization.

Milk may be rich and clean, and it may keep sweet for a long period, and yet be a source of danger to public health. Outbreaks of typhoid, scarlet fever, septic sore throat, and other diseases of human origin, in addition to that dread foe of children, bovine tuberculosis, have been traced to the milk supply time and time again. Safety to health is ensured in most large cities to-day through pasteurization, which, when done with the proper supervision, is universally regarded by public health authorities as being as near safe as milk can be made.

Pasteurization consists of heating milk to a temperature of 145 F. and then cooling rapidly to bottling temperature. Science claims this temperature is sufficient to kill all forms of germ life.

Milk which has a flavour or odour foreign to that of good, fresh milk should never be offered for human consumption, although at certain seasons of the year when plant growth is profuse it is almost impossible to avoid some food flavour.

Little Girl (to playmate): "So long, Elsie, momma's giving a party and I gotta go home and make percocious remarks."

GOOD THINGS TO EAT

By Etta Bitta Pye

Chocolate Pie

½ cup sugar
4 tablespoons cornstarch
1-3 cup cocoa
¼ teaspoon salt
1 teaspoon vanilla extract
3 cups scalded milk

Mix first 4 ingredients thoroughly; pour on milk slowly and mix to smooth paste. Return to double boiler; stir and cook until thick. Cover and cook 10 minutes. Add vanilla and pour into baked pie shell. Chill and, just before serving, spread thickly with sweetened whipped cream.

3 squares chocolate, cut in pieces and melted in the hot milk may be used in place of cocoa.

Butterscotch Pie

3 egg yolks
1 cup brown sugar
3½ tablespoons cornstarch
2 cups milk
¼ teaspoon salt
3 tablespoons butter
1 teaspoon vanilla extract

Beat egg yolks; add sugar mixed well with cornstarch; add milk and salt. Cook in double boiler until thick. Remove from fire; add butter and vanilla. Pour into a baked crust. Make a meringue of the egg whites beaten stiff with 3 tablespoons sugar and 1 teaspoon baking powder. Spread on pie, return to moderate oven at 325 deg. F., to brown or spread top with sweetened whip cream.

Pumpkin Pie

2 cups stewed and strained pumpkin (or canned pumpkin)
2 cups rich milk or cream
1 cup brown or granulated sugar
2 eggs
1 teaspoon salt
½ teaspoon ginger
2 teaspoons cinnamon
½ teaspoon allspice

Mix pumpkin with milk, sugar, beaten eggs, salt and spices, and beat 2 minutes. Pour into pie tin which has been lined with pastry. Place in hot oven at 475 deg. F. for 15 minutes, then lower heat to 400 deg. F. and bake about 45 minutes or until filling is firm.

Lemon Meringue Pie

2 cups boiling water
3 tablespoons cornstarch
2 tablespoons flour
1 cup sugar
3 eggs
4 tablespoons lemon juice
1 teaspoon grated lemon rind
1 teaspoon salt

Line pie plate loosely with plain pastry, prick and bake in oven at 500 deg. F. about 5 minutes until light brown. Mix cornstarch, flour and sugar with additional ½ cup cold water until smooth; mix in egg yolks; add slowly to boiling water. Cook 5 minutes, stirring constantly; add lemon juice, rind and salt; cool and pour into baked crust. Beat egg whites; add 3 tablespoons sugar and 1 teaspoon baking powder. Spread thickly on pie. Bake in moderate oven at 325 deg. F. about 10 minutes or until light brown.

Spicy Fruit Pie

¾ cup seeded raisins
2 cups finely cut citron or preserved water-melon rind
¾ cup brown sugar
2 tablespoons butter
2 cups hot water
2 tablespoons vinegar
Grate rind of ½ lemon
Grate rind of ½ orange
½ teaspoon cinnamon
½ teaspoon grated nutmeg

Place all ingredients in saucepan and cook slowly for 12 minutes. Thicken with 1 tablespoon cornstarch mixed with cold water; cool and pour into pie plate lined with pastry. Cover with pastry strips; bake in hot oven at 425 deg. F. until brown.

Liver and Bacon

Have liver cut in thin slices; wash, drain, dry and roll in flour. Put bacon thinly sliced into hot frying pan. turn until brown and transfer to hot platter. Fry liver quickly in the hot bacon drippings, turning often. When done put on platter with bacon. Pour off all but 1 or 2 tablespoons fat, add 1 to 2 tablespoons flour, and stir until brown. Add hot water gradually to make smooth gravy, season and boil 1 minute.

Church Road

We are sorry to report Mr. James J. Styles on the sick list.

Mrs. Ben Johnston, of Brinston, spent a few days last week with her sister, Mrs. Russell Link.

Mr. Lyman Ault, of Finch, was a recent guest of Mr. and Mrs. Ross Prunner.

Mrs. Melburn Hyslop, of Iroquois, spent Thursday with her parents, Mr. and Mrs. Simon Schwerdfeger.

Mrs. Bowman spent Friday afternoon with her sister, Mrs. Peter McIntosh, of Willamsburg.

Mrs. Evah Casselman returned home after spending the past two months with her mother, Mrs. Wm. Bowman, at Richville, N. Y.

Mrs. Murray Styles and children spent Thursday with Mr. and Mrs. Roland Froats.

Miss Grace Fetterly, Boucks Hill, spent last week with Miss Nellie Barkley.

The Ladies' Guild of Trinity Church held their monthly meeting for January at the home of Mrs. Roy Styles.

Mrs. Harry Bowman spent a few days recently with her parents, Mr. and Mrs. Jeff. Swerdfeger.

Much sympathy is extended to Mrs. Peter McIntosh and family, of Williamsburg, in their recent bereavement.

Payne Valley

Mrs. Hughie Shaver spent the past week with her daughter, Mrs. Bill Smith, Chesterville.

Mr. and Mrs. George Eligh, accompanied by Mr. Earl Stephenson, of Cornwall, and Mrs. Alfred Wells, of Aultsville, motored to Brockville on Tuesday and spent the day with Mrs. Leslie Stephenson and glad to say they found her very much improved.

Mr. and Mrs. Clayton Guernsey, of Wolfe Island, and Miss Rose Cameron spent a few days last week with Mrs. Lyle Hunter and Mr. Hunter, at Morewood.

Mr. and Mrs. Clayton Guernsey, Mrs. Kennie Cameron and daughter Rose spent one day last week with Mr. and Mrs. Cory Bush and Mrs. Leonard Cameron, Dixon.

Miss Maggie Morrison, teacher, spent the week end at her parental home in Avonmore.

Mr. and Mrs. George Eligh and Master Boyd Stephenson were calling on friends at Finch on Saturday.

Mr. and Mrs. Jas. McMillan spent one day last week at the latter's parental home, Mr. and Mrs. Alex McLean's.

Mr. Grant Nugent spent the week end with Messrs. Hughie and Johnnie Shaver.

Mr. Dan Campbell spent Friday with friends at Glen Sanfield.

S. S. No. 8, Winchester

Honour Roll. * Denotes Perfect Attendance. Names in Order of Merit.

Lights and Shades of London

SHIPS COME HOME

IN THE GREY DAWN liners from the Seven Seas slip into the docks of London; and men and women gather there to meet friends. Some even meet their sweethearts. They are the lucky ones.

It was not yet light. Dawn was a good hour away, and it was very cold. I was travelling away from London towards Woolwich in a jangling, dirty workman's train. On the platform at Fenchurch Street I had noticed several other people obviously on their way to meet friends, but they had been assimilated in the gloom of the long train; and I was glad, for I was enjoying myself in a carriage full of dock workers: a carriage that reeked of smoke and manly conversation. The train ploughed wearily on through the darkness, stopping at stations. . . . Stepney East . . . Burdett Road . . . Bromley . . . Canning Town . . . Bleak, unfriendly places under their pale lights. More early Londoners stormed the carriage at each station and split pleasantries rather like roadmen hitting a spike:

"Good mornin', Bil'. . . ."

"It ain't a goo' mornin'. It's a blinkin' cold mornin'!"

The laughter could not have been louder if the retort had been made by a judge or a king!

The conversation was both technical and sporting. The technical discussion centred round the life and shortcomings of a certain foreman, who, I gathered, although he knew less about a ship than a —— —— school-teacher, was, if not a man of iron, at least a man of blood. So they said. Football and racing! They knew the parentage, habits and hobbies of every league player, also the result of contests going right back to ancient times. They all had "a bit" on the three-thirty.

* * * *

North Woolwich! In the still air of dawn I could feel the nearness of shipping. I could not see much, but I knew that I was surrounded by ships. The docks were not awake. The steam winches were not screaming, the hammers were stilled; yet over the dark docks lay the presence of great ships home from sea. . . .

I walked on past the shrouded cranes, standing in their straight lines near the water's side. I came upon a tall ship looming up like a cliff. I could make out a man leaning over her deck far above. I asked him if this was the ship I wanted. He opened his mouth, there descended unwilling, curious sounds, like something trying hard to escape from his throat and then changing its mind and trying to get back again. I think he was talking Japanese.

So I walked along to the stern of the ship to read the name, and there I met another man gazing upward, too. It turned out that we were both looking for the same ship, so we walked on together.

"What an experience it is," he said. "I wonder how many people in London have ever done this. I'm generally asleep at this time of the morning. How early London wakes up. Think of those workmen's trains. . . ."

"Are you meeting a friend in the ——," I asked.

He coughed slightly and said, "Yes," and the way he said it told me that it was going to be a romantic occasion.

Then dawn. If there is anything more wonderful in London than dawn coming up over the tangled shipping of the docks I would like to know of it. First a silvery light in the air, a chilly greyness, then a flush in the east, and with startling suddenness every mast, every funnel, every leaning crane is silhouetted jet-black against the pearl-coloured sky. . . . Unreal . . . still . . . silent.

Gradually the docks awaken. Men walk along the wharfside, doors are opened. In the depths of little ships men rise and become busy with ropes; there is, from some, a smell of frying bacon; on tall ships mast lights grow pale in the dawn light, men in swinging cradles yawn and start painting a ship's hull, and from far off sounds the first hammer of a new day.

As light grows one's sense of smell increases. This is strange. The air is now full of a pungent smell of hemp and tow and tar, and even distant docks, stored with their merchandise, seem to contribute their part as the dawn wind blows.

High up in the sky there is a flush of pink cloud, such a delicate flamingo pink that changes, spreads, and fades even as you look. It becomes gold, and you know that at any moment the sun may rise up like a tocsin and call all the world to work.

We found the ship. A mountain she was, towering up above us with tiny holes in her side like the entrances to caves. She smelt of fried fish, bacon, and eggs and coffee. . . .

Soon after I was aboard I had to look the other way for I had seen my friend holding a girl in his arms and I had heard him say:

"And how are you, darling?"

"Splendid!" she cried. "Let me look at you! Come into the light.

So you see wonderful things happen to some people when tall ships come out of the Seven Seas and find their way to London Town.

Cornwall Blanks Winchester Free-For-All Mars Game

The Cornwall Colts won from the Winchester team in a game in the Central Ottawa Valley series at Cornwall Monday night by a score of 3 to 0, and thus left Winchester in sole possession of the basement position in the league. The Colts had only two alternate players to start against Winchester's ten men and for the last ten minutes of the match Scott and Jamieson did not figure in the play at all, having been banished for the rest of the game by Referee Frank MacMillan, of Ottawa, for fighting. At this stage in the proceedings the players and spectators mixed it on Winchester's end of the ice and a free-for-all seemed imminent for a few minutes.

Cornwall scored two snappy goals early in the second period and from then on there never was much doubt about the result, although Robertson was called on to save a couple of close ones from McLean, Seguin, and Scott. From the face-off in the last period the Colts scored twice at close quarters but were called back on each occasion. Parker and Jamieson teamed up nicely and the latter scored but it was called back again. McLean finally rushed alone and, eluding the opposing defence, placed the score at 3 to 0 for the Colts.

The teams:

Cornwall Colts—Robertson, Dupuis, Petepiece, Jamieson, Anderson, Parker; subs. McLean, McAteer.

Winchester—Workman, Scott, Seguin, H. McLean, Laushway, Carkner; subs., Pratt, Thompson, McDonald, Render.

Referee—Frank McMillan, Ottawa.

Sunnyside

Mr. Robert Steven, of Cannamore, returned home last Saturday morning to St. Albert's Station after spending a week with his uncle who lives at Dundee.

We are sorry to hear of so many people being on the sick list in our community: Mr. and Mrs. Henry Armstrong, our schoolteacher, Miss Winnifred Blair; and Grant Burd.

Mr. and Mrs. Charlie Aggett and son John spent Wednesday evening at the home of Mr. and Mrs. Alvin Burd.

Mr. Lorne Feeley spent Saturday afternoon at his parental home, Mr. and Mrs. Thos. Feeley's, at Cannamore.

Miss Elsie May Burd spent Friday afternoon with Mr. and Mrs. John Carruthers.

We are sorry to hear of Master Donald Carruthers being sick with la grippe, and hope he will be attending school again.

A number of our young people attended the dance on Monday evening at the home of Mr. and Mrs. Cyril Cockburn of Berwick.

Grantley

Mrs. Chas. McMillan spent Tuesday with her mother, Mrs. Jas. Wallace.

Mr. and Mrs. Angus Smith were guests on Sunday of Mrs. Jas. Wallace.

Mr. and Mrs. Wallace Myers motored to Ottawa on Sunday and spent the day with their son, Bert, and Mrs. Myers.

Mrs. Maurice Beckstead took supper on Friday with Mr. and Mrs. Howard Beckstead.

Mrs. Jas. Myers spent Monday with Mrs. M. O. Robinson.

Mrs. John Kittle is spending a few days with her father in Cornwall.

HOW TO CORRECT AUTOMOBILE SKID

"Skidding Wizard" of Great Gives Practical Advice

AFTER forty-six years in the service service of the London General Omnibus Company, Mr. Thomas Dale, the skidding wizard of Great Britain, has just recently retired. The last eleven years have been spent as a driving instructor. In this period of time he has created and corrected well over 1,000,000 skids. His advice on how to correct a back wheel skid is as follows:

Don't touch your brakes when the car begins to skid.

Release the accelerator pedal and ease the clutch.

Turn the front wheel in the direction of the skid; that is, if the rear wheels skid to the left, turn the steering wheel to the left. Turning the front wheels into the skid will check the spinning back wheels.

If possible, as soon as the wheels begin to grip, change into a lower gear and accelerate. The car should then straighten up.

For a front wheel skid, which is rarer and even more dangerous, the skidding champion advises:

Try to create a back-wheel skid by jamming on the brakes. This will swing the tail around. Then act as for a back wheel skid.

Skidding, according to Mr. Dale, can be avoided to a great extent by:

Driving in a careful manner on greasy roads so that sudden braking is avoided.

Accelerating gently.

Taking corners at a slow speed.

Avoiding sudden diversion of direction, such as pulling over suddenly to pass another vehicle.

Mrs. Eliza A. Russell Passes Was Resident of Colquhoun

It is with heartfelt sympathy that we record the death of Mrs. Eliza A. Russell, of the Colquhoun Settlement who passed away on Sunady at the home of her daughter, Mrs. Alfred McMahon, at the age of 72 years and six months. She had spent all of her life in the districts of Archer and Colquhoun, and although she had been in failing health for some time had been confined to her bed but three weeks. She bore her sufferings with much fortitude, never murmuring or repining her lot, her death being due to a complication of diseases.

She leaves to mourn her loss besides her husband, James M. Russell, five children: Mrs. Grace McMahon, with whom she resided; Mrs. Hattie E. Robbins, Keene, N. H., Arthur J. and Charles M. Russell, of Massena, N. Y.; Thomas J. Russell, of Archer; one step-daughter, Mrs. Obadiah Gallinger; also two sisters and one brother: Mr. Robert Shaw, Misses Mary and Elizabeth Shaw, all of Archer; twelve grandchildren, and one great-grandson, who have the sympathy of the community.

The funeral service was held at the Colquhoun United Church on Tuesday, being conducted by Rev. Mr. Russell, of Williamsburg. The choir sang "Draw Me Nearer, Nearer, Nearer, Blessed Lord," and "Abide With Me." Interment was made in the Colquhoun cemetery.

The pall bearers were: Samuel Kyle, Joseph Cheney, Charles May, and Walter Watson.

The floral offerings were a family wreat from the children, spray from Mr. and Mrs. Arthur Russell, Massena.

SKATING PARTY HELD

A skating party was held by Mr. W. N. Fulton's class of the United Sunday school last evening. Lunch was served afterwards in the Sunday School rooms.

Morewood

Mr. Robert Evans is spending a few days with friends in Ottawa.

Mr. and Mrs. Orrin Dilabough spent Friday with Mr. and Mrs. Ray Dillabough of Russell.

Miss Doris Wagner, of Montreal, is spending a few days with her parents, Mr. and Mrs. John Wagner.

Mr. and Mrs. Harry McGillvary, of St. Albert, called on Mrs. John Shaver on Thursday evening.

Mrs. John Shaver visited on Sunday with her daughter, Mr. and Mrs. Harry McGillvary, of St. Albert.

Miss Melba Steinberg visited Sunday with her cousin, Miss Evelyn Steinberg.

Mrs. Kenneth McIntosh and family, of Ormond, are spending a few days with Mr. and Mrs. Alex Dillabough.

There was a very large attendance at the oyster supper held in the United Church Hall on Monday night under the leadership of groups two and three of the Women's Association. After supper a good programme of moving pictures was given by Mr. Simpson, agricultural representative.

The regular meeting of the Women's Institute will be held at the home of Mrs. James Bogart on Tuesday, February 9th.

After a young lawyer had talked nearly five hours to a jury who felt like lynching him, his opponent in the case, a grizzled old veteran of the legal cockpit, rose, smiled sweetly at the judge, and jurymen, and said:

"Your Honour, I will follow the example of my young friend who has just concluded, and will submit the case without argument."

Riverside

The Misses Teressa Droppo and Viola McConnell and Mrs. Wm. McMillan were week-end visitors at the home of Mr. Dan Pollock.

Mrs. S. Hutt, Mr. and Mrs. Fay M. Droppo and Thelma. and Mr. I. G. Bogart were week-end visitors at the home of Mr. Robert C. Bogart.

Mr. C. Stewart, insurance agent, of Chesterville was a caller at Riverside on Monday.

Miss Ruth McIntosh spent the week end in Ottawa.

A number from here attended the regular meeting of the Y. P. S. in St. Paul's United Church, Berwick, Tuesday night.

Mr. and Mrs. John Rutley visited at the home of Mr. Dougal McMillan on Saturday.

Mrs. Clement Whitteker visited Mrs. Lewis Hutt on Wednesday.

Miss Eliza Thompson is a visitor at the home of Mrs. W. Whitteker.

Mrs. Wm. Starke and Mr. Alex Starke visited Mrs. C. Foster on Friday.

The regular meeting of the W.M.S. was held on Tuesday at the home of Mrs. C. Thompson, the president, who presided. The meeting was opened with two minutes of silent prayer and the Lord's prayer in unison. The hymn, "Take Time to be Holy," was sung, and the scripture lesson was taken from Luke 9 and 10, and Mrs. Alf Casselman led in prayer. The minutes of the last meeting were read and adopted. The roll was called, and the offering taken. Correspondence was read and discussed. Arrangements were made for the world's day of prayer for disarmament to be held in the church on February 12th, also the members decided to meet each day at 10.30 o'clock for prayer for the auxiliaries, missionaries, and the community. Mrs. L. Hutt was in charge of the twenty questions for the close of the year's work. Meeting closed with prayer. The next meeting will be in the church on February 12. A good attendance is hoped for.

Winchester Players Feted

The executive and members of the Winchester senior hockey team of the Central Ottawa Valley League were honoured at a banquet given by Hyman Bessin at his residence. Addresses were given by the vice-president, Jack Ault, who acted as chairman, and the coach, Ernest Kellogg, who congratulated the players on their fine showing. A vote of thanks was moved to Mr. Bessin by Nelson Dixon. Those assisting at the dinner were the Misses H. Sweet and Tessie Bessin.

Berwick Juniors Tie With League Leaders

In a scheduled game in Russell on Monday night in the Junior Central Ottawa Valley Hockey League, Berwick and Russell played to a 3-3 tie. McElroy and Hoople counted for the visitors in the first period, while Nichols, for Berwick, and Hay, for Russell, scored in the second. Fielding and Hay netted for the home team in the third session to tie the score.

The teams:

Berwick — Goal, Casselman; defence, Plantz and Nichols; centre, Hoople; wings, McElroy and McPherson; subs., McLean and McLaughlin.

Russell—Goal, McCaffrey; defence, Hay and L. Rombough; centre, A. Rombough; wings, Lemond and Fielding; subs., Lancaster, Gamble and Eadie.

Referee—Ed. Kenny.

Young Women's Association Holds Initial Meeting

The Young Women of Morewood United Church organized a Young Women's Society with the following officers:

Honourary President—Mrs. Armstrong,

President—Mrs. Walter Steven,

Vice-Pres.—Mrs. Olive Craik,

Recording and Press Sec'y—Mrs. W. J. Edgerton,

Temperance Herald—Mrs. Bogart,

Christian Steward Secretary—Miss C. Steven,

Strangers' Sec'y—Miss Lillie Swerdfeger,

Missionary Monthly Se'y—Mrs. Popplewell.

The January meeting was held at the home of Mrs. Craik, the president in charge. The devotional period was taken by Mrs. W. J. Edgerton and Mrs. R. Swerdfeger. Mrs. W. Steven gave a temperance reading. Mrs. Popplewell gave a talk on "Better Health in Korea. The February meeting will be held at Mrs. Dillabough's. The Roll Call to be answered with the name of a Bible owman.

Sevneth Ave., E., Osnabruck

Mr. and Mrs. George Brownell spent Sunday evening with Mr. and Mrs. Warner Campbell and family.

Miss Olive Bowman is spending a few days with Miss Blanche Summers at Aultsville.

Mr. and Mrs. George Summers spent Friday with Mr. and Mrs. Willis Ulman of Crysler.

The many friends of Mrs. John G. Otto are glad to hear that she is improving in health.

Miss Alice Winters is still confined to her bed.

Mr. and Mrs. Roy Brownell and Kathleen spent Saturday evening with Mr. and Mrs. John Brownell and Jean.

Miss Lottie Ostler is spending a few days with the Misses Avis and Vera Ostler.

Matilda Teachers' Salaries Suffer Substantial Reduction

Mr. Samuel D. Thorpe ,of Matilda, in presenting the ratepayers 'case before the Counties' Council said he was glad to note that council had already petitioned the Department of Education to reduce the two-year Normal School, required before teachers may secure a first class certificate. He felt that a teacher who is not a success after four years of teaching would be better at something else, and felt that the second year at Normal School is unnecessary if the teacher has ordinary common sense. He felt that teachers would not mind a cut in salary if the second year course were abolished, as the $1,500 to $2,000 they would save in this way would make up for the reduction in their pay. In Matilda Township, teachers' salaries have been cut from $100 to $300, and the teachers had taken it good naturedly.

Mary had a little car—
She thought 'twas out of gas,
One night she lit a match to see—
Above her waves the grass.

THE PLEASURES OF BEING HARD UP

By Mary Borden

Condensed from
Nash's Pall Mall Magazine

POVERTY has to do with the exhilaration of battle, the tonic of change, the excitement of discovery. I am not despising money as the root of all evil, but I have found that the Scriptural savings about rich men are true. I know one or two idle millionaires who are quite nice men, but not many. I cannot honestly call them interesting, although I am grateful to them for the hospitality of their big houses, big yachts, big motors. Most of them are pitiably cut off from the rest of the world.

Would I change with them? Yes, I suppose I would. But I'd be wrong. And I know what would become of me. In my present state of indigence I declare that I'm more interesting than any millionaire; but if I changed places, I know I'd become the Queen of the Bores, lose all my real friends, and be surrounded by new, unreal ones, as boring as myself. I might even become one of those old women whom I've watched at the big tables in the casino of Deauville or Monte Carlo—a woman incapable of laughter or love or adventurous curiosity, incapable of effort of any kind.

I've something better to do than that now. I must make money out of ideas, dreams and fancies. I've got to become a wizard alchemist and transform the flimsy stuff that floats through my head into gold. It's a difficult, even a mysterious process and a very exciting proposition, since my bread and butter depend on it. We must have enough money, but that word "enough" is a very variable term. Some men say they could do on ten thousand pounds a year ($50,000), some think that with a couple of hundred ($1,000) they could have everything they wanted. It's a stock question with the social agitator at political meetings, that "what would you consider a living wage for a working man with five children?"

Any change in an individual's circumstances that makes him poorer than he was contains elements of pleasure, even when it appears to be disagreeable. For variety is the spice of life, and monotony is death, and there is very little to choose between the deadening effects of poverty and monotonous riches. Change is what we all need; it is what the doctors invariably prescribe.

Now many of us had chance, and we didn't like it. But the real "cures" that people take are all disagreeable. For if we are given a chance, we choose invariably the same old thing simply because it's the only thing we know, and we know what we'll get out of it.

I once found an overdraft at the bank very stimulating. I am engaged in casual labour. I write novels, an occasional short story and newspaper articles. Though I think I work hard, I could, most certainly, work harder. But being naturally lazy, I don't like to work any more than any one else does. When I've finished a novel, I give an immense sigh of relief, sit back, fold my hands, relax and figuratively go to sleep. Actually I love sleep. I love to go to bed with a book and sleep twelve hours by the clock. If I lived to be eighty, I would have spent forty years of my life in oblivion. How can I not be grateful to my bank for not rousing me from this state of idiotic lethargy?

There are two elementary biological instincts in all living creatures. One is the instinct to move on, the other instinct is to lie down. The first belongs to youth, the second to old age. Children run instead of walking, youth seeks adventure. The great people of the world belong to the youth of the world. They are not to be compared to the massed millions that populate the earth. In most of us the instinct to push on dies quickly. As one grows older, it only continues to work under some outside stimulus.

Many things can stimulate a man or woman to push on. Fear, ambition, curiosity, love, envy and necessity are some of them. But necessity is the strongest. So I welcome the dramatic drop in my income which is a stimulant. For I am growing old and I do not want to grow old. I want to belong to the youth of the world, not only as outward apnearance go, but inwardly, too. I want a young mind and heart so that I can belong to the adventurous youth who climb Mount Everest and fly the Atlantic, or search endlessly for new forms of beauty in the world. I was drowsing when the crash came in Wall Street. That waked me with a vengeance. Sleepers awake in an earthquake. This was one, followed by others. I do not claim that the experience is a pleasant one. I hate it, and I am afraid, when I think that we might be ruined, that my children should suffer need and neglect. This fear brings with a new zest, born of necessity. The future is not so certain as it was. The future will be different to the past; but there will be opportunity for great exploring.

The Mr.: "Isn't it about time to have these windows cleaned?"

The Mrs.: "Why, they were cleaned only recently."

"How recently?"

"Two girls ago."

ON MAKING A LEFT TURN - - WITH NEON

New Neon Device Standardizes Left-Turn Indicators

RECENT newspaper announcements stated in no uncertain terms that the driver would be required by law to indicate his intention of making a left turn. Several devices for this purpose have been on the market, one of which is the large unwieldly wooden arm that swings up like a railroad crossing gate. This latter piece of equipment has been used by trucks with overhanging bodies that make the driver's left arm useless. Then, of course, we have the small manual units that are up on the windshield post in front of the driver, one on each side. On some swanky de luxe cars they have this right and left signal incorporated in the stop light unit. But like the old triangle four-wheel brake indicator there seems to be definite action to standardize this type of left-hand indicator equipment. That it should be both distinguishable by day and night is accepted. For this purpose an electric Neon device is now available. It is expected that through the installation of this device there will be a lessening in the number of accidents caused by last minute left-hand turns with the traffic close behind.

"A national inferiority complex has us in its grip," writes an eminent psychologist. It would seem that we have become timid and are not taking as much money away from one another as we formerly did.

HINTS THAT INCREASE INCUBATION EFFICIENCY

Experimental Farms Note

ATTENTION to detail during the actual process of incubation, whether this be natural or artificial, is not enough to ensure maximum results. From the time when the pullets have concluded their first season's laying, and have become yearling hens, their eventual use as breeders must be borne in mind.

A great deal of the bird's vitality has been given to egg production, and in order to rebuild its health, it must be forced into a period of rest and recuperation. This is best accomplished by removing the laying mash from the pens of all contemplated breeders around November 1st, thereby bringing on a moult, with consequent rest from laying. About the middle of January, or four or five weeks before eggs are required for incubation, laying mash is again supplied to the birds, thus bringing on good production when it is needed.

In those districts where alfalfa is grown, the hay will be found to provide an excellent means by which incubation results may be bettered. At the Exeprimental Station, Summerland, B. C., the breeding pens are littered with alfalfa hay for at least three months before hatching eggs are wanted, and during that time the birds are fed mangels as a supplementary green feed. This excellent combination gave 15.8 per cent better fertility than straw litter. It might be remarked that cod liver oil comprising 2 per cent of the mash, was used in both cases.

One of the reasons why artificial incubation does not always show such good results as when a hen is used as a hatching medium, is because proper care is not given to the handling of the eggs prior to incubating. An egg commences to incubate at a temperature approximating 68 degrees Farenheit. If hatching eggs are kept in a kitchen or living room, where the temperature, more often than not, exceeds this mark during the day, and is far below it during the night, it cannot be expected that good results may be achieved when such conditions prevail throughout the period when enough eggs are being collected to set an incubator.

Incubation results are to a great extent what the poultry man makes them.

The Canadian Hackney Horse Society in its annual report, points out that with feed particularly cheap at the present time, farmers are more interested in horses as the cheapest source of power than for many years.

Harold Keyes, a member of Winchester's fire brigade, was struck on the chin when the lid of a chemical tank which he was filling blew off, when fighting a fire there last Monday morning.

"He who puts his hand to the plough," shouted an agitator, "must not turn back!"

"What's he to do when he gets to the end of the furrow?" asked a man in the crowd."

HORSES EARN THEIR KEEP

Experimental Farms Note

THERE ARE probably no more interesting or useful publications distributed by the Federal Department of Agriculture than the reports of the several Experimental Farms and Stations operated throughout Canada. They are replete with specific studies as to costs, yields, profits, and methods, which provide invaluable guides to the farmer in the profitable operation of his business.

W. W. Baird, superintendent of the Experimental Station at Nappan, N. S., in his current report provides a fine example of the practical nature of much of this material in his reference to the cost of horse labour. He shows on the one hand what it costs to keep a heavy draft horse on a yearly basis—$198.15; and charging against this the number of hours of horse labour worked during the year —1,925, he arrives at a cost of ten cents per hour. With this as a working basis he charges against the cost of horse labour—$192.60. the cost of feed during the year—$111.76, leaving a credit balance of $80.74, which the horse earned over cost of feed.

S. Ballantyne, Superintendent at the Kapuskasing Station, dealing with the same subject, supplies us with figures showing an average cost of horse labour per hour for 1930 of 6.6 cents, and this seems to be fairly well in line with his records which show an average of 6.3 cost per hour for the past eight years.

These figures provide a complete picture of the cost of horse labour because every element of cost has been taken into consideration, charges being made for feed, labour, interest on investment, shelter, harness and repairs, and shoeing.

If Experiment Farm reports filled no other office than to serve as a guide to the farmer in figuring his costs of operation, they would certainly more than fully repay the effort and cost involved in securing the datum and making it available to farmers in publication form.

TROTZKY FORESEES REVOLT OF SOVIET RUSSIAN WORKERS

A COLLAPSE of Soviet Russia's five-year plan is indicated in a series of articles contributed to the Los Angeles Examiner by Isaac Don Levine, borne in Russia, educated in the United States, for a time editor of the foreign news department of the New York Tribune, author of "Stalin" and biographer of Lenin. His exposure is the more effective in that it is based on official Soviet sources.

Mr. Levine gives the five-year plan credit for three achievements, still in the experimental stage, namely, a tremendous reduction in illiteracy, the modernization of primitive agriculture, and the erection of many metallurgical, chemical, and other industrial plants. On the other hand there have been eight definite and disastrous failures. Stalin's conduct of the five-year plan is said to have set Russia's national economy back at least twenty years.

Among the failures is the destruction of livestock by peasants on a scale unprecedented in history. According to official figures, the Soviet Union had in 1928 over 230,000,000 horned cattle, sheep and pigs. Then came Stalin's agrarian revolution. At the close of 1930, Grinko, one of Stalin's chief executives, stated that there were left in Russia less than 153,000,000 head of livestock. Within 18 months the peasants destroyed nearly 78,000,000 of their domestic animals for food. When one considers that these animals formed the most precious possession of the impoverished peasant one can visualize the despair responsible for the nation-wide slaughter. There is nothing in the five-year plan about the struggle for bread, meat, soap, clothing. As late as Nov. 18th, 1931, the Moscow Pravda, official organ of the Bolshevist Party, proclaimed the necessity of "mobilizing the masses in the struggle for bread."

Currency has been inflated for the second time since the revolution. The ruble is officially quoted by the State Bank in Moscow at 51 cents but actually it is worth about 2 cents. Hence the average worker's pay of 70 rubles a month condemns him and his family to semi-starvation. Why do the workers of the Soviet Union, the labour paradise, migrate continuously? Why does Stalin have to resort to special measures to keep them attached to their lathes? "The growth of the mobility of labour," answers Trotsky in a recent article, "signifies that in the conditions of the third year of the five-year plan the working classes do not feel quite happy." Trotzky adds this significant comment: "One should not be deceived; the physical movement of the workers may portend their political movement."

The collectivization of farming has not eradicated the instinct of private property in the peasant. The Soviet press is full of evidence that the large masses of the peasantry regard the produce of their labour as their own. So long as that produce consists largely of bread even the dictatorship is powerless to take it away from the people who need it. The transportation system has broken down and the housing cries in cities and towns is continually growing more acute. Mr. Levine concludes that Stalin's grandiose experiment, whatever the verdict of history may be, is a luxury which the harassed people of Russia did not court and which they can ill afford.

WHAT MAKES MILK QUALITY

Quality When Applied to Milk Embraces Five Factors

AS IT APPLIES to milk, the term "quality embraces five factors. These are: Food value, freedom from dirt, keep quality, safety to health, and freedom from off-flavours and odours. When determining the quality of milk supply either from the standpoint of the urban or rural producer all these factors in proper relation have to be considered.

As defined by the Division of Bacteriology of the Federal Department of Agriculture, the food value of milk apart from its vitamin content depends almost entirely on the amount of fat and not-fatty solids it contains. The richer the milk in these constituents, the higher its food value. The minimum standard set by Federal regulations requires 3.25 per cent and 8.50 per cent solids not fat, but a milk which barely conforms to this requirement would in these days of keen competition be unsatisfactory to the discriminating consumer. However, conditions have changed from that day when the richness of the milk could be determined by the depth of the cream layer at the top of the bottle. The reason for this lies in pasteurization, which tends to reduce the depth of the cream layer.

The bottom of the milk bottle is the gauge for the second quality factor—freedom from dirt. When the bottle is held up if there is an appreciable amount of dirt in the milk a noticeable sediment can be observed at the bottom of the bottle.

Good milk should keep at least 24 hours in a properly iced and cooled refrigerator, and spoilage in a shorter period indicates considerable growth of bacteria prior to delivery. Much dissatisfaction with respect to the keeping quality of milk arises from carelessness on the part of the consumers themselves in their neglect of the milk after it is delivered. Bottles of milk are often allowed to remain outside in the hot sun, or in a hot kitchen, for hours, while all too frequently the temperature in the refrigerator is far higher than it should be. Keeping quality is improved through pasteurization.

Milk may be rich and clean, and it may keep sweet for a long period, and yet be a source of danger to public health. Outbreaks of typhoid, scarlet fever, septic sore throat, and other diseases of human origin, in addition to that dread foe of children, bovine tuberculosis, have been traced to the milk supply time and time again. Safety to health is ensured in most large cities to-day through pasteurization, which, when done with the proper supervision, is universally regarded by public health authorities as being as near safe as milk can be made.

Pasteurization consists of heating milk to a temperature of 145 F. and then cooling rapidly to bottling temperature. Science claims this temperature is sufficient to kill all forms of germ life.

Milk which has a flavour or odour foreign to that of good, fresh milk should never be offered for human consumption, although at certain seasons of the year when plant growth is profuse it is almost impossible to avoid some food flavour.

Little Girl (to playmate): "So long, Elsie, momma's giving a party and I gotta go home and make percocious remarks."

GOOD THINGS TO EAT

By Etta Bitta Pye

Chocolate Pie

½ cup sugar
4 tablespoons cornstarch
1-3 cup cocoa
¼ teaspoon salt
1 teaspoon vanilla extract
3 cups scalded milk

Mix first 4 ingredients thoroughly; pour on milk slowly and mix to smooth paste. Return to double boiler; stir and cook until thick. Cover and cook 10 minutes. Add vanilla and pour into baked pie shell. Chill and, just before serving, spread thickly with sweetened whipped cream.

3 squares chocolate, cut in pieces and melted in the hot milk may be used in place of cocoa.

Butterscotch Pie

3 egg yolks
1 cup brown sugar
3½ tablespoons cornstarch
2 cups milk
¼ teaspoon salt
3 tablespoons butter
1 teaspoon vanilla extract

Beat egg yolks; add sugar mixed well with cornstarch; add milk and salt. Cook in double boiler until thick. Remove from fire; add butter and vanilla. Pour into a baked crust. Make a meringue of the egg whites beaten stiff with 3 tablespoons sugar and 1 teaspoon baking powder. Spread on pie, return to moderate oven at 325 deg. F., to brown or spread top with sweetened whip cream.

Pumpkin Pie

2 cups stewed and strained pumpkin (or canned pumpkin)
2 cups rich milk or cream
1 cup brown or granulated sugar
2 eggs
1 teaspoon salt
½ teaspoon ginger
2 teaspoons cinnamon
½ teaspoon allspice

Mix pumpkin with milk, sugar, beaten eggs, salt and spices, and beat 2 minutes. Pour into pie tin which has been lined with pastry. Place in hot oven at 475 deg. F. for 15 minutes, then lower heat to 400 deg. F. and bake about 45 minutes or until filling is firm.

Lemon Meringue Pie

2 cups boiling water
3 tablespoons cornstarch
2 tablespoons flour
1 cup sugar
3 eggs
4 tablespoons lemon juice
1 teaspoon grated lemon rind
1 teaspoon salt

Line pie plate loosely with plain pastry, prick and bake in oven at 500 deg. F. about 5 minutes until light brown. Mix cornstarch, flour and sugar with additional ½ cup cold water until smooth; mix in egg yolks; add slowly to boiling water. Cook 5 minutes, stirring constantly; add lemon juice, rind and salt; cool and pour into baked crust. Beat egg whites; add 3 tablespoons sugar and 1 teaspoon baking powder. Spread thickly on pie. Bake in moderate oven at 325 deg. F. about 10 minutes or until light brown.

Spicy Fruit Pie

¾ cup seeded raisins
2 cups finely cut citron or preserved water-melon rind
¾ cup brown sugar
2 tablespoons butter
2 cups hot water
2 tablespoons vinegar
Grate rind of ½ lemon
Grate rind of ½ orange
½ teaspoon cinnamon
½ teaspoon grated nutmeg

Place all ingredients in saucepan and cook slowly for 12 minutes. Thicken with 1 tablespoon cornstarch mixed with cold water; cool and pour into pie plate lined with pastry. Cover with pastry strips; bake in hot oven at 425 deg. F. until brown.

Liver and Bacon

Have liver cut in thin slices; wash, drain, dry and roll in flour. Put bacon thinly sliced into hot frying pan. turn until brown and transfer to hot platter. Fry liver quickly in the hot bacon drippings, turning often. When done put on platter with bacon. Pour off all but 1 or 2 tablespoons fat, add 1 to 2 tablespoons flour, and stir until brown. Add hot water gradually to make smooth gravy, season and boil 1 minute.

Church Road

We are sorry to report Mr. James J. Styles on the sick list.

Mrs. Ben Johnston, of Brinston, spent a few days last week with her sister, Mrs. Russell Link.

Mr. Lyman Ault, of Finch, was a recent guest of Mr. and Mrs. Ross Prunner.

Mrs. Melburn Hyslop, of Iroquois, spent Thursday with her parents, Mr. and Mrs. Simon Schwerdfeger.

Mrs. Bowman spent Friday afternoon with her sister, Mrs. Peter McIntosh, of Willamsburg.

Mrs. Evah Casselman returned home after spending the past two months with her mother, Mrs. Wm. Bowman, at Richville, N. Y.

Mrs. Murray Styles and children spent Thursday with Mr. and Mrs. Roland Froats.

Miss Grace Fetterly, Boucks Hill, spent last week with Miss Nellie Barkley.

The Ladies' Guild of Trinity Church held their monthly meeting for January at the home of Mrs. Roy Styles.

Mrs. Harry Bowman spent a few days recently with her parents, Mr. and Mrs. Jeff. Swerdfeger.

Much sympathy is extended to Mrs. Peter McIntosh and family, of Williamsburg, in their recent bereavement.

Payne Valley

Mrs. Hughie Shaver spent the past week with her daughter, Mrs. Bill Smith, Chesterville.

Mr. and Mrs. George Eligh, accompanied by Mr. Earl Stephenson, of Cornwall, and Mrs. Alfred Wells, of Aultsville, motored to Brockville on Tuesday and spent the day with Mrs. Leslie Stephenson and glad to say they found her very much improved.

Mr. and Mrs. Clayton Guernsey, of Wolfe Island, and Miss Rose Cameron spent a few days last week with Mrs. Lyle Hunter and Mr. Hunter, at Morewood.

Mr. and Mrs. Clayton Guernsey, Mrs. Kennie Cameron and daughter Rose spent one day last week with Mr. and Mrs. Cory Bush and Mrs. Leonard Cameron, Dixon.

Miss Maggie Morrison, teacher, spent the week end at her parental home in Avonmore.

Mr. and Mrs. George Eligh and Master Boyd Stephenson were calling on friends at Finch on Saturday.

Mr. and Mrs. Jas. McMillan spent one day last week at the latter's parental home, Mr. and Mrs. Alex McLean's.

Mr. Grant Nugent spent the week end with Messrs. Hughie and Johnnie Shaver.

Mr. Dan Campbell spent Friday with friends at Glen Sanfield.

S. S. No. 8, Winchester

Lights and Shades of London

SHIPS COME HOME

IN THE GREY DAWN liners from the Seven Seas slip into the docks of London; and men and women gather there to meet friends. Some even meet their sweethearts. They are the lucky ones.

It was not yet light. Dawn was a good hour away, and it was very cold. I was travelling away from London towards Woolwich in a jangling, dirty workman's train. On the platform at Fenchurch Street I had noticed several other people obviously on their way to meet friends, but they had been assimilated in the gloom of the long train; and I was glad, for I was enjoying myself in a carriage full of dock workers: a carriage that reeked of smoke and manly conversation. The train ploughed wearily on through the darkness, stopping at stations. . . . Stepney East . . . Burdett Road . . . Bromley . . . Canning Town . . . . Bleak, unfriendly places under their pale lights. More early Londoners stormed the carriage at each station and split pleasantries rather like roadmen hitting a spike:

"Good mornin', Bil'. . . ."

"It ain't a goo' mornin'. It's a blinkin' cold mornin'!"

The laughter could not have been louder if the retort had been made by a judge or a king!

The conversation was both technical and sporting. The technical discussion centred round the life and shortcomings of a certain foreman, who, I gathered, although he knew less about a ship than a —— —— school-teacher, was, if not a man of iron, at least a man of blood. So they said. Football and racing! They knew the parentage, habits and hobbies of every league player, also the result of contests going right back to ancient times. They all had "a bit" on the three-thirty.

* * * *

North Woolwich! In the still air of dawn I could feel the nearness of shipping. I could not see much, but I knew that I was surrounded by ships. The docks were not awake. The steam winches were not screaming, the hammers were stilled; yet over the dark docks lay the presence of great ships home from sea. . . .

I walked on past the shrouded cranes, standing in their straight lines near the water's side. I came upon a tall ship looming up like a cliff. I could make out a man leaning over her deck far above. I asked him if this was the ship I wanted. He opened his mouth, there descended unwilling, curious sounds, like something trying hard to escape from his throat and then changing its mind and trying to get back again. I think he was talking Japanese.

So I walked along to the stern of the ship to read the name, and there I met another man gazing upward, too. It turned out that we were both looking for the same ship, so we walked on together.

"What an experience it is," he said. "I wonder how many people in London have ever done this. I'm generally asleep at this time of the morning. How early London wakes up. Think of those workmen's trains. . . ."

"Are you meeting a friend in the ——," I asked.

He coughed slightly and said, "Yes," and the way he said it told me that it was going to be a romantic occasion.

Then dawn. If there is anything more wonderful in London than dawn coming up over the tangled shipping of the docks I would like to know of it. First a silvery light in the air, a chilly greyness, then a flush in the east, and with startling suddenness every mast, every funnel, every leaning crane is silhouetted jet-black against the pearl-coloured sky. . . . Unreal . . . still . . . silent.

Gradually the docks awaken. Men walk along the wharfside, doors are opened. In the depths of little ships men rise and become busy with ropes; there is, from some, a smell of frying bacon; on tall ships mast lights grow pale in the dawn light, men in swinging cradles yawn and start painting a ship's hull, and from far off sounds the first hammer of a new day.

As light grows one's sense of smell increases. This is strange. The air is now full of a pungent smell of hemp and tow and tar, and even distant docks, stored with their merchandise, seem to contribute their part as the dawn wind blows.

High up in the sky there is a flush of pink cloud, such a delicate flamingo pink that changes, spreads, and fades even as you look. It becomes gold, and you know that at any moment the sun may rise up like a tocsin and call all the world to work.

We found the ship. A mountain she was, towering up above us with tiny holes in her side like the entrances to caves. She smelt of fried fish, bacon, and eggs and coffee. . . .

Soon after I was aboard I had to look the other way for I had seen my friend holding a girl in his arms and I had heard him say:

"And how are you, darling?"

"Splendid!" she cried. "Let me look at you! Come into the light.

So you see wonderful things happen to some people when tall ships come out of the Seven Seas and find their way to London Town.

Cornwall Blanks Winchester Free-For-All Mars Game

The Cornwall Colts won from the Winchester team in a game in the Central Ottawa Valley series at Cornwall Monday night by a score of 3 to 0, and thus left Winchester in sole possession of the basement position in the league. The Colts had only two alternate players to start against Winchester's ten men and for the last ten minutes of the match Scott and Jamieson did not figure in the play at all, having been banished for the rest of the game by Referee Frank MacMillan, of Ottawa, for fighting. At this stage in the proceedings the players and spectators mixed it on Winchester's end of the ice and a free-for-all seemed imminent for a few minutes.

Cornwall scored two snappy goals early in the second period and from then on there never was much doubt about the result, although Robertson was called on to save a couple of close ones from McLean, Seguin, and Scott. From the face-off in the last period the Colts scored twice at close quarters but were called back on each occasion. Parker and Jamieson teamed up nicely and the latter scored but it was called back again. McLean finally rushed alone and, eluding the opposing defence, placed the score at 3 to 0 for the Colts.

The teams:

Cornwall Colts—Robertson, Dupuis, Petepiece, Jamieson, Anderson, Parker; subs. McLean, McAteer.

Winchester—Workman, Scott, Seguin, H. McLean, Laushway, Carkner; subs., Pratt, Thompson, McDonald, Render.

Referee—Frank McMillan, Ottawa.

Sunnyside

Mr. Robert Steven, of Cannamore, returned home last Saturday morning to St. Albert's Station after spending a week with his uncle who lives at Dundee.

We are sorry to hear of so many people being on the sick list in our community: Mr. and Mrs. Henry Armstrong, our schoolteacher, Miss Winnifred Blair; and Grant Burd.

Mr. and Mrs. Charlie Aggett and son John spent Wednesday evening at the home of Mr. and Mrs. Alvin Burd.

Mr. Lorne Feeley spent Saturday afternoon at his parental home, Mr. and Mrs. Thos. Feeley's, at Cannamore.

Miss Elsie May Burd spent Friday afternoon with Mr. and Mrs. John Carruthers.

We are sorry to hear of Master Donald Carruthers being sick with la grippe, and hope he will be attending school again.

A number of our young people attended the dance on Monday evening at the home of Mr. and Mrs. Cyril Cockburn of Berwick.

Grantley

Mrs. Chas. McMillan spent Tuesday with her mother, Mrs. Jas. Wallace.

Mr. and Mrs. Angus Smith were guests on Sunday of Mrs. Jas. Wallace.

Mr. and Mrs. Wallace Myers motored to Ottawa on Sunday and spent the day with their son, Bert, and Mrs. Myers.

Mrs. Maurice Beckstead took supper on Friday with Mr. and Mrs. Howard Beckstead.

Mrs. Jas. Myers spent Monday with Mrs. M. O. Robinson.

Mrs. John Kittle is spending a few days with her father in Cornwall.

HOW TO CORRECT AUTOMOBILE SKID

"Skidding Wizard" of Great Gives Practical Advice

AFTER forty-six years in the service service of the London General Omnibus Company, Mr. Thomas Dale, the skidding wizard of Great Britain, has just recently retired. The last eleven years have been spent as a driving instructor. In this period of time he has created and corrected well over 1,000,000 skids. His advice on how to correct a back wheel skid is as follows:

Don't touch your brakes when the car begins to skid.

Release the accelerator pedal and ease the clutch.

Turn the front wheel in the direction of the skid; that is, if the rear wheels skid to the left, turn the steering wheel to the left. Turning the front wheels into the skid will check the spinning back wheels.

If possible, as soon as the wheels begin to grip, change into a lower gear and accelerate. The car should then straighten up.

For a front wheel skid, which is rarer and even more dangerous, the skidding champion advises:

Try to create a back-wheel skid by jamming on the brakes. This will swing the tail around. Then act as for a back wheel skid.

Skidding, according to Mr. Dale, can be avoided to a great extent by:

Driving in a careful manner on greasy roads so that sudden braking is avoided.

Accelerating gently.

Taking corners at a slow speed.

Avoiding sudden diversion of direction, such as pulling over suddenly to pass another vehicle.

Mrs. Eliza A. Russell Passes Was Resident of Colquhoun

It is with heartfelt sympathy that we record the death of Mrs. Eliza A. Russell, of the Colquhoun Settlement who passed away on Sunady at the home of her daughter, Mrs. Alfred McMahon, at the age of 72 years and six months. She had spent all of her life in the districts of Archer and Colquhoun, and although she had been in failing health for some time had been confined to her bed but three weeks. She bore her sufferings with much fortitude, never murmuring or repining her lot, her death being due to a complication of diseases.

She leaves to mourn her loss besides her husband, James M. Russell, five children: Mrs. Grace McMahon, with whom she resided; Mrs. Hattie E. Robbins, Keene, N. H., Arthur J. and Charles M. Russell, of Massena, N. Y.; Thomas J. Russell, of Archer; one step-daughter, Mrs. Obadiah Gallinger; also two sisters and one brother: Mr. Robert Shaw, Misses Mary and Elizabeth Shaw, all of Archer; twelve grandchildren, and one great-grandson, who have the sympathy of the community.

The funeral service was held at the Colquhoun United Church on Tuesday, being conducted by Rev. Mr. Russell, of Williamsburg. The choir sang "Draw Me Nearer, Nearer, Nearer, Blessed Lord," and "Abide With Me." Interment was made in the Colquhoun cemetery.

The pall bearers were: Samuel Kyle, Joseph Cheney, Charles May, and Walter Watson.

The floral offerings were a family wreat from the children, spray from Mr. and Mrs. Arthur Russell, Massena.

SKATING PARTY HELD

A skating party was held by Mr. W. N. Fulton's class of the United Sunday school last evening. Lunch was served afterwards in the Sunday School rooms.

Morewood

Mr. Robert Evans is spending a few days with friends in Ottawa.

Mr. and Mrs. Orrin Dillabough spent Friday with Mr. and Mrs. Ray Dillabough of Russell.

Miss Doris Wagner, of Montreal, is spending a few days with her parents, Mr. and Mrs. John Wagner.

Mr. and Mrs. Harry McGillvary, of St. Albert, called on Mrs. John Shaver on Thursday evening.

Mrs. John Shaver visited on Sunday with her daughter, Mr. and Mrs. Harry McGillvary, of St. Albert.

Miss Melba Steinberg visited Sunday with her cousin, Miss Evelyn Steinberg.

Mrs. Kenneth McIntosh and family, of Ormond, are spending a few days with Mr. and Mrs. Alex Dillabough.

There was a very large attendance at the oyster supper held in the United Church Hall on Monday night under the leadership of groups two and three of the Women's Association. After supper a good programme of moving pictures was given by Mr. Simpson, agricultural representative.

The regular meeting of the Women's Institute will be held at the home of Mrs. James Bogart on Tuesday, February 9th.

After a young lawyer had talked nearly five hours to a jury who felt like lynching him, his opponent in the case, a grizzled old veteran of the legal cockpit, rose, smiled sweetly at the judge, and jurymen, and said:

"Your Honour, I will follow the example of my young friend who has just concluded, and will submit the case without argument."
