JAS. CURRIE - CRYSLER

Russell 5, Chesterville 2

In the league hockey game at Russell on Monday night Chesterville had another game chalked up against them by a score of 5 to 2. Lack of condition lost the game, when after having set the pace for half of the game and the score two to nothing in their favor they had shot their bolt and Russell took a hand in the scoring, rolling in five counters before the final whistle. Chesterville was without the services of Foster which probably accounts for the defeat.

Burglars Get Long Terms

(Cornwall Freeholder)

On Monday morning Willie Morpaw, who was found guilty of stealing goods from Hall Bros. and Fawthrop Bros., and of assulting Constable Uren, was sentenced by Police Magistrate Danis to five years in Kingston penitentiary on one of the robbery charges and to two years on the assault charge, while sentence was suspended on the second robbery charge.

On Friday morning Coral Fitzpatrick, William Thompson and Ernest Guay appeared before Judge O'Reilly to answer to charges of burglary at Chesterville, where they broke into H. J. McMahon's store, and at Cornwall where they robbed S. W. Jacobs' store, and pleaded guilty. Fitzpatrick's record showed that he had been let go on suspended sentence on a robbery charge in Winnipeg in 1917. The prisoners were remanded till Monday, when Judge O'Reilly gave Fitzpatrick four years in Kingston, and Thompson and Guay 23 months each in the Ontario Reformatory at Burwash, Ontario. The prisoners were taken away on Tuesday.

Chesterville 6, Cannamore 2

Last Friday night when the Cannamore hockey club invaded Maple Leaf Arena the ice conditions were the best of the season so far and some good hockey was played notwithstanding that the score was some what topsided in favor of Chesterville by 6 goals to 2.

Cannamore were at a disadvantage in starting the first period lacking some of their regular line up but managed to hold their own against their heavier opponents ending with one goal each.

The second period was the best of the game when each found the nets for only one counter. Cannamore came strong in this period and had the better of the play at practically all stages. Several of the second string bunch of the home team were given a try out and found their work cut out for them from the facing of the puck. In the last period the full Chesterville team made somewhat of a runaway with the game when they scored four goals without allowing their opponents a look in.

Cannamore has a good team of light players but had not the weight to make their play more effective.

The line up.

Chesterville		Cannamore
Rady	Goal	Campbell
Bogart	Point	Nado
Braithwaite	Cover Point	O'Neil
Foster	Centre	Marcellus
McElroy	Wing	Laughridge
Clarmo	Wing	Ouderkirk

Grand Carnival Feb. 18

The Chesterville Rink Association has arranged for one of the grandest fetes in many years, a treat for old and young, featuring the grandeur of Drury Lane and Barnum's Hippodrome, with a full complement of clowns, the fat man, slim man, tall man, short man, fire brigade of the sunny south, mountain lion, wild men from Africa, and many castes too numerous to mention. We solicit the talent of each and every one to dress fittingly as the judging will be upon the merit of the individual only. All masqueraders will assemble at the the post office square and join in the parade along the main streets of the town accompanied by the ~~Fife and Drum band~~ and Citizens' band to the ~~Arena,~~ where all those in costume must register at the ticket office.

The Glengarry News refers to our team as the champions of the Upper "Ottawa Valley". We feel almost sure this is a misprint for Nation Valley.

Mrs. Amanda M. Wells

There passed away on Sunday, January 26th an esteemed and highly respected resident of Aultsville, in the person of Mrs. Amanda Wells, aged 74 years. Deceased had not been very well for sometime but while attending the funeral of her son, Curtis, of Kingston, had contracted a heavy cold which developed into plurisy. She was able to be around until two weeks ago when she became confined to her bed where on Sunday evening after calling her children one by one to her bedside, bidding them farewell and telling them she was going home, passed peacefully away surrounded by all the members of her family, except her son Edward of Belleville and daughter Catherine of Kingston, who were unable to get down on account of no train connections. She is survived by three daughters:—Mrs. Robert Bogart of Berwick, Mrs. William Dafoe, of Aultsville, who were constantly at her bedside for the last ten days; Mrs. Dr. Bogart, Kingston, and three sons—George of Aultsville, Durham of Williamsburg and Edward of Belleville. Two sisters—Mrs. Edwin Rupert of Lunenburg, Mrs. Howard Carrington of Ottawa and one brother, Roland of Michigan. Her husband predeceased her 11 years ago.

The funeral took place from her son's residence to the Methodist church of which she was a life long member, where an impressive sermon was preached by the pastor, Rev. Mr. Baldwin, after which the remains were laid to rest in the family plot beside her husband. Beautiful floral tributes were placed on the casket by the members of her family. Many friends were present from Kingston, Finch, Lunenburg, Newington, Williamsburg and other places.

The pall-bearers were Messrs. S. Loucks, T. B. Dafoe, H. Lapointe, C. Bush, S. Gove and L. McNairn.

The members of her family have the sympathy of the community in the loss of a kind and loving mother, always ready and willing to lend a helping hand in every good work.

If you break a lens or a frame of your eye glasses Mr. A. E. Bolster can fix it for you—day or night every day—at W. G. Bolster's Drug Store, Chesterville.

SUBSCRIPTION RATES

The rates of subscription for The Record are now as follows:

To any address in Canada
12 months for $1.50
6 months for 75c.
4 months for 50c.

To United States $2.00 per year.

All payable in advance.

Ice Storage

(Farmers, cut this out)

We will commence to cut ice as soon as possible. First hole will be cut at Bailey's Bush. Patrons are requested to commence drawing as soon as notified, this will keep the cost down to a minimum.

Cooling of milk during summer months will be required. More cooling means less loss.

February Milk Price—12.90.

Harris Vs. Laundry.

A case that has created a considerable amount of interest to the farmers of this part, was heard and disposed of at the division Court which was held at Finch on the 16th, inst., when his honor, Judge Liddle quashed a conviction made by James Pollock, J. P., of Berwick, with costs. It appears that in August last, Mr. D. Harris of Russell, a milk tester employed by the factory west of here, known as the Johnston factory, when making tests in said factory, found the milk of H. Laundry, a patron to test at the factory 2.8% and 2.9% respectively, at two different tests. Other samples testing 3% and upwards. Mr. Harris before leaving, left his official test record, which was posted up for the patrons' inspection, showing that the samples tested 3% and over. That would be about Aug. 23rd. On the 29th. of August Mr. Mitchell an instructor, came to this factory andtested Mr. Laundry's milk in the morning and found the test to be 3.6%. Mr. Harris went to the Laundry farm the same day and made a herd test which also showed 3.6 per cent. Both tests made on the same day, by different testers, showed the same amount of butter fat. Mr. Harris then went and laid a complaint before James Pollock, J. P., charging Mr. Laundry with delivering milk to a cheese factory in an adulterated form, or milk that had part of the cream removed. The hearing was called to take place in the township hall, Berwick.

Several dates were fixed for the opening of said Court but owing to so much sickness and other causes, Court was not opened until Sept. 28th, and was immediately adjourned, owing to so much sickness and only one party in attendance. On Oct. 5th. a hearing was held when Professor L. Zuefelt, of Kingston and Mr. Mitchell attended and gave professional evidence. Both of these men gave evidences to go to show that Laundry's milk should have tested higher and looked suspicious but would not swear positively that fat had been removed from sample sent to factory on Aug. 23rd. In order to make a stronger case, Mr. Harris produced a corrected statement of his tests made on the 23rd, Aug., and admitted that the sheet posted was not correct when posted. Said sheet was produced in Court and showed that the figures showing Laundry's test had been changed to show test of less than 3 per cent. The court then adjourned and at the next hearing Thos. Ellis a milk tester and former instructor gave professional evidence which did not agree wholly with the former witness, he claiming that it was quite possible and common for normal milk to test 2 per cent. and to vary a full 1 per cent. in a week and he would not think of making a complaint unless he had a full 1 per cent. difference from the sample delivered at the factory and the herd test and that these tests should be made on the same day or the day following at the latest. The Laundry family also gave evidence that no cream had been used about the house during the said time. The court then adjourned and met on the 25th, of Oct., when Magistrate Pollock decided to find Laundry guilty and fined him $50.00 and costs—in all over $90.00.

Mr. Laundry at once appealed the case and on the 16th, it was gone over again before his Honor. Mr. Harris admitted falsifying the Laundry test. Mr. Thos. Ellis gave very strong evidence in favour of Laundry as did also Mr. Johnston, tester of the Chesterville Condensing plant.

His honor reserved his decision and later gave judgment quashing the conviction as above.

W. B. Lawson K. C. appeared for the defense while Mr. Broadfoot of Ottawa, appeared for the prosecution.

The Laundry family is a large, respectable and prosperous family, there being eleven sons and three daughters, brothers and sisters of accused. Nine of these men are farmers, one a merchant and one a priest. Mr. Laundry deserves credit for defending his case and is to be congratulated upon the outcome, thus removing the strain of such a charge from himself and family.

The decision is a popular one and one of much importance to the dairy interests. Had the conviction been upheld, a precedent would have been established, whereby a tester, by change and falsifying figures could have any patron fined and he (the tester) would walk off with one half the fine.

J. P.

Crysler, Jan., 30th, 1919.

TOY'S HILL.

This neighbourhood and surrounding community extend their heartfelt sympathy to Mr. and Mrs. S. Coons of Toys Hill in their deep grief in the loss of their son Eddie after a few days illness of the flu.

Mr. and Mrs. George Kirkwood and family of Winchester Springs were recent visitors at the home of Mr. and Mrs. R. Kirkwood of the Hill.

Some of the Hill folks attended Mr. W. Barkley's sale east of Winchester Springs last Wednesday.

Miss Gladys Robinson of Winchester Springs, spent the week-end at the home of Mr. and Mrs. Jas. Johnson of the Hill.

Mr. Zerney Harper and family motored to Winchester Springs last Sunday evening.

Mr. and Mrs. Jas. Johnson and Miss Gladys Robinson of Winchester, were the guests of Mr. and Mrs. Alex McIlreath last Sunday.

Mr. and Mrs. W. Hugh Moore and family spent last Sunday at Inkerman the guests of Mr. and Mrs. Thos. Haggerty.

Mr. Frank Kirkwood and Mr. John Weaver of Mountain made a business trip to Dundela last Saturday.

Mr. and Mrs. Frank Kirkwood and Mrs. Walton Weaver of Mountain, motored to Iroquois last Tuesday.

Visitors at the home of Mr. and Mrs. Jas. McLaughlin last week were—Mr. and Mrs. Henry Hanson of Strader Hill, Mrs. Willis Tupper and sons of Williamsburg, Miss Annie Servage of Chesterville and Mr. and Mrs. James Bell of Winchester Springs.

Mr. Ed Hummel of Maple Ridge was hauling hay from Toys Hill last week.

DUNBAR

Mr. and Mrs. Orie Bouck visited Saturday at Charles Marcellus'.

Miss Myrtle Newvine of Chesterville, spent a few days with some of her many friends.

Mr. and Mrs. Clifford McIntosh of Williamsburg, were the guests on Sunday with Francis Froats.

Mrs. Geo. Merkley and Mr. and Mrs. Wm. Merkley of Bethune Bush, spent Thursday with the latter's parents Mr. and Mrs. Francis Froats.

Hearts are being made glad now the boys return. Dunbar rejoiced on Monday when Mercus Marcellus came back from France.

Rev. L. M. McCreery of Williamsburg. will preach both services on Sunday in St. Lukes church. Mr. Sorensen will preach at Williamsburg.

A good winner makes a poor loser.

Produce Plenty of Maple Syrup

Chairman Thomson of the Canada Food Board is calling for the greatest possible production of maple sugar and maple syrup this coming spring. Farmers with maple groves might well prepare to tap an unusual number of trees. In the opinion of those in the export business there will be a profitable market for maple syrup and maple sugar. Indication also points to a favorable season as the winter has been mild and there is plenty of moisture in the ground to insure a good run of sap.

Last year, although weather conditions were not favorable owing to the prolonged and steady cold and the lack of bright warm days until comparatively late in the season to start the sap running, the production of maple sugar and maple syrup showed a considerable increase over 1917. Customs Department figures show that the export of maple sugar was augmented by 26%, while the value of this export business showed an increase of 76% owing to higher prices received for the product. The United States is a good customer for our maple products, while England and France, when trade conditions are adjusted, will also prove good customers as Canadian soldiers have introduced maple sugar into those countries and a taste for it has been inaugurated.

When it is considered that our net debt has increased by over a billion dollars since the war, or 300%, every dollar of export trade Canada can develop is needed. The re-adjustment of our finances and of our trade balances require the utmost utilization of our agricultural resources and the maple sugar and syrup crop, although comparatively small up to the present time, may be greatly increased if farmers realize the opportunity and make the effort,

Follow Nature in Feeding Poultry

Attention to the three factors: Breed, feed and weed, are necessary to succees in Poultry-keeping as to keeping other kinds of live stock, but with poultry, feeding perhaps is more important than aught else, and to attain satisfactory results in feeding, notice should be taken of the indications of nature, and though an improvement on natures attainment of results in egg-production and fattening of chickens is possible, the general principles must be followed to a large extent. In the Spring the production of eggs on the farm is an easy matter. Fowls which are at liberty to roam find an abundance of green and animal feed on their range, which, with grain, furnishes a perfect ration for laying hens. In addition to this, they get plenty of exercise and fresh air. So far as lies within his power, then, the feeder should aim to make the conditions during other seasons Spring-like.

In feeding fowls in Winter the feeder should aim to provide a variety of grain such as would be picked up by the birds at liberty on the average farm, and in addition, green feed, grit and some form of lime should be provided, so that the fowls will be fully equipped for the manufacture of eggs and flesh. Grain and concentrated by-products of the milling industry should not form the entire feed ration, except in the fattening pen, and even there grit must be supplied in order to provide for assimilation of the feed.

Grit is essential to the health of fowls and to economy in feeding. Grit takes the place of teeth in preparing the feed for further digestion, and is required for the proper preparation of feed in the gizzard. When the feed is not properly taken care of in this organ, an undue strain is thrown on the fowl's system, often resulting in disease, and also allowing much nutriment to pass through the bird's body without being absorbed. In every pen or yard a box of grit should be kept. Investigators have asserted that grit is a part of the necessary feed, giving the fowls strong bones and a bright plumage.

Might be in Time

"It's a great pity, I'm told", declared Mrs. Jones, while dressing, "the second act takes place two years after Act 1".

"We may be in time for that", commended Mr. Jones.

All Wrong

"No", said the editor, "We cannot use your poem"

"Why?" asked the poet, "is it too long?"

"Yes", hissed the editor, It's too long and too wide and too thick".

Explained

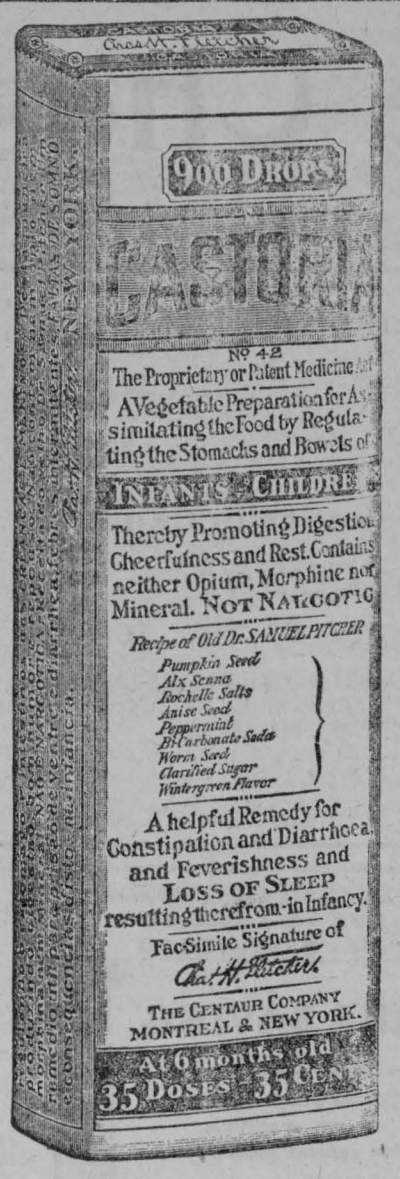

"Just what is different between an optimist and a pessimsit?" asked the Thin Man.

"Well", responded the Fat Man, "an optimist regards a caterpillar as an unfinished butterfly and a pessimist regards a butterfly as an overdone caterpillar."

A Miserable Cynic

"What are you laughing about?"

"Now that peace is here I'm thinking of the poor guys who got married to escape the draft."

Light Four Touring

Model 90
The Practical Car

MORE than 80,000 of these Overland Model 90 touring cars have been sold during the past year.

A pretty good tribute to their all-around dependability—their usefulness—their economy.

Compare this Model 90 with other cars in its price class. Note its style, its beauty and its easy riding qualities.

Its 32 horsepower motor is a wonder for power, reliability and faithful performance.

Soft cushions, long resilient cantilever rear springs and large four inch tires smooth out the rough stretches of road and make driving a pleasure.

We want you to try a Model 90 and form your own opinion as to its value. We will be glad to furnish the car and we feel sure that you will be satisfied with its performance.

FINCH RED CROSS.

After being twice postponed on account of the influenza epidemic the second annual meeting of the Finch Red Cross was held at the home of Mrs H. K. McLean on Monday afternoon, December 30th, 1918.

The following officers were elected;

Mrs. J. J. MacMillan—President.

Eva McMartin—Secretary.

Mrs. H. K. McLean—Treasurer.

Vice-Presidents—Mrs. Beehler, Mrs. Sim Casselman, Mrs. McNaughton, Mrs. Kenneth Cameron, Mrs. A. D. Cameron, Mrs. D. P. Cameron, Mrs. Beckstead, Mrs. E. N. Bicks, Mrs. James Russell.

The following report for the year ending 1918 was submitted for consideration.

Materials purchased—266 lbs. of yarn, 1292 yds. of flannellette, 153½ yds. towelling, 171 yds shirting, 66 yds. white cotton, 57¼ yds. flannel, 1 gross braid, 4 gross tape, 8 gross binding, 10 gross buttons, 192 spools thread.

Articles completed and shipped to Montreal—673 prs. socks, 383 property bags, 99 suits of pyjamas, 54 pneumonia jackets, 39 flannel shirts, 76 bed jackets, 43 hospital shirts, 145 towels, 10 ties besides bandages.

30 Christmas stockings were filled and sent to the hospitals in England. 97 boxes were sent to our own boys in the trenches. These were filled with socks and other comforts.

ONLY MEDICINE MADE FROM FRUIT

Extraordinary Success which "Fruit-a-tives" Has Achieved

One reason why "Fruit-a-tives" is so extraordinarily successful in giving relief to those suffering with *Constipation*, *Torpid Liver*, *Indigestion*, *Chronic Headaches*, *Neuralgia*, *Kidney and Bladder Troubles*, *Rheumatism*, *Pain in the Back*, *Eczema* and other Skin Affections, is, because it is the only medicine in the world made from fruit juices.

It is composed of the medicinal principles found in apples, oranges, figs and prunes, together with the nerve tonics and antiseptics of proven repute.

50c. a box, 6 for $2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

WINTER DAIRY HINTS

Cleanliness and Succu'ent and Concentrated Feed Essential.

Grass Is the Natural Feed of Cattle —Make Winter Feed as Much Like It as Possible—A Ration for Laying Hens Which Has Brought Results at the O. A. College.

(Contributed by Ontario Department of Agriculture, Toronto.)

THE whole question of winter care of dairy cattle may be summed up in one word—comfort. In order to obtain this, the cattle require a comfortable, clean, well-ventilated, well-lighted stable. The stalls, where animals are tied, should be of proper width and length to accommodate them without discomfort; and also be so constructed as to keep them clean without too much labor on the part of the person in charge. Plenty of bedding is needed, and an absorbent such as cut straw, shavings or sawdust, to take up the liquids which cause so much dirt and discomfort to both animals and attendants. A cement gutter behind the animals having the required amount of absorbing material placed in it daily, after cleaning the stable, is the best plan of keeping stable and cattle clean. If there be some shavings, sawdust or fine straw scattered along the passage behind the cows it assists in cleanliness and lessens labor.

Feeding.

The natural feed of cows is grass. The feeder of cows never goes far astray if the winter ration is made, so far as possible, similar to that of grass. This is got by using silage and roots, mixed with the dry, bulky fodders, like straw and clover hay. The mixing may be done by the feeder, if he has time to do so; or, it may be done by the cow before and after eating. The cow carries a wonderful mixing apparatus in her stomach, and so far as this part of feeding is concerned, she can do the necessary work of mixing feeds. Mixing before feed is given to the cow, often adds to its palatability and hence usually pays.

In addition to the succulent and dry bulky feeds mentioned, a cow giving milk requires a certain amount of concentrated feed in the form of meals, such a ground oats, oats and barley, wheat bran, oil-cake, or cottonseed meal. Standard Dairy Feed fills the bill excellently in this regard.

Watering Cows.

Next in importance to feed, comes water for milking cows. When cows are producing large quantities of milk they must have large quantities of water. This may be supplied in the stable, or in a trough outside. In fine weather, animals are better for being a short time outside in the fresh air daily, and they can be conveniently watered at that time. In very cold or stormy weather, they should be watered inside.

Comfort, cleanliness, succulent feed, along with a reasonable amount of concentrates, and plenty of water and fresh, pure air, are the main things required by animals giving milk in winter.—Prof. H. H. Dean, O. A. College, Guelph.

Feeding Laying Hens In Winter.

In order to lay well a hen requires a surplus of food above body maintenance. That is a hen must be in good flesh, not thin. A good laying hen is seldom very fat. The yolk of an egg contains considerable fat. The white is mostly muscle forming food and the shell largely lime. There must be a supply of these over and above what is required to daily maintain the body.

In summer a hen eats tender grass or green shoots, some whole grain, generally some ground grains, usually worms or insects, picks up some gravel or old plaster, and in doing so takes exercise. If she has to hunt all day for these, at times she does not lay very well because she is working hard getting something to eat.

We are feeding now, at the O. A. College a grain mixture of about the following: Seven parts of cracked corn, two parts of barley, two parts of good oats, one part buckwheat, and three parts of feed wheat. This is fed in deep litter night and morning, the hens going to bed with a full crop.

During cold weather it is advisable to feed a mixture of nearly half corn or buckwheat. A hen will do a little better on such feed. A mixture of two or three kinds of grain gives variety.

At noon, cooked waste house scraps, such as potatoes, cabbage or other vegetable trimming, together with the table scraps, make a good foundation for a wet mash. These scraps are best fed in a crumbly state. Dry them off with whatever chop you may have. A mixture of shorts, barley meal, and oat chop in equal parts, is very good. We use a dry mash which is fed in hoppers. This is in front of the birds at all times. We are using Government Standard Hog feed. We have used in previous years, very successfully, rolled or crushed oats.

EXPERIENCE vs. EXPERIMENT

Learning office work is like learning any other kind of work or trade or profession.

Machinists are trained by practical machinists, doctors by doctors, dentists by dentists.

The secret of success of the Graduates of Willis College is that they are the only ones trained by expert, experienced office workers for expert office work.

For Stenegrapher, Secretary or Accountant, we have the best courses available anywhere.

Last year our increase was 45%. This year to date is even better. Still Employers Demands Exceed the Number of Willis Graduates.

HONOR ROLLS

Chesterville High School

The following shows the average percentage obtained by each student on the Christmas examinations. Detailed reports are being given to each student, and parents are asked to see that these are returned with their signature as soon as possible'

The Board and Principal regret very much the interruption to the school work caused by the impossibility of obtaining a teacher to succeed Miss Kirkwood. However, that difficulty has now been remedied, and the school can again take its place as second to none in the United Counties.

On account of losing so much time during the Fall term we are having examinations after four in all subjects, each month to review the work covered. Will parents kindly encourage their children to put forth every effort to make at least 75% on each months work. Time should be given them not only for this work but for exercise. If the past standard is to be kept up this year a united effort will have to be made and pupils present everyday. Absent pupils are greatly handicapped as the lost work can only be obtained by their own private study or some time before or after school hours.

D. L. Collison, Teacher
Jr. Room

The Labor Troubles in Britain

Many people predicted that there would be labor troubles in the United Kingdom after the war, but very few, if any foresaw that they would be thrust upon the country so quickly and so sharply.

The working classes and the plain people were told that after the war there would be "a better life" for the masses. Apparently they expect and demand that "better life" sooner than the Government is prepared to take in hand the business of constructing the new era.

There are as many explanations for the present industrial unrest as there are points of view. Some say that the workingmen are uneasy and restless, and that the strikes are merely a sort of holiday effervesence, and not to be taken as serious symptoms of any labour policies. Another and extreme point of view that the British people are infected by the general world movement which is wrought by the Bolsheviki, and the foundations of society are threatened.

Among other explanations are that the laborers have real grievances which they endured patiently during the war, and that they have only waited until the ship of state was out of troubled waters to press their own interests, and that the laborers fear that their jobs will be endangered by the demobilization of hundreds of thousands from the army, and are agitating for shorter hours with the idea that shorter hours will be the only solution of the need of work for all.

The strikes in Belfast and Glasgow have several new features. Instead of merely striking against their employers and confining the battle to the familiar campaign of men against masters, the strikers are disrupting the nerve centres of their communities. The strikes entail not only the stoppage of work in certain industries, but are paralizing the everyday life of the cities. Transportation, lighting and power for manufacturing are the vital arteries of normal living which the strikers and their sympathizers are putting at a standstill. This makes entire communities suffer on account of the disputes of a fraction of their citizens, and none suffer more than the poor people and the middle clssses.

The Government up to this time has followed a line of non-intervention, but in the whole matter of industrial conditions will be involved in the legislation for reconstruction. The responsibility for carrying this out rests chiefly upon the Prime Minister, and there are indications that he will not be slow to grapple with it. How successfully he will meet the problem remains to be seen.

Another use for Corks

Every housekeeper knows that there are times when she would be delighted to have some means at hand for removing the odor of burned food or of certain preparations which are often disagreeable in the cooking, says the Christian Science Monotor. An easy method of overcoming such unpleasantness in the home is offered in the following suggestion:—When a piece of ordinary cork is placed on a stove lid or other iron plate and is gradually heated until it smolders and turns black, it will give off a decidely fresh and fragrant odor, which will remove any other about it. The smell of burning cork is so pungent and spicy that it would be welcome at any time.

$1,480 For Pint of Liquor

Two Prince Rupert women, who paid a stranger $1,480 in cash for one pint of excellent whiskey, feel that they have a grievance. The women thought they were buying for this money 45 gallons of the forbidden intoxicant, and the test they made convinced them that the quality was good.

Later they noticed that the barrel they took the sample from was filled under the bung, and the remainder was only water.

The man, having disposed of the lonely pint at the rate of $11,840 a gallon, which undoubtedly constitutes a record, left for the south and is believed to be in Vancouver.

Counties Council Proceedings

The first meeting of the Counties' Council for the United Counties of Stormont, Dundas and Glengarry, was held in the Court House, Cornwall, on Tuesday Jany, 27th, but all the members not having arrived, an adjournment was had till 8 p. m. At that hour the Council was called to order, when all answered to their names as follows:

STORMONT

Cornwall Town—G. A. Styles, Reeve; Dr. W. A. Munroe, Deputy Reeve

Cornwall Township—P. A. Nolan, Reeve; Horatia Dow, Deputy Reeve.

Roxborough—D. D. McLeod, Reeve. A A. McMillan, Deputy Reeve.

Osnabruck—D. Dunbar, Reeve; A. Stewart, Deputy Reeve.

Finch Township—A. W. McIntyre, Reeve; M. J. McMillan, Deputy Reeve.

Finch Village—D. A. McNaughton Reeve.

DUNDAS

Williamsburg—S. Allison, Reeve; M. Beckstead, Deputy Reeve.

Winchester Township—S. R. Fulton, Reeve; Wm. Hamilton, Deputy Reeve.

Mountain Township—Joseph S. Robinson, Reeve; Thomas Carlyle, Deputy Reeve.

Matilda—Ellis Merkley, Reeve; Geo. Cooke, Deputy Reeve.

Morrisburg Village—G. L. Brown, Reeve.

Iroquois Village—G. H. Davy, Reeve.

Winchester Village—James F. Ault, Reeve.

Chesterville Village—W. Hamilton, Reeve.

GLENGARRY

Charlottenburgh—H. S. Kinloch, Reeve; Angus McGillis, Deputy Reeve.

Lancaster Township—James A. Sangster, Reeve; R. A. McLeod, Deputy Reeve.

Kenyon—J. W. Kennedy, Reeve; S. A. Kennedy, Deputy Reeve.

Lochiel—Allan Campbell, Reeve; D.W. Fraser, Deputy Reeve.

Lancaster Village—R. T. Nicholson, Reeve.

Alexandria—Alex. Cameron, Reeve.

Maxville—A. H. Robertson, Reeve.

The first business being the election of a Warden, the following gentlemen were put in nomination. (The position this year goes to the County of Glengarry in rotation).

A. H. Robertson, Reeve of Maxville—Moved by J. A. Sangster, seconded by G. H. Davy.

R. G. Nicholson, Reeve of Lancaster Village—Moved by H. S. Kinloch, seconded by J. S. Robinson.

J. W. Kennedy, Reeve of Kenyon—Moved by D. A. McNaughton, seconded by G. A. Stiles.

Mr. Kennedy declined the nomination.

A vote was then taken between Messrs. Robertson and Nicholson, resulting in the election of Mr. Robertson by 21 to 13.

The warden elect was then escorted to the chair by his mover and seconder, and was heartily applauded on taking his seat.

Mr. Robertson, after thanking the members heartily for their generous support, said he was born on New Year's Day, quite a number of years ago, and starting out in life with cold weather, he had a long road to fight for whatever he had. This had become a habit, and now he rather enjoyed it, and as long as everything was fair and above board, as the contest just closed had been, he had no complaint. He found no fault with those who had voted for his very worthy and possibly more capable opponent. Just now the slogan of Canada was "thrift," which was prominently displayed everywhere advocating the buying of Thrift Stamps. The Warden gave his idea of that homely and old fashioned virtue, which might well be adopted by this year's Council, in all money matters by so administering the affairs of the corporatton as to spend the funds of the ratepayers in a way to secure the best results, viz.; the greatest good to the greatest number, with an absence of waste. Personally he had nodesire to be a candidate, but felt the honour was due to his municipality which so far never had a warden, and was pleased that the village of Maxville had been so honoured. He realized his deficiencies, but would endeavor to be just and impartial, and asked for their kindly co-operation and forbearance.

An invitation was extended by the Warden to Ex-Warden Fisher and Mr. Copeland, Ex-Reeve of Cornwall Township, to sit with the members.

Mr. Fisher thanked the Warden for his courtesy and congratulated him heartily on his election. The making of good roads being very near his heart, he naturally had something to say about the progress made in that direction, and invited the members to attend the Convention of the Eastern Ontario Association, in Ottawa, on Feb. 4 and 5. Mr. Copeland also briefly expressed his appreciation.

The communications received by the Clerk since last session were read and referred to the proper committees.

Standing Committees.

As the appointment of Standing Committees was the next order of business, it was moved by D. A. McNaughton, seconded by G. A. Styles, that Messrs. Merkley, Robinson, Fulton, Sangster, Kinloch, J. W. Kennedy and the mover and the seconder be a special committee to strike standing committees.

J. W. Hamilton and A. W. McIntyre moved in amendment that the Reeves of each municipality compose the special committee.

The yeas and nays were taken on the amendment and the vote stood as follows:—

Yeas—Messrs. Allison, Ault, Beckstead, Brown, Cameron, Cooper, Davy, Dow, Dunbar, Fulton, Wesley Hamilton, Wm. Hamilton, J. W. Kennedy, A. A. Kennedy Kinloch, Merkley, Munro, McGillis, McIntyre, D. D. McLeod, R. A. McLeod, M. J. McMillan, A. A. McMillan, Nolan and Sangster,—25.

Nays—Messrs. Campbell, Fraser, Carlyle, McNaughton, Stewart, Stiles and Robinson—7.

Council then adjourned for 30 minntes to enable the special committee to meet, and on reassembling the following report was brought in by the chairman, and adopted in Council without amendment:—

Education—G. L. Brown, chairman; Messrs. Ault, Beckstead, Carlyle, Cooper, Fraser, Wesley Hamilton, J. W. Kennedy, Kinloch, R. A. McLeod, A. A. McMillan, McNaughton, Nicholson, Nolan and Stewart.

Finance—A. W. McIntyre, chairman; Messrs. Ault, Beckstead, Brown, Cameron, Campbell, Davy, Dow, Fulton, Wesley Hamilton, A. A. Kennedy, Merkley, Munro, McGillis, D. D. McLeod, Nolan, Robinson, Sangster, Stewart and Stiles.

County Property—H. Dow, chairman; Messrs. Ault, Cameron, Carlyle, Cooper, Dunbar, Munro, R. A. McLeod, M. J. McMillan and Nicholson.

Roads and bridges—H. S. Kinloch, chairman; all Reeves and Deputy Reeves.

Equalization of Assement—J. F. Ault, chairman; Messrs. Stiles, Nolan, D. D. McLeod, McIntyre, Dunbar, McNaughton Allison, Fulton, Robinson, Merkley, Brown, Davy, Wesley Hamilton, Kinloch, Sangster, Campbell, J. W. Kennedy, Nicholson, Cameron and Robertson.

Printing—A. A. Kennedy, chairman; Messrs. Cooper, Dow, Wm. Hamilton, R. A. McLeod and M. J. McMillan.

Communications—Matthew Beckstead, Chairman; Messrs. Fraser, Wm. Hamilton, McGillis and A. A. McMillan.

Resolutions and Memorials—Dr. W. A. Munro, chairman; Messrs. Campbell, Carlyle, Dow, A. A. Kennedy, A. A. McMillan and Robinson.

There being no further business Council adjourned till 10 a. m. Wednesday.

Wednesday Afternoon

When Council resumed on Wednesday afternoon a deputation composed of a number of Cornwall business men and others, headed by Mayor Fetterly of Cornwall, appeared before Council to take up the matter of greater co-operation with the OntarioGood Roads Association. On the request of the Warden, Mr. Fetterly was asked to address Council. Mr. Fetterly stated that he wished to assure Council that the town of Cornwall was in hearty accord with the good roads movement. Road improvement is the big question now before the people of Ontario and in order to get something for this section of Ontario, which every one was aware, was badly needed, it was necessary to put up a strong appeal to the government. He asked members of Council to send a deputation to the Good Roads Association convention in Ottawa next week, and said that doubtless a number of members of the Cornwall town council, as weil as citizens, would be present. A reasonable request would be made for road work, and he felt that if it were shown that the people of this section of Ontario were behind the good roads scheme the government would recognize their claim for the spending of the money raised and spend it on road work. In support of his contention he said a big effort had been made to have something done on the Prescott-Ottawa highway and that the government had decided to do something this year. The condition of the front or river road here was such that in the automobile guide books motorists are advised not to come east of Prescott as the roads are practically impassable. If this condition were not remedied all tourist traffic would go through to Ottawa and down to Quebec, without any of it ever reaching Cornwall.

Ex-Warden W. J. Fisher, who was present, was also asked to speak. He said that the Highways Department had a special eye on the towns of Cornwall and Alexandria with a view to giving them something for the money they pay in for good roads. He was a strong believer in deputations and said that as many as possible should go to Ottawa next week to urge the construction of the River Highway at as early date as possible.

G. D. Atkinson and H. Yates expressed their sympathy with the movement.

J. F. Ault Reeve of Winchester, who has always taken a deep interest in good roads, counselled the members very strongly to attend the convention even if if they have to do so at their own expense. Unless the interests of this section of the province are carefully watched, the money in the hands of the province will be spent elsewhere and eastern Ontario will get nothing. Everywhere the demand was for good roads and there was no argument about the cost. As a member of Council he was in favor of spending money judiciously on road work.

As there were no other members of the deputation who wished to speak, the Warden said he heartily agreed with the remarks made, and felt Council would do all in its power to further the movement.

As there was no further business, Council anjourned till 10. a m. on Thursday.

The proceedings for the balance of the session will appear next week.

Not Much Choice

"Old man, you are to close in money matters. Your friends are beginning to classify you as a tight-wad."

"What does it matter? I'd rather be classified as a tight-wad than a as good thing".

Increase Our Live Stock

The various interests engaged in the live stock business, including producers, packers, transportation companies, and the Canadian bankers, have realized that the Canadian live stock industry must take a greater part in our national economies. Each of these varied interests have appointed representatives on a Committee to confer with the government official and each other upon the problems in connection with the domestic and export trade in animal products. The present situation interrupting our export meat business is regarded as a merely temporary one, and a policy looking forward to the next five years is what is in mind. The development looked for is not merely a matter for producers to consider, but for those whose business it is to manufacture, find markets and distribute animal products for human consumption, and to finance these various stages of the industry. The Committee will meet as occasion demands or suggests as advisable, to consult with the Live Stock Commissioner at Ottawa upon any measurers found necessary in the practical development of the trade. Decisions of the Committee after action is resolved upon will be transmitted to the bankers, or the railway companies, or the Live Stock Council, or the packers, as the case may require by the member of the Committee directly representing that interest and in this way co-ordination and generally approved action may be obtained. The Canadian Live Stock Council will be represented by Mr. Robert Miller of Stouffville, Ont.

It is recognized that the live stock industry is not a separate series of conflicting competitive interests, but a chain of links, each depending on the other and upon that principle the Committee will proceed.

Canada Food Board.

Humble "Quarter" is now being Mobilized in the Service of the Country

Tom Moore, president of the Trades and Labour Congress of Canada, is today, by reason of his position, the recognized leader of organized labour in the Dominion. He is also a man of international standing. The advantages of the War Saving plan are obvious to him, as the following statement shows:—

"During this Reconstruction period the question of eliminating unemployment is one of the vital problems, and the Government, by the carrying on of essential public works, etc., can materially help and thus stabilize the labour market. In order to do this money must be forthcoming.

"The pre-war methods of financing were found unequal to the requirements of war time, and regulations imposed by other countries made it necessary to secure money direct from the people of Canada. The sale of Victory Bonds was instituted and the marvellous success achieved proved the value of the policy of placing the purchase of these within the reach of the greater number by introducing the low denomination of fifty dollars.

"Even greater success can be achieved by still further reducing the minimum amount which can be subscribed and Canada has now decided, through the War Thrift Stamp Saving scheme to offer opportunities by which not only the men and women, but the children of the country, can help to provide the money which is still urgently needed to carry on. The humble "quarter" is at last being mobilized into the country's service. All should lend their aid and make the aggregate sum secured so large as to prove for all time that the workers of Canada can finance their own undertakings."

Feeding Poultry

When feeding corn to poultry it should not be forgotten that when using the whole grain fowls can readily obtain a full meal with very little exercise. This is detrimenal to egg production inasmuch as birds are apt to become too fat. It is much better to have the corn cracked and scattered in the litter so that the flock will have to work for it. Oats when fed whole are not eagerly eaten unless prepared in some way. A new oat called "Liberty ", originated at the Central Experimental Farm, and now being introduced into public use, threshes out free from hull, and has therefore a special value in poultry feeding.

These points are brought out in a recently issued bulletin, No. 91 of the Dominion Experimental Farms, and obtainable from the Publications Branch of the Department of Agriculture at Ottawa, which deals fully with poultry feeds and feeding. It takes up the balanced ration, grain and by-products, green foods, animal foods and mineral foods, and tells how to combine and use these in the feeding of hens, turkeys, guinea fowl, ducks; and geese.

TO MAKE CHICKENS LAY

To Make the Stock Pay Feed Concentrates.

Roughage and Roots Give Bulk to the Ration, But Production Depends Upon the Grains, Mill-feeds and Oilcakes.

(Contributed by Ontario Department of Agriculture, Toronto.)

MANY people forget that a hen requires feeds other than grain in order to be in good health and to lay.

All-grain rations are neither conducive to health or egg production. At times when hens have the run of the stables and the yards, together with house scraps, they do very well, owing to the fact that an opportunity is given them to pick up bits of clover leaves, roots, and such like material.

A certain amount of meat foods is essential in order to produce the white of the eggs. Too much of such feed is apt to cause trouble with the general digestion of the bird.

Milk as a drink, is, without doubt, the best animal feed known. It gives the best results when sour. When birds are accustomed to it they will not take too much.

Beef scrap and high grade tankage are used very extensively on large poultry plants where milk is not available. These are mixed with ground grain, generally in the proportion of fifteen to twenty per cent. For the general purpose breeds the former amount is sufficient. Breeds such as Leghorns will make good use of twenty per cent. of meat scrap in the ration.

Cooked butchers' meat, green cut bone, cooked beef head, lungs, liver, etc., are all very good feeds and may be fed in a manner similar to meat scrap.

Some people think that because a little of meat feeds are good, more would be better. Experience has shown that such is not the case. Too much often causes serious trouble.

Green feeds are essential for health and for economy. A hen should have all the green feed she will consume. A certain amount of bulky, succulent green feed she will consume. Such feed is usually fairly inexpensive. Where birds are not fed any green feed, in the course of time they become unthrifty, lay poorly and moreover, the eggs from such birds many times are very low in hatching power.

Experience has shown that oats when properly sprouted are a most excellent feed. The hens are very fond of them and the value of the oats as a feed is good. That is, the sprouted oats reduce the grain feed consumption equal to the pounds of oats sprouted and one gains the increased palatability of the oats, as well as the value from the greens.

Thin-leafed greens contain one of the very important elements of growth and health. They are called nature's protective feeds; that is they assist to maintain the birds' health or normal resistance against disease. Health is an essential to profit. In winter we find such feed in sprouted oats, cabbage, and clover leaves.—Prof. R. W. Graham, O. A. College, Guelph.

Winter Care of Pregnant Mares.

Those who have had experience in horse breeding have noticed that a considerable percentage of the spring colts, especially those born before the mares are on pasture, are weakly, often not able to stand, and sometimes without sufficient ambition to nurse when held up and the teat introduced into the mouth. It will also be observed that foals of this description are usually those of dams that have been pampered during the winter months—those that have been well fed, and kept in the stable most of the time without exercise.

The pregnant mare should be well fed and given regular exercise or light work. The idea that she should not be well fed is not uncommon. The foetus is daily increasing in size. This growth does not take place without nutriment. The nutriment must be supplied by the blood of the dam, and, as nutriment is not a normal product of the blood, but is supplied by the food the animal eats, we can readily see that the pregnant animal has not only her own tissues to nourish, but also those of a growing foetus, which, in the latter months of gestation is no small matter. Hence we see that the pregnant mare requires more food than her non-pregnant sister of the same size that is doing the same work. Good hay and oats are the foods to be relied upon to provide nourishment, and these should be fed in quantities proportionate to the size of the animal and the grain in proportion to the amount of work or exercise given. In addition she should be given a few raw roots daily, and a feed of bran with a cupful of linseed meal at least twice weekly. She should also be given all the good water she will drink at least three times daily.

A pregnant mare should, where possible, be provided with a large, comfortable box stall when in the stable. This, we may say, is necessary after the ninth month of gestation, as parturition may take place at any time after this.—J. H. R., O. A. College, Guelph.

BUY YOUR SEED RIGHT

Be Sure the Clover and Grass Seed Is Pure.

Why Every Farmer Should Have Spray Calendar—How to Get It and Use It—Only Sprayng Done at Right Time Is Effective.

(Contributed by Ontario Department of Agriculture, Toronto.)

SUCCESS or failure depends to a large extent upon the quality of the seed sown. No man can afford to use low-grade clover or grass seed. The risk of seeding down the farm with noxious weed seeds is too great. High-grade clover and grass seed is freer from weed seeds and produces more healthy, vigorous plants per pound than does low-grade seed. Impure seed is dear at any price. Pure seed is the purchaser's right and he should insist on having it.

In the purchase of clover and grass seed the following qualities should be looked for:—

1 Freedom from weed seeds, especially those weed seeds covered by the Seed Control Act. The weed seeds can be properly seen only by spreading out the sample of clover or grass seed on a clean white sheet of paper and looking carefully over it with the aid of a tripod magnifier or hand lens. No farmer should be without a lens of some kind. Everyone who has to purchase seed should endeavor to become familiar with the common weed seeds and know the standards of purity required by the Seed Control Act for the various grades of clover and grass seed.

2. Freedom from dirt, grit, broken straw and other inert matter. A great many samples of clover and grass seed contain far too large a percentage of such inert matter. Those buying such seed are paying a high price per pound for dirt.

3. Good size and color. A good sample of seed of any kind should be large, plump, bright, and have the characteristic color well developed. Plumpness, brightness and good color are usually indicative of high germinative capacity.

4. High germinative capacity. Good clover or grass seed of any kind should have a high germinative capacity. This cannot be accurately judged by an examination of the seed and can be ascertained only by a germination test. Purchasers of seed can have such tests made for them by sending their seed to the office of the Seed Commissioner, Department of Agriculture, Ottawa.

Farmers are reminded that the Department of Botany of the Ontario Agricultural College is at their service at all times for the testing of seed as to purity. In submitting samples for purity test send at least one pound of the coarser grains, one ounce of alfalfa or red clover, and half an ounce of alsike or timothy. A full report on samples will be furnished. Samples of seed should be carefully packed and addressed with postage prepaid to the Botanical Department, Ontario Agricultural College, Guelph.—Prof. J. E. Howitt, O. A. College, Guelph.

Every Farmer Should Have Spray Calendar.

Before giving the reasons why every farmer should have a spray calendar let us state what a spray calendar is. It is the gathering together into a small space—usually just one sheet or page—of all the necessary knowledge for the control of the various insects and diseases that attack our fruit trees and bush fruits; so that instead of having to search half a dozen bulletins the farmer can obtain the required information almost at a glance. A spray calendar is therefore a handy reference sheet on the control of insect pests and plant diseases.

Every farmer should have a spray calendar for the following reasons:—

1. Because it will save him time in finding the necessary information on the control of insects and plant diseases.

2. Because the information given in the spray calendar is more reliable than he can obtain from his neighbors or any other source. It is the best information that can be obtained anywhere.

3. Because the spray calendar will prevent costly mistakes due to slips of memory.

4. Because the spray calendar states definitely when to treat the different pests. A week too early or a week too late would in the case of some of our worst insects and diseases mean utter failure. There is a good reason for each date of treatment given in the calendar. It is not guesswork.

5. Because the spray calendar states definitely the mixture or mixtures to use in each case and gives the proper strength. Too strong a mixture would mean loss of money and sometimes burning of the foliage or fruit; too weak a mixture failure to control the pest.

6. Because several spray mixtures, e.g., Bordeaux mixture, can be made at home. The spray calendar tells how to make these.

7. Because by following the directions given in the spray calendar, almost perfectly clean fruit and much more of it can be obtained.

Always ask for the latest spray calendar, since they are revised from time to time, and new and better methods added in place of the old as soon as they have been sufficiently tested.

How can spray calendars be obtained? Send a postcard to the Department of Agriculture, with a request for one. Write your name and address clearly.—L. Caeser, B.S.A., O. A. College, Guelph.

Father and Son.

A certain Chicago business man is the father of a youth of a most literal tendency. Last spring, when the father left for Europe, where he was to spend the entire summer, he promised the lad that if he were to attain a certain mark in his studies his reward would be a continental trip with his father.

The prospect of such a trip stimulated the lad to such a degree that he attained a mark even higher than that set him by his parent. He cabled his father the one word "Yes."

It would seem, however, that the pater had forgotten his offer, for after thinking over the message he cabled back, "Yes, what?"

Then, in turn, the son was perplexed. Finally, after due reflection, he cabled to his father, "Yes, sir."—Detroit Free Press.

ROBUSTNESS

Nature has not been prodigal with everybody in the matter of robustness. Many, all through life, must stand guard and combat colds, coughs, bronchitis or perhaps more serious pulmonary ailments. For nearly five decades

SCOTT'S EMULSION

has been helping to turn weakness into strength. For those who are delicate, with tender lungs, weak throats and a proneness to debility and anemia, the definite nourishing and tonic qualities of *Scott's* are of special value.

John King, Chesterville, Can Save You Money

Personal, Local and District News.

Mr. L. Jordan of town made a business trip to Ottawa Tuesday.

Whittaker the Optician will be at Chesterville February 11th.

Miss Luva Barkley of Inkerman, is the guest of Miss Irene MacLean.

Mrs. J. H. Deeks and Nurse E. M. Deeks spent the week end in Ottawa.

The best game of hockey of the season tonight. Alexandria VS. Chesterville.

Miss Gertrude Foley of Finch, spent the week end with Miss Helena Dwyer.

Miss Ena D. Weegar of Winchester, spent the week end at her home in Spruce Grove.

Miss Annie LaPierre of Ottawa, was the guest of her mother over the week end.

Mr. Fred Fawcett and Miss Ida Watson were married last evening at Winchester by Rev. J. H. Miller.

Mr. and Mrs. Wallace and Master Bert spent Sunday evening at Mr. J. A. Shaver's, Finch.

Mrs. Arnold Docksteader and Miss Annie George of Cloverdale, were guests of Mrs. Geo. Beattie on Monday.

The Chesterville Junior hockeyists last night at the Arena in a brilliant game trimmed Winchester to the tune of 4 to 1.

Since the burning of the South Mountain school the classes of the Public school have been resumed in the old tannery. Could any thing have been more appropriate?

A memorial service will be held in Dunbar Presbyterian Church for the late Mrs. Jacob Froats at 2.30 o'clock on Sunday afternoon, Feby., 9th.

Guests of Miss Velva Todd, Grantley, on Friday evening were Misses Jean Fraser, Lillie Harte and Mr. C. Rupert, Finch; C. Merkley, Chesterville and W. Feader, Grantley.

Mr. and Mrs. Abe Ball and family, Mr. and Mrs. F. Forward of Chesterville and Mr. and Mrs. Henry Elliot of The Boyne, spent Thursday at Mr. S. D. Beckstead's of Beckstead.

Consult Mr. A. E. Bolster, if your case can be helped by the use of lenses, he can do it for you. Free test—day or night every day—at W. G. Bolster's Drug Chesterville.

The Women's Institute will hold a Valentine Tea at the home of Mrs. D. Allison, on Friday Feby., 14th, from 3 p. m. to 5.30 and from 7.30 to 9.00. Proceeds in aid of Public Library. Gentleman specially invited.

Several ladies of South Mountain on returning from a Red Cross meeting last week were severly injured when their sleigh upturned. Mrs. Merrill was rendered unconscious and Nurse Franeis received injuries to the spine.

C. W. Casselman, C. P. R. Ticket Agent. Rail tickets to all points. Rates and train connections cheerfully given. Information furnished as regards Ocean Steamship tickets. Passports necessary.

D W. Griffith's mammoth picture The Hearts of the World with their own special symphony orchestra will be seen at the Music Hall Feb. 20th. This is one of the greatest attractions on the road today and you should not fail to see it.

We note in the Ormstown Bulletin that Rev. S. A. Woods, formerly pastor of Chesterville Presbyterian church now at Riverfield, Que., has completed a most successful year, at his charges of Riverfield and Howick, where the total giving amounted to $4248. Mr. Woods services were recognized by a salary increase of $100 per year, and those of his good wife by a Life Membership certificate in the W. M. S.

Last week The Record, through business engagements, was unable to attend a meeting of the publishers of Dundas at Winchester and partake of a banquet tendered them by the village council. We have waited with greatly aroused curiosity to know what happened at the feed. We have failed to find a line regarding it in any paper of the county. Why all this reticence, brethren? Did the bubble burst before gas masks were adjusted?

CARD OF THANKS

Mrs. Wm. Hutt and family wish to thank the neighbors and friends for their kindness and sympathy in their recent bereavement.
