Auto and Truck Lost When Garage Burns

Friday night at the same hour as Mulloy's school burned, fire in the Melvin Settlement caused serious loss to John Erratt when his truck and auto were both destroyed from fire said to have started in the pump house caused by the back firing of a gasoline engine. The pump house was quickly a mass of flames which soon reached the garage to the west and the dwelling a short distance away was in danger. Neighbours who had hurried to the scene did all within their power to keep the flames in check, but fearing control might be lost asked assistance from Winchester and their fire truck was rushed to Melvins in time to render the necessary assistance.

MULLOY'S SCHOOL BURNED.

Friday night about eleven o'clock Mullov's school house about two miles west of Winchester was completely gutted by fire of unknown origin. The seats and other furnishing in the schoolroom were removed to safety. The fire apparently started in the boys' lavatory at the west end of the shed. The two side walls and the front wall were left standing but he rear wall collapsed. Miss Irene Brown was the teacher at Mulloy's.

Mrs. C. A. Summers

The funeral of Mrs. C. A. Summers, of North Augusta, was held on Monday from her late residence to the Wesleyan Methodist church, where Rev. A. J. Shea, of Syracuse N.Y., conducted the service, assisted by Rev. S. W. Blanchard of Ottawa. Interment was made in Maple Ridge cemetery, near Winchester.

Mrs. Summers was the former Mary Ann Emily Holmes and was born at Blue Sea Lake, 76 years ago, daughter of the late Mr. and Mrs. Thomas W. Holmes. She married Mr. Summers at Winchester on September 6, 1889.

Surviving, besides her husband, are: Four sons, Edward A., of Bowmanville; Osborne O., of Ottawa; Cecil H., of Fort Jackson; and D.L. of Brockville; four daughters, Mrs. W. I. Watts, of Ottawa; Mrs. Hubert Black of Toronto; Mrs. W. A. Kinch, of North Augusta, and Mrs. A.K.B. Casswell of Ottawa.

J. L. Bouchard Dies At Winchester

In the passing of John Louis Bouchard, at his home on Gladstone street, last Friday, Winchester loses one of its most highly esteemed citizens.

Mr. Bouchard, who was in his 62 year, had been in ill health for the past four months. Born near South Indian, Russell county, he was a son of the late James Bouchard and Elizabeth Legault.

Following his marriage to Miss Margaret Gertrude Bruce, 36 years ago, he took up residence in Winchester, and apprenticed himself with the late Joseph Greer to learn the carpenter's trade. Four years later he joined the staff of the M.F. Beach Co. Limited, where for the past 32 years he had been an employee. Mr. Bouchard was a member of St. Paul's Presbyterian Church and for several years had served on the board of managers. He was also a member of L.O.L. No. 862.

The funeral service, which was largely attended was held in St. Paul's Presbyterian Church on Sunday afternoon when the pastor, Rev. Wallace MacKinnon, officiated. During the service, the choir, under the direction of Miss Clara Irving, sang "Only Shadows".

Interment was made at Maple Ridge cemetery.

Besides his wife. Mr. Bouchard leaves three brothers, James, of Calgary; Philip of Montreal and Joseph of Cornwall; also one sister, Mrs. A. Lavictoire, of Cornwall.

TRINITY UNITED W. M. S. ..

The May meeting of the Woman's Missionary Society of Trinity United church was held on Thursday, May 18, in the S. S. hall, with the president, Mrs. W.E. Wright presiding. The programme was in charge of Mrs. Myles Merkley's group. Mrs. J. Fader conducted the worship service and Mrs. Stanley Shay sang a most appropriate solo. The study chapter was taken by Mrs. Myles Merkley. Reports of the presbyterial were brought by Mrs. W.O. Dixon, and Mrs. W.N. Fulton. At the close of the meeting a social hour was enjoyed. The next meeting will be on Thursday, June 8th.

FO "Andy" Williamson At Stalagluft III, Germany

Much uneasiness has been caused the friends of "Andy" Williamson, who has been a prisoner of war for a long time in Germany, after having been brought down while on operations over that country. In all the exciting news of the escape and shooting of allied prisoners of war from Stalagluft III there has been no mention of FO Williamson being in any way connected with in. The latest story about the alleged shooting having been done by German guards right in the camp is not to be in accord with the facts.

HEN LAID TWO JOINED EGGS WITH TAIL ATTACHED

Mr. Ralph Dillabough of Mountain was surprised last Friday when he found that one of his Plymouth Rock hens had laid two eggs attached to each other and had also attached a tail to one egg which was almost ¾ of an inch long.

One egg was quite large and had a hard shell the other was attached to it but was soft shelled but both eggs were connected by a small opening into each other and the tail finished it off.

REPORTED MISSING

A message was received last week by Rev. I. E. and Mrs. Smith of Edmonton, Alberta, that their son, Pilot Officer Harold Smith of the R.C.A.F overseas, is missing. Harold has many relatives in this district, who regret to hear this news, and whose sympathy will go out to the anxious parents, and brothers and sisters.

While employed in the Civil Service before enlisting in the RCAF, Harold visited often in this district with his relatives.

PUMP HOUSE BURNED NEAR MOREWOOD

The second fire in this district from the back firing of a gasoline engine was caused at the home of Wm. Fetterly about a mile from Morewood. Assistance was quickly called by telephone but nothing could be done to save anything.

DOING NICELY AFTER OPERATION

Mrs. Myles Merkley who was taken to Cornwall General hospital last Friday suffering from acute appendicitis is reported doing nicely following an operation.

Victoria Day

"The twenty-fourth of May
Is the Queen's birthday,
And if they don't give us a holiday,
We'll all run away.

With a day like yesterday who could blame them. It was a close squeak they did get a holiday yesterday. The stores had it all figured out that they would be closed all day. That meant only an extra half day in the regular Wednesday closing. Someone had overlooked that Victoria Day is not a legal holiday and nothing was done about it to make it legal for every place to close up and go fishing or somethin'. Practically everyone did go legally or otherwise and all are satisfied.

Oxford Station Farmer Badly Injured In Runaway

Monday afternoon around 5.50 Mr. Thomas Sanderson, well known farmer of Oxford Station was badly bruised and shaken up when he was thrown to the highway and dragged some distance when his team was frightened and ran away.

Mr. Sanderson was driving home and was descending the south side of the overhead bridge when in some manner the neckyoke came away from the pole and the team got out of control. Mr. Sanderson was pulled off the wagon and received some bad grazes and cuts and bruises.

TEACHERS ATTEND CHEST CLINIC

All the school teachers of Dundas county were called to Winchester Tuesday of this week to undergo an x-ray treatment at a clinic being held. The resultant half holiday was not objected to by the pupils.

HELP BRING YOUR BOY HOME
BUY VICTORY BONDS—NOW

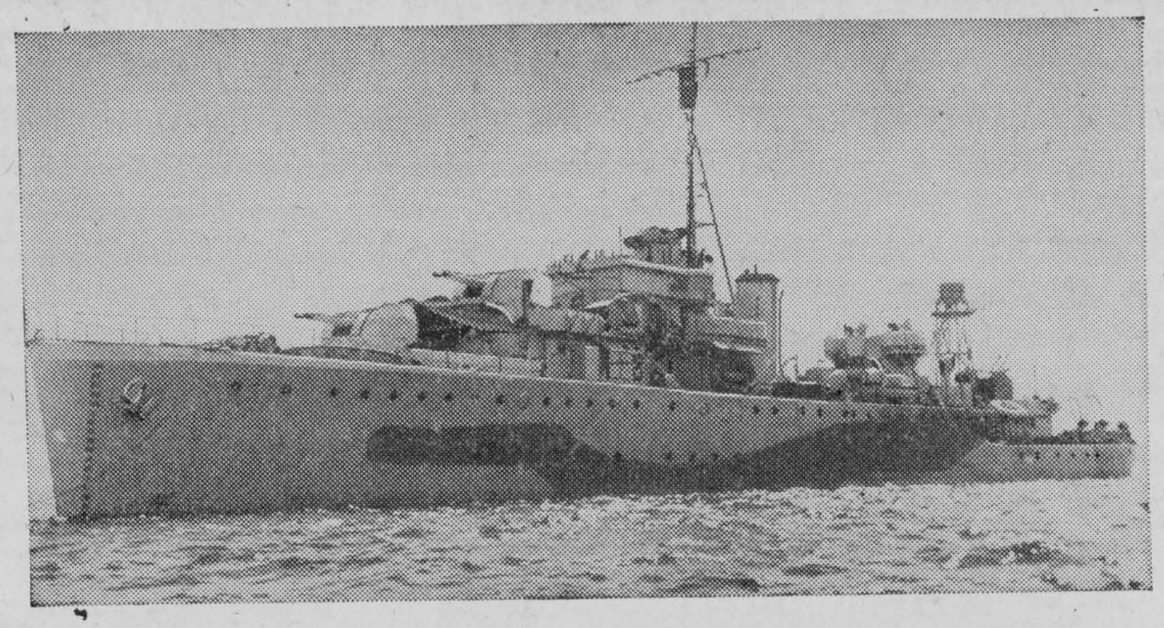

THURSDAY, MAY 25TH, 1944.

HAP HAZARD METHODS WILL BE CHANGED

In the old days the work to which a youth would be destined to devote his energies was determined largely by necesssity, not choice. In many cases family requirements made it almost essential that a young man should accept the first job that offered itself, irrespective of his fitness or desires in the matter. There was no preparation for any particular calling in life. Some years ago a man who made a practice of spending his vacation in the Gatineau district became interested in the growth of a French Canadian boy. When the youth reached his twelfth year he said to his father, "Fine boy you have there. Baptiste." "Yes, big boy," was the reply, "soon be ready for the bush". This getting ready for the bush was not an isolated case and resulted in many misfits in life. In Ontario it is proposed to change such haphazard methods by the creation of an educational guidance branch to be supervised by trained departmental officials, which will come into operation during the coming school year. In the schools every effort will be made to fit the pupil for future life stressing the needs of the individual pupil on the basis of his particular ability. Premier Drew as Minister of Education explains that the plan to institute educational guidance in the schools calls for the work to be carried out by the teachers themselves in co-operation with a small but highly specialized staff of officials who will form the educational guidance branch. He emphasizes that little training will be required by the school teachers to fit themselves for vocational guidance, as the plan will be reduced to charts and forms which will set out specific undertakings. It is altogether probable that the program will be confined to the Secondary Schools first, although there is a possibility that the plan may also start in the last grades of the Elementary Schools.

LOCKING THE STABLE DOOR

There was a time when potato producers in Ontario were not inclined to take a back seat to any place in respect to the excellence of their tubers. They pointed with pride to the quality of the Early Rose, the Irish Cobblers, not to mention other varieties. But of late years Ontario grown potatoes do not commend the respect hitherto accorded them. "Murphies" from the little island of Prince Edward hold a key position both as to price and flavour and the tubers from the Maritimes and Quebec rate a higher quotation than the Ontario varieties. Just at present there is a surplus of the 1943 crop of potatoes in several counties in this province and the Minister of Agriculture has inaugerated a system of grading to assist growers. Two inspectors have been appointed to start work at once in the areas where the potato surplus is located and it has also been arranged to have the potatoes packed in new printed bags. While the steps taken by the Department are appreciated it is feared by the producers that the step has been delayed too long to be of much assistance in moving the balance of the "1943 crop". It is being urged, however, that grading be made a permanent policy in the marketing of Ontario potatoes as in this manner this province might regain its old prestage in the field of competition.

THE BRITISH SLOOP STORK

Picture Shows: Bow view of H.M. S. Stork, the 1,190 tons sloop.

FISH SOLD AT 3 CENTS PER POUND

While the residents of towns and cities in this enlightened province are paying anywhere from 25 to 60 cents a pound for fresh fish, a News Dispatch states that fishermen around Kingsville have started to pull up their nets from local waters and tie up their boats in protest against the price of three cents a pound offered by dealers for their catches which have been exceptionally heavy. Owing to lack of a freezing plant the fishermen have been unable to hold the fish off the market for a rise in price, thus placing them at the mercy of the buyers. It is contended by the fishermen that the government should place a floor price of not lower than 10 cents a pound on fish as they lose money when the price goes below this level. It might also be suggested to the Prices Board that when abnormal catches are being made ,a ceiling on the price of fish would give the long suffering consumer a slight break.

CO-OPERATIVE EFFORT NEEDED

At the closing session of the Third National Foreign Trade Conference of the Canadian Chamber of Commerce meeting in Hamilton, a program for expansion and development of trade arrangements and all other international measures for the elimination of destructive tariff and trade wars was advocated. It was pointed out that future trade policies will require a greater equilibrium between exports and imports if a large volume of exports is to be maintained. This points to the conclusion that to maintain maximum employment, a high level of national income and well being, and the full utilization of our expanded industrial capacity, every effort must be devoted to maintaining and increasing our foreign trade. This objective can best be served by an intelligent and co-operative effort on the part of Government and business in the spheres of international collaboration and in domestic policies.

YOUR DOLLAR IN THE COMMUNITY

"As sure as death and taxes" seems to be as positive a way of affirming a statement as any. From ancient days the word tax has carried a burden of meaning but today we are interpreting it in a new light. The slave was forced to keep his nose to the ground by numerous taxes on everything and anything. Even the air he breathed depended upon his ability to pay for his living quarters. Gradually the urge for better conditions spurred the average person to demand a value in return for the money he handed over. He had a right to have a decent home and an education for his children.

To carry out the necessary reforms a small group of men had to be appointed to make laws and regulations and to see that they were carried out. A city or a town might be the area administered or it might be a large area sparcely populated. Thus we have the term municipal affairs appearing which simply means the common laws for the good citizens of the city, town, village or wider rural area. Population usually governs the boundaries within which a municipal council works. Although in Quebec we find the old ecclesiastical division into parishes in the days of the first colonists has been used for civil purposes in that province.

Today every province has its own interpretation of what a municipality should be, the only thing in common being the words urban and rural. Even then the definition for rural varies widely. For example, rural municipalities are called townships in Ontario, districts in British Columbia, municipal districts in Alberta, counties in New Brunswick, municipalities in Manitoba and Saskatchewan. More will be said about the provincial municipalities later.

No matter what the section covered is called, it still levies taxes for its work. The Finance Branch of the Dominion Bureau of Statistics reports that in 1941 the taxes levied by municipalities in Canada was over 249 million dollars. That means that the citizens in the four thousand or more incorporated municipalities were asked to pay for better public buildings, schools, roads, bridges, police and fire protection and so on. The sad part of the story is that not all of the money collected on this account can be spent on going ahead but must be used to catch up on arrears and keep the "ship of state" on an even keel.

THEIR TEACHING LIVES

A He wrought with grace and
builder builded a temple,
skill;
Pillars and groins and arches
All fashioned to work his will.
Men said as they saw its beauty,
"It shall never know decay;
Great is thy skill. O builder!
Thy fame shall endure for aye."

A teacher builded a temple
With loving and infinite care,
Planning each arch with patience,
Laying each stone with prayer.
None praised her unceasing efforts,
None knew of her wondrous plan,
For the temple the teacher builded,
Was unseen by the eyes of man.

Gone is the builder's temple,
Crumbled into dust;
Low lies each stately pillar,
Food for consuming rust.
But the temple the teacher builded
Will last while the ages roll.
For that beautiful unseen temple
Is a child's immortal soul.

PRINCIPALS AND TEACHERS ARE ASKED TO HELP

In view of the urgent demand for help for Ontario farms during the busy summer season, Alex MacLaren Director of the Ontario Farm Service Force, is appealing for the active co-operation of the Principals and teachers of secondary schools throughout the province. The bulk of the help for the summer season in certain parts of Ontario will have to come from the secondary schools but so far the response has been a long way short of the demand. Mr. McLaren is convinced that Principals and Teachers of these schools can render a tremendous service by using their influence and knowledge of the critical food situation to encourage their students to spend at least a part of their summer vacation period on farm work, either on individual farms on in farm service camps.

School Principals and Teachers can assist boys and girls to decide to undertake farm work by placing before them clearly and forcefully the importance of farm service work to the food situation and also the conditions under which they can leave school at once if they are definitely going into farm work. As the Department of Education is supporting the Farm Service Movement very strongly. Mr. McLaren is confident that he will receive the co-operation of Principals and Teachers along the lines suggested.

RURAL ELECTRIFICATION

At a short course in agriculture given at one of our Canadian universities President Wallace claimed that rural electricfication was one of the most pressing needs following the war. To anyone who has any knowledge of farm life, this sounds very reasonable and progressive.

So many farmers, carrying an extra heavy load during wartime, have not even the advantage of working by electric light, a convenience taken for granted by office and factory worker alike. Poking about in the early morning darkness with a lantern and filling pails at a hand pump, the temperature below zero, aren't exactly conducive to increased efficiency.

And the farmer's wife! What of her extra duties, for she too has felt the loss of help. The wood-box replaced by an electric stove would be such a help not to mention an electric iron and an electric washing machine. She wouldn't have to worry about the children pouring over books by lamp light, afraid that eager Johnny would be so disappointed if his eyes prevented him from becoming a daring pilot.

Even a radio to keep in touch with the rest of the world would mean so much. An interesting moving picture film once a fortnight, probably shown in the school-house or town hall, would make rural people feel that they are not actually forgotten by the march of time.

Only 20 percent of farm homes in Canada have electric lights. Imagine how amazed people in a city or town would feel if only every fifth house in a hundred had electric lights. According to the Dominion Bureau of Statistics there was 733,000 farms in Canada. What a field of enlightenment!

Professional Courtesy

A Minister, a scientist and a lawyer were adrift on a life raft in the tropics. At last they sighted land. But the wind died down while they were still a short way off the beach.

The lawyer, the only one who could swim, volunteered to go ashore with a line and pull the raft to land. The minister knelt and prayed for his safety.

Then the lawyer dived in. His companions saw the black fin of a shark making straight for him. The shark disappeared, then came up on the other side, having passed under the swimmer. Shortly they saw an even bigger shark darting toward him, but this one also swerved just in time.

After the lawyer had reached shallow water, the minister said to the scientist. "There you are doubting Thomas, there is proof of the power of prayer."

"Power of prayer, hell!" retorted the scientist. "That was just professional courtesy."

2,000 Boys and 800 Girls Are Needed At Once

An urgent call for 2,000 boys and at least 800 girls from the secondary schools of Ontario to undertake farm work this summer, starting at once, has been issued by Alex McLaren, Director of the Farm Service Force of the Ontario Department of Agriculture. With prospects of bumper crops of hay, grain, fruit and vegetables this year the demand for boys and girls for seasonal farm help is far beyond what it was in 1943 when crops were greately below normal.

"There will be a real food crisis next fall unless we have far more boy and girl volunteers to hoe and harvest the bumper crops that are expected," said Mr. McLaren. "Our farmers are able to produce the food that is needed, but unless we can provide the labour to take care of the crops and harvest them thousands of tons of highly essential foodstuffs will go to waste and will rot in the fields and orchards."

At least 1,500 boys are urgently needed at once to work on selected farms all over the Province, where standard wages will be paid and good living conditions provided in inspected farm homes. These openings are available now to boys who have the necessary standing at school to qualify them to go to work on farms at once and still secure educational credits. In addition, 500 boys are required for the Ontario Farm Service Camps in the market garden areas of Ontario, such as Burlington, Blenheim, Harrow, Leamington and Holland Marsh.

Applications from any collegiate or high school boys for these camps are requested at once.

So far as girls are concerned, enrolments are 800 below last year's figures at this date and this leeway must be made up at once if the farm service camps are to be filled. The girls now in the camps are finding the work both pleasant and profitable, with splendid living conditions and supervised recreational facilities for their leisure time. Most of the girls' camps are in the Niagara Peninsula and the Kent County fruit areas.

Boys and girls can be placed immediately in work that is vital to the country's war effort by making application to the Ontario Farm Service Force, Room 901-T, Parliament Buildings, by letter or personal call.

TEA AND COFFEE ON SAME COUPON

The Ration Administration has announced that it is now permissable to buy eight ounces of coffee and two ounces of tea on the same tea or coffee coupon. Before higher coupon values became effective May 1, consumers were obliged to buy one or other commodity with their coupons. Purchases of a combination of both tea and coffee in the amounts mentioned are now allowed. This was not previously possible with the former coupon value as tea was not generally packaged in one-ounce containers.

Clerk of Morrisburg Dies in 75th Year

Veteran telegraph operator of the St. Lawrence district of the Canadian National Railways and for 44 years municipal clerk of Morrisburg, Fred R. Chalmers was buried in Fairview cemetery Tuesday afternoon, May 16th, in the presence of a large assembly of town and district citizens.

Service was conducted at Mr. Chalmers' residence by Rev. R. P. Maitland, of Knox Presbyterian church.

His death occurred suddenly on Sunday last in his 75th year.

Born in Morrisburg, a son of Jas. Chalmers, the first telegrapher of that district, and Mrs. Chalmers, he was educated in the local schools and also at Adams, N.Y. Following the completion of his schooling he went into business with his father as a jeweller and telegrapher.

In his younger days he was well known in sports circles in the area as goaler for Morrisburg's first hockey team which later became famous throughout Eastern Canada. He was also prominent as a curler and skater and visited the local rinks to participate in those sports until recent years.

A former elder of Knox Presbyterian church, he served on the executive of the Canadian Club of Morrisburg and district since it was founded 20 years ago and was the first president of the club.

He was twice married. Some years following the death of his first wife, the former Annie B. Proctor, of Waddington, N.Y., he married Mrs. Louis Ainslie of Lexington, Kentucky who survives.

In addition to his widow he is surviveid by a son, Proctor Chalmers of Toronto. A daughter, Mrs. A.C. Casselman died in 1929.

5th Ave, Williamsburg

Rev. W. Henley, Newington and Mrs. Percy Rupert, Crystal Ave were tea guests on Sunday of Mr. and Mrs. Oliver Gallinger, Colquhoun.

Mr. and Mrs. E. Styles, Elva and Miss Rea Wickwire, Brinston, were recent guests of Mr. and Mrs. Calvin Gallinger.

Rev. Story, Aultsville, was a recent Sunday tea guest of Mr. and Mrs. Calvin Gallinger.

Mr. Ed. Hanna, Finch, called at John Hanna's on Tuesday last.

Mountain West

Mrs. Harry Workman spent Wednesday in Ottawa.

Mrs. Bert Harrison and baby are spending this week with her uncle Mr. Melvin Adams and family of Kirkwood road.

We have just heard of the death of another resident of South Mountain, in the person of Hugh Short. We extend our sincere sympathy to the bereaved ones.

Miss Marguerite Crowder spent the week-end at her home here.

Mr. Samuel Grant of Hyndman spent some time visiting his daughter Mrs. Arlow Beggs.

Mrs. Arlow Beggs and daughter Irene called on Mr. and Mrs. Sam Graham and family recently.

Mrs. Wm. Beggs of Kemptville called on Mr. and Mrs. Edmond Francis this week.

Mr. and Mrs. Harry Workman visited friends in Brinston recently.

Eighth Line, Osnabruck

Mr. and Mrs. Edward Gillard spent Tuesday evening with Mr. and Mrs. Jas. Hesson, Grantley.

Mrs. Peter Lapier, spent Wednesday with Mrs. Annie Carbino.

Mr. and Mrs. Jack Dunbar and daughters, Cedar Grove, spent Sunday with Mr. and Mrs. Alfred Dunbar and family and Mrs. John Dunbar and David.

Clarence Moak, Cornwall, spent the week-end with his wife and daughter Carolyn and Mr. and Mrs. Wm. Ostler.

Mr. and Mrs. Harold Alguire and daughters of Williamsburg, accompanied by Mr. and Mrs. Peter Lapier and Lydda spent Sunday with Mr. and Mrs. Bruce Harper, Dundela.

Mrs. Wm. Ostler and Mrs. Clarence Moak, entertained the Baptist Mission Circle on Wednesday.

Mrs. Ellwood Carbino and family, spent Sunday with Mr. and Mrs. Wm. Gillard.

Mr. and Mrs. Ed. Gillard and family and Mr. and Mrs. Alfred Dunbar spent Saturday evening in Cornwall.

Morley, June and Pauline Winters spent Sunday evening with Mr. and Mrs. Alfred Winters and Elsie.

Miss Lydda Lapier spent the week-end with her parents Mr. and Mrs. Peter Lapier.

Mr. and Mrs. Edward Gillard spent Sunday evening with Wm. Feader and Miss Sarah Feader, of Grantley.

Mr. and Mrs. Wm. Ostler, Mr. and Mrs. Clarence Moak and Carolyn were entertained on Saturday evening to a birthday party in honour of Mrs. Clarence Moak at Mr. and Mrs. Orval Moaks, Newington West.

Ralph and Albert Winters spent Sunday with Mr. and Mrs. Ernest Gault and Gary and Miss Hazel Winters, Ottawa.

Willis Warner, 7th Ave., West, spent Wednesday evening at the home of Wm. Gillard.

Cpl. Ernest Waldroff, Kingston, spent the week-end with Mr. and Mrs. Robert Waldroff and sons.

Miss Elsie Winters, teacher at Bush Glen, spent the week-end with her parents Mr. and Mrs. Alfred Winters and George.

Mr. and Mrs. Geo. Moak and Bernice, Newington West, spent Sunday with Mr. and Mrs. Wm. Ostler and family.

Mr. and Mrs. Wm. Gillard, Edward Gillard and Betty spent Monday with Mr. and Mrs. Ernest Beckstead, Orchardside. 1

Mr. and Mrs. Carl Waldroff, of Finch, Mrs. H. Waldroff and Harold of Williamsburg spent Sunday with Mr. and Mrs. Robert Waldroff and sons.

Payne Valley

Mr. Gordon MacIntyre is spending some time with Mr. and Mrs. Wendell Henry.

Mr. and Mrs. George Eligh called on Mrs. Adelaide Empey, Mrs. Ida Bishop and Mrs. Jimmie Munro of Finch, Friday.

Miss Dorothy Siddell spent the week-end with Mrs. Lois Lafaver of Williamstown.

Mr. and Mrs. J.D. Shaver and son Garry and Mr. Donald Shaver and George Eligh spent Monday with friends in Cornwall.

Miss Dorothy Siddell spent Wednesday evening in Winchester.

Mr. Dan Campbell called on Mr. and Mrs. George Eligh on Saturday evening.

Pte Colin Cameron of Camp Borden is spending his furlough with Mrs. Cameron and family.

Mr. and Mrs. George Eligh and Mr. and Mrs. Leslie Stephenson and daughters of Cornwall spent Sunday afternoon with Mr. and Mrs. Ernest Swerdfeger, Hoasic; also called at Strader's Hill and visited a while with Mr. Donald Garlough, Williamsburg.

Mr. and Mrs. Geo. Eligh and Mrs. Hughie Cameron and family spent Sataurday in Cornwall.

A number from here attended the sale at Wendell Henry's, Berwick, on Friday.

Mrs. K. Cameron returned home on Sunday after spending a few days with Mr. and Mrs. Millward Cameron, Moose Creek.

Mr. and Mrs. Leslie Stephenson and family, Cornwall, spent Sunday with Mr. and Mrs. George Eligh and Mrs. Hughie Cameron.

Mrs. Dan Campbell spent a couple of days last week with Mr. and Mrs. Edgar McLean, Finch.

Melvins

(Too late for last week)

AC2 Glen Christie of RCAF, Vancouver is spending some holidays at his parental home here.

Mr. and Mrs. George Beckstead and daughters Mrs. Farren Beckstead and Mr. John Stata spent a Sunday recently with Mr. and Mrs. Ernest Swerdfeger of Hainsville.

Mr. and Mrs. Samuel Presley and children have returned to their home in Toronto having spent a week with Mr. and Mrs. James Shaw.

Mrs. Peter Poole spent the week-end with her mother Mrs. J. Scott, who is still ill.

Mr. and Mrs. Clifford Lafaver of Chestervile spent Tuesday with Mr. and Mrs. Richard Scott and Mrs. J. Scott.

Mr. and Mrs. Norman Holland and Jr. of Massena, N. Y., spent Mothers' Day with Mrs. Holland's parents, Mr. and Mrs. Adam Gainer.

Mrs. Johnston Stewart and children of Massena spent the week-end with her parents Mr. and Mrs. J. Presley.

Mr. and Mrs. Elgin Black, Genevieve and Arden spent Sunday with Mrs. Marcia Strader and Mr. and Mrs. James Bowman.

Mr. and Mrs. Chas. Davidson and baby spent Sunday evening with Mr. and Mrs. Willis Robinson.

Miss Eileen Gunn and girl friend, of Ottawa, spent the week-end with Mr. and Mrs. Stewart Gunn.

Mrs. J. Stewart and children and Mrs. J. Presley spent Saturday afternoon with Mr. and Mrs. Bernice Short and Mrs. Wm. Stewart.

Mr. and Mrs. Richard Scott called on Mr. and Mrs. John Redmond of Winchester.

Miss Hilda Shaw of Ottawa spent the week-end at her parental home.

BOY SOLDIER

News of Norway—For selling a children's ticket to a uniformed German soldier, the ticket seller and captain of an Ostfold ferryboat were summoned to the police. The German officer who reported the incident declared it constituted a rank insult to the German Wehrmacht. But the ticket seller explained and proved, that he had been acting in accordance with the regulations. It is the rule, he said, that children under 16 should pay only half fare. When he had asked the German soldier in question his age, he had received the reply: "Fourteen and a half years". The case was dropped.

Mrs. Edsel Merkley Receives Letter From Son

RCAF Overseas.

Dear Mother: I will write a few lines tonight. I am pretty tired as I will tell you about our experience in the last twenty-four hours. Otherwise from being tired I am fine and hope you are the same.

Last night at seven o'clock we were told to pack everything, load our trucks, and be ready to leave this morning at five o'clock. We finished packing everything just before midnight and went to bed for a few hours, but really had to get up early as we had to pull down our tents and pack our bedding before five. Anyhow we did that and away we went this morning on a parctise convoy trip. I don't know where we went, this country is full of roads, and maybe we were going in circles for all I know. We stopped at noon and set up the mess tent and the cooks had our dinner ready in less than two hours after we stopped. Pretty good, eh? After dinner we left and arrived back in camp at four o'clock and were given two hours to unload and put up our tents. We did it in record time so do you wonder at be being tired? I am lying in my bed, a straw tick in the ground, with my flashlight for light writing this. not bad eh? Now that is just one move we made. We have a set time for every one of our moves, but this one was a record. I hope the next one is to France.

Oh, I must now tell you, I have praised Chesterville up so much that they all call me Chesterville and we all have our trucks named and mine has Chesterville on it. Wait 'till I land in France with it. They'll think I'm a long way from home, eh.

Well, it is now starting to rain, so I guess we just got home in time. I will close as the rain on the tent is putting me asleep. By the way, the apple trees are in bloom here and today I say lilacs. They made me think of home. I wonder will I be back to see them next year at this time. Oh, well time will tell.

Have not had time to post the letter I wrote last night so will add some more to it tonight. I received a letter from you today so I can answer a few questions from it. By the way mother, the Red Cross gave us turtle neck sweaters, socks and handkerchiefs, so don't you send anything in that line until I write and ask for it. Here is a clipping from the paper I'm sending, believe it or not it is us. That's how we travel, pertty nice isn't it. We sure are making history. I wish The Record would put that in the paper. Do you suppose it would. It is the all-Canadian airfield I told him of when I was at home. Anyhow, take a good look at it and let the others see it. Yes, Cassel'man and Henderson are still with me. We are scattered all over the place so I don't see them as often as I might. However, we still get together and talk things over.

Sure I still go to church, every time I can get there. Church won't hurt anyone. I always did like going and we have near here a little church the airforce has taken over and we have church twice on Sunday in it. I was there both times last Sunday and hope to go again tomorrow.

Well I will close for now and will write again soon.

Yours.

Carl Merkley.

Taking No Risks.

An English youth came to a farmer to borrow a lantern. At first he refused to say why he wanted it, but eventually confessed that he wanted it to go courting. The farmer was scornful.

"I did my courting without a lantern."

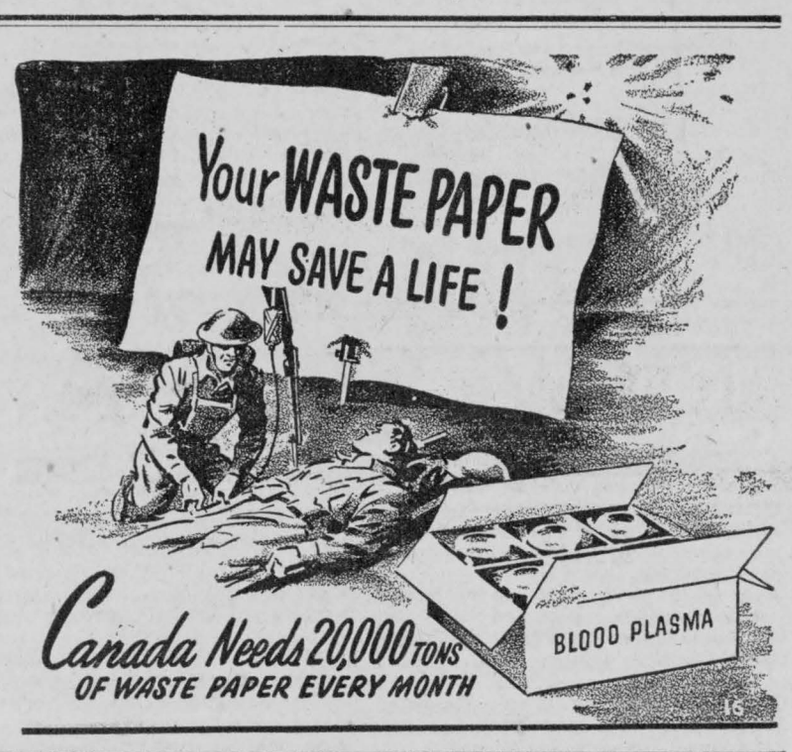

"Yes," replied the youth, "and look at your missus."

SUGAR POLICY ON HOME CANNING

More home canning is done in farm homes than by residents in urban centres, so the policy for this year with respect to sugar for canning or preserving is of particular interest to farm housewives.

The Wartime Prices and Trade Board has announced that five pounds of canning sugar can be secured with the first 5 "F" coupons in Ration Book No. 3 on or after May 25th and another 5 pounds can be obtained with F coupons after July 6, making 10 pounds of sugar per person as a minimum for canning. In addition, consumers have the alternative of using each of the 26 preserves coupons in Ration Books No. 3 and 4, when valid, for purchase of half a pound of canning sugar. By using the sugar alternative for each of the preserves coupons 23 pounds of canning sugar during the year can be obtained per person. This is in addition to the regular weekly sugar ration of half a pound per person.

If a consumer chooses to buy preserves rather than put down fruit the F coupons can be exchanged for preserves coupons at Local Ration Boards after they become valid on May 25 and July 6.

The Road Ahead...

Canadian Agriculture, giving as it has such abundant evidence in these days of prodigious war needs, of its ability to furnish ever-increasing quotas, is yet going to be faced with greater production programmes in the days following the liberation of the occupied territories of war-torn Europe.

There is perhaps no other single factor that has so greatly assisted the Canadian farmer to accomplish such record achievements as that of modern machinery. United with the farmer, in the job of continuously improving and increasing the efficiency of his methods of production, is the Implement Engineer.

Massey-Harris, always a leader in the introduction of time and labor saving equipment, has made another notable advance with its self-propelled combine which has revolutionized harvesting methods.

The self-propelled principle introduced in the Massey-Harris Combine opens up a world of possibilities in the future trend of farm machines for the road ahead.

MASSEY-HARRIS COMPANY LIMITED
BUILDERS OF GOOD FARM IMPLEMENTS SINCE 1847

Free Enterprise

IS IN THEIR BLOOD

SINCE the beginning of Canada's history, independent trappers, operating on their own initiative and responsibility, have been the basis of Canada's great fur industry.

Rejecting an ordered way of living, trappers have adventured far beyond the boundaries of civilization in their quest for furs. Some have made fortunes. Some have not. But each has lived the life he wished to live . . . has treasured his right to fulfil a personal ambition. This is free enterprise in action.

This Bank, in its lifetime of over a century, has been a support of Canada's fur industry . . . has been attuned to the independence and the self-reliance of the men who built it.

Keep Canada Strong and Free!

Melvins

Mrs. Gordon Wells and little son of Colquhoun spent Friday with her parents Mr. and Mrs. J.A. Erratt.

Visitors at Mr. and Mrs. Emanuel Coyeau's were Mr. Paul Gauthier and mother Mr. and Mrs. Leo St. Pierre and Emmett St. Pierre.

Mr. and Mrs. Adam Gainer are spending a few days this week with their daughter and son-in-law Mr. and Mrs. N. Holland of Massena.

Mr. and Mrs. Willis Robinson spent Sunday at the latter's home in Ormond.

Visitors at Mr. Richard Scott's on Sunday were: Mr. and Mrs. Gordon Scott of Montreal, Mr. and Mrs. Peter Poole and Mrs. George Coons and Edna and Earle Desjardine of Winchester.

We were sorry to hear that Mr. John Erratt had such a loss by fire on Friday last.

Mrs. Sterling Coons and daughters Elethia and Bertha of Winchester visited Mrs. John Scott on Saturday afternoon.

RAISING THE HEALTH STANDARD ....

There are many ways in which the average person may assist in raising the standard not only of his own health, but that of the community and ultimately of the nation as a whole. This is a statement which opens up a whole field of enquiry of no little interest.

Take for example just one instance. A survey was made recently of a number of restaurants considered to be using superior cooking and serving devices and technique. This survey revealed that there was an average loss of 45 p.c. of the anti-scurvy vitamin C; and 35 p.c. of thiamin, vitamin B-1, during cooking of all vegetables. This loss is due to the destruction of vitamins by heat and to the fact that the water in which they are soluble is discarded. A further 15 p.c. is lost during the time vegetables must stand before serving. Actually, then, the customer is getting only about one-quarter of the original vitamin content of all cooked vegetables that are served to him.

During the Conference of the Canadian Medical Association at Ottawa, last summer, a most interesting fact in connection with Cancer Research which has a direct bearing on the above was introduced by Dr. Davidson of Winnipeg, Manitoba, in connection with his report on the treatment, prevention and possible cure of the disease.

While still in an experimental stage there is excellent reason to believe that diet may be of great value in reducing the susceptibility of the human race to the disease and quite possibly effecting cures. Foundation for this belief rests on a number of actual cases presented by Dr. Davidson.

In our homes it is easy enough to regulate our diets so that we have a satisfactory balance of vitamins, particularly those mentioned above, thus raising our resistance to disease, this is a matter of volutnary effort. For those who frequent restaurants, a little cooperation between dietician and patron can counter-balance the deficiency which now exists.

Seventh Ave, Osnabruck

Mr. and Mrs. Wilson Runions, Mr. and Mrs. George Feek. Cornwall, were Sunday guests of the firmer's sister, Mrs. W. G. Wert and Mr. Wert.

Mr. Willis Warner, accompanied by his grandchildren Lois and Gerald Gallinger spent the week-end in Ottawa with Miss Arla Warner.

Mr. and Mrs. John Grandaw spent Sunday with Mr. Geo. Johnston, Bennett and Earle of Chesterville.

Mrs. Sam O'Neill, Ottawa, was a Wednesday dinner guest of Mrs. Jacob Brownell and called on other friends and former neighbours here.

Mrs. Leslie Dunn, Perth, had tea with Mrs. Laurel Beach, Tuesday.

Mr. and Mrs. Ed. McLaughlin and family, Cardinal, visited Mr. and Mrs. Robert Grant, Wednesday evening.

Mr. and Mrs. Harold Francis, Mr. and Mrs. Lawrence Pelton and son, Charles, Miss Doris Cowan, Master Irving Robinson, attended the circus at Ottawa, Thursday evening.

Miss Eva Dunn, Brockville spent a few days last week visiting her brother, Mr. Bobby Beach.

Mrs. Thos. Canning, Pleasant Valley spent Friday with her daughter, Mrs. Ray Grant.

Mrs. Laurel Beach, Bobby and Denis attended the funeral of the late Geo. Dunn on Tuesday afternoon at Brinston. We extend our sympathy to the bereaved ones.

Born: To Mr. and Mrs. Hubert Robinson on May 19th, a son, at the Grace hospital, Ottawa.

Mr. and Mrs. Gorman Alkerton and daughter Marilyn, Mrs. Allan Grant and family of Cardinal visited friends here Sunday.

Mr. and Mrs. Garnet Sears and family, Spencerville, were Sunday visitors of Mr. and Mrs. Jas. Sommerville.

Mr. and Mrs. Sam Brown, Groveton, spent Sunday with Mr. and Mrs. Roy McCarley.

Mr. Jas. Sommerville had the misfortune to lose a horse last week.

Mr. and Mrs. Jim Grant, Misses Katie and Reta Grant, Cardinal, visited Mr. and Mrs. Jas. Lattimore, Sunday evening.

Mr. and Mrs. Cecil Canning visited her parents Mr. and Mrs. Robert Grant, Sunday.

ESKIMOS.

The Far North never ceases to interest us, and the stories of the Eskimos, the inhabitants of that vast hinterland, will always hold our attention. These peace-loving inhabitants are said to have originated from the same racial stock as the Indians —from the great Mongolian races that predominate throughout the eastern and northern parts of Asia. The name 'Eskimo' is a Cree word which means "eaters of raw meat". A generation ago the word was spelt Esquimault.

The 1941 census tells us that there has been an increase in our Eskimo population during the past ten years. In 1931 they numbered 5,979 and by 1941 they had increased to 7,205. They live principally on the northern fringe of the mainland and on islands in the Arctic Archipelago and in Hudson Bay, although in the Baker Lake Chesterfield inlet area on the west side of Hudson Bay, there are bands of Eskimos who are essentially an inland people and who subsist chiefly on caribou.

The administrative care of Eskimos devolves upon the Lands, Parks and Forests Branch of the Dominion Department of Mines and Resources, which by regulative measures, conserves the natural resources necessary to their subsistence. Contact with the Eskimo is maintained through permanent stations in the eastern, central and western Arctic, at a number of which medical officers are located and by means of the annual Canadian Eastern Arctic Patrol by steamship.

Law and order in all regions in Canada inhabited by Eskimos is maintained by the Royal Canadian Mounted Police.

STRAWBERRIES ALL SEASON.

One of the very inspiring requests we got a year or two ago was from the headquarters of the Educational Services of our Canadian Armed Forces in the United Kingdom to send copies of the Fact a Day for the use of the instructors in the splendid work they are doing for our young men.

Another suggestion which came to us was to make a note of any new development in farming, because a great many of the lads had the ambition to own a bit of land, farm it well and make on the great open spaces a comfortable and progressive homestead. So we have tried to do this, which is why we so often talk about beans and peas, hens and horses and whatnot.

Well there has just come to the Bureau a batch of information from the Department of Agriculture which is particularly interesting. It tells of two things that are new. The first one is that recently developed varieties permit picking strawberries in a Prairie Garden almost continuously from late June until freeze-up.

This is accomplished apparently by growing both June-bearers. in the usual manner, and ever-bearers.

The second important finding is that the cost of producing a sugar beet seed crop was very considerably reduced when it was found that the young plants could be wintered in the open, thereby saving all costs in harvesting and pitting the roots and planting them to the field the following spring.

These are important additions to our store of knowledge which the busy scientists have brought us and those who want rounded-out information about them should write to the Publicity Branch of the Department of Agriculture, Ottawa, and their wants will be supplied.

Miss Vida Smith spent the 24th at her home in Finch.

Miss Alice Fetterly visited the first of the week at Finch.

Misses Alice Meldrum and Elva Ouderkirk of the General hospital visited over the holiday at their homes.

Mr. Joseph Servage of Cornwall visited his brother George recently.

A few of our citizens went to Cardinal to attend the horse races on the 24th.

Messrs. O. Bourgon and C. Rochor spent Tuesday in Ottawa.

Misses Kathleen and Helen Ruddy of Ottawa and Mr. Willard Lett of Eganville were guests over Sunday of Mrs. Ruddy and family.

WHERE DOES THE SOAP GO?

Many youngsters would not feel badly if a cake of soap were not forthcoming; others approaching the "particular or fussy age" would most certainly voice a complaint. Canadian children as a rule are taught that cleanliness is a personal duty towards the welfare of all and when we read of the German authorities cancelling extra soap rations to Netherlands children under seven, soap assumes a new importance in our everyday life. Small children and infants are heavy users of this homely commodity especially when it comes to keeping clothing clean and fresh. What will happen to the European children from a hygienic point of view?

An ordinary bar of soap doesn't betray its kinship to a stick of dynamite but the two have been very close relatives. At one time in their preparation they shared the same vat—as soap and glycerine—glycerine later forming the base for dynamite, nitro-glycerine and cordite. The by-product or second cousin in the family soap tree has now assumed the more favored place in world affairs and every ounce of explosives is doing a fine clean-up job.

However, soap is not a luxury product but a necessity. Scientists in the soap laboratories are working very hard to provide cleansers that will suit military needs. Soaps that will remove grease and grime from land operations will not always prove satisfactory at sea where salt water is used. Then again the need for a product that will keep, under all weather conditions, is very important. Naturally, economy has to be considered. Another cause for headaches is the loss of the sources of oils such as cocoanut and olive and the search for substitutes.

Ships travelling to Newfoundland carried over four million pounds more soap in 1942 than in 1941 and this seems to be typical wherever military camps have been established. Countries which before the war took very little, if any of this product, now show considerable increases in their imports. This may be due to the increase of personnel for defence or to the closing of European markets. For example, British Guiana took over ten times as much soap as in the previous year; Haiti over seventy times as much, and so on. In fact exports of soap from Canada jumped from three million pounds in 1941 to twelve million in 1942, according to the External Trade Branch of the Dominion Bureau of Statistics.

Sandtown

Mr. and Mrs. George Millross of Finch and Mr. and Mrs. Graham Silmser and Mrs. Ola Boal of Cornwall and Mr. and Mrs. Johnnie Boa of Ottawa and Mrs. Russell Brownell of Wales spent Sunday with Mr. and Mrs. Will Boal and Mr. and Mrs. Harry Gove.

Mr. and Mrs. Linden Boal and family of Cardinal spent the week-end with friends here.

Mr. and Mrs. Fred Neilson and family spent Sunday with Mr. and Mrs. J.D. McMillan of Finch.

Mr. and Mrs. Andrew Helmer and son Harold and Mrs. Lloyd Hawn spent the week-end with Mr. and Mrs. Roy Love at Ottawa.

Mr. and Mrs. Wilbert Helmer and family spent Sunday with Mrs. Henry Steel and family at Avonmore.

Mr. Dannie Hehir spent Tuesday and Wednesday with Mr. and Mrs. Linden Boal at Cardinal.

Miss May Helmer of Cornwall is spending a week with her parents Mr. and Mrs. Wilbert Helmer.

Mr. and Mrs. Carl Waldroff, Finch spent Sunday with Mr. and Mrs. R. J. Waldroff and sons.

Mr. Howard Winters of Newington and Mr. and Mrs. Tom Brownell and son Sterling of Massena, spent Sunday with Mrs. Jas. Winters and Mr. and Mrs. Harold Winters.

Mr. Hillard Helmer of Chesterville was a Saturday night guest of Mr. and Mrs. Wilbert Helmer.

Mr. Arnold Pearson who spent the past three weeks at his home here returned to Smiths Falls on Monday.

Miss Joyce McLean of Finch spent Monday and Tuesday with Miss Leda Hehir.

Mrs. Cecil Rupert of Cornwall spent Monday and Tuesday with her mother, Mrs. James Winters.

Mr. and Mrs. Willard Hawn and daughter Joyce of Cornwall spent Wednesday with Mr. and Mrs. Wilbert Helmer.

Riverside

A number of the W. I. members attended the District Annual at Wales, Wednesday.

A large number attended the Auction sale at the home of Wendell Henry, Friday.

Mr. and Mrs. Fergus McKercher and Mrs. John Cameron of St. Elmo and Mrs. Melvin McMillan and daughter of Winchester were week-end visitors at the home of Mr. and Mrs. Fay Droppo and family. Glad to report Fay recovering from an attack of pneumonia. Dr. Justus of Chesterville is in attendance.

Mrs. D. W. Pollock spent Tuesday in Ottawa. Ann Pollock accompanied her home to spend some time with her grandparents.

MUSICAL INSTRUMENTS.

Both music and language employ sound as their medium and while a person talking to himself would be regarded as "odd" to say the least, another humming a tune or playing a mouth organ would be called musical or even gifted. Both would be expressing themselves by sound. A soldier in the trenches, whistling a tune, a sailor hunched up in his hammock squeezing music out of an accordion or an airman fondly coaxing "Home, Sweet Home" out of a piccolo, each is expressing his innermost feelings in music.

The emotions expressed on a musical instrument today are the same as those felt by a Chinese playing on a seh or zitherlike instrument in the Chou dynasty, 255 B.C. The oldest cultivated music systems are those of India and China. Strangely enough at one time in the latter country, prime ministers were selected according to their skill in music. The Chinese language is based on tones, one syllable or lu has twelve inflections. Naturally one who could accurately strike the right pitch would facilitate the affairs of state by correct interpretation of sound.

But most people like to play something, carrying out the feeling of rhythm with their hands. Drums have already been favorites and have played a great role in the communication systems of Africa, the West Indies and Mexico. Flutes and musical bows used to convey messages between lovers in the South Seas, parts of Western North America and in certain regions of Africa. The pipes of Pan and the conch shell trumpet are foreign to Canadians but their descendants are with us. With changes in shape and materials pianos, organs, violins, saxaphones, etc., have evolved for the use of the musically inclined.

Music has its part to play in morale as can be easily imagined from the increase of exports of musical instruments to Newfoundland from $9,000 in 1941 to $14,000 in 1942. Phonographs and radios would be a boon to defence outposts. A report on the production of musical instruments from the General Manufacturers Branch of the Dominion Bureau of Statistics shows that there is still a source of supply. In 1942 the manufacture of upright and grand pianos remained about the same as in the year before but there were about 150 more in the process of manufacture. The value of repair work took a jump of about $23,000.

Drygoods Values

We are glad to say that our teacher, Mr. Lloyd Marcellus is home from Brockville hospital and is as well as can be expected.

Mr. and Mrs. Douglas Gallinger and baby of Brinston had tea on Wednesday at Mr. and Mrs. Earle Beckstead's.

Our next Red Cross meting will be in the evening on May 30th, at Mrs. Arthur Heagle's.

Mr. and Mrs. Douglas Gallinger and baby of Brinston called on Mr. and Mrs. Frank Whittaker and family on Wednesday.

Master Bert and Gordy Whittaker spent the week-end with their grandparents Mr. and Mrs. Frank Whittaker.

Miss Jean Whittaker and Mrs. Frank Whittaker had dinner with Mr. and Mrs. Lawrence Whittaker on Sunday.

Mrs. Burton Beckstead spent Saturday with Mr. and Mrs. Frank Darling and family.

Mrs. Frank Darling and son Ray and friend called at Mr. and Mrs. Burton Beckstead's on Friday evening.

Mr. and Mrs. Harvey Dillabough of Osnabruck Centre spent Sunday afternoon with Mr. and Mrs. Frank Todd.

BUSINESS PERMITS ARE NOW ELIMINATED

A permit from the Prices Board is no longer required when an existing business changes ownership, acquires additional floor space or moves to other premises. But one is still needed for the formation of a new business not carried on at November 2, 1942, for changes in the class of business conducted at that date and for changes in the classes and kinds of goods or services dealt in at that time. When such permits are granted, the Board will assume no responsibility for providing supplies. It is further pointed out that whenever a new business is commenced or an existing business changes its address, the Board's Director of Licensing at Ottawa must be notified.

When painting at the time of year when insects might alight on and adhere to fresh paint, try adding from two or four ounces of citronella oil to each gallon of paint. The odor of the oil repels insects.

WORK CENTRE MARKS FIRST ANNIVERSARY

Since the Mobile clinics of Ontario Division, Canadian Red Cross Society began operations in November, 1943, they have been responsible ,to date, for 120,553 donations. No small part in establishing this excellent record is played by the devoted volunteer workers who come every day and each evening, in various groups to prepare the equipment and in other ways take care of the blood donations received from the 145 mobile clinics at work in the province. May 21, at the Ontario Mobile Division Work Centre, 855 Bay Street, Toronto, a reception was given in the honor of the workers, more than 150 of whom were present, as well as the mobile nurses and many other interested friends. Mrs. Arthur W. Ellis president Ontario Division of Red Cross, Ontario Commissioner Stafford Roberts, chairman of Ontario Blood Donor Committee, Mr. Russell T. Kelley of Hamilton and senior technician Mrs. G.R. Fuller received the guests. Refreshments, prepared and served by the Food Administration section of the Corps, were dispensed from a table attractive with garden flowers and yellow tapers in massive silver candelabra. Mr. Kelley told the volunteers what a large part their service played in the blood donor project, stated that nowhere else did one find such a spirit of service as in the blood donor clinics of Red Cross, and emphasized the fact that the volunteers would fully appreciate their own contribution if they met, as he had, the hundreds of returned men whose lives had been saved by blood serum.

Mrs. J.C. Fraser told something of the work of another department of Red Cross, that of the Women's War Work Committee, and explained what Red Cross knitters and sewers made in the way of special articles for servicemen and women. Hon. Leopold Macaulay, president Toronto Branch, said no work of Red Cross exceeded in importance that of the preparation of blood serum and that when the history of the war is written, brightest page in it would be the story of lives saved by blood serum.

Some medical authorities believe now that many cases of asthma and bronchial trouble can be traced to certain moulds that form on walls and ceilings, especially in damp rooms. The trouble, in such cases, has been found to clear up after the room is painted.

JUNE CHICKS

June Chicks cost less to buy, brooding costs are low as the weather is warmer, you will have your own 1944 grain crop to help out on the feed end. They will lay when the earlier pullets are out of production.

Delacour, Alta.,
May 9th, 1944

Dear Roy:

Just a few lines to let you know the chicks arrived O.K. They are sure smart and doing fine. I have my crop all in, also potatoes and garden. Am writing this in Calgary so I can send it today. Will write later.

P.D. Scott.

These chicks, 400 in the lot, were shipped from Mountain on the noon train, Tuesday May 2nd, and arrived in Calgary, Friday forenoon, May 5th. They were not fed or water until they got to Mr. Scott's place at Delacour, 20 miles from Calgary.

Plan now on a brooder house lot of Berryholm Chicks for June.

Berryholm Poultry Farm
South Mountain, Ont.

Parapooches Trained To Aid Crash Victims

Seventeen husky dogs are in training at Fort Nelson, midway point on the Edmonton-White-horse air route, as parachutists to take aid to airmen forced down on the route. Already two of them "Maggie" and "Jiggs", have passed their tests with flying colours and are taking to the 'chutes like veterans. Last fall Capt. W.R. (Wop) May, civilian director of the No. 2 Air Observer School in Edmonton, created a team of human parachutists ready to drop to aid stranded fliers. Now the United States Army Air Forces is going one better by training dogs for the job, too. To Major Joseph F. Westover, who commands the Canadian sector of the Wing Search and Rescue Unit, went the job of training the animals.

The 17 dogs were rounded up from Indians and others, in the area. "Jiggs" and "Maggie" got the honor of being the first jumpers because they were the nastiest of the bunch. Major Westover figured that if any of his animals had to be expendable these two could be the ones. But after many jumps these pioneers of the group are living.

A five-pound canvass harness, lined with sheepskin, was rigged up to fit across the chest and under the belly. It was decided that two dogs could be dropped on one 28-foot cargo parachute.

When the time came for the first jump "Maggie" and "Jiggs" snarled and snapped at each other on the way to the airplane. Curiously, they got along together once they got into the plane.

When the dogs made their first jump, it wasn't by invitation. They were just heaved out. They didn't object. The jump was made from 1,500 feet and their parachute was opened automatically as they left the plane. Each carried a load of 35 pounds, but landed completely relaxed and without injury.

Get Their Wings.

After five jumps, each was presented with paratrooper wings. But it didn't make much difference; the dogs didn't get along except when they were in the air or just after a jump.

Helping Major Westover is Lieut. David Irvin of Grand Rapids, Mich., an Arctic veteran who once made a lone jaunt from Aklavik to the Baker Lake region.

At first, Lieut. Irwin found the paratroop dogs were soft and tired easily. To harden them he made a 175-mile trip through the bush. On a second trip he and the dogs travelled 75 miles in eighteen hours.

Here's the theory behind the training of the dogs: If an airplane comes down in a spot where a rescue airplane can't land, or at a spot which is too far to reach by ground travel, the dogs and a man or two will be dropped.

The plan is that only the dogs and their equipment will be dropped where grounded airmen appear to be uninjured. The grounded men would unfasten the parachutes from the dogs after the animals land. Then the dogs would help them make their way out to safety by packing the equipment—blankets, medical kits, etc.—on their backs.

"When men have to make their way through the bush, and they're not used to it, there is more chance that they will become exhausted if they are burdened down," an officer explained. "That's where the dogs come in the picture; the dogs will tote the stuff for them."

If grounded men appear injured, a flight surgeon will jump with the dogs. Again, the dogs would carry the equipment as the men make their way through the bush.

Capt. Wm. R. Jacobs of Lewiston Idaho, wing flight surgeon, has bailed out with 'Maggie' and 'Jiggs'. He has gone through a routine with the dogs and they seem to understand it. The routine consists of unclasping the dogs' chute, getting out the first aid kit and going to work.

Capt. Jacobs said flight surgeons can carry 30 to 40 pounds of medical equipment in jumping. He's trying to develop a standard crash kit for flight surgeons to carry on jumps.

Alaskan Wing headquarters said the rescue teams won't be limited to cases where U.S. airmen are down. They'll be available to any one.

SPRINGTIME IN THE HOME.

This is the time of the year when nature, taking on its own new raiment, whispers to men "You need a new suit," to women "How about a new bonnet" and to everyone "How about sprucing up the home." It is the season at which to rediscover our homes, to take inventory of the ravages of winter inside and out and to check up, clean up and paint up.

Everyone has their own way of going at these things, but it is an excellent idea to start with the cellar or basement. All basements have a knack of accumulating discarded articles that have no further usefulness. Perhaps every basement in Canada can yield something of value to a scrap drive and if one's springtime urge went only as far as getting rid of all unnecessary litter in a home, it would serve some purpose and be a patriotic gesture. But most basements and collars at this moment are asking for more than just a tidying up. After four years of war much exposed metal work is corroded and crying out for proper attention and refinishing. Many worn cement floors are giving off dust and calling loudly for paint. Ceilings and walls need retinting.

Cellar stairs are often dimly lighted. To outline them with white paint is good accident insurance.

Let spring into the kitchen and you let it right into a woman's heart. Sanitation and appearance demand that all worn spots and edges, especially around handles and knobs of doors and drawers be touched up. Kitchen floors get hard wear in wintertime and nowhere in the home will a little paint, enamel or varnish pay better dividends than in the kitchen.

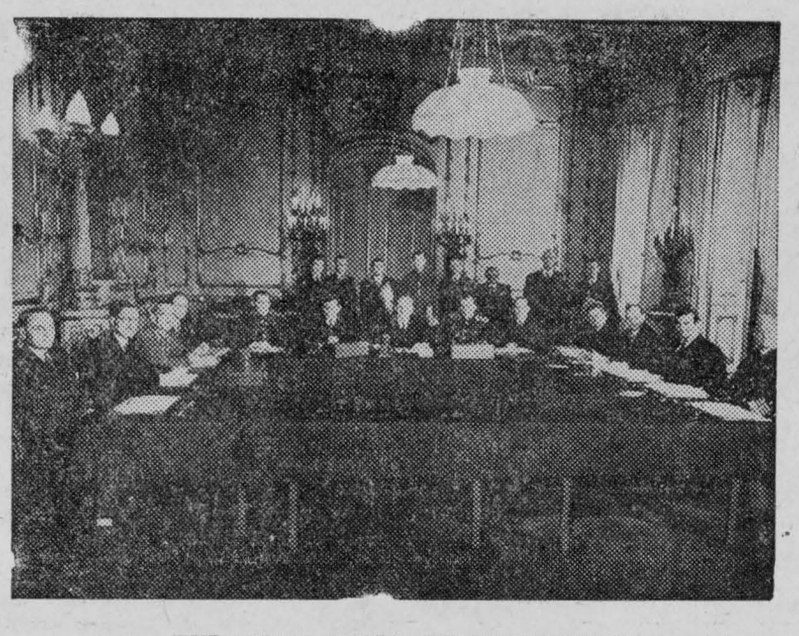

Living and dining rooms, halls and foyers are the show places of the home. They are seen by all visitors and reflect either good or bad housekeeping. Nothing can dampen springtime spirits more readily than walls grimed by winter smoke. At this time of the year, mantels above fireplaces usually require refinishing. If walls and ceilings must be redone it is wise to remember that light tints reflect light and make rooms more cheerful than the deeper, more sombre colours. Floors, too, should come in for attention at this happy clean-up season.

Hard-worked bathrooms rival kitchens when it comes to taking it on the chin. Steam and continued damp take their toll and in most homes annual refinshing is a practical necessity.

The nursery, too, should come in for springtime inspection. Little hands are often dirty hands and can do all sorts of things to woodwork and furniture. Other bedrooms get less wear, but refinishing these rooms too, in light tints, will contribute to the health, comfort and cheerfulness of the family and its guests.

Now, trip upstairs and have a look at that attic. If your attic is used only as a store-room, remember that white makes light. If it is used for sleeping quarters or other living purposes, it affords you a real opportunity for ingenuity in arrangements, lay-out and colour scheme. Attics have often been made into very comfortable living and sleeping quarters.

At New Year's we take stock of ourselves and make new resolutions for the year to come. At this time of the year we should all take stock of our homes; inspect every nook and cranny and protect them against the ravages of time and disintegration. Paints, enamels, varnishes and other surface protectors are the soundest kind of economy. They protect, preserve and beautify. They guard against fire. They fight worms and insects, aid health and vision. Paint makes any home the more enjoyable makes working in it pleasanter, lessens strain and fatigue and generally makes this old world a cheerier and brighter place in which to live.

EUROPEAN ADVISORY COMMISSION

One of the first photographs taken during a session of the European Advisory Commission in London.

Picture Shows: The Delegates seated left to right: Representing Britain: Gladwyn Jebb, Sir W. Strang, Maj. Gen. S. W. Kirby, and C. O'Neill; representing Russia: Maj. Gen. I. A. Skiarov, A. A. Sonelev, F. I. Gousev, Rear Admiral N. M. Kharlamev and N. V. Ivanov; representing America: Lieut. Commander W. Sargent, G. F. Kennan, J. S. Winant and Admiral Stark.

The idea which is being widely used in industry to increase illumination in workrooms by painting walls white or ivory has its home-application in garrets, basements, closets and other storage places. Painting of floors and walls white increases the reflection value of the surface to provide more light and also discourage moths, which prefer dark surfaces.

TAX EXPERTS DISAGREE

Toronto Telegram—To the crusade for a simpler income-tax form comes support from a weary taxpayer who has been interested in comment on the cost of the country of the experts engaged by the Government to assist people in the preparation of their returns.

Like thousands of others the weary taxpayer made use of one of these experts to check up his calculations. Not satisfied with the result, he took exactly the same set of figures to another expert. There was a difference of $37 in the amount of tax found by the two experts to be payable.

Talking this over with a friend he found that the friend had been even more careful; he had consulted three experts. No two of them reached the same answer, and there was a spread of $60 between the highest and the lowest amounts found by the experts to be payable. A third man bore witness that an expert had told him to expect a refund of $40. When the refund was made it was $80.

Church Road

Mr. and Mrs. Albert Bowman of Chesterville and Grant Bowman of Glen Union were guests on Sunday of Mrs. A. Bowman.

Miss Ruth Beckstead, the Misses Evaline Crober and Mary Styles of Morrisburg were guests Wednesday evening of Mr. and Mrs. Murray Styles and family.

Mr. and Mrs. Roy Styles spent Monday evening with Mr. and Mrs. Garnet Pruner, Morrisburg.

Mr. and Mrs. Ben Bowman and daughter were recent guests of Mrs. Woddart and family, East Williamsburg.

Miss Beatrice Shannette of Williamsburg spent the week-end with Miss Jean Dafoe.

Mr. and Mrs. Roy Styles spent Sunday evening with Mr. and Mrs. James Robinson, Riverside.

WHY THEY WAITED

Glasgow Herald—That's a nice little story which has trickled out of Denmark regarding Rommel's anti-invasion inspection.

A crowd of Danes filled the street in front of Rommel's hotel in Copenhagen, but remained after he had come out and had driven away. The police tried to move them on, but without success, and finally they asked them why they waited.

"We're waiting to see Montgomery," several of them replied. "He always comes along right behind Rommel."

Tough

Man—Whatcha cryin' for?
Boy—I lost my nickel.
Man—Where?
Boy—In Virginia.
Man—How come?
Boy—She swallowed it.

Cedar Grove

Mrs. Hester Seeley and Mr. and Mrs. J.C. Seeley, Iroquois, visited Mr. and Mrs. Charlie Ault, Sunday.

Mr. and Mrs. Jay Bailey and Marilyn of Winchester Springs spent Sunday with Mr. and Mrs. Frank Dafoe and Mrs. Lillie Dafoe.

Miss Leila McEwan was the guest of Mrs. George McNairn and Mr. and Mrs. Charlie McNairn, Colquhoun.

Mr. John Campbell and Mr. Campbell of Sandtown called on Cecil Gones' Tuesday afternoon.

George Ferguson, Fourth Ave., is busy grading the road.

Mr. Jas. Drew and daughter Elsie spent Sunday evening with Mr. and Mrs. Earl McIntosh, Archer.

Chinks around windows and cracks and open joints in walls are in the front line of fuel wasters. An easy way to effect an important fuel saving is to fill these openings with putty or caulking material. The repair job won't show after painting—and you'll be warmer next winter.

Children's Welfare

This is the Sixth in the Series of Seven Articles which will appear in these columns.

In every community all over this province there are couples anxiously, and often impatiently, awaiting the opportunity to legally adopt a baby. The word impatiently is used advisedly because often prospective adoptive parents cannot understand why they should have to wait so long. They know that thousands of children come under the care of Children's Aid Societies every year; they hear of abandoned babies, of children, for one reason or another, removed from the care of their natural parents. They cannot see why there is not always a child awaiting loving, adoptive parents.

As has been emphasized before, the first principle observed by your Children's Aid Society is that the child's natural and normal environment is his own family. Every resource of the community must be used to preserve his home when this can be done without detriment to the child. Thousands of children are in temporary care of Societies because time and effort is being expended in rehabilitating their own homes.

Many children in the care of the Children's Aid Society have special handicaps of a physical nature or related to personality or behavior. No reputable society will recommend adoption under such circumstances unless the adoptive parents, knowing the child's handicap, still insist on adoption and can give assurance of their ability to furnish special care for as long as may be needed.

Most prospective adoptive parents desire infants and are unwilling to accept older children. There are thousands of older boys and girls to whom adoptiin would be a God-send. Many a couple, awaiting an infant for adoption, allow years to pass and perhaps in the end do not realize their desire. In the meantime many a little boy or girl has missed the one great opportunity of his or her life.

What does adoption imply under the Act? Speaking generally an adoption order puts the child in all respects in the same position as he would have been had he been born the lawful child of the adopting party, save that this does not prevent his inheriting from his natural parents if they die intestate. In former years when the adoption law was not so strictly observed or understood as it is today many a couple believed they had legally adopted a child. They gave this child their name and every natural family relationship was observed. But sometimes these adoptive parents died without making a will and the child was deprived by law of his inheritance.

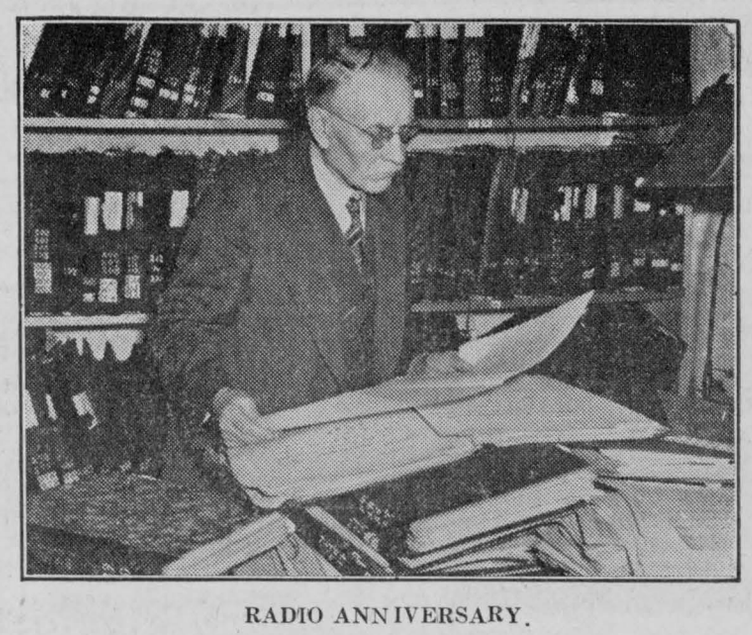

Today in all cases of adoption in Ontario the legal procedure goes through the Children's Aid Branch of the Provincial Department of Welfare and the local Society is brought into the picture to act in the interests both of the child and the prospective adoptive parents.

There are so many snags in the matter of adoption that every couple wishing to adopt a child should realize that the law is here to safeguard all parties. There have been cases of couples who without the knowledge of their Children's Aid Society have taken a baby into their home as foster parents. They have come to love this little one as their own and later taken steps to legally adopt it. Then they have found some obstacle in the way which has all but broken their hearts and of which they would have been forwarned had they consulted their local Society. Here is one example: A child had been born out of wedlock to a married woman during the prolonged absence of her husband. She places this child with a couple who, assured of his decent heritage and physical and mental fitness, are only too anxious to take him. After a year or more they find themselves so devoted to the child that they approach the local Society with a view of adoption. Then they find that, in law, the husband of the child's mother, although he is not the father, must give his consent to its adoption. Many a father, under such circumstances, refuses his consent and leaves the mother. The child can then never become the legal son or daughter of its foster parents!

Before recommending a child for adoption the Society secures every available piece of information about his mother, their history, religious affiliation, the child's own mental and physical record, etc. In reviewing the application for adoption the Society must take into consideration not only the community standing of the applicants, but their personalities, education, interests, religion, the kind of neighborhood they live in and their ages. It must never be forgotten that the child is the first consideration of the Children's Aid Society! For example: An application may be refused on account of the applicants' ages. One case is on record of a child adopted by a middle-aged couple. This boy became a brilliant student, but in his first year at high school the adoptive father, then an elderly man became ill and lost his employment. The boy had to leave school early to maintain his parents. Actually he was of university calibre and unquestionably would, under other circumstances, have become a professional man.

Another application was refused because the couple, although well educated and comfortably off, quarrelled frequently. Another because the neighborhood was undesirable and the would-be adoptive mother too busy with outside interests to give the child adequate care.

There is no more serious responsibility than to undertake the decision that makes a boy or girl the legal child of a couple to whom he will go a complete stranger.

RADIO ANNIVERSARY.

Celebrating his eleventh year in the service of national broadcasting this month, Louis Waizman is one of the musical personalities of Canada. Friend of celebrities and unknown students alike, it has been his lifetime hobby to encourage gifted youngsters to seek a career in music. Percy Faith is among the Waizman alumni. As musical arranger for the CBC since 1933, as librarian for the Toronto Symphony Orchestra and valued associate of its conductor, Sir Ernest MacMillan, Mr. Waizman's friends are legion. He is seen above with part of the symphony library of which he is custodian.

DELICIOUS

"SALADA" TEA & COFFEE

As a little must now go a long way, satisfaction depends upon quality of flavour.

BIGGER POULTRY FLOCKS NOT NEEDED

Behind the recent statement of the Dominion Department of Agriculture that sufficient egg supplies for Great Britain now appear assured without further expansion of Canadian poultry flocks, lies a warning to the poultry industry. The warning is that in the near future Canadian poultrymen should plan to obtain their egg production from more efficient poultry and poultry husbandry rather than from increased numbers of poultry.

The quantity of eggs which the Special Products Board expects to acquire for Britain this year may equal the entire quantity of eggs shipped annually from Denmark to Britain in pre-war days. Canadian shipments of dried egg powder to Britain may this year equal one-third the entire amount of British egg imports in the years before the war. Much of this estimate is based on the fact that by the middle of May, the Special Products Board had bought 2,617 carloads of shell eggs as against only 1,250 carloads at the corresponding time a year ago.

Even though some farmers were dissappointed last winter that they did not get ceiling prices for their eggs over a longer period, the sales of chicks this year are reported to be larger than those of last year.

If feed supplies are available for full production next winter and if flocks are still further increased, poultry producers may be faced with even shorter periods of ceiling prices.

Because Canada's poultry production is now at high level with egg drying and storage facilities being used to capacity, emphasis should be given at this time to flock improvement and increased efficiency rather than to expansion through the purchase of large numbers of chicks.

Ration Coupon Calendar

May 25-31, 1944

Butter: Coupons 58, 59, 60, 61, 62 and 63 are valid. Coupons 58, 59, 60 and 61 expire May 31. Coupons 64 and 65 fall due June 8.

Tea or Coffee: Coupons 14-29 and E1-E6 (old book) and T30-T33 (new book) are now valid and remain so until declared invalid. Coupon T34 will fall due June 8.

Preserves: Coupons D1-D16 (old book) and 17, 18, 19 and 20 (new book) are now valid and remain so until declared invalid. Coupons 21 and 22 fall due June 8. Valid preserves coupons may also be used for the purchase of sugar at one-half pound per coupon.

Sugar: Coupons 14-29 (old book) and 30, 31, 32 and 33 (new book) are now valid and remain so until declared invalid. Coupons 34 and 35 fall due June 8.

Canning Sugar: Coupons F1-F5 (old book) are now valid for the purchase of sugar for home canning at one pound per coupon. If desired, they may be exchanged for home canning at one pound per coupon. If desired, they may be exchanged for preserves coupons on application to Local Ration Boards. Coupons F6-F10 (old book) will fall due July 6 with similar value.

FARM MACHINERY OFF RATION LIST

Six types of new farm machinery and equipment have been removed from the ration list. These are diamond harrow sections, flexible harrow sections, spring tooth harrow sections, cream separators, power sheep-shearing machines and animal clippers, egg cleaners and brushes. Increased production sufficient to meet anticipated demand is the reason given for their removal from the ration list.

THE MIXING BOWL

By ANNE ALLAN

Hydro Home Economist

Hello Homemakers! Lets all dig in and grow more in the year 1944—provided you can store any surplus. There is still time to work a small plot somewhere, where the soil is good. Measure your row and then sow about one half ounce of seed for fifty feet (or one packet). This however, should be considered from the storage methods available, since one packet of seed will produce approximately one to two bushels of greens or such vegetables as carrots and beets, depending upon the type of soil and the weather. Enthusiastic growers should remember that green vegetables have a short season and a second planting in three or four weeks time is a better idea.

From one pound of good seed potatoes you may get seven to eight pounds of potatoes. The average family of four should store 550 pounds of potatoes for the year, if they are able to keep them in a well ventilated room at a temperature of 38 deg.

The good gardener calculates on two or three pounds of tomatoes from each stalked tomato plant. Tomatoes are a valuable product and economical to can.

We mention the above facts to encourage you to keep good records of: length of row, amount of seed in packets, date when seeds planted, date and treatment of plant disease, date of first picking, date of last picking, estimate of production and notes on desirability and quantity. A notebook and pencil are all you require to do the job that should be started now.

RHUBARB HONEY CHIFFON PIE

3½ cups rhubarb, cut in ½ in. pieces, ½ cup corn syrup, ¾ cup honey, 1 tbsp. granulated gelatine, ¼ cup cold water, 1 tbsp. lemon juice, 2 egg whites, baked 8-inch pie shell (deep).

Cook rhubarb gently with corn syrup and honey until soft. Add gelatine dissolved in cold water and lemon juice. Cool, and when partially set, add egg whites beaten stiff but not dry. Pour into baked pie shell. Serve garnished with whipped cream.

RHUBARB AND PRUNE RELISH.

4 lbs. rhubarb, 2 lbs. prunes, 2 lbs. sugar, 2 lbs. corn syrup.

Cover prunes with water and leave 24 hours. Cut rhubarb in small pieces and sprinkle over it 2 lbs. of corn syrup. Let stand over night. Place prunes, water and rhubarb, with the syrup, in kettle. Add to mixture and simmer 1 hour. Add 2 lbs. sugar. Boil gently ½ hour longer. Yield: 6-8 eight-ounce glasses.

ALL-IN-ONE-DISH

1 cup uncooked spaghetti, 4 slices breakfast bacon, diced, ½ cup chopped onion, ½ lb. round steak, ground, 2 tbsp. starch, 1 (10½ oz.) can tomato soup, (condensed), 1 can water (10½ oz.) ¾ teaspoon salt, 1|16 teaspoon pepper.

Cook spaghetti till tender in 2 qts. boiling water to which has been added 2 teaspoons salt; drain. Cook bacon; add onion and meat; cook till brown. Add [illegible]ch, blend well. Add soup, w[illegible] pepper, and spaghetti. [illegible]ly on electric element fo[illegible] Serve with hot toast.

TAKE A TIP

Paint brush conservation: curled brush ends should be emmersed in boiling water for a few moments and allowed to dry. Paint-hardened brushes can be fixed if they are placed in a bath of paint remover and left for several hours. Then brush on a smooth board.

THE QUESTION BOX

Mrs. M.R. says: I thought the oven was the cause of my cakes burning on the bottom, but I decided it was my thin black pans, so I've been turning an old chipped enamel pan upside down to deflect the heat. Note: This is a good conservation tip.

Mrs. J.C. asks: How do you keep a large cake moist.

Answer: We cut it so that it fits into the bread box, wrap it in wax paper and then put a couple of slices of fresh bread in a box each day.

Anne Allen invites you to write to her c|o The Record. Send in your questions on homemaking problems and watch this column for replies.

UNINSURED ACCIDENTS ARE COSTLY

PILOT INSURANCE COMPANY

• Accidents happen in a flash. If you are not insured, repayment may cost you your home, your savings or months of income. Let us explain Pilot Automobile insurance to you. It costs so little.

The personnel of the Winchester Contest Concert upon their arrival in town Monday evening were received and welcomed in the Library Room at the Community Hall by Mrs. Andrew Carruthers, vice-president of the Nation Valley Red Cross unit and by Mrs. Geo. Merkley, president of the Women's Institute of Chesterville.

WHAT IS PENICILLIN?

What is Penicillin? Where does it come from and who discovered it? Is there a real foundation for the curative properties attributed to it?

Aren't these the questions a good many people have been asking since Penicillin first made its rather spectacular appearance?

We know now that Penicillin is a salt, one of a number of natural compounds which promise great possibilities in the future and which are given off in the form of tiny pearl-like droplets in the life process of the common bread and cheese moulds.

Little is known as yet of its chemical composition and exhaustive study will be required before it can be manufactured synthetically, but even then it is extremely doubtful whether such manufacture will be practical in view of its cost. However we are assured of ten times as much during 1944 as was available in 1943 and, as its natural production is a relatively simple matter, there is every reason to believe that the supply will be sufficient to fill the demand.

It was first discovered by Dr. A. Fleming, St. Mary's hospital, London, England, in 1929. Following close upon its discovery, came the fact of its therapeutic vaule as a bacteria-killing agent which was established by Prof. H. W. Florey, Dr. E. Chain and collaborators of Oxford University in 1940 and 1941. Later in the same year it was used to treat disease in man with satisfactory results. In fact so startling were the cures that the new wonder drugs, the sulfas, were forced to give ground in certain instances. For example, to date Penicillin has been proved non-toxic to men. Further, we know that germs become immunized to the sulfas, as also they do to penicillin, but in the case of the latter, the germs lose to a great extent their virulency.

In treating blood poisoning, wound infections and germ diseases it has effected amazing cures and has a much wider field of operation than the sulfas. To date, we know of several hundred patients who have been treated successfully with this amazing discovery and the extent of its possibilities is to date unlimited.

CANADIAN HOUSEWIFE IN ENVIABLE POSITION

Byrne Sanders director of the Consumer Branch of the Prices Board, told a Montreal audience that "the Canadian housewife is better off than any other woman in the world and it is largely due to her own efforts and initiative that she occupies this enviable position. The Canadian woman, through her wartime daily fight against inflation, is fitting her back to the burden of post-war problems."

URGE TURNING IN USED METAL TUBES

Although it is no longer compulsory to do so, the turning in of used metal tubes with the purchase of such commodities as tooth-paste and shaving cream is urged by the Prices Board so that tin and lead contained in them may be reclaimed for vital uses. Tin, it is pointed out, is still a valuable war metal and consumers are asked not to throw away their used tubes but to turn them in to their druggists or other dealers so that they may be collected as salvage.

It is cheap protection against fire to paint up all property which is weathered, cracked or rotted or otherwise in a condition making it relatively easy to ignite.

It has been found that office help who complained of being chilly when the interior of working rooms was painted a cool blue were found contented with the previous temperature when the walls and ceilings were painted a warm yellow. Similarly, greens and blues have been found to make hot offices more bearable during the summer months.

FOLEY—BAXTER.

On Saturday, May 20th, 1944, in the United church, Huron St., Toronto, by the Rev. Dr. Pigeon, Donelda June, youngest daughter of Mr. and Mrs. Whitney Baxter, to LAC Foley, D.A., RCAF, son of Mr. and Mrs. H. Allen Foley of Centerville, Nova Scotia.

GAGNON—COYNE.

The marriage of Kathryne, daughter of Mr. Bernard Coyne, and the late Mrs. Coyne, of Chesterville, to Mr. Paul Gagnon, son of the late Mr. and Mrs. Joseph Gagnon, took place Tuesday morning in the church of Christ the King, Ottawa. Rev. J.E. Bechard officiated.

Miss Irene Allen, of Toronto, and Captain Aurele Gagnon, of Quebec, were the couple's only attendants.

The bride wore a two-piece dress of dusty pink crepe, with black accessories and a shoulder bouquet of pinochio roses and sweet peas.

Following a wedding breakfast at the Chateau Laurier the couple left for Quebec City. They will reside in Ottawa on their return.

A MUSEUM NEEDS "KNOW HOW" TOO

The urgencies of war put a premium on the man who has "know how" the special skill and knowledge to do a job quickly and well. Wars may be won or lost at the machinist's bench or in the research laboratory as well as at the fighting front. Craft of hand and agility of mind turn the trick. A Museum needs "know how", too. Consider for a minute the Royal Ontario Museum and some of its jobs. To prepare for exhibition a moose's skin or a dinosaur's fossilized bones, the scientist, mechanic and artist must combine. To excavate an ancient Indian village site, to identify microfossils from an oil well boring, or to classify a rock or mineral, are all part of a day's work. See the evidence for yourself the next time you visit the museum.

Caught On Quickly

The young mother was shocked to learn that little Sammie had told a lie. Taking the lad on her knee, she graphically explained the consequences of falsehood:

"A tall, black man with red, fiery eyes and two sharp horns grabs little boys who tell falsehoods," she explained, "and carries them off at night. He takes them to Mars, where they have to work hard, in a dark canyon for 50 years. Now, you won't tell a lie again will you?"

"No, mom," said Sammie, cheerfully. "You can tell 'em from now on!"

Fire Insurance

COVERING
MERCANTILE, MANUFACTURING, RESIDENTIAL, AND FARM PROPERTY
WINDSTORM & AUTOMOBILE RISKS ALSO

Prices of Farm Products have advanced but the rates for Fire Insurance in our Companies remain the same and are the lowest in the Province for this class. No fees asked nor premium notes or other obligations required, as our securities—as sound companies—are on deposit with the Dominion Government, Department of Insurance.

FARM PROPERTY INSURANCE
CARRIED UNDER THREE-YEAR OR ONE- YEAR SYSTEM AS NECESSARY

James Clement DIAL 598 Chesterville

Stormy Weather

Winter's Stormy Weather is upon us bringing slippery streets, sliding cars and blinding snow storms— these mean increased accident possibilities.

Accidents cause terrible physical pain but often the financial injury, in meeting hospital and doctor's bills, as well as the loss of your regular salary, is worse. Let us protect you against a financial disaster with an accident policy designed to meet your individual needs.
