Health-Building Foods Contain

ALUMINUM

NATURE PUT THIS IMPORTANT MINERAL
in Whole Wheat, Wheat Flour, Apples Raw Carrots, Green Lettuce, Green Cabbage, Beets, Potatoes, Meats eggs etc.

Nature Made Aluminum Friendly to Food

The friendship between foods and aluminum starts way back in the earliest chemistry of food. There are small quantities of aluminum in practically all the foods we eat and in drinking water & milk. Mother Nature put it there. At the same time, she gave the metal, Aluminum, qualities that make it ideal in contact with foods. Aluminum protects purity, preserves color and taste, and assures cleanliness and wholesomeness. Candies and cheese, for instance are wrapped in Aluminum foil for just such reasons. The purity of milk, our most sensitive common food is guarded in dairies with Aluminum equipment.

In meat-packing plant and cannery, in brewery and bakery, Aluminum is used extensively to assure cleaner purer food products. Caps and seals of Aluminum are on millions of fod jars and bottles for the same seasons.

Leading hospitals and sanitariums, whose business is health, equip their kitchens with Aluminum. Hotels and restaurants, depending upon selling food, join millions of housewives in equipping their kitchens with Aluminum utensils.

Foods cook in Aluminum utensils more economically because nature made Aluminum a superir conductor of heat.

We have a nicely assorted stock of Aluminum utensils selling at last year's prices. This is an opportune time to make your purchases of any articles you may require before prices advance.

THREE UNINJURED BUT CAR WRECKED

Three persons had a narrow escape from serious injury Sunday when a large transport truck completely demolished an automobile, broke six guard posts and a telephone pole at Fisher's Curve about one mile west of Iroquois on No. 2 highway.

Rev. Robert J. Day of Iroquois, owner of the car, who was accompanied by Mr. and Mrs. James Lazert of Iroquois, had reached the curve some little time before the heavy truck, driven by Stanley Walters of Toronto. The automobile had only been able to get about half-way round the curve due to the icy condition of the road, and Mr. Day had stopped the car and in company with Mr. Lazert was investigating the possibility of pushing the car the remainder of the way around the curve with Mrs. Lazert at the wheel, when the truck arrived on the scene. Walters at once applied his brakes but was unable to halt the truck in time and it crashed into the car, tossed it against the guard rails, completely wrecking it.

Mrs. Lazert's arm was bruised while Mr. Davy and Mr. Lazert both escaped injury by jumping clear of the car as it was struck by the truck.

Traffic Officer Eugene Rose of Morrisburg who investigated the accident, stated that the mishap was due entirely to weather conditions and that no charge would be laid.

DUNDAS COUNTY ORANGE LODGES REPORT GAINS

The annual meeting of Dundas County L.O.L. was held in the Orange Hall, Winchester Springs, Tuesday with delegates from every lodge in the district present.

Reports presented indicate that all lodges were in a sound financial condition, and had increased their membership during the year.

No center was chosen for holding the annual county celebration on July 12th, but it was suggested that county lodges attend the celebration at Ottawa this year, and that an L.O.L. picnic be held on August 12 in place of the annual county celebration.

Allan Swerdfeger, past county master, presided during the election and installation of officers which resulted as follows: I.P.M., Frank Nesbitt, Winchester Springs; W.M. Elisha I. Jackson, South Mountain; D.M. Herbert Wallace, Pleasant Valley; chaplain, Norman Hunter, Toyes Hill; recording secretary, Charles Morrow, Winchester Springs; financial secretary, Charles Baker, Cannamore; treasurer, R. A. Ball, Winchester Springs; first lecturer, Ernest Morrow, Winchester Springs; second lecturer, Willis Baker, Cannamore; marshal, Cecil Hanson, Toyes Hill; chairman of committee, Ross Hess Winchester Springs; sentinel, John F. Casselman Toyes Hill.

SUCCESSFUL CARNIVAL

A successful carnival was held in the Morrisburg Arena last night, (Thursday). A large number of skaters attended from Morrisburg and surrounding district. Prizes were won by the following:

Best Gent Skater—Ross McIntyre.
Gent's Skating Race—Ted Weir.
Boys' Skating Race—Bruce Aikman.
Girls' Skating Race—1, Audrey Fraser; 2, Marjorie Deeks.
Best Lady Skater (with partner) Minnie Taylor.
Best Lady Skater (alone) Hazel McIntyre.

The arena management announce that another carnival will be held soon. They wish to thank those who donated the decorations for the occasion, also the following who donated prizes: Weber Store, Burns Drug Store, W & J Meikle, J. H. Meikle, Beamish Stores, D. T. Henderson, N. McGillis, R. H. Bradfield, G. D. Howith, S. Agulnik & Son.

JOHN IRVING'S FUNERAL HELD AT MAPLE RIDGE

The funeral of John Irving was held on Sunday afternoon from the home of his nephew, George Smith, Maple Ridge, where an impressive service was conducted by Rev. R. C Tate, pastor of Trinity United church Chesterville. The choir was present under the direction of P. G. Hewitt and led in the singing. During the service, "The Old Rugged Cross" was rendered as a duet by Mrs. Irving Cross and Miss Gertrude Weegar.

Following the service, interment took place at Maple Ridge cemetery. The pall-bearers were Frank Parker E. J. Christie. A. G. Suffell, R. M. Elliott, Hart Melvin and D. G. Hutt

The late Mr. Irving passed away at his home at Calgary, Alta,., on Wednesday last, following a brief illness. The body arrived in Winchester on Saturday afternoon.

Born in Winchester township 69 years ago, deceased was a son of the late George Irving and his wife, the former Mary Christie. When a young man he became an employe of the C. P. R. at Arthur, Ont., and later was transferred to Brandon, Man., where he was connected with the freight department. He was superannuated two years ago. His wife, the former Hattie Milks of Winchester, died in 1933.

Surviving are two daughters, Mrs. Cecil Grosskruth of Weston, Ont., and Mrs. W. Williams of Calgary, Alta.; one brother, Thos. Irving of Calgary, and one sister, Mrs. Henry Smith of Three Rivers, Que.

STORMONT PEAT DEVEOPMENT LTD.

A project of great interest to the people of the United Counties and neighboring parts is the formation of a local company to develop the vast peat resources of this district. It has just been incorporated under the name of Stormont Peat Development Ltd., with head office at Newington and an authorized capital of $40,000. The incorporators are L. G. Wert of Wales, Robert Smith of Finch, A. C. Jardine, P. J. McEwan, Fred Bancroft and Rev. J. H. Allen of Newington, and J. D. McIntyre of Finch township. Other prominent stockholders are Elgin Lang of Avonmore, Charles Jack of Finch, George Rice and Oscar Eamon of Wales, John J. Whittaker of Cornwall, C. W. Stillson, A. J. McDonald, Harry McGillivray, W. J. Duval, A. W. Loverin, Robert Eamer and P. DuBoulay of Newington, and Frank T. Shaver of Aultsville. The known character of these men is such as to give confidence in any project which they see fit to get behind.

Peat has long been known as a source of fuel but its development in this country has been slow until recent years. In Ireland where easy drainage and the pecular quality of the peat has made hand production easy, it has been worked for centuries. But in Europe where the condition of the bgs more nearly resemble those of Canada, it has been found necessary to machine the peat to produce a satisfactory fuel. About the beginning of the century, many attempts were made to dry the peat artifically and much capital was wasted before this method was proven uneconomic. Then the Dominion and Ontario government established a joint experimental station which they operated for five years testing methods to find those most suitable fo Canadian conditions. The services of the engineer who was in charge of these experiments have been retained by the present company, as consultant. They expect to begin operations next spring in the Newington bog and to have machine peat fuel on the market by midsummer.

However, fuel is only one product among many which is being prepared from peat. Hundreds of tons of peat moss litter are annually imported into Canada from Europe. It is used chiefly in poultry raising as its disinfectant nature and high absorption qualities make it ideal for where the fowls are inclosed. Although it is retailing from $3.50 up per hundred pounds, not a pound is being produced commercially in Canada.

Peat is also extensively used in commercial fertilizer as the carrier of the valuable nitrates and phosphates. It has an extensive use as insulating material in refrigerators, incubators, etc. It provides a valuable packing for certain commodities and has a number of other lesser applications. Hence the field open before the new company is a large one and continually expanding.

Many people will recall in this connection the attempt made 35 years ago to develop the Newington bog. This was one of the ill-advised kiln drying systems. It necessitated an extensive and costly plant built of firm land to which the heavy and bulky raw peat had to be transported for a considerable distance and the cost of the artificial heat was also excessive. It also had to compete with coal at $6.00 a ton and a then abundant supply of wood fuel.

The modern method is to use light caterpillar mounted machines which treat the peat at the point of excavation and it is dried in the open air as close to the point of excavation as possible, thus greatly reducing costs in both labor and overhead. Market conditions have also changed, coal being exxpensive and wood being much scarcer everywhere and practicable unobtainable in some districts. It is estimated that the local market alone will require several machines operating day and night throughout the season to meet the demand so soon as the fuel qualities of the peat become well known.

MINUTES OF COUNCIL

The regular meeting of council for February was held in the Town Hall Monday, February 1st at 8 p.m.

Members all present.

Moved by Mr. Broder, seconded by Mr. Harback, That By-Law No. 621 be read a first, second and third time, passed, signed and sealed in open council this 1st day of February, 1937.—Carried.

Moved by Mr. Harback, seconded by Mr. Carr, That Mr. Christensen be instructed to arrange for suitable accommodation for the holding of Health Clinic as suggested by Dr. Reddick, M. O. H.—Carried.

Moved by Mr. Broder, seconded by Mr. Carr, That John Weston be assessor at a salary of $90 to include the collecting of dog taxes.—Carried.

Moved by Mr. Christensen, seconded by Mr. Harback, That Wm. Heagle be weed inspector for the year—Carried.

Moved by Mr. Harback, seconded by Mr. Carr, That Messrs. Christensen and Broder be authorized to wait on the superintendent of Motive Power of the C.N.R. with a view to adjusting the present contract for the supply of water to engines at the station here—Carried.

STAR RUBY

By Louise Jerrold

Albertine Tevans, shopgirl, falls in love with Dennis Maxwell, jewelry salesman, but is worried by a rumor that he has got into some sort of trouble with his firm. Out of a clear sky, her rich great-Aunt Celia Tevans, whom she has never seen, invites her for a visit. The night before she is to leave, Jennis thrusts a star ruby into her hand and bolts. The next day, she arrives at her aunt's estate to find two other guests—Countess Yelena Loupakoff nd her brother, Count Michael. There seems to be tension in the air, and Aunt Celia's houseman and chauffeur, Bates, who always wears dark glasses, gives Albertine the creeps. A man with a collection of rubies to show Aunt Celia is expected. He arrives—it is Dennis!

"I'm on my way to her now. Let me take her tray."

But Bates gently insisted on carrying it himself, and lingered in Aunt Celia's bedroom after he had adjusted the breakfast rack in front of her in her bed.

"That'll do, Bates," she said rather testily.

"Hadn't I better see if madam's coffee——"

Aunt Celia cut him short. "Your coffee's always good. Too good, I shouldn't drink it, the doctor tells me, but I'm going to. Usually, coffee keeps me awake all night, but yours puts me to sleep before my head's on the pillow."

With a murmur, Bates bowed and left, quietly closing the door behind him.

"A excellent servant," said Aunt Celia, munching toast, "but a little too much underfoot. I've a strong feeling he's not really a servant, but the Loupakoffs assure me he worked for them when they first came to this country.

"Sit here, my dear. Close to me. You look fresh as the morning. What a fool I was not to break down my stupid pride and send for you sooner. But that's spilled milk. Now you're here, child, I shall not let you go again, as I told you yesterday. The doctors agree it can't be more than a matter of months, at the most—"

On such a heavenly day, one must not think of death and sadness and parting, Albertine told herself, while she said aloud:

"You don't know how wonderful it is that you want me to stay, Aunt Celia," she bent over and kissed the old lady's withered cheek.

"You're better than any doctor, my dear, but I suppose I'll have to be sensible and keep to my bed today. Tell that young man from Tanman-Roan——"

"Dennis Maxwell," Albertine supplied quickly.

"Tell him to stay here till I feel able to see his collection. Probably tomorrow some time. It will be worth his while to wait. And please make my excuses to the Loupakoffs."

Aunt Celia's head sank back wearily on her pillow. Albertine tiptoed from the room

From the doorway of the breakfast room, a few minutes later, Albertine saw Dennis and Yelena on the window seat, laughing and chatting like old friends.

"I'm usually starved for breakfast, Countess," Dennis was saying, "but how could one think of anything so material as food in the presence of such beauty?"

Yelena, who in the brilliant morning light, looked rather jaded, flashed her eyes at him.

"You American men are usually so high-speed, so full of business, you have no time for such pretty speeches."

Albertine entered, and managed a pleasant, "Good morning, Countess. Good morning, Mr. Maxwell. I hope you slept well."

The Countess nodded coolly, and Dennis answered her with polite formality When she gave him her aunt's message, he regarded her very queerly for a moment, and then he merely nodded

Breakfast as gay, at least for two of them. Albertine, behind the coffee urn, said little as she listened to Yelena's bright sallies and Denny's witty retorts. Michael had not yet appeared.

"Miss Tevans tells me that there is a rather good golf course west of the village," Yelena said. "Michael and I brought our clubs."

"Possibly I could borrow a set," said Dennis. He turned to Albertine. "How about a foursome, Miss Tevans?

He knew she didn't play golf — did not play any game. She had told him. Her chin lifted If he wanted to keep up this make-believe of being strangers all right.

"I don't play golf, Mr. Maxwell," she said her eyes looking coolly into his. "Besides, I have letters to write."

Later, she was standing by the window in her room when merry voices and laughter floated up to her. Dennis with both golf bags strapped over his shoulder, was guiding Yelena, his hand on her elbow, down the driveway that led to the garage. One gay remark of Yelena's was clearly audible.

"I want to beat you at the game of golf, my Dennis, douschka, but not at the game of love."

Albertine suddenly felt unutterably lonely.

Fish — The Food of Heath

From the days of the early Greeks and Romans fish has always been a popular dish. Instinctively they knew what was good for them and the prowess of the early Romans as a sturdy nation is well known to students of history.

Throughout Europe fish is a daily dish. In Canada, however, more of the housewives should make a closer study of this wonderful food. Fish contains vitamins, minerals in quantity and variety and is an excellent source of high digestible proteins.

Fish contains proteins for building of muscles and other body tissues Fish fats have a high energy value, too, and are as completely digested as fats from other foods.

Apart from the standpoint of better health, you will find a study of your local fish market will prove worthwhile and a tremendous help in this business of balancing both budget and menu. Ask your merchant about all the varieties he sells. Usually he can tell you whether each kind is dry or oily, free of small bones, where it is caught, and how brought to market and give you suggestions for cooking it. Fish merchants take a pride in the telling you what they know about it.

Fish is equally delicious whether it is baked, broiled or steamed. There are no end of tempting dishes also that can be prepared from canned fish products. While there is an art in the cooking of fish, it is so simple even growing boy or girl can prepare it. The determination of that psychological moments when the cooking process is complete is one that mus be left to the individual judgment. Over or under-cooking minimizes that essential delicacy of flavour which does make properly prepared fish so enticing. So watch it closely.

As one demonstrator from overseas said recently. "Ve do not cook from the recipe in my country, ve cook from de heart." She who cooks fish, will, likewise, not cook from "de recipe," but rather from 'de heart." The wish itself will give the signal. She will watch for it. The one infallible sign when fish is cooked is that the moment a knife blade, or a fork is slipped between the flesh of the fish it separates clean from the bone. At this moment fish in in its full perfection. It makes no difference what method of cooking you employ, this test may be used.

Try this delicious recipe for stuffed fillets of Sole. It is one that is simple to prepare and one that every member of the family will enjoy. Choose six large fillets of equal size, which will serve four or five people. Make a stuffing by moistening a cup and one-half of stale bread crumbs with a cup or more, depending on the staleness of the crumbs, of hot, sifted tomato juice, one-half a teaspoonful of salt, a tablespoonful of minced parsley, and one-half teaspoonful of pepper. A teaspoonful of mixed dried herbs may be added if desired. Spread this stuffing over three of the fillets, place over these the left-over three fillets, fasten at the sides with the wooden toothpicks, lay on the grate of a baking pan with a thin slice of salt pork over each, pour into the pan a cup or more of fish stock, water or water and tomato mixed and bake for half an hour until done — at 350 degrees F., basting every ten minutes.

Pan Broiled Fillets a la Meuniere are delicious too:

2 lbs Canadian Fish Fillets, 1 tablespoonful finely minced parsley, 4 tablespoonfuls butter, juice of one lemon, salt and pepper.

Roll fillets in salted flour. Heat some oil in a frying pan and fry fillets until cooked a nice brown on each side. Remove to a hot platter. Melt the butter, add the lemon juice.

And don't forget that a good sauce always adds to the zest and enjoyment of a fish dish.

HANDY HINTS

Below are listed some questions and answers concerning numerous, small household problems:

Q. How can I treat cellar walls that are moldy?

A. Apply unslacked lime with a garden spray. The atmosphere of the whole house will be freshened.

Q. How can I take proper care of rubber gloves?

A. If the gloves are used frequently sprinkle talcum powder into them before putting them on. It will be easier to slip them on and off, and the powder will absorb any perspiration from the hands.

Q. How can I renew and restore the colors to a rug?

A. Sprinkle some ammonia powder over the rug, dampen the broom, and sweep thoroughly. The rug will look almost new.

Q. How can I prevent dates, raisins and figs from sticking to the grinder when running them through?

A. They will not stick to the grinder if lemon juice is squeezed into the grinder before the fruit is put through it.

Must Find Right People

The man who had made a huge fortune was speaking a few words to a number of students at a business class. Of course, the main theme of the address was himself.

"All my success in life, all my tremendous financial prestige," he said proudly, "I owe to one thing alone—pluck, pluck, pluck!"

He made an impressive pause here, but the effect was ruined by one student, who asked impressively:

"Yes, sir; but how are we to find the right people to pluck?"

HOW TO AVOID ILLNESS

When you begin to feel fagged out at the end of the day, look out. Illness is just around the corner waiting to lay you low. At times like this there's nothing like Wincarnis, the great tonic that has won over 20,000 recommendations from medical men. There's *health* for you in Wincarnis—new vigor, new resistance to illness.

Wincarnis is a delicious wine, not a drug. In each bottle there are all the nourishing elements of 2½ lbs. of grapes added to the strengthening elements of beef and guaranteed malt extract.

These elements in Wincarnis help to restore lost energy quickly. They will help you to sound sleep, vigorous awakenings and active, enjoyable days. Drink this delicious wine regularly three times each day, and soon years will drop from your shoulders.

To pick you up when you are out of sorts, to soothe your nerves, enrich your blood, or in cases of nervousness, insomnia, palidness and debility, take Wincarnis. At all druggists—Sales Agents: Harold F. Ritchie & Co. Ltd., Toronto. 35

7-36

In a Showdown With Japan, China Cannot Count On Powers' Support

Japan's predominance in the Far East has reached such a stage of development that the three other powers which bulk largest in China's foreign relation—Great Britain, the United States and the Soviet Union —are all inclined, for various reasons, to sympathize with efforts by the Chinese Government to check Japanese penetration, observes the Christian Science Monitor. It is, however, extremely doubtful whether China can count on any of these powers for positive material support.

Japan is, of course, China's most urgent and immediate concern in foreign policy. And two objectives which various Japanese spokesmen, with various degrees of authority and directness, have indicated during recent years are impossible to reconcile with China's new-born and growing sense of national unity. One is the claim, most plainly set forth in the famous "Amau Statement," that Japan, by virtue of its self-asserted "special status" as the main stabilizing force in East Asia, may exercise a right of veto in relation to foreign financial assistance to China. The other is the obvious disposition of the Japanese army leaders in North China to treat that region as a sort of special Japanese military and economic preserve, detached in act, if not in name, from allegiance to the central Chinese Government.

Russia's interest in China is primarily political, while that of Great Britain and America is basically economic. The Soviet Union has annexed in all but name the vast, sparsley populated region of Outer Mongolia, which still appears on most maps as part of China, and has established a virtual protectorate in Sinkiang, or Chinese Turkestan. Both these measures have been political, rather than economic, in motivation. Outer Mongolia is quite valuable from the point of view of military strategy.

But it seems improbable that either Great Britain, with its grave European preoccupations, or the Soviet Union, which is after all more of a European than an Asiatic power, or the United States, where aversion to foreign "entanglements" has seldom been stronger than at the present time, would intervene actively on China's behalf if Japan should force the disputed issues between the two countries to a military showdown. In such an eventuality, China must depend mainly on its own strength, combined with the various factors which make Japan indisposed to press matters to extremities.

DO THIS FOR A COLD

1 Take 2 "Aspirin" tablets with a full glass of water at first sign of a cold.

2 If throat is sore, gargle twice with 3 "Aspirin" tablets dissolved in ⅓ glass water.

Quick Relief with 2 "ASPIRIN" Tablets

The modern way to treat a cold is this: Two "Aspirin" tablets the moment you feel a cold coming on. Repeat, if necessary, in two hours. If you have a sore throat with the cold, dissolve 3 "Aspirin" tablets in ⅓ glass of water and gargle with this twice. The "Aspirin" you take internally will act to combat fever, aches, pains and the cold itself. The gargle will provide almost instant relief from soreness and rawness of your throat. Your doctor, we feel sure, will approve this modern way of treating a cold.

● "Aspirin" tablets are made in Canada by the Bayer Company, Limited, of Windsor, Ontario.

Country's Backbone

Blessed is the nation that can boast of a sturdy "farm aristocracy," families that have farmed for two or three generations and would no more think of going off the land and migrating to the cities than they would of becoming sailors. Such families have character. They sink their roots into the soil, and one generation is proud to succeed another. It would be interesting to know how many families on Canadian farms could trace their ownership back to pioneer days. Such people are the the backbone of the country and make the first type of citizens.—Stratford Beacon-Herald.

Woods Going, Too

Optimists say that Canada is now out of the woods. But if the destructions of her forests continues, the woods will soon be out of Canada.—Toronto Star.

One View of Speed

Surely, it requires no argument to prove that risk increases proportionately to speed. With all the modern mechanical improvements and technical safeguards, it is, after all, the human factor which counts most in ensuring safety. A car bounding along at 70 or 80 miles an hour is not under proper control and it is a peril to itself and to other vehicles. Experts agree that to drive above 50 miles an hour is to invite disaster.

While something might be said for stepping up the speed limit to some extent, in view of recent developments in the automobile industry, to abolish it altogether would be to surrender to the demands of the reckless, the selfish, and inconsiderate.—Hamilton Spectator.

Days of Youth

"We are only young once," you often hear some person remark as an excuse for "hitting the pace." True, we can be young but once, and the pleasures of youth must be crowded into that space of time. But how long are we young? Some men are old at 40, while others are still young at 60. It depends upon the pace they hit and the manner in which they hit it. —Kingston Whig-Standard.

Scenic Highways

Everybody knows that the provincial highways are all too drab at many points and everyone will agree that the placing of pretty flowers here and there would do much to improve them. It seems to us that the government itself should give some attention to this phase of the highway situation, doing a good deal more than it has in the past toward making Ontario's main routes the scenic attractions they should be. It should be needless to point out the enormous revenue that we secure from these routes and the desirability of making them look better than at present.—Windsor Star.

Modern Convenience

Dr. Arthur Pillsbury, naturalist, scientist and inventor, states that housewives soon may be growing their own vegetables in the kitchen sink by the use of chemicals. With coal in the bath tub and vegetables growing in the sink, the folks in the house will have to resort to the old tin basin for washing hands and face and to the tub on the kitchen floor for the Saturday night soapy plunges.—Montreal Gazett

School Buildings

There are those who say and believe that no municipality can afford to be niggardly in regard to such an important matter as education of the young. But they can be, nevertheless, sensible about it and not involve themselves in expenses which are other than reasonable and justifiable or above the ability of the ratepayers to meet over a period of years. More than one municipality has found itself financially embarrassed during the past few years because of unwise capital expenditures which it previously made in respect of education with town veining with town as to which should equip itself most lavishly in this regard.

There is danger that in this country we have made rather a fetish of school buildings without as much attention being paid to the teaching given in them.—Brockville Recorder and Times.

Candid

"There is nothing connected with the Press that has ever got me into such great trouble as the accuracy of the reports of what I have said," confides Lord Derby. And such admirable honesty and candor is worthy of a place in the records.—St. Catharines Standard.

Too Much Talking

Some day we are going to wake up and tumble to the fact that there is too much talking. Every time you turn on your radio somebody is starting (that's as far as he gets) to give you an earful of words. Politicians spend their lives talking. Wives (not your or mine of course) are always at it. Preachers do their share. Editors do their with a typewriters or fountain pens. What a lot of ink there must be! One of these days when we wake up and cease the incessant clatter for a moment, somebody is bound to take advantage of the lull — and do a little thinking.—St. Mary's Journal-Argus.

Fat Profits from War

During 1914 1918 one British munitions company is reputed to have made net profits of some £34,000,000. The firm supplied four battleships, three armored cruisers, fifty-three submarines, sixty-two light ships, three auxiliary cruisers, 2,328 heavy naval guns, field guns, etc., 100,000 Maxim guns, 5,500 aeroplanes, and a large number of rifles, small guns and other materials of war. The war business certainly runs up big profits for those who depend on human sacrifices for their orders. Windsor Star.

Air Mail Service Pays

Air mail service in Canada has proved cheaper than other kinds. Air mail costs in the last fiscal year were $375,971, and the revenue amounted to $533,048. If the entire service could operate on that basis we would have 2-cent postage in a hurry. — Peterborough Examiner.

THE EMPIRE

Careers for Youth

There has in the past been no official machinery by which boys have been able to join the British Army or Air Force. Unofficially some 50 young men have gone over to find successfully military careers. Although it is the Navy that invites youth "to see the world," the sister same invitation, and South Africans service could really extend much the who have returned after service in the British Army come home with tales of strange places. But judging from the inquiries we have received, the offer of commissions in the Royal Air Force to university graduates under the age of 25 is likely to find most response in the Union. Even with clouds on the European horizon, these careers hold much to attract youth. And to judge of the value to the Union of this training abroad it may be remarked that Air Force pilots were the pioneers of civil aviation in this country. —The Cape Argus.

No Excuse for Slaughter

Crossings and speed limits are of no avail if the drivers, riders, and walkers will not be constantly vigilant. There is no excuse for road slaughter. It must be stopped. By taking thought and taking care it can be stopped. — London Sunday Dispatch.

Sport Idols

Art in All Trades

In the turbulent days of the pioneer west, one of the popular ways of execution was death by the rope. This was meted out in a wholesale manner and not always with the sanction of the law. Because in the early day, the law was far too inadequate to cope with all crooks in so large a territory. At one time the law had an area of not less than 73,000 square miles in its jurisdiction under one United States court.

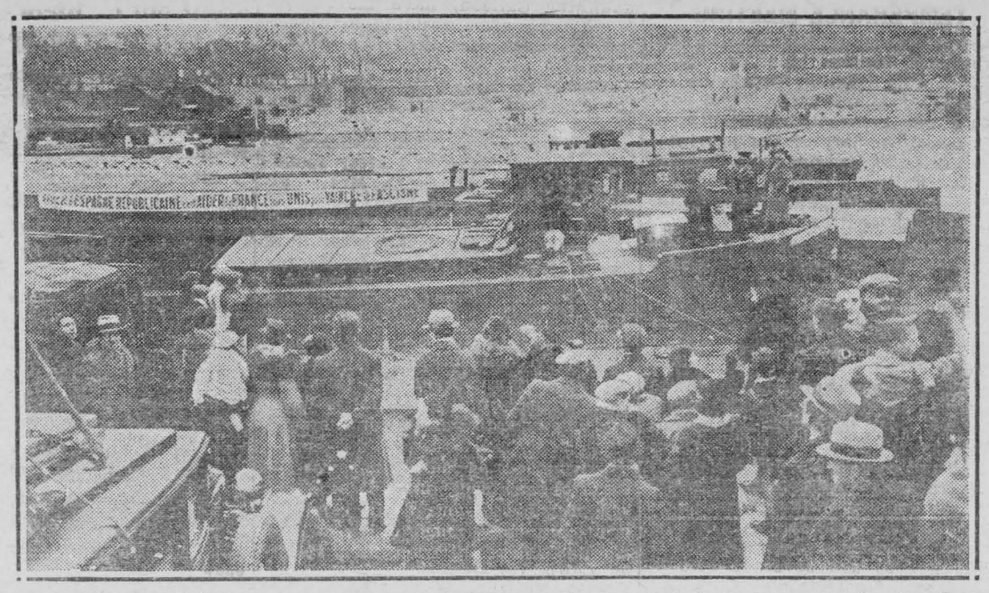

Hanging was used extensively and men became very proficient in the use of the rope, for this, at the time was a trade.

It was discovered that the method used in fastening the rope was of great importance to the victim. The difference being whether he died a slow death of strangulation or instantly a broken neck. If the rope were tied as any other rope might be tied then usually the victim was strangled to death, very slowly as can be seen. On the other hand if the rope were tied loosely and the knot were placed under the left ear then when the trap was sprung the neck was broken instantly.

At the time of these unsettled regions one United States court had under its jurisdiction an area covering 70,000 square miles of land.

Production of Nova Scotia creamery butter, reported by twenty-six creameries and one creamery estimated, was 296,569 pounds in November as compared with 289,564 pounds in the same month last year, an increase of 2.45 per cent., the provincial department of agriculture reports.

Supplies for Spain

Two large barges loaded with foodstuffs, clothing and medical supplies for the Spanish Loyalists are pictured as they left the Quai Henry in Paris, France, as sympathizers of the Spanish Government cheered. Funds for the supplies and their transportation were raised by popular subscription.

61,382 Industrial Mishaps Are Reported During Past Year

375 Fatalities Among List; Reductions for 1937 Easily Obtained Accident Prevention Officials Claim—Give Suggestions For Safe Driving During Winter Months.

TORONTO.—"Industrial accidents reported to this board for 1936 totalled 61,382. Fatal accidents totalled 375. Sand sucking fatalities totalled 24. These are serious losses. They can and should be reduced for 1937. Employers and workmen and the Accident Prevention Associations can and should for their own sake and for the sake of humanity help make that reduction."

Such was the message received from George Wilkie, chairman of the Ontario Workmen's Compensation Board by the Industrial Accident Prevention Associations.

R. B. Morley, general manager of the I.A.P.A., commenting on the statement pointed out that the increase last year in industrial accidents was due to a considerable extent to the fact that within the past few years "industry has moved out on to the highways."

This development, said Mr. Morley, has seriously complicated efforts to promote highway safety and the organizations he represents have been working for some time in close co-operation with the Department of Highways and other groups interested in reducing accidents on Ontario roads.

RULES FOR DRIVERS

He made the suggestion that recent clear road conditions throughout the province offered an excellent opportunity to put into practice several suggestions designed to promote safe driving when Winter lays its inevitable blanket of snow and ice over the countryside.

The following rules, if applied conscientiously, Mr. Morley believed, would help considerably to control highway accidents in Winter weather:

1. When starting on slippery pavements, accelerate slowly and gradually; when stopping, begin to slow down a safe distance from the stopping point. Avoid situations calling for quick stops.

2. On days requiring anti-skid chains, continue to drive as though you didn't have them.

3. Watch the road surfaces for very slippery spots. Try to keep out of ruts and street car tracks. If driving in them, bring the car to a stop before trying to turn out.

4. When two vehicles meet on narrow, slippery roadway, one should pull to the right and stop to let the other one pass.

5. At all times drive with courtesy and consideration for the other users of the highway. This includes the pedestrian.

Commenting further on the increase in compensated accidents in 1936, Mr. Morley pointed to the increase industrial activity throughout Ontario, and urged employers who were taking on new men, or former hands who had lost some of their skill, to exercise full accident prevention control so that these new workers might be saved from injury.

Income of American farmers from their sale of products in November amounted to $731,000,000, compared with $882,000,000 in October and $669,000,000 in November, 1935. The income from crops fell off somewhat more than usual from October to November, due chiefly to the decreased sales of cotton and tobacco. Receipts from live stock and live stock products on the other hand increased more than usual.

What Our Visitors Expect When They Cross the Border

(By F. T. Pattison, Collector of Customs and Excise at Fort Erie, Ont., in the National Revenue Review).

The successful handling of a large volume of tourist traffic is, of course, a matter that requires close attention and serious consideration. At the same time, unusual incidents occur during the daily routine to relieve any monotony.

Many tourists entering at Fort Erie have a sketchy and meagre knowledge of the geography of Canada, and their inquiries very often appear to be the result of an active imagination. For instance: An officer is busily engaged with the flow of automobiles before him, making the necessary inquiries of each person to determine what procedure he shall outline to be followed, when someone from the rear seat of the the outomobile says, in response to inquiry as to the length of time it is intended to remain in Canada, "Oh, we are only coming in to see the quints. We will be back in plenty of time for dinner." The time is approximately two p.m.

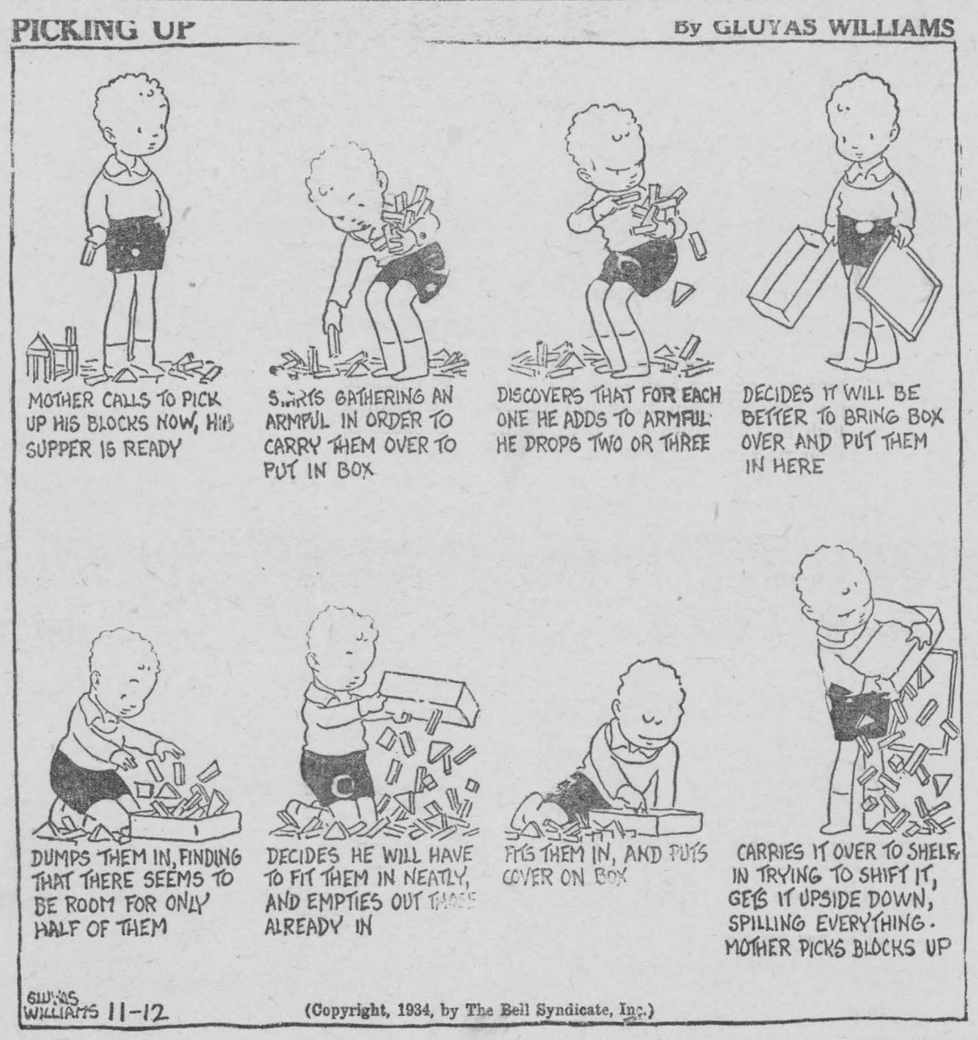

At 11 a.m., on one occasion, three boys of the "teen" age, equipped with fishing rods and a light lunch, informed the officers they were just going up to North Bay for some Canadian trout. In response to further inquiry, they stated they would not be in Canada more than a short time, as they had to be back to play football that afternoon in a nearby United States city.

There was a lady tourist from the state of Alabama applying for a permit, who, in response to the officer's question if the car was with radio or heater replied that if a heater was needed in this country at this time of the year—September—she would go no further, but would hurry back to Alabama.

A native of the state of Kansas naively stated he had been spending a few days in Buffalo, N.Y., and, "learning that Canada was just across the way," thought he would run over to Montreal for the afternoon.

During the month of August a young man from a not far-distant United States city requested a permit to enter. Not a little attention was attracted to his equipment, which consisted of heavy woolen socks, shoepacks, mackinaw jackets and sundry other articles to be found in lumber camps.

Taking no exception to any of these articles, the officer advised the young man that the regulations did not permit him to bring into Canada the large western type, 45-calibre revolver contained in his duffle bag. However, the young man would not contemplate the protection of this gun, and it was only after repeated assurance of his safety that he hesitantly decided to brave the dangers from wild bear and moose, pictured to him by his friends, to be encountered in Canada.

News in Brief

Fears News Leak

TORONTO—At the Liberal Party caucus held this week, Attorney-General Roebuck refused to talk on the reported pending purchase of more Quebec power from the Ottawa Valley Company, for fear, the news would "leak" to the newspapers.

"Traitors"?

A lot of caucus argument was centred on the possibility that "traitors" were providing the press with caucus information that could not be obtained except through "leaks." Major James Clark (Windsor-Sandwich) was strong in his denunciation of such alleged tactics, and had the caucus adopt a resolution providing that all speeches therein be regarded as "secret." Tom Murray, veteran legislator and famed humorist from North Renfrew, sugested that the best way to get around the situation was to trip up the press by having the best liar among the Liberals invent inaccurate stories to feed out systematically to the reporters.

Good Speech

At Ottawa this week when A. A. Heaps, (C.C.F., Winnipeg North) presented his motion asking the Government to request President Roosevelt to call a world peace conference, he read at length from what he thought was an address delivered by Mr. Roosevelt at Rio de Janeiro.

Prime Minister Mackenzie King interrupted him: "Is my honorable friend quoting the President of the United States? I think that is what I said."

"That may be the case," replied Mr. Heaps, "but I think it is a pretty good statement to make and I am fully in accord with what the Prime Minister said and I hope I have done him no injustice by crediting his remarks to the President of the United States.

Veto Peace Conference

The World Peace Conference to be held at Washington suggested by A. A. Heaps, was sternly opposed by the Prime Minister and the Leader of the Opposition.

Declared Prime Minister Mackenzie King: "I am not sure that a world conference would achieve any good. And it might make things a great deal worse."

"Our generation is gone a little mad on the question of conferences, it seems to me. A conference is a very convenient way of appearing to be doing something, while in reality very little is being achieved. The more I see of conferences, the less patience I am coming to have with them."

Observed the Conservative Leader, R. B. Bennett: "I have not forgotten that a great World Economic Conference was called in 1933. I know one man, two men, three men, who were urged by the President of the United States to expedite in every possible way the work of that conference. Yet the conference had hardly met and organized before the President of the United States torpedoed it for reasons which have never yet been made public."

Provincial Parley Favored

Right Hon. R. B. Bennett's proposal for a conference on constitutional questions generally found favor among Provincial Government heads.

Premier W. J. Patterson of Saskatchewan said he believed it might be better handled by a commission than by the proposed conference.

Acting Premier Harry Nixon of Ontario had no comment to make on Mr. Bennett's suggestions.

Hon. A. P. Paterson, Minister of Federal and Municipal Relations of New Brunswick: "We shall never get it right until all get around a table and talk it over quietly and dispassionately."

Premier Angus L. Macdonald of Nova Scotia: "It is generally agreed certain amendment are necessary. The only point of difficulty is deciding on a method of amendment that will be satisfactory to both the Dominion Parliament and Provincial Legislatures."

Premier J. D. Pattullo of British Columbia: "Such action had been advocated by British Columbia for years."

Premier William Aberhart of Alberta: "Alberta is ready to discuss any necessary changes in Canada's Constitution."

Premier John Bracken of Manitoba: "We have been agitating for modernization of the Canadian Governmental set-up for ten years."

Lethbridge Boast

LETHBRIDGE Alberta challenges the Galt, Ontario record of not one fatal motor acciden within its boundaries during 1936 with a two-year record. Not one automobile fatality occurred there in 1936 or 1935.

---

fewer than 65 different items have been found in the stomachs of cows which have been killed and dissected by scientists.

A suggestion that air development had destroyed naval supremacy, rendering it a matter of difficulty for Australia to send troops to Europe in a new war, was made by Mr. W. M. Hughes, Australia's war-time Prime Minister, speaking at a luncheon in Melbourne.

OFFICERS ARE ELECTED FOR MOUNTAIN UNITED

The annual meeting of the United church of the Mountain charge was held with the pastor, Rev. W. R. Johnston, in charge. The various organization reports showed much satisfactory work accomplished during the past year, especially in the Sunday school department. The W.M.S and Mission Band showed increases in givings and the W.A. reported a balance of $132.49. The financial statement of the church treasurer showed a small deficit, while the M. and M. fund was increased 5.61 per cent. Nine new members were added to the church roll.

Officers for 1937 are: Charles Robinson, senior elder; elders D. W. Cameon, H. C. Fader, A. Moorehouse, S. W. VanAllen; stewards: W. Hoy, Robert Bryan, W. J. McCargar, A. Froom, D. Cameron, A. Moorehouse; secretary-treasurer, H. C. Fader; envelope steward, A. VanAllen; assistant, Miss E. Cheney auditors, A. Froom and S. Finlay.

MR. JAMES CINNAMON

The death of James Cinnamon at Harmony on Saturday, removes from this district a highly respected citizen and one of the community's most progressive farmers.

Born at Harmony 78 years ago, deceased was a son of the late Henry Cinnamon and his wife, Sarah Smith pioneer settlers of that district. He spent his entire life in the township of Winchester, where he was engaged in farming. For several years he had been a school trustee and had served on many township committees. He was a member of Harmony L.O.L. and Harmony United church

The funeral was held from the family residence on Monday afternoon, where service was conducted by Rev. W. S. Atchison, pastor of Winchester United church. Interment was in Maple Ridge cemetery,. The late Mr. Cinnamon is survived by his wife, the former Miss Janey McVeigh; two daughters, Mrs. Howard Fetterly, Winchester, and Mrs. Sandy McLean, Ormond; two sons, William and John, at home; one brother, Thomas Cinnamon, Ormond and two sisters, Mrs. James Wray, Vancouver, and Mrs. Alex. McGregor, of Grand View, Sask.

STRADERS HILL

Misses Doris, Audrey and Ruth Strader and Mahlon and Lyell Strader, with a number of other friends had tea on Tuesday at the home of Mr. and Mrs. Ernest Marcellus at Rowena.

Mr. Patrick Houlahan and mother of Toyes Hill, and Mr. Robert Robinson had tea Tuesday evening with Mr. and Mrs. Guy Strader.

Mr. and Mrs. Herbert Hanson spent Thursday with Mr. and Mrs. Wm. Casselman at Rowena.

Mrs. Alonzo Foster spent the week end with her parents, Mr. and Mrs. J. E. Marcellus at Rowena.

Messrs. Ellis Ray and Wm. Merkley spent Friday evening with Mr. Cecil Hanson.

Mr. and Mrs. Guy Strader and Donald, and Miss Mary Strader had tea Friday evening at the home of Mr. and Mrs. Edwin Johnston.

Mr. and Mrs. Cecil Hanson and Edward and Miss Nellie Cameron of Morrisburg, had tea Saturday evening with Mr. and Mrs. Bernice Strader.

Miss Jean Strader and Master J. Edward Hanson spent Saturday with Miss Audrey Strader

Mr. and Mrs. Wilbert Strader and girls spent Saturday evening at Mr Guy Strader's.

Mr. and Mrs. Cecil Hanson and Edward spent Sunday with Mr. and Mrs. E. P. Foster at Morrisburg.

50th Anniversary Celebrated

A large number of friends and neighbors gathered at the home of Mr. and Mrs. Milton Locke, Rowena, Wednesday evening, January 27 the occasion being their golden wedding anniversary. The bride was formerly Miss Emma Redmond, of Iroquois, Mr. and Mrs. Locke have resided in this vicinity since their marriage.

Born to this union were two sons Howard at home and Willis of Kingston, N.Y., who were present with their families for the occasion. The evening was spent in games and singing of old familiar songs. The three tier wedding cake was cut by the bride, and each guest received a piece.

At an appointed time the bride and groom were called to the floor. An address was read by Mrs. Elgin Hamilton and they were presented with a silver tea service.

Both Mr. and Mrs. Locke are enjoying very good health.

MR. GEO. DURANT

There passed away at his home in Iroquois on Saturday morning an old and well known citizen of Dundas county in the person of George Durant. The deceased, who was in 90th year, was born in Williamsburg township and was the last of a family of eight.

In early life he was a pump manufacturer and later went into the general store business at Elma. In later life he acted as agent. He married Lydia Ault of Matilda township and was the father of two children, Chadwick, who predeceased him some years ago, and Etta (Mrs. E. Schlichter) of Cardinal. He was a life member of Excelsior Masonic Lodge of Morrisburg.

About 15 years ago the late Mr. Durant and his wife retired to Iroquois where they were highly respected as citizens. He is survived by his widow, his daughter, one grandson, George Clifford of Cardinal and two great grand-children. A funeral service was held at his residence on Monday at 1.30 p.m. with Rev. T. Knowles of the Iroquois United church officiating. Interment was at Boucks Hill cemetery.

TEMPERANCE MEETING

A conference of Eastern Ontario temperance leaders met in Wall Street United Church, Brockville on Thursday, January 28th. The conference was generally representative of the eastern part of the province, delegates being present from Ottawa, Smiths Falls, Prescott, Iroquois, Brockville, Athens and territories adjoining these centres.

Addresses were given by Rev. A. J. Irwin, D.D., General Secretary of the Ontario Temperance Federation, and Rev. R. T. Richards, B.A.,B.D., president of the Bay of Quinte Conference of the United church.

A round-table conference followed conducted by Rev. R. A. Whattam at which the following resolutions were passed:

1. That we express our desire for more frequent temperance discours from the pulpits of the churches.

2. That we deplore the drinking of liquor in homes and urge upon our people not to use beverage alcohol as a means of entertainment.

3. That while opposed to the liquor traffic in all its forms we particularly emphasize our objection to beverage rooms.

4. That we call upon our Government to give to our people by means of a referendum the opportunity of expressing their wish as to the continuance o fthese.

5. We would also call attention to the menace upon our highways of drunken and drinking drivers.

6. That we urge our local organizations and representatives of our churches and lodges to make a point of attending the annual provincial convention of The Ontario Temperance Federation on March 4th and 5th in Toronto, where the policy of the organization i nmatters of legislation and law enforcement will be more clearly enunciated.

VILLAGE VIEW

The Village View friends extend their sympathy to Mr. and Mrs. Harvey Beckstead and family in the death of their infant daughter, aged 6 months who passed away Friday morning.

Friday visitors at Edward Deeks' home were: Mr. Ernest Wells, Hoasic, Mr. and Mrs. Fred Deeks and son Allan of Brinston Corners.

Mr. Clarence Houtt spent Sunday evening at his parental home at Brinston Corners.

Mr. and Mrs. Donald Merkley and son Ronald of Morrisburg were Sunday visitors at Mr. and Mrs. Frank Merkley's home.

Mr. and Mrs. Walter Ray, also Mrs. Sim Beckstead of Morrisburg were Sunday evening guests of Mr. and Mrs. Edward Deeks.

We are sorry Miss Ethel Reddick is on the sick list this week.

Mr. J. M. Deeks, Miss Josephine Deeks, also Mr. Clarence Houtt were Sunday visitors at Mr. and Mrs. E. Well's home, Hoasic.

Mr. and Mrs. Bud Weagant and daughter Calleen, have moved to Morrisburg after residing at Brinston Corners for the last several months.

Miss Elva Declair spent Sunday as the guest of Miss Lillian VanAllan of Glen Union.

Miss Greta Dafoe has returned to her home at Aultsville after spending several weeks with Mrs. E. Janack.

Mr. Roy Beckstead and Omer Beckstead of Glen Union were Sunday afternoon callers at Harvey Beckstead's home.

Mr. and Mrs. Elmer Janack spent Sunday last with Mr. and Mrs. Fred Dafoe, Aultsville.

Miss Lillian VanAllen of Glen Union spent the week end with Miss Elva Declair.

KIPPERED HERRING SCALLOP

Flake one can Canadian kippered herring in small pieces. In buttered bake dish put alternate layers of cooked potatoes, fish and cheese, sprinkling crumbs between the layers. Add seasoning to one cup of milk and pour over the scallop. Cover with buttered crumbs and bake until brown.

ANY DAY A FISH DAY

ROAD SUPT RE-APPOINTED WINCHESTER TP. COUNCIL

The February meeting of Winchester Township Council was held in the McCloskey House, Chesterville, Monday, February 1st, with all the members present. The minutes of the last meeting wr adopted as read and signed by the reev.

The Reeve, Deputy Reeve and Road Superintendnt wr appointd delegates to attend the Good Roads Convention to be held in Toronto the latter part of February.

H. G. Cummings was again appointed Road Superintendent for the Township of Winchester for 1937, and the following Trustees were appointed for the Morewood High School — William Steen for three years, Ford Steinburg for two years, and Allan Smirle for one year.

It was reported that the Baker bridge had been swept from its piers by the winter flood of the Nation river and the engineer, J. D. Millar, recommended that the structure be salvaged and drawn to higher ground, to prevent it from floating away in the spring floods. The bridge will be rebuilt in the spring.

Accounts were passed.

Council adjourned to meet at Winchester on Monday, March 1st, at 10.30 a.m.

FATHER LALONDE HONORED

Rev. Dalbert Lalonde, curate of Crysler and Finch, recently transferred to Lancaster and Curry Hill, was presented with a substantial purse on behalf of his parishoners of St. Bernard's church, Finch, following high mass on Sunday. The presentation was made by James Mc Mahon and an address of regret at his depatue and recognition of his many good works in the parish was read by Bernard Grady. Father Lalonde made a graceful reply.

HAINSVILLE

Mr. and Mrs. Clifford Gilmer spent Friday evening with Mr. and Mrs. Norman Baker.

Mrs. Cecil Locke of Dixxon Corners, spent a couple of days with her sister, Mrs. Basil Reynolds.

Mr. and Mrs. Arnold Fader spent Sunday with Mr. and Mrs. John Briggs.

Mr. and Mrs. Andrew Brown, of Ventnor spent Sunday with the latter's mother, Mrs. Barkley, who we are sorry to report is quite ill at present.

Mrs. James Murdock and Mrs. Wm. Barkley spent Thursday with Mrs. George Hodge.

Mrs. Arnold Fader spent Friday afternoon with Mrs. Norman Baker.

Miss Alice Fader spent Thursday with Miss Jean Fader.

John McKercher, Ventnor, spent a couple of days with friends here.

Mrs. Wm. Fader returneed home on Sunday after spending the past week with her parents, Mr. and Mrs. Webb, Williamsburg.

Mr. and Mrs. James Murdock Mrs. John Miller and Mrs. Arnold Fader were recent visitors of Miss Stella Johnson, Glen Stewart.

Johnson Fader spent Monday afternoon and night with friends at Ventnor.

Mr. and Mrs. Stanley McIntosh of Williamsburg were recent callers in this vicinity.

Mr. Roy Schell has purchased a fine new Chevrolet car.

Wish to correct an error in last week's items. It should have read: "Much sympathy is felt for Mr. V. Casselman's family in the loss of their infant daughter, Eva Joan.

Mrs. Wm. Dafoe spent the past week with friends at East Williamsburg.

CANADIANS AND THEIR INDUSTRIES.....AND THEIR BANK

MINING AND METALLURGY

Mining in Canada, now second largest of the country's industries, gives employment to 80,000 workmen and has a production value of over $300,000,000 per annum.

As an accompaniment of this great and growing mining industry, Canada is building up a smelting and refining industry of world importance. There are now huge plants in Ontario, Quebec, Nova Scotia, British Columbia and Manitoba. These plants produce:

Copper • Nickel • Zinc • Lead • Cobalt • Iron
Ferro-alloys • Gold • Silver • Bismuth • Radium
Cadmium • Selenium • Aluminum • Tellurium • Uranium

The plants give direct employment to 10,000 workers, and indirect employment to many thousands more; have a production value of $200,000,000 per annum; purchase coal and electricity to the value of $12,000,000; pay for equipment, supplies, freight, etc., some $40,000,000 per annum; and add some $100,000,000 to the export value of Canada's mineral products, without counting the value of the gold recovered from base metal ores.

Prominently identified with the upbuilding of the smelting and refining industry of Canada from its inception, the Bank of Montreal gives this industry financial service through every stage. Thousands of workers are depositors, sharing in the safety and facilities of the Bank with their employing companies.

The Bank's services include: Commercial accounts; foreign currency accounts; financing of shipments; loans and discounts; collections; trade and credit information; safekeeping of securities; savings accounts; money orders; travellers cheques; banking by mail; personal loans.

BANK OF MONTREAL

Morrisburg Branch: W. D. S. THOMAS, Manager

MODERN, EXPERIENCED BANKING SERVICE....THE OUTCOME OF 119 YEARS' SUCCESSFUL OPERATION

News And Information For The Busy Farmer

Furnished by the Ontario Department of Agriculture.

Unfinished Hogs

All unfinished hogs offered at stockyards and packing plants such as do not conform to the requirements of the grading regulations, are graded as feeders, and it is in the interests of the producers to make every effort to hold back hogs of select bacon, and bacon weights, until they are properly finished. Under-finished pigs make soft bacon and poor cuts and roasts.

Beauty Parlor for Dairy Cows

An impotant step in clean milk poduction is to clip the udde, hips, and flanks of the cows, thus making the daily brushing much easier and more effective. Clipping of the tail, head, neck and shoulders adds to the appearance of the cows and aids in getting rid of lice, which will multiply quickly at this time if not promptly eradicated. A good wet or powder shampoo repeated in ten days' time will do the trick

Reducing Mortality

Mortality among chickens, both old and young, is the bane of the poultry industry. This is particularly noticeable in commercial flocks, due probably to a large extent to the unnatural conditions under which the birds are housed and fed during a large part of the year and the unsanitary surroundings in which many flocks are maintained. The remedy, of course, lies in acquiring more scientific knowledge in the care of chickens and the application of this knowledge over a greater farming area.

The first step advised by the authorities is the adoption of a sane sanitary programme for raising the annual crop of pullets, so that they will be as free as possible of parasitic infestations and infectious diseases when they are housed. Secondly, by vaccinating when necessary at the proper time for the control of such diseases as fowl pox and laryngotracheitis; later, if possible, to eradicate these diseases.

Thirdly, dispose of all old birds previous to housing new crop of pullets on the farm annually where any disease has been epidemic. Regardless of how valuable an old hen may be as a breeder, she stands indicted as a source of most of the disease troubles that are carried over from generation to generation

Stock Exports

The approximate number of cattle and calves exported from Canada to the United States during 1936, up to December 17, was 217,226, as compared with 123,683 in the correspond ing period of 1935. The grand total of hogs graded in Canada during 51 weeks of 1936 was 3,572,496, an increase of 638,682 on the number graded in 1935 (2,888,814). In 1936, the number of hogs graded by carcass was 422,774, as against 111,-785 during the corresponding 51 weeks of 1935.

Annual Conventions

Ontario Plowmen's Assn., (Annual Meeting), Tuesday, February 9 9.30 a.m., King Edward Hotel, Toronto.

Ontario Field Crop and Seed Growers' Assn., (Annual Meeting), Wednesday, February 10th; 9.30 a.m., King Edward Hotel Toronto.

Ontario Association of Agricultural oScieties, (Annual Convention) Thursday, Feb. 11th 9.30 a.m., King Edward Hotel, Toronto.

Ontario Association of Agricultural Societies (Annual Convention) Friday, Feb. 12th 9.30 a.m. King Edward Hotel, Toronto.

Seed Display, February 9 to 12th 9.30 a.m., King Edward Hotel, Toronto.

Ontario Horticultural Assn. (Convention). Thursday and Friday Feb. 18th and 19th 9.30 a.m., King Edward Hotel, Toronto.

It is generally recognized throughout the poultry industry that one of the most rapid and effective means of improving farm poultry flocks is through the application of the Dominion Hatchery Regulations. These regulations, with the co-operation of of the provinces, are accomplishing good results. To lay the foundation of a profitable farm flock, it is necessary to start with good healthy stock. To enable the farmer to obtain this kind of stock, regulations for the control of hatcheries were drawn up, with the co-operation of several of the provinces and at their request.

Briefly, these hatchery regulations provide for the following: (1) All commercial hatcheries of over 1,000 eggs capacity to obtain their hatching eggs from approved flocks and to operate under Dominion supervision as regards hatchery conduct, operation, and advertising; and (2) approval of flocks as sources of hatchery eggs to be under provincial supervision.

The farm flock may be started by (1) the purchase of hatching eggs (2) of day-old chicks; (3) of pullets ready to lay; and (4) of adult breed ing stock. Whatever method is adopted, one thing is certain—a great deal of annoyance and loss may be obviated by purchasing from R.O.P (Record of Performance) or approved flocks.

Ice Storage Methods

Where ice is really avainable the storage of a few blocks of it is a very simple matter. Any unoccupied corner of a shed will serve the purpose. A rough board enclosure, ten feet square and eight feet high, will hold enough ice to provide 50 pounds per day for 130 days, after allowing for a reasonable amount of wastage. The smaller the quantity stored, the larger is the proportion of waste.

The bottom of the enclosure should be covered with about one foot of sawdust. If the soil underneath is impervious clay, it will be all the better if there is a few inches of gravel under the sawdust. In putting the ice in the enclosure, the boards can be taken away from one side and replaced after the ice is in position. The space of one foot, to be filled with sawdust, should be left between the ice and the boards, and the ice should be covered with about th same thickness of sawdust,. It is the sawdust which keeps the ice from melting.

The drier the sawdust, the better the ice will keep, and it is a good plan to throw out the driest of the sawdust from time to time as the ice is being removed during the summer. Under cover this sawdust will continue to dry out and thus be in a better condition to be used again in the following year.

HULBERT

Mr. and Mrs. Stanley McQuaig had dinner on Sunday with Mr. and Mrs. Chris Mellan and family.

Mrs. Lloyd Montgomery attended the meeting of the W.M.S. at Mountain on Wednesday.

Miss Ruth Ellis and Miss Margaret Ellis spent the week end at their home here.

Mr. and Mrs. Ira Ellis entertained to a birthday tea on January 27. Mr. and Mrs. Wilbur Morrison, Mrs,. Jas. Morrison, Mr. and Mrs. Arthur Morrison and Donnie. This was on the occasion of the birthdays of Mrs. Wilbur Morrison and little granddaughter Donnie

Mrs. Hugh McQuaig and son spent Wednesday with Mr. and Mrs. Ralph Adams.

Miss Mina Lewis spent the week end with Mrs. Hugh McQuaig.

Miss Doris Montgomery spent the week end with her parents, Mr and Mrs. Lloyd Montgomery.

Mr. and Mrs. Clifford Thorpe and Marion visited Mr. and Mrs. S. D. Thorpe on Sunday afternoon.

Mr. and Mrs. Leland Barclay and baby of Williamsburg had dinner with Mr. and Mrs. Wesley Flegg.

Picadilly THEATRE Williamsburg

THREE MATINEES—MON., WED, & SAT.

THIS FRIDAY & SATURDAY, FEBRUARY 5—6

BIG DOUBLE BILL...."DOWN TO THE SEA" with Ann Rutherford and Ben Lyon. Thrills under the sea. Courage and daring in this undersea epic. Second picture is "ROARING LEAD" with Bob Livingstone. A western with a Bang Bang.

SUNDAY SCHOOL LESSON

LESSON VI.—FEB. 7.
JESUS THE LIGHT of the WORLD
JOHN 7: 1—9: 41.

Golden Text:—I am the light of the world: he that followeth Me shall not walk in the darkness, but shall have the light of life. John 8: 12.

The Lesson In Its Setting

Time.— All the events in this lesson occurred during the week of October 11—18, A.D. 29.

Place.—All the events in this lesson took place in the city of Jerusalem.

Again therefore Jesus spake unto them, saying, I am the light of the world: he that followeth Me shall not walk in the darkness, but shall have the light of life. In these nine verses we have a declarative statement by Christ, a repudiation of that statement by the Pharisees who heard Him, and a defense of the truthfulness of His words by the Lord Himself.

Jesus therefore said to those Jews that had believed Him, If ye abide in My word, then are ye truly my disciples. "Surrender of mind, heart, and will to the power of Christ's doctrine must be complete and enduring. There must be more than a mere recognition of the striking personality of Jesus. There must be the reception of His word into conscience and heart."

And ye shall know the truth, and the truth shall make you free:— Later on, the night before His death, Jesus, in praying to the Father, again refers to the word of God as truth (John 17: 17—19). If men accept the truth which Christ teaches, that is, the truth about God, about sin, about Satan, about eternal life, about holiness, about love, men will be free from the power of Satan who deceives, from the bondage of fear, which is due to ignorance, from the power of darkness, from sin itself.

And as he passed by, he saw a man blind from his birth. Blindness from birth is a condition which no man could change, especially no man could ever open his own eyes. All the beauty of life is shut out from the world of a man born blind.

And His disciples asked him, saying, Rabbi, who sinned, this man, or his parents, that he should be born blind?— That the man's blindness was due to sin the disciples assumed: the question was, Was the sin committed by the man so afflicted, or by his parents? In one way the question seems foolish, for the man was born blind, before he ever could have sinned. Furthermore, the question is based on a false assumption. Not all suffering or physical handicaps are the consequences of sin in some immediate ancestor. Parents of most devout faith have been known to have children of imbecilic tendencies, while there are parents who have given birth to children while living in scandalous sin, whose children have lived for years without any physical suffering. Ultimately, of course, all suffering results from the fallen condition of the human race.

Jesus answered, Neither did this man sin, nor his parents: but that the works of God should be made manifest in him. "The Lord deals only with the special case; and that only so far as it is an occasion for action and not a subject for speculation.

We must work the works of him that sent me, while it is day: the night cometh, when no man can work:—"We cannot think it strange that Jesus should connect the man's blindness with his own appearance on earth, born blind in order that Jesus might give him sight."

When I am in the world, I am the light of the world.—"There is special reference here to Christ's giving light both to the man's eyes and to his soul."

When he had thus spoken, he spat on the ground, and made clay of the spittle, and anointed his eyes with the clay.—"A medicinal value was attributed to saliva, above all, for disorders of the eyes. (See also Mark 7: 33; 8: 23). Neither are we without examples of a medicinal of clay. Still we must not suppose that, besides his divine power, the Lord also used natural remedies, or that these were more than conductors, not in themselves needful; for other blind eyes he opened without employing any such means (Matt. 20: 30—34).

And said unto him, Go, wash in the pool of Siloam (which is by interpretation, Sent). He went away therefore, and washed, and came seeing.—The pool of Siloam was 50 feet long, 20 feet deep, and 20 feet wide, lying in the mouth of the Tyropean Valley. Water was drawn from it for the temple, and it was supplied by the Fountain of the Virgin. "The obedience was that of faith, feeble as yet, but real; and the reward that which is always promised to faith, even feeble, if real."

The neighbors therefore, and they that saw him aforetime, that he was a beggar, said: Is not this he that sat and begged? Others said: It is he: Others said: No, but he is like him. He said: I am he. — Here we have the first words from the man who was blind, "I am he." His testimony must be received. He knew who he was.

They said therefore unto him, How then were thine eyes opened? The question is perfectly natural. It does not intimate any unbelief or skepticism, but a natural inquisitiveness. Anyone would ask this question.

He answered, The man that is called Jesus made clay, and anointed mine eyes, and said unto me: Go to Siloam, and wash: so I went away and washed, and I received sight. — The report of the blind man is vivid, accurate, clear, and ought to be convincing. There are no adornments here. It is a simple statement of fact. He relates what happened, but actually how Christ opened his eyes, he does not know, and no one else does. We do not understand miracles: we believe them.

Enjoys Holiday in Sun

Thomas O. M. Sopwith, noted British airplane designer and yachtsman, pictured with Mrs. Sopwith as they sit in the sun at Palm Beach. Sopwith, who has taken up the late Sir Thomas Lipton's mantle, will race two yachts against America's best at Newport, R. I., next summer.

British Tommies Trained for Civilian Life

Preparing for a place in life after they leave the army, British soldiers learn to lay bricks at the army vocational center at Aldershot. After six months training at the trades they have chosen to follow, they are given tools and jobs are found for them.

Movie-radio gossip

By DOROTHY

There was a rather funny reaction to an interview that Edward G. Robinson gave a reporter for an Italian newspaper some time ago. He praised the work of Frank Capra, the director, who is Italian by birth, saying that Capra refused to direct gangster films.

He remarked that he thought it was because Capra did not want to make pictures which showed his own people in a bad light. When the storm burst it hit, not Capra, but Robinson. Seems the Italians thought gangsters were something like senators — an American institution of which the Americans were proud!

The long discussion over which actress would play the mother role in "Stella Dallas" has been settled at last. It goes to Barbara Stanwyck, who does seem a bit young for it, but of course, there's always the make-up. An anyway, the part is to be rewritten to fit her.

Barbara Stanwyck

At the moment the "Gone With the Wind" pursuit of a heroine is still raging, but no doubt that will be settled in the same way—some attractive, dependable actress whose screen work is known to the public everywhere will get it.

Phil Baker, who has long been one of radio's favorite comedians, has learned a lot from what has happened to other men like him when they consented to make a picture. And he is profiting by what he has learned. He knows, that, when the picture is released, the comedian's part may have been cut and cut until there is practically nothing left of it.

Both Samuel Goldwyn and Paramount want him to do his specialty in pictures, but he has held on, even to the extent of refusing $12,000 to do his stuff.

The very funny Ritz Brothers, who can be relied upon to send movie audiences into gales of laughter, encountered something that was not so very funny to them, when they had to learn to skate for "One in a Million," the Sonja Henie picture that's all about skating, with Miss Henie doing five big numbers.

The brothers simply could not learn to skate. They could not even stand up on skates. Finally the difficulty was solved by having special skates made for them.

Speaking of romantic stories, even the movies can't beat the one of Wallace Ford's long search for his mother and his finding her just before the Christmas season. It's about 38 years since she had to put him in an English orphanage, and Ford found her living in an automobile trailer, and the wife of a blind match seller. Now he is going to do all the things for her that he has planned during the long years when he was trying to find her.

Head of Trust

L. F. Lord (above) recently was appointed manager of the $10,000,000 Nuffield Trust for the Special Areas, Lord, who is 40 and until recently the managing director of the Morris organization and Lord Nuffield's right hand man, is regarded as a production genius. It is believed that an important scheme for industrial developments in the distressed areas, for which Lord Nuffield gave the trust as a Christmas gift, is being prepared.

Probably nobody will ever be able to explain why certain radio programs succeed, any more than motion picture producers can tell why some pictures smash box-office records and others that seem just as good flop terribly.

There is a delightful radio program that has been going well for considerably more than a year. It's called "Dot and Will." And so far no sponsor has bought it. Yet the company has actual proof that thousands of people listen to it.

Apparently a lot of old stories are to be re-made during 1937. "Ben Hur" is up for discussion — maybe with both Clarl Gable and Robert Taylor in it. There was a time, when, if three featured players were in a picture, it was advertised as having an all-star cast. Now the producing companies put several of their biggest stars into one picture and just take it as a matter of course, and do the audiences.

Clark Gable

ODDS AND ENDS—Hollywood is still regretting the death of Irene Fenwick, Lionel Barrymore's wife; their's as an exceptionally happy marriage, and Miss Fenwick was very popular — Now that Bette Davis is back at work they are working her so hard that she barely has a chance to breathe, to make up for the time lost when she was battling with the company—"After the Thin Man" is just as funny as "The Thin Man" was — so don't miss it. — And you'll surely want to see "Beloved Enemy," with Merle Oberon and Brian Aherne —And "That Girl From Paris"— Tilly Losch, who did a bit as a dancer in "Garden of Allah" may appear in re-makes of some of Greta Garbo's old pictures.

Farm Problems

Conducted by
PROFESSOR HENRY G. BELL
with the co-operation of the various departments of Ontario Agricultural College

1. Question:—"A farmer has just taken over a greenhouse which contains 25 tons earth prepared for tomato plant growing five years ago, but never used. This soil has been tested, is natural in reaction, contains a fair amount of nitrate, but is low in phosphoric acid and potash. Would an application of 0-12-10 or 0-12-15 at the rate of 25 lbs. per 1000 square ft. put this soil in suitable condition for growing tomato plants this Spring?"—R.W., Northumberland Co.

Answer:—The addition of 0-12-10 or 0-12-15 fertilizer at the rate of 25 lbs. per 1000 square feet would be equivalent to a little over 1000 lbs. per acre. This is a fair application for outdoor use, but I would be of the opinion that this could be almost doubled for indoor purposes such as you recommend. You do not say whether or not the 25 tons of earth have been kept in a dry place and rain and snow have been prevented from falling on them. Of course, if this soil has been kept absolutely dry and no moisture has been added to it, microscopic life will be at a low ebb in it on account of lack of moisture. In this case, it might take the soil a short time to come back to its normal form. I believe the treatments you suggest would put it in fair shape for tomato plant growing.

2. Question:—"I wish some information regarding the building up of land which is in poor condition. I have 45 acres fall plowing on which I would like to sow oats and seed down with 5 lbs. of Timothy and 5 lb. of Red Clover, and was wondering if lime and salt would be a good thing to put on the land and if so, how much per acre? There is also 50 acres that I was thinking of summer fallowing and putting in Fall Wheat and the same mixture of grass seed. Would also like to know if lime and salt would be a good thing to put on for potatoes on land in good condition."—M. G., Oxford.

Answer:—Answering your question regarding treatment of 45 acres of fall plowed land on which you purpose sowing oats and which land I understand is in poor condition. I wish to say that use of lime and salt cannot be recommended. Without testing the soil, it is impossible for me to know whether the soil needs lime or not. If it is acid in reaction (or sour) lime will help. If it is alkaline or neutral, the addition of lime will do no good whatever. The addition of salt merely hastens the robbing of the soil of its fertility. The sodium of the salt displaces the potassium of the soil, hence benefit for a crop or two can be seen, but in general, the use of salt on the land corresponds to the use of the whip on the team. Most often more oats fed to the team give better results in labour which can be obtained from them, similarly, the addition of plant-food to the soil in the shape of manure or fertilizer, or both, will give much better and more lasting results than the use of salt.

With reference to the handling of the other 50 acres, I would strongly advise against putting on lime where you purpose growing potatoes, since lime produces a condition where the potato scab thrives. This fungus disease is common in most of our older soils.

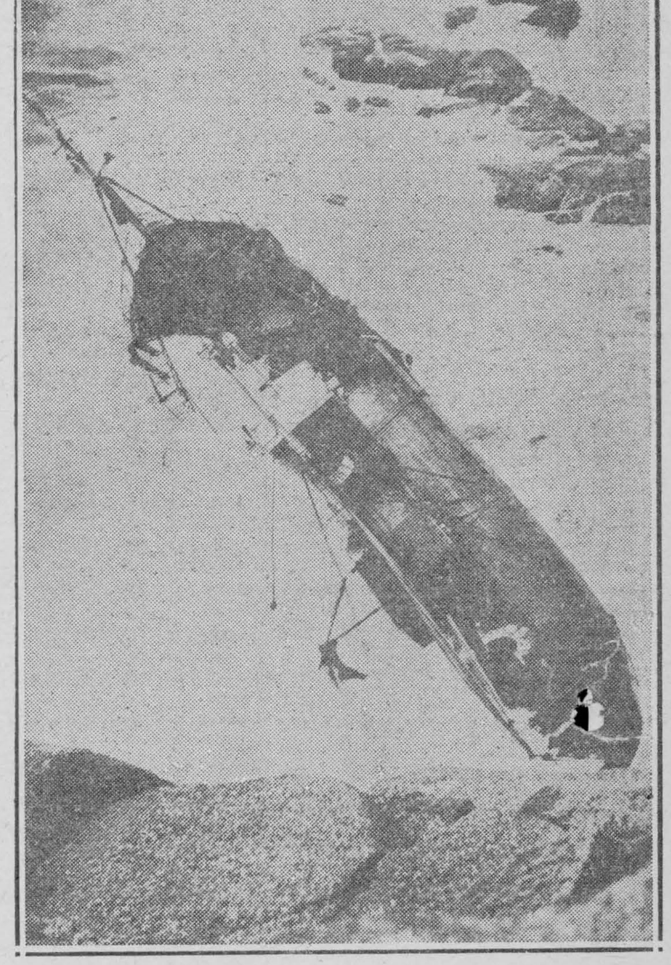

Tsetse flies do not lay eggs; they bring forth living larvae.

You May Be Skeptical, But——

You've laughed at the idea of a hare chasing a hound, but here's irrefutable proof of an otter-hound paling up with his traditional enemy the otter. While hunting with the Bure Valley otter hounds near Aylesham, Norfolk, En.g,, Miss E. Townsend caught the young otter which she reared with the aid of a baby's feeding bottle. Named Perdita, it is now a household pet, and follows her about like a dog. Perdita's greatest pal is an old otter-hound—but the young otter is "boss," and chases the old dog sometimes. The strange pair are seen here taking a stroll on the beach with their mistress.

Sea Beats Its Prey

Angry seas seethe and hiss at they roar across the deck of the Belgian trawler, Pierge Marie, which was flung against cliffs at Lamorna, Cornwall, England, in recent gale. Four of the crew were drowned.

HER HANDS WERE ALL OUT OF SHAPE

In Grip of Rheumatism for 15 Years

Here is a letter which shows the value of persevering with Kruschen:—

"For about two years I hardly went out, it was such a painful effort to walk owing to rheumatism. My hands and feet were the worst affected. I was unable to walk without a cane. I read so much about Kruschen, I decided to try it. I was three months before I felt any better, but I kept on and since then I have been fine and never used the cane. My hands were all out of shape, but they are almost normal now. Of course I could not expect to get better all at once, as I had suffered for 15 years before I started on Kruschen."—(Miss) A. L.

Rheumatism is frequently caused by an excess of uric acid in the blood. If you could see how Kruschen dulls these uric acid deposits, then dissolves them away altogether, you would agree that the Kruschen treatment should bring relief in cases of rheumatism.

Points Out Need Of Reforestaton

Farmer Outlines Benefits of Proper Tree Planting

SIMCOE—What is all this about "conservation?" What has reforestation and tree planting to do with floods, drought and soil erosion? Answers gathered from prominent men in Norfolk County, where reforestation has gained considerable headway, go far to answering these questions.

Monroe Landon, Norfolk County Chamber of Commerce, chairman considered conservation from its economic and aesthetic side.

"All objective of a reforestation scheme are not yet clear," said Mr. Landon, "Life today is a survival of woodland environment. That environment requires moisture. Forces interlocked to provide mutual helpful effects until we destroyed our forests. Rivers irrigated the land, trees stored up water in swamps so that rivers flowed evenly. Trees provided bird protection; birds in turn ate insect pests which migh otherwise have destroyed the trees. The whole program of nature interlocks. We sh teach this inter-locking picture of our children in the schools."

"We don't know enough about trees," he added. He went on to point out that few took advantages of robins' preference for mulberries to cherries. A few mulberry trees in a cherry orchard would attract the birds and let the cherries ripen in peace.

"Farmers would be better off with smaller fields surrounded by hedges," sa I Mr. Landon. He pointed out that edges provide protections to insectivorous birds and keep down soil erosion from winds; the few extra feet occupied by a hedge as compared to a fence would be amply repaid by other benefits derived.

Reforestation was held out as means of providing winter agricultural employment. Men could work in the woods during winter months. Forests would retain moisture to even upstream flow and promote propogation of game fish, which in turn would attract tourists. Municipalities should be interested in reforestation as a means of increasing property values.

The Assessment Act, said Mr Landon, was an injustice as far as reforestation was concerned.

The forestry taxation was begun when it was desirable to have land cleared and in the days when a small amount purchased valuable timber from which revenue could be derived. Trees are taxed for 40 years their crop life.

'Municipal Drainage Act needs looking into," he said. According to law a man with swamp land could demand that his neighbour provide him with a outlet so that he could drain his swamp, thereby destroying the thing which irrigated against drought.

What to do about it all? Mr Landon said consideration might be given to legislation which would zone the province and provide a forester for each zone. Regulations could be made which would require permission before trees were cut; and replacements should be made in most cases.

The Norfolk Chamber of Commerce president has taken only part of his ideas from books. Much of his information on nature science has been gained first hand. He has a case filled with thousands of botanical speci collected by himself.

His two greenhouses are his hobby. Here, one is surrounded by strange plants. Bananas have grown here. Bougainvillea, a Mexican red-flowering vine, was in full bloom a few days ago. Mr. Landon displayed a monstera deliciosa, strange palm-like plant, with weird roots which branched off into snakey tendrils.

Besides farming, including raising of purebred stock, Mr. Landon goes in for nature study photography and wood carving.

"Glass Boot" Saves Limb

London Teacher — Used in Moose River Mine Disaster

London, Ont.—One of sience's latest contributions to the medical world, the glass boot, is credited with saving Fred Kirkpatrick, London Technichal School teacher, from losing his leg and possibly his life.

The glass boot gained world-wide prominence after the Moose River disaster. One was used on Alfred Scadding after he had been rescued from the mine and medical authorities believe it saved his leg.

Victoria Hospital officials decided to purchase one, and it arrived here just in time to save Mr. Kirkpatrick's leg. At first it was feared the leg might have to be amputated, but instead the glass boot treatment was tried. Medical authorities believe it did the trick. Mr. Kirkpatrick was reported to be recovering satisfactorily after the treatment.

Seeks Answer to Age-old Riddle

Doctor Deals with Question "Will It Be Boy Or Girl?"

BUDAPEST.—In statistics, not biology, Dr. Bela Foeldes seeks an answer to the age-old riddle, "Will it be a boy or a girl?"

Seasons, he says, have something to do with the sex of babies. The surplus of boys over girls for example, is greatest among births in July, and least in October.

The age of parents is also to be taken into account. Of one group studied, where the father was older than the mother, there were 684 boys born to 589 girls.

When the parents were of the same age, the ratio of boys to girls was the same. When the mother was older than the father, girls were found to predominate, by a proportion of 289 to 270.

Dr. Foeldes, a former Government official, believes these figures show why more males than females are born in Europe—that is, the fathers are generally older than the mothers.

It explains, too, he thinks, why the preponderance of illegitimate are girls—in these cases, the father is younger than the woman.

When the parents are older than 35, it is contended that the proportion of boys declines, but the ratio favors male births when the parents are between 20 and 24.

Here's that Fast "Phillips" Way

To Alkalize Stomach Quickly

On all sides, people are learning that the way to gain almost incredibly quick relief, from stomach condition arising from overacidity, is to alkalize the stomach quickly with Phillips' Milk of Magnesia.

You take either two teaspoons of the liquid Phillips' after meals; or two Phillips' Milk of Magnesia Tablets. Almost instantly "acid indigestion" goes, gas from hyperacidity, "acid - headaches" — from over-indulgence in food or smoking — and nausea are relieved.

Try this Phillips' way if you have any acid stomach upsets. You will be surprised at results. Get either the liquid "Phillips" or the remarkable, *new* Phillips' Milk of Magnesia Tablets. Only 25¢ for a big box of tablets at drug stores.

ALSO IN TABLET FORM:
Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

MADE IN CANADA

PHILLIPS' MILK OF MAGNESIA

BUY Ryders' SEEDS ... they're right!

No name stands higher amongst gardening experts

To make certain of results buy seeds with a reputation — Ryders'! Then you will get double-tested seeds at reasonable prices from a firm with a 70 years' reputation.

Great Coronation Year SEED BOOK!

Write today for a FREE copy of Ryders' latest and greatest seed book. 122 pages. Unique novelties. Old favourites. Practical advice.

Dept. WP 2, P.O. Box 2454, Montreal. Orders for seeds must be sent direct to:—Ryder & Son (1920) Ltd., Seed Specialists, St. Albans, England.

HAVE YOU HEARD

Minister — "I have never christened a child who has behaved so well as yours."

Mother (beaming) — "I have been getting him used to it with the watering can for the past week.

The way of the transgressor is very rough and rocky. But he will never be lonesome for lack of company.

First Hobo — "Whad-deya say, lets go to the college and get a free shave"

Second Hobo — "No, thanks, I'm afraid that fella who shaved me last time hasn't graduated yet."

If a sedentary worker spends his leisure time in walking he will need an additional fifty-seven calories per mile; half a pint of milo ale will provide him with that amount of energy twice over — Dr W. F. Christie in "The Practitioner." But it does not follow that if you drink ten pints you'll be able to walk forty miles.

The exciting feature about marriage is that every day holds forth the possibility of some new disagreement.

THANKFULNESS

I'm thankful for the dawn of day,
For useful work and buoyant play;
I'm thankful for the faith of friends,
For humble heart that condescends.
I'm thankful for the trees and the flowers,
For sapphire seas and cooling showers;
I'm thankful for the world of books,
For chanting birds and purling brooks
I'm thankful for the sun at noon,
For silent stars and crescent moon,
I'm thankful for the gift of prayer,
For blessings I can freely share.
I'm thankful for the right to live,
For daily chance to serve and give,
I'm thankful most to God above
For His protecting, perfect love.
—Grenville Kleiser.

The difference between a turkey and a tax-payer is that the turkey gets it in the neck only once a year.

Hamilton — "Jim, what did you call your mother-in-law after you got married?"

Jim — "Well, for the first year I addressed her as "Say," and after that we called her "Grandma!"

Salesman — "Where is the manager's office?"

Stenographer — "Follow the passage until you come to the sign that reads 'No Admittance.' Go upstairs till you see the sign: "Keep Out." And then follow the corridor until you see the sign: "Silence." Then yell for him."

Gas From Clover To Help Farmers

Young Scientists Tell of Discovery Made of Cheap Fuel

NEW YORK.—Two young men, graduated last June from Macalester College, St. Paul, Minn., arrived in New York to tell about new process for manufacturing illuminating gas from clover which they discovered as youngsters of 1 and 20 years old. They are Harold A. Ohlgran, 23, now an assistant in the physics department of the University of Minnesota, and William H. Mahle, who is doing research in chemical engineering.

At an interview the two inventors discussed their plans for bringing the farmer all the comforts of city life by means of three acres of clover. It would, they estimated, cost $26 a year for cooking and heating after an initial outlay of $500 for the apparatus which converts clover into gas.

Ohygran and Mahle told of the problem their chemistry professor had given them as freshmen. An attempt to extract pyroligenous acid from cellulose was so great a failure they reconstructed all their apparatus and then discovered all they were obtaining was gas. For three years they worked on their discovery and, in the course of it, discovered a new method of extracting gas from coal which they believe is cheaper and yields larger amounts of gas than the present method.

"It's really just an improvement," said Mahle. "Under the present system one ton of coal yields 13,000 cubic feet of gas at 500 British thermal units per cubic foot. Our process gets 18,000 cubic feet at 800 British thermal units. The essential difference lies in the fact that we completely break down all volatiles, including tar and oils, which are residues of the present process, into a permanent fixed gas."

Although Ohlgran and Mahle estimate that they will need $15,000 to start production of their clover-gas machines on a small scale, they are experimenting with the application of their discovery to other than stationary machines. At present they are working on the bottling of their gas under pressure so that it may be used on tractors and automobiles. "In that case the pistons and the stroke will have to be longer," Ohlgran pointed out, "but we fixed up a car in Minneapolis and ran it for less than a quarter of a cent a mile."

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

Botanists Serve Public of Canada

Advice On Plant Disease, Insects Given by Department

Like every other branch of the Dominion Department of Agriculture, the plant pathological service of the Division of Botany is at the disposal of the people of Canada, particularly farmers. In addition to the practical and research work of the Division, assistance with reference to plant diseases is given to individuals through personal correspondence which may be addressed to the Dominion Botanist, Central Experimental Farm, Ottawa, or to the officer in charge of the Dominion Plant Pathological Laboratories, respectively, at Charlottetown, P.E.I., Kentville, N.S.; Fredricton, N.B.; Ste. Anne de la Pocatiere, P.Q.; St. Catharines, Ont., Winnipeg, Man.; Saskatoon, Sask.; Lamonton, Alta.; Summerland, B.C.; and Saanichton, B.C. Letters and packages of specimens of plants, if below 16 ozs. in weight, addressed to the Dominion Botanist at Ottawa, may be sent free by mail.

For advice on destructive insects and pests, communications should be addressed to the Dominion Entomologist, Dominion Department of Agriculture, Ottawa.

Generous But Foolish

A Pennsylvania manufacturer, Harvey Gravell, marked the beginning of the year by paying off all the debts owed by his employees so that they could start the New Year owing no man, comments the Stratford Beacon-Herald. Mr. Gravell subscribes to the axiom that it is his employees who make his business successful, and that it really paid him to have happy workers because they gave better service, therefore, he was really making a good investment by paying off their house mortgages, car debts, grocery bills and the rest. He paid one debt of $7,000 and another of $6,500 and many smaller sums. To those who were not in debt, he gave small sums of money, as low as $10, according to length of service.

Mr. Gravell's theory is right that a man who has no debts pressing upon him makes a good worker because he has no worries, but his own generosity is a bit distorted. If he made the shiftless workers— some would have been just unfortunate—happy he would quite likely by the same action make the fellows who had scraped to pay their obligations as they went, discontented. They probably denied themselves things they might have bought for their own or their family's convenience and pleasure. But they cut their coats according to their cloth and because they could not afford certain things they went without. Now they find they might just as well have had everything they fancied because their employer would have paid the bills. There will probably be a good deal of grumbling around the Gravell factory.

Charity is a good thing, but it has to be handed out with great discrimination and care.

Further discoveries have been made near the Sphinx, including another stele—an upright slab or pillar—inscribed with hieroglyphics giving interesting information about the Sphinx, and two dainty feet on a pedestal.

Along Canada's Mining Highway

One of the best mediums for the conservatively minded, for participation in the developments along Canada's mining highway, is through the holding companies.

Ventures controls excellent mining enterprises in Quebec, Ontario and Manitoba, and has important interests in the North West areas. Premier Gold has, in addition to British Columbia and Ontario interests, a very important investment in Australia.

Towagmac Exploration has interests in copper, silver, gold, lead and zinc, through its important holdings in Aldermac Copper, Francoeur Gold and Lake Geneva Mines.

Royalite is a safe medium among the oil holding companies.

Market interest, however, is still concentrated on the developing gold properties. The public memory is still fresh with the spectacular movement in Moneta shares, following diamond drilling results. Federal Kirkland, with one drill started and a second ready to begin, is being watched with great interest. The proximity of its adjoining neighbors—Sylvanite, Toburn and Continental Kirkland is the reason. Jellicoe — in the Little Long Lac Camp — has reported what promises to be a very interesting development, according to diamond drilling indications. Its rich ore discovery is of importance, not only to Jellicoe, but promises much for Bankfield and Magnet Lake.

Hutchison Lake should provide market news at an early date. Shaft sinking is nearing the first level. Smelter Gold should provide news from its diamond drilling campaign already started.

Underground work on the Kerr Addison and Martin Bird properties in the Larder Lake District of Ontario is creating a big public following for these issues.

In the Quebec Field, Francoeur Gold, Astoria Rouyn, Dempsey Cadillac, Powell Rouyn and Rouyn Reward are likely to provide important mining news.

In the Oil fields the important development has been the formation of the Brown Oil Corporation with finances provided by Eastern capital. The Company is financed to drill three wells on the west flank of Turner Valley. The Company's holdings are regarded as proven acreage. Pacalta Oils is expected to start drilling operations in the Wainwright field a an early date. The Company's Alberta Oil leases approximate 17,480 acres.

Difficulties of British Films

The motion picture industry in the British Isles is confronted with difficulties, observes the Galt Reporter. It lost $10,000,000 last year and three independent concerns have been forced into receivership. Liabilities of three companies are said to total $3,000,000.

The critcism of the motion picture business in Britain refers to fantastic salaries, attempts to turn our colored masterpieces, and competition with Hollywood in world markets. It is said that the future of the business is not promising unless drastic changes in policies are undertaken.

It would appear to be a difficult task to bring the motion picture down to earth because of the superlative traditions associated therewith. In the American field, it is the custom to exaggerate in every detail relating to pictures. The word colossal is worn thread bare in describing productions and the idea gets into all the accessories. It is habitual to brag about the salaries paid the people who, in many cases, by freaks of luck, have been able to create a public impression. It is not infrequent that a restaurant dish-washer becomes the toast of the picture stage. That is not exactly in line with the British conception of sound business. In trying to imitate something in which they have not genuine confidence, the Britishers find that they are running up a blind alley. They would be well-advised to change their tactics to conform with the conditions and demands that are characteristic of their own country.

LOCAL AND GENERAL

Born—At Cornwall General Hospital, on Tuesday, Feb. 2, to Mr. and Mrs. Harold E. Swerdfeger, a daughter.

* * *

Word has been received that Mrs. Aaron Sweet, who left for Florida a short time ago, has arrived safely. Mrs. Sweet is remaining for some time as a guest at the Gray Moss Inn, Clearwater, Fla.

* * *

Mr. and Mrs. J. H. Wiggins left on Monday for Lindsay where they will join Dr. and Mrs. Laidley and the party will go to Florida to spend the remainder of the winter.

* * *

Yesterday afternoon, as Lorne Thompson, of Morewood, was working in the sand pit on the Dagenais farm, a sudden slide of gravel and frozen earth caught him before he could jump clear, breaking his left leg near the ankle.

* * *

Stanley Burtenshaw, 26, of Mille Roches, was electrocuted Saturday night when he came in contact with two terminals of a 550-volt circuit at the Mille Roches plant of the Provincial Paper Mills, Limited.

* * *

By order of the Medical Officer of Health the Board of Education closed the Public Schools in Morrisburg on Monday last. They will be reopened on Monday next. More than one-third of the total attendance were absent with the flu.

* * *

George Bernhardt, Oswego's oldest resident, yesterday celebrated his 104th birthday. He came to Oswego from Iroquois, and up to the time of his 94th birthday, he said, he worked every day. Yesterday, though, he was content to sit by the fire and tell tales of the gold rush of 49.

* * *

Donald Coons, infant son of Mr. and Mrs. Dalton Coons, Toyes Hill died yesterday morning. He is survived by his parents, two sisters, Lois and Elaine, and one brother, Lawrence, all at home. The funeral will be held from the family residence today (Friday).

* * *

While working in a bush near his home yesterday afternoon, Norman Porteous of Ormond tripped on a log and hit his head on a tree, resulting in a fractured bone at the base of his skull. He was removed to his home where medical attention was given by Dr. J. J. McKendry of Winchester.

* * *

Standing 300 feet below the Atlantic's surface on the hulk of the Lusitania, Captain John Craig will broadcast to North America May 7, the 22nd anniversary of the liner's sinking by a German submarine with a loss of 1,198 lives. The program will mark the climax of salvage operations begun after the wreck was located in October 1935.

* * *

Mr. and Mrs. Charles C. Stubbs, of Morrisburg, wish to announce the marriage of their daughter, Sarah Doris, to Dr. H. E. D. Bateman, on October 12th, 1935, at Metropolitan United Church, Detroit, Mich., by Dr. M. S. Rice. Dr. and Mrs. Bateman will reside in Cornwall.

* * *

Reginald Ewart, of Prescott, is in St. Vincent de Paul Hospital, Brockville, with a fractured skull, victim of a highway accident. The light delivery truck he was driving east of Prescott turned over on the road. Other occupants of the truck suffered minor injuries.

* * *

Mrs. Lucy I. Phillips, a highly esteemed citizen of Morrisburg, died at her home on Monday morning following a lengthy illness. Her husband predeceased her in 1918. She was a daughter of the late Mr. and Mrs. David Melvin Hall. The funeral was held from her late home on Wednesday at 2 p.m. to St. Pauls Lutheran church, where Rev. Garlung conducted the service.

* * *

The funeral of Floyd Tousaw who died on Monday, was held on Wednesday afternoon from his late residence to the United church at Mountain Station where the service was conducted by Rev. W. R. Johnston of South Mountain. Deceased was born in Mountain township, a son of the late Allan Tousaw and Mrs. Tousaw and was 20 years of age.

* * *

Consideration will be given by the Fish and Game Committee of the Legislature to a proposal that the fishing season in the St. Lawrence River for small and largemouthed black bass be opened on July 1, instead of June 16. D. J. Taylor, Deputy Minister of the department, said this week that his department looked with favor on a request of this nature made by the Eastern Ontario Game Protective Association "The fish are spawned the last two weeks in June and we do not like to see their spawning beds fished out," said the Deputy Minister. "This request from Brockville is likely to receive approval from the committee of the Legislature."

The license plate color combinations chosen for the provinces in Canada for 1937 are as follows: British Columbia, black on cream; Alberta, black on orange; Saskatchewan, black on white; Manitoba, white on green; Ontario, white on military scarlet;; Quebec, white on brown; New Brunswick, white on black; Nova Scotia, lemon yellow on black; P. E. Island, black on white

* * *

Damage estimated at $500 was caused by fire in the basement of St. James United church at Avonmore early on Tuesday. It is believed the blaze originated from an overheated furnace and the flames spread to the kitchen in the church basement and also damaged the ceiling. The loss is covered by insurance.

* * *

Wm. H. Merrilees, son of Rev. Wm. and Mrs. Merrilees, Iroquois, is announced as winner of the Robert Bruce Scholarship for students in medicine at Queen's University, Kingston. This scholarship is awarded annually to second year students of Scottish extraction on the basis of their first year's work and is worth about $90.

* * *

The fine property at Iroquois known of late as the Mulloy property, was bought Wednesday last by Fred Hadley, of Montreal. The place was built by the late Philip Carman and is a fine old style stone residence with several acres of land that extend south to the bank of the St. Lawrence river and before "Trooper Mulloy" and his wife lived there it had seen several generations of Carmans. Mr. Hadley has been engaged in the hardware business in Montreal, but, on taking possession of the place, will engage in orchard work, gardening and probably poultry.

* * *

While three members of the family were in bed with influenza, fire broke out at the home of Mr. Almon Summers, Cass Bridge, about 9 o'clock yesterday morning, and before it could be extinguished had caused damage estimated at $1,000. The fire, which is believed to have been caused by overheated stove-pipe was first discovered in the upper stor-ey of the house and had gained considerable headway. Notifying the neighbors by telephone, a bucket brigade was formed and the blaze attacked by cutting holes through the roof. Before being brought under control, the upper storey of the dwelling was badly gutted by the flames, while considerable damage was done by smoke and water. Only the valiant efforts of the men who manned the buckets, saved the house from total destruction. It is understood the damage is partially covered by insurance.

* * *

The funeral took place at Iroquois last Friday, with burial at Hainsville of Diana Barkley, wife of William H. Thrasher of Brownsville, N.Y., who died in a Watertown hospital last week after a long illness. Born at Kenmore in 1896, the daughter of Hiram and Magaret Lennox Barkley, she moved to northern New York about 15 years ago, having been married at South Mountain on April 4, 1912. Surviving besides her husband are six sisters, Mrs. Gertrude Fossitt, Iroquois; Mrs. Irene Tappner, Gennen, Alta.; Mrs. Ambrose Price Baytman, Alta.; Mrs. Joseph Douglas, Watertown; Mrs. Samuel Collinson, Iroquois; Mrs. Lena Goldsmith, North Bay; four brothers, Silas Barkley, Iroquois; Sidney Barkley, Watertown; Percy Barkley, Prescott and Clayton Barkley.

ACKNOWLEDGMENT

The Morrisburg Leader gratefully acknowledges the following communication:—

"At the Annual Meeting of Knox Presbyterian church last night, the following resolution was unanimously carried:

"Moved by Geo. D. Meikle, seconded by Mr. Coby,

"That the Secretary be instructed to thank Mr. L. Laurin for his kindness and courtesy during the past year."

J. H. MEIKLE, Sec.

Applications for tuition in piano by M. Edith Armstrong, A.T.C.M., will be accepted at the home of Mrs. W. E. Boyd, Maple Street. cp

ARTHUR O. MILLER

Many relatives and friends gathered on Tuesday afternoon to pay tribute to the memory of the late Arthur Obadiah Miller, one of the most highly esteemed citizens of Leonard. Born at Williamsburg 68 years ago Mr. Miller was a son of the late Michael Miller and his wife, Julia Barkley. In 1875 he came to Clarence and later in 1903 he moved to Milestone, Sask., where his wife, Sarah James, died. In 1909 he returned to Leonard.

He is survived by one daughter, Mrs. H. Birch, Hammond; two sons, Stanley of Sarsfield, and Arthur Leonard; one brother, George, at Willows, Sask., and four sisters, Mrs. H. Chapman, La Rivere, Man. Mrs. W. Kinsella, Hammond; Mrs. C. Empey, Bourget, and Mrs. D. Yandon, Hammond. He is also survived by eleven grandchildren.

The funeral was held from his late residence to Hammond church where Rev. Franklin Clarke of Bearbrook and Rev. G. Patterson of Vars conducted the service. Interment was in the adjoining cemetery.

FINED FOR ILLEGAL USE OF FIREARMS

Two Embrun men were charged with having firearms without licenses, while one faced a charge of obstructing a police officer, when they appeared before Magistrate P. C. Bergeron, of Cornwall, in Dundas County Court in Winchester, Monday. Magistrate Bergeron presided due to the illness of Magistrate John McCormick.

Jeremie Emard of Embrun, was given suspended sentence of one year for interfering with a police officer, and was fined $10 and costs for using a firearm without a proper license. In default of payment he will spend 15 days in jail.

Jerry Brisson, of Embrum was sentenced to pay $10 and costs for using firearms without license or 15 days in the county jail.

Donald Garrison, of Ottawa, $10 and costs of $4.70 for not having license plates on a motor vehicle, and $2 fine and costs of $3 for failing to produce an operator's permit.

Earl Bowman, Winchester, for failing to report an accident, $10 and costs of $2.25; for negligent driving, $10 and costs of $2.25, the fine in the latter case being suspended for thre months.

WELLS—MERKLEY

A very pretty wedding was solemnized at the Cosy Corner, Williamsburg on Tuesday, February 2nd at 6.30 o'clock, when Rev. C. A. Adey united Mrs. Mary Christina Merkley and Mr. Franklin Peter Wells of Hoasic, in marriage. The bride and groom were unattended.

The bride entered the living room to the strains of the bridal chorus by Lahengrin, played by her daughter, Mrs. Charles W. McCain of Fort Covington, N.Y. A dinner was held for the immediate family following the ceremony.

In honor of cornation year, the bride wore a coronation blue crepe gown trimmed with gold and she also wore the gift of the groom, a yellow gold wrist watch.

Mr. and Mrs. Wells will reside at the Cosy Corner, Williamsburg.

UNITED CHURCH NOTES

t The debate scheduled for last Monday evening in the Young Peoples' Union was postponed because of the small attendance. The epidemic of Grippe made its inroads into our membership and the debate will be held next Monday. The debaters have put a great deal of time on their subject and all are invited to take part.

—

The three meetings held last Wednesday evening in different homes were well attended in spite of the illness of so many. In a short while similar meetings will be held. Next Wednesday the regular meeting for study and prayer will be held in the Ladies Parlor.

—

February 21st to 28th will mark a series of meetings in the United Church which will seek to give emphasis to the Evangelisation of Canadian Life. Mr. W. H. Goodwin of Toronto and Montreal will be associated with the Minister as Leaders. Further details of these special meetings will be announced later.

—

Next Sunday evening Rev. R. D. Smith will speak on the Life of D. L. Moody, the great Evangelist who was born one hundred years ago this Friday. Some of the Moody and Sanky hymns will be sung, both by the choir and the congregation.

HOCKEY NEWS

JUNIORS WIND UP SEASON

The Morrisburg Juniors came to the end of their season on Monday night at the arena, when they lost a 5-2 decision to Spencerville. The loss was the straw which broke the camel's back, for it obliterated the locals' last chance to catch a playoff berth.

Although out of the playoff picture the boys have every reason to be proud of their accomplishments this season. During the latter part of the season, they were severly handicapped by injuries and sickness. They lost three of their best players of last year's team; Eamon, Locke and Casselman, but showed plenty of good spirit and a lot of good hockey.

IROQUOIS WINS FROM CARDINAL 6—1

In a regular scheduled game in the St. Lawrence Senior Hockey League, played at Cardinal last Saturday, Iroquois defeated Cardinal 6-1, to advance them into a tie with the losers for fourth place in the league standing.

Butterworth, on a pass from Wylie opened the scoring, after twelve minutes of play in the first period. When Adams drew a five-minute penalty, midway through the second, the winners went further ahead on goals by Brouse and Wylie.

Cardinal forced the play starting the third period and kept the visitors inside their own blue line, but were unable to beat Haley,. O'Malley broke away and passed to Whittle for the fourth goal. Little saved the home team from a shutout after eight minutes. The losers kept forcing the play, but a break-away from Wylie and Pyefinch, to score, settled the issue.

The teams:

Iroquois—Goal, Haley; defence, McInenly and Brouse; center, Wylie wings, Pyefinch and Butterworth; subs, O'Malley, Bush, Whittle and Smyth.

Cardinal—Goal, Carther; defence Gamble and Adams; center, Lennon; wings, Sorrell and Little; subs. Loughridge, Kinchen, Armstrong and Lamson.

Referee, George Foster of Ottawa.

FOUR TEAMS TIED IN WINCHESTER LEAGUE

At the close of Monday night's Winchester Hockey League daubleheader, all four teams were tied in the league standing, each having a total of eight points in the eight games played to date.

In the first game Monday night, the Maple Leafs and Williamsburg played a 1-1 tie. The Leafs took the lead after three minutes' play when Art Summers took a neat pass from Lloyd Kenny and beat the Williamsburg goalie on a hard shot. Jack Sutton, assisted by Mel Whittles, got the equalizer for Williamsburg early in the third period. The game was fast from start to finish.

Nation Valley Loses

In the second contest Bezzin's came from behind to defeat the league-leading Nation Valley squad 3-2. Jack Elmsley and Andy Williamson put the Valley team two up in the first and second periods, but timely goals by Don. Rowat, Dave Melvin and Wilfred Lannin gave Bezzin's their margin of victory.

The teams:

First Game

Williamsburg—Goal, Corry; defence McIntosh and Marcellus; center, Barkley; wings, Sutton and Casselman; ;alternates, Hutt, Whittles, Soucie and Smith.

Maple Leafs—Goal, Williams; defence Cameron and MacLean; center, Kenny, wings, McDonald and Summers; alternates, Wylie, Carkner, Dixon, Cross and Stuart.

Second Game

Bezzin's—Goal, Coons; defence Quart and Boyd; center, Hullquist; wings, Lannin and Melvin; alternates, Curtis, Rowat and Hutt.

Nation Valley — Goal, Steinburg, defence, Smith and Williamson, center Elmsley, wings, Gordon and Marcellus, alternates, D. Munro, Shay A Munro and Moore.

Referee—Melvin Scott.

SPENCERVILLE WINS FROM PRESCOTT 3-1

Spencerville defeated Prescott 3-1 in a Junior Hockey League game on Saturday last in the Spencerville Arena, to retain their playoff hopes.

Tripp and Pelton were outstanding for the locals, while Bowers and Barton turned in a good game for Prescott.

Baker scored two goals, with Lawrence and Anderson each netting one for the home team. Francis scored the visitors' lone goal.

SMITH—HENRY

Awedding of much interest was solemnized at the home of Mr. and Mrs. Arthur Henry which was tastefully decorated. on Saturday, January the 30th 1937 at 12 o'clock. Miss Lola Winnifred, youngest daughter of Mr. and Mrs. Arthur Henry of Aultsville was united in marriage to Mr. Harry J. Smith, son of the late Mr. and Mrs. Henry J. Smith of 101 Holmwood Ave., Ottawa. The ceremony was performed by the Rev. M. C. Pritchard of Carleton Place. As the bridal party entered the drawing room, Lohengrin's wedding march was played by Mr. William Cunningham of Cornwall. Given in marriage by her father, the bride looked picturesque in a gown of rich Royal blue, triple sheer beaded crepe. She carried an arm bouquet of carnations and maiden hair ferns. The bride was attended by her sister, Mrs. Alex. Smith who was gowned in grey ripple crepe and wore a corsage of temple roses. The groom was attended by his brother, Mr. Alex Smith of 1010 Bank St ,.Ottawa Immediately after the ceremony a very dainty buffet lunch was served to the immediate relatives of the contracting parties. After this the bridal pair left amid showers of confetti and the good wishes of their many friends on a trip to Toronto, Niagara Falls, Buffalo and other points in the States. The bride travelled in a coat of rich black fur pony with accessories to match. On their return they will reside at the groom's home at Ramsyville, Ont.

IN MEMORIAM

In loving memory of Wm. Beckstead, who passed away on February 11th, 1936.

We oftimes said we'd miss you
Those words have proved too true;
We lost our best and dearest friend
Dear dad, when we lost you.

Sadly missed by his wife and family.
