MORRISBURG — ONTARIO

ELIJAH ALEX. STRADER

Elijah Alexander Strader, a well-known and respected citizen of Matilda died very suddenly at his home on Monday, March 17th, 1924, of heart trouble. News of his death came as a shock to a large number of friends and acquaintances among whom he was highly esteemed.

Mr. Strader was born in Matilda on December 19ht, 1853 and was united in marriage to Miss Eva Hanson of Matilda on January 7th 1877.

He leaves to mourn his loss his widow, three daughters, Mrs. Mary McIntosh of Morrisburg, Mrs. Clinton McIntosh of Toronto, Mrs. Geo. Beckstead of Massena, N.Y. and two sons, Stanford of Massena N.Y. and Bernice at home, also one brother, Harris of Morrisburg.

The funeral was held Thursday morning at 10.30 o'clock from his late residence to the Lutheran church, Williamsburg. The service will be conducted by the pastor the Rev. T. Isler.

Sincere sympathy of friends and neighbors is extended to the bereaved.

DR. HOWARD V. MORGAN

At the age of 70 years and two months, there passed away in Aultsville, at the home of his brother, John, where he had been confined to bed for over a year and a half, Dr. Howard V. Morgan. The deceased was a son of the late Nelson Morgan of Aultsville, and for over 30 years practiced his profession at River Beaudette, and was held in high esteem by the people of that community. He was unmarried. He leaves to mourn his loss three brothers, Wellington of Crossfield, Alta., Frank of Winnipeg, and John at home; and two sisters, Mrs. J. Carrigan of Toronto, and Mrs. (Dr.) Service of West China.

The funeral took place on Monday March 17th, from the residence of his brother, John, to the Methodist Church and Aultsville cemetery. Rev. A. W. Stewart of Aultsville conducted the services.

Among relatives present from a distance were: Mrs. W. Flynn and Mrs. I. Markell of Montreal; Mr. S. T. Loucks and A. Winters, Montreal, Colin McPherson, J. D. McVickie and Henry Baker of Bainsville, and J. LeBlanc, Wales formerly of River Beaudette, Mrs. E. Mattice of Lunenburg. The members of Farran Point Lodge No. 256 A.F. & A.M., attended the funeral in a body. The floral tributes which were many, included a pillow from brother John and family, wreaths from Mr. and Mrs. J. Harris, Toronto; Mr. and Mrs. Wellington Morgan, Crossfield, Alta.; and Farran Point Masonic Lodge. To the bereaved relatives, the deepest sympathy of the community is extended

WILLIAMSBURG COUNCIL

The Council met at Williamsburg on Saturday, March 15th, 1924. Members all present. Minutes of last meeting read and adopted. A bylaw was passed appointing the following officers for current year.

Fence Viewers—

Isaiah Fetterly, Merton Saddlemire, Wm. Thompson, Geo. A. Fetterly, C. W. Brown, Jesse I. Casselman, Wm. Wallace, Melvin McIntosh Geo Carlyle, Arthur Beckstead and Jefferson Swerdfeger.

Sheep Valuators—

James Salmon, Clarence Baker, Geo. A. Fetterly, Miles Marcellus, Mahlon Beckstead, Geo. Hill, Howard Merkley, J. D. Dain, John M. Casselman, Durham Wells, Hugh McIntosh.

Pound keepers—

Div. No. 1—Lee Deeks; 2, Rufus Casselman; 3 Miles Cramer; 4 Jesse I. Casselman; 5 G. C. McKenzie; 6, W. A. VanAllen; 7 Isaiah Fetterly; 8 Abram Bailey;; 9 Geo H. Merkley, 10 John M. Casselman; 11 Leonard Barkley; 12 Frank Casselman; 13 Charlie Price; 14 C. H. Casselman; 15 Chas. Hart 16 Reuben Mattice; 17 Rube Hunter; 18 Adam McHaffie; 19 Simon Swerdfeger; 20 R. O. Gallinger; 21 John Warren 22 Thos. Casselman; 23 Alfred Hall; 24 Frank Hess; 25 Geo. Cramer; 26 Thos. Deeks 28 Elgar Casselman; 29 Jacob Whitteker; 30 Frank Wells 31 Elgin Herriman; 32 James Gow; 33 Wesley Dawson; 34 Abram Hess; 35 Edgar Alguire; 36 Henry Garlough; 37 John Weegar; 38 Iden Whitteker; 39 Rube Carkner; 40 Howard Merkley 41 Lyle Thom; 42 Peter Droppo; 43 Lemuel Dillabough; 44 A. H. Beckstead; 45 Orrin Casselman; 46 Geo. Carlyle; 47 Harvey Dillabough 48 Peter Merkley; 49 Geo. Cunningham; 50 Osborne McMillan; 51 John Barkley; 53 Isaiah Whitteker 54 Iden Merkley; 55 Geo. Casselman; 56 Calvin Gallinger; 57 Wm. Carr; 58 Mason Robinson 59 Geo. Hess 60 Sam. Swerdfeger; 61 Ezra Garlough.

All officers must take the oath of office before acting.

The Council adjourned to meet again at Williamsburg in Froats Hall on Saturday, April 19th, 1924. at one o'clock p.m.

M. S. BECKSTEAD, Clerk.

OH SAY

Did you hear the Radio Concert at Hartley's Ice Cream Parlor, Canal street, Saturday night. It was great.. He is having them every Saturday evening.

AULTSVILLE BRINGS HOME HOCKEY CUP

The Aultsville team were successful in winning the cup at the final hockey match played on the Cornwall rink between Aultsville and Mille Roches last Friday night. The triumphant crowd brought the cup with them and all the residents knew they had won when they arrived. The celebration began at the station on the arrival of the 10 p.m. train and continued until they were all home and settled for the night. The cup is a beautiful one and is on exhibition in C. S. Ault's large glass show case.

FISH AND GAME CLUB ACTIVE

At a meeting of the Morrisburg Fish and Game Club held Thursday night, the membership was reported as numbering 59. During the evening three more were added.

The Secretary was authorized to write the Ontario Department of Game and Fisheries, recommending that the years 1924 and 1925 be declared a close season for Pheasants in this locality. The reason being that the birds are not yet numerous enough to be hunted.

The department will also be asked to furnish a permit to one local man for netting suckers and mullets, operations to be conducted under the supervision of local game inspector.

It was decided to apply for 15 settings of Pheasants' eggs for distribution to members of the Club.

The Club appreciate the kindness of Mr. Springstead in allowing them to meet in the Agricultural Office.

TAXES

Tax the people, with care,
To help the multi-millionaire.
Tax the farmer, tax his fowl.
Tax the dog, and tax his howl.
Tax the hen, and tax her egg,
And let the bloomin' mudsill beg.
Tax his pig, and tax its squeal,
Tax his boots run down at heel;
Tax his horse, tax his lands,
Tax the blisters on his hands.
Tax his plow and tax his clothes,
Tax the rag that wipes his nose,
Tax his house and tax his bed,
Tax the bald spot on his head.
Tax the ox and tax the ass,
Tax his "Henry", tax his gas;
Tax the road that he must pass,
And make him travel o'er the grass.
Tax his cow, and tax the calf,
Tax him if he dares to laugh,
He is but a common-man,
So tax the cuss just all you can,
Tax the lab'rer, but be discreet—
Tax him for walking on the street.
Tax his bread and tax his meat,
Tax the shoes clear off his feet.
Tax the payroll, tax the sale,
Tax all his hard-earned kale;
Tax his pipe, and tax his smoke,
Teach him Government is no joke.
Tax their coffins, tax their shrouds,
Tax their souls beyond the clouds,
Tax all business, tax the shop,
Tax their incomes, tax their stocks;
Tax the living, tax the dead,
Tax the unborn before they're fed.
Tax the water, tax the air,
Tax the sunlight if you dare.
Tax them all and tax them well,
Tax them to the gates of hell,
But close your eyes, so you can't see
The coupon-clipper go tax free.

RADIO SERMONS

With the radio stations broadcasting church services thousands of church members are doing their Sunday sleeping at home. People who used to call in person for them every Sabbath are demanding that their sermons be served them in bed.

In the old days a Christian was a man who got up at 5 o'clock in the morning, hitched up the horse and drove 10 or 12 miles through the snow with his family to church. Today he remains coiled in the quilts and tunes into whatever church has the best musical program

Ask what church they belong to and they can't tell you off-hand whether it's the First WEAF the reformed KDKA or the Interdenominational WJZ. They don't know for certain whether they are by faith Weafodists, Wjzopalians or Kdkaolics.

The one question really agitating churchmen today is whether to build more churches or more radio stations. Whether to turn out more ministers or more copper wire.

FOR SALE

We have for private sale, on or before April 1st, the following.

Chesterfield suite, large size, tapestry-covered, marshall cushions.

One tapestry rug 9x12 ft.

One tapestry rug 12x18 ft.

White enamel kitchen cabinet.

One iron bed with matress and springs.

White enamel dresser with tripple mirrors.

Congoleum rug, Gold Seal, 9x12.

Sewing machine, Barnet Refrigerator, "Coles" coffee grinder, two Quebec Heaters with grates. One dining-room suite, 9 pieces. bicycle, leather couch, copper boiler and several other articles.

F. E. DEEKS.

ACCLIMATIZATION OF VARIETIES OF GRAIN.

It is quite commonly believed that any variety of grain when grown in a given district for a number of years, gradually becomes more and more suited to the conditions of that district. While this may be true in the case of plants which naturally cross-fertilize, such as most of the grasses and clovers, it is not true to the same extent in the case of such plants as wheat, oats and barley, except possibly where mixed varieties containing different strains are grown. In nature, acclimatization takes place as a result of natural selection. The vagaries of soil and climate gradually weed out or weaken those strains which are less suited to survive, whereas the stronger strains increase in proportion.

Since varieties differ greatly in their ability to thrive under different conditions of moisture, temperature, physical condition of the soil, it is highly important from a practical standpoint that the farmer grow the variety which is best suited to his conditions. This variety can be located only through comparative tests of different varieties sown in adjoining plots in his district. After two or three years' careful testing, it should be possible to choose the variety which seems to give the most promise. If this variety is what is known as a *pure line*, by which is meant a variety composed of a single strain, it is not likely that so called acclimatization will take place to any appreciable extent. If, on the other hand, a variety should happen to be a composite one, that is, composed of two or more strains of varying adaptabilities, it is quite possible that acclimatization may take place by the gradual increase in the proportion of plants belonging to the best adapted strain.

It was once thought that acclimatization takes place in a fairly definite manner in the case of practically all plant life and that any variety might, in the course of time, become especially suited to the conditions under which it was grown. That this point of view was incorrect has been clearly demonstrated during recent years, and farmers would be well advised to depend more upon comparative tests of different varieties rather than upon the time-worn theory that sorts grown in a district for many years must inevitably be superior to any new introduction.

Farmers desirous of comparing a few of the best varieties of grain of any kind are invited to communicate with the Cereal Division, Experimental Farm, Ottawa, for advice as to how to proceed. The above institution is anxious to co-operate with farmers in different districts in this work as it realizes that the soil and fertility conditions on a given farm may differ to a very considerable extent from the conditions under which varieties are tested at the Farm at Ottawa. In other words, varieties which do not do particularly well at Ottawa might be most desirable to grow under certain conditions met with on a given farm some distance away.

Where a farmer does not wish to take the time to conduct a comparative test of different sorts on his own farm but would like to have the variety he is growing compared at the Experimental Farm at Ottawa with the varieties grown at that institution, the Cereal Division will be glad to receive from him a one-pound sample of his seed. The sack containing this sample should bear the grower's name, the variety name, and the number of years the seed has been grown on his own farm. A report on the relative performance of the varieties sent in for this test will be sent the farmer in due time.

TUBER UNIT SEED PLOTS FOR POTATOES.

In many sections of the country where seed potatoes are produced, the growers have found the advantage of having their own seed plots. A comparatively new method of planting these is the tuber unit system, i.e., all seed pieces cut from the same tuber are planted consecutively.

The tubers should first be graded for uniformity of type and size, using tubers from 5 ozs. to 8 ozs. in weight free from visible symptoms of disease. The plot of ground to be used should be well isolated from other potato fields. When this is ready to plant, the tubers (previously treated if desired) are taken to the field and cut as they are being planted. The seed pieces from each potato are planted consecutively, leaving short gaps between the groups of hills from each tuber. Stakes may be used to separate the units, but the majority of growers who practice the method prefer to leave a gap equivalent to a "miss."

When the plants are about eight inches high they are carefully inspected and where one or more plants in a unit are found affected with mosaic, leaf roll, spindle tuber or other seed-borne disease, the entire tuber unit is rogued—every hill planted from the one potato. Care should be taken in all rogueing to remove the entire plant. The plots are inspected two or three times during the season, and all undesirable plants removed.

The extra amount of time involved in planting tuber unit plots is well worth the trouble when a grower has a good strain of potatoes and wishes to get them as free from disease as possible. The most important advantages of this system of planting over the usual method are that all seed pieces from a diseased tuber are together and may be readily rogued and that selections for trueness to type and yield may be made by harvesting each unit separately. Moreover the chances of spread of degeneration diseases are reduced to a minimum on account of removing the entire unit, whether or not each plant from that unit shows disease symptoms at the time it is rogued.

This system is being used by a number of seed potato growers in other parts of the continent. It has been found far superior to the old methods of planting seed plots as mosaic, leaf roll, spindle tuber and other degeneration diseases can be more readily eliminated. There are many strains of high-yielding varieties of potatoes that should be planted for one or two years at least in tuber unit plots in order to eliminate degeneration diseases and bring them into good condition for certified seed.

Any grower desiring assistance in preparing a tuber unit seed plot may obtain such by applying to the nearest Dominion Laboratory of Plant Pathology.

POULTRY

When the chicks are a few days old—from two to five days—they should be given access to a good chick buttermilk starting mash, and when about three weeks old this may be changed to a buttermilk growing mash. There are many excellent commercial rations of this kind on the market. Should you desire to mix your own mash feed, the following formula has given excellent results: Thirty pounds of wheat bran, ten pounds of wheat middlings, ten pounds of ground hulled oats, ten pounds of oil meal, ten pounds of corn meal, ten pounds of gluten feed, ten pounds of meat scrap and ten of dried buttermilk.

The buttermilk mash should be fed in hoppers or feeding troughs so arranged that the chicks will not waste the mash, but so that they can have access to it at all times. Begin to feed the mash sparingly until the chicks get used to it. Keep sour milk or semisolid buttermilk before the chicks throughout their growing life.

HORSE

Alfalfa is a splendid horse feed, but must be fed with judgment and care. Because of its palatability, mature horses are likely to eat too much alfalfa if permitted to have free access to it. The average farm horse at work is allowed to eat much more alfalfa and other roughage than he really needs to maintain his weight.

One pound of alfalfa or other hay, and nearly one and one-fourth pounds of grain per day for each 100 pounds of a horse's weight, make a good ration for an average working horse.

Horses like alfalfa stems. Refuse from the cattle racks is very acceptable to horses.

Feed mature horses first and second cutting alfalfa, which is free from mold and dust. Never feed wet alfalfa hay to horses.

A man can have more friends than he needs if he has plenty of money and isn't particular.

Seeds for Sale

Peel County is noted for its high-quality seeds. Peel Seed House, Brampton, Ont., is located in the very centre of this district. It has large quantities of Grimm, Variegated and Special Alfalfas, Red Clovers, Alsike, Sweet Clovers, Timothy, etc., which are sold direct to farmers, any part, in any size lots. Write at once for price list.

PEEL SEED HOUSE,
Brampton, Ontario

BEAUTIFY THE HOME GROUNDS

Have you ever considered the advisability of utilizing fruit trees in your yard, in addition or in preference to what we know as ornamental trees? Fruit trees yield both shelter and shade and impart a cheerful look to the grounds, besides giving a plentiful supply of fruit in the fall, and in spring their lovely blossoms are a delight to the eye.

When planning the small home orchard, the object in view should be to grow various kinds and varieties of fruit, that the ripening period may be distributed over as long a season as possible. For instance, in apples there should be early, midseason, and winter varieties, the winter sorts, of course, predominating.

The question of varieties is all important, certain kinds which are first-class in some localities may not be adapted to your condition. It is advisable to get suggestions from experienced local fruit growers or the state experiment station.

With spring planting many losses can be traced to delay in setting out the trees until after the buds have started into growth; so, to avoid such a calamity, which means losing a year, it is most important to have this operation completed while the young trees are perfectly dormant.

GETTING THE SOIL IN SHAPE.

When devoting a piece of land entirely to an orchard, the entire area is usually thoroughly cultivated, either by digging very deeply or using a subsoil plow. The ground should be given a liberal coating of manure, also a dressing of bone meal, and the land turned over for a second time. For two or more years the intervening spaces between the trees can be devoted to vegetables and strawberries.

According to the variety, apples come into bearing in about six years from planting, and the crop will increase annually as the trees increase in size. Proper and careful pruning hastens early bearing, but indiscriminate pruning may have quite the opposite effect. During the first season superfluous shoots are cut out, the aim at this stage being the future shape and form of the mature tree. At the next dormant pruning the previous season's growth is cut back by half, after which the trees will only require thinning out the centre to keep the head open.

THE ROOM THEY NEED.

Apple trees are planted at least twenty-five feet apart. Pear trees rather closer, as their growth is more upright; say about twenty feet. Sour-cherry trees, fifteen feet. Peach trees, fifteen to twenty feet.

Pear trees invariably come into bearing much sooner than apple trees and will stand rather closer pruning. Varieties that are inclined to grow very tall should have the heads cut back hard, to keep the tree within bounds and facilitate gathering the fruit. It is therefore advisable to keep the head low and to encourage an open though free-branching habit.

Plums are most accommodating as to soil and rarely fail to produce abundant crops of fine fruit annually. They require little pruning except that necessary in shaping the tree.

The peach tree does not require much pruning, if we except cutting back the strongest growths and, if necessary, thinning out some of the weakest branches should they become overcrowded. But when first planted the entire head is cut off to within two feet from the ground.

TWO EXCELLENT BERRIES.

Raspberries are one of our most esteemed small fruits. They do best in a deep, well-manured and fairly moist soil, though they are not too fastidious on that account. They should be planted two feet apart, allowing four feet between the rows. When planting in the spring the canes are cut down close to the ground, and, of course, no fruit is expected until the second year. When the canes come into bearing make it a rule to cut away the old canes immediately after the crop has been gathered, retaining the young ones. The young growths springing from the base of the plant are thinned out to four or five, retaining the strongest. The young canes must be tied to the wire trellis, spreading them out evenly that they may all receive their full share of sun and air. Early in spring the tips are pinched out evenly.

Blackberries, equally desirable as the raspberry, are cultivated very similarly, but being more rampant in growth the plants are allowed more space.

SHRUBS THAT DELIGHT THE EYE.

The home grounds are greatly improved by the judicious use of shrubs. Among the early-flowering shrubs one that is not grown as frequently as it deserves is Spiraea thunbergii with its masses of starry bloom in May. Then there is Spiraea prunifolia with its long wreaths of double blossoms. The cercis, or Judas tree, is always welcome in the early spring when laden with its wealth of rosy-purple blossoms which appear before the leaves.

The deutzias are highly ornamental, the variety gracilis being the most popular and best known. Established plants flower profusely every spring, the entire shrub becoming smothered with the graceful white flowers. Forsythia, or golden ball, with its bright yellow flowers, well deserves a place among our best flowering shrubs.

Diervillas, known also as weigelas or bush honeysuckle, are a delightful group of free-growing shrubs with bell-shaped flowers of various colors.

The hydrangeas form a group of hardy shrubs of considerable importance.

Mock oranges are sweet-scented, white-flowered shrubs of the simplest culture. Syringas, or, as they are more commonly called, lilacs, usually find a place in all collections of flowering shrubs. Double and single flowered, all of them are lovely, the distinct and pleasing odor adding greatly to their charm.

Spring Fever and Poultry.

By S. W. Knipe

As spring comes upon us every year there are numerous enquiries made by people who have kept a few hens and wonder if they should go into the poultry business on a large scale. This article is especially intended for such inquirers.

Just a few days ago a friend told me that the 15 pullets he got last August had laid 1,012 eggs during November, December and January, and at same rate of laying, allowing three months for rest and molt they would average 202.4 eggs each in the twelve months. "Don't you think I should give up my job and go into poultry?" he said; to which I replied, "No." He has suitable vacant land, a little money and is interested in the game. What more is needed? That which is needed in every walk of life—experience. Hatching a few chicks under a hen in the cellar or in a wooden box is a vastly different thing than hatching a couple of thousand eggs in an incubator. The hen looks after the heat, turning and cooling of the eggs, shelters her chicks from the storms, protects them from danger. Taking the hen off for a feed at night, putting her back on her eggs again, supplying the chicks with hard boiled eggs and other feed, then seeing they are closed up for the night is vastly different to caring for incubators and brooders. Incubating and brooding one to two thousand, yes, even five hundred chicks in chilly days of March and April is quite a different proposition to leaving it to the old hen in the warm days of June. You may think the difference is so slight that it does not prove a difficulty. If so, just try. But take my advice and don't.

Without the required experience you are apt to meet with sad disaster. You may have your brooder temperature just fine at night. The next morning, your fire in brooder may be almost out. Experience will teach one that machines are not perfect and weather cannot be depended upon. It is possible to have most of your eggs in incubator fertile, and even after the second test the greater majority promise to produce live chicks. Then at the critical moment a little neglect in attending your fire or lamp may mean every chick chilled or cooked. There are dozens of other things which go to making success or failure, even after your chicks are out. Feeding the wrong sort of feed, dampness or drafts, will also play havoc in the sturdiest flock of chicks.

Considering all, it would be wise to continue in a small way for two or three years. Get an incubator and brooder, try them on the little space you have. Then, if you are successful and still interested, take the "plunge."

Artificial incubating and brooding is the only thing possible on a commercial plant. Clucking hens cannot always be secured when they are required, and, in fact, the cost of keeping a hundred or more hens for such a purpose is entirely prohibitive. Therefore it is absolutely necessary to have a thorough practical knowledge along these lines.

Assists Farmers to Purchase Live Stock.

The Minister of Agriculture for Canada, Hon. W. R. Motherwell, by the carrying out of policies administered by the Live Stock Branch of his Department, has, during the past fiscal year, either for breeding or feeding, been able to conserve a large number of live stock consigned to stockyards and abattoirs. Unfinished steers to the number of 80,717, 89,024 heifers, 678 sows and 48,000 sheep were, under the arrangement referred to, returned to the farms for breeding purposes in the case of females and for finishing into good beef in the case of feeder cattle. Two policies are involved in this service, one, the remission of freight charges, brought about by an arrangement between the Live Stock Branch and the railway companies, and the other, the payment of the reasonable travelling expenses of farmers making the purchases. The Minister's report, which supplies this information, makes it clear that the assistance thus given was available for stock purchased for breeding or further feeding by the purchaser and not for speculative purposes.

Big fields are much cheaper to plow and cultivate than small ones.

Chapped Hands or Face

Cured by one application of MEDORA CREAM. Leaves skin smooth and velvety. Used exclusively in Toronto General Hospital for ten years. Ask your druggist for 50c bottle and preserve your youthful complexion, or sent postpaid on receipt of 50c. J. A. MacDonald, Phm.B., 34 Hogarth Ave., Toronto.

The April Fool Frolic

"I'd like to give a real foolish party," said Eleanor Parker to her best chum, Myra Spencer, over a pan of fudge one March afternoon.

"All right, let's!" agreed Myra. "Where'll we give it?"

"At my house, of course!" said Eleanor.

"Why not at my house?" objected Myra.

"Why not both houses?" laughed Eleanor. Then she stopped suddenly as an idea took hold of her mind. "Myra, why don't we? Give it at both houses. I'll have the games and fun at my house, and you have the refreshments at yours. Don't you see how that will fool them?"

And so the party was planned. All the boys and girls of the young crowd who always had such good times together received a few days later, an envelope containing an apparently blank card, on each side of which was written in the corner the word "Over." Of course they turned them every way, held them to the light and to the heat, but soon discovered that the card was double and was pasted together around the edge, except for one small corner. When they tore it apart they found the invitation written inside, asking them to a surprise party for Myra on April 1. They were to meet at Eleanor's and proceed to Myra's around the corner in a body.

When April 1 arrived they appeared without exception at Myra's house. But the house was dark, no one answered the bell, which they rang insistently. "Well, there's only one thing to do, and that is to come back to my house and have our party there," said Eleanor resignedly. When all had responded with a shout to this suggestion, Myra stuck her head out the window and called, "April fool, folks! Can I come along?"

You can imagine what a sensation that made, and how keyed up the crowd was for the fun prepared for them at Eleanor's. When they had removed their hats and settled down she gave out little slips of paper to each one. On them she had written instructions for a joke that must be played on certain persons before the evening was over. Thus Myra drew, "Make Rus Ryan think his tie is crooked." Every time one of the crowd succeeded in getting his joke over and was able to cry "April fool" he threw his paper into a big hat. Those with papers left had to pay a forfeit.

Everywhere possible Eleanor had arranged the rooms with tricks. Thus magazines were stuck to each other, a cushion was laid over a seatless chair, a picture turned to the wall had April fool written across it when turned. A hidden electric fan blew a sudden blast in a dark corner of the hall. An alarm clock hidden in a candy box went off at a crucial moment.

The rugs were rolled back and the canned music turned on for dancing. Just a little earlier than usual, Myra said she must go home. This started things, and all agreed with her. Would somebody walk home with her? They would all go. When they reached the Spencer house it was ablaze with light, and the door was flung open to the jolly crowd. What was their surprise to see set through the middle of the dining room and living room a long table. It did not take long for them to realize that the party was a real one at last.

In the centre of the table was a huge bouquet of roses, which when one leaned over to smell them proved to be artificial and gave off an odor of onions. For place cards Myra had gotten up conundrums or "jokes" upon each guest. The favors were silk dunce cap pin cushions for the girls and little calendars for the men with April 1 ringed in red.

A delicious supper followed, but it seemed to come on reversed. What looked to be ice cream and cake proved to be brown bread iced with cream cheese and a croquet covered with white sauce served in a sherbet glass. The ice cream was disguised as a salad in a paper cup imbedded in lettuce leaves and sprinkled with chopped nuts and fruit. Crackers were iced with chocolate to look like large mints. White cake was baked in a breadpan and cut in thin slices. Candies looked like nuts.

It was a great "sell," all declared, but they also added that they would be glad to be sold again in the same way.

MAPLE-SUGAR TIME

BY C. O. ORMSBEE.

Maple sap, as it flows from the tree, is as clear as purest water. Were it possible and practicable to concentrate it by congelation as soon as it leaves the tree, without exposure to light or a warm atmosphere, instead of by evaporation over a fire, the syrup would be colorless and transparent, while the sugar would be as white as the best granulated sugar. Both would rank even higher among the most delicious products of the confectioner's art.

Contrary to the impression that is prevalent in many sections of the country, an extremely light color, combined with a deliciously delicate flavor, forms the essential characteristics of a high-grade maple product. On the other hand, a dark color, combined with a strong, rank flavor, is positive indication of a low-grade product, denoting carelessness in manipulation.

As intimated above, exposure to the action of light and warm air, as well as a long storage, has a tendency to darken the product and to detract from its flavor. More than this, the sap seems as susceptible as milk to bacteria influence. These conditions favor the development of several kinds of bacteria, all of which hinder the production of a high grade of sugar. It is the bacteria that darken the product and give it the strong, rank flavor which, among the uninitiated, passes for the maple flavor, and which is tolerated only by reason of the reputation possessed by the true maple flavor.

Methods of evaporation also have a very great influence upon the quality of the product. The correct method is to conduct the evaporation in large, shallow pans or evaporators. This method has been almost universally adopted. But there are good and bad methods even here.

These pans are set upon arches of stone or brick or iron, and heat is applied by means of a fire built beneath. The steam originates in little bubbles, each being held upon the bottom of the pan by means of a thin film—somewhat analogous to the film which incloses a soap bubble—and materially strengthened by the weight of the sap above. While so confined, it forms a vacuum beneath, thus leaving a space upon the bottom of the pan that is bare of liquid and fully exposed to the blazing fire beneath.

SECRET OF QUALITY.

The natural consequence is that, as must be expected, particles of sugar adhering to the metal of the pan become scorched and thus transformed into caramel, a substance of a dark brown color, possessing a bitter and somewhat acrid flavor. As soon as the film bursts and the steam escapes, the surrounding sap rushes in, fills the space, washes away the caramel and disseminates it throughout every part of the boiling sap or syrup, thus imparting, in a measure, both the color and flavor of the caramel to the product.

Now it is obvious that the deeper the sap above the film, the more the film will be re-enforced, and the greater will be the power necessary to burst the film. This being true, it is equally obvious that the deeper the sap the longer time the space inclosed by the film must be exposed to the action of the heat. More caramel will be formed, and darker and more acrid will it be made. Its influence will be greater.

Maple sap evaporated at a uniform depth of four inches in the pan will yield a product many shades darker than if evaporated at half that depth. This point is well established, and the Quebec maple-sugar makers, who aim at the production of the highest grade of product, never allow the sap in the evaporator to reach the depth of even one inch. This, of course, requires a closer attention to detail, and involves a somewhat greater cost for labor. On the other hand, it is economical of fuel, and it is the one great secret of the fine quality of Quebec maple products.

If you would produce the highest grade of maple sugar products, see to it that the sap in your evaporator is maintained at the least possible depth consistent with safety.

Horns are prevented from developing by thoroughly rubbing a stick of caustic potash upon the dampened skin over each horn button when the calf is less than one week old. Apply lard or vaseline freely around the horn button. Wrap one end of the caustic pencil with strong paper to protect the fingers. Keep caustic out of calf's eyes.—Dr. A. S. Alexander.

Roller skates were first patented by Merlin, a Flemish musical-instrument maker, in 1760.

CHIPPAWA SYSTEM COST $82,400,000· FINDING OF COMMISSION

Gregory Hydro-Electric Investigation Report Praises Project and Vindicates Integrity of Commission.

A despatch from Toronto says:—The Gregory Hydro-Electric Investigation Commission report, representing the results of over a year's probing and the expenditure of more than half a million dollars, was tabled on Thursday in the Ontario Legislature.

The Commissioners vindicated absolutely the personal integrity of the Hydro Commissioners and Engineers, conceded their admiration for the engineering phases of the scheme, but said that it should have cost, with reference to the Queenston-Chippawa development, $11,800,000 less.

Concerning the management, it says: "There is not a breath of suspicion of any personal wrongdoing" There are special references to the efficient and loyal services of Engineers F. A. Gaby and Harry G. Acres, and as to the results of their engineering efforts as represented in the Queenston-Chippawa development plant, its efficiency, it states, "surpassed even their own expectations."

One paragraph pays tribute to Sir Adam Beck, who through anxious years has shouldered responsibility for the world's premier public ownership power project at Chippawa. "His fighting qualities," it says, "stood him in good stead and enabled him to overcome all obstacles. From the beginning he has kept the Commission free from paralyzing influences of officialdom." He "has rendered great and notable service to Ontario."

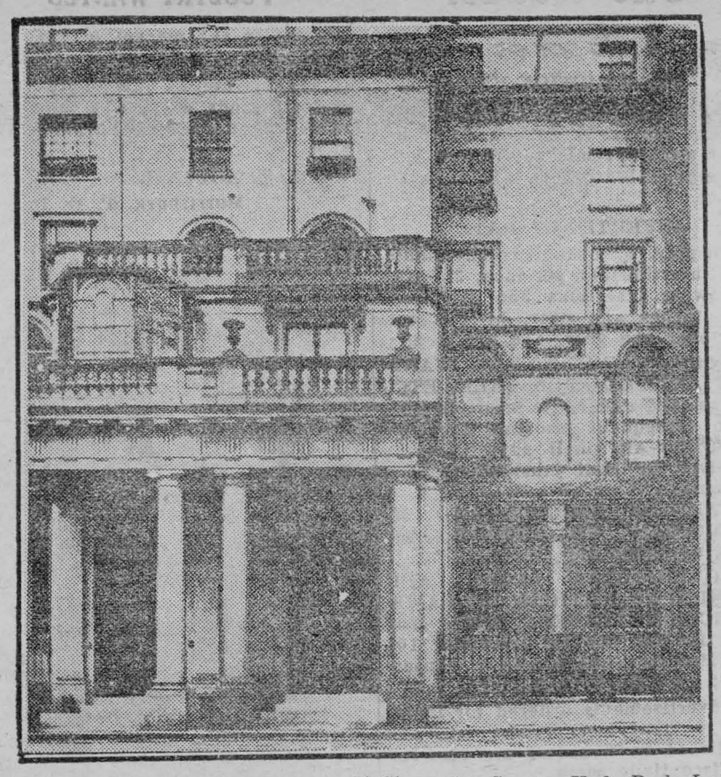

After praising the value of the work of Sir Adam Beck and of those in charge of the Hydro project, the report goes on to say: "The chairman of the Commission has been regarded in effect as the Commission itself, and his forceful personality has played a great part in settling—or unsettling—the relations between the Government and the Commission; he was arbitrary and inconsiderate, and allowed nothing to stand in his way." His "utter disregard for law" is also commented upon.

In other sections, with regard to the relations between the Commission and the Government, the report states: "There was a notable lack of frankness upon the part of the Commission. This led to misunderstanding and mistrust, which ought never to have existed." Again, the report declares: "The Commission over-spent the appropriation made by the Legislature and diverted funds which it had no authority to use for this purpose. The question of costs seems to have been lightly regarded."

The crux of the Gregory Commission's position in the whole matter of the Queenston-Chippawa development is that it should have been carried on by a separate construction department directly responsible to the Commission. To this policy largely, which resulted finally in the necessity for adopting the "rush schedule plan," it attributes the $11,800,000 excess cost claimed to have been incurred on the Chippawa plant.

The full cost of the Queenston-Chippawa 550,000 horsepower development, the report states, will be $82,483,914.

With regard to the general Hydro undertaking, the report makes various suggestions. It declares that the Hydro made a mistake in entering the radial business. It criticises the failure of the Commission to build up a sinking fund to take care of its bonded indebtedness. It finds that the powers of the Government to guarantee Hydro indebtedness are too wide. It believes that regular conferences should be held by the Commission with the municipalities. It recommends that the Central Ontario system should be unscrambled. It says that the Government should have fuller information regarding the operations of the Hydro. And it declares that the value of the power developments under the control and management of the Power Commission are inestimable.

Photograph shows the house at 34 Gloucester Square, Hyde Park, London, where Robert Stephenson, the great engineer and inventor of the steam railway, lived. He died there in 1859.

FRANCE OBTAINS $100,000,000 BANKING CREDIT FROM AMERICAN FINANCIERS

A despatch from New York says:—Establishment of a banking credit of not less than $100,000,000 in favor of the Bank of France has been arranged by an American banking group headed by J. P. Morgan and Co.

The loan is fully secured by gold held in the vaults of the Bank of France, which is acting for the French Government, and will be used to stabilize French exchange and for such other purposes as the French Government may determine.

While details of the loan were not made public it is understood it will not run for more than one year. In the event that the credit is not at maturity liquidated in other ways, gold in amount equal to the loan will be shipped to the Morgan firm in New York.

The group is limited to bankers of New York and neighboring cities, applications to share in the loan largely exceeding the amount required by the French Government.

In connection with this credit the Governor of the Bank of France has issued a statement which sets forth the following points:

1. Complete measures are being taken to better the financial situation.
2. The French Government is insisting that the Senate shall ratify the new tax measure, which means balancing the budget, and shall approve the policy of stopping new expenditures.
3. Until the financial situation has been greatly bettered, the Government will undertake no new borrowings whatsoever except for funding existing floating indebtedness.
4. After such improvement in the financial situation has been shown the Government will make no new loan, even for reconstruction in the liberated regions, without being assured that the budget will cover the service of such new loan.
5. The Bank of France will continue to envisage and assist the situation.

This is the first foreign government credit of its kind that has been arranged in this country. The only international banking operation of an analogous nature was the famous credit to the British Government during the war in which British-owned American securities were pledged as collateral.

NEW CANADIAN FLAG ON THE SEVEN SEAS

Red Ensign to Appear on Shipping — Union Jack Floats on Land.

A despatch from Ottawa says:—The Canadian red ensign is to be used by all privately owned ships of Canadian register on the high seas—as it is now by the offices of the Canadian High Commissioner in London. It will make its appearance wherever Canadian merchantmen are voyaging, on the last day of this month. This flag has a red field, with the Union Jack in the left upper corner. It has been called the exclusive flag of Canada, but will not be used in Canada, where, as before, the Union Jack will be flown as the national emblem.

The new flag will carry a simplified form of the new Canadian coat-of-arms in the field. It has been authorized in order to give to Canadian shipping a mark in contrast with vessels of the Motherland and the other Dominions. For the same reason it has been authorized for the flagstaff of the High Commissioner's office in London.

The blue ensign will be used exclusively by Government owned vessels or vessels which number among their crew a specified percentage of naval reserve men.

HOOVER TO HEAD U.S. BOARD ON WATERWAY

Co-operate With Canadian Commission in Discussion of Waterway Project.

A despatch from Washington says:—The Canadian Government, in a note made public by the State Department on Friday, agrees to the suggestion of the United States Government that two additional engineers be appointed by each Government to the Joint Engineering Board which will have charge of the consideration of the St. Lawrence River waterway project.

At the same time President Coolidge authorized the announcement that, in pursuance to the correspondence given out by Secretary Hughes in respect to the advancement of the improvement of the St. Lawrence, the President had appointed the St. Lawrence Commission of the United States, comprising:

Herbert Hoover, Secretary of Commerce (chairman); William C. Breed, attorney-at-law, New York City, former President New York Merchants' Association; James E. Davidson, Bay City, Mich., Vice-President American Shipbuilding Co., Bay City; James P. Goodrich, Winchester, Ind., formerly Governor of Indiana; James R. Howard, Chicago, formerly President American Farm Bureau Federation; James D. Noonan, American Federation of Labor; Stephen B. Davis, Washington, D.C., Counsel; Charles P. Craig, Duluth, Minn., Executive Secretary.

A further member of the Commission will be chosen from the commercial community in the New England States.

Blizzard in New Brunswick, Signs of Spring in Yukon

A despatch from Moncton, N.B., says:—The snowstorm continues here There has been practically no cessation since early Wednesday morning.

A despatch from Dawson City, Y. T., says:—Very mild weather prevails in the Yukon, and there are indications of an early spring. The mountain bluebird, the earliest of feathered migrants, was seen at White Horse, Feb. 9, two weeks earlier than usual.

A despatch from Fredericton says:—The March blizzard which commenced on Wednesday grew in intensity here on Friday with the snowfall becoming heavier all the time.

The slowest in promising is always the most faithful in fulfilling.

The Week's Markets

TORONTO.

Man. wheat—No. 1 North., $1.10½.
Man. oats—No. 3 CW., 44¾c; No. 1, b3¾c.
Man. barley—Nominal.
All the above, c.i.f., bay ports.
Ontario barley—65 to 70c.
American corn—No. 2 yellow 98½c.
Buckwheat—No. 2, 78 to 82c.
Ontario Rye—No. 3, 75 to 79c.
Peas—No. 2, $1.45 to $1.50.
Millfeed—Del., Montreal freights, bags included: Bran, per ton, $28; shorts, per ton, $30; middlings, $36; good feed flour, $2.10.
Ontario wheat—No. 2 white, 98 to $1.02, outside.
Ontario No. 2 white oats—41 to 43c.
Ontario corn—Nominal.
Ontario flour—Ninety per cent. pat., in jute bags, Montreal, prompt shipment, $4.70; Toronto basis, $4.70; bulk seaboard, $4.35.
Manitoba flour—1st pats., in jute sacks, $6.30 per bbl.; 2nd pats., $5.80.
Hay—Extra No. 2 timothy, per ton, track, Toronto, $14.50 to $15; No. 2, $14.50; no. 3, $12.50 to $13; mixed, $12.50.
Straw—Carlots, per ton, $9.50.
Standard recleaned screenings, f.o.b. bay ports, per ton, $20.
Cheese—New, large, 19 to 20c; twins, 20 to 21c; triplets, 21 to 21½c; Stiltons, 22 to 23c. Old, large, 25 to 27c; twins, 26 to 28c; triplets, 30c.
Butter—Finest creamery prints, 45 to 46c; No. 1 creamery, 43 to 44c; No. 2, 42 to 43c; dairy, 37c.
Eggs—Extras, fresh, in cartons, 36 to 37c; fresh extras, loose, 34 to 35c; fresh firsts, 32 to 33c; fresh seconds, 28 to 29c.
Live poultry—Chickens, 3 to 4 lbs., 20c; hens, over 5 lbs., 22c; do, 4 to 5 lbs., 15c; do, 3 to 4 lbs., 15c; spring chickens, 4 lbs. and over, 25c; roosters, 15c; ducklings, over 5 lbs., 19c; do, 4 to 5 lbs., 18c; turkeys, young, 10 lbs., and up, 22c.
Dressed poultry—Chickens, 3 to 4 lbs., 25c; hens, over 5 lbs., 28c; do, 4 to 5 lbs., 24c; do, 3 to 4 lbs., 18c; spring chickens, 4 lbs. and over, 30c; roosters, over 5 lbs., 18c; ducklings, over 5 lbs., 24c; do, 4 to 5 lbs., 25c; turkeys, young, 10 lbs. and up 32 to 35c; geese, 22c.
Beans—Canadian hand-picked, lb., 7c; primes, 6½c.
Maple products—Syrup, per imp. gal., $2.50; per 5-gal. tin, $2.40 per gal.; maple sugar, lb., 25c.
Honey—60-lb. tins, 11 to 11½c per lb.; 10-lb. tins, 11 to 12c; 5-lb. tins, 11½ to 12c; 2½-lb. tins, 12½ to 13c; comb honey, per doz., No. 1, $3.75 to $4; No. 2, $3.25 to $3.50.
Smoked meats—Hams, med., 24 to 25c; cooked hams, 34 to 36c; smoked rolls, 17 to 18c; cottage rolls, 19 to 21c; breakfast bacon, 23 to 26c; special breakfast bacon, 28 to 30c; backs, boneless, 28 to 33c.
Cured meats—Long clear bacon, 50 to 70 lbs., $18.50; 70 to 90 lbs., $18; 90 lbs. and up, $17; lightweight rolls, in barrels, $37; heavyweight rolls, $32.
Lard—Pure tierces, 14¼ to 14¾c; tubs, 14½ to 15c; pails, 15 to 15½c; prints, 17½ to 18c; shortening tierces, 14 to 14½c; tubs, 14 to 15c; pails, 15 to 15½c; prints, 17 to 17½c.
Heavy steers, choice, $7.50 to $7.75; butcher steers, choice, $6.75 to $7.75; do, good, $6 to $6.50; do, med., $5 to $5.75; do, com., $4 to $4.50; butcher heifers, choice, $6.75 to $7.50; do, med., $5 to $5.75; do, com., $4.25 to $4.75; butcher cows, choice, $4.75 to $5.50; do, med., $3.50 to $4.50; canners and cutters, $1.50 to $2; do, com., $2.50 to $3.50; feeding steers,, choice, $5.50 to $6; do, fair, $4 to $5; stockers, choice, $4 to $5; do, fair, $3.50 to $4; milkers and springers, choice, $80 to $120; calves, choice, $10 to $12; do, med., $7 to $9; do, com., $5.50 to $6; lambs, choice ewes, $14 to $15; do, bucks, $12.50 to $13.50; do, culls, $8 to $9; hogs, fed and watered, $7.75 to $8; do, f.o.b., $7.25 to $7.50; do, country points, $7 to $7.25; do, selects, $8.50 to $8.80.

MONTREAL.

Oats, Can. West., No. 2, 53 to 54c; do, No. 3, 50½ to 51c; extra No. 1 feed, 49½ to 50c; No. 2 local white, 47½ to 48c. Flour, Man. spring wheat pats, 1sts, $6.30; 2nds, $5.80; strong bakers', $5.60; winter pats., choice, $5.65 to $5.75. Rolled oats, bag 90 lbs., $3.05. Bran, $28.25. Shorts, $30.25. Middlings, $36.25. Hay, No. 2, per ton, car lots, $16.20.

Butter, No. 1, pasteurized, 38c; No. 1 creamery, 37c; 2nds, 36c. Eggs, fresh extras, 36c; fresh firsts, 33c. Potatoes, per bag, car lots, $1.55 to $1.60.

Heavy veals, $8; com. light calves, $6.75 and up; hogs, thick, smooth, and shops, $8.25 to $8.50; do, poor quality, $8; select bacon hogs, $9.

Soviet Will Prohibit Wife-Buying in Provinces

A despatch from Moscow says:—Women in Turkestan, the Khirghiz republic and the Bashkir and Kalmuk regions of Russia, who for ages have been treated with inequality, are soon to be protected by laws similar to those in effect where Western civilization has spread. This has been decided upon by the Soviet Council of Commissars in connection with the celebration of the international working women's day.

The widely prevalent custom, whereby a bridegroom buys his wife with money or cattle may be punished by a year's imprisonment, and persons found forcing a woman to marry without her free consent may be sentenced to five years at hard labor. The custom in other regions of a bride being stolen by a bridegroom's family or the bridegroom himself will be punishable by five years' imprisonment. The penalty for bigamy and concubinage will be a year's hard labor. The marriage of extremely young women will be prohibited.

500-POUND NUGGET AMONG SILVER EXHIBITS

Canada Will Have Wonderful Display at Empire Exhibition in London.

A despatch from London says:—A silver nugget weighing 5,000 pounds is typical of Canada's effort at the British Empire Exhibition, which will be opened shortly. It certainly impressed British newspapermen who were conducted over the building by A. W. Tolmie, the Dominion Commissioner.

The Canadian exhibit will be ready on April 17, and the building itself will be completed next week. To-day the building is a hive of industry. Carpenters and artisans are putting the finishing touches on the interior, and every particle of wood handled came from Dominion forests.

One group of decorators was coating papier-mache forms with glue and covering them with a dozen different colored seeds, cracked corn and pea meal. The result was a soft effect impossible to achieve with brush and paint.

Six thousand cases containing Canadian exhibits have arrived in Brisair, and a few hundred are now in the building. The mineral exhibit is already in place, with the exception of some valuable chunks of gold ore. Some fruits have been unpacked, and one exhibit of machinery is in place. The others will be installed as rapidly as their backgrounds are in position.

PATROL SUBMARINES NEW NAVAL PHRASE

British Policy Offers Encouragement to Dominion Navies.

A despatch from London says:—Great Britain's policy of encouraging the Dominion navies, and of carrying out world-wide fueling plans, despite the uncertainty of the Singapore base project, the increase of the navy personnel and the construction of five cruisers and two destroyers as had been previously announced, are points in the 1924-25 naval estimates presented to Parliament on Thursday which have attracted the most attention.

The estimates provide for an expenditure of £55,800,000, a reduction of £2,200,000, as compared with the estimates for 1923-24.

In all points the estimates conform to the Washington treaty, it being explained that the capital ships to be scrapped under the treaty terms are in the hands of ship-breakers.

Dominion naval co-operation is not a new policy, but the Admiralty's hearty endorsement of the principle is looked upon as another intimation to the overseas empire units that it is bearing a very heavy burden in the protection of communications and trade routes throughout the world.

If all the year were playing holidays, to sport would be as tedious as to work.

Dr. Harold Wismer
London specialist, who has discovered a means of diagnosing certain types of disease through X-ray examinations of the head. His method is an examination of the sthenoidal cells.

CANADA ENTERS INTO TRADE AGREEMENT

Economic Union of Belgium and Luxemburg, and the Netherlands Granted Tariff.

A despatch from Ottawa says:—Canada has granted her intermediate tariff to the economic union of Belgium and Luxemburg, and to the Netherlands, the Netherlands East Indies, the Netherlands Guiana and the Netherlands West Indies.

In return, Canadian products will get most favored-nation treatment in the countries mentioned.

Imports of produce from Belgium during the fiscal year 1922-23 were to the value of $4,995,093, while Canadian produce was exported to Belgium to the value of $12,527,524. The principal imports were artificial silk, window glass, diamonds, beans and canned vegetables. Exports included wheat, oats, barley, lobsters, canned salmon and agricultural implements.

To the Netherlands Canada exported good to the value of $10,540,085 in 1922-23, and imported goods to the value of $4,970,362. The principal commodities imported were cocoa-butter, gin, bulbs, plants and nursery stock, and aniline dyes, while exports were wheat, barley, wheat flour, buckwheat, oats, rye, oil-cake, rubber tires, canned salmon and lobster.

Canadian National Institute for the Blind

The Library and Publishing Department of the Canadian National Institute for the Blind is located at 142 College St., Toronto. It occupies the whole of a sixteen-room building opposite the Conservatory of Music and is a department of which the Institute is justly proud.

When this library was first organized, it owned a total of 81 volumes, but its catalogue now shows works of literature and music aggregating nearly 13,000 numbers. The whole of the lower floor of the building is devoted to the housing, cataloguing, mailing, receiving, etc., of that large collection of books comprising titles on almost every subject from the "Arabian Nights" to "The Coming of Evolution," and from "Nature Readers" to "Theses on the Atomic Theory." George Elliot and John Buchan, Sir Walter Scott and Robert Louis Stevenson, Charles Dickens and Conan Doyle, Daniel Defoe and Alexandre Dumas, Jane Austen and Charlotte Bronte, W. W. Jacobs and Mark Twain rub shoulders most amicably on the crowded shelves when not out on visits to cheer the blind book-lovers in all parts of the Dominion.

Books for the blind are carried free by our Government, which was the first in the world to grant such a privilege, thus making possible the fullest development of the circulating library system for readers without sight. Books go and come in specially devised canvas wrappers which make it unnecessary for a blind person to call upon sighted members of his family to assist him in mailing his volumes back to the library. During the first year of the library's history, some 700 volumes were loaned; last year 13,075 were sent out. And since every book going out means another coming in, approximately 26,000 volumes were handled.

Do you know what a volume for the blind means? The Bible comprises 39 volumes and requires more than six feet of shelf room. And other works are in proportion. Each volume costs the Institute from two to four dollars. Think, then of what a library for the blind represents in cost of books alone!

Our Publishing Department prints works of various kinds from Ontario Public School texts to stories of the calibre of "Maria Chapdelaine," that beautiful prose idyll of life in the frontier districts of Northern Quebec. It also issues for ten months each year a monthly magazine known as The Braille Courier. This journal contains news of the Canadian National Institute for the Blind and articles, poems, etc., of a general and interesting character. The Braille Courier is a hundred per cent. Canadian in spirit and source of material, and is the only magazine for the blind published in the Dominion. Through the courtesy of Canadian readers many copies are forwarded to blind people in all parts of the world, so that the name of our Institute is known wherever Braille is read. If you come to Toronto do not fail to visit the Library and Publishing Dept. of the Institute at 142 College St. You will be welcome, and you will be interested.

Telephone girls sell goods

A small store in a small town can train one or two of its own girls (or men) to take telephone orders on advertised goods, as the big stores do.

In one store with over 100 telephone operators, each takes telephone orders, acting as shoppers for the telephone customer. In this store as many as 3,000 telephone orders will be received in one day.

Some grocers use the same method. May we help you apply it to your business?

CORNWALL GENERAL HOSPITAL

This institution provides skilled nursing and care at very moderate rates to those able to pay, and without charge to indigent persons from the three United Counties, other than the Municipal Grants.

It is kept up by:

Fees from paying patients.

Grants from the Government and Municipalities.

Donations and subscriptions from Churches, Corporations, Societies and individuals, the last being the largest source of revenue.

YOU ARE ASKED TO ASSIST IN THIS WORK

The nucleus of an endowment fund has been established by a legacy recently received, and parties remembering the Hospital in their wills may stipulate that bequests made by them shall go to this fund.

If you would like a copy of the last Annual Report, drop a card to the Secretary, who will be pleased to

Why **Ford Predominates**

Endorsed By Fleet Owners

In almost every business where fast and economical delivery service is a factor, Ford trucks have established an enviable reputation.

The experience of Robert Simpson Company Limited, is a typical example.

The Robert Simpson Company operates one of the largest truck fleets in Toronto, 55 Fords.

This fleet has proved so satisfactory that it is being constantly enlarged: so practical and economical in operation that during the past five years not a single car or truck has been traded in.

The prompt and efficient delivery system which is an inseparable part of this store's service to the public is largely due to the flexibility and staunch endurance of this Ford delivery fleet.

The Ford has the confidence of its users. That's why there are so many Ford users.

See Any Authorized Ford Dealer

"Indispensable In Our Business"

Another whole-hearted endorsement comes from Mr. A. W. Williams, General Manager of the Belle Ewart Ice Company Limited, Toronto, who says: "We have been using Ford trucks for the past eight years and find them indispensable in our business."

A Ready Help For The Girl Who Needs Blood

DURING the critical period between twelve and seventeen there is a special strain on the young girl's system which often leaves her in a weak run-down condition.

She becomes anaemic or bloodless.

The gums and eyelids as well as the complexion generally become very pale and there is weakness and lassitude.

Indigestion and constipation are usual.

There is shortness of breath, palpitation of the heart, headaches and irregularities of the vital organs.

These symptoms are also common to chlorosis in which case the complexion assumes a greenish tinge.

More blood is needed—rich, red, invigorating blood.

Since Dr. Chase's Nerve Food is the greatest of blood builders this is the treatment indicated.

The restorative qualities of Dr. Chase's Nerve Food have never been more certainly proven than in the treatment of young girls for anaemia, chlorosis and such ailments which arise from a debilitated condition of the blood.

Since young girls seldom understand themselves at this age the responsibility rests with the mother.

The whole future health and happiness of your daughter may depend on getting through this critical period in good physical condition.

There is no question of Dr. Chase's Nerve Food being the most effective means of overcoming the anaemic condition.

It is only necessary to have a little patience and keep up the use of the Nerve Food regularly until the growing body is supplied with an abundance of rich, red, life-sustaining blood.

You will notice that while the price of Dr. Chase's Nerve Food has been increased to 60c. the box now contains 60 pills instead of 50 as formerly.

Likewise Dr. Chase's Kidney-Liver Pills are 35c. a box of 35 pills, instead of 25c. for 25 pills. Edmanson, Bates & Co., Ltd., Toronto.

OUR CORRESPONDENTS

WILLIAMSBURG

There will be no services in the Lutheran Church Sunday evening, March 23rd. The morning service will be conducted as usual. Sermon subject: "True disciples of Jesus. I. They continue in His Word; II. They know the truth; III. The truth makes them free."

Mrs J. D. Beckstead spent last week end in Ottawa with her daughter Mrs. Claude Merkley.

Mrs. Allan Garlough was taken to the General Hospital, Brockville, last Friday where she underwent a successful operation for appendicitis. Her many friends hope for a speedy recovery.

CHAPTER XXXVII.

ON THE GRILL.

In spite of the fact that his mind had at times moved toward his cousin James as the murderer, Kirby experienced a shock at this accusation. He happened to glance at Olson, perhaps to see the effect of it upon him.

The effect was slight, but it startled Kirby. For just an instant the Dry Valley farmer's eyes told the truth—shouted it as plainly as words could have done. He had expected that answer from Hull. He had expected it because he, too, had reason to believe it the truth. Then the lids narrowed, and the man's lip lifted in a sneer of rejection. He was covering up.

"Pretty near up to you to find some one else to pass the buck to, ain't it?" he taunted.

"Suppose you tell us the whole story, Hull," the Wyoming man said.

The fat man had one last flare of resistance. "Olson here says he seen me crack Cunningham with the butt of my gun. How did he see me? Where does he claim he was when he seen it?"

"I was standin' on the fire escape of the Wyndham across the alley—about ten or fifteen feet away. I heard every word that was said by Cunningham an' yore wife. Oh, I've got you good."

Hull threw up the sponge. He was caught and realized it. His only chance now was to make a clean breast of what he knew.

"Where shall I begin?" he asked weakly, his voice quavering.

"At the beginning. We've got plenty of time," Kirby replied.

"Well, you know how yore uncle beat me in that Dry Valley scheme of his. First place, I didn't know he couldn't get water enough. If he give the farmers a crooked deal, I hadn't a thing to do with that. When I talked up the idea to them I was actin' in good faith."

"Lie number one," interrupted Olson bitterly.

"Hadn't we better let him tell his story in his own way?" Kirby suggested. "If we don't start any arguments he ain't so liable to get mixed up in his facts."

"By my way of figurin' he owed me about four to six thousand dollars he wouldn't pay," Hull went on. "I tried to get him to see it right, thinkin' at first he was just bull-headed. But pretty soon I got wise to it that he plain intended to do me. O' course I wasn't goin' to stand for that, an' I told him so."

"What do you mean when you say you weren't goin' to stand for it. My uncle told a witness that you said you'd give him two days, then you'd come at him with a gun.

The fat man mopped a perspiring face with his bandanna. His eyes dodged. "Maybe I told him so. I don't recollect. When he's sore a fellow talks a heap o' foolishness. I wasn't lookin' for trouble, though."

"Not even after he threw you downstairs?"

"No, sir. He didn't exactly throw me down. I kinda slipped. If I'd been expectin' trouble would I have let Mrs. Hull go up to his rooms with me?"

Kirby had his own view on that point, but he did not press it. He rather thought that Mrs. Hull had driven her husband upstairs and had gone along to see that he stood to his guns. Once in the presence of Cunningham, she had taken the bit in her own teeth, driven to it by temper. This was his guess. He knew he might be wrong.

"But I knew how violent he was," the fat man went on. "So I slipped my six-gun into my pocket before we started."

"What kind of a gun?" Kirby asked.

"A sawed-off .38."

"Do you own an automatic?"

"No, sir. Wouldn't know how to work one. Never had one in my hands."

"You'll get a chance to prove that," Olson jeered.

"He doesn't have to prove it. His statement is assumed to be true until it is proved false," Kirby answered.

Hull's eyes signaled gratitude. He was where he needed a friend badly. He would be willing to pay almost any price for Lane's help.

"Cunningham had left the door open, I reckon because it was hot. I started to push the bell, but Mrs. Hull she walked right in an' of course then I followed. He wasn't in the sittin'-room, but we seen him smokin' in the small room off'n the parlor. So we just went in on him.

"He acted mean right from the start—hollered at Mrs. Hull what was we doin' there. She up an' told him, real civil, that we wanted to talk the business over an' see if we couldn't come to some agreement about it. He kep' right on insultin' her, an' one thing led to another. Mrs. Hull she didn't get mad, but she told him where he'd have to head in at. Fact is, we'd about made up our minds to sue him. Well, he went clean off the handle then, an' said he wouldn't do a thing for us, an' how we was to get right out."

Hull paused to wipe the small sweat beads from his forehead. He was not enjoying himself. A cold terror constricted his heart. Was he slipping a noose over his own head? Was he telling more than he should? He wished his wife were here to give him a hint. She had the brains as well as the courage and audacity of the family.

"Well, sir, I claim self-defence," Hull went on presently. "A man's got no call to stand by an' see his wife shot down. Cunningham reached for a drawer an' started to pull out an automatic gun. Knowin' him, I was scared. I beat him to it an' lammed him one over the head with my gun. My idea was to head him off from drawin' on Mrs. Hull, but I reckon I hit him harder than I'd aimed to. It knocked him senseless."

"And then?" Kirby said, when he paused.

"I was struck all of a heap, but Mrs. Hull she didn't lose her presence of mind. She went to the window an' pulled down the curtain. Then we figured, seein' as how we'd got in bad so far, we might as well try a bluff. We tied yore uncle to the chair, intendin' for to make him sign a cheque before we turned him loose. Right at that time the telephone rang."

"Did you answer the call?"

"Yes, sir. It kept ringing. Finally the wife said to answer it, pretendin' I was Cunningham. We was kinda scared some one might butt in on us. Yore uncle had said he was expectin' some folks."

"What did you do?"

"I took up the receiver an' listened. Then I said, 'Hello!' Fellow at the other end said, 'This you, Uncle James?' Kinda grufflike, I said, 'Yes.' Then, 'James talkin',' he said. 'We're on our way over now.' I was struck all of a heap, not knowin' what to say. So I called back, 'Who?' He came back with, 'Phyllis an' I.' I hung up."

"And then?"

"We talked it over, the wife an' me. We didn't know how close James, as he called himself, was when he was talkin'. He might be at the drug-store on the next corner for all we knew. We were in one hell of a hole, an' it didn't look like there was any way out. We decided to beat it right then. That's what we did."

"You left the apartment?"

"Yes, sir."

"With my uncle still tied up?"

Hull nodded. "We got panicky an' cut our stick."

"Did anybody see you go?"

"The Jap janitor was in the hall fixin' one of the windows that was stuck."

"Did he say anything?"

"Not then."

"Afterward?"

"He come to me after the murder was discovered—next day, I reckon it was in the afternoon, just before the inquest—and said could I lend him five hundred dollars. Well, I knew right away it was a hold-up, but I couldn't do a thing. I dug up the money an' let him have it."

"Has he bothered you since?"

Hull hesitated. "Well—no."

"Meanin' that he has?"

Hull flew the usual flag of distress, a red bandanna mopping a perspiring, apoplectic face. "He kinda hinted he wanted more money."

"Did you give it to him?"

"I didn't have it right handy. I stalled."

"That's the trouble with a blackmailer. Give way to him once an' he's got you in his power," Kirby said. "The thing to do is to tell him right off the reel to go to Halifax."

"If a fellow can afford to," Olson put in significantly. "When you've just got through a little private murder of yore own, you ain't exactly free to tell one of the witnesses against you to go very far."

"Tell you I didn't kill Cunningham," Hull retorted sullenly. "Some one else must 'a' come in an' did that after I left."

"Sounds reasonable," Olson murmured with heavy sarcasm.

"Was the hall lit when you came out of my uncle's rooms?" Kirby asked suddenly.

"Yes. I told you Shibo was workin' at one of the windows."

"So Shibo saw you and Mrs. Hull plainly?"

"I ain't denyin' he saw us," Hull replied testily.

"No, you don't deny anything we can prove on you," the Dry Valley man jeered.

"And Shibo didn't let up on you. He kept annoyin' you afterward," the cattleman persisted.

"Well, he—I reckon he aims to be reasonable now," Hull said uneasily.

"Why now? What's changed his views?"

The fat man looked again at this brown-faced youngster with the single-track mind who never quit till he got what he wanted. Why was he shaking the bones of Shibo's blackmailing. Did he know more than he had told? It was on the tip of Hull's tongue to tell something more, a damnatory fact against himself. But he stopped in time. He was in deep enough water already. He could not afford to tell the dynamic cattleman anything that would make an enemy of him.

"Well, I reckon he can't get blood from a turnip, as the old sayin' is," the land agent returned.

Minard's Liniment Heals Cuts.

"Standby" Cakes.

For use with this and other desserts and to serve with tea or at luncheon one may bake these attractive "standby" cakes instead of the usual cookies. These get their name because they are the housewife's "standby"—they can be kept on hand always and, instead of getting stale, they improve with age.

Cream three-quarters of a cup of butter and then gradually add a cupful of brown sugar. Beat two eggs well and stir them up. Sift together a cup and a half of flour, a teaspoon of cinnamon, a quarter teaspoon of cloves and half a teaspoon of nutmeg (this last may be omitted if desired), and add these to the other ingredients. Then stir in a cup of seedless raisins and half a cup of chopped nuts.

Place the batter by spoonfuls on shallow greased enameled ware baking pans and bake until brown.

Minard's Liniment for Dandruff.

TYPEWRITERS TO RENT

Underwoods for practice purposes. Special rates to students. Also rebuilt Underwoods for sale at moderate prices by the makers.

The Bale Fires.

Fierce sagas of the snowlands are ringing on the gale,
The trees are icy armored like skeletons in mail,
The frost's sharp sword of silver is glittering in the air,
The brook its crystal fetters in silence still must wear.
No life is in the marshes, no music in the wood,
Each gable in the village retains its ermine hood,
The world is white and frozen, but lyin my bed
At dawn I heard the trumpets of wild geese overhead.

And see! along the mountains the sunset flaming high
Leaps up in gold and crimson and orange to the sky,
The gray cloud's trailing edges are kindled into light,
The cold blue zenith reddens, the first faint stars ignite
And like celestial rubies glow through a rosy haze;
Behold! in all the glory that sets the west ablaze,
And sheds on field and forest its splendor far and near,
The bale fires of the winter, dead viking of the year.

—Minna Irving.

Dear Percival.

When little Percival arrived at school on the opening day, he carried the following note to the teacher: "Dear Teacher, our sweet little Percival is a very delicate, nervous child, and if he is naughty—and he is likely to be naughty at times—just punish the boy next to him, and that will frighten him so he'll be good."

The Woman of To-Day

A PRETTY SERVICEABLE PLAY DRESS.

4655. This style of garment is the most popular and the most comfortable for "tiny" children. The opening at the inner seam edges is convenient and practical. Additional opening is provided at the centre back.

This Pattern is cut in 3 Sizes: 6 months, 1 year and 2 years. A 1-year size requires 1¾ yards of 27-inch material.

Pattern mailed to any address on receipt of 15c in silver, by the Wilson Publishing Co., 73 West Adelaide St., Toronto. Allow two weeks for receipt of pattern.

WHY IS A CHILD ALWAYS HUNGRY?

You don't need to tell the mother of a large family that children need large amounts of food. She knows it. The appetites of children seem, at times, insatiable, for many a twelve-year-old boy eats twice as much as his father, who has double his weight. What is there in the child's life that makes so much food necessary? As a result of many measurements of the food needs and muscular activity of adults, it is known that there is a very close relationship between a person's activity and his need for food.

Every time a muscle moves, heat is given off. The greater the activity, the more heat is produced. As children are normally very active, they give off a great deal of heat, and as the heat must be produced either from food or from the body substance, they must eat a great deal in order not to lose weight. A normal healthy child does not know the meaning of food economy. The half-starved children of Vienna were listless and thin because their scanty diet was only sufficient to keep them alive and left nothing over to supply the needs of growth and exercise.

Food provides not only fuel for muscular activity but building material for growth. The growing child needs an extra supply of food from which, by the process of digestion, material may be absorbed, and then rebuilt by the bodily machinery into flesh, fat and bone.

In addition to the demands for muscular activity and growth, food must keep up the internal vital activities of the body which goes on in the body at rest independent of any exertion. This internal vital activity is greater in children than in adults and greater in boys than in girls. In babies a year old it is greatest of the whole range of life.

No wonder children are hungry and eat ravenously! Think of their food demands! They are incessantly active at play or work, and this activity results in the combustion of fuel or food in the body; they need food to supply the material for growth; and finally, they have a higher vital activity, even when perfectly quiet and asleep, that is, the fires of life burn more intensely than in adults, more heat is being given off in proportion to their size, and for every unit of heat (a calory) lost there must be corresponding fuel furnished in the food.

HINTS FROM THE SALTCELLAR.

It has oft been repeated that "salt is just salt," but the experienced housewife who gives careful consideration to the expenditure of the family food budget is convinced that there is a difference in salt. Through her personal experiences she has learned that because of its preserving and purifying uses, it pays to buy only the best.

In the proper curing and preserving of meat, salt is a principal ingredient. In this curing process, it is absolutely necessary to use a good grade of salt. Any adulterations or impurities will entail a great loss of a valuable food product.

Without salt, much of the real flavor of food is lost. Besides its use for preserving or flavoring, salt becomes a great convenience in solving many household problems.

The odor of onions lingers long on knives and cooking utensils. If they are rubbed with a damp cloth and then with salt before washing in warm water, the disagreeable odor will be gone. This same operation will remove the odor of gasoline from the hands.

When making cooked icing, if a pinch of salt is added to the sugar the icing will not grain.

If a berry pie or some other dish boils over in the oven, a handful of salt thrown in on it will help to avoid a disagreeable odor.

Apples that are too long out of the storage room will become withered. To freshen them, wash clean and place in crock with brine—one handful of salt to three gallons of water. Change the water every six hours until the apples are fresh.

To remove iron rust on white material, rub with salt and lemon juice and place in the sun to bleach.

Mix equal parts of salt and flour with enough vinegar to make a paste, for cleaning brass or copper. Let this paste remain on for an hour, and then rub off with a soft cloth. Wash with a soft brush and polish.

If salt is rubbed on china it will remove tea stains and other discolorations.

Egg stains on silver can be removed by rubbing with a damp cloth which has been dipped in salt.

For polishing a mirror, sprinkle fine salt on a woolen cloth.

A paste of salt, alum and boiling water makes a fine cement for floor cracks.

If equal parts of salt and ashes are mixed with water to make a paste, it makes an excellent cement for stove cracks.

CORNS

Lift Off—No Pain!

Doesn't hurt one bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers.

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the foot calluses, without soreness or irritation.

A BLENDED TEA IS BETTER.

Tea from one garden, no matter how fine it is, possesses certain desirable qualities but may lack others, because all characteristics are not developed under the same conditions. If the tea has a perfect flavor it may lack body; if it has body it is perhaps without the same perfection of flavor. To combine all desirable characteristics in one blend has been the work of the "SALADA" experts for over a quarter of a century and "SALADA" is the fruit of their labors. The flavor is tea grown.

TO WASH WINDOWS QUICKLY.

Moisten a piece of chamois skin in warm water and wash the window pane with this. Wash the chamois skin so as to rinse out the dust and dirt, wring dry and simply rub lightly over the wet windowpane to remove the extra water, then let the pane dry without any more polishing. This is a quicker and better method of keeping windows clean than the common one generally used.

If a piece of new chamois skin is being put into service be sure to wash it thoroughly before using on the windows.

WOMANLY ARTS.

It has been said that of all the charms that woman may possess, beauty, grace and wisdom not excepted, the one which is most attractive to men of all stations is—a happy disposition. A similar vote about the traits of men most admired by us of the gingham brigade might not miss that target very far either.—L. M. S.

He is great whose failings can be numbered.

WOMEN! DYE FADED THINGS NEW AGAIN

Dye or Tint Any Worn, Shabby Garment or Drapery.

Diamond Dyes

Each 15-cent package of "Diamond Dyes" contains directions so simple that any woman can dye or tint any old, worn, faded thing new, even if she has never dyed before. Choose any color at drug store.

WRIGLEY'S

after every meal

Cleanses mouth and teeth and aids digestion.

Relieves that over-eaten feeling and acid mouth.

Its l-a-s-t-i-n-g flavor satisfies the craving for sweets.

Wrigley's is double value in the benefit and pleasure it provides.

Sealed in its Purity Package.

KEEP THE SINK SHINING.

Soap jelly, which is made by dissolving a large bar of soap in two quarts of boiling water and two tablespoonfuls of kerosene is a great help in keeping the sink white and shining. I keep a glass of soap jelly on the sink shelf, and when the dishes are finished put a little on a cloth, kept for that purpose, and rub well over the sink. Then wash with clear water and the sink looks as if I had given it a good scouring.

Innocence is very far from finding as much protection as crime.

Observe the face of the wife to know the husband's character.

The parasite has no roots.

Shelley's "Ozymandias of Egypt."

The name of Percy Bysshe Shelley is one of the greatest in English literature. His finest works are "The Cenci" and "Prometheus Unbound," but the best-known are his "Ode to a Skylark" and "Ode to the West Wind."

Shelley was drowned while yachting in the Gulf of Spezia. His body was washed ashore a fortnight later, and, in accordance with the quarantine laws of Italy, burnt on a pyre in the presence of Byron, Leigh Hunt, and Trelawny.

The following is one of the finest sonnets in the language, and to-day has peculiar interest:

I met a traveller from an antique land
Who said: "Two vast and trunkless legs of stone
Stand in the desert. Near them on the sand,
Half sunk, a shattered visage lies, whose frown
And wrinkled lip and sneer of cold command
Tell that its sculptor well those passions read
Which yet survive, stamped on these lifeless things,
The hand that mocked them and the heart that fed.
And on the pedestal these words appear:
"My name is Ozymandias, king of kings:
Look on my works, ye mighty, and despair.'
Nothing beside remains. Round the decay
Of that colossal wreck, boundless and bare,
The lone and level sands stretch far away."

HERE'S WHAT PEOPLE SAY ABOUT TANLAC

"If it had not been for Tanlac I would still be a sick, discouraged woman, for nothing else seemed to do me any good," says Mrs. Edward Gibbs.

All the advertising in the world and all the sales efforts combined could not have made the great success for TANLAC that has been attained, unless this reconstructive tonic possessed merit of the greatest degree. Over 40 Million Bottles of Tanlac have been sold and the demand to-day is greater than ever before.

That TANLAC possesses merit and has brought relief to hundreds of thousands of persons is attested by the great number of testimonials that have been received by the company from people in every state of the Union and every province of Canada. There are over 100,000 such statements on file with the company, all ringing with sincere praise for TANLAC and what it has accomplished.

Here are excerpts from a few of the 100,000 statements on file:

Mrs. Edward Gibbs, Lancaster, Pa.—"For 2 years indigestion deprived me of nearly all the pleasure of living. If it had not been for TANLAC I would still be a sick and discouraged woman, for nothing else seemed to do me any good."

Mrs. Mary A. Benson, Seattle, Wash.: "Following an operation my stomach and nerves seemed to give way and I became almost helpless. As a last resort I tried TANLAC. I began to improve from the very first, gained 29 lbs., and to-day am feeling fine."

O. E. Moore, Kansas City, Mo.: "My stomach seemed to pain me constantly, food seemed to do me no good, I would bloat up with gas, lost my strength, and could not sleep or rest. I was on the down-grade all the time. Tanlac corrected my troubles and put me in excellent shape."

Thomas Lucas, Peterboro, Ontario: "Well, sir, buying TANLAC was the best investment I ever made, for it built up my health and strength to where I haven't a complaint in the world."

Mr. and Mrs. Joseph E. Kaake, Detroit, Mich.: "For more than a year our three children, age 2, 4 and 6, had been so peaked and lifeless that we were worried about them. Their stomachs were upset, appetites poor, the color had left their cheeks, their nights were restless and during the day they would just mope around, taking no interest in play or anything else. They began to improve with the first dose of TANLAC, and to-day there are no more healthy children in Detroit."

Tanlac is for sale by all good druggists. Over 40 million bottles sold. Accept no substitute.

Take Tanlac Vegetable Pills.

Mirror Magic.

The primitive man looking at his own reflection in a still pool beheld a phenomenon he could not explain. He saw something which was not himself, but which must be so closely related to himself that there was no joke in it.

What is known as sympathetic magic always regarded a close connection as existing between a person and his "counterfeit presentment." We know better now, but who is there who can see a looking glass accidentally broken without experiencing a secret feeling of uneasiness?

The smashing of the mirror destroys the reflected image—his counterfeit self or a surface which has borne it, as it has also borne the images of other members of his family. Therefore he himself, or some member of his family, whispers the lingering voice of despised, forgotten, but inherited belief in sympathetic magic, is in danger. All of which accounts for the superstition that if you break a looking-glass there will be a death in the family within the year.

God's Little Things.

I love the little things of God—
The loamy scent of fresh-turned sod,
The fleecy white clouds in the sky,
The passing of the south winds by,
The darting flash of bluebird's wing,
And all the sights and sounds of spring.

I love the days when summer fades,
The scarlet tinge in forest glades,
The wild grapes, purple on the vine,
The crisp air, heady as old wine,
The hint of snow in graying sky,
To warn us that old winter's nigh.

—Hazel Blair.

RHEUMATIC PEOPLE CAN FIND RELIEF

By Enriching Their Blood With Dr. Williams' Pink Pills.

Rheumatism attacks people when the blood is clogged with impurities, thus setting up an inflammation of the muscles and joints. Cold or wet weather may start the tortures of rheumatism, but it is not the cause, as was once supposed. The cause is thin or impure blood. Rubbing with liniments or applying hot applications may give relief, but that is all; the pain is soon back again. You must get at the trouble through the blood to get rid of it. The value of Dr. Williams' Pink Pills in cases of this kind is proved by the following statement. Miss Margaret M. Cullen, writing on behalf of her grandmother, Mrs. A. McEwen, Ormstown, Que., says:—"My grandmother, now 85 years of age, was, some years ago, a great sufferer from rheumatism. She tried many remedies, but found none that did her any good until she began using Dr. Williams' Pink Pills. These she used for some months until every trace of rheumatism disappeared. Since then she has taken the pills at intervals, and they have kept her in the best of health. It is marvellous how well and active my grandmother is. She cooked the dinner for the threshers last fall, and she gives the credit for her good health to Dr. Williams' Pink Pills. She is anxious that her experience with this splendid medicine be given for the benefit of others."

If you are suffering from any trouble due to poor or watery blood Dr. Williams' Pink Pills will help you. Sold by medicine dealers everywhere, or sent by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

No Man's Island.

A house, consisting of one room, which stands in two states, three counties, and four towns at one and the same time is the proud possession of a dance-hall proprietor in the U.S.A. This unique building stands on a tiny island on the borders of Vermont and New Hampshire.

Although the building was once used as a dwelling-house, it is now given up entirely to dancing. Standing in the middle of the dance floor, the visitor finds himself in nine different places at once. Beneath his feet is the meeting point of the boundaries of the two states, of the counties of Grafton, Caledonia and Orange, and of four towns, Ryegate, Newbury, Bath, and Haverhill.

Locally the place is known as "No Man's Land," and is very popular as a summer dancing pavilion. But the river is slowly eating its way into the centre of the little island, and it seems likely that before long it will bore a way right through both islet and house. Meantime, the proprietor thanks his lucky stars that only one of the towns, Haverhill, sends along the tax collector.

Small minds are captivated by trifles.

Every man's face is the ledger of his good and of his evil accounts.

ECZEMA

of the skin and scalp is an affliction that we have been successfully treating by mail and in our offices here for over 30 years. If afflicted, write us explaining your case fully. Surnames and Their Origin

BAYARD.

Variations—Baird, Beard, Bird.
Racial Origin—English.
Source—A nickname.

Here is a family name derived from an adjective which to-day is applied almost exclusively to horses, but which in the Middle Ages was in rather wide usage, denoting a color.

To-day you'd hardly refer to a "bay" dress or a "bay" complexion, though you would speak of a "bay" horse. Fifty years from now the word may die completely, unless the horse finds a new excuse for existence and avoids the doom with which the automobile is threatening him.

The medieval English for "bay" was "bayard."

A man might have been called "Roger le Bayard" or "Udo le Bayard" either from the color of his hair, the general impression of his complexion, or perhaps from the color of the clothing which he uscally wore.

Baird is a fairly usual contraction of Bayard, though the family name of Baird does not in all instances trace back to the other. Likewise Beard and Bird are often logical developments, though, particularly in the case of Bird, it does not follow that Bayard is always the original form of the name.

SKINNER

Racial Origin—English.
Source—An occupation.

There is a wealth of knowledge to be gained through a study of nomenclature of the industrial as well as of the social conditions in England during the Middle Ages.

Virtually every occupation of any importance in that period has been preserved to us in one or more family names, and if you find an occupation or profession which has not so been commemorated, it is only because the occupation did not exist at the period of family name formation, or because it is known to-day by a comparatively modern term. Thus we have no family names "Doctor" or "Physician," though we do have "Leech." We have no family name "Automanufacturer," though we have "Cartwright."

Tanning and leathermaking, however, were among the most important industries of Medieval England, like the various branches of the textile industry, particularly those handling woollen fabrics.

"Le Skynnere" ("the skinner") was quite naturally the surname most often conferred by his neighbors on the man who made his living by stripping skins from the carcasses of animals.

Mother! Give Sick Baby "California Fig Syrup"

Harmless Laxative to Clean Liver and Bowels of Baby or Child.

Even constipated, bilious, feverish, or sick, colic Babies and Children love to take genuine "California Fig Syrup." No other laxative regulates the tender little bowels so nicely. It sweetens the stomach and starts the liver and bowels acting without griping. Contains no narcotics or soothing drugs. Say "California" to your druggist and avoid counterfeits! Insist upon genuine "California Fig Syrup" which contains directions.

Youngsters to Match.

Mistress—"Maggie, I think I'll take one of the children to church this morning."

Maggie—"Yes, ma'am."

Mistress—"Which one do you think would go best with my dress?"

Infantile mortality has gone down from 150 per 1,000 at the beginning of the century to 80 per 1,000 to-day.

Nearly Educated.

It was Kenneth's first day at school and when all the pupils were seated he raised his hand and said:

"I can spell cat and count up to seven and write my own name, so you won't have to bother to teach me much."

Ask for Minard's and take no other.

A Drawback to Matrimony.

A little girl in Ayrshire had been punished for not being able to recite her geography lesson. Her mother went to the lady teacher to reprimand her.

"Was it you who punished our wee Jeanie for her geography?" she demanded.

"Yes, I punished her," was the reply.

"Weel," continued the mother angrily, "her Auntie Leezie had nae geography, an' she got a man. I had nae geography, an' I got a man; an' there's you wi' a' your geography, an' you havena got a man yet! I don't want my lassie to get geography!"

Too Shy to Say "No."

"How on earth did young Robin get married?" asked the fat woman. "Why, I always thought he was so terribly shy."

"He is," said the acid-faced woman. "He was probably too shy to say 'No'."

A druggist says: "For nearly thirty years I have recommended the Extract of Roots, known as Mother Seigel's Curative Syrup, for arresting and permanently relieving constipation and indigestion. It is an old reliable remedy that never fails to do the work. 30 drops thrice daily. Get the genuine at your druggist.

A Poor Husband.

Hubert—"I am wedded to my art."

Shubert—"Your wife seems to be a great sufferer."

GUARD THE BABY AGAINST COLDS

To guard the baby against colds nothing can equal Baby's Own Tablets. The Tablets are a mild laxative that will keep the little one's stomach and bowels working regularly. It is a recognized fact that where the stomach and bowels are in good order that colds will not exist; that the health of the little one will be good and that he will thrive and be happy. The new sales tax will not increase the price of Baby's Own Tablets, as the company pays the tax. You can still obtain the Tablets through any medicine dealer at 25 cents a box, or by mail, post paid, from The Dr. Williams' Medicine Co., Brockville, Ont.

Money Left to Monarchs.

Not many men have chosen to leave their fortunes to members of the Royal Family in the maner of the late Lord Farquhar. Under the terms of his will, Prince George receives $10,000 and Princess Maud or Lord Carnegie $250,000, while other royal beneficiaries are the King and Queen, Queen Alexandra, the Princess Royal and Princess Arthur of Connaught.

The largest gift ever willed by a subject to a British sovereign was that of $2,500,000, which fell to Queen Victoria on the death of one John Camden Neild, who died in 1852.

The son of a London goldsmith, Neild succeeded to $1,250,000 on his father's death, but being of a miserly disposition, he lived in poverty. After his death he was found to have left the whole of his property, with the exception of a few legacies, to "Her Gracious Majesty Queen Victoria, begging Her Majesty's most gracious acceptance of the same for her sole use and benefit."

Another man who remembered the sovereign in his will was Sir Ernest Cassel, who, on his death in 1921, left property to the value of thirty million dollars. His London residence, Brook House, Park Lane, may one day become a home of the Royal Family, for Sir Ernest directed that in the event of the death without issue of his daughter, the house and its contents should be offered as a gift to the then reigning sovereign.

Payment for articles advertised in this column should be made with Dominion Express Money Orders—a safe way of sending money by mail.

Plumber's Harvest.

Teacher—"Now, Bobbie, tell us when is the harvest season?"

Bobbie — "From November to March."

Teacher—"Why, Bobbie, I am surprised that you should name such barren months. Who told you they were the harvest season?"

Bobbie—"Pa. He's a plumber.

Keep Minard's Liniment in the house.

He that parleys has half surrendered.

The best prophet of the future is the past.

Elderly People Need More Iron in the Blood

To Give Added Strength, Vitality, and Greater Power of Resistance Against Disease.

IRON is constantly leaving the body, especially toward the period of middle age and you must make up for this iron deficiency if you want to escape disease and be strong and well. When the iron in your blood runs low, signs of old age creep into your system. If there is not enough iron circulating the blood-stream becomes thin, pale and watery, the body weak and run-down. In such cases ordinary iron-containing foods seldom supply a sufficient quantity of this important element to make up for the waste so that many physicians now prescribe a concentrated form of organic iron—Nuxated Iron—which contains iron like the iron in your blood.

Actual blood tests show that a tremendously large number of people who are weak and ill lack iron in their blood. If you are not sure of your own condition, go to your doctor and have him take your blood-count and see where you stand or else make the following test yourself:

See how long you can work or how far you can walk without becoming tired; next take two five-grain tablets of Nuxated Iron three times per day after meals for two weeks. Then test your strength again and see how much you have gained. By enriching the blood and creating new red blood cells Nuxated Iron strengthens the nerves, rebuilds the weakened tissues and helps to instill renewed energy and power into the whole system.

Unlike the older inorganic iron products, Nuxated Iron is easily assimilated, does not injure the teeth, make them black nor upset the stomach. The manufacturers guarantee successful and entirely satisfactory results to every purchaser or they will refund your money. It is dispensed by all good druggists.

GIRLS! HAIR GROWS THICK AND BEAUTIFUL

35-Cent "Danderine" Does Wonders for Lifeless, Neglected Hair.

A gleamy mass of luxuriant hair full of gloss, lustre and life shortly follows a genuine toning up of neglected scalps with dependable "Danderdine."

Falling hair, itching scalp and the dandruff is corrected immediately. Thin, dry, wispy or fading hair is quickly invigorated, taking on new strength, color and youthful beauty. "Danderine" is delightful on the hair; a refreshing, stimulating tonic — not sticky or greasy! Any drugstore.

For Lasting Fragrance Use Cuticura Talcum

There is nothing better than Cuticura Talcum for powdering and perfuming the skin. It appeals to the most fastidious because of its fine, smooth texture and delicate fragrance.

HELP FOR YOUNG WOMEN

Mrs. Holmberg Tells How Lydia E. Pinkham's Vegetable Compound Helped Her

Viking, Alta.—"From the time I was 15 years old I would get such sick feelings in the lower part of my abdomen, followed by cramps and vomiting. This kept me from my work (I help my parents on the farm) as I usually had to go to bed for the rest of the day. Or at times I would have to walk the floor. I suffered in this way until a friend induced me to try Lydia E. Pinkham's Vegetable Compound. I have had very satisfactory results so far and am recommending the Vegetable Compound to my friends. I surely am glad I tried it for I feel like a different person now that I don't have these troubles."—ODELIA HOLMBERG, Box 93, Viking, Alta.

Letters like this establish the merits of Lydia E. Pinkham's Vegetable Compound. They tell of the relief from such pains and ailments after taking it.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotic or harmful drugs, and today holds the record of being the most successful remedy for female ills in this country, and thousands of voluntary testimonials prove this fact.

If you doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to the Lydia E. Pinkham Medicine Co., Cobourg, Ontario, for Mrs. Pinkham's private text-book and learn more about it.

* * *

Born, at Niles, Michigan, to Mr. and Mrs. Fred McCoy, Gertrude Ruth, on March 15th.

The Iroquois High School Board is asking the council of that village to pass a bylaw requiring all pupils of the school not to be on the streets after 8 o'clock on the evening of any school day.

The Dundas Board of Agriculture are holding a meeting at Froat's Hall, Williamsburg, Wednesday, March 26th, at 7.30 p.m. Dr. D. M. Robertson, Veterinary Sergeon, will address the meeting on Accreditation of Dairying Herds. Public are cordially invited.

The Board of Health of the village of Kemptville requires that cows from which milk is supplied for domestic use in that municipality shall be tested for tuberculosis and stables inspected before May 1st next.

Forty-five British harvesters have left Toronto on a hike to Ottawa, to impress the Government with the fact that they are unemployed and in need. They ended their second day at Oshawa. They have managed to get food so far at various points along the way through the generosity of the population. The men expect to complete the tramp in two weeks.

On Sunday, March 23, Rev. Theo. A Iseler will preach at Riverside in the afternoon and at Morrisburg in the evening. Sermon subject: "The different attitude with which people regard the preaching of the Cross."

The Hawthorn Woollen Mills at Carleton Place have closed down depriving the town of employment which produced $250,000 a year in wages, and all that this meant to local merchants and to surrounding farmers. It is the price that is paid for tariff tinkering for the benefit of one section of the country, and for temporary political advantage for a party.

Robert Flanagan, for almost 40 years paymaster on the Ontario St. Lawrence Canals at Cornwall, died at his home, Cornwall this week. He was superannuated three years ago. He was 84 years of age, and was born in the Township of Charlottenburg, and was a nephew of the late Darby Bergin, M.P., for Stormont. He leaves his widow, one brother, James of Parkfalls, Winconsin, and one sister, Mrs. J. McDonald of Ottawa.

It is understood that the plant of the Dundas Linen Mills Co., Limited at Iroquois, totally destroyed by fire on Sunday of last week with a loss of $100,000, will be rebuilt, although a number of tempting offers to locate elsewhere have been received by the company. The cause of the fire cannot be determined and the loss is only partially covered by insurance.

With the object of checking petty smuggling by women along the St. Lawrence frontier, the Department of Customs and Excise has appointed Mrs. Janet Jamieson of Prescott, to be a woman preventive officer, with headquarters at Brockville. Mrs Jamieson, who is the widow of Dr Jamieson, drowned while on overseas service, will continue to reside in Prescott. She has already entered upon her duties.

* * *

Tenders are being called for the construction of a nurses' home in connection with St. Vincent de Paul Hospital, Brockville. The building is to be of brick and fireproof construction, three storeys and basement in height with the outside dimensions 36x66 feet. The plans have been prepared by A. S. Allaster registered architect.

* * *

The Editor of the Smith County Pioneer gives some inside dope on one of the dear departed in a current issue as follows: Can you beat it? A widow of eight years standing claiming the No. 9 overshoe that Milo Stiver's pup swiped and brought home and which we advertised in this paper last week. She would have walked off with the article too, had not our man in front proved obdurate and out-talked her. If the overshoe belonged to her husband, as she claimed, he doesn't need it now. He is dead and he beat this paper out of four years' subscription before he went where he is."

* * *

The Metropolitan Life Assurance Co., it is announced, will shortly establish a head office for their Canadian business in Ottawa, which will be in charge of Mr. A. F. C. Fiske. The company will open up in the Jackson Building about April 15th, and will bring 300 of the company's staff from New York. They will employ in all, a staff of about 500 mostly clerks.

Easier to Operate The New McLaughlin-Buick

Every motorist will appreciate the advantages of the new, completely automatic oiling system of the 1924 McLaughlin-Buick "Master Six" engine. Every part is lubricated at all times without any attention other than keeping the crank case supplied. Push rods, rocker arms, crank shaft, timing gears, are all perfectly oiled and require a minimum of care from the driver.

From radiator to tail light the new "Master Sixes" are new cars.

More powerful engine—new and longer chassis—new body—four-wheel brakes. Yet underlying all these improvments are the proved McLaughlin-Buick engineering principles—principles famous throughout the Dominion and responsible for McLaughlin-Buick's enviable position as "Canada's Standard Car."

W. H. Fetterly & Co., - Morrisburg.

Real Value

The man who places his repair work with a handy man or sends it to a cut rate establishment, for the sake of, what is frequently, a purely visionary saving of a dollar or two, is very apt to later find that instead of a saving, the transaction actually stands him a considerable loss.

You certainly have a right to expect real value for the money you expend in repairs, at a legitimate repair shop.

The TRUE VALUE of repairs, properly executed, can perhaps be better reckoned in days, weeks, and months of subsequent satisfactory performance, than in terms of mere dollars and cents of initial cost.

We believe we are giving the public the cheapest service obtainable in this locality today (all things considered) We aim to deliver real and true value on every transaction and if we succeed in this our customers must surely profit as well as ourselves.

Help us to succeed, and come in for your full share of the customers profits.

TINDAL'S GARAGE
H. B. Tindal, Prop

HAVE GLASSES GONE UP IN PRICE?

This is a question we often are asked. Our answer is

VERY LITTLE

Ten years ago you could get a pair of ordinary glasses for about $6.00, to-day you can get the same thing for about $7.00. In those days the cheapest Bifocals were about $9.00, today the same quality costs you about $10 00.

BUT HERE IS THE DIFFERENCE

To-day, people want the best that can be had, and the best cost from $15.00 to $20.00, but you can have the cheaper kind if you want them.

IT'S UP TO YOU.
