We Uphold Anything that is FAIR & JUST

The Leader

If You Don't Like Our Policy KEEP AWAY

XXV, No. 13 MORRISBURG, ONT. FRIDAY, MAR. 26 1926

Flour and Feed

There is a great demand for millfeed just now. The farmers in many cases have used up their own feed hoping for a decline in Millfeed, consequently, there will be a good deal more Feed going out than formerly expected which will undoubtedly have an effect on the price.

Screenings

A real good feed—cheap—our sales to date have been three carloads and the feeding season is just commencing.

Scratch Feed

We have always a good supply of Monarch Scratch Feed on hand.

EGGS

We are paying the highest market price for fresh eggs; graded and paid for according to quality.

The MORRISBURG FEED & PRODUCE Co.

MORRISBURG, ONT.

NOW is the time to make your walls fresh and attractive with Alabastine. Apply it on any wall surface over plaster, wall-board or soiled painted walls.

DRS. WEAGANT & WEAGANT APPRECIATE LEADER'S POLICY

Drs. C. H. Weagant and A. A. Weagant, dentist and physician, respectively, formerly of Morrisburg, in renewing their subscription to The Leader send the following letter of appreciation:—

"Dear Mr. Editor:

"In sending my subscription for The Leader to December 1926, permit me to say that in my opinion Morrisburg and the County of Dundas has got in you the right man in the right place.

"The fearless stand you take on all matters of local interest, commends itself to all right thinking people and in my opinion, your stand is generally very sane, very business like and very fair, and I trust that your work will be heartily endorsed by your fellow townsmen in future.

"My regards to the old timers of Morrisburg and community."

C. H. WEAGANT.

Mr. R. E. Story, also formerly of Morrisburg, in renewing his subscription says:—

"Every morning, a common question around our home is "Where is The Leader?"

"It seems to me, as an only partly interested reader, that the Town Council sees things differently to that of their predecessors in many ways. As meter users for some time now, we see the great advantages, especially the one by which you pay for what you use and get what you pay for."

R. E. STORY.

MRS. MARY ELLEN DORAN

(Contributed)

The subject of this sketch became known to the writer when she lived in Duncanville, now Russell. Her visits to her father, the late G. S. Hickey, were times of much merriment. Her kindness was proverbial Great zest was added to the gathering when the late Miss Marcia Doran joined the company. What good times these were. Aunt Mary though unable to walk, beamed upon us all, and prepared most wonderful meals. In later years Mrs. Doran returned and nursed both her mother and father in their last illness, Mr. Hickey's being quite prolonged. Through all she maintained a sweet and patient demeanor. These were not the only ones she comforted in times of bereavement. Mrs. Doran dearly loved Morrisburg and the people here. On her last visit she often expressed her longing to spend her last days with old friends. She however felt that her place was with her sister, Mrs. Merrick, with whom she remained till she answered the final summons. Shortly after the New Year failing health became very manifest. On Saturday evening 13th instant, amidst her nearest relatives she "passed over" quietly and without pain or distress. On Sunday evening at the home of her sister, a beautiful solemn service was held. Her Pastor, Rev. R. Newton Powell minister of the United Church, Avenue Road, assisted by a former Pastor, Rev. Hunter, officiated. Mr. Powell spoke most sympathetically and testified to the beautiful Christian character and faithfulness of our departed friend. The floral offerings were most beautiful. In due time the remains will be laid to rest beside her father and mother in Fairview Cemetery.

REV. R. J. M. GLASSFORD

Rev. Mr. Glassford of Renfrew, former pastor of St. Pauls Presbyterian Church, Winchester, died suddenly in Toronto on Friday evening last.

Rev. Mr. Glassford had been attending the Board of Missions of the Presbyterian Church, then in session in Toronto. He was on his way to lunch, in company with his brother-in-law, Rev. J. A. Cranston and another minister, and when in front of the City Hall, on Queen Street he suddenly collapsed. He was immediately hurried to the city hospital, but did not rally, and passed away three hours later. Rev. Mr. Glassford was apparently in his usual health and gave no warning of his sudden collapse. Mrs. Glassford was in Renfrew at the time, and did not receive word of his death until too late to catch the afternoon train and was not able to go to Toront until the following morning.

Deceased had been very active since he went to Renfrew, where they were building a new church which they expected to dedicate in about two weeks time.

He is survived by his widow, who was formerly Miss Agnes Cranston, of Caledon East; one sister Mrs. H. J. Gray, and a brother, Howard Glassford of Buffalo.

RADIO EQUIPPED TRAINS

Getting the latest market reports and daily news with music by the foremost entertainers of Canada and the United States while travelling on a Canadian National Radio-equipped observation library car between Montreal and Quebec, Toronto, Chicago, Winnipeg, Western Canada, Vancouver, Halifax and the Maritime Provinces is a point of service that the Canadian National Railways exclusively offer to travellers between these points. When you have occasion to travel, go Canadian National. Local Agents will be pleased to make reservations and plan your itinerary.

URIAS S. ALGIRE, 100 TODAY TABOOS TOBACCO & LIQUOR

(Syracuse Star)

Urias S. Alguire 207 Columbus Avenue, is today celebrating his 100th birthday. He is hale and hearty and as active as many a man a quarter century younger.

Born in Williamsburg, Ont., Canada, but most of his life a resident of Syracuse and vicinity, Mr. Algire has been a lifelong abstainer of alcohol and tobacco and a strict follower of the Christadelphian faith.

This faith, according to Mr. Algire is interspersed somewhat in the belief of the Hebrews in that it is a firm conviction of the second coming of Christ. It is the fondest hope of all followers that the Lord will again visit the earth.

For 14 years Mr. Algire has lived with his niece, Mrs. Charlotte A. Bliss, at the Columbus Avenue residence and previous to that for many years at Liverpool.

Mrs. Martha Weaver of Williamsburg, is a niece, and Mf. Alex Algire of Williamsburg is a nephew of Mr. Urias Algire.

SURVEY OF MUNICIPAL WATER SERVICE

As a result of the municipal water service survey just completed, which dates back three years, the revenue has been increased by approximately $100 a year and arrears amounting to $200. Had the survey dated from the first of the present year, it would have had the approval of all our citizens, as the water service is good, and all users are willing to pay for service rendered.

The present method of rendering accounts, however, particularly for service in arrears, is not in keeping with the Council's attempt to systemize and harmonize their work. The regular collections are made quarterly from a statement, as follows: "To water from Jan. 1926 to April 1926—$0.00". The occupant of the house may be a new tenant, or new owner, who has neither added nor decreased the water service in the house, into which he has moved, and naturally accepts the statement rendered, as being in full to date for the water service in connection with the property. In justice to the citizens, therefore, the quarterly accounts should be itemized so that they can compare the amount of service with the account, and not be subject to an additional account later, dating back three years.

The Council are attempting to systemize the affairs of the town, and if they would succeed in perfecting their system, they must be consistent to retain the co-operation of the people.

EXTRA STURDINESS

McLAUGHLIN-BUICK TORQUE TUBE DRIVE

ABSOLUTE comfort and safety at all speeds are assured in the Better McLaughlin-Buick through the torque tube drive. This sturdy tube with rigid strut rods keeps the rear end in perfect alignment and relieves the springs of the "driving" strain. Only one universal joint, automatically lubricated, is required.

As a result, this construction gives extra sturdiness and longer life to the McLaughlin-Buick.

The new low GMAC financing rates are available to purchasers of McLaughlin-Buick on time.

GIVERS AND TAKERS

BY MELLA RUSSELL McCALLUM.

PART III.

Rose had planned to spend her two weeks' vacation at a nearby lake, with a merry party of her father's distant cousins. Now she decided to go on farther, to Lawton, and to stop at Lake Cynthia on the way back. Lawton was 200 miles beyond Lake Cynthia, on the same road.

She would tell her cousins to expect her some time during the day. Then she would leave Yorke on the early train and get back to the lake at 10 that night. The extra railroad fare would be frightfully expensive. She would have to do without the white hat and shoes that she had wanted to buy.

When the day came, and she kissed Ellen good-bye at 6 o'clock in the morning, she felt a pang of guilt. It was her first planned deception.

The journey was not tiresome, for she was not used to traveling, and the changing view from the car window delighted her; but when she found herself actually on the street of the strange town, she wanted to flee. She did not know Lawton. Her last relative there had died when she was a baby.

She started up the main business street. She did not want to provoke curiosity by inquiring.

The office of the Eagle was not hard to find. It was a gray, dusty-windowed building wedged in between a grocery and a hardware store. She went in. A space was fenced off for visitors. Behind it stood a safe and a large, littered desk. Beyond was a door leading to the pressroom, whence came the odor of type and printer's ink.

A stooped man appeared in the doorway. He wore an inky blue-and-white-striped apron, and he had not shaved his melancholy face for several days.

"Anything I can do, miss?"

"I wanted to see the proprietor."

"He's eatin' his dinner. Better set down an' wait."

Thank Heaven that was not Aaron Moore!

Yet when he did appear, he was not prepossessing. He banged in at the door, a square man inclined to stoutness, in baggy gray clothes, with a harsh, forbidding face; but at least he was cleanly shaved, and at sight of a lady he grabbed off his felt hat.

"What can I do for you?"

The blue eyes that met hers were keen and impersonal. With his hat off, his head was like a lion's with a tousled shock of graying hair.

"Are you Mr. Moore?" Rose inquired, though she could hardly speak.

"I am."

"My name is Rose Walton."

He waited courteously.

"I'm Ellen Bigelow's daughter."

There was a ripple under the mask.

"Well, well!" he said quickly. "This is interesting! Your mother was an old friend of mine. Are you—living hereabouts now?"

"No—we live in Yorke."

"I see! Yorke—yes, that was where your mother went when she married, as I remember."

"Yes—we've always lived them."

"H-m! Let me see, wasn't your father on the road for a drug house? Still in the same business, I suppose?"

"My father died ten years ago."

Rose wondered afterward what would have happened if Aaron Moore had not made the conversation. All she could do was to answer questions.

"Ten years ago!" mused the man. "I'm sorry to hear that, Miss Walton."

Up to this time he had been standing. Now he went behind the desk and sat down, so that all she could see was the leonine head and shoulders.

"I'm sorry to hear that," he repeated. "How time flies! So Ellen Bigelow has a girl as big as you!"

"Yes."

"You don't favor your mother."

"No—I wish I did."

"She was a nice-looking young lady. In fact"—the great head turned, and the eyes met Rose's squarely—"In fact, she was beautiful."

"I know she must have been, Mr. Moore, because—she is yet. But I mustn't take any more of your time. I just dropped in—"

Rose got up uncertainly. She did not know how to terminate the call.

"How long do you remain in Lawton, Miss Walton?"

"Only till the 5 o'clock train."

"Had your dinner?"

"Oh, yes, thank you—I had some sandwiches on the train."

Aaron Moore rose heavily, and called back in the direction of the pressroom:

"Going out for a few minutes, Pete. Now you come along with me," he commanded Rose. "This town isn't fixed very good on restaurants, and the hotel dining room is closed by now, but we have some ice cream parlors. I can't let Ellen Bigelow's girl go back home without a little something!"

He was taller than he had seemed. Rose was a strong walker, but she had to hurry beside his long, heavy steps.

He looked out of place sitting in a little iron-legged chair, eating a chocolate-nut sundae; but he ate it to the last drop.

"There's still a longish time till 5 o'clock," he observed. "If you've nothing better to do, I have a car in the garage—well, not a car, exactly, but I'd like to show you a bit of the country your mother used to know."

"I'd love to go, Mr. Moore!"

They drove about the town, and he pointed ou the churches and the schools. Then, a little way out, he showed her her grandfather's homestead, now a dreary, rented place.

"And there"—he indicated a stiff red brick house, vacant, surrounded by tall grass—"is where I lived when I was married. They look after me in the hotel now. I wasn't much good keeping bachelor's hall."

When they rounded their way back into town, he bought her a box of candy, and took her to the station. He did not talk as much as he had at first; but now Rose's tongue had loosened, and she could chat about her work and her vacation plans. She wondered how she had ever thought his face forbidding. There was something wistful and small-boyish about it.

"You must remember me to your mother," he said, as the train came in.

"I couldn't very well do that. She—doesn't know I came."

He looked at her slowly, and a hint of a twinkle came into his eye.

Then she was in the coach, smiling and waving her hand, and he was making a stiff, old-fashioned bow that ended in a kind of salute. He was nice!

But what must he think of her, now that he couldn't help but understand why she came?

Oh, well, it didn't matter what he thought. She had been compelled to do this, for Ellen. Through false pride Ellen had lost twenty years. Ellen's happiness was worth taking a chance for.

If Aaron Moore did not wish to understand—if the past was dead with him—Ellen need never know; but if he should one day come to Yorke, and he and Ellen——

The possibility of happiness for Ellen threw Rose's own misery into relief. A flat, let-down feeling pervaded her spirit. The pilgrimage was done, and there was nothing to buoy her up.

She wsa tired and hungry. She would like a hot meal, but the dining car prices were beyond her. She bought two sandwiches and a container of milk, and opened the box of chocolates. The chocolates were not very fresh.

Her fellow passengers also lunched. A dash of rain caused a hurried closing of windows. The air was heavy with food odors. Children fretted, and grown people sprawled. Rose began to pity herself. What fun was it going to be at the lake, going through the motions of a good time? Always before, on her vacations there, Bart Reed had been able to run up for a day or two.

What fun was there ever going to be in anything?

When she got back to Yorke, she would enter night school and take up bookkeeping. If she was going to be a business woman, she would at least be a good one.

She dozed a little, waking stiff and unrefreshed. The chocolates had made a bad taste in her mouth. She wondered if any one would meet her at the lake. Oh, well, she might as well trudge a mile through the rain as anything else!

What silliness, this self-pity! She pulled herself together, powdered her nose, and adjusted her hat.

At last they reached Lake Cynthia. She was the only passenger to get out. The train from Yorke would be there in ten minutes. She had better wait for it, in case some one might come to meet her.

She dashed across the platform, through the rain, into the unlighted waiting room. Through a dirty window she saw a car coming from the direction of the lake. So Cousin George was meeting her, after all! Her spirits rose slightly.

The car came close and slowed down with a familiar purr. The driver jumped out and came into the room. It was Bartley Reed.

Minard's Liniment for dandruff.

From the Heaviest Woolens To the Filmiest Silks

THE same quality in Lux that thoroughly cleanses and preserves woollens, deals gently with the filmy things that are so beautiful and cost so much.

To use Lux for the entire family wash is to prolong the life of fabrics, thereby lessening the strain on the family treasury.

Important

The long enduring popularity of Lux has encouraged imitations. For your protection Lux is never sold in bulk—only in packages with Lever Brothers Limited name on each package.

WINDOWS---THE EYES OF ARCHITECTURE

By W. L. Symons.

The gospel of sunlight is spreading, and far and wide the marvelous effects of its healing influences—mental and physical—are being taught.

The dim, mouldy, carpeted parlor is being replaced by the sun-room and the sanitary hardwood floors, and the question of light and air in our homes is now conceded first place. How can we build to get most sunlight and the best views—and bring all out doors into our rooms—is the question of the day. The adequate heating of our homes is now possible—warm air and hot water superceding the old base burners and self feeders—and we can safely have a few more window openings in our rooms, without dread of cold houses.

Windows have been well termed "the eyes of architecture," not only to look through, but to be seen, and to evidence the character of the inmate.

That our well being is conditioned by the factor of our home environment is beyond question, and our health and disposition will be in direct proportion to the amount of sunlight we admit into our homes; and also in the degree that this healthy environment is beautiful and comfortable it will affect us favorably, or vise-versa.

Without doubt, in house planning, the location and size of the windows must be considered to a great extent from the interior. Each room—even the kitchen—should have, at least, one window through which direct sunlight may come into the room. Plan and replan your house until this is accomplished—and in an old house, watch your sunny walls and cut openings to let in the sunlight.

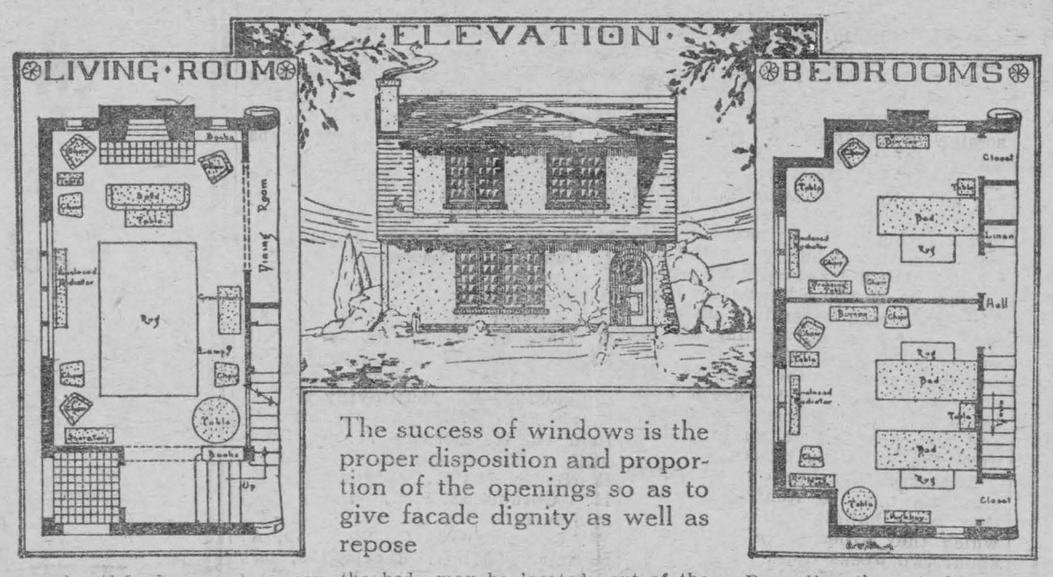

The plan of each room in your new home should be carefully considered as to the right location of the windows, in order to give proper wall and floor space for the furniture. The living room can be well sunlit from one side, with a four or five light mullioned window, and small openings on each side of the fireplace.

Bedroom windows, two if possible, must be placed so as to give proper light to the dressing table, and so that the bed may be located out of the draught.

If you cannot get direct sunlight—on a north wall—throw out a deep bay window, to project as far out as possible. Remember the word "bay" originally meant a unit of measurement of sixteen feet. What a caricature of the "bay" our modern planning has made!

Regarding types of windows—we have a choice of two—the lifting balanced sash, and the casement. Both have advantages, but without doubt the latter is the more artistic. If the sash are made to open outwards, much better chance is given for hanging of curtains—roller blinds are out of the question—and should be. The window frames may be divided by a transom so as to give a small upper sash, which can be opened without opening the entire height of the window; this will be found to be of great advantage in bed rooms, for night ventilation.

The charm of the casement as far as designing goes, is without doubt, its adaptability to grouping in the rooms, as well as for heights in stair halls, thus allowing great variety in application and design. As far as the weather is concerned, the casement can be made as serviceable as the lifting sash, by means of metal weather stripping. Care should be given in the selection of suitable hardware, on which depends the entire service of this style of window—as is evidenced by the types used by the metal casement sash manufacturers.

The success of windows is the proper disposition and proportion of the openings so as to give facade dignity as well as repose

Regarding the exterior of our window openings—the essential thing to remember is, that we have walls in which must be made simple openings—placed rythmically—and all ornament on or about them is of secondary importance, the important factor being to study the proper disposition and proportion of the openings, so as to give a facade dignity, as well as repose.

Remember, again, that windows must be governed to a large extent by the interior arrangements, and that the outside should never control the inside. Exterior design can be modified to meet interior necessities. and the interior planning can give way somewhat to exterior design.

"Custom dulls observation and sends reason to sleep"—but le us for that reason all the more be strong advocates of the crusade for "more light and air."

"Rose! Where have you been? Your mother said you were to come this morning, and I've met every train all day!"

This was too much, too much piling on of hardship, to have him here!

"I just came," she said carefully. Her teeth wanted to chatter. "What did you want to see me for?"

"Oh, everything!"

On Dan Seeley's hill, famous for moonlight, romance had dropped away from her life, leaving stark fact. Here, in a dingy waiting room, with a rusty, leering stove for witness, romance drifted back on its gold wings.

Another brief dash in the rain, then the snug, curtained inclosure of the roadster. Bart was talking, in broken bits of self-flagellation.

"All kinds of the usual fool—dazzled, I suppose—then lost—drowning. If it hadn't been for knowing where you stood—something to hold on to—"

"But I have no proper pride, Bart. I didn't play the game!"

"There is no game between us, Rose!"

(The End.)

J. S. Fletcher, master of detective fiction, has written another brilliant, startling, mystifying tale, "The Middle of Things." You will be lost in a maze of intrigues and tangled clues. It will seem that the situation can never be straightened out—and then the solution, startling but logical, will make everything clear. Oh, it's a great story. Begin it next week in this column.

Minard's Liniment for sore throat.

Mrs. Newlywed (to butcher): "What sort of joint do you think would go well with a perfect darling of a blue-and-white dinner service?"

Extensive tests are stated to have proved that short sight, or myopia, is neither caused nor increased by reading or any other form of near work.

Royal wills are never made public in Britain. They are kept in a special room of Somerset House, and not even the officials see them.

A Breaking Wave.

Brown—"Your wife says she's going to get a permanent wave."

Harduppe—"It's going to be a breaker, I fear."

Real Prodigy.

"Why do you call your child remarkable?"

"He's nine years old and plays no instrument, doesn't even recite pieces."

Pictures "painted" entirely with the juices of flowers were recently exhibited in London. The colors are obtained by rubbing the flower petals across the paper.

Ostrich feathers have so lost their popularity that these birds are now being killed in South Africa for their skins and flesh. Of the former light shoes are being made.

TOO LITTLE BLOOD

The Cause of Nearly All the Everyday Ailments of Life.

Too little blood—that is what makes men and women look pale and sallow and feel languid. That is what makes them drag along, always tired, never real hungry, unable to digest their food, breathless after even slight exertion, and often feeling that life is scarcely worth living. The doctors tell them they are anaemic— the plain English being too little blood.

More weak, anaemic people have been made strong, energetic and cheerful by taking Dr. Williams' Pink Pills than by any other means. The case of Mrs. A. P. Foster, Bowden, Alta., is excellent proof of this statement. Mrs. Foster says:—"Some years ago I was very badly run-down. My doctor attended me for several months and then told me I had better go South to spend the winter as my blood was so poor that he feared I would not stand the cold of our winter. I took his advice and went to my mother's, and as soon as she saw me she said, "Dr. Williams' Pink Pills are what you need." She got the pills for me and I began taking them. I had intended staying three months, but at the end of the second month I came home a well woman. When the doctor saw me he said, "You are all right now, but don't let yourself get run-down again or nothing will save you." Then last winter I had the influenza, which left me as weak and pale and miserable as before. Again I took Dr. Williams' Pink Pills and again they made me well and strong. I can gratefully recommend the pills for I feel that they have saved my life."

Weak, ailing men and women should begin taking Dr. Williams' Pink Pills to-day and note the speedy improvement that follows. You can get these pills from medicine dealers or by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

"Build—Build!"

Away behind the distant Irish mountains the rich glows of the evening sunset are framing them round, as well as throwing them out from backgrounds of orange, purple, red, pale yellow, and delicate green. Below these are the sharper outlines of nearer hills, up which the hazy evening mists are creeping. Nearer still, the plowed fields show up their rich, dark surfaces, ready for early planting; and the trees, in their winter tracery against the sky, take many intricate and quaint patterns, guides for the artist's pencil, or for the art designer's needle.

Nearer still, the lately bare flower-beds speak a lesson of hope, for there the first shafts of the pointed tops of daffodils and crocuses are appearing; snowdrops are nodding their graceful [illegible] and the ever cheerful primroses of every hue, first children of the spring, are heralding its coming.

On the garden rail a red-breasted robin has perched himself to rest a moment in his arduous task of building. We seem to hear in his merry song the message, "Build on,—build ever." And then he hops down, and collecting a few twigs, flies off to lay the foundation beam of his nest in the thick Portugal laurel, which grows near at hand.

Again he alights, a little nearer, and now his prize is a coil of white lamb's wool, and a shred of scarlet flannel, wherewith to decorate his home.

And "Build, build, keep on building," seems the burden of his blithesome song as he pours it forth on the dewy air of the clear calm evening, just as the first glint of the crescent moon is heaving above the horizon.

"Build, build,—never cease building," his song rings out, as he rises from one of the flower-beds where his search has evidently been prolonged, resulting in another twig and a long trail of soft blue-checked cotton stuff.

"Build, build,—keep on building." So he leaves us pondering.

Sign of Mourning.

Shaving off the beard was a sign of morning among the ancients. The Romans began shaving in 296 B.C. when the idea came form Sicily. It was as late as 1700 when shaving became even a half fashion in France.

A fly had fallen into the inkwell of a certain author who writes a very bad and a very inky hand. The writer's little boy rescued the unhappy insect and dropped him on a piece of paper. After watching him intently for a while, he called to his mother: "Here's a fly, mother, that writes just like dad."

DOMINION OBSERVATORY INVESTIGATING METEOR

An unusual and striking phenomenon was seen in the evening sky of Tuesday, December 29, about 5.25 o'clock, when a bright meteor, leaving an illuminated path which lasted for many minutes, lighted up the landscape over portions of southeastern Ontario, southwestern Quebec, and adjacent parts of the United States.

Meteors are known to be small bodies revolving in orbits, similar to that of the earth, around the sun, and controlled by its gravitative force. From time to time individuals of this innumerable horde, which are all normally dark and invisible, collide with the earth's atmosphere, and are immediately rendered incandescent by the friction arising from their terrific speed, which may in some cases reach to as much as 30 or 40 miles per second. As they are of all sizes, varying from mere specks to masses of many tons, they may be either burnt up in a fraction of a second, or in extreme cases may penetrate the earth's atmosphere and fall on its surface; or sometimes may only graze the atmosphere and escape again into space. Many thousands of such collisions occur every day, and were it not for the protecting blanket furnished by the air we should be continually and unbearably pelted by these celestial visitors, even to the point of rendering the earth quite uninhabitable.

The particular meteor in question, judging from the position in which it appeared, must have overtaken the earth in its orbit around the sun, and as a consequence its apparent speed was relatively slow—probably not more than a very few miles per second. Such slow-moving meteors are also called fireballs. From its unusual brightness it must have been of considerable size, but so far as present reports show it did not fall to earth as a meteorite, and must therefore either have escaped again into space or, perhaps more probably, have been entirely consumed before reaching the earth's surface.

Observers in Ottawa and the eastern part of Ontario and neighboring parts of Quebec saw the phenomenon in the southwest, while those north of lake Ontario and west as far as Hamilton, lake Simcoe and Grey county, saw it in a southerly or southwesterly direction; New York and Massachusetts observers apparently saw it in the northwest. It seems likely that somewhere in the region south of lake Ontario it should have been seen overhead, travelling in a general northerly direction. Unfortunately very meagre details from that section of the country have at the time of writing reached the Dominion Observatory, which is collecting information from all available sources, but more particularly in Ontario and Quebec. A large number of reports have been received at Harvard College Observatory, of Cambridge, Mass., and it seems likely that a fusion of all the data may serve to definitely settle the direction and extent of its path, as well as the elevation.

The study of meteors has a contact with so many branches of astronomy that it is desirable to investigate such phenomena as that of December 29 as thoroughly as the records will permit. The Dominion Observatory, Ottawa, would be glad to receive definite information from observers anywhere, more particularly as to the exact direction and position in which the meteor was seen, as well as the direction of motion and length of the apparent path in degrees; any other available details would also be welcomed.

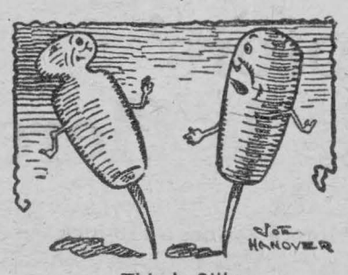

CHILDREN LIKE THEM

Baby's Own Tablets Are Effective and Easy to Give.

You do not have to coax and threaten to get the little ones to take Baby's Own Tablets. The ease with which they are given, as compared with liquid medicines, will appeal to every mother. None is spilled or wasted; you know just how big a dose has reached the little stomach. As a remedy for the ills of childhood arising from derangements of the stomach and bowels they are most satisfactory.

Mrs. Rose Voyer, Willimantic, Conn., says:—"I used Baby's Own Tablets in the Canadian Northwest and found them a wonderful medicine for children's troubles, especially indigestion and constipation. I have also given them to my children for simple fever and the restlessness accompanying teething and they always gave relief. I can recommend Baby's Own Tablets to all mothers."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

This Is Silly.

"Hello, how do you feel to-day?"
"Awl right!"

Who Invented Radio?

Who was the "inventor" of radio? The Soviet Government claims the honor for a Russian, Professor Alexander Stepanovitch Popoff, and has adopted a characteristic method of telling the world about it.

A new Russian stamp came to the notice of the writer a few days ago. Above an excellent likeness appear the words "Inventisto de Radio-Popov." The language of this inscription is Esperanto, though the other characters on the stamp are Russian.

The facts appear to be that Professor Popoff—admittedly one the great pioneers of wireless—publicly transmitted wireless signals over a distance of 40 metres in 1895, the year before Marconi took out his first patent for Hertzian Wave Telegraphy.

But Branly and Sir Oliver Lodge had been experimenting for some time along the same lines, and the latter gave demonstrationss in 1894 in which "coherers" (the earliest form of radio "detectors") were employed. It is not easy, therefore, to award the palm. Hertz, after all, was the first to produce the radio wave.

Eternal.

I have seen an anchor on the naked hills
And ocean-shells among the mountain tops.
But One, One only; for the Eternal Mind
Enfolds all changes, and can never change.

—Alfred Noyes.

Only one modern girl out of twenty knows how to sew properly, according to one expert.

Minard's Liniment used by physicians.

The Goblins' Bonfire.

There's a crackle and a splutter in the hollow next the oak,
And a little flash of firelight, and a little puff of smoke;
And sturdy little goblins are dropping from their backs
Their little stores of fuel packed in little mouseskin sacks.

There are kindly words unspoken, there are kisses left unkissed,
And promisess forgotten, and the chance that were missed;
There are little envious heart-throbs, and little loans unlent,
And letters left unwritten, and the gifts that were not sent.

There's a crackle and a splutter, and the grimy goblins stoke
Till there's nothing left but ashes of the bonfire by the oak,
A heap of smoldering ashes. Then upon his homeward track
Each weary goblin hastens with his empty mouseskin pack.

Now every goblin slumbers in his cozy moss-lined bed,
And the moon looks down in sadness on the ashes faintly red.

—Joe Walker.

Serenity.

With how much care and fret and useless trouble
We build our souls of unsubstantial things,
Until our minds grow ill, our bodies double!
For lacking wisdom, all our striving brings
Serenity no nearer. And the springs
Of joy we might have found are choked with stubble.
About our foolish roofless walls of rubble
Doubts brush, like bats, our faces with their wings.

We have not learned that ancient pagan calm
With which men, firm in courage, met despair;
Nor peace, which is the Christian's secret charm;
Nor Nature's deep serenity; the air
Of starlit evening, and a quiet river,
And Death a wind to cool the hottest fever.

—Theodore Maynard.

The face value of a friendly smile cannot be measured in dollars and cents.—Edward W. Young.

"DIAMOND DYE" ANY GARMENT, DRAPERY

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

The Empty Workshop.

"Let's go out and play." This inviting, childish command is so often heard by teachers and parents, and all too often the place of invitation is a barren yard or fenced piece of God's green earth, utterly devoid of equipment or incentive for active play. The playground is to the child what the home is to the home-maker—it is his workshop, his social center, and his land of adventure.

But the wide difference between these two institutions, the home and the playground, is that the home-maker has the supply of equipment of the home much within her own control. But the child has little or nothing to say about what equipment shall be placed on his playground. As a result we see little or no equipment on the average school and community playgrounds as we pass through the country.

Every home-maker has experienced the difficulty of preparing a meal without sufficient cooking equipment. She has, also, experienced the thrill of adding one or two much-needed pieces of new equipment to her home. For the child it is, also, difficult to play without anything to play with. The placing of a new slide, swing, or ball game equipment on the playground would be a thrill for the child in double portion.

In the number of letters received this week, little mention was made of the needs of the school and community playground. Almost universally, there is great opportunity for community organizations to sponsor this movement which would bring greater happiness to every child in the neighborhood.

On the Moors.

Is it Spring on the moors today, are the skylarks singing?
Do they sing in pearly blue skies to-day?
Has she come, my Lady of Green, with heather bells ringing?
What do the south winds say?

—Alfred Turner.

Take the pep from your dyspepsia with 15 to 30 drops of Seigel's Syrup in a glass of water as directed on the bottle. Any drug store.

An Extravagant Gesture.

As he passed the pavement artist a Scotsman with a lordly air flung a shilling into his outstretched hand. His wife immediately took him to task for his extravagance.

"Dinna fash yersel'," he said, "'twas a bad shilling."

"An hae ye no' a bad saxpence, ye gowk?" she retorted.

Golden eagles have been credited with carrying off live lambs and even infants. An expert photographer of birds now states that he has failed to find any evidence of this; he himself saw an eagle have the greatest difficulty in lifting a live hare off the ground.

RED ROSE "is good tea" TEA

And because you like good things you'll like Red Rose.

73

Song.

Go, teach the swan to swim,
The swallow still to skim,
The bat to go by night,
The lark to love the light,
The tortoise to step short, the gnat to move,
And counsel me to love.

Were I, like every creature,
But true to my own nature:
But let my lips impart
What lieth near my heart,
Then would I tell and tell in every place
Her goodness and her grace.

What's beautiful and fit?
A rainbow bravely lit,
The gliding sun at morn,
A hilside rope with corn,
Apple in bloom, a full-rigged ship at sea,
And my love kind to me
Soon it may be

—E. N. daC. Andrade.

Minard's Liniment for colds.

Mountain Calm.

Unutterably far, and still, and high,
The mountains stand against the sunset sky;
O little angry heart, against your will,
You must grow quiet here, and wise, and still.

—Frances Cornford.

The Regulator.

Mistress—"Mary, how is it that the breakfast eggs are sometimes boiled soft and sometimes quite hard?"

Mary—"Well, mum, I'm sure I don't know. I puts 'em in regular as the clock strikes eight and I takes 'em out promptly when I hears the train go by."

Pains in The Back Are Generally Danger Signs

Kidney Disease Will Lead to Fatal Results Unless Checked In Time.

Thousands have kidney trouble and do not know it. Many times a "run-down" feeling, dyspepsia, shattered nerves, dizzy spells, backache and a hundred and one other ills are due to the condition of the kidneys and liver.

Warner's Safe Kidney and Liver Remedy has been tested nearly 50 years and found a positive relief for kidney and liver troubles.

It is a vegetable and contains no harmful drugs; a most valuable and effective tonic. Goes right at its work and does it with positive method; soothing, stimulating and healing the broken down tissues and so builds up the body, gives it strength and restores energy. Get a bottle at once.

Sold by all druggists. Price $1.25 per bottle. Warner's Safe Remedies Co., Toronto, Ontario.

Proved safe by millions and prescribed by physicians for

Lumbago Colds Neuritis Neuralgia
Headache Pain Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe Accept only "Bayer" package which contains proven directions.
Handy "Bayer" boxes of 12 tablets
Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

In Selecting Wallpaper Try Samples In Home.

Do not decide on a wallpaper in the shop. Take home a sample and try it in the room where it is to live. See it with your furniture and your curtains, in the light that is to give it value. This is the only way to be certain that you are getting the right thing. You may be sure that your house wil be grateful for its new spring dress if you consult its taste in this fashion.

I went by the field of the sluggard and . . lo, it was grown all over with thorns. . . . So shall poverty come as a robber and thy want as an armed man.—Prov. 24: 29-34.

AFTER SHAVING

Dilute Minard's one-half with cream or sweet oil and apply to the face. Very soothing and refreshing.

MINARD'S "KING OF PAIN" LINIMENT

SICK ABED EIGHT MONTHS

After Taking Lydia E. Pinkham's Vegetable Compound Could Do All Her Work and Gained in Weight

Melfort, Saskatchewan. — "I had inward troubles, headaches and severe pains in my back and sides. I was so sick generally that I could not sit up and I was in bed most of the time for eight months. An aunt came to visit and help me as I was unable to attend to my baby and could not do my work. She told me to try Lydia E. Pinkham's Vegetable Compound, and after taking two bottles I could get up and dress myself. I also took Lydia E. Pinkham's Blood Medicine. When I first took the medicine I only weighed seventy-eight pounds. Now I weigh twice as much. If I get out of sorts or weary and can't sleep I always take another bottle of the Vegetable Compound. I find it wonderfully good for female troubles, and have recommended it to my neighbors. I will be only too glad to answer any letters I receive asking about it." — Mrs. WILLIAM RITCHIE, Box 486, Melfort, Saskatchewan.

TROUBLED WITH ECZEMA IN RASH

All Over Scalp, Itched and Burned, Cuticura Healed.

"I was troubled with eczema. It broke out in a red rash all over my scalp and after a time turned to pimples. It itched and burned all the time and caused my hair to fall out.

"I read an advertisement for Cuticura Soap and Ointment and sent for a free sample and after using it found great relief. I purchased more, and after using two cakes of Cuticura Soap and one box of Cuticura Ointment I was completely healed." (Signed) Miss Sarah G. Davidson, Summer St., New Glasgow, Nova Scotia.

Cuticura Soap, Ointment and Talcum promote and maintain skin purity, skin comfort and skin health often when all else fails.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.
Cuticura Shaving Stick 25c.

MORRISBURG JUNIORS ARE CHAMPIONS

(By one of the boys)

The boys of the Morrisburg Junior Hockey Team are the Champions of the St. Lawrence Junior Hockey League, having won the play-off series from Cardinal 6—5 on the rounds. On Thursday night of last week the Cardinal boys came to Morrisburg and held the locals at a tie 3—3; Friday night in Cardinal, the Morrisburg boys beat Cardinal 3—2, giving them a margin of one goal.

Line-up of Teams

Morrisburg		Cardinal
A. Loucks	goal	F. Coons
D. Wells	R. Defense	F. Dodge
J. Campbell	L. defense	E. St. Louis
L. Ryan	centre	J. Bass
H. Meikle	L. wing	C. Burell
E. Eamon	R. wing	S. Amell
R. Cassel	Sub's	K. Prossers
T. Lapierre		G. Omell
G. Coligan		B. Short

Referee—W. Coir.

The Junior Association wish to thank the hockey fans and especially the business men of town for their generous support during the past season. If there is anything that helps any team to win a Championship, it is for the players to know the home town is behind them.

For some time there has been a general feeling in this locality that the brand of hockey shown in this town has not been worthy of support. This may be true in some cases, but if there is anyone who has seen one of the Junior Hockey matches this season and still feels that way, we are safe in saying that that individual does not deserve much sympathy.

Our boys they've won the championship
In the St. Lawrence League this year,
But they haven't won a silver cup,
For there wasn't one up, we hear.
This is the first season
They've climbed the ladder to fame;
And if someone doesn't donate a cup
It will surely be a shame.

Mr. W. Coir was the referee,
Who represents clean hockey,
And that is surely the only game,
The rough stuff makes you knotty.
Now, when the games were over,
And the scores were added up,
Morrisburg were able to count six,
Cardinal could count but five.

Now we'll give to you the names
Of the boys representing our Burg,
They were just our regular players.
But each did his share of the work.
The Cardinal gang have an All-Star team,
For they surely made Morrisburg step,
And the only reason that we won out
Was that our boys were full of pep.

"Bus" Ryan, he played at centre ice,
A clean, fast man is he,
He's deserving a lot of credit
And a mark like "Single Gee."
When he drew the puck from centre ice,
He was away just like a flash,
And passed it to his friend 'Ernie',
Who slammed one in, just nice.

Ernie Eamon played the right wing,
And when he got the chance,
He snatched the puck with lightning speed
That made the rubber dance.
He back-checked his opponents,
And did it with all ease,
Sometimes they tried to ride him,
But he made them stop and wheeze.

Harry Meikle played the left wing,
No one more popular on the team;
But when it comes to hockey,
He is chucked right full of steam.
Now, this kid can handle the stick,
Sometimes he gets by them standing thick.
He has a shot that's hard to beat
When Big St. Louis doesn't put him off his feet.

"Don" Wells played on our defense,
A second "Cleghorn" was he,
For when an opponent met him,
They thought they'd struck a tree.
The school-boy did some nice stick-handling,
He had speed with it as well,
He was a combination player,
From the first dong of the bell.

"Scotty" Campbell also played on defense,
He got one minute behind the fence;
He made lone rushes down the ice,
And came near scoring on the goalie twice.
He's the swiftest shot that's on the team;
Has no dirty tricks, not even mean,
He played the game with all his might,
Yet had his face bandaged up that night.

Arthur Loucks guarded the nets
With his all-eagle-like eyes;
He stopped most every shot that came,
By batting them off like flies.
He's deserving of a medal,
Not of tin, but one of gold,
'Cause he guarded the main position
While the night was rather cold.

Gerald Coligan played as spare man,
And there was one thing plain to see,
That when called upon to relieve someone,
He was as tickled as could be.
"Jed" didn't have very much to say,
But he was thinking quite a lot,
For he was always there on time
Like Johnnie on the spot.

"Timmy" Lapierre was another spare
Who helped to win the game;
He was a nice clean player,
And a credit to the name.
Now, he is the smallest one on the team,
But not so small as he might seem,
For when he helps to score a goal,
He feels quite big, yet takes it cool.

"Reub" Cassel, he was also there,
The position he plays, we just don't know where,
Sometimes he plays within the nets.
Other times he stands aside and bets

Now, Reuben is a jolly old boy,
Sometimes he fills us all with joy,
When those times are, you surely can bet,
Well its when he's singing with the "Peerless Quartette."

Now there's Michael O'Malley to deal with,
And he's a very peculiar case;
The boys were saving him for the hard games,
When, all at once, he lost his pace.
We took him over to Brockville,
Where they have a covered arena,
They shoved him on and they pulled him off
And he hollered just like a hyena.

And there's another man worth mentioning,
His name is William Snyder,
He usually acts as manager
'Cause he always carries the cider.
Now, the last time we were in Cardinal,
Something happened that couldn't be helped—
He met a Jane at the corner of Main,
And we haven't seen him since.
Dear Readers, my verses are ended,
I'm not much at making rhymes,
For I've been busy at other things,
And haven't had very much time.
Now please don't take any insults
From the verses that I wrote,
I'm only a genuine hockey sport
And just wrote these for a joke.

General Motors' New Six is Here!

GENERAL MOTORS of Canada, Limited, now presents the New Pontiac Six—the *first car* ever developed and sponsored entirely by General Motors.

A car of high quality—the Pontiac Six possesses a degree of power, smoothness, comfort and beauty, never before combined in a car at or near its price.

Pontiac Six affords you a roadability of unusual scope—exhilarating power on hills—refreshing agility in traffic—a maximum speed you will use only in emergencies. This new General Motors' Six has a 110-inch wheelbase, and is equipped with low pressure tires, nickeled radiator, Fisher body with VV windshield, automatic windshield wiper, rear vision mirror, high speed window regulators and other fine car features.

Here, in brief, is the six you have always wanted—a six that represents the full scope of General Motors' engineering skill, manufacturing experience, purchasing power—*at a price so unexpectedly low* that only General Motors could possibly achieve it.

OUR CORRESPONDENTS

WILLIAMSBURG

Mr. and Mrs. Harry Foster of Mariatown were guests of Mr. and Mrs. John Hanson last Thursday.

Messrs. Chas Dewland and Ray Fader spent last Sunday at the latter's home in Iroquois.

Miss Oradel Shannette is spending a few days with her sister, Mrs. Lee Tuttle of Dundela.

Miss Eugenia Alguire and Master Grant Alguire spent a day last week with Mr. and Mrs. Elza Barkley of Dunbar.

Mr. Bert Merkley of Iroquois is spending a couple of weeks at the home of Mr. Edgar McIntosh.

Mrs. Ora McIntosh spent a few days last week with her parents, Mr. and Mrs. Sam Allison of Dunbar.

We regret to report the serious illness of Mrs. Alex. Madden and hope she will soon be on the read to recovery.

Mrs. Edgar Alguire and little son Claire were guests of Mrs. Mary Shannette on Tuesday of this week.

Mrs. Isaac J. McIntosh entertained a few of the W.M.S. women at a missionary quilting bee on Friday of last week.

Miss Meda Whitteker is at present acting as nurse to Mr. Thomas Eastwood after spending the past year nursing Mrs. Nettie Strader.

We are sorry to report that Mr. Eastwood is not recovering his usual health.

Mrs. Clifford McIntosh, Mrs. Ross Beckstead, Mrs. Alfred Casselman and Miss Helen Becker spent Thursday last with Mrs. Bert Whitteker.

Sympathy is extended to Mr. T. Weaver in the death of his sister-in-law, Mrs. W. A. Weaver of Lakota, N.D.

On Good Friday evening at 8 o'clock services will be held in the Lutheran Church.

Holy Communion will be administered in the Lutheran Church on Easter Sunday morning.

Visitors at John F. Casselman's on Wednesday of this week were Rev. Iseler and family."

AULTSVILLE

The entertainment to be given in "Trinity" United Church Sunday School room under the auspices of the Mission Circle of that Church has been postponed until Monday evening March 29th, at 8 o'clock.

Some of Mrs. Goodwins music pupils will assist in the program and refreshments will be served at the close. A free will offering will be taken at the door. Everyone welcome. Come and enjoy a musical evening.

Mr. Edgar LaBarre of Iroquois was in town on Saturday.

Mr. A. F. Goodwin, Mr. Geo. Hagarman and Mr. Carl Markell are on the sick list this week.

The Womans Missionary Society of "Trinity" United Church held a very successful quilting at the home of the Treasurer, Miss M. Morgan on Tuesday. Two quilts were finished ready for the supply work.

Quite a number of our young folks had a delightful sleigh drive and party at the home of Mr. 'Jack' Hickey "Frogmore farm" East Williamsburg, on Monday evening.

Mr. Thorold Lane who has been on the staff of the Montreal Bank in Belleville for a few months is recuperating at his home here from an attack of LaGrippe.

Mr. George W. Markell is spending the week at Belleville the guest of Mr. and Mrs. Harold Froats of 13 Brassey St.

Master Ellery Bowman is visiting his grandparents, Mr. and Mrs. Rutley of Newington.

Mr. Roy Brownell of Woodlands was calling on friends here on Monday.

Mrs. Cyrus Stata of Farrans Point spent Saturday here with Mrs. Geo. Sampson.

Mrs. M. Burton of Archer spent the past week here with her daughter Mrs. A. N. Dafoe.

The Womans Missionary Society of Immanuel Presbyterian Church purpose holding a "Conundrum Tea and Moving Pictures in that church, next Wednesday afternoon and evening. Tea 25 cents. Picture Show 15 cents.

CEDAR GROVE

Quite a number from here attended the tea meeting in Gallingertown United Church on Tuesday evening.

Mrs. Fred Dafoe and Miss Gretta accompanied by Mrs. P. E. Pier of 3rd Avenue spent the week end in Morrisburg with their cousin, Mrs. Crowbar.

Mr. and Mrs. Selim Shaver visited Mr. and Mrs. E. Dennison, Archer, Sunday.

Mr. Harold Buchanan and sister, Miss Mabel visited Mr. and Mrs. C. Froats, Gallingertown, the 21st.

Mrs. F. McConnell and Miss Muriel spent Thursday, with Mrs. John McConnell, 3rd Con.

Mrs. W. B. Heagle and children of Second Concession spent Sunday with her sister, Mrs. Wm. Jarvis here.

Mr. Wm. Myers was in North Williamsburg on Monday.

Mrs. Selim Shaver has returned home from Cornwall where she was visiting her daughter Mrs. Colin McMillan.

Mr. and Mrs. Crites and baby, Third Avenue spent Sunday with Mr. and Mrs. Earl McIntosh.

Mr. Earnest Shaver, Second Con. spent Friday at Mr. Selim Shaver's.

PAYNE VALLEY

Mr. and Mrs. Charlie Meldrum Berwick spent Sunday evening with Mr. and Mrs. Will Meldrum.

Mr. and Mrs. Will Meldrum spent Sunday with the latter's parents, Mr. and Mrs. John Dawson, Newington.

Mr. and Mrs. George Eligh and daughter, Mae and Ruby spent Sunday with friends at Grantley.

We are sorry to report Mrs. Robert Maclean on the sick list. We hope for a speedy recovery.

Died—At Newington on Monday, Mrs. Jane Barkley, in her 90th year,

Miss Helen McIntosh is spending a few days with Mrs. Rupert McIntyre.

Mr. Merrill Nesbitt was calling in our Valley on Monday.

Mr. and Mrs. David Cameron were visiting friends at Grantley recently.

EXECUTOR'S SALE OF LAND

For the purpose of dividing the estate of P. J. A. Saddlemire deceased, among the persons entitled thereto, the surviving executor of said estate will offer for sale by Public Auction, at the Law Office of R. F. Lyle, of Morrisburg, Ont., on Saturday, April 10, 1926, at two o'clock in the afternoon, the following lands and premises, namely: Part of Lot number Thirty-one in Block number Sixteen in the Village of Morrisburg, in the County of Dundas, according to the registered map of said Village made by Walter Beatty, P.L.S., said Lot lying at the corner of the Gravel or Nine Mile Road and Rose Street, according to said map and said part being described as follows: commencing at the Northwest corner of said Lot being at the intersection of the East side of the said Gravel Road and the South side of said Rose Street, thence Southerly along the West side of said Lot a distance of thirty-two feet more or less to a point opposite the middle line of the double dwelling house now standing on said Lot, thence Easterly parallel to Rose Street through the middle line of said house and of the addition at the rear to a distance of three feet from the rear wall of said addition, thence Southerly parallel to the said Gravel Road, a distance of twelve feet more or less to a point opposite the Southeast corner of the said addition at the rear of said double house and distant forty-two feet more or less from the front of said Lot, thence Easterly along a fence to the rear of said Lot a distance of sixty-six feet more or less and so as to pass through the middle line of a stable now standing at the rear of said Lot, thence Northerly along the rear of said Lot to Rose Street a distance of forty-four feet more or less, thence Westerly along Rose Street one hundred and eight feet more of less to the place of beginning.

The dwelling-house on said lands is connected with the water-works and electric light system of Morrisburg.

TERMS OF SALE—Twenty per cent of the purchase money to be paid on the day of sale to the Vendor's Solicitor and the balance when the deed of conveyance is ready for delivery without interest.

The sale is subject to the present lease to Edward Duval, which expires on the first day of May, 1926. Subject also to a reserve bid.

Further particulars and conditions of sale will be made known on the day of sale and on application to the undersigned.

R. F. LYLE,
Solicitor for Vendor.

Radford Link, Auctioneer.

"Berryholm Poultry Farm"

BABY CHICKS

S. C. WHITE LEGHORNS

We are again taking orders for day old chicks from our high egg production poultry. Our Leghorn Chicks will all be from 2 and 3 year old breeders, carefully culled for size, type and egg production and mated to cockerels with three generations of from 260 to 300 egg breeding behind them.

BARRED PLYMOUTH ROCKS

Our Rocks will be all from hens of the well-known O. A. C. Strain mated to cockerels from eggs direct from the Kemptville Agriculture School. We have an established reputation for hatching big strong chicks that will live and grow into real money-makers. In our five years' experience we have never yet been able to supply the demand although we have increased our capacity each year. Let us have your order early. It will receive our careful consideration whether for 25 or 1000. We would be pleased to have you inspect our farm and stock.

Prices—April and May S. C. White Leghorns—
50 Chicks $9.00; 100 Chicks $17.00; 500 Chicks, $80.00; 1000 Chicks $150.00;
Barred Plymouth Rocks—
50 Chicks $10.00; 100 Chicks $19.00; 500 Chicks $90.00; 1000 Chicks $175.00.

WE SHORTENED OUR WORK

BY W. C. SMITH.

We have been paid in real money as well as in time and steps to rearrange the interior of our poultry house. An investigator for a large feed concern told us once that he had visited most of the larger poultry flocks of several states and that in his honest opinion at least two-thirds of the arrangements were not more than 50 per cent. efficient for housing and feeding. In grouping his specific reasons for this condition we found it largely due to the following causes:

Poorly arranged, inadequate, unhandy water supply.

Lack of mash hopper capacity and wasteful hoppers.

Feed rooms, usually the barn or granary, located too far from the poultry buildings.

Floors cluttered up with unnecessary appliances, wasting room needed for the birds and making extra work.

Lack of dropping boards and nests made of boxes, old pails and odds and ends, making the house difficult to keep in a sanitary condition and adding extra work in cleaning.

We found that, without being conscious of it, we had been wasting time and efficiency through some of these things and set about to correct them. Our first improvement was in the water and feed supplies.

Our main houses are 16x48 feet, holding approximately 275 birds. In addition to these, two or three 9x12-foot colony houses are used for breeders, surplus cockerels and other needs which arise from time to time. The first step was to group these colony houses where they could be passed without extra steps on our way to the main buildings.

Water bothered considerably. It is no small task to supply 400 or 500 hens where water must be carried a hundred yards. We had no water system except a pump that could be operated either with the gasoline engine or by hand, and no supply tank of any sort except the stock tank. All that was necessary to do away with the water toting was to lay a few hundred feet of iron pipe from the lower pump outlet to the houses. It was not even necessary to bury it below freezing depth, for the grade was sufficient to keep the pipe drained, and so far it has given no trouble.

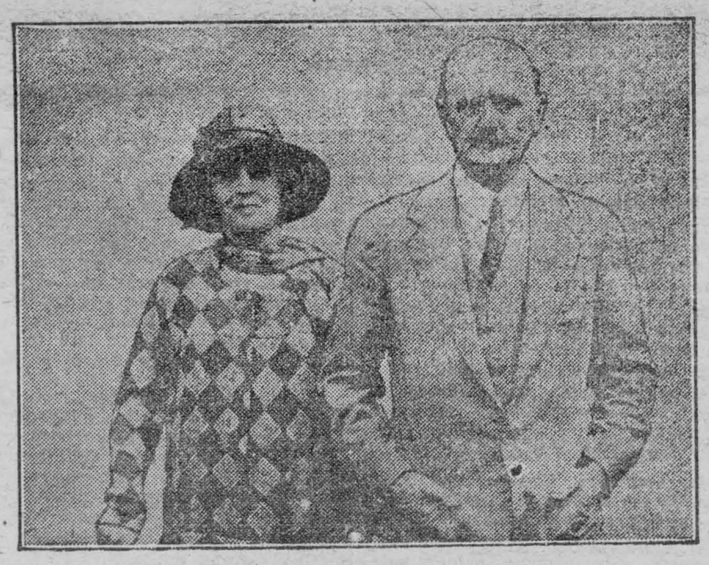

At the outlet a half-barrel was set in the floor of the house. This has a hinged lid and is provided with an overflow pipe so the fowls cannot get into it and there is no surplus water. Pails are used for the colony houses and are filled from this half-barrel.

Had it not been for the natural grade we would have buried the pipes below freezing depth and forced the water. However, that would have been a wonderful improvement over carrying the daily supply in pails. Pipe was bought second-hand and this simple but efficient system cost less than a five-dollar bill.

Some extra mash hoppers were built and the feeding troughs of the old ones widened slightly. This gives a two-wseks mash supply and less feed is wasted by the birds. Each hen can feed without being crowded. More eggs have resulted. At one house an outside grain bin was built from used lumber. This, supplemented by some heavy oak barrels and bought at the grocery for a dollar each and fitted with tightly hinged lids, hold a two-weeks supply of grain. Each two weeks a supply of mash and grain is loaded onto a one-horse sled or wagon and the houses supplied.

Where there was need, wall nests took the place of boxes. These are merely shelves with partitions. The wall of the house makes the rear of the nests. They are swung at the top so they can easily be removed for renovation.

Altogether we spent $15 for improvements. It formerly took at least thirty minutes night and morning to feed, with an extra trip or two during the day to refill the water vessels. Now fifteen minutes is ample time for feeding and there is no water to carry.

THE "BULL OF BASHAN" IN CANADA

Field Marshal Sir Edmund Allenby, the conqueror of Palestine and the deliverer of the Holy Land from the Turk and the modern Crusader who has achieved what had not been done since the Crusades, landed at Victoria recently from the S.S. Aorangi, which has come from Sydney, New South Wales, and touched Honolulu en route. His Lordship is known because of his thrusting offensive in the war as the "Bull of Bashan," will make a trip across the Dominion. Photograph shows Lord Allenby with Lady Allenby.

DIFFERENT WAYS OF PREPARING VEAL

A Calf's Head will make several excellent meals. Split the head open, remove the brains and tie them in a thin cloth, chop off the jaws and discard them, along with the eyes. Wash the head and put to boil in water to cover. When partly done drop in the brains. Boil slowly until the meat will leave the bones, then chop it finely along with a slice of fried ham. Season with salt and cayenne pepper, stir in a beaten egg, a few bread-crumbs, and the brains (unless you save them for making croquettes) and put in a baking-dish. Sprinkle bread-crumbs over the top and dot with butter. Add enough liquor to half-cover the mixture and bake in a moderate oven for one-half hour. Strain the bones from the rest of the liquor, season with salt, a dash of cayenne pepper, a few drops of lemon juice, and slice a hard-boiled egg over the top and serve hot. Bread cut into dice and fried in butter may be dropped into this soup when served. The tongue can be boiled for another meal.

Mock Birds are nice for a company dinner. To make use veal cutlets, one-half inch thick. Divide each cutlet into pieces about 2x4 or 2x5 inches, dust each piece with salt, pepper and poultry seasoning, roll and fasten with wooden toothpicks or tie with string. Brown the birds in the fat from the cutlets or other dripping, then add one-half cupful of water or enough to cover the bottom of cooking utensil. Cover closely and simmer very slowly until tender, adding more water if this cooks away. At serving time, remove fastenings and lift carefully to platter and cover with a gravy made by adding flour to the fat, blending until smooth and then adding milk to make sauce the consistency of thick cream.

Veal Pot-Pie: Cut meat into small pieces, drop into boiling water and cook until tender. Then add twelve potatoes, six small onions and two carrots (quartered). When the vegetables are tender, thicken the gravy, put all in a baking-dish and cover with strips of pastry in lattice fashion. Bake for one-half hour in a hot oven.

For Mock-Turtle Soup, clean and scrape a calf's head, discard the eyes, cut off and throw away the jaws. Cover with water and boil until the meat is tender, then cut the best pieces from the bones and set aside. Return the bones to the broth, and add some chicken bones to flavor, if you have them. Add two sliced onions, a sliced turnip, some sticks of celery and a few sprigs of parsley. Add a piece of stick cinnamon, one clove, one or two allspice, a grating of nutmeg and salt and pepper to taste. Cook one and one-half hours, then strain through a sieve and thicken with a little browned flour stirred smooth in cold water. Then add the veal cut into dice, a little chicken meat, if you have it, and simmer 20 minutes. Dish into hot plates and drop a slice of lemon in each to improve the flavor.

Roast Veal is improved by a stuffing of mashed potatoes seasoned with a finely minced onion and chopped parsley. Make a pocket for the stuffing by removing the bones. If the bones are well cracked and rice or barley added, they will make a fine broth. Brown gravy for veal (or lamb) is particularly good if a little tart jelly is added to it.

Veal Loaf is nice for luncheon or supper. It requires three pounds of uncooked veal, one-fourth pound of salt pork or ham (both finely chopped), one cupful of rolled crackers, three eggs (well beaten), one teaspoonful of sugar, two teaspoonfuls of salt, one-half teaspoonful of pepper. Form into a loaf and bake two hours. Slice cold.

Care of the Hair.

The number of hairs on the scalp of a full-grown adult is supposed to be about 100,000, but the average scalp seldom has that number. An expert says that cases of falling hair are divided into two classes. One class is idiopathic, which means that nobody knows any real reason why the hair falls out. It just falls out and that's the end of it. The other big class includes all those cases in which the hair falls out as the result of some disease.

In the first class the hair may fall out all at once or it may fall out in patches. In such cases in which the loss of hair seems to have some vague nervous origin it seldom is permanent and the hair sooner or later grows back again. After a severe fever there is a tendency for the hair to fall out. This usually takes place about three months after the time that the fever was at its highest.

It takes a hair about six weeks to grow an inch, and cutting the hair does not improve its growing qualities. The hair is not a hollow tube. This fact will surprise those who are inclined to have the hair singed occasionally. Singeing the hair is often recommended to overcome splitting of the ends and to prevent falling of the hair. According to the beauty specialists, "it closes the tube and keeps the fluid in the hair." But the hair has no sap. The long hair of a woman has a tendency to split at the ends and the singeing of the tips substitutes a charred blunt point for one that is cut clean. Greasing the hair lightly will supply oil, the lack of which causes the hair to split.

The hair is nourished by the blood that comes to the hair roots. In order to prevent the hair from falling out, a certain amount of time each day must be devoted to head hygiene. Keep the scalp clean. Wash the hair once in two weeks, using a good soap. After lathering the hair well it is important to rinse repeatedly with warm water, to make sure that all the soap is removed from the hair and the scalp. In drying the hair it is not necessary to rub vigorously, but rather to pat it with warm Turkish towels. After drying the scalp, start a vigorous circulation of the blood by rubbing with the ends of the fingers. Avoid scratching the scalp. If it seems dry, a small amount of pure olive-oil may be rubbed in. Part the hair and rub the oil into the scalp. If warmed, the oil will penetrate the scalp more readily.

Oily hair is usually caused by some disorder of the digestive organs, and frequent shampooing will stimulate the oil glands and increase the oiliness. Once a month is often enough for the soap-and-water shampoo. Between times, the dry shampoo will cleanse the hair and improve its appearance.

For the dry shampoo, use powdered orris root, dusted evenly over the hair (not the scalp). Allow to remain two hours, then brush out. Cornmeal is also good. Talcum powder may be used in an emergency, but is likely to sift into the pores of the scalp, and that is what you want to avoid.

The beaten white of an egg will cleanse the hair quickly and easily. Allow the egg to remain in the hair until it is dry as powder, then brush out. This does not clog the pores, but it will straighten out artificial curls and waves.

Wearing a tight hat does not cause the hair to fall out, so much as wearing the hat for long hours at a time and a lack of open-air exercise. The scalp must not only be kept clean, but it must have air and sunshine. In fact, modern life has brought about many changes, and the fact that we no longer depend upon a heavy head of hair for protection has had a serious effect upon the scalp.

Aluminum Paint Checks the Heat.

If the steam or hot-water radiators in your home are painted with aluminum paint their radiation effectiveness is reduced about 15 or 20 per cent. This means they are giving off that much less heat than they would were they covered with a more effective paint. In other words, all conditions being equal, larger radiators are required to heat your room in cold weather. These are facts, proven by government tests. However, on steam or hot-water pipes leading to radiators or storage tanks, the aluminum paint is an advantage as it helps keep the heat in. The tests also show that where aluminum paint is applied to the under side of thin metal roofs, it reduces by half the amount of heat radiated underneath, as compared with under surfaces of corroded metal or those covered with ordinary paints.

It is not necessary to remove the old paint before applying the aluminum. Nor is it necessary to remove it from radiators to increase their effectiveness by applying another kind. This is due to the fact, paradoxical as it may seem, that in radiation it is the character of the surface that is important, and the effectiveness of aluminum paint in suppressing radiation, or of non-metallic paints in promoting it, is not affected by what they cover up.—H.

Honey for the Table.

My fondness for honey led me to consider keeping a few bees some years ago, although I had no time to spend as a bee-keeper. By chance I happened to hear of a simple way to have my own honey. The plan, which I adopted, is as follows:

I keep my bees in a cupboard, the dimensions of which are 2 x 2 x 4 feet. In this cupboard are two shelves, with an equal space between each shelf and the top and bottom of the cupboard. A space is left between the shelves and the sides so as to let the bees circulate freely, the shelves resting on brackets nailed to the back of the cupboard.

This improvised "hive" is placed in a corner of my barn. A runaway extends from the bottom of the cupboard out through a hole cut in the side of the barn, acting as an entrance and exit for the bees.

The door is the same size as the face of the cupboard, 2 x 4 feet. It is equipped with a window so that the activity of the bees can be watched occasionally. This window is shuttered so that the light is excluded at all other times.

I have never been troubled by swarming, due to the fact, I imagine, that the bees have plenty of room. Neither have I been troubled with millers.

I do not even bother with boxes, as the bees use the shelves for their honey. I remove the honey on frosty mornings.

Professional bee-keepers may laugh at my plan. Personally I am willing to admit that I know nothing of the technical points of bee culture. The one thing that I do know is that this plan has worked fine for me. My table is always supplied with honey—at the least possible effort on my part.

Throwing mud at a good man soils your own hands.

I Got Rid of Quack Grass.

I have completely eradicated quack-grass from my farm, and I believe you would like to know how I did it.

Commence any time in the year that you can get at it, but be sure that you can remain right with the job faithfully until completed. If a firm sod, you should use a breaking plow with a jointer instead of a coulter. Thus, you can turn the sod completely over and leave it smooth and flat.

Plow six inches deep, or deeper if possible. This will give a few inches of soil on the surface, which the disk, set at as steep an angle as possible, will pulverize. At the same time the disk will cut the root-stalks and throw them to the surface.

Always lay the disk half-way; by so doing the surface is always kept smooth and level. Now disk crosswise in the same manner and continue until you have formed a perfect dust mulch all over the field. This dust mulch will prevent evaporation of moisture. As soon as the green blades begin to show, commence disking again, and keep going until every spear of green has been destroyed. Do not bother to rake up the root-stalks and haul them off and burn them. Leave them right there for they will add humus to the soil — a mighty important factor. Where these roots are the thickest, there you find the best growth of corn.

When this work is commenced after harvest, continue the disking till May 24 and plant to corn, or a cultivated crop.

One plowing of quack is enough if properly done. The dust mulch will hold the moisture, and the roots below said mulch must either grow or decay. Your continuous disking prevents the roots from getting a green leaf on the surface, consequently the roots must die and decay.

Have the disks good and sharp, so they will shave the roots right off. Step on the gas, so as to give motion enough to throw the roots out to the surface. Remember—no raking and hauling off the roots, no second plowing. Do this work in a workman-like manner and you will have satisfactory results.—A. A. H.

Bowel Troubles in Fowls.

Olive oil (the dose is a tablespoonful) has been successfully used for bowel troubles in fowls. Castor-oil is also valuable in cases of diarrhoea. A dose will remove irritant matter from the intestines, and cool the bowels. Some poultrymen use castor-oil and follow with a dose of olive-oil. Other recommended treatments for diarrhoea are:

1. A few drops of spirits of camphor in the drinking water.

2. A half-teaspoonful of paregoric per fowl daily.

3. A teaspoonful of soda water (made by adding three teaspoonfuls of bicarbonate of soda to a pint of water).

4. Finely ground charcoal added to the mash food.

5. A tablespoonful of lime water in each pint of drinking water.

6. Ten drops of tincture of nux vomica for every half-pint of drinking water. There are some who claim this will check bowel disease when all other remedies fail.

7. Rice boiled to a gummy mass and fed by itself for a few days.

8. Ten drops of laudanum in a teaspoonful of water. If this dose does not correct the looseness, the dose should be increased next day. Two or three doses generally effect a cure.

When the excrement secreted by the kidneys, which is normally pure white, appears yellow, though the droppings are solid, and the bird appears perfectly healthy, look out for bowel troubles. When the discharges are streaked with blood, it is time to give preventives for diarrhoea. Greenish discharges, turning to frothy white, are a symptom of cholera.

For severe dysentery, a tablespoonful of common baking soda, mixed in water (using plenty of it) is excellent. Repeat three times a day until the fowl recovers. This is especially recommended when the bowels indicate a cholera condition.

Th general causes of diarrhoea are indigestible food, a chill, coarse or half-cooked feed, too much bran, scarcity of grit, exposure to heavy rains, irregular and improper feeding, filthy water, and too much fat.

Diarrhoea may also be produced by keeping the fowls a long while on hard, dry feed, and then giving a liberal supply of green feed. Deprived of green feed for any length of time, fowls eat so greedily that they become gorged, and the result generally is diarrhoea. When diarrhoea starts the feathers become soiled around the vent.

Looseness of the bowels is an indication of indigestion, or derangement of the digestive organs. Fowls that are in good health seldom suffer from bowel trouble.

To Prevent Horns on Calves.

Dehorn your cows when they are calves from one to two weeks old. Here is how: Clip the hair away from the little horn button and rub the button with caustic potash. Rub until a spot about the size of a dime appears red, but not bleeding.

Put caustic on the button only. Don't turn the calf out in the rain immediately after putting the caustic on, for this will wash the caustic into the calf's eyes. You can get caustic at the drug store for a few cents. Do not handle caustic with the bare hands; use an old glove. Caustic must be kept in an air-tight container to preserve its strength.—W. F. H.

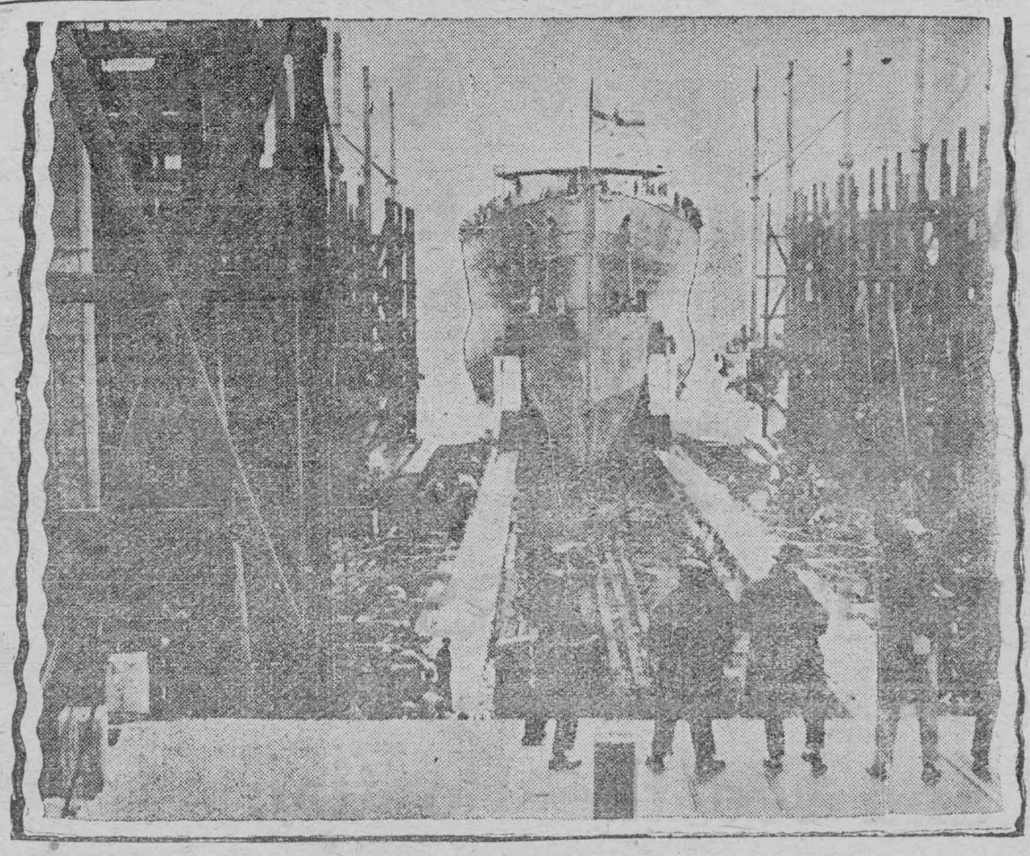

"Keeps My Feet Dry."

"It keeps my feet dry," said the hired man. He cut from an old inner tube a piece of rubber a trifle larger than the sole of his shoe. In resoling his shoes he placed this piece of rubber between the shoe and the new sole, after which he nailed firmly and trimmed.—J. L. B.

Well-placed windows in a hog house that runs east and west, will admit nearly twice the amount of light that would enter a similar house extending north and south. Sunlight is a necessity in keeping the hog house dry, warm, and sanitary.

Don't feed the sow for the first twenty-four hours after farrowing. She should, however, have all the luke-warm water that she desires. One should gradually increase her ration of light feeds of bran and ground grains, so that in ten days or two weeks she will be receiving a normal feed.

When the farmhouse medicine cabinet contains only the simplest of first-aid remedies and when the doctor is called in to prescribe for all illness, the health of the rural family will be much improved.

NO DETAILS GIVEN

The utmost secrecy has been observed regarding the constructional design of the new British cruiser, Suffolk, the recent launching of which, the other day at Portsmouth, is shown above. The vessel is the first of five cruisers of the county class now under construction.

THE OVERSKIRT FIGURES IN AFTERNOON MODES.

A note of chic simplicity is a feature of this satin frock, which has its graceful overskirt curved to form a deep V in the front and back. Long full sleeves of contrasting-color satin are trimmed with bands of embroidery and gathered into tight little bands at the wrists. The diagram shows just how the dress is put together, and pattern No. 1268 is in sizes 16, 18 and 20 years (or 34, 36 and 38 inches bust only). Size 18 years (36 bust) requires 5⅛ yards 36-inch, or 3 yards 54-inch material, with 1⅜ yards trimming-braid for the sleeves. Price 20c.

Every woman's desire is to achieve that smart different appearance which draws favorable comment from the observing public. The designs illustrated in our new Fashion Book are originated in the heart of the style centres and will help you to acquire that much desired air of individuality. Price of the book 10 cents the copy.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

Making Medicine Palatable.

It is always an unpleasant task to give a small child a dose of medicine which it dislikes. When I had to give my small daughter daily doses of one of the mineral oils so much used now, I tried putting just a few of the chocolate sprinkles, or shot, which are used to decorate cake icings on top of the medicine. Now she takes it eagerly. Finely cut chocolate would work as well.—R. B. G.

I have always thought the actions of men the best interpreters of their thoughts.—Locke.

FIELD MARSHAL VISCOUNT ALLENBY GIVEN ROYAL WELCOME BY TORONTO CITIZENS

Last Crusader Tells Thrilling Story of Campaign in Palestine When the Cross Triumphed Over the Crescent and the Holy Land Was Delivered from the Infidels.

Toronto, March 22.—Tall, broad-shouldered, bronzed, Field Marshal Allenby presented a striking picture as, in evening dress, with his many decorations on his breast, and broad scarlet sash across the shirt front, he rose to speak to the crowded audience in Massey Hall. He plunged with soldier-like directness into the subject on which he had been asked to speak—the Palestine campaign and its influence on Imperial communications. There was no attempt at studied phrase-making in his speech. His sentences were uttered with great rapidity, with perky pauses between, calling to mind images of sorties and sallies, attacks and counter-attacks.

He detailed the campaign in Palestine from the time he took charge in June, 1917, after having been transferred from the Western Front, where the battle of Arras had just ended, and where he had fought side by side with Canadians at Vimy Ridge. From that time reverse after reverse was the lot of the Turks and their German commanders, due to the brilliant tactics of General Allenby. With due modesty, the speaker almost failed to allude to his part in the compaign, but was warm in his praise of his cavalry and infantry and the intomitable courage they showed under most trying conditions. Lord Allenby carried in his mind's eye a picture of the Palestinian battlegrounds, and in his description of the campaign moved regiments and squadrons from place to place with the facility of a staff officer seated before an ordnance map, by to the majority of the audience the process was somewhat bewildering. The Judean hills were crossed and recrossed. There were pauses on the mountains of Moab and in the valleys of Hebron. Sometimes the troops were on one side of the Jordan and sometimes on the other. Modern armies battled in Gath and at Gaza and tramped again over storied ground from Dan to Beersheba.

The story of the Palestine compaign from the lips of the leader gained in fascination, especially that portion referring to the taking of the Holy City. General Allenby had so planned matters that no shot was fired and no stone damaged. The Turks had been completely out-manoeuvred and the city fell without bloodshed. Some years before the wall of the city had been creached to allow the Kaiser to make his bombastic entry on horseback and the breach was still there. But Allenby did not enter that way. "To have followed the feet of the Emperor's horse would have been too mumiliating, everyone thought," he commented, "and I don't think a single soldier went that way." Nor did the General. Quietly, and on foot, he entered by the Jaffa gate.

In concluding, Lord Allenby said he did not hold with the strategic purists that every man, every gun, every airplane should have been concentrated on the Western front. Undefeated in the East, Germany would have continued trying to fulful her dream of an Eastern empire, but that ambition was finally quenched, her prestige submerged. Britain, however, had consolidated her position. Despite what had been said, Egypt was a friendly country, he remarked, speaking with the authority of one recently returned from there. British control of the Suez was assured. It was essential that Britain should have not control of the seas, but freedom of the seas, which did not separate but linked together the scattered portions of the Empire. That Empire was bound together by self-sacrifice and self-interest. He had Biblical authority for saying "Love thy neighbor as thyself," but, he commented, it was not said "better than thyself."

BRITISH FARMERS SAILING FOR CANADA

Well-to-Do Immigrants Now Coming Are Fine Colonization Material.

A despatch from London says:—Eleven hundred immigrants who left for Canada on Thursday on the Antonia contain some of the finest colonization material that it would be possible to imagine.

Among them are 65 approved families with seven, eight or ten children each, but with enough capital to maintain them for a time or enable them to return. There are scores of farmers who have owned their own farms in this country.

One farmer sold his 30 acres by Radnorshire to invest his fortune in a fruit farm near Vernon, British Columbia. He is accompanied by his wife and several children, and has sufficient money to go first to Toronto and take instruction in mixed farming. Another, who from his farm in Kent distributed vegetables in wholesale quantities to every corner of the British Isles, is traveling with his wife, three sons and a daughter, to take up mixed farming near Amherst, N.S.

Those men are not tired of farming, but say it does not pay in England.

Dowager Queen of Denmark Suffers from Pneumonia

A despatch from Copenhagen says:—The Danish queen mother, Louise, is suffering from an attack of pneumonia.

Dowager Queen Louise of Denmark was born 1851.

King George Goes to Windsor Instead of Mediterranean

A despatch from London says:—King George's health is so good that he will not spend Easter in the Mediterranean as he did last year.

He will go to Windsor with Queen Mary for Easter, and probably stay there during April.

HISTORIC BRIDGE SWEPT AWAY BY ICE

Flood Conditions Along the Allegheny River Grow More Serious Hourly.

Franklin, Pa., March 21.—The Big Rock bridge, one mile below Franklin, and above which the ice in the Allegheny River has been gorged ever since January 20, was swept into the river at 7 o'clock to-night, 20 minutes after a carload of passengers bound for Oil City, passed over the structure.

The pressure of the accumulated ice against it to-day with part of the big pack a mile up stream giving way and jamming against the Big Rock pack, was so great that the piers on the Pennsylvania Railroad, on the eastern side of the stream, were weakened. No person was injured.

The collapse of the bridge came unexpectedly, as the ice did not move any great distance, less than 20 feet, it is said.

Conductor Joe Coyle, of a northbound Pennsylvania freight say the bridge fall as the caboose had cleared the under part of the structure.

LOCKOUT IS AVERTED IN ENGINEERING TRADE

Machinists in Britain, Who Defied Union, Agree to Return to Work.

A despatch from London says:—The engineering world of Great Britain was greatly relieved on Thursday by the termination of the threat of a nation-wide lockout in the engineering trades, which, had it been carried into effect as planned by the employers, might have involved 1,000,000 men in 47 unions.

The lockout was averted when 900 machinists employed by the Hoe Co., makers of printing presses, whose unofficial strike had caused the lockout notices to be posted, agreed to resume work Monday.

URGE TEN-CENT TARIFF ON U.S. MAGAZINES

Publishers Allege Canadian Manufacturers Are Suffering From Unfair Competition.

A despatch from Ottawa says:—Pointing out that Canadian manufacturers were suffering from competition of manufacturers in the United States who were able to reach the Canadian consumers with their advertisements admitted free into this country in periodicals and week-end newspapers, and who, not having any business establishment in this country, did not have to pay taxes in Canada, a delegation from the Magazine Publishing Association of Canada interviewed Premier W. L. Mackenzie King, members of the Cabinet and Leaders of the Conservative and Progressive parties.

As a solution of this problem the delegation suggested the imposing of a tariff of 10 cents a pound on all periodicals and week-end magazines entering Canada.

This tariff, they pointed out, would equal the existing tariff of 15 cents a pound on all advertisements entering the country under any other guise than publications. The present tariff is also subject to a 2½ cent ad valorem service tax. The proposed tariff would, the delegation claimed, equal the percentage of advertising matter carried in incoming publications.

Figures produced by the delegation indicated that an average of 40,000,000 copies of United States magazines entered Canada yearly and approximately 15,000,000 copies of United States week-end newspapers. If taxed as suggested the revenue to the Government would approximate $5,000,000 yearly on the present circulation of imported publications.

The Canadian publishing trade was also suffering from outside competition, the delegation pointed out, by being subjected to heavy taxation on both material and general business.

It was suggested that the proposed tariff would assist in checking the influx of obnoxious foreign publications.

Emigration from Canada to United States on Decline

New York, March 21.—Emigration from Canada to the United States during the seven months period ending January 31 decreased 20 per cent. as compared with the previous year, according to figures issued by the National Industrial Conference Board. The report indicated that the bulk of immigration still continues to come from Canada and Mexico.

Canadian comparative figures given by the board are: 1925-26, 52,752; 1924-25, 70,089.

It was noted in the report that Great Britain, although more than half the year had passed, had up to January 31st, filled less than one-third of her quota.

Dowager Queen Dies in Denmark

Copenhagen, Denmark, March 21.—Dowager Queen Louise of Denmark, widow of King Frederick VIII., died last night. Her death was directly due to a heart attack superinduced by pneumonia. She was 74 years of age.

Queen Louise was the first Sovereign of Denmark to dies as Dokager Queen in 150 years. All her children, except King Haakon, of Norway, were at the deathbed, as well as Queen Alexandra, Crown Prince Christian Frederick, and Prince Knud.

Prince of Wales Plans Own Home

A despatch from London says:—The Prince of Wales soon will have a new residence in London, Marlborough House, and he is personally directing the work of its preparation for his occupancy. As soon as the work was begun he went over the plans himself and made several radical changes.

The Prince told the contractors that he would visit the place every few days, and ordered that he be informed of any changes made in the present plans.

He has asked his mother, Queen Mary, to select the decorations for his new residence, and this Her Majesty has agreed to do.

Lt.-Col. S. J. Donaldson

Member of the Northwest Mounted Police from 1876 to 1882, former M.P. for Prince Albert, and for some years a member of the Saskatchewan legislature, died in Prince Albert on March 14. He was a native of Ontario, and during the great war raised and took a western battalion overseas.

POLAR TRIP PLANES ARE COME TO GRIEF

Last of Three Machines of Capt. Wilkins Wrecked in Alaska.

A despatch from Fairbanks, Alaska, says:—The last of three aeroplanes of Captain H. Wilkins was wrecked here on Friday when the landing gear of the Detroiter, a three-engine machine, buckled, throwing the plane on its nose. An engine was thrown out of position and the propeller bent. The big plane, which was being started on its first test flight had shot along the ground only about 40 feet when the accident occurred.

Capt. Wilkins, who planned an air expedition to hunt for land in the Arctic region, and a transpolar flight over the Arctic wastes from Point Barrow, Alaska, to Spitzbergen, originally started with two three-motor aeroplanes and one single-engine machine.

One of the big planes was destroyed Jan. 17 when fire wrecked an experiment laboratory at the Ford air port of Dearborn, o suburb of Detroit. The two others were transported to Fairbanks.

On Friday, the single-engine ship, named the Alaskan, was smashed in landing after a test trial. Friday's smash-up temporarily delays the Wilkins party from proceding to the expedition.

EIGHT SURVIVORS OF SHARPSHOOTER TROOP

Rescue Column Pick Up Remnant of French and Senegalese.

A despatch from Paris says:—After a day and night of terror, hairbreadth escapes from the Druses, and fighting, the eight survivors of a company of French and Sengalese sharpshooters have been picked up by a rescue column.

The company was trapped on the heights of Nedcha, the day before yesterday, and after hours of fighting attempted to escape during the night. Dragging their wounded, they struck out across country. But having only just landed in Syria they lost their way and wandered into a strong force of Druses. All were killed except eight, who survived in the broken ground until the rescuers came up.

Workman in Thorold Factory Killed by Machine

A despatch from Thorold, Ont., says:—Thomas Joseph Rowan was instantly killed at the Beaver-board factory, near Thorold Friday afternoon. He was employed as a backtender, and was putting paper through the winder on the board machine when his hand was drawn in, his head following. He died within three minutes after the accident.

The late Mr. Rowan, who was 30 years of age, had been employed in the factory for five years. He is survived by his widow, Mrs. T. Rowan, and four small children.

CAMPAIGN LAUNCHED TO DEPORT ALIENS WHO ARE ILLEGALLY IN UNITED STATES

Canadians Arrested by Detroit Office of Immigration Bureau for Non-payment of Head Tax and Passport Fee.

A despatch from Detroit says:—An intensive campaign to round up and deport aliens who have entered this country without observing the required formalities, with reference to Canadians, has been launched by the Detroit office of the United States Immigration Bureau.

Twenty-five women, most of them of Canadian birth, have been arrested this week, and are being held at police headquarters on charges of violating the immigration law.

Eighty deportation warrants for both men and women have been obtained in the last month, and by June 1 the whereabouts of about 500 Canadian citizens who are illegally in Detroit will be more or less definitely known, according to Alexander M. Doig, Chief Immigration Inspector for Detroit.

Doig said the arrests were being made on information given his office by other Canadians living in Detroit. He detailed a squad of immigration inspectors to question the women held at police headquarters.

"We are making this immediate examination so that those who are legally in the country may be released as soon as possible," Doig said. "Where we find the law has been violated, it is our custom to release the violator on bond of $500 and immediately begin deportation proceedings.

"It is surprising that Canadians, who can enter this country as non-quota aliens upon payment of the $8 head tax and the $10 fee for a passport visa and by submitting to an examination when they enter, should seek to enter the United States illegally. This drive, we hope, will result in teaching prospective immigrants the advisibility of entering legally. If they do not enter legally they can never become citizens and they are always subject to deportation. However, they may apply for admission to the United States a year after they have been deported."

THE MARKETS

TORONTO.

Man. wheat—No. 1 North., $1.61½; No. 2 North., $1.56½; No. 3 North., $1.53.

Col. John Coolidge Passes Away at Plymouth

A despatch from Plymouth, Vt., says:—Col. John C. Coolidge, father of the President, died on Thursday. Within two weeks of his 81st birthday, Col. John had been sinking gradually since he suffered a severe heart attack a week ago.

A remarkable physique, coupled with an iron will, carried the aged patient through to a new rally for life, but he lost strength day by day. Another severe heart attack early on Thursday heralded the approaching end.

The President, speeding northward on a special train to the bedside of his dying father, lost in a hopeless race with death.

Prince of Wales Plans Holiday in South of France

A despatch from London says:—The Prince of Wales, The Westminster Gazette announces, has decided to take a short holiday on the Continent early in April. The newspaper says that, according to the Prince's secretary, his plans are not yet fixed, but he has no engagements from Easter until April 20. The Prince's holiday, about a fortnight, is likely to be spent somewhere in the South of France.

Welland Canal Construction Claims Another Victim

A despatch from St. Catharines, Ont., says:—The second fatality this year on the Welland ship canal construction happened on Section two Thursday night when Lloyd Pearce, foreman, aged 35, was instantly killed when thrown between the wheels of a construction train which had left the track.

Coroner Currey ordered an inquest. Pearce is survived by a widow and three children.

Taking Orders.

Mrs Henpeck—"Just put this parcel under your arm, James!"

Mr. Henpeck—"Yes, my dear—right or left arm?"

MUTT AND JEFF—By Bud Fisher.

Fishing Along the Seine in Paris

LOCAL AND GENERAL

WINIFRED FARRAR, A.T.C.M.
TEACHER OF PIANO

Come and bring your friends to the Music Hall Friday April 9th.

* * *

A number of the children will be taking part in recitations, vocal and instrumental numbers. Everyone is invited to come and spend the afternoon with the children.

* * *

The local branch of the Bank of Montreal are distributing a booklet called "Hogs for Pork and Profit" which is the result of investigation and experiments by leading specialists. Any farmer from this district can procure a copy for the asking, from any member of the bank staff.

* * *

As we go to press, we learn of the death at Buffalo on March 24th, of a former esteemed resident of Morrisburg, in the person of Mr. Chas. Allison, son of Mr. and Mrs. O. F. Allison of Cobourg. The remains were conveyed to Morrisburg, arriving this morning (Friday), and the funeral service was held at the home of the Misses Loucks at 11 o'clock, Rev. E. Lawson officiating, assisted by Ven. Archdeacon Carson. The remains were placed in the vault and will later be interred in Fairview Cemetery.

* * *

Fear that an ice jam of stupendous proportion was forming below Ogdensburg in the St. Lawrence River was expressed this week by river men who made hurried survey of the channel between Ogdensburg and Morrisburg. With the ice fields above rapidly melted, and breaking up in small spots, a repetition of the Morrisburg jam of three years ago was forseen.

* * *

We are informed by Dr. C. A. Zavitz, Agricultural College, Guelph Ontario, that 2832 Ontario farmers conducted experiments with field crops on their own farms in 1925. The number is increasing from year to year. Choice seed of some of the best varieties is being distributed now free of cost. Any farmer who asks for it may have the seed for an experiment with one of the classes of farm crops such as oats, field corn, mangles, turnips, alfalfa, sweet corn, etc. The distribution will likely continue well into April or until the supply of seed of the different crops is exhausted. These co-operative tests of the Experimental Union have greatly increased crop-yields making Ontario outstanding in this respect.

The opponents of the St. Lawrence waterway are busy advocating a Great Lakes Hudson river ship canal all in the United States. The Toronto Globe says if this plan is accepted it will "postpone till far in the future the construction of the St. Lawrence waterway, but that that project will ultimately be realized is beyond question and when it is realized it will be by that route, and not by the New York all-american line, that the commerce of both sides of the border created by the great western country from Lake Huron to the Rocky Mountains will pass to the markets of the world.

Died—At Morrisburg, Thursday, March 25th, the infant twin sons of Mr. and Mrs. Eddie Jones.

* * *

We are pleased to report that Mr. A. C. Jenkinson is recovering favorably from an operation which he underwent at the Cornwall General Hospital this week.

* * *

Mrs. A. Froats arrived home last Friday after spending the last two months in Pittsburg, Pa.

* * *

Mrs. C. Markell and Mrs. A. Crowbar attended the funeral of Austin Lynch, infant son of Mr. and Mrs. C. M. Lynch on Monday, Mar. 15th.

* * *

Graceful little hats from Paris come to illustrate the tremendous vogue of Grosgrain Ribbon—to be seen at Mrs. McGannon's.

* * *

Mrs. Irwin Hilliard attended the Easter service of the W.M.S. of Smiths Falls on Wednesday evening, where she gave an address.

* * *

The semi-weekly Kingston Whig has been discontinued and the subscribers added to the daily list.

* * *

Owing to extra demand on our advertising space this week, we are compelled to hold over a considerable amount of news matter, from our correspondents, until next week.

* * *

The Carleton Place Board of Education are trying out an experiment to shorten their regular sessions. In future, instead of having the secretary read the minutes of previous regular and special meetings, typed copies of the minutes will be placed before each member.

* * *

Spring has arrived in Manitoba where the weather is fine and warm. Hundreds of farmers are already on the land plowing and discing.

* * *

Where are you going Friday evening April 9th? Why, a bunch of us have planned to go to "Billy's Bungalow" in the Music Hall, where we will be entertained for more than two hours with one of the best plays and music you have ever listened to. Come along too. I guess we will, for Dr. Davy's orchestra is going to be there.

* * *

In the Provincial supplementary estimates is an item of $20,000 for an extension to the Ontario Hospital at Brockville.

* * *

William S. Connell, a well-known commercial traveller, died on Wednesday of last week. He was born in Prescott but lived in Kingston for 15 years.

After a lingering illness Mr. Geo. Scott of Winchester passed away in the Brockville Asylum on Thursday morning last where he had been taken only a few days before.

At the spring term of the Supreme Court of Ontario, held at Brockville last week before Mr. Justice Mowat, the jury action of Mr. T. J. Allison, of Edwardsburg, against Aden Richmire, of Cardinal, for alienation of wife's affections, was concluded. The jury returned a verdict in favor of the plaintiff for $5,000 and costs.

A very sad and untimely death occurred early Friday morning last, when Jim Mallory passed away at the age of 23 years, after a few days of intense suffering from blood poison. He was a son of Mr. and Mrs. Calvin Mallory, who live just west of Winchester.

There passed away on Friday, March 12th, at his home, west of Hainsville, a life-long resident in the person of Mr. William E. Boyd, in his sixty-fifth year. Deceased was born near Prescott, Ont., on Novem ber 9th, 1861, and moved at an early age, with his parents, to a farm at the above place. In 1886 he was united in marriage to Marjory Collison of Brinston, who, with the son, Perley S. Boyd, Principal of the Public School at Chesterville, is left to mourn the loss of a loving husband and father.

"The Old Reliable"

NOW IS THE TIME to select your SPRING COAT. Our Stock is now complete and awaits your selection. We offer you exceptional values which you should profit by.
We feature straight line and flared models from the hips down, in Poiret Twill, English Tricotine and fine Charmeen. Some have fur edging around collar and trimmed with tube brade or metallic silver. Linings are of heavy figured or plain Canton Crepe. Colors—Cocoa, Rust, Sand, Rosewood, Cadet, Navy and Black.
For Men and Young Men, we have just opened up a full line of Suits and Overcoats at prices to suit everybody.
