Many Blood Donors Needed for October 6th

The Mobile Blood Clinic will operate in Chesterville, Wednesday, Oct. 6 in the Sunday School rooms of Trinity United church. Dr. Dunning of Ottawa with a staff of nurses will be in charge and will be assisted by local doctors and nurses and other necessary help.

It is hoped that there will be more than eighty donors. If that number is not available to use the services offered it takes up a great deal of valuable time which might be used to better advantage.

The fact that you are asked to donate a certain amount of the rich type of blood is not solely based on the benefit you may receive from such an operation, but for the sole and simple reason that the blood you donate will in all likelihood save the life of a wounded Canadian serviceman who has been wounded in an effort to retain for you the privileges you enjoy as a citizen of this country. He is willing and is risking his life every minute he is overseas for you, his wife, mother, sweetheart or neighbor. It is assumed that you might be willing to give a certain amount of your blood to bring him back from the jaws of death. It has been fully established by ample research that blood plasma will do just that for a wounded soldier. It is believed that probably you know all about that, but nobody can give your blood but yourself, not even force you to give it. It's a voluntary effort on your part to save a life.

If you will do this go to your own doctor as soon as possible and have a test made, without cost to you, and find out if your blood is acceptable. You can do this at once, the sooner the better. A limited number may have this examination made the morning of the Clinic by the doctors assisting. The only drawback to the proceedure is that you may have partaken of certain foods that very morning which would render your blood on that day unfit for the purpose of the clinic.

There is no danger of any kind to you. The slight operation, a puncture in your arm which causes no inconvenience, is nothing to fear or worry about. Every few days the daily papers carry news items and pictures of people who have given blood several times, some of them as many as fifteen times.

If the doctor finds your blood the suitable type get in touch with Leo T. Gallagher and have the hour set when you will appear at the clinic.

THE BRITISH KING VISITS VICTORIOUS ALLIED FORCES IN AFRICA

His Majesty The King visits the fighting men of the United Nations after their victorious North African Campaign.

Picture shows: The King standing in his car, acknowledges the cheers of British troops lining his route.

Assessment Methods Will Be Changed

At a special meeting of Village Council held on September 27th, the Assessment Roll made in 1943 was adopted as the Roll to be used in 1944. This action was made necessary by the adoption of a new system of assessment by the Council of the United Counties of Stormont, Dundas and Glengarry at their June session. As a great many more details of information regarding land and buildings will be taken by the assessor for a better equalization of assessment, it will require more time for this work. The Assessment for 1945 will be taken between April 1-1944 and September 30th 1944. Notices of date for holding Court of Revision will be placed in the next issue of this paper.

P.O. KELLY CHAMBERS NOW PRESUMED DEAD

The information was given this week to Pat Chambers that his son Pilot Officer Kelly Chambers, who was reported missing in operations July 4th, was now presumed to be dead, for official purposes.

Mr. and Mrs. Graham Johnston Honoured By Their Friends

About 150 friends and neighbours gathered at the Community Hall on Tuesday evening to extend congratulations to Mr. and Mrs. Graham Johnston on their recent marriage. The evening was pleasantly spent in dancing. About 11.45 the gathering was called to order and the newly weds presented with many useful and beautiful gifts; also a purse of money.

The following address was read by Mr. Hosea Droppo.

Chesterville, Ont.
September 28, 1943.

Dear Thelma and Graham—We, your many friends of Chesterville and community, have assembled here this evening to convey to you our "Best Wishes" on the occasion of your recent marriage.

"Marriage" should be regarded as Life's crowning achievement and it is our earnest wish that you will find this to be so. May your wedded life be one of joy and happiness, and may all your endeavours be crowned with success and prosperity.

It was with regret, Graham, that we learned you were leaving us, as we have always found you a very willing and capable worker and your presence and smile will be missed from the social affairs of our community. We trust that your fellowship with us will cause you to seek a like fellowship in the life in your new home community.

To you, Thelma, we extend the hand of love and friendship. Although many of us have known you but for a short time, it has been long enough to allow us to recognize your many sterling qualities. We wish to congratulate you on your choice of a life partner. Together we feel certain you will bring the "Matrimonial Ship" to port.

We extend to you both our heartiest congratulations and as a token of our friendship towards you, may we ask you to accept these gifts. May they ever remind you of your friends in Chesterville.

"May every breeze blow safely,
May every sky be blue,
And every path be leading
To happiness for you."

Signed on behalf of those present: Albert Merkley' Blake Ball, Henry Sauve.

Mr. Johnston made a very fitting reply and everyone sang, "For They Are Jolly Good Fellows." A dainty lunch was served by the ladies and the gathering dispersed.

HEARS FROM SON IN SICILY

Mr. and Mrs. Elmer McMillan of Dunbar, have received an airgraph letter from their son Trooper Alec. McMillan, who went into Sicily with the 1st Division, P.L.D.G.'s. He was well and wished to be remembered to his many friends of Dunbar and Chesterville.

Coming Events

EUCHRE FOR RED CROSS

A euchre will be held in the Community Hall, Wednesday, October 6, at 8.15 p.m. sponsored by the Red Cross to raise money to send Christmas boxes to our local boys overseas. Admission 25 cents. 50-1

STORES WILL CONTINUE CLOSING WEDNESDAY AFTERNOON

With the time expiring for which the merchants agreed to close their places of business a meeting was held Monday evening when it was agreed to continue the closing during the months of October and November. What will be done after that will be decided later.

Mrs. Edward Eastman 81 Formerly Lived in Morewood

An old and respected resident of Russell, Letitia Beattie, widow of Edward Eastman, died Friday at an Ottawa hospital following a long illness. Mrs. Eastman was in her 81st year and was born at Marvelville, daughter of the late William Beattie and his wife, Ann Argue. During her married life she resided at Felton, Morewood and Russell. She retired 25 years ago and moved to Russell village where she had since resided. Mr. Eastman predeceased her five years ago.

The funeral was held from her residence on Saturday. Service was conducted by Rev. Thomas McNaught of Russell. Mrs. Eastman was a member of Russell United Church and was interested in community affairs.

She leaves to mourn, one son, W. R. Eastman of Brooklyn, N.Y.; one daughter, Mrs. George McCullough, and three brothers, Thomas Beattie, Dr. George Beattie, both of Ottawa, and James Beattie of Toronto.

Interment was made in Russell United Church cemetery.

GRAIN WELCOME NOT SO WITH WEEDS

There is no definite data as to when and how the corn borer reached this province but he has surely been a busy and unwelcome visitor ever since. There are many other pests not indigenous to the soil that have reached Ontario in many cases through lack of inspection or carelessness. It was a patriotic English hotelkeeper residing in Toronto who imported the English sparrow and the little bird has remained in Ontario winter and summer multiplying like the wild pigeon now extinct, that legend says was once so numerous that it obscured the sun in its flights. This is all by the way of the announcement of the Ontario Minister of Agriculture that owing to the acute shortage of feed grain and as an emergency measure only Ontario with the other four provinces will permit the entry of Western grain with a maximum 3 percent dockage instead of the 1 percent tolerance previously allowed. In other words this means that grain from the west will not go through the cleaning mills at Port Arthur and Fort William for removal of weeds and other seeds. This plan is being taken to expedite the delivery of grain eastward but for the future welfare of the province it would perhaps be wise to slow up long enough to let the cleaning mills do their work. Ontario has enough pests now without importing new varieties from Western Canada. Warnings have been issued to the farmer in respect to weed seeds menace in accepting this emergency grain. It is pointed out that if the weed seeds are largely wild oats or wild buckwheat the germination of both can be destroyed by grinding. Old time Ontario millers will devoutly say would that some wise man had given warning respecting the extermination of wild mustard.

BEEF SUPPLY GETS CUT

Evidently the Federal Government has in view the Exporting of beef to the United Kingdom which would seem to hold out the hope that there will be an increase in cattle marketings as up to the present no Canadian beef has been shipped to Britain. With meat rationing on a pretty strict basis and even feed for dogs at a premium Ontario housewives when they come to realize its potentialities will not regard with favor a new order of the Canadian meat board which became effective September 27th prohibiting the storage of certain designated qualities of meat by any packer or other person without first receiving authority from the board. The order is designated to "supplement the arrangements of the Government in purchasing surplus beef suitable for domestic reserves and for export to the United Kingdom if required at the established floor prices." The order states that no packer or other person may freeze any beef, or store any beef frozen on or after September 27th, which bears the Canadian Government inspection legend and is of the qualities known as "special", "commercial" or "cow", specified under a Meat Board requirement effective September 21, without first obtaining the authorization of the secretary manager of the Meat Board.

DEPRECIATION FUND TAKEN BY TAXES

An Ontario businessman expresses the opinion that the Federal Government collecting agencies in some respect are almost getting into the hold-up class which will adversely affect after the war employment where he is most needed. He points out that the priority branch of the Department of Munitions and Supply will not now and have not allowed manufacturers to purchase or install new machinery since the beginning of 1941. The Income Tax Branch of the Federal Government will allow depreciation off machinery and equipment to the extent of only 85 per cent if same is kept in use which it has to be as new installations cannot be made that would keep depreciation average. Depreciation fund cannot be written off present machinery and put into a fund for buying new machinery, but what should go into depreciation fund has to be added to any profits as excess profits and the Income Tax Department taxes it 100 percent. This will kill the hen that lays the eggs for breakfast. Commenting on this a writer aptly says: "Penny wise, pound foolish. In Noah's day he could not have built his ark if such tax tactics had prevailed. One of the most important provisions for the future is to set aside funds for replacing depreciated and obsolete equipment and for expansion. A tax policy such as described practically ensured more unemployment than need occur.

GOLD BULKS LARGE IN PRECIOUS METALS

Gold they say is where you find it. Despite the manpower shortage and increased taxation the war has not altogether throttled the mining industry in Ontario as is evidenced by the fact that production of gold in the past eight months totalled $55,371,322. While a large number of promising prospects have ceased operations for the duration in view of the many people who have been induced to buy mining stocks the news that the industry is still carrying on will be welcome to shareholders. As the result of a higher grade ore being milled, production of gold bullion by the mines of Ontario increased to $6,392,248 in August from $6,332,121 in July. This increase was achieved despite a reduction in the tonnage milled, from 653,533 to 651,924. Production for the first eight months of the year amounted to $55,371,322 from the treatment of 5,599,244 tons of ore against $71,467,619 from 7,340,443 tons in the like period of last year, a drop of 22.5 percent in value and 23.7 percent in tonnage milled. Production from the Porcupine camp for the seven months was $27,313,023 against $35,415,151 for the same period last year. The Kirkland-Larder Lake belt produced $16,918,435 against $19,542,188. Matachewan-Sudbury production was $1,682,361, against $2,406,247; Northwestern Ontario produced $9,440,040, against $14,079,367.

EQUALITY—CANADIAN AND U S WAGE RATES?

The Huntingdon Gleaner.

Railway Unions are openly demanding that they get the U. S. scale of wages. That is, if a railway engineer is earning $5,000 a year in U.S. currency in the U.S.—which is not uncommon—a man on a similar run in Canada should obtain $5,000. The Unions do not say whether they should also be given the number of Canadian dollars necessary to equal $5,000 U.S. dollars.

Now, a great many people in the U.S.—a great many very serious people—believe that the U.S. dollar is bound to hit a tobaggon. Mr. Illsley, explaining why the Canadian dollar still stands at a discount, was very carefu to point out that this might happen.

If some sort of inflation took place in the U.S. and a locomotive engineer got $25,000 a year and all other prices rose in accord with it, would the railway unions want their engineers to get $25,000 a year, and would they be willing to have all other prices rise in accordance with this? The farmers might think about this a bit. Mr. Donald Gordon has been lecturing them pretty severely; telling them that they are unreasonable in wanting fair prices for their produce, rising in proportion as city wages rise. The railway unions go far beyond Mr. Gordon.

The plain attitude of the farmer, in his own interest, is to go on record flatly that, if railway wages are fixed on the U.S. level, then we admit that we have thrown overboard all independent control of prices in Canada and are going to follow the U.S. price pattern. The farmer should demand that, in such a case, the Government of Canada should see that he gets full U.S. prices for everything which he produces, and that this is kept up, as fast as prices rise in the U.S.—if that should happen.

Farmers have no desire to hurt railway workers, but they certainly do not intend to have the railway workers put this trick over on them—and we hope that Mr. Gordon and Mr. Illsley will notice this. We particularly recommend it to Hon. Jimmy Gardner.

We hope there will be no mistake about this. If railway workers get U.S. wages. Canadian farmers are going to get U.S. prices—and let there be no mistake about it..

It All Depends.

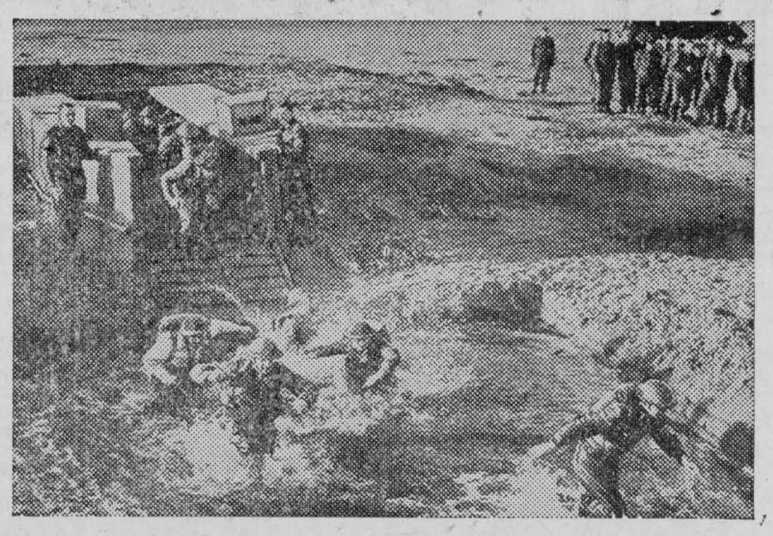

"Dad!"

"Well, what is it?"

"It says here, A man is known by the company he keeps. Is that so, Father?"

"Yes."

"Well, father, if a good man keeps company with a bad man, is the good man bad because he keeps company with the bad man, or is the bad man good because he keeps company with the good man?"

BRITAIN'S SHOCK TROOPS PRACTICE ASSAULT TACTICS.

CONQUERING FATE
By Sarah K. Bolton

I like the man who faces what he must
With step triumphant and a heart of cheer;
Who fights the daily battle without fear;
Sees his hopes fail, yet keeps unfaltering trust
That God is God; that somehow, true and just
His plans work out for mortals; not a tear
Is shed when fortune, which the world holds dear,
Falls from his grasp; better, with love, a crust
Than living in dishonor; envies not,
Nor loses faith in man; but does his best
Nor ever mourns over his humbler lot,
But with a smile and words of hope, gives zest
To every toiler; he alone is great,
Who by a life heroic conquers fate.

Take time for all things; great haste makes great waste.—Ben Franklin.

New Development In Work for the Blind

In the recently published Annual Report of The Canadian National Institute for the Blind four photographs appear showing blind people employed at new types of work. Just how this new department came into existence, and what it means, is explained in the article which accompanies the illustrations:—

"The experience of Lindsay Williamson in finding positions for blind people in industrial establishments led him to consider the possibility of achieving the same end, in some instances, by reversing the procedure. Why not, he thought, persuade manufacturers that some of their assembly processes could be economically and efficiently handled by blind workers on the Institute premises, thus saving their valuable plant space and working hours for more vital operations? This, in turn, would provide regular employment for a group who, for various reasons, were not employable in outside industry.

"In 1943 the dream became a reality—the war had proved the logic of Mr. Williamson's idea and a new department was opened to take care of the sub-contracts for assembly operations which began to pour in from many firms who welcomed the services offered by the Institute.

"Today, there are twenty-five blind men and women steadily and happily employed as a result of this new venture and their number is growing. They operate small presses and do hand assembly jobs of all kinds. To them, the clatter of their machines is a symphony daily rising in crescendo and proclaiming the fact that the world no longer owes them a living.

NEW SCHEDULE

PRESERVES RATIONING

EFFECTIVE SEPTEMBER 30, 1943

Preserves rationing gives the consumer a number of choices both of products and sizes of containers. Because of the wide range of container sizes and the variation in buying habits across the country it was necessary to put the system into operation and then make adjustments on the basis of experience.

Now that preserves rationing has been in effect for several weeks, it is possible to made some increases in coupon values. The new schedule is announced below and is effective September 30th.

The new doubled ration allowances for molasses, extracted and comb honey will enable consumers in areas where consumption of these products is heavy, to buy more and still leave enough for districts where the total demand is light.

The increased ration allowances for corn, cane and blended table syrups and maple syrup are adjusted to bring coupon values more closely into line with the great variety of container sizes now in use.

ONE "D" COUPON IS GOOD FOR
Not More Than

Jams, Jellies, Marmalades, Maple Butter, Apple Butter or Honey Butter	6 FLUID OZ.
or	
Comb Honey (in Squares)	One Standard Section
or	
Cut Comb Honey	1 LB. NET
or	
Extracted Honey or Maple Syrup	12 FLUID OZ. (1 LB. NET)
or	
Maple Sugar	½ LB. NET
or	
Molasses	20 FLUID OZ. (1 PINT)
or	
Corn Syrup, Cane Syrup, or any Blended Table Syrup	14 FLUID OZ.
or	
Canned Fruit	10 FLUID OZ.
or	
Sugar	½ LB. NET

Coupons D-4 and D-5
NOW BECOME VALID SEPTEMBER 30th

The validity date of these coupons has been moved forward from the original October 14th to September 30th.

This has been done to accommodate purchasers of some items which at this season of the year are normally bought in large units.

Coupons D-6 and D-7 will become valid on November 11th and the original schedule will be continued from then on, with two coupons becoming valid every four weeks.

Francis C. Moran Weds Rita C. McDonell

St. Anthony's church, Apple Hill, was the scene, September 4th, of the wedding of Rita Catherine McDonell, daughter of Mr. and Mrs. Steven McDonell to Francis Charles Moran, son of Mr. Charles Moran and the late Mrs. Moran of Crysler.

Reverend Father John McPhail, cousin of the bride officiated at the ceremony assisted by Rev. C. F. Gauthier.

The bride looked charming in a white brocaded satin dress with draped basque and sweetheart neckline. The long puffed sleeves fell in points over the hands and the headdress consisted of a pleated halo and a shoulder length veil of matchin silk net.

She carried an arm bouquet of Bettertime roses.

Miss Edan McDonell, sister of the bride was bridesmaid and wore a shell green dress of brocaded taffeta with a gold feather hat and matching veil. She carried a nosegay of bronze mums.

Mr. Samuel McDonell, brother of the bride acted as best man.

Mrs. Steven McDonell, mother of the bride, wore a Queen's blue two-piece wool dress, with navy accessories. Her corsage bouquet was of Happy Day roses.

Following the ceremony a buffet breakfast was served at the bride's home.

The couple left later to spend a week in the U.S.A., Kingston and other western points.

The bride travelled in an olive green crepe dress with brown accessories.

On their return they were honored by a reception at Green Valley and Berwick.

MISCELLANEOUS SHOWER

On Thursday evening prior to her marriage Miss Reta McDonell was tendered a shower at the home of Mrs. Martin Maloney.

The bride was escorted by Misses Dorothy Helmer and Georgina McIntosh to the reception room which was gaily decorated with gladioli and green and white streamers.

Following an address read by Miss Gertrude McMillan a basket laden with gifts was brought in by the Misses Muriel and Norma Maloney.

The bride thanked her friends in a few well chosen words and the remainder of the evening was spent in games and dancing.

F. C. Eligh, Finch Wins Reserve Championship

Featured by a large attendance of breeders and others interested in Holstein stock, the third Championship Holstein show was held on Tuesday, on the Agricultural grounds at Kemptville.

The grand champion bull was Strathaven Supreme Comrade, owned by David M. Nesbitt, of Kingston, while the reserve award went to Glenafton Acme Mercedes, owned by J.A. Vaillancourt, of Green Valley, Glengarry.

In the female classes, the grand championship was won by the two-year-old heifer, Alta Vista Beth Successor, owned by A.E. Garrett of Lancaster, while the reserve championship was awarded to Glenholm Ardis Inka Rag Apple, the four-year-old cow owned by F. C. Eligh of Finch, Stormont.

The show was the culmination of 10 Black and White days held at county fairs, throughout Eastern Ontario, only winners at these district fairs being eligible to show at Kemptville.

In all, 162 animals were on exhibit by 61 individual exhibitors of whom 17 were new to this championship show. Nine county herds, of five animals each, lined up for the final event of the day.

Breeders Complimented

Both Judge Fraser, Streetsville, and President George C. Jackson, Downsview, of the Holstein-Freisian Association of Canada, complimented eastern Ontario breeders on the vast improvement made by the breed in this district in recent years. Mr. Jackson remarked that two classes in particular—the heifer class with 40 entries and the young bull class with 21 entries — were "extraordinary good". Both congratulated A. V. Langton, Kemptville, Eastern Fieldman for the association on the way he had managed the show.

In the competition between nine county herds, that made up by Lanark county exhibitors was in first place: Frontenac county, second; Glengarry, third; Carleton-Russell, fourth; Stormont, fifth; and Renfrew sixth.

The junior championships were: Bull—S.W. Rothwell and W.A. Johnson, Navan, with Rockdale Rag Apple Chief; reserve, H. Millar and Son, Perth with Tayside Supreme Design.

Heifers—John T. Snedden, Almonte, with Model Echo Posch; reserve, H. Millar and Son, Perth, with Tayside Pontiac Anna.

LET'S BE DOING
... while we're planning

● Everybody is thinking a great deal about the future these days . . . planning . . . getting ready for the period to follow the war. All realize that the war may bring surprises—but the tide is turning in our favour.

Chemists and engineers, producing things needed for war, are making discoveries which will mean comforts and conveniences for all of us when peace comes. New methods of making things, new processes, new materials, now being filed away in blue prints and formulae, will bring us many new and useful articles. Many things not available now will be replaced by better models and designs.

You may have plans for a new home, remodelling your present home, new home furnishings. If you are a farmer you will need new and improved equipment and machinery.

Now, while you are thinking and planning, you can do something to insure that your plans can be carried out. Victory Bonds—which can be bought on convenient instalments, with money as you get it—provide a means of keeping your savings intact, earmarked for things you want.

Most Canadians are saving money. Most of us are buying Victory Bonds and when we buy Victory Bonds we are helping to win the war. We are helping to speed the day of victory and we are doing something that will benefit ourselves.

●

WHAT IS A VICTORY BOND?

A VICTORY BOND is the promise of the Dominion of Canada to repay in cash the face value of the Bond on the date of maturity with half-yearly interest until that time. A Victory Bond is the safest investment in Canada backed by the entire resources of the Dominion. Canada has been issuing bonds for 75 years, and has never failed to pay every dollar of principal and interest when due. A Victory Bond is an asset readily marketable at any time.

Miss Barbara Cameron of Chesterville is enjoyed as teacher in the Valley school.

LOOSE MEXICAN ORANGES NEW TO MONTREAL TRADE

Oranges from Mexico shipped loosely in cars and not in the traditional crate, recently arriveid at the Montreal Fruit and Produce Terminal, a subsidiary of the Canadian National Railways, provided a new experience for the local trade. It was the first arrival at the terminal of fruit shipped in that manner. To market the fruit the oranges were placed in bushel baskets and promptly purchased by retailers to whom any fruit is welcome in this season of shortages.

Nice Of Him

What happened after you were thrown out of the side exit on your face?

I told the usher I belonged to a very important family.

So what?

He begged my pardon, asked me in again and threw me out the front door.

Boucks Hill

Word has been received here that John Brooks has landed safely overseas.

Silo filling is the order of the day in and around this district.

Mr. and Mrs. George Hill, were in Smiths Falls on Sunday.

Miss Minnie Pharoah, R.N. of Montreal spent Sunday at the home of Mr. and Mrs. W.A. Carr.

Mr. and Mrs. Albert Utman of Morrisburg made a business trip here on Monday.

A few from here attended the Anniversary Services at Colquhoun church on Sunday evening.

Church Road

J.M. Carkner of Peterborough is spending a few days with his family here.

Mr. and Mrs. Chas. Hummel and son of Morrisburg were recent guests of Mr. and Mrs. Roy Styles.

Mr. and Mrs. Clifford Swerdfeger and baby of Brockville spent Monday with Mr. and Mrs. James Swerdfeger.

Mrs. C. Beckstead and Mrs. Gilbert Beckstead entertained the ladies of St. John's W.M.S. on Wednesday evening.

Mrs. Mary Gowland of Riverside spent Sunday with Mr. and Mrs. Roy Styles.

Shortly . .

Shortly our paid up list of subscribers will reach our allotment of paper for the year. After that point new subscribers will only be taken as those in arrears are dropped and placed for collection without further notice.

The address label on this paper or on the wrapper of your paper shows the date to which you last paid. Please bring your subscription forward so that it's "in advance"

It's the right thing to do.

War Summary

THURSDAY, SEPTEMBER 30, 1943

Every German bridgehead on the east bank of the Dnieper, above Zaporozha, has been wiped out by the Russians with the capture of Kremenchug. As a result a large enemy force has been pocketed between Poltava and the river. If the Red Army can cross here in force the Germans face the possibility of having their whole line in the lower Dnieper outflanked. In the north the Red Army drove to within 110 of the old Polish frontier, capturing Rudnya which Stalin's congratulatory order of the day described as a "powerful enemy stronghold and a centre of communications in the Vitebsk direction".

By now Naples is probably in Allied hands. News of Italy from Allied Headquarters is at least a day old when correspondents get it, and yesterday's report of the capture of Nocera and Castellammare di Stabia and the following up of the retreating Hun concerned action on Tuesday. At that time the 5th Army was rolling on to the Naples plain and the fall of the city was expected at any moment. On the Adriatic end on the line the 8th Army moved north along the coast to capture the fishing por of Zapponeto, due east of Foggia.

Japanese fliers pulled a fast one in sinking the former liner Excambria, which had been renamed John Penn and converted into a troopship. She was lying off Guadacanal when a flight of high-flying bombers came over. They were immediately given the works, but they diverted the attention of the defense to allow a low flying torpedo plane to drop in unobserved adn drop its tinfish. Defenders spotted it making the final run, but then it was too late. Fortunately the ship had been unloaded and casualties were few.

A political problem of some importance is developing around the Italian fleet. So far it is in Italian hands, but the French want it, pointing out that they have a naval force of 25,000 officers and men spoiling for a fight and ready to take the ships to the Pacific if need be. The Dutch, the Greeks and the Norwegians, who all have naval personnel but lack ships, would like to fight some of them, too. Since there is some disposition to accept Italy as a co-belligerent, if not as a full ally, decision involving the fleets fate will be difficult and please nobody.

Preparing Land For Wartime Garden

It takes a few years to get land into good condition for growing crops. To those who have already tried a Victory Garden and may be discouraged, James Gallagher, Head Gardener, Dominion Experimental Station, advises try again.

The fall, he says, is the time to dig the land. Towards the middle of October all late vegetables should be harvested and the land cleared of all refuse, which should either be burned or put into a rubbish heap.

On no account should leaves or roots of vegetables be dug into the land for fear of disease being present in them. They can, however, be composted (allowed to rot for a year) and spread over the perennial crops, such as rhubarb or raspberries. The next procedure is to dig with a spade a trench about 18 inches broad, half the length of the garden, 8 inches to 10 inches in depth. Place this soil at the end of the other half nearby (not the far end). Loosen up the subsoil with a fork and place a layer of rotted manure in the bottom. This will be the top spit the next year, or the surface soil for the following year's crop to grow in.

If the land is in sod or full of couch grass place the first spit upside down in the bottom of the trench. It will rot during the year, and be a fine top spit the following year. On this dig over a spit deep from the next trench 18 inches wide then place another layer of manure on this and then clean out the bottom of trench on top of manure and so on till the other end of the plot is reached. Reverse on the other half of the plot, filling in the last trench of the first half by opening a trench in the second half and when back at the beginning, fill the last trench with the soil first removed.

Go over the whole plot and ridge it up by making drills as if to plant potatoes and leave it this way all winter. This will hold the snow which is a good fertilizer, and also gives the frost a better chance to penetrate, which will help to kill off many pests that live in the ground during winter. If the land is on a slope make these ridges across, not up and down, or the soil will wash away in spring.

Being ridged the land will dry out earlier in spring, allowing seeding and planting to be done much earlier. Towards the end of April or early in May, the land should be forked over, deep enough to mix the manure well with the soil, and leaving it as level as possible. After this give a dressing of commercial fertilizer at the rate of about 3 pounds to 100 square feet of land, and fork over again quite shallow, or rake the fertilizer in. The seed may be sown or the plants set out as recommended in the Wartime Production Series Pamphlet "The Wartime Garden" a copy of which can be obtained from Dominion Department of Agriculture Ottawa.

Potato, Grain Seed Shortages Cause Anxiety

The potato outlook in Ontario for 1944 is regarded as so serious that, as one of its first acts, the new Ontario Agricultural Inquiry Commission at its inaugural sessions at Queen's Park yesterday wired Ottawa for a statement on Federal Government intentions on a potato ceiling and an increased price differential between table and seed potatoes. Scarcity of seed grain also caused concern at the meetings, which continue today.

M.M. Robinson, member of the Commission from Burlington, told chairman Archibald Leitch of Guelph that the 30 cents a bushel difference between the price of seed and table potatoes now allowed should be 75 cents if seed is to be obtained. On his motion the commission wired K. W. Taylor, co-ordinator of the feods administration, at Ottawa, that it "strongly urges immediate settlement of seed potato ceiling and question of price differential over price of table stock.

"Grave concern expressed", the wire added, "over deterioration of potato situation. Would appreciate intimation of possible action for our Thursday session."

Stocks Again Short

Ontario will not have any more potatoes next year than last—and last year's crop was short—and would be looking to the south for help, the commission was told.

Shortage of seed grain in Ontario some members felt, was attributed in part to Federal subsidies not being sufficient to compensate Ontario prices with those of other provinces.

"We must keep this Province's farming diversified even if perpetual subsidies have to make up for differences," Mr. Robinson declared. "In other words, I suggest that the provincial Government go into subsidies on a large scale."

Mr. Robinson was warmly critical of the present subsidy situation in three ways," he said, "on production, under the Food Board: a price control subsidy; supposed originally to be a consumers' subsidy and, thirdly, the most vicious, a cost of living index subsidy, like that on potatoes where they use the subsidy to keep down the index." He felt the commission would have to do something promptly or "miss the boat."

Members viewed the "definite shortage" of oats, barley, and potato seed as "alarming". Suggestions were made to have local committees purchase what 1942 seed farmers had and store it for seed purposes next fall.

Goldfield

Mrs. Bernard Foley spent a few days at her home in Connaught.

BORN—On Tuesday, September 28 at Cornwall General hospital to Mr. and Mrs. Cederic McLeod a son.

Mr. and Mrs. Blake Nephew and Mr. and Mrs. McIntosh and George attended the Kemptville Fair on Tuesday.

Mrs. Wm. Johnston, Finch, spent a few days with Mr. Hudson Kendrick.

Mr. and Mrs. Aden Casselman of Berwick, visited at the home of Mr. Archie Gillies at the week-end.

Mr. and Mrs. James Murphy of Connaught, visited with Mrs. Catherine Foley and family during the week.

The September meeting of the Women's Missionary Society of St. Luke's Presbyterian Church, Finch, was held at the home of Miss Isabel MacMillan.

A number from here attended Avonmore Fair on Friday.

MASSEY-HARRIS

HIGH GRADE FARM IMPLEMENTS

and Genuine Repair Parts

Repair your corn harvesting equipment now. When repairs are sometimes slow arriving order early, so you will not be held up when you are are ready to put machines in use.

We have for sale

1 Oliver Sulky Plow in good condition.

2 2-furrow horse plows in good condition.

1 4-year-old gelding broken single and double.

WINS AT MASSENA WITH SHOW HORSES

Willie Servage, who has attracted so much attention at fairs this fall with his show horses, received an invitation to show them at Massena Fair last Saturday, winning first prize with two of his horses. There were large classes of heavy horses and saddle horses.

Berwick

Miss Audrey Elliott left on Monday to enter the University at Kingston.

Miss Mary Kavanaugh met with an accident last week by falling down stairs and breaking her collar bone and other injuries. She is at present resting quietly at her home.

Mr. Jack Ashton left on Sunday for a week's holidays in Toronto and other places.

Mr. and Mrs. Wm. Barwell and son Neil are spending a week visiting relatives at Montreal.

Mr. Geo. Servage and his daughter are leaving on Saturday for Montkeith where Mr. Servage will remain for the winter months with Mr. and Mrs. Alex McGlashen. His daughter Mrs. McGlashen came for him.

Pte Melvin Munro of Kingston is spending a few days with Mrs. Munro and other relatives.

All are glad Mrs. Austin Nichols is recovering from a car accident, which occurred shortly before 9 o'clock on Tuesday morning. She had just left her home a few minutes with her car going to teach school at Lodi. As she passed the gate at Mr. Robert Stark's, Mr. Lucien Brier was backing out his truck, striking Mrs. Nichols car heavily. Mrs. Nichols suffered from cuts on her hand and face and from shock, narrowly escaping death.

Mr. and Mrs. Ovide Bourgon and son Laurier are spending this week in Montreal.

Mrs. Jane Summers is spending a few days with friends in Newington.

Mrs. Orpha Searle returned home the first of the week after spending six weeks in St. Catherines.

RED CROSS AUCTION SALE.

Red Cross Auction Sale at Williamsburg, Friday, October 8th at 1.30 p.m. at

PICADILLY PARKING LOT.

when there will be offered by Public Auction Fruits, Vegetables, Potatoes, Fowl, Grain, Wool and many articles too numerous to mention.

Proceeds to go to the General Fund. Ross Morrow, Auct.

NOTICE TO TAXPAYERS.

The United Counties of Stormont, Dundas and Glengarry having adopted a new system of Assessment at their June session of County Council it has become necessary to adopt our 1943 Roll for the year 1944. The Assessment to be taken in 1944 under the said new system will be for the year 1945. Appeals against this 1943 Assessment to be used for 1944 will be heard by Court of Revision before November 15th, 1943 and appeals to the County Judge on or before December 15th, 1943. Changes in this roll can only be made by Court of Revision therefore if there has been any change of ownership or value of property, an appeal must be sent to the Municipal Clerk who will notify appellants of Date of Sitting by Court of Revision.

G.H. Barkley, Reeve. H.C. Hummel, Clerk.

Barkley Family Meets Meets In Annual Picnic

Recently, 50 members of the family of the late Mr. and Mrs. Jeremiah Barkley met at the home of Mr. and Mrs. Linden Barkley, midway between Williamsburg and Morrisburg for the annual get-together. Their family consisted of 12 children and all are living but one son, Dalton who passed away several years ago.

Eight children were present, including Mrs. Kenneth Lennox (Sarah), Mountain; Mrs. Frank Perrault, (Mary); Chesterville; Mrs. Chesley Schwerdfeger (Hattie), Auitsville; Mrs. Wm. Scott, (Lillian), Winchester; Preston Barkley, Chesterville; Silas, Newington; Linden, Williamsburg; Milton of Winchester.

Mrs. Floyd Carr, Potsdam, N.Y., a sister, was unable to be present owing to illness and at noon a letter was read from Thomas, of Saskatoon and John of Springwater, Sask., expressing regret at their not being able to be present, owing to the shortage of help.

At one o'clock all sat down to well laden tables and all did justice to the abundance of eats.

With dinner concluded, all gathered on the lawn under the maple trees and enjoyed a general get-together and an old fashioned singsong of hymns.

After supper, Mrs. Schwerdfeger extended hearty invitation to all to meet at her home next year, and she moved a vote of thanks to Linden and Vera for their kindness extended to all on Sunday. This was seconded by Mrs. Perrault and an enjoyable day was brought to a close.

Feeding and Care Of Poultry

The wise poultry keeper is now planning his winter campaign in order to obtain the best production.

Houses should be checked carefully for leaks and drafts. Drafts are particularly detrimental to heavy production and no flock of birds will lay heavily if litter becomes damp. The house should have plenty of light and means should be provided for adequate ventilation, says B.F. Tinney, Dominion Experimental Farm, Charlottetown, P.E.I.

Thoroughly clean and disinfect premises and equipment. Remove equipment, then sweep ceilings, walls, floors, drop boards, after which scrub or spray with a hot solution of lye. When dry, the ceiling and walls, roosts and drop boards, etc. should be given a coat of lime wash.

With the premises cleaned and ready, plan a house only vigorous, healthy pullets. Weakling stock is an unprofitable proposition.

Keeping the premises clean and sanitary at all times will tend to prevent outbreaks of parasites and disease—both of which are handicaps to economic production.

For the best production, birds should receive adequate feed and the ration should be well balanced. High protein concentrates are somewhat difficult to procure and balancing a ration may now be a bit of a problem.

The following has been recommended as an "all farm" ration that has given satisfaction:—

Oats, wheat, barley, in equal parts. Grind part of this and hopper feed as a mash keeping it before the birds at all times. Use the same materials as a scratch grain, feeding this more heavily in late afternoon or just before the birds go to roost. Keep dark green, good quality alfalfa or clover hay in racks where the birds can reach it. Alfalfa is preferable, if available, and if the hay is soaked in small lots, (seven to ten pounds per one hundred hens per day), it is surprising the amount they will eat. With this ration skim milk or buttermilk only should be used as drink. This will require about one gallon per day for each 25 to 30 birds. Milk must be used to supply necessary protein and if water is given the birds will not consume sufficient milk.

Shell and grit also must be supplied. Cull frequently and dispose of the free boarder and unprofitable birds.

Fall Values

If You Had Been At the Controls

A story of a breath-taking experience which for drama, suspense and excitement surpasses anything dreamed up by those who specialize in extravaganzas for the screen, comes to us. The story concerns Tom Belden of the Aluminum and Magnesium Division of the War Production Board in Washington. And it is a true story.

Briefly it is this. Tom Belden and a friend were flying recently from Indianapolis to Cincinnati. Shortly after the plane took off with 21 civilian passengers the stewardess was called to the cockpit. A few minutes later she struggled out of the cockpit cabin and collapsed. Tom Belden and his friend tried to revive her. Then through the partly opened door to the cabin Belden noticed that the pilot and co-pilot were in trouble. He went into the cabin to see what was wrong. Both had collapsed.

So here he was in the cockpit of a plane full of passengers—with the pilot and co-pilot unconscious. He was not a flier. He knew nothing about planes. But fortunately he was an amateur radio fan. His knowledge of radio enabled him to contact the field at Cincinnati. Soon he was talking to the chief pilot who told him to carry on, do as he was told and tell the passengers nothing. Sten by sten the chief told him how to operate the plane. That did not prove too difficult in flight. Soon he was over Cincinnati facing the dangerous task of bringing the big plane with its precious cargo safely to land. He circled the field while getting instructions. Then he lined it up, came down, levelled out, cut his motors and hit the landing strip right on the nose. The plane and passengers came to a halt intact.

A fleet of ambulances and fire trucks met the plane, prepared for a host of casualties. Only when the stewardess, pilot and co-pilot were carried off did the passengers realize that the plane had been flown by a man never at the controls before. And only then did Tom Belden collapse.

Collapse of the plane's crew was due to acute ptomaine poisoning.

To Meet Dressed Poultry Trade

The official grades for dressed poultry are established on current market demand, and this demand is built on four principle factors, namely, conformation of the bird, well-fleshed in relation to length and depth of the body, white or creamy fat showing on back, hips, breast and pin bones, and the dressing or appearance. To meet these requirements, the poultry authorities point out, all producers know that the breeding pens should contain no birds with crooked keel bones nor birds that are poorly fleshed. Birds will not have the amount of fat to meet Grade A Milkfed unless they have been crate or pen fattened for two or three weeks immediately before killing. The fourth factor, that is, dressing or appearance, has to do with the way in which birds are killed, plucked and cooled. They will not meet Grade A Milkfed unless they have been thoroughly bled, cleanly plucked and cooled.

Cooling is an important item and requires much care. Dressed poultry is a perishable product that deteriorates rapidly unless cooled immediately after killing and plucking. It must be cooled without delay. There is always a considerable loss incurred in the industry by handling dressed poultry in too high temperatures. Thirty-two degrees F. is the correct temperature to cool and hold poultry for fresh shipment and immediate consumption. Even at that temperature it can be held only for a short period.

Grade A Milkfed chickens usually sell from six to seven cents per pound higher than Grade C. This higher price of six to seven cents is the result of consumer preference.

SOME PIE FILLERS ARE NOW RATIONED

The Ration Administration has announced that under the preserves rationing now in force, pie fillers, if canned and made from whole fresh fruit or fresh fruit sliced, pulped, in pieces or in sauce form, are considered preserves and consequently are rationed. Raisin pie filling and fillers such as chocolate, caramel and cocoanut, or a cream filling merely flavoured with lemon or other fruit flavoring, are not rationed.

Wanted—A Wife!

"I got one o' them cookery books once but I never could do nothing with it."

"Too much fancy work in it, eh?"

"You've said it, every one of them recipes begins the same way. "Take a clean dish—and that settled me."

...—V...—

Presto!

Teacher was giving a lesson on the weather idosyncrasies of March.

"What is it," she asked, "that comes in like a lion and goes out like a lamb?"

And little Julia in the back row replied: "Father."

DEFEATING GERMANY'S KEY WEAPON: R.A.F. LIBERATOR VERSUS U-BOAT.

Liberators of Coastal Command are one of the answers given by the R.A.F. to Germany's key weapon the U-boat. During long, uneventful hours of patrol flying Liberators look for the under-water menace. When they find their prey, they take short, sharp and usually successful action.

Photo Shows: Liberator Pilot F. O. Turner who had a U-boat confirmed as sunk just before this photograph was taken.

FIVE-DAY TOWN
Huron Expositor

In these days of consumer shortages, when even with the rationing of many food products, people are finding it increasingly difficult to get the living allowances they have been accustomed to all their lives; when coal and other fuel is at a premium; when the stocks in every line of merchandise are dwindling and Hydro must be saved for war work, the town of Kincardine is showing the way to other towns and communities in the matter of saving these most necessary needs of mankind, and at the same time providing a wartime example for others to follow.

The business week in Kincardine now starts on Tuesday morning and ends at ten o'clock on Saturday night.

The merchants claim that they can dispose of their quota of goods in these five days and, further, that there will be a very considerable saving of coal and other fuel, as well as light, as over the long week-end the fires can be banked to a minimum or allowed to go out altogether, while lights are turned off.

From January 1 to March 21 there will be a further curtailment of business hours. During these months all business places will be closed on Saturday nights at seven o'clock.

Sandtown

A number from here attended the Avonmore Fair on Friday.

Mr. and Mrs. Andrew Helmer and son Harold and Mrs. Lloyd Hawn and Mr. Dannie Hehir spent Saturday in Cornwall.

Mr. and Mrs. John Ostler and Mr. and Mrs. Harry Gove and family spent Sunday with Mr. and Mrs. James Ostler at Moulinette.

Mr. and Mrs. Gordon Helmer of Newington spent Wednesday with Mr. and Mrs. Andrew Helmer.

Miss May Helmer of Cornwall is spending a month with Mr. and Mrs. Wilbert Helmer.

Mr. and Mrs. Tom Brownell and son Sterling and Mr. and Mrs. Walter Bryant of Massena and Mr. and Mrs. Cecil Rupert of Finch and Mr. Howard Winters and Mr. and Mrs. Gladstone Winters of Newington and Miss Luella Winters of Cornwall spent Sunday with Mr. and Mrs. Harold Winters and Mrs. Jas. Winters.

Mr. and Mrs. Victor Johnson and family of Cass Bridge spent Sunday with Mr. and Mrs. Wilbert Helmer.

Mr. and Mrs. Thorald Whiting of Iroquois spent Sunday with Mrs. E. J. Markell.

The many friends here were sorry to hear of the death of the late Mr. Robert Fleming of Farren's Point. We extend our sympathy to the sorrowing son and daughters.

Miss Leda Hehir was a Sunday tea guest of Mr. and Mrs. Andrew Helmer.

Husband—If a man steals, no matter what, he will live to regret it.

Wife (coyly)—You used to steal kisses from me before we were married.

Husband—Well, you heard what I said.

CUT COARSE FOR THE PIPE
OLD CHUM
CUT FINE FOR CIGARETTES

ALLOW RE-TINNING OF SYRUP EVAPORATORS

Metals required for the recoating of maple syrup evaporators worn by years of service will be released to renew the equipment, according to information received at the regional office of the Wartime Prices and Trade Board.

In a move to conserve metals, the manufacture of evaporators was prohibited except for replacement. Now it has been announced that this equipment from which the tin coating has been worn by service may be retinned and made suitable for further use. In this way it is anticipated that production will not be curtailed and metals marked for civilian use will be put to their best possible use.

SAY SOME FARMERS MAKING SUGAR SYRUP

Farmers in the Gananoque district are reported to be making their own syrup to help beat the sugar rationing. More sugar cane is being grown in the Gananoque district than ever before. Far-sighted residents planted the cane heavily this season, and are now squeezing out the fine Winter supply of syrup fit for breakfast pancakes, or for use in cooking or desserts. Some have improvised old-time apple cider presses for squeezing the cane; others have made their own juice extractors out of burlap sacking and stout canvas bags wringing the bruised cane dry by pressure.

A liar begins with making falsehood appear like truth and ends with making truth itself appear like falsehood.—Shenstone.

Hyndman

Mr. and Mrs. Sam Gilmer, Van Allen's Corners, were Monday evening visitors of Mr. and Mrs. Jas. Lattimore.

Mrs. Herb Wilson, Heckston, called on Mrs. Ray McCarley, Wednesday.

Mr. John Gilmer, Shanley, tax collector, was a caller in this vicinity, Thursday.

Mrs. Ed McLaughlin and family, Cardinal, spent last week with her parents Mr. and Mrs. Robert Grant.

We are pleased to see Miss Jennie Francis home again after having an operation for appendicitis about two weeks ago at the Brockville General hospital.

Born to Mr. and Mrs. Allan McFadden on Friday, September 24th, a son.

Some from here took in Spencerville Fair on Wednesday.

Mrs. Robert Conley and Lorne visited Mr. and Mrs. Howard Conley of Prescott on Friday.

Mrs. Hugh Robertson, London, Mr. and Mrs. Harry Francis and family, Toronto, spent the week-end with Mrs. Mary Francis.

Mr. and Mrs. Russell Pittman, Groveton, Mr. and Mrs. A. Pittman, Mrs. R. Connors, Ventnor, were Sunday visitors of Mr. and Mrs. Jas. Lattimore.

Mrs. Cecil Canning visited Miss Jennie Francis, Friday afternoon.

Threshing and silo filling is the order of the day in this vicinity.

Master Leslie Grant and boy with the former's uncle Mr. Ray

It is much safer to reconcile an enemy than to conquer him.—Feltham.

Drew Government Gives First Report to Province

Ontario's first Agriculture Committee of Inquiry is now at work and similar government committees are being appointed to inquire into fuel, mining, labor, forestry and other problems, Premier Drew announced.

As a prelude to practical remedies for agriculture in the Province Premier Drew said the committee with Archibald Leitch of Guelph as chairman is "conducting an inquiry and will make recommendations from time to time on every phase of agriculture in this province." The committee would be requested to go beyond the ordinary details of actual farming and make recommendations on farm education and other similar subjects.

Premier Drew replied to critics who had said his Government would be limited in its efforts to give a strong administration "because we have not a clear majority."

It has also been said that we must make compromises to obtain support," he said. "Let me remove any doubts on that score. We will govern the Province and introduce legislation just as we would have done if we possessed a large majority. It will be for the members of the legislature to decide whether they intend to support that legislation or not. We have no thought of temporizing and we are quite prepared to face the consequences of standing by what we said we would do."

At the first Cabinet meeting, he pointed out, that he had fulfilled his election promise to cancel timber contracts which disposed of vast areas that had not been developed in accordance with agreements. Contracts had been cancelled, thus returning 13,729,280 acres of the finest timber lands to the control of the people of the Province.

Another preparatory step toward the promised organization of forest resources had been the appointment of a committee of three, headed by Hon. Frank Hughes, K.C., in an effort to get the Abitibi Power and Paper Co., out of receivership.

Premier Drew also announced the appointment of Government committees to enquire into the mining and fuel problems in Ontario.

An inquiry into labor relations would be instituted, he declared, adding—"We hope to lay the foundation for the very best labor laws that can be enacted."

Health and education were under review by their departments, he stated, and progressive steps already have been taken. Speaking of the "widespread concern" over juvenile delinquency, the Premier said, "It will be our purpose to make sure that people of Ontario have a real understanding of discipline and responsibility."

The Ontario Premier added to his remarks, criticism of the "unsatisfactory" conditions in the province in regard to liquor sale and expressed the hope that "before long proposals may be placed before the Dominion Government which will result in a considerable improvement of the general situation."

Practical Aid To Farmers

"The Drew Government has delivered on the first part of its leader's promises of practical aid for Ontario farmers," says the Toronto Goble and Mail in a recent editorial.

"The Agricultural Committee of Inquiry,—actually it is a commission—is, in a sense, unique. It is non-partisian, its membership representative of the Province's diversified farming interests and its many sections. It was selected, not by the Government, but by the farmers themselves from among their own number, and neither Government nor Legislature is represented on it.

"Never before, we think, has any economic unit in Canada had the same opportunity to determine its own future."

CALLING THE COW
Stratford Beacon-Herald.

Recently we heard of a cow called Springbank Snow Countess; consider that for a few minutes. It calls up a picture of a high-born beauty, chilly and distant in manner, but with a promise of warmth and affection upon closer acquaintance. Another cow is called Glenview Pontiac Dora de Kol; there is a name which would not be amiss in the Social Register. Yet another is Doreen Francy Rag Apple, obviously a skittish, debutante, cafe-society sort of cow. And another, well-known to dairymen, is Susie Corndyke Fayne Lass, a name fit for a princess among cows.

Think of the thoughtful affection which appears in these names! Think of the pride of the milkmaid or cowman who walks out to the pasture gate and calls "Here Susie Corndyke Fayne Lass! Here Doreen Francy Rag Apple!"

And think of the pride of the cow who responds! She will be no red-eyed old terror with a crumbled horn but a high-stepping society cow, filled to the neck with cream. Anyone who says that farmers have no imagination merely shows his ignorance.

FROG CROP
Winnipeg Free Press

The story is told about the Alberta farmer whose crop failed to grow because of too much rain, a strange thing here. His fields were drowned out. To make matters worse, a plague of frogs arrived to inhabit the pools that lay round his farm. Then suddenly Winter came, as it does in Alberta, and just as the frost hardened the surface of the sloughs, the frogs leaped into the water and were frozen solid with their hind feet in the air. The farmer merely took out his lawn mower and cut himself 10 bushels of frogs legs to the acre and lived lusciously through the winter.

OATS FOR POULTRY.

Many poultrymen feel that there is some special virtue in oats both as a growing and laying feed and continue to use them in quantity wherever practicable. This claim however, states the Egg and Poultry Market Report, Dominion Department of Agriculture Marketing Service, has not been substantiated in a scientific way.

Sprouted oats are again growing in favor, especially in the light of the increasing consciousness of the need of green feed. The greatest problem in the sprouting of oats is the avoiding of mould, and a suggestion of daily turning and watering the oats seems to be the simplest form of prevention. Oats for sprouting should be soaked in water for 24 hours. When a sloping bench is used, the soaked grain is started at one end and the sprouted grain removed from the other. Each day the grain is turned, shaken up and watered as it is moved along the bench. This will assure that the oats remain sweet and free from mould. A movable board is used to separate the different lots and more space is allowed as the grain becomes more bulky. A continuous daily supply is thus maintained.

Let's Go!

Sonny—Mother, we're going to play elephants at the zoo and we want you to help us.

Mother—What on earth can I do?

Sonny—You can be the lady who gives them peanuts and candy.

—...V—...

A Tough Bird

The diner addressed the waiter. "This chicken was hatched in an incubator."

"How do you know that, sir?"

"Because no bird that had known a mother's tender care could turn out as tough as this."

A Short Nap May Mean a Long Sleep

A SHORT NAP MAY MEAN A LONG SLEEP

Fighters are careful about their sleeping habits. They do not doze while they are facing their opponents, for example. At least the winning kind do not. Both box-fighters and warriors get to be champions and stay champions because they know it is not safe to relax before the opposition quits or is knocked out.

Supposing the Nazi propaganda master, Goebbels, handed out a new dish—his theme that Canadian troops were losing interest in the war. Let's say his fancy story ran something like this: Canadians in the Navy, the Army and the Air Force are becoming weary; they are more interested in getting back home than in pressing the attack; their aggressiveness has noticeably deteriorated.

What would happen to Goebbels' propaganda in this country? Why, in every big and little town people would laugh it down! We would know the story was a pack of lies. Nothing that the German lie-masters invented could destroy our faith in the determination of our men to win, no matter what the cost.

But suppose that Goebbels' tried his hand at such tactics, in reverse. Let us imagine that he planted the following story among Canadian troops overseas: the folks at home are becoming weary of the war; production is dropping noticeably in plants throughout the country; absenteeism is growing into a major problem; young and old are spending more and more money for selfish purposes and are becoming less interested in Victory Loan drives.

Would our men overseas in such a situation have the same confidence in us and the same scorn of such rumor story as we would show against the reverse propaganda? We think the answer would be "yes". We believe that our troops have confidence in the home front. We have given them every reason for such faith in the past three years. But if we are to be champions in our field as our men in uniform are champions over there, we will remember that even a slight relaxation can prove our undoing. This is particularly applicable to our present task of making the Fifth Victory Loan campaign an outstanding success.

IT WAS TOO GOOD
Tit-Bits (London).

The ATS private had gone for a walk in the country near her camp. It was a hot day, so when she came to a pool a little off the road and surrounded by trees, she decided to have a dip.

She folded her clothes on the bank and jumped in, swam around for a while, and then scrambled out.

As she did so she saw an Army officer approaching and hid behind one of the trees. He came nearer and nearer, and suddenly called out: "Camouflage platoon, dismiss!"

Whereupon all the trees walked away!

JAM CONSUMPTION IS MUCH INCREASED

One great reason why rationing of jam and preserves is now in force lies in the striking increase in the consumption of jam in Canada during the war years. Since the opening of hostilities, this consumption has steadily climbed until last year it amounted to 70,000,000 pounds, of which 9,000,000 pounds were exported. This left 61,000,000 pounds used in Canada, where people had found 39,000,000 pounds sufficient in 1939. The demand for jam and kindred spreads finally became so great that it could not be met by increased production and rationing resulted in order to distribute available supplies as equitably as possible.

FARMERS MAY HELP SOLDIERS ON ROADS

There is nothing in the regulations of the Prices Board to prevent farmers who are in the habit of giving lifts to members of the armed forces in their trucks continuing that practice. There is no ban on furnishing such assistance to wearers of the King's uniform. During the harvest season, moreover, help may be moved in trucks from point to point where necessary in connection with their work.

Wrong Number

"I called on Mabel last night and I was hardly inside the door before her mother asked me about my intentions."

"That must have been embarrassing."

"Yes. But the worst of it was Mabel called from up stairs and said, "That isn't the one, Mother!"

—v—

Not His Fault

Two London cabmen were glaring at each other. "Aw, what's the matter with you?" demanded one.

"Nothing's the matter with me."

"You gave me a narsty look," persisted the first.

"Well," responded the other, "now you mention it, you certainly have a narsty look but I didn't give it to you."

Ever Reliable

"SALADA" TEA & COFFEE

will give you the maximum of satisfaction for your rations.

Woman's Point of View

There's a small pile of wood in a small garden behind a rather new house, a pile of wood that is not No. 1 hardwood but, nevertheless, a pile that will keep the kitchen stove burning cheerily for some time and if you have never known just how much real, cosy warmth can permeate a smallish house from a kitchen stove burning real fuel, you have missed something.

Now this particular pile of wood caused a good deal of tolerant amusement among many of the inhabitants of the area in which it is piled. For it is built of salvaged wood and the idea of salvaging anything of the thousands of cords lying about everywhere in the Province of Ontario is an idea that still strikes most Ontario folk as very ridiculous. "It doesn't pay," they chorus.

But when the city woman who built the pile in question came into the district in which it was garnered, she found coal unobtainable—such as there was of it, was being reserved for old customers. It was much the same with the small stocks of wood—old customers were to be given the preference. So the city woman looked about—there was a fine log lying partially immersed, on the lake shore. Deciding that salvage would "pay" better than a cold home, cold food and chills, the city woman, taking saw and axe, went daily to the lakeshore and bit by bit, sawed and then chopped that log, carrying home the result in a mood of pure triumph. Besides her work on the log this woman, who didn't mind if she did afford a little brief amusement to the community, picked up bits of wood here and there, some of them lying along country roadsides, some in little woods now sparse through continuous cutting of all timber of any size.

As we write someone tells us that a family, rather unique in the variety of its interests and activities, has gathered quite a respectable supply of firewood from a piece of land that a year ago no one would have thought capable of yielding a harvest of comfort. As the days wear on, we hope we shall hear of more individuals who have ceased to prattle about the salvaging of wood not "paying".

Why even the trimmings of a cedar hedge have made fires in a fireplace, fires which, if brief, were very hot while they lasted, sending out such a blast of heat as they flared and crackled that a large sitting room was warmed by it. Old shingles, too, salvaged from a spring shingling and burning on the sitting room hearth, have made the only glow of warmth in a house in which the kitchen range burns nothing warmer than electricity.

Husbands are awkward things to deal with; even keeping them in hot water doesn't make them tender.—Mary Buckley.

Not Telling

"I want to know," said the woman, "how much money my husband drew out of this bank last week."

"Sorry madam," answered the man in the cage, "I can't give you that information."

"Well, aren't you the paying teller?" she persisted.

"Yes, madam," he said, "but I'm not the telling payer."

THE MIXING BOWL

By ANNE ALLAN

Hydro Home Economist

School Days - - More Work

Hello Homemakers! Every mother has more ironing and pressing to do during school terms. No matter how simple a method we give you, the pile of laundry after a big wash is not diminished.

If you want your clothes to keep their shape and be easy to iron, put the dresses and blouses on clothes hangers and fuss with them a bit, so that they will dry smooth and straight. Button the buttons, zip the zippers, straighten the seams, pockets and collar, and you all but iron the dresses. Be kind enough to hang them in the shade, so they keep their even colour. Then when they are taken from the line fold them and stack in a basket instead of crumpling. It is a wise plan to sort linens, cottons, rayons, etc. and turn the garments inside-out. The rayons are dampened first, then cottons, lastly, the linens (which need a real hot iron), then the cottons and rayons last as they must be pressed with the iron at low heat. (Turning an automatic electric iron frequently from high to low requires time to adjust the temperature, and you are apt to damage the switch.)

When dampening, be sparing of moisture on spun rayon, a little more lavish on cottons and linens. Use a perforated capped bottle, a clean brush or your fingertips for producing a fine even sprinkle. Cover the dampened clothes in a basket for an hour, or overnight . . .longer may cause minute mould growth.

Begin on the seam or hem of the article; do not run into corners. Iron with the weave of the material. Iron with long even strokes, as the steam escapes more freely than when short strokes are used. Do not press into folds more than is necessary or the sharp edges may soon fray. When ironing garments press the thin parts of the material first before they dry out. Hang each article over a clothes rack to air thoroughly, hanging blouses, shirts and dresses on hangers.

May we remind you that in these full-scheduled days of time conservation not to press articles you need not iron—bath towels, dish towels, overalls, seersucker materials, etc. . . .no one is doing unnecessary jobs.

TAKE A TIP

1. Rayons need very low heat. It is wise to try the iron first on a portion of the fabric that does not show.
2. Jersey silks, etc., need moderate to low heat. A damp pressing cloth should be used on the wrong side of the garment.
3. Wools ned moderate heat. Again, a damp pressing cloth should be placed on the wrong side of fabric and iron should be pressed down lightly. The iron should be lifted and placed on the next area—never moved up and down as ordinarily.

THE QUESTION BOX

Mrs. H.K. suggests:

Uncooked Mustard Pickle.

1 gallon cider vinegar, 1 cup salt, 2 ounces white mustard seed, 1 ounce of turmeric, ¼ pound dry mustard, 1 teaspoon cayenne papper, 2 cups brown sugar, Saccharine to taste, cucumber, onions, cauliflower, etc.

Combine vinegar and flavourings. Cut prepared vegetables in suitable sizes and place in the liquid. Cover with heavy plate to keep vegetables under liquid. The longer the vegetables are left in the liquid, the better the flavour. Stone or glass jars are desirable.

Mrs. J.C. says her family likes a one-plate meal frequently.

On a plate arrange 3 crisp lettuce leaves. In them place devilled eggs; slices of green pepper and shredded carrot; thick slice of a cantaloupe and a few grapes in the centre. For dressing put some grated carrot in a piece of cheesecloth and squeeze the juice over the lettuce and carrots.

Mrs. C. M. asks: "How much saccharine do you recommend to add to 2 quarts of applesauce?"

Answer: Cook apples in a little water. Add saccharine to taste (about two ¼ grains) after you have taken the cooked sauce from the stove.

Anne Allen invites you to write to her c/o The Record. Send in your questions on homemaking problems and watch this column for replies.

Street Scene Brings Close The Horrors of the Fighting

In Moscow, as in all great cities which have felt the heart tug of war, there are street scenes daily which bring close the horror of the fighting.

The time was late afternoon. The golden rays of the setting sun cut slantwise across the old Smolensk Rd., down which the army of Napoleon once so ignobly withdrew from Moscow. Children played in its faint warming glow.

The games were the same as might have been played in any other city. But sitting to one side were two tots who didn't play.

One was a boy about 7, the other a girl about 9. They sat silently in a window which was almost level with the street. The boy held the girl's hand.

The girl's little white face was turned toward the sun. She sat there as if spellbound.

You stopped and talked as you would to a couple of children any where. There were the usual questions—what is your name?

How old are you? Is this your sister? Is this your brother?

They were brother and sister and their names were Katia and Vovo.

Suddenly with horrible clarity you realize why Katia was staring into the sun and not blinking or squinting—Katia was blind.

Vovo was full of quiet information.

His father? No, he did not have a father any more. He was killed by the Germans. His mother? The last he had seen of her was when an aunt took him and his sister from their home in Smolensk. His mother was sick and some friends were taking her away in a truck. Yes, there was a lot of bombing and shooting that day in Smolensk—that day a couple of years ago.

As her brother talked of bombs, Katia turned her little head.

"I could see before the bombs," she said.

That was one of those statements that you don't answer—or don't know how to answer.

The boy said he and his sister were sitting in the sunlight while his aunt put her other children to bed and fed them.

"She's got three besides us," Katia volunteered, "but I am more trouble than the baby because I can't see."

It was heartening to hear the Moscow radio announce that Demidov, just northwest of Smolensk had fallen to the Red Army. I hope some one told Katia.

WILD RASPBERRIES BEARING WELL

Yesterday James Black of town, brought in to this office one stalk of wild raspberries picked in the swamp a mile or so north of the village, on which there were a dozen beautifully ripe berries and thirty or more in various stages of development.

Orchardside

Mr. and Mrs. Donald Loucks and Mrs. Thos. Loucks spent Thursday afternoon in Winchester.

Mr. and Mrs. Pliny Irving and family spent Sunday in Mountain visiting the latter's mother Mrs. Alice Bolton.

Mr. and Mrs. George Cunningham and Irene and Hugh spent Sunday visiting Mr. and Mrs. Thos. Cunningham at Winchester Springs.

Corporal B.M. Loucks of Trenton, RCAF, spent the week-end at the home of his parents Mr. and Mrs. Thos. Loucks before leaving for his new posting at Manning Pool Depot, Toronto.

Mrs. Jas. Imrie and children John and Ronald of Kingston spent a few days with her parents Mr. and Mrs. Geo. Elliott.

Our Red Cross unit met on Thursday last at the home of Mrs. Geo. Cunningham where the members quilted a quilt.

Friends are sorry to report Mrs. Edward Hummel ill with pneumonia and hope for a speedy recovery.

Mr. and Mrs. John Bolton and daughter Linda of Winchester Springs spent Sunday afternoon with the latter's parents Mr. and Mrs. Thos. Loucks and family.

Mr. and Mrs. Harry Edgerton visited on Sunday afternoon at the home of Mr. and Mrs. Wilburn Edgerton.

Mr. Jas. Irving of Mountain called at the home of Mr. and Mrs. Pliny Irving on Monday evening.

Melvins

Mr. and Mrs. Willard Presley and of Newington were Sunday guests of Mr. and Mrs. J. Presley.

The Red Cross meeting was held at the home of Mrs. Manuel Coveau this Wednesday afternoon taking the form of a miscellaneous shower in honor of Mrs. Joseph Coveau (nee Miss Lucy St. Pierre), who was married recently. Luncheon was served, and a pleasant afternoon brought to close.

Mr. and Mrs. Geo. Beckstead and children and Mrs. G. F. Beckstead and Mr. John Stata were guests of Mr. and Mrs. Lorne Jordon of Iroquois and called on Mr. and Mrs. Ernest Swetfeger of Hainsville on Sunday.

Mrs. Euclid Coveau visited her parents Mr. and Mrs. A. St. Pierre last week.

Mrs. Chas. Flegg of Chesterville visited Mrs. R. Scott on Wednesday and attended the shower of Mrs. J. Coveau.

SAVE APAIRY EQUIPMENT (Experimental Farm News)

Now that the honey crop is removed, the beekeeper will be well repaid by paying careful attention to the protection of his equipment, says C.A. Jamieson, Bee Division, Central Experimental Farm, Ottawa.

Extractors should be washed both inside and out with hot water to remove all traces of honey. All storage tanks and everything that comes in contact with honey should be cleaned in the same manner. There used to be an idea that extractors and tanks should be left smeared with a film of honey which acts upon the iron that becomes exposed when the zinc plating is broken. Storage in a dry atmosphere after thorough washing and drying keeps the metal surfaces in better condition.

This is the time of the year that the wax moth is most dangerous. Many eggs are laid in the cracks of the supers while still on the hives. Fortunately the bees will look after any larvae that enter their hive, but when the supers are removed it is the beekeepers responsibility to destroy this pest.

Paradichlorobenzene, commonly called "P.D.B." is a safe and effective fumigant for this purpose. Supers may be stacked 5-6 high on an inverted lid with all cracks between supers covered with gummed paper to prevent leakage of the gas. Place about six tablespoonfuls of the fumigant in a dish or on a piece of paper on the top super and cover tightly. The gas is heavier than air and will penetrate to the bottom of the pile. The treatment should be repeated two or three weeks later in order to destroy larvae from newly hatched eggs.

Conservation of your apiary equipment is essential as metal and bees wax are urgently needed for the manufacture of war materials.

Mr. and Mrs. D.M. McGee and son Billie of Toronto are spending a holiday with Mrs. T.J. McGee and Mr. and Mrs. W.O. Dixon.

ENGAGEMENT.

Mrs. Bessie McLaren wishes to announce the engagement of her daughter Lillian Helen to William Earl Stewart, son of Mr. and Mrs. James Stewart of Morewood. The marriage to take place in October.

Morewood Mission Band

The Regular Monthly meeting of the Mission Band was held in the Sunday School room of the church. The Band entertained and was hostess to the WMS. the CGIT and the Baby's Band. The meeting opened with hymn 605 and prayer by Betty Carruthers. A welcome was given to all the visitors by Betty Carruthers on behalf of the members of the Mission Band. Devotional period was taken by Ms. Hubert Dixon, leader of the CGIT; hymn 614 was sung and a story read by Mrs. Dixon. Hymn 251 was sung by the Mission Band with a story by Mrs. Popplewell about our new study book.

After hymn 623 was sung a recitation was given by Donalda McLaren. A temperance Quiz and temperance songs were given by the Cannamore girls. Hymn 252 was sung and the meeting closed with the Lord's benediction. Lunch was served by the Mission Band girls.

ARRIVES OVERSEAS

Mr. and Mrs. John McLean of town, received a cable yesterday from their son Pte Rae McLean, stating that he had arrived safely overseas and was well.

CARD OF THANKS.

Mr. and Mrs. Willie McDonald wish to thank their friends and neighbours for many acts of kindness, beautiful flowers and expressions of sympathy in their recent bereavement.

NAMES OF LOCAL BOYS OVERSEAS WANTED

Would the residents of Chesterville and district please hand in to either Mrs. R. C. Dillabough or Mrs. Geo. Merkley before October 8th, the names of local boys overseas in the armed forces. The Women's Institute will pack and mail a Christmas box to each one.

Fire Insurance

COVERING

MERCANTILE, MANUFACTURING, RESIDENTIAL, AND FARM PROPERTY

WINDSTORM & AUTOMOBILE RISKS ALSO

Prices of Farm Products have advanced but the rates for Fire Insurance in our Companies remain the same and are the lowest in the Province for this class. No fees asked nor premium notes or other obligations required, as our securities—as sound companies—are on deposit with the Dominion Government, Department of Insurance.

FARM PROPERTY INSURANCE

CARRIED UNDER THREE-YEAR OR ONE- YEAR SYSTEM AS NECESSARY

James Clement DIAL 598 Chesterville

Why run these Risks of Damage To Your Home or Apartment ?

1. FIRE
2. LIGHTNING
3. WINDSTORM
4. HAIL
5. EXPLOSION
6. RIOTS
7. VANDALISM AND MALICIOUS MISCHIEF
8. IMPACT OF AIRCRAFT OR OTHER VEHICLES
9. SMOKE DAMAGE
10. FLOOD
11. WATER—ICE—SNOW
12. COLLAPSE BUILDING

Your ordinary fire policy does not cover all of the above hazards . . . but the

Preferred Property Damage Policy Gives this broad coverage on Dwellings and Apartment Buildings

Its cost is equitable; that's why every property owner can well afford it. You never know when a catastrophe may strike your property, especially from fire, windstorm or smoke, to say nothing about damage from lightning or hail, or when a roof or wall may collapse from weight of ice and snow.

The Preferred Property Damage Policy is one of the broadest forms of Property protection issued.

Enquire about this contract. We will give you full particulars.
