JAMES McLAUGHLIN

The sudden death of Mr. James McLaughlin, who passed away at his home on Tuesday, at 11 p.m., has caused general regret in the community. Mr. McLaughlin, who for many years had been successfully engaged in the tombstone business, on Lock street, Morrisburg, was active, as usual on Tuesday, and death came with but a few hours' warning.

Deceased was born in the township of Metilda in the year 1854, a son of the late Michael McLaughlin. He is survived by his wife; one son, Robert of Edmonton, Alta., and one daughter, Miss Margaret of Ottawa; two sisters and three brothers, Mrs. Kendall, Brockville; Mrs. Kearns, Vancouver, B.C.; Dr. P. McLaughlin, Winchester; Thos. McLaughlin, Metilda, and Dr. E. McLaughlin of this town.

The funeral service was conducted at his late home on Friday, at 2 p.m., Rev. H. Cameron of Ottawa, officiating.

MORRISBURG PUBLIC SCHOOL

March Honor Roll. No. enrolled 215. Per cent. attendance, 79.39. Average attendance 170.81. Number days school open 21.

Room A—Entrance Class—
Luella Heagle, Muriel Marsh, Ethel Hamilton, Pauline Biecum, Claribel Harriman, Jane Williams, Marion Vipond, Margaret McGannon, George Biecum, John Thompson, Kermit Pyper, Gerald Colligan, Hazel McIntyre, Edward Williams, Malcolm Colquhoun, Edward Shennett, Paul Gormley, Margaret Empey, Eileen Baker, Laura VanAllen, Ingram Redmond, Clinton Weegar, John Sherman, Marcella Nash, Eileen Myers, Margaret McGillivray, Collette Hutt, Edna Beckstead.
J. CLINTON FETTERLY, Principal.

Room B, Jr. Fourth—
Edythe Laurin, Irwin Hillard, Mary McDonald, Albert Taylor, Ernest Guay, Theodore Borrette, Nola Burrette, Carman Casselman, Homer Janack, Mona Barr, Margaret Priest, Audrey Fisher, Thomas Robertson, Gilbert Clark and Foster Bowman, equal; Flossie Reid, Jack McMartin, Pauline Rozon, Kenneth Stitt, Rose O'Malley, Basil Fisher, Helen Vipond, Marguerite Munro, Harold Cassel, Clayton Merkley, Willie Reddick, Howard Beckstead, Hubert Duval, Max Crawley, Ruth Reddick, Vera Myers, Claude Wood, Lloyd Barkley, Jack McLaren, Louis Lee, Laura Aikman, G. A. Foulds.

Room C, Jr. 3rd Class.
Rosie Stitt, Henry Rohrig, Evelyn Colligan, Ruth Coir, Ruby Lynch, Ruth Weston and Thelma Clark, equal; Phyllis Armstrong and Mae Williams equal; Dora Casselman, Sheridan Casselman, Ralph Ashton, Glen Hummell, Edna Utman, Harry Utman, Hugh Shennett, Andrew Hummell, Wilma Wood, Kathleen Gordon, Grace Casselman, Orlie VanAllen, Mary Gogo, Harold Campbell, Ernest Dawson, Maxwell Thom, Percy Reid, John Hummell.

E. M. Steed.
Room D, Sr. Second Class.
Rosa Taylor, Aden O'Shaughnessy, Ora Casselman, Willie Barrett, Helen Janack and Raymond Empey equal; Harry Locke, Marjorie Dupran; Craig Merkley and Marjorie Hutt, equal; Muriel Weegar and Ross McLaren, equal; Dorothy Beckstead, Arlington Gamble, John Millward, George Smith and Lloyd VanAllen, equal; Donald Myers, Malcolm Pruner, Jean Meikle, Violet VanAllen, Giles Harper, Mary Hummell, Jean Vipond, Audrey Daley, Alwyn Darragh.

Jr. 2 Class—
Dwaine Harriman, Eleanor Miller, Kathleen Clark, George Aikman, Robert Merkley, Ronald Ryan, Gertrude Casselman, John Hartell, Audrey Myers, Helen Gamble, Spencer Clark, Clifford Gordon, George McGillivray.

C. L. Hazell.
Senior First—
George Jenkinson, Lawrence Colligan, Leona Hutt, Genevieve McDonald, Wallace Guay, Carl Phillips, Walter Taylor, Ruby Shennett, August Rohrig, George Weegar, Hubert Holmes, Joe Burrette, Gertrude VanAllen, Gladys Smith, Isabel Wood, Darwin Stata, Albert Fetterly.

Junior First—
Ernest VanAllen, Harry Smith, Herman Smith, Eddie McKay and Terret Empey equal; Dorothy Lynch, Gerald Hunter, Marion Gamble, Edith VanAllen, Sr. Primer—
Della Coir, Luella Harriman, Willie Sutherland, Arthur Colligan, Burton Middagh, Reginald McGillivray.

M. Smith.
Class A—
Arthur Laurin, Marion Fetterly, Ralph Hummell, Lawrence Snyder, Sarah VanAllen, Kenneth Borrette, Willie Locke, Beaumont Hutt, Herbert Mallen, Edith Beckstead.

Class B—
Wellington Hall, Sybil Armstrong, Gladys Aikman, Gordon Thom, Isabel Duval, Leonard Laurin, Gordon McKay, Phyllis Pear.
Class C—
Marjorie Ryan, David McDonald, Charlie Weegar, Ross MacIntyre, Norman Clark, Ronald Hunter, Eileen Lynch, Willie Gordon.

Class D—
Bonnie Carson, Clifford Reid, Lulu Leaman, Dannie Locke, Dorothy Barclay, Pat. Myers, Jno. Stitt, Donald Beckstead, Joe Agulnik, Willie Coir, Gertrude Campbell.

CORRESPONDENCE

To the Editor, "The Leader":
Dear Sir,—As you have been kind enough to place the columns of "The Leader" at the disposal of the citizens of Morrisburg for the discussion of the Electric Light and Power question, and as several citizens have requested the publication of the Minority Report of the Committee appointed by the Municipal Council to advise in the above matter, that they might have the opportunity of thoroughly studying the question, I beg to hand you a copy of the said report for publication.

THE REPORT

"To the Reeve and Council, of the Village of Morrisburg.
Gentlemen,—Not being in accord with the recommendations of the majority of the Committee appointed by your honorable body to advise in the matter of Electric Light and Power, I beg to submit for your consideration, a minority report.

"I could not see the wisdom of advising you to secure the services of an expert to suggest changes and report on the cost of the same in the face of the report made in 1904 by W. McLea Walbank, C.E.

There is no more power available now from the canal than there was at the time of making that report, and Mr. Walbank reported, that under winter conditions, the total amount of power the whole canal would supply, if the intake at the head were large enough to admit the full capacity of the canal, would be only 800 Horse Power, assuming a current of 1 1/2 feet per second, but as the intake at the head was capable of supplying only 51,200 cubic feet per minute, the Horse Power available without enlarging the intake was only 500.

I fancy few would care to question Mr. Walbank's ability or his standing as an Engineer, and if there are only 500 Horse Power available without the tremendous cost of enlarging the intake, it seems to me that the cost of any changes in the Big Power Plant on the bank would not be commensurate with the small increase of power secured by such changes. It must be remembered that the 500 Horse Power includes what is being utilized by the Lighting Plant and Waterworks Plant, so that the margin secured from any changes is small indeed.

"Mr. Walbank in the same report deals with the suggestion of enlarging and improving the Lighting Plant and estimates that the present output of this plant could be increased to 408 Horse Power by removing the sluices, and widening the present flume to 50 feet, making the power house 75 feet wide and the tail race 58 feet wide and 10 feet deep using the water at about two feet per second. This would mean simply the construction of a new plant at a cost of at least \$42,000 and the throwing away of the present lighting plant, and all for the sake of securing 150 H.P. more than it now develops.

It is contended that if this course were adopted we would have electric power to induce industries to locate here. We have been offering free power for years to induce industries to come to Morrisburg and I see no reason why they would be more likely to come in the future than they have in the past.

I could not agree with the other members of your committee in recommending the adoption of the Meter System in connection with the payment for electrical energy, because I am of the opinion that, although it is the most equitable method of charging for electrical energy, it will entail a needless expenditure and increased taxation when already our taxes are higher than in the cities where there are many advantages we do not enjoy in Morrisburg.

"Three or four years ago, under normal conditions, there were no complaints from the consumer with respect to the quality of the light being supplied by our Lighting Plant.

During the three or four years referred to the number of lights carried by the plant, has not materially increased, nor has the consumer been more prodigal in the use of the light so it naturally follows, if we are not now getting as good service as we did then, that there must be reasons for the poor service other than the excessive use of the lights.

The other reasons are 1—Waste of energy by transmitting the current through many feet of useless and unused line. 2—Waste of energy by grounding the current. 3—The use of energy to operate Electric fans, electric irons, electric grills, electric washers, electric cooking ranges, electric water heaters, electric air heaters, electric toasters, electric meat grinders, small electric motors, electric pianos and other electrical appliances.

The remedy for No 1 and No. 2 is obvious and simple. The remedy for No. 3 is to operate the Light Plant at night only, for lighting purposes only, and incidentally save the cost of employment of one operator whose services are rendered necessary now because the plant has to be operated in the day time to furnish electric power to manufacturing concerns (and this at a much lower rate than that charged

Built for Hard Work As Well as for Comfort

The "Master Four" Touring, 23-35 Special

THE McLaughlin-Buick "Master Four" Touring is the ideal car for everyday use. It is strongly constructed to "stand up" under the most strenuous service, over all kinds of roads, in any kind of weather. It is ready with abundant power for any emergency. It is low in cost of operation and upkeep, and it is backed by such widespread and efficient service that it need never be "laid up" when wanted.

Yet it is a handsome car—one you will be proud to own. It is big enough to accommodate the family on its pleasure trips and on visits to friends and relations. It is a comfortable car—smooth riding, a real means of relaxation after a hard day's work. As to price, a close inspection will convince you of its outstanding value.

BRITISH EXCHEQUER SHOWS SURPLUS OF HUNDRED THOUSAND POUNDS

Reduction of Expenditures Under Heads of Civil Services and Defence, Together with Big Revenues from Income Tax, Excess Profits Duty and War Stores Sales Result in Balance on Right Side of Ledger.

London, April 1.—The extreme difficulty experienced by Chancellors of the Exchequer, after the war, in estimating correctly the nation's accounts a year ahead was shown by the figures for the financial year ended March 31. Instead of a surplus between six and seven million pounds sterling, as estimated by the former Chancellor, Sir Robert S. Horne, the surplus actually exceeds £101,000,000.

This big surplus is mainly due to unexpectedly large reductions in expenditures, the chief saving being under the head of civil service, which cost approximately £287,000,000, as compared with estimates of £450,000,000, and defence services of £111,000,000, as compared with an estimated £190,000,000.

On the revenue side, although the income tax was reduced, it produced £50,000,000 more than was estimated,

while the excess profits duty and sale of war stores together produced £64,000,000 less than estimated.

The question uppermost in the nation's mind at the present moment is whether the budget statement Chancellor Baldwin will submit a week hence will afford any further relief from taxation. The Chancellor is being bombarded with demands for such reductions, and there is general expectation of a reduction of sixpence or a shilling on the income tax, with relief in the beer and sugar duties.

The present year has not been remarkable for expansion of trade, but the fact that the reduced income tax has yielded so much beyond expectations will be seized upon by those who argue that the only thing required to stimulate trade and industry is relief from heavy taxation.

BIG ADVANCE IN CUSTOMS REVENUE

Excise Taxes Also Show Marked Increase During Fiscal Year Just Ended.

Ottawa, April 1.—Revenue received from customs and excise during the fiscal year 1922-23, which ended on Saturday, amounted to \$274,655,739, an increase of \$44,855,465 over the previous fiscal year, for which the total revenue was \$229,800,274. Excise tax collections showed there was also a marked increase in the revenue derived from customs import duties. The total amount received in customs import duties during 1922-23 was \$131,828,042, as compared with \$119,553,485, or an increase for the twelve months of \$12,274,606. Excise taxes yielded \$105,649,889 in the year just ended, or \$83,020,547 more than in the previous year, when the amount received was \$72,629,342.

The amount collected in excise duties during the fiscal year just closed was \$36,022,439. Sundry collections yielded \$1,155,367 in 1922-23, or an increase of \$118,923 over 1921-22, when the total revenue from this source was \$1,037,043.

The month of March, the last of the fiscal year, showed increases in import duties, excise taxes and sundry collections. Customs import duties collected during the month totalled \$12,524,852, as compared with \$11,856,616 in March, 1922. The amount realized from excise taxes last month was \$9,093,657, as against \$5,217,780 in the same month a year ago. Excise duties yielded \$2,333,216, a decrease from March, 1922, when revenue from this source was \$2,908,440. Sundry collections amounted to \$91,374 last month, as compared with \$88,920 in March, 1922.

"Worry," says a recent book on nerves, "is a complete circle of inefficient thought whirling round a pivot of fear."

Lord Robert Cecil.

He is soon to pay a visit to Canada and the United States. During his visit to Toronto he is to receive a degree at a special convocation of the University of Toronto, when other distinguished men will also be honored, among them, Sir Henry Newbolt and Sir Robert Baden-Powell. Lord Robert is British representative in the League of Nations.

NEWFOUNDLAND IN GRIP OF BLIZZARD

Toll of Death in Thursday's Storm Now Six—Schooner Sinks.

St. John's, Nfld., April 1.—The schooner Gordon Hollett sank off Cape Race within an hour after the crew had been removed to the steamer Sable, the latter vessel reported on her arrival here to-day with mail from Louisbourg, C. B. The Gordon Hollett was 65 days out of Cadiz for St. John's, salt-laden, when she foundered.

The schooner was damaged by ice while trying to work her way through the fogs to this port, and on sighting the Sable, hoisted distress signals.

Captain Thrown, of the Gordon Hollett, reported his schooner's condition to the Sable and the crew was transferred without suffering discomfort. No other steamer was expected in that vicinity for many days.

Reports from outlying districts of Newfoundland brought the total deaths from Thursday's blizzard to six. In addition to three men previously reported frozen to death at Three Harbors, the loss of three became known to-day.

John Tobin of Trepassy walked into a hole in the ice on Trepassy Harbor, near Cape Race and was drowned. Jacob Stoodley and Thomas Green, of Fortune Bay, disappeared while on their way to English Cove.

Service on the Newfoundland railway suspended owing to the blizzard, has not been resumed as yet. Off the coast the storm is still raging. Many vessels remain frozen in the ice-fields and the sealing fleet reported by radio yesterday that it was unable to move owing to the ice pack.

Nero spent an equivalent of about \$200,000 for roses for one festival.

THE PRINCE IN ACTION

Prince Edward of Wales, recently dubbed "The White Prince" by the United States Ambassador to England, photographed just as he made a jump in a recent race in which he finished third. The Prince is devoted to riding and hunting and is never happier than when on a horse.

COAST GUARD BOAT EFFECTS THRILLING RESCUE ON STORMY LAKE ERIE

A despatch from Cleveland, O., says:—Successfully battling the waves of Lake Erie, United States coastguards early on Wednesday night brought to shore Harry Holsworth, who, for 24 hours, lay a victim of pneumonia on the waterworks crib, of which he was the keeper, five miles out. It was one of the most thrilling rescues recorded in the annals of the Great Lakes' history.

The coastguard power boat, with a crew of eight men and a captain, set out for the crib late on Wednesday in the teeth of a high wind, after several previous attempts had failed. An hour later, the boat itself became the object of a rescue.

As the power boat reached the crib, John Hugo and Thomas B. Keller, Holsworth's assistants, tied a rope around the sick man. Then as the boat manoeuvred in close, Holsworth was lowered 20 feet to the ice-coated cabin roof as the vessel passed.

He was grabbed by two of the crew, who several times almost slipped into the water. Holsworth was finally placed inside the cabin, where Dr. Harry L. Baird worked over him as the boat buffeted the waves on her landward trip.

Half way back to the coastguard station, the power boat's engine went dead. The crew of the Frank W., which had been held in readiness by the Great Lakes Towing Company, steamed out into the lake and towed the boat to shore.

An ambulance, held in readiness, rushed Holsworth to a hospital. His condition is extremely serious, Dr. Baird declared.

First word that Holsworth was ill was picked up by an amateur radio operator early on Wednesday. He in turn notified the coastguard, but because of the heavy seas and high wind, the life-saving crew was unable to approach the crib during the day.

Victoria Cross Winner is Heir to \$75,000

Prince Albert, April 1.—After a year's search by private detectives, Dr. R. C. Gillmour, V.C., has been located on a farm at Canwood, between Prince Albert and Big River.

The object of the officers' search was to acquaint him with the fact that he had been left a fortune of \$75,000 by his grandmother, Lady Jean Gillmour of Newton Mearns, Glasgow, Scotland.

Dr. Gillmour was attached to the Gordon Highlanders during the war, and received his V.C. for carrying his wounded Colonel off the field in face of heavy fire during the retreat from Mons on October 21, 1914.

Plan to Receive Canadian Cattle Officially

Glasgow, April 1.—Glasgow corporation is extending to the first shipment of Canadian store cattle received since the lifting of the embargo an official reception. Invitations to attend the landing have been sent broadcast by the markets committee. The committee is hoping that the shipment which is now nearing Glasgow will be the first to arrive in Great Britain.

Thirty Prisoners Escape from Limerick Jail

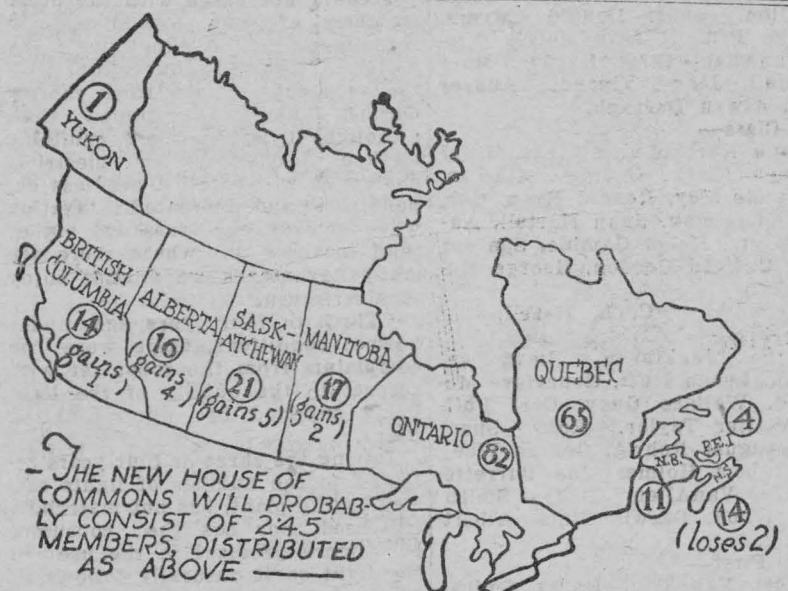

Dublin, April 1.—Thirty prisoners escaped from Limerick Jail Saturday by means of a tunnel. Two of them were recaptured.

Miss Mary MacSwiney was arrested again on Thursday, but was released yesterday.

Queenston Dockyard Handed Over to Free State

Queenstown, Ireland, April 1.—The well-known Saul Bowline dockyard here was handed over to the Free State authorities Saturday. As the Irish tri-color was hoisted to the signal tower, national troops present. Two hundred troops will be quartered at the dockyard.

Canada exported meats and allied products to the value of \$30,752,000 last year, and imported to the value of \$10,265,000, leaving a favorable balance of \$20,487,000, according to a statement issued by the Dominion Bureau of Statistics. It is expected that shipments to the United Kingdom in 1923 will show a substantial increase over those of 1922, in view of the lifting of the embargo on Canadian cattle by the British Government.

REDISTRIBUTION FOR THE COMMONS

It is expected that the redistribution, based on the last census, will show 245 seats in the Canadian House of Commons distributed as marked on the above map.

SEVEN KILLED, 15 INJURED IN WRECK

Big Four Pullman Struck Automobile at Columbus Grade Crossing.

A despatch from Columbus says:—Seven persons are known to have been killed, and fifteen injured, some seriously, when a fast Big Four pullman train, enroute from Boston to Cincinnati, struck an automobile at a grade crossing at the North city limits Friday morning.

The engine left the tracks and turned over in the ditch, four pullman sleepers piling on top of it. All of the cars in the train, with the exception of a dining car left the track.

The train, due in Columbus, at 7.50 o'clock, was more than an hour late and was running at an estimated speed of 65 or 70 miles an hour.

The known dead are two firemen and the occupants of the demolished automobile, Mrs. Frank F. Hemminger of Columbus, and her two children.

Kingston Lad Killed in Grist Mill Machinery

Kingston, Ont., March 30.—Frank Babcock, aged nineteen, employed in the grist mill of Robert Rickey, Millhaven, shortly after eleven o'clock yesterday morning was caught in the shafting and terribly injured. He died at three o'clock this afternoon.

Murderer to Hang on June 23 at Fort Saskatchewan

Stettler, Alta., March 30.—Fred Kolvin was found guilty by a jury last night of the murder of John Kaslanko and was sentenced by Mr. Justice Simmons to hang at Fort Saskatchewan on June 23 next. The deliberations of the jury lasted for five hours. The accused took the sentence stoically and showed no emotion.

Senator Dundurand

One of the speakers in the debate in the Senate upon the important subject of the Hoppe claims in the far west. They are supposed to contain anthracite and other varieties of coal in unlimited quantities. They were discovered and owned before the war by a German who claimed to be an American citizen. The Government cancelled his claims and there has been much litigation and legislation concerning the lands since.

Turkey Preparing to Ratify Peace Treaty

London, April 1.—A despatch to The Times from Constantinople says the National Assembly at Angora today unexpectedly, on a proposal made in behalf of 200 Kemalist deputies, voted by a large majority in favor of immediate elections so that the new assembly would be ready to ratify a peace treaty is one is signed. The despatch adds that Ismet Pasha expressed his approval of the plan.

France lost 10 per cent. of its population in the war.

THE TONIC THAT GIVES STRENGTH

Now is the Time to Invigorate Your System and Throw Off Winter's Ills.

An unusually trying winter is almost over, but the spring will find many whose strength has been sapped and systems undermined by winter colds, influenza, pneumonia or close confinement indoors. Recovery from this condition is often slow, but it can be hastened by the use of a true tonic medicine. Strength and energy can be restored, the stomach toned up, headaches banished and nervousness overcome through a fair use of Dr. Williams' Pink Pills. These pills have a direct action on the blood, enriching and purifying it, thus bringing new strength to every organ and nerve in the body. In this way this medicine has brought new health to thousands of weak and despondent people. Among those who owe their present health to Dr. Williams' Pink Pills is Mrs. Clarence E. Misner, Chipman's Brook, N.S., who says:—"I had a very severe attack of influenza, but after the characteristic symptom of that trouble had passed, I was left in a very weak and depressed condition. I could not keep on my feet for half an hour at a time, and words can scarcely tell how badly I did feel. I had been taking the medicine my doctor gave me, but it was not helping me, and as I had used Dr. Williams' Pink Pills on a former occasion with great benefit I decided to try them again. I got half a dozen boxes, and soon after beginning their use I could feel my strength returning. By the time I had used up my supply of pills, my old-time strength had come back, I could do my housework and keep on my feet all day without feeling used up as formerly. I feel that these pills have been worth their weight in gold to me, and I strongly recommend them to other weak, run down people."

You can get these pills through any dealer in medicine or by mail, post-paid, at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Failure may be quite as important as success in character-making. Minard's Liniment used by Physicians.

There is one attempt in which failure is unforgivable—the attempt to be funny.

Compelled Belief.

"So beautiful and charming a girl as you should believe I am telling the truth!"

April Promise.

April, you're a comely name,
What may be its root?
Latin smooth as cherry bark
Must have borne such fruit.

Who'd have thought "aperio"
Gave the sweet degree?
Open windows, open brooks,
Are its prophecy.

Open eyes to loveliness
Of the bridal spring,
In a midst of emerald
Shyly burgeoning.

Open souls to greet the gifts
Of a heavenly hand,
Pouring glories without stint
O'er a radiant land.

Open bird throats, rearing buds,
Add their jocund share;
With such hues the open sloughs
We can surely dare;

Unafraid of sucking bogs
In the woodland lanes,
Tramp we home with mired feet,
Proud of our campaigns.

"April, April," how it lifts
With the bubbling stream!
"April, April," thrushes call
Through the shower and gleam.

Winter, then, our open hearts
Shall no more annoy;
They shall greet the April dawn
With an answering joy.

—Elliot White.
Fiction as she is wrote—"She gave him a black look and he turned white."

Your Job Is Your Key.

"I will never get ahead here. There is nobody here that cares a continental whether I get on or not. It doesn't make any difference how hard I work or how I do my work, nobody pays any attention."

Now, I often hear remarks like that. Employees say, "What's the use? I don't propose to wear my life out for nothing. I am just going to do enough to draw my salary. I will look for something better."

My friend, do you realize that that something better waiting for you depends on how well you can do your work where you are right now? Your present job is the key that will open the door to the place above you, and the door is not likely to open until you open it. Success doors don't open themselves. They don't open very easily.—O. S. Marden.

SPRING WEATHER HARD ON BABY

The Canadian Spring weather—one day mild and bright; the next raw and blustery, is extremely hard on the baby. Conditions are such that the mother cannot take the little one out for the fresh air so much to be desired. He is confined to the house, which is often over-heated and badly ventilated. He catches cold; his little stomach and bowels become disordered, and the mother soon has a sick baby to look after. To prevent this an occasional dose of Baby's Own Tablets should be given. They regulate the stomach and bowels, thus preventing or relieving colds, simple fevers, colic or any other of the many minor ills of childhood. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Owing to lack of fuel and capital, 20,000 miles of railway under the Russian Soviet has been closed.

Minard's Liniment for sale everywhere

Forest Fires.

The season of forest fire danger is approaching and the forest services, federal and provincial, and forest protective associations, are making preparations to combat this great destroyer of forest wealth. Everything that modern science has devised will be used in the campaign—patrols, lookout stations, telephones, telegraphs and heliographs, portable pumps, gasoline trucks, power boats, railway speeders, and aeroplanes. These are all valuable aids, but the great engine for fighting forest fires is public opinion.

Nearly all forest fires are caused by human carelessness, therefore when public opinion sets itself solidly against this carelessness, and holds it to be a crime against the nation, a large part of the cause of fires will disappear. Patriotic citizens can do a great service for Canada by being scrupulously careful with their own use of fire when in the woods and by helping to build up, whether they live in the city or the country, a body of public opinion about fires which will deter the careless and strengthen the hands of those who protect the forests.

In proportion to its size a fly walks thirty-five times as fast as a human being.

The Arctic Ocean is said to be getting warmer, with the result that icebergs are getting scarcer and herrings are being found in the old seal-fishing grounds.

HAPPY MOTHER PRAISES TANLAC

Mrs. Cooper Declares It Restored Health of Delicate Daughter—Gained 11 Pounds.

"Six months ago Tanlac brought robust health to my daughter Stella, who is seventeen, and I wish I could tell every mother what a wonderful treatment it is," declared Mrs. Lillian Cooper, 24 Saultier St., Toronto, Ont.

"Two years ago Stella began losing ground. Her cheeks faded, she was dreadfully run-down, and so thin she was just a frame. Her nerves were so excited I feared I would have to take her out of school, for while doing her lessons she could hardly keep still and at times couldn't write at all. Her appetite was so poor she scarcely ate enough to sustain life, and her sleep was so restless she was always tired and worn out."

"I bless the day I bought the first bottle of Tanlac. My daughter has gained eleven pounds, eats heartily, sleeps soundly, and her studies are like play. The Tanlac treatment is grand, and I believe it should be in every home."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.

How to Purify the Blood

"Fifteen to thirty drops of Extract of Root, commonly called Mother Seigel's Curative Syrup, may be taken in water with meals and at bedtime, for indigestion, constipation and bad blood. Persistence in this treatment will give permanent relief in nearly every case." Get the genuine at druggists, 50c. and \$1.00 bottles.

MOTHER! MOVE CHILD'S BOWELS

"California Fig Syrup" is Child's Best Laxative

Hurry Mother! A teaspoonful of "California Fig Syrup" now will thoroughly clean the little bowels and in a few hours you have a well, playful child again. Even if cross, feverish, bilious, constipated or full of cold, children love its "fruity" taste, and mothers can rest easy because it never fails to work all the souring food and nasty bile right out of the stomach and bowels without griping or upsetting the child.

Tell your druggist you want only the genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother, you must say "California." Refuse any imitation.

Why Are Negroes Black?

There have been many theories as to why there should be black, white, yellow, and red people in the world. It has even been asserted that Adam was black.

The latest theory regarding the color of the skin is that it turns entirely upon the question of salt. The writer of an ingenious book brings together a mass of evidence to show that the darker the race the more it lacks salt as an item of diet.

It seems that in some parts of Africa salt is such a luxury that the Negroes suck rock salt as we would confectionery. They describe a rich man as one who eats salt with his meals.

The author of the salt theory states that each Briton eats about sixteen pounds of salt every year. In India, however, salt is taxed, and the average consumption per head may not be more than three or four pounds. As everybody knows, the natives of India, although they would resent being called "black men," are certainly not white.

It is remarkable how wide is the difference in complexion, say, between the natives of Samoa and those of New Britain. Anthropologists would say they were of different races, and probably they are, but it seems that "access to salt" is the cause of the difference between the blacks and the light browns!

So scarce is salt in Tahiti that Captain Cook, the great navigator, described how salt water was a royal drink, taken with great solemnity, a sip at a time, on ceremonial occasions. The writer finds, however, that people who live near the sea in that part of the world tend to grow lighter in complexion.

TO EXPECTANT MOTHERS

A Letter from Mrs. Smith Tells How Lydia E. Pinkham's Vegetable Compound Helped Her

Trenton, Ont.—"I am writing to you in regard to Lydia E. Pinkham's Vegetable Compound. I would not be without it. I have taken it before each of my children was born and afterwards, and find it a great help. Before my first baby was born I had shortness of breath and ringing in my ears. I felt as if I would never pull through. One day a friend of my husband told him what the Vegetable Compound had done for his wife and advised him to take a bottle home for me. After the fourth bottle I was a different woman. I have four children now, and I always find the Vegetable Compound a great help as it seems to make confinement easier. I recommend it to my friends." Mrs. FRED H. SMITH, John St., Trenton, Ont.

Lydia E. Pinkham's Vegetable Compound is an excellent medicine for expectant mothers, and should be taken during the entire period. It has a general effect to strengthen and tone up the entire system, so that it may work in every respect effectually as nature intended. Thousands of women testify to this fact.

Surnames and Their Origin

DENTON

Variation—Dinton.
Racial Origin—English.
Source—A place name.

You might suspect from the ending of this family name that it had been originally the name of a place, used first to indicate the place of residence of some early bearer.

And so it was. "Is" is a better word, for the town from which this name came in the vast majority of instances, so far as the available records indicate, is still in existence. Denton is the name of a place in the county of Buckingham, England.

The manner by which the community got its name, is a simple one. "Dent," in the speech of the Anglo-Saxon, had a slightly different meaning from that which now is commonly ascribed to it. In the days before the coming of the Normans it indicated a depressed section of ground or valley. Naturally, such places were likely to be wooded and to become the refuge of animals; hence the modern frequent figurative meaning of the word. Denton simply meant the "town in the valley."

FARNHAM

Variations—Farnum, Farnam.
Racial Origin—English.

Here is another family name which is simply the development of a surname indicating originally that the person bearing it had come from the place referred to.

The place name, like the surname, is spelled Farnham, and it is located in Surrey, England.

The name rather clearly reveals the method by which it originated, and the fact that it is a combination of purely Anglo-Saxon words. The latter fact indicates, aside from historical record, that it was an established community before the coming to England of William the Conqueror and his Norman hosts.

"Fearn" in the speech of the Anglo-Saxons means "fern," being in fact the parent word of our modern English word "ham," as has been explained in other articles of this series, is an element frequently found in English place names, indicating a village, a word which is obsolete in the language to-day except in the form of one of its diminutives, "hamlet." Farnham, therefore, bears literally the poetic name of "the village of ferns."

It's a main highway

The way to satisfaction, comfort and health through Instant Postum, has become a world-wide way.

This famous table beverage which has stood the test of twenty five years, fills every requirement of taste for a hot and invigorating mealtime drink. Unlike tea or coffee, Instant Postum

contains nothing that can irritate nerves or disturb digestion. Even the children may safely enjoy it.

Wouldn't it be well for you to avoid the harm which so many have found in tea and coffee? You can protect health while pleasing taste, with wholesome, satisfying Instant Postum.

CORRESPONDENCE

(Continued from page 1)

the consumer for light.)

Naturally it will be asked, "What provisions, if any, would be made for those who are now obtaining 'Power' from the Lighting Plant?" The answer is, "Put all users of Electrical Energy other than that for light, on a separate service line supplied by the now idle big power plant in the bank, and operate that plant in the day time only by the services of the day operator no longer required at the Light Plant as it will run at night only."

"Two objections would be raised to this plan. First, that during the winter months, when the water conditions are bad there would be little power at the Big Plant. The answer to this is that when the low water and ice conditions are bad for the big power plant, resulting in decreasing the power, they likewise decrease the power of the lighting plant and render it unable to carry the whole load. But, if during such low water period, the lighting plant were relieved of say 100 H.P. it could successfully carry the balance of the load and the big power plant on the bank cannot furnish from 275 to 390 Horse Power it is not worth more than junk."

The second objection raised to the above plan is the cost of running a transmission line from the big power plant on the bank to the several points where the energy will be required. This objection is more imaginary than real because the poles are already erected and the cost of the necessary transmission line can be more than met from the sale of the heavy transmission wire now lying idle and useless from the said plant to the site of the old tin plate mill. Thus the whole cost involved would amount only to the cost of stringing the wire and making connections.

Let us now examine the financial end of the question on the assumption that the above plan were adopted. In the first place, a saving of \$1278 for operator, \$50.00 for oil and \$25.00 for fuel or a total of \$1353 will be made in the annual operating cost of the Lighting Plant.

The approximate cost of operating the big power plant on the bank will be as follows:

Government Rental, \$1540
Operator 1278
Oil, Waste, Fuel 105

Total \$2923

At the present time about 175 H. P. is being supplied by the Light Plant for manufacturing purposes, and about 187 H.P. for electric heaters, ranges, washers, etc. If the consumers of this 362 H.P. paid the whole of the \$2923 operating expense, it would amount to only \$8.07 per H.P. which is a low rate and no valid reason can be advanced to show that the users of power and the users of energy for the other electrical utilities before mentioned should not pay for such power at a rate at least as great as that paid by the consumer for light.

On the assumption that the standard lamp is a 55 Watt 110 volt and that the voltage is kept to standard the consumer is paying about \$13.50 per H.P. for lights. At this rate the users of Electrical Energy for 'Power' and for the Electrical Luxuries before enumerated would pay \$4887.00 which would give a balance, after deducting operating expense, of \$1964.00. In this connection it might be interesting to note that at Prescott where the meter system is in use it costs the users of power for manufacturing purposes about \$36.00 per H.P. per year for a ten hour service.

The placing of the whole output of the lighting plant on a meter system is being advocated as a cure-all for our present lighting and power troubles and while we admit that the meter system is the most equitable method of charging for electrical energy, it must be remembered that as we own and operate, by water power, our own lighting plant, it does not cost us any more to develop and deliver 100 H.P. than it does 50 H.P., and it makes no difference to John Jones how much electrical energy his neighbor is using and not paying for so long as such use does not interfere with the quality of the service supplied to John Jones.

The Village Clerk's books show that at the present time there are 490 users of electric energy. To meter the village will therefore require the purchase and installation of at least 490 meters at a cost for meters alone of from \$8.75 for the small size to \$35.00 each for the large size. Thus the total cost of these meters installed will be in the neighborhood of \$6,200, and they must be installed under the directions and according to the rules of the Hydro Electric Power Commission, which means that before the meters are installed the electric wiring of the houses will have to be done over again. This alone will cost at least \$5000 so that the total initial or first cost will amount to at least \$11,200. But this is not all. After the meters are installed they must be examined and read periodically by a competent official who will report to the Village Clerk that he may compute the electrical energy that has been used by each of the 490 consumers. This is no small amount of work and the Clerk will have to be paid what the work is worth.

At Prescott two men are employed to read and inspect the light and water meters of which there are 702 in operation. For this work the Town of Prescott pays \$2654 annually and the clerk \$612 over and above his regular salary, on account of the extra labor, to say nothing of the cost of a stenographer to help him out.

It has been said that if meters were installed, enough energy could be saved in the operation of the

Lighting Plant by curtailing the use of lights, to sell or rent for manufacturing purposes.

Let us study this contention. The light plant develops about 250 H.P. Of this about 27 H.P. is consumed by the street lights, none of which would be cut out by the use of meters, leaving 223 H. P. for building lights and the electrical luxuries before spoken of. The use of meters will not lessen the number of these luxuries, but will lessen the time in each twenty-four hours that they will be in use, but it will be possible for the whole of them to be in operation at once and hence unless the 187 H.P. they require is supplied the voltage will drop and we will be just where we are now with poor service. Thus the plant must be in a position to supply this 187 H.P. together with the 27 H.P. for street lights. This will leave, out of the 250 H.P. only 36 H.P. for building lights. This 36 H.P. would supply 486 sixteen candle power lamps of 55 watts and 110 volts burning at one time, or one lamp for each of 490 users which would be ridiculous because the shops, public halls, churches, tack factory and hotels, where many lights are required, at one time, would bring the average of necessary lights up to many times as much and the plant would be unable to carry the load at the required voltage. Thus the service would be just as unsatisfactory as it is now.

It is true that the whole of the 187 H.P. may not be in use at one time but there would be nothing in the use of meters that could prevent the whole of it from being used at one time; nor is there anything in the use of meters that could prevent additional citizens from installing these luxuries and still further overloading the lighting plant.

It is being freely stated about town that your honorable body has already decided to instal meters but I trust that such report is untrue and that before making such an important decision you will take the trouble to ascertain the opinion of the consumers on this question. This may be very easily and cheaply done by sending to each of the 490 users a double post card asking the question "Are you in favor of having Electric Meters installed and paying for electric current by meter?"

If a majority of the 490 answer in the affirmative you will have the moral backing to put the scheme through. But if a majority answer in the negative, it would be a very arbitrary proceeding for your honorable body to force upon the ratepayers something they don't want but will be required to pay for.

In conclusion I desire to thank Mr. Dowsley, Light Commissioner at Prescott, the Overseer of the Williamsburg Canal, the Lockmaster at Lock 23, and our Village Clerk for information cheerfully furnished me and regret that I cannot extend the same courtesy to a certain paid servant of the village who refused to supply data that I required, and rendered it necessary to secure the same from other sources.

"I have the honor to be,
"Your obedient servant,
"GEO. L. BROWN."

HAVE YOUR CAR REPAIRED NOW

A few weeks more will bring good roads and the demand for repairs will be greater than we will be able to take care of. It is therefore advisable for you to bring your car to Harback & Barr's Garage at once, where they guarantee their work.

We have a stock of the very best Diamond, Dominion and Dunlop non-skid tires, at bargain prices that command your attention. These tires will go fast, at the price we are selling them, so come early and don't be disappointed.

HARBACK & BARR
Main Street Garage, Phone 78.
Morrisburg, Ontario.

Eczema Covered Arms of This Healthy Child

Mrs. Alex. Marshall, Sprucedale, Ont., writes:—

Baby Marshall.

"When my little son was three months old he broke out in sores on his chest and arms. We did all we could to heal those terrible sores, but nothing did him much good. Finally I ventured on a box of Dr. Chase's Ointment and kept on using it. At last we were rewarded by the steady healing of the sores, and finally he was completely relieved of them. He is now three years old, and has had no return of the trouble since."

DR. CHASE'S OINTMENT

60 cents a box, all dealers or Edmanston, Bates & Co., Ltd., Toronto.

CORNWALL

GENERAL HOSPITAL

This institution provides skilled nursing and care at very moderate rates to those able to pay, and without charge to indigent persons from the three United Counties, other than the Municipal Grants.

It is kept up by:
Fees from paying patients.
Grants from the Government and Municipalities.

Donations and subscriptions from Churches, Corporations, Societies and individuals, the last being the largest source of revenue.

YOU ARE ASKED TO ASSIST IN THIS WORK

The nucleus of an endowment fund has been established by a legacy recently received, and parties remembering the Hospital in their wills may stipulate that bequests made by them shall go to this fund.

If you would like a copy of the last Annual Report, drop a card to the Secretary, who will be pleased to ap

I DO WANT TO GO TO

Business School

Let me hear you say, "I do want to go to business school" and I will tell you if this business world is anxious to have your services.

I can tell by the way you say it. Do you emphasize "do"? There are plenty of boys and girls who would like to dream themselves into good jobs and never get there.

The Doing kind gets into action and reach the goal of their desires.

Our catalogue tells you all about our different courses of study, tuition rates, etc. Write for your copy today.

Success Is Guaranteed For Your Baking

QUAKER FLOUR must be not only the best in quality, but it must always be the same. We see to this by hourly tests during the milling process.

But laboratory tests are not enough. Each day's milling is put to a practical test by our Master Baker. It must always measure up to the exact Quaker standard before it can go into the sack with the Quaker on it.

All "chance" is taken out of your baking when you use Quaker Flour. "The happy baker uses Quaker."

A few friends gathered at the home of Mrs. M. Beckstead Tuesday March 27th to help her celebrate her birthday. A social time was spent and tea was served by the Ladies at 6 p.m.

Mrs. Jollie Sheets was in Morrisburg on Monday.

Mr. I. Beckstead spent last week with friends in Grantley.

The members of the Ladies Aid held a surprise party at the home of Mrs. J. McDonald, Station St., on Easter Monday evening. Mrs. McDonald is moving to Toronto in the near future and the evening was given as a farewell to herself and family. Dainty refreshments were served by the Ladies. During the evening an address was read by Mrs. C. S. Ault, and a beautiful Mahogany pedestal was presented. Mrs. McDonald, although taken completely by surprise made a suitable reply, thanking the ladies for their kind thoughts of her.

The Sacred Concert given in the Methodist Church Good Friday evening by the "Lets Try" Mission Circle was said by those who attended to be one of the best ever held here. Great credit is due not only the members of the Circle, but also those who assisted them. Mrs. (Rev.) A. W. Stewart presided at the organ and every number was in perfect accord with the time and place. Although the audience was not large it was appreciative and perfect order prevailed through the lengthy programme.

Next Sunday, April 8th, will be W.M.S. Sunday in the Methodist Church. Mrs. Merrill of Ottawa, organizer for the Matilda District will give an address at 11 a.m., and a special Easter Thank Offering will be taken. Those having the Easter offering envelopes will please bring them to this meeting. Mrs. Merrill will also speak at the Methodist Church, Osnaburck Centre, Sunday evening at 7.30. All are cordially invited to one or both of these services. The Circle members will entertain Mrs. Merrill at the tea hour on Monday evening, April 9th, when all the members are expected to be present.

When you see the
"F" Power and
Light Plant

at work you will agree it
is the handiest and most
practical plant made.

It was designed first of all for producing electric light anywhere and everywhere—cheaply and well, and it does that job to perfection. It floods your home, shop, or other buildings with clean, brilliant light for a few cents a day, and still has power to spare.

When you examine its sturdy construction, and mechanical simplicity, and note its flexibility and ease of operation, you will wonder how it can be sold at the price.

We have no hesitation in telling you the demand for the "F" Plant all over the country is so great, that now is the time to install your plant if you want the advantages of Power and Light at low cost.

Come in any day and see the "F" Plant in operation, or send me a post card asking for a catalogue.

UNDER ORDERS

BY MARY SYNON

PART II.

"But you're not really sick," Amie declared.

"Dr. Karol says I am." He beckoned her toward the table, but she refused, staring at Agnes Wells with speculative hostility. "It's the silliest thing I've ever heard," she asserted. "If you're really sick, you should go to the hospital. If you're not—"

"If I'd dreamed that any one would take that attitude," he said, "I'd have stayed at St. Mark's. All I thought about was that I hated the idea of a hospital. You must think I want to be sick," he went on with the peevishness of illness.

"Well, there seem to be compensations," she tantalized him.

Agnes Wells began to clear off the table and Blair followed Amie to the other side of the room. "I know it's unusual," he told her, "but it's my headstrongness against Dr. Karol's determination that's brought it about. Miss Wells is simply obeying the doctor's orders in trying to save my life."

From under her long, carefully emphasized lashes Amie studied him, and eventually concluded that she had made a mistake in direct attack, for she crossed back to him, lifting his chin in her hands. "I didn't dream you were serious, Van," she told him. "I never thought of you being ill."

"I never thought of it myself," he said, and kissed her just as Agnes returned to the room. He knew that she must have seen him and he flushed at the knowledge, but he reassured himself with the thought that, after all, it simplified matters between them. She would know now that he was in love with Amie, and she would see that her own cool professionalism of manner would mean nothing to him. Amie, purring content, opened his cigarette case and lighted one for him, then her own.

"Have one, Miss Wells?" she queried with an infection which seemed to shut out Agnes.

"No, thanks," Agnes said. "They won't hurt you," Amie went on.

"She has as much right to refuse them as you have to take them," Van told Amie.

"Oh, if you feel that way," she said, and puffed hard. "Aren't you going to take me riding?" she asked him after a while, and, because he could see no way of refusing, he agreed.

The ride lacked, however, the charm of other rides with Amie, and he turned back early. He found Agnes reading and unperturbed by the incidents of the evening. She refused to let him tell her about Amie, donning her nurse's manner for shield against intimate conversation. He had a feeling that he had somehow fallen from her good graces, and he spent the next two days struggling to restate himself. It was on the second night that he felt justified in talking to her in the same tone that had marked their first evening. He set the scene for it with care, driving her out to a point where they were alone with sky and water.

It was not of his later years that he spoke then, but of his childhood, telling her of his father, of his wanderings from school to school, of his loneliness and growing recklessness as the years went on. "I've never had anything to work for but excitement," he justified himself. "No man has ever cared whether I lived or died."

"Why didn't you marry?" she asked him.

"I've never loved any woman well enough," he said.

"But—"

"Amie? I've never thought of marrying her until I began to see I was slipping down. Then I thought it didn't make much difference. You—well, you know the world, and you've met Amie."

"But there are so many girls who—"

"You're the first really good girl I've ever known," he said. Then, plumbing the depths of the water into which he had waded, he leaped back to shore. "When a fellow has just a year ahead of him," he told her, "he's

likely to do the most reckless thing he knows."

The next day he suffered a sharp reaction to his mood of resignation toward the physician's advice. He wasn't going to be treated like a child, he decided. If Miss Wells had undertaken his case at Dr. Karol's order she'd have to take the consequences. He hadn't promised anything except to let her come. He'd go on just as if she weren't there. If she wanted to come, she could. If she didn't, she could stay there, and wait for him. Amie's telephoned call, telling him that Vale wanted them to go out that evening, confirmed his decision. "At least, he wants me," Amie said, "but I told him he had to ask you."

"I may have to bring my censor," he told her.

She laughed, and he knew that she had diagnosed his determination as a jealous reaction from the fact that Vale wanted her, anyhow. "Bring her," she dared him.

He left the acceptance to Agnes, however, telling her offhandedly that the crowd would be gay. She studied him with the manner which was beginning to irritate him at every recurrence, so definitely did it remind him of his danger. "You shouldn't go, Mr. Blair," she told him. "You let me go to work."

"You said you had to go."

"I do—although I don't see that I'm going to be able to do anything if this crash comes."

"You can do much more if you don't burn the candle at both ends."

"Will you come with me to-night?"

"I don't want to go," she said, "but I must. I hope you'll understand that definitely before we start."

"You give me no chance to forget that you're only doing this under orders."

He pulled up in front of Tracey's in no holiday mood, but recklessness seized him as he entered the place, smoke-hung already and clamorous beneath its swaying Chinese lanterns. A Negro orchestra on a raised platform blared out volumes of jazz, and at the crowded tables men and girls sometimes joined in the songs. There were other crowds dancing, and Blair had to lead the way through them to the table where Amie and Vale were waiting for them. He knew that hundreds of eyes followed their course, watching Agnes in amazement. She looked as out of place as Amie would have seemed in a church, but she seemed unconscious of the sensation she was causing—and Amie would never have missed that. "Beats the Belle of New York," he heard a man say, and had to choke down his impulse to tell him to keep still.

If Vale had invited Amie for his own amusement he seemed entirely willing to sacrifice himself once Agnes arrived. He devoted himself to her with the assiduity which always annoyed Blair, even giving up dances to talk to her. She was new to him, of course. That, Blair reasoned, explained his devotion for Vale couldn't appreciate her fineness, Amie, moving over closer to Blair, sought to shut both the others out from his thought, flirting with him outrageously.

He tried to respond, but his emotions seemed incapable of being aroused. He was tired, tired of the noisy music, tired of the crowd, tired of Vale, tired of Amie. His gaze kept straying back to Agnes, serene in her quiet, and there came to his mind the memory of a stanza he had heard in college. An old professor in an English course had read it, and Blair had lingered on it for rhythm.

She walks, the lady of my delight,
A shepherdess of sheep,

he recalled. Other lines faded, but the last of the stanza stood out:

She has her soul to keep.

That was it. That was why Agnes Wells was so different from all the rest of them. She knew that she had her soul to keep. The knowledge set her apart. That was why—yes, that was why he loved her!

His first conscious registration of his knowledge loosed a flood of light upon his brain. What a fool he had been! He must have loved her from the moment she had come into the high room at St. Mark's. That was why he had wanted her to come with him. That was why he was jealous of her admiration of Karol. That was why he had defended her against Amie's insinuations. Because he loved her he had opened his heart to her. Loving her, he had told her just what Amie meant to him. Fool, fool, fool! he upbraided himself. He had shown her the worst of himself. He had brought her here to Tracey's to look on Amie's proprietary possession of him, to listen to Vale's innocuous philanderings. A fury of his own folly laid hold upon him. He began to drink Vale's liquor, telling himself that nothing mattered now. He didn't even want the year since he had lost Agnes. "The only really good girl I've ever known," the hammer in his brain kept pounding.

"What's the matter with you, Van?" Amie complained, bending close to him.

"Let me alone," he muttered.

"He's sick," Vale laughed. "He has to play the part. We'd all do it, though, for the same stake." He gazed fatuously at Agnes, but her gaze passed him toward Blair, growing dark with concern as she watched. "I think," she said, rising, "that we'd better go."

"He's going to stay," said Amie.

"He isn't," Agnes told her.

"You can't come here to my party and spoil it like this," Amie cried. "Van isn't sick. He's as well as Tom Vale is. You're both of you lying, you and that doctor. You're just trying to get him away from me, and I

won't let you! There's no reason why he shouldn't have a good time. You're fooling him. Come on, Van, let's fool them. Let's dance, and dance, and dance till the cows come home!"

She sprang up, catching hold of his arm, but he did not move. He was watching Agnes. For an instant the girl stood hesitant, then came around the table and faced Amie squarely. "We aren't lying," she told her. "Mr. Blair hasn't one chance in a thousand if he keeps on this pace you set for him. He won't even have the year Dr. Karol hoped he'd have. But he isn't going to keep on it. I'm going to take him away from you."

In utter amazement at her outburst Amie Lane stared at the white uniformed girl, then, with eyes aflame with rage, she leaped toward her. In a flash the room was in up roar. Men and women shouted. The jazzing orchestra played the louder. Some one yelled for police. Blair saw Vale jump forward as Amie's hands went to Agnes' throat. He thrust the other man aside and swung in between the two girls. "Let her alone," he commanded Amie.

"I won't let her alone," she gasped.

"Every right," he said. "I love her."

"You go home with Amie," he heard Vale say. "I'll take the nurse back to the hospital."

"You will not!" he cried, and swung out at the man he had called his friend.

"Oh, if you feel that way," Vale's voice came to him across what seemed an interminable distance. Then the world receded away from him as he fell forward.

He came back to consciousness in a white room which seemed strangely dim and strangely secluded.

Slowly the remembrance of Tracey's seeped into his mind.

He saw Karol's head at the door before he heard the doctor's voice. He sought to close his eyes, but Karol interposed himself between him and pretence to sleep. "He has come back," he heard him say, as if to another person. "This headstrong young man who would not stay with us has returned. Now he must obey you, Miss Wells."

He saw her come from the other side of the room and he watched her with pathetic wistfulness as she aided the physician. Once, as he took his pulse, Karol smiled at him reassuringly, but Agnes kept her eyes from meeting his gaze. Only after Karol had gone did he venture to speak to her. "Did you bring her here?" he asked her.

"Mr. Vale and I did."

"Last night?"

"Fourteen days ago."

"Then I've been—"

"You've been very sick. Even—"

"Even Amie would believe it now?"

"Any one would."

"Will I get well?"

"Temporarily, yes. The rest depends upon yourself, just as it did before that night."

"Agnes!"

"Yes?"

"Come here."

She returned, standing above him and watching him with eyes into which shadows had come. His own eyes filled with tears, tears of weakness, of pity for himself, of regrets, of grief. He saw her lips quiver in the pain of sympathy, and with his old gambling instinct, he flung all on one chance.

"Does it mean anything to you," he asked her, "whether I live or die?"

Bravely she met him gaze. "It means everything," she said.

"Then I'm going to get well."

"I knew you would," she bent nearer to him, and the beneficent glow of her loveliness unfolded him.

"You are beautiful," she said.

"Try to sleep now," she told him.

He closed his eyes, but could still see her outlined against the sunset glow over the city roofs.

(The End.)

Bovril Limited Reports

Good Business in 1922

The report submitted at the 26th Annual General Meeting of Shareholders of Bovril, Limited, in London, England, last month, was most satisfactory.

A net profit was shown of £305,709—out of which after payment of regular dividends or preferred stocks a dividend of 9% on the Deferred Shares—free of Income Tax—was voted.

Sir George Lawson Johnston is Chairman, The Earl of Erroll, Vice-Chairman, and Mr. Douglas Walker, Managing Director. Sir Cornthwaite Rason, a former premier of Western Australia, has recently accepted the position of Secretary.

Bovril exports in 1922 exceeded those of 1921 by 22%, and 1923 shows every indication of still further growth.

The increasing amount devoted to various forms of advertising was one of the noteworthy features of the statement—and one to which perhaps much of the increased success of operations was due.

Another Failure Noted.

"Doctors report an alarming increase in baldness."

"Yes; it's being demonstrated that hair tonic's a failure when applied on the inside."

Napoleon said: "The more I study the world, the more I am convinced of the inability of brute force to create anything durable."

We lie in the lap of immense intelligence which makes us organs of its activity and receivers of its truth.—Emerson.

Minard's Liniment for Corns and Warts

The Woman of To-Day

PUTTING AWAY THE WINTER WARDROBE.

If the work of storing away the winter clothing is done properly, it will be a joy to open the closets, boxes, or drawers next fall and find all of the garments clean and in repair. All outside garments, such as dresses, suits and coats should be well brushed and spots removed. If they are badly soiled they should be sent to the dry cleaner or cleaned at home in gasoline (cleaning grade), pressed, and hung on hangers.

If clothes hangers are not available use rolled newspapers, tied through the centre and suspended by a loop. A smooth stick or a piece of barrel hoop, padded, and covered, answers the same purpose. More garments may be hung in a small space if one or more rods are placed crosswise in the closet. These rods may be made from broomsticks or curtain poles.

Shirts should be hung from the skirtband. Trouser hangers of various types are good, or large safety pins make good substitutes. All garments that are loosely woven and are apt to stretch should be kept in a box or drawer.

Furs or woolen garments can be cleaned with a vacuum cleaner. If there are any moths or moth eggs in the garments they will be quickly removed by this process. If a vacuum cleaner is not available use a brush and shake the garment well. Undyed furs should be very carefully put away and as early in the spring as possible, for moth millers are sometimes out by the middle of March or first of April. There are various kinds of effective moth-killing compounds on the market. These compounds can be used on either woolen or fur garments.

Dresses, suits, coats, etc., should be protected from dust, coal, smoke, etc., by covers made from old garments, old sheets or cases made for that purpose. All heavy underwear, stockings, woolen mittens, scarfs, bedding, etc., should be carefully washed and mended before putting away. If the clothes are thoroughly cleaned, it will increase the length of the service of the garment. Perspiration and dust injures the fabric. Shoes should be brushed, cleaned and put on shoe trees. Shoe trees keep the shoes in shape and allow a better circulation of air through the shoe.

KLEVER KINKS FOR BUSYBODIES.

When the triangular floor duster wears off its dust catching strands at the apex, it can be renewed as follows: Cut a cast-off cotton or silk stocking round and round in one-inch strips. Sew this in long loops to the frame to replace the worn parts. Apply a few drops of oil and for all practical purposes the duster will be as good as new.

To frost a cake in a hurry, moisten one large cup of powdered sugar with some juice from strawberries, raspberries or cherries. This icing hardens nicely and has a delicious flavor. Use only enough juice to allow the mixture to spread evenly. Fresh strawberries crushed with powdered sugar makes a nice frosting also.

WHAT'S IN A CAN OF FRUIT?

The canning season is always an enjoyable time to me. But this enjoyment extends until the cans are all emptied. With the opening of each can there come pleasant memories and humorous occasions that make the contents doubly enjoyable to all.

For instance, when I open a can of black cherries, I see my husband dangling from the limb of a cherry tree when a sudden gust of wind blew his ladder over. I also see a wet and bedraggled creature whom he calls wife descending from a nearby tree and rushing to his rescue, while it rains and stops our picking for that day.

From my cans of black raspberries I get a picture of myself, ill, and the kindest auntie in the world going several miles to stand in the hot sun and pick them for me.

My blackberries bring a picture of the big cool woods and singing birds on that hot July day that my mother and I picked them.

The white cherries bring a picture of hubby and I sitting up until eleven o'clock to get them looked over and canned, because they spoil so easily after leaving the tree.

The strawberries show a beautiful dewy, fragrant June morning with my two boys and I on our knees gathering the beauties.

Each variety brings its picture and memories, but the best of all, I think, is the one I get from the peaches. A trip of a hundred miles and return, through the Niagara fruit belt to Lake Ontario, was one to be remembered. Miles and miles of peaches, pears, plums and grapes, our meals by the side of the road, and the night on the shore with our blankets spread on the sand and the old lake to lull us to sleep, all come back to me with each can of peaches I open.—Mrs. J. N.

TWO WHOLESOME CAKES.

For cinnamon bun prepare dough as for raisin bread, omitting the raisins. Roll out to one-half inch in thickness, spread thickly with a mixture com-

bining one-half cupful of butter, one cupful of sugar, and one-quarter cupful of cinnamon, then sprinkle generously with seedless raisins. Roll dough as for jelly roll, and cut across in slices about one inch thick. Pinch one end of the slices, then set them on end (pinched side down) close together in a baking pan. Let rise until light, then bake. Part of the sugar filling will ooze down into the pan, forming a candy coating which is delicious.

Raisin bread is wholesome and less expensive than cake: Scald a cupful of milk, add a tablespoonful each of sugar and butter, and a cupful of cold milk, or else cold water. When the mixture is milk-warm, add half a yeast cake softened in half a cupful of tepid water. With a knife, stir in six or seven cupfuls of flour; cut and stir until smooth and elastic; cover thickly and set in a warm place to rise. In cold weather, set this sponge after supper, and in the morning cut it down with a knife, set to rise until after breakfast, then knead well. For the raisin loaf, take about two cupfuls of the dough, add half a cupful of sugar, a well-beaten egg, two tablespoonfuls of melted butter, a quarter of a teaspoonful of grated nutmeg and work with a mixing spoon until well blended, then add half a cupful of small raisins, floured, or of chopped dates, if preferred. Pour into a greased cake tin and let rise until light and bubbly, then sift mixed sugar and cinnamon over the top and bake for three-quarters of an hour. The remainder of the dough may be made into rolls or cinnamon buns.

Dye Silk Stockings Blouse or Sweater In Diamond Dyes

"Diamond Dyes" add years of wear to worn, faded skirts, waists, coats, stockings, sweaters, coverings, hangings, draperies, everything. Every package contains directions so simple any woman can put new, rich, fadeless colors into her worn garments or draperies even if she has never dyed before. Just buy Diamond Dyes—no other kind—then your material will come out right, because Diamond Dyes are guaranteed not to streak, spot, fade, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.

"To believe your own thought, to believe that what is true for you in your private heart is true for all men—that is genius. Speak your latest conviction, and it shall be the universal sense; for the inmost in due time becomes the outmost."—Emerson.

Question—What breeds of pigeons are best adapted for the raising of squabs for the market?

Answer—Bulletin No. 15 of the Department of Agriculture at Ottawa, dealing with the subject of pigeons, names three breeds suitable for squab production, the Homer, the Carneau and the Mondaine. The Homer is generally acknowledged to be one of the most profitable breeds for this purpose. It is a hardy breed, very active, prolific, and produces a good average weight squabs. The Carneau, originated in Flanders, has been bred for food for many generations. This breed has the habit of remaining close to the home quarters when given its freedom. It is prolific and robust and the squabs develop rapidly. The Mondaine, bred originally in Switzerland, is a utility pigeon, and is stated in the bulletin to be rapidly gaining popularity on this continent. It is a very prolific breed, and the squabs are broad breasted and well fleshed.

Question—Are there any advantages gained from warming the drinking water of hogs during the cold weather?

Answer—An experiment carried on at the Central Experimental Farm indicated two things: First, that hogs make better gains when they have be-

fore them a constant supply of water for drinking purposes, and second, that in winter the gains are more pronounced when the water is given slightly warmed.

Stock Raiser, Durham Co.—The farmers in this district grew large quantities of peas many years ago, but the coming of the pea weevil led many of us to discontinue. We desire to sow a field this year and the seed we have has an occasional infested seed. Please advise me how to treat the seed to destroy these insects.

Answer—Coal oil has been found useful in destroying the pea "bug" in the seed. About a half gallon of coal oil is sufficient to treat about five bushels of peas. The idea is to thoroughly moisten every seed so that the oil will penetrate and kill the insects. For this purpose the seed may be placed on a floor, the oil sprinkled on, and the peas shovelled over thoroughly. The shovelling should be repeated every day for at least four days, the first shovelling to be done about two weeks before sowing. It would be well, if possible, to induce every farmer in your neighborhood to treat his seed peas this spring. If this is done thoroughly there should be no "bugs" in the crop in that neighborhood for several years.

Serves Public Health.

Western University, London, is accomplishing good things through its faculty of Public Health, conducted under Professor H. W. Hill. Dr. Hill has been in charge of the Institute of Public Health since 1912, except for three years spent with the same faculty of the University of Minnesota.

and muriate of potash may be mixed together and all applied at the one time.

Two pounds of stable manure per square yard is equivalent to nearly five tons per acre. If the manure has been well preserved and is from well fed stock, the average farm yard manure will contain 10 pounds of nitrogen, 5 pounds of phosphorus and 10 pounds of potash in one ton. The five tons will contain 50 pounds of nitrogen, 25 pounds of phosphorus and 50 pounds of potash, and if applied annually per acre, would furnish the orchard with its requirement of plant food. It is not easy to apply five tons per acre evenly, particularly in the orchard. In most cases commercial fertilizers are depended upon, with cover crops, to supply the humus which is so necessary to produce a good mechanical condition in the soil. Stable manure if used should be applied early and in annual quantities rather than in a heavy dressing one year with none again for several years.

A Lantern That Will Not Tip Over.

A cement base cast on the bottom of a lantern will make it hard to knock over. Such a lantern will be very useful around the barn or shop. A form is made by bending a piece of sheet iron, the diameter being about three inches larger than the base of the lantern. It is also about one inch higher. In casting, the form is set on a smooth flat board, about one inch of cement is placed in the bottom, then the lantern is set in the centre on top of the cement and the space around it is filled in. A cement mixture of about three parts screened sand to one of cement is about right.

Have You a Typewriter?

Too little importance is attached to the value of the typewriter on the farm. As one farmer put it when the subject was broached to him: "Never write a letter but once or twice a year, and then I guess I can use the elephant tracks I learned to make at school." Too many men are of the same mind. Sometimes it is this small matter of writing a few neatly-typed letters which takes away the farmer's 10 per cent, and part of his good living. It is excusable when a rebuilt typewriter may be bought for a small sum? Every man with a well regulated business owns and uses a typewriter. How about it? Is your business well regulated or simply haphazard?

Probably no other single factor pays such excellent returns on the farm as does investment in quality seed.

The Scale Situation

BY R. H. PETTIT, ENTOMOLOGIST.

The fact that lime-sulphur, which served in the past to control scale, seems inadequate to the task at present, has led some of our growers to believe that a resistant race of scale has been developed—a race capable of enduring the lime-sulphur wash without being killed. The situation seems to the writer to be due to an entirely different reason.

First—Lime-sulphur kills by depriving the insect under the scale of its oxygen and it is hard to conceive of any insect acquiring the ability to get along without oxygen, any more than one could conclude that a rabbit could become immune to a charge of shot.

Furthermore, we know through rearing experiments conducted by the department of entomology at the college that a number of native parasites have started to work on the scale. Now, the battle waged between any insect and its parasites is apt to go first one way and then the other.

Once more, if we look back a few years we will remember that owing to the reduction in the activity of the scale, and to the increased cost of spraying due to cost of materials and of labor, the winter spray of lime-sulphur was put on more dilute than formerly. Everything worked satisfactorily until the parasites "knocked off" for some reason or other, and the scale commenced to multiply—then it became apparent that dilute sprays

Markets and Requirements for Export Cattle.

Feeders of beef cattle may look with considerable assurance for a strong market for properly selected and finished export beef on the hoof during the latter part of April and the first weeks of May. No very great movement can take place before that time, for the terms of the cattle embargo removal, which become effective April 1st, stipulate that all cattle must be shipped from a Canadian port. Montreal is the logical economical port for these shipments but it will not be open until about the end of April. A few shipments may go by way of Halifax or St. John in the meantime, but, on account of the high cost of rail transportation, the bulk will be held for the opening of the port of Montreal. Present indications point to a heavy demand from the British market as soon as it can be supplied.

The statement "properly selected and finished" used above is used advisedly. The British consumer is a connoisseur of beef, and his palate is not likely to be satisfied with any second rate meat, consequently if we do not wish to land this prospective beef trade into the secondary position in which we now find our bacon trade, let us start right by sending over a well graded product. Grading should be done on the basis of breeding, size, finish and suitability for shipment. In the first place, an export steer should show sufficient good beef breeding that he will fill the eye of the prospective buyer on that score alone. First impressions are most lasting. Size is both for and against. Shipment being on the basis of so much per head, the heavier the animal the lower the cost of transportation. The demand, however, is for a medium sized animal. Selection should therefore be on the basis of weight for size and age, i.e., heavy little animals. The finish must be up to a fairly high standard, recently and uniformly put on. Here to a greater extent than is the case on our home market is where feeding to a high finish will be justifiable. Suitability for export shipment includes such factors as freedom from disease, or recently received blemishes; a degree of docile temperament; and last, but not least, an absence of horns, for dehorning is practically imperative for export shipping. If these few factors are kept in mind at the start and nothing but Canada's best shipped over, a steady rather than a glutted market may be looked for.—Geo. Muir, Animal Husbandman.

Simple Battery Check-Up.

Some garage mechanics are careless and some are just plain ignorant, so after one has removed and replaced the storage battery on your car or truck, check him up to see whether he has put the battery in right. If he has done it wrong, an injured or ruined battery may result. As soon as the battery is connected up, and before the engine is started, simply turn on the lights. If the ammeter indicates "charge" instead of "discharge," as it would normally, the battery is on wrong. Have it reversed at once.

My Remedy for Horse Colic.

Here is a remedy I keep in a bottle for a horse that may take the colic. I have used this remedy for years and have never known it to fail. The bottle contains one pint of raw linseed oil, one-half ounce of laudanum, and one-half ounce of nitre. As soon as the horse shows signs of colic he should be taken into a good stall, his head held high and the mixture poured down his throat. A long-necked bottle is essential for this purpose. If the animal does not get relief in an hour, repeat the dose. I have had a horse to be relieved inside of thirty minutes.—W. O. N.

Maples or oaks generally indicate well-drained land. When you cut ham or bacon, to run lard over the exposed surface will guard it from mold.

Why I Use a Drill for Small Grain.

A field is more easily and more quickly sown with the grain-drill than by hand or wagon-box seeder, since there is no stepping-off and gauging to be done—nothing to do but hitch up and drive. With hand-sowing one must step off the desired width of a round and set flags to sow by, walk and carry the seed while he sows.

The wind is bothersome when sowing grain by any of the methods except that of drilling, and a poor or streaked stand almost invariably is the result if there is a wind at sowing time. With the grain-drill, this trouble is avoided, and as even a stand is secured when the wind is blowing as when there is not the slightest breeze.

Grain put in the ground by a drill is all placed at exactly the same depth, and this is not true of another system of seeding. Where seeds are sown at uneven depths, germination is sure to be slower with some than with others. Those nearest the surface of the ground, if the weather turns dry, will not sprout at all, but shrivel up and are lost entirely.

When all is said and done it is a matter of yields and profits. Seed planted with a grain drill yields more per acre than seed sown broadcast. That is reason enough for me to use a grain drill.—M. Coverdell.

Hot Boxes on Tractor.

Last winter I had trouble with hot boxes on my tractor. I found that they were caused by the oil getting so cold and stiff it didn't get to the bearings, and the bearings ran dry and got hot. I make a practice of getting my tractor thoroughly warmed up before attempting to do any work in cold weather. After starting the motor I walk around the tractor, inspect the different parts and see that everything is working smoothly before giving my attention to other matters.—Mark Underwood.

Using Oil in Incubator.

Those using a hot water type incubator with galvanized tank which has rusted can easily avoid the trouble by using cylinder oil in place of water. Unless oil is about blood heat or little warmer, do not fill tank as full as you would with water as the oil expands more when heated than water. I could not see but what the incubator hatched just as good as when using water. I find a light body oil works best.—N. F.

Irrigated Farms in Southern Alberta

In the Famous Vauxhall District Bow River Irrigation Project. An especially good location for mixed farming and dairying. Splendid opportunity for young men now living in districts where good land cannot be bought at reasonable prices. THIS IS NOT PIONEERING, the first 10,000 acres are fully settled and another 10,000 acres now ready for settlement; maximum distance from railroad, seven miles. Good roads, telephones and schools. Easy payments, extending over 13 years. This is the Best Land Buy in Alberta. Write for further information to CANADA LAND PREPARATION COMPANY, LIMITED, Medicine Hat, Alberta.

For all the Family

Strains, sprains and pains, overworked muscles, a twinge of rheumatism—Kendall's penetrates right to the sore all of them answer spot—soothe, cool at once to Kendall's Spavin Treatment. Kendall's Spavin Treatment, known for more than 40 years as Kendall's Spavin Cure, is economical and clean—no rubbing, no bandaging.

PRATTS 51ST YEAR OF SERVICE

\$ Why is Early Ripening so Profitable?

In Corn—Because it increases the protein of ensilage from 50 to 150%; and consequently you do not have to buy so much feed.

In Oats—Because early maturing oats escape considerable rust injury; and fill before they are killed with heat.

In Potatoes—Because early potatoes bring Biggest Prices.

SHUR-GAIN Fertilizers hasten ripening of all crops.

Order SHUR-GAIN Fertilizers now for spring use.

Consult our Agent or write us. Agents wanted in territories where we are not represented.

Proper Time to Hatch Chicks

It is a confirmed fact that pullets must be thoroughly matured before egg production can be expected, therefore, they must be hatched early enough to have time to mature well before the time that egg production is desired. Under ordinary circumstances, any of the general purpose breeds, such as Plymouth Rocks, Wyandottes, Rhode Island Reds, etc., require on an average five and a half to six months to mature, thus, pullets intended to commence laying the latter part of October, would have to be hatched in the month of April, while the Mediterranean Breeds, such as Leghorns, Anconas, etc., being smaller birds, can be matured in slightly less time, and could be hatched a week or two later, and still be matured ready to commence producing in the latter part of October. The care which the young growing stock receive during the summer months has much to do with having them properly matured in time for winter eggs. One breeder may hatch his birds early in April, and yet by neglect in proper feeding and exercise, may not have them as well matured in October as another breeder who hatched his birds in May, but who gave them proper care while they were growing on the range.

Again, chicks hatched too early, besides being harder to take care of early in the year when the weather is more severe, can be forced to maturity and egg production about August and September, and will exhaust a certain amount of their strength by the time that cold weather comes, with the result that they very often go into a moult, stop laying, and owing to short days of feeding, cannot regain their strength sufficiently to produce until

after the most urgent demand for winter eggs is over.

A number of experiments conducted at the Lennoxville Experimental Station during the past two or three years, to ascertain the proper time to hatch stock required for profitable winter egg production, have given some interesting figures. For instance, from November 1, 1920, to March 1, 1921, 25 pullets, hatched between April 5 and April 12, gave an average profit of \$3.73 per bird over the cost of their feed; while 25 pullets, hatched between May 1 and May 10 gave an average profit of \$1.75 per bird over the cost of their feed. Experiments conducted during the following winter gave results that helped to strengthen the data already secured, viz.: From November 1, 1921, to March 1, 1922, 25 pullets hatched between April 7 and April 15, gave an average profit of \$2.83 per bird over the cost of their feed; while 25 pullets, hatched between May 1 and May 10, gave an average profit of only \$1.71 per bird over the cost of their feed. It was thought possible by some, that the later hatched lots would produce sufficiently more eggs in January and February to balance the profits of the earlier birds in November and December, but such has not been the case in any of the experiments to date. Given proper care and feeding during the summer months on a good range for exercise, the past results would justify the recommending of hatching chickens of the general purpose type, not later than the end of April, the first three weeks of April preferred, and of the Mediterranean classes, not later than the 24th of May, for the most profitable production of winter eggs in western Quebec.

Fertilizing the Orchard

Calculated from analysis an orchard producing 100 barrels of apples per acre would take from the soil 45 pounds of nitrogen, 12.1 pounds of phosphoric acid and 43.2 pounds of potash. It is found in actual practice that more phosphoric acid is required than is revealed by an analysis of the crop. Experimental results would indicate that a fertilizer carrying 30 pounds of nitrogen, 50 pounds of phosphoric acid, and 50 pounds of potash, should be furnished annually to the average orchard in bearing; one producing about 100 barrels per acre. To supply these requirements 200 pounds of nitrate of soda, or sulphate of ammonia, 300 pounds of acid phosphate, or slag, and 100 pounds of muriate of potash per acre—giving 30 pounds of nitrogen, 48 pounds of phosphorus and 50 pounds of potash, or approximately a 5-8-8 fertilizer (one containing 5 per cent. of nitrogen, 8 per cent. of phosphorus, and 8 per cent. of potash) applied at the rate of 600 pounds per acre is advised.

Of the above elements nitrogen is the most expensive, costing 22 cents per pound, valuing nitrate of soda (15 per cent. nitrogen) at \$66 per ton. Phosphorus, either in acid phosphate or basic slag, costs 7 1/2 cents per pound, valuing acid phosphate or slag (16 per cent. phosphorus) at \$24 per ton. Potash in muriate of potash (50 per cent. potash), valuing it at \$30 per ton, costs 5 cents per pound. On this basis the fertilizer advised above per acre would cost for nitrogen \$6.60; phosphorus, \$3.60; and potash \$2.50, a total of \$12.70 per acre.

Nitrate of soda seems to be the most valuable nitrogenous fertilizer, due to the fact that it is quickly available and gives the fruit tree the needed nitrate early in the spring when growth should be most active and when available soil nitrates are less than at any other time. Experimental evidence supports the practice

of applying nitrate of soda early in May, and not later than the 15th, thus giving a vigorous start to the early spring growth. There is some evidence to show that 200 pounds per acre in the early spring may not be too large an application. It is possible, however, that this amount applied late may produce too active vegetative growth if used on soils in a good state of fertility, thus tending to carry too great a growth into the summer. This possibility of course would be largely overcome by a cover crop to take up the excess of plant food and bring about an earlier and better maturity of fruit and tree. When applying nitrate of soda to a mature orchard of 40 trees per acre, five pounds per tree is considered ample. If trees are variable in size and vigor judgment should be exercised, as, in order to bring about average vigor, some trees should be fed less and others more than that generally advised. It may be stated that an application of one ounce to a square yard is equal to 300 pounds per acre; and that if a pound of nitrate of soda is applied to a tree with a spread of 13 feet in diameter, the tree is getting this material at the rate of approximately 300 pounds per acre.

It is difficult to measure the influence of phosphatic and potassic fertilizers, their effect being less marked than that of nitrate of soda. However, it is well known from experiments with other plants that a properly balanced fertilizer ultimately gives the best product. There is no doubt that nitrogen is the most important factor in relation to fruitfulness, yet there is a possibility that nitrogen used to excess, with a shortage of potash and phosphorus, may result in a fruit product less resistant to the effect of handling and transportation. Nitrate of soda or sulphate of ammonia, acid phosphate

LOCAL AND GENERAL

FAGIN-McGILLIVRAY

Stove repairs ordered for any range.

MORASH FOUNDRY

Mrs. F. W. Sherman and son John spent Easter in Prescott.

Miss Grace Gilhard spent the week end holiday in Montreal.

Mr. Arthur Clay, Toronto, spent Easter in town.

Mrs. F. Hawkes is spending the week with friends in Ottawa.

Mrs. Alex. Thom returned home recently from Toronto.

Mrs. Farrer left on Friday last to spend a few weeks in Toronto.

Mr. Fred Nash spent Easter at his home here.

Mrs. Fred Cassell left the first of the week for Vancouver, B.C.

Mr. J. T. Jarvis, Montreal, spent the holiday with his family.

Mr. S. G. Finnie spent Tuesday in Cornwall.

Mrs. J. P. Gormely spent a few days in Montreal this week.

Why blister your chest until it is raw, when Williams' Camphorated Mustard Cream takes out the soreness, loosens the stiffness and leaves the skin as soft and smooth as a baby's. 35c a jar at druggists.

Real bargains—10-inch double-sided Victor Records at 40 cents each. Also Victor Red Seal Records at greatly reduced prices. We must clear out this stock. Come up stairs and save money.—J. Miles Whitteker.

Mr. and Mrs. F. Fentiman, Ottawa spent a couple of days with Mrs. A. J. Harrison, this week.

Mr. and Mrs. E. Coons and daughter of Ottawa are spending the week with Mr. and Mrs. A. A. Brown.

Mr. Andrew Barr was called to Cleveland on Wednesday owing to the death of his mother.

Mrs. McLean of Ottawa spent the Easter holiday at the home of Mr. and Mrs. O. B. Beckstead.

Miss Georgina Stetham of Cardinal is the guest of Miss Florence Oudekirk this week.

Mrs. Wm. Houston of Brockville spent Easter with her parents, Arch deacon and Mrs. Carson.

Mrs. McRae of Ottawa spent a few days with Miss G. D. Merkley this week.

Mrs. D. T. Henderson and daughter, Roberta are spending the holiday in Montreal.

Miss Jean Meikle of Toronto is spending her holidays at her home here.

Miss Ida Daley, Montreal, spent the week end with her parents recently.

Mr. Fraser Weegar, Lennoxville, Que., is spending his holidays at his home here.

Mr. and Mrs. E. A. Smith and family left for Vancouver on Monday, where they will reside.

Miss Lucille Wallace of Montreal spent the week-end with Miss Audrey Allison.

Mrs. D. D. Irvine, Inkerman, is spending a few days here at her home.

Mr. John Barkley, Montreal, spent the week-end with his father, Mr. S. E. Barkley.

Mrs. W. G. Beckstead left on Friday noon for Port Arthur, where she will spend a few weeks with her daughter, Mrs. McEwen.

Miss Mary and Genevieve McDonald are spending a few days in Prescott.

"Lest You Forget, We say it Yet" Williams' Camphorated Mustard Cream soothes away soreness and stiffness, relieves lumbago and neuralgia, and does not blister the skin. At your druggist's, 35c a jar.

Mr. Jesse Casselman who underwent a serious operation in the Brockville General Hospital, is improving as well as can be expected.

Rev. John A. McDonald of Kingston will conduct services at Knox Church, Morrisburg, on Sunday, April 8th, at the usual hours.

Mrs. Wm. Allison has returned home after spending a week visiting her daughter, Mrs. Wilson in Valleyfield, Que.

Mrs. Leslie Holmes and little daughter of Ottawa are spending the week with her parents, Mr. and Mrs. W. T. Armstrong.

Mrs. Clarke Hyndman of Mount, spent a few days this week the guest of Mr. Rob. and Miss Sadie Armstrong.

A very pretty wedding was solemnized at St. Mary's Church, Morrisburg, on Wednesday, April 3rd, 1923, at 6 a.m., when Rev. Father Meagher united in marriage, Mr. Edward Francis Fagin, son of Mr. Thos. Fagin of Cornwall, and Miss Mary, Elizabeth McGillivray, daughter of Mrs. Peter McGillivray of this town. After the ceremony the party drove to the home of the bride's mother, where breakfast was served, after which they boarded the 7:28 train for Toronto and Niagara, and will also spend a week in Buffalo, the guests of the bride's uncle, Mr. A. B. McGillivray. Mr. and Mrs. Fagin will reside in Cornwall. The Leader joins with their many friends in extending congratulations.

MRS. ALEX. SHANNETTE SR.

The community of Williamsburg mourns the death of a highly respected and beloved citizen in the person of Mrs. Alex. Shannette Sr., who passed from death into Life on Tuesday April 4th, 1923, at her home near Williamsburg, at the good old age of eighty-three years. She suffered from a slight paralytic stroke a week before her death from which she never regained consciousness. The world is darker to day for the passing of Mrs. Shannette, but the anticipation of the great resurrection morn is the brighter.

Deepest sympathy is extended to her aged life partner and family—four daughters and three sons—Miss Lucy and Roland at home, Miss Alice of Brockville, Miss Kate of Athens, Mrs. Ida Coughler of Williamsburg, Alex Jr. and Joe of Williamsburg. The funeral service was held at the house on Thursday afternoon.

Mrs. H. H. Bradfield left on Monday for Welland, Ont. to spend a few weeks with her daughter, Mrs. C. Mathewson.

Mrs. Ralph Kilgour, Beauharnois, Miss Isabel Eager, Ottawa, and Mr. Spencer Eager, Lennoxville, spent Easter with their father, Mr. Wm. Eager.

Messrs. Ken. and Raymond Malen, who have been playing hockey with Brantford and Belleville, are home for a few weeks.

Donald, the little son of Mrs. Maude Lawless, spent last Thursday in town with his mother.

Mr. and Mrs. Herb Houlahan of Toys Hill, were guests of relatives in town on Sunday.

With over 60 new cases of the disease reported since the first of the week, the typhoid epidemic which has the town of Cornwall in its grip shows no signs of abating.

Mr. J. L. Casselman, chairman of the local Board of Education, is attending the meeting of the Ontario Educational Association held in Toronto this week.

C. A. Larabee of Iroquois, has been appointed bailiff of the sixth division court of the united counties of Stormont, Dundas and Glengarry.

By a proclamation to be issued this week, June 4th this year will be observed in Canada as the birthday of his Majesty King George V. June 3 this year falls on a Sunday.

Miss Elda Epaugh and Mr. Garfield Cottrell of Cornwall spent Easter with Mr. and Mrs. John Loucks.

Mr. Russell Strader and daughter Dorothy of Cardinal spent the Easter holidays with the latter's grand, parents, Mr. and Mrs. John Courtney.

It pays to advertise in The Leader for the very next day after the first publication of my ad. "To Rent my Farm," I received a satisfactory tenant. So please do not publish any further notice.—W. R. Prunner.

Mr. and Mrs. Wm. Houlahan who have spent the winter with their daughter Mrs. J. O. Marchand at Lake Side, Quebec, after spending the week-end with relatives in town, left Monday morning for Chicago where they expect to remain for some time with the former's sister, Dr. Brown of that city.

"The Missing Miss Miller" will be presented in 3 Acts by St. Luke's Luther League, Dunbar, Thursday, April 12th, 8 p.m. Adults 35c, children 20c. Come and enjoy a good laugh.

Here is a snap for a quick buyer—one small frame business stand \$900; one small brick business stand \$1200. These buildings are centrally located in the business centre of Main street, Morrisburg, and must be sold in thirty days. Farmers requiring money on real estate call and see me. My terms are easy. All business strictly confidential.—J. A. Riddell.

Rev. Father Fleming, parish priest at Wolfe Island, has been transferred to Kemptonville, and will begin his duties there about April 15th. It is understood that Rev. Father McKernan of Kemptonville will succeed Father Fleming at Wolfe Island.

Experience a sad teacher—This is very often the case, but like all rules has exceptions, and one of the exceptions is the experience of the person who uses Williams' Camphorated Mustard Cream for chest colds, sore throat, stiff neck or many of the prevailing aches and pains. It's really splendid, too, for children. Not expensive, 35c a jar. Your dealer has it.

A COMPLETE NEW STOCK

AFTER OUR BIG SALE

Most everything in our store is new. Through careful buying, for cash only, we were able to procure all new goods at remarkably low prices, which we will turn over to the public at Bargains that will equal those which we have been handing out during the last three weeks of our Big Sale. Come in and see the new goods.
